# 1 Getting started

## 1.1 About this guide

This document describes the commands available in the MD-CLI that can be used to manage the router.

For a list of unsupported features by platform and chassis, see the *SR OS R23.x.Rx Software Release Notes*, part number 3HE 19269 000x TQZZA.

Command outputs shown in this guide are examples only; actual output may differ depending on supported functionality and user configuration.

**Note:**

This guide generically covers Release 23.x.Rx content and may contain some content that will be released in later maintenance loads. In addition, some SR OS features are platform-specific and may not be available or visible on all platforms. See the *SR OS R23.x.Rx Software Release Notes*, part number 3HE 19269 000x TQZZA, for information about the supported features and applicable platforms in each load of the Release 23.x.Rx software.

To access the configuration statements within the MD-CLI, the MD-CLI engine must be enabled and the configuration mode must be **mixed** or **model-driven**. For information about using the MD-CLI, see the *7450 ESS, 7750 SR, 7950 XRS, and VSR MD-CLI User Guide*.

## 1.2 Platforms and terminology

**Note:**

Unless explicitly noted otherwise, this guide uses the terminology defined in the following table to collectively designate the specified platforms.

*Table 1: Platforms and terminology*

Platform	Collective platform designation
7450 ESS-7	All
7450 ESS-12	
7750 SR-1	
7750 SR-1-24D	
7750 SR-1-46S	
7750 SR-1-48D	
7750 SR-1-92S	
7750 SR-1x-48D	

Platform	Collective platform designation
7750 SR-1x-92S	
7750 SR-7	
7750 SR-12	
7750 SR-12e	
7750 SR-a4	
7750 SR-a8	
7750 SR-1e	
7750 SR-2e	
7750 SR-3e	
7750 SR-1s	
7750 SR-1se	
7750 SR-2s	
7750 SR-2se	
7750 SR-7s	
7750 SR-14s	
7950 XRS-20	
7950 XRS-20e	
7950 XRS-40	
VSR	
VSR-NRC	
7450 ESS-7	7450 ESS
7450 ESS-12	
7750 SR-1	7750 SR
7750 SR-1-24D	
7750 SR-1-46S	
7750 SR-1-48D	
7750 SR-1-92S	
7750 SR-1x-48D	
7750 SR-1x-92S	
7750 SR-7	

Platform	Collective platform designation
7750 SR-12	
7750 SR-12e	
7750 SR-7	7750 SR-7/12/12e
7750 SR-12	
7750 SR-12e	
7750 SR-7	7750 SR-7/12
7750 SR-12	
7750 SR-a4	7750 SR-a
7750 SR-a8	
7750 SR-1e	7750 SR-e
7750 SR-2e	
7750 SR-3e	
7750 SR-1s	7750 SR-s
7750 SR-1se	
7750 SR-2s	
7750 SR-2se	
7750 SR-7s	
7750 SR-14s	
7950 XRS-20	7950 XRS
7950 XRS-20e	
7950 XRS-40	
VSR	VSR
VSR-NRC	

## 1.3 Conventions

This section describes the general conventions used in this guide.

### 1.3.1 Precautionary and information messages

The following information symbols are used in the documentation.

**DANGER:** Danger warns that the described activity or situation may result in serious personal injury or death. An electric shock hazard could exist. Before you begin work on this equipment, be aware of hazards involving electrical circuitry, be familiar with networking environments, and implement accident prevention procedures.

**WARNING:** Warning indicates that the described activity or situation may, or will, cause equipment damage, serious performance problems, or loss of data.

**Caution:** Caution indicates that the described activity or situation may reduce your component or system performance.

**Note:** Note provides additional operational information.

**Tip:** Tip provides suggestions for use or best practices.

### 1.3.2 Options or substeps in procedures and sequential workflows

Options in a procedure or a sequential workflow are indicated by a bulleted list. In the following example, at step 1, the user must perform the described action. At step 2, the user must perform one of the listed options to complete the step.

#### Example: Options in a procedure

1. User must perform this step.
2. This step offers three options. User must perform one option to complete this step.
  - This is one option.
  - This is another option.
  - This is yet another option.

Substeps in a procedure or a sequential workflow are indicated by letters. In the following example, at step 1, the user must perform the described action. At step 2, the user must perform two substeps (a. and b.) to complete the step.

#### Example: Substeps in a procedure

1. User must perform this step.
2. User must perform all substeps to complete this action.
  - a. This is one substep.
  - b. This is another substep.

## 1.4 MD-CLI command reference

## 1.4.1 MD-CLI tree hierarchy

Table 2: Command syntax symbols

Symbol	Description
	A vertical bar represents an “or” condition, indicating that only one of the parameters in the brackets or parentheses can be selected.
()	Parentheses indicate that one of the parameters must be selected.
[]	Brackets indicate optional parameters.
Bold	Commands in <b>bold</b> indicate commands and keywords.
Italic	Commands in <i>italics</i> indicate that you must enter text for the parameter.

In the following examples, **location** and **graceful-shutdown** are command names. For the **location** command, *keyword* must be one of the keywords **cf1**, **cf2**, or **cf3**. For the **graceful-shutdown** command, *boolean* must be one of the keywords **true** or **false**, although explicitly using the keyword **true** is optional.

```
location keyword
keyword - (cf1 | cf2 | cf3)

graceful-shutdown boolean
boolean - (true | false)
```

The configuration branch of the MD-CLI shows the commands and parameters (also known as elements) that are available, shown in a hierarchical structure as in the following figure.

Figure 1: MD-CLI configuration tree example

```

configure
- cflowd
- active-flow-timeout number
- admin-state keyword
- analyze-gre-payload boolean
- analyze-l2tp-traffic boolean
- analyze-v4overv6-traffic boolean
- apply-groups reference
- apply-groups-exclude reference
- cache-size number
- collector (ipv4-address-no-zone | ipv6-address-no-zone) port number
- admin-state keyword
- aggregation
- as-matrix boolean
- destination-prefix boolean
- protocol-port boolean
- raw boolean
- source-destination-prefix boolean
- source-prefix boolean
- apply-groups reference
- apply-groups-exclude reference
- autonomous-system-type keyword
- description string
- export-filter
- family
- ipv4 boolean
- ipv6 boolean
- l2-ip boolean
- mcast-ipv4 boolean
- mcast-ipv6 boolean
- mpls boolean
- interface-list
- router reference interface-name reference
- service

```

sw4113

The **configure** context is the root level of the configuration branch within the configuration mode in the MD-CLI. Each chapter of this guide describes a configuration branch in the MD-CLI configuration tree.

Commands are linked to their command descriptions in the configuration tree with some exceptions (for example, to reduce repeated content), including the **apply-groups**, **apply-groups-exclude**, and **groups** commands. These commands are used to direct the use of configuration templates called configuration groups in the configure region at all configuration levels. The **apply-groups** command applies a configuration group at a configuration level and the **apply-groups-exclude** command excludes a configuration group at a configuration level. See "Using configuration groups" in the *7450 ESS, 7750 SR, 7950 XRS, and VSR MD-CLI User Guide* for more information.

Some commands require one or more keys to be entered with the command. For example, the **collector** command has two keys which must be entered: the IP address and the port number. The key name for the IP address (**ip-address**) is optional, however, the key name **port** must be entered before the port number.

```
- collector (ipv4-address-no-zone | ipv6-address-no-zone) port number
```

The command description indicates the required syntax for each command. See [MD-CLI command descriptions](#) for more information.

**collector** [**ip-address**] (*ipv4-address-no-zone* | *ipv6-address-no-zone*) **port** *number*

Italicized names after a command or parameter name indicate the parameter type. The parameter types include (but are not limited to):

- Boolean (true and false values)
- keyword (enumerated values)
- string

- number
- IPv4 address
- IPv6 address
- MAC address

The **summary-only** parameter, for example, requires a Boolean value. The **autonomous-system** parameter requires a number. For more information about the input values, click the command or parameter name from the MD-CLI tree to be linked to the command description.

```
- summary-only boolean
- autonomous-system number
```

A parameter type may also be a combination of different base types. These parameters are displayed in the MD-CLI tree with the individual parameter types enclosed in round brackets (()), separated by a vertical bar (|). For example, the **indirect** parameter can be configured with either an IPv4 address or IPv6 address:

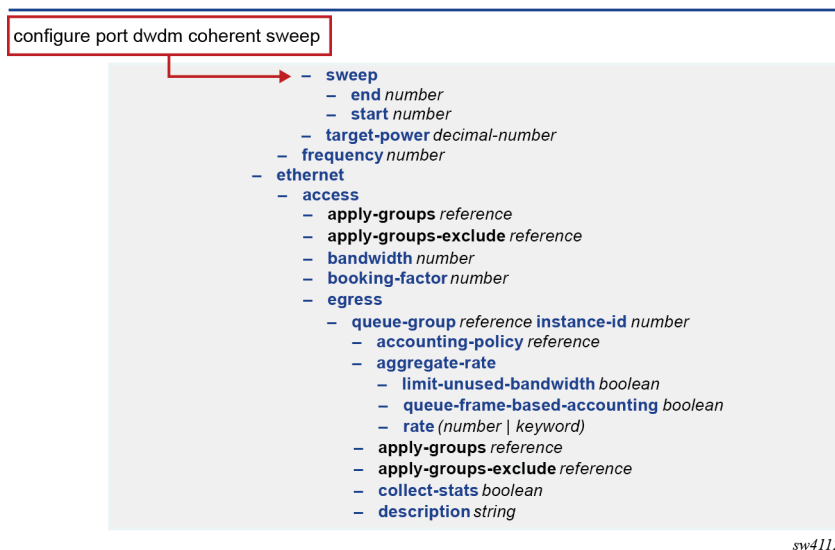

```
- indirect (ipv4-address-no-zone | ipv6-address-no-zone)
```

Allowed values in strings are printable, 7-bit ASCII characters. If the string contains special characters (#, \$, spaces, and so on), the entire string must be enclosed within double quotation marks. Double quotation marks within a string are not supported.

### 1.4.1.1 Context path

In the CLI tree section, a contextual path at the top of a page refers to the full context of the first command on the page, as shown in the following figure.

Figure 2: Command tree navigation

## 1.4.2 MD-CLI command descriptions

The command syntax is shown in the command description, where the command is displayed in bold, followed by any key names and a type. From the MD-CLI tree, the **configure log accounting-policy** command shows that the key for the command is a number:

```
- log
  - accounting-policy number
```

The command description for **accounting-policy** shows that the key for the command is a policy identifier:

**accounting-policy** [**policy-id**] *number*

The square brackets ([ ]) indicate that the **policy-id** key name is optional. From the **policy-id** command description, the range of the identifier is a number from 1 to 99. Therefore, when using the **accounting-policy** command, the following inputs are acceptable:

```
accounting-policy policy-id 15
accounting-policy 25
accounting-policy 1
accounting-policy policy-id 99
```

The following table describes the fields that may be displayed for a command. Not all fields are applicable for all commands.

Table 3: Command descriptions fields

Field	Description
Element Name	Name of the element (command or parameter) and its syntax
Synopsis	Summary description of the element
Context	Full path to the command (with links to parent commands)
Tree	Link to the command in the CLI tree. For key elements, the link is to the parent element.
Description	Detailed description of the element, as needed
String Length	For string elements, the range of the number of characters allowed
Range/Max. Range	For number elements, the range of allowed values. A maximum range may be overridden by a platform-specific range.
Units	Base unit type of the element
Options	Enumerated values allowed for the element. Not all options are available on all platforms.
MD-CLI Default	MD-CLI default value for the element

Field	Description
Default	YANG default value when there is no MD-CLI default. Platform-specific defaults are not displayed.
Reference	Reference to an element instance in the configuration or state datastore
Min./Max. Instances	For lists and leaf-lists, the minimum or maximum number of instances for this element
Notes	Information about special attributes of the element, including whether the element is: <ul style="list-style-type: none"> <li>• a key for an element</li> <li>• mandatory</li> <li>• ordered by the user (instead of by the system)</li> <li>• part of a choice of elements</li> </ul>
Introduced	Release in which the element was introduced
Deprecated	Release in which the element was deprecated
Platforms	Hardware platforms on which the element is available. See <a href="#">Platforms and terminology</a> for more information about the platforms. <p> <b>Note:</b> Some SR OS features are platform-specific and therefore may not be available or visible on all platforms. See the <i>SR OS R23.x.Rx Software Release Notes</i>, part number 3HE 19269 000x TQZZA, for information about platform support.</p>

A description of the element is also available from the online help for the element. For information about using the online help in the MD-CLI, see the *7450 ESS*, *7750 SR*, *7950 XRS*, and *VSR MD-CLI User Guide*.

**Note:**

All options for enumerated types and numerical ranges are listed in the MD-CLI command descriptions, however, not all options or ranges are valid on all platforms.

## 2 Operational commands

This section lists the commands available at the operation level of the MD-CLI.

## 2.1 admin commands

The **admin** commands are used to perform administrative functions, such as displaying configuration that is not subject to AAA, manually saving the configuration, clearing user sessions, and rebooting the system.

```

admin
- application-assurance
  - group reference
    - url-list reference
      - upgrade
  - upgrade
- clear
  - security
    - lockout
      - all
      - user string
    - password-history
      - all
      - user string
- disconnect
  - address (ipv4-address-no-zone | ipv6-address-no-zone)
  - op-table-bypass boolean
  - session-id number
  - session-type keyword
  - username string
- ipsec
  - show
    - key
      - gateway string
      - ip-tunnel string
      - ipsec-tunnel string
      - peer-tunnel-ip-address (ipv4-address-no-zone | ipv6-address-no-zone)
      - peer-tunnel-port number
      - type keyword
- nat
  - save-deterministic-script
- reboot
  - [card] keyword
  - hold
  - now
- redundancy
  - force-switchover
    - ignore-status
    - now
  - synchronize
    - boot-environment
    - certificate
    - configuration
- satellite
  - ethernet-satellite reference
    - reboot
      - now
      - upgrade
    - synchronize
    - tech-support
      - [url] string
- save
  - bof
  - configure
  - debug
  - li

```

## admin save [url]

```

- [url] string
- set
- time
  - [system-time] string
- show
- configuration
  - bof
  - booted
  - cflash-id string
  - [cli-path] string
  - configure
  - debug
  - depth number
  - detail
  - flat
  - full-context
  - intended
  - json
  - li
  - running
  - units
  - xml
- support-mode
- password
  - kernel string
  - shell string
- system
- license
  - activate
    - [file-url] string
    - now
  - clear
    - now
  - validate
    - [file-url] string
- management-interface
- commit
  - confirmed
    - accept
    - cancel
- operations
  - delete-operation
    - [delete-id] number
    - op-table-bypass boolean
  - stop-operation
    - op-table-bypass boolean
    - [stop-id] number
- security
- hash-control
  - custom-hash
    - algorithm keyword
    - key string
  - remove-custom-hash
- pki
- clear-ocsp-cache
  - [entry-id] number
- cmpv2
  - cert-request
    - ca-profile reference
    - current-certificate string
    - current-key string
    - domain-name string
    - hash-algorithm keyword
    - ip-address (ipv4-address-no-zone | ipv6-address-no-zone)

```

## admin system security pki cmpv2 cert-request new-key

```

    - new-key string
    - save-as string
    - subject-dn string
  - clear-request
    - ca-profile reference
  - initial-registration
    - ca-profile reference
    - certificate string
    - domain-name string
    - hash-algorithm keyword
    - ip-address (ipv4-address-no-zone | ipv6-address-no-zone)
    - key-to-certify string
    - password string
    - protection-key string
    - reference string
    - save-as string
    - send-chain
    - subject-dn string
    - with-ca reference
  - key-update
    - ca-profile reference
    - hash-algorithm keyword
    - new-key string
    - old-certificate string
    - old-key string
    - save-as string
  - poll
    - ca-profile reference
  - convert-file
    - force
    - format keyword
    - [input-file] string
    - [output-file] string
  - crl-update
    - ca-profile reference
  - est
    - ca-certificates
    - est-profile string
    - force
    - output-url string
  - enroll
    - domain-name string
    - est-profile string
    - force
    - hash-algorithm keyword
    - ip-address (ipv4-address-no-zone | ipv6-address-no-zone)
    - key string
    - output-file string
    - subject-dn string
    - validate-certificate-chain
  - renew
    - certificate string
    - est-profile string
    - force
    - hash-algorithm keyword
    - key string
    - output-file string
    - validate-certificate-chain
  - export
    - format keyword
    - input-file string
    - key-file string
    - output-url string
    - password string

```

## admin system security pki export type

```

- type keyword
- generate-csr
  - domain-name string
  - hash-algorithm keyword
  - ip-address (ipv4-address-no-zone | ipv6-address-no-zone)
  - key-url string
  - output-url string
  - subject-dn string
  - use-printable
- generate-keypair
  - dsa-key-size number
  - ecdsa-curve keyword
  - rsa-key-size number
  - [save-path] string
- import
  - format keyword
  - input-url string
  - output-file string
  - password string
  - type keyword
  - validate-certificate-chain
- reload
  - application keyword
  - certificate string
  - key string

  - card reference
  - confirmation-code string
  - serial-number string
- update-key
  - card reference
  - confirmation-code string
  - serial-number string
  - software-image string
- validate
  - software-image string
- system-password
  - admin-password
- telemetry
  - grpc
    - cancel
    - all
    - subscription-id number
- tech-support
  - [url] string

```

## 2.1.1 admin command descriptions

### admin

Synopsis	Enter the administrative context for system operations
Context	<a href="#">admin</a>
Tree	<a href="#">admin</a>
Introduced	16.0.R1
Platforms	All

### application-assurance

Synopsis	Enter the <b>application-assurance</b> context
Context	<a href="#">admin application-assurance</a>
Tree	<a href="#">application-assurance</a>
Description	Commands in this context configure Application Assurance (AA) upgrade and AA group upgrade operations.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### group [[aa-group-id](#)] *reference*

Synopsis	Enter the <b>group</b> list instance
Context	<a href="#">admin application-assurance group reference</a>
Tree	<a href="#">group</a>
Description	Commands in this context configure the attributes of the group-specific upgrade.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### [\[aa-group-id\]](#) *reference*

Synopsis	AA group ID
Context	<a href="#">admin application-assurance group reference</a>
Tree	<a href="#">group</a>
Reference	<b>state application-assurance group</b> <i>number</i>

Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **url-list** [[url-list-name](#)] *reference*

Synopsis	Enter the <b>url-list</b> list instance
Context	<a href="#">admin application-assurance group reference url-list reference</a>
Tree	<a href="#">url-list</a>
Description	Commands in this context configure the URL list upgrade parameters.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **[url-list-name]** *reference*

Synopsis	AA URL list name
Context	<a href="#">admin application-assurance group reference url-list reference</a>
Tree	<a href="#">url-list</a>
Reference	<b>state application-assurance group number url-list string</b>
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **upgrade**

Synopsis	Upgrade the referenced URL list
Context	<a href="#">admin application-assurance group reference url-list reference upgrade</a>
Tree	<a href="#">upgrade</a>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **upgrade**

Synopsis	Upgrade to a new isa-aa.tim file
Context	<a href="#">admin application-assurance upgrade</a>

---

Tree	<a href="#">upgrade</a>
Description	This command loads a new isa-aa.tim file as part of a router-independent signature upgrade. An AA ISA reboot is required for the upgrade to take effect.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## clear

Synopsis	Enter the <b>clear</b> context
Context	<a href="#">admin clear</a>
Tree	<a href="#">clear</a>
Introduced	19.10.R1
Platforms	All

## security

Synopsis	Enter the <b>security</b> context
Context	<a href="#">admin clear security</a>
Tree	<a href="#">security</a>
Introduced	19.10.R1
Platforms	All

## lockout

Synopsis	Reset the lockout timer
Context	<a href="#">admin clear security lockout</a>
Tree	<a href="#">lockout</a>
Introduced	19.10.R1
Platforms	All

## all

Synopsis	Clear lockout of all users
Context	<a href="#">admin clear security lockout all</a>
Tree	<a href="#">all</a>

---

Notes	The following elements are part of a mandatory choice: <b>all</b> or <b>user</b> .
Introduced	19.10.R1
Platforms	All

### **user string**

Synopsis	User to be cleared of lockout
Context	<a href="#">admin clear security lockout user string</a>
Tree	<a href="#">user</a>
String Length	1 to 32
Notes	The following elements are part of a mandatory choice: <b>all</b> or <b>user</b> .
Introduced	19.10.R1
Platforms	All

### **password-history**

Synopsis	Clear the password history
Context	<a href="#">admin clear security password-history</a>
Tree	<a href="#">password-history</a>
Introduced	19.10.R1
Platforms	All

### **all**

Synopsis	Clear password history of all users
Context	<a href="#">admin clear security password-history all</a>
Tree	<a href="#">all</a>
Notes	The following elements are part of a mandatory choice: <b>all</b> or <b>user</b> .
Introduced	19.10.R1
Platforms	All

### **user string**

Synopsis	User to be cleared of password history information
Context	<a href="#">admin clear security password-history user string</a>

Tree	<a href="#">user</a>
String Length	1 to 32
Notes	The following elements are part of a mandatory choice: <b>all</b> or <b>user</b> .
Introduced	19.10.R1
Platforms	All

## disconnect

Synopsis	Disconnect a user session
Context	<a href="#">admin disconnect</a>
Tree	<a href="#">disconnect</a>
Introduced	16.0.R1
Platforms	All

## address (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	IP address of the session to disconnect
Context	<a href="#">admin disconnect address</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	<a href="#">address</a>
Introduced	19.10.R1
Platforms	All

## op-table-bypass *boolean*

Synopsis	Avoid operation ID allocation
Context	<a href="#">admin disconnect op-table-bypass</a> <i>boolean</i>
Tree	<a href="#">op-table-bypass</a>
Description	When configured to <b>true</b> , the system bypasses the YANG-based operations infrastructure and avoids the allocation of an operation ID. This is useful if the global operations table is full and a delete operation or <b>admin disconnect</b> is required.
Introduced	21.5.R1
Platforms	All

## session-id *number*

Synopsis	ID of the session to disconnect
----------	---------------------------------

---

Context	<a href="#">admin disconnect session-id</a> <i>number</i>
Tree	<a href="#">session-id</a>
Range	1 to 4294967295
Introduced	16.0.R1
Platforms	All

### **session-type** *keyword*

Synopsis	Type of session to disconnect
Context	<a href="#">admin disconnect session-type</a> <i>keyword</i>
Tree	<a href="#">session-type</a>
Options	console, bluetooth, telnet, ssh, ftp, netconf, grpc, cron-ehs
Introduced	19.10.R1
Platforms	All

### **username** *string*

Synopsis	Username to disconnect
Context	<a href="#">admin disconnect username</a> <i>string</i>
Tree	<a href="#">username</a>
String Length	1 to 32
Introduced	19.10.R1
Platforms	All

### **ipsec**

Synopsis	Perform IPsec operations
Context	<a href="#">admin ipsec</a>
Tree	<a href="#">ipsec</a>
Introduced	23.10.R1
Platforms	All

### **show**

Synopsis	Display IPsec information
----------	---------------------------

Context	<a href="#">admin ipsec show</a>
Tree	<a href="#">show</a>
Introduced	23.10.R1
Platforms	All

## key

Synopsis	Display IPsec key history
Context	<a href="#">admin ipsec show key</a>
Tree	<a href="#">key</a>
Introduced	23.10.R1
Platforms	All

## gateway *string*

Synopsis	IPsec gateway name
Context	<a href="#">admin ipsec show key gateway <i>string</i></a>
Tree	<a href="#">gateway</a>
String Length	1 to 32
Notes	The following elements are part of a mandatory choice: ( <b>gateway</b> , <b>peer-tunnel-ip-address</b> , and <b>peer-tunnel-port</b> ), <b>ip-tunnel</b> , or <b>ipsec-tunnel</b> .
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## ip-tunnel *string*

Synopsis	IPsec transport mode IP tunnel name
Context	<a href="#">admin ipsec show key ip-tunnel <i>string</i></a>
Tree	<a href="#">ip-tunnel</a>
String Length	1 to 32
Notes	The following elements are part of a mandatory choice: ( <b>gateway</b> , <b>peer-tunnel-ip-address</b> , and <b>peer-tunnel-port</b> ), <b>ip-tunnel</b> , or <b>ipsec-tunnel</b> .
Introduced	23.10.R1
Platforms	All

**ipsec-tunnel *string***

Synopsis	IPsec tunnel name
Context	<a href="#">admin ipsec show key ipsec-tunnel <i>string</i></a>
Tree	<a href="#">ipsec-tunnel</a>
String Length	1 to 32
Notes	The following elements are part of a mandatory choice: ( <b>gateway</b> , <b>peer-tunnel-ip-address</b> , and <b>peer-tunnel-port</b> ), <b>ip-tunnel</b> , or <b>ipsec-tunnel</b> .
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**peer-tunnel-ip-address (*ipv4-address-no-zone* | *ipv6-address-no-zone*)**

Synopsis	Dynamic tunnel IP address
Context	<a href="#">admin ipsec show key peer-tunnel-ip-address (<i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i>)</a>
Tree	<a href="#">peer-tunnel-ip-address</a>
Notes	The following elements are part of a mandatory choice: ( <b>gateway</b> , <b>peer-tunnel-ip-address</b> , and <b>peer-tunnel-port</b> ), <b>ip-tunnel</b> , or <b>ipsec-tunnel</b> .
Introduced	23.10.R1
Platforms	All

**peer-tunnel-port *number***

Synopsis	Dynamic tunnel port
Context	<a href="#">admin ipsec show key peer-tunnel-port <i>number</i></a>
Tree	<a href="#">peer-tunnel-port</a>
Range	0   1 to 65535
Notes	The following elements are part of a mandatory choice: ( <b>gateway</b> , <b>peer-tunnel-ip-address</b> , and <b>peer-tunnel-port</b> ), <b>ip-tunnel</b> , or <b>ipsec-tunnel</b> .
Introduced	23.10.R1
Platforms	All

**type *keyword***

Synopsis	Key type
Context	<a href="#">admin ipsec show key type <i>keyword</i></a>

Tree	<a href="#">type</a>
Options	ike, child
Notes	This element is mandatory.
Introduced	23.10.R1
Platforms	All

## nat

Synopsis	Enter the <b>nat</b> context
Context	<a href="#">admin nat</a>
Tree	<a href="#">nat</a>
Introduced	21.2.R1
Platforms	All

## save-deterministic-script

Synopsis	Save script that computes deterministic NAT map entries
Context	<a href="#">admin nat save-deterministic-script</a>
Tree	<a href="#">save-deterministic-script</a>
Introduced	21.2.R1
Platforms	All

## reboot

Synopsis	Reboot CPM or force an upgrade of system boot ROMs
Context	<a href="#">admin reboot</a>
Tree	<a href="#">reboot</a>
Introduced	16.0.R1
Platforms	All

## [card] keyword

Synopsis	Card to reboot
Context	<a href="#">admin reboot [card] keyword</a>
Tree	<a href="#">[card]</a>

---

Options	active, standby, upgrade
Introduced	16.0.R1
Platforms	All

## hold

Synopsis	Hold a rebooted standby CPM from coming back online
Context	<a href="#">admin reboot hold</a>
Tree	<a href="#">hold</a>
Introduced	19.10.R1
Platforms	7750 SR-7s, 7750 SR-14s, VSR

## now

Synopsis	Reboot immediately without prompts or confirmation
Context	<a href="#">admin reboot now</a>
Tree	<a href="#">now</a>
Introduced	16.0.R1
Platforms	All

## redundancy

Synopsis	Enter the <b>redundancy</b> context
Context	<a href="#">admin redundancy</a>
Tree	<a href="#">redundancy</a>
Introduced	16.0.R1
Platforms	All

## force-switchover

Synopsis	Force a switchover to the standby CPM
Context	<a href="#">admin redundancy force-switchover</a>
Tree	<a href="#">force-switchover</a>
Introduced	16.0.R1
Platforms	All

## ignore-status

Synopsis	Switch to the standby CPM regardless of its status
Context	<a href="#">admin redundancy force-switchover ignore-status</a>
Tree	<a href="#">ignore-status</a>
Introduced	19.10.R1
Platforms	7950 XRS

## now

Synopsis	Force the switchover to the standby CPM immediately
Context	<a href="#">admin redundancy force-switchover now</a>
Tree	<a href="#">now</a>
Introduced	16.0.R1
Platforms	All

## synchronize

Synopsis	Synchronize the standby CPM
Context	<a href="#">admin redundancy synchronize</a>
Tree	<a href="#">synchronize</a>
Introduced	20.10.R1
Platforms	All

## boot-environment

Synopsis	Synchronize all files required for the boot process
Context	<a href="#">admin redundancy synchronize boot-environment</a>
Tree	<a href="#">boot-environment</a>
Notes	The following elements are part of a mandatory choice: <b>boot-environment</b> , <b>certificate</b> , or <b>configuration</b> .
Introduced	20.10.R1
Platforms	All

## certificate

Synopsis	Synchronize imported certificate, key, and CRL files
Context	<a href="#">admin redundancy synchronize certificate</a>
Tree	<a href="#">certificate</a>
Notes	The following elements are part of a mandatory choice: <b>boot-environment</b> , <b>certificate</b> , or <b>configuration</b> .
Introduced	23.3.R1
Platforms	All

## configuration

Synopsis	Synchronize the configuration files
Context	<a href="#">admin redundancy synchronize configuration</a>
Tree	<a href="#">configuration</a>
Description	When specified, the system synchronizes the primary, secondary, and tertiary configuration files.
Notes	The following elements are part of a mandatory choice: <b>boot-environment</b> , <b>certificate</b> , or <b>configuration</b> .
Introduced	20.10.R1
Platforms	All

## satellite

Synopsis	Perform administrative operations for satellites
Context	<a href="#">admin satellite</a>
Tree	<a href="#">satellite</a>
Introduced	22.2.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## ethernet-satellite [[satellite-id](#)] *reference*

Synopsis	Enter the <b>ethernet-satellite</b> list instance
Context	<a href="#">admin satellite ethernet-satellite</a> <i>reference</i>
Tree	<a href="#">ethernet-satellite</a>
Introduced	22.2.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **[satellite-id] reference**

Synopsis Satellite ID  
Context [admin satellite ethernet-satellite reference](#)  
Tree [ethernet-satellite](#)  
Reference **state satellite ethernet-satellite number**  
Notes This element is part of a list key.  
Introduced 22.2.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **reboot**

Synopsis Initiate an administrative reboot of the chassis  
Context [admin satellite ethernet-satellite reference reboot](#)  
Tree [reboot](#)  
Introduced 22.2.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **now**

Synopsis Reboot immediately without prompts or confirmation  
Context [admin satellite ethernet-satellite reference reboot now](#)  
Tree [now](#)  
Introduced 22.2.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **upgrade**

Synopsis Initiate a firmware image update during the reboot  
Context [admin satellite ethernet-satellite reference reboot upgrade](#)  
Tree [upgrade](#)  
Introduced 22.2.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## synchronize

Synopsis	Synchronize the chassis to the boot image
Context	<a href="#">admin satellite ethernet-satellite</a> <i>reference</i> <a href="#">synchronize</a>
Tree	<a href="#">synchronize</a>
Introduced	22.2.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## tech-support

Synopsis	Save satellite technical support information
Context	<a href="#">admin satellite ethernet-satellite</a> <i>reference</i> <a href="#">tech-support</a>
Tree	<a href="#">tech-support</a>
Description	<p>This command creates a system core dump. If no file URL is specified and the <b>ts-location</b> command is configured in the <b>configure system security tech-support</b> context, the technical support file is automatically generated by the system with the file name based on the system name and the date and time, and is saved to the directory indicated by the <b>ts-location</b> configuration.</p> <p>The format of the auto-generated file name is ts-XXXXX.YYYYMMDD.HHMMUTC.dat, where:</p> <ul style="list-style-type: none"> <li>• XXXXX is the system name with special characters expanded to avoid problems with file systems (for example, a period (.) is expanded to %2E)</li> <li>• YYYYMMDD is the date with leading zeros on the year, month, and day</li> <li>• HHMM is the hours and minutes in UTC time (24 hour format, always 4 characters, with leading zeros on the hours and minutes)</li> </ul> <p><b>Note:</b> This command is not supported over non-interactive interfaces (for example, NETCONF).</p> <p><b>Note:</b> This command should only be used with authorized direction from the Nokia Technical Assistance Center (TAC).</p>
Introduced	22.2.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### [url] string

Synopsis	URL to save technical support information
Context	<a href="#">admin satellite ethernet-satellite</a> <i>reference</i> <a href="#">tech-support</a> <a href="#">[url]</a> <i>string</i>
Tree	<a href="#">[url]</a>
String Length	1 to 180

---

Notes	This element is mandatory.
Introduced	22.2.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## save

Synopsis	Perform configuration save operations
Context	<a href="#">admin save</a>
Tree	<a href="#">save</a>
Introduced	16.0.R1
Platforms	All

## bof

Synopsis	Save the BOF region configuration
Context	<a href="#">admin save bof</a>
Tree	<a href="#">bof</a>
Notes	The following elements are part of a choice: <b>bof</b> , <b>configure</b> , <b>debug</b> , or <b>li</b> .
Introduced	20.10.R1
Platforms	All

## configure

Synopsis	Save the configure region configuration
Context	<a href="#">admin save configure</a>
Tree	<a href="#">configure</a>
Notes	The following elements are part of a choice: <b>bof</b> , <b>configure</b> , <b>debug</b> , or <b>li</b> .
Introduced	20.7.R2
Platforms	All

## debug

Synopsis	Save the debug region configuration
Context	<a href="#">admin save debug</a>
Tree	<a href="#">debug</a>

---

Notes	The following elements are part of a choice: <b>bof</b> , <b>configure</b> , <b>debug</b> , or <b>li</b> .
Introduced	21.5.R1
Platforms	All

## **li**

Synopsis	Save the LI region configuration
Context	<a href="#">admin save li</a>
Tree	<a href="#">li</a>
Notes	The following elements are part of a choice: <b>bof</b> , <b>configure</b> , <b>debug</b> , or <b>li</b> .
Introduced	19.10.R1
Platforms	All

## **[url] string**

Synopsis	Location to save the configuration
Context	<a href="#">admin save [url] string</a>
Tree	<a href="#">[url]</a>
Introduced	16.0.R1
Platforms	All

## **set**

Synopsis	Enter the <b>set</b> context
Context	<a href="#">admin set</a>
Tree	<a href="#">set</a>
Introduced	19.10.R1
Platforms	All

## **time**

Synopsis	System date and time
Context	<a href="#">admin set time</a>
Tree	<a href="#">time</a>
Introduced	19.10.R1

Platforms All

### **[system-time]** *string*

Synopsis System date and time

Context [admin set time \[system-time\] string](#)

Tree [\[system-time\]](#)

Description This command sets the system date and time. The time zone may optionally be specified. When the time zone is not specified, the system uses the configured system time zone.

Notes This element is mandatory.

Introduced 19.10.R1

Platforms All

### **show**

Synopsis Enter the **show** context

Context [admin show](#)

Tree [show](#)

Description The **admin show** commands display the same configuration as the **info** command but are not subject to command authorization and do not require configuration mode access.

Introduced 16.0.R1

Platforms All

### **configuration**

Synopsis Show the current configuration

Context [admin show configuration](#)

Tree [configuration](#)

Introduced 16.0.R1

Platforms All

### **bof**

Synopsis Show the BOF region configuration

---

Context	<a href="#">admin show configuration bof</a>
Tree	<a href="#">bof</a>
Notes	The following elements are part of a choice: <b>bof</b> , <b>configure</b> , <b>debug</b> , or <b>li</b> .
Introduced	20.10.R1
Platforms	All

Synopsis	Show the booted BOF configuration
Context	<a href="#">admin show configuration booted</a>
Tree	<a href="#">booted</a>
Notes	The following elements are part of a choice: <b>booted</b> or <b>cflash-id</b> .
Introduced	20.10.R1
Platforms	All

### **cflash-id** *string*

Synopsis	Show the BOF configuration file on a compact flash
Context	<a href="#">admin show configuration cflash-id string</a>
Tree	<a href="#">cflash-id</a>
String Length	4 to 6
Notes	The following elements are part of a choice: <b>booted</b> or <b>cflash-id</b> .
Introduced	20.10.R1
Platforms	All

### **[cli-path]** *string*

Synopsis	Absolute path or relative path from '/'
Context	<a href="#">admin show configuration [cli-path] string</a>
Tree	<a href="#">[cli-path]</a>
Introduced	21.10.R1
Platforms	All

## configure

Synopsis	Show the configure region configuration
Context	<a href="#">admin show configuration configure</a>
Tree	<a href="#">configure</a>
Notes	The following elements are part of a choice: <b>bof</b> , <b>configure</b> , <b>debug</b> , or <b>li</b> .
Introduced	20.7.R1
Platforms	All

## debug

Synopsis	Show the debug region configuration
Context	<a href="#">admin show configuration debug</a>
Tree	<a href="#">debug</a>
Notes	The following elements are part of a choice: <b>bof</b> , <b>configure</b> , <b>debug</b> , or <b>li</b> .
Introduced	21.5.R1
Platforms	All

## depth *number*

Synopsis	Depth limit from the pwc
Context	<a href="#">admin show configuration depth <i>number</i></a>
Tree	<a href="#">depth</a>
Range	1 to 4294967040
Introduced	23.10.R1
Platforms	All

## detail

Synopsis	Include default and unconfigured values
Context	<a href="#">admin show configuration detail</a>
Tree	<a href="#">detail</a>
Introduced	20.7.R1
Platforms	All

## flat

Synopsis	Show the context from the pwc on each line
Context	<a href="#">admin show configuration flat</a>
Tree	<a href="#">flat</a>
Notes	The following elements are part of a choice: <b>flat</b> , <b>full-context</b> , <b>json</b> , or <b>xml</b> .
Introduced	20.7.R1
Platforms	All

## full-context

Synopsis	Show the full context on each line
Context	<a href="#">admin show configuration full-context</a>
Tree	<a href="#">full-context</a>
Notes	The following elements are part of a choice: <b>flat</b> , <b>full-context</b> , <b>json</b> , or <b>xml</b> .
Introduced	20.7.R1
Platforms	All

## intended

Synopsis	Show the intended configuration
Context	<a href="#">admin show configuration intended</a>
Tree	<a href="#">intended</a>
Notes	The following elements are part of a choice: <b>intended</b> or <b>running</b> .
Introduced	20.7.R1
Platforms	All

## json

Synopsis	Show the output in indented JSON format
Context	<a href="#">admin show configuration json</a>
Tree	<a href="#">json</a>
Notes	The following elements are part of a choice: <b>flat</b> , <b>full-context</b> , <b>json</b> , or <b>xml</b> .
Introduced	19.10.R1
Platforms	All

## li

Synopsis	Show the LI region configuration
Context	<a href="#">admin show configuration li</a>
Tree	<a href="#">li</a>
Notes	The following elements are part of a choice: <b>bof</b> , <b>configure</b> , <b>debug</b> , or <b>li</b> .
Introduced	19.10.R1
Platforms	All

## running

Synopsis	Show the running configuration
Context	<a href="#">admin show configuration running</a>
Tree	<a href="#">running</a>
Notes	The following elements are part of a choice: <b>intended</b> or <b>running</b> .
Introduced	20.7.R1
Platforms	All

## units

Synopsis	Include unit types for applicable elements
Context	<a href="#">admin show configuration units</a>
Tree	<a href="#">units</a>
Introduced	20.10.R1
Platforms	All

## xml

Synopsis	Show the output in indented XML format
Context	<a href="#">admin show configuration xml</a>
Tree	<a href="#">xml</a>
Notes	The following elements are part of a choice: <b>flat</b> , <b>full-context</b> , <b>json</b> , or <b>xml</b> .
Introduced	20.7.R1
Platforms	All

## support-mode

Synopsis	Enable the kernel and shell commands
Context	<a href="#">admin support-mode</a>
Tree	<a href="#">support-mode</a>
Description	Commands in this context enable the <b>kernel</b> and <b>shell</b> commands. <b>Note:</b> These commands should be used only with authorized direction from Nokia support.
Introduced	16.0.R4
Platforms	All

## password

Synopsis	Enter support mode command passwords
Context	<a href="#">admin support-mode password</a>
Tree	<a href="#">password</a>
Introduced	23.10.R1
Platforms	All

## kernel *string*

Synopsis	Kernel command password
Context	<a href="#">admin support-mode password kernel <i>string</i></a>
Tree	<a href="#">kernel</a>
String Length	1 to 199
Notes	The following elements are part of a mandatory choice: <b>kernel</b> or <b>shell</b> .
Introduced	23.10.R1
Platforms	All

## shell *string*

Synopsis	Shell command password
Context	<a href="#">admin support-mode password shell <i>string</i></a>
Tree	<a href="#">shell</a>
String Length	1 to 199

---

Notes	The following elements are part of a mandatory choice: <b>kernel</b> or <b>shell</b> .
Introduced	23.10.R1
Platforms	All

**confirmed**

Synopsis	Enter the <b>confirmed</b> context
Context	<a href="#">admin system management-interface commit confirmed</a>
Tree	<a href="#">confirmed</a>
Description	Commands in this context accept or cancel a confirmed commit that is in progress and that was started by another configuration session.
Introduced	23.10.R1
Platforms	All

## accept

Synopsis	Accept commit confirmed and cancel automatic rollback
Context	<a href="#">admin system management-interface commit confirmed accept</a>
Tree	<a href="#">accept</a>
Introduced	23.10.R1
Platforms	All

## cancel

Synopsis	Cancel commit confirmed and roll back changes
Context	<a href="#">admin system management-interface commit confirmed cancel</a>
Tree	<a href="#">cancel</a>
Description	When specified, the router rolls back the configuration and returns the changes to the candidate.
Introduced	23.10.R1
Platforms	All

## operations

Synopsis	Enter the <b>operations</b> context
Context	<a href="#">admin system management-interface operations</a>
Tree	<a href="#">operations</a>
Description	Commands in this context are used to manage YANG-based operations (for example, <b>admin reboot</b> , or <b>ping</b> ) in model-driven interfaces.
Introduced	21.5.R1
Platforms	All

## delete-operation

Synopsis	Stop and remove an operation
Context	<a href="#">admin system management-interface operations delete-operation</a>
Tree	<a href="#">delete-operation</a>
Description	This command removes an operation and all status and data associated with it. If the operation was executing, it is stopped before removal.
Introduced	21.5.R1

Platforms All

### **[delete-id]** *number*

Synopsis ID of the operation to remove

Context [admin system management-interface operations delete-operation \[delete-id\] number](#)

Tree [\[delete-id\]](#)

Range 1 to 10000

Notes This element is mandatory.

Introduced 21.5.R1

Platforms All

### **op-table-bypass** *boolean*

Synopsis Avoid operation ID allocation

Context [admin system management-interface operations delete-operation op-table-bypass boolean](#)

Tree [op-table-bypass](#)

Description When configured to **true**, the system bypasses the YANG-based operations infrastructure and avoids the allocation of an operation ID. This is useful if the global operations table is full and a delete operation or **admin disconnect** is required.

Introduced 21.5.R1

Platforms All

### **stop-operation**

Synopsis Stop the execution of an operational command

Context [admin system management-interface operations stop-operation](#)

Tree [stop-operation](#)

Description This command stops the execution of an operational command.  
An operation launched as "asynchronous" is not deleted from the system when it is stopped. Status and other data associated with the operation persist until the operation is explicitly deleted using the delete operation command or a retention timeout.

Introduced 21.5.R1

Platforms All

**op-table-bypass** *boolean*

Synopsis	Avoid operation ID allocation
Context	<a href="#">admin system management-interface operations stop-operation op-table-bypass</a> <i>boolean</i>
Tree	<a href="#">op-table-bypass</a>
Description	When configured to <b>true</b> , the system bypasses the YANG-based operations infrastructure and avoids the allocation of an operation ID. This is useful if the global operations table is full and a delete operation or <b>admin disconnect</b> is required.
Introduced	21.5.R1
Platforms	All

**[stop-id]** *number*

Synopsis	ID of the operation to stop
Context	<a href="#">admin system management-interface operations stop-operation [stop-id]</a> <i>number</i>
Tree	<a href="#">[stop-id]</a>
Range	1 to 10000
Notes	This element is mandatory.
Introduced	21.5.R1
Platforms	All

**security**

Synopsis	Enter the <b>security</b> context
Context	<a href="#">admin system security</a>
Tree	<a href="#">security</a>
Introduced	16.0.R6
Platforms	All

**hash-control**

Synopsis	Enter the <b>hash-control</b> context
Context	<a href="#">admin system security hash-control</a>
Tree	<a href="#">hash-control</a>
Introduced	16.0.R6

Platforms All

## custom-hash

Synopsis Custom encryption  
 Context [admin system security hash-control custom-hash](#)  
 Tree [custom-hash](#)  
 Introduced 16.0.R6  
 Platforms All

## algorithm *keyword*

Synopsis Algorithm for custom encryption  
 Context [admin system security hash-control custom-hash algorithm \*keyword\*](#)  
 Tree [algorithm](#)  
 Description This command configures the algorithm for custom encryption. The encryption uses ECB mode, PKCS#7 padding, and Base64 encoding.  
 Options 3des – DES-EDE3-ECB with PKCS #5 padding  
 aes128 – AES-128-ECB with PKCS #7 padding  
 aes192 – AES-192-ECB with PKCS #7 padding  
 aes256 – AES-256-ECB with PKCS #7 padding  
 Notes This element is mandatory.  
 Introduced 16.0.R6  
 Platforms All

## key *string*

Synopsis Key for encryption algorithm  
 Context [admin system security hash-control custom-hash key \*string\*](#)  
 Tree [key](#)  
 String Length 1 to 71  
 Notes This element is mandatory.  
 Introduced 16.0.R6  
 Platforms All

## remove-custom-hash

Synopsis	Remove the custom encryption
Context	<a href="#">admin system security hash-control remove-custom-hash</a>
Tree	<a href="#">remove-custom-hash</a>
Introduced	20.10.R1
Platforms	All

## pki

Synopsis	Perform PKI related operations
Context	<a href="#">admin system security pki</a>
Tree	<a href="#">pki</a>
Description	Commands in this context specify options for public key infrastructure operations.
Introduced	23.3.R1
Platforms	All

## clear-ocsp-cache

Synopsis	Clear the current OCSP response cache
Context	<a href="#">admin system security pki clear-ocsp-cache</a>
Tree	<a href="#">clear-ocsp-cache</a>
Introduced	23.3.R1
Platforms	All

## [entry-id] *number*

Synopsis	Local OCSP response cache entry ID to clear
Context	<a href="#">admin system security pki clear-ocsp-cache [entry-id] number</a>
Tree	<a href="#">[entry-id]</a>
Range	1 to 2000
Introduced	23.3.R1
Platforms	All

## cmpv2

Synopsis	Perform CMPv2 operations
Context	<a href="#">admin system security pki cmpv2</a>
Tree	<a href="#">cmpv2</a>
Description	Commands in this context specify options for Certificate Management Protocol v2 (CMPv2) operations.
Introduced	23.3.R1
Platforms	All

## cert-request

Synopsis	Request an additional certificate
Context	<a href="#">admin system security pki cmpv2 cert-request</a>
Tree	<a href="#">cert-request</a>
Description	<p>When specified, the system requests an additional certificate after the initial certificate has been obtained from the CA.</p> <p>The request is authenticated by a signature signed by the current key, along with the current certificate. The hash algorithm used for the signature depends on the key type:</p> <ul style="list-style-type: none"> <li>• DSA key - SHA1</li> <li>• RSA key: MD5   SHA1   SHA224   SHA256   SHA384   SHA512 (default is SHA1)</li> <li>• ECDSA key: SHA1   SHA224   SHA256   SHA384   SHA512 (default is SHA256)</li> </ul> <p>CA may not return a certificate immediately, for example, if the request process requires manual intervention. The <b>poll</b> command can be used to poll the status of the request.</p>
Introduced	23.3.R1
Platforms	All

## ca-profile *reference*

Synopsis	PKI CA profile name
Context	<a href="#">admin system security pki cmpv2 cert-request ca-profile <i>reference</i></a>
Tree	<a href="#">ca-profile</a>
Description	This command configures the CA profile that contains the CMPv2 configuration like server URL.
Reference	<b>state system security pki ca-profile <i>string</i></b>
Notes	This element is mandatory.
Introduced	23.3.R1

Platforms All

### **current-certificate** *string*

Synopsis Existing imported certificate file to create request  
Context [admin system security pki cmpv2 cert-request current-certificate](#) *string*  
Tree [current-certificate](#)  
String Length 1 to 95  
Notes This element is mandatory.  
Introduced 23.3.R1  
Platforms All

### **current-key** *string*

Synopsis Imported key file used to create the request  
Context [admin system security pki cmpv2 cert-request current-key](#) *string*  
Tree [current-key](#)  
Description This command specifies the imported key file corresponding to the existing imported certificate file used to create the request.  
String Length 1 to 95  
Notes This element is mandatory.  
Introduced 23.3.R1  
Platforms All

### **domain-name** *string*

Synopsis FQDNs for the Subject Alternative Name  
Context [admin system security pki cmpv2 cert-request domain-name](#) *string*  
Tree [domain-name](#)  
Description This command specifies the Fully Qualified Domain Names (FQDNs) for the Subject Alternative Name extension of the requesting certificate, separated by commas.  
String Length 1 to 512  
Introduced 23.3.R1  
Platforms All

**hash-algorithm** *keyword*

Synopsis	Hash algorithm used for the certificate signature
Context	<a href="#">admin system security pki cmpv2 cert-request hash-algorithm</a> <i>keyword</i>
Tree	<a href="#">hash-algorithm</a>
Options	md5, sha1, sha224, sha256, sha384, sha512
Introduced	23.3.R1
Platforms	All

**ip-address** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	IP address for the Subject Alternative Name
Context	<a href="#">admin system security pki cmpv2 cert-request ip-address</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	<a href="#">ip-address</a>
Description	This command specifies an IPv4 or IPv6 address for the Subject Alternative Name extension of the requesting certificate.
Introduced	23.3.R1
Platforms	All

**new-key** *string*

Synopsis	New imported key file to create certificate request
Context	<a href="#">admin system security pki cmpv2 cert-request new-key</a> <i>string</i>
Tree	<a href="#">new-key</a>
String Length	1 to 95
Notes	This element is mandatory.
Introduced	23.3.R1
Platforms	All

**save-as** *string*

Synopsis	Full path to save the result certificate
Context	<a href="#">admin system security pki cmpv2 cert-request save-as</a> <i>string</i>
Tree	<a href="#">save-as</a>
String Length	1 to 200

Notes	This element is mandatory.
Introduced	23.3.R1
Platforms	All

### **subject-dn** *string*

Synopsis	Subject of the requesting certificate
Context	<a href="#">admin system security pki cmpv2 cert-request subject-dn</a> <i>string</i>
Tree	<a href="#">subject-dn</a>
Description	This command specifies the subject DN attributes used in the certificate request. The format is a comma separated list with the format attr1=val1, attr2=val2, where attrN={C   ST   O   OU   CN}.
String Length	1 to 256
Introduced	23.3.R1
Platforms	All

### **clear-request**

Synopsis	Clear pending CMPv2 requests
Context	<a href="#">admin system security pki cmpv2 clear-request</a>
Tree	<a href="#">clear-request</a>
Description	When specified, the system clears pending CMPv2 requests for the specified CA. If no requests are pending, the system clears the saved result of the previous request
Introduced	23.3.R1
Platforms	All

### **ca-profile** *reference*

Synopsis	PKI CA profile name
Context	<a href="#">admin system security pki cmpv2 clear-request ca-profile</a> <i>reference</i>
Tree	<a href="#">ca-profile</a>
Description	This command configures the CA profile that contains the CMPv2 configuration like server URL.
Reference	<b>state system security pki ca-profile</b> <i>string</i>
Notes	This element is mandatory.
Introduced	23.3.R1

Platforms All

## initial-registration

Synopsis Request initial certificate using the CMPv2 protocol

Context [admin system security pki cmpv2 initial-registration](#)

Tree [initial-registration](#)

Description When specified, the system requests the initial certificate from the CA using the CMPv2 initial registration procedure.

The **ca-profile** parameter specifies a CA profile which includes CMP server information.

The **key-to-certify** parameter is an imported key file to be certified by the CA.

The request is authenticated via one of the following methods:

- A password and a reference number that pre-distributed by CA via out-of-band means. The specified password and reference number are not necessarily in the key-list configured in the corresponding CA-Profile. If key-list is not configured in the corresponding CA profile, the system uses the existing password to authenticate the CMPv2 packets from server if it is in password protection. If key-list is configured in the corresponding CA profile and the server does not send SenderKID, the system uses the lexicographical first key in the key-list to authenticate the CMPv2 packets from the server in case it is in password protection mode.
- A signature signed by the protection-key or key-to-certify, optionally with with the corresponding certificate. If the **protection-key** command is not specified, the system uses the **key-to-certify** configuration for message protection. The hash algorithm used for the signature depends on the key type. See the **cert-request** command for details. Optionally, the system may send a certificate or a chain of certificates in the extraCertsfield. The certificate is specified by the **certificate** parameter and must include the public key of the key used for message protection. Sending a chain is enabled by specifying the **send-chain** and **with-ca** command options.

The **subject-dn** command specifies the subject of the requesting certificate.

The **save-as** command specifies the full path name for saving the result certificate.

The CA may not return the certificate immediately, for example, if the request process requires manual intervention. In such cases, the **poll** command can be used to poll the status of the request.

Introduced 23.3.R1

Platforms All

## ca-profile reference

Synopsis PKI CA profile name

Context [admin system security pki cmpv2 initial-registration ca-profile reference](#)

Tree	<a href="#">ca-profile</a>
Description	This command configures the CA profile that contains the CMPv2 configuration like server URL.
Reference	<b>state system security pki ca-profile</b> <i>string</i>
Notes	This element is mandatory.
Introduced	23.3.R1
Platforms	All

### **certificate** *string*

Synopsis	Filename of the certificate for the protection key
Context	<a href="#">admin system security pki cmpv2 initial-registration certificate</a> <i>string</i>
Tree	<a href="#">certificate</a>
String Length	1 to 95
Notes	The following elements are part of a mandatory choice: ( <b>certificate</b> , <b>hash-algorithm</b> , <b>protection-key</b> , <b>send-chain</b> , and <b>with-ca</b> ) or ( <b>password</b> and <b>reference</b> ).
Introduced	23.3.R1
Platforms	All

### **domain-name** *string*

Synopsis	FQDNs for the Subject Alternative Name
Context	<a href="#">admin system security pki cmpv2 initial-registration domain-name</a> <i>string</i>
Tree	<a href="#">domain-name</a>
Description	This command specifies the Fully Qualified Domain Names (FQDNs) for the Subject Alternative Name extension of the requesting certificate, separated by commas.
String Length	1 to 512
Introduced	23.3.R1
Platforms	All

### **hash-algorithm** *keyword*

Synopsis	Hash algorithm used for the certificate signature
Context	<a href="#">admin system security pki cmpv2 initial-registration hash-algorithm</a> <i>keyword</i>
Tree	<a href="#">hash-algorithm</a>

Options	md5, sha1, sha224, sha256, sha384, sha512
Notes	The following elements are part of a mandatory choice: ( <b>certificate</b> , <b>hash-algorithm</b> , <b>protection-key</b> , <b>send-chain</b> , and <b>with-ca</b> ) or ( <b>password</b> and <b>reference</b> ).
Introduced	23.3.R1
Platforms	All

### **ip-address** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	IP address for the Subject Alternative Name
Context	<a href="#">admin system security pki cmpv2 initial-registration ip-address</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	<a href="#">ip-address</a>
Description	This command specifies an IPv4 or IPv6 address for the Subject Alternative Name extension of the requesting certificate.
Introduced	23.3.R1
Platforms	All

### **key-to-certify** *string*

Synopsis	Name of the key file used to create initial request
Context	<a href="#">admin system security pki cmpv2 initial-registration key-to-certify</a> <i>string</i>
Tree	<a href="#">key-to-certify</a>
String Length	1 to 95
Notes	This element is mandatory.
Introduced	23.3.R1
Platforms	All

### **password** *string*

Synopsis	Password for message protection
Context	<a href="#">admin system security pki cmpv2 initial-registration password</a> <i>string</i>
Tree	<a href="#">password</a>
String Length	1 to 64
Notes	The following elements are part of a mandatory choice: ( <b>certificate</b> , <b>hash-algorithm</b> , <b>protection-key</b> , <b>send-chain</b> , and <b>with-ca</b> ) or ( <b>password</b> and <b>reference</b> ).
Introduced	23.3.R1

Platforms All

### **protection-key** *string*

Synopsis Key file used to generate message protection signature

Context [admin system security pki cmpv2 initial-registration protection-key](#) *string*

Tree [protection-key](#)

String Length 1 to 95

Notes The following elements are part of a mandatory choice: (**certificate**, **hash-algorithm**, **protection-key**, **send-chain**, and **with-ca**) or (**password** and **reference**).

Introduced 23.3.R1

Platforms All

### **reference** *string*

Synopsis Password reference number

Context [admin system security pki cmpv2 initial-registration reference](#) *string*

Tree [reference](#)

String Length 1 to 64

Notes The following elements are part of a mandatory choice: (**certificate**, **hash-algorithm**, **protection-key**, **send-chain**, and **with-ca**) or (**password** and **reference**).

Introduced 23.3.R1

Platforms All

### **save-as** *string*

Synopsis Full path to save the result certificate

Context [admin system security pki cmpv2 initial-registration save-as](#) *string*

Tree [save-as](#)

String Length 1 to 200

Notes This element is mandatory.

Introduced 23.3.R1

Platforms All

## send-chain

Synopsis	Send a certificate chain
Context	<a href="#">admin system security pki cmpv2 initial-registration send-chain</a>
Tree	<a href="#">send-chain</a>
Notes	The following elements are part of a mandatory choice: ( <b>certificate</b> , <b>hash-algorithm</b> , <b>protection-key</b> , <b>send-chain</b> , and <b>with-ca</b> ) or ( <b>password</b> and <b>reference</b> ).
Introduced	23.3.R1
Platforms	All

## subject-dn *string*

Synopsis	Subject of the requesting certificate
Context	<a href="#">admin system security pki cmpv2 initial-registration subject-dn <i>string</i></a>
Tree	<a href="#">subject-dn</a>
Description	This command specifies the subject DN attributes used in the certificate request. The format is a comma separated list with the format attr1=val1, attr2=val2, where attrN={C   ST   O   OU   CN}.
String Length	1 to 256
Introduced	23.3.R1
Platforms	All

## with-ca *reference*

Synopsis	Name of CA profile with certificate in the send chain
Context	<a href="#">admin system security pki cmpv2 initial-registration with-ca <i>reference</i></a>
Tree	<a href="#">with-ca</a>
Reference	<b>state system security pki ca-profile <i>string</i></b>
Notes	The following elements are part of a mandatory choice: ( <b>certificate</b> , <b>hash-algorithm</b> , <b>protection-key</b> , <b>send-chain</b> , and <b>with-ca</b> ) or ( <b>password</b> and <b>reference</b> ).
Introduced	23.3.R1
Platforms	All

## key-update

Synopsis	Request new certificate to update existing certificate
Context	<a href="#">admin system security pki cmpv2 key-update</a>

Tree	<a href="#">key-update</a>
Description	When specified, the system requests a new certificate from the CA to update an existing certificate due to reasons such as a key refresh or to replace a compromised key.  The CA may not return the certificate immediately, for example, if the request process requires manual intervention. In these cases, the <b>poll</b> command can be used to poll the status of the request.
Introduced	23.3.R1
Platforms	All

### **ca-profile** *reference*

Synopsis	PKI CA profile name
Context	<a href="#">admin system security pki cmpv2 key-update ca-profile</a> <i>reference</i>
Tree	<a href="#">ca-profile</a>
Description	This command configures the CA profile that contains the CMPv2 configuration like server URL.
Reference	<b>state system security pki ca-profile</b> <i>string</i>
Notes	This element is mandatory.
Introduced	23.3.R1
Platforms	All

### **hash-algorithm** *keyword*

Synopsis	Hash algorithm used for the certificate signature
Context	<a href="#">admin system security pki cmpv2 key-update hash-algorithm</a> <i>keyword</i>
Tree	<a href="#">hash-algorithm</a>
Options	md5, sha1, sha224, sha256, sha384, sha512
Introduced	23.3.R1
Platforms	All

### **new-key** *string*

Synopsis	Name of new imported key file used for the key update
Context	<a href="#">admin system security pki cmpv2 key-update new-key</a> <i>string</i>
Tree	<a href="#">new-key</a>
String Length	1 to 95

---

Notes	This element is mandatory.
Introduced	23.3.R1
Platforms	All

### **old-certificate** *string*

Synopsis	Name of the old certificate file to be replaced
Context	<a href="#">admin</a> <a href="#">system</a> <a href="#">security</a> <a href="#">pki</a> <a href="#">cmpv2</a> <a href="#">key-update</a> <a href="#">old-certificate</a> <i>string</i>
Tree	<a href="#">old-certificate</a>
String Length	1 to 95
Notes	This element is mandatory.
Introduced	23.3.R1
Platforms	All

### **old-key** *string*

Synopsis	Name of the old key file to be replaced
Context	<a href="#">admin</a> <a href="#">system</a> <a href="#">security</a> <a href="#">pki</a> <a href="#">cmpv2</a> <a href="#">key-update</a> <a href="#">old-key</a> <i>string</i>
Tree	<a href="#">old-key</a>
String Length	1 to 95
Notes	This element is mandatory.
Introduced	23.3.R1
Platforms	All

### **save-as** *string*

Synopsis	Full path to save the result certificate file
Context	<a href="#">admin</a> <a href="#">system</a> <a href="#">security</a> <a href="#">pki</a> <a href="#">cmpv2</a> <a href="#">key-update</a> <a href="#">save-as</a> <i>string</i>
Tree	<a href="#">save-as</a>
String Length	1 to 200
Notes	This element is mandatory.
Introduced	23.3.R1
Platforms	All

## poll

Synopsis	Poll the CMPv2 server for pending request status
Context	<a href="#">admin system security pki cmpv2 poll</a>
Tree	<a href="#">poll</a>
Description	<p>When specified, the system polls the status of the pending CMPv2 request toward the specified CA.</p> <p>If the response is ready, the system resumes the CMPv2 protocol exchange with the server.</p> <p>SR OS allows only one pending CMP request per CA; therefore, no new request is allowed when a pending request is present.</p>
Introduced	23.3.R1
Platforms	All

## ca-profile *reference*

Synopsis	PKI CA profile name
Context	<a href="#">admin system security pki cmpv2 poll ca-profile <i>reference</i></a>
Tree	<a href="#">ca-profile</a>
Description	This command configures the CA profile that contains the CMPv2 configuration like server URL.
Reference	<b>state system security pki ca-profile <i>string</i></b>
Notes	This element is mandatory.
Introduced	23.3.R1
Platforms	All

## convert-file

Synopsis	Convert imported file between secure and legacy format
Context	<a href="#">admin system security pki convert-file</a>
Tree	<a href="#">convert-file</a>
Introduced	23.3.R1
Platforms	All

## force

Synopsis	Force the conversion
----------	----------------------

Context	<a href="#">admin system security pki convert-file force</a>
Tree	<a href="#">force</a>
Description	When specified, the system forces the conversion of imported certificates and keys even if files with the same output names exist.
Introduced	23.3.R1
Platforms	All

**format** *keyword*

Synopsis	File format to convert to
Context	<a href="#">admin system security pki convert-file format keyword</a>
Tree	<a href="#">format</a>
Options	secure, legacy
Notes	This element is mandatory.
Introduced	23.3.R1
Platforms	All

**[input-file]** *string*

Synopsis	Name of the file to be converted
Context	<a href="#">admin system security pki convert-file [input-file] string</a>
Tree	<a href="#">[input-file]</a>
String Length	1 to 95
Notes	This element is mandatory.
Introduced	23.3.R1
Platforms	All

**[output-file]** *string*

Synopsis	Output filename
Context	<a href="#">admin system security pki convert-file [output-file] string</a>
Tree	<a href="#">[output-file]</a>
Description	This command specifies the output filename. If the filename already exists, the system prompts the user to proceed or aborts if the <b>force</b> command is unconfigured.
String Length	1 to 95

---

Notes	This element is mandatory.
Introduced	23.3.R1
Platforms	All

### **crl-update**

Synopsis	Trigger the CRL update for the CA profile
Context	<a href="#">admin system security pki crl-update</a>
Tree	<a href="#">crl-update</a>
Introduced	23.3.R1
Platforms	All

### **ca-profile** *reference*

Synopsis	PKI CA profile name
Context	<a href="#">admin system security pki crl-update ca-profile</a> <i>reference</i>
Tree	<a href="#">ca-profile</a>
Description	This command configures the CA profile that contains the CMPv2 configuration like server URL.
Reference	<b>state system security pki ca-profile</b> <i>string</i>
Notes	This element is mandatory.
Introduced	23.3.R1
Platforms	All

### **est**

Synopsis	Perform Enrollment over Secure Transport operations
Context	<a href="#">admin system security pki est</a>
Tree	<a href="#">est</a>
Description	Commands in this context configure command options for Enrollment over Secure Transport (EST) protocol operations.
Introduced	23.3.R1
Platforms	All

## ca-certificates

Synopsis	Download CA certificates from the EST server
Context	<a href="#">admin system security pki est ca-certificates</a>
Tree	<a href="#">ca-certificates</a>
Description	This command downloads a Certificate Authority (CA) certificate from an EST server specified by the profile name.
Introduced	23.3.R1
Platforms	All

## est-profile *string*

Synopsis	PKI EST profile name
Context	<a href="#">admin system security pki est ca-certificates est-profile string</a>
Tree	<a href="#">est-profile</a>
String Length	1 to 32
Notes	This element is mandatory.
Introduced	23.3.R1
Platforms	All

## force

Synopsis	Force an overwrite of the result file
Context	<a href="#">admin system security pki est ca-certificates force</a>
Tree	<a href="#">force</a>
Introduced	23.3.R1
Platforms	All

## output-url *string*

Synopsis	Path to the result file
Context	<a href="#">admin system security pki est ca-certificates output-url string</a>
Tree	<a href="#">output-url</a>
String Length	1 to 200
Notes	This element is mandatory.
Introduced	23.3.R1

Platforms All

## enroll

Synopsis Enroll a new certificate with CA with the EST protocol

Context [admin system security pki est enroll](#)

Tree [enroll](#)

Description When specified, the system enrolls a new certificate with Certificate Authority (CA) by the EST protocol specified with the **est-profile** command with a imported private key specified by the **key** command.

The **est-profile** command specifies the authentication between the system and EST server.

The **hash-alg**, **subject-dn**, **domain-name**, and **ip-address** commands are used to generate the Certificate Signing Request (CSR) in the EST request message. The **domain-name** and **ip-address** commands are used as subject alternative names.

If **validate-certificate-chain** is specified, the system validates the chain of result certificate before importing it. The certificate chain is the chain of all certificates from the result certificate to the issuing CA. The result certificate is the new certificate returned by the EST server.

The result certificate is imported and saved with the filename specified by the **output-file** command. If the **force** command is specified, the system overwrites the existing file with same name as the output file.

Introduced 23.3.R1

Platforms All

## domain-name *string*

Synopsis FQDNs for the Subject Alternative Name

Context [admin system security pki est enroll domain-name string](#)

Tree [domain-name](#)

Description This command specifies the Fully Qualified Domain Names (FQDNs) for the Subject Alternative Name extension of the requesting certificate, separated by commas.

String Length 1 to 512

Introduced 23.3.R1

Platforms All

## est-profile *string*

Synopsis PKI EST profile name

Context	<a href="#">admin system security pki est enroll est-profile</a> <i>string</i>
Tree	<a href="#">est-profile</a>
String Length	1 to 32
Notes	This element is mandatory.
Introduced	23.3.R1
Platforms	All

**force**

Synopsis	Force an overwrite of the result file
Context	<a href="#">admin system security pki est enroll force</a>
Tree	<a href="#">force</a>
Introduced	23.3.R1
Platforms	All

**hash-algorithm** *keyword*

Synopsis	Hash algorithm used for the certificate signature
Context	<a href="#">admin system security pki est enroll hash-algorithm</a> <i>keyword</i>
Tree	<a href="#">hash-algorithm</a>
Options	md5, sha1, sha224, sha256, sha384, sha512
Introduced	23.3.R1
Platforms	All

**ip-address** (*ipv4-address-no-zone | ipv6-address-no-zone*)

Synopsis	IP address for the Subject Alternative Name
Context	<a href="#">admin system security pki est enroll ip-address</a> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> )
Tree	<a href="#">ip-address</a>
Description	This command specifies an IPv4 or IPv6 address for the Subject Alternative Name extension of the requesting certificate.
Introduced	23.3.R1
Platforms	All

### **key string**

Synopsis	Name of the imported the key file to enroll
Context	<a href="#">admin system security pki est enroll key string</a>
Tree	<a href="#">key</a>
String Length	1 to 200
Notes	This element is mandatory.
Introduced	23.3.R1
Platforms	All

### **output-file string**

Synopsis	Name of the result file
Context	<a href="#">admin system security pki est enroll output-file string</a>
Tree	<a href="#">output-file</a>
String Length	1 to 95
Notes	This element is mandatory.
Introduced	23.3.R1
Platforms	All

### **subject-dn string**

Synopsis	Subject of the requesting certificate
Context	<a href="#">admin system security pki est enroll subject-dn string</a>
Tree	<a href="#">subject-dn</a>
Description	This command specifies the subject DN attributes used in the certificate request. The format is a comma separated list with the format attr1=val1, attr2=val2, where attrN={C   ST   O   OU   CN}.
String Length	1 to 256
Introduced	23.3.R1
Platforms	All

### **validate-certificate-chain**

Synopsis	Validate result certificate chain before importing
Context	<a href="#">admin system security pki est enroll validate-certificate-chain</a>

Tree	<a href="#">validate-certificate-chain</a>
Introduced	23.3.R1
Platforms	All

## renew

Synopsis	Renew a CA certificate using the EST protocol
Context	<a href="#">admin system security pki est renew</a>
Tree	<a href="#">renew</a>
Description	<p>When specified, the system renews an imported certificate (specified by the <b>certificate</b> command) with a Certificate Authority (CA) using the EST protocol specified by the <b>est-profile</b> parameter, with an imported private key specified the <b>key</b> command. The key can be either the key of the certificate to be renewed or a new key.</p> <p>The authentication between system and EST server is specified by the <b>est-profile</b> parameter.</p> <p>The system uses the <b>hash-alg</b> command to generate the CSR in the EST request message.</p>
Introduced	23.3.R1
Platforms	All

## certificate *string*

Synopsis	Name of the imported certificate file to renew
Context	<a href="#">admin system security pki est renew certificate string</a>
Tree	<a href="#">certificate</a>
String Length	1 to 200
Notes	This element is mandatory.
Introduced	23.3.R1
Platforms	All

## est-profile *string*

Synopsis	PKI EST profile name
Context	<a href="#">admin system security pki est renew est-profile string</a>
Tree	<a href="#">est-profile</a>
String Length	1 to 32

Notes	This element is mandatory.
Introduced	23.3.R1
Platforms	All

**force**

Synopsis	Force an overwrite of the result file
Context	<a href="#">admin system security pki est renew force</a>
Tree	<a href="#">force</a>
Introduced	23.3.R1
Platforms	All

**hash-algorithm *keyword***

Synopsis	Hash algorithm used for the certificate signature
Context	<a href="#">admin system security pki est renew hash-algorithm <i>keyword</i></a>
Tree	<a href="#">hash-algorithm</a>
Options	md5, sha1, sha224, sha256, sha384, sha512
Introduced	23.3.R1
Platforms	All

**key *string***

Synopsis	Imported key file of the certificate to renew
Context	<a href="#">admin system security pki est renew key <i>string</i></a>
Tree	<a href="#">key</a>
String Length	1 to 200
Notes	This element is mandatory.
Introduced	23.3.R1
Platforms	All

**output-file *string***

Synopsis	Name of the result file
Context	<a href="#">admin system security pki est renew output-file <i>string</i></a>

---

Tree	<a href="#">output-file</a>
String Length	1 to 95
Notes	This element is mandatory.
Introduced	23.3.R1
Platforms	All

### **validate-certificate-chain**

Synopsis	Validate result certificate chain before importing
Context	<a href="#">admin system security pki est renew validate-certificate-chain</a>
Tree	<a href="#">validate-certificate-chain</a>
Introduced	23.3.R1
Platforms	All

### **export**

Synopsis	Export an imported file
Context	<a href="#">admin system security pki export</a>
Tree	<a href="#">export</a>
Introduced	23.3.R1
Platforms	All

### **format** *keyword*

Synopsis	Output file format
Context	<a href="#">admin system security pki export format</a> <i>keyword</i>
Tree	<a href="#">format</a>
Options	pkcs12, pkcs7-der, pkcs7-pem, pem, der
Notes	This element is mandatory.
Introduced	23.3.R1
Platforms	All

### **input-file** *string*

Synopsis	Name of the file to be exported
----------	---------------------------------

---

Context	<a href="#">admin system security pki export input-file</a> <i>string</i>
Tree	<a href="#">input-file</a>
String Length	1 to 95
Notes	This element is mandatory.
Introduced	23.3.R1
Platforms	All

### **key-file** *string*

Synopsis	Name of the key file to be exported
Context	<a href="#">admin system security pki export key-file</a> <i>string</i>
Tree	<a href="#">key-file</a>
Description	This command specifies the name of the key file to be exported when the output format may contain the certificate and the key.
String Length	1 to 95
Introduced	23.3.R1
Platforms	All

### **output-url** *string*

Synopsis	Full path to export the result file
Context	<a href="#">admin system security pki export output-url</a> <i>string</i>
Tree	<a href="#">output-url</a>
String Length	1 to 200
Notes	This element is mandatory.
Introduced	23.3.R1
Platforms	All

### **password** *string*

Synopsis	Password used to encrypt the output file
Context	<a href="#">admin system security pki export password</a> <i>string</i>
Tree	<a href="#">password</a>
String Length	1 to 32
Introduced	23.3.R1

Platforms All

### **type** *keyword*

Synopsis Type of file to be exported  
Context [admin system security pki export type keyword](#)  
Tree [type](#)  
Options certificate, key, crl  
Notes This element is mandatory.  
Introduced 23.3.R1  
Platforms All

### **generate-csr**

Synopsis Generate a PKCS#10 certificate signing request file  
Context [admin system security pki generate-csr](#)  
Tree [generate-csr](#)  
Introduced 23.3.R1  
Platforms All

### **domain-name** *string*

Synopsis FQDNs for the Subject Alternative Name  
Context [admin system security pki generate-csr domain-name string](#)  
Tree [domain-name](#)  
Description This command specifies the Fully Qualified Domain Names (FQDNs) for the Subject Alternative Name extension of the requesting certificate, separated by commas.  
String Length 1 to 512  
Introduced 23.3.R1  
Platforms All

### **hash-algorithm** *keyword*

Synopsis Hash algorithm used for the certificate signature  
Context [admin system security pki generate-csr hash-algorithm keyword](#)

Tree	<a href="#">hash-algorithm</a>
Options	md5, sha1, sha224, sha256, sha384, sha512
Introduced	23.3.R1
Platforms	All

### **ip-address** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	IP address for the Subject Alternative Name
Context	<a href="#">admin system security pki generate-csr ip-address</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	<a href="#">ip-address</a>
Description	This command specifies an IPv4 or IPv6 address for the Subject Alternative Name extension of the requesting certificate.
Introduced	23.3.R1
Platforms	All

### **key-url string**

Synopsis	Full path to the key file used to generate the request
Context	<a href="#">admin system security pki generate-csr key-url string</a>
Tree	<a href="#">key-url</a>
String Length	1 to 200
Notes	This element is mandatory.
Introduced	23.3.R1
Platforms	All

### **output-url string**

Synopsis	Full path to result certificate signing request file
Context	<a href="#">admin system security pki generate-csr output-url string</a>
Tree	<a href="#">output-url</a>
String Length	1 to 200
Notes	This element is mandatory.
Introduced	23.3.R1
Platforms	All

### **subject-dn** *string*

Synopsis	Subject of the requesting certificate
Context	<a href="#">admin system security pki generate-csr subject-dn</a> <i>string</i>
Tree	<a href="#">subject-dn</a>
Description	This command specifies the subject DN attributes used in the certificate request. The format is a comma separated list with the format attr1=val1, attr2=val2, where attrN={C   ST   O   OU   CN}.
String Length	1 to 256
Introduced	23.3.R1
Platforms	All

### **use-printable**

Synopsis	Force ASCII encoding for input subject DN attributes
Context	<a href="#">admin system security pki generate-csr use-printable</a>
Tree	<a href="#">use-printable</a>
Description	When specified, the system forces the use of ASCII encoding for the input subject DN attributes. Otherwise, the system uses UTF-8 encoding.
Introduced	23.3.R1
Platforms	All

### **generate-keypair**

Synopsis	Generate PKI key pair
Context	<a href="#">admin system security pki generate-keypair</a>
Tree	<a href="#">generate-keypair</a>
Description	When specified, the system generates an RSA, DSA, or ECDSA private/public key pair file
Introduced	23.3.R1
Platforms	All

### **dsa-key-size** *number*

Synopsis	Length of the DSA key to be generated
Context	<a href="#">admin system security pki generate-keypair dsa-key-size</a> <i>number</i>

Tree	<a href="#">dsa-key-size</a>
Range	512 to 8192
Default	2048
Notes	The following elements are part of a mandatory choice: <b>dsa-key-size</b> , <b>ecdsa-curve</b> , or <b>rsa-key-size</b> .
Introduced	23.3.R1
Platforms	All

### **ecdsa-curve** *keyword*

Synopsis	Elliptic curve of the ECDSA key to be generated
Context	<a href="#">admin system security pki generate-keypair ecdsa-curve</a> <i>keyword</i>
Tree	<a href="#">ecdsa-curve</a>
Options	secp256r1, secp384r1, secp521r1
Default	secp256r1
Notes	The following elements are part of a mandatory choice: <b>dsa-key-size</b> , <b>ecdsa-curve</b> , or <b>rsa-key-size</b> .
Introduced	23.3.R1
Platforms	All

### **rsa-key-size** *number*

Synopsis	Length of the RSA key to be generated
Context	<a href="#">admin system security pki generate-keypair rsa-key-size</a> <i>number</i>
Tree	<a href="#">rsa-key-size</a>
Range	512 to 8192
Default	2048
Notes	The following elements are part of a mandatory choice: <b>dsa-key-size</b> , <b>ecdsa-curve</b> , or <b>rsa-key-size</b> .
Introduced	23.3.R1
Platforms	All

### **[save-path]** *string*

Synopsis	Full path to save the result key file
Context	<a href="#">admin system security pki generate-keypair [save-path]</a> <i>string</i>

Tree	<a href="#">[save-path]</a>
String Length	1 to 200
Notes	This element is mandatory.
Introduced	23.3.R1
Platforms	All

## import

Synopsis	Import a certificate related file
Context	<a href="#">admin system security pki import</a>
Tree	<a href="#">import</a>
Description	When specified, the system imports an input file (key/certificate/CRL) to be used by SROS applications. The following summarizes the supported formats: <ul style="list-style-type: none"> <li>• Certificate - PKCS #12, PKCS #7 PEM encoded, PKCS #7 DER encoded, PEM, DER</li> <li>• Key - PKCS #12, PEM, DER</li> <li>• CRL - PKCS #7 PEM encoded, PKCS #7 DER encoded, PEM, DER</li> </ul>
Introduced	23.3.R1
Platforms	All

## format *keyword*

Synopsis	Output file format
Context	<a href="#">admin system security pki import format <i>keyword</i></a>
Tree	<a href="#">format</a>
Options	pkcs12, pkcs7-der, pkcs7-pem, pem, der
Notes	This element is mandatory.
Introduced	23.3.R1
Platforms	All

## input-url *string*

Synopsis	Full path to the file to import
Context	<a href="#">admin system security pki import input-url <i>string</i></a>
Tree	<a href="#">input-url</a>

---

String Length	1 to 200
Notes	This element is mandatory.
Introduced	23.3.R1
Platforms	All

### **output-file** *string*

Synopsis	Name of the result file
Context	<a href="#">admin system security pki import output-file</a> <i>string</i>
Tree	<a href="#">output-file</a>
String Length	1 to 95
Notes	This element is mandatory.
Introduced	23.3.R1
Platforms	All

### **password** *string*

Synopsis	Password used to encrypt the output file
Context	<a href="#">admin system security pki import password</a> <i>string</i>
Tree	<a href="#">password</a>
String Length	1 to 32
Introduced	23.3.R1
Platforms	All

### **type** *keyword*

Synopsis	Type of file to be exported
Context	<a href="#">admin system security pki import type</a> <i>keyword</i>
Tree	<a href="#">type</a>
Options	certificate, key, crl
Notes	This element is mandatory.
Introduced	23.3.R1
Platforms	All

**validate-certificate-chain**

Synopsis	Validate the certificate chain
Context	<a href="#">admin system security pki import validate-certificate-chain</a>
Tree	<a href="#">validate-certificate-chain</a>
Description	When specified, the system validates the result certificate chain before it is imported.
Introduced	23.3.R1
Platforms	All

**reload**

Synopsis	Reload key or certificate files
Context	<a href="#">admin system security pki reload</a>
Tree	<a href="#">reload</a>
Description	When specified, the system reloads the key or certificate files for the specified application. This command can be used to ensure a changed imported file takes effect.
Introduced	23.3.R1
Platforms	All

**application *keyword***

Synopsis	Application to be reloaded
Context	<a href="#">admin system security pki reload application <i>keyword</i></a>
Tree	<a href="#">application</a>
Options	ipsec
Notes	This element is mandatory.
Introduced	23.3.R1
Platforms	All

**certificate *string***

Synopsis	Name of the certificate file to reload
Context	<a href="#">admin system security pki reload certificate <i>string</i></a>
Tree	<a href="#">certificate</a>
String Length	1 to 95
Notes	This element is mandatory.

Introduced 23.3.R1  
Platforms All

### **key string**

Synopsis Name of the key file to reload  
Context [admin system security pki reload key string](#)  
Tree [key](#)  
String Length 1 to 95  
Notes This element is mandatory.  
Introduced 23.3.R1  
Platforms All

### **show**

Synopsis Enter the **show** context  
Context [admin system security pki show](#)  
Tree [show](#)  
Description Commands in this context include operations to display the PKI file.  
Introduced 23.3.R1  
Platforms All

### **file-content**

Synopsis Display content of certificate related files  
Context [admin system security pki show file-content](#)  
Tree [file-content](#)  
Introduced 23.3.R1  
Platforms All

### **[file-path] string**

Synopsis Full path to the file to display  
Context [admin system security pki show file-content \[file-path\] string](#)  
Tree [\[file-path\]](#)

---

String Length	1 to 200
Notes	This element is mandatory.
Introduced	23.3.R1
Platforms	All

**format** *keyword*

Synopsis	Format of the file to display
Context	<a href="#">admin system security pki show file-content format keyword</a>
Tree	<a href="#">format</a>
Options	pkcs10, pkcs12, pkcs7-der, pkcs7-pem, pem, der
Notes	This element is mandatory.
Introduced	23.3.R1
Platforms	All

**password** *string*

Synopsis	File decryption password
Context	<a href="#">admin system security pki show file-content password string</a>
Tree	<a href="#">password</a>
String Length	1 to 32
Introduced	23.3.R1
Platforms	All

**type** *keyword*

Synopsis	Type of the file to display
Context	<a href="#">admin system security pki show file-content type keyword</a>
Tree	<a href="#">type</a>
Options	certificate, key, crl, csr
Notes	This element is mandatory.
Introduced	23.3.R1
Platforms	All

## update-certificate

Synopsis	Update End Entity certificate
Context	<a href="#">admin system security pki update-certificate</a>
Tree	<a href="#">update-certificate</a>
Description	When specified, the system triggers an update for the specified certificate according to the corresponding <b>configure system security pki certificate-auto-update</b> configuration.
Introduced	23.3.R1
Platforms	All

## certificate *reference*

Synopsis	Name of the certificate file to be updated
Context	<a href="#">admin system security pki update-certificate certificate reference</a>
Tree	<a href="#">certificate</a>
Reference	<b>state system security pki certificate-auto-update <i>string</i></b>
Notes	This element is mandatory.
Introduced	23.3.R1
Platforms	All

## secure-boot

Synopsis	Enter the <b>secure-boot</b> context
Context	<a href="#">admin system security secure-boot</a>
Tree	<a href="#">secure-boot</a>
Introduced	23.7.R1
Platforms	7750 SR-1-24D, 7750 SR-1-46S, 7750 SR-1-48D, 7750 SR-1-92S, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-s, 7950 XRS-20e

## activate

Synopsis	Activate secure boot on a CPM
Context	<a href="#">admin system security secure-boot activate</a>
Tree	<a href="#">activate</a>
Description	This command activates Secure Boot to enforce digital signature verification of the software on every boot.

Once Secure Boot is activated on a CPM, the capability is permanently enabled and cannot be disabled.

Introduced	23.7.R1
Platforms	7750 SR-1-24D, 7750 SR-1-46S, 7750 SR-1-48D, 7750 SR-1-92S, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-s, 7950 XRS-20e

### **card reference**

Synopsis	CPM slot where secure boot is activated or modified
Context	<a href="#">admin system security secure-boot activate card reference</a>
Tree	<a href="#">card</a>
Reference	<b>state cpm string</b>
Notes	This element is mandatory.
Introduced	23.7.R1
Platforms	7750 SR-1-24D, 7750 SR-1-46S, 7750 SR-1-48D, 7750 SR-1-92S, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-s, 7950 XRS-20e

### **confirmation-code string**

Synopsis	Confirmation code
Context	<a href="#">admin system security secure-boot activate confirmation-code string</a>
Tree	<a href="#">confirmation-code</a>
String Length	1 to 32
Introduced	23.7.R1
Platforms	7750 SR-1-24D, 7750 SR-1-46S, 7750 SR-1-48D, 7750 SR-1-92S, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-s, 7950 XRS-20e

### **serial-number string**

Synopsis	CPM card serial number which secure-boot activates
Context	<a href="#">admin system security secure-boot activate serial-number string</a>
Tree	<a href="#">serial-number</a>
String Length	1 to 32
Introduced	23.7.R1
Platforms	7750 SR-1-24D, 7750 SR-1-46S, 7750 SR-1-48D, 7750 SR-1-92S, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-s, 7950 XRS-20e

## revoke-key

Synopsis	Revoke secure boot keys
Context	<a href="#">admin system security secure-boot revoke-key</a>
Tree	<a href="#">revoke-key</a>
Introduced	23.7.R1
Platforms	7750 SR-1-24D, 7750 SR-1-46S, 7750 SR-1-48D, 7750 SR-1-92S, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-s, 7950 XRS-20e

## card reference

Synopsis	CPM slot where secure boot is activated or modified
Context	<a href="#">admin system security secure-boot revoke-key card reference</a>
Tree	<a href="#">card</a>
Reference	<b>state cpm string</b>
Notes	This element is mandatory.
Introduced	23.7.R1
Platforms	7750 SR-1-24D, 7750 SR-1-46S, 7750 SR-1-48D, 7750 SR-1-92S, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-s, 7950 XRS-20e

## confirmation-code string

Synopsis	Confirmation code
Context	<a href="#">admin system security secure-boot revoke-key confirmation-code string</a>
Tree	<a href="#">confirmation-code</a>
String Length	1 to 32
Introduced	23.7.R1
Platforms	7750 SR-1-24D, 7750 SR-1-46S, 7750 SR-1-48D, 7750 SR-1-92S, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-s, 7950 XRS-20e

## serial-number string

Synopsis	CPM card serial number which secure-boot activates
Context	<a href="#">admin system security secure-boot revoke-key serial-number string</a>
Tree	<a href="#">serial-number</a>
String Length	1 to 32

Introduced	23.7.R1
Platforms	7750 SR-1-24D, 7750 SR-1-46S, 7750 SR-1-48D, 7750 SR-1-92S, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-s, 7950 XRS-20e

## update-key

Synopsis	Update secure boot keys
Context	<a href="#">admin system security secure-boot update-key</a>
Tree	<a href="#">update-key</a>
Introduced	23.7.R1
Platforms	7750 SR-1-24D, 7750 SR-1-46S, 7750 SR-1-48D, 7750 SR-1-92S, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-s, 7950 XRS-20e

## card reference

Synopsis	CPM slot where secure boot is activated or modified
Context	<a href="#">admin system security secure-boot update-key card reference</a>
Tree	<a href="#">card</a>
Reference	<b>state cpm string</b>
Notes	This element is mandatory.
Introduced	23.7.R1
Platforms	7750 SR-1-24D, 7750 SR-1-46S, 7750 SR-1-48D, 7750 SR-1-92S, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-s, 7950 XRS-20e

## confirmation-code string

Synopsis	Confirmation code
Context	<a href="#">admin system security secure-boot update-key confirmation-code string</a>
Tree	<a href="#">confirmation-code</a>
String Length	1 to 32
Introduced	23.7.R1
Platforms	7750 SR-1-24D, 7750 SR-1-46S, 7750 SR-1-48D, 7750 SR-1-92S, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-s, 7950 XRS-20e

**serial-number *string***

Synopsis	CPM card serial number which secure-boot activates
Context	<a href="#">admin</a> <a href="#">system</a> <a href="#">security</a> <a href="#">secure-boot</a> <a href="#">update-key</a> <a href="#">serial-number</a> <i>string</i>
Tree	<a href="#">serial-number</a>

Introduced	23.7.R1
Platforms	7750 SR-1-24D, 7750 SR-1-46S, 7750 SR-1-48D, 7750 SR-1-92S, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-s, 7950 XRS-20e

**software-image *string***

Synopsis	Location of the target software image
Context	<a href="#">admin</a> <a href="#">system</a> <a href="#">security</a> <a href="#">secure-boot</a> <a href="#">update-key</a> <a href="#">software-image</a> <i>string</i>
Tree	<a href="#">software-image</a>
String Length	1 to 180
Notes	This element is mandatory.
Introduced	23.7.R1
Platforms	7750 SR-1-24D, 7750 SR-1-46S, 7750 SR-1-48D, 7750 SR-1-92S, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-s, 7950 XRS-20e

**validate**

Synopsis	Validate software signature for the specified image
Context	<a href="#">admin</a> <a href="#">system</a> <a href="#">security</a> <a href="#">secure-boot</a> <a href="#">validate</a>
Tree	<a href="#">validate</a>
Introduced	23.7.R1
Platforms	7750 SR-1-24D, 7750 SR-1-46S, 7750 SR-1-48D, 7750 SR-1-92S, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-s, 7950 XRS-20e

**software-image *string***

Synopsis	Location of the target software image
Context	<a href="#">admin</a> <a href="#">system</a> <a href="#">security</a> <a href="#">secure-boot</a> <a href="#">validate</a> <a href="#">software-image</a> <i>string</i>
Tree	<a href="#">software-image</a>
String Length	1 to 180
Notes	This element is mandatory.

---

Introduced	23.7.R1
Platforms	7750 SR-1-24D, 7750 SR-1-46S, 7750 SR-1-48D, 7750 SR-1-92S, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-s, 7950 XRS-20e

## system-password

Synopsis	Change a local system password
Context	<a href="#">admin system security system-password</a>
Tree	<a href="#">system-password</a>
Introduced	22.10.R2
Platforms	All

## admin-password

Synopsis	Administrative password
Context	<a href="#">admin system security system-password admin-password</a>
Tree	<a href="#">admin-password</a>
Notes	This element is mandatory.
Introduced	22.10.R2
Platforms	All

## telemetry

Synopsis	Enter the <b>telemetry</b> context
Context	<a href="#">admin system telemetry</a>
Tree	<a href="#">telemetry</a>
Introduced	19.10.R1
Platforms	All

## grpc

Synopsis	Enter the <b>grpc</b> context
Context	<a href="#">admin system telemetry grpc</a>
Tree	<a href="#">grpc</a>
Introduced	19.10.R1

Platforms All

## cancel

Synopsis Cancel the gRPC dynamic telemetry subscription

Context [admin system telemetry grpc cancel](#)

Tree [cancel](#)

Introduced 19.10.R1

Platforms All

## all

Synopsis Cancel gRPC dynamic telemetry for all subscriptions

Context [admin system telemetry grpc cancel all](#)

Tree [all](#)

Notes The following elements are part of a mandatory choice: **all** or **subscription-id**.

Introduced 19.10.R1

Platforms All

## subscription-id *number*

Synopsis ID of the telemetry subscription to cancel

Context [admin system telemetry grpc cancel subscription-id \*number\*](#)

Tree [subscription-id](#)

Max. Range 0 to 4294967295

Notes The following elements are part of a mandatory choice: **all** or **subscription-id**.

Introduced 19.10.R1

Platforms All

## tech-support

Synopsis Save technical support information to a file

Context [admin tech-support](#)

Tree [tech-support](#)

Introduced 20.10.R1

---

Platforms All

**[url]** *string*

Synopsis URL to save technical support information

Context [admin tech-support \[url\]](#) *string*

Tree [\[url\]](#)

String Length 1 to 180

Introduced 20.10.R1

Platforms All

## 2.2 Configuration mode commands

See “Configuring in the MD-CLI” in the *7450 ESS, 7750 SR, 7950 XRS, and VSR MD-CLI User Guide* for more information.

```

- annotate string
  - [cli-path] string
- commit
  - comment string
  - confirmed
    - accept
    - cancel
    - comment string
    - persist-id string
    - [timeout] number
- compare string [to] string
  - [cli-path] string
  - flat
  - full-context
  - lines number
  - netconf-rpc
  - summary
- copy
  - [cli-path] string
  - to string
- discard
  - [cli-path] string
- insert string
  - after
    - [cli-path] string
  - before
    - [cli-path] string
  - beginning
  - end
- load keyword
  - encryption-key string
  - interactive
  - [url] string
- rename
  - [cli-path] string
  - to string
- replace string with string
  - [cli-path] string
  - continue-on-error
  - depth number
  - ignore-case
- rollback
  - commit-id number
  - [rollback-id] (keyword | number)
- update
  - /configure
  - /bof
  - check
  - /debug
  - /li
- validate

```

## 2.2.1 Configuration mode command descriptions

### **annotate** [[comment-text](#)] *string*

Synopsis	Annotate a configuration element with a comment
Context	<a href="#">annotate</a> <i>string</i>
Tree	<a href="#">annotate</a>
Introduced	21.5.R1
Platforms	All

### **[comment-text]** *string*

Synopsis	Comment for the configuration element
Context	<a href="#">annotate</a> <i>string</i>
Tree	<a href="#">annotate</a>
String Length	0 to 2048
Notes	This element is part of a list key.
Introduced	21.5.R1
Platforms	All

### **[cli-path]** *string*

Synopsis	Absolute path or relative path from pwc, or 'pwc'
Context	<a href="#">annotate</a> <i>string</i> [ <a href="#">cli-path</a> ] <i>string</i>
Tree	<a href="#">cli-path</a>
Notes	This element is mandatory.
Introduced	21.5.R1
Platforms	All

### **commit**

Synopsis	Commit the candidate configuration
Context	<a href="#">commit</a>
Tree	<a href="#">commit</a>

Introduced 16.0.R1  
Platforms All

### **comment** *string*

Synopsis Comment associated with the commit  
Context [commit comment string](#)  
Tree [comment](#)  
String Length 1 to 2048  
Introduced 21.10.R1  
Platforms All

### **confirmed**

Synopsis Enter the **confirmed** context  
Context [commit confirmed](#)  
Tree [confirmed](#)  
Introduced 16.0.R1  
Platforms All

### **accept**

Synopsis Accept commit confirmed and cancel automatic rollback  
Context [commit confirmed accept](#)  
Tree [accept](#)  
Notes The following elements are part of a choice: **accept**, **cancel**, or (**comment** and **timeout**).  
Introduced 16.0.R1  
Platforms All

### **cancel**

Synopsis Cancel commit confirmed and roll back changes  
Context [commit confirmed cancel](#)  
Tree [cancel](#)

Description	When specified, the router rolls back the configuration and returns the changes to the candidate.
Notes	The following elements are part of a choice: <b>accept</b> , <b>cancel</b> , or ( <b>comment</b> and <b>timeout</b> ).
Introduced	16.0.R1
Platforms	All

### **comment** *string*

Synopsis	Comment associated with the commit
Context	<a href="#">commit confirmed comment</a> <i>string</i>
Tree	<a href="#">comment</a>
String Length	1 to 2048
Notes	The following elements are part of a choice: <b>accept</b> , <b>cancel</b> , or ( <b>comment</b> and <b>timeout</b> ).
Introduced	21.10.R1
Platforms	All

### **persist-id** *string*

Synopsis	Persistent confirmed commit ID
Context	<a href="#">commit confirmed persist-id</a> <i>string</i>
Tree	<a href="#">persist-id</a>
Introduced	16.0.R1
Platforms	All

### **[timeout]** *number*

Synopsis	Confirmed commit expiration timeout interval
Context	<a href="#">commit confirmed [timeout]</a> <i>number</i>
Tree	<a href="#">[timeout]</a>
Range	1 to 65535
Units	minutes
Default	10
Notes	The following elements are part of a choice: <b>accept</b> , <b>cancel</b> , or ( <b>comment</b> and <b>timeout</b> ).

Introduced 16.0.R1  
 Platforms All

### **compare** [*from*] *string to string*

Synopsis Compare changes between datastores  
 Context [compare string \[to\] string](#)  
 Tree [compare](#)  
 Introduced 16.0.R1  
 Platforms All

### **[from]** *string*

Synopsis Source configuration from which to compare  
 Context [compare string \[to\] string](#)  
 Tree [compare](#)  
 MD-CLI baseline  
 Default  
 Notes This element is part of a list key.  
 Introduced 16.0.R1  
 Platforms All

### **[to]** *string*

Synopsis Configuration to compare against source configuration  
 Context [compare string \[to\] string](#)  
 Tree [compare](#)  
 MD-CLI candidate  
 Default  
 Notes This element is part of a list key.  
 Introduced 16.0.R1  
 Platforms All

### **[cli-path]** *string*

Synopsis Absolute path or relative path from pwc

Context	<code>compare string [to] string [cli-path] string</code>
Tree	<code>[cli-path]</code>
Introduced	20.10.R1
Platforms	All

## flat

Synopsis	Show the context from the pwc on each line
Context	<code>compare string [to] string flat</code>
Tree	<code>flat</code>
Description	This option shows the hierarchy on each line starting from the present working context.
Notes	The following elements are part of a choice: <b>flat</b> or <b>netconf-rpc</b> .
Introduced	16.0.R1
Platforms	All

## full-context

Synopsis	Show the full context on each line
Context	<code>compare string [to] string full-context</code>
Tree	<code>full-context</code>
Introduced	16.0.R1
Platforms	All

## lines number

Synopsis	Number of lines of context to display before and after
Context	<code>compare string [to] string lines number</code>
Tree	<code>lines</code>
Description	This command specifies the number of lines of context to display before and after changed elements. The context is evaluated separately at each container. If the parameter value is larger than the available context, the maximum available context up to the container boundary is displayed.
Max. Range	0 to 4294967295
Default	0
Introduced	16.0.R1

Platforms All

## netconf-rpc

Synopsis Display changes in NETCONF <edit-config> RPC format

Context [compare string \[to\] string netconf-rpc](#)

Tree [netconf-rpc](#)

Description This option specifies the display of changes in NETCONF <edit-config> RPC format. This option is only supported with the **summary** option.

Notes The following elements are part of a choice: **flat** or **netconf-rpc**.

Introduced 21.5.R1

Platforms All

## summary

Synopsis Suppress specific differences and display a summary

Context [compare string \[to\] string summary](#)

Tree [summary](#)

Description This command allows the suppression of specific differences and displays a summarized comparison. The summarized differences in elements under the highest level container that was deleted is displayed with { ... }. A tilde (~) character is displayed to indicate the new value of an element that has changed.

Introduced 16.0.R1

Platforms All

## copy

Synopsis Copy a configuration element to another

Context [copy](#)

Tree [copy](#)

Introduced 20.10.R1

Platforms All

## [cli-path] string

Synopsis Absolute path or relative path from pwc, or 'pwc'

---

Context	<a href="#">copy [cli-path]</a> <i>string</i>
Tree	<a href="#">[cli-path]</a>
Introduced	20.10.R1
Platforms	All

### **to *string***

Synopsis	Destination path, or 'pwc'
Context	<a href="#">copy to <i>string</i></a>
Tree	<a href="#">to</a>
Introduced	20.10.R1
Platforms	All

### **discard**

Synopsis	Discard changes in the candidate configuration
Context	<a href="#">discard</a>
Tree	<a href="#">discard</a>
Introduced	16.0.R1
Platforms	All

### **[cli-path] *string***

Synopsis	Absolute path or relative path from pwc
Context	<a href="#">discard [cli-path]</a> <i>string</i>
Tree	<a href="#">[cli-path]</a>
Introduced	20.10.R1
Platforms	All

### **insert [[new-entry](#)] *string***

Synopsis	Insert an element into a user-ordered list
Context	<a href="#">insert <i>string</i></a>
Tree	<a href="#">insert</a>
Introduced	19.10.R1

Platforms All

### **[new-entry]** *string*

Synopsis Identification of the new entry  
 Context [insert string](#)  
 Tree [insert](#)  
 Notes This element is part of a list key.  
 Introduced 19.10.R1  
 Platforms All

### **after**

Synopsis Insert an entry after the specified entry  
 Context [insert string after](#)  
 Tree [after](#)  
 Notes The following elements are part of a choice: **after**, **before**, **beginning**, or **end**.  
 Introduced 19.10.R1  
 Platforms All

### **[cli-path]** *string*

Synopsis Absolute path or relative path from pwc  
 Context [insert string after \[cli-path\] string](#)  
 Tree [\[cli-path\]](#)  
 Introduced 19.10.R1  
 Platforms All

### **before**

Synopsis Insert an entry before the specified entry  
 Context [insert string before](#)  
 Tree [before](#)  
 Notes The following elements are part of a choice: **after**, **before**, **beginning**, or **end**.  
 Introduced 19.10.R1

Platforms All

### **[cli-path]** *string*

Synopsis Absolute path or relative path from pwc  
Context [insert string before \[cli-path\] string](#)  
Tree [\[cli-path\]](#)  
Introduced 19.10.R1  
Platforms All

### **beginning**

Synopsis Insert the new entry at the beginning of the list  
Context [insert string beginning](#)  
Tree [beginning](#)  
Notes The following elements are part of a choice: **after**, **before**, **beginning**, or **end**.  
Introduced 19.10.R1  
Platforms All

### **end**

Synopsis Insert the new entry at the end of the list  
Context [insert string end](#)  
Tree [end](#)  
Notes The following elements are part of a choice: **after**, **before**, **beginning**, or **end**.  
Introduced 19.10.R1  
Platforms All

### **load** [[mode](#)] *keyword*

Synopsis Load configuration into the candidate configuration  
Context [load keyword](#)  
Tree [load](#)  
Introduced 16.0.R1  
Platforms All

**[mode] keyword**

Synopsis	Load mode
Context	<a href="#">load keyword</a>
Tree	<a href="#">load</a>
Options	merge – Merge with the candidate configuration full-replace – Replace the candidate configuration
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

**encryption-key string**

Synopsis	Encryption key of the file to be loaded
Context	<a href="#">load keyword encryption-key string</a>
Tree	<a href="#">encryption-key</a>
String Length	8 to 32
Notes	The following elements are part of a mandatory choice: <b>interactive</b> or ( <b>encryption-key</b> and <b>url</b> ).
Introduced	21.7.R1
Platforms	All

**interactive**

Synopsis	Load the configuration interactively
Context	<a href="#">load keyword interactive</a>
Tree	<a href="#">interactive</a>
Description	This command allows the user to enter configuration commands directly in an interactive session.  This command is available with the <b>merge</b> option of the <b>load</b> command.  See "Loading configuration interactively" in the <i>7450 ESS, 7750 SR, 7950 XRS, and VSR MD-CLI User Guide</i> for more information.
Notes	The following elements are part of a mandatory choice: <b>interactive</b> or ( <b>encryption-key</b> and <b>url</b> ).
Introduced	22.10.R1
Platforms	All

**[url] string**

Synopsis	Location of the file to be loaded
Context	<a href="#">load</a> keyword <a href="#">[url]</a> string
Tree	<a href="#">[url]</a>
String Length	1 to 255
Notes	The following elements are part of a mandatory choice: <b>interactive</b> or ( <b>encryption-key</b> and <b>url</b> ).
Introduced	16.0.R1
Platforms	All

**rename**

Synopsis	Rename a list element
Context	<a href="#">rename</a>
Tree	<a href="#">rename</a>
Introduced	20.10.R1
Platforms	All

**[cli-path] string**

Synopsis	Source element path to the list, or 'pwc'
Context	<a href="#">rename</a> <a href="#">[cli-path]</a> string
Tree	<a href="#">[cli-path]</a>
Introduced	20.10.R1
Platforms	All

**to string**

Synopsis	Destination key name
Context	<a href="#">rename</a> <a href="#">to</a> string
Tree	<a href="#">to</a>
Introduced	20.10.R1
Platforms	All

**replace** *[pattern] string with string*

Synopsis	Match and replace values in the candidate configuration
Context	<a href="#">replace string with string</a>
Tree	<a href="#">replace</a>
Introduced	23.7.R1
Platforms	All

**[pattern]** *string*

Synopsis	String (") or regular expression (') pattern to match
Context	<a href="#">replace string with string</a>
Tree	<a href="#">replace</a>
Description	This command configures a text string or regular expression that defines the values to match.
String Length	1 to 255
Notes	This element is part of a list key.
Introduced	23.7.R1
Platforms	All

**with** *string*

Synopsis	String (") or regular expression (') pattern to replace
Context	<a href="#">replace string with string</a>
Tree	<a href="#">replace</a>
String Length	0 to 255
Notes	This element is part of a list key.
Introduced	23.7.R1
Platforms	All

**[cli-path]** *string*

Synopsis	Absolute path or relative path from pwc
Context	<a href="#">replace string with string [cli-path] string</a>
Tree	<a href="#">[cli-path]</a>
Introduced	23.7.R1

---

Platforms All

### **continue-on-error**

Synopsis Continue the replace operation upon errors  
Context [replace string with string continue-on-error](#)  
Tree [continue-on-error](#)  
Introduced 23.7.R1  
Platforms All

### **depth *number***

Synopsis Replace operation depth from the pwc  
Context [replace string with string depth number](#)  
Tree [depth](#)  
Range 1 to 4294967040  
Introduced 23.7.R1  
Platforms All

### **ignore-case**

Synopsis Ignore case in pattern match  
Context [replace string with string ignore-case](#)  
Tree [ignore-case](#)  
Introduced 23.7.R1  
Platforms All

### **rollback**

Synopsis Roll back to a previous configuration  
Context [rollback](#)  
Tree [rollback](#)  
Introduced 16.0.R1  
Platforms All

**commit-id** *number*

Synopsis	Commit ID to roll back to
Context	<a href="#">rollback commit-id</a> <i>number</i>
Tree	<a href="#">commit-id</a>
Range	1 to 4294967295
Notes	The following elements are part of a choice: <b>commit-id</b> or <b>rollback-id</b> .
Introduced	23.3.R1
Platforms	All

**[rollback-id]** (*keyword* | *number*)

Synopsis	Previous configuration to roll back to
Context	<a href="#">rollback [rollback-id]</a> ( <i>keyword</i>   <i>number</i> )
Tree	<a href="#">[rollback-id]</a>
Range	0 to 200
Options	startup – Configuration loaded when the system boots
Notes	The following elements are part of a choice: <b>commit-id</b> or <b>rollback-id</b> .
Introduced	23.3.R1
Platforms	All

**update**

Synopsis	Update the candidate baseline
Context	<a href="#">update</a>
Tree	<a href="#">update</a>
Introduced	16.0.R4
Platforms	All

**/configure**

Synopsis	Update the entire candidate
Context	<a href="#">update /configure</a>
Tree	<a href="#">/configure</a>
Introduced	16.0.R4

---

Platforms All

### **/bof**

Synopsis Update the entire BOF candidate

Context [update /bof](#)

Tree [/bof](#)

Introduced 20.10.R1

Platforms All

### **check**

Synopsis Perform dry-run update report without an actual update

Context [update check](#)

Tree [check](#)

Introduced 16.0.R4

Platforms All

### **/debug**

Synopsis Update the entire debug candidate

Context [update /debug](#)

Tree [/debug](#)

Introduced 21.5.R1

Platforms All

### **/li**

Synopsis Update the entire LI candidate

Context [update /li](#)

Tree [/li](#)

Introduced 19.10.R1

Platforms All

---

**validate**

Synopsis	Validate changes in the candidate configuration
Context	<a href="#">validate</a>
Tree	<a href="#">validate</a>
Introduced	16.0.R1
Platforms	All

## 2.3 environment commands

See “Environment commands” in the *7450 ESS, 7750 SR, 7950 XRS, and VSR MD-CLI User Guide* for more information.

```
environment
- command-alias
- alias string
  - admin-state keyword
  - cli-command string
  - description string
  - mount-point (keyword | string)
  - python-script reference
- command-completion
- enter boolean
- space boolean
- tab boolean
- console
- length number
- width number
- info-output
- always-display
  - admin-state boolean
- message-severity-level
- cli keyword
- more boolean
- progress-indicator
- admin-state keyword
- delay number
- type keyword
- prompt
- context boolean
- newline boolean
- timestamp boolean
- uncommitted-changes-indicator boolean
- python
- memory-reservation number
- minimum-available-memory number
- timeout number
- time-display keyword
- time-format keyword
```

## 2.3.1 environment command descriptions

### environment

Synopsis	Configure the environment settings for this session
Context	<a href="#">environment</a>
Tree	<a href="#">environment</a>
Introduced	16.0.R1
Platforms	All

### command-alias

Synopsis	Enter the <b>command-alias</b> context
Context	<a href="#">environment command-alias</a>
Tree	<a href="#">command-alias</a>
Description	<p>Commands in this context create aliases to existing MD-CLI commands or to Python scripts.</p> <p>Aliases may be mounted for use globally or for selected context paths. Arguments and output modifiers may be provided to aliases at configuration or run time.</p>
Introduced	21.7.R1
Platforms	All

### alias [[alias-name](#)] *string*

Synopsis	Enter the <b>alias</b> list instance
Context	<a href="#">environment command-alias alias</a> <i>string</i>
Tree	<a href="#">alias</a>
Description	<p>Commands in this context create aliases to existing MD-CLI commands or to Python applications.</p> <p>Aliases may be mounted for use globally or for selected context paths. Arguments and output modifiers may be provided to aliases at configuration or run time.</p>
Introduced	21.7.R1
Platforms	All

**[alias-name]** *string*

Synopsis	Alias name
Context	<a href="#">environment</a> <a href="#">command-alias</a> <a href="#">alias</a> <i>string</i>
Tree	<a href="#">alias</a>
String Length	1 to 64
Notes	This element is part of a list key.
Introduced	21.7.R1
Platforms	All

**admin-state** *keyword*

Synopsis	Administrative state of the alias
Context	<a href="#">environment</a> <a href="#">command-alias</a> <a href="#">alias</a> <i>string</i> <a href="#">admin-state</a> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Description	This command controls the administrative state of the MD-CLI alias. MD-CLI aliases that are administratively disabled cannot be executed, do not autocomplete in operational mode, and do not appear in ? help.
Options	enable, disable
Introduced	21.10.R1
Platforms	All

**cli-command** *string*

Synopsis	CLI command to run when executing the alias
Context	<a href="#">environment</a> <a href="#">command-alias</a> <a href="#">alias</a> <i>string</i> <a href="#">cli-command</a> <i>string</i>
Tree	<a href="#">cli-command</a>
String Length	1 to 255
Notes	The following elements are part of a mandatory choice: <b>cli-command</b> or <b>python-script</b> .
Introduced	21.7.R1
Platforms	All

**description** *string*

Synopsis	Text description
Context	<a href="#">environment</a> <a href="#">command-alias</a> <a href="#">alias</a> <i>string</i> <a href="#">description</a> <i>string</i>

Tree	<a href="#">description</a>
String Length	1 to 110
Introduced	21.7.R1
Platforms	All

### **mount-point** [[path](#)] (*keyword* | *string*)

Synopsis	Add a list entry for <b>mount-point</b>
Context	<a href="#">environment</a> <a href="#">command-alias</a> <a href="#">alias</a> <i>string</i> <a href="#">mount-point</a> ( <i>keyword</i>   <i>string</i> )
Tree	<a href="#">mount-point</a>
Min. Instances	1
Introduced	21.7.R1
Platforms	All

### **[path]** (*keyword* | *string*)

Synopsis	Mount point where the alias is available
Context	<a href="#">environment</a> <a href="#">command-alias</a> <a href="#">alias</a> <i>string</i> <a href="#">mount-point</a> ( <i>keyword</i>   <i>string</i> )
Tree	<a href="#">mount-point</a>
String Length	1 to 255
Options	global
Notes	This element is part of a list key.
Introduced	21.7.R1
Platforms	All

### **python-script** *reference*

Synopsis	Python script to run when executing the alias
Context	<a href="#">environment</a> <a href="#">command-alias</a> <a href="#">alias</a> <i>string</i> <a href="#">python-script</a> <i>reference</i>
Tree	<a href="#">python-script</a>
Reference	<b>state</b> <b>python</b> <b>python-script</b> <i>string</i>
Notes	The following elements are part of a mandatory choice: <b>cli-command</b> or <b>python-script</b> .
Introduced	21.7.R1
Platforms	All

## command-completion

Synopsis	Enter the <b>command-completion</b> context
Context	<a href="#">environment command-completion</a>
Tree	<a href="#">command-completion</a>
Introduced	16.0.R1
Platforms	All

## enter *boolean*

Synopsis	Complete the command when the Enter key is pressed
Context	<a href="#">environment command-completion enter <i>boolean</i></a>
Tree	<a href="#">enter</a>
Default	true
Introduced	16.0.R1
Platforms	All

## space *boolean*

Synopsis	Complete the command when the Space key is pressed
Context	<a href="#">environment command-completion space <i>boolean</i></a>
Tree	<a href="#">space</a>
Default	true
Introduced	16.0.R1
Platforms	All

## tab *boolean*

Synopsis	Complete the command when the Tab key is pressed
Context	<a href="#">environment command-completion tab <i>boolean</i></a>
Tree	<a href="#">tab</a>
Default	true
Introduced	16.0.R1
Platforms	All

## console

Synopsis	Enter the <b>console</b> context
Context	<a href="#">environment console</a>
Tree	<a href="#">console</a>
Introduced	16.0.R1
Platforms	All

## length *number*

Synopsis	Number of lines displayed on the console
Context	<a href="#">environment console length <i>number</i></a>
Tree	<a href="#">length</a>
Range	24 to 512
Default	24
Introduced	16.0.R1
Platforms	All

## width *number*

Synopsis	Number of columns displayed on the console
Context	<a href="#">environment console width <i>number</i></a>
Tree	<a href="#">width</a>
Range	80 to 512
Default	80
Introduced	16.0.R1
Platforms	All

## info-output

Synopsis	Enter the <b>info-output</b> context
Context	<a href="#">environment info-output</a>
Tree	<a href="#">info-output</a>
Introduced	22.2.R1
Platforms	All

## always-display

Synopsis	Enter the <b>always-display</b> context
Context	<a href="#">environment info-output always-display</a>
Tree	<a href="#">always-display</a>
Description	Commands in this context specify elements that are always displayed, regardless of whether they are set to their default value.
Introduced	22.2.R1
Platforms	All

## admin-state *boolean*

Synopsis	Always display admin-state elements
Context	<a href="#">environment info-output always-display admin-state <i>boolean</i></a>
Tree	<a href="#">admin-state</a>
Description	When configured to <b>true</b> , the values of the <b>admin-state</b> elements in <b>info</b> output (without the <b>detail</b> option) are always displayed, even if they are the default values.
Default	false
Introduced	22.2.R1
Platforms	All

## message-severity-level

Synopsis	Enter the <b>message-severity-level</b> context
Context	<a href="#">environment message-severity-level</a>
Tree	<a href="#">message-severity-level</a>
Introduced	16.0.R1
Platforms	All

## cli *keyword*

Synopsis	Message severity threshold for CLI messages
Context	<a href="#">environment message-severity-level cli <i>keyword</i></a>
Tree	<a href="#">cli</a>
Options	warning, info

---

Default	info
Introduced	16.0.R1
Platforms	All

### **more** *boolean*

Synopsis	Activate the pager when output is longer than a screen
Context	<a href="#">environment</a> <a href="#">more</a> <i>boolean</i>
Tree	<a href="#">more</a>
Default	true
Introduced	16.0.R1
Platforms	All

### **progress-indicator**

Synopsis	Enter the <b>progress-indicator</b> context
Context	<a href="#">environment</a> <a href="#">progress-indicator</a>
Tree	<a href="#">progress-indicator</a>
Introduced	16.0.R1
Platforms	All

### **admin-state** *keyword*

Synopsis	Administrative state of the progress indicator
Context	<a href="#">environment</a> <a href="#">progress-indicator</a> <a href="#">admin-state</a> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	enable
Introduced	16.0.R1
Platforms	All

### **delay** *number*

Synopsis	Delay before the progress indicator is displayed
Context	<a href="#">environment</a> <a href="#">progress-indicator</a> <a href="#">delay</a> <i>number</i>

---

Tree	<a href="#">delay</a>
Range	0 to 10000
Units	milliseconds
Default	1000
Introduced	16.0.R1
Platforms	All

### **type** *keyword*

Synopsis	Progress indicator output style
Context	<a href="#">environment</a> <a href="#">progress-indicator</a> <a href="#">type</a> <i>keyword</i>
Tree	<a href="#">type</a>
Options	dots
Default	dots
Introduced	16.0.R1
Platforms	All

### **prompt**

Synopsis	Enter the <b>prompt</b> context
Context	<a href="#">environment</a> <a href="#">prompt</a>
Tree	<a href="#">prompt</a>
Introduced	16.0.R1
Platforms	All

### **context** *boolean*

Synopsis	Show the current command context in the prompt
Context	<a href="#">environment</a> <a href="#">prompt</a> <a href="#">context</a> <i>boolean</i>
Tree	<a href="#">context</a>
Default	true
Introduced	16.0.R1
Platforms	All

**newline** *boolean*

Synopsis	Add a new line before every prompt line
Context	<a href="#">environment prompt newline</a> <i>boolean</i>
Tree	<a href="#">newline</a>
Default	true
Introduced	16.0.R1
Platforms	All

**timestamp** *boolean*

Synopsis	Show the timestamp before the first prompt line
Context	<a href="#">environment prompt timestamp</a> <i>boolean</i>
Tree	<a href="#">timestamp</a>
Default	false
Introduced	16.0.R1
Platforms	All

**uncommitted-changes-indicator** *boolean*

Synopsis	Show an asterisk (*) when uncommitted changes exist
Context	<a href="#">environment prompt uncommitted-changes-indicator</a> <i>boolean</i>
Tree	<a href="#">uncommitted-changes-indicator</a>
Default	true
Introduced	16.0.R1
Platforms	All

**python**

Synopsis	Enter the <b>python</b> context
Context	<a href="#">environment python</a>
Tree	<a href="#">python</a>
Introduced	21.10.R1
Platforms	All

**memory-reservation** *number*

Synopsis	Memory reserved per Python interpreter
Context	<a href="#">environment python memory-reservation</a> <i>number</i>
Tree	<a href="#">memory-reservation</a>
Range	1 to 500
Units	megabytes
Introduced	21.10.R1
Platforms	All

**minimum-available-memory** *number*

Synopsis	Minimum memory requirement to run a Python interpreter
Context	<a href="#">environment python minimum-available-memory</a> <i>number</i>
Tree	<a href="#">minimum-available-memory</a>
Range	5 to 50
Units	percent
Introduced	21.10.R1
Platforms	All

**timeout** *number*

Synopsis	Maximum run time before a Python application is stopped
Context	<a href="#">environment python timeout</a> <i>number</i>
Tree	<a href="#">timeout</a>
Range	30 to 86400
Units	seconds
Default	3600
Introduced	21.10.R1
Platforms	All

**time-display** *keyword*

Synopsis	Time zone to display time
Context	<a href="#">environment time-display</a> <i>keyword</i>
Tree	<a href="#">time-display</a>

---

Description	<p>This command configures the time zone for a timestamp displayed in outputs, such as event logs and <b>show</b> commands for the current CLI session.</p> <p>In event logs, the selected time is used to control the timestamps in the CLI output of <b>show log log-id</b> and in YANG state in the /state/log/log-id branch (for logs such as session, cli, memory, SNMP, and NETCONF).</p> <p>Also see the <b>configure log log-id time-format</b> command.</p>
Options	local, utc
Default	local
Introduced	16.0.R1
Platforms	All

### **time-format** *keyword*

Synopsis	Format to display the date and time
Context	<a href="#">environment time-format keyword</a>
Tree	<a href="#">time-format</a>
Description	This command specifies the format of the time display in the prompt, configuration, state, and certain <b>show</b> command output in the current CLI session.
Options	iso-8601, rfc-1123, rfc-3339
Default	rfc-3339
Introduced	20.5.R1
Platforms	All

## 2.4 file commands

See “File management” in the *7450 ESS, 7750 SR, 7950 XRS, and VSR Basic System Configuration Guide* for more information.

```

file
- change-directory
- [url] (sat-url | cflash-url | string-not-all-spaces | ftp-url)
- checksum
- [type] keyword
- [url] (sat-url | cflash-url | string-not-all-spaces | ftp-tftp-url)
- copy
- client-tls-profile string
- [destination-url] (sat-url | cflash-url | string-not-all-spaces | ftp-tftp-url | http-
url-loose | scp-url)
- direct-http
- force
- proxy string
- recursive
- router-instance string
- [source-url] (sat-url | cflash-url | string-not-all-spaces | ftp-tftp-url | http-url-
loose)
- disable
- active
- cflash-id string
- standby
- edit
- [url] (sat-url | cflash-url | string-not-all-spaces)
- enable
- active
- cflash-id string
- standby
- format
- [cflash-id] string
- list
- reverse
- [sort-order] keyword
- [url] (sat-url | cflash-url | string-not-all-spaces | ftp-url)
- make-directory
- [url] (sat-url | cflash-url | string-not-all-spaces | ftp-url)
- move
- client-tls-profile string
- [destination-url] (sat-url | cflash-url | string-not-all-spaces | ftp-url | http-url-
loose)
- direct-http
- force
- proxy string
- [source-url] (sat-url | cflash-url | string-not-all-spaces | ftp-url | http-url-loose)
- permission
- [attribute] keyword
- [url] (sat-url | cflash-url | string-not-all-spaces)
- remove
- client-tls-profile string
- direct-http
- force
- proxy string
- [url] (sat-url | cflash-url | string-not-all-spaces | ftp-url | http-url-loose)
- remove-directory
- force
- recursive
- [url] (sat-url | cflash-url | string-not-all-spaces | ftp-url)

```

## file repair

```
- repair
- [cflash-id] string
- show
- client-tls-profile string
- direct-http
- proxy string
- [url] (sat-url | cflash-url | string-not-all-spaces | ftp-tftp-url | http-url-loose)
- unzip
- create-destination
- [destination-url] (sat-url | cflash-url | string-not-all-spaces)
- force
- list
- [source-url] (sat-url | cflash-url | string-not-all-spaces | ftp-tftp-url | http-url-
loose)
- version
- [url] (sat-url | cflash-url | string-not-all-spaces | ftp-tftp-url)
```

## 2.4.1 file command descriptions

### file

Synopsis	Perform file operations
Context	<a href="#">file</a>
Tree	<a href="#">file</a>
Description	Commands in this context execute file management operations.
Introduced	20.10.R1
Platforms	All

### change-directory

Synopsis	Change the working directory
Context	<a href="#">file change-directory</a>
Tree	<a href="#">change-directory</a>
Introduced	20.10.R1
Platforms	All

### **[url]** (*sat-url* | *cflash-url* | *string-not-all-spaces* | *ftp-url*)

Synopsis	New working directory URL
Context	<a href="#">file change-directory [url]</a> ( <i>sat-url</i>   <i>cflash-url</i>   <i>string-not-all-spaces</i>   <i>ftp-url</i> )
Tree	<a href="#">[url]</a>
String Length	1 to 200
Default	.
Introduced	20.10.R1
Platforms	All

### checksum

Synopsis	Compute and display checksums
Context	<a href="#">file checksum</a>
Tree	<a href="#">checksum</a>

Description	This command computes and displays an image file or a checksum for a file.
Introduced	20.10.R1
Platforms	All

**[type] keyword**

Synopsis	Checksum option type
Context	<a href="#">file checksum</a> <a href="#">[type] keyword</a>
Tree	<a href="#">[type]</a>
Options	image, md5, sha256
Notes	This element is mandatory.
Introduced	20.10.R1
Platforms	All

**[url] (*sat-url* | *cflash-url* | *string-not-all-spaces* | *ftp-tftp-url*)**

Synopsis	File URL
Context	<a href="#">file checksum</a> <a href="#">[url] (<i>sat-url</i>   <i>cflash-url</i>   <i>string-not-all-spaces</i>   <i>ftp-tftp-url</i>)</a>
Tree	<a href="#">[url]</a>
String Length	1 to 200
Notes	This element is mandatory.
Introduced	20.10.R1
Platforms	All

**copy**

Synopsis	Copy files
Context	<a href="#">file copy</a>
Tree	<a href="#">copy</a>
Introduced	20.10.R1
Platforms	All

**client-tls-profile *string***

Synopsis	Connect over HTTP with a client TLS profile
----------	---

Context	<a href="#">file copy client-tls-profile</a> <i>string</i>
Tree	<a href="#">client-tls-profile</a>
String Length	1 to 32
Introduced	20.10.R1
Platforms	All

**[destination-url]** (*sat-url | cflash-url | string-not-all-spaces | ftp-tftp-url | http-url-loose | scp-url*)

Synopsis	Destination URL or '.' for the working directory
Context	<a href="#">file copy [destination-url]</a> ( <i>sat-url   cflash-url   string-not-all-spaces   ftp-tftp-url   http-url-loose   scp-url</i> )
Tree	<a href="#">[destination-url]</a>
String Length	1 to 200
Notes	This element is mandatory.
Introduced	20.10.R1
Platforms	All

### direct-http

Synopsis	Allow direct HTTP connection, do not follow redirects
Context	<a href="#">file copy direct-http</a>
Tree	<a href="#">direct-http</a>
Introduced	20.10.R1
Platforms	All

### force

Synopsis	Force copy without prompting before overwriting
Context	<a href="#">file copy force</a>
Tree	<a href="#">force</a>
Introduced	20.10.R1
Platforms	All

**proxy string**

Synopsis	Connect over HTTP with a proxy
Context	<a href="#">file copy proxy string</a>
Tree	<a href="#">proxy</a>
String Length	1 to 255
Introduced	20.10.R1
Platforms	All

**recursive**

Synopsis	Copy sub-directories encountered at the source URL
Context	<a href="#">file copy recursive</a>
Tree	<a href="#">recursive</a>
Description	This command recursively copies files and directories. If files or directories already exist, the operator is prompted to overwrite them. When the <b>force</b> command is enabled, a positive response to the overwrite prompts is assumed, and the operator is not prompted for confirmation. The existing files or directories are overwritten.
Introduced	21.10.R1
Platforms	All

**router-instance string**

Synopsis	Router name or VPRN service name
Context	<a href="#">file copy router-instance string</a>
Tree	<a href="#">router-instance</a>
Introduced	23.10.R1
Platforms	All

**[source-url]** (*sat-url* | *cflash-url* | *string-not-all-spaces* | *ftp-tftp-url* | *http-url-loose*)

Synopsis	Source URL
Context	<a href="#">file copy [source-url]</a> ( <i>sat-url</i>   <i>cflash-url</i>   <i>string-not-all-spaces</i>   <i>ftp-tftp-url</i>   <i>http-url-loose</i> )
Tree	<a href="#">[source-url]</a>
String Length	1 to 200
Notes	This element is mandatory.
Introduced	20.10.R1

---

Platforms All

## disable

Synopsis Disable compact flash devices  
Context [file disable](#)  
Tree [disable](#)  
Introduced 20.10.R1  
Platforms All

## active

Synopsis Disable all devices on the active CPM  
Context [file disable active](#)  
Tree [active](#)  
Notes The following elements are part of a choice: **active**, **cflash-id**, or **standby**.  
Introduced 20.10.R1  
Platforms All

## cflash-id *string*

Synopsis Disable the compact flash device  
Context [file disable cflash-id string](#)  
Tree [cflash-id](#)  
String Length 4 to 6  
Notes The following elements are part of a choice: **active**, **cflash-id**, or **standby**.  
Introduced 20.10.R1  
Platforms All

## standby

Synopsis Disable all devices on the standby CPM  
Context [file disable standby](#)  
Tree [standby](#)  
Notes The following elements are part of a choice: **active**, **cflash-id**, or **standby**.

Introduced	20.10.R1
Platforms	All

**edit**

Synopsis	Edit files with the text editor
Context	<a href="#">file edit</a>
Tree	<a href="#">edit</a>
Description	This command allows users to edit files with the text editor. See "Text editor" in the <i>7450 ESS, 7750 SR, 7950 XRS, and VSR Basic System Configuration Guide</i> for more information.
Introduced	22.10.R1
Platforms	All

**[url]** (*sat-url* | *cflash-url* | *string-not-all-spaces*)

Synopsis	File URL
Context	<a href="#">file edit [url]</a> ( <i>sat-url</i>   <i>cflash-url</i>   <i>string-not-all-spaces</i> )
Tree	<a href="#">[url]</a>
String Length	1 to 200
Notes	This element is mandatory.
Introduced	22.10.R1
Platforms	All

**enable**

Synopsis	Enable compact flash devices
Context	<a href="#">file enable</a>
Tree	<a href="#">enable</a>
Introduced	20.10.R1
Platforms	All

**active**

Synopsis	Enable all devices on the active CPM
----------	--------------------------------------

---

Context	<a href="#">file enable active</a>
Tree	<a href="#">active</a>
Notes	The following elements are part of a choice: <b>active</b> , <b>cflash-id</b> , or <b>standby</b> .
Introduced	20.10.R1
Platforms	All

### **cflash-id** *string*

Synopsis	Enable the compact flash device
Context	<a href="#">file enable cflash-id</a> <i>string</i>
Tree	<a href="#">cflash-id</a>
String Length	4 to 6
Notes	The following elements are part of a choice: <b>active</b> , <b>cflash-id</b> , or <b>standby</b> .
Introduced	20.10.R1
Platforms	All

### **standby**

Synopsis	Enable all devices on the standby CPM
Context	<a href="#">file enable standby</a>
Tree	<a href="#">standby</a>
Notes	The following elements are part of a choice: <b>active</b> , <b>cflash-id</b> , or <b>standby</b> .
Introduced	20.10.R1
Platforms	All

### **format**

Synopsis	Format a compact flash device
Context	<a href="#">file format</a>
Tree	<a href="#">format</a>
Introduced	20.10.R1
Platforms	All

**[cflash-id]** *string*

Synopsis	Compact flash ID
Context	<a href="#">file format</a> <b>[cflash-id]</b> <i>string</i>
Tree	<a href="#">[cflash-id]</a>
String Length	4 to 6
Introduced	20.10.R1
Platforms	All

**list**

Synopsis	List directory contents
Context	<a href="#">file list</a>
Tree	<a href="#">list</a>
Introduced	20.10.R1
Platforms	All

**reverse**

Synopsis	List files in reverse sort order
Context	<a href="#">file list reverse</a>
Tree	<a href="#">reverse</a>
Introduced	20.10.R1
Platforms	All

**[sort-order]** *keyword*

Synopsis	Sort order for the directory
Context	<a href="#">file list</a> <b>[sort-order]</b> <i>keyword</i>
Tree	<a href="#">[sort-order]</a>
Options	date, name, size
Introduced	20.10.R1
Platforms	All

**[url]** (*sat-url* | *cflash-url* | *string-not-all-spaces* | *ftp-url*)

Synopsis	Location of the directory to be listed
Context	<a href="#">file list [url]</a> ( <i>sat-url</i>   <i>cflash-url</i>   <i>string-not-all-spaces</i>   <i>ftp-url</i> )
Tree	<a href="#">[url]</a>
String Length	1 to 200
Default	.
Introduced	20.10.R1
Platforms	All

**make-directory**

Synopsis	Make a directory
Context	<a href="#">file make-directory</a>
Tree	<a href="#">make-directory</a>
Introduced	20.10.R1
Platforms	All

**[url]** (*sat-url* | *cflash-url* | *string-not-all-spaces* | *ftp-url*)

Synopsis	Directory location
Context	<a href="#">file make-directory [url]</a> ( <i>sat-url</i>   <i>cflash-url</i>   <i>string-not-all-spaces</i>   <i>ftp-url</i> )
Tree	<a href="#">[url]</a>
String Length	1 to 200
Notes	This element is mandatory.
Introduced	20.10.R1
Platforms	All

**move**

Synopsis	Move or rename files or directories
Context	<a href="#">file move</a>
Tree	<a href="#">move</a>
Introduced	20.10.R1
Platforms	All

**client-tls-profile** *string*

Synopsis	Connect over HTTP with a client TLS profile
Context	<a href="#">file move client-tls-profile</a> <i>string</i>
Tree	<a href="#">client-tls-profile</a>
String Length	1 to 32
Introduced	20.10.R1
Platforms	All

**[destination-url]** (*sat-url* | *cflash-url* | *string-not-all-spaces* | *ftp-url* | *http-url-loose*)

Synopsis	Destination URL or '.' for the working directory
Context	<a href="#">file move [destination-url]</a> ( <i>sat-url</i>   <i>cflash-url</i>   <i>string-not-all-spaces</i>   <i>ftp-url</i>   <i>http-url-loose</i> )
Tree	<a href="#">[destination-url]</a>
String Length	1 to 200
Notes	This element is mandatory.
Introduced	20.10.R1
Platforms	All

**direct-http**

Synopsis	Allow direct HTTP connection, do not follow redirects
Context	<a href="#">file move direct-http</a>
Tree	<a href="#">direct-http</a>
Introduced	20.10.R1
Platforms	All

**force**

Synopsis	Force move without prompting before overwriting
Context	<a href="#">file move force</a>
Tree	<a href="#">force</a>
Introduced	20.10.R1
Platforms	All

**proxy string**

Synopsis	Connect over HTTP with a proxy
Context	<a href="#">file move proxy string</a>
Tree	<a href="#">proxy</a>
String Length	1 to 255
Introduced	20.10.R1
Platforms	All

**[source-url]** (*sat-url* | *cflash-url* | *string-not-all-spaces* | *ftp-url* | *http-url-loose*)

Synopsis	Source URL
Context	<a href="#">file move [source-url]</a> ( <i>sat-url</i>   <i>cflash-url</i>   <i>string-not-all-spaces</i>   <i>ftp-url</i>   <i>http-url-loose</i> )
Tree	<a href="#">[source-url]</a>
String Length	1 to 200
Notes	This element is mandatory.
Introduced	20.10.R1
Platforms	All

**permission**

Synopsis	Show or set file permissions
Context	<a href="#">file permission</a>
Tree	<a href="#">permission</a>
Introduced	20.10.R1
Platforms	All

**[attribute]** *keyword*

Synopsis	File permission
Context	<a href="#">file permission [attribute]</a> <i>keyword</i>
Tree	<a href="#">[attribute]</a>
Options	read-only, read-write
Introduced	20.10.R1
Platforms	All

**[url]** (*sat-url* | *cflash-url* | *string-not-all-spaces*)

Synopsis	File URL to set permissions
Context	<a href="#">file permission</a> <a href="#">[url]</a> ( <i>sat-url</i>   <i>cflash-url</i>   <i>string-not-all-spaces</i> )
Tree	<a href="#">[url]</a>
String Length	1 to 200
Introduced	20.10.R1
Platforms	All

**remove**

Synopsis	Remove files
Context	<a href="#">file remove</a>
Tree	<a href="#">remove</a>
Introduced	20.10.R1
Platforms	All

**client-tls-profile** *string*

Synopsis	Connect over HTTP with a client TLS profile
Context	<a href="#">file remove client-tls-profile</a> <i>string</i>
Tree	<a href="#">client-tls-profile</a>
String Length	1 to 32
Introduced	20.10.R1
Platforms	All

**direct-http**

Synopsis	Allow direct HTTP connection, do not follow redirects
Context	<a href="#">file remove direct-http</a>
Tree	<a href="#">direct-http</a>
Introduced	20.10.R1
Platforms	All

## force

Synopsis	Force removal without prompting
Context	<a href="#">file remove force</a>
Tree	<a href="#">force</a>
Introduced	20.10.R1
Platforms	All

## proxy string

Synopsis	Connect over HTTP with a proxy
Context	<a href="#">file remove proxy string</a>
Tree	<a href="#">proxy</a>
String Length	1 to 255
Introduced	20.10.R1
Platforms	All

## [url] (*sat-url* | *cflash-url* | *string-not-all-spaces* | *ftp-url* | *http-url-loose*)

Synopsis	File URL
Context	<a href="#">file remove [url]</a> ( <i>sat-url</i>   <i>cflash-url</i>   <i>string-not-all-spaces</i>   <i>ftp-url</i>   <i>http-url-loose</i> )
Tree	<a href="#">[url]</a>
String Length	1 to 200
Notes	This element is mandatory.
Introduced	20.10.R1
Platforms	All

## remove-directory

Synopsis	Remove directories
Context	<a href="#">file remove-directory</a>
Tree	<a href="#">remove-directory</a>
Introduced	20.10.R1
Platforms	All

## force

Synopsis	Force removal without prompting
Context	<a href="#">file remove-directory force</a>
Tree	<a href="#">force</a>
Introduced	20.10.R1
Platforms	All

## recursive

Synopsis	Remove directory and contents recursively
Context	<a href="#">file remove-directory recursive</a>
Tree	<a href="#">recursive</a>
Introduced	20.10.R1
Platforms	All

## [url] (*sat-url* | *cflash-url* | *string-not-all-spaces* | *ftp-url*)

Synopsis	Directory URL
Context	<a href="#">file remove-directory [url]</a> ( <i>sat-url</i>   <i>cflash-url</i>   <i>string-not-all-spaces</i>   <i>ftp-url</i> )
Tree	<a href="#">[url]</a>
String Length	1 to 200
Notes	This element is mandatory.
Introduced	20.10.R1
Platforms	All

## repair

Synopsis	Repair a compact flash file system
Context	<a href="#">file repair</a>
Tree	<a href="#">repair</a>
Introduced	20.10.R1
Platforms	All

**[cflash-id] string**

Synopsis	Compact flash ID
Context	<a href="#">file repair</a> <b>[cflash-id]</b> <i>string</i>
Tree	<a href="#">[cflash-id]</a>
String Length	4 to 6
Introduced	20.10.R1
Platforms	All

**show**

Synopsis	Display the contents of a file
Context	<a href="#">file show</a>
Tree	<a href="#">show</a>
Introduced	20.10.R1
Platforms	All

**client-tls-profile string**

Synopsis	Connect over HTTP with a client TLS profile
Context	<a href="#">file show client-tls-profile</a> <i>string</i>
Tree	<a href="#">client-tls-profile</a>
String Length	1 to 32
Introduced	20.10.R1
Platforms	All

**direct-http**

Synopsis	Allow direct HTTP connection, do not follow redirects
Context	<a href="#">file show direct-http</a>
Tree	<a href="#">direct-http</a>
Introduced	20.10.R1
Platforms	All

**proxy string**

Synopsis	Connect over HTTP with a proxy
Context	<a href="#">file show proxy string</a>
Tree	<a href="#">proxy</a>
String Length	1 to 255
Introduced	20.10.R1
Platforms	All

**[url] (*sat-url* | *cflash-url* | *string-not-all-spaces* | *ftp-tftp-url* | *http-url-loose*)**

Synopsis	File URL
Context	<a href="#">file show [url] (<i>sat-url</i>   <i>cflash-url</i>   <i>string-not-all-spaces</i>   <i>ftp-tftp-url</i>   <i>http-url-loose</i>)</a>
Tree	<a href="#">[url]</a>
String Length	1 to 200
Notes	This element is mandatory.
Introduced	20.10.R1
Platforms	All

**unzip**

Synopsis	Unzip files
Context	<a href="#">file unzip</a>
Tree	<a href="#">unzip</a>
Introduced	20.10.R1
Platforms	All

**create-destination**

Synopsis	Create destination directory if it does not exist
Context	<a href="#">file unzip create-destination</a>
Tree	<a href="#">create-destination</a>
Introduced	20.10.R1
Platforms	All

**[destination-url]** (*sat-url* | *cflash-url* | *string-not-all-spaces*)

Synopsis	Destination URL or '.' for the working directory
Context	<a href="#">file unzip</a> <a href="#">[destination-url]</a> ( <i>sat-url</i>   <i>cflash-url</i>   <i>string-not-all-spaces</i> )
Tree	<a href="#">[destination-url]</a>
String Length	1 to 200
Introduced	20.10.R1
Platforms	All

**force**

Synopsis	Force the unzip operation without prompting
Context	<a href="#">file unzip</a> <a href="#">force</a>
Tree	<a href="#">force</a>
Description	<p>When configured, files and directories that already exist in the destination URL are overwritten without prompting.</p> <p>The system does not automatically create directories explicitly specified by the destination URL. To allow the system to create new directories, use the <b>create-destination</b> command.</p> <p>When unconfigured, the system prompts the user before overwriting a file or directory.</p>
Notes	The following elements are part of a choice: <b>force</b> or <b>list</b> .
Introduced	20.10.R1
Platforms	All

**list**

Synopsis	List the file contents without the unzip operation
Context	<a href="#">file unzip</a> <a href="#">list</a>
Tree	<a href="#">list</a>
Notes	The following elements are part of a choice: <b>force</b> or <b>list</b> .
Introduced	20.10.R1
Platforms	All

**[source-url]** (*sat-url* | *cflash-url* | *string-not-all-spaces* | *ftp-tftp-url* | *http-url-loose*)

Synopsis	Source URL
----------	------------

---

Context	<a href="#">file unzip [source-url]</a> ( <i>sat-url</i>   <i>cflash-url</i>   <i>string-not-all-spaces</i>   <i>ftp-tftp-url</i>   <i>http-url-loose</i> )
Tree	<a href="#">[source-url]</a>
String Length	1 to 200
Notes	This element is mandatory.
Introduced	20.10.R1
Platforms	All

## version

Synopsis	Display the version of an SR OS image file
Context	<a href="#">file version</a>
Tree	<a href="#">version</a>
Introduced	20.10.R1
Platforms	All

## [url] (*sat-url* | *cflash-url* | *string-not-all-spaces* | *ftp-tftp-url*)

Synopsis	File URL
Context	<a href="#">file version [url]</a> ( <i>sat-url</i>   <i>cflash-url</i>   <i>string-not-all-spaces</i>   <i>ftp-tftp-url</i> )
Tree	<a href="#">[url]</a>
String Length	1 to 200
Notes	This element is mandatory.
Introduced	20.10.R1
Platforms	All

## 2.5 Global commands

Global commands are used for operational functions, such as entering configuration sessions, navigating the CLI, executing OAM commands, and logging into remote hosts.

```

- back number
- bof
  - exclusive
  - private
  - read-only
- configure
  - exclusive
  - global
  - private
  - read-only
- debug
  - exclusive
  - private
  - read-only
- delete string
- edit-config
  - bof
  - debug
  - exclusive
  - global
  - li
  - private
  - read-only
- enable
- exec string
  - echo
- exit
  - all
- history
- info keyword
  - [cli-path] string
  - converted
  - depth number
  - detail
  - differences
  - flat
  - full-context
  - inheritance
  - json
  - model keyword
  - units
  - values
  - xml
- li
  - exclusive
  - private
  - read-only
- logout
- oam
  - efm
    - local-loopback
      - [action] keyword
      - port-id string
    - remote-loopback
      - [action] keyword
      - port-id string

```

## [\[from\]](#) *keyword*

Synopsis Source datastore

Context [info keyword](#)

Tree [info](#)

Description This command specifies the source datastore. This option is not supported for **state** elements.

Options  
 candidate – The candidate datastore  
 running – The running datastore  
 baseline – The baseline candidate configuration

	intended – The intended datastore
MD-CLI	candidate
Default	
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

**[cli-path]** *string*

Synopsis	Absolute path or relative path from pwc
Context	<a href="#">info</a> keyword <a href="#">[cli-path]</a> <i>string</i>
Tree	<a href="#">[cli-path]</a>
Introduced	20.10.R1
Platforms	All

**converted**

Synopsis	Include converted third-party model configuration from the running datastore
Context	<a href="#">info</a> keyword <a href="#">converted</a>
Tree	<a href="#">converted</a>
Description	<p>This option specifies the inclusion of converted configuration values from third party models in the output and is only available when <b>configure system management-interface yang-modules openconfig-modules</b> is set to <b>true</b>.</p> <p>This option should only be used in the <b>configure</b> region when third party models are used. The output with this option is the same as <b>info</b> when used in other configuration regions.</p> <p>This option is not supported for <b>state</b> elements.</p>
Introduced	16.0.R1
Platforms	All

**depth** *number*

Synopsis	Depth limit from the pwc
Context	<a href="#">info</a> keyword <a href="#">depth</a> <i>number</i>
Tree	<a href="#">depth</a>
Range	1 to 4294967040
Introduced	23.10.R1

---

Platforms All

### detail

Synopsis Include default and unconfigured values  
Context [info keyword detail](#)  
Tree [detail](#)  
Introduced 16.0.R1  
Platforms All

### differences

Synopsis Show the different values each model tries to set  
Context [info keyword differences](#)  
Tree [differences](#)  
Description When specified, this command shows only the values that are different when multiple models set the same configuration element.  
Notes The following elements are part of a choice: **differences**, **model**, or **values**.  
Introduced 23.3.R1  
Platforms All

### flat

Synopsis Show the context from the pwc on each line  
Context [info keyword flat](#)  
Tree [flat](#)  
Description This option shows the hierarchy on each line starting from the present working context.  
Notes The following elements are part of a choice: **flat**, **json**, or **xml**.  
Introduced 16.0.R1  
Platforms All

### full-context

Synopsis Show the full context on each line  
Context [info keyword full-context](#)

Tree	<a href="#">full-context</a>
Introduced	16.0.R1
Platforms	All

## inheritance

Synopsis	Include configuration inherited from configuration groups
Context	<a href="#">info keyword inheritance</a>
Tree	<a href="#">inheritance</a>
Description	<p>This option specifies the inclusion of configuration inherited from configuration groups in the output.</p> <p>This option should only be used in the <b>configure</b> region when configuration groups are used. The output with this option is the same as <b>info</b> when used in other configuration regions.</p> <p>This option is not supported for <b>state</b> elements.</p>
Introduced	16.0.R1
Platforms	All

## json

Synopsis	Show the output in indented JSON IETF format
Context	<a href="#">info keyword json</a>
Tree	<a href="#">json</a>
Notes	The following elements are part of a choice: <b>flat</b> , <b>json</b> , or <b>xml</b> .
Introduced	19.10.R1
Platforms	All

## model keyword

Synopsis	Data model for which to display converted output
Context	<a href="#">info keyword model keyword</a>
Tree	<a href="#">model</a>
Description	<p>This option specifies the data model for which to display the converted output.</p> <p>This option is only supported with the <b>converted</b> option and is only available when <b>configure system management-interface yang-modules openconfig-modules</b> is set to <b>true</b>.</p>

Options	all – All models openconfig – OpenConfig models
Default	all
Notes	The following elements are part of a choice: <b>differences</b> , <b>model</b> , or <b>values</b> .
Introduced	20.7.R1
Platforms	All

## units

Synopsis	Include unit types for applicable elements
Context	<a href="#">info keyword units</a>
Tree	<a href="#">units</a>
Introduced	20.5.R1
Platforms	All

## values

Synopsis	Show all the values each model tries to set
Context	<a href="#">info keyword values</a>
Tree	<a href="#">values</a>
Description	When specified, this command shows all the values that each model tries to set.
Notes	The following elements are part of a choice: <b>differences</b> , <b>model</b> , or <b>values</b> .
Introduced	23.3.R1
Platforms	All

## xml

Synopsis	Show the output in indented XML format
Context	<a href="#">info keyword xml</a>
Tree	<a href="#">xml</a>
Notes	The following elements are part of a choice: <b>flat</b> , <b>json</b> , or <b>xml</b> .
Introduced	20.7.R1
Platforms	All

## li

Synopsis	Enter a candidate configuration mode
Context	<a href="#">li</a>
Tree	<a href="#">li</a>
Introduced	19.10.R1
Platforms	All

## exclusive

Synopsis	Enter exclusive configuration mode
Context	<a href="#">li exclusive</a>
Tree	<a href="#">exclusive</a>
Introduced	19.10.R1
Platforms	All

## private

Synopsis	Enter private configuration mode
Context	<a href="#">li private</a>
Tree	<a href="#">private</a>
Introduced	19.10.R1
Platforms	All

## read-only

Synopsis	Enter read-only configuration mode
Context	<a href="#">li read-only</a>
Tree	<a href="#">read-only</a>
Introduced	19.10.R1
Platforms	All

## logout

Synopsis	Exit the CLI session
Context	<a href="#">logout</a>

---

Tree	<a href="#">logout</a>
Introduced	16.0.R1
Platforms	All

## oam

Synopsis	Perform OAM tests
Context	<a href="#">oam</a>
Tree	<a href="#">oam</a>
Introduced	20.2.R1
Platforms	All

Synopsis	Enter the <b>efm</b> context
Context	<a href="#">oam efm</a>
Tree	<a href="#">efm</a>
Introduced	20.2.R1
Platforms	All

## local-loopback

Synopsis	Start or stop local loopback test on a port
Context	<a href="#">oam efm local-loopback</a>
Tree	<a href="#">local-loopback</a>
Introduced	20.2.R1
Platforms	All

## [action] keyword

Synopsis	Action type for the test
Context	<a href="#">oam efm local-loopback [action] keyword</a>
Tree	<a href="#">[action]</a>
Options	start, stop
Notes	This element is mandatory.

Introduced 20.2.R1  
Platforms All

### **port-id** *string*

Synopsis Port ID for the test  
Context [oam efm local-loopback port-id string](#)  
Tree [port-id](#)  
Notes This element is mandatory.  
Introduced 20.2.R1  
Platforms All

### **remote-loopback**

Synopsis Start or stop remote loopback test on a port  
Context [oam efm remote-loopback](#)  
Tree [remote-loopback](#)  
Introduced 20.2.R1  
Platforms All

### **[action]** *keyword*

Synopsis Action type for the test  
Context [oam efm remote-loopback \[action\] keyword](#)  
Tree [\[action\]](#)  
Options start, stop  
Notes This element is mandatory.  
Introduced 20.2.R1  
Platforms All

### **port-id** *string*

Synopsis Port ID for the test  
Context [oam efm remote-loopback port-id string](#)  
Tree [port-id](#)

Notes	This element is mandatory.
Introduced	20.2.R1
Platforms	All

### **eth-cfm**

Synopsis	Initiate an Ethernet Connectivity Fault Management test
Context	<a href="#">oam eth-cfm</a>
Tree	<a href="#">eth-cfm</a>
Introduced	20.2.R1
Platforms	All

### **eth-test**

Synopsis	Initiate an OAM ETH-CFM test
Context	<a href="#">oam eth-cfm eth-test</a>
Tree	<a href="#">eth-test</a>
Introduced	20.2.R1
Platforms	All

### **data-length** *number*

Synopsis	Size of the padding to be added to the frame
Context	<a href="#">oam eth-cfm eth-test data-length</a> <i>number</i>
Tree	<a href="#">data-length</a>
Range	64 to 1500
Default	64
Introduced	20.2.R1
Platforms	All

### **[destination]** (*mac-unicast-address-no-zero* | *number*)

Synopsis	Destination MAC address or remote MEP ID of the peer
Context	<a href="#">oam eth-cfm eth-test [destination]</a> ( <i>mac-unicast-address-no-zero</i>   <i>number</i> )
Tree	<a href="#">[destination]</a>

---

Range	1 to 8191
Notes	This element is mandatory.
Introduced	20.2.R1
Platforms	All

### **ma-admin-name** *reference*

Synopsis	Association name
Context	<a href="#">oam eth-cfm eth-test ma-admin-name reference</a>
Tree	<a href="#">ma-admin-name</a>
Reference	<b>state eth-cfm domain string association string</b>
Notes	This element is mandatory.
Introduced	20.2.R1
Platforms	All

### **md-admin-name** *reference*

Synopsis	Domain name
Context	<a href="#">oam eth-cfm eth-test md-admin-name reference</a>
Tree	<a href="#">md-admin-name</a>
Reference	<b>state eth-cfm domain string</b>
Notes	This element is mandatory.
Introduced	20.2.R1
Platforms	All

### **mep-id** *number*

Synopsis	Local Maintenance Association Endpoint (MEP) ID
Context	<a href="#">oam eth-cfm eth-test mep-id number</a>
Tree	<a href="#">mep-id</a>
Range	1 to 8191
Notes	This element is mandatory.
Introduced	20.2.R1
Platforms	All

**priority number**

Synopsis	Frame priority that can be manipulated by QoS policies
Context	<a href="#">oam eth-cfm eth-test priority number</a>
Tree	<a href="#">priority</a>
Range	0 to 7
Default	7
Introduced	20.2.R1
Platforms	All

**linktrace**

Synopsis	Initiate a linktrace test
Context	<a href="#">oam eth-cfm linktrace</a>
Tree	<a href="#">linktrace</a>
Introduced	20.2.R1
Platforms	All

**[destination]** (*mac-unicast-address-no-zero | number*)

Synopsis	Destination MAC address or remote MEP ID of the peer
Context	<a href="#">oam eth-cfm linktrace [destination]</a> ( <i>mac-unicast-address-no-zero   number</i> )
Tree	<a href="#">[destination]</a>
Range	1 to 8191
Notes	This element is mandatory.
Introduced	20.2.R1
Platforms	All

**ma-admin-name reference**

Synopsis	Association name
Context	<a href="#">oam eth-cfm linktrace ma-admin-name reference</a>
Tree	<a href="#">ma-admin-name</a>
Reference	<b>state eth-cfm domain string association string</b>
Notes	This element is mandatory.

Introduced 20.2.R1  
Platforms All

### **md-admin-name** *reference*

Synopsis Domain name  
Context [oam eth-cfm linktrace md-admin-name reference](#)  
Tree [md-admin-name](#)  
Reference **state eth-cfm domain string**  
Notes This element is mandatory.  
Introduced 20.2.R1  
Platforms All

### **mep-id** *number*

Synopsis Local Maintenance Association Endpoint (MEP) ID  
Context [oam eth-cfm linktrace mep-id number](#)  
Tree [mep-id](#)  
Range 1 to 8191  
Notes This element is mandatory.  
Introduced 20.2.R1  
Platforms All

### **ttl** *number*

Synopsis Time to live for a returned linktrace  
Context [oam eth-cfm linktrace ttl number](#)  
Tree [ttl](#)  
Range 0 to 255  
Default 64  
Introduced 20.2.R1  
Platforms All

**loopback**

Synopsis	Initiate a loopback test
Context	<a href="#">oam eth-cfm loopback</a>
Tree	<a href="#">loopback</a>
Introduced	20.2.R1
Platforms	All

**[destination]** (*mac-unicast-address-no-zero | keyword | number*)

Synopsis	Destination MAC address or remote MEP ID of the peer
Context	<a href="#">oam eth-cfm loopback [destination]</a> ( <i>mac-unicast-address-no-zero   keyword   number</i> )
Tree	<a href="#">[destination]</a>
Range	1 to 8191
Options	multicast – Class one destination multicast address based on the level of the local MEP
Notes	This element is mandatory.
Introduced	20.2.R1
Platforms	All

**interval** *number*

Synopsis	Time between probes within the test run
Context	<a href="#">oam eth-cfm loopback interval</a> <i>number</i>
Tree	<a href="#">interval</a>
Range	0 to 600
Units	deciseconds
Default	0
Introduced	20.2.R1
Platforms	All

**lbm-padding** *number*

Synopsis	Data portion size of the data TLV, no octet string
Context	<a href="#">oam eth-cfm loopback lbm-padding</a> <i>number</i>
Tree	<a href="#">lbm-padding</a>

Description	This command specifies the size of the data portion of the data TLV which does not allow for an optional octet string.  MSDU is not processed when setting is in use. A value of 0 means that no data TLV is added to the packet. This is specified with an octet string. This parameter and <b>size</b> are mutually exclusive.
Range	0   3 to 9778
Default	0
Introduced	20.2.R1
Platforms	All

### **ma-admin-name** *reference*

Synopsis	Association name
Context	<a href="#">oam eth-cfm loopback ma-admin-name reference</a>
Tree	<a href="#">ma-admin-name</a>
Reference	<b>state eth-cfm domain string association string</b>
Notes	This element is mandatory.
Introduced	20.2.R1
Platforms	All

### **md-admin-name** *reference*

Synopsis	Domain name
Context	<a href="#">oam eth-cfm loopback md-admin-name reference</a>
Tree	<a href="#">md-admin-name</a>
Reference	<b>state eth-cfm domain string</b>
Notes	This element is mandatory.
Introduced	20.2.R1
Platforms	All

### **mep-id** *number*

Synopsis	Local Maintenance Association Endpoint (MEP) ID
Context	<a href="#">oam eth-cfm loopback mep-id number</a>
Tree	<a href="#">mep-id</a>

Range	1 to 8191
Notes	This element is mandatory.
Introduced	20.2.R1
Platforms	All

### **priority number**

Synopsis	Frame priority that can be manipulated by QoS policies
Context	<a href="#">oam eth-cfm loopback priority number</a>
Tree	<a href="#">priority</a>
Range	0 to 7
Introduced	20.2.R1
Platforms	All

### **send-count number**

Synopsis	Number of loopback messages to send
Context	<a href="#">oam eth-cfm loopback send-count number</a>
Tree	<a href="#">send-count</a>
Range	1 to 1024
Default	1
Introduced	20.2.R1
Platforms	All

### **size number**

Synopsis	Data portion size of the data TLV, octet string allowed
Context	<a href="#">oam eth-cfm loopback size number</a>
Tree	<a href="#">size</a>
Description	This command specifies the size of the data portion of the data TLV allowing for an optional octet string to be included.  A value of 0 means that no data TLV is added to the packet. This parameter and <b>lbm-padding</b> are mutually exclusive.
Range	0 to 1500
Units	bytes

Default	0
Introduced	20.2.R1
Platforms	All

**timeout** *number*

Synopsis	Wait time for a reply to a sent message request
Context	<a href="#">oam eth-cfm loopback timeout</a> <i>number</i>
Tree	<a href="#">timeout</a>
Description	This command specifies the time the router waits for a message reply after sending a message request.  Upon expiration of the timeout, the router assumes that the message response is not received. Any response received after the timeout is silently discarded.
Range	1 to 10
Units	seconds
Default	5
Introduced	20.2.R1
Platforms	All

**one-way-delay-test**

Synopsis	Initiate a one-way delay test
Context	<a href="#">oam eth-cfm one-way-delay-test</a>
Tree	<a href="#">one-way-delay-test</a>
Introduced	20.2.R1
Platforms	All

**[destination]** (*mac-unicast-address-no-zero* | *number*)

Synopsis	Destination MAC address or remote MEP ID of the peer
Context	<a href="#">oam eth-cfm one-way-delay-test [destination]</a> ( <i>mac-unicast-address-no-zero</i>   <i>number</i> )
Tree	<a href="#">[destination]</a>
Range	1 to 8191
Notes	This element is mandatory.
Introduced	20.2.R1

----------	---

Context	<a href="#">oam lsp-ping</a>
Tree	<a href="#">lsp-ping</a>
Introduced	23.3.R1
Platforms	All

## **bgp-label**

Synopsis	Perform a BGP-label LSP trace test
Context	<a href="#">oam lsp-ping bgp-label</a>
Tree	<a href="#">bgp-label</a>
Description	This command option performs a Border Gateway Protocol (BGP-label) LSP trace test using Target FEC Stack code point "BGP labeled IPv4 prefix".
Introduced	23.3.R1
Platforms	All

## **fc keyword**

Synopsis	QoS forwarding class for the sent echo request packet
Context	<a href="#">oam lsp-ping bgp-label fc keyword</a>
Tree	<a href="#">fc</a>
Options	be, l2, af, l1, h2, ef, h1, nc
Default	be
Introduced	23.3.R1
Platforms	All

## **interface reference**

Synopsis	Egress router interface to use with path destination
Context	<a href="#">oam lsp-ping bgp-label interface reference</a>
Tree	<a href="#">interface</a>
Reference	<b>state router</b> <i>string</i> <b>interface</b> <i>string</i>
Notes	The following elements are part of a choice: <b>interface</b> or <b>next-hop</b> .
Introduced	23.3.R1
Platforms	All

**interval** *number*

Synopsis	Minimum time to expire before next echo request is sent
Context	<a href="#">oam lsp-ping bgp-label interval</a> <i>number</i>
Tree	<a href="#">interval</a>
Range	1 to 10
Units	seconds
Default	1
Introduced	23.3.R1
Platforms	All

**next-hop** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	Egress IP next hop address to use with path destination
Context	<a href="#">oam lsp-ping bgp-label next-hop</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	<a href="#">next-hop</a>
Notes	The following elements are part of a choice: <b>interface</b> or <b>next-hop</b> .
Introduced	23.3.R1
Platforms	All

**path-destination** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	IP address of the path destination
Context	<a href="#">oam lsp-ping bgp-label path-destination</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	<a href="#">path-destination</a>
Introduced	23.3.R1
Platforms	All

**prefix** (*ipv4-prefix* | *ipv6-prefix*)

Synopsis	Destination IP prefix for the test
Context	<a href="#">oam lsp-ping bgp-label prefix</a> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> )
Tree	<a href="#">prefix</a>
Notes	This element is mandatory.
Introduced	23.3.R1

---

Platforms All

### **profile** *keyword*

Synopsis QoS profile for the transmitted echo request packets  
Context [oam lsp-ping bgp-label profile keyword](#)  
Tree [profile](#)  
Options in, out  
Default out  
Introduced 23.3.R1  
Platforms All

### **send-count** *number*

Synopsis Number of echo request packets to send  
Context [oam lsp-ping bgp-label send-count number](#)  
Tree [send-count](#)  
Range 1 to 100  
Units packets  
Default 1  
Introduced 23.3.R1  
Platforms All

### **size** *number*

Synopsis Echo request packet pad size  
Context [oam lsp-ping bgp-label size number](#)  
Tree [size](#)  
Range 1 to 9786  
Units bytes  
Default 1  
Introduced 23.3.R1  
Platforms All

**source-ip-address** (*ipv4-address-no-zone | ipv6-address-no-zone*)

Synopsis	Source IP address
Context	<a href="#">oam lsp-ping bgp-label source-ip-address</a> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> )
Tree	<a href="#">source-ip-address</a>
Introduced	23.3.R1
Platforms	All

**timeout** *number*

Synopsis	Time to wait for a reply after sending an echo request
Context	<a href="#">oam lsp-ping bgp-label timeout</a> <i>number</i>
Tree	<a href="#">timeout</a>
Range	1 to 10
Units	seconds
Default	5
Introduced	23.3.R1
Platforms	All

**ttl** *number*

Synopsis	TTL value for the MPLS label of the echo request
Context	<a href="#">oam lsp-ping bgp-label ttl</a> <i>number</i>
Tree	<a href="#">ttl</a>
Range	1 to 255
Default	255
Introduced	23.3.R1
Platforms	All

**ldp**

Synopsis	Perform Label Distribution Protocol (LDP) LSP ping test
Context	<a href="#">oam lsp-ping ldp</a>
Tree	<a href="#">ldp</a>
Introduced	23.3.R1

---

Platforms All

### **fc** keyword

Synopsis QoS forwarding class for the sent echo request packet  
Context [oam lsp-ping ldp fc keyword](#)  
Tree [fc](#)  
Options be, l2, af, l1, h2, ef, h1, nc  
Default be  
Introduced 23.3.R1  
Platforms All

### **interface** reference

Synopsis Egress router interface to use with path destination  
Context [oam lsp-ping ldp interface reference](#)  
Tree [interface](#)  
Reference **state router** *string interface string*  
Notes The following elements are part of a choice: **interface** or **next-hop**.  
Introduced 23.3.R1  
Platforms All

### **interval** number

Synopsis Minimum time to expire before next echo request is sent  
Context [oam lsp-ping ldp interval number](#)  
Tree [interval](#)  
Range 1 to 10  
Units seconds  
Default 1  
Introduced 23.3.R1  
Platforms All

**next-hop** (*ipv4-address-no-zone | ipv6-address-no-zone*)

Synopsis	Egress IP next hop address to use with path destination
Context	<a href="#">oam lsp-ping ldp next-hop</a> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> )
Tree	<a href="#">next-hop</a>
Notes	The following elements are part of a choice: <b>interface</b> or <b>next-hop</b> .
Introduced	23.3.R1
Platforms	All

**path-destination** (*ipv4-address-no-zone | ipv6-address-no-zone*)

Synopsis	IP address of the path destination
Context	<a href="#">oam lsp-ping ldp path-destination</a> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> )
Tree	<a href="#">path-destination</a>
Introduced	23.3.R1
Platforms	All

**prefix** (*ipv4-prefix | ipv6-prefix*)

Synopsis	Destination IP prefix for the test
Context	<a href="#">oam lsp-ping ldp prefix</a> ( <i>ipv4-prefix   ipv6-prefix</i> )
Tree	<a href="#">prefix</a>
Notes	This element is mandatory.
Introduced	23.3.R1
Platforms	All

**profile** *keyword*

Synopsis	QoS profile for the transmitted echo request packets
Context	<a href="#">oam lsp-ping ldp profile</a> <i>keyword</i>
Tree	<a href="#">profile</a>
Options	in, out
Default	out
Introduced	23.3.R1
Platforms	All

**send-count** *number*

Synopsis	Number of echo request packets to send
Context	<a href="#">oam lsp-ping ldp send-count</a> <i>number</i>
Tree	<a href="#">send-count</a>
Range	1 to 100
Units	packets
Default	1
Introduced	23.3.R1
Platforms	All

**size** *number*

Synopsis	Echo request packet pad size
Context	<a href="#">oam lsp-ping ldp size</a> <i>number</i>
Tree	<a href="#">size</a>
Range	1 to 9786
Units	bytes
Default	1
Introduced	23.3.R1
Platforms	All

**source-ip-address** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	Source IP address
Context	<a href="#">oam lsp-ping ldp source-ip-address</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	<a href="#">source-ip-address</a>
Introduced	23.3.R1
Platforms	All

**timeout** *number*

Synopsis	Time to wait for a reply after sending an echo request
Context	<a href="#">oam lsp-ping ldp timeout</a> <i>number</i>
Tree	<a href="#">timeout</a>

---

Range	1 to 10
Units	seconds
Default	5
Introduced	23.3.R1
Platforms	All

### ***t***tl *number*

Synopsis	TTL value for the MPLS label of the echo request
Context	<a href="#">oam lsp-ping ldp ttl number</a>
Tree	<a href="#">ttl</a>
Range	1 to 255
Default	255
Introduced	23.3.R1
Platforms	All

### ***r***svp-*te*

Synopsis	Perform an RSVP-TE LSP ping test
Context	<a href="#">oam lsp-ping rsvp-te</a>
Tree	<a href="#">rsvp-te</a>
Introduced	23.3.R1
Platforms	All

### ***fc*** *keyword*

Synopsis	QoS forwarding class for the sent echo request packet
Context	<a href="#">oam lsp-ping rsvp-te fc keyword</a>
Tree	<a href="#">fc</a>
Options	be, l2, af, l1, h2, ef, h1, nc
Default	be
Introduced	23.3.R1
Platforms	All

### **interval** *number*

Synopsis	Minimum time to expire before next echo request is sent
Context	<a href="#">oam lsp-ping rsvp-te interval</a> <i>number</i>
Tree	<a href="#">interval</a>
Range	1 to 10
Units	seconds
Default	1
Introduced	23.3.R1
Platforms	All

### **lsp-name** *reference*

Synopsis	Name of the LSP to test
Context	<a href="#">oam lsp-ping rsvp-te lsp-name</a> <i>reference</i>
Tree	<a href="#">lsp-name</a>
Reference	<b>state router</b> <i>string mpls lsp string</i>
Notes	This element is mandatory.
Introduced	23.3.R1
Platforms	All

### **path** *reference*

Synopsis	Name of the MPLS path to test
Context	<a href="#">oam lsp-ping rsvp-te path</a> <i>reference</i>
Tree	<a href="#">path</a>
Reference	<b>state router</b> <i>string mpls path string</i>
Introduced	23.3.R1
Platforms	All

### **profile** *keyword*

Synopsis	QoS profile for the transmitted echo request packets
Context	<a href="#">oam lsp-ping rsvp-te profile</a> <i>keyword</i>
Tree	<a href="#">profile</a>

---

Options	in, out
Default	out
Introduced	23.3.R1
Platforms	All

**send-count** *number*

Synopsis	Number of echo request packets to send
Context	<a href="#">oam lsp-ping rsvp-te send-count</a> <i>number</i>
Tree	<a href="#">send-count</a>
Range	1 to 100
Units	packets
Default	1
Introduced	23.3.R1
Platforms	All

**size** *number*

Synopsis	Echo request packet pad size
Context	<a href="#">oam lsp-ping rsvp-te size</a> <i>number</i>
Tree	<a href="#">size</a>
Range	1 to 9786
Units	bytes
Default	1
Introduced	23.3.R1
Platforms	All

**source-ip-address** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	Source IP address
Context	<a href="#">oam lsp-ping rsvp-te source-ip-address</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	<a href="#">source-ip-address</a>
Introduced	23.3.R1
Platforms	All

**timeout** *number*

Synopsis	Time to wait for a reply after sending an echo request
Context	<a href="#">oam lsp-ping rsvp-te timeout</a> <i>number</i>
Tree	<a href="#">timeout</a>
Range	1 to 10
Units	seconds
Default	5
Introduced	23.3.R1
Platforms	All

**ttl** *number*

Synopsis	TTL value for the MPLS label of the echo request
Context	<a href="#">oam lsp-ping rsvp-te ttl</a> <i>number</i>
Tree	<a href="#">ttl</a>
Range	1 to 255
Default	255
Introduced	23.3.R1
Platforms	All

**sr-isis**

Synopsis	Perform an SR-ISIS LSP ping test
Context	<a href="#">oam lsp-ping sr-isis</a>
Tree	<a href="#">sr-isis</a>
Introduced	23.3.R1
Platforms	All

**fc** *keyword*

Synopsis	QoS forwarding class for the sent echo request packet
Context	<a href="#">oam lsp-ping sr-isis fc</a> <i>keyword</i>
Tree	<a href="#">fc</a>
Options	be, l2, af, l1, h2, ef, h1, nc

Default	be
Introduced	23.3.R1
Platforms	All

### **flex-algo** *number*

Synopsis	Segment Routing Flexible Algorithm for the test
Context	<a href="#">oam lsp-ping sr-isis flex-algo</a> <i>number</i>
Tree	<a href="#">flex-algo</a>
Range	128 to 255
Introduced	23.7.R1
Platforms	All

### **igp-instance** *number*

Synopsis	IGP instance for the SR-ISIS test
Context	<a href="#">oam lsp-ping sr-isis igp-instance</a> <i>number</i>
Tree	<a href="#">igp-instance</a>
Range	0 to 127
Default	0
Introduced	23.3.R1
Platforms	All

### **interface** *reference*

Synopsis	Egress router interface to use with path destination
Context	<a href="#">oam lsp-ping sr-isis interface</a> <i>reference</i>
Tree	<a href="#">interface</a>
Reference	<b>state router</b> <i>string interface string</i>
Notes	The following elements are part of a choice: <b>interface</b> or <b>next-hop</b> .
Introduced	23.3.R1
Platforms	All

**interval number**

Synopsis	Minimum time to expire before next echo request is sent
Context	<a href="#">oam lsp-ping sr-isis interval number</a>
Tree	<a href="#">interval</a>
Range	1 to 10
Units	seconds
Default	1
Introduced	23.3.R1
Platforms	All

**next-hop** (*ipv4-address-no-zone | ipv6-address-no-zone*)

Synopsis	Egress IP next hop address to use with path destination
Context	<a href="#">oam lsp-ping sr-isis next-hop (ipv4-address-no-zone   ipv6-address-no-zone)</a>
Tree	<a href="#">next-hop</a>
Notes	The following elements are part of a choice: <b>interface</b> or <b>next-hop</b> .
Introduced	23.3.R1
Platforms	All

**path-destination** (*ipv4-address-no-zone | ipv6-address-no-zone*)

Synopsis	IP address of the path destination
Context	<a href="#">oam lsp-ping sr-isis path-destination (ipv4-address-no-zone   ipv6-address-no-zone)</a>
Tree	<a href="#">path-destination</a>
Introduced	23.3.R1
Platforms	All

**prefix** (*ipv4-prefix | ipv6-prefix*)

Synopsis	Destination IP prefix for the test
Context	<a href="#">oam lsp-ping sr-isis prefix (ipv4-prefix   ipv6-prefix)</a>
Tree	<a href="#">prefix</a>
Notes	This element is mandatory.
Introduced	23.3.R1

---

Platforms All

### **profile** *keyword*

Synopsis QoS profile for the transmitted echo request packets  
Context [oam lsp-ping sr-isis profile keyword](#)  
Tree [profile](#)  
Options in, out  
Default out  
Introduced 23.3.R1  
Platforms All

### **send-count** *number*

Synopsis Number of echo request packets to send  
Context [oam lsp-ping sr-isis send-count number](#)  
Tree [send-count](#)  
Range 1 to 100  
Units packets  
Default 1  
Introduced 23.3.R1  
Platforms All

### **size** *number*

Synopsis Echo request packet pad size  
Context [oam lsp-ping sr-isis size number](#)  
Tree [size](#)  
Range 1 to 9786  
Units bytes  
Default 1  
Introduced 23.3.R1  
Platforms All

**source-ip-address** (*ipv4-address-no-zone | ipv6-address-no-zone*)

Synopsis	Source IP address
Context	<a href="#">oam lsp-ping sr-isis source-ip-address</a> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> )
Tree	<a href="#">source-ip-address</a>
Introduced	23.3.R1
Platforms	All

**timeout** *number*

Synopsis	Time to wait for a reply after sending an echo request
Context	<a href="#">oam lsp-ping sr-isis timeout</a> <i>number</i>
Tree	<a href="#">timeout</a>
Range	1 to 10
Units	seconds
Default	5
Introduced	23.3.R1
Platforms	All

**ttl** *number*

Synopsis	TTL value for the MPLS label of the echo request
Context	<a href="#">oam lsp-ping sr-isis ttl</a> <i>number</i>
Tree	<a href="#">ttl</a>
Range	1 to 255
Default	255
Introduced	23.3.R1
Platforms	All

**sr-ospf**

Synopsis	Perform an SR-OSPF LSP ping test
Context	<a href="#">oam lsp-ping sr-ospf</a>
Tree	<a href="#">sr-ospf</a>
Introduced	23.3.R1
Platforms	All

**fc keyword**

Synopsis	QoS forwarding class for the sent echo request packet
Context	<a href="#">oam lsp-ping sr-ospf fc keyword</a>
Tree	<a href="#">fc</a>
Options	be, l2, af, l1, h2, ef, h1, nc
Default	be
Introduced	23.3.R1
Platforms	All

**flex-algo number**

Synopsis	Segment Routing Flexible Algorithm for the test
Context	<a href="#">oam lsp-ping sr-ospf flex-algo number</a>
Tree	<a href="#">flex-algo</a>
Range	128 to 255
Introduced	23.7.R1
Platforms	All

**igp-instance number**

Synopsis	IGP instance for the SR-OSPF test
Context	<a href="#">oam lsp-ping sr-ospf igp-instance number</a>
Tree	<a href="#">igp-instance</a>
Range	0 to 31
Default	0
Introduced	23.3.R1
Platforms	All

**interface reference**

Synopsis	Egress router interface to use with path destination
Context	<a href="#">oam lsp-ping sr-ospf interface reference</a>
Tree	<a href="#">interface</a>
Reference	<b>state router</b> <i>string interface string</i>

---

Notes	The following elements are part of a choice: <b>interface</b> or <b>next-hop</b> .
Introduced	23.3.R1
Platforms	All

### **interval** *number*

Synopsis	Minimum time to expire before next echo request is sent
Context	<a href="#">oam lsp-ping sr-ospf interval</a> <i>number</i>
Tree	<a href="#">interval</a>
Range	1 to 10
Units	seconds
Default	1
Introduced	23.3.R1
Platforms	All

### **next-hop** *string*

Synopsis	Egress IP next hop address to use with path destination
Context	<a href="#">oam lsp-ping sr-ospf next-hop</a> <i>string</i>
Tree	<a href="#">next-hop</a>
Notes	The following elements are part of a choice: <b>interface</b> or <b>next-hop</b> .
Introduced	23.3.R1
Platforms	All

### **path-destination** *string*

Synopsis	IP address of the path destination
Context	<a href="#">oam lsp-ping sr-ospf path-destination</a> <i>string</i>
Tree	<a href="#">path-destination</a>
Introduced	23.3.R1
Platforms	All

### **prefix** (*ipv4-prefix* | *ipv6-prefix*)

Synopsis	Destination IP prefix for the test
----------	------------------------------------

Context	<a href="#">oam lsp-ping sr-ospf prefix</a> ( <i>ipv4-prefix   ipv6-prefix</i> )
Tree	<a href="#">prefix</a>
Notes	This element is mandatory.
Introduced	23.3.R1
Platforms	All

### **profile** *keyword*

Synopsis	QoS profile for the transmitted echo request packets
Context	<a href="#">oam lsp-ping sr-ospf profile</a> <i>keyword</i>
Tree	<a href="#">profile</a>
Options	in, out
Default	out
Introduced	23.3.R1
Platforms	All

### **send-count** *number*

Synopsis	Number of echo request packets to send
Context	<a href="#">oam lsp-ping sr-ospf send-count</a> <i>number</i>
Tree	<a href="#">send-count</a>
Range	1 to 100
Units	packets
Default	1
Introduced	23.3.R1
Platforms	All

### **size** *number*

Synopsis	Echo request packet pad size
Context	<a href="#">oam lsp-ping sr-ospf size</a> <i>number</i>
Tree	<a href="#">size</a>
Range	1 to 9786
Units	bytes
Default	1

Introduced 23.3.R1  
Platforms All

### **source-ip-address** *string*

Synopsis Source IP address  
Context [oam lsp-ping sr-ospf source-ip-address string](#)  
Tree [source-ip-address](#)  
Introduced 23.3.R1  
Platforms All

### **timeout** *number*

Synopsis Time to wait for a reply after sending an echo request  
Context [oam lsp-ping sr-ospf timeout number](#)  
Tree [timeout](#)  
Range 1 to 10  
Units seconds  
Default 5  
Introduced 23.3.R1  
Platforms All

### **ttl** *number*

Synopsis TTL value for the MPLS label of the echo request  
Context [oam lsp-ping sr-ospf ttl number](#)  
Tree [ttl](#)  
Range 1 to 255  
Default 255  
Introduced 23.3.R1  
Platforms All

### **sr-ospf3**

Synopsis Perform an SR-OSPFv3 LSP ping test

Context	<a href="#">oam lsp-ping sr-ospf3</a>
Tree	<a href="#">sr-ospf3</a>
Introduced	23.3.R1
Platforms	All

**fc keyword**

Synopsis	QoS forwarding class for the sent echo request packet
Context	<a href="#">oam lsp-ping sr-ospf3 fc keyword</a>
Tree	<a href="#">fc</a>
Options	be, l2, af, l1, h2, ef, h1, nc
Default	be
Introduced	23.3.R1
Platforms	All

**igp-instance number**

Synopsis	IGP instance for the SR-OSPFv3 test
Context	<a href="#">oam lsp-ping sr-ospf3 igp-instance number</a>
Tree	<a href="#">igp-instance</a>
Range	0 to 31   64 to 95
Default	0
Introduced	23.3.R1
Platforms	All

**interface reference**

Synopsis	Egress router interface to use with path destination
Context	<a href="#">oam lsp-ping sr-ospf3 interface reference</a>
Tree	<a href="#">interface</a>
Reference	<b>state router</b> <i>string interface string</i>
Notes	The following elements are part of a choice: <b>interface</b> or <b>next-hop</b> .
Introduced	23.3.R1
Platforms	All

**interval number**

Synopsis	Minimum time to expire before next echo request is sent
Context	<a href="#">oam lsp-ping sr-ospf3 interval number</a>
Tree	<a href="#">interval</a>
Range	1 to 10
Units	seconds
Default	1
Introduced	23.3.R1
Platforms	All

**next-hop** (*ipv4-address-no-zone | ipv6-address-no-zone*)

Synopsis	Egress IP next hop address to use with path destination
Context	<a href="#">oam lsp-ping sr-ospf3 next-hop (ipv4-address-no-zone   ipv6-address-no-zone)</a>
Tree	<a href="#">next-hop</a>
Notes	The following elements are part of a choice: <b>interface</b> or <b>next-hop</b> .
Introduced	23.3.R1
Platforms	All

**path-destination** (*ipv4-address-no-zone | ipv6-address-no-zone*)

Synopsis	IP address of the path destination
Context	<a href="#">oam lsp-ping sr-ospf3 path-destination (ipv4-address-no-zone   ipv6-address-no-zone)</a>
Tree	<a href="#">path-destination</a>
Introduced	23.3.R1
Platforms	All

**prefix** (*ipv4-prefix | ipv6-prefix*)

Synopsis	Destination IP prefix for the test
Context	<a href="#">oam lsp-ping sr-ospf3 prefix (ipv4-prefix   ipv6-prefix)</a>
Tree	<a href="#">prefix</a>
Notes	This element is mandatory.
Introduced	23.3.R1

---

Platforms All

### **profile** *keyword*

Synopsis QoS profile for the transmitted echo request packets  
Context [oam lsp-ping sr-ospf3 profile keyword](#)  
Tree [profile](#)  
Options in, out  
Default out  
Introduced 23.3.R1  
Platforms All

### **send-count** *number*

Synopsis Number of echo request packets to send  
Context [oam lsp-ping sr-ospf3 send-count number](#)  
Tree [send-count](#)  
Range 1 to 100  
Units packets  
Default 1  
Introduced 23.3.R1  
Platforms All

### **size** *number*

Synopsis Echo request packet pad size  
Context [oam lsp-ping sr-ospf3 size number](#)  
Tree [size](#)  
Range 1 to 9786  
Units bytes  
Default 1  
Introduced 23.3.R1  
Platforms All

**source-ip-address** (*ipv4-address-no-zone | ipv6-address-no-zone*)

Synopsis	Source IP address
Context	<a href="#">oam lsp-ping sr-ospf3 source-ip-address</a> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> )
Tree	<a href="#">source-ip-address</a>
Introduced	23.3.R1
Platforms	All

**timeout** *number*

Synopsis	Time to wait for a reply after sending an echo request
Context	<a href="#">oam lsp-ping sr-ospf3 timeout</a> <i>number</i>
Tree	<a href="#">timeout</a>
Range	1 to 10
Units	seconds
Default	5
Introduced	23.3.R1
Platforms	All

**ttl** *number*

Synopsis	TTL value for the MPLS label of the echo request
Context	<a href="#">oam lsp-ping sr-ospf3 ttl</a> <i>number</i>
Tree	<a href="#">ttl</a>
Range	1 to 255
Default	255
Introduced	23.3.R1
Platforms	All

**sr-policy**

Synopsis	Perform an SR policy LSP ping test
Context	<a href="#">oam lsp-ping sr-policy</a>
Tree	<a href="#">sr-policy</a>
Introduced	23.3.R1
Platforms	All

**color number**

Synopsis	Segment Routing color for the test
Context	<a href="#">oam lsp-ping sr-policy color number</a>
Tree	<a href="#">color</a>
Max. Range	0 to 4294967295
Notes	This element is mandatory.
Introduced	23.3.R1
Platforms	All

**endpoint** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	Segment Routing endpoint for the test
Context	<a href="#">oam lsp-ping sr-policy endpoint</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	<a href="#">endpoint</a>
Notes	This element is mandatory.
Introduced	23.3.R1
Platforms	All

**fc keyword**

Synopsis	QoS forwarding class for the sent echo request packet
Context	<a href="#">oam lsp-ping sr-policy fc keyword</a>
Tree	<a href="#">fc</a>
Options	be, l2, af, l1, h2, ef, h1, nc
Default	be
Introduced	23.3.R1
Platforms	All

**interface reference**

Synopsis	Egress router interface to use with path destination
Context	<a href="#">oam lsp-ping sr-policy interface reference</a>
Tree	<a href="#">interface</a>
Reference	<b>state router</b> <i>string</i> <b>interface</b> <i>string</i>

Notes	The following elements are part of a choice: <b>interface</b> or <b>next-hop</b> .
Introduced	23.3.R1
Platforms	All

### **interval** *number*

Synopsis	Minimum time to expire before next echo request is sent
Context	<a href="#">oam lsp-ping sr-policy interval</a> <i>number</i>
Tree	<a href="#">interval</a>
Range	1 to 10
Units	seconds
Default	1
Introduced	23.3.R1
Platforms	All

### **next-hop** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	Egress IP next hop address to use with path destination
Context	<a href="#">oam lsp-ping sr-policy next-hop</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	<a href="#">next-hop</a>
Notes	The following elements are part of a choice: <b>interface</b> or <b>next-hop</b> .
Introduced	23.3.R1
Platforms	All

### **path-destination** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	IP address of the path destination
Context	<a href="#">oam lsp-ping sr-policy path-destination</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	<a href="#">path-destination</a>
Introduced	23.3.R1
Platforms	All

### **profile** *keyword*

Synopsis	QoS profile for the transmitted echo request packets
----------	--

---

Context	<a href="#">oam lsp-ping sr-policy profile</a> <i>keyword</i>
Tree	<a href="#">profile</a>
Options	in, out
Default	out
Introduced	23.3.R1
Platforms	All

### **segment-list** *number*

Synopsis	Segment Routing segment list for the test
Context	<a href="#">oam lsp-ping sr-policy segment-list</a> <i>number</i>
Tree	<a href="#">segment-list</a>
Range	1 to 32
Introduced	23.3.R1
Platforms	All

### **send-count** *number*

Synopsis	Number of echo request packets to send
Context	<a href="#">oam lsp-ping sr-policy send-count</a> <i>number</i>
Tree	<a href="#">send-count</a>
Range	1 to 100
Units	packets
Default	1
Introduced	23.3.R1
Platforms	All

### **size** *number*

Synopsis	Echo request packet pad size
Context	<a href="#">oam lsp-ping sr-policy size</a> <i>number</i>
Tree	<a href="#">size</a>
Range	1 to 9786
Units	bytes
Default	1

Introduced 23.3.R1  
Platforms All

### **source-ip-address** (*ipv4-address-no-zone | ipv6-address-no-zone*)

Synopsis Source IP address  
Context [oam lsp-ping sr-policy source-ip-address](#) (*ipv4-address-no-zone | ipv6-address-no-zone*)  
Tree [source-ip-address](#)  
Introduced 23.3.R1  
Platforms All

### **timeout** *number*

Synopsis Time to wait for a reply after sending an echo request  
Context [oam lsp-ping sr-policy timeout](#) *number*  
Tree [timeout](#)  
Range 1 to 10  
Units seconds  
Default 5  
Introduced 23.3.R1  
Platforms All

### **ttl** *number*

Synopsis TTL value for the MPLS label of the echo request  
Context [oam lsp-ping sr-policy ttl](#) *number*  
Tree [ttl](#)  
Range 1 to 255  
Default 255  
Introduced 23.3.R1  
Platforms All

### **sr-te**

Synopsis Perform an SR-TE LSP ping test

Context	<a href="#">oam lsp-ping sr-te</a>
Tree	<a href="#">sr-te</a>
Introduced	23.3.R1
Platforms	All

### **fc** *keyword*

Synopsis	QoS forwarding class for the sent echo request packet
Context	<a href="#">oam lsp-ping sr-te fc</a> <i>keyword</i>
Tree	<a href="#">fc</a>
Options	be, l2, af, l1, h2, ef, h1, nc
Default	be
Introduced	23.3.R1
Platforms	All

### **interface** *reference*

Synopsis	Egress router interface to use with path destination
Context	<a href="#">oam lsp-ping sr-te interface</a> <i>reference</i>
Tree	<a href="#">interface</a>
Reference	<b>state router</b> <i>string interface string</i>
Notes	The following elements are part of a choice: <b>interface</b> or <b>next-hop</b> .
Introduced	23.3.R1
Platforms	All

### **interval** *number*

Synopsis	Minimum time to expire before next echo request is sent
Context	<a href="#">oam lsp-ping sr-te interval</a> <i>number</i>
Tree	<a href="#">interval</a>
Range	1 to 10
Units	seconds
Default	1
Introduced	23.3.R1
Platforms	All

**lsp-name reference**

Synopsis	Name of the LSP to test
Context	<a href="#">oam lsp-ping sr-te lsp-name reference</a>
Tree	<a href="#">lsp-name</a>
Reference	<b>state router string mpls lsp string</b>
Notes	This element is mandatory.
Introduced	23.3.R1
Platforms	All

**next-hop (ipv4-address-no-zone | ipv6-address-no-zone)**

Synopsis	Egress IP next hop address to use with path destination
Context	<a href="#">oam lsp-ping sr-te next-hop (ipv4-address-no-zone   ipv6-address-no-zone)</a>
Tree	<a href="#">next-hop</a>
Notes	The following elements are part of a choice: <b>interface</b> or <b>next-hop</b> .
Introduced	23.3.R1
Platforms	All

**path reference**

Synopsis	Name of the MPLS path to test
Context	<a href="#">oam lsp-ping sr-te path reference</a>
Tree	<a href="#">path</a>
Reference	<b>state router string mpls path string</b>
Introduced	23.3.R1
Platforms	All

**path-destination (ipv4-address-no-zone | ipv6-address-no-zone)**

Synopsis	IP address of the path destination
Context	<a href="#">oam lsp-ping sr-te path-destination (ipv4-address-no-zone   ipv6-address-no-zone)</a>
Tree	<a href="#">path-destination</a>
Introduced	23.3.R1

---

Platforms All

### **profile** *keyword*

Synopsis QoS profile for the transmitted echo request packets  
Context [oam lsp-ping sr-te profile keyword](#)  
Tree [profile](#)  
Options in, out  
Default out  
Introduced 23.3.R1  
Platforms All

### **send-count** *number*

Synopsis Number of echo request packets to send  
Context [oam lsp-ping sr-te send-count number](#)  
Tree [send-count](#)  
Range 1 to 100  
Units packets  
Default 1  
Introduced 23.3.R1  
Platforms All

### **size** *number*

Synopsis Echo request packet pad size  
Context [oam lsp-ping sr-te size number](#)  
Tree [size](#)  
Range 1 to 9786  
Units bytes  
Default 1  
Introduced 23.3.R1  
Platforms All

**source-ip-address** (*ipv4-address-no-zone | ipv6-address-no-zone*)

Synopsis	Source IP address
Context	<a href="#">oam lsp-ping sr-te source-ip-address</a> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> )
Tree	<a href="#">source-ip-address</a>
Introduced	23.3.R1
Platforms	All

**timeout** *number*

Synopsis	Time to wait for a reply after sending an echo request
Context	<a href="#">oam lsp-ping sr-te timeout</a> <i>number</i>
Tree	<a href="#">timeout</a>
Range	1 to 10
Units	seconds
Default	5
Introduced	23.3.R1
Platforms	All

**ttl** *number*

Synopsis	TTL value for the MPLS label of the echo request
Context	<a href="#">oam lsp-ping sr-te ttl</a> <i>number</i>
Tree	<a href="#">ttl</a>
Range	1 to 255
Default	255
Introduced	23.3.R1
Platforms	All

**lsp-trace**

Synopsis	Perform a Label Switched Path (LSP) trace test
Context	<a href="#">oam lsp-trace</a>
Tree	<a href="#">lsp-trace</a>
Introduced	23.3.R1
Platforms	All

**bgp-label**

Synopsis	Perform a BGP-label LSP trace test
Context	<a href="#">oam lsp-trace bgp-label</a>
Tree	<a href="#">bgp-label</a>
Description	This option performs an LSP trace test using Target FEC Stack sub-type "BGP labeled IPv4 prefix".
Introduced	23.3.R1
Platforms	All

**downstream-map-tlv** *keyword*

Synopsis	Type of downstream mapping TLV in MPLS echo request PDU
Context	<a href="#">oam lsp-trace bgp-label downstream-map-tlv keyword</a>
Tree	<a href="#">downstream-map-tlv</a>
Options	dsmap – Downstream mapping TLV ddmap – Detailed downstream mapping TLV none – No mapping TLV
Introduced	23.3.R1
Platforms	All

**fc** *keyword*

Synopsis	QoS forwarding class for the sent echo request packet
Context	<a href="#">oam lsp-trace bgp-label fc keyword</a>
Tree	<a href="#">fc</a>
Options	be, l2, af, l1, h2, ef, h1, nc
Default	be
Introduced	23.3.R1
Platforms	All

**interface** *reference*

Synopsis	Egress router interface to use with path destination
Context	<a href="#">oam lsp-trace bgp-label interface reference</a>
Tree	<a href="#">interface</a>

---

Reference	<b>state router <i>string</i> interface <i>string</i></b>
Notes	The following elements are part of a choice: <b>interface</b> or <b>next-hop</b> .
Introduced	23.3.R1
Platforms	All

### **interval** *number*

Synopsis	Minimum time to expire before next echo request is sent
Context	<a href="#">oam lsp-trace bgp-label interval</a> <i>number</i>
Tree	<a href="#">interval</a>
Range	1 to 10
Units	seconds
Default	1
Introduced	23.3.R1
Platforms	All

### **max-fail** *number*

Synopsis	Maximum consecutive timeouts before terminating test
Context	<a href="#">oam lsp-trace bgp-label max-fail</a> <i>number</i>
Tree	<a href="#">max-fail</a>
Range	1 to 255
Default	5
Introduced	23.3.R1
Platforms	All

### **max-ttl** *number*

Synopsis	Maximum TTL
Context	<a href="#">oam lsp-trace bgp-label max-ttl</a> <i>number</i>
Tree	<a href="#">max-ttl</a>
Range	1 to 255
Default	30
Introduced	23.3.R1
Platforms	All

**min-ttl** *number*

Synopsis	Initial TTL for the test
Context	<a href="#">oam lsp-trace bgp-label min-ttl</a> <i>number</i>
Tree	<a href="#">min-ttl</a>
Range	1 to 255
Default	1
Introduced	23.3.R1
Platforms	All

**next-hop** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	Egress IP next hop address to use with path destination
Context	<a href="#">oam lsp-trace bgp-label next-hop</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	<a href="#">next-hop</a>
Notes	The following elements are part of a choice: <b>interface</b> or <b>next-hop</b> .
Introduced	23.3.R1
Platforms	All

**output-format** *keyword*

Synopsis	Output format for the result
Context	<a href="#">oam lsp-trace bgp-label output-format</a> <i>keyword</i>
Tree	<a href="#">output-format</a>
Options	summary, detail
Default	summary
Introduced	23.3.R1
Platforms	All

**path-destination** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	IP address of the path destination
Context	<a href="#">oam lsp-trace bgp-label path-destination</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	<a href="#">path-destination</a>
Introduced	23.3.R1

Platforms All

### **prefix** (*ipv4-prefix* | *ipv6-prefix*)

Synopsis Destination IP prefix for the test

Context [oam lsp-trace bgp-label prefix](#) (*ipv4-prefix* | *ipv6-prefix*)

Tree [prefix](#)

Notes This element is mandatory.

Introduced 23.3.R1

Platforms All

### **probe-count** *number*

Synopsis Number of OAM trace probes to send per TTL

Context [oam lsp-trace bgp-label probe-count](#) *number*

Tree [probe-count](#)

Range 1 to 10

Default 1

Introduced 23.3.R1

Platforms All

### **profile** *keyword*

Synopsis QoS profile for the transmitted echo request packets

Context [oam lsp-trace bgp-label profile](#) *keyword*

Tree [profile](#)

Options in, out

Default out

Introduced 23.3.R1

Platforms All

### **size** *number*

Synopsis Echo request packet pad size

Context [oam lsp-trace bgp-label size](#) *number*

Tree	<a href="#">size</a>
Range	1 to 9786
Units	bytes
Default	1
Introduced	23.3.R1
Platforms	All

### **source-ip-address** (*ipv4-address-no-zone | ipv6-address-no-zone*)

Synopsis	Source IP address
Context	<a href="#">oam lsp-trace bgp-label source-ip-address</a> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> )
Tree	<a href="#">source-ip-address</a>
Introduced	23.3.R1
Platforms	All

### **timeout** *number*

Synopsis	Time to wait for a reply after sending an echo request
Context	<a href="#">oam lsp-trace bgp-label timeout</a> <i>number</i>
Tree	<a href="#">timeout</a>
Range	1 to 10
Units	seconds
Default	5
Introduced	23.3.R1
Platforms	All

### **ldp**

Synopsis	Perform an LDP LSP trace test
Context	<a href="#">oam lsp-trace ldp</a>
Tree	<a href="#">ldp</a>
Introduced	23.3.R1
Platforms	All

**downstream-map-tlv** *keyword*

Synopsis	Type of downstream mapping TLV in MPLS echo request PDU
Context	<a href="#">oam lsp-trace ldp downstream-map-tlv keyword</a>
Tree	<a href="#">downstream-map-tlv</a>
Options	dsmap – Downstream mapping TLV ddmap – Detailed downstream mapping TLV none – No mapping TLV
Introduced	23.3.R1
Platforms	All

**fc** *keyword*

Synopsis	QoS forwarding class for the sent echo request packet
Context	<a href="#">oam lsp-trace ldp fc keyword</a>
Tree	<a href="#">fc</a>
Options	be, l2, af, l1, h2, ef, h1, nc
Default	be
Introduced	23.3.R1
Platforms	All

**interface** *reference*

Synopsis	Egress router interface to use with path destination
Context	<a href="#">oam lsp-trace ldp interface reference</a>
Tree	<a href="#">interface</a>
Reference	<b>state router</b> <i>string interface string</i>
Notes	The following elements are part of a choice: <b>interface</b> or <b>next-hop</b> .
Introduced	23.3.R1
Platforms	All

**interval** *number*

Synopsis	Minimum time to expire before next echo request is sent
Context	<a href="#">oam lsp-trace ldp interval number</a>
Tree	<a href="#">interval</a>

---

Range	1 to 10
Units	seconds
Default	1
Introduced	23.3.R1
Platforms	All

### **max-fail** *number*

Synopsis	Maximum consecutive timeouts before terminating test
Context	<a href="#">oam lsp-trace ldp max-fail</a> <i>number</i>
Tree	<a href="#">max-fail</a>
Range	1 to 255
Default	5
Introduced	23.3.R1
Platforms	All

### **max-ttl** *number*

Synopsis	Maximum TTL
Context	<a href="#">oam lsp-trace ldp max-ttl</a> <i>number</i>
Tree	<a href="#">max-ttl</a>
Range	1 to 255
Default	30
Introduced	23.3.R1
Platforms	All

### **min-ttl** *number*

Synopsis	Initial TTL for the test
Context	<a href="#">oam lsp-trace ldp min-ttl</a> <i>number</i>
Tree	<a href="#">min-ttl</a>
Range	1 to 255
Default	1
Introduced	23.3.R1
Platforms	All

**next-hop** (*ipv4-address-no-zone | ipv6-address-no-zone*)

Synopsis	Egress IP next hop address to use with path destination
Context	<a href="#">oam lsp-trace ldp next-hop</a> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> )
Tree	<a href="#">next-hop</a>
Notes	The following elements are part of a choice: <b>interface</b> or <b>next-hop</b> .
Introduced	23.3.R1
Platforms	All

**output-format** *keyword*

Synopsis	Output format for the result
Context	<a href="#">oam lsp-trace ldp output-format</a> <i>keyword</i>
Tree	<a href="#">output-format</a>
Options	summary, detail
Default	summary
Introduced	23.3.R1
Platforms	All

**path-destination** (*ipv4-address-no-zone | ipv6-address-no-zone*)

Synopsis	IP address of the path destination
Context	<a href="#">oam lsp-trace ldp path-destination</a> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> )
Tree	<a href="#">path-destination</a>
Introduced	23.3.R1
Platforms	All

**prefix** (*ipv4-prefix | ipv6-prefix*)

Synopsis	Destination IP prefix for the test
Context	<a href="#">oam lsp-trace ldp prefix</a> ( <i>ipv4-prefix   ipv6-prefix</i> )
Tree	<a href="#">prefix</a>
Notes	This element is mandatory.
Introduced	23.3.R1
Platforms	All

**probe-count** *number*

Synopsis	Number of OAM trace probes to send per TTL
Context	<a href="#">oam lsp-trace ldp probe-count</a> <i>number</i>
Tree	<a href="#">probe-count</a>
Range	1 to 10
Default	1
Introduced	23.3.R1
Platforms	All

**profile** *keyword*

Synopsis	QoS profile for the transmitted echo request packets
Context	<a href="#">oam lsp-trace ldp profile</a> <i>keyword</i>
Tree	<a href="#">profile</a>
Options	in, out
Default	out
Introduced	23.3.R1
Platforms	All

**size** *number*

Synopsis	Echo request packet pad size
Context	<a href="#">oam lsp-trace ldp size</a> <i>number</i>
Tree	<a href="#">size</a>
Range	1 to 9786
Units	bytes
Default	1
Introduced	23.3.R1
Platforms	All

**source-ip-address** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	Source IP address
Context	<a href="#">oam lsp-trace ldp source-ip-address</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )

Tree	<a href="#">source-ip-address</a>
Introduced	23.3.R1
Platforms	All

**timeout** *number*

Synopsis	Time to wait for a reply after sending an echo request
Context	<a href="#">oam lsp-trace ldp timeout number</a>
Tree	<a href="#">timeout</a>
Range	1 to 10
Units	seconds
Default	5
Introduced	23.3.R1
Platforms	All

**rsvp-te**

Synopsis	Perform an RSVP-TE LSP trace test
Context	<a href="#">oam lsp-trace rsvp-te</a>
Tree	<a href="#">rsvp-te</a>
Introduced	23.3.R1
Platforms	All

**downstream-map-tlv** *keyword*

Synopsis	Type of downstream mapping TLV in MPLS echo request PDU
Context	<a href="#">oam lsp-trace rsvp-te downstream-map-tlv keyword</a>
Tree	<a href="#">downstream-map-tlv</a>
Options	dsmap – Downstream mapping TLV ddmap – Detailed downstream mapping TLV none – No mapping TLV
Introduced	23.3.R1
Platforms	All

### **fc keyword**

Synopsis	QoS forwarding class for the sent echo request packet
Context	<a href="#">oam lsp-trace rsvp-te fc keyword</a>
Tree	<a href="#">fc</a>
Options	be, l2, af, l1, h2, ef, h1, nc
Default	be
Introduced	23.3.R1
Platforms	All

### **interval number**

Synopsis	Minimum time to expire before next echo request is sent
Context	<a href="#">oam lsp-trace rsvp-te interval number</a>
Tree	<a href="#">interval</a>
Range	1 to 10
Units	seconds
Default	1
Introduced	23.3.R1
Platforms	All

### **lsp-name reference**

Synopsis	Name of the LSP to test
Context	<a href="#">oam lsp-trace rsvp-te lsp-name reference</a>
Tree	<a href="#">lsp-name</a>
Reference	<b>state router string mpls lsp string</b>
Notes	This element is mandatory.
Introduced	23.3.R1
Platforms	All

### **max-fail number**

Synopsis	Maximum consecutive timeouts before terminating test
Context	<a href="#">oam lsp-trace rsvp-te max-fail number</a>
Tree	<a href="#">max-fail</a>

---

Range	1 to 255
Default	5
Introduced	23.3.R1
Platforms	All

**max-ttl** *number*

Synopsis	Maximum TTL
Context	<a href="#">oam lsp-trace rsvp-te max-ttl</a> <i>number</i>
Tree	<a href="#">max-ttl</a>
Range	1 to 255
Default	30
Introduced	23.3.R1
Platforms	All

**min-ttl** *number*

Synopsis	Initial TTL for the test
Context	<a href="#">oam lsp-trace rsvp-te min-ttl</a> <i>number</i>
Tree	<a href="#">min-ttl</a>
Range	1 to 255
Default	1
Introduced	23.3.R1
Platforms	All

**output-format** *keyword*

Synopsis	Output format for the result
Context	<a href="#">oam lsp-trace rsvp-te output-format</a> <i>keyword</i>
Tree	<a href="#">output-format</a>
Options	summary, detail
Default	summary
Introduced	23.3.R1
Platforms	All

**path** *reference*

Synopsis	Name of the MPLS path to test
Context	<a href="#">oam lsp-trace rsvp-te path</a> <i>reference</i>
Tree	<a href="#">path</a>
Reference	<b>state router</b> <i>string mpls path string</i>
Introduced	23.3.R1
Platforms	All

**probe-count** *number*

Synopsis	Number of OAM trace probes to send per TTL
Context	<a href="#">oam lsp-trace rsvp-te probe-count</a> <i>number</i>
Tree	<a href="#">probe-count</a>
Range	1 to 10
Default	1
Introduced	23.3.R1
Platforms	All

**profile** *keyword*

Synopsis	QoS profile for the transmitted echo request packets
Context	<a href="#">oam lsp-trace rsvp-te profile</a> <i>keyword</i>
Tree	<a href="#">profile</a>
Options	in, out
Default	out
Introduced	23.3.R1
Platforms	All

**size** *number*

Synopsis	Echo request packet pad size
Context	<a href="#">oam lsp-trace rsvp-te size</a> <i>number</i>
Tree	<a href="#">size</a>
Range	1 to 9786

Units	bytes
Default	1
Introduced	23.3.R1
Platforms	All

### **source-ip-address** (*ipv4-address-no-zone | ipv6-address-no-zone*)

Synopsis	Source IP address
Context	<a href="#">oam lsp-trace rsvp-te source-ip-address</a> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> )
Tree	<a href="#">source-ip-address</a>
Introduced	23.3.R1
Platforms	All

### **timeout** *number*

Synopsis	Time to wait for a reply after sending an echo request
Context	<a href="#">oam lsp-trace rsvp-te timeout</a> <i>number</i>
Tree	<a href="#">timeout</a>
Range	1 to 10
Units	seconds
Default	5
Introduced	23.3.R1
Platforms	All

### **sr-isis**

Synopsis	Perform an SR-ISIS LSP trace test
Context	<a href="#">oam lsp-trace sr-isis</a>
Tree	<a href="#">sr-isis</a>
Introduced	23.3.R1
Platforms	All

### **downstream-map-tlv** *keyword*

Synopsis	Type of downstream mapping TLV in MPLS echo request PDU
----------	---

---

Context	<a href="#">oam lsp-trace sr-isis downstream-map-tlv keyword</a>
Tree	<a href="#">downstream-map-tlv</a>
Options	dsmap – Downstream mapping TLV ddmap – Detailed downstream mapping TLV none – No mapping TLV
Introduced	23.3.R1
Platforms	All

### **fc keyword**

Synopsis	QoS forwarding class for the sent echo request packet
Context	<a href="#">oam lsp-trace sr-isis fc keyword</a>
Tree	<a href="#">fc</a>
Options	be, l2, af, l1, h2, ef, h1, nc
Default	be
Introduced	23.3.R1
Platforms	All

### **flex-algo number**

Synopsis	Segment Routing Flexible Algorithm for the test
Context	<a href="#">oam lsp-trace sr-isis flex-algo number</a>
Tree	<a href="#">flex-algo</a>
Range	128 to 255
Introduced	23.7.R1
Platforms	All

### **igp-instance number**

Synopsis	IGP instance for the SR-ISIS test
Context	<a href="#">oam lsp-trace sr-isis igp-instance number</a>
Tree	<a href="#">igp-instance</a>
Range	0 to 127
Default	0
Introduced	23.3.R1

---

Platforms All

### **interface** *reference*

Synopsis Egress router interface to use with path destination

Context [oam lsp-trace sr-isis interface reference](#)

Tree [interface](#)

Reference **state router string interface string**

Notes The following elements are part of a choice: **interface** or **next-hop**.

Introduced 23.3.R1

Platforms All

### **interval** *number*

Synopsis Minimum time to expire before next echo request is sent

Context [oam lsp-trace sr-isis interval number](#)

Tree [interval](#)

Range 1 to 10

Units seconds

Default 1

Introduced 23.3.R1

Platforms All

### **max-fail** *number*

Synopsis Maximum consecutive timeouts before terminating test

Context [oam lsp-trace sr-isis max-fail number](#)

Tree [max-fail](#)

Range 1 to 255

Default 5

Introduced 23.3.R1

Platforms All

**max-ttl** *number*

Synopsis	Maximum TTL
Context	<a href="#">oam lsp-trace sr-isis max-ttl</a> <i>number</i>
Tree	<a href="#">max-ttl</a>
Range	1 to 255
Default	30
Introduced	23.3.R1
Platforms	All

**min-ttl** *number*

Synopsis	Initial TTL for the test
Context	<a href="#">oam lsp-trace sr-isis min-ttl</a> <i>number</i>
Tree	<a href="#">min-ttl</a>
Range	1 to 255
Default	1
Introduced	23.3.R1
Platforms	All

**next-hop** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	Egress IP next hop address to use with path destination
Context	<a href="#">oam lsp-trace sr-isis next-hop</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	<a href="#">next-hop</a>
Notes	The following elements are part of a choice: <b>interface</b> or <b>next-hop</b> .
Introduced	23.3.R1
Platforms	All

**output-format** *keyword*

Synopsis	Output format for the result
Context	<a href="#">oam lsp-trace sr-isis output-format</a> <i>keyword</i>
Tree	<a href="#">output-format</a>
Options	summary, detail
Default	summary

Introduced 23.3.R1  
Platforms All

### **path-destination** (*ipv4-address-no-zone | ipv6-address-no-zone*)

Synopsis IP address of the path destination  
Context [oam lsp-trace sr-isis path-destination](#) (*ipv4-address-no-zone | ipv6-address-no-zone*)  
Tree [path-destination](#)  
Introduced 23.3.R1  
Platforms All

### **prefix** (*ipv4-prefix | ipv6-prefix*)

Synopsis Destination IP prefix for the test  
Context [oam lsp-trace sr-isis prefix](#) (*ipv4-prefix | ipv6-prefix*)  
Tree [prefix](#)  
Notes This element is mandatory.  
Introduced 23.3.R1  
Platforms All

### **probe-count** *number*

Synopsis Number of OAM trace probes to send per TTL  
Context [oam lsp-trace sr-isis probe-count](#) *number*  
Tree [probe-count](#)  
Range 1 to 10  
Default 1  
Introduced 23.3.R1  
Platforms All

### **profile** *keyword*

Synopsis QoS profile for the transmitted echo request packets  
Context [oam lsp-trace sr-isis profile](#) *keyword*  
Tree [profile](#)

---

Options	in, out
Default	out
Introduced	23.3.R1
Platforms	All

**size number**

Synopsis	Echo request packet pad size
Context	<a href="#">oam lsp-trace sr-isis size number</a>
Tree	<a href="#">size</a>
Range	1 to 9786
Units	bytes
Default	1
Introduced	23.3.R1
Platforms	All

**source-ip-address** ([ipv4-address-no-zone](#) | [ipv6-address-no-zone](#))

Synopsis	Source IP address
Context	<a href="#">oam lsp-trace sr-isis source-ip-address</a> ( <a href="#">ipv4-address-no-zone</a>   <a href="#">ipv6-address-no-zone</a> )
Tree	<a href="#">source-ip-address</a>
Introduced	23.3.R1
Platforms	All

**timeout number**

Synopsis	Time to wait for a reply after sending an echo request
Context	<a href="#">oam lsp-trace sr-isis timeout number</a>
Tree	<a href="#">timeout</a>
Range	1 to 10
Units	seconds
Default	5
Introduced	23.3.R1
Platforms	All

**sr-ospf**

Synopsis	Perform an SR-OSPF LSP trace test
Context	<a href="#">oam lsp-trace sr-ospf</a>
Tree	<a href="#">sr-ospf</a>
Introduced	23.3.R1
Platforms	All

**downstream-map-tlv** *keyword*

Synopsis	Type of downstream mapping TLV in MPLS echo request PDU
Context	<a href="#">oam lsp-trace sr-ospf downstream-map-tlv keyword</a>
Tree	<a href="#">downstream-map-tlv</a>
Options	dsmap – Downstream mapping TLV ddmap – Detailed downstream mapping TLV none – No mapping TLV
Introduced	23.3.R1
Platforms	All

**fc** *keyword*

Synopsis	QoS forwarding class for the sent echo request packet
Context	<a href="#">oam lsp-trace sr-ospf fc keyword</a>
Tree	<a href="#">fc</a>
Options	be, l2, af, l1, h2, ef, h1, nc
Default	be
Introduced	23.3.R1
Platforms	All

**flex-algo** *number*

Synopsis	Segment Routing Flexible Algorithm for the test
Context	<a href="#">oam lsp-trace sr-ospf flex-algo number</a>
Tree	<a href="#">flex-algo</a>
Range	128 to 255
Introduced	23.7.R1

---

Platforms All

### **igp-instance** *number*

Synopsis IGP instance for the SR-OSPF test

Context [oam lsp-trace sr-ospf igp-instance](#) *number*

Tree [igp-instance](#)

Range 0 to 31

Default 0

Introduced 23.3.R1

Platforms All

### **interface** *reference*

Synopsis Egress router interface to use with path destination

Context [oam lsp-trace sr-ospf interface](#) *reference*

Tree [interface](#)

Reference **state router** *string interface string*

Notes The following elements are part of a choice: **interface** or **next-hop**.

Introduced 23.3.R1

Platforms All

### **interval** *number*

Synopsis Minimum time to expire before next echo request is sent

Context [oam lsp-trace sr-ospf interval](#) *number*

Tree [interval](#)

Range 1 to 10

Units seconds

Default 1

Introduced 23.3.R1

Platforms All

### **max-fail** *number*

Synopsis	Maximum consecutive timeouts before terminating test
Context	<a href="#">oam lsp-trace sr-ospf max-fail</a> <i>number</i>
Tree	<a href="#">max-fail</a>
Range	1 to 255
Default	5
Introduced	23.3.R1
Platforms	All

### **max-ttl** *number*

Synopsis	Maximum TTL
Context	<a href="#">oam lsp-trace sr-ospf max-ttl</a> <i>number</i>
Tree	<a href="#">max-ttl</a>
Range	1 to 255
Default	30
Introduced	23.3.R1
Platforms	All

### **min-ttl** *number*

Synopsis	Initial TTL for the test
Context	<a href="#">oam lsp-trace sr-ospf min-ttl</a> <i>number</i>
Tree	<a href="#">min-ttl</a>
Range	1 to 255
Default	1
Introduced	23.3.R1
Platforms	All

### **next-hop** *string*

Synopsis	Egress IP next hop address to use with path destination
Context	<a href="#">oam lsp-trace sr-ospf next-hop</a> <i>string</i>
Tree	<a href="#">next-hop</a>
Notes	The following elements are part of a choice: <b>interface</b> or <b>next-hop</b> .

---

Introduced	23.3.R1
Platforms	All

**output-format** *keyword*

Synopsis	Output format for the result
Context	<a href="#">oam lsp-trace sr-ospf output-format keyword</a>
Tree	<a href="#">output-format</a>
Options	summary, detail
Default	summary
Introduced	23.3.R1
Platforms	All

**path-destination** *string*

Synopsis	IP address of the path destination
Context	<a href="#">oam lsp-trace sr-ospf path-destination string</a>
Tree	<a href="#">path-destination</a>
Introduced	23.3.R1
Platforms	All

**prefix** (*ipv4-prefix* | *ipv6-prefix*)

Synopsis	Destination IP prefix for the test
Context	<a href="#">oam lsp-trace sr-ospf prefix (ipv4-prefix   ipv6-prefix)</a>
Tree	<a href="#">prefix</a>
Notes	This element is mandatory.
Introduced	23.3.R1
Platforms	All

**probe-count** *number*

Synopsis	Number of OAM trace probes to send per TTL
Context	<a href="#">oam lsp-trace sr-ospf probe-count number</a>
Tree	<a href="#">probe-count</a>

---

Range	1 to 10
Default	1
Introduced	23.3.R1
Platforms	All

**profile** *keyword*

Synopsis	QoS profile for the transmitted echo request packets
Context	<a href="#">oam lsp-trace sr-ospf profile keyword</a>
Tree	<a href="#">profile</a>
Options	in, out
Default	out
Introduced	23.3.R1
Platforms	All

**size** *number*

Synopsis	Echo request packet pad size
Context	<a href="#">oam lsp-trace sr-ospf size number</a>
Tree	<a href="#">size</a>
Range	1 to 9786
Units	bytes
Default	1
Introduced	23.3.R1
Platforms	All

**source-ip-address** *string*

Synopsis	Source IP address
Context	<a href="#">oam lsp-trace sr-ospf source-ip-address string</a>
Tree	<a href="#">source-ip-address</a>
Introduced	23.3.R1
Platforms	All

**timeout** *number*

Synopsis	Time to wait for a reply after sending an echo request
Context	<a href="#">oam lsp-trace sr-ospf timeout</a> <i>number</i>
Tree	<a href="#">timeout</a>
Range	1 to 10
Units	seconds
Default	5
Introduced	23.3.R1
Platforms	All

**sr-ospf3**

Synopsis	Perform an SR-OSPFv3 LSP trace test
Context	<a href="#">oam lsp-trace sr-ospf3</a>
Tree	<a href="#">sr-ospf3</a>
Introduced	23.3.R1
Platforms	All

**downstream-map-tlv** *keyword*

Synopsis	Type of downstream mapping TLV in MPLS echo request PDU
Context	<a href="#">oam lsp-trace sr-ospf3 downstream-map-tlv</a> <i>keyword</i>
Tree	<a href="#">downstream-map-tlv</a>
Options	dsmap – Downstream mapping TLV ddmap – Detailed downstream mapping TLV none – No mapping TLV
Introduced	23.3.R1
Platforms	All

**fc** *keyword*

Synopsis	QoS forwarding class for the sent echo request packet
Context	<a href="#">oam lsp-trace sr-ospf3 fc</a> <i>keyword</i>
Tree	<a href="#">fc</a>
Options	be, l2, af, l1, h2, ef, h1, nc

Default	be
Introduced	23.3.R1
Platforms	All

### **igp-instance** *number*

Synopsis	IGP instance for the SR-OSPFv3 test
Context	<a href="#">oam lsp-trace sr-ospf3 igp-instance</a> <i>number</i>
Tree	<a href="#">igp-instance</a>
Range	0 to 31   64 to 95
Default	0
Introduced	23.3.R1
Platforms	All

### **interface** *reference*

Synopsis	Egress router interface to use with path destination
Context	<a href="#">oam lsp-trace sr-ospf3 interface</a> <i>reference</i>
Tree	<a href="#">interface</a>
Reference	<b>state router</b> <i>string interface string</i>
Notes	The following elements are part of a choice: <b>interface</b> or <b>next-hop</b> .
Introduced	23.3.R1
Platforms	All

### **interval** *number*

Synopsis	Minimum time to expire before next echo request is sent
Context	<a href="#">oam lsp-trace sr-ospf3 interval</a> <i>number</i>
Tree	<a href="#">interval</a>
Range	1 to 10
Units	seconds
Default	1
Introduced	23.3.R1
Platforms	All

**max-fail number**

Synopsis	Maximum consecutive timeouts before terminating test
Context	<a href="#">oam lsp-trace sr-ospf3 max-fail number</a>
Tree	<a href="#">max-fail</a>
Range	1 to 255
Default	5
Introduced	23.3.R1
Platforms	All

**max-ttl number**

Synopsis	Maximum TTL
Context	<a href="#">oam lsp-trace sr-ospf3 max-ttl number</a>
Tree	<a href="#">max-ttl</a>
Range	1 to 255
Default	30
Introduced	23.3.R1
Platforms	All

**min-ttl number**

Synopsis	Initial TTL for the test
Context	<a href="#">oam lsp-trace sr-ospf3 min-ttl number</a>
Tree	<a href="#">min-ttl</a>
Range	1 to 255
Default	1
Introduced	23.3.R1
Platforms	All

**next-hop (ipv4-address-no-zone | ipv6-address-no-zone)**

Synopsis	Egress IP next hop address to use with path destination
Context	<a href="#">oam lsp-trace sr-ospf3 next-hop (ipv4-address-no-zone   ipv6-address-no-zone)</a>
Tree	<a href="#">next-hop</a>

---

Notes	The following elements are part of a choice: <b>interface</b> or <b>next-hop</b> .
Introduced	23.3.R1
Platforms	All

**output-format** *keyword*

Synopsis	Output format for the result
Context	<a href="#">oam lsp-trace sr-ospf3 output-format keyword</a>
Tree	<a href="#">output-format</a>
Options	summary, detail
Default	summary
Introduced	23.3.R1
Platforms	All

**path-destination** (*ipv4-address-no-zone | ipv6-address-no-zone*)

Synopsis	IP address of the path destination
Context	<a href="#">oam lsp-trace sr-ospf3 path-destination (ipv4-address-no-zone   ipv6-address-no-zone)</a>
Tree	<a href="#">path-destination</a>
Introduced	23.3.R1
Platforms	All

**prefix** (*ipv4-prefix | ipv6-prefix*)

Synopsis	Destination IP prefix for the test
Context	<a href="#">oam lsp-trace sr-ospf3 prefix (ipv4-prefix   ipv6-prefix)</a>
Tree	<a href="#">prefix</a>
Notes	This element is mandatory.
Introduced	23.3.R1
Platforms	All

**probe-count** *number*

Synopsis	Number of OAM trace probes to send per TTL
Context	<a href="#">oam lsp-trace sr-ospf3 probe-count number</a>

Tree	<a href="#">probe-count</a>
Range	1 to 10
Default	1
Introduced	23.3.R1
Platforms	All

### **profile** *keyword*

Synopsis	QoS profile for the transmitted echo request packets
Context	<a href="#">oam lsp-trace sr-ospf3 profile keyword</a>
Tree	<a href="#">profile</a>
Options	in, out
Default	out
Introduced	23.3.R1
Platforms	All

### **size** *number*

Synopsis	Echo request packet pad size
Context	<a href="#">oam lsp-trace sr-ospf3 size number</a>
Tree	<a href="#">size</a>
Range	1 to 9786
Units	bytes
Default	1
Introduced	23.3.R1
Platforms	All

### **source-ip-address** (*ipv4-address-no-zone | ipv6-address-no-zone*)

Synopsis	Source IP address
Context	<a href="#">oam lsp-trace sr-ospf3 source-ip-address (ipv4-address-no-zone   ipv6-address-no-zone)</a>
Tree	<a href="#">source-ip-address</a>
Introduced	23.3.R1
Platforms	All

**timeout** *number*

Synopsis	Time to wait for a reply after sending an echo request
Context	<a href="#">oam lsp-trace sr-ospf3 timeout</a> <i>number</i>
Tree	<a href="#">timeout</a>
Range	1 to 10
Units	seconds
Default	5
Introduced	23.3.R1
Platforms	All

**sr-policy**

Synopsis	Perform an SR policy LSP trace test
Context	<a href="#">oam lsp-trace sr-policy</a>
Tree	<a href="#">sr-policy</a>
Introduced	23.3.R1
Platforms	All

**color** *number*

Synopsis	Segment Routing color for the test
Context	<a href="#">oam lsp-trace sr-policy color</a> <i>number</i>
Tree	<a href="#">color</a>
Max. Range	0 to 4294967295
Notes	This element is mandatory.
Introduced	23.3.R1
Platforms	All

**downstream-map-tlv** *keyword*

Synopsis	Type of downstream mapping TLV in MPLS echo request PDU
Context	<a href="#">oam lsp-trace sr-policy downstream-map-tlv</a> <i>keyword</i>
Tree	<a href="#">downstream-map-tlv</a>
Options	dsmap – Downstream mapping TLV

	ddmap – Detailed downstream mapping TLV none – No mapping TLV
Introduced	23.3.R1
Platforms	All

### **endpoint** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	Segment Routing endpoint for the test
Context	<a href="#">oam lsp-trace sr-policy endpoint</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	<a href="#">endpoint</a>
Notes	This element is mandatory.
Introduced	23.3.R1
Platforms	All

### **fc keyword**

Synopsis	QoS forwarding class for the sent echo request packet
Context	<a href="#">oam lsp-trace sr-policy fc keyword</a>
Tree	<a href="#">fc</a>
Options	be, l2, af, l1, h2, ef, h1, nc
Default	be
Introduced	23.3.R1
Platforms	All

### **interface reference**

Synopsis	Egress router interface to use with path destination
Context	<a href="#">oam lsp-trace sr-policy interface reference</a>
Tree	<a href="#">interface</a>
Reference	<b>state router</b> <i>string interface string</i>
Notes	The following elements are part of a choice: <b>interface</b> or <b>next-hop</b> .
Introduced	23.3.R1
Platforms	All

**interval number**

Synopsis	Minimum time to expire before next echo request is sent
Context	<a href="#">oam lsp-trace sr-policy interval number</a>
Tree	<a href="#">interval</a>
Range	1 to 10
Units	seconds
Default	1
Introduced	23.3.R1
Platforms	All

**max-fail number**

Synopsis	Maximum consecutive timeouts before terminating test
Context	<a href="#">oam lsp-trace sr-policy max-fail number</a>
Tree	<a href="#">max-fail</a>
Range	1 to 255
Default	5
Introduced	23.3.R1
Platforms	All

**max-ttl number**

Synopsis	Maximum TTL
Context	<a href="#">oam lsp-trace sr-policy max-ttl number</a>
Tree	<a href="#">max-ttl</a>
Range	1 to 255
Default	30
Introduced	23.3.R1
Platforms	All

**min-ttl number**

Synopsis	Initial TTL for the test
Context	<a href="#">oam lsp-trace sr-policy min-ttl number</a>
Tree	<a href="#">min-ttl</a>

---

Range	1 to 255
Default	1
Introduced	23.3.R1
Platforms	All

**next-hop** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	Egress IP next hop address to use with path destination
Context	<a href="#">oam lsp-trace sr-policy next-hop</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	<a href="#">next-hop</a>
Notes	The following elements are part of a choice: <b>interface</b> or <b>next-hop</b> .
Introduced	23.3.R1
Platforms	All

**output-format** *keyword*

Synopsis	Output format for the result
Context	<a href="#">oam lsp-trace sr-policy output-format</a> <i>keyword</i>
Tree	<a href="#">output-format</a>
Options	summary, detail
Default	summary
Introduced	23.3.R1
Platforms	All

**path-destination** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	IP address of the path destination
Context	<a href="#">oam lsp-trace sr-policy path-destination</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	<a href="#">path-destination</a>
Introduced	23.3.R1
Platforms	All

**probe-count** *number*

Synopsis	Number of OAM trace probes to send per TTL
----------	--

---

Context	<a href="#">oam lsp-trace sr-policy probe-count</a> <i>number</i>
Tree	<a href="#">probe-count</a>
Range	1 to 10
Default	1
Introduced	23.3.R1
Platforms	All

### **profile** *keyword*

Synopsis	QoS profile for the transmitted echo request packets
Context	<a href="#">oam lsp-trace sr-policy profile</a> <i>keyword</i>
Tree	<a href="#">profile</a>
Options	in, out
Default	out
Introduced	23.3.R1
Platforms	All

### **segment-list** *number*

Synopsis	Segment Routing segment list for the test
Context	<a href="#">oam lsp-trace sr-policy segment-list</a> <i>number</i>
Tree	<a href="#">segment-list</a>
Range	1 to 32
Introduced	23.3.R1
Platforms	All

### **size** *number*

Synopsis	Echo request packet pad size
Context	<a href="#">oam lsp-trace sr-policy size</a> <i>number</i>
Tree	<a href="#">size</a>
Range	1 to 9786
Units	bytes
Default	1
Introduced	23.3.R1

Platforms All

### **source-ip-address** (*ipv4-address-no-zone | ipv6-address-no-zone*)

Synopsis Source IP address  
 Context [oam lsp-trace sr-policy source-ip-address](#) (*ipv4-address-no-zone | ipv6-address-no-zone*)  
 Tree [source-ip-address](#)  
 Introduced 23.3.R1  
 Platforms All

### **timeout** *number*

Synopsis Time to wait for a reply after sending an echo request  
 Context [oam lsp-trace sr-policy timeout](#) *number*  
 Tree [timeout](#)  
 Range 1 to 10  
 Units seconds  
 Default 5  
 Introduced 23.3.R1  
 Platforms All

### **sr-te**

Synopsis Perform an SR-TE LSP trace test  
 Context [oam lsp-trace sr-te](#)  
 Tree [sr-te](#)  
 Introduced 23.3.R1  
 Platforms All

### **downstream-map-tlv** *keyword*

Synopsis Type of downstream mapping TLV in MPLS echo request PDU  
 Context [oam lsp-trace sr-te downstream-map-tlv](#) *keyword*  
 Tree [downstream-map-tlv](#)  
 Options dsmap – Downstream mapping TLV

	ddmap – Detailed downstream mapping TLV none – No mapping TLV
Introduced	23.3.R1
Platforms	All

**fc keyword**

Synopsis	QoS forwarding class for the sent echo request packet
Context	<a href="#">oam lsp-trace sr-te fc keyword</a>
Tree	<a href="#">fc</a>
Options	be, l2, af, l1, h2, ef, h1, nc
Default	be
Introduced	23.3.R1
Platforms	All

**interface reference**

Synopsis	Egress router interface to use with path destination
Context	<a href="#">oam lsp-trace sr-te interface reference</a>
Tree	<a href="#">interface</a>
Reference	<b>state router string interface string</b>
Notes	The following elements are part of a choice: <b>interface</b> or <b>next-hop</b> .
Introduced	23.3.R1
Platforms	All

**interval number**

Synopsis	Minimum time to expire before next echo request is sent
Context	<a href="#">oam lsp-trace sr-te interval number</a>
Tree	<a href="#">interval</a>
Range	1 to 10
Units	seconds
Default	1
Introduced	23.3.R1
Platforms	All

### **lsp-name** *reference*

Synopsis	Name of the LSP to test
Context	<a href="#">oam lsp-trace sr-te lsp-name</a> <i>reference</i>
Tree	<a href="#">lsp-name</a>
Reference	<b>state router</b> <i>string mpls lsp string</i>
Notes	This element is mandatory.
Introduced	23.3.R1
Platforms	All

### **max-fail** *number*

Synopsis	Maximum consecutive timeouts before terminating test
Context	<a href="#">oam lsp-trace sr-te max-fail</a> <i>number</i>
Tree	<a href="#">max-fail</a>
Range	1 to 255
Default	5
Introduced	23.3.R1
Platforms	All

### **max-ttl** *number*

Synopsis	Maximum TTL
Context	<a href="#">oam lsp-trace sr-te max-ttl</a> <i>number</i>
Tree	<a href="#">max-ttl</a>
Range	1 to 255
Default	30
Introduced	23.3.R1
Platforms	All

### **min-ttl** *number*

Synopsis	Initial TTL for the test
Context	<a href="#">oam lsp-trace sr-te min-ttl</a> <i>number</i>
Tree	<a href="#">min-ttl</a>

Range	1 to 255
Default	1
Introduced	23.3.R1
Platforms	All

### **next-hop** (*ipv4-address-no-zone | ipv6-address-no-zone*)

Synopsis	Egress IP next hop address to use with path destination
Context	<a href="#">oam lsp-trace sr-te next-hop</a> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> )
Tree	<a href="#">next-hop</a>
Notes	The following elements are part of a choice: <b>interface</b> or <b>next-hop</b> .
Introduced	23.3.R1
Platforms	All

### **output-format** *keyword*

Synopsis	Output format for the result
Context	<a href="#">oam lsp-trace sr-te output-format</a> <i>keyword</i>
Tree	<a href="#">output-format</a>
Options	summary, detail
Default	summary
Introduced	23.3.R1
Platforms	All

### **path** *reference*

Synopsis	Name of the MPLS path to test
Context	<a href="#">oam lsp-trace sr-te path</a> <i>reference</i>
Tree	<a href="#">path</a>
Reference	<b>state router</b> <i>string mpls path string</i>
Introduced	23.3.R1
Platforms	All

**path-destination** (*ipv4-address-no-zone | ipv6-address-no-zone*)

Synopsis	IP address of the path destination
Context	<a href="#">oam lsp-trace sr-te path-destination</a> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> )
Tree	<a href="#">path-destination</a>
Introduced	23.3.R1
Platforms	All

**probe-count** *number*

Synopsis	Number of OAM trace probes to send per TTL
Context	<a href="#">oam lsp-trace sr-te probe-count</a> <i>number</i>
Tree	<a href="#">probe-count</a>
Range	1 to 10
Default	1
Introduced	23.3.R1
Platforms	All

**profile** *keyword*

Synopsis	QoS profile for the transmitted echo request packets
Context	<a href="#">oam lsp-trace sr-te profile</a> <i>keyword</i>
Tree	<a href="#">profile</a>
Options	in, out
Default	out
Introduced	23.3.R1
Platforms	All

**size** *number*

Synopsis	Echo request packet pad size
Context	<a href="#">oam lsp-trace sr-te size</a> <i>number</i>
Tree	<a href="#">size</a>
Range	1 to 9786
Units	bytes
Default	1

Introduced 23.3.R1  
Platforms All

### **source-ip-address** (*ipv4-address-no-zone | ipv6-address-no-zone*)

Synopsis Source IP address  
Context [oam lsp-trace sr-te source-ip-address](#) (*ipv4-address-no-zone | ipv6-address-no-zone*)  
Tree [source-ip-address](#)  
Introduced 23.3.R1  
Platforms All

### **timeout** *number*

Synopsis Time to wait for a reply after sending an echo request  
Context [oam lsp-trace sr-te timeout](#) *number*  
Tree [timeout](#)  
Range 1 to 10  
Units seconds  
Default 5  
Introduced 23.3.R1  
Platforms All

### **oam-pm**

Synopsis Initiate an on-demand OAM Performance Monitoring test  
Context [oam oam-pm](#)  
Tree [oam-pm](#)  
Introduced 20.2.R1  
Platforms All

### **action** *keyword*

Synopsis OAM-PM test action  
Context [oam oam-pm action](#) *keyword*  
Tree [action](#)

---

Options	start, stop
Notes	This element is mandatory.
Introduced	20.2.R1
Platforms	All

### **session** *reference*

Synopsis	OAM-PM session name
Context	<a href="#">oam oam-pm session reference</a>
Tree	<a href="#">session</a>
Reference	<b>state oam-pm session</b> <i>string</i>
Notes	This element is mandatory.
Introduced	20.2.R1
Platforms	All

### **test-type** *keyword*

Synopsis	Test type
Context	<a href="#">oam oam-pm test-type keyword</a>
Tree	<a href="#">test-type</a>
Options	dm, dmm, lmm, slm, twamp-light
Notes	This element is mandatory.
Introduced	20.2.R1
Platforms	All

### **saa**

Synopsis	Enter the <b>saa</b> context
Context	<a href="#">oam saa</a>
Tree	<a href="#">saa</a>
Introduced	22.10.R1
Platforms	All

**owner** [**owner-name**] *reference test reference*

Synopsis	SAA owner name
Context	<a href="#">oam saa owner</a> <i>reference test reference</i>
Tree	<a href="#">owner</a>
Introduced	22.10.R1
Platforms	All

**[owner-name]** *reference*

Synopsis	Name of the owner of SAA test to be stopped or started
Context	<a href="#">oam saa owner</a> <i>reference test reference</i>
Tree	<a href="#">owner</a>
MD-CLI	TiMOS CLI
Default	
Reference	<b>state saa owner</b> <i>string test string</i>
Notes	This element is part of a list key.
Introduced	22.10.R1
Platforms	All

**test** *reference*

Synopsis	Name of the SAA test to be stopped or started
Context	<a href="#">oam saa owner</a> <i>reference test reference</i>
Tree	<a href="#">owner</a>
Reference	<b>state saa owner</b> <i>string test string</i>
Notes	This element is part of a list key.
Introduced	22.10.R1
Platforms	All

**start**

Synopsis	Start the SAA test
Context	<a href="#">oam saa owner</a> <i>reference test reference start</i>
Tree	<a href="#">start</a>
Introduced	22.10.R1

---

Platforms All

### **accounting *boolean***

Synopsis Disable recording results in accounting policy  
Context [oam saa owner reference test reference start accounting boolean](#)  
Tree [accounting](#)  
Default true  
Introduced 22.10.R1  
Platforms All

### **stop**

Synopsis Stop the SAA test  
Context [oam saa owner reference test reference stop](#)  
Tree [stop](#)  
Introduced 22.10.R1  
Platforms All

### **accounting *boolean***

Synopsis Disable recording results in accounting policy  
Context [oam saa owner reference test reference stop accounting boolean](#)  
Tree [accounting](#)  
Default true  
Introduced 22.10.R1  
Platforms All

### **service-activation-testhead**

Synopsis Start or stop Service Activation Testhead service test  
Context [oam service-activation-testhead](#)  
Tree [service-activation-testhead](#)  
Introduced 23.10.R1  
Platforms All

**service-test** [[service-test-name](#)] *reference*

Synopsis	Service test name
Context	<a href="#">oam service-activation-testhead service-test reference</a>
Tree	<a href="#">service-test</a>
Introduced	23.10.R1
Platforms	All

**[service-test-name]** *reference*

Synopsis	Name of the service test to be started or stopped
Context	<a href="#">oam service-activation-testhead service-test reference</a>
Tree	<a href="#">service-test</a>
Reference	<b>state test-oam service-activation-testhead service-test string</b>
Notes	This element is part of a list key.
Introduced	23.10.R1
Platforms	All

**start**

Synopsis	Start OAM SATH service test
Context	<a href="#">oam service-activation-testhead service-test reference start</a>
Tree	<a href="#">start</a>
Description	This command starts an OAM Service Activation Testhead (SATH) service test. Only one instance of a service test is allowed for the specified <i>service-test-name</i> . If the user attempts to start another instance of a service test for the same <i>service-test-name</i> while the current instance is still running, an error is generated.
Introduced	23.10.R1
Platforms	All

**stop**

Synopsis	Stop OAM SATH service test
Context	<a href="#">oam service-activation-testhead service-test reference stop</a>
Tree	<a href="#">stop</a>

---

Description	This command stops an OAM Service Activation Testhead (SATH) service test. If the user attempts to stop a service test that is already complete, an error is generated.
Introduced	23.10.R1
Platforms	All

## password

Synopsis	Change the local user password
Context	<a href="#">password</a>
Tree	<a href="#">password</a>
Introduced	20.10.R1
Platforms	All

## ping

Synopsis	Ping an IP address or DNS name
Context	<a href="#">ping</a>
Tree	<a href="#">ping</a>
Introduced	19.10.R1
Platforms	All

## bypass-routing

Synopsis	Bypass routing table when sending ping request to host
Context	<a href="#">ping bypass-routing</a>
Tree	<a href="#">bypass-routing</a>
Description	When configured, the system bypasses the routing table when sending the ping request to a host on a directly-attached network. If the host is not on a directly-attached network, an error is returned.
Notes	The following elements are part of a choice: <b>bypass-routing</b> , <b>interface</b> , <b>next-hop-address</b> , or <b>subscriber</b> .
Introduced	19.10.R1
Platforms	All

**candidate-path**

Synopsis	Ping candidate path of the SRv6 policy
Context	<a href="#">ping candidate-path</a>
Tree	<a href="#">candidate-path</a>
Description	When configured, this command allows the user to specify a candidate path of the SRv6 policy to ping. The candidate path does not need to be the currently active candidate path.
Introduced	23.10.R1
Platforms	All

**color number**

Synopsis	Color identifier of the Segment Routing IPv6 policy
Context	<a href="#">ping color number</a>
Tree	<a href="#">color</a>
Max. Range	0 to 4294967295
Notes	The following elements are part of a mandatory choice: ( <b>destination</b> , <b>router-instance</b> , and <b>source-address</b> ) or ( <b>color</b> , <b>endpoint</b> , <b>segment-list</b> , and <b>srv6-policy</b> ).
Introduced	23.7.R1
Platforms	All

**count number**

Synopsis	Number of ping requests to send to the remote host
Context	<a href="#">ping count number</a>
Tree	<a href="#">count</a>
Range	1 to 100000
Units	packets
Default	5
Introduced	19.10.R1
Platforms	All

**[destination]** (*ipv4-address-with-zone | ipv6-address-with-zone | string-not-all-spaces*)

Synopsis	Destination IP address or DNS name
----------	------------------------------------

Context	<a href="#">ping [destination]</a> ( <i>ipv4-address-with-zone   ipv6-address-with-zone   string-not-all-spaces</i> )
Tree	<a href="#">[destination]</a>
String Length	1 to 128
Notes	The following elements are part of a mandatory choice: ( <b>destination</b> , <b>router-instance</b> , and <b>source-address</b> ) or ( <b>color</b> , <b>endpoint</b> , <b>segment-list</b> , and <b>srv6-policy</b> ).
Introduced	19.10.R1
Platforms	All

### **distinguisher** *number*

Synopsis	SRv6 policy candidate path distinguisher
Context	<a href="#">ping distinguisher</a> <i>number</i>
Tree	<a href="#">distinguisher</a>
Description	This command specifies the distinguisher of the SRv6 policy candidate path to send the ping probe on.  This command must be configured if the <b>protocol-owner</b> command is configured to <b>bgp</b> .
Range	1 to 4294967295
Introduced	23.10.R1
Platforms	All

### **do-not-fragment**

Synopsis	Do not fragment the request frame
Context	<a href="#">ping do-not-fragment</a>
Tree	<a href="#">do-not-fragment</a>
Description	This command sets the do-not-fragment bit in the IPv4 header. This prevents packet fragmentation along the path when there is an MTU mismatch.
Introduced	19.10.R1
Platforms	All

### **endpoint** *string*

Synopsis	Endpoint identifier of the Segment Routing IPv6 policy to be pinged
Context	<a href="#">ping endpoint</a> <i>string</i>

Tree	<a href="#">endpoint</a>
Notes	The following elements are part of a mandatory choice: ( <b>destination</b> , <b>router-instance</b> , and <b>source-address</b> ) or ( <b>color</b> , <b>endpoint</b> , <b>segment-list</b> , and <b>srv6-policy</b> ).
Introduced	23.7.R1
Platforms	All

**fc keyword**

Synopsis	Forwarding class option for the transmitted packet
Context	<a href="#">ping fc keyword</a>
Tree	<a href="#">fc</a>
Options	be, l2, af, l1, h2, ef, h1, nc
Default	nc
Introduced	19.10.R1
Platforms	All

**interface** (*reference | reference | reference | reference | reference*)

Synopsis	Sending interface name
Context	<a href="#">ping interface</a> ( <i>reference   reference   reference   reference   reference</i> )
Tree	<a href="#">interface</a>
Reference	<b>state router</b> <i>string interface string</i> <b>state service ies</b> <i>string interface string</i> <b>state service ies</b> <i>string subscriber-interface string</i> <b>state service vprn</b> <i>string interface string</i> <b>state service vprn</b> <i>string subscriber-interface string</i>
Notes	The following elements are part of a choice: <b>bypass-routing</b> , <b>interface</b> , <b>next-hop-address</b> , or <b>subscriber</b> .
Introduced	19.10.R1
Platforms	All

**interval** (*number | decimal-number*)

Synopsis	Time between consecutive ping requests
Context	<a href="#">ping interval</a> ( <i>number   decimal-number</i> )

Tree	<a href="#">interval</a>
Range	1 to 10000
Units	seconds
Default	1
Introduced	19.10.R1
Platforms	All

### **next-hop-address** (*ipv4-address-no-zone | ipv6-address-no-zone*)

Synopsis	Next-hop address to send packet, ignoring routing table
Context	<a href="#">ping next-hop-address</a> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> )
Tree	<a href="#">next-hop-address</a>
Description	This command specifies the next-hop address. The system does not use the routing table and the address must be on an adjacent router attached to a common subnet.
Notes	The following elements are part of a choice: <b>bypass-routing</b> , <b>interface</b> , <b>next-hop-address</b> , or <b>subscriber</b> .
Introduced	19.10.R1
Platforms	All

### **output-format** *keyword*

Synopsis	Output format
Context	<a href="#">ping output-format</a> <i>keyword</i>
Tree	<a href="#">output-format</a>
Options	summary, detail
Default	detail
Introduced	19.10.R1
Platforms	All

### **pattern** (*keyword | number*)

Synopsis	Pattern string to include in the packet
Context	<a href="#">ping pattern</a> ( <i>keyword   number</i> )
Tree	<a href="#">pattern</a>
Range	0 to 65535

Options	sequential
Default	sequential
Introduced	19.10.R1
Platforms	All

### **preference** *number*

Synopsis	SRv6 policy candidate path preference
Context	<a href="#">ping preference number</a>
Tree	<a href="#">preference</a>
Description	This command specifies the preference of the SRv6 policy candidate path to send the ping probe on.
Max. Range	0 to 4294967295
Default	100
Introduced	23.10.R1
Platforms	All

### **protocol-owner** *keyword*

Synopsis	Protocol owner
Context	<a href="#">ping protocol-owner keyword</a>
Tree	<a href="#">protocol-owner</a>
Description	This command specifies the protocol owner of the SRv6 policy candidate path to ping. The <b>bgp</b> option specifies a BGP SRv6 policy. The <b>static</b> option specifies a locally configured static SRv6 policy.
Options	bgp, static
Introduced	23.10.R1
Platforms	All

### **router-instance** (*reference* | *reference*)

Synopsis	Router name or VPRN service name
Context	<a href="#">ping router-instance (reference   reference)</a>
Tree	<a href="#">router-instance</a>
Default	Base

Reference	<b>state router</b> <i>string</i> <b>state service vprn</b> <i>string</i>
Notes	The following elements are part of a mandatory choice: ( <b>destination</b> , <b>router-instance</b> , and <b>source-address</b> ) or ( <b>color</b> , <b>endpoint</b> , <b>segment-list</b> , and <b>srv6-policy</b> ).
Introduced	19.10.R1
Platforms	All

### **segment-list** *number*

Synopsis	Segment Routing IPv6 segment list to be pinged
Context	<a href="#">ping segment-list</a> <i>number</i>
Tree	<a href="#">segment-list</a>
Range	1 to 32
Notes	The following elements are part of a mandatory choice: ( <b>destination</b> , <b>router-instance</b> , and <b>source-address</b> ) or ( <b>color</b> , <b>endpoint</b> , <b>segment-list</b> , and <b>srv6-policy</b> ).
Introduced	23.7.R1
Platforms	All

### **size** *number*

Synopsis	Request packet size including ICMP header and payload
Context	<a href="#">ping size</a> <i>number</i>
Tree	<a href="#">size</a>
Range	0 to 16384
Units	bytes
Default	56
Introduced	19.10.R1
Platforms	All

### **source-address** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	Source IP address used in the ICMP Echo Request packet
Context	<a href="#">ping source-address</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	<a href="#">source-address</a>
Notes	The following elements are part of a mandatory choice: ( <b>destination</b> , <b>router-instance</b> , and <b>source-address</b> ) or ( <b>color</b> , <b>endpoint</b> , <b>segment-list</b> , and <b>srv6-policy</b> ).

---

Introduced	19.10.R1
Platforms	All

### **srv6-policy**

Synopsis	Ping a Segment Routing IPv6 policy
Context	<a href="#">ping srv6-policy</a>
Tree	<a href="#">srv6-policy</a>
Notes	The following elements are part of a mandatory choice: ( <b>destination</b> , <b>router-instance</b> , and <b>source-address</b> ) or ( <b>color</b> , <b>endpoint</b> , <b>segment-list</b> , and <b>srv6-policy</b> ).
Introduced	23.7.R1
Platforms	All

### **subscriber string**

Synopsis	Subscriber ID for sending ICMP Echo Request packets
Context	<a href="#">ping subscriber string</a>
Tree	<a href="#">subscriber</a>
String Length	1 to 64
Notes	The following elements are part of a choice: <b>bypass-routing</b> , <b>interface</b> , <b>next-hop-address</b> , or <b>subscriber</b> .
Introduced	19.10.R1
Platforms	All

### **timeout number**

Synopsis	Wait time for the ICMP Echo Reply packet
Context	<a href="#">ping timeout number</a>
Tree	<a href="#">timeout</a>
Description	This command specifies the time to wait for the ICMP Echo Reply packet. The timer is started when the last ICMP Echo Request is sent.
Range	1 to 10
Units	seconds
Default	5
Introduced	19.10.R2

Platforms All

### **tos number**

Synopsis Type of Service (ToS) bits in the IP header  
Context [ping tos number](#)  
Tree [tos](#)  
Range 0 to 255  
Default 0  
Introduced 19.10.R1  
Platforms All

### **tll number**

Synopsis Time to Live (TTL) included in the request packet  
Context [ping tll number](#)  
Tree [tll](#)  
Range 1 to 128  
Default 64  
Introduced 19.10.R1  
Platforms All

### **pwc**

Synopsis Show the present working context  
Context [pwc](#)  
Tree [pwc](#)  
Introduced 16.0.R1  
Platforms All

### **[path-type] keyword**

Synopsis Alternative format to display the path  
Context [pwc \[path-type\] keyword](#)  
Tree [\[path-type\]](#)

Description	This command provides alternative formats to display the present working context. The <b>gnmi-path</b> option replaces the <b>xpath</b> option.
Options	model-path – YANG-modeled format for RESTCONF gnmi-path – gNMI format for streaming telemetry cli-path – MD-CLI format on a single line for copying and pasting json-instance-path – YANG-modeled format for pySROS
Introduced	19.10.R1
Platforms	All

## previous

Synopsis	Display previous working context
Context	<a href="#">pwc previous</a>
Tree	<a href="#">previous</a>
Introduced	16.0.R1
Platforms	All

## pyexec [[url](#)] (*string* | *string*)

Synopsis	Execute a Python application
Context	<a href="#">pyexec</a> ( <i>string</i>   <i>string</i> )
Tree	<a href="#">pyexec</a>
Introduced	21.7.R1
Platforms	All

## [\[url\]](#) (*string* | *string*)

Synopsis	Location of the script to be executed
Context	<a href="#">pyexec</a> ( <i>string</i>   <i>string</i> )
Tree	<a href="#">pyexec</a>
Notes	This element is part of a list key.
Introduced	21.7.R1
Platforms	All

**[argument-01] string**

Synopsis	First argument
Context	<a href="#">pyexec</a> ( <i>string</i>   <i>string</i> ) <a href="#">[argument-01]</a> <i>string</i>

**quit-config**

Synopsis	Exit the candidate configuration mode
Context	<a href="#">quit-config</a>
Tree	<a href="#">quit-config</a>
Introduced	16.0.R1
Platforms	All

**ssh**

Synopsis	SSH to an IP address or DNS name
Context	<a href="#">ssh</a>
Tree	<a href="#">ssh</a>
Introduced	20.7.R1
Platforms	All

**[destination]** (*ipv4-address-with-zone* | *ipv6-address-with-zone* | *string-not-all-spaces*)

Synopsis	Destination IP address or DNS name
Context	<a href="#">ssh</a> <a href="#">[destination]</a> ( <i>ipv4-address-with-zone</i>   <i>ipv6-address-with-zone</i>   <i>string-not-all-spaces</i> )
Tree	<a href="#">[destination]</a>
String Length	1 to 128
Notes	This element is mandatory.
Introduced	20.7.R1
Platforms	All

## key-re-exchange

Synopsis	Enter the <b>key-re-exchange</b> context
Context	<a href="#">ssh key-re-exchange</a>
Tree	<a href="#">key-re-exchange</a>
Introduced	20.7.R1
Platforms	All

## mbytes (*number* | *keyword*)

Synopsis	Maximum bytes before initiating key re-exchange
Context	<a href="#">ssh key-re-exchange mbytes</a> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">mbytes</a>
Description	This command specifies the number of bytes transmitted on an SSH session, after which the SSH client initiates the key re-exchange.
Range	1 to 64000
Units	megabytes
Options	infinite
Default	1024
Introduced	20.7.R1
Platforms	All

## minutes (*number* | *keyword*)

Synopsis	Time after which SSH client initiates key re-exchange
Context	<a href="#">ssh key-re-exchange minutes</a> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">minutes</a>
Range	1 to 1440
Units	minutes
Options	infinite
Default	60
Introduced	20.7.R1
Platforms	All

**login-name** *string*

Synopsis	SSH login username
Context	<a href="#">ssh login-name</a> <i>string</i>
Tree	<a href="#">login-name</a>
String Length	1 to 32
Introduced	20.7.R1
Platforms	All

**private-key-file** *string*

Synopsis	File with SSH private key
Context	<a href="#">ssh private-key-file</a> <i>string</i>
Tree	<a href="#">private-key-file</a>
Introduced	23.10.R3
Platforms	All

**router-instance** (*string* | *string*)

Synopsis	Router name or VPRN service name
Context	<a href="#">ssh router-instance</a> ( <i>string</i>   <i>string</i> )
Tree	<a href="#">router-instance</a>
Default	Base
Introduced	20.7.R1
Platforms	All

**telnet**

Synopsis	Telnet to an IP address or DNS name
Context	<a href="#">telnet</a>
Tree	<a href="#">telnet</a>
Description	This command opens a Telnet session to a remote host. In SR-series networks, the Telnet servers limit Telnet clients to three login attempts; if unsuccessful, the Telnet client session disconnects. The number is not user configurable.
Introduced	20.7.R1
Platforms	All

**[destination]** (*ipv4-address-with-zone | ipv6-address-with-zone | string-not-all-spaces*)

Synopsis	Destination IP address or DNS name
Context	<a href="#">telnet [destination]</a> ( <i>ipv4-address-with-zone   ipv6-address-with-zone   string-not-all-spaces</i> )
Tree	<a href="#">[destination]</a>
Description	This command specifies the IP address or DNS name (if DNS name resolution is configured) of the remote host for the Telnet session.
String Length	1 to 128
Notes	This element is mandatory.
Introduced	20.7.R1
Platforms	All

**port number**

Synopsis	Remote host TCP port for the Telnet connection
Context	<a href="#">telnet port number</a>
Tree	<a href="#">port</a>
Range	1 to 65535
Default	23
Introduced	20.7.R1
Platforms	All

**router-instance** (*string | string*)

Synopsis	Router name or VPRN service name
Context	<a href="#">telnet router-instance</a> ( <i>string   string</i> )
Tree	<a href="#">router-instance</a>
Default	Base
Introduced	20.7.R1
Platforms	All

**source-address** (*ipv4-address-no-zone | ipv6-address-no-zone*)

Synopsis	Source IP address of the Telnet packets
----------	---

---

Context	<a href="#">telnet source-address</a> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> )
Tree	<a href="#">source-address</a>
Introduced	20.7.R1
Platforms	All

## top

Synopsis	Move to the top level of the context
Context	<a href="#">top</a>
Tree	<a href="#">top</a>
Introduced	16.0.R1
Platforms	All

## traceroute

Synopsis	Show the route taken to an IP address or DNS name
Context	<a href="#">traceroute</a>
Tree	<a href="#">traceroute</a>
Introduced	19.10.R1
Platforms	All

## candidate-path

Synopsis	Trace route of the candidate path of the SRv6 policy
Context	<a href="#">traceroute candidate-path</a>
Tree	<a href="#">candidate-path</a>
Description	When configured, this command allows the user to specify a candidate path of the SRv6 policy to traceroute. The candidate path does not need to be the currently active candidate path.
Introduced	23.10.R1
Platforms	All

## color number

Synopsis	Color ID of the SRv6 policy to trace
Context	<a href="#">traceroute color number</a>

---

Tree	<a href="#">color</a>
Description	This command launches a traceroute of an SRv6 policy that matches a specific color.
Max. Range	0 to 4294967295
Notes	The following elements are part of a mandatory choice: ( <b>destination</b> , <b>router-instance</b> , and <b>source-address</b> ) or ( <b>color</b> , <b>endpoint</b> , <b>segment-list</b> , and <b>srv6-policy</b> ).
Introduced	23.3.R1
Platforms	All

### **decode** *keyword*

Synopsis	Perform original datagram parsing functions
Context	<a href="#">traceroute decode</a> <i>keyword</i>
Tree	<a href="#">decode</a>
Options	none, original-datagram
Default	none
Introduced	22.7.R1
Platforms	All

### **dest-port** *number*

Synopsis	Transport protocol destination port number
Context	<a href="#">traceroute dest-port</a> <i>number</i>
Tree	<a href="#">dest-port</a>
Range	1 to 65535
Default	33434
Introduced	20.10.R1
Platforms	All

### **dest-port-udp-fixed**

Synopsis	Avoid increment of destination port number for UDP test
Context	<a href="#">traceroute dest-port-udp-fixed</a>
Tree	<a href="#">dest-port-udp-fixed</a>
Introduced	21.10.R1
Platforms	All

**[destination]** (*ipv4-address-no-zone | ipv6-address-no-zone | string-not-all-spaces*)

Synopsis	Destination IP address or DNS name
Context	<a href="#">traceroute [destination]</a> ( <i>ipv4-address-no-zone   ipv6-address-no-zone   string-not-all-spaces</i> )
Tree	<a href="#">[destination]</a>
String Length	1 to 128
Notes	The following elements are part of a mandatory choice: ( <b>destination</b> , <b>router-instance</b> , and <b>source-address</b> ) or ( <b>color</b> , <b>endpoint</b> , <b>segment-list</b> , and <b>srv6-policy</b> ).
Introduced	19.10.R1
Platforms	All

**detail**

Synopsis	Display MPLS label stack information or TCP port status
Context	<a href="#">traceroute detail</a>
Tree	<a href="#">detail</a>
Introduced	19.10.R1
Platforms	All

**distinguisher** *number*

Synopsis	SRv6 policy candidate path distinguisher
Context	<a href="#">traceroute distinguisher</a> <i>number</i>
Tree	<a href="#">distinguisher</a>
Description	This command specifies the distinguisher of the SRv6 policy candidate path to send the traceroute probe on.  This command must be configured if the <b>protocol-owner</b> command is configured to <b>bgp</b> .
Range	1 to 4294967295
Introduced	23.10.R1
Platforms	All

**endpoint** *string*

Synopsis	Endpoint of the SRv6 policy to trace
----------	--------------------------------------

Context	<a href="#">traceroute endpoint</a> <i>string</i>
Tree	<a href="#">endpoint</a>
Description	This command configures an IPv6 endpoint address for an SRv6 policy as the target of the traceroute.
Notes	The following elements are part of a mandatory choice: ( <b>destination</b> , <b>router-instance</b> , and <b>source-address</b> ) or ( <b>color</b> , <b>endpoint</b> , <b>segment-list</b> , and <b>srv6-policy</b> ).
Introduced	23.3.R1
Platforms	All

### **min-ttl** *number*

Synopsis	First hop traceroute probes using the TTL value
Context	<a href="#">traceroute min-ttl</a> <i>number</i>
Tree	<a href="#">min-ttl</a>
Description	This command specifies the first hop traceroute probes, using the <b>ttl</b> value.
Range	1 to 255
Default	1
Introduced	21.10.R1
Platforms	All

### **numeric**

Synopsis	Display IP addresses instead of DNS names
Context	<a href="#">traceroute numeric</a>
Tree	<a href="#">numeric</a>
Introduced	19.10.R1
Platforms	All

### **preference** *number*

Synopsis	SRv6 policy candidate path preference
Context	<a href="#">traceroute preference</a> <i>number</i>
Tree	<a href="#">preference</a>
Description	This command specifies the preference of the SRv6 policy candidate path to send the traceroute probe on.

Max. Range	0 to 4294967295
Default	100
Introduced	23.10.R1
Platforms	All

### **probe-count** *number*

Synopsis	Number of probes to send per hop
Context	<a href="#">traceroute probe-count</a> <i>number</i>
Tree	<a href="#">probe-count</a>
Range	1 to 10
Default	3
Introduced	20.10.R1
Platforms	All

### **protocol** *keyword*

Synopsis	Packet type to send
Context	<a href="#">traceroute protocol</a> <i>keyword</i>
Tree	<a href="#">protocol</a>
Description	This command sets the transport protocol, UDP or TCP, for the traceroute packet. A targeted VPRN service silently discards TCP traceroutes and only responds to UDP traceroutes.
Options	udp, tcp
Default	udp
Introduced	21.10.R1
Platforms	All

### **protocol-owner** *keyword*

Synopsis	Protocol owner
Context	<a href="#">traceroute protocol-owner</a> <i>keyword</i>
Tree	<a href="#">protocol-owner</a>
Description	This command specifies the protocol owner of the SRv6 policy candidate path to traceroute.  The <b>bgp</b> option specifies a BGP SRv6 policy.

The **static** option specifies a locally configured static SRv6 policy.

Options	bgp, static
Introduced	23.10.R1
Platforms	All

### **router-instance** *string*

Synopsis	Router name or VPRN service name
Context	<a href="#">traceroute router-instance</a> <i>string</i>
Tree	<a href="#">router-instance</a>
Default	Base
Notes	The following elements are part of a mandatory choice: ( <b>destination</b> , <b>router-instance</b> , and <b>source-address</b> ) or ( <b>color</b> , <b>endpoint</b> , <b>segment-list</b> , and <b>srv6-policy</b> ).
Introduced	19.10.R1
Platforms	All

### **segment-list** *number*

Synopsis	SR IPv6 segment list to trace
Context	<a href="#">traceroute segment-list</a> <i>number</i>
Tree	<a href="#">segment-list</a>
Description	This command configures the traceroute probe to target a specific segment list of an SRv6 policy. When the segment list is not specified, the traceroute probe is sent on the lowest available segment list.
Range	1 to 32
Notes	The following elements are part of a mandatory choice: ( <b>destination</b> , <b>router-instance</b> , and <b>source-address</b> ) or ( <b>color</b> , <b>endpoint</b> , <b>segment-list</b> , and <b>srv6-policy</b> ).
Introduced	23.3.R1
Platforms	All

### **size** *number*

Synopsis	Number of pad bytes in each transmitted packet
Context	<a href="#">traceroute size</a> <i>number</i>
Tree	<a href="#">size</a>
Range	0 to 9786

Units	bytes
Default	0
Introduced	21.10.R1
Platforms	All

### **source-address** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	Source address of the probe packets
Context	<a href="#">traceroute source-address</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	<a href="#">source-address</a>
Description	This command specifies the source address of the probe packets. If the IP address is not one of the interfaces of the device, the system returns an error.
Notes	The following elements are part of a mandatory choice: ( <b>destination</b> , <b>router-instance</b> , and <b>source-address</b> ) or ( <b>color</b> , <b>endpoint</b> , <b>segment-list</b> , and <b>srv6-policy</b> ).
Introduced	19.10.R1
Platforms	All

### **srv6-policy**

Synopsis	Trace an SRv6 policy
Context	<a href="#">traceroute srv6-policy</a>
Tree	<a href="#">srv6-policy</a>
Description	This command launches a traceroute of a Segment Routing IPv6 (SRv6) policy.
Notes	The following elements are part of a mandatory choice: ( <b>destination</b> , <b>router-instance</b> , and <b>source-address</b> ) or ( <b>color</b> , <b>endpoint</b> , <b>segment-list</b> , and <b>srv6-policy</b> ).
Introduced	23.3.R1
Platforms	All

### **tos number**

Synopsis	Type of Service (ToS) bits in the IP header
Context	<a href="#">traceroute tos number</a>
Tree	<a href="#">tos</a>
Range	0 to 255
Default	0

---

Introduced	19.10.R1
Platforms	All

**tll number**

Synopsis	Maximum number of hops (TTL) to probe
Context	<a href="#">traceroute tll number</a>
Tree	<a href="#">tll</a>
Range	1 to 255
Default	30
Introduced	19.10.R1
Platforms	All

**wait number**

Synopsis	Time to wait for a response to the probe
Context	<a href="#">traceroute wait number</a>
Tree	<a href="#">wait</a>
Range	10 to 60000
Units	milliseconds
Default	5000
Introduced	19.10.R1
Platforms	All

**tree**

Synopsis	Show the command tree under the present working context
Context	<a href="#">tree</a>
Tree	<a href="#">tree</a>
Introduced	16.0.R1
Platforms	All

**[cli-path] string**

Synopsis	Absolute path or relative path from pwc
----------	---

---

Context	<a href="#">tree [cli-path] string</a>
Tree	<a href="#">[cli-path]</a>
Introduced	20.10.R1
Platforms	All

### detail

Synopsis	Display the tree with keys and field values
Context	<a href="#">tree detail</a>
Tree	<a href="#">detail</a>
Introduced	16.0.R1
Platforms	All

### flat

Synopsis	Show the context from the pwc on each line
Context	<a href="#">tree flat</a>
Tree	<a href="#">flat</a>
Introduced	16.0.R1
Platforms	All

## 2.6 Output modifier commands

See “Using output modifiers in the MD-CLI” in the *7450 ESS, 7750 SR, 7950 XRS, and VSR MD-CLI User Guide* for more information.

```
- |
- count
- match string
  - ignore-case boolean
  - invert-match boolean
  - max-count number
  - post-lines number
  - pre-lines number
- no-more
- pyexec (string | reference)
  - [argument-01] string
  - [argument-02] string
  - [argument-03] string
  - [argument-04] string
  - [argument-05] string
  - [argument-06] string
  - [argument-07] string
  - [argument-08] string
  - [argument-09] string
  - [argument-10] string
- reverse-dns
- > (cflash-url | ftp-tftp-url)
```

## 2.6.1 Output modifier command descriptions

|

Synopsis	Apply an output modifier
Context	
Tree	
Introduced	16.0.R1
Platforms	All

### count

Synopsis	Show the line count of the output
Context	<a href="#">count</a>
Tree	<a href="#">count</a>
Introduced	16.0.R1
Platforms	All

### match [\[pattern\]](#) *string*

Synopsis	Match on a string (") or regular expression (')
Context	<a href="#">match</a> <i>string</i>
Tree	<a href="#">match</a>
Introduced	16.0.R1
Platforms	All

### [\[pattern\]](#) *string*

Synopsis	String (") or regular expression (') pattern to match
Context	<a href="#">match</a> <i>string</i>
Tree	<a href="#">match</a>
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

**ignore-case** *boolean*

Synopsis	Ignore case in pattern match
Context	<a href="#">match string ignore-case boolean</a>
Tree	<a href="#">ignore-case</a>
Default	false
Introduced	16.0.R1
Platforms	All

**invert-match** *boolean*

Synopsis	Invert the pattern match selection
Context	<a href="#">match string invert-match boolean</a>
Tree	<a href="#">invert-match</a>
Default	false
Introduced	16.0.R1
Platforms	All

**max-count** *number*

Synopsis	Maximum number of displayed matches
Context	<a href="#">match string max-count number</a>
Tree	<a href="#">max-count</a>
Range	1 to 4294967295
Introduced	16.0.R1
Platforms	All

**post-lines** *number*

Synopsis	Number of lines to display following the matched line
Context	<a href="#">match string post-lines number</a>
Tree	<a href="#">post-lines</a>
Range	0 to 4294967295
Default	0
Introduced	16.0.R1

Platforms All

### **pre-lines** *number*

Synopsis Number of lines to display preceding the matched line  
 Context | [match string pre-lines number](#)  
 Tree [pre-lines](#)  
 Range 0 to 4294967295  
 Default 0  
 Introduced 16.0.R1  
 Platforms All

### **no-more**

Synopsis Prevent pagination for the displayed output  
 Context | [no-more](#)  
 Tree [no-more](#)  
 Introduced 16.0.R1  
 Platforms All

### **pyexec** [[url](#)] (*string | reference*)

Synopsis Execute a Python application  
 Context | [pyexec \(string | reference\)](#)  
 Tree [pyexec](#)  
 Introduced 21.7.R1  
 Platforms All

### **[url]** (*string | reference*)

Synopsis Location of the script to be executed  
 Context | [pyexec \(string | reference\)](#)  
 Tree [pyexec](#)  
 Reference **state python python-script string**  
 Notes This element is part of a list key.

Introduced 21.7.R1  
Platforms All

**[argument-01] string**

Synopsis First argument  
Context | [pyexec \(string | reference\) \[argument-01\] string](#)  
Tree [\[argument-01\]](#)  
Introduced 21.7.R1  
Platforms All

**[argument-02] string**

Synopsis Second argument  
Context | [pyexec \(string | reference\) \[argument-02\] string](#)  
Tree [\[argument-02\]](#)  
Introduced 21.7.R1  
Platforms All

**[argument-03] string**

Synopsis Third argument  
Context | [pyexec \(string | reference\) \[argument-03\] string](#)  
Tree [\[argument-03\]](#)  
Introduced 21.7.R1  
Platforms All

**[argument-04] string**

Synopsis Fourth argument  
Context | [pyexec \(string | reference\) \[argument-04\] string](#)  
Tree [\[argument-04\]](#)  
Introduced 21.7.R1  
Platforms All

**[argument-05]** *string*

Synopsis	Fifth argument
Context	<a href="#">pyexec</a> ( <i>string</i>   <i>reference</i> ) <a href="#">[argument-05]</a> <i>string</i>
Tree	<a href="#">[argument-05]</a>
Introduced	21.7.R1
Platforms	All

**[argument-06]** *string*

Synopsis	Sixth argument
Context	<a href="#">pyexec</a> ( <i>string</i>   <i>reference</i> ) <a href="#">[argument-06]</a> <i>string</i>
Tree	<a href="#">[argument-06]</a>
Introduced	21.7.R1
Platforms	All

**[argument-07]** *string*

Synopsis	Seventh argument
Context	<a href="#">pyexec</a> ( <i>string</i>   <i>reference</i> ) <a href="#">[argument-07]</a> <i>string</i>
Tree	<a href="#">[argument-07]</a>
Introduced	21.7.R1
Platforms	All

**[argument-08]** *string*

Synopsis	Eight argument
Context	<a href="#">pyexec</a> ( <i>string</i>   <i>reference</i> ) <a href="#">[argument-08]</a> <i>string</i>
Tree	<a href="#">[argument-08]</a>
Introduced	21.7.R1
Platforms	All

**[argument-09]** *string*

Synopsis	Ninth argument
Context	<a href="#">pyexec</a> ( <i>string</i>   <i>reference</i> ) <a href="#">[argument-09]</a> <i>string</i>

Tree [\[argument-09\]](#)  
 Introduced 21.7.R1  
 Platforms All

### **[argument-10]** *string*

Synopsis Tenth argument  
 Context [| pyexec \(string | reference\) \[argument-10\] string](#)  
 Tree [\[argument-10\]](#)  
 Introduced 21.7.R1  
 Platforms All

### **reverse-dns**

Synopsis Resolve IP addresses to DNS names in input  
 Context [| reverse-dns](#)  
 Tree [reverse-dns](#)  
 Introduced 22.7.R1  
 Platforms All

### **> [url]** (*cflash-url | ftp-tftp-url*)

Synopsis Redirect output to a file  
 Context [> \(cflash-url | ftp-tftp-url\)](#)  
 Tree [>](#)  
 Introduced 16.0.R4  
 Platforms All

### **[url]** (*cflash-url | ftp-tftp-url*)

Synopsis Location to save the output  
 Context [> \(cflash-url | ftp-tftp-url\)](#)  
 Tree [>](#)  
 String Length 1 to 199  
 Notes This element is part of a list key.

Introduced	16.0.R4
Platforms	All

## 2.7 perform commands

The **perform** commands are YANG-modeled versions of the **tools perform** commands and are available in MD-CLI and NETCONF interfaces. The **perform** commands execute actions in the router, such as:

- force a LAG subgroup to become active
- set an IS-IS overload condition
- terminate a Python script

```
perform
- filter
  - ip-filter reference
    - entry reference
      - activate-primary-action
  - ipv6-filter reference
    - entry reference
      - activate-primary-action
  - mac-filter reference
    - entry reference
      - activate-primary-action
  - redirect-policy reference
    - activate-best-dest
- lag
  - clear-force
    - lag
      - [lag-name] reference
      - sub-group number
    - multi-chassis
      - all
      - peer
        - [ip-address] reference
  - force-active
    - lag
      - [lag-name] reference
      - sub-group number
    - multi-chassis
      - all
      - peer
        - [ip-address] reference
  - force-standby
    - lag
      - [lag-name] reference
      - sub-group number
    - multi-chassis
      - all
      - peer
        - [ip-address] reference
- load-balance
  - class number
  - [lag-name] reference
- python
  - python-policy
    - cache
      - policy
        - hex-key string
        - [name] reference
        - set-lifetime number
        - string-key string
  - python-script
  - protect
```

---

perform python python-script protect hmac-sha256-key

```
    - hmac-sha256-key string
    - input-file string
    - output-file string
  - reload
    - script
      - [name] reference
- router string
- isis reference
  - ldp-sync-exit
  - overload
    - max-metric boolean
    - [seconds] number
  - run-manual-spf
- system
  - script-control
  - script-policy
    - stop
      - all
      - owner reference
      - policy-name reference
  - security
    - secure-boot
      - show
        - uefi-variables
          - card reference
```

## 2.7.1 perform command descriptions

### perform

Synopsis	Perform troubleshooting and debugging
Context	<a href="#">perform</a>
Tree	<a href="#">perform</a>
Introduced	23.7.R1
Platforms	All

### filter

Synopsis	Enter the <b>filter</b> context
Context	<a href="#">perform filter</a>
Tree	<a href="#">filter</a>
Introduced	23.7.R1
Platforms	All

### ip-filter [[filter-name](#)] *reference*

Synopsis	Enter the <b>ip-filter</b> list instance
Context	<a href="#">perform filter ip-filter reference</a>
Tree	<a href="#">ip-filter</a>
Introduced	23.7.R1
Platforms	All

### [[filter-name](#)] *reference*

Synopsis	Name to associate with the IP filter
Context	<a href="#">perform filter ip-filter reference</a>
Tree	<a href="#">ip-filter</a>
Reference	<b>state filter ip-filter string</b>
Notes	This element is part of a list key.
Introduced	23.7.R1

Platforms All

### **entry** [[entry-id](#)] *reference*

Synopsis Enter the **entry** list instance

Context [perform filter ip-filter reference entry reference](#)

Tree [entry](#)

Introduced 23.7.R1

Platforms All

### **[entry-id]** *reference*

Synopsis ID for the IP filter entry

Context [perform filter ip-filter reference entry reference](#)

Tree [entry](#)

Reference **state filter ip-filter string entry number**

Notes This element is part of a list key.

Introduced 23.7.R1

Platforms All

### **activate-primary-action**

Synopsis Switch from the secondary to the primary action

Context [perform filter ip-filter reference entry reference activate-primary-action](#)

Tree [activate-primary-action](#)

Description This command activates the primary action for the specified filter policy entry. If the primary action is already active, the command has no effect. If a secondary action is active, the primary action is activated unless the primary target is down. If the **configure filter redirect sticky-dest** command is configured, the timer expires.

Introduced 23.7.R1

Platforms All

### **ipv6-filter** [[filter-name](#)] *reference*

Synopsis Enter the **ipv6-filter** list instance

Context [perform filter ipv6-filter reference](#)

Tree	<a href="#">ipv6-filter</a>
Introduced	23.7.R1
Platforms	All

**[filter-name] reference**

Synopsis	Name to associate with the IPv6 filter
Context	<a href="#">perform filter ipv6-filter reference</a>
Tree	<a href="#">ipv6-filter</a>
Reference	<b>state filter ipv6-filter string</b>
Notes	This element is part of a list key.
Introduced	23.7.R1
Platforms	All

**entry [entry-id] reference**

Synopsis	Enter the <b>entry</b> list instance
Context	<a href="#">perform filter ipv6-filter reference entry reference</a>
Tree	<a href="#">entry</a>
Introduced	23.7.R1
Platforms	All

**[entry-id] reference**

Synopsis	ID for the IPv6 filter entry
Context	<a href="#">perform filter ipv6-filter reference entry reference</a>
Tree	<a href="#">entry</a>
Reference	<b>state filter ipv6-filter string entry number</b>
Notes	This element is part of a list key.
Introduced	23.7.R1
Platforms	All

**activate-primary-action**

Synopsis	Switch from the secondary to the primary action
----------	---

Context	<a href="#">perform filter ipv6-filter reference entry reference activate-primary-action</a>
Tree	<a href="#">activate-primary-action</a>
Description	This command activates the primary action for the specified filter policy entry. If the primary action is already active, the command has no effect. If a secondary action is active, the primary action is activated unless the primary target is down. If the <b>configure filter redirect sticky-dest</b> command is configured, the timer expires.
Introduced	23.7.R1
Platforms	All

### **mac-filter** [[filter-name](#)] *reference*

Synopsis	Enter the <b>mac-filter</b> list instance
Context	<a href="#">perform filter mac-filter reference</a>
Tree	<a href="#">mac-filter</a>
Introduced	23.7.R1
Platforms	All

### **[filter-name]** *reference*

Synopsis	Name to associate with the MAC filter
Context	<a href="#">perform filter mac-filter reference</a>
Tree	<a href="#">mac-filter</a>
Reference	<b>state filter mac-filter string</b>
Notes	This element is part of a list key.
Introduced	23.7.R1
Platforms	All

### **entry** [[entry-id](#)] *reference*

Synopsis	Enter the <b>entry</b> list instance
Context	<a href="#">perform filter mac-filter reference entry reference</a>
Tree	<a href="#">entry</a>
Introduced	23.7.R1
Platforms	All

**[entry-id] reference**

Synopsis	ID for the MAC filter entry
Context	<a href="#">perform filter mac-filter reference entry reference</a>
Tree	<a href="#">entry</a>
Reference	<b>state filter mac-filter string entry number</b>
Notes	This element is part of a list key.
Introduced	23.7.R1
Platforms	All

**activate-primary-action**

Synopsis	Switch from the secondary to the primary action
Context	<a href="#">perform filter mac-filter reference entry reference activate-primary-action</a>
Tree	<a href="#">activate-primary-action</a>
Description	This command activates the primary action for the specified filter policy entry. If the primary action is already active, the command has no effect. If a secondary action is active, the primary action is activated unless the primary target is down. If the <b>configure filter redirect sticky-dest</b> command is configured, the timer expires.
Introduced	23.7.R1
Platforms	All

**redirect-policy [redirect-policy-name] reference**

Synopsis	Enter the <b>redirect-policy</b> list instance
Context	<a href="#">perform filter redirect-policy reference</a>
Tree	<a href="#">redirect-policy</a>
Introduced	23.7.R1
Platforms	All

**[redirect-policy-name] reference**

Synopsis	Name of the redirect policy
Context	<a href="#">perform filter redirect-policy reference</a>
Tree	<a href="#">redirect-policy</a>
Reference	<b>state filter redirect-policy string</b>

Notes	This element is part of a list key.
Introduced	23.7.R1
Platforms	All

### activate-best-dest

Synopsis	Activate the current best destination
Context	<a href="#">perform filter redirect-policy</a> <i>reference</i> <a href="#">activate-best-dest</a>
Tree	<a href="#">activate-best-dest</a>
Description	This command forces a PBR switch to the best destination selected by the redirect policy when that destination is not currently active as result of sticky destination functionality being enabled for the specified redirect policy. If the <b>configure filter redirect sticky-dest</b> command is configured, the timer expires.
Introduced	23.7.R1
Platforms	All

### lag

Synopsis	Perform LAG operations
Context	<a href="#">perform lag</a>
Tree	<a href="#">lag</a>
Introduced	23.7.R1
Platforms	All

### clear-force

Synopsis	Perform LAG clear-force operation
Context	<a href="#">perform lag clear-force</a>
Tree	<a href="#">clear-force</a>
Introduced	23.7.R1
Platforms	All

### lag

Synopsis	Perform LAG operation on the specified LAG
Context	<a href="#">perform lag clear-force lag</a>

---

Tree	<a href="#">lag</a>
Introduced	23.7.R1
Platforms	All

### **[lag-name]** *reference*

Synopsis	LAG name
Context	<a href="#">perform lag clear-force lag [lag-name] reference</a>
Tree	<a href="#">[lag-name]</a>
Reference	<b>state lag string</b>
Notes	This element is mandatory.
Introduced	23.7.R1
Platforms	All

### **sub-group** *number*

Synopsis	Sub-group in the LAG
Context	<a href="#">perform lag clear-force lag sub-group number</a>
Tree	<a href="#">sub-group</a>
Range	1 to 16
Default	1
Introduced	23.7.R1
Platforms	All

### **multi-chassis**

Synopsis	Enter the <b>multi-chassis</b> context
Context	<a href="#">perform lag clear-force multi-chassis</a>
Tree	<a href="#">multi-chassis</a>
Introduced	23.7.R1
Platforms	All

### **all**

Synopsis	Perform LAG operation on all multi-chassis LAGs
----------	---

Context	<a href="#">perform lag clear-force multi-chassis all</a>
Tree	<a href="#">all</a>
Introduced	23.7.R1
Platforms	All

## peer

Synopsis	Perform LAG operation on the MC peer
Context	<a href="#">perform lag clear-force multi-chassis peer</a>
Tree	<a href="#">peer</a>
Introduced	23.7.R1
Platforms	All

## [ip-address] reference

Synopsis	Peer IP address
Context	<a href="#">perform lag clear-force multi-chassis peer [ip-address] reference</a>
Tree	<a href="#">[ip-address]</a>
Reference	<b>state redundancy multi-chassis peer</b> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> )
Notes	This element is mandatory.
Introduced	23.7.R1
Platforms	All

## force-active

Synopsis	Perform LAG force-active operation
Context	<a href="#">perform lag force-active</a>
Tree	<a href="#">force-active</a>
Introduced	23.7.R1
Platforms	All

## lag

Synopsis	Perform LAG operation on the specified LAG
Context	<a href="#">perform lag force-active lag</a>

---

Tree	<a href="#">lag</a>
Introduced	23.7.R1
Platforms	All

**[lag-name] reference**

Synopsis	LAG name
Context	<a href="#">perform lag force-active lag [lag-name] reference</a>
Tree	<a href="#">[lag-name]</a>
Reference	<b>state lag string</b>
Notes	This element is mandatory.
Introduced	23.7.R1
Platforms	All

**sub-group number**

Synopsis	Sub-group in the LAG
Context	<a href="#">perform lag force-active lag sub-group number</a>
Tree	<a href="#">sub-group</a>
Range	1 to 16
Default	1
Introduced	23.7.R1
Platforms	All

**multi-chassis**

Synopsis	Enter the <b>multi-chassis</b> context
Context	<a href="#">perform lag force-active multi-chassis</a>
Tree	<a href="#">multi-chassis</a>
Introduced	23.7.R1
Platforms	All

**all**

Synopsis	Perform LAG operation on all multi-chassis LAGs
----------	---

Context	<a href="#">perform lag force-active multi-chassis all</a>
Tree	<a href="#">all</a>
Introduced	23.7.R1
Platforms	All

## peer

Synopsis	Perform LAG operation on the MC peer
Context	<a href="#">perform lag force-active multi-chassis peer</a>
Tree	<a href="#">peer</a>
Introduced	23.7.R1
Platforms	All

## [ip-address] *reference*

Synopsis	Peer IP address
Context	<a href="#">perform lag force-active multi-chassis peer [ip-address] <i>reference</i></a>
Tree	<a href="#">[ip-address]</a>
Reference	<b>state redundancy multi-chassis peer</b> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> )
Notes	This element is mandatory.
Introduced	23.7.R1
Platforms	All

## force-standby

Synopsis	Perform LAG force-standby operation
Context	<a href="#">perform lag force-standby</a>
Tree	<a href="#">force-standby</a>
Introduced	23.7.R1
Platforms	All

## lag

Synopsis	Perform LAG operation on the specified LAG
Context	<a href="#">perform lag force-standby lag</a>

---

Tree	<a href="#">lag</a>
Introduced	23.7.R1
Platforms	All

### **[lag-name] reference**

Synopsis	LAG name
Context	<a href="#">perform lag force-standby lag [lag-name] reference</a>
Tree	<a href="#">[lag-name]</a>
Reference	<b>state lag string</b>
Notes	This element is mandatory.
Introduced	23.7.R1
Platforms	All

### **sub-group number**

Synopsis	Sub-group in the LAG
Context	<a href="#">perform lag force-standby lag sub-group number</a>
Tree	<a href="#">sub-group</a>
Range	1 to 16
Default	1
Introduced	23.7.R1
Platforms	All

### **multi-chassis**

Synopsis	Enter the <b>multi-chassis</b> context
Context	<a href="#">perform lag force-standby multi-chassis</a>
Tree	<a href="#">multi-chassis</a>
Introduced	23.7.R1
Platforms	All

### **all**

Synopsis	Perform LAG operation on all multi-chassis LAGs
----------	---

Context	<a href="#">perform lag force-standby multi-chassis all</a>
Tree	<a href="#">all</a>
Introduced	23.7.R1
Platforms	All

**peer**

Synopsis	Perform LAG operation on the MC peer
Context	<a href="#">perform lag force-standby multi-chassis peer</a>
Tree	<a href="#">peer</a>
Introduced	23.7.R1
Platforms	All

**[ip-address] reference**

Synopsis	Peer IP address
Context	<a href="#">perform lag force-standby multi-chassis peer [ip-address] reference</a>
Tree	<a href="#">[ip-address]</a>
Reference	<b>state redundancy multi-chassis peer</b> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> )
Notes	This element is mandatory.
Introduced	23.7.R1
Platforms	All

**load-balance**

Synopsis	Perform LAG load-balance operation
Context	<a href="#">perform lag load-balance</a>
Tree	<a href="#">load-balance</a>
Introduced	23.7.R1
Platforms	All

**class number**

Synopsis	Class used for load balancing
Context	<a href="#">perform lag load-balance class number</a>

Tree	<a href="#">class</a>
Range	1 to 3
Default	1
Introduced	23.7.R1
Platforms	All

### **[lag-name] reference**

Synopsis	LAG name
Context	<a href="#">perform lag load-balance [lag-name] reference</a>
Tree	<a href="#">[lag-name]</a>
Reference	<b>state lag string</b>
Notes	This element is mandatory.
Introduced	23.7.R1
Platforms	All

### **python**

Synopsis	Enter the <b>python</b> context
Context	<a href="#">perform python</a>
Tree	<a href="#">python</a>
Introduced	23.10.R1
Platforms	All

### **python-policy**

Synopsis	Enter the python-policy context
Context	<a href="#">perform python python-policy</a>
Tree	<a href="#">python-policy</a>
Introduced	23.10.R1
Platforms	All

### **cache**

Synopsis	Enter the cache context
----------	-------------------------

Context	<a href="#">perform python python-policy cache</a>
Tree	<a href="#">cache</a>
Description	Commands in this context operate on python cache entries.
Introduced	23.10.R1
Platforms	All

## policy

Synopsis	Set the lifetime of a specified python cache entry
Context	<a href="#">perform python python-policy cache policy</a>
Tree	<a href="#">policy</a>
Introduced	23.10.R1
Platforms	All

## hex-key *string*

Synopsis	Policy key in hexadecimal format
Context	<a href="#">perform python python-policy cache policy hex-key <i>string</i></a>
Tree	<a href="#">hex-key</a>
String Length	3 to 1026
Notes	The following elements are part of a mandatory choice: <b>hex-key</b> or <b>string-key</b> .
Introduced	23.10.R1
Platforms	All

## [name] *reference*

Synopsis	Name of the Python policy
Context	<a href="#">perform python python-policy cache policy [name] <i>reference</i></a>
Tree	<a href="#">[name]</a>
Reference	<b>state python python-policy <i>string</i></b>
Notes	This element is mandatory.
Introduced	23.10.R1
Platforms	All

### **set-lifetime** *number*

Synopsis	Lifetime to set for a Python cache entry
Context	<a href="#">perform python python-policy cache policy set-lifetime</a> <i>number</i>
Tree	<a href="#">set-lifetime</a>
Range	1 to 604800
Units	seconds
Notes	This element is mandatory.
Introduced	23.10.R1
Platforms	All

### **string-key** *string*

Synopsis	Policy key in ASCII format
Context	<a href="#">perform python python-policy cache policy string-key</a> <i>string</i>
Tree	<a href="#">string-key</a>
String Length	1 to 512
Notes	The following elements are part of a mandatory choice: <b>hex-key</b> or <b>string-key</b> .
Introduced	23.10.R1
Platforms	All

### **python-script**

Synopsis	Enter the <b>python-script</b> context
Context	<a href="#">perform python python-script</a>
Tree	<a href="#">python-script</a>
Introduced	23.10.R1
Platforms	All

### **protect**

Synopsis	Convert a Python file into a protected SRPY format
Context	<a href="#">perform python python-script protect</a>
Tree	<a href="#">protect</a>
Description	When invoked, the system converts a normal (unprotected) Python script file into a protected SRPY format using a specified key.

For more information about the SRPY format and protected scripts, see "Python script protection" in the *7450 ESS, 7750 SR, and VSR Triple Play Service Delivery Architecture Guide*.

Introduced 23.10.R1

Platforms All

### **hmac-sha256-key string**

Synopsis Key used to compute the hash

Context [perform python python-script protect hmac-sha256-key string](#)

Tree [hmac-sha256-key](#)

String Length 1 to 128

Notes This element is mandatory.

Introduced 23.10.R1

Platforms All

### **input-file string**

Synopsis URL of the input unprotected script file

Context [perform python python-script protect input-file string](#)

Tree [input-file](#)

String Length 1 to 180

Notes This element is mandatory.

Introduced 23.10.R1

Platforms All

### **output-file string**

Synopsis URL of the output protected script file

Context [perform python python-script protect output-file string](#)

Tree [output-file](#)

String Length 1 to 180

Notes This element is mandatory.

Introduced 23.10.R1

Platforms All

**reload**

Synopsis	Enter the <b>reload</b> context
Context	<a href="#">perform python python-script reload</a>
Tree	<a href="#">reload</a>
Description	<p>Commands in this context reload and recompile the primary, secondary, and tertiary scripts in the specified Python scripts, in that order. The system uses the first script that comes up.</p> <p>Executing these commands may update the last modified time for the system configuration.</p>
Introduced	23.10.R1
Platforms	All

**script**

Synopsis	Reload and recompile the specified script
Context	<a href="#">perform python python-script reload script</a>
Tree	<a href="#">script</a>
Introduced	23.10.R1
Platforms	All

**[name] reference**

Synopsis	Name of the python script to reload
Context	<a href="#">perform python python-script reload script [name] reference</a>
Tree	<a href="#">[name]</a>
Reference	<b>state python python-script <i>string</i></b>
Notes	This element is mandatory.
Introduced	23.10.R1
Platforms	All

**router [router-instance] string**

Synopsis	Enter the <b>router</b> list instance
Context	<a href="#">perform router <i>string</i></a>
Tree	<a href="#">router</a>

Introduced	23.10.R1
Platforms	All

**[router-instance] string**

Synopsis	Router name or VPRN service name
Context	<a href="#">perform router string</a>
Tree	<a href="#">router</a>
MD-CLI	Base
Default	
Notes	This element is part of a list key.
Introduced	23.10.R1
Platforms	All

**isis [isis-instance] reference**

Synopsis	Enter the <b>isis</b> list instance
Context	<a href="#">perform router string isis reference</a>
Tree	<a href="#">isis</a>
Introduced	23.10.R1
Platforms	All

**[isis-instance] reference**

Synopsis	IS-IS instance
Context	<a href="#">perform router string isis reference</a>
Tree	<a href="#">isis</a>
MD-CLI	0
Default	
Reference	<b>state router string isis number</b>
Notes	This element is part of a list key.
Introduced	23.10.R1
Platforms	All

## ldp-sync-exit

Synopsis	Terminate LDP synchronization and restore actual cost
Context	<a href="#">perform router string isis reference ldp-sync-exit</a>
Tree	<a href="#">ldp-sync-exit</a>
Introduced	23.10.R1
Platforms	All

## overload

Synopsis	Perform IS-IS overload
Context	<a href="#">perform router string isis reference overload</a>
Tree	<a href="#">overload</a>
Introduced	23.10.R1
Platforms	All

## max-metric *boolean*

Synopsis	Enable advertising max-metric values
Context	<a href="#">perform router string isis reference overload max-metric boolean</a>
Tree	<a href="#">max-metric</a>
Default	false
Introduced	23.10.R1
Platforms	All

## [seconds] *number*

Synopsis	Overload duration
Context	<a href="#">perform router string isis reference overload [seconds] number</a>
Tree	<a href="#">[seconds]</a>
Range	60 to 1800
Notes	This element is mandatory.
Introduced	23.10.R1
Platforms	All

## run-manual-spf

Synopsis	Run SPF algorithm
Context	<a href="#">perform router string isis reference run-manual-spf</a>
Tree	<a href="#">run-manual-spf</a>
Introduced	23.10.R1
Platforms	All

## system

Synopsis	Enter the <b>system</b> context
Context	<a href="#">perform system</a>
Tree	<a href="#">system</a>
Introduced	23.7.R1
Platforms	All

## script-control

Synopsis	Enter the <b>script-control</b> context
Context	<a href="#">perform system script-control</a>
Tree	<a href="#">script-control</a>
Introduced	23.10.R1
Platforms	All

## script-policy

Synopsis	Enter the <b>script-policy</b> context
Context	<a href="#">perform system script-control script-policy</a>
Tree	<a href="#">script-policy</a>
Introduced	23.10.R1
Platforms	All

## stop

Synopsis	Stop the execution of scripts
Context	<a href="#">perform system script-control script-policy stop</a>

---

Tree	<a href="#">stop</a>
Introduced	23.10.R1
Platforms	All

## **all**

Synopsis	Stop script execution for all script policies
Context	<a href="#">perform system script-control script-policy stop all</a>
Tree	<a href="#">all</a>
Notes	The following elements are part of a mandatory choice: <b>all</b> or ( <b>owner</b> and <b>policy-name</b> ).
Introduced	23.10.R1
Platforms	All

## **owner reference**

Synopsis	Stop script execution for a specific owner
Context	<a href="#">perform system script-control script-policy stop owner reference</a>
Tree	<a href="#">owner</a>
Default	TiMOS CLI
Reference	<b>state system script-control script-policy string owner string</b>
Notes	The following elements are part of a mandatory choice: <b>all</b> or ( <b>owner</b> and <b>policy-name</b> ).
Introduced	23.10.R1
Platforms	All

## **policy-name reference**

Synopsis	Stop script execution for a specific policy
Context	<a href="#">perform system script-control script-policy stop policy-name reference</a>
Tree	<a href="#">policy-name</a>
Reference	<b>state system script-control script-policy string owner string</b>
Notes	The following elements are part of a mandatory choice: <b>all</b> or ( <b>owner</b> and <b>policy-name</b> ).
Introduced	23.10.R1
Platforms	All

## security

Synopsis	Enter the <b>security</b> context
Context	<a href="#">perform system security</a>
Tree	<a href="#">security</a>
Introduced	23.7.R1
Platforms	7750 SR-1-24D, 7750 SR-1-46S, 7750 SR-1-48D, 7750 SR-1-92S, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-s, 7950 XRS-20e

## secure-boot

Synopsis	Enter the <b>secure-boot</b> context
Context	<a href="#">perform system security secure-boot</a>
Tree	<a href="#">secure-boot</a>
Introduced	23.7.R1
Platforms	7750 SR-1-24D, 7750 SR-1-46S, 7750 SR-1-48D, 7750 SR-1-92S, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-s, 7950 XRS-20e

## show

Synopsis	Enter the <b>show</b> context
Context	<a href="#">perform system security secure-boot show</a>
Tree	<a href="#">show</a>
Introduced	23.7.R1
Platforms	7750 SR-1-24D, 7750 SR-1-46S, 7750 SR-1-48D, 7750 SR-1-92S, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-s, 7950 XRS-20e

## uefi-variables

Synopsis	Display secure-boot UEFI variables
Context	<a href="#">perform system security secure-boot show uefi-variables</a>
Tree	<a href="#">uefi-variables</a>
Introduced	23.7.R1
Platforms	7750 SR-1-24D, 7750 SR-1-46S, 7750 SR-1-48D, 7750 SR-1-92S, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-s, 7950 XRS-20e

---

**card reference**

Synopsis	CPM slot where UEFI variables are returned
Context	<a href="#">perform system security secure-boot show uefi-variables card</a> <i>reference</i>
Tree	<a href="#">card</a>
Reference	<b>state cpm string</b>
Notes	This element is mandatory.
Introduced	23.7.R1
Platforms	7750 SR-1-24D, 7750 SR-1-46S, 7750 SR-1-48D, 7750 SR-1-92S, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-s, 7950 XRS-20e

## 2.8 reset commands

The **reset** commands are YANG-modeled versions of the **clear** commands and are available in MD-CLI and NETCONF interfaces. The **reset** commands are primarily used to:

- set statistics in a specific area back to a value of zero
- reset specific hardware assemblies, for example, cards
- delete temporary operational state data, for example, contents of a log in memory

```

reset
- filter
- ip-exception
  - direction keyword
  - entry reference
  - [filter-name] reference
- ip-filter
  - direction keyword
  - entry reference
  - [filter-name] reference
- ipv6-exception
  - direction keyword
  - entry reference

## 2.8.1 reset command descriptions

### reset

Synopsis	Clear statistics or reset operational state
Context	<a href="#">reset</a>
Tree	<a href="#">reset</a>
Description	Commands in this context are used to clear specific statistics, reset specific hardware assemblies (for example, cards), and delete temporary operational state data (for example, contents of a log in memory).
Introduced	23.3.R1
Platforms	All

### filter

Synopsis	Enter the <b>filter</b> context
Context	<a href="#">reset filter</a>
Tree	<a href="#">filter</a>
Introduced	23.3.R1
Platforms	All

### ip-exception

Synopsis	Reset operation on the specified IP exception filter
Context	<a href="#">reset filter ip-exception</a>
Tree	<a href="#">ip-exception</a>
Introduced	23.3.R1
Platforms	VSR

### direction *keyword*

Synopsis	Statistics direction for IP exception filter entries
Context	<a href="#">reset filter ip-exception direction <i>keyword</i></a>
Tree	<a href="#">direction</a>
Options	ingress, egress

Introduced 23.3.R1  
Platforms VSR

### **entry** *reference*

Synopsis Entry ID for the filter  
Context [reset filter ip-exception entry reference](#)  
Tree [entry](#)  
Reference **state filter ip-exception** *string entry number*  
Introduced 23.3.R1  
Platforms VSR

### **[filter-name]** *reference*

Synopsis IP exception filter name  
Context [reset filter ip-exception \[filter-name\] reference](#)  
Tree [\[filter-name\]](#)  
Reference **state filter ip-exception** *string*  
Notes This element is mandatory.  
Introduced 23.3.R1  
Platforms VSR

### **ip-filter**

Synopsis Reset operation on the specified IP filter  
Context [reset filter ip-filter](#)  
Tree [ip-filter](#)  
Introduced 23.3.R1  
Platforms All

### **direction** *keyword*

Synopsis Statistics direction for IP filter entries  
Context [reset filter ip-filter direction keyword](#)  
Tree [direction](#)

---

Options	ingress, egress
Introduced	23.3.R1
Platforms	All

### **entry** *reference*

Synopsis	Entry ID for the filter
Context	<a href="#">reset filter ip-filter entry reference</a>
Tree	<a href="#">entry</a>
Reference	<b>state filter ip-filter string entry number</b>
Introduced	23.3.R1
Platforms	All

### **[filter-name]** *reference*

Synopsis	IP filter name
Context	<a href="#">reset filter ip-filter [filter-name] reference</a>
Tree	<a href="#">[filter-name]</a>
Reference	<b>state filter ip-filter string</b>
Notes	This element is mandatory.
Introduced	23.3.R1
Platforms	All

### **ipv6-exception**

Synopsis	Reset operation on the specified IPv6 exception filter
Context	<a href="#">reset filter ipv6-exception</a>
Tree	<a href="#">ipv6-exception</a>
Introduced	23.3.R1
Platforms	VSR

### **direction** *keyword*

Synopsis	Statistics direction for IPv6 exception filter entries
Context	<a href="#">reset filter ipv6-exception direction keyword</a>

Tree	<a href="#">direction</a>
Options	ingress, egress
Introduced	23.3.R1
Platforms	VSR

### **entry** *reference*

Synopsis	Entry ID for the filter
Context	<a href="#">reset filter ipv6-exception entry reference</a>
Tree	<a href="#">entry</a>
Reference	<b>state filter ipv6-exception</b> <i>string entry number</i>
Introduced	23.3.R1
Platforms	VSR

### **[filter-name]** *reference*

Synopsis	IPv6 exception filter name
Context	<a href="#">reset filter ipv6-exception [filter-name] reference</a>
Tree	<a href="#">[filter-name]</a>
Reference	<b>state filter ipv6-exception</b> <i>string</i>
Notes	This element is mandatory.
Introduced	23.3.R1
Platforms	VSR

### **ipv6-filter**

Synopsis	Reset operation on the specified IPv6 filter
Context	<a href="#">reset filter ipv6-filter</a>
Tree	<a href="#">ipv6-filter</a>
Introduced	23.3.R1
Platforms	All

### **direction** *keyword*

Synopsis	Statistics direction of IPv6 filter entries
----------	---

Context	<a href="#">reset filter ipv6-filter direction</a> <i>keyword</i>
Tree	<a href="#">direction</a>
Options	ingress, egress
Introduced	23.3.R1
Platforms	All

### **entry** *reference*

Synopsis	Entry ID for the IPv6 filter
Context	<a href="#">reset filter ipv6-filter entry</a> <i>reference</i>
Tree	<a href="#">entry</a>
Reference	<b>state filter ipv6-filter</b> <i>string entry number</i>
Introduced	23.3.R1
Platforms	All

### **[filter-name]** *reference*

Synopsis	IPv6 exception filter name
Context	<a href="#">reset filter ipv6-filter [filter-name]</a> <i>reference</i>
Tree	<a href="#">[filter-name]</a>
Reference	<b>state filter ipv6-filter</b> <i>string</i>
Notes	This element is mandatory.
Introduced	23.3.R1
Platforms	All

### **log**

Synopsis	Reset the specified filter log
Context	<a href="#">reset filter log</a>
Tree	<a href="#">log</a>
Description	<p>This command reinitializes or rolls over the specified memory filter log. Memory filter logs are reinitialized and cleared of contents.</p> <p>This command is applicable only to filter logs that are directed to memory destinations. Filter logs with destinations other than memory are not affected by this command.</p>
Introduced	23.7.R1

---

Platforms All

### **[log-id] reference**

Synopsis ID of the filter log to reset

Context [reset filter log \[log-id\] reference](#)

Tree [\[log-id\]](#)

Reference **state filter log** *number*

Notes This element is mandatory.

Introduced 23.7.R1

Platforms All

### **mac-filter**

Synopsis Reset operation on the specified MAC filter

Context [reset filter mac-filter](#)

Tree [mac-filter](#)

Introduced 23.3.R1

Platforms All

### **direction keyword**

Synopsis Statistics direction for MAC filter entries

Context [reset filter mac-filter direction keyword](#)

Tree [direction](#)

Options ingress, egress

Introduced 23.3.R1

Platforms All

### **entry reference**

Synopsis Entry ID for the MAC filter

Context [reset filter mac-filter entry reference](#)

Tree [entry](#)

Reference **state filter mac-filter** *string entry number*

Introduced 23.3.R1  
 Platforms All

### **[filter-name]** *reference*

Synopsis MAC filter name  
 Context [reset filter mac-filter \[filter-name\] reference](#)  
 Tree [\[filter-name\]](#)  
 Reference **state filter mac-filter** *string*  
 Notes This element is mandatory.  
 Introduced 23.3.R1  
 Platforms All

### **lag** [\[lag-name\]](#) *reference*

Synopsis Enter the **lag** list instance  
 Context [reset lag reference](#)  
 Tree [lag](#)  
 Description Commands in this context configure LAG reset operations.  
 Introduced 23.3.R1  
 Platforms All

### **[lag-name]** *reference*

Synopsis LAG name, starting with lag-  
 Context [reset lag reference](#)  
 Tree [lag](#)  
 Reference **state lag** *string*  
 Notes This element is part of a list key.  
 Introduced 23.3.R1  
 Platforms All

### **bfd-session**

Synopsis Enter the **bfd-session** context

Context	<a href="#">reset lag</a> <i>reference</i> <a href="#">bfd-session</a>
Tree	<a href="#">bfd-session</a>
Description	Commands in this context reset the LAG BFD session data.
Introduced	23.3.R1
Platforms	All

**port**

Synopsis	Port identifier in the LAG
Context	<a href="#">reset lag</a> <i>reference</i> <a href="#">bfd-session</a> <a href="#">port</a>
Tree	<a href="#">port</a>
Introduced	23.3.R1
Platforms	All

**family** *keyword*

Synopsis	BFD session family type
Context	<a href="#">reset lag</a> <i>reference</i> <a href="#">bfd-session</a> <a href="#">port</a> <a href="#">family</a> <i>keyword</i>
Tree	<a href="#">family</a>
Options	ipv4, ipv6
Notes	This element is mandatory.
Introduced	23.3.R1
Platforms	All

**[lag-port]** *reference*

Synopsis	Member port of the LAG
Context	<a href="#">reset lag</a> <i>reference</i> <a href="#">bfd-session</a> <a href="#">port</a> <a href="#">[lag-port]</a> <i>reference</i>
Tree	<a href="#">[lag-port]</a>
Reference	<b>state lag</b> <i>string</i> <b>port</b> <i>reference</i>
Notes	This element is mandatory.
Introduced	23.3.R1
Platforms	All

## lACP-statistics

Synopsis	Reset LACP statistics
Context	<a href="#">reset lag</a> <i>reference</i> <a href="#">lACP-statistics</a>
Tree	<a href="#">lACP-statistics</a>
Introduced	23.3.R1
Platforms	All

## statistics

Synopsis	Reset LAG statistics
Context	<a href="#">reset lag</a> <i>reference</i> <a href="#">statistics</a>
Tree	<a href="#">statistics</a>
Introduced	23.3.R1
Platforms	All

## log

Synopsis	Enter the <b>log</b> context
Context	<a href="#">reset log</a>
Tree	<a href="#">log</a>
Description	Commands in this context provide reset operations for events, logs, and the event handling system (EHS).
Introduced	23.7.R1
Platforms	All

## event-handling

Synopsis	Enter the <b>event-handling</b> context
Context	<a href="#">reset log event-handling</a>
Tree	<a href="#">event-handling</a>
Description	Commands in this context provide reset operations for the EHS.
Introduced	23.7.R1
Platforms	All

## handlers

Synopsis	Enter the <b>handlers</b> context
Context	<a href="#">reset log event-handling handlers</a>
Tree	<a href="#">handlers</a>
Description	Commands in this context reset statistics related to EHS handlers.
Introduced	23.7.R1
Platforms	All

## all

Synopsis	Reset statistics for all EHS handlers
Context	<a href="#">reset log event-handling handlers all</a>
Tree	<a href="#">all</a>
Description	This command resets all statistics for all handlers in the <b>state log event-handling handler</b> context and in the output of the <b>show log event-handling handler</b> command.
Introduced	23.7.R1
Platforms	All

## handler

Synopsis	Reset statistics for a specified EHS handler
Context	<a href="#">reset log event-handling handlers handler</a>
Tree	<a href="#">handler</a>
Description	This command resets all statistics for the specified handler in the <b>state log event-handling handler</b> context and in the output of the <b>show log event-handling handler</b> command.
Introduced	23.7.R1
Platforms	All

## [name] reference

Synopsis	Handler name to reset
Context	<a href="#">reset log event-handling handlers handler [name] reference</a>
Tree	<a href="#">[name]</a>
Reference	<b>state log event-handling handler</b> <i>string</i>

---

Notes	This element is mandatory.
Introduced	23.7.R1
Platforms	All

## information

Synopsis	Reset general EHS operational data
Context	<a href="#">reset log event-handling information</a>
Tree	<a href="#">information</a>
Description	This command resets all data in the <b>state log event-handling summary-statistics</b> context and in the output of the <b>show log event-handling information</b> command.
Introduced	23.7.R1
Platforms	All

## log-events

Synopsis	Enter the <b>log-events</b> context
Context	<a href="#">reset log log-events</a>
Tree	<a href="#">log-events</a>
Description	Commands in this context reset the operational state related to log events.
Introduced	23.7.R1
Platforms	All

## repeating-events

Synopsis	Enter the <b>repeating-events</b> context
Context	<a href="#">reset log log-events repeating-events</a>
Tree	<a href="#">repeating-events</a>
Description	Commands in this context reset the operational state related to repeating log events.
Introduced	23.7.R1
Platforms	All

## all

Synopsis	Reset operation for all repeating log events
----------	--

Context	<a href="#">reset log log-events repeating-events all</a>
Tree	<a href="#">all</a>
Description	This command cancels the repetition of all log events that are currently repeating. All repeating log events stop repeating.
Introduced	23.7.R1
Platforms	All

## log-id

Synopsis	Reset the specified event log
Context	<a href="#">reset log log-id</a>
Tree	<a href="#">log-id</a>
Description	This command reinitializes or rolls over the specified memory or file event log. Memory logs are reinitialized and cleared of contents. File logs are manually rolled over by this command.  This command is applicable only to event logs that are directed to file destinations and memory destinations. This command does not affect SNMP, syslog, console, CLI, or session logs.
Introduced	23.7.R1
Platforms	All

## [name] *reference*

Synopsis	Name of the event log to reset
Context	<a href="#">reset log log-id [name] <i>reference</i></a>
Tree	<a href="#">[name]</a>
Reference	<b>state log log-id <i>string</i></b>
Notes	This element is mandatory.
Introduced	23.7.R1
Platforms	All

## router [[router-instance](#)] *string*

Synopsis	Enter the <b>router</b> list instance
Context	<a href="#">reset router <i>string</i></a>
Tree	<a href="#">router</a>

Introduced 23.7.R1  
Platforms All

### **[router-instance] string**

Synopsis Router name or VPRN service name  
Context [reset router string](#)  
Tree [router](#)  
MD-CLI Base  
Default  
Notes This element is part of a list key.  
Introduced 23.7.R1  
Platforms All

### **arp**

Synopsis Enter the **arp** context  
Context [reset router string arp](#)  
Tree [arp](#)  
Description Commands in this context reset ARP cache entries.  
Introduced 23.10.R1  
Platforms All

### **address**

Synopsis Reset the ARP cache entries for the IPv4 address  
Context [reset router string arp address](#)  
Tree [address](#)  
Introduced 23.10.R1  
Platforms All

### **ipv4-address string**

Synopsis IPv4 address  
Context [reset router string arp address ipv4-address string](#)

---

Tree	<a href="#">ipv4-address</a>
Introduced	23.10.R1
Platforms	All

## all

Synopsis	Reset all ARP cache entries
Context	<a href="#">reset router string arp all</a>
Tree	<a href="#">all</a>
Introduced	23.10.R1
Platforms	All

## interface

Synopsis	Reset ARP cache entries for the interface
Context	<a href="#">reset router string arp interface</a>
Tree	<a href="#">interface</a>
Introduced	23.10.R1
Platforms	All

## interface-name *string*

Synopsis	Interface name
Context	<a href="#">reset router string arp interface interface-name string</a>
Tree	<a href="#">interface-name</a>
String Length	1 to 32
Introduced	23.10.R1
Platforms	All

## bfd

Synopsis	Enter the <b>bfd</b> context
Context	<a href="#">reset router string bfd</a>
Tree	<a href="#">bfd</a>
Description	Commands in this context reset bidirectional forwarding (BFD) sessions and statistics.

Introduced 23.10.R1  
Platforms All

## session

Synopsis Enter the **session** context  
Context [reset router string bfd session](#)  
Tree [session](#)  
Introduced 23.10.R1  
Platforms All

## Isp-ldp

Synopsis Enter the **Isp-ldp** context  
Context [reset router string bfd session Isp-ldp](#)  
Tree [Isp-ldp](#)  
Introduced 23.10.R1  
Platforms All

## head

Synopsis Enter the **head** context  
Context [reset router string bfd session Isp-ldp head](#)  
Tree [head](#)  
Introduced 23.10.R1  
Platforms All

## session-key

Synopsis Reset information for the session key  
Context [reset router string bfd session Isp-ldp head session-key](#)  
Tree [session-key](#)  
Introduced 23.10.R1  
Platforms All

**prefix** (*ipv4-prefix* | *ipv6-prefix*)

Synopsis	Prefix
Context	<a href="#">reset router</a> <i>string</i> <a href="#">bfd session</a> <a href="#">lsp-ldp head</a> <a href="#">session-key</a> <a href="#">prefix</a> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> )
Tree	<a href="#">prefix</a>
Notes	This element is mandatory.
Introduced	23.10.R1
Platforms	All

**src-ip** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	Source address
Context	<a href="#">reset router</a> <i>string</i> <a href="#">bfd session</a> <a href="#">lsp-ldp head</a> <a href="#">session-key</a> <a href="#">src-ip</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	<a href="#">src-ip</a>
Notes	This element is mandatory.
Introduced	23.10.R1
Platforms	All

**tail**

Synopsis	Enter the <b>tail</b> context
Context	<a href="#">reset router</a> <i>string</i> <a href="#">bfd session</a> <a href="#">lsp-ldp</a> <a href="#">tail</a>
Tree	<a href="#">tail</a>
Introduced	23.10.R1
Platforms	All

**session-key**

Synopsis	Reset information for the session key
Context	<a href="#">reset router</a> <i>string</i> <a href="#">bfd session</a> <a href="#">lsp-ldp tail</a> <a href="#">session-key</a>
Tree	<a href="#">session-key</a>
Introduced	23.10.R1
Platforms	All

**dst-ip** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	Destination address
Context	<a href="#">reset router string bfd session lsp-ldp tail session-key dst-ip</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	<a href="#">dst-ip</a>
Notes	This element is mandatory.
Introduced	23.10.R1
Platforms	All

**prefix** (*ipv4-prefix* | *ipv6-prefix*)

Synopsis	Prefix
Context	<a href="#">reset router string bfd session lsp-ldp tail session-key prefix</a> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> )
Tree	<a href="#">prefix</a>
Notes	This element is mandatory.
Introduced	23.10.R1
Platforms	All

**lsp-rsvp**

Synopsis	Enter the <b>lsp-rsvp</b> context
Context	<a href="#">reset router string bfd session lsp-rsvp</a>
Tree	<a href="#">lsp-rsvp</a>
Introduced	23.10.R1
Platforms	All

**head**

Synopsis	Enter the <b>head</b> context
Context	<a href="#">reset router string bfd session lsp-rsvp head</a>
Tree	<a href="#">head</a>
Introduced	23.10.R1
Platforms	All

**rsvp-session-name**

Synopsis	Reset information for the RSVP session name
Context	<a href="#">reset router</a> <i>string</i> <a href="#">bfd session</a> <a href="#">lsp-rsvp head</a> <a href="#">rsvp-session-name</a>
Tree	<a href="#">rsvp-session-name</a>
Introduced	23.10.R1
Platforms	All

**rsvp-session-name *string***

Synopsis	RSVP session name
Context	<a href="#">reset router</a> <i>string</i> <a href="#">bfd session</a> <a href="#">lsp-rsvp head</a> <a href="#">rsvp-session-name</a> <a href="#">rsvp-session-name</a> <i>string</i>
Tree	<a href="#">rsvp-session-name</a>
String Length	1 to 256
Notes	This element is mandatory.
Introduced	23.10.R1
Platforms	All

**session-key**

Synopsis	Reset information for the session key
Context	<a href="#">reset router</a> <i>string</i> <a href="#">bfd session</a> <a href="#">lsp-rsvp head</a> <a href="#">session-key</a>
Tree	<a href="#">session-key</a>
Introduced	23.10.R1
Platforms	All

**dst-ip (*ipv4-address-no-zone* | *ipv6-address-no-zone*)**

Synopsis	Destination address
Context	<a href="#">reset router</a> <i>string</i> <a href="#">bfd session</a> <a href="#">lsp-rsvp head</a> <a href="#">session-key</a> <a href="#">dst-ip</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	<a href="#">dst-ip</a>
Notes	This element is mandatory.
Introduced	23.10.R1
Platforms	All

### **lsp-id number**

Synopsis	LSP ID
Context	<code>reset router string bfd session lsp-rsvp head session-key lsp-id number</code>
Tree	<code>lsp-id</code>
Max. Range	0 to 4294967295
Notes	This element is mandatory.
Introduced	23.10.R1
Platforms	All

### **src-ip (ipv4-address-no-zone | ipv6-address-no-zone)**

Synopsis	Source address
Context	<code>reset router string bfd session lsp-rsvp head session-key src-ip (ipv4-address-no-zone   ipv6-address-no-zone)</code>
Tree	<code>src-ip</code>
Notes	This element is mandatory.
Introduced	23.10.R1
Platforms	All

### **tunnel-id number**

Synopsis	Tunnel ID
Context	<code>reset router string bfd session lsp-rsvp head session-key tunnel-id number</code>
Tree	<code>tunnel-id</code>
Max. Range	0 to 4294967295
Notes	This element is mandatory.
Introduced	23.10.R1
Platforms	All

### **tail**

Synopsis	Enter the <b>tail</b> context
Context	<code>reset router string bfd session lsp-rsvp tail</code>
Tree	<code>tail</code>

Introduced 23.10.R1  
 Platforms All

### **rsvp-session-name**

Synopsis Reset information for the RSVP session name  
 Context [reset router](#) *string* [bfd session](#) [lsp-rsvp tail](#) [rsvp-session-name](#)  
 Tree [rsvp-session-name](#)  
 Introduced 23.10.R1  
 Platforms All

### **rsvp-session-name *string***

Synopsis RSVP session name  
 Context [reset router](#) *string* [bfd session](#) [lsp-rsvp tail](#) [rsvp-session-name](#) [rsvp-session-name](#) *string*  
 Tree [rsvp-session-name](#)  
 String Length 1 to 256  
 Notes This element is mandatory.  
 Introduced 23.10.R1  
 Platforms All

### **sender-ip (*ipv4-address-no-zone | ipv6-address-no-zone*)**

Synopsis RSVP session sender IP address  
 Context [reset router](#) *string* [bfd session](#) [lsp-rsvp tail](#) [rsvp-session-name](#) [sender-ip](#) (*ipv4-address-no-zone | ipv6-address-no-zone*)  
 Tree [sender-ip](#)  
 Notes This element is mandatory.  
 Introduced 23.10.R1  
 Platforms All

### **session-key**

Synopsis Reset information for the session key  
 Context [reset router](#) *string* [bfd session](#) [lsp-rsvp tail](#) [session-key](#)

Tree	<a href="#">session-key</a>
Introduced	23.10.R1
Platforms	All

### **dst-ip** (*ipv4-address-no-zone | ipv6-address-no-zone*)

Synopsis	Destination address
Context	<a href="#">reset router string bfd session lsp-rsvp tail session-key dst-ip</a> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> )
Tree	<a href="#">dst-ip</a>
Notes	This element is mandatory.
Introduced	23.10.R1
Platforms	All

### **lsp-id number**

Synopsis	LSP ID
Context	<a href="#">reset router string bfd session lsp-rsvp tail session-key lsp-id number</a>
Tree	<a href="#">lsp-id</a>
Max. Range	0 to 4294967295
Notes	This element is mandatory.
Introduced	23.10.R1
Platforms	All

### **src-ip** (*ipv4-address-no-zone | ipv6-address-no-zone*)

Synopsis	Source address
Context	<a href="#">reset router string bfd session lsp-rsvp tail session-key src-ip</a> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> )
Tree	<a href="#">src-ip</a>
Notes	This element is mandatory.
Introduced	23.10.R1
Platforms	All

**tunnel-id** *number*

Synopsis	Tunnel ID
Context	<a href="#">reset router</a> <i>string</i> <a href="#">bfd session</a> <a href="#">lsp-rsvp tail session-key</a> <b>tunnel-id</b> <i>number</i>
Tree	<a href="#">tunnel-id</a>
Max. Range	0 to 4294967295
Notes	This element is mandatory.
Introduced	23.10.R1
Platforms	All

**mpls-tp**

Synopsis	Enter the <b>mpls-tp</b> context
Context	<a href="#">reset router</a> <i>string</i> <a href="#">bfd session</a> <b>mpls-tp</b>
Tree	<a href="#">mpls-tp</a>
Introduced	23.10.R1
Platforms	All

**lsp-id**

Synopsis	Reset information for the LSP ID
Context	<a href="#">reset router</a> <i>string</i> <a href="#">bfd session</a> <a href="#">mpls-tp</a> <b>lsp-id</b>
Tree	<a href="#">lsp-id</a>
Introduced	23.10.R1
Platforms	All

**lsp-name** *string*

Synopsis	LSP name
Context	<a href="#">reset router</a> <i>string</i> <a href="#">bfd session</a> <a href="#">mpls-tp</a> <a href="#">lsp-id</a> <b>lsp-name</b> <i>string</i>
Tree	<a href="#">lsp-name</a>
String Length	1 to 256
Introduced	23.10.R1
Platforms	All

### **path** *keyword*

Synopsis	Path status
Context	<a href="#">reset router</a> <i>string</i> <a href="#">bfd session mpls-tp lsp-id</a> <i>path</i> <i>keyword</i>
Tree	<a href="#">path</a>
Options	working, protecting
Notes	This element is mandatory.
Introduced	23.10.R1
Platforms	All

### **point-to-multipoint**

Synopsis	Enter the <b>point-to-multipoint</b> context
Context	<a href="#">reset router</a> <i>string</i> <a href="#">bfd session</a> <a href="#">point-to-multipoint</a>
Tree	<a href="#">point-to-multipoint</a>
Introduced	23.10.R1
Platforms	All

### **p2mp-interface-name**

Synopsis	Reset information for the P2MP interface
Context	<a href="#">reset router</a> <i>string</i> <a href="#">bfd session</a> <a href="#">point-to-multipoint</a> <a href="#">p2mp-interface-name</a>
Tree	<a href="#">p2mp-interface-name</a>
Introduced	23.10.R1
Platforms	All

### **[p2mp-interface-name]** *string*

Synopsis	P2MP interface name
Context	<a href="#">reset router</a> <i>string</i> <a href="#">bfd session</a> <a href="#">point-to-multipoint</a> <a href="#">p2mp-interface-name</a> [ <a href="#">p2mp-interface-name</a> ] <i>string</i>
Tree	<a href="#">[p2mp-interface-name]</a>
Notes	This element is mandatory.
Introduced	23.10.R1
Platforms	All

## point-to-point

Synopsis	Enter the <b>point-to-point</b> context
Context	<a href="#">reset router string bfd session point-to-point</a>
Tree	<a href="#">point-to-point</a>
Introduced	23.10.R1
Platforms	All

## session-key

Synopsis	Reset information for the session key
Context	<a href="#">reset router string bfd session point-to-point session-key</a>
Tree	<a href="#">session-key</a>
Introduced	23.10.R1
Platforms	All

## dst (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	Destination address
Context	<a href="#">reset router string bfd session point-to-point session-key dst (<i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i>)</a>
Tree	<a href="#">dst</a>
Notes	This element is mandatory.
Introduced	23.10.R1
Platforms	All

## src (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	Source address
Context	<a href="#">reset router string bfd session point-to-point session-key src (<i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i>)</a>
Tree	<a href="#">src</a>
Notes	This element is mandatory.
Introduced	23.10.R1
Platforms	All

## seamless-lsp-path

Synopsis	Enter the <b>seamless-lsp-path</b> context
Context	<a href="#">reset router string bfd session seamless-lsp-path</a>
Tree	<a href="#">seamless-lsp-path</a>
Introduced	23.10.R1
Platforms	All

## all

Synopsis	Reset all sessions
Context	<a href="#">reset router string bfd session seamless-lsp-path all</a>
Tree	<a href="#">all</a>
Introduced	23.10.R1
Platforms	All

## session-key

Synopsis	Reset information for the session key
Context	<a href="#">reset router string bfd session seamless-lsp-path session-key</a>
Tree	<a href="#">session-key</a>
Introduced	23.10.R1
Platforms	All

## **lsp-index** *number*

Synopsis	LSP index
Context	<a href="#">reset router string bfd session seamless-lsp-path session-key lsp-index number</a>
Tree	<a href="#">lsp-index</a>
Max. Range	0 to 4294967295
Notes	This element is mandatory.
Introduced	23.10.R1
Platforms	All

**path-lspid** *number*

Synopsis	LSP path ID
Context	<a href="#">reset router</a> <i>string</i> <a href="#">bfd session seamless-lsp-path session-key path-lspid</a> <i>number</i>
Tree	<a href="#">path-lspid</a>
Max. Range	0 to 4294967295
Notes	This element is mandatory.
Introduced	23.10.R1
Platforms	All

**prefix** (*ipv4-prefix* | *ipv6-prefix*)

Synopsis	Prefix
Context	<a href="#">reset router</a> <i>string</i> <a href="#">bfd session seamless-lsp-path session-key prefix</a> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> )
Tree	<a href="#">prefix</a>
Notes	This element is mandatory.
Introduced	23.10.R1
Platforms	All

**src-ip** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	Source address
Context	<a href="#">reset router</a> <i>string</i> <a href="#">bfd session seamless-lsp-path session-key src-ip</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	<a href="#">src-ip</a>
Notes	This element is mandatory.
Introduced	23.10.R1
Platforms	All

**seamless-sr-policy**

Synopsis	Enter the <b>seamless-sr-policy</b> context
Context	<a href="#">reset router</a> <i>string</i> <a href="#">bfd session seamless-sr-policy</a>
Tree	<a href="#">seamless-sr-policy</a>
Introduced	23.10.R1

Platforms All

## all

Synopsis Reset all sessions  
 Context [reset router string bfd session seamless-sr-policy all](#)  
 Tree [all](#)  
 Introduced 23.10.R1  
 Platforms All

## session-key

Synopsis Reset information for the session key  
 Context [reset router string bfd session seamless-sr-policy session-key](#)  
 Tree [session-key](#)  
 Introduced 23.10.R1  
 Platforms All

## lsp-index number

Synopsis LSP index  
 Context [reset router string bfd session seamless-sr-policy session-key lsp-index number](#)  
 Tree [lsp-index](#)  
 Max. Range 0 to 4294967295  
 Notes This element is mandatory.  
 Introduced 23.10.R1  
 Platforms All

## path-lspid number

Synopsis LSP path ID  
 Context [reset router string bfd session seamless-sr-policy session-key path-lspid number](#)  
 Tree [path-lspid](#)  
 Max. Range 0 to 4294967295  
 Notes This element is mandatory.

Introduced 23.10.R1  
 Platforms All

### **prefix** (*ipv4-prefix* | *ipv6-prefix*)

Synopsis Prefix  
 Context [reset router string bfd session seamless-sr-policy session-key prefix](#) (*ipv4-prefix* | *ipv6-prefix*)  
 Tree [prefix](#)  
 Notes This element is mandatory.  
 Introduced 23.10.R1  
 Platforms All

### **src-ip** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis Source address  
 Context [reset router string bfd session seamless-sr-policy session-key src-ip](#) (*ipv4-address-no-zone* | *ipv6-address-no-zone*)  
 Tree [src-ip](#)  
 Notes This element is mandatory.  
 Introduced 23.10.R1  
 Platforms All

### **statistics**

Synopsis Enter the **statistics** context  
 Context [reset router string bfd statistics](#)  
 Tree [statistics](#)  
 Introduced 23.10.R1  
 Platforms All

### **Isp-ldp**

Synopsis Enter the **Isp-ldp** context  
 Context [reset router string bfd statistics Isp-ldp](#)  
 Tree [Isp-ldp](#)

Introduced	23.10.R1
Platforms	All

## head

Synopsis	Enter the <b>head</b> context
Context	<a href="#">reset router string bfd statistics lsp-ldp head</a>
Tree	<a href="#">head</a>
Introduced	23.10.R1
Platforms	All

## session-key

Synopsis	Reset information for the session key
Context	<a href="#">reset router string bfd statistics lsp-ldp head session-key</a>
Tree	<a href="#">session-key</a>
Introduced	23.10.R1
Platforms	All

## prefix (*ipv4-prefix* | *ipv6-prefix*)

Synopsis	Prefix
Context	<a href="#">reset router string bfd statistics lsp-ldp head session-key prefix (<i>ipv4-prefix</i>   <i>ipv6-prefix</i>)</a>
Tree	<a href="#">prefix</a>
Notes	This element is mandatory.
Introduced	23.10.R1
Platforms	All

## src-ip (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	Source address
Context	<a href="#">reset router string bfd statistics lsp-ldp head session-key src-ip (<i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i>)</a>
Tree	<a href="#">src-ip</a>
Notes	This element is mandatory.

Introduced	23.10.R1
Platforms	All

## tail

Synopsis	Enter the <b>tail</b> context
Context	<a href="#">reset router string bfd statistics lsp-ldp tail</a>
Tree	<a href="#">tail</a>
Introduced	23.10.R1
Platforms	All

## session-key

Synopsis	Reset information for the session key
Context	<a href="#">reset router string bfd statistics lsp-ldp tail session-key</a>
Tree	<a href="#">session-key</a>
Introduced	23.10.R1
Platforms	All

## dst-ip (*ipv4-address-no-zone | ipv6-address-no-zone*)

Synopsis	Destination address
Context	<a href="#">reset router string bfd statistics lsp-ldp tail session-key dst-ip (<i>ipv4-address-no-zone   ipv6-address-no-zone</i>)</a>
Tree	<a href="#">dst-ip</a>
Notes	This element is mandatory.
Introduced	23.10.R1
Platforms	All

## prefix (*ipv4-prefix | ipv6-prefix*)

Synopsis	Prefix
Context	<a href="#">reset router string bfd statistics lsp-ldp tail session-key prefix (<i>ipv4-prefix   ipv6-prefix</i>)</a>
Tree	<a href="#">prefix</a>
Notes	This element is mandatory.

Introduced 23.10.R1  
Platforms All

## **lsp-rsvp**

Synopsis Enter the **lsp-rsvp** context  
Context [reset router \*string\* bfd statistics lsp-rsvp](#)  
Tree [lsp-rsvp](#)  
Introduced 23.10.R1  
Platforms All

## **head**

Synopsis Enter the **head** context  
Context [reset router \*string\* bfd statistics lsp-rsvp head](#)  
Tree [head](#)  
Introduced 23.10.R1  
Platforms All

## **rsvp-session-name**

Synopsis Reset information for the RSVP session name  
Context [reset router \*string\* bfd statistics lsp-rsvp head rsvp-session-name](#)  
Tree [rsvp-session-name](#)  
Introduced 23.10.R1  
Platforms All

## **rsvp-session-name *string***

Synopsis RSVP session name  
Context [reset router \*string\* bfd statistics lsp-rsvp head rsvp-session-name rsvp-session-name \*string\*](#)  
Tree [rsvp-session-name](#)  
String Length 1 to 256  
Notes This element is mandatory.

Introduced	23.10.R1
Platforms	All

### **session-key**

Synopsis	Reset information for the session key
Context	<a href="#">reset router</a> <i>string</i> <a href="#">bfd statistics</a> <a href="#">lsp-rsvp head</a> <a href="#">session-key</a>
Tree	<a href="#">session-key</a>
Introduced	23.10.R1
Platforms	All

### **dst-ip** (*ipv4-address-no-zone | ipv6-address-no-zone*)

Synopsis	Destination address
Context	<a href="#">reset router</a> <i>string</i> <a href="#">bfd statistics</a> <a href="#">lsp-rsvp head</a> <a href="#">session-key</a> <a href="#">dst-ip</a> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> )
Tree	<a href="#">dst-ip</a>
Notes	This element is mandatory.
Introduced	23.10.R1
Platforms	All

### **lsp-id number**

Synopsis	LSP ID
Context	<a href="#">reset router</a> <i>string</i> <a href="#">bfd statistics</a> <a href="#">lsp-rsvp head</a> <a href="#">session-key</a> <a href="#">lsp-id number</a>
Tree	<a href="#">lsp-id</a>
Max. Range	0 to 4294967295
Notes	This element is mandatory.
Introduced	23.10.R1
Platforms	All

### **src-ip** (*ipv4-address-no-zone | ipv6-address-no-zone*)

Synopsis	Source address
Context	<a href="#">reset router</a> <i>string</i> <a href="#">bfd statistics</a> <a href="#">lsp-rsvp head</a> <a href="#">session-key</a> <a href="#">src-ip</a> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> )

Tree	<a href="#">src-ip</a>
Notes	This element is mandatory.
Introduced	23.10.R1
Platforms	All

### **tunnel-id** *number*

Synopsis	Tunnel ID
Context	<a href="#">reset router</a> <i>string</i> <a href="#">bfd statistics</a> <a href="#">lsp-rsvp head session-key</a> <b>tunnel-id</b> <i>number</i>
Tree	<a href="#">tunnel-id</a>
Max. Range	0 to 4294967295
Notes	This element is mandatory.
Introduced	23.10.R1
Platforms	All

### **tail**

Synopsis	Enter the <b>tail</b> context
Context	<a href="#">reset router</a> <i>string</i> <a href="#">bfd statistics</a> <a href="#">lsp-rsvp tail</a>
Tree	<a href="#">tail</a>
Introduced	23.10.R1
Platforms	All

### **rsvp-session-name**

Synopsis	Reset information for the RSVP session name
Context	<a href="#">reset router</a> <i>string</i> <a href="#">bfd statistics</a> <a href="#">lsp-rsvp tail</a> <b>rsvp-session-name</b>
Tree	<a href="#">rsvp-session-name</a>
Introduced	23.10.R1
Platforms	All

### **rsvp-session-name** *string*

Synopsis	RSVP session name
Context	<a href="#">reset router</a> <i>string</i> <a href="#">bfd statistics</a> <a href="#">lsp-rsvp tail</a> <a href="#">rsvp-session-name</a> <b>rsvp-session-name</b> <i>string</i>

Tree	<a href="#">rsvp-session-name</a>
String Length	1 to 256
Notes	This element is mandatory.
Introduced	23.10.R1
Platforms	All

### **sender-ip** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	RSVP session sender IP address
Context	<a href="#">reset router</a> <i>string</i> <a href="#">bfd statistics</a> <a href="#">lsp-rsvp tail</a> <a href="#">rsvp-session-name</a> <b>sender-ip</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	<a href="#">sender-ip</a>
Notes	This element is mandatory.
Introduced	23.10.R1
Platforms	All

### **session-key**

Synopsis	Reset information for the session key
Context	<a href="#">reset router</a> <i>string</i> <a href="#">bfd statistics</a> <a href="#">lsp-rsvp tail</a> <b>session-key</b>
Tree	<a href="#">session-key</a>
Introduced	23.10.R1
Platforms	All

### **dst-ip** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	Destination address
Context	<a href="#">reset router</a> <i>string</i> <a href="#">bfd statistics</a> <a href="#">lsp-rsvp tail</a> <a href="#">session-key</a> <b>dst-ip</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	<a href="#">dst-ip</a>
Notes	This element is mandatory.
Introduced	23.10.R1
Platforms	All

**lsp-id number**

Synopsis	LSP ID
Context	<a href="#">reset router string bfd statistics lsp-rsvp tail session-key lsp-id number</a>
Tree	<a href="#">lsp-id</a>
Max. Range	0 to 4294967295
Notes	This element is mandatory.
Introduced	23.10.R1
Platforms	All

**src-ip (ipv4-address-no-zone | ipv6-address-no-zone)**

Synopsis	Source address
Context	<a href="#">reset router string bfd statistics lsp-rsvp tail session-key src-ip (ipv4-address-no-zone   ipv6-address-no-zone)</a>
Tree	<a href="#">src-ip</a>
Notes	This element is mandatory.
Introduced	23.10.R1
Platforms	All

**tunnel-id number**

Synopsis	Tunnel ID
Context	<a href="#">reset router string bfd statistics lsp-rsvp tail session-key tunnel-id number</a>
Tree	<a href="#">tunnel-id</a>
Max. Range	0 to 4294967295
Notes	This element is mandatory.
Introduced	23.10.R1
Platforms	All

**mpls-tp**

Synopsis	Enter the <b>mpls-tp</b> context
Context	<a href="#">reset router string bfd statistics mpls-tp</a>
Tree	<a href="#">mpls-tp</a>
Introduced	23.10.R1

Platforms All

### **lsp-id**

Synopsis Reset information for the LSP ID  
Context [reset router string bfd statistics mpls-tp lsp-id](#)  
Tree [lsp-id](#)  
Introduced 23.10.R1  
Platforms All

### **lsp-name string**

Synopsis LSP name  
Context [reset router string bfd statistics mpls-tp lsp-id lsp-name string](#)  
Tree [lsp-name](#)  
String Length 1 to 256  
Introduced 23.10.R1  
Platforms All

### **path keyword**

Synopsis Path status  
Context [reset router string bfd statistics mpls-tp lsp-id path keyword](#)  
Tree [path](#)  
Options working, protecting  
Notes This element is mandatory.  
Introduced 23.10.R1  
Platforms All

### **point-to-multipoint**

Synopsis Enter the **point-to-multipoint** context  
Context [reset router string bfd statistics point-to-multipoint](#)  
Tree [point-to-multipoint](#)  
Introduced 23.10.R1

Platforms All

### **p2mp-interface-name**

Synopsis Reset information for the P2MP interface  
Context [reset router string bfd statistics point-to-multipoint p2mp-interface-name](#)  
Tree [p2mp-interface-name](#)  
Introduced 23.10.R1  
Platforms All

### **[p2mp-interface-name] string**

Synopsis P2MP interface name  
Context [reset router string bfd statistics point-to-multipoint p2mp-interface-name \[p2mp-interface-name\] string](#)  
Tree [\[p2mp-interface-name\]](#)  
Notes This element is mandatory.  
Introduced 23.10.R1  
Platforms All

### **point-to-point**

Synopsis Enter the **point-to-point** context  
Context [reset router string bfd statistics point-to-point](#)  
Tree [point-to-point](#)  
Introduced 23.10.R1  
Platforms All

### **session-key**

Synopsis Reset information for the session key  
Context [reset router string bfd statistics point-to-point session-key](#)  
Tree [session-key](#)  
Introduced 23.10.R1  
Platforms All

**dst** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	Destination address
Context	<a href="#">reset router string bfd statistics point-to-point session-key dst</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	<a href="#">dst</a>
Notes	This element is mandatory.
Introduced	23.10.R1
Platforms	All

**src** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	Source address
Context	<a href="#">reset router string bfd statistics point-to-point session-key src</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	<a href="#">src</a>
Notes	This element is mandatory.
Introduced	23.10.R1
Platforms	All

**seamless-lsp-path**

Synopsis	Enter the <b>seamless-lsp-path</b> context
Context	<a href="#">reset router string bfd statistics seamless-lsp-path</a>
Tree	<a href="#">seamless-lsp-path</a>
Introduced	23.10.R1
Platforms	All

**all**

Synopsis	Reset all sessions
Context	<a href="#">reset router string bfd statistics seamless-lsp-path all</a>
Tree	<a href="#">all</a>
Introduced	23.10.R1
Platforms	All

## session-key

Synopsis	Reset information for the session key
Context	<a href="#">reset router string bfd statistics seamless-lsp-path session-key</a>
Tree	<a href="#">session-key</a>
Introduced	23.10.R1
Platforms	All

## lsp-index number

Synopsis	LSP index
Context	<a href="#">reset router string bfd statistics seamless-lsp-path session-key lsp-index number</a>
Tree	<a href="#">lsp-index</a>
Max. Range	0 to 4294967295
Notes	This element is mandatory.
Introduced	23.10.R1
Platforms	All

## path-lspid number

Synopsis	LSP path ID
Context	<a href="#">reset router string bfd statistics seamless-lsp-path session-key path-lspid number</a>
Tree	<a href="#">path-lspid</a>
Max. Range	0 to 4294967295
Notes	This element is mandatory.
Introduced	23.10.R1
Platforms	All

## prefix (ipv4-prefix | ipv6-prefix)

Synopsis	Prefix
Context	<a href="#">reset router string bfd statistics seamless-lsp-path session-key prefix (ipv4-prefix   ipv6-prefix)</a>
Tree	<a href="#">prefix</a>
Notes	This element is mandatory.

Introduced 23.10.R1  
 Platforms All

### **src-ip** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis Source address  
 Context [reset router string bfd statistics seamless-lsp-path session-key src-ip](#) (*ipv4-address-no-zone* | *ipv6-address-no-zone*)  
 Tree [src-ip](#)  
 Notes This element is mandatory.  
 Introduced 23.10.R1  
 Platforms All

### **seamless-sr-policy**

Synopsis Enter the **seamless-sr-policy** context  
 Context [reset router string bfd statistics seamless-sr-policy](#)  
 Tree [seamless-sr-policy](#)  
 Introduced 23.10.R1  
 Platforms All

 Notes This element is mandatory.  
 Introduced 23.10.R1  
 Platforms All

### **prefix (ipv4-prefix | ipv6-prefix)**

Synopsis Prefix  
 Context [reset router string bfd statistics seamless-sr-policy session-key prefix \(ipv4-prefix | ipv6-prefix\)](#)  
 Tree [prefix](#)  
 Notes This element is mandatory.  
 Introduced 23.10.R1  
 Platforms All

### **src-ip (ipv4-address-no-zone | ipv6-address-no-zone)**

Synopsis Source address

Context	<a href="#">reset router string bfd statistics seamless-sr-policy session-key src-ip</a> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> )
Tree	<a href="#">src-ip</a>
Notes	This element is mandatory.
Introduced	23.10.R1
Platforms	All

## dhcp-server

Synopsis	Enter the <b>dhcp-server</b> context
Context	<a href="#">reset router string dhcp-server</a>
Tree	<a href="#">dhcp-server</a>
Description	Commands in this context reset DHCPv4 server entities.
Introduced	23.10.R1
Platforms	All

## dhcpv4 [[server-name](#)] *string*

Synopsis	Enter the <b>dhcpv4</b> list instance
Context	<a href="#">reset router string dhcp-server dhcpv4 string</a>
Tree	<a href="#">dhcpv4</a>
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## [[server-name](#)] *string*

Synopsis	Server name
Context	<a href="#">reset router string dhcp-server dhcpv4 string</a>
Tree	<a href="#">dhcpv4</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## declined-addresses

Synopsis	Enter the <b>declined-addresses</b> context
Context	<a href="#">reset router string dhcp-server dhcpv4 string declined-addresses</a>
Tree	<a href="#">declined-addresses</a>
Description	Commands in this context make declined DHCPv4 addresses available.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## address

Synopsis	Make the specified declined addresses available
Context	<a href="#">reset router string dhcp-server dhcpv4 string declined-addresses address</a>
Tree	<a href="#">address</a>
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## [address] string

Synopsis	IPv4 address
Context	<a href="#">reset router string dhcp-server dhcpv4 string declined-addresses address [address] string</a>
Tree	<a href="#">[address]</a>
Notes	This element is mandatory.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## mask number

Synopsis	IPv4 address mask
Context	<a href="#">reset router string dhcp-server dhcpv4 string declined-addresses address mask number</a>
Tree	<a href="#">mask</a>
Range	1 to 32
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**pool**

Synopsis	Make declined addresses in the pool available
Context	<code>reset router string dhcp-server dhcpv4 string declined-addresses pool</code>
Tree	<code>pool</code>
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**[pool] string**

Synopsis	Pool name
Context	<code>reset router string dhcp-server dhcpv4 string declined-addresses pool [pool] string</code>
Tree	<code>[pool]</code>
String Length	1 to 32
Notes	This element is mandatory.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**failover-pool-statistics**

Synopsis	Enter the <b>failover-pool-statistics</b> context
Context	<code>reset router string dhcp-server dhcpv4 string failover-pool-statistics</code>
Tree	<code>failover-pool-statistics</code>
Description	Commands in this context reset the per pool failover statistics.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**all**

Synopsis	Reset failover statistics for all pools
Context	<code>reset router string dhcp-server dhcpv4 string failover-pool-statistics all</code>
Tree	<code>all</code>
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## pool

Synopsis	Reset failover statistics for the specified pool
Context	<code>reset router string dhcp-server dhcpv4 string failover-pool-statistics pool</code>
Tree	<code>pool</code>
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## [pool] string

Synopsis	Pool name
Context	<code>reset router string dhcp-server dhcpv4 string failover-pool-statistics pool [pool] string</code>
Tree	<code>[pool]</code>
String Length	1 to 32
Notes	This element is mandatory.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## leases

Synopsis	Enter the <b>leases</b> context
Context	<code>reset router string dhcp-server dhcpv4 string leases</code>
Tree	<code>leases</code>
Description	Commands in this context delete leases in the specified DHCPv4 server.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## address

Synopsis	Delete the specified DHCPv4 lease
Context	<code>reset router string dhcp-server dhcpv4 string leases address</code>
Tree	<code>address</code>
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**[address]** (*ipv4-address-no-zone | ipv6-address-no-zone*)

Synopsis	IPv4 address
Context	<code>reset router string dhcp-server dhcpv4 string leases address [address]</code> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> )
Tree	<code>[address]</code>
Notes	This element is mandatory.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**state keyword**

Synopsis	Lease state
Context	<code>reset router string dhcp-server dhcpv4 string leases address state keyword</code>
Tree	<code>state</code>
Options	offered, stable, force-renew-pending, remove-pending, held, internal, internal-orphan, internal-offered, internal-held, sticky
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**all**

Synopsis	Delete all DHCPv4 leases
Context	<code>reset router string dhcp-server dhcpv4 string leases all</code>
Tree	<code>all</code>
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**state keyword**

Synopsis	Lease state
Context	<code>reset router string dhcp-server dhcpv4 string leases all state keyword</code>
Tree	<code>state</code>
Options	offered, stable, force-renew-pending, remove-pending, held, internal, internal-orphan, internal-offered, internal-held, sticky
Introduced	23.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## prefix

Synopsis Delete all DHCPv4 leases in the specified prefix  
 Context [reset router string dhcp-server dhcpv4 string leases prefix](#)  
 Tree [prefix](#)  
 Introduced 23.10.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## [prefix] string

Synopsis IPv4 prefix  
 Context [reset router string dhcp-server dhcpv4 string leases prefix \[prefix\] string](#)  
 Tree [\[prefix\]](#)  
 Notes This element is mandatory.  
 Introduced 23.10.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## state keyword

Synopsis Lease state  
 Context [reset router string dhcp-server dhcpv4 string leases prefix state keyword](#)  
 Tree [state](#)  
 Options offered, stable, force-renew-pending, remove-pending, held, internal, internal-orphan, internal-offered, internal-held, sticky  
 Introduced 23.10.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## pool-extended-statistics

Synopsis Enter the **pool-extended-statistics** context  
 Context [reset router string dhcp-server dhcpv4 string pool-extended-statistics](#)  
 Tree [pool-extended-statistics](#)  
 Description Commands in this context reset the pool extended statistics peak values.

Introduced 23.10.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## all

Synopsis Reset extended statistics peak values for all pools  
 Context [reset router string dhcp-server dhcpv4 string pool-extended-statistics all](#)  
 Tree [all](#)  
 Introduced 23.10.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## pool

Synopsis Reset extended statistics peak values for the pool  
 Context [reset router string dhcp-server dhcpv4 string pool-extended-statistics pool](#)  
 Tree [pool](#)  
 Introduced 23.10.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## [pool] string

Synopsis Pool name  
 Context [reset router string dhcp-server dhcpv4 string pool-extended-statistics pool \[pool\] string](#)  
 Tree [\[pool\]](#)  
 String Length 1 to 32  
 Notes This element is mandatory.  
 Introduced 23.10.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## statistics

Synopsis Reset DHCPv4 server statistics  
 Context [reset router string dhcp-server dhcpv4 string statistics](#)  
 Tree [statistics](#)  
 Introduced 23.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## sticky-leases

Synopsis Enter the **sticky-leases** context

Context [reset router string dhcp-server dhcpv4 string sticky-leases](#)

Tree [sticky-leases](#)

Description Commands in this context delete sticky leases.

Introduced 23.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## host-name

Synopsis Delete the sticky lease associated with the hostname

Context [reset router string dhcp-server dhcpv4 string sticky-leases host-name](#)

Tree [host-name](#)

Introduced 23.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## [host-name] string

Synopsis Hostname

Context [reset router string dhcp-server dhcpv4 string sticky-leases host-name \[host-name\] string](#)

Tree [\[host-name\]](#)

String Length 1 to 32

Notes This element is mandatory.

Introduced 23.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## host-name-prefix

Synopsis Delete sticky leases associated with hostnames containing the prefix

Context [reset router string dhcp-server dhcpv4 string sticky-leases host-name-prefix](#)

Tree [host-name-prefix](#)

Introduced 23.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **[host-name-prefix] string**

Synopsis Hostname prefix

Context [reset router string dhcp-server dhcpv4 string sticky-leases host-name-prefix \[host-name-prefix\] string](#)

Tree [\[host-name-prefix\]](#)

String Length 1 to 32

Notes This element is mandatory.

Introduced 23.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **subnet-extended-statistics**

Synopsis Enter the **subnet-extended-statistics** context

Context [reset router string dhcp-server dhcpv4 string subnet-extended-statistics](#)

Tree [subnet-extended-statistics](#)

Description Commands in this context reset the per subnet extended statistics peak values.

Introduced 23.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **pool**

Synopsis Reset extended statistics peak values for all subnets in the pool

Context [reset router string dhcp-server dhcpv4 string subnet-extended-statistics pool](#)

Tree [pool](#)

Introduced 23.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **[pool] string**

Synopsis Pool name

Context [reset router string dhcp-server dhcpv4 string subnet-extended-statistics pool \[pool\] string](#)

Tree [\[pool\]](#)

String Length	1 to 32
Notes	This element is mandatory.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## prefix

Synopsis	Reset extended statistics peak values for the specified prefix
Context	<a href="#">reset router string dhcp-server dhcpv4 string subnet-extended-statistics prefix</a>
Tree	<a href="#">prefix</a>
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## [prefix] string

Synopsis	IPv4 prefix
Context	<a href="#">reset router string dhcp-server dhcpv4 string subnet-extended-statistics prefix [prefix] string</a>
Tree	<a href="#">[prefix]</a>
Notes	This element is mandatory.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## dhcpv6 [server-name] string

Synopsis	Enter the <b>dhcpv6</b> list instance
Context	<a href="#">reset router string dhcp-server dhcpv6 string</a>
Tree	<a href="#">dhcpv6</a>
Description	Commands in this context reset DHCPv6 server entities.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## [server-name] string

Synopsis	Server name
----------	-------------

Context	<a href="#">reset router string dhcp-server dhcpv6 string</a>
Tree	<a href="#">dhcpv6</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## failover-pool-statistics

Synopsis	Enter the <b>failover-pool-statistics</b> context
Context	<a href="#">reset router string dhcp-server dhcpv6 string failover-pool-statistics</a>
Tree	<a href="#">failover-pool-statistics</a>
Description	Commands in this context reset the per pool failover statistics.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## all

Synopsis	Reset failover statistics for all pools
Context	<a href="#">reset router string dhcp-server dhcpv6 string failover-pool-statistics all</a>
Tree	<a href="#">all</a>
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## pool

Synopsis	Reset failover statistics for the specified pool
Context	<a href="#">reset router string dhcp-server dhcpv6 string failover-pool-statistics pool</a>
Tree	<a href="#">pool</a>
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## [pool] string

Synopsis	Pool name
----------	-----------

Context	<code>reset router string dhcp-server dhcpv6 string failover-pool-statistics pool [pool] string</code>
Tree	<code>[pool]</code>
String Length	1 to 32
Notes	This element is mandatory.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## leases

Synopsis	Enter the <b>leases</b> context
Context	<code>reset router string dhcp-server dhcpv6 string leases</code>
Tree	<code>leases</code>
Description	Commands in this context delete leases in the specified DHCPv6 server.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## address

Synopsis	Delete the specified DHCPv6 lease
Context	<code>reset router string dhcp-server dhcpv6 string leases address</code>
Tree	<code>address</code>
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## [address] (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	IPv6 address
Context	<code>reset router string dhcp-server dhcpv6 string leases address [address] (<i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i>)</code>
Tree	<code>[address]</code>
Notes	This element is mandatory.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**state keyword**

Synopsis	Lease state
Context	<a href="#">reset router</a> <i>string</i> <a href="#">dhcp-server</a> <a href="#">dhcpv6</a> <i>string</i> <a href="#">leases</a> <a href="#">address</a> <a href="#">state</a> <i>keyword</i>
Tree	<a href="#">state</a>
Options	advertised, stable, remove-pending, held, internal, internal-orphan, internal-offered, internal-held
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**type keyword**

Synopsis	Lease type
Context	<a href="#">reset router</a> <i>string</i> <a href="#">dhcp-server</a> <a href="#">dhcpv6</a> <i>string</i> <a href="#">leases</a> <a href="#">address</a> <a href="#">type</a> <i>keyword</i>
Tree	<a href="#">type</a>
Options	pd, slaac, wan
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**all**

Synopsis	Delete all DHCPv6 leases
Context	<a href="#">reset router</a> <i>string</i> <a href="#">dhcp-server</a> <a href="#">dhcpv6</a> <i>string</i> <a href="#">leases</a> <a href="#">all</a>
Tree	<a href="#">all</a>
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**state keyword**

Synopsis	Lease state
Context	<a href="#">reset router</a> <i>string</i> <a href="#">dhcp-server</a> <a href="#">dhcpv6</a> <i>string</i> <a href="#">leases</a> <a href="#">all</a> <a href="#">state</a> <i>keyword</i>
Tree	<a href="#">state</a>
Options	advertised, stable, remove-pending, held, internal, internal-orphan, internal-offered, internal-held
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**type keyword**

Synopsis	Lease type
Context	<a href="#">reset router string dhcp-server dhcpv6 string leases all type keyword</a>
Tree	<a href="#">type</a>
Options	pd, slaac, wan
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**prefix**

Synopsis	Delete all DHCPv6 leases in the specified prefix
Context	<a href="#">reset router string dhcp-server dhcpv6 string leases prefix</a>
Tree	<a href="#">prefix</a>
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**[prefix] string**

Synopsis	IPv6 prefix
Context	<a href="#">reset router string dhcp-server dhcpv6 string leases prefix [prefix] string</a>
Tree	<a href="#">[prefix]</a>
Notes	This element is mandatory.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**state keyword**

Synopsis	Lease state
Context	<a href="#">reset router string dhcp-server dhcpv6 string leases prefix state keyword</a>
Tree	<a href="#">state</a>
Options	advertised, stable, remove-pending, held, internal, internal-orphan, internal-offered, internal-held
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## **type keyword**

Synopsis	Lease type
Context	<a href="#">reset router string dhcp-server dhcpv6 string leases prefix type keyword</a>
Tree	<a href="#">type</a>
Options	pd, slaac, wan
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## **pool-extended-statistics**

Synopsis	Enter the <b>pool-extended-statistics</b> context
Context	<a href="#">reset router string dhcp-server dhcpv6 string pool-extended-statistics</a>
Tree	<a href="#">pool-extended-statistics</a>
Description	Commands in this context reset the pool extended statistics extended values.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## **all**

Synopsis	Reset extended statistics peak values for all pools
Context	<a href="#">reset router string dhcp-server dhcpv6 string pool-extended-statistics all</a>
Tree	<a href="#">all</a>
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## **pool**

Synopsis	Reset extended statistics peak values for the specified pool
Context	<a href="#">reset router string dhcp-server dhcpv6 string pool-extended-statistics pool</a>
Tree	<a href="#">pool</a>
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**[pool] string**

Synopsis	Pool name
Context	<a href="#">reset router string dhcp-server dhcpv6 string pool-extended-statistics pool [pool] string</a>
Tree	<a href="#">[pool]</a>
String Length	1 to 32
Notes	This element is mandatory.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**pool-threshold-statistics**

Synopsis	Enter the <b>pool-threshold-statistics</b> context
Context	<a href="#">reset router string dhcp-server dhcpv6 string pool-threshold-statistics</a>
Tree	<a href="#">pool-threshold-statistics</a>
Description	Commands in this context reset the per pool threshold statistics peak values.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**all**

Synopsis	Reset threshold statistics peak values for all pools
Context	<a href="#">reset router string dhcp-server dhcpv6 string pool-threshold-statistics all</a>
Tree	<a href="#">all</a>
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**pool**

Synopsis	Reset threshold statistics peak values for the pool
Context	<a href="#">reset router string dhcp-server dhcpv6 string pool-threshold-statistics pool</a>
Tree	<a href="#">pool</a>
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**[pool] string**

Synopsis	Pool name
Context	<a href="#">reset router string dhcp-server dhcpv6 string pool-threshold-statistics pool [pool] string</a>
Tree	<a href="#">[pool]</a>
String Length	1 to 32
Notes	This element is mandatory.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**prefix-extended-statistics**

Synopsis	Enter the <b>prefix-extended-statistics</b> context
Context	<a href="#">reset router string dhcp-server dhcpv6 string prefix-extended-statistics</a>
Tree	<a href="#">prefix-extended-statistics</a>
Description	Commands in this context reset the per prefix extended statistics peak values.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**pool**

Synopsis	Reset extended statistics peak values for all prefixes in the pool
Context	<a href="#">reset router string dhcp-server dhcpv6 string prefix-extended-statistics pool</a>
Tree	<a href="#">pool</a>
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**[pool] string**

Synopsis	Pool name
Context	<a href="#">reset router string dhcp-server dhcpv6 string prefix-extended-statistics pool [pool] string</a>
Tree	<a href="#">[pool]</a>
String Length	1 to 32
Notes	This element is mandatory.
Introduced	23.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## prefix

Synopsis Reset extended statistics peak values for the prefix  
 Context [reset router string dhcp-server dhcpv6 string prefix-extended-statistics prefix](#)  
 Tree [prefix](#)  
 Introduced 23.10.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## [prefix] string

Synopsis IPv6 prefix  
 Context [reset router string dhcp-server dhcpv6 string prefix-extended-statistics prefix \[prefix\] string](#)  
 Tree [\[prefix\]](#)  
 Notes This element is mandatory.  
 Introduced 23.10.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## prefix-threshold-statistics

Synopsis Enter the **prefix-threshold-statistics** context  
 Context [reset router string dhcp-server dhcpv6 string prefix-threshold-statistics](#)  
 Tree [prefix-threshold-statistics](#)  
 Description Commands in this context reset the per prefix threshold statistics peak values.  
 Introduced 23.10.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## pool

Synopsis Reset threshold statistics peak values for all prefixes in the pool  
 Context [reset router string dhcp-server dhcpv6 string prefix-threshold-statistics pool](#)  
 Tree [pool](#)  
 Introduced 23.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **[pool]** *string*

Synopsis Pool name  
 Context [reset router string dhcp-server dhcpv6 string prefix-threshold-statistics pool \[pool\] string](#)  
 Tree [\[pool\]](#)  
 String Length 1 to 32  
 Notes This element is mandatory.  
 Introduced 23.10.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **prefix**

Synopsis Reset threshold statistics peak values for the specified prefix  
 Context [reset router string dhcp-server dhcpv6 string prefix-threshold-statistics prefix](#)  
 Tree [prefix](#)  
 Introduced 23.10.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **[prefix]** *string*

Synopsis IPv6 prefix  
 Context [reset router string dhcp-server dhcpv6 string prefix-threshold-statistics prefix \[prefix\] string](#)  
 Tree [\[prefix\]](#)  
 Notes This element is mandatory.  
 Introduced 23.10.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **statistics**

Synopsis Reset DHCPv6 server statistics  
 Context [reset router string dhcp-server dhcpv6 string statistics](#)  
 Tree [statistics](#)

Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## forwarding-table

Synopsis	Enter the <b>forwarding-table</b> context
Context	<a href="#">reset router string forwarding-table</a>
Tree	<a href="#">forwarding-table</a>
Description	Commands in this context reset the router forwarding table for the IOM.
Introduced	23.10.R1
Platforms	All

## all

Synopsis	Reset all router forwarding tables
Context	<a href="#">reset router string forwarding-table all</a>
Tree	<a href="#">all</a>
Introduced	23.10.R1
Platforms	All

## slot

Synopsis	Reset the router forwarding table for the IOM slot
Context	<a href="#">reset router string forwarding-table slot</a>
Tree	<a href="#">slot</a>
Introduced	23.10.R1
Platforms	All

## slot-number *reference*

Synopsis	Slot number
Context	<a href="#">reset router string forwarding-table slot slot-number reference</a>
Tree	<a href="#">slot-number</a>
Reference	<b>state card number</b>
Introduced	23.10.R1

Platforms All

## grt-lookup

Synopsis Re-evaluate the route policies for GRT

Context [reset router string grt-lookup](#)

Tree [grt-lookup](#)

Introduced 23.10.R1

Platforms All

## icmp

Synopsis Enter the **icmp** context

Context [reset router string icmp](#)

Tree [icmp](#)

Introduced 23.10.R1

Platforms All

## all

Synopsis Reset all ICMP router statistics

Context [reset router string icmp all](#)

Tree [all](#)

Introduced 23.10.R1

Platforms All

## global

Synopsis Reset global router statistics

Context [reset router string icmp global](#)

Tree [global](#)

Introduced 23.10.R1

Platforms All

## interface

Synopsis	Reset ICMP statistics for the interface
Context	<a href="#">reset router</a> <i>string</i> <a href="#">icmp</a> <a href="#">interface</a>
Tree	<a href="#">interface</a>
Introduced	23.10.R1
Platforms	All

## interface-name *string*

Synopsis	Interface name
Context	<a href="#">reset router</a> <i>string</i> <a href="#">icmp</a> <a href="#">interface</a> <a href="#">interface-name</a> <i>string</i>
Tree	<a href="#">interface-name</a>
String Length	1 to 32
Introduced	23.10.R1
Platforms	All

## icmp-redirect-route

Synopsis	Enter the <b>icmp-redirect-route</b> context
Context	<a href="#">reset router</a> <i>string</i> <a href="#">icmp-redirect-route</a>
Tree	<a href="#">icmp-redirect-route</a>
Description	Commands in this context remove routes created as a result of ICMP redirects received on the management interface.
Introduced	23.10.R1
Platforms	All

## address

Synopsis	Reset the routes associated with the IP address
Context	<a href="#">reset router</a> <i>string</i> <a href="#">icmp-redirect-route</a> <a href="#">address</a>
Tree	<a href="#">address</a>
Introduced	23.10.R1
Platforms	All

### **ipv4-address** *string*

Synopsis	IPv4 address
Context	<a href="#">reset router</a> <i>string</i> <a href="#">icmp-redirect-route</a> address <a href="#">ipv4-address</a> <i>string</i>
Tree	<a href="#">ipv4-address</a>
Introduced	23.10.R1
Platforms	All

### **all**

Synopsis	Reset all routes
Context	<a href="#">reset router</a> <i>string</i> <a href="#">icmp-redirect-route</a> all
Tree	<a href="#">all</a>
Introduced	23.10.R1
Platforms	All

### **icmp6**

Synopsis	Enter the <b>icmp6</b> context
Context	<a href="#">reset router</a> <i>string</i> <a href="#">icmp6</a>
Tree	<a href="#">icmp6</a>
Description	Commands in this context reset ICMPv6 statistics.
Introduced	23.10.R1
Platforms	All

### **all**

Synopsis	Reset all ICMPv6 router statistics
Context	<a href="#">reset router</a> <i>string</i> <a href="#">icmp6</a> all
Tree	<a href="#">all</a>
Introduced	23.10.R1
Platforms	All

### **global**

Synopsis	Reset ICMPv6 global router statistics
----------	---------------------------------------

---

Context	<a href="#">reset router string icmp6 global</a>
Tree	<a href="#">global</a>
Introduced	23.10.R1
Platforms	All

## interface

Synopsis	Reset ICMPv6 router statistics of the interface
Context	<a href="#">reset router string icmp6 interface</a>
Tree	<a href="#">interface</a>
Introduced	23.10.R1
Platforms	All

## interface-name *string*

Synopsis	Interface name
Context	<a href="#">reset router string icmp6 interface interface-name string</a>
Tree	<a href="#">interface-name</a>
String Length	1 to 32
Introduced	23.10.R1
Platforms	All

## icmp6-redirect-route

Synopsis	Enter the <b>icmp6-redirect-route</b> context
Context	<a href="#">reset router string icmp6-redirect-route</a>
Tree	<a href="#">icmp6-redirect-route</a>
Description	Commands in this context delete routes created from ICMPv6 redirects received on the management interface.
Introduced	23.10.R1
Platforms	All

## address

Synopsis	Reset routes associated with the IPv6 address
----------	---

Context	<a href="#">reset router string icmp6-redirect-route address</a>
Tree	<a href="#">address</a>
Introduced	23.10.R1
Platforms	All

### **ipv6-address** *string*

Synopsis	IPv6 address
Context	<a href="#">reset router string icmp6-redirect-route address ipv6-address string</a>
Tree	<a href="#">ipv6-address</a>
Introduced	23.10.R1
Platforms	All

### **all**

Synopsis	Reset all routes
Context	<a href="#">reset router string icmp6-redirect-route all</a>
Tree	<a href="#">all</a>
Introduced	23.10.R1
Platforms	All

### **interface** [[interface-name](#)] *string*

Synopsis	Enter the <b>interface</b> list instance
Context	<a href="#">reset router string interface string</a>
Tree	<a href="#">interface</a>
Description	Commands in this context reset IP interface statistics.
Introduced	23.7.R1
Platforms	All

### **[interface-name]** *string*

Synopsis	Interface name
Context	<a href="#">reset router string interface string</a>
Tree	<a href="#">interface</a>

---

String Length	1 to 32
Notes	This element is part of a list key.
Introduced	23.7.R1
Platforms	All

## hold-time

Synopsis	Reset the IP interface activation hold timers
Context	<a href="#">reset router</a> <i>string</i> <a href="#">interface</a> <i>string</i> <b>hold-time</b>
Tree	<a href="#">hold-time</a>
Introduced	23.7.R1
Platforms	All

## mac

Synopsis	Enter the <b>mac</b> context
Context	<a href="#">reset router</a> <i>string</i> <a href="#">interface</a> <i>string</i> <b>mac</b>
Tree	<a href="#">mac</a>
Introduced	23.7.R1
Platforms	All

## address

Synopsis	Reset specified MAC address from associated interface
Context	<a href="#">reset router</a> <i>string</i> <a href="#">interface</a> <i>string</i> <b>mac</b> <b>address</b>
Tree	<a href="#">address</a>
Introduced	23.7.R1
Platforms	All

## [**mac-address**] *string*

Synopsis	MAC address
Context	<a href="#">reset router</a> <i>string</i> <a href="#">interface</a> <i>string</i> <b>mac</b> <b>address</b> [ <b>mac-address</b> ] <i>string</i>
Tree	<a href="#">[mac-address]</a>
Notes	This element is mandatory.

Introduced 23.7.R1  
Platforms All

## all

Synopsis Reset all MAC addresses for the specified interface  
Context [reset router string interface string mac all](#)  
Tree [all](#)  
Introduced 23.7.R1  
Platforms All

## policy-accounting

Synopsis Enter the **policy-accounting** context  
Context [reset router string interface string policy-accounting](#)  
Tree [policy-accounting](#)  
Description Commands in this context reset the accounting statistics.  
Introduced 23.7.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

## all

Synopsis Reset all the policy-accounting statistics  
Context [reset router string interface string policy-accounting all](#)  
Tree [all](#)  
Description When configured, the system resets all classes, indexes, and policers.  
Introduced 23.7.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

## class

Synopsis Reset the specified policy-accounting class  
Context [reset router string interface string policy-accounting class](#)  
Tree [class](#)  
Introduced 23.7.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

## all

Synopsis Reset all policy-accounting class indexes  
 Context [reset router string interface string policy-accounting class all](#)  
 Tree [all](#)  
 Notes The following elements are part of a mandatory choice: **all** or **index**.  
 Introduced 23.7.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

## index number

Synopsis Policy-accounting class index  
 Context [reset router string interface string policy-accounting class index number](#)  
 Tree [index](#)  
 Range 1 to 255  
 Notes The following elements are part of a mandatory choice: **all** or **index**.  
 Introduced 23.7.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

## [name] keyword

Synopsis Policy-accounting class counters to reset  
 Context [reset router string interface string policy-accounting class \[name\] keyword](#)  
 Tree [\[name\]](#)  
 Options source-class, destination-class  
 Notes This element is mandatory.  
 Introduced 23.7.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

## policer

Synopsis Enter the **policer** context  
 Context [reset router string interface string policy-accounting policer](#)

Tree	<a href="#">policer</a>
Introduced	23.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

**all**

Synopsis	Reset all the policer statistics
Context	<a href="#">reset router</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">policy-accounting</a> <a href="#">policer</a> <a href="#">all</a>
Tree	<a href="#">all</a>
Introduced	23.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

**index**

Synopsis	Reset the specified policer
Context	<a href="#">reset router</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">policy-accounting</a> <a href="#">policer</a> <a href="#">index</a>
Tree	<a href="#">index</a>
Introduced	23.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

**[policer-index] *number***

Synopsis	Policer index
Context	<a href="#">reset router</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">policy-accounting</a> <a href="#">policer</a> <a href="#">index</a> <a href="#">[policer-index]</a> <i>number</i>
Tree	<a href="#">[policer-index]</a>
Range	1 to 63
Notes	This element is mandatory.
Introduced	23.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

**statistics**

Synopsis	Reset the interface traffic statistics
Context	<a href="#">reset router</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">statistics</a>
Tree	<a href="#">statistics</a>

Introduced 23.7.R1  
 Platforms All

### **urpf-statistics**

Synopsis Reset the interface uRPF statistics  
 Context [reset router string interface string urpf-statistics](#)  
 Tree [urpf-statistics](#)  
 Introduced 23.7.R1  
 Platforms All

### **isis [isis-instance] reference**

Synopsis Enter the **isis** list instance  
 Context [reset router string isis reference](#)  
 Tree [isis](#)  
 Description Commands in this context reset the IS-IS protocol entities.  
 Introduced 23.10.R1  
 Platforms All

### **[isis-instance] reference**

Synopsis IS-IS instance  
 Context [reset router string isis reference](#)  
 Tree [isis](#)  
 MD-CLI 0  
 Default  
 Reference **state router string isis number**  
 Notes This element is part of a list key.  
 Introduced 23.10.R1  
 Platforms All

### **adjacency**

Synopsis Enter the **adjacency** context

---

Context	<a href="#">reset router string isis reference adjacency</a>
Tree	<a href="#">adjacency</a>
Description	Commands in this context reset the entries from the IS-IS adjacency database.
Introduced	23.10.R1
Platforms	All

## all-adjacencies

Synopsis	Reset all IS-IS adjacencies
Context	<a href="#">reset router string isis reference adjacency all-adjacencies</a>
Tree	<a href="#">all-adjacencies</a>
Introduced	23.10.R1
Platforms	All

## system-id

Synopsis	Reset the IS-IS adjacency to a node
Context	<a href="#">reset router string isis reference adjacency system-id</a>
Tree	<a href="#">system-id</a>
Introduced	23.10.R1
Platforms	All

## [system-id] string

Synopsis	System ID for a specific node
Context	<a href="#">reset router string isis reference adjacency system-id [system-id] string</a>
Tree	<a href="#">[system-id]</a>
String Length	14
Default	0000.0000.0000
Notes	This element is mandatory.
Introduced	23.10.R1
Platforms	All

**database**

Synopsis	Enter the <b>database</b> context
Context	<a href="#">reset router string isis reference database</a>
Tree	<a href="#">database</a>
Description	Commands in this context reset the entries from the IS-IS link-state database.
Introduced	23.10.R1
Platforms	All

**all-databases**

Synopsis	Reset all IS-IS databases system wide
Context	<a href="#">reset router string isis reference database all-databases</a>
Tree	<a href="#">all-databases</a>
Introduced	23.10.R1
Platforms	All

**system-id**

Synopsis	Reset the IS-IS database for a node
Context	<a href="#">reset router string isis reference database system-id</a>
Tree	<a href="#">system-id</a>
Introduced	23.10.R1
Platforms	All

**[system-id] string**

Synopsis	System ID for a specific node
Context	<a href="#">reset router string isis reference database system-id [system-id] string</a>
Tree	<a href="#">[system-id]</a>
String Length	14
Default	0000.0000.0000
Notes	This element is mandatory.
Introduced	23.10.R1
Platforms	All

## export

Synopsis	Reset and re-evaluate IS-IS route policies
Context	<a href="#">reset router string isis reference export</a>
Tree	<a href="#">export</a>
Description	When configured, the system re-evaluates route policies participating in the export mechanism, either as importers or exporters of routes.
Introduced	23.10.R1
Platforms	All

## overload

Synopsis	Reset the IS-IS overload
Context	<a href="#">reset router string isis reference overload</a>
Tree	<a href="#">overload</a>
Introduced	23.10.R1
Platforms	All

### [**overload-type**] *keyword*

Synopsis	Overload type
Context	<a href="#">reset router string isis reference overload [<b>overload-type</b>] keyword</a>
Tree	<a href="#">[<b>overload-type</b>]</a>
Options	fib, rtm, prefix-limit
Notes	This element is mandatory.
Introduced	23.10.R1
Platforms	All

## sid-egress-stats

Synopsis	Enter the <b>sid-egress-stats</b> context
Context	<a href="#">reset router string isis reference sid-egress-stats</a>
Tree	<a href="#">sid-egress-stats</a>
Introduced	23.10.R1
Platforms	All

## adj

Synopsis	Enter the <b>adj</b> context
Context	<a href="#">reset router string isis reference sid-egress-stats adj</a>
Tree	<a href="#">adj</a>
Introduced	23.10.R1
Platforms	All

## all

Synopsis	Reset all egress SID statistics for all adjacencies
Context	<a href="#">reset router string isis reference sid-egress-stats adj all</a>
Tree	<a href="#">all</a>
Introduced	23.10.R1
Platforms	All

## interface

Synopsis	Reset adjacency SID statistics for an interface
Context	<a href="#">reset router string isis reference sid-egress-stats adj interface</a>
Tree	<a href="#">interface</a>
Introduced	23.10.R1
Platforms	All

## **[interface-name]** *string*

Synopsis	Interface name
Context	<a href="#">reset router string isis reference sid-egress-stats adj interface [interface-name] string</a>
Tree	<a href="#">[interface-name]</a>
Notes	This element is mandatory.
Introduced	23.10.R1
Platforms	All

**adj-set**

Synopsis	Enter the <b>adj-set</b> context
Context	<a href="#">reset router string isis reference sid-egress-stats adj-set</a>
Tree	<a href="#">adj-set</a>
Introduced	23.10.R1
Platforms	All

**all**

Synopsis	Reset egress SID statistics for all adjacency sets
Context	<a href="#">reset router string isis reference sid-egress-stats adj-set all</a>
Tree	<a href="#">all</a>
Introduced	23.10.R1
Platforms	All

**id**

Synopsis	Reset adjacency set ID
Context	<a href="#">reset router string isis reference sid-egress-stats adj-set id</a>
Tree	<a href="#">id</a>
Introduced	23.10.R1
Platforms	All

**[id] reference**

Synopsis	Adjacency set ID
Context	<a href="#">reset router string isis reference sid-egress-stats adj-set id [id] reference</a>
Tree	<a href="#">[id]</a>
Reference	<b>state router string isis number segment-routing adjacency-set number</b>
Notes	This element is mandatory.
Introduced	23.10.R1
Platforms	All

**all**

Synopsis	Reset all egress SID statistics
Context	<a href="#">reset router string isis reference sid-egress-stats all</a>
Tree	<a href="#">all</a>
Introduced	23.10.R1
Platforms	All

**node**

Synopsis	Enter the <b>node</b> context
Context	<a href="#">reset router string isis reference sid-egress-stats node</a>
Tree	<a href="#">node</a>
Introduced	23.10.R1
Platforms	All

**all**

Synopsis	Reset all egress node SID statistics
Context	<a href="#">reset router string isis reference sid-egress-stats node all</a>
Tree	<a href="#">all</a>
Introduced	23.10.R1
Platforms	All

**prefix**

Synopsis	Reset egress statistics for a node prefix SID
Context	<a href="#">reset router string isis reference sid-egress-stats node prefix</a>
Tree	<a href="#">prefix</a>
Introduced	23.10.R1
Platforms	All

**[ip-prefix-prefix-length]** (*ipv4-address-no-zone* | *ipv6-address-no-zone* | *ipv4-prefix* | *ipv6-prefix*)

Synopsis	Node prefix

Reference	<b>state router</b> <i>string</i> <b>segment-routing sr-policies sr-policy-egress-statistics</b> <i>number</i> <b>endpoint</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>segment-index</b> <i>number</i>
Notes	This element is mandatory.
Introduced	23.10.R1
Platforms	All

## sr-policies-ingress-statistics

Synopsis	Reset ingress traffic statistics
Context	<a href="#">reset router</a> <i>string</i> <a href="#">segment-routing sr-policies sr-policies-ingress-statistics</a>
Tree	<a href="#">sr-policies-ingress-statistics</a>
Description	This command resets traffic statistics collected on ingress of segment-routing policies, identified by their color and endpoint address, if any.
Introduced	23.10.R1
Platforms	All

### [color] reference

Synopsis	Color for the SR policy
Context	<a href="#">reset router</a> <i>string</i> <a href="#">segment-routing sr-policies sr-policies-ingress-statistics</a> <a href="#">[color]</a> <i>reference</i>
Tree	<a href="#">[color]</a>
Reference	<b>state router</b> <i>string</i> <b>segment-routing sr-policies sr-policy-ingress-statistics</b> <i>number</i> <b>endpoint</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Notes	This element is mandatory.
Introduced	23.10.R1
Platforms	All

### endpoint reference

Synopsis	Endpoint of the SR policy
Context	<a href="#">reset router</a> <i>string</i> <a href="#">segment-routing sr-policies sr-policies-ingress-statistics</a> <a href="#">endpoint</a> <i>reference</i>
Tree	<a href="#">endpoint</a>
Reference	<b>state router</b> <i>string</i> <b>segment-routing sr-policies sr-policy-ingress-statistics</b> <i>number</i> <b>endpoint</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )

Notes	This element is mandatory.
Introduced	23.10.R1
Platforms	All

## **vrrp**

Synopsis	Enter the <b>vrrp</b> context
Context	<a href="#">reset router string vrrp</a>
Tree	<a href="#">vrrp</a>
Introduced	23.10.R1
Platforms	All

## **instances**

Synopsis	Enter the <b>instances</b> context
Context	<a href="#">reset router string vrrp instances</a>
Tree	<a href="#">instances</a>
Description	Commands in this context reset VRRP protocol instances.
Introduced	23.10.R1
Platforms	All

## **interface** [\[interface-name\]](#) *string*

Synopsis	Enter the <b>interface</b> list instance
Context	<a href="#">reset router string vrrp instances interface string</a>
Tree	<a href="#">interface</a>
Description	Commands in this context reset VRRP protocol instances on an IP interface.
Introduced	23.10.R1
Platforms	All

## **[interface-name]** *string*

Synopsis	Interface name
Context	<a href="#">reset router string vrrp instances interface string</a>
Tree	<a href="#">interface</a>

String Length	1 to 32
Notes	This element is part of a list key.
Introduced	23.10.R1
Platforms	All

### **all-vrid**

Synopsis	Reset all VRRP instances on the interface
Context	<a href="#">reset router</a> <i>string</i> <a href="#">vrrp instances</a> <a href="#">interface</a> <i>string</i> <b>all-vrid</b>
Tree	<a href="#">all-vrid</a>
Introduced	23.10.R1
Platforms	All

### **ipv4**

Synopsis	Enter the <b>ipv4</b> context
Context	<a href="#">reset router</a> <i>string</i> <a href="#">vrrp instances</a> <a href="#">interface</a> <i>string</i> <b>ipv4</b>
Tree	<a href="#">ipv4</a>
Introduced	23.10.R1
Platforms	All

### **vrid**

Synopsis	Reset the IPv4 VRRP instance
Context	<a href="#">reset router</a> <i>string</i> <a href="#">vrrp instances</a> <a href="#">interface</a> <i>string</i> <b>ipv4 vrid</b>
Tree	<a href="#">vrid</a>
Introduced	23.10.R1
Platforms	All

### **virtual-router-id** *number*

Synopsis	VRRP instance to reset
Context	<a href="#">reset router</a> <i>string</i> <a href="#">vrrp instances</a> <a href="#">interface</a> <i>string</i> <b>ipv4 vrid</b> <b>virtual-router-id</b> <i>number</i>
Tree	<a href="#">virtual-router-id</a>
Max. Range	-2147483648 to 2147483647

Introduced	23.10.R1
Platforms	All

## ipv6

Synopsis	Enter the <b>ipv6</b> context
Context	<a href="#">reset router string vrrp instances interface string ipv6</a>
Tree	<a href="#">ipv6</a>
Introduced	23.10.R1
Platforms	All

## vrid

Synopsis	Reset the IPv6 VRRP instance
Context	<a href="#">reset router string vrrp instances interface string ipv6 vrid</a>
Tree	<a href="#">vrid</a>
Introduced	23.10.R1
Platforms	All

## virtual-router-id *number*

Synopsis	VRRP instance to reset
Context	<a href="#">reset router string vrrp instances interface string ipv6 vrid virtual-router-id number</a>
Tree	<a href="#">virtual-router-id</a>
Max. Range	-2147483648 to 2147483647
Introduced	23.10.R1
Platforms	All

## statistics

Synopsis	Enter the <b>statistics</b> context
Context	<a href="#">reset router string vrrp statistics</a>
Tree	<a href="#">statistics</a>
Description	Commands in this context reset statistics for VRRP instances on an IP interface or VRRP priority control policies.

Introduced 23.10.R1  
 Platforms All

### **all-statistics**

Synopsis Reset statistics of VRRP instances on all interfaces  
 Context [reset router string vrrp statistics all-statistics](#)  
 Tree [all-statistics](#)  
 Introduced 23.10.R1  
 Platforms All

### **interface** [\[interface-name\]](#) *string*

Synopsis Enter the **interface** list instance  
 Context [reset router string vrrp statistics interface string](#)  
 Tree [interface](#)  
 Introduced 23.10.R1  
 Platforms All

### **[interface-name]** *string*

Synopsis Interface name  
 Context [reset router string vrrp statistics interface string](#)  
 Tree [interface](#)  
 String Length 1 to 32  
 Notes This element is part of a list key.  
 Introduced 23.10.R1  
 Platforms All

### **all-vrid**

Synopsis Reset statistics of all VRRP instances on the interface  
 Context [reset router string vrrp statistics interface string all-vrid](#)  
 Tree [all-vrid](#)  
 Introduced 23.10.R1

Platforms All

## ipv4

Synopsis Enter the **ipv4** context  
Context [reset router string vrrp statistics interface string ipv4](#)  
Tree [ipv4](#)  
Introduced 23.10.R1  
Platforms All

## vrid

Synopsis Reset statistics of the IPv4 VRRP instance  
Context [reset router string vrrp statistics interface string ipv4 vrid](#)  
Tree [vrid](#)  
Introduced 23.10.R1  
Platforms All

## virtual-router-id *number*

Synopsis VRRP instance to reset  
Context [reset router string vrrp statistics interface string ipv4 vrid virtual-router-id number](#)  
Tree [virtual-router-id](#)  
Max. Range -2147483648 to 2147483647  
Introduced 23.10.R1  
Platforms All

## ipv6

Synopsis Enter the **ipv6** context  
Context [reset router string vrrp statistics interface string ipv6](#)  
Tree [ipv6](#)  
Introduced 23.10.R1  
Platforms All

**vrid**

Synopsis	Reset statistics of the IPv6 VRRP instance
Context	<a href="#">reset router</a> <i>string</i> <a href="#">vrrp statistics</a> <a href="#">interface</a> <i>string</i> <a href="#">ipv6 vrid</a>
Tree	<a href="#">vrid</a>
Introduced	23.10.R1
Platforms	All

**virtual-router-id** *number*

Synopsis	VRRP instance to reset
Context	<a href="#">reset router</a> <i>string</i> <a href="#">vrrp statistics</a> <a href="#">interface</a> <i>string</i> <a href="#">ipv6 vrid</a> <a href="#">virtual-router-id</a> <i>number</i>
Tree	<a href="#">virtual-router-id</a>
Max. Range	-2147483648 to 2147483647
Introduced	23.10.R1
Platforms	All

**saa**

Synopsis	Enter the <b>saa</b> context
Context	<a href="#">reset saa</a>
Tree	<a href="#">saa</a>
Introduced	23.3.R1
Platforms	All

**owner** [[owner-name](#)] *reference* [test](#) *reference*

Synopsis	Enter the <b>owner</b> list instance
Context	<a href="#">reset saa owner</a> <i>reference</i> <a href="#">test</a> <i>reference</i>
Tree	<a href="#">owner</a>
Introduced	23.3.R1
Platforms	All

**[owner-name]** *reference*

Synopsis	Name of SAA test owner for which to reset statistics
----------	--

Context	<a href="#">reset saa owner reference test reference</a>
Tree	<a href="#">owner</a>
MD-CLI Default	TIMOS CLI
Reference	<b>state saa owner string test string</b>
Notes	This element is part of a list key.
Introduced	23.3.R1
Platforms	All

### **test reference**

Synopsis	Name of the SAA test for which to reset statistics
Context	<a href="#">reset saa owner reference test reference</a>
Tree	<a href="#">owner</a>
Reference	<b>state saa owner string test string</b>
Notes	This element is part of a list key.
Introduced	23.3.R1
Platforms	All

### **statistics**

Synopsis	Clear the SAA test statistics
Context	<a href="#">reset saa owner reference test reference statistics</a>
Tree	<a href="#">statistics</a>
Description	This command clears historical statistics for a completed run. If this option is not configured, the reset operation has no impact.
Introduced	23.3.R1
Platforms	All

### **subscriber-management**

Synopsis	Enter the <b>subscriber-management</b> context
Context	<a href="#">reset subscriber-management</a>
Tree	<a href="#">subscriber-management</a>
Introduced	23.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## **ancp**

Synopsis Enter the **ancp** context

Context [reset subscriber-management ancp](#)

Tree [ancp](#)

Introduced 23.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## **sub-string**

Synopsis Delete the ANCP association for matching ANCP strings

Context [reset subscriber-management ancp sub-string](#)

Tree [sub-string](#)

Introduced 23.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## **[value] string**

Synopsis Substring to match

Context [reset subscriber-management ancp sub-string \[value\] string](#)

Tree [\[value\]](#)

String Length 1 to 63

Notes This element is mandatory.

Introduced 23.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## **errors**

Synopsis Delete subscriber management errors

Context [reset subscriber-management errors](#)

Tree [errors](#)

Introduced 23.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## host-lockout

Synopsis	Enter the <b>host-lockout</b> context
Context	<a href="#">reset subscriber-management host-lockout</a>
Tree	<a href="#">host-lockout</a>
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## policy

Synopsis	Delete matching host lockout contexts from the policy
Context	<a href="#">reset subscriber-management host-lockout policy</a>
Tree	<a href="#">policy</a>
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## [name] *string*

Synopsis	Host lockout policy name
Context	<a href="#">reset subscriber-management host-lockout policy [name] <i>string</i></a>
Tree	<a href="#">[name]</a>
String Length	1 to 32
Notes	This element is mandatory.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## state *keyword*

Synopsis	Lockout state to match
Context	<a href="#">reset subscriber-management host-lockout policy state <i>keyword</i></a>
Tree	<a href="#">state</a>
Options	all, active, graceful
Notes	This element is mandatory.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**sap**

Synopsis	Delete matching host lockout contexts from the SAP
Context	<a href="#">reset subscriber-management host-lockout sap</a>
Tree	<a href="#">sap</a>
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**circuit-id string**

Synopsis	Circuit ID to match
Context	<a href="#">reset subscriber-management host-lockout sap circuit-id string</a>
Tree	<a href="#">circuit-id</a>
String Length	1 to 253
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**mac string**

Synopsis	MAC address to match
Context	<a href="#">reset subscriber-management host-lockout sap mac string</a>
Tree	<a href="#">mac</a>
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**remote-id string**

Synopsis	Remote ID to match
Context	<a href="#">reset subscriber-management host-lockout sap remote-id string</a>
Tree	<a href="#">remote-id</a>
String Length	1 to 253
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**[sap] string**

Synopsis	SAP ID
Context	<a href="#">reset subscriber-management host-lockout sap [sap] string</a>
Tree	<a href="#">[sap]</a>
String Length	1 to 45
Notes	This element is mandatory.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**state keyword**

Synopsis	Lockout state to match
Context	<a href="#">reset subscriber-management host-lockout sap state keyword</a>
Tree	<a href="#">state</a>
Options	all, active, graceful
Notes	This element is mandatory.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**state**

Synopsis	Delete all host lockout contexts in the state
Context	<a href="#">reset subscriber-management host-lockout state</a>
Tree	<a href="#">state</a>
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**[state] keyword**

Synopsis	Lockout state
Context	<a href="#">reset subscriber-management host-lockout state [state] keyword</a>
Tree	<a href="#">[state]</a>
Options	all, active, graceful
Notes	This element is mandatory.

Introduced 23.10.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## idle-only-msap

Synopsis Enter the **idle-only-msap** context  
 Context [reset subscriber-management idle-only-msap](#)  
 Tree [idle-only-msap](#)  
 Description Commands in this context remove idle MSAPs without active subscribers.  
 Introduced 23.10.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## all

Synopsis Delete all sticky MSAPs in the idle state  
 Context [reset subscriber-management idle-only-msap all](#)  
 Tree [all](#)  
 Introduced 23.10.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## msap-policy

Synopsis Delete idle state sticky MSAPs created by the policy  
 Context [reset subscriber-management idle-only-msap msap-policy](#)  
 Tree [msap-policy](#)  
 Introduced 23.10.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## name *reference*

Synopsis MSAP policy name  
 Context [reset subscriber-management idle-only-msap msap-policy name \*reference\*](#)  
 Tree [name](#)  
 Reference **state subscriber-mgmt msap-policy *string***  
 Notes This element is mandatory.

Introduced 23.10.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## msap-policy

Synopsis Delete MSAPs created by the policy  
 Context [reset subscriber-management msap-policy](#)  
 Tree [msap-policy](#)  
 Introduced 23.10.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## name *reference*

Synopsis MSAP policy name  
 Context [reset subscriber-management msap-policy name \*reference\*](#)  
 Tree [name](#)  
 Reference **state subscriber-mgmt msap-policy** *string*  
 Notes This element is mandatory.  
 Introduced 23.10.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## sap-template [[name](#)] *string*

Synopsis Enter the **sap-template** list instance  
 Context [reset subscriber-management sap-template \*string\*](#)  
 Tree [sap-template](#)  
 Introduced 23.10.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## [[name](#)] *string*

Synopsis SAP template name  
 Context [reset subscriber-management sap-template \*string\*](#)  
 Tree [sap-template](#)  
 String Length 1 to 32

---

Notes	This element is part of a list key.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## idle-saps

Synopsis	Delete SAPs that use this template and have no sessions
Context	<a href="#">reset subscriber-management sap-template</a> <i>string</i> <b>idle-saps</b>
Tree	<a href="#">idle-saps</a>
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## sessions

Synopsis	Enter the <b>sessions</b> context
Context	<a href="#">reset subscriber-management sessions</a>
Tree	<a href="#">sessions</a>
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## diameter

Synopsis	Enter the <b>diameter</b> context
Context	<a href="#">reset subscriber-management sessions diameter</a>
Tree	<a href="#">diameter</a>
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## ccrt-replay

Synopsis	Enter the <b>ccrt-replay</b> context
Context	<a href="#">reset subscriber-management sessions diameter ccrt-replay</a>
Tree	<a href="#">ccrt-replay</a>
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## application-policy

Synopsis	Delete sessions in CCR-T replay mode
Context	<a href="#">reset subscriber-management sessions diameter ccrt-replay application-policy</a>
Tree	<a href="#">application-policy</a>
Description	This command deletes sessions in CCR-T replay mode and that are associated with the application policy.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## [name] string

Synopsis	Diameter application policy name
Context	<a href="#">reset subscriber-management sessions diameter ccrt-replay application-policy [name] string</a>
Tree	<a href="#">[name]</a>
String Length	1 to 32
Notes	This element is mandatory.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## gtp

Synopsis	Enter the <b>gtp</b> context
Context	<a href="#">reset subscriber-management sessions gtp</a>
Tree	<a href="#">gtp</a>
Description	Commands in this context delete the GPRS Tunnelling Protocol (GTP) sessions matching the specified criteria. Associated objects, such as the ESM subscriber in a GTP uplink scenario, are also removed.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## all

Synopsis	Delete all GTP sessions
Context	<a href="#">reset subscriber-management sessions gtp all</a>

Tree	<a href="#">all</a>
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**apn** [[apn](#)] *string*

Synopsis	Enter the <b>apn</b> list instance
Context	<a href="#">reset subscriber-management sessions gtp apn string</a>
Tree	<a href="#">apn</a>
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**[apn]** *string*

Synopsis	Access point name
Context	<a href="#">reset subscriber-management sessions gtp apn string</a>
Tree	<a href="#">apn</a>
String Length	1 to 100
Notes	This element is part of a list key.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**all**

Synopsis	Delete all GTP sessions associated with the APN
Context	<a href="#">reset subscriber-management sessions gtp apn string all</a>
Tree	<a href="#">all</a>
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**imsi**

Synopsis	Delete the GTP session with the specified IMSI
Context	<a href="#">reset subscriber-management sessions gtp apn string imsi</a>
Tree	<a href="#">imsi</a>

Description	This command deletes the GTP session with the specified IMSI and associated with the APN.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**[imsi] string**

Synopsis	International Mobile Subscriber Identity
Context	<a href="#">reset subscriber-management sessions gtp apn string imsi [imsi] string</a>
Tree	<a href="#">[imsi]</a>
String Length	0 to 15
Notes	This element is mandatory.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**imsi**

Synopsis	Delete the GTP session with the specified IMSI
Context	<a href="#">reset subscriber-management sessions gtp imsi</a>
Tree	<a href="#">imsi</a>
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**[imsi] string**

Synopsis	International Mobile Subscriber Identity
Context	<a href="#">reset subscriber-management sessions gtp imsi [imsi] string</a>
Tree	<a href="#">[imsi]</a>
String Length	0 to 15
Notes	This element is mandatory.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## host-tracking

Synopsis	Enter the <b>host-tracking</b> context
Context	<a href="#">reset subscriber-management sessions host-tracking</a>
Tree	<a href="#">host-tracking</a>
Description	Commands in this context delete host-tracking table entries.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## subscriber

Synopsis	Enter the <b>subscriber</b> context
Context	<a href="#">reset subscriber-management sessions host-tracking subscriber</a>
Tree	<a href="#">subscriber</a>
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## all

Synopsis	Delete host tracking table entry for all subscribers
Context	<a href="#">reset subscriber-management sessions host-tracking subscriber all</a>
Tree	<a href="#">all</a>
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## id

Synopsis	Delete host tracking table entry for the subscriber
Context	<a href="#">reset subscriber-management sessions host-tracking subscriber id</a>
Tree	<a href="#">id</a>
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## [name] reference

Synopsis	Subscriber ID
----------	---------------

Context	<a href="#">reset subscriber-management sessions host-tracking subscriber id [name] reference</a>
Tree	<a href="#">[name]</a>
Reference	<b>state subscriber-mgmt subscriber string</b>
Notes	This element is mandatory.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## pfcp

Synopsis	Enter the <b>pfcp</b> context
Context	<a href="#">reset subscriber-management sessions pfcp</a>
Tree	<a href="#">pfcp</a>
Description	Commands in this context delete Packet Forwarding Control Protocol (PFCP) sessions matching the specified criteria.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## nat-member

Synopsis	Delete PFCP session matching the NAT group member ID
Context	<a href="#">reset subscriber-management sessions pfcp nat-member</a>
Tree	<a href="#">nat-member</a>
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## [id] reference

Synopsis	NAT group member ID
Context	<a href="#">reset subscriber-management sessions pfcp nat-member [id] reference</a>
Tree	<a href="#">[id]</a>
Reference	<b>state isa nat-group number member number</b>
Notes	This element is mandatory.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## sap

Synopsis	Delete the PFCP session matching the SAP and MAC
Context	<a href="#">reset subscriber-management sessions pfcap sap</a>
Tree	<a href="#">sap</a>
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## mac string

Synopsis	MAC address
Context	<a href="#">reset subscriber-management sessions pfcap sap mac string</a>
Tree	<a href="#">mac</a>
Notes	This element is mandatory.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## [sap] string

Synopsis	SAP ID
Context	<a href="#">reset subscriber-management sessions pfcap sap [sap] string</a>
Tree	<a href="#">[sap]</a>
String Length	1 to 45
Notes	This element is mandatory.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## session-id

Synopsis	Delete the PFCP session with the local SEID
Context	<a href="#">reset subscriber-management sessions pfcap session-id</a>
Tree	<a href="#">session-id</a>
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**[local-session-id] reference**

Synopsis	Local assigned PFCP session ID
Context	<a href="#">reset subscriber-management sessions pfcp session-id [local-session-id] reference</a>
Tree	<a href="#">[local-session-id]</a>
Reference	<b>state subscriber-mgmt pfcp association string session string</b>
Notes	This element is mandatory.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**statistics**

Synopsis	Enter the <b>statistics</b> context
Context	<a href="#">reset subscriber-management statistics</a>
Tree	<a href="#">statistics</a>
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**accumulated**

Synopsis	Enter the <b>accumulated</b> context
Context	<a href="#">reset subscriber-management statistics accumulated</a>
Tree	<a href="#">accumulated</a>
Description	Commands in this context reset accumulated statistics for a subscriber.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**active-subscribers**

Synopsis	Enter the <b>active-subscribers</b> context
Context	<a href="#">reset subscriber-management statistics accumulated active-subscribers</a>
Tree	<a href="#">active-subscribers</a>
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**no-accu-stats-policy**

Synopsis	Reset accumulated statistics for active subscribers
Context	<a href="#">reset subscriber-management statistics accumulated active-subscribers no-accu-stats-policy</a>
Tree	<a href="#">no-accu-stats-policy</a>
Description	This command resets the accumulated statistics that are no longer associated with an accumulated statistics policy. These statistics apply to active subscribers that are referencing a subscriber profile where the accumulated statistics policy is removed.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**sub-profile**

Synopsis	Reset active subscribers statistics without a policy
Context	<a href="#">reset subscriber-management statistics accumulated active-subscribers sub-profile</a>
Tree	<a href="#">sub-profile</a>
Description	This command resets the accumulated statistics that are no longer associated with an accumulated statistics policy. These statistics apply to active subscribers that are referencing the specified subscriber profile where the accumulated statistics policy is removed.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**[name] reference**

Synopsis	Subscriber profile name
Context	<a href="#">reset subscriber-management statistics accumulated active-subscribers sub-profile [name] reference</a>
Tree	<a href="#">[name]</a>
Reference	<b>state subscriber-mgmt sub-profile <i>string</i></b>
Notes	This element is mandatory.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## inactive-subscribers

Synopsis	Reset accumulated statistics for all inactive subscribers
Context	<a href="#">reset subscriber-management statistics accumulated inactive-subscribers</a>
Tree	<a href="#">inactive-subscribers</a>
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## subscriber

Synopsis	Reset accumulated statistics for specified subscriber
Context	<a href="#">reset subscriber-management statistics accumulated subscriber</a>
Tree	<a href="#">subscriber</a>
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## [name] *reference*

Synopsis	Subscriber ID
Context	<a href="#">reset subscriber-management statistics accumulated subscriber [name] <i>reference</i></a>
Tree	<a href="#">[name]</a>
Reference	<b>state subscriber-mgmt subscriber <i>string</i></b>
Notes	This element is mandatory.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## data-trigger

Synopsis	Enter the <b>data-trigger</b> context
Context	<a href="#">reset subscriber-management statistics data-trigger</a>
Tree	<a href="#">data-trigger</a>
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## system

Synopsis	Reset data-trigger statistics
Context	<a href="#">reset subscriber-management statistics data-trigger system</a>
Tree	<a href="#">system</a>
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## diameter

Synopsis	Enter the <b>diameter</b> context
Context	<a href="#">reset subscriber-management statistics diameter</a>
Tree	<a href="#">diameter</a>
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## application-policy

Synopsis	Reset Diameter application policy statistics
Context	<a href="#">reset subscriber-management statistics diameter application-policy</a>
Tree	<a href="#">application-policy</a>
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## [name] *string*

Synopsis	Diameter application policy name
Context	<a href="#">reset subscriber-management statistics diameter application-policy [name] string</a>
Tree	<a href="#">[name]</a>
String Length	1 to 32
Notes	This element is mandatory.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## ccrt-replay

Synopsis	Enter the <b>ccrt-replay</b> context
Context	<a href="#">reset subscriber-management statistics diameter ccrt-replay</a>
Tree	<a href="#">ccrt-replay</a>
Description	Commands in this context reset CCR-T replay statistics.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## application-policy

Synopsis	Reset CCR-T replay stats for the application policy
Context	<a href="#">reset subscriber-management statistics diameter ccrt-replay application-policy</a>
Tree	<a href="#">application-policy</a>
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## [name] *string*

Synopsis	Diameter application policy name
Context	<a href="#">reset subscriber-management statistics diameter ccrt-replay application-policy [name] string</a>
Tree	<a href="#">[name]</a>
String Length	1 to 32
Notes	This element is mandatory.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## gtp

Synopsis	Enter the <b>gtp</b> context
Context	<a href="#">reset subscriber-management statistics gtp</a>
Tree	<a href="#">gtp</a>
Description	Commands in this context reset GTP statistics.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## all

Synopsis	Reset GTP messaging statistics
Context	<a href="#">reset subscriber-management statistics gtp all</a>
Tree	<a href="#">all</a>
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## host-and-session

Synopsis	Enter the <b>host-and-session</b> context
Context	<a href="#">reset subscriber-management statistics host-and-session</a>
Tree	<a href="#">host-and-session</a>
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## peakvalues

Synopsis	Enter the <b>peakvalues</b> context
Context	<a href="#">reset subscriber-management statistics host-and-session peakvalues</a>
Tree	<a href="#">peakvalues</a>
Description	Commands in this context reset the peak values of subscriber management host and session statistics  <b>Note:</b> Peak values statistics can be reset at each level independently. For example, clearing the most recent peak value for an IOM does not impact the MDA peak value.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## card

Synopsis	Enter the <b>card</b> context
Context	<a href="#">reset subscriber-management statistics host-and-session peakvalues card</a>
Tree	<a href="#">card</a>
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**all**

Synopsis	Reset the peak value statistics for all cards
Context	<a href="#">reset subscriber-management statistics host-and-session peakvalues card all</a>
Tree	<a href="#">all</a>
Description	This command resets the subscriber management statistics peak values for all cards.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**recursive**

Synopsis	Reset the statistics recursively
Context	<a href="#">reset subscriber-management statistics host-and-session peakvalues card all recursive</a>
Tree	<a href="#">recursive</a>
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**slot**

Synopsis	Reset peak values statistics for the specified card
Context	<a href="#">reset subscriber-management statistics host-and-session peakvalues card slot</a>
Tree	<a href="#">slot</a>
Description	This command resets the subscriber management statistics peak values for the specified card.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**recursive**

Synopsis	Reset the statistics recursively
Context	<a href="#">reset subscriber-management statistics host-and-session peakvalues card slot recursive</a>
Tree	<a href="#">recursive</a>
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**[slot-number] reference**

Synopsis	Slot number
Context	<a href="#">reset subscriber-management statistics host-and-session peakvalues card slot [slot-number] reference</a>
Tree	<a href="#">[slot-number]</a>
Reference	<b>state card number</b>
Notes	This element is mandatory.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**mda**

Synopsis	Enter the <b>mda</b> context
Context	<a href="#">reset subscriber-management statistics host-and-session peakvalues mda</a>
Tree	<a href="#">mda</a>
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**all**

Synopsis	Reset peak value statistics for all MDAs
Context	<a href="#">reset subscriber-management statistics host-and-session peakvalues mda all</a>
Tree	<a href="#">all</a>
Description	This command resets the subscriber management statistics peak values for all MDA.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**recursive**

Synopsis	Reset the statistics recursively
Context	<a href="#">reset subscriber-management statistics host-and-session peakvalues mda all recursive</a>
Tree	<a href="#">recursive</a>
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**card-slot** [[slot-number](#)] *reference*

Synopsis	Enter the <b>card-slot</b> list instance
Context	<a href="#">reset subscriber-management statistics host-and-session peakvalues mda card-slot reference</a>
Tree	<a href="#">card-slot</a>
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**[slot-number]** *reference*

Synopsis	Slot number
Context	<a href="#">reset subscriber-management statistics host-and-session peakvalues mda card-slot reference</a>
Tree	<a href="#">card-slot</a>
Reference	<b>state card number</b>
Notes	This element is part of a list key.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**mda-slot**

Synopsis	Reset peak value statistics for the specified MDA
Context	<a href="#">reset subscriber-management statistics host-and-session peakvalues mda card-slot reference mda-slot</a>
Tree	<a href="#">mda-slot</a>
Description	This command resets the subscriber management statistics peak values for the specified MDA.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**[mda]** *reference*

Synopsis	MDA slot number
Context	<a href="#">reset subscriber-management statistics host-and-session peakvalues mda card-slot reference mda-slot [mda] reference</a>

Tree	<a href="#">[mda]</a>
Reference	<b>state card</b> <i>number mda number</i>
Notes	This element is mandatory.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### recursive

Synopsis	Reset the statistics recursively
Context	<a href="#">reset subscriber-management statistics host-and-session peakvalues mda card-slot reference mda-slot recursive</a>
Tree	<a href="#">recursive</a>
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### xiom-slot

Synopsis	Reset peak value statistics for the specified XIOM MDA
Context	<a href="#">reset subscriber-management statistics host-and-session peakvalues mda card-slot reference xiom-slot</a>
Tree	<a href="#">xiom-slot</a>
Description	This command resets the subscriber management statistics peak values for the specified XIOM MDA.
Introduced	23.10.R1
Platforms	7750 SR-1s, 7750 SR-2s, 7750 SR-2se, 7750 SR-7s, 7750 SR-14s

### mda-slot reference

Synopsis	MDA slot number
Context	<a href="#">reset subscriber-management statistics host-and-session peakvalues mda card-slot reference xiom-slot mda-slot reference</a>
Tree	<a href="#">mda-slot</a>
Reference	<b>state card</b> <i>number xiom string mda number</i>
Notes	This element is mandatory.
Introduced	23.10.R1
Platforms	7750 SR-1s, 7750 SR-2s, 7750 SR-2se, 7750 SR-7s, 7750 SR-14s

**recursive**

Synopsis	Reset the statistics recursively
Context	<a href="#">reset subscriber-management statistics host-and-session peakvalues mda card-slot reference xiom-slot recursive</a>
Tree	<a href="#">recursive</a>
Introduced	23.10.R1
Platforms	7750 SR-1s, 7750 SR-2s, 7750 SR-2se, 7750 SR-7s, 7750 SR-14s

**[xiom] reference**

Synopsis	XIOM slot number
Context	<a href="#">reset subscriber-management statistics host-and-session peakvalues mda card-slot reference xiom-slot [xiom] reference</a>
Tree	<a href="#">[xiom]</a>
Reference	<b>state card number xiom string</b>
Notes	This element is mandatory.
Introduced	23.10.R1
Platforms	7750 SR-1s, 7750 SR-2s, 7750 SR-2se, 7750 SR-7s, 7750 SR-14s

**port**

Synopsis	Enter the <b>port</b> context
Context	<a href="#">reset subscriber-management statistics host-and-session peakvalues port</a>
Tree	<a href="#">port</a>
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**all**

Synopsis	Reset peak values statistics for all ports
Context	<a href="#">reset subscriber-management statistics host-and-session peakvalues port all</a>
Tree	<a href="#">all</a>
Description	This command resets the subscriber management statistics peak values for all ports.
Introduced	23.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## lag

Synopsis Reset peak value statistics for the specified LAG

Context [reset subscriber-management statistics host-and-session peakvalues port lag](#)

Tree [lag](#)

Description This command resets the subscriber management statistics peak values for the specified LAG.

Introduced 23.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## [name] reference

Synopsis LAG name

Context [reset subscriber-management statistics host-and-session peakvalues port lag \[name\] reference](#)

Tree [\[name\]](#)

Reference **state lag string**

Notes This element is mandatory.

Introduced 23.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## port-id

Synopsis Reset peak value statistics for the specified port

Context [reset subscriber-management statistics host-and-session peakvalues port port-id](#)

Tree [port-id](#)

Description This command resets the subscriber management statistics peak values for the specified port.

Introduced 23.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## [port-id] reference

Synopsis Port ID

Context	<a href="#">reset subscriber-management statistics host-and-session peakvalues port port-id [port-id]</a> <i>reference</i>
Tree	<a href="#">[port-id]</a>
Reference	<b>state port string</b>
Notes	This element is mandatory.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## pw-port

Synopsis	Enter the <b>pw-port</b> context
Context	<a href="#">reset subscriber-management statistics host-and-session peakvalues pw-port</a>
Tree	<a href="#">pw-port</a>
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## all

Synopsis	Reset peak value statistics for all PW ports
Context	<a href="#">reset subscriber-management statistics host-and-session peakvalues pw-port all</a>
Tree	<a href="#">all</a>
Description	This command resets the subscriber management statistics peak values for all PW ports.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## pw-port-id

Synopsis	Reset peak value statistics for the PW port
Context	<a href="#">reset subscriber-management statistics host-and-session peakvalues pw-port pw-port-id</a>
Tree	<a href="#">pw-port-id</a>
Description	This command resets the subscriber management statistics peak values for the specified PW port.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**[pw-port-id] reference**

Synopsis	PW port ID
Context	<a href="#">reset subscriber-management statistics host-and-session peakvalues pw-port pw-port-id [pw-port-id] reference</a>
Tree	<a href="#">[pw-port-id]</a>
Reference	<b>state pw-port number</b>
Notes	This element is mandatory.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**service**

Synopsis	Enter the <b>service</b> context
Context	<a href="#">reset subscriber-management statistics host-and-session peakvalues service</a>
Tree	<a href="#">service</a>
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**all**

Synopsis	Reset peak value statistics for all services
Context	<a href="#">reset subscriber-management statistics host-and-session peakvalues service all</a>
Tree	<a href="#">all</a>
Description	This command resets the subscriber management statistics peak values for all services.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**recursive**

Synopsis	Reset the statistics recursively
Context	<a href="#">reset subscriber-management statistics host-and-session peakvalues service all recursive</a>
Tree	<a href="#">recursive</a>
Introduced	23.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **name** [[service-name](#)] *string*

## group-interface

Synopsis	Enter the <b>group-interface</b> context
Context	<a href="#">reset subscriber-management statistics host-and-session peakvalues service name</a> <i>string</i> <a href="#">group-interface</a>
Tree	<a href="#">group-interface</a>
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## all

Synopsis	Reset peak value statistics for all group interfaces
Context	<a href="#">reset subscriber-management statistics host-and-session peakvalues service name</a> <i>string</i> <a href="#">group-interface all</a>
Tree	<a href="#">all</a>
Description	This command resets the subscriber management statistics peak values for all group interfaces.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## name

Synopsis	Reset peak value statistics for the group interface
Context	<a href="#">reset subscriber-management statistics host-and-session peakvalues service name</a> <i>string</i> <a href="#">group-interface name</a>
Tree	<a href="#">name</a>
Description	This command resets the subscriber management statistics peak values for the specified group interface.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**[name]** *string*

Synopsis	Group interface name
Context	<a href="#">reset subscriber-management statistics host-and-session peakvalues service name</a> <i>string</i> <a href="#">group-interface name</a> <b>[name]</b> <i>string</i>
Tree	<a href="#">[name]</a>
String Length	1 to 32
Notes	This element is mandatory.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**subscriber-interface**

Synopsis	Enter the <b>subscriber-interface</b> context
Context	<a href="#">reset subscriber-management statistics host-and-session peakvalues service name</a> <i>string</i> <a href="#">subscriber-interface</a>
Tree	<a href="#">subscriber-interface</a>
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**all**

Synopsis	Reset peak value stats for all subscriber interfaces
Context	<a href="#">reset subscriber-management statistics host-and-session peakvalues service name</a> <i>string</i> <a href="#">subscriber-interface all</a>
Tree	<a href="#">all</a>
Description	This command resets the subscriber management statistics peak values for all subscriber interfaces.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**recursive**

Synopsis	Reset the statistics recursively
Context	<a href="#">reset subscriber-management statistics host-and-session peakvalues service name</a> <i>string</i> <a href="#">subscriber-interface all recursive</a>

Tree	<a href="#">recursive</a>
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**name**

Synopsis	Reset peak values stats for the subscriber interface
Context	<a href="#">reset subscriber-management statistics host-and-session peakvalues service name string subscriber-interface name</a>
Tree	<a href="#">name</a>
Description	This command resets the subscriber management statistics peak values for the specified subscriber interface.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**[name] string**

Synopsis	Subscriber interface name
Context	<a href="#">reset subscriber-management statistics host-and-session peakvalues service name string subscriber-interface name [name] string</a>
Tree	<a href="#">[name]</a>
String Length	1 to 32
Notes	This element is mandatory.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**recursive**

Synopsis	Reset the statistics recursively
Context	<a href="#">reset subscriber-management statistics host-and-session peakvalues service name string subscriber-interface name recursive</a>
Tree	<a href="#">recursive</a>
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## system

Synopsis	Reset peak value statistics for the system
Context	<a href="#">reset subscriber-management statistics host-and-session peakvalues system</a>
Tree	<a href="#">system</a>
Description	This command resets the subscriber management statistics peak values for the system.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## recursive

Synopsis	Reset the statistics recursively
Context	<a href="#">reset subscriber-management statistics host-and-session peakvalues system recursive</a>
Tree	<a href="#">recursive</a>
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## host-tracking

Synopsis	Enter the <b>host-tracking</b> context
Context	<a href="#">reset subscriber-management statistics host-tracking</a>
Tree	<a href="#">host-tracking</a>
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## subscriber

Synopsis	Enter the <b>subscriber</b> context
Context	<a href="#">reset subscriber-management statistics host-tracking subscriber</a>
Tree	<a href="#">subscriber</a>
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## all

Synopsis	Reset the host-tracking statistics for all subscribers
----------	--

Context [reset subscriber-management statistics host-tracking subscriber all](#)

## ptp

Synopsis Enter the **ptp** context  
 Context [reset system ptp](#)  
 Tree [ptp](#)  
 Introduced 23.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## clock-recovery

Synopsis Reset PTP clock recovery algorithm

Context [reset system ptp clock-recovery](#)

Tree [clock-recovery](#)

Description This command resets the algorithms involved in PTP frequency and time recovery to initial conditions. This clears out any previous history and can be used to ensure a consistent starting state for a test or can be used to clear any unexpected behavior in the algorithm.

Introduced 23.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## satellite

Synopsis Enter the **satellite** context

Context [reset system satellite](#)

Tree [satellite](#)

Description Commands in this context reset satellite information.

Introduced 23.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## ethernet-satellite [[satellite-id](#)] *reference*

Synopsis Enter the **ethernet-satellite** list instance

Context [reset system satellite ethernet-satellite reference](#)

Tree [ethernet-satellite](#)

Description Commands in this context reset Ethernet satellite information.

Introduced 23.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## [[satellite-id](#)] *reference*

Synopsis Satellite ID

Context [reset system satellite ethernet-satellite reference](#)

Tree	<a href="#">ethernet-satellite</a>
Reference	<b>state satellite ethernet-satellite</b> <i>number</i>
Notes	This element is part of a list key.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## synchronous-interface-timing

Synopsis	Reset a failed reference on the Ethernet satellite
Context	<a href="#">reset system satellite ethernet-satellite</a> <i>reference</i> <a href="#">synchronous-interface-timing</a>
Tree	<a href="#">synchronous-interface-timing</a>
Description	This command resets (re-enables) a previously failed reference on the Ethernet satellite.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## [reference] *keyword*

Synopsis	Synchronous timing reference
Context	<a href="#">reset system satellite ethernet-satellite</a> <i>reference</i> <a href="#">synchronous-interface-timing</a> <a href="#">[reference]</a> <i>keyword</i>
Tree	<a href="#">[reference]</a>
Options	ref1, ref2
Notes	This element is mandatory.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## script-control

Synopsis	Enter the <b>script-control</b> context
Context	<a href="#">reset system script-control</a>
Tree	<a href="#">script-control</a>
Introduced	23.7.R1
Platforms	All

## script-policy

Synopsis	Enter the <b>script-policy</b> context
Context	<a href="#">reset system script-control script-policy</a>
Tree	<a href="#">script-policy</a>
Introduced	23.7.R1
Platforms	All

## completed

Synopsis	Enter the <b>completed</b> context
Context	<a href="#">reset system script-control script-policy completed</a>
Tree	<a href="#">completed</a>
Description	Commands in this context delete completed script run history entries.
Introduced	23.7.R1
Platforms	All

## all

Synopsis	Delete script run entries for all script policies
Context	<a href="#">reset system script-control script-policy completed all</a>
Tree	<a href="#">all</a>
Introduced	23.7.R1
Platforms	All

## policy

Synopsis	Delete script run entries for specific policies
Context	<a href="#">reset system script-control script-policy completed policy</a>
Tree	<a href="#">policy</a>
Introduced	23.7.R1
Platforms	All

## owner reference

Synopsis	Script-policy owner for run history deletion
----------	--

Context	<a href="#">reset system script-control script-policy completed policy owner</a> <i>reference</i>
Tree	<a href="#">owner</a>
Description	This command specifies the script policy owner for run history deletion. The system only deletes run history entries for script policies with this owner and the specified policy name.
Default	TIMOS CLI
Reference	<b>state system script-control script-policy</b> <i>string owner string</i>
Introduced	23.7.R1
Platforms	All

### **[policy-name]** *reference*

Synopsis	Script-policy name for run history deletion
Context	<a href="#">reset system script-control script-policy completed policy [policy-name]</a> <i>reference</i>
Tree	<a href="#">[policy-name]</a>
Reference	<b>state system script-control script-policy</b> <i>string owner string</i>
Notes	This element is mandatory.
Introduced	23.7.R1
Platforms	All

### **security**

Synopsis	Enter the <b>security</b> context
Context	<a href="#">reset system security</a>
Tree	<a href="#">security</a>
Introduced	23.3.R1
Platforms	All

### **cpm-filter**

Synopsis	Enter the <b>cpm-filter</b> context
Context	<a href="#">reset system security cpm-filter</a>
Tree	<a href="#">cpm-filter</a>
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## cpm-queue

Synopsis	Reset CPM queue information
Context	<a href="#">reset system security cpm-filter cpm-queue</a>
Tree	<a href="#">cpm-queue</a>
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## queue-id *reference*

Synopsis	Queue ID for the CPM queue
Context	<a href="#">reset system security cpm-filter cpm-queue queue-id reference</a>
Tree	<a href="#">queue-id</a>
Reference	<b>state system security cpm-queue queue number</b>
Notes	This element is mandatory.
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## ip-filter

Synopsis	Reset IP filter information
Context	<a href="#">reset system security cpm-filter ip-filter</a>
Tree	<a href="#">ip-filter</a>
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## entry *reference*

Synopsis	Entry ID for IP filter
Context	<a href="#">reset system security cpm-filter ip-filter entry reference</a>
Tree	<a href="#">entry</a>
Reference	<b>state system security cpm-filter ip-filter entry number</b>
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## ipv6-filter

Synopsis	Reset IPv6 filter information
Context	<a href="#">reset system security cpm-filter ipv6-filter</a>
Tree	<a href="#">ipv6-filter</a>
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## entry reference

Synopsis	Entry ID for IPv6 filter
Context	<a href="#">reset system security cpm-filter ipv6-filter entry reference</a>
Tree	<a href="#">entry</a>
Reference	<b>state system security cpm-filter ipv6-filter entry number</b>
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## mac-filter

Synopsis	Reset MAC filter information
Context	<a href="#">reset system security cpm-filter mac-filter</a>
Tree	<a href="#">mac-filter</a>
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## entry reference

Synopsis	Entry ID for the MAC filter
Context	<a href="#">reset system security cpm-filter mac-filter entry reference</a>
Tree	<a href="#">entry</a>
Reference	<b>state system security cpm-filter mac-filter entry number</b>
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## management-access-filter

Synopsis	Enter the <b>management-access-filter</b> context
Context	<a href="#">reset system security management-access-filter</a>
Tree	<a href="#">management-access-filter</a>
Introduced	23.3.R1
Platforms	All

## ip-filter

Synopsis	Reset operation on the specified IP filter
Context	<a href="#">reset system security management-access-filter ip-filter</a>
Tree	<a href="#">ip-filter</a>
Introduced	23.3.R1
Platforms	All

## entry reference

Synopsis	Entry ID for the IP filter
Context	<a href="#">reset system security management-access-filter ip-filter entry reference</a>
Tree	<a href="#">entry</a>
Reference	<b>state system security management-access-filter ip-filter entry <i>number</i></b>
Introduced	23.3.R1
Platforms	All

## ipv6-filter

Synopsis	Reset operation on the specified IPv6 filter
Context	<a href="#">reset system security management-access-filter ipv6-filter</a>
Tree	<a href="#">ipv6-filter</a>
Introduced	23.3.R1
Platforms	All

## entry reference

Synopsis	Entry ID for the IPv6 filter
----------	------------------------------

---

Context	<a href="#">reset system security management-access-filter ipv6-filter entry reference</a>
Tree	<a href="#">entry</a>
Reference	<b>state system security management-access-filter ipv6-filter entry number</b>
Introduced	23.3.R1
Platforms	All

### mac-filter

Synopsis	Reset operation on the specified MAC filter
Context	<a href="#">reset system security management-access-filter mac-filter</a>
Tree	<a href="#">mac-filter</a>
Introduced	23.3.R1
Platforms	All

### entry reference

Synopsis	Entry ID for the MAC filter
Context	<a href="#">reset system security management-access-filter mac-filter entry reference</a>
Tree	<a href="#">entry</a>
Reference	<b>state system security management-access-filter mac-filter entry number</b>
Introduced	23.3.R1
Platforms	All

## 3 Configuration commands

This section lists MD-CLI configuration commands.

### 3.1 aaa commands

```

configure
- aaa
  - apply-groups reference
  - apply-groups-exclude reference
  - diameter
    - node string
      - apply-groups reference
      - apply-groups-exclude reference
      - connection
        - ipv4
          - allow-connections boolean
          - local-address string
        - ipv6
          - allow-connections boolean
          - local-address string
        - timer number
      - description string
      - origin-realm string
      - peer index number
        - address (ipv4-address-no-zone | ipv6-address-no-zone)
        - admin-state keyword
        - apply-groups reference
        - apply-groups-exclude reference
        - connection-timer number
        - default-peer boolean
        - destination-host string
        - preference number
        - route index number
          - application keyword
          - apply-groups reference
          - apply-groups-exclude reference
          - preference number
          - realm string
        - watchdog-timer number
      - python-policy reference
      - router-instance string
    - radius
      - acct-on-off-group string
      - apply-groups reference
      - apply-groups-exclude reference
      - description string
      - coa-port number
      - isa-policy string
      - accounting
        - include-attributes
          - acct-delay-time boolean
          - acct-triggered-reason boolean
          - called-station-id boolean
          - calling-station-id boolean
          - circuit-id boolean
          - class boolean
          - credit-control-quota boolean
          - dhcp-options boolean
          - dhcp-vendor-class-id boolean
          - frame-counters boolean
          - framed-ip-address boolean
          - framed-ip-netmask boolean
          - framed-ipv6-prefix boolean
          - hardware-timestamp boolean

```

configure aaa radius isa-policy accounting include-attributes ipv6-address

```

- ipv6-address boolean
- mac-address boolean
- millisecond-event-timestamp boolean
- multi-session-id boolean
- nas-identifier boolean
- nas-ip-address boolean
- nas-ipv6-address boolean
- nas-port boolean
- nas-port-id boolean
- nas-port-type boolean
- nat-inside-service-id boolean
- nat-outside-ip-address boolean
- nat-outside-service-id boolean
- nat-port-range-block boolean
- nat-subscriber-string boolean
- octet-counters boolean
- proxied-subscriber-data boolean
- release-reason boolean
- remote-id boolean
- rsi boolean
- session-time boolean
- subscriber-id boolean
- toserver-dhcp6-options boolean
- ue-creation-type boolean
- user-name boolean
- wlan-ssid-vlan boolean
- xconnect-tunnel-home-address boolean
- xconnect-tunnel-local-ipv6-address boolean
- xconnect-tunnel-remote-ipv6-address boolean
- xconnect-tunnel-service boolean
- xconnect-tunnel-type boolean
- nat-periodic-update
- interval number
- rate-limit (number | keyword)
- update-triggers
- address-state boolean
- soft-quota-exhausted boolean
- apply-groups reference
- apply-groups-exclude reference
- authentication
- include-attributes
- called-station-id boolean
- calling-station-id boolean
- circuit-id boolean
- dhcp-vendor-class-id boolean
- framed-ip-address boolean
- ipv6-address boolean
- mac-address boolean
- nas-identifier boolean
- nas-ip-address boolean
- nas-ipv6-address boolean
- nas-port boolean
- nas-port-id boolean
- nas-port-type boolean
- remote-id boolean
- toserver-dhcp-options boolean
- toserver-dhcp6-options boolean
- wlan-ssid-vlan boolean
- xconnect-tunnel-home-address boolean
- description string
- nas-ip-address-origin keyword
- password string
- python-policy reference
- servers

```

### 3.1.1 aaa command descriptions

#### aaa

Synopsis	Enter the <b>aaa</b> context
Context	<b>configure aaa</b>
Tree	<a href="#">aaa</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

#### diameter

Synopsis	Enter the <b>diameter</b> context
Context	<b>configure aaa diameter</b>
Tree	<a href="#">diameter</a>
Description	Commands in this context configure Diameter Base parameters.
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

#### node [[origin-host](#)] *string*

Synopsis	Enter the <b>node</b> list instance
Context	<b>configure aaa diameter node <i>string</i></b>
Tree	<a href="#">node</a>
Max. Instances	32
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

#### [\[origin-host\]](#) *string*

Synopsis	Origin-Host AVP
Context	<b>configure aaa diameter node <i>string</i></b>
Tree	<a href="#">node</a>
String Length	1 to 80

Notes	This element is part of a list key.
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## connection

Synopsis	Enter the <b>connection</b> context
Context	<b>configure</b> <a href="#">aaa diameter node</a> <i>string</i> <b>connection</b>
Tree	<a href="#">connection</a>
Introduced	16.0.R6
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## ipv4

Synopsis	Enter the <b>ipv4</b> context
Context	<b>configure</b> <a href="#">aaa diameter node</a> <i>string</i> <b>connection</b> <b>ipv4</b>
Tree	<a href="#">ipv4</a>
Introduced	16.0.R6
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## allow-connections *boolean*

Synopsis	Listen on local address for incoming peer connections
Context	<b>configure</b> <a href="#">aaa diameter node</a> <i>string</i> <b>connection</b> <b>ipv4</b> <b>allow-connections</b> <i>boolean</i>
Tree	<a href="#">allow-connections</a>
Description	<p>When configured to <b>true</b>, this command is used in multi-chassis redundancy where the local Diameter node accepts connection from the inter-chassis peer. The peer requesting the connection must have the same Diameter name as the local peer and its source address must match the IP address of the locally configured destination peer.</p> <p>The IPv4 address on which the node listens for incoming connection is the configured source address of the local peer. This source IPv4 address can reference any local interface, including loopbacks.</p> <p>When configured to <b>false</b>, incoming requests for connections are refused.</p>
Default	false
Introduced	19.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**local-address** *string*

Synopsis	IPv4 source address for the TCP peer connection
Context	<b>configure</b> <a href="#">aaa diameter node</a> <i>string</i> <a href="#">connection ipv4</a> <b>local-address</b> <i>string</i>
Tree	<a href="#">local-address</a>
Introduced	16.0.R6
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**ipv6**

Synopsis	Enter the <b>ipv6</b> context
Context	<b>configure</b> <a href="#">aaa diameter node</a> <i>string</i> <a href="#">connection ipv6</a>
Tree	<a href="#">ipv6</a>
Introduced	16.0.R6
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**allow-connections** *boolean*

Synopsis	Listen on local address for incoming peer connections
Context	<b>configure</b> <a href="#">aaa diameter node</a> <i>string</i> <a href="#">connection ipv6</a> <b>allow-connections</b> <i>boolean</i>
Tree	<a href="#">allow-connections</a>
Default	false
Introduced	19.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**local-address** *string*

Synopsis	IPv6 source address for the TCP peer connection
Context	<b>configure</b> <a href="#">aaa diameter node</a> <i>string</i> <a href="#">connection ipv6</a> <b>local-address</b> <i>string</i>
Tree	<a href="#">local-address</a>
Introduced	16.0.R6
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**timer number**

Synopsis	Wait time before attempting reconnection to peer
Context	<b>configure</b> <a href="#">aaa diameter node</a> <i>string</i> <a href="#">connection timer</a> <i>number</i>
Tree	<a href="#">timer</a>
Description	This command configures the time the system waits before attempting to reconnect to a peer after the connection is lost.
Range	1 to 1000
Units	seconds
Default	30
Introduced	16.0.R6
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**description string**

Synopsis	Text description
Context	<b>configure</b> <a href="#">aaa diameter node</a> <i>string</i> <a href="#">description</a> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**origin-realm string****WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Origin-realm name
Context	<b>configure</b> <a href="#">aaa diameter node</a> <i>string</i> <a href="#">origin-realm</a> <i>string</i>
Tree	<a href="#">origin-realm</a>
String Length	1 to 80
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**peer index number**

Synopsis	Enter the <b>peer</b> list instance
Context	<b>configure</b> <b>aaa diameter node</b> <i>string</i> <b>peer index number</b>
Tree	<b>peer</b>
Max. Instances	5
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**index number**

Synopsis	Index of a peer within the node
Context	<b>configure</b> <b>aaa diameter node</b> <i>string</i> <b>peer index number</b>
Tree	<b>peer</b>
Range	1 to 5
Notes	This element is part of a list key.
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**address** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	Diameter peer address
Context	<b>configure</b> <b>aaa diameter node</b> <i>string</i> <b>peer index number</b> <b>address</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	<b>address</b>
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**admin-state** *keyword*

Synopsis	Administrative state of the Diameter peer
Context	<b>configure</b> <b>aaa diameter node</b> <i>string</i> <b>peer index number</b> <b>admin-state</b> <i>keyword</i>
Tree	<b>admin-state</b>
Options	enable, disable
Default	disable

Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**connection-timer** *number*

Synopsis	Wait time before attempting reconnection to peer
Context	<b>configure</b> <a href="#">aaa diameter node</a> <i>string</i> <a href="#">peer index</a> <i>number</i> <b>connection-timer</b> <i>number</i>
Tree	<a href="#">connection-timer</a>
Range	1 to 1000
Units	seconds
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**default-peer** *boolean*

Synopsis	Use the peer as default route for realm-based routing
Context	<b>configure</b> <a href="#">aaa diameter node</a> <i>string</i> <a href="#">peer index</a> <i>number</i> <b>default-peer</b> <i>boolean</i>
Tree	<a href="#">default-peer</a>
Default	false
Introduced	19.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**destination-host** *string***WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Destination-Host AVP string for Diameter messages
Context	<b>configure</b> <a href="#">aaa diameter node</a> <i>string</i> <a href="#">peer index</a> <i>number</i> <b>destination-host</b> <i>string</i>
Tree	<a href="#">destination-host</a>
String Length	1 to 80
Notes	This element is mandatory.
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**preference number**

Synopsis	Diameter routing preference for a peer
Context	<b>configure</b> <i>aaa diameter node string peer index number preference number</i>
Tree	<i>preference</i>
Range	1 to 100
Default	50
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**route index number**

Synopsis	Enter the <b>route</b> list instance
Context	<b>configure</b> <i>aaa diameter node string peer index number route index number</i>
Tree	<i>route</i>
Max. Instances	15
Introduced	20.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**index number**

Synopsis	Static Diameter route ID
Context	<b>configure</b> <i>aaa diameter node string peer index number route index number</i>
Tree	<i>route</i>
Description	This command configures the ID of the static route used to reach remote realms that are not directly connected to the origin realm. The route can also be used to override the route preference (peer preference) of the directly-connected realms.
Range	1 to 15
Notes	This element is part of a list key.
Introduced	20.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**application** *keyword***WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Diameter application to which the route applies
Context	<b>configure</b> <a href="#">aaa</a> <a href="#">diameter node</a> <i>string</i> <a href="#">peer index number</a> <a href="#">route index number</a> <a href="#">application keyword</a>
Tree	<a href="#">application</a>
Description	This command specifies the Diameter application in the destination realm reachable via the static route.
Options	nasreq, gy, gx
Notes	This element is mandatory.
Introduced	20.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**preference** *number*

Synopsis	Static route preference; lower value is preferred
Context	<b>configure</b> <a href="#">aaa</a> <a href="#">diameter node</a> <i>string</i> <a href="#">peer index number</a> <a href="#">route index number</a> <a href="#">preference number</a>
Tree	<a href="#">preference</a>
Description	This command configures the preference of the static route. The preference is compared with the preference values of all other static and dynamic routes. The dynamic route is a realm route learned directly from the peer via the Capabilities Exchange process during the peer negotiation phase. The preference value of the dynamic route is configured directly under the peer configuration. A lower preference value is preferred for route selection.
Range	1 to 100
Default	50
Introduced	20.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**realm** *string***WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Destination realm reachable via the static route
Context	<b>configure</b> <a href="#">aaa</a> <a href="#">diameter</a> <a href="#">node</a> <i>string</i> <a href="#">peer</a> <a href="#">index</a> <i>number</i> <a href="#">route</a> <a href="#">index</a> <i>number</i> <a href="#">realm</a> <i>string</i>
Tree	<a href="#">realm</a>
String Length	1 to 80
Notes	This element is mandatory.
Introduced	20.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **watchdog-timer** *number*

Synopsis	Time between consecutive watchdog messages
Context	<b>configure</b> <a href="#">aaa</a> <a href="#">diameter</a> <a href="#">node</a> <i>string</i> <a href="#">peer</a> <a href="#">index</a> <i>number</i> <a href="#">watchdog-timer</a> <i>number</i>
Tree	<a href="#">watchdog-timer</a>
Range	1 to 1000
Units	seconds
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **python-policy** *reference*

Synopsis	Python policy for received or sent Diameter messages
Context	<b>configure</b> <a href="#">aaa</a> <a href="#">diameter</a> <a href="#">node</a> <i>string</i> <a href="#">python-policy</a> <i>reference</i>
Tree	<a href="#">python-policy</a>
Reference	<b>configure</b> <a href="#">python</a> <a href="#">python-policy</a> <i>string</i>
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **router-instance** *string*

Synopsis	Router in which this node connects to its peers
Context	<b>configure</b> <a href="#">aaa</a> <a href="#">diameter</a> <a href="#">node</a> <i>string</i> <a href="#">router-instance</a> <i>string</i>
Tree	<a href="#">router-instance</a>
Default	Base
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## radius

Synopsis	Enter the <b>radius</b> context
Context	<b>configure</b> <a href="#">aaa radius</a>
Tree	<a href="#">radius</a>
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## acct-on-off-group [[name](#)] *string*

Synopsis	Enter the <b>acct-on-off-group</b> list instance
Context	<b>configure</b> <a href="#">aaa radius acct-on-off-group</a> <i>string</i>
Tree	<a href="#">acct-on-off-group</a>
Max. Instances	32
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## [\[name\]](#) *string*

Synopsis	Group name for accounting on/off
Context	<b>configure</b> <a href="#">aaa radius acct-on-off-group</a> <i>string</i>
Tree	<a href="#">acct-on-off-group</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## description *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">aaa radius acct-on-off-group</a> <i>string</i> <a href="#">description</a> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R4

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **coa-port** *number*

Synopsis RADIUS listening port for CoA and Disconnect messages  
 Context **configure** *aaa radius coa-port number*  
 Tree [coa-port](#)  
 Range 1647 | 1700 | 1812 | 3799  
 Default 3799  
 Introduced 16.0.R4  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **isa-policy** [*name*] *string*

Synopsis Enter the **isa-policy** list instance  
 Context **configure** *aaa radius isa-policy string*  
 Tree [isa-policy](#)  
 Max. Instances 8  
 Introduced 16.0.R4  
 Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **[name]** *string*

Synopsis ISA RADIUS policy name referenced by a NAT application  
 Context **configure** *aaa radius isa-policy string*  
 Tree [isa-policy](#)  
 String Length 1 to 32  
 Notes This element is part of a list key.  
 Introduced 16.0.R4  
 Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **accounting**

Synopsis Enter the **accounting** context

---

Context	<b>configure</b> <a href="#">aaa radius isa-policy string accounting</a>
Tree	<a href="#">accounting</a>
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **include-attributes**

Synopsis	Enter the <b>include-attributes</b> context
Context	<b>configure</b> <a href="#">aaa radius isa-policy string accounting include-attributes</a>
Tree	<a href="#">include-attributes</a>
Description	Commands in this context specify the attributes to include in the RADIUS accounting messages.
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **acct-delay-time** *boolean*

Synopsis	Include the accounting delay time attribute
Context	<b>configure</b> <a href="#">aaa radius isa-policy string accounting include-attributes acct-delay-time boolean</a>
Tree	<a href="#">acct-delay-time</a>
Default	false
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **acct-triggered-reason** *boolean*

Synopsis	Include the accounting triggered reason attribute
Context	<b>configure</b> <a href="#">aaa radius isa-policy string accounting include-attributes acct-triggered-reason boolean</a>
Tree	<a href="#">acct-triggered-reason</a>
Default	false
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**called-station-id** *boolean*

Synopsis	Include the Called-Station-Id attribute
Context	<b>configure</b> <a href="#">aaa</a> <a href="#">radius</a> <a href="#">isa-policy</a> <a href="#">string</a> <a href="#">accounting</a> <a href="#">include-attributes</a> <a href="#">called-station-id</a> <i>boolean</i>
Tree	<a href="#">called-station-id</a>
Default	false
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**calling-station-id** *boolean*

Synopsis	Include the Calling-Station-Id attribute
Context	<b>configure</b> <a href="#">aaa</a> <a href="#">radius</a> <a href="#">isa-policy</a> <a href="#">string</a> <a href="#">accounting</a> <a href="#">include-attributes</a> <a href="#">calling-station-id</a> <i>boolean</i>
Tree	<a href="#">calling-station-id</a>
Default	false
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**circuit-id** *boolean*

Synopsis	Include the Agent-Circuit-Id attribute
Context	<b>configure</b> <a href="#">aaa</a> <a href="#">radius</a> <a href="#">isa-policy</a> <a href="#">string</a> <a href="#">accounting</a> <a href="#">include-attributes</a> <a href="#">circuit-id</a> <i>boolean</i>
Tree	<a href="#">circuit-id</a>
Default	false
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**class** *boolean*

Synopsis	Include the Class attribute
Context	<b>configure</b> <a href="#">aaa</a> <a href="#">radius</a> <a href="#">isa-policy</a> <a href="#">string</a> <a href="#">accounting</a> <a href="#">include-attributes</a> <a href="#">class</a> <i>boolean</i>
Tree	<a href="#">class</a>
Default	false
Introduced	16.0.R4

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **credit-control-quota** *boolean*

Synopsis Add unconsumed volume quota to Credit-Control-Quota

Context **configure** [aaa](#) [radius](#) [isa-policy](#) *string* [accounting](#) [include-attributes](#) [credit-control-quota](#) *boolean*

Tree [credit-control-quota](#)

Default false

Introduced 21.7.R1

Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **dhcp-options** *boolean*

Synopsis Include the Alc-ToServer-Dhcp-Options attribute

Context **configure** [aaa](#) [radius](#) [isa-policy](#) *string* [accounting](#) [include-attributes](#) [dhcp-options](#) *boolean*

Tree [dhcp-options](#)

Default false

Introduced 16.0.R4

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **dhcp-vendor-class-id** *boolean*

Synopsis Include the Alc-Dhcp-Vendor-Class-Id attribute

Context **configure** [aaa](#) [radius](#) [isa-policy](#) *string* [accounting](#) [include-attributes](#) [dhcp-vendor-class-id](#) *boolean*

Tree [dhcp-vendor-class-id](#)

Default false

Introduced 16.0.R4

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **frame-counters** *boolean*

Synopsis Include Acct-Input-Packets and Acct-Output-Packets

Context **configure** [aaa](#) [radius](#) [isa-policy](#) *string* [accounting](#) [include-attributes](#) [frame-counters](#) *boolean*

---

Tree	<a href="#">frame-counters</a>
Default	false
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **framed-ip-address** *boolean*

Synopsis	Include the Framed-IP-Address attribute
Context	<b>configure</b> <a href="#">aaa</a> <a href="#">radius</a> <a href="#">isa-policy</a> <i>string</i> <a href="#">accounting</a> <a href="#">include-attributes</a> <a href="#">framed-ip-address</a> <i>boolean</i>
Tree	<a href="#">framed-ip-address</a>
Default	false
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **framed-ip-netmask** *boolean*

Synopsis	Include the Framed-IP-Netmask attribute
Context	<b>configure</b> <a href="#">aaa</a> <a href="#">radius</a> <a href="#">isa-policy</a> <i>string</i> <a href="#">accounting</a> <a href="#">include-attributes</a> <a href="#">framed-ip-netmask</a> <i>boolean</i>
Tree	<a href="#">framed-ip-netmask</a>
Default	false
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **framed-ipv6-prefix** *boolean*

Synopsis	Include the Framed-IPv6-Prefix attribute
Context	<b>configure</b> <a href="#">aaa</a> <a href="#">radius</a> <a href="#">isa-policy</a> <i>string</i> <a href="#">accounting</a> <a href="#">include-attributes</a> <a href="#">framed-ipv6-prefix</a> <i>boolean</i>
Tree	<a href="#">framed-ipv6-prefix</a>
Default	false
Introduced	16.0.R4
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### hardware-timestamp *boolean*

Synopsis	Include the Event-Timestamp attribute
Context	<b>configure</b> <a href="#">aaa</a> <a href="#">radius</a> <a href="#">isa-policy</a> <i>string</i> <a href="#">accounting</a> <a href="#">include-attributes</a> <a href="#">hardware-timestamp</a> <i>boolean</i>
Tree	<a href="#">hardware-timestamp</a>
Default	false
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### ipv6-address *boolean*

Synopsis	Include the Alc-Ipv6-Address attribute
Context	<b>configure</b> <a href="#">aaa</a> <a href="#">radius</a> <a href="#">isa-policy</a> <i>string</i> <a href="#">accounting</a> <a href="#">include-attributes</a> <a href="#">ipv6-address</a> <i>boolean</i>
Tree	<a href="#">ipv6-address</a>
Description	When configured to <b>true</b> , the IA_NA address of the UE is included in the accounting message if an active IA_NA lease exists. When configured to <b>false</b> , the address is not included.
Default	false
Introduced	16.0.R4
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### mac-address *boolean*

Synopsis	Include the Alc-Client-Hardware-Addr attribute
Context	<b>configure</b> <a href="#">aaa</a> <a href="#">radius</a> <a href="#">isa-policy</a> <i>string</i> <a href="#">accounting</a> <a href="#">include-attributes</a> <a href="#">mac-address</a> <i>boolean</i>
Tree	<a href="#">mac-address</a>
Default	false
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### millisecond-event-timestamp *boolean*

Synopsis	Include the Alc-Millisecond-Event-Timestamp attribute
----------	---

Context	<b>configure</b> <a href="#">aaa radius isa-policy string accounting include-attributes millisecond-event-timestamp</a> <i>boolean</i>
Tree	<a href="#">millisecond-event-timestamp</a>
Description	When configured to <b>true</b> , the router includes the Alc-Millisecond-Event-Timestamp attribute in the accounting message. This attribute includes the time the accounting event was logged in milliseconds since Jan 1, 1970 00:00:00 UTC. When configured to <b>false</b> , the router does not include this attribute.
Default	false
Introduced	20.10.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**multi-session-id** *boolean*

Synopsis	Include the Acct-Multi-Session-Id attribute
Context	<b>configure</b> <a href="#">aaa radius isa-policy string accounting include-attributes multi-session-id</a> <i>boolean</i>
Tree	<a href="#">multi-session-id</a>
Default	false
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**nas-identifier** *boolean*

Synopsis	Include the NAS-Identifier attribute
Context	<b>configure</b> <a href="#">aaa radius isa-policy string accounting include-attributes nas-identifier</a> <i>boolean</i>
Tree	<a href="#">nas-identifier</a>
Default	false
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**nas-ip-address** *boolean*

Synopsis	Include the NAS-IP-Address attribute
Context	<b>configure</b> <a href="#">aaa radius isa-policy string accounting include-attributes nas-ip-address</a> <i>boolean</i>
Tree	<a href="#">nas-ip-address</a>

Default	false
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **nas-ipv6-address** *boolean*

Synopsis	Include the NAS-IPv6-Address attribute
Context	<b>configure</b> <a href="#">aaa radius isa-policy</a> <i>string</i> <a href="#">accounting include-attributes nas-ipv6-address</a> <i>boolean</i>
Tree	<a href="#">nas-ipv6-address</a>
Description	<p>When configured to <b>true</b>, the router includes the NAS-IPv6-Address attribute in RADIUS accounting messages using the address specified in the <b>configure aaa radius isa-policy nas-ip-address-origin</b> command. The NAS-IPv6-Address attribute is included in both IPv4 and IPv6 RADIUS connections.</p> <p>When configured to <b>false</b>, the router does not include the NAS-IPv6-Address attribute in RADIUS accounting messages.</p>
Default	false
Introduced	22.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **nas-port** *boolean*

Synopsis	Include the NAS-Port attribute
Context	<b>configure</b> <a href="#">aaa radius isa-policy</a> <i>string</i> <a href="#">accounting include-attributes nas-port</a> <i>boolean</i>
Tree	<a href="#">nas-port</a>
Default	false
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **nas-port-id** *boolean*

Synopsis	Include the NAS-Port-Id attribute
Context	<b>configure</b> <a href="#">aaa radius isa-policy</a> <i>string</i> <a href="#">accounting include-attributes nas-port-id</a> <i>boolean</i>
Tree	<a href="#">nas-port-id</a>
Default	false
Introduced	16.0.R4

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **nas-port-type** *boolean*

Synopsis Include the NAS-Port-Type attribute

Context **configure** [aaa](#) [radius](#) [isa-policy](#) *string* [accounting](#) [include-attributes](#) [nas-port-type](#) *boolean*

Tree [nas-port-type](#)

Default false

Introduced 16.0.R4

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **nat-inside-service-id** *boolean*

Synopsis Include NAT inside service ID in Alc-Serv-Id attribute

Context **configure** [aaa](#) [radius](#) [isa-policy](#) *string* [accounting](#) [include-attributes](#) [nat-inside-service-id](#) *boolean*

Tree [nat-inside-service-id](#)

Default false

Introduced 16.0.R4

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **nat-outside-ip-address** *boolean*

Synopsis Include the Alc-Nat-Outside-Ip-Addr attribute

Context **configure** [aaa](#) [radius](#) [isa-policy](#) *string* [accounting](#) [include-attributes](#) [nat-outside-ip-address](#) *boolean*

Tree [nat-outside-ip-address](#)

Default false

Introduced 16.0.R4

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **nat-outside-service-id** *boolean*

Synopsis Include NAT outside service ID in Alc-Serv-Id attribute

Context **configure** [aaa](#) [radius](#) [isa-policy](#) *string* [accounting](#) [include-attributes](#) [nat-outside-service-id](#) *boolean*

---

Tree	<a href="#">nat-outside-service-id</a>
Default	false
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **nat-port-range-block** *boolean*

Synopsis	Include the Alc-Nat-Port-Range attribute
Context	<b>configure</b> <a href="#">aaa</a> <a href="#">radius</a> <a href="#">isa-policy</a> <i>string</i> <a href="#">accounting</a> <a href="#">include-attributes</a> <a href="#">nat-port-range-block</a> <i>boolean</i>
Tree	<a href="#">nat-port-range-block</a>
Default	false
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **nat-subscriber-string** *boolean*

Synopsis	Include the Alc-Subsc-ID-Str attribute
Context	<b>configure</b> <a href="#">aaa</a> <a href="#">radius</a> <a href="#">isa-policy</a> <i>string</i> <a href="#">accounting</a> <a href="#">include-attributes</a> <a href="#">nat-subscriber-string</a> <i>boolean</i>
Tree	<a href="#">nat-subscriber-string</a>
Default	false
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **octet-counters** *boolean*

Synopsis	Include Acct-Input-Octets and Acct-Output-Octets
Context	<b>configure</b> <a href="#">aaa</a> <a href="#">radius</a> <a href="#">isa-policy</a> <i>string</i> <a href="#">accounting</a> <a href="#">include-attributes</a> <a href="#">octet-counters</a> <i>boolean</i>
Tree	<a href="#">octet-counters</a>
Default	false
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**proxied-subscriber-data** *boolean*

Synopsis	Include subscriber data as RADIUS attributes
Context	<b>configure</b> <a href="#">aaa</a> <a href="#">radius</a> <a href="#">isa-policy</a> <i>string</i> <a href="#">accounting</a> <a href="#">include-attributes</a> <a href="#">proxied-subscriber-data</a> <i>boolean</i>
Tree	<a href="#">proxied-subscriber-data</a>
Default	false
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**release-reason** *boolean*

Synopsis	Include reason in the Acct-Terminate-Cause attribute
Context	<b>configure</b> <a href="#">aaa</a> <a href="#">radius</a> <a href="#">isa-policy</a> <i>string</i> <a href="#">accounting</a> <a href="#">include-attributes</a> <a href="#">release-reason</a> <i>boolean</i>
Tree	<a href="#">release-reason</a>
Default	false
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**remote-id** *boolean*

Synopsis	Include the Agent-Remote-Id attribute
Context	<b>configure</b> <a href="#">aaa</a> <a href="#">radius</a> <a href="#">isa-policy</a> <i>string</i> <a href="#">accounting</a> <a href="#">include-attributes</a> <a href="#">remote-id</a> <i>boolean</i>
Tree	<a href="#">remote-id</a>
Default	false
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**rsi** *boolean*

Synopsis	Include the Alc-RSSI attribute
Context	<b>configure</b> <a href="#">aaa</a> <a href="#">radius</a> <a href="#">isa-policy</a> <i>string</i> <a href="#">accounting</a> <a href="#">include-attributes</a> <a href="#">rsi</a> <i>boolean</i>
Tree	<a href="#">rsi</a>
Default	false
Introduced	16.0.R4

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **session-time** *boolean*

Synopsis Include the Acct-Session-Time attribute

Context **configure** [aaa](#) [radius](#) [isa-policy](#) [string](#) [accounting](#) [include-attributes](#) [session-time](#) *boolean*

Tree [session-time](#)

Default false

Introduced 16.0.R4

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **subscriber-id** *boolean*

Synopsis Include the Alc-Subsc-ID-Str attribute

Context **configure** [aaa](#) [radius](#) [isa-policy](#) [string](#) [accounting](#) [include-attributes](#) [subscriber-id](#) *boolean*

Tree [subscriber-id](#)

Default false

Introduced 16.0.R4

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **toserver-dhcp6-options** *boolean*

Synopsis Include the Alc-ToServer-Dhcp6-Options attribute

Context **configure** [aaa](#) [radius](#) [isa-policy](#) [string](#) [accounting](#) [include-attributes](#) [toserver-dhcp6-options](#) *boolean*

Tree [toserver-dhcp6-options](#)

Default false

Introduced 16.0.R4

Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **ue-creation-type** *boolean*

Synopsis Include the Alc-Wlan-Ue-Creation-Type attribute

Context **configure** [aaa](#) [radius](#) [isa-policy](#) [string](#) [accounting](#) [include-attributes](#) [ue-creation-type](#) *boolean*

---

Tree	<a href="#">ue-creation-type</a>
Default	false
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **user-name** *boolean*

Synopsis	Include the User-Name attribute
Context	<b>configure</b> <a href="#">aaa</a> <a href="#">radius</a> <a href="#">isa-policy</a> <i>string</i> <a href="#">accounting</a> <a href="#">include-attributes</a> <a href="#">user-name</a> <i>boolean</i>
Tree	<a href="#">user-name</a>
Default	false
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **wlan-ssid-vlan** *boolean*

Synopsis	Include per-SSID VLAN in Alc-Wlan-SSID-VLAN attribute
Context	<b>configure</b> <a href="#">aaa</a> <a href="#">radius</a> <a href="#">isa-policy</a> <i>string</i> <a href="#">accounting</a> <a href="#">include-attributes</a> <a href="#">wlan-ssid-vlan</a> <i>boolean</i>
Tree	<a href="#">wlan-ssid-vlan</a>
Default	false
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **xconnect-tunnel-home-address** *boolean*

Synopsis	Include the Alc-Xconnect-Tunnel-Home-Ipv6 attribute
Context	<b>configure</b> <a href="#">aaa</a> <a href="#">radius</a> <a href="#">isa-policy</a> <i>string</i> <a href="#">accounting</a> <a href="#">include-attributes</a> <a href="#">xconnect-tunnel-home-address</a> <i>boolean</i>
Tree	<a href="#">xconnect-tunnel-home-address</a>
Default	false
Introduced	16.0.R4
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**xconnect-tunnel-local-ipv6-address** *boolean*

Synopsis	Include the Alc-Xconnect-Tunnel-Local-Ipv6 attribute
Context	<b>configure</b> <a href="#">aaa</a> <a href="#">radius</a> <a href="#">isa-policy</a> <a href="#">string</a> <a href="#">accounting</a> <a href="#">include-attributes</a> <a href="#">xconnect-tunnel-local-ipv6-address</a> <i>boolean</i>
Tree	<a href="#">xconnect-tunnel-local-ipv6-address</a>
Default	false
Introduced	16.0.R4
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**xconnect-tunnel-remote-ipv6-address** *boolean*

Synopsis	Include the Alc-Xconnect-Tunnel-Remote-Ipv6 attribute
Context	<b>configure</b> <a href="#">aaa</a> <a href="#">radius</a> <a href="#">isa-policy</a> <a href="#">string</a> <a href="#">accounting</a> <a href="#">include-attributes</a> <a href="#">xconnect-tunnel-remote-ipv6-address</a> <i>boolean</i>
Tree	<a href="#">xconnect-tunnel-remote-ipv6-address</a>
Default	false
Introduced	16.0.R4
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**xconnect-tunnel-service** *boolean*

Synopsis	Include the Alc-Xconnect-Tunnel-Service attribute
Context	<b>configure</b> <a href="#">aaa</a> <a href="#">radius</a> <a href="#">isa-policy</a> <a href="#">string</a> <a href="#">accounting</a> <a href="#">include-attributes</a> <a href="#">xconnect-tunnel-service</a> <i>boolean</i>
Tree	<a href="#">xconnect-tunnel-service</a>
Default	false
Introduced	16.0.R4
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**xconnect-tunnel-type** *boolean*

Synopsis	Include the Alc-Xconnect-Tunnel-Type attribute
Context	<b>configure</b> <a href="#">aaa</a> <a href="#">radius</a> <a href="#">isa-policy</a> <a href="#">string</a> <a href="#">accounting</a> <a href="#">include-attributes</a> <a href="#">xconnect-tunnel-type</a> <i>boolean</i>
Tree	<a href="#">xconnect-tunnel-type</a>
Default	false

Introduced 16.0.R4  
Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **nat-periodic-update**

Synopsis Enter the **nat-periodic-update** context  
Context **configure** [aaa radius isa-policy string accounting nat-periodic-update](#)  
Tree [nat-periodic-update](#)  
Introduced 16.0.R4  
Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **interval** *number*

Synopsis Interval for periodic RADIUS Interim-Update messages  
Context **configure** [aaa radius isa-policy string accounting nat-periodic-update interval number](#)  
Tree [interval](#)  
Range 1 to 72  
Units hours  
Introduced 16.0.R4  
Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **rate-limit** (*number* | *keyword*)

Synopsis Rate limit for periodic RADIUS Interim-Update messages  
Context **configure** [aaa radius isa-policy string accounting nat-periodic-update rate-limit \(number | keyword\)](#)  
Tree [rate-limit](#)  
Range 1 to 100000  
Units packets per second  
Options unlimited  
Default unlimited  
Introduced 16.0.R4  
Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## update-triggers

Synopsis	Enter the <b>update-triggers</b> context
Context	<b>configure</b> <a href="#">aaa</a> <a href="#">radius</a> <a href="#">isa-policy</a> <i>string</i> <a href="#">accounting</a> <a href="#">update-triggers</a>
Tree	<a href="#">update-triggers</a>
Introduced	16.0.R4
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

## address-state *boolean*

Synopsis	Send an Interim-Update when address allocated or freed
Context	<b>configure</b> <a href="#">aaa</a> <a href="#">radius</a> <a href="#">isa-policy</a> <i>string</i> <a href="#">accounting</a> <a href="#">update-triggers</a> <a href="#">address-state</a> <i>boolean</i>
Tree	<a href="#">address-state</a>
Default	false
Introduced	16.0.R4
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

## soft-quota-exhausted *boolean*

Synopsis	Send interim update when soft volume quota is reached
Context	<b>configure</b> <a href="#">aaa</a> <a href="#">radius</a> <a href="#">isa-policy</a> <i>string</i> <a href="#">accounting</a> <a href="#">update-triggers</a> <a href="#">soft-quota-exhausted</a> <i>boolean</i>
Tree	<a href="#">soft-quota-exhausted</a>
Default	false
Introduced	21.7.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

## authentication

Synopsis	Enter the <b>authentication</b> context
Context	<b>configure</b> <a href="#">aaa</a> <a href="#">radius</a> <a href="#">isa-policy</a> <i>string</i> <a href="#">authentication</a>
Tree	<a href="#">authentication</a>
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## include-attributes

Synopsis	Enter the <b>include-attributes</b> context
Context	<b>configure</b> <a href="#">aaa</a> <a href="#">radius</a> <a href="#">isa-policy</a> <i>string</i> <a href="#">authentication</a> <a href="#">include-attributes</a>
Tree	<a href="#">include-attributes</a>
Description	Commands in this context specify the attributes to include in the RADIUS authentication messages.
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## called-station-id *boolean*

Synopsis	Include the Called-Station-Id attribute
Context	<b>configure</b> <a href="#">aaa</a> <a href="#">radius</a> <a href="#">isa-policy</a> <i>string</i> <a href="#">authentication</a> <a href="#">include-attributes</a> <a href="#">called-station-id</a> <i>boolean</i>
Tree	<a href="#">called-station-id</a>
Default	false
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## calling-station-id *boolean*

Synopsis	Include the Calling-Station-Id attribute
Context	<b>configure</b> <a href="#">aaa</a> <a href="#">radius</a> <a href="#">isa-policy</a> <i>string</i> <a href="#">authentication</a> <a href="#">include-attributes</a> <a href="#">calling-station-id</a> <i>boolean</i>
Tree	<a href="#">calling-station-id</a>
Default	false
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## circuit-id *boolean*

Synopsis	Include the Agent-Circuit-Id attribute
Context	<b>configure</b> <a href="#">aaa</a> <a href="#">radius</a> <a href="#">isa-policy</a> <i>string</i> <a href="#">authentication</a> <a href="#">include-attributes</a> <a href="#">circuit-id</a> <i>boolean</i>
Tree	<a href="#">circuit-id</a>
Default	false
Introduced	16.0.R4

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **dhcp-vendor-class-id** *boolean*

Synopsis Include the Alc-DHCP-Vendor-Class-Id attribute

Context **configure** [aaa](#) [radius](#) [isa-policy](#) *string* [authentication](#) [include-attributes](#) [dhcp-vendor-class-id](#) *boolean*

Tree [dhcp-vendor-class-id](#)

Default false

Introduced 16.0.R4

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **framed-ip-address** *boolean*

Synopsis Include the Framed-IP-Address attribute

Context **configure** [aaa](#) [radius](#) [isa-policy](#) *string* [authentication](#) [include-attributes](#) [framed-ip-address](#) *boolean*

Tree [framed-ip-address](#)

Default false

Introduced 16.0.R4

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **ipv6-address** *boolean*

Synopsis Include the Alc-IPv6-address attribute

Context **configure** [aaa](#) [radius](#) [isa-policy](#) *string* [authentication](#) [include-attributes](#) [ipv6-address](#) *boolean*

Tree [ipv6-address](#)

Default false

Introduced 16.0.R4

Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **mac-address** *boolean*

Synopsis Include the Alc-Client-Hardware-Addr attribute

Context **configure** [aaa](#) [radius](#) [isa-policy](#) *string* [authentication](#) [include-attributes](#) [mac-address](#) *boolean*

Tree	<a href="#">mac-address</a>
Default	false
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **nas-identifier** *boolean*

Synopsis	Include the NAS-Identifier attribute
Context	<b>configure</b> <a href="#">aaa</a> <a href="#">radius</a> <a href="#">isa-policy</a> <i>string</i> <a href="#">authentication</a> <a href="#">include-attributes</a> <a href="#">nas-identifier</a> <i>boolean</i>
Tree	<a href="#">nas-identifier</a>
Default	false
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **nas-ip-address** *boolean*

Synopsis	Include the NAS-IP-Address attribute
Context	<b>configure</b> <a href="#">aaa</a> <a href="#">radius</a> <a href="#">isa-policy</a> <i>string</i> <a href="#">authentication</a> <a href="#">include-attributes</a> <a href="#">nas-ip-address</a> <i>boolean</i>
Tree	<a href="#">nas-ip-address</a>
Default	true
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **nas-ipv6-address** *boolean*

Synopsis	Include the NAS-IPv6-Address attribute
Context	<b>configure</b> <a href="#">aaa</a> <a href="#">radius</a> <a href="#">isa-policy</a> <i>string</i> <a href="#">authentication</a> <a href="#">include-attributes</a> <a href="#">nas-ipv6-address</a> <i>boolean</i>
Tree	<a href="#">nas-ipv6-address</a>
Description	<p>When configured to <b>true</b>, the router includes the NAS-IPv6-Address attribute in RADIUS authentication messages using the address specified in the <b>configure aaa radius isa-policy nas-ip-address-origin</b> command. The NAS-IPv6-Address attribute is included in both IPv4 and IPv6 RADIUS connections.</p> <p>When configured to <b>false</b>, the router does not include the NAS-IPv6-Address attribute in RADIUS authentication messages.</p>

Introduced 22.10.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **nas-port** *boolean*

Synopsis Include the NAS-Port attribute  
Context **configure** [aaa](#) [radius](#) [isa-policy](#) *string* [authentication](#) [include-attributes](#) [nas-port](#) *boolean*  
Tree [nas-port](#)  
Default false  
Introduced 16.0.R4  
Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **nas-port-id** *boolean*

Synopsis Include the NAS-Port-Id attribute  
Context **configure** [aaa](#) [radius](#) [isa-policy](#) *string* [authentication](#) [include-attributes](#) [nas-port-id](#) *boolean*  
Tree [nas-port-id](#)  
Default false  
Introduced 16.0.R4  
Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **nas-port-type** *boolean*

Synopsis Include the NAS-Port-Type attribute  
Context **configure** [aaa](#) [radius](#) [isa-policy](#) *string* [authentication](#) [include-attributes](#) [nas-port-type](#) *boolean*  
Tree [nas-port-type](#)  
Default false  
Introduced 16.0.R4  
Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **remote-id** *boolean*

Synopsis Include the Agent-Remote-Id attribute

Context	<b>configure</b> <a href="#">aaa</a> <a href="#">radius</a> <a href="#">isa-policy</a> <i>string</i> <a href="#">authentication</a> <a href="#">include-attributes</a> <a href="#">remote-id</a> <i>boolean</i>
Tree	<a href="#">remote-id</a>
Default	false
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**toserver-dhcp-options** *boolean*

Synopsis	Include the Alc-ToServer-Dhcp-Options attribute
Context	<b>configure</b> <a href="#">aaa</a> <a href="#">radius</a> <a href="#">isa-policy</a> <i>string</i> <a href="#">authentication</a> <a href="#">include-attributes</a> <a href="#">toserver-dhcp-options</a> <i>boolean</i>
Tree	<a href="#">toserver-dhcp-options</a>
Default	false
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**toserver-dhcp6-options** *boolean*

Synopsis	Include the Alc-ToServer-Dhcp6-Options attribute
Context	<b>configure</b> <a href="#">aaa</a> <a href="#">radius</a> <a href="#">isa-policy</a> <i>string</i> <a href="#">authentication</a> <a href="#">include-attributes</a> <a href="#">toserver-dhcp6-options</a> <i>boolean</i>
Tree	<a href="#">toserver-dhcp6-options</a>
Default	false
Introduced	16.0.R4
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**wlan-ssid-vlan** *boolean*

Synopsis	Include per-SSID VLAN in Alc-Wlan-SSID-VLAN attribute
Context	<b>configure</b> <a href="#">aaa</a> <a href="#">radius</a> <a href="#">isa-policy</a> <i>string</i> <a href="#">authentication</a> <a href="#">include-attributes</a> <a href="#">wlan-ssid-vlan</a> <i>boolean</i>
Tree	<a href="#">wlan-ssid-vlan</a>
Default	false
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**xconnect-tunnel-home-address** *boolean*

Synopsis	Include the Alc-Xconnect-Tunnel-Home-Ipv6 attribute
Context	<b>configure</b> <a href="#">aaa</a> <a href="#">radius</a> <a href="#">isa-policy</a> <i>string</i> <a href="#">authentication</a> <a href="#">include-attributes</a> <a href="#">xconnect-tunnel-home-address</a> <i>boolean</i>
Tree	<a href="#">xconnect-tunnel-home-address</a>
Default	false
Introduced	16.0.R5
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">aaa</a> <a href="#">radius</a> <a href="#">isa-policy</a> <i>string</i> <a href="#">description</a> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**nas-ip-address-origin** *keyword*

Synopsis	NAS-IP-Address attribute
Context	<b>configure</b> <a href="#">aaa</a> <a href="#">radius</a> <a href="#">isa-policy</a> <i>string</i> <a href="#">nas-ip-address-origin</a> <i>keyword</i>
Tree	<a href="#">nas-ip-address-origin</a>
Options	system-ip, isa-ip
Default	system-ip
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**password** *string*

Synopsis	Password used in the RADIUS access requests
Context	<b>configure</b> <a href="#">aaa</a> <a href="#">radius</a> <a href="#">isa-policy</a> <i>string</i> <a href="#">password</a> <i>string</i>
Tree	<a href="#">password</a>
String Length	1 to 42

Introduced 16.0.R4  
 Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **python-policy** *reference*

Synopsis Python policy used for modifying RADIUS messages  
 Context **configure** [aaa radius isa-policy string python-policy reference](#)  
 Tree [python-policy](#)  
 Reference **configure** [python python-policy string](#)  
 Introduced 16.0.R4  
 Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **servers**

Synopsis Enter the **servers** context  
 Context **configure** [aaa radius isa-policy string servers](#)  
 Tree [servers](#)  
 Introduced 16.0.R4  
 Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **access-algorithm** *keyword*

Synopsis Algorithm that accesses the RADIUS servers  
 Context **configure** [aaa radius isa-policy string servers access-algorithm keyword](#)  
 Tree [access-algorithm](#)  
 Options direct, round-robin, hash-based, direct-priority  
 Default direct  
 Introduced 16.0.R4  
 Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **ipv6**

Synopsis Enter the **ipv6** context  
 Context **configure** [aaa radius isa-policy string servers ipv6](#)  
 Tree [ipv6](#)

Description	Commands in this context configure how to communicate with IPv6 RADIUS servers.
Introduced	22.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **mtu number**

Synopsis	MTU used to fragment outgoing IPv6 RADIUS packets
Context	<b>configure</b> <a href="#">aaa radius isa-policy string servers ipv6 mtu number</a>
Tree	<a href="#">mtu</a>
Range	1280 to 9000
Default	9000
Introduced	22.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **source-prefix string**

Synopsis	Prefix containing individual source addresses per ISA
Context	<b>configure</b> <a href="#">aaa radius isa-policy string servers ipv6 source-prefix string</a>
Tree	<a href="#">source-prefix</a>
Description	This command configures an IPv6 prefix containing individual /128 addresses. These addresses are used as the source address for connections to IPv6 RADIUS servers.  The prefix must be large enough to accommodate all BB-ISAs or ESA VMs in the system.
Introduced	22.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **router-instance string**

Synopsis	Routing instance
Context	<b>configure</b> <a href="#">aaa radius isa-policy string servers router-instance string</a>
Tree	<a href="#">router-instance</a>
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**server** [[index](#)] *number*

Synopsis	Enter the <b>server</b> list instance
Context	<b>configure</b> <a href="#">aaa</a> <a href="#">radius</a> <a href="#">isa-policy</a> <i>string</i> <a href="#">servers</a> <a href="#">server</a> <i>number</i>
Tree	<a href="#">server</a>
Max. Instances	10
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**[index]** *number*

Synopsis	RADIUS server ID
Context	<b>configure</b> <a href="#">aaa</a> <a href="#">radius</a> <a href="#">isa-policy</a> <i>string</i> <a href="#">servers</a> <a href="#">server</a> <i>number</i>
Tree	<a href="#">server</a>
Range	1 to 10
Notes	This element is part of a list key.
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**admin-state** *keyword*

Synopsis	Administrative state of the ISA RADIUS server
Context	<b>configure</b> <a href="#">aaa</a> <a href="#">radius</a> <a href="#">isa-policy</a> <i>string</i> <a href="#">servers</a> <a href="#">server</a> <i>number</i> <b>admin-state</b> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**ip-address** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	IP address of the RADIUS server
----------	---------------------------------

Context	<b>configure</b> <a href="#">aaa radius isa-policy string servers server number ip-address</a> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> )
Tree	<a href="#">ip-address</a>
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## purpose

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Enter the <b>purpose</b> context
Context	<b>configure</b> <a href="#">aaa radius isa-policy string servers server number purpose</a>
Tree	<a href="#">purpose</a>
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## accounting

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Enable the <b>accounting</b> context
Context	<b>configure</b> <a href="#">aaa radius isa-policy string servers server number purpose accounting</a>
Tree	<a href="#">accounting</a>
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## udp-port *number*

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	ISA RADIUS server accounting UDP port
----------	---------------------------------------

Context	<b>configure</b> <a href="#">aaa</a> <a href="#">radius</a> <a href="#">isa-policy</a> <a href="#">string</a> <a href="#">servers</a> <a href="#">server</a> <a href="#">number</a> <a href="#">purpose</a> <a href="#">accounting</a> <a href="#">udp-port</a> <a href="#">number</a>
Tree	<a href="#">udp-port</a>
Range	1 to 65535
Default	1813
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## authentication

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Enable the <b>authentication</b> context
Context	<b>configure</b> <a href="#">aaa</a> <a href="#">radius</a> <a href="#">isa-policy</a> <a href="#">string</a> <a href="#">servers</a> <a href="#">server</a> <a href="#">number</a> <a href="#">purpose</a> <a href="#">authentication</a>
Tree	<a href="#">authentication</a>
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## udp-port *number*

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	ISA RADIUS server authentication UDP port
Context	<b>configure</b> <a href="#">aaa</a> <a href="#">radius</a> <a href="#">isa-policy</a> <a href="#">string</a> <a href="#">servers</a> <a href="#">server</a> <a href="#">number</a> <a href="#">purpose</a> <a href="#">authentication</a> <a href="#">udp-port</a> <a href="#">number</a>
Tree	<a href="#">udp-port</a>
Range	1 to 65535
Default	1812
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**coa****WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Enable the <b>coa</b> context
Context	<b>configure</b> <a href="#">aaa radius isa-policy string servers server number purpose coa</a>
Tree	<a href="#">coa</a>
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**udp-port** *number***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	ISA RADIUS server change of authorization UDP port
Context	<b>configure</b> <a href="#">aaa radius isa-policy string servers server number purpose coa udp-port number</a>
Tree	<a href="#">udp-port</a>
Range	1 to 65535
Default	3799
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**secret** *string***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Secret key to access the RADIUS server
Context	<b>configure</b> <a href="#">aaa radius isa-policy string servers server number secret string</a>
Tree	<a href="#">secret</a>
String Length	1 to 115
Introduced	16.0.R4

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **source-address-range** *string*

Synopsis Starting IP address of the IP address range  
Context **configure** [aaa radius isa-policy](#) *string* [servers](#) [source-address-range](#) *string*  
Tree [source-address-range](#)  
Introduced 16.0.R4  
Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **timeout** *number*

Synopsis Timeout for a response from the RADIUS server  
Context **configure** [aaa radius isa-policy](#) *string* [servers](#) [timeout](#) *number*  
Tree [timeout](#)  
Range 1 to 90  
Units seconds  
Default 5  
Introduced 16.0.R4  
Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **total-tries** *number*

Synopsis Maximum number of tries toward the same RADIUS server  
Context **configure** [aaa radius isa-policy](#) *string* [servers](#) [total-tries](#) *number*  
Tree [total-tries](#)  
Range 1 to 10  
Default 3  
Introduced 16.0.R4  
Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **user-name**

Synopsis Enter the **user-name** context  
Context **configure** [aaa radius isa-policy](#) *string* [user-name](#)

Tree	<a href="#">user-name</a>
Description	Commands in this context define the format of the username field in the UE authentication request sent to the RADIUS server. For authentication of IPv6 triggers (ICMPv6, DHCPv6, IPv6 data-trigger) the username format will always fall back to MAC only.
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **format** *keyword*

Synopsis	Username format in RADIUS message
Context	<b>configure</b> <a href="#">aaa</a> <a href="#">radius</a> <a href="#">isa-policy</a> <i>string</i> <a href="#">user-name</a> <b>format</b> <i>keyword</i>
Tree	<a href="#">format</a>
Options	mac, mac-ip, dhcp-vendor, circuit-id
Default	mac
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **mac-format** *keyword*

Synopsis	MAC address format when contacting RADIUS server
Context	<b>configure</b> <a href="#">aaa</a> <a href="#">radius</a> <a href="#">isa-policy</a> <i>string</i> <a href="#">user-name</a> <b>mac-format</b> <i>keyword</i>
Tree	<a href="#">mac-format</a>
Options	alu, ieee
Default	alu
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **l2tp-accounting-policy** [[name](#)] *string*

Synopsis	Enter the <b>l2tp-accounting-policy</b> list instance
Context	<b>configure</b> <a href="#">aaa</a> <a href="#">radius</a> <b>l2tp-accounting-policy</b> <i>string</i>
Tree	<a href="#">l2tp-accounting-policy</a>
Max. Instances	32
Introduced	16.0.R4

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **[name]** *string*

Synopsis L2TP RADIUS accounting policy name  
 Context **configure** [aaa radius l2tp-accounting-policy](#) *string*  
 Tree [l2tp-accounting-policy](#)  
 String Length 1 to 32  
 Notes This element is part of a list key.  
 Introduced 16.0.R4  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **accounting-type**

Synopsis Enter the **accounting-type** context  
 Context **configure** [aaa radius l2tp-accounting-policy](#) *string* [accounting-type](#)  
 Tree [accounting-type](#)  
 Introduced 16.0.R4  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **session** *boolean*

Synopsis Enable per-session accounting  
 Context **configure** [aaa radius l2tp-accounting-policy](#) *string* [accounting-type](#) [session](#) *boolean*  
 Tree [session](#)  
 Default true  
 Introduced 16.0.R4  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **tunnel** *boolean*

Synopsis Enable per-tunnel accounting  
 Context **configure** [aaa radius l2tp-accounting-policy](#) *string* [accounting-type](#) [tunnel](#) *boolean*  
 Tree [tunnel](#)  
 Default true

Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **acct-tunnel-connection-fmt** *string*

Synopsis	Accounting tunnel connection ASCII specification
Context	<b>configure</b> <a href="#">aaa radius l2tp-accounting-policy</a> <i>string</i> <a href="#">acct-tunnel-connection-fmt</a> <i>string</i>
Tree	<a href="#">acct-tunnel-connection-fmt</a>
String Length	1 to 253
Default	%n
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">aaa radius l2tp-accounting-policy</a> <i>string</i> <a href="#">description</a> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **include-radius-attribute**

Synopsis	Enter the <b>include-radius-attribute</b> context
Context	<b>configure</b> <a href="#">aaa radius l2tp-accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute</a>
Tree	<a href="#">include-radius-attribute</a>
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **calling-station-id** *boolean*

Synopsis	Include the Calling-Station-Id attribute
Context	<b>configure</b> <a href="#">aaa radius l2tp-accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute</a> <a href="#">calling-station-id</a> <i>boolean</i>
Tree	<a href="#">calling-station-id</a>

Default	false
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**nas-identifier** *boolean*

Synopsis	Include the NAS-Identifier attribute
Context	<b>configure</b> <a href="#">aaa</a> <a href="#">radius</a> <a href="#">l2tp-accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute</a> <a href="#">nas-identifier</a> <i>boolean</i>
Tree	<a href="#">nas-identifier</a>
Default	false
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**nas-port**

Synopsis	Enable the <b>nas-port</b> context
Context	<b>configure</b> <a href="#">aaa</a> <a href="#">radius</a> <a href="#">l2tp-accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute</a> <a href="#">nas-port</a>
Tree	<a href="#">nas-port</a>
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**bit-spec** *string*

Synopsis	RADIUS NAS-Port attribute
Context	<b>configure</b> <a href="#">aaa</a> <a href="#">radius</a> <a href="#">l2tp-accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute</a> <a href="#">nas-port</a> <a href="#">bit-spec</a> <i>string</i>
Tree	<a href="#">bit-spec</a>
String Length	1 to 255
Notes	This element is mandatory.
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**nas-port-id**

Synopsis	Enable the <b>nas-port-id</b> context
----------	---------------------------------------

Context	<b>configure</b> <a href="#">aaa radius l2tp-accounting-policy string include-radius-attribute nas-port-id</a>
Tree	<a href="#">nas-port-id</a>
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **prefix-string** *string*

Synopsis	Prefix string added to RADIUS NAS-Port attribute
Context	<b>configure</b> <a href="#">aaa radius l2tp-accounting-policy string include-radius-attribute nas-port-id prefix-string string</a>
Tree	<a href="#">prefix-string</a>
String Length	1 to 8
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **suffix** *keyword*

Synopsis	NAS-Port-Id suffix type
Context	<b>configure</b> <a href="#">aaa radius l2tp-accounting-policy string include-radius-attribute nas-port-id suffix keyword</a>
Tree	<a href="#">suffix</a>
Options	circuit-id, remote-id
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **nas-port-type**

Synopsis	Enable the <b>nas-port-type</b> context
Context	<b>configure</b> <a href="#">aaa radius l2tp-accounting-policy string include-radius-attribute nas-port-type</a>
Tree	<a href="#">nas-port-type</a>
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **type** (*keyword* | *number*)

Synopsis	Value for RADIUS NAS-Port-Type attribute
----------	--

Context	<b>configure</b> <b>aaa radius l2tp-accounting-policy</b> <i>string</i> <b>include-radius-attribute</b> <b>nas-port-type</b> <b>type</b> ( <i>keyword</i>   <i>number</i> )
Tree	<b>type</b>
Range	0 to 255
Options	rfc-aligned
Default	rfc-aligned
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **radius-server-policy** *reference*

Synopsis	RADIUS server policy referenced
Context	<b>configure</b> <b>aaa radius l2tp-accounting-policy</b> <i>string</i> <b>radius-server-policy</b> <i>reference</i>
Tree	<b>radius-server-policy</b>
Reference	<b>configure</b> <b>aaa radius server-policy</b> <i>string</i>
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **route-downloader** [**name**] *string*

Synopsis	Enter the <b>route-downloader</b> list instance
Context	<b>configure</b> <b>aaa radius route-downloader</b> <i>string</i>
Tree	<b>route-downloader</b>
Max. Instances	1
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **[name]** *string*

Synopsis	RADIUS route downloader name
Context	<b>configure</b> <b>aaa radius route-downloader</b> <i>string</i>
Tree	<b>route-downloader</b>
String Length	1 to 32
Notes	This element is part of a list key.

Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **admin-state** *keyword*

Synopsis	Administrative state of this route downloader
Context	<b>configure</b> <a href="#">aaa radius route-downloader</a> <i>string</i> <b>admin-state</b> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **base-user-name** *string*

Synopsis	Prefix of the username used as access requests
Context	<b>configure</b> <a href="#">aaa radius route-downloader</a> <i>string</i> <b>base-user-name</b> <i>string</i>
Tree	<a href="#">base-user-name</a>
Description	This command sets the prefix for the username that is used for access requests. The actual name used is a concatenation of this string, the "-" (dash) character and a monotonically increasing integer.
String Length	1 to 32
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **default-metric** *number*

Synopsis	Default metric that RTM imported routes acquire
Context	<b>configure</b> <a href="#">aaa radius route-downloader</a> <i>string</i> <b>default-metric</b> <i>number</i>
Tree	<a href="#">default-metric</a>
Range	0 to 254
Default	2
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**default-tag** *number*

Synopsis	Default tag of this route downloader
Context	<b>configure</b> <a href="#">aaa radius route-downloader</a> <i>string default-tag number</i>
Tree	<a href="#">default-tag</a>
Range	0 to 4294967295
Default	0
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">aaa radius route-downloader</a> <i>string description string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**download-interval** *number*

Synopsis	Wait time between consecutive runs of the process
Context	<b>configure</b> <a href="#">aaa radius route-downloader</a> <i>string download-interval number</i>
Tree	<a href="#">download-interval</a>
Range	1 to 1440
Units	minutes
Default	720
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**max-routes** *number*

Synopsis	Maximum routes imported by this route downloader
Context	<b>configure</b> <a href="#">aaa radius route-downloader</a> <i>string max-routes number</i>
Tree	<a href="#">max-routes</a>
Range	1 to 200000

Default	200000
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **password** *string*

Synopsis	Route downloader password for RADIUS access requests
Context	<b>configure</b> <a href="#">aaa radius route-downloader</a> <i>string password string</i>
Tree	<a href="#">password</a>
String Length	1 to 71
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **radius-server-policy** *reference*

#### **WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	RADIUS server policy referenced
Context	<b>configure</b> <a href="#">aaa radius route-downloader</a> <i>string radius-server-policy reference</i>
Tree	<a href="#">radius-server-policy</a>
Reference	<b>configure</b> <a href="#">aaa radius server-policy</a> <i>string</i>
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **retry-interval**

Synopsis	Enter the <b>retry-interval</b> context
Context	<b>configure</b> <a href="#">aaa radius route-downloader</a> <i>string retry-interval</i>
Tree	<a href="#">retry-interval</a>
Description	Commands in this context configure parameters of the retry interval timer, which is an exponential backoff timer. The system retries sending an Access Request message after the previous message was unanswered (for example, a RADIUS failure or ICMP port unreachable error).
Introduced	16.0.R4

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **max number**

Synopsis Maximum duration of the retry interval

Context **configure** [aaa radius route-downloader](#) *string* [retry-interval](#) **max** *number*

Tree [max](#)

Range 1 to 1440

Units minutes

Default 20

Introduced 16.0.R4

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **min number**

Synopsis Minimum duration of the retry interval

Context **configure** [aaa radius route-downloader](#) *string* [retry-interval](#) **min** *number*

Tree [min](#)

Description This command specifies the minimum duration of the retry interval. This duration grows exponentially after each sequential failure.

Range 1 to 1440

Units minutes

Default 10

Introduced 16.0.R4

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **server-policy** [[name](#)] *string*

Synopsis Enter the **server-policy** list instance

Context **configure** [aaa radius server-policy](#) *string*

Tree [server-policy](#)

Max. Instances 32

Introduced 16.0.R4

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**[name]** *string*

Synopsis	RADIUS server policy name
Context	<b>configure</b> <a href="#">aaa radius server-policy</a> <i>string</i>
Tree	<a href="#">server-policy</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**acct-on-off**

Synopsis	Enable the <b>acct-on-off</b> context
Context	<b>configure</b> <a href="#">aaa radius server-policy</a> <i>string</i> <b>acct-on-off</b>
Tree	<a href="#">acct-on-off</a>
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**monitor** *reference***WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Accounting on/off group name
Context	<b>configure</b> <a href="#">aaa radius server-policy</a> <i>string</i> <b>acct-on-off</b> <b>monitor</b> <i>reference</i>
Tree	<a href="#">monitor</a>
Reference	<b>configure</b> <a href="#">aaa radius acct-on-off-group</a> <i>string</i>
Notes	The following elements are part of a choice: <b>monitor</b> or <b>oper-state-change</b> .
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**oper-state-change**

Synopsis	Enable the <b>oper-state-change</b> context
Context	<b>configure</b> <a href="#">aaa radius server-policy</a> <i>string</i> <b>acct-on-off</b> <b>oper-state-change</b>

Tree	<a href="#">oper-state-change</a>
Notes	The following elements are part of a choice: <b>monitor</b> or <b>oper-state-change</b> .
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### group *reference*

#### **WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Operational state for a group
Context	<b>configure</b> <a href="#">aaa radius server-policy</a> <i>string</i> <a href="#">acct-on-off oper-state-change group</a> <i>reference</i>
Tree	<a href="#">group</a>
Reference	<b>configure</b> <a href="#">aaa radius acct-on-off-group</a> <i>string</i>
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### description *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">aaa radius server-policy</a> <i>string</i> <a href="#">description</a> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### python-policy *reference*

Synopsis	Python policy for RADIUS packets to/from RADIUS servers
Context	<b>configure</b> <a href="#">aaa radius server-policy</a> <i>string</i> <a href="#">python-policy</a> <i>reference</i>
Tree	<a href="#">python-policy</a>
Reference	<b>configure</b> <a href="#">python</a> <a href="#">python-policy</a> <i>string</i>
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## servers

Synopsis	Enter the <b>servers</b> context
Context	<b>configure</b> <a href="#">aaa radius server-policy</a> <i>string</i> <a href="#">servers</a>
Tree	<a href="#">servers</a>
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## access-algorithm *keyword*

Synopsis	Algorithm to select a RADIUS server from the pool
Context	<b>configure</b> <a href="#">aaa radius server-policy</a> <i>string</i> <a href="#">servers</a> <a href="#">access-algorithm</a> <i>keyword</i>
Tree	<a href="#">access-algorithm</a>
Options	direct, round-robin, hash-based
Default	direct
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## buffering

Synopsis	Enter the <b>buffering</b> context
Context	<b>configure</b> <a href="#">aaa radius server-policy</a> <i>string</i> <a href="#">servers</a> <a href="#">buffering</a>
Tree	<a href="#">buffering</a>
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## acct-interim

Synopsis	Enable the <b>acct-interim</b> context
Context	<b>configure</b> <a href="#">aaa radius server-policy</a> <i>string</i> <a href="#">servers</a> <a href="#">buffering</a> <a href="#">acct-interim</a>
Tree	<a href="#">acct-interim</a>
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **lifetime number**

Synopsis	Time accounting message can be in retransmission buffer
Context	<b>configure</b> <a href="#">aaa radius server-policy</a> <i>string</i> <a href="#">servers buffering acct-interim lifetime number</a>
Tree	<a href="#">lifetime</a>
Range	1 to 25
Units	hours
Notes	This element is mandatory.
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **max number**

Synopsis	Maximum time between accounting message resend attempts
Context	<b>configure</b> <a href="#">aaa radius server-policy</a> <i>string</i> <a href="#">servers buffering acct-interim max number</a>
Tree	<a href="#">max</a>
Range	1 to 3600
Units	seconds
Notes	This element is mandatory.
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **min number**

Synopsis	Minimum time between accounting message resend attempts
Context	<b>configure</b> <a href="#">aaa radius server-policy</a> <i>string</i> <a href="#">servers buffering acct-interim min number</a>
Tree	<a href="#">min</a>
Range	1 to 3600
Units	seconds
Notes	This element is mandatory.
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## acct-start

Synopsis	Enable the <b>acct-start</b> context
Context	<b>configure</b> <a href="#">aaa radius server-policy</a> <i>string</i> <a href="#">servers buffering acct-start</a>
Tree	<a href="#">acct-start</a>
Introduced	20.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## lifetime number

Synopsis	Time accounting message can be in retransmission buffer
Context	<b>configure</b> <a href="#">aaa radius server-policy</a> <i>string</i> <a href="#">servers buffering acct-start lifetime</a> <i>number</i>
Tree	<a href="#">lifetime</a>
Range	1 to 25
Units	hours
Notes	This element is mandatory.
Introduced	20.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## max number

Synopsis	Maximum time between accounting message resend attempts
Context	<b>configure</b> <a href="#">aaa radius server-policy</a> <i>string</i> <a href="#">servers buffering acct-start max</a> <i>number</i>
Tree	<a href="#">max</a>
Range	1 to 3600
Units	seconds
Notes	This element is mandatory.
Introduced	20.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## min number

Synopsis	Minimum time between accounting message resend attempts
Context	<b>configure</b> <a href="#">aaa radius server-policy</a> <i>string</i> <a href="#">servers buffering acct-start min</a> <i>number</i>
Tree	<a href="#">min</a>
Range	1 to 3600

Units	seconds
Notes	This element is mandatory.
Introduced	20.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **acct-stop**

Synopsis	Enable the <b>acct-stop</b> context
Context	<b>configure</b> <a href="#">aaa radius server-policy</a> <i>string</i> <a href="#">servers buffering acct-stop</a>
Tree	<a href="#">acct-stop</a>
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **lifetime number**

Synopsis	Time accounting message can be in retransmission buffer
Context	<b>configure</b> <a href="#">aaa radius server-policy</a> <i>string</i> <a href="#">servers buffering acct-stop lifetime number</a>
Tree	<a href="#">lifetime</a>
Range	1 to 25
Units	hours
Notes	This element is mandatory.
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **max number**

Synopsis	Maximum time between accounting message resend attempts
Context	<b>configure</b> <a href="#">aaa radius server-policy</a> <i>string</i> <a href="#">servers buffering acct-stop max number</a>
Tree	<a href="#">max</a>
Range	1 to 3600
Units	seconds
Notes	This element is mandatory.
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **min number**

Synopsis	Minimum time between accounting message resend attempts
Context	<b>configure</b> <a href="#">aaa radius server-policy</a> <i>string</i> <a href="#">servers buffering acct-stop</a> <i>min number</i>
Tree	<a href="#">min</a>
Range	1 to 3600
Units	seconds
Notes	This element is mandatory.
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **health-check**

Synopsis	Enter the <b>health-check</b> context
Context	<b>configure</b> <a href="#">aaa radius server-policy</a> <i>string</i> <a href="#">servers health-check</a>
Tree	<a href="#">health-check</a>
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **down-timeout number**

Synopsis	Wait time before declaring RADIUS server out-of-service
Context	<b>configure</b> <a href="#">aaa radius server-policy</a> <i>string</i> <a href="#">servers health-check down-timeout</a> <i>number</i>
Tree	<a href="#">down-timeout</a>
Range	1 to 340
Units	seconds
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **test-account**

Synopsis	Enter the <b>test-account</b> context
Context	<b>configure</b> <a href="#">aaa radius server-policy</a> <i>string</i> <a href="#">servers health-check test-account</a>
Tree	<a href="#">test-account</a>
Introduced	16.0.R4

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **admin-state** *keyword*

Synopsis Administrative state of the health check

Context **configure** [aaa radius server-policy](#) *string* [servers health-check test-account admin-state](#) *keyword*

Tree [admin-state](#)

Options enable, disable

Default disable

Introduced 16.0.R4

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **interval** *number*

Synopsis Time for test account to check health of RADIUS servers

Context **configure** [aaa radius server-policy](#) *string* [servers health-check test-account interval](#) *number*

Tree [interval](#)

Range 1 to 60

Units seconds

Default 3

Introduced 16.0.R4

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **password** *string*

Synopsis Test account password for RADIUS server health check

Context **configure** [aaa radius server-policy](#) *string* [servers health-check test-account password](#) *string*

Tree [password](#)

String Length 1 to 115

Introduced 16.0.R4

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**user-name** *string*

Synopsis	Username to send access requests to probe RADIUS server
Context	<b>configure</b> <a href="#">aaa radius server-policy</a> <i>string</i> <a href="#">servers health-check test-account user-name</a> <i>string</i>
Tree	<a href="#">user-name</a>
String Length	1 to 64
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**hold-down-time** *number*

Synopsis	Hold time before reusing a RADIUS server that was down
Context	<b>configure</b> <a href="#">aaa radius server-policy</a> <i>string</i> <a href="#">servers hold-down-time</a> <i>number</i>
Tree	<a href="#">hold-down-time</a>
Range	30 to 86400
Units	seconds
Default	30
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**ipv6-source-address** *string*

Synopsis	Source address for IPv6 RADIUS datagrams
Context	<b>configure</b> <a href="#">aaa radius server-policy</a> <i>string</i> <a href="#">servers ipv6-source-address</a> <i>string</i>
Tree	<a href="#">ipv6-source-address</a>
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**retry-count** *number*

Synopsis	Number of retries for contacting the RADIUS server
Context	<b>configure</b> <a href="#">aaa radius server-policy</a> <i>string</i> <a href="#">servers retry-count</a> <i>number</i>
Tree	<a href="#">retry-count</a>
Range	1 to 256
Default	3

Introduced 16.0.R4  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **router-instance** *string*

Synopsis RADIUS routing instance  
 Context **configure** [aaa radius server-policy](#) *string* [servers router-instance](#) *string*  
 Tree [router-instance](#)  
 Introduced 16.0.R4  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **server** [[server-index](#)] *number*

Synopsis Enter the **server** list instance  
 Context **configure** [aaa radius server-policy](#) *string* [servers server](#) *number*  
 Tree [server](#)  
 Max. Instances 32  
 Introduced 16.0.R4  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **[server-index]** *number*

Synopsis RADIUS server index  
 Context **configure** [aaa radius server-policy](#) *string* [servers server](#) *number*  
 Tree [server](#)  
 Range 1 to 16  
 Notes This element is part of a list key.  
 Introduced 16.0.R4  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **server-name** *string*

Synopsis RADIUS server name  
 Context **configure** [aaa radius server-policy](#) *string* [servers server](#) *number* [server-name](#) *string*

Tree	<a href="#">server-name</a>
String Length	1 to 32
Notes	This element is mandatory.
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **source-address** *string*

Synopsis	Source address of RADIUS messages
Context	<b>configure</b> <a href="#">aaa radius server-policy</a> <i>string</i> <a href="#">servers</a> <a href="#">source-address</a> <i>string</i>
Tree	<a href="#">source-address</a>
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **stickiness** *boolean*

Synopsis	Allow stickiness in a multi-server application
Context	<b>configure</b> <a href="#">aaa radius server-policy</a> <i>string</i> <a href="#">servers</a> <a href="#">stickiness</a> <i>boolean</i>
Tree	<a href="#">stickiness</a>
Default	true
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **timeout** *number*

Synopsis	Time until the next retry to the RADIUS server
Context	<b>configure</b> <a href="#">aaa radius server-policy</a> <i>string</i> <a href="#">servers</a> <a href="#">timeout</a> <i>number</i>
Tree	<a href="#">timeout</a>
Range	1 to 340
Units	seconds
Default	5
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## wpp

Synopsis	Enter the <b>wpp</b> context
Context	<b>configure</b> <a href="#">aaa wpp</a>
Tree	<a href="#">wpp</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## portal-group [[group-name](#)] *string*

Synopsis	Enter the <b>portal-group</b> list instance
Context	<b>configure</b> <a href="#">aaa wpp portal-group</a> <i>string</i>
Tree	<a href="#">portal-group</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## [[group-name](#)] *string*

Synopsis	Portal group name
Context	<b>configure</b> <a href="#">aaa wpp portal-group</a> <i>string</i>
Tree	<a href="#">portal-group</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## admin-state *keyword*

Synopsis	Administrative state of the portal group
Context	<b>configure</b> <a href="#">aaa wpp portal-group</a> <i>string</i> <b>admin-state</b> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">aaa wpp portal-group</a> <i>string</i> <a href="#">description</a> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**portal** [[router-instance](#)] *string* [name](#) *string*

Synopsis	Add a list entry for <b>portal</b>
Context	<b>configure</b> <a href="#">aaa wpp portal-group</a> <i>string</i> <a href="#">portal</a> <i>string</i> <a href="#">name</a> <i>string</i>
Tree	<a href="#">portal</a>
Max. Instances	8
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**[[router-instance](#)]** *string*

Synopsis	Router on which the portal is configured
Context	<b>configure</b> <a href="#">aaa wpp portal-group</a> <i>string</i> <a href="#">portal</a> <i>string</i> <a href="#">name</a> <i>string</i>
Tree	<a href="#">portal</a>
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**name** *string*

Synopsis	Web portal server name
Context	<b>configure</b> <a href="#">aaa wpp portal-group</a> <i>string</i> <a href="#">portal</a> <i>string</i> <a href="#">name</a> <i>string</i>
Tree	<a href="#">portal</a>
String Length	1 to 32
Notes	This element is part of a list key.

---

Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **system-name** *string*

Synopsis System name used in WPP protocol messages  
Context **configure** *aaa wpp system-name string*  
Tree *system-name*  
String Length 1 to 16  
Introduced 16.0.R6  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## 3.2 anysec commands

```
configure
- anysec
  - apply-groups reference
  - apply-groups-exclude reference
  - mka-over-ip
    - mka-udp-port number
  - reserved-label-block reference
  - tunnel-encryption
    - encryption-group string
      - admin-state keyword
      - apply-groups reference
      - apply-groups-exclude reference
      - ca-name reference
      - encryption-label number
      - peer (ipv4-address-no-zone | ipv6-address-no-zone)
        - admin-state keyword
        - apply-groups reference
        - apply-groups-exclude reference
      - peer-tunnel-attributes
        - flex-algo-id number
        - igp-instance-id number
        - protocol keyword
      - security-termination-policy reference
    - security-termination-policy string
      - admin-state keyword
      - apply-groups reference
      - apply-groups-exclude reference
      - flex-algo-id number
      - igp-instance-id number
      - local-address (ipv4-address-no-zone | ipv6-address-no-zone)
      - protocol keyword
      - rx-must-be-encrypted boolean
```

### 3.2.1 anysec command descriptions

#### anysec

Synopsis	Enter the <b>anysec</b> context
Context	<b>configure anysec</b>
Tree	<a href="#">anysec</a>
Introduced	23.3.R1
Platforms	7750 SR-1-24D, 7750 SR-1-46S, 7750 SR-1-48D, 7750 SR-1-92S, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-1se

#### mka-over-ip

Synopsis	Enter the <b>mka-over-ip</b> context
Context	<b>configure anysec mka-over-ip</b>
Tree	<a href="#">mka-over-ip</a>
Introduced	23.3.R1
Platforms	7750 SR-1-24D, 7750 SR-1-46S, 7750 SR-1-48D, 7750 SR-1-92S, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-1se

#### mka-udp-port *number*

Synopsis	ANYSec MKA UDP port
Context	<b>configure anysec mka-over-ip mka-udp-port <i>number</i></b>
Tree	<a href="#">mka-udp-port</a>
Description	This command configures the UDP port that identifies the MKA packet on the system. Nokia recommends configuring this UDP port network wide. In addition, ensure the UDP port is not used by any other protocols in the network.
Range	1024 to 49151
Introduced	23.3.R1
Platforms	7750 SR-1-24D, 7750 SR-1-46S, 7750 SR-1-48D, 7750 SR-1-92S, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-1se

#### reserved-label-block *reference*

Synopsis	ANYSec reserved label block
----------	-----------------------------

Context	<b>configure anysec reserved-label-block</b> <i>reference</i>
Tree	<a href="#">reserved-label-block</a>
Description	<p>This command assigns the label block that is reserved for the ANYsec encryption SID. Without this reserved block, ANYsec cannot assign any encryption SIDs. The encryption SID uniquely identifies the encrypting node within a network and avoids double encryption scenarios. The encryption SID can be assigned per encryption group. However, all encryption groups can have the same encryption SID.</p> <p>To save label space, Nokia recommends limiting the number of encryption SIDs within a network.</p>
Reference	<b>configure router</b> <i>string</i> <a href="#">mpls-labels reserved-label-block</a> <i>string</i>
Introduced	23.3.R1
Platforms	7750 SR-1-24D, 7750 SR-1-46S, 7750 SR-1-48D, 7750 SR-1-92S, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-1se

## tunnel-encryption

Synopsis	Enter the <b>tunnel-encryption</b> context
Context	<b>configure anysec tunnel-encryption</b>
Tree	<a href="#">tunnel-encryption</a>
Introduced	23.3.R1
Platforms	7750 SR-1-24D, 7750 SR-1-46S, 7750 SR-1-48D, 7750 SR-1-92S, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-1se

## encryption-group [[group-name](#)] *string*

Synopsis	Enter the <b>encryption-group</b> list instance
Context	<b>configure anysec tunnel-encryption encryption-group</b> <i>string</i>
Tree	<a href="#">encryption-group</a>
Description	<p>Commands in this context create an encryption group.</p> <p>An encryption group is a group of LSPs that use the same CA and preshared keys (PSK). For ease of PSK management, SR OS allows a group of LSPs to use the same CA with the same PSKs. The PSK is used to secure the SAK for distribution to other PEERs.</p> <p>Note: Although the LSPs are unidirectional, ANYsec is a bidirectional concept where a pair of LSPs between two peers are encrypted and decrypted. Each pair of LSPs uses its own SAK for maximum security, although they may share the same CA and PSK with all other LSPs in the encryption group to secure the SAK.</p>
Max. Instances	1023

Introduced	23.3.R1
Platforms	7750 SR-1-24D, 7750 SR-1-46S, 7750 SR-1-48D, 7750 SR-1-92S, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-1se

### **[group-name]** *string*

Synopsis	ANYsec encryption group name
Context	<b>configure</b> <a href="#">anysec</a> <a href="#">tunnel-encryption</a> <a href="#">encryption-group</a> <i>string</i>
Tree	<a href="#">encryption-group</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	23.3.R1
Platforms	7750 SR-1-24D, 7750 SR-1-46S, 7750 SR-1-48D, 7750 SR-1-92S, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-1se

### **admin-state** *keyword*

Synopsis	Administrative state of the encryption group
Context	<b>configure</b> <a href="#">anysec</a> <a href="#">tunnel-encryption</a> <a href="#">encryption-group</a> <i>string</i> <b>admin-state</b> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	23.3.R2
Platforms	7750 SR-1-24D, 7750 SR-1-46S, 7750 SR-1-48D, 7750 SR-1-92S, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-1se

### **ca-name** *reference*

#### **WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Connectivity association for the encryption group
Context	<b>configure</b> <a href="#">anysec</a> <a href="#">tunnel-encryption</a> <a href="#">encryption-group</a> <i>string</i> <b>ca-name</b> <i>reference</i>
Tree	<a href="#">ca-name</a>
Description	This command configures the CA used for this encryption group. A CA must be configured with the keyword <b>anysec</b> for use in the encryption group.

Reference	<b>configure</b> <a href="#">macsec connectivity-association</a> <i>string</i>
Introduced	23.3.R1
Platforms	7750 SR-1-24D, 7750 SR-1-46S, 7750 SR-1-48D, 7750 SR-1-92S, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-1se

## encryption-label *number*

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Label identifying packets sent from the node to peers
Context	<b>configure</b> <a href="#">anysec tunnel-encryption encryption-group</a> <i>string encryption-label number</i>
Tree	<a href="#">encryption-label</a>
Description	<p>This command creates an encryption SD for the encryption group.</p> <p>The encryption SID uniquely identifies the encrypting node within a network to avoid double encryption scenarios. The encryption SID can be assigned per encryption group. However, all encryption groups can have the same encryption SID. To save label space, Nokia recommends limiting the number of encryption SIDs within a network. To configure the encryption SID, a <b>reserved-label-block</b> command must be configured under the <b>anysec</b> context. The encryption SID is programmed at the bottom of the stack with the S-it set.</p>
Range	32 to 1048575
Introduced	23.3.R1
Platforms	7750 SR-1-24D, 7750 SR-1-46S, 7750 SR-1-48D, 7750 SR-1-92S, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-1se

## peer [[peer-ip-address](#)] (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	Enter the <b>peer</b> list instance
Context	<b>configure</b> <a href="#">anysec tunnel-encryption encryption-group</a> <i>string peer (ipv4-address-no-zone   ipv6-address-no-zone)</i>
Tree	<a href="#">peer</a>
Max. Instances	1023
Introduced	23.3.R1
Platforms	7750 SR-1-24D, 7750 SR-1-46S, 7750 SR-1-48D, 7750 SR-1-92S, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-1se

**[peer-ip-address]** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	Peer IP address of the node SID
Context	<b>configure</b> <a href="#">anysec</a> <a href="#">tunnel-encryption</a> <a href="#">encryption-group</a> <i>string</i> <a href="#">peer</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	<a href="#">peer</a>
Description	<p>This command configures the IPv4 or IPv6 address of the node SID of the peer that is part of this encryption group.</p> <p>This configuration identifies the segment routing node SID of the peer and programs the egress label stack for matching on the FP5 for encrypting the LSP.</p> <p>When the label stack is downloaded, the encryption SID is also included at the bottom of the stack with the S-bit set.</p>
Notes	This element is part of a list key.
Introduced	23.3.R1
Platforms	7750 SR-1-24D, 7750 SR-1-46S, 7750 SR-1-48D, 7750 SR-1-92S, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-1se

**admin-state** *keyword*

Synopsis	Administrative state of the encryption group peer
Context	<b>configure</b> <a href="#">anysec</a> <a href="#">tunnel-encryption</a> <a href="#">encryption-group</a> <i>string</i> <a href="#">peer</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <a href="#">admin-state</a> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	23.3.R1
Platforms	7750 SR-1-24D, 7750 SR-1-46S, 7750 SR-1-48D, 7750 SR-1-92S, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-1se

**peer-tunnel-attributes****WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Enter the <b>peer-tunnel-attributes</b> context
Context	<b>configure</b> <a href="#">anysec</a> <a href="#">tunnel-encryption</a> <a href="#">encryption-group</a> <i>string</i> <a href="#">peer-tunnel-attributes</a>
Tree	<a href="#">peer-tunnel-attributes</a>

Description	Commands in this context configure the peer-tunnel attributes. Tunnel attributes are used to match and identify the outgoing tunnels for encryptoin with ANYsec. A single tunnel attribute is used for multiple peers. Since an LSP is unidirectional, the outgoing tunnel can have different attributes from the incoming tunnel (for example, security termination policy).
Introduced	23.3.R1
Platforms	7750 SR-1-24D, 7750 SR-1-46S, 7750 SR-1-48D, 7750 SR-1-92S, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-1se

### flex-algo-id *number*

#### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Flexible algorithm ID
Context	<b>configure</b> anysec tunnel-encryption encryption-group <i>string</i> peer-tunnel-attributes flex-algo-id <i>number</i>
Tree	flex-algo-id
Description	This command configures the flexible algorithm ID. This ID must match the local terminating ANYsec tunnel.
Range	128 to 255
Introduced	23.3.R1
Platforms	7750 SR-1-24D, 7750 SR-1-46S, 7750 SR-1-48D, 7750 SR-1-92S, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-1se

### igp-instance-id *number*

#### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	IGP instance ID
Context	<b>configure</b> anysec tunnel-encryption encryption-group <i>string</i> peer-tunnel-attributes igp-instance-id <i>number</i>
Tree	igp-instance-id
Description	This command configures the IGP instance ID. This IGP instance ID must match the IGP instance that the incoming encrypted LSP was signaled on.
Range	0 to 31   64 to 95

Introduced	23.3.R1
Platforms	7750 SR-1-24D, 7750 SR-1-46S, 7750 SR-1-48D, 7750 SR-1-92S, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-1se

### **protocol** *keyword*

#### **WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Protocol used to advertise node SID of incoming tunnel
Context	<b>configure</b> <a href="#">anysec</a> <a href="#">tunnel-encryption</a> <a href="#">encryption-group</a> <i>string</i> <a href="#">peer-tunnel-attributes</a> <b>protocol</b> <i>keyword</i>
Tree	<a href="#">protocol</a>
Options	sr-ospf, sr-ospf3, sr-isis
Default	sr-isis
Introduced	23.10.R1
Platforms	7750 SR-1-24D, 7750 SR-1-46S, 7750 SR-1-48D, 7750 SR-1-92S, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-1se

### **security-termination-policy** *reference*

#### **WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Security termination policy used by encryption group
Context	<b>configure</b> <a href="#">anysec</a> <a href="#">tunnel-encryption</a> <a href="#">encryption-group</a> <i>string</i> <a href="#">security-termination-policy</a> <i>reference</i>
Tree	<a href="#">security-termination-policy</a>
Reference	<b>configure</b> <a href="#">anysec</a> <a href="#">tunnel-encryption</a> <a href="#">security-termination-policy</a> <i>string</i>
Introduced	23.3.R1
Platforms	7750 SR-1-24D, 7750 SR-1-46S, 7750 SR-1-48D, 7750 SR-1-92S, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-1se

### **security-termination-policy** [[policy-name](#)] *string*

Synopsis	Enter the <b>security-termination-policy</b> list instance
----------	--

Context	<b>configure anysec tunnel-encryption security-termination-policy</b> <i>string</i>
Tree	<a href="#">security-termination-policy</a>

### **[policy-name]** *string*

Synopsis	ANYsec security termination policy name
Context	<b>configure anysec tunnel-encryption security-termination-policy</b> <i>string</i>
Tree	<a href="#">security-termination-policy</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	23.3.R1
Platforms	7750 SR-1-24D, 7750 SR-1-46S, 7750 SR-1-48D, 7750 SR-1-92S, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-1se

### **admin-state** *keyword*

Synopsis	Administrative state of the security termination policy
Context	<b>configure anysec tunnel-encryption security-termination-policy</b> <i>string</i> <b>admin-state</b> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	23.3.R1
Platforms	7750 SR-1-24D, 7750 SR-1-46S, 7750 SR-1-48D, 7750 SR-1-92S, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-1se

### **flex-algo-id** *number*

#### **WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Flexible algorithm ID
Context	<b>configure</b> anysec tunnel-encryption security-termination-policy <i>string</i> flex-algo-id <i>number</i>
Tree	flex-algo-id
Description	This command configures the flexible algorithm ID. This ID must match the local terminating ANYsec tunnel.
Range	128 to 255
Introduced	23.3.R1
Platforms	7750 SR-1-24D, 7750 SR-1-46S, 7750 SR-1-48D, 7750 SR-1-92S, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-1se

### igp-instance-id *number*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	IGP instance ID
Context	<b>configure</b> anysec tunnel-encryption security-termination-policy <i>string</i> igp-instance-id <i>number</i>
Tree	igp-instance-id
Description	This command configures the IGP instance ID. This IGP instance ID must match the IGP instance that the incoming encrypted LSP was signaled on.
Range	0 to 31   64 to 95
Introduced	23.3.R1
Platforms	7750 SR-1-24D, 7750 SR-1-46S, 7750 SR-1-48D, 7750 SR-1-92S, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-1se

### local-address (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Local address of node SID associated with ANYsec tunnel
Context	<b>configure</b> anysec tunnel-encryption security-termination-policy <i>string</i> local-address ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	local-address

Description	This command configures the local IPv4 or IPv6 address for the system IP or loopback node SID. This is used to program the FP5 label stack to match the incoming ANYsec tunnel and decryption of the tunnel.
Introduced	23.3.R1
Platforms	7750 SR-1-24D, 7750 SR-1-46S, 7750 SR-1-48D, 7750 SR-1-92S, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-1se

### **protocol** *keyword*

#### **WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Protocol used to advertise node SID of incoming tunnel
Context	<b>configure</b> <a href="#">anysec</a> <a href="#">tunnel-encryption</a> <a href="#">security-termination-policy</a> <i>string</i> <b>protocol</b> <i>keyword</i>
Tree	<a href="#">protocol</a>
Options	sr-ospf, sr-ospf3, sr-isis
Default	sr-isis
Introduced	23.10.R1
Platforms	7750 SR-1-24D, 7750 SR-1-46S, 7750 SR-1-48D, 7750 SR-1-92S, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-1se

### **rx-must-be-encrypted** *boolean*

Synopsis	Enforce encryption for received packets
Context	<b>configure</b> <a href="#">anysec</a> <a href="#">tunnel-encryption</a> <a href="#">security-termination-policy</a> <i>string</i> <b>rx-must-be-encrypted</b> <i>boolean</i>
Tree	<a href="#">rx-must-be-encrypted</a>
Description	When configured to <b>true</b> , the router accepts all arriving traffic that is ANYsec secured on the port. All other traffic is dropped. When configured to <b>false</b> , the router accepts all arriving traffic on the port.
Default	false
Introduced	23.3.R1
Platforms	7750 SR-1-24D, 7750 SR-1-46S, 7750 SR-1-48D, 7750 SR-1-92S, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-1se

### 3.3 application-assurance commands

```

configure

### 3.3.1 application-assurance command descriptions

#### application-assurance

Synopsis	Enter the <b>application-assurance</b> context
Context	<b>configure</b> <a href="#">application-assurance</a>
Tree	<a href="#">application-assurance</a>
Description	Commands in this context configure the attributes of Application Assurance (AA) operations.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

#### **aarp** [[aarp-id](#)] *number*

Synopsis	Enter the <b>aarp</b> list instance
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">aarp</a> <i>number</i>
Tree	<a href="#">aarp</a>
Description	Commands in this context define an Application Assurance Redundancy Protocol (AARP) instance. This instance is paired with the same AARP ID in a peer node, as part of the configuration to provide flow and packet asymmetry removal for traffic of a multi-homed SAP or spoke SDP.
Max. Instances	100
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

#### [\[aarp-id\]](#) *number*

Synopsis	AARP ID
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">aarp</a> <i>number</i>
Tree	<a href="#">aarp</a>
Range	1 to 65535
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**admin-state** *keyword*

Synopsis	Administrative state of the AARP instance
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">aarp</a> <i>number</i> <b>admin-state</b> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">aarp</a> <i>number</i> <b>description</b> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**master-selection-mode** *keyword***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	AARP master selection mode
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">aarp</a> <i>number</i> <b>master-selection-mode</b> <i>keyword</i>
Tree	<a href="#">master-selection-mode</a>
Description	This command configures the AARP mode of operation with the peer instance. The modes affect the AARP state machine behavior according to the specified behavior.
Options	minimize-switchovers, inter-chassis-efficiency, priority-based-balance
Default	minimize-switchovers
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**peer** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	AARP peer IP address
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">aarp</a> <i>number</i> <b>peer</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	<a href="#">peer</a>
Description	This command defines the IP address of the AARP peer router, which must be a routable system IP address. If no peer is configured when the AARP is administratively enabled, it is configured as a single node AARP instance.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**peer-endpoint**

Synopsis	Enter the <b>peer-endpoint</b> context
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">aarp</a> <i>number</i> <b>peer-endpoint</b>
Tree	<a href="#">peer-endpoint</a>
Description	Commands in this context specify the attributes of the peer endpoint parent AA subscriber of the AARP peer.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**sap**

Synopsis	Enable the <b>sap</b> context
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">aarp</a> <i>number</i> <b>peer-endpoint</b> <b>sap</b>
Tree	<a href="#">sap</a>
Notes	The following elements are part of a choice: <b>sap</b> or <b>spoke-sdp</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**encap-type** *keyword*

Synopsis	Encapsulation type for peer endpoint SAP
----------	--

Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">aarp</a> <i>number</i> <a href="#">peer-endpoint</a> <a href="#">sap</a> <a href="#">encap-type</a> <i>keyword</i>
Tree	<a href="#">encap-type</a>
Options	null, dot1q, qinq
Notes	This element is mandatory.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **sap-id** *string*

Synopsis	AARP peer endpoint SAP ID
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">aarp</a> <i>number</i> <a href="#">peer-endpoint</a> <a href="#">sap</a> <a href="#">sap-id</a> <i>string</i>
Tree	<a href="#">sap-id</a>
String Length	1 to 45
Notes	This element is mandatory.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **spoke-sdp** *string*

Synopsis	AARP peer endpoint spoke SDP
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">aarp</a> <i>number</i> <a href="#">peer-endpoint</a> <a href="#">spoke-sdp</a> <i>string</i>
Tree	<a href="#">spoke-sdp</a>
String Length	3 to 16
Notes	The following elements are part of a choice: <b>sap</b> or <b>spoke-sdp</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **priority** *number*

#### **WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	AARP priority
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">aarp</a> <i>number</i> <a href="#">priority</a> <i>number</i>

Tree	<a href="#">priority</a>
Description	This command defines the priority for the AARP instance. The priority value is used to determine the master and backup upon initialization or rebalance.
Range	0 to 255
Default	100
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## **cflowd**

Synopsis	Enter the <b>cflowd</b> context
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">cflowd</a>
Tree	<a href="#">cflowd</a>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## **field** [[field-name](#)] *string*

Synopsis	Enter the <b>field</b> list instance
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">cflowd</a> <a href="#">field</a> <i>string</i>
Tree	<a href="#">field</a>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## **[field-name]** *string*

Synopsis	Cflowd record field name
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">cflowd</a> <a href="#">field</a> <i>string</i>
Tree	<a href="#">field</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**comment** *string*

Synopsis	User information comment
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">cflowd field</a> <i>string</i> <b>comment</b> <i>string</i>
Tree	<a href="#">comment</a>
String Length	1 to 32
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**flow-attribute**

Synopsis	Enter the <b>flow-attribute</b> context
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">flow-attribute</a>
Tree	<a href="#">flow-attribute</a>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**attribute** [[attribute-name](#)] *string*

Synopsis	Enter the <b>attribute</b> list instance
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">flow-attribute</a> <a href="#">attribute</a> <i>string</i>
Tree	<a href="#">attribute</a>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**[attribute-name]** *string*

Synopsis	Attribute name
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">flow-attribute</a> <a href="#">attribute</a> <i>string</i>
Tree	<a href="#">attribute</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**comment** *string*

Synopsis	User information comment
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">flow-attribute</a> <a href="#">attribute</a> <i>string</i> <b>comment</b> <i>string</i>
Tree	<a href="#">comment</a>
String Length	1 to 32
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**group** [[aa-group-id](#)] *number*

Synopsis	Enter the <b>group</b> list instance
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i>
Tree	<a href="#">group</a>
Description	Commands in this context configure an Application Assurance group and partition parameters.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**[aa-group-id]** *number*

Synopsis	AA group ID
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i>
Tree	<a href="#">group</a>
Range	1 to 255
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**certificate-profile** [[cert-prof-name](#)] *string*

Synopsis	Enter the <b>certificate-profile</b> list instance
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">certificate-profile</a> <i>string</i>
Tree	<a href="#">certificate-profile</a>
Description	Commands in this context create a certificate profile to be used for certificate-based encryption in HTTP header enrichment.

Introduced 21.10.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **[cert-prof-name]** *string*

Synopsis AA group certificate profile name  
Context **configure** [application-assurance](#) [group](#) *number* [certificate-profile](#) *string*  
Tree [certificate-profile](#)  
String Length 1 to 32  
Notes This element is part of a list key.  
Introduced 21.10.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **admin-state** *keyword*

Synopsis Administrative state of the AA certificate profile  
Context **configure** [application-assurance](#) [group](#) *number* [certificate-profile](#) *string* **admin-state** *keyword*  
Tree [admin-state](#)  
Options enable, disable  
Default disable  
Introduced 21.10.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **description** *string*

Synopsis Text description  
Context **configure** [application-assurance](#) [group](#) *number* [certificate-profile](#) *string* **description** *string*  
Tree [description](#)  
String Length 1 to 80  
Introduced 21.10.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**file string****WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Certificate file name
Context	<b>configure</b> <a href="#">application-assurance group number certificate-profile string file string</a>
Tree	<a href="#">file</a>
String Length	1 to 95
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**cflowd**

Synopsis	Enter the <b>cflowd</b> context
Context	<b>configure</b> <a href="#">application-assurance group number cflowd</a>
Tree	<a href="#">cflowd</a>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**admin-state keyword**

Synopsis	Administrative state of cflowd export
Context	<b>configure</b> <a href="#">application-assurance group number cflowd admin-state keyword</a>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**collector [ip-address] (ipv4-address-no-zone | ipv6-address-no-zone) port number**

Synopsis	Enter the <b>collector</b> list instance
Context	<b>configure</b> <a href="#">application-assurance group number cflowd collector (ipv4-address-no-zone   ipv6-address-no-zone) port number</a>
Tree	<a href="#">collector</a>

Description	<p>Commands in this context configure flow data collectors for cflowd data.</p> <p>In the current release, the system supports IPv4 addresses only for the cflowd collector host.</p> <p>In the current release, the system supports IPv4 addresses only for the cflowd collector host.</p>
Max. Instances	2
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### [**ip-address**] (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	IP address of the remote cflowd collector host
Context	<b>configure</b> <a href="#">application-assurance group</a> <i>number</i> <a href="#">cflowd collector</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <a href="#">port number</a>
Tree	<a href="#">collector</a>
Description	<p>This command configures the IP address of the remote cflowd collector host.</p> <p>In the current release, the system supports IPv4 addresses only for the cflowd collector host.</p>
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **port number**

Synopsis	Cflowd collector host port number
Context	<b>configure</b> <a href="#">application-assurance group</a> <i>number</i> <a href="#">cflowd collector</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <a href="#">port number</a>
Tree	<a href="#">collector</a>
Description	This command configures the UDP port number used by the remote cflowd collector host.
Range	1 to 65535
MD-CLI Default	4739
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**admin-state** *keyword*

Synopsis	Administrative state of the cflowd export
Context	<b>configure</b> <a href="#">application-assurance group number cflowd collector</a> ( <a href="#">ipv4-address-no-zone</a>   <a href="#">ipv6-address-no-zone</a> ) <a href="#">port number admin-state keyword</a>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">application-assurance group number cflowd collector</a> ( <a href="#">ipv4-address-no-zone</a>   <a href="#">ipv6-address-no-zone</a> ) <a href="#">port number description string</a>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**comprehensive**

Synopsis	Enter the <b>comprehensive</b> context
Context	<b>configure</b> <a href="#">application-assurance group number cflowd comprehensive</a>
Tree	<a href="#">comprehensive</a>
Description	Commands in this context configure cflowd comprehensive records output parameters.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**flow-rate** *number*

Synopsis	Cflowd flow sampling rate
Context	<b>configure</b> <a href="#">application-assurance group number cflowd comprehensive flow-rate number</a>
Tree	<a href="#">flow-rate</a>
Range	1 to 1000

Units	flows per second
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **flow-rate-2** *number*

Synopsis	Cflowd per-flow second sampling rate
Context	<b>configure</b> <a href="#">application-assurance group</a> <i>number</i> <a href="#">cflowd comprehensive flow-rate-2</a> <i>number</i>
Tree	<a href="#">flow-rate-2</a>
Range	1 to 1000
Units	flows per second
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **template**

Synopsis	Enter the <b>template</b> context
Context	<b>configure</b> <a href="#">application-assurance group</a> <i>number</i> <a href="#">cflowd comprehensive template</a>
Tree	<a href="#">template</a>
Description	Commands in this context configure the template for comprehensive fields.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **dynamic-fields**

Synopsis	Enter the <b>dynamic-fields</b> context
Context	<b>configure</b> <a href="#">application-assurance group</a> <i>number</i> <a href="#">cflowd comprehensive template</a> <a href="#">dynamic-fields</a>
Tree	<a href="#">dynamic-fields</a>
Description	Commands in this context configure the fields that are included in the exported cflowd template.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**admin-state** *keyword*

Synopsis	Administrative state of the dynamic fields
Context	<b>configure</b> <a href="#">application-assurance group number cflowd comprehensive template dynamic-fields admin-state keyword</a>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**field** [[field-name](#)] *string*

Synopsis	Add a list entry for <b>field</b>
Context	<b>configure</b> <a href="#">application-assurance group number cflowd comprehensive template dynamic-fields field string</a>
Tree	<a href="#">field</a>
Description	This command adds a dynamic field to be included in the exported cflowd template.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**[field-name]** *string*

Synopsis	Cflowd template dynamic field name
Context	<b>configure</b> <a href="#">application-assurance group number cflowd comprehensive template dynamic-fields field string</a>
Tree	<a href="#">field</a>

Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **[collector-id]** *number*

Synopsis	Cflowd direct export collector ID
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">cflowd direct-export collector number</a>
Tree	<a href="#">collector</a>
Range	1 to 65535
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **address** [[ip-address](#)] (*ipv4-address-no-zone* | *ipv6-address-no-zone*) *port number*

Synopsis	Enter the <b>address</b> list instance
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">cflowd direct-export collector number</a> <a href="#">address (ipv4-address-no-zone   ipv6-address-no-zone) port number</a>
Tree	<a href="#">address</a>
Description	Commands in this context configure the cflowd direct export collector IP address. In the current release, the system supports IPv4 addresses only for the cflowd direct export collector.
Max. Instances	2
Introduced	21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **[ip-address]** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis IP address of the remote cflowd collector host

Context **configure** [application-assurance](#) [group](#) *number* [cflowd](#) [direct-export](#) [collector](#) *number* [address](#) (*ipv4-address-no-zone* | *ipv6-address-no-zone*) [port](#) *number*

Tree [address](#)

Description This command configures the IP address of the remote cflowd collector host.  
In the current release, the system supports IPv4 addresses only for the cflowd collector host.

Notes This element is part of a list key.

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **port number**

Synopsis Cflowd collector host port number

Context **configure** [application-assurance](#) [group](#) *number* [cflowd](#) [direct-export](#) [collector](#) *number* [address](#) (*ipv4-address-no-zone* | *ipv6-address-no-zone*) [port](#) *number*

Tree [address](#)

Description This command configures the UDP port number used by the remote cflowd collector host.

Range 1 to 65535

MD-CLI 4739

Default

Notes This element is part of a list key.

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **admin-state** *keyword*

Synopsis Administrative state of the direct export collector

Context **configure** [application-assurance](#) [group](#) *number* [cflowd](#) [direct-export](#) [collector](#) *number* [address](#) (*ipv4-address-no-zone* | *ipv6-address-no-zone*) [port](#) *number* [admin-state](#) *keyword*

Tree [admin-state](#)

Description	This command sets the administrative state of the cflowd direct export collector. In the current release, the system supports IPv4 addresses only for the cflowd direct export collector.
Options	enable, disable
Default	disable
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **description string**

Synopsis	Text description
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">cflowd direct-export collector number</a> <a href="#">description string</a>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **vlan-id number**

Synopsis	Cflowd direct export VLAN ID
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">cflowd direct-export vlan-id number</a>
Tree	<a href="#">vlan-id</a>
Range	1 to 4094
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **export-override**

Synopsis	Enter the <b>export-override</b> context
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">cflowd export-override</a>
Tree	<a href="#">export-override</a>
Description	Commands in this context configure the AA subtype used in the cflowd record export. The cflowd statistics exported to the cflowd collector look identical to AA for the type of system defined by the mode. The following cflowd export fields are affected: <ul style="list-style-type: none"> <li>The cflowd export observation point (field 138) mode is derived from the export-override category that is selected.</li> </ul>

- The cflowd export AA\_Subscriber\_Type (field 12) mode is modified as configured, using existing field types.
- The cflowd interface name is used as the sub-ID field, optionally modified to use the configured **mode** and **prefix** commands for global identifiers.

All AA cflowd record types are affected by export override. To change the export override or prefix, cflowd must first be disabled. When this command is set back to the default, the prefix is also set back to its default.

Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### mode keyword

#### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	AA cflowd export override mode
Context	<b>configure</b> application-assurance group number cflowd export-override mode keyword
Tree	mode
Description	This command specifies the type of system emulated for the cflowd export.
Options	mobile, ifname-obfuscate
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### prefix string

#### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	AA group cflowd export override prefix
Context	<b>configure</b> application-assurance group number cflowd export-override prefix string
Tree	prefix
Description	This command specifies the prefix-string associated with the export override. The prefix string specifies up to an 8 character string. If the 8 character prefix is "ABCDEFG_" for a particular node, the cflowd export override would generate IPv4 interface names such as ABCDEF_255.255.255.255 or IPv6 as ABCDEF_2001:DB8:EF01:2345::/64. By default, the prefix is left blank.
String Length	1 to 8

Introduced 21.10.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## obfuscation

Synopsis Enter the **obfuscation** context  
Context **configure** [application-assurance group number cflowd obfuscation](#)  
Tree [obfuscation](#)  
Introduced 21.10.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## aes-128-encryption-key *string*

Synopsis AES-128 encryption key  
Context **configure** [application-assurance group number cflowd obfuscation aes-128-encryption-key string](#)  
Tree [aes-128-encryption-key](#)  
Description This command specifies the AES-128 key used to encrypt export cflowd fields.  
String Length 51  
Introduced 21.10.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## aes-256-encryption-key *string*

Synopsis AES-256 encryption key  
Context **configure** [application-assurance group number cflowd obfuscation aes-256-encryption-key string](#)  
Tree [aes-256-encryption-key](#)  
Description This command specifies the AES-256 key used to encrypt exported cflowd fields.  
String Length 71  
Introduced 21.10.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## rtp-performance

Synopsis Enter the **rtp-performance** context

Context	<b>configure</b> <a href="#">application-assurance group number cflowd rtp-performance</a>
Tree	<a href="#">rtp-performance</a>
Description	Commands in this context configure cflowd real-time transport protocol (RTP) performance export for the AA group.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## audio-template

Synopsis	Enter the <b>audio-template</b> context
Context	<b>configure</b> <a href="#">application-assurance group number cflowd rtp-performance audio-template</a>
Tree	<a href="#">audio-template</a>
Description	Commands in this context configure the fields to be included in the exported cflowd template.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## dynamic-fields

Synopsis	Enter the <b>dynamic-fields</b> context
Context	<b>configure</b> <a href="#">application-assurance group number cflowd rtp-performance audio-template dynamic-fields</a>
Tree	<a href="#">dynamic-fields</a>
Description	Commands in this context configure dynamic fields to be included in the exported cflowd template.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## admin-state *keyword*

Synopsis	Administrative state of the dynamic fields
Context	<b>configure</b> <a href="#">application-assurance group number cflowd rtp-performance audio-template dynamic-fields admin-state keyword</a>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable

Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **field** [[field-name](#)] *string*

Synopsis	Add a list entry for <b>field</b>
Context	<b>configure</b> <a href="#">application-assurance group number cflowd rtp-performance audio-template dynamic-fields field</a> <i>string</i>
Tree	<a href="#">field</a>
Description	This command adds a list entry for fields to include in the exported cflowd template.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

String Length	1 to 32
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**field-selection** *keyword*

Synopsis	Field selection method
Context	<b>configure</b> <a href="#">application-assurance group</a> <i>number</i> <a href="#">cflowd</a> <a href="#">rtp-performance</a> <a href="#">voice-template</a> <b>field-selection</b> <i>keyword</i>
Tree	<a href="#">field-selection</a>
Description	This command configures the method for selecting the fields to be included in the exported cflowd template.
Options	legacy, dynamic
Default	legacy
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**tcp-performance**

Synopsis	Enter the <b>tcp-performance</b> context
Context	<b>configure</b> <a href="#">application-assurance group</a> <i>number</i> <a href="#">cflowd</a> <b>tcp-performance</b>
Tree	<a href="#">tcp-performance</a>
Description	Commands in this context configure TCP performance parameters for the group cflowd export.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**flow-rate** *number*

Synopsis	Cflowd flow sampling rate
Context	<b>configure</b> <a href="#">application-assurance group</a> <i>number</i> <a href="#">cflowd</a> <a href="#">tcp-performance</a> <b>flow-rate</b> <i>number</i>
Tree	<a href="#">flow-rate</a>
Range	1 to 1000
Units	flows per second
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**flow-rate-2** *number*

Synopsis	Cflowd per-flow second sampling rate
----------	--------------------------------------

Context	<b>configure</b> <a href="#">application-assurance group number cflowd tcp-performance flow-rate-2</a> <i>number</i>
Tree	<a href="#">flow-rate-2</a>
Range	1 to 1000
Units	flows per second
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## template

Synopsis	Enter the <b>template</b> context
Context	<b>configure</b> <a href="#">application-assurance group number cflowd tcp-performance template</a>
Tree	<a href="#">template</a>
Description	Commands in this context configure the template for cflowd TCP performance fields.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## dynamic-fields

Synopsis	Enter the <b>dynamic-fields</b> context
Context	<b>configure</b> <a href="#">application-assurance group number cflowd tcp-performance template dynamic-fields</a>
Tree	<a href="#">dynamic-fields</a>
Description	Commands in this context configure the fields to be included in the exported cflowd template.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## admin-state *keyword*

Synopsis	Administrative state of the dynamic fields
Context	<b>configure</b> <a href="#">application-assurance group number cflowd tcp-performance template dynamic-fields admin-state keyword</a>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable

Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **field** [[field-name](#)] *string*

Synopsis	Add a list entry for <b>field</b>
Context	<b>configure</b> <a href="#">application-assurance group number cflowd tcp-performance template dynamic-fields field</a> <i>string</i>
Tree	<a href="#">field</a>
Description	This command adds a list entry for fields to include in the exported cflowd template.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **[field-name]** *string*

Synopsis	Cflowd template dynamic field name
Context	<b>configure</b> <a href="#">application-assurance group number cflowd tcp-performance template dynamic-fields field</a> <i>string</i>
Tree	<a href="#">field</a>
Description	<p>This command specifies the name of the field to be included in the exported cflowd template.</p> <ul style="list-style-type: none"> <li>• Common to all templates are the following values: flowStartSeconds   flowDuration Milliseconds   postIppPrecedence   aaProt   aaApp   aaAppGrp   hostName   hostName Extended   deviceId   deviceMfgId   deviceOsId   ipFamily   deviceOsVer1   device OsVer2   deviceOsVer3   aniType   aniTopology   aniCongestionState   apn   charge Id   mnc   imsi   msisdn   sgw-sgsnAddr   pgw-ggsnAddr   bsid   ratType   regionId   cellId   timeZone   aaChargingGrp   flowAttr_video   flowAttr_abr_service   flowAttr_audio   flowAttr_encrypted   flowAttr_download   flowAttr_upload   flowAttr_realtime_communication   aaSubTetheringState   imei   ipTTL   imei roamingStatus   mcc   uli   chargingChar   plmnid   customerId</li> <li>• When AA is deployed in FWA SR, the following value applies: ApnExtended</li> <li>• For the rtp-voice template only, the following values apply: flowStartSeconds   flowDuration Milliseconds   postIppPrecedence   aaProt   aaApp   aaAppGrp   rtpBurstCount   rtpAvgBurstLengthMs   rtpGapCount   rtpAvgGapLengthMs   MAPDV   RBurst   RGap   SSRC</li> <li>• For the rtp-video template only, the following values apply: flowStartSeconds   flowDuration Milliseconds   postIppPrecedence   aaProt   aaApp   aaAppGrp   rtpRefClockRate   MOSAV   VSTQ   estimatedPSNR   GoPType   avgGoPLength   avgInterIframeGap   imageWidth   imageHeight   frameRate   slicesPerIframe   SSRC   video Interlaced   IFrameReceived   IFrameImpaired   PFrameReceived   PFrameImpaired   BFrameReceived   BFrameImpaired   SIFrameReceived   SIFrameImpaired  </li> </ul>

SPFrameReceived | SPFrameImpaired | frameInterArrivalJitter | IFrameInterArrivalJitter | avgFrameArrivalDelay

- For the rtp-audio template only, the following values apply: flowStartSeconds | flowDurationMilliseconds | postIpPrecedence | aaProt | aaApp | aaAppGrp | rtpBurstCount | rtpAvgBurstLengthPkts | rtpGapCount | rtpAvgGapLengthPkts | PPDVM | rtpNumAudioChannels | rtpRefClockRate | rtpPeakAudioBw | SSRC | hostName
- For volume and comprehensive templates, the following values apply: tcpSessionEstDelay | tcpRetransmittedBytes | tcpRetransmittedPackets

String Length 1 to 32

Notes This element is part of a list key.

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **field-selection** *keyword*

Synopsis Field selection method

Context **configure** [application-assurance group number cflowd tcp-performance template field-selection keyword](#)

Tree [field-selection](#)

Description This command configures the method for selecting the fields to be included in the exported cflowd template.

Options legacy, dynamic

Default legacy

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **template-retransmit** *number*

Synopsis Template retransmit time

Context **configure** [application-assurance group number cflowd template-retransmit number](#)

Tree [template-retransmit](#)

Range 10 to 600

Units seconds

Default 600

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## volume

Synopsis	Enter the <b>volume</b> context
Context	<b>configure</b> <a href="#">application-assurance group number cflowd volume</a>
Tree	<a href="#">volume</a>
Description	Commands in this context configure the cflowd volume export.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## rate number

Synopsis	Cflowd packet sampling rate
Context	<b>configure</b> <a href="#">application-assurance group number cflowd volume rate number</a>
Tree	<a href="#">rate</a>
Range	1 to 10000
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## template

Synopsis	Enter the <b>template</b> context
Context	<b>configure</b> <a href="#">application-assurance group number cflowd volume template</a>
Tree	<a href="#">template</a>
Description	Commands in this context configure the template for cflowd volume fields.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## dynamic-fields

Synopsis	Enter the <b>dynamic-fields</b> context
Context	<b>configure</b> <a href="#">application-assurance group number cflowd volume template dynamic-fields</a>
Tree	<a href="#">dynamic-fields</a>
Description	Commands in this context configure the fields to be included in the exported cflowd template.
Introduced	21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **admin-state** *keyword*

Synopsis Administrative state of the dynamic fields

Context **configure** [application-assurance](#) [group](#) [number](#) [cflowd](#) [volume](#) [template](#) [dynamic-fields](#)  
**admin-state** *keyword*

Tree [admin-state](#)

Options enable, disable

Default disable

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **field** [[field-name](#)] *string*

Synopsis Add a list entry for **field**

Context **configure** [application-assurance](#) [group](#) [number](#) [cflowd](#) [volume](#) [template](#) [dynamic-fields](#)  
**field** *string*

Tree [field](#)

Description This command adds a list entry for the fields to be included in the exported cflowd template.

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **[field-name]** *string*

Synopsis Cflowd template dynamic field name

Context **configure** [application-assurance](#) [group](#) [number](#) [cflowd](#) [volume](#) [template](#) [dynamic-fields](#)  
**field** *string*

Tree [field](#)

Description This command specifies the name of the field to be included in the exported cflowd template.

- Common to all templates are the following values: flowStartSeconds | flowDuration Milliseconds | postItpPrecedence | aaProt | aaApp | aaAppGrp | hostName | hostName Extended | deviceId | deviceMfgId | deviceOsId | ipFamily | deviceOsVer1 | device OsVer2 | deviceOsVer3 | aniType | aniTopology | aniCongestionState | apn | charge Id | mnc | imsi | msisdn | sgw-sgsnAddr | pgw-ggsnAddr | bsid | ratType | regionId | cellId | timeZone | aaChargingGrp | flowAttr\_video | flowAttr\_abr\_service | flowAttr\_audio | flowAttr\_encrypted | flowAttr\_download | flowAttr\_upload | flowAttr\_realtime\_

communication | aaSubTetheringState | imei| ipTTL | imei roamingStatus | mcc | uli | chargingChar | plmnid| customerId

- When AA is deployed in FWA SR, the following value applies: ApnExtended
- For the rtp-voice template only, the following values apply: flowStartSeconds | flowDurationMilliseconds | postIpPrecedence | aaProt | aaApp | aaAppGrp | rtpBurstCount| rtpAvgBurstLengthMs | rtpGapCount | rtpAvgGapLengthMs |MAPDV | RBurst | RGap | SSRC
- For the rtp-video template only, the following values apply: flowStartSeconds | flowDurationMilliseconds | postIpPrecedence | aaProt | aaApp | aaAppGrp | rtpRefClockRate | MOSAV | VSTQ | estimatedPSNR | GoPType | avgGoPLength | avgInterFrameGap | imageWidth| imageHeight | frameRate |slicesPerIFrame | SSRC |video Interlaced | IFrameReceived | IFrameImpaired | PFrameReceived | PFrameImpaired | BFrameReceived |BFrameImpaired | SIFrameReceived | SIFrameImpaired | SPFrameReceived | SPFrameImpaired |frameInterArrivalJitter| IFrameInterArrival Jitter | avgFrameArrivalDelay
- For the rtp-audio template only, the following values apply: flowStartSeconds | flowDurationMilliseconds | postIpPrecedence | aaProt | aaApp | aaAppGrp | rtpBurstCount| rtpAvgBurstLengthPkts | rtpGapCount |rtpAvgGapLengthPkts | PPDVM | rtpNumAudioChannels |rtpRefClockRate |rtpPeakAudioBw | SSRC | hostName
- For volume and comprehensive templates, the following values apply: tcpSessionEstDelay | tcpRetransmittedBytes |tcpRetransmittedPackets

String Length 1 to 32

Notes This element is part of a list key.

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### field-selection *keyword*

Synopsis Field selection method

Context **configure** [application-assurance group](#) *number* [cflowd](#) [volume](#) [template](#) [field-selection keyword](#)

Tree [field-selection](#)

Description This command configures the method for selecting the fields to be included in the exported cflowd template.

Options legacy, dynamic

Default legacy

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**dns-ip-cache** [**dns-ip-cache-name**] *string*

Synopsis	Enter the <b>dns-ip-cache</b> list instance
Context	<b>configure</b> <a href="#">application-assurance group number dns-ip-cache string</a>
Tree	<a href="#">dns-ip-cache</a>
Description	Commands in this context configure a DNS IP cache that is used to snoop DNS requests generated by subscribers, to populate a cache of IP addresses that match a specified list of domain names. In the context of strengthening URL-content charging, Operators may also specify a list of trusted DNS servers to populate the DNS IP cache.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**[dns-ip-cache-name]** *string*

Synopsis	DNS IP cache name within the AA group
Context	<b>configure</b> <a href="#">application-assurance group number dns-ip-cache string</a>
Tree	<a href="#">dns-ip-cache</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**admin-state** *keyword*

Synopsis	Administrative state of the AA DNS IP cache object
Context	<b>configure</b> <a href="#">application-assurance group number dns-ip-cache string admin-state keyword</a>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">application-assurance group number dns-ip-cache string description string</a>

Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## dns-match

Synopsis	Enter the <b>dns-match</b> context
Context	<b>configure</b> <a href="#">application-assurance group number dns-ip-cache string dns-match</a>
Tree	<a href="#">dns-match</a>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## domain [[domain-name](#)] *string*

Synopsis	Enter the <b>domain</b> list instance
Context	<b>configure</b> <a href="#">application-assurance group number dns-ip-cache string dns-match domain string</a>
Tree	<a href="#">domain</a>
Description	Commands in this context configure a domain expression to populate the DNS IP cache.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## [[domain-name](#)] *string*

Synopsis	DNS IP cache domain name
Context	<b>configure</b> <a href="#">application-assurance group number dns-ip-cache string dns-match domain string</a>
Tree	<a href="#">domain</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**expression string**

Synopsis	AA DNS domain expression to match
Context	<b>configure application-assurance group number dns-ip-cache string dns-match domain string expression string</b>
Tree	<b>expression</b>
Description	This command specifies a domain name expression string used to define a pattern match. The domain expression uses the same syntax as the expressions used in <b>configure application-assurance group partition policy app-filter entry app-filters</b> configuration.
String Length	1 to 255
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**trusted-server-address [dns-server-address] (ipv4-address-no-zone | ipv6-address-no-zone)**

Synopsis	Enter the <b>trusted-server-address</b> list instance
Context	<b>configure application-assurance group number dns-ip-cache string dns-match trusted-server-address (ipv4-address-no-zone   ipv6-address-no-zone)</b>
Tree	<b>trusted-server-address</b>
Description	Commands in this context configure a trusted DNS server address. DNS responses from this DNS server are used to populate the DNS IP cache.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**[dns-server-address] (ipv4-address-no-zone | ipv6-address-no-zone)**

Synopsis	Trusted DNS server address
Context	<b>configure application-assurance group number dns-ip-cache string dns-match trusted-server-address (ipv4-address-no-zone   ipv6-address-no-zone)</b>
Tree	<b>trusted-server-address</b>
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**server-name** *string*

Synopsis	DNS server name
Context	<b>configure</b> <a href="#">application-assurance group number dns-ip-cache string dns-match trusted-server-address (ipv4-address-no-zone   ipv6-address-no-zone) server-name string</a>
Tree	<a href="#">server-name</a>
String Length	1 to 32
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**ip-cache**

Synopsis	Enter the <b>ip-cache</b> context
Context	<b>configure</b> <a href="#">application-assurance group number dns-ip-cache string ip-cache</a>
Tree	<a href="#">ip-cache</a>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**high-watermark** *number*

Synopsis	High watermark value for the DNS IP cache
Context	<b>configure</b> <a href="#">application-assurance group number dns-ip-cache string ip-cache high-watermark number</a>
Tree	<a href="#">high-watermark</a>
Description	This command configures the high watermark value for the DNS IP cache. When the number of cached IP addresses exceeds the threshold, the system generates a trap.
Range	0 to 100
Default	90
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**low-watermark** *number*

Synopsis	Low watermark value for the DNS IP cache
Context	<b>configure</b> <a href="#">application-assurance group number dns-ip-cache string ip-cache low-watermark number</a>
Tree	<a href="#">low-watermark</a>

Description	This command configures the low watermark value for the DNS IP cache. When the number of cached IP addresses exceeds the high watermark threshold, the system generates a trap based on the high watermark. The trap clears after the number of cached IP addresses drops below the configured low watermark value.
Range	0 to 100
Default	80
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**size number**

Synopsis	Maximum number of IP addresses stored in the cache
Context	<b>configure</b> <a href="#">application-assurance group number dns-ip-cache string ip-cache size number</a>
Tree	<a href="#">size</a>
Range	10 to 64000
Default	10
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**static-address** [[static-ip-address](#)] (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	Add a list entry for <b>static-address</b>
Context	<b>configure</b> <a href="#">application-assurance group number dns-ip-cache string ip-cache static-address (ipv4-address-no-zone   ipv6-address-no-zone)</a>
Tree	<a href="#">static-address</a>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**[static-ip-address]** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	Trusted IP address for the DNS IP cache
Context	<b>configure</b> <a href="#">application-assurance group number dns-ip-cache string ip-cache static-address (ipv4-address-no-zone   ipv6-address-no-zone)</a>
Tree	<a href="#">static-address</a>

Description	This command configures an IP address to be used as a trusted IP address. For packets whose destination IP address matches that of the trusted IP address, a cache hit is assumed.
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **http-enrich** [[http-enrich-name](#)] *string*

Synopsis	Enter the <b>http-enrich</b> list instance
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">http-enrich</a> <i>string</i>
Tree	<a href="#">http-enrich</a>
Description	Commands in this context configure the attributes of the HTTP enrichment policy.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **[http-enrich-name]** *string*

Synopsis	HTTP header enrichment policy name
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">http-enrich</a> <i>string</i>
Tree	<a href="#">http-enrich</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **admin-state** *keyword*

Synopsis	Administrative state of the HTTP enrichment policy
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">http-enrich</a> <i>string</i> <a href="#">admin-state</a> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">application-assurance group number http-enrich string description string</a>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**field** [[field-name](#)] *string*

Synopsis	Enter the <b>field</b> list instance
Context	<b>configure</b> <a href="#">application-assurance group number http-enrich string field string</a>
Tree	<a href="#">field</a>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**[field-name]** *string*

Synopsis	Field name to insert into the HTTP header
Context	<b>configure</b> <a href="#">application-assurance group number http-enrich string field string</a>
Tree	<a href="#">field</a>
Description	<p>This command specifies the field type to insert into the HTTP header. The command must be repeated for each field to be inserted. The same field cannot be inserted twice into the header under different header names.</p> <p><b>Note:</b> AA can insert two copies of the following fields in the same HTTP header (with a different header name):</p> <p>imei-hyphenated, imei-hyphenated-2, imsi, imsi-2, static-string, static-string-2, user-location-raw, and user-location-raw2.</p> <p>The following field types are supported in any deployment:</p> <p>static-string - header name for the inserted string</p> <p>static-string-2 - header name for the inserted string</p> <p>subscriber-id - header name for the subscriber ID</p> <p>subscriber-ip - header name for the subscriber IP address</p> <p>The following field types are supported in Fixed Wireless Access (FWA) deployments only:</p> <p>apn - complete APN string</p>

apn-ni - APN Network Identifier (APN-NI) used by the UE  
 billing-type - UE charging type (charging characteristics)  
 dynamic-acr - dynamic Anonymous Customer Record (ACR)  
 static-acr - static ACR  
 imei-hyphenated - subscriber IMEI with format AABBBBBB-CCCCCC-EE  
 imei-hyphenated-2 - subscriber IMEI with format AABBBBBB-CCCCCC-EE  
 imei-sv - subscriber IMEI with format AABBBBBBCCCCCEE  
 imsi - subscriber IMSI  
 imsi-2 - subscriber IMSI  
 msisdn - subscriber MSISDN  
 msisdn-ts - subscriber MSISDN appended with the UNIX timestamp  
 msisdn-without-cc - subscriber MSISDN without a country code  
 pgw-ggsn-address - PGW/GGSN address serving the UE  
 plmn-id - Public Land Mobile Network (PLMN) ID of the SGSN/MME  
 rat-type - Radio Access Technology (RAT) type  
 timestamp - timestamp inserted in UNIX time format; for example, 1531204313  
 user-location - UE LOCATION (ULI)  
 user-location-3gpp - ULI encoded as defined in 3GPP 29.061  
 user-location-raw - ULI in raw format:<ULI-TYPE1>[+<ULI-TYPE2>]=<ULI HEX>  
 Example: x-locinfo: TAI+ECGI=1300622c46130062014adf16  
 user-location-raw-2 - ULI in raw format:<ULI-TYPE1>[+<ULI-TYPE2>]=<ULI HEX>  
 Example: x-locinfo: TAI+ECGI=1300622c46130062014adf16

String Length	1 to 32
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **aes-initialization-vector** *string*

Synopsis	Initialization vector for the AES CBC encryption
Context	<b>configure</b> <i>application-assurance</i> <i>group</i> <i>number</i> <i>http-enrich</i> <i>string</i> <i>field</i> <i>string</i> <b>aes-initialization-vector</b> <i>string</i>
Tree	<a href="#">aes-initialization-vector</a>
Description	This command configures the initialization vector used for the AES CBC encryption. The vector consists of 34 characters, that is, 0x followed by exactly 32 hexadecimal characters.

String Length	34
Introduced	22.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **anti-spoof** *boolean*

Synopsis	Enable anti-spoofing
Context	<b>configure</b> <a href="#">application-assurance group number http-enrich string field string anti-spoof boolean</a>
Tree	<a href="#">anti-spoof</a>
Description	When configured to <b>true</b> , this command enables the HTTP header enrichment anti-spoofing functionality.
Default	false
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **calling-line-id** *boolean*

Synopsis	Enable calling line identification
Context	<b>configure</b> <a href="#">application-assurance group number http-enrich string field string calling-line-id boolean</a>
Tree	<a href="#">calling-line-id</a>
Description	When configured to <b>true</b> , this command configures the HTTP header for “x-up-calling-line-id” anti-spoofing.
Default	false
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **encode**

Synopsis	Enter the <b>encode</b> context
Context	<b>configure</b> <a href="#">application-assurance group number http-enrich string field string encode</a>
Tree	<a href="#">encode</a>
Description	Commands in this context configure the encoding applied to the HTTP header enrichment field.
Introduced	21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **cert-base64** *reference*

Synopsis Certificate profile name

Context **configure** [application-assurance group number](#) [http-enrich string field string encode](#) [cert-base64 reference](#)

Tree [cert-base64](#)

Reference **configure** [application-assurance group number](#) [certificate-profile string](#)

Notes The following elements are part of a choice: **cert-base64**, **cert-profile**, or **key**.

Introduced 23.3.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **cert-profile** *reference*

Synopsis Certificate profile name used for encryption

Context **configure** [application-assurance group number](#) [http-enrich string field string encode](#) [cert-profile reference](#)

Tree [cert-profile](#)

Reference **configure** [application-assurance group number](#) [certificate-profile string](#)

Notes The following elements are part of a choice: **cert-base64**, **cert-profile**, or **key**.

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **key**

Synopsis Enter the **key** context

Context **configure** [application-assurance group number](#) [http-enrich string field string encode](#) [key](#)

Tree [key](#)

Description Commands in this context configure the encryption fields.

Notes The following elements are part of a choice: **cert-base64**, **cert-profile**, or **key**.

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**type keyword**

Synopsis	Encoding type
Context	<b>configure</b> <a href="#">application-assurance group number http-enrich string field string encode key type keyword</a>
Tree	<a href="#">type</a>
Description	This command configures the encoding/ encryption method.
Options	md5, rc4, rc4-md5-base64, aes128, aes256, aes128cbc, aes256cbc
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**value string**

Synopsis	Secret key for encrypting the field
Context	<b>configure</b> <a href="#">application-assurance group number http-enrich string field string encode key value string</a>
Tree	<a href="#">value</a>
String Length	1 to 114
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**md5-salt string**

Synopsis	MD5 salt string
Context	<b>configure</b> <a href="#">application-assurance group number http-enrich string field string md5-salt string</a>
Tree	<a href="#">md5-salt</a>
Description	This command configures an MD5 salt string. The configured string is appended to the parameter before performing MD5 hashing of the field.
String Length	1 to 16
Introduced	22.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**name** *string***WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	HTTP header field name
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <a href="#">number</a> <a href="#">http-enrich</a> <a href="#">string</a> <a href="#">field</a> <a href="#">string</a> <a href="#">name</a> <a href="#">string</a>
Tree	<a href="#">name</a>
String Length	1 to 32
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**static-string** *string*

Synopsis	HTTP header enrichment template field static string
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <a href="#">number</a> <a href="#">http-enrich</a> <a href="#">string</a> <a href="#">field</a> <a href="#">string</a> <a href="#">static-string</a> <a href="#">string</a>
Tree	<a href="#">static-string</a>
String Length	1 to 16
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**rat-type-enrichment**

Synopsis	Enter the <b>rat-type-enrichment</b> context
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <a href="#">number</a> <a href="#">http-enrich</a> <a href="#">string</a> <a href="#">rat-type-enrichment</a>
Tree	<a href="#">rat-type-enrichment</a>
Description	Commands in this context configure Radio Access Type (RAT) enrichment.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**rat-type** [[rat-type-name](#)] *keyword*

Synopsis	Enter the <b>rat-type</b> list instance
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <a href="#">number</a> <a href="#">http-enrich</a> <a href="#">string</a> <a href="#">rat-type-enrichment</a> <a href="#">rat-type</a> <a href="#">keyword</a>

Tree	<a href="#">rat-type</a>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **[rat-type-name]** *keyword*

Synopsis	RAT type name
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">http-enrich</a> <i>string</i> <a href="#">rat-type-enrichment</a> <a href="#">rat-type</a> <i>keyword</i>
Tree	<a href="#">rat-type</a>
Description	This command configures a customised RAT value for the specified RAT-Type.
Options	utran, geran, wlan, gan, hspa-evol, eutran, virtual, eutran-nb, ehrpd, hrpd, cdma-1x, umb, wifi, nr, lte-m
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **rat-string** *string*

Synopsis	Customised RAT type value
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">http-enrich</a> <i>string</i> <a href="#">rat-type-enrichment</a> <a href="#">rat-type</a> <i>keyword</i> <a href="#">rat-string</a> <i>string</i>
Tree	<a href="#">rat-string</a>
String Length	1 to 31
Notes	This element is mandatory.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **http-error-redirect** [[http-error-redirect-name](#)] *string*

Synopsis	Enter the <b>http-error-redirect</b> list instance
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">http-error-redirect</a> <i>string</i>
Tree	<a href="#">http-error-redirect</a>
Description	Commands in this context configure an HTTP error redirect policy that contains important information relevant to the redirect server.
Introduced	21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **[http-error-redirect-name]** *string*

Synopsis HTTP error redirect policy name

Context **configure** [application-assurance group number](#) [http-error-redirect string](#)

Tree [http-error-redirect](#)

String Length 1 to 32

Notes This element is part of a list key.

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **admin-state** *keyword*

Synopsis Administrative state of the HTTP error redirect object

Context **configure** [application-assurance group number](#) [http-error-redirect string](#) [admin-state keyword](#)

Tree [admin-state](#)

Options enable, disable

Default disable

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **description** *string*

Synopsis Text description

Context **configure** [application-assurance group number](#) [http-error-redirect string](#) [description string](#)

Tree [description](#)

String Length 1 to 80

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **error-code** [[error-code-value](#)] *number*

Synopsis Enter the **error-code** list instance

Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">http-error-redirect</a> <i>string</i> <a href="#">error-code</a> <i>number</i>
Tree	<a href="#">error-code</a>
Description	Commands in this context configure the HTTP error status codes to which a redirect action is applied. Only messages with sizes less than that configured for the <b>custom-message-size</b> command are eligible for redirect action.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **[error-code-value]** *number*

Synopsis	HTTP error code value for an HTTP error redirect
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">http-error-redirect</a> <i>string</i> <a href="#">error-code</a> <i>number</i>
Tree	<a href="#">error-code</a>
Range	400 to 999
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **custom-message-size** *number*

Synopsis	HTTP error redirect error code custom message size
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">http-error-redirect</a> <i>string</i> <a href="#">error-code</a> <i>number</i> <a href="#">custom-message-size</a> <i>number</i>
Tree	<a href="#">custom-message-size</a>
Description	This command specifies the maximum message size above which an HTTP error redirect is not performed.
Max. Range	0 to 4294967295
Units	octets
Default	1024
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **http-host** *string*

Synopsis	HTTP host for the HTTP error redirect object
----------	--

Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">http-error-redirect string</a> <a href="#">http-host string</a>
Tree	<a href="#">http-host</a>
Description	This command specifies the HTTP hostname of the landing server (Barefruit or Xerocole). It is used in the HTTP GET operation from the client (which is being redirected) to the redirect search landing server. The hostname must contain a valid IP address or HTTP hostname or URI for the HTTP GET from the client to the landing server.
String Length	1 to 255
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **participant-id** *string*

Synopsis	Participant ID for the HTTP error redirect object
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">http-error-redirect string</a> <a href="#">participant-id string</a>
Tree	<a href="#">participant-id</a>
Description	This command specifies a string assigned to the operator by Barefruit. It is used by Barefruit landing servers (applies to template # 1 only).
String Length	1 to 32
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **template** *number*

Synopsis	Template ID for the HTTP error redirect object
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">http-error-redirect string</a> <a href="#">template number</a>
Tree	<a href="#">template</a>
Description	This command configures the template of parameters passed from the AA-ISA to the redirect server using JavaScript in the redirect packet. The template is specific to the redirect server used in the network. Currently, two partners are supported with AA-ISA redirect solution, Barefruit, and Xerocole.
Max. Range	0 to 4294967295
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**http-notification** [[http-notification-name](#)] *string*

Synopsis	Enter the <b>http-notification</b> list instance
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">http-notification string</a>
Tree	<a href="#">http-notification</a>
Description	Commands in this context configure an HTTP notification object for the subscriber in-browser notification.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**[http-notification-name]** *string*

Synopsis	HTTP notification policy name
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">http-notification string</a>
Tree	<a href="#">http-notification</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**admin-state** *keyword*

Synopsis	Administrative state of the AA HTTP notification object
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">http-notification string</a> <a href="#">admin-state keyword</a>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">http-notification string</a> <a href="#">description string</a>
Tree	<a href="#">description</a>

String Length	1 to 80
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **interval** (*number* | *keyword*)

Synopsis	Minimum HTTP response notification interval
Context	<b>configure</b> <a href="#">application-assurance group</a> <i>number</i> <a href="#">http-notification string</a> <b>interval</b> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">interval</a>
Range	1 to 1440
Units	minutes
Options	one-time
Default	one-time
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **script-url** *string*

Synopsis	Script URL inserted into the HTTP response
Context	<b>configure</b> <a href="#">application-assurance group</a> <i>number</i> <a href="#">http-notification string</a> <b>script-url</b> <i>string</i>
Tree	<a href="#">script-url</a>
Description	This command configures the URL of the script used by the HTTP notification policy.
String Length	1 to 255
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **template** *number*

Synopsis	Template ID for the AA HTTP notification object
Context	<b>configure</b> <a href="#">application-assurance group</a> <i>number</i> <a href="#">http-notification string</a> <b>template</b> <i>number</i>
Tree	<a href="#">template</a>
Description	This command configures the template that defines the format and attributes included in the HTTP notification message.
Max. Range	0 to 4294967295

Introduced 21.10.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **http-redirect** [[http-redirect-name](#)] *string*

Synopsis Enter the **http-redirect** list instance  
 Context **configure** [application-assurance group number http-redirect string](#)  
 Tree [http-redirect](#)  
 Description Commands in this context configure the parameters of the HTTP redirect policy.  
 Introduced 21.10.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **[http-redirect-name]** *string*

Synopsis HTTP redirect policy name  
 Context **configure** [application-assurance group number http-redirect string](#)  
 Tree [http-redirect](#)  
 Description This command specifies the applied HTTP redirect name. If no redirect name is specified, HTTP redirect is not enabled.  
 String Length 1 to 32  
 Notes This element is part of a list key.  
 Introduced 21.10.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **admin-state** *keyword*

Synopsis Administrative state of the AA HTTP redirect object  
 Context **configure** [application-assurance group number http-redirect string admin-state keyword](#)  
 Tree [admin-state](#)  
 Options enable, disable  
 Default disable  
 Introduced 21.10.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## **captive-redirect**

Synopsis	Enter the <b>captive-redirect</b> context
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">http-redirect string</a> <b>captive-redirect</b>
Tree	<a href="#">captive-redirect</a>
Description	<p>Commands in this context configure the captive redirect capability for an HTTP redirect policy. HTTP redirect policies using captive redirect can be used in conjunction with a session-filter policy to terminate TCP flows in the ISA-AA card before reaching the Internet to redirect subscribers to the predefined redirect URL.</p> <p>Non-HTTP TCP flows are TCP reset. Captive redirect uses the provisioned VLAN ID to send the HTTP response to subscribers; therefore, this VLAN ID must be properly assigned in the same VPN as the subscriber.</p> <p>The operator can select the URL arguments to include in the redirect URL using either a specific template ID or by configuring the redirect URL using a supported macro substitution keyword.</p>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## **vlan-id number**

Synopsis	Captive redirect VLAN ID
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">http-redirect string</a> <b>captive-redirect</b> <a href="#">vlan-id number</a>
Tree	<a href="#">vlan-id</a>
Description	This command configures the VLAN ID for a captive redirect. Captive redirect uses the provisioned VLAN ID to send the HTTP response to subscribers; therefore, this VLAN ID must be properly assigned in the same VPN as the subscriber.
Range	1 to 4094
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## **description string**

Synopsis	Text description
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">http-redirect string</a> <b>description</b> <a href="#">string</a>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**redirect-https** *boolean*

Synopsis	Enable HTTPS redirect
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">http-redirect string</a> <b>redirect-https</b> <i>boolean</i>
Tree	<a href="#">redirect-https</a>
Description	When set to <b>true</b> , the HTTP redirect policy redirects HTTPS sessions to the configured redirect URL.
Default	false
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**redirect-url** *string*

Synopsis	HTTP redirect URL
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">http-redirect string</a> <b>redirect-url</b> <i>string</i>
Tree	<a href="#">redirect-url</a>
Description	<p>This command configures the HTTP redirect URL which is the URL (page) that the user is redirected to when an HTTP redirect takes effect.</p> <p>The operator can select the URL arguments to include in the redirect URL, using either a specific template ID or by configuring any of the following macro substitution keywords:</p> <ul style="list-style-type: none"> <li>• \$URL - The Request-URI in the HTTP GET Request received</li> <li>• \$SUB - The subscriber ID</li> <li>• \$IP - The IP address of the subscriber host</li> <li>• \$RTRID - The router ID</li> <li>• \$URLPRM - The HTTP URL parameter associated with the subscriber</li> <li>• \$MAC - The UE MAC address</li> <li>• \$SAP - The UE SAP</li> <li>• \$CID - The circuit ID or interface ID of the subscriber</li> <li>• \$RID - The remote ID of the subscriber</li> <li>• \$CATID - The URL filter web-service rating category identifier</li> <li>• \$CATNAME - The URL filter web-service rating category name</li> </ul> <p>Only ESM and ESM-MAC sub types support \$MAC, \$SAP, \$CID, and \$RID macro substitution.</p>
String Length	1 to 255
Introduced	21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **tcp-client-reset** *boolean*

Synopsis Enable TCP client reset

Context **configure** [application-assurance group number](#) [http-redirect string](#) [tcp-client-reset boolean](#)

Tree [tcp-client-reset](#)

Description When configured to **true**, this command enables an HTTP-redirect policy to initiate a TCP reset towards the client if the AA policy results in a redirect with packet drop but the HTTP redirect cannot be delivered. Scenarios for this include HTTP (TLS) sessions, blocking of non-HTTP TCP traffic, and blocking of existing flows after a policy re-evaluation of an existing subscriber.

Default false

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **template** *number*

Synopsis Template ID for the HTTP redirect object

Context **configure** [application-assurance group number](#) [http-redirect string](#) [template number](#)

Tree [template](#)

Description This command configures the template that defines which parameters are appended to the HTTP host redirect field in the redirect message. The HTTP redirect template provides HTTP 302 redirect containing only the URL specified in the redirect policy, with no other parameters.

Max. Range 0 to 4294967295

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **ip-identification-assist**

Synopsis Enter the **ip-identification-assist** context

Context **configure** [application-assurance group number](#) [ip-identification-assist](#)

Tree [ip-identification-assist](#)

Description Commands in this context configure the IP identification assist feature, which uses IP addresses to assist in traffic identification.

This optional mechanism is enabled by default and consults an internally generated and stored database when app-filters fail to classify the traffic as one of the configured applications from the AppDB.

Use the **configure application-assurance group ip-identification-assist admin-state** command to disable the administrative state of the IP identification assist feature.

Introduced	22.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **admin-state** *keyword*

Synopsis	Administrative state of IP identification assist
Context	<b>configure application-assurance group number ip-identification-assist admin-state keyword</b>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	enable
Introduced	22.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **passive-dns**

Synopsis	Enter the <b>passive-dns</b> context
Context	<b>configure application-assurance group number ip-identification-assist passive-dns</b>
Tree	<a href="#">passive-dns</a>
Description	Commands in this context configure passive DNS monitoring for the IP identification assist feature.
Introduced	22.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **monitor** *boolean*

#### **WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Use passive DNS monitoring to collect IP addresses
Context	<b>configure application-assurance group number ip-identification-assist passive-dns monitor boolean</b>

Tree	<a href="#">monitor</a>
Description	When configured to <b>true</b> , the router collects IP addresses by passively monitoring DNS traffic. The router uses the collected IP addresses to build its internal database.
Default	true
Introduced	22.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **trusted-server** [[ip-address](#)] (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	Enter the <b>trusted-server</b> list instance
Context	<b>configure</b> <a href="#">application-assurance group number ip-identification-assist passive-dns trusted-server</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	<a href="#">trusted-server</a>
Description	Commands in this context configure a DNS server that the IP identification assist feature is allowed to passively monitor.
Max. Instances	64
Introduced	22.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **[ip-address]** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	IP address of the DNS server
Context	<b>configure</b> <a href="#">application-assurance group number ip-identification-assist passive-dns trusted-server</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	<a href="#">trusted-server</a>
Notes	This element is part of a list key.
Introduced	22.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **comment string**

Synopsis	Name or description to associate with the DNS server
Context	<b>configure</b> <a href="#">application-assurance group number ip-identification-assist passive-dns trusted-server</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <a href="#">comment string</a>
Tree	<a href="#">comment</a>
String Length	0 to 32

Introduced	22.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## positive-app-id

Synopsis	Enter the <b>positive-app-id</b> context
Context	<b>configure</b> <a href="#">application-assurance group number ip-identification-assist positive-app-id</a>
Tree	<a href="#">positive-app-id</a>
Description	Commands in this context implement the positive application identification mechanism, which monitors the correlations between IP addresses and applications identified with a high degree of confidence independently of any IP identification assist mechanism.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## enabled *boolean*

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Use the positive application identification mechanism
Context	<b>configure</b> <a href="#">application-assurance group number ip-identification-assist positive-app-id enabled boolean</a>
Tree	<a href="#">enabled</a>
Description	When configured to <b>true</b> , the router uses the positive application identification mechanism. This mechanism causes the router to add the IP addresses of the global applications learned through AA analysis into the IP identification assist cache. The router uses the harvested IP addresses to build its internal application-IP database.  When configured to <b>false</b> , only DNS is used to harvest IP addresses.
Default	true
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## partition [[aa-partition-id](#)] *number*

Synopsis	Enter the <b>partition</b> list instance
Context	<b>configure</b> <a href="#">application-assurance group number partition number</a>
Tree	<a href="#">partition</a>

Description	Commands in this context configure the AA partition-related policies.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **[aa-partition-id]** *number*

Synopsis	Partition ID within the AA group
Context	<b>configure</b> <a href="#">application-assurance group</a> <i>number</i> <a href="#">partition</a> <i>number</i>
Tree	<a href="#">partition</a>
Range	0 to 65535
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **aa-sub-congestion-detection**

Synopsis	Enter the <b>aa-sub-congestion-detection</b> context
Context	<b>configure</b> <a href="#">application-assurance group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">aa-sub-congestion-detection</a>
Tree	<a href="#">aa-sub-congestion-detection</a>
Description	Commands in this context configure congestion detection parameters related to Non-location Based Dynamic Experience Management (NLB-DEM). <b>Note:</b> NLB-DEM cannot be enabled if Access-Network Location (ANL) DEM mode is enabled; the two are mutually exclusive.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **admin-state** *keyword*

Synopsis	Administrative state of congestion detection
Context	<b>configure</b> <a href="#">application-assurance group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">aa-sub-congestion-detection</a> <b>admin-state</b> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **rat-type** [[rat-type-name](#)] *keyword*

Synopsis Enter the **rat-type** list instance

Context **configure** [application-assurance](#) [group](#) *number* [partition](#) *number* [aa-sub-congestion-detection](#) [rat-type](#) *keyword*

Tree [rat-type](#)

Description Commands in this context configure the RAT types for which unique RTT thresholds are configured.

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **[rat-type-name]** *keyword*

Synopsis Mobile radio access technology (RAT) type

Context **configure** [application-assurance](#) [group](#) *number* [partition](#) *number* [aa-sub-congestion-detection](#) [rat-type](#) *keyword*

Tree [rat-type](#)

Options utran, geran, wlan, gan, hspa-evol, eutran, virtual, eutran-nb, ehrpd, hrpd, cdma-1x, umb, wifi, nr, lte-m

Notes This element is part of a list key.

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **rtt-threshold** (*number* | *keyword*)

Synopsis Round trip time congestion threshold for a RAT type

Context **configure** [application-assurance](#) [group](#) *number* [partition](#) *number* [aa-sub-congestion-detection](#) [rat-type](#) *keyword* **rtt-threshold** (*number* | *keyword*)

Tree [rtt-threshold](#)

Description This command configures the maximum acceptable round trip time (RTT) under no congestion. Any measured RTT above the threshold is considered an indication of possible congestion.

Range 1 to 500

Units milliseconds

Options not-applicable

Notes	This element is mandatory.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **rtt-threshold** (*number* | *keyword*)

Synopsis	Round trip time congestion threshold
Context	<b>configure</b> <a href="#">application-assurance group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">aa-sub-congestion-detection</a> <b>rtt-threshold</b> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">rtt-threshold</a>
Description	This command configures the default round trip delay threshold used by the DEM gateway algorithm to determine subscriber congestion for NLB-DEM. This default value is used when the current RAT-Type is not known, or has no associated configured RTT threshold.
Range	1 to 500
Units	milliseconds
Options	not-applicable
Default	173
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **rtt-threshold-tolerance** *number*

Synopsis	RTT threshold tolerance for congestion detection
Context	<b>configure</b> <a href="#">application-assurance group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">aa-sub-congestion-detection</a> <b>rtt-threshold-tolerance</b> <i>number</i>
Tree	<a href="#">rtt-threshold-tolerance</a>
Description	This command configures the round trip delay threshold tolerance used by the DEM gateway algorithm to determine subscriber-level congestion.
Range	0 to 100
Units	percent
Default	50
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**aa-sub-remote** *boolean*

Synopsis	Reverse subscriber traffic direction
Context	<b>configure</b> <a href="#">application-assurance group number partition number</a> <b>aa-sub-remote</b> <i>boolean</i>
Tree	<a href="#">aa-sub-remote</a>
Description	When configured to <b>true</b> , the direction of the from-subscriber and to-subscriber traffic is reversed for this group partition.
Default	false
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**access-network-location**

Synopsis	Enter the <b>access-network-location</b> context
Context	<b>configure</b> <a href="#">application-assurance group number partition number</a> <b>access-network-location</b>
Tree	<a href="#">access-network-location</a>
Description	Commands in this context configure parameters related to dynamic experience management, also known as Access Network Location (ANL).
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**source** [[source-type](#)] *keyword*

Synopsis	Enter the <b>source</b> list instance
Context	<b>configure</b> <a href="#">application-assurance group number partition number</a> <b>access-network-location</b> <a href="#">source</a> <i>keyword</i>
Tree	<a href="#">source</a>
Description	Commands in this context configure location sources for dynamic experience management.
Max. Instances	1
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**[source-type] keyword**

Synopsis	Access network location source
Context	<b>configure</b> <a href="#">application-assurance group number partition number access-network-location source keyword</a>
Tree	<a href="#">source</a>
Description	This command specifies the location or access technology. AA supports access points for WLGW access points or ULI-2gpp for mobile (for example, FWA).
Options	mobile-3g, access-point, uli-3gpp
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**rat-type [rat-type-name] keyword**

Synopsis	Enter the <b>rat-type</b> list instance
Context	<b>configure</b> <a href="#">application-assurance group number partition number access-network-location source keyword rat-type keyword</a>
Tree	<a href="#">rat-type</a>
Description	Commands in this context configure the RAT types for which unique RTT thresholds are configured.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**[rat-type-name] keyword**

Synopsis	Access network location RAT type
Context	<b>configure</b> <a href="#">application-assurance group number partition number access-network-location source keyword rat-type keyword</a>
Tree	<a href="#">rat-type</a>
Options	utran, geran, wlan, gan, hspa-evol, eutran, virtual, eutran-nb, ehrpd, hrpd, cdma-1x, umb, wifi, nr, lte-m
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**rtt-threshold** (*number* | *keyword*)

Synopsis	RTT congestion threshold for a RAT type
Context	<b>configure</b> <a href="#">application-assurance group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">access-network-location source</a> <i>keyword</i> <a href="#">rat-type</a> <i>keyword</i> <b>rtt-threshold</b> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">rtt-threshold</a>
Description	This command specifies the maximum acceptable round trip time (RTT) under no congestion. Any measured RTT above the threshold is considered an indication of possible congestion.
Range	1 to 500
Units	milliseconds
Options	not-applicable
Notes	This element is mandatory.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**rtt-threshold** (*number* | *keyword*)

Synopsis	Source round trip time congestion threshold
Context	<b>configure</b> <a href="#">application-assurance group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">access-network-location source</a> <i>keyword</i> <b>rtt-threshold</b> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">rtt-threshold</a>
Description	This command configures the default round trip delay threshold used by the DEM gateway algorithm to determine ANL congestion. This default value is used when either the ANL RAT-Type is not known or has no associated configured RTT threshold.
Range	1 to 500
Units	milliseconds
Options	not-applicable
Default	173
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**rtt-threshold-tolerance** *number*

Synopsis	Source round trip time congestion threshold tolerance
Context	<b>configure</b> <a href="#">application-assurance group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">access-network-location source</a> <i>keyword</i> <b>rtt-threshold-tolerance</b> <i>number</i>

Tree	<a href="#">rtt-threshold-tolerance</a>
Description	This command configures the ANL round trip delay threshold tolerance used by the DEM gateway algorithm to determine ANL-level congestion.
Range	0 to 100
Units	percent
Default	50
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### source-level *keyword*

#### WARNING:

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Access network location source level
Context	<b>configure</b> <a href="#">application-assurance group number partition number access-network-location source keyword source-level keyword</a>
Tree	<a href="#">source-level</a>
Options	cell, transport-network-link, mac-vlan
Default	cell
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### aqp-initial-lookup *boolean*

Synopsis	Enable AQP initial lookup
Context	<b>configure</b> <a href="#">application-assurance group number partition number aqp-initial-lookup boolean</a>
Tree	<a href="#">aqp-initial-lookup</a>
Description	<p>When configured to <b>true</b>, this command allows AA to perform application QoS policy (AQP) lookups on flows prior to complete application identification. As usual, AQP will be looked up again when identification is complete. Without this, AA executes AQPs that are part of the sub-default policy. The sub-default policy is formed by regular AQPs that contain ASOs, subID, or flow direction as matching conditions.</p> <p>This behavior is required, for example, to apply GTP and SCTP filtering on the first packet of a new GTP/SCTP flow (AQP matching conditions).</p>

When configured to **false**, AA only performs AQP lookups when identification is complete.

Default	false
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## **cflowd**

Synopsis	Enter the <b>cflowd</b> context
Context	<b>configure</b> <a href="#">application-assurance group number partition number cflowd</a>
Tree	<a href="#">cflowd</a>
Description	Commands in this context configure the AA partition-based cflowd fields.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## **export-type** [[flow-export-type](#)] *keyword*

Synopsis	Enter the <b>export-type</b> list instance
Context	<b>configure</b> <a href="#">application-assurance group number partition number cflowd export-type keyword</a>
Tree	<a href="#">export-type</a>
Description	Commands in this context configure the scope of traffic subjected to AA cflowd export.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## **[flow-export-type]** *keyword*

Synopsis	Cflowd flow export type for the partition
Context	<b>configure</b> <a href="#">application-assurance group number partition number cflowd export-type keyword</a>
Tree	<a href="#">export-type</a>
Description	This command allows the operator to configure the scope of traffic that can be sampled for cflowd export for the configured cflowd template.
Options	volume, tcp-performance, rtp-performance, comprehensive
Notes	This element is part of a list key.
Introduced	21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **admin-state** *keyword*

Synopsis Administrative state of cflowd export

Context **configure** [application-assurance group number partition number cflowd export-type keyword admin-state keyword](#)

Tree [admin-state](#)

Options enable, disable

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **app-group** [[app-group-name](#)] *reference*

Synopsis Enter the **app-group** list instance

Context **configure** [application-assurance group number partition number cflowd export-type keyword app-group reference](#)

Tree [app-group](#)

Description Commands in this context configure application groups for flow sampling and cflowd export.

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **[app-group-name]** *reference*

Synopsis Application group name

Context **configure** [application-assurance group number partition number cflowd export-type keyword app-group reference](#)

Tree [app-group](#)

Reference **configure** [application-assurance group number partition number policy app-group string](#)

Notes This element is part of a list key.

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**rate-choice** *keyword*

Synopsis	Cflowd rate to use for sampling
Context	<b>configure</b> <a href="#">application-assurance group number partition number cflowd export-type keyword app-group reference rate-choice keyword</a>
Tree	<a href="#">rate-choice</a>
Options	flow-rate, flow-rate-2
Default	flow-rate
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**application** [[application-name](#)] *reference*

Synopsis	Enter the <b>application</b> list instance
Context	<b>configure</b> <a href="#">application-assurance group number partition number cflowd export-type keyword application reference</a>
Tree	<a href="#">application</a>
Description	Commands in this context configure applications for flow sampling and cflowd export.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**[application-name]** *reference*

Synopsis	Application name
Context	<b>configure</b> <a href="#">application-assurance group number partition number cflowd export-type keyword application reference</a>
Tree	<a href="#">application</a>
Reference	<b>configure</b> <a href="#">application-assurance group number partition number policy application string</a>
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**rate-choice** *keyword*

Synopsis	Cflowd rate to use for sampling
----------	---------------------------------

Context	<b>configure</b> <a href="#">application-assurance group number partition number cflowd export-type keyword application reference rate-choice keyword</a>
Tree	<a href="#">rate-choice</a>
Options	flow-rate, flow-rate-2
Default	flow-rate
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">application-assurance group number partition number description string</a>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **event-log** [[event-log-name](#)] *string*

Synopsis	Enter the <b>event-log</b> list instance
Context	<b>configure</b> <a href="#">application-assurance group number partition number event-log string</a>
Tree	<a href="#">event-log</a>
Description	Commands in this context configure an event log.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **[event-log-name]** *string*

Synopsis	Partition event log name
Context	<b>configure</b> <a href="#">application-assurance group number partition number event-log string</a>
Tree	<a href="#">event-log</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**admin-state** *keyword*

Synopsis	Administrative state of the event log
Context	<b>configure</b> <a href="#">application-assurance group number partition number event-log string admin-state keyword</a>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**buffer-type** *keyword***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Event log buffer type
Context	<b>configure</b> <a href="#">application-assurance group number partition number event-log string buffer-type keyword</a>
Tree	<a href="#">buffer-type</a>
Options	linear, circular, syslog
Default	linear
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**max-entries** *number***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Maximum number of entries for the event log
Context	<b>configure</b> <a href="#">application-assurance group number partition number event-log string max-entries number</a>
Tree	<a href="#">max-entries</a>
Range	1 to 100000

Default	500
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## syslog

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Enter the <b>syslog</b> context
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <a href="#">number</a> <a href="#">partition</a> <a href="#">number</a> <a href="#">event-log</a> <a href="#">string</a> <b>syslog</b>
Tree	<a href="#">syslog</a>
Description	Commands in this context configure the syslog options for the partition.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## address (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Syslog host IP address
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <a href="#">number</a> <a href="#">partition</a> <a href="#">number</a> <a href="#">event-log</a> <a href="#">string</a> <b>syslog</b> <a href="#">address</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	<a href="#">address</a>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## description *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <a href="#">number</a> <a href="#">partition</a> <a href="#">number</a> <a href="#">event-log</a> <a href="#">string</a> <b>syslog</b> <a href="#">description</a> <i>string</i>

Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### facility *keyword*

#### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	AA syslog facility
Context	<b>configure</b> <a href="#">application-assurance group number partition number event-log string syslog facility keyword</a>
Tree	<a href="#">facility</a>
Description	This command configures the syslog facility. The syslog facility is an information field associated with a syslog message. It is defined by the syslog protocol and provides an indication of which part of the system originated the message.
Options	kernel, user, mail, systemd, auth, syslogd, printer, netnews, uucp, cron, authpriv, ftp, ntp, logaudit, logalert, cron2, local0, local1, local2, local3, local4, local5, local6, local7
Default	local7
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### port *number*

#### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	UDP port for syslog events
Context	<b>configure</b> <a href="#">application-assurance group number partition number event-log string syslog port number</a>
Tree	<a href="#">port</a>
Max. Range	0 to 65535
Default	514
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**severity** *keyword***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Syslog message severity level threshold
Context	<b>configure</b> <a href="#">application-assurance group number partition number event-log string syslog severity keyword</a>
Tree	<a href="#">severity</a>
Options	emergency, alert, critical, error, warning, notice, info, debug
Default	info
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**vlan-id** *number***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	ISA service port VLAN ID for sending syslog traffic
Context	<b>configure</b> <a href="#">application-assurance group number partition number event-log string syslog vlan-id number</a>
Tree	<a href="#">vlan-id</a>
Description	This command configures the service port VLAN ID to be used by application assurance to provide syslog events. This VLAN ID also needs to be configured for the application assurance interface.
Range	1 to 4094
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**gtp**

Synopsis	Enter the <b>gtp</b> context
Context	<b>configure</b> <a href="#">application-assurance group number partition number gtp</a>
Tree	<a href="#">gtp</a>
Description	Commands in this context configure GTP parameters.

Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **admin-state** *keyword*

Synopsis	Administrative state of GTP
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">gtp</a> <a href="#">admin-state</a> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **gtp-filter** [[gtp-filter-name](#)] *string*

Synopsis	Enter the <b>gtp-filter</b> list instance
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">gtp</a> <a href="#">gtp-filter</a> <i>string</i>
Tree	<a href="#">gtp-filter</a>
Description	Commands in this context allow AA to treat traffic on UDP port number 2152 as GTP-U. Without further specifying any other parameters within this GTP context, AA performs basic GTP-U header sanity checks and discards packets that are malformed. This GTP context also allows the operator to configure various GTP filters.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **[gtp-filter-name]** *string*

Synopsis	GTP filter name
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">gtp</a> <a href="#">gtp-filter</a> <i>string</i>
Tree	<a href="#">gtp-filter</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">application-assurance group number partition number gtp gtp-filter string description string</a>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**gtp-in-gtp** *keyword*

Synopsis	GTP in GTP packet filtering
Context	<b>configure</b> <a href="#">application-assurance group number partition number gtp gtp-filter string gtp-in-gtp keyword</a>
Tree	<a href="#">gtp-in-gtp</a>
Options	deny, permit
Default	permit
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**gtp-tunnel-database**

Synopsis	Enter the <b>gtp-tunnel-database</b> context
Context	<b>configure</b> <a href="#">application-assurance group number partition number gtp gtp-filter string gtp-tunnel-database</a>
Tree	<a href="#">gtp-tunnel-database</a>
Description	Commands in this context configure GTP advanced firewall functions, such as validating GTP tunnels, sequence numbers, and source IP addresses).
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**default-tunnel-endpoint-limit** *number*

Synopsis	Default GTP tunnel endpoint limit
Context	<b>configure</b> <a href="#">application-assurance group number partition number gtp gtp-filter string gtp-tunnel-database default-tunnel-endpoint-limit number</a>

Tree	<a href="#">default-tunnel-endpoint-limit</a>
Description	This command configures the maximum number of GTP endpoints requested in GTP-C messages by using, for example, the PDP Context Create message type. The <b>validate-gtp-tunnels</b> command must be enabled before using this command.
Range	1 to 4294967295
Default	4294967295
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **validate-gtp-tunnels** *boolean*

Synopsis	Enable GTP tunnel validation
Context	<b>configure</b> <a href="#">application-assurance group number partition number gtp gtp-filter string gtp-tunnel-database validate-gtp-tunnels</a> <i>boolean</i>
Tree	<a href="#">validate-gtp-tunnels</a>
Description	When configured to <b>true</b> , this command configures GTP tunnel validation. This allows for the validation of TEIDs and is a prerequisite for sequence checking and UE IP address validation. This command is only applicable when AA GTP FW is deployed on S8/S5/Gp/Gn interfaces. The <b>gtp-inspection</b> command in the <b>configure application-assurance group partition gtp</b> context must be configured to true before using this command.  When configured to <b>false</b> , the GTP tunnels cannot be validated.
Default	false
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **validate-sequence-number** *boolean*

Synopsis	Enable GTP sequence number checking
Context	<b>configure</b> <a href="#">application-assurance group number partition number gtp gtp-filter string gtp-tunnel-database validate-sequence-number</a> <i>boolean</i>
Tree	<a href="#">validate-sequence-number</a>
Description	When configured to <b>true</b> , this command enables GTP sequence number checking. GTP packets that fail the sequence number check are discarded.  The <b>validate-gtp-tunnels</b> command in the <b>configure application-assurance group partition gtp gtp-filter gtp-tunnel-database</b> context must be configured to <b>true</b> before using this command.  When configured to <b>false</b> , the GTP packet sequence number cannot be checked.

Default	false
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **validate-source-ip-addr** *boolean*

Synopsis	Validate source IP address in GTP frames
Context	<b>configure application-assurance group number partition number gtp gtp-filter string gtp-tunnel-database validate-source-ip-addr boolean</b>
Tree	<a href="#">validate-source-ip-addr</a>
Description	<p>When configured to <b>true</b>, this command enables checking for spoofed or invalid UE IP addresses. Upstream GTP packets that contain invalid UE IP addresses are discarded. When a packet is dropped due to source-ip-address “invalid source IP add”, the statistics counter is updated.</p> <p>The <b>validate-gtp-tunnels</b> command in the <b>configure application-assurance group partition gtp gtp-filter gtp-tunnel-database</b> context must be configured to <b>true</b> before using this command.</p> <p>When configured to <b>false</b>, the spoofed or invalid UE IP addresses cannot be checked.</p>
Default	false
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **imsi-apn-filter**

Synopsis	Enter the <b>imsi-apn-filter</b> context
Context	<b>configure application-assurance group number partition number gtp gtp-filter string imsi-apn-filter</b>
Tree	<a href="#">imsi-apn-filter</a>
Description	<p>Commands in this context configure IMSI and APN filtering.</p> <p>The <b>gtpc-inspection</b> command in the <b>configure application-assurance group partition gtp</b> context must be configured to true before using this command.</p> <p>This command is only applicable to the GTP packets that contain IMSI or APN information elements (IEs).</p>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**default-action** *keyword*

Synopsis	IMSI APN filter default action
Context	<b>configure</b> <a href="#">application-assurance group number partition number gtp gtp-filter string imsi-apn-filter default-action keyword</a>
Tree	<a href="#">default-action</a>
Options	deny, permit
Default	permit
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**entry** [[entry-id](#)] *number*

Synopsis	Enter the <b>entry</b> list instance
Context	<b>configure</b> <a href="#">application-assurance group number partition number gtp gtp-filter string imsi-apn-filter entry number</a>
Tree	<a href="#">entry</a>
Description	Commands in this context configure an entry within the IMSI-APN filter to allow for IMSI-APN match and action configuration.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**[entry-id]** *number*

Synopsis	AA IMSI-APN filter entry ID
Context	<b>configure</b> <a href="#">application-assurance group number partition number gtp gtp-filter string imsi-apn-filter entry number</a>
Tree	<a href="#">entry</a>
Description	This command specifies the index in the IMSI-APN list that defines a custom filtering action.
Range	1031 to 2030
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**action keyword**

Synopsis	IMSI APN filter entry action
Context	<b>configure</b> <a href="#">application-assurance group number partition number gtp gtp-filter string imsi-apn-filter entry number action keyword</a>
Tree	<a href="#">action</a>
Options	deny, permit
Default	permit
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**apn string**

Synopsis	APN as GTP filter match criterion
Context	<b>configure</b> <a href="#">application-assurance group number partition number gtp gtp-filter string imsi-apn-filter entry number apn string</a>
Tree	<a href="#">apn</a>
Description	This command configures a matching condition for an APN configured as a GTP filter. If no APN is specified, the entry is not checked for the APN IE in GTP-C packets. The values for this command are: <ul style="list-style-type: none"> <li>• string: The extracted APN must match string exactly.</li> <li>• ^string: The extracted APN must start with string.</li> <li>• string\$: The extracted APN must end with string.</li> <li>• WILDCARD_APN: Special string that indicates that the extracted APN must be "*" (that is, a length octet with value one, followed by the ASCII code for the asterisk)</li> <li>• EMPTY_APN: Special string that indicates that the extracted APN must be empty (that is, "")</li> <li>• ANY_APN: Special string that indicates that the extracted APN IE must be present and can have any value in order for the filter entry to match</li> </ul>
String Length	1 to 100
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**imsi-mcc-mnc-prefix string**

Synopsis	IMSI (MCC-MNC) prefix as GTP filter match criterion
Context	<b>configure</b> <a href="#">application-assurance group number partition number gtp gtp-filter string imsi-apn-filter entry number imsi-mcc-mnc-prefix string</a>

Tree	<a href="#">imsi-mcc-mnc-prefix</a>
Description	This command configures a matching condition for the IMSI (MCC-MNC) prefix. This string represents the IMSI prefix to be matched against the IMSI IE of the packet, or the special value ANY_IMSI to indicate that an IMSI IE must be present as a matching condition regardless of the IMSI IE value. If no MCC-MNC prefix is specified, the entry will match GTP packets that have an IMSI IE containing any value.
String Length	1 to 8
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### src-gsn

Synopsis	Enter the <b>src-gsn</b> context
Context	<b>configure</b> <a href="#">application-assurance group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">gtp gtp-filter</a> <i>string</i> <a href="#">imsi-apn-filter</a> <i>entry</i> <i>number</i> <b>src-gsn</b>
Tree	<a href="#">src-gsn</a>
Description	Commands in this context configure a matching condition for the GSN IP address. The IP address value is checked only against the source IP address of the GTP packets that contain an APN IE or an IMSI IE.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### ip-prefix (*ipv4-prefix* | *ipv6-prefix*)

Synopsis	Source GSN IP address prefix as filter match criterion
Context	<b>configure</b> <a href="#">application-assurance group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">gtp gtp-filter</a> <i>string</i> <a href="#">imsi-apn-filter</a> <i>entry</i> <i>number</i> <b>src-gsn</b> <b>ip-prefix</b> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> )
Tree	<a href="#">ip-prefix</a>
Description	This command specifies a valid unicast address associated with the IMSI-APN filter entry.
Notes	The following elements are part of a choice: <b>ip-prefix</b> or <b>ip-prefix-list</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### ip-prefix-list *reference*

Synopsis	Source GSN IP address prefix list as match criterion
----------	--

Context	<b>configure</b> <a href="#">application-assurance group number partition number gtp gtp-filter string imsi-apn-filter entry number src-gsn ip-prefix-list reference</a>
Tree	<a href="#">ip-prefix-list</a>
Reference	<b>configure</b> <a href="#">application-assurance group number partition number ip-prefix-list string</a>
Notes	The following elements are part of a choice: <b>ip-prefix</b> or <b>ip-prefix-list</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## log

Synopsis	Enter the <b>log</b> context
Context	<b>configure</b> <a href="#">application-assurance group number partition number gtp gtp-filter string log</a>
Tree	<a href="#">log</a>
Description	Commands in this context configure the AA group partition GTP filter log.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## action keyword

Synopsis	GTP filter action to be logged
Context	<b>configure</b> <a href="#">application-assurance group number partition number gtp gtp-filter string log action keyword</a>
Tree	<a href="#">action</a>
Options	deny, permit, all
Default	deny
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## event-log reference

Synopsis	Event-log name to capture GTP filter events
Context	<b>configure</b> <a href="#">application-assurance group number partition number gtp gtp-filter string log event-log reference</a>
Tree	<a href="#">event-log</a>
Reference	<b>configure</b> <a href="#">application-assurance group number partition number event-log string</a>

Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **max-payload-length** *number*

Synopsis	Maximum allowed GTP payload length
Context	<b>configure</b> <a href="#">application-assurance group number partition number gtp gtp-filter string max-payload-length number</a>
Tree	<a href="#">max-payload-length</a>
Range	0 to 65535
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **message-type**

Synopsis	Enter the <b>message-type</b> context
Context	<b>configure</b> <a href="#">application-assurance group number partition number gtp gtp-filter string message-type</a>
Tree	<a href="#">message-type</a>
Description	Commands in this context configure the GTP message-type filtering. If no message type is specified within a filter, all GTP message types are allowed.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **default-action** *keyword*

Synopsis	GTP message type default action
Context	<b>configure</b> <a href="#">application-assurance group number partition number gtp gtp-filter string message-type default-action keyword</a>
Tree	<a href="#">default-action</a>
Options	deny, permit
Default	permit
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**entry** [**entry-id**] *number*

Synopsis	Enter the <b>entry</b> list instance
Context	<b>configure</b> <a href="#">application-assurance group number partition number gtp gtp-filter string message-type entry number</a>
Tree	<a href="#">entry</a>
Description	Commands in this context configure an entry for a specific GTPv1 message type value.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**[entry-id]** *number*

Synopsis	GTP filter entry ID
Context	<b>configure</b> <a href="#">application-assurance group number partition number gtp gtp-filter string message-type entry number</a>
Tree	<a href="#">entry</a>
Description	This command specifies the index in the GTPv1 message value list that defines a custom message-type action.
Range	1 to 255
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**action** *keyword*

Synopsis	GTPv1 filter message entry action
Context	<b>configure</b> <a href="#">application-assurance group number partition number gtp gtp-filter string message-type entry number action keyword</a>
Tree	<a href="#">action</a>
Options	deny, permit
Notes	This element is mandatory.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**value** (*number* | *keyword*)**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	GTPv1 filter message type value
Context	<b>configure</b> <a href="#">application-assurance group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">gtp gtp-filter</a> <i>string</i> <a href="#">message-type entry</a> <i>number</i> <b>value</b> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">value</a>
Range	1 to 255
Options	echo-request, echo-response, version-not-supported, node-alive-request, node-alive-response, redirection-request, redirection-response, create-pdp-context-request, create-pdp-context-response, update-pdp-context-request, update-pdp-context-response, delete-pdp-context-request, delete-pdp-context-response, initiate-pdp-context-activation-request, initiate-pdp-context-activation-response, error-indication, pdu-notification-request, pdu-notification-response, pdu-notification-reject-request, pdu-notification-reject-response, supported-extension-headers-notification, send-routing-information-for-gprs-request, send-routing-information-for-gprs-response, failure-report-request, failure-report-response, note-ms-gprs-present-request, note-ms-gprs-present-response, identification-request, identification-response, sgsn-context-request, sgsn-context-response, sgsn-context-acknowledge, forward-relocation-request, forward-relocation-response, forward-relocation-complete, relocation-cancel-request, relocation-cancel-response, forward-srns-context, forward-relocation-complete-acknowledge, forward-srns-context-acknowledge, ran-information-relay, mbms-notification-request, mbms-notification-response, mbms-notification-reject-request, mbms-notification-reject-response, create-mbms-context-request, create-mbms-context-response, update-mbms-context-request, update-mbms-context-response, delete-mbms-context-request, delete-mbms-context-response, mbms-registration-request, mbms-registration-response, mbms-de-registration-request, mbms-de-registration-response, mbms-session-start-request, mbms-session-start-response, mbms-session-stop-request, mbms-session-stop-response, mbms-session-update-request, mbms-session-update-response, ms-info-change-notification-request, ms-info-change-notification-response, data-record-transfer-request, data-record-transfer-response, end-marker, g-pdu
Notes	This element is mandatory.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**message-type-gtp-v2**

Synopsis	Enter the <b>message-type-gtp-v2</b> context
----------	--

Context	<b>configure application-assurance group number partition number gtp gtp-filter string message-type-gtp-v2</b>
Tree	<b>message-type-gtp-v2</b>
Description	<p>Commands in this context configure the GTPv2 message-type filtering.</p> <p>If message-type GTPv2 is not specified within a filter, all GTP message types are allowed, except for the messages that are dropped by GTP-C inspection because they violate the expected GTP protocol for the deployment interface (for example, roaming deployment).</p> <p>The <b>gtpc-inspection</b> command in the <b>configure application-assurance group partition gtp</b> context must be configured to true before configuring GTPv2 message-type filtering.</p>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **default-action** *keyword*

Synopsis	GTPv2 message type default action
Context	<b>configure application-assurance group number partition number gtp gtp-filter string message-type-gtp-v2 default-action keyword</b>
Tree	<b>default-action</b>
Options	deny, permit
Default	permit
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **entry** [*entry-id*] *number*

Synopsis	Enter the <b>entry</b> list instance
Context	<b>configure application-assurance group number partition number gtp gtp-filter string message-type-gtp-v2 entry number</b>
Tree	<b>entry</b>
Description	Commands in this context configure an entry for a specific GTPv2 message type value.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**[entry-id] number**

Synopsis	GTPv2 filter entry ID
Context	<b>configure</b> <a href="#">application-assurance group number partition number gtp gtp-filter string message-type-gtp-v2 entry number</a>
Tree	<a href="#">entry</a>
Description	This command configures the index in the GTP message value list that defines a custom message-type action.
Range	516 to 770
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**action keyword**

Synopsis	GTPv2 filter message entry action
Context	<b>configure</b> <a href="#">application-assurance group number partition number gtp gtp-filter string message-type-gtp-v2 entry number action keyword</a>
Tree	<a href="#">action</a>
Description	This command specifies the action to take for packets that match this GTPv2 filter message entry.
Options	deny, permit
Notes	This element is mandatory.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**value (number | keyword)****WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	GTPv2 filter message type value
Context	<b>configure</b> <a href="#">application-assurance group number partition number gtp gtp-filter string message-type-gtp-v2 entry number value (number   keyword)</a>
Tree	<a href="#">value</a>
Range	1 to 255

Options	echo-request, echo-response, version-not-supported-indication, create-session-request, create-session-response, modify-bearer-request, modify-bearer-response, delete-session-request, delete-session-response, change-notification-request, change-notification-response, remote-ue-report-notification, remote-ue-report-acknowledge, modify-bearer-command, modify-bearer-failure-indication, delete-bearer-command, delete-bearer-failure-indication, bearer-resource-command, bearer-resource-failure-indication, downlink-data-notification-failure-indication, trace-session-activation, trace-session-deactivation, stop-paging-indication, create-bearer-request, create-bearer-response, update-bearer-request, update-bearer-response, delete-bearer-request, delete-bearer-response, delete-pdn-connection-set-request, delete-pdn-connection-set-response, pgw-downlink-triggering-notification, pgw-downlink-triggering-acknowledge, identification-request, identification-response, context-request, context-response, context-acknowledge, forward-relocation-request, forward-relocation-response, forward-relocation-complete-notification, forward-relocation-complete-acknowledge, forward-access-context-notification, forward-access-context-acknowledge, relocation-cancel-request, relocation-cancel-response, configuration-transfer-tunnel, detach-notification, detach-acknowledge, cs-paging-indication, ran-information-relay, alert-mme-notification, alert-mme-acknowledge, ue-activity-notification, ue-activity-acknowledge, isr-status-indication, create-forwarding-tunnel-request, create-forwarding-tunnel-response, suspend-notification, suspend-acknowledge, resume-notification, resume-acknowledge, create-indirect-data-forwarding-tunnel-request, create-indirect-data-forwarding-tunnel-response, delete-indirect-data-forwarding-tunnel-request, delete-indirect-data-forwarding-tunnel-response, release-access-bearers-request, release-access-bearers-response, downlink-data-notification, downlink-data-notification-acknowledge, pgw-restart-notification, pgw-restart-notification-acknowledge, update-pdn-connection-set-request, update-pdn-connection-set-response, modify-access-bearers-request, modify-access-bearers-response, mbms-session-start-request, mbms-session-start-response, mbms-session-update-request, mbms-session-update-response, mbms-session-stop-request, mbms-session-stop-response
Notes	This element is mandatory.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **gtpc-inspection** *boolean*

Synopsis	Enable inspection of GTP-C packets
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">gtp</a> <a href="#">gtpc-inspection</a> <i>boolean</i>
Tree	<a href="#">gtpc-inspection</a>

Description	When configured to <b>true</b> , this command enables the inspection of GTP-C packets. This is relevant only when AA GTP FW is deployed on S8/S5/Gp/Gn interfaces. This command must be enabled before configuring related features, such as APN filtering, GTP tunnel validation, message-type-v2 filtering, sequence number validation, and SRC IP validation.  When configured to <b>false</b> , GTP-C packet inspection cannot be performed.
Default	false
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## log

Synopsis	Enter the <b>log</b> context
Context	<b>configure</b> <a href="#">application-assurance group number partition number gtp log</a>
Tree	<a href="#">log</a>
Description	Commands in this context configure the AA group partition GTP log.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## action keyword

Synopsis	GTP log action
Context	<b>configure</b> <a href="#">application-assurance group number partition number gtp log action keyword</a>
Tree	<a href="#">action</a>
Description	This command specifies the action on which the GTP log is raised.
Options	deny, permit, all
Default	deny
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## event-log reference

Synopsis	Event log reference for logging GTP events
Context	<b>configure</b> <a href="#">application-assurance group number partition number gtp log event-log reference</a>
Tree	<a href="#">event-log</a>

Reference	<b>configure</b> <a href="#">application-assurance group number partition number event-log string</a>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **mode** *keyword*

#### **WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	GTP mode
Context	<b>configure</b> <a href="#">application-assurance group number partition number gtp mode keyword</a>
Tree	<a href="#">mode</a>
Options	filtering, untunneling
Default	filtering
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **http-match-all-requests** *boolean*

Synopsis	Enable HTTP matching for all requests for an expression
Context	<b>configure</b> <a href="#">application-assurance group number partition number http-match-all-requests boolean</a>
Tree	<a href="#">http-match-all-requests</a>
Description	When configured to <b>true</b> , this command enables HTTP matching for all requests for an HTTP expression.  When configured to <b>false</b> , this command restores the default and removes the matching request for this particular expression.
Default	false
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **http-x-online-host** *boolean*

Synopsis	Enable X-Online-Host header field
Context	<b>configure</b> <a href="#">application-assurance group number partition number http-x-online-host boolean</a>

Tree	<a href="#">http-x-online-host</a>
Description	When configured to <b>true</b> , this command enables the X-Online-Host header field as a replacement for the HTTP Host header field.
Default	false
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **ip-identification-contribute** *boolean*

Synopsis	Contribute traffic info from this partition to group
Context	<b>configure</b> <a href="#">application-assurance group number partition number ip-identification-contribute</a> <i>boolean</i>
Tree	<a href="#">ip-identification-contribute</a>
Description	When configured to <b>true</b> , the router collects information from traffic in this partition and contributes it to the database that is built by the IP identification assist feature at the group level.
Default	true
Introduced	22.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **ip-prefix-list** [[ip-prefix-list-name](#)] *string*

Synopsis	Enter the <b>ip-prefix-list</b> list instance
Context	<b>configure</b> <a href="#">application-assurance group number partition number ip-prefix-list</a> <i>string</i>
Tree	<a href="#">ip-prefix-list</a>
Description	Commands in this context configure an IP prefix list.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **[ip-prefix-list-name]** *string*

Synopsis	AA IP prefix list name
Context	<b>configure</b> <a href="#">application-assurance group number partition number ip-prefix-list</a> <i>string</i>
Tree	<a href="#">ip-prefix-list</a>
String Length	1 to 32
Notes	This element is part of a list key.

Introduced 21.10.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **description** *string*

Synopsis Text description  
 Context **configure** [application-assurance](#) [group](#) *number* [partition](#) *number* [ip-prefix-list](#) *string*  
[description](#) *string*  
 Tree [description](#)  
 String Length 1 to 80  
 Introduced 21.10.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **prefix** [[ip-prefix](#)] (*ipv4-prefix* | *ipv6-prefix*)

Synopsis Enter the **prefix** list instance  
 Context **configure** [application-assurance](#) [group](#) *number* [partition](#) *number* [ip-prefix-list](#) *string*  
[prefix](#) (*ipv4-prefix* | *ipv6-prefix*)  
 Tree [prefix](#)  
 Description Commands in this context configure an IP prefix within the list.  
 Introduced 21.10.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **[ip-prefix]** (*ipv4-prefix* | *ipv6-prefix*)

Synopsis AA IP prefix  
 Context **configure** [application-assurance](#) [group](#) *number* [partition](#) *number* [ip-prefix-list](#) *string*  
[prefix](#) (*ipv4-prefix* | *ipv6-prefix*)  
 Tree [prefix](#)  
 Notes This element is part of a list key.  
 Introduced 21.10.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **name** *string*

Synopsis AA IP prefix name

Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">ip-prefix-list</a> <i>string</i> <a href="#">prefix</a> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> ) <a href="#">name</a> <i>string</i>
Tree	<a href="#">name</a>
String Length	1 to 32
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## policy

Synopsis	Enter the <b>policy</b> context
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">policy</a>
Tree	<a href="#">policy</a>
Description	Commands in this context configure the fields for the Application Assurance policy.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## app-filter

Synopsis	Enter the <b>app-filter</b> context
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">policy</a> <a href="#">app-filter</a>
Tree	<a href="#">app-filter</a>
Description	Commands in this context configure an application filter for Application Assurance.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## entry [[entry-id](#)] *number*

Synopsis	Enter the <b>entry</b> list instance
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">policy</a> <a href="#">app-filter</a> <a href="#">entry</a> <i>number</i>
Tree	<a href="#">entry</a>
Description	<p>Commands in this context create an application filter entry.</p> <p>Application filter entries are an ordered list. The lowest numerical entry that matches the flow defines the application for that flow.</p> <p>An application filter entry or entries configure match attributes of an application.</p>
Introduced	21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **[entry-id]** *number*

Synopsis Application filter entry ID

Context **configure** [application-assurance](#) [group](#) *number* [partition](#) *number* [policy](#) [app-filter](#) [entry](#) *number*

Tree [entry](#)

Range 1 to 65535

Notes This element is part of a list key.

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **admin-state** *keyword*

Synopsis Administrative state of the AA application filter entry

Context **configure** [application-assurance](#) [group](#) *number* [partition](#) *number* [policy](#) [app-filter](#) [entry](#) *number* [admin-state](#) *keyword*

Tree [admin-state](#)

Options enable, disable

Default disable

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **application** *reference*

Synopsis Application name

Context **configure** [application-assurance](#) [group](#) *number* [partition](#) *number* [policy](#) [app-filter](#) [entry](#) *number* [application](#) *reference*

Tree [application](#)

Reference **configure** [application-assurance](#) [group](#) *number* [partition](#) *number* [policy](#) [application](#) *string*

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">partition number</a> <a href="#">policy app-filter entry number</a> <i>description string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**expression** [[expr-index](#)] *number*

Synopsis	Enter the <b>expression</b> list instance
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">partition number</a> <a href="#">policy app-filter entry number</a> <a href="#">expression number</a>
Tree	<a href="#">expression</a>
Description	Commands in this context configure string values to use in the application definition.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**[[expr-index](#)]** *number*

Synopsis	Application filter matching expression identifier
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">partition number</a> <a href="#">policy app-filter entry number</a> <a href="#">expression number</a>
Tree	<a href="#">expression</a>
Range	1 to 4
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**eq** *string*

Synopsis	Exact match for application filter matching expression
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">partition number</a> <a href="#">policy app-filter entry number</a> <a href="#">expression number</a> <a href="#">eq string</a>
Tree	<a href="#">eq</a>

String Length	1 to 255
Notes	The following elements are part of a mandatory choice: <b>eq</b> or <b>neq</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**neq string**

Synopsis	Non-match for application filter matching expression
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-filter entry number expression number neq string</a>
Tree	<a href="#">neq</a>
String Length	1 to 255
Notes	The following elements are part of a mandatory choice: <b>eq</b> or <b>neq</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**type keyword**

Synopsis	Application filter matching expression type
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-filter entry number expression number type keyword</a>
Tree	<a href="#">type</a>
Options	http-host, http-uri, http-referer, sip-ua, sip-uri, sip-mt, citrix-app, http-user-agent, h323-product-id, tls-cert-subj-org-name, tls-cert-subj-common-name, rtsp-host, rtsp-uri, rtsp-ua, rtmp-page-host, rtmp-page-uri, rtmp-swf-host, rtmp-swf-uri, rtmp-tc-host, rtmp-tc-uri, dns-domain-name
Notes	This element is mandatory.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**flow-setup-direction keyword**

Synopsis	Traffic flow direction for the application filter entry
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-filter entry number flow-setup-direction keyword</a>
Tree	<a href="#">flow-setup-direction</a>
Options	subscriber-to-network, network-to-subscriber, both

Default	both
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **http-match-all-requests** *boolean*

Synopsis	Enable HTTP matching for all requests
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">partition number</a> <a href="#">policy app-filter entry number</a> <a href="#">http-match-all-requests boolean</a>
Tree	<a href="#">http-match-all-requests</a>
Description	When configured to <b>true</b> , this command enables HTTP matching for all requests for an HTTP expression. When configured to <b>false</b> , this command restores the default for this app-filter entry which matches the first request.
Default	false
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **http-port**

Synopsis	Enter the <b>http-port</b> context
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">partition number</a> <a href="#">policy app-filter entry number</a> <a href="#">http-port</a>
Tree	<a href="#">http-port</a>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **eq**

Synopsis	Enter the <b>eq</b> context
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">partition number</a> <a href="#">policy app-filter entry number</a> <a href="#">http-port eq</a>
Tree	<a href="#">eq</a>
Description	Commands in this context configure the exact value as the match criterion.
Notes	The following elements are part of a choice: <b>eq</b> or <b>neq</b> .
Introduced	21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **port-list** *reference*

Synopsis Port list name

Context **configure** [application-assurance group number](#) [partition number](#) [policy app-filter entry number](#) [http-port eq port-list reference](#)

Tree [port-list](#)

Reference **configure** [application-assurance group number](#) [partition number](#) [port-list string](#)

Notes The following elements are part of a choice: **port-list** or **port-number**.

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **port-number** *number*

Synopsis Server port number

Context **configure** [application-assurance group number](#) [partition number](#) [policy app-filter entry number](#) [http-port eq port-number number](#)

Tree [port-number](#)

Range 0 | 1 to 65535

Default 0

Notes The following elements are part of a choice: **port-list** or **port-number**.

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **neq**

Synopsis Enter the **neq** context

Context **configure** [application-assurance group number](#) [partition number](#) [policy app-filter entry number](#) [http-port neq](#)

Tree [neq](#)

Description Commands in this context configure the non-match criterion used.

Notes The following elements are part of a choice: **eq** or **neq**.

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**port-list** *reference*

Synopsis	Port list name
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">partition number</a> <a href="#">policy app-filter entry number</a> <a href="#">http-port neq port-list reference</a>
Tree	<a href="#">port-list</a>
Reference	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">partition number</a> <a href="#">port-list string</a>
Notes	The following elements are part of a choice: <b>port-list</b> or <b>port-number</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**port-number** *number*

Synopsis	Server port number
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">partition number</a> <a href="#">policy app-filter entry number</a> <a href="#">http-port neq port-number number</a>
Tree	<a href="#">port-number</a>
Range	0   1 to 65535
Default	0
Notes	The following elements are part of a choice: <b>port-list</b> or <b>port-number</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**ip-identification-assist** *boolean*

Synopsis	Enable IP identification assist for this entry
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">partition number</a> <a href="#">policy app-filter entry number</a> <a href="#">ip-identification-assist boolean</a>
Tree	<a href="#">ip-identification-assist</a>
Description	<p>When configured to <b>true</b>, the router performs a network IP address lookup that overrides the assigned application if it finds the network IP address in its internal application-IP database.</p> <p>If an IP match is found, the application assigned from the app-filter is overridden with the application from the IP lookup. This also affects the app-group and charging group.</p> <p>If an IP match is not found, the application assigned from the app-filter is not overridden and remains (including the app-group and charging group).</p>

When configured to **false**, this command disables the router from performing a network IP address lookup and overriding the assigned application.

Default	false
Introduced	22.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## ip-protocol

Synopsis	Enter the <b>ip-protocol</b> context
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">policy</a> <a href="#">app-filter</a> <a href="#">entry</a> <i>number</i> <b>ip-protocol</b>
Tree	<a href="#">ip-protocol</a>
Description	Commands in this context configure the IP protocol to use in the application definition.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## eq (*number* | *keyword*)

Synopsis	Exact match criterion used for the IP protocol number
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">policy</a> <a href="#">app-filter</a> <a href="#">entry</a> <i>number</i> <b>ip-protocol</b> <b>eq</b> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">eq</a>
Range	0 to 255
Options	tcp-udp, icmp, igmp, ip, tcp, egp, igp, udp, rdp, ipv6, ipv6-route, ipv6-frag, idrp, rsvp, gre, ipv6-icmp, ipv6-no-nxt, ipv6-opts, iso-ip, eigrp, ospf-igp, ether-ip, encap, pnni, pim, vrrp, l2tp, stp, ptp, isis, crtp, crudp, sctp
Notes	The following elements are part of a choice: <b>eq</b> or <b>neq</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## neq (*number* | *keyword*)

Synopsis	Non-match criterion used for the IP protocol number
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">policy</a> <a href="#">app-filter</a> <a href="#">entry</a> <i>number</i> <b>ip-protocol</b> <b>neq</b> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">neq</a>
Range	0 to 255

Options	tcp-udp, icmp, igmp, ip, tcp, egp, igp, udp, rdp, ipv6, ipv6-route, ipv6-frag, idrp, rsvp, gre, ipv6-icmp, ipv6-no-nxt, ipv6-opts, iso-ip, eigrp, ospf-igp, ether-ip, encap, pnni, pim, vrrp, l2tp, stp, ptp, isis, crtp, crudp, sctp
Notes	The following elements are part of a choice: <b>eq</b> or <b>neq</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## network-address

Synopsis	Enter the <b>network-address</b> context
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <a href="#">number</a> <a href="#">partition</a> <a href="#">number</a> <a href="#">policy</a> <a href="#">app-filter</a> <a href="#">entry</a> <a href="#">number</a> <a href="#">network-address</a>
Tree	<a href="#">network-address</a>
Description	Commands in this context configure the network address to use for the application filter entry. The network address is the address on the network side of AA, independent of whether the subscriber is acting as a client or server and is not normally used in AA app-filters. The network address will match the destination IP address in a from-sub flow or the source IP address in a to-sub flow.
Notes	The following elements are part of a choice: <b>network-address</b> or <b>server-address</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## eq

Synopsis	Enter the <b>eq</b> context
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <a href="#">number</a> <a href="#">partition</a> <a href="#">number</a> <a href="#">policy</a> <a href="#">app-filter</a> <a href="#">entry</a> <a href="#">number</a> <a href="#">network-address</a> <a href="#">eq</a>
Tree	<a href="#">eq</a>
Description	Commands in this context specify an exact value as the match criterion for the network address.
Notes	The following elements are part of a choice: <b>eq</b> or <b>neq</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## ip-prefix (*ipv4-prefix* | *ipv6-prefix*)

Synopsis	IP prefix
----------	-----------

Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">policy</a> <a href="#">app-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">network-address</a> <a href="#">eq</a> <a href="#">ip-prefix</a> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> )
Tree	<a href="#">ip-prefix</a>
Notes	The following elements are part of a choice: <b>ip-prefix</b> or <b>ip-prefix-list</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **ip-prefix-list** *reference*

Synopsis	IP prefix list
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">policy</a> <a href="#">app-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">network-address</a> <a href="#">eq</a> <a href="#">ip-prefix-list</a> <i>reference</i>
Tree	<a href="#">ip-prefix-list</a>
Reference	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">ip-prefix-list</a> <i>string</i>
Notes	The following elements are part of a choice: <b>ip-prefix</b> or <b>ip-prefix-list</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **neq**

Synopsis	Enter the <b>neq</b> context
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">policy</a> <a href="#">app-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">network-address</a> <a href="#">neq</a>
Tree	<a href="#">neq</a>
Description	Commands in this context specify the non-match criterion used for the network address.
Notes	The following elements are part of a choice: <b>eq</b> or <b>neq</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **ip-prefix** (*ipv4-prefix* | *ipv6-prefix*)

Synopsis	IP prefix
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">policy</a> <a href="#">app-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">network-address</a> <a href="#">neq</a> <a href="#">ip-prefix</a> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> )
Tree	<a href="#">ip-prefix</a>
Notes	The following elements are part of a choice: <b>ip-prefix</b> or <b>ip-prefix-list</b> .

Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **ip-prefix-list** *reference*

Synopsis	IP prefix list
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-filter entry number network-address neq ip-prefix-list reference</a>
Tree	<a href="#">ip-prefix-list</a>
Reference	<b>configure</b> <a href="#">application-assurance group number partition number ip-prefix-list string</a>
Notes	The following elements are part of a choice: <b>ip-prefix</b> or <b>ip-prefix-list</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **protocol**

Synopsis	Enter the <b>protocol</b> context
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-filter entry number protocol</a>
Tree	<a href="#">protocol</a>
Description	Commands in this context configure the protocol signature in the application definition.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **eq** (*string* | *named-item*)

Synopsis	Exact match criterion used for the AA protocol name
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-filter entry number protocol eq (string   named-item)</a>
Tree	<a href="#">eq</a>
String Length	1 to 32
Notes	The following elements are part of a choice: <b>eq</b> or <b>neq</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**neq** (*string* | *named-item*)

Synopsis	Non-match criterion used for the AA protocol name
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">policy</a> <a href="#">app-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">protocol</a> <b>neq</b> ( <i>string</i>   <i>named-item</i> )
Tree	<a href="#">neq</a>
String Length	1 to 32
Notes	The following elements are part of a choice: <b>eq</b> or <b>neq</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**server-address**

Synopsis	Enter the <b>server-address</b> context
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">policy</a> <a href="#">app-filter</a> <a href="#">entry</a> <i>number</i> <b>server-address</b>
Tree	<a href="#">server-address</a>
Description	Commands in this context configure the server address to use for the application filter entry. The server address is the address on the server end of a client-server session.
Notes	The following elements are part of a choice: <b>network-address</b> or <b>server-address</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**eq**

Synopsis	Enter the <b>eq</b> context
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">policy</a> <a href="#">app-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">server-address</a> <b>eq</b>
Tree	<a href="#">eq</a>
Description	Commands in this context configure the attributes of the IP address used for the exact match criterion for the application flow.
Notes	The following elements are part of a choice: <b>eq</b> or <b>neq</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**dns-ip-cache** *reference*

Synopsis	DNS IP cache name
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-filter entry number server-address eq dns-ip-cache reference</a>
Tree	<a href="#">dns-ip-cache</a>
Reference	<b>configure</b> <a href="#">application-assurance group number dns-ip-cache string</a>
Notes	The following elements are part of a choice: <b>dns-ip-cache</b> , <b>ip-prefix</b> , <b>ip-prefix-list</b> , or <b>masked-ip</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**ip-prefix** (*ipv4-prefix* | *ipv6-prefix*)

Synopsis	IP prefix
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-filter entry number server-address eq ip-prefix (ipv4-prefix   ipv6-prefix)</a>
Tree	<a href="#">ip-prefix</a>
Notes	The following elements are part of a choice: <b>dns-ip-cache</b> , <b>ip-prefix</b> , <b>ip-prefix-list</b> , or <b>masked-ip</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**ip-prefix-list** *reference*

Synopsis	IP prefix list
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-filter entry number server-address eq ip-prefix-list reference</a>
Tree	<a href="#">ip-prefix-list</a>
Reference	<b>configure</b> <a href="#">application-assurance group number partition number ip-prefix-list string</a>
Notes	The following elements are part of a choice: <b>dns-ip-cache</b> , <b>ip-prefix</b> , <b>ip-prefix-list</b> , or <b>masked-ip</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## masked-ip

Synopsis	Enter the <b>masked-ip</b> context
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">partition number</a> <a href="#">policy app-filter entry number</a> <a href="#">server-address eq masked-ip</a>
Tree	<a href="#">masked-ip</a>
Description	Commands in this context configure the attributes of a masked IP address.
Notes	The following elements are part of a choice: <b>dns-ip-cache</b> , <b>ip-prefix</b> , <b>ip-prefix-list</b> , or <b>masked-ip</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## address (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	IPv4 or IPv6 address mask
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">partition number</a> <a href="#">policy app-filter entry number</a> <a href="#">server-address eq masked-ip address</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	<a href="#">address</a>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## netmask (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	IPv4 or IPv6 address mask
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">partition number</a> <a href="#">policy app-filter entry number</a> <a href="#">server-address eq masked-ip netmask</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	<a href="#">netmask</a>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## neq

Synopsis	Enter the <b>neq</b> context
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">partition number</a> <a href="#">policy app-filter entry number</a> <a href="#">server-address neq</a>
Tree	<a href="#">neq</a>

Description	Commands in this context configure the attributes of the IP address used for non-matching criteria in the application flow.
Notes	The following elements are part of a choice: <b>eq</b> or <b>neq</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **dns-ip-cache** *reference*

Synopsis	DNS IP cache name
Context	<b>configure</b> <a href="#">application-assurance group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">policy app-filter entry</a> <i>number</i> <a href="#">server-address</a> <a href="#">neq dns-ip-cache</a> <i>reference</i>
Tree	<a href="#">dns-ip-cache</a>
Reference	<b>configure</b> <a href="#">application-assurance group</a> <i>number</i> <a href="#">dns-ip-cache</a> <i>string</i>
Notes	The following elements are part of a choice: <b>dns-ip-cache</b> , <b>ip-prefix</b> , <b>ip-prefix-list</b> , or <b>masked-ip</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **ip-prefix** (*ipv4-prefix* | *ipv6-prefix*)

Synopsis	IP prefix
Context	<b>configure</b> <a href="#">application-assurance group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">policy app-filter entry</a> <i>number</i> <a href="#">server-address</a> <a href="#">neq ip-prefix</a> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> )
Tree	<a href="#">ip-prefix</a>
Notes	The following elements are part of a choice: <b>dns-ip-cache</b> , <b>ip-prefix</b> , <b>ip-prefix-list</b> , or <b>masked-ip</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **ip-prefix-list** *reference*

Synopsis	IP prefix list
Context	<b>configure</b> <a href="#">application-assurance group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">policy app-filter entry</a> <i>number</i> <a href="#">server-address</a> <a href="#">neq ip-prefix-list</a> <i>reference</i>
Tree	<a href="#">ip-prefix-list</a>
Reference	<b>configure</b> <a href="#">application-assurance group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">ip-prefix-list</a> <i>string</i>

Notes	The following elements are part of a choice: <b>dns-ip-cache</b> , <b>ip-prefix</b> , <b>ip-prefix-list</b> , or <b>masked-ip</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## masked-ip

Synopsis	Enter the <b>masked-ip</b> context
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-filter entry number server-address neq masked-ip</a>
Tree	<a href="#">masked-ip</a>
Description	Commands in this context configure the attributes of a masked IP address.
Notes	The following elements are part of a choice: <b>dns-ip-cache</b> , <b>ip-prefix</b> , <b>ip-prefix-list</b> , or <b>masked-ip</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## address (*ipv4-address-no-zone | ipv6-address-no-zone*)

Synopsis	IPv4 or IPv6 address mask
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-filter entry number server-address neq masked-ip address (ipv4-address-no-zone   ipv6-address-no-zone)</a>
Tree	<a href="#">address</a>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## netmask (*ipv4-address-no-zone | ipv6-address-no-zone*)

Synopsis	IPv4 or IPv6 address mask
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-filter entry number server-address neq masked-ip netmask (ipv4-address-no-zone   ipv6-address-no-zone)</a>
Tree	<a href="#">netmask</a>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**server-port**

Synopsis	Enter the <b>server-port</b> context
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-filter entry number server-port</a>
Tree	<a href="#">server-port</a>
Description	Commands in this context specify the server TCP or UDP port number to use in the application definition.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**eq**

Synopsis	Enter the <b>eq</b> context
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-filter entry number server-port eq</a>
Tree	<a href="#">eq</a>
Description	Commands in this context configure the exact value as the match criterion for the server TCP or UDP number in the app-filter.
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>neq</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**first-packet-policy** *keyword*

Synopsis	TCP/UDP port application to apply
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-filter entry number server-port eq first-packet-policy keyword</a>
Tree	<a href="#">first-packet-policy</a>
Options	first-packet-trusted, first-packet-validate
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**port-list** *reference*

Synopsis	Port-list name used in application filter criteria
----------	--

Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">policy</a> <a href="#">app-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">server-port</a> <a href="#">eq</a> <a href="#">port-list</a> <a href="#">reference</a>
Tree	<a href="#">port-list</a>
Reference	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">port-list</a> <a href="#">string</a>
Notes	The following elements are part of a choice: <b>port-list</b> , <b>port-number</b> , or <b>range</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **port-number** *number*

Synopsis	Server port number used as match criterion
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">policy</a> <a href="#">app-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">server-port</a> <a href="#">eq</a> <a href="#">port-number</a> <i>number</i>
Tree	<a href="#">port-number</a>
Range	0   1 to 65535
Default	0
Notes	The following elements are part of a choice: <b>port-list</b> , <b>port-number</b> , or <b>range</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **range**

Synopsis	Enter the <b>range</b> context
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">policy</a> <a href="#">app-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">server-port</a> <a href="#">eq</a> <a href="#">range</a>
Tree	<a href="#">range</a>
Description	Commands in this context specify the match value as the match criterion based on the starting or ending port number.
Notes	The following elements are part of a choice: <b>port-list</b> , <b>port-number</b> , or <b>range</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **end** *number*

Synopsis	TCP/UDP ending port number
----------	----------------------------

Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">policy</a> <a href="#">app-filter</a> <a href="#">entry</a> <a href="#">number</a> <a href="#">server-port</a> <a href="#">eq</a> <a href="#">range</a> <a href="#">end</a> <i>number</i>
Tree	<a href="#">end</a>
Range	0   1 to 65535
Default	1
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**start number**

Synopsis	TCP/UDP starting port number
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">policy</a> <a href="#">app-filter</a> <a href="#">entry</a> <a href="#">number</a> <a href="#">server-port</a> <a href="#">eq</a> <a href="#">range</a> <a href="#">start</a> <i>number</i>
Tree	<a href="#">start</a>
Range	0   1 to 65535
Default	0
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**gt**

Synopsis	Enter the <b>gt</b> context
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">policy</a> <a href="#">app-filter</a> <a href="#">entry</a> <a href="#">number</a> <a href="#">server-port</a> <a href="#">gt</a>
Tree	<a href="#">gt</a>
Description	Commands in this context specify the greater than value as the match criterion for the server port number for the app-filter.
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>neq</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**port-number number**

Synopsis	Server port number used as match criterion
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">policy</a> <a href="#">app-filter</a> <a href="#">entry</a> <a href="#">number</a> <a href="#">server-port</a> <a href="#">gt</a> <a href="#">port-number</a> <i>number</i>

Tree	<a href="#">port-number</a>
Range	0   1 to 65535
Default	0
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## lt

Synopsis	Enter the <b>lt</b> context
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">partition number</a> <a href="#">policy app-filter entry number</a> <a href="#">server-port lt</a>
Tree	<a href="#">lt</a>
Description	Commands in this context specify the less than value as the match criterion for the server port number for the app-filter.
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>neq</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## port-number number

Synopsis	Server port number used as match criterion
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">partition number</a> <a href="#">policy app-filter entry number</a> <a href="#">server-port lt port-number number</a>
Tree	<a href="#">port-number</a>
Range	0   1 to 65535
Default	0
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## neq

Synopsis	Enter the <b>neq</b> context
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">partition number</a> <a href="#">policy app-filter entry number</a> <a href="#">server-port neq</a>
Tree	<a href="#">neq</a>

Description	Commands in this context configure non-match criterion used for the server TCP or UDP number in the app-filter.
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>neq</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **port-list** *reference*

Synopsis	Port-list name used in application filter criteria
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-filter entry number server-port neq port-list reference</a>
Tree	<a href="#">port-list</a>
Reference	<b>configure</b> <a href="#">application-assurance group number partition number port-list string</a>
Notes	The following elements are part of a choice: <b>port-list</b> , <b>port-number</b> , or <b>range</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **port-number** *number*

Synopsis	Server port number used as match criterion
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-filter entry number server-port neq port-number number</a>
Tree	<a href="#">port-number</a>
Range	0   1 to 65535
Default	0
Notes	The following elements are part of a choice: <b>port-list</b> , <b>port-number</b> , or <b>range</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **range**

Synopsis	Enter the <b>range</b> context
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-filter entry number server-port neq range</a>
Tree	<a href="#">range</a>

Description	Commands in this context specify the match value as the match criterion based on the starting or ending port number.
Notes	The following elements are part of a choice: <b>port-list</b> , <b>port-number</b> , or <b>range</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **end number**

Synopsis	TCP/UDP ending port number
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-filter entry number server-port neq range end number</a>
Tree	<a href="#">end</a>
Range	0   1 to 65535
Default	1
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **start number**

Synopsis	TCP/UDP starting port number
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-filter entry number server-port neq range start number</a>
Tree	<a href="#">start</a>
Range	0   1 to 65535
Default	0
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **app-group** [[application-group-name](#)] *string*

Synopsis	Enter the <b>app-group</b> list instance
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-group string</a>
Tree	<a href="#">app-group</a>
Description	Commands in this context create an application group for an application assurance policy.
Introduced	21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **[application-group-name] string**

Synopsis Application group name

Context **configure** [application-assurance group number partition number policy app-group string](#)

Tree [app-group](#)

String Length 1 to 32

Notes This element is part of a list key.

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **charging-group reference**

Synopsis Charging group used in the AA application group policy

Context **configure** [application-assurance group number partition number policy app-group string charging-group reference](#)

Tree [charging-group](#)

Reference **configure** [application-assurance group number partition number policy charging-group string](#)

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **description string**

Synopsis Text description

Context **configure** [application-assurance group number partition number policy app-group string description string](#)

Tree [description](#)

String Length 1 to 80

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **export-id number**

Synopsis App group export ID used in RADIUS accounting export

Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">policy</a> <a href="#">app-group</a> <i>string</i> <a href="#">export-id</a> <i>number</i>
Tree	<a href="#">export-id</a>
Description	This command assigns an export ID value to a charging group, an application group, or an application that RADIUS accounting uses for accounting export identification. This export ID is encoded in the top two bytes of the RADIUS accounting VSA to identify which charging group the counter value represents.  If no export ID is assigned, the counter cannot be added to the AA subscriber stats RADIUS export-type. After a charging group index is referenced, it cannot be deleted without removing the reference.
Range	1 to 255
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **app-profile** [[app-profile-name](#)] *string*

Synopsis	Enter the <b>app-profile</b> list instance
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">policy</a> <a href="#">app-profile</a> <i>string</i>
Tree	<a href="#">app-profile</a>
Description	Commands in this context create an application profile and configure the profile parameters.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **[app-profile-name]** *string*

Synopsis	App-profile name
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">policy</a> <a href="#">app-profile</a> <i>string</i>
Tree	<a href="#">app-profile</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **aa-sub-suppressible** *boolean*

Synopsis	Enable AA suppression for subs with this app profile
----------	--

Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">policy</a> <a href="#">app-profile</a> <i>string</i> <a href="#">aa-sub-suppressible</a> <i>boolean</i>
Tree	<a href="#">aa-sub-suppressible</a>
Description	When configured to <b>true</b> , this command configures the ability to suppress Application Assurance for subscribers with this application profile.  This function is used in the context of an SRRP group interface. If an SRRP group interface is configured as <b>configure service ies subscriber-interface group-interface suppress-aa-sub</b> or <b>configure service vprn subscriber-interface group-interface suppress-aa-sub</b> , subscribers with an application profile configured as suppressible are not diverted to Application Assurance.
Default	false
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **capacity-cost** *number*

Synopsis	Application profile capacity cost
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">policy</a> <a href="#">app-profile</a> <i>string</i> <a href="#">capacity-cost</a> <i>number</i>
Tree	<a href="#">capacity-cost</a>
Description	This command configures an application profile capacity cost.  Capacity cost based load balancing allows a cost to be assigned to diverted SAPs (with the application profile). This allows for load balancing SAPs between ISAs and acts as a threshold to notify the operator if capacity planning is exceeded.
Range	1 to 65535
Default	1
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **characteristic** [[characteristic-name](#)] *reference*

Synopsis	Enter the <b>characteristic</b> list instance
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">policy</a> <a href="#">app-profile</a> <i>string</i> <a href="#">characteristic</a> <i>reference</i>
Tree	<a href="#">characteristic</a>
Description	Commands in this context assign one of the existing values of an existing application service option characteristic to the application profile.
Introduced	21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### [characteristic-name] *reference*

Synopsis Application service option characteristic name

Context **configure** [application-assurance](#) [group](#) *number* [partition](#) *number* [policy](#) [app-profile](#) *string* [characteristic](#) *reference*

Tree [characteristic](#)

Reference **configure** [application-assurance](#) [group](#) *number* [partition](#) *number* [policy](#) [app-service-options](#) [characteristic](#) *string*

Notes This element is part of a list key.

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### value *reference*

Synopsis ASO characteristic value name

Context **configure** [application-assurance](#) [group](#) *number* [partition](#) *number* [policy](#) [app-profile](#) *string* [characteristic](#) *reference* [value](#) *reference*

Tree [value](#)

Reference **configure** [application-assurance](#) [group](#) *number* [partition](#) *number* [policy](#) [app-service-options](#) [characteristic](#) *string* [value](#) *string*

Notes This element is mandatory.

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### description *string*

Synopsis Text description

Context **configure** [application-assurance](#) [group](#) *number* [partition](#) *number* [policy](#) [app-profile](#) *string* [description](#) *string*

Tree [description](#)

String Length 1 to 80

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**divert *boolean***

Synopsis	Enable traffic redirection to AA ISAs or ESA VMs
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">partition number</a> <a href="#">policy app-profile string</a> <b>divert <i>boolean</i></b>
Tree	<a href="#">divert</a>
Description	When configured to <b>true</b> , this command enables the redirection of traffic to AA ISAs or ESA VMs for the system-wide forwarding classes diverted to Application Assurance ( <b>configure isa application-assurance-group divert-fc</b> ) for AA subscribers using this application profile.  When configured to <b>false</b> , this command stops the redirection of traffic to AA ISAs or ESA VMs for the AA subscribers using this application profile.
Default	false
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**app-qos-policy**

Synopsis	Enter the <b>app-qos-policy</b> context
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">partition number</a> <a href="#">policy app-qos-policy</a>
Tree	<a href="#">app-qos-policy</a>
Description	Commands in this context configure an application QoS policy.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**entry [[entry-id](#)] *number***

Synopsis	Enter the <b>entry</b> list instance
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">partition number</a> <a href="#">policy app-qos-policy</a> <b>entry <i>number</i></b>
Tree	<a href="#">entry</a>
Description	Commands in this context create an application QoS policy (AQP) entry.  A flow that matches multiple AQP entries will have multiple AQP entries actions applied. If a conflict occurs for two or more actions, the action from the AQP entry with the lowest numerical value takes precedence.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**[entry-id] number**

Synopsis	AQP entry ID
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-qos-policy entry number</a>
Tree	<a href="#">entry</a>
Range	1 to 65535
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**action**

Synopsis	Enter the <b>action</b> context
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-qos-policy entry number action</a>
Tree	<a href="#">action</a>
Description	Commands in this context configure AQP actions to be performed on flows that match the match criteria of the AQP entry.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**abandon-tcp-optimization boolean**

Synopsis	Abandon TCPO for this entry
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-qos-policy entry number action abandon-tcp-optimization boolean</a>
Tree	<a href="#">abandon-tcp-optimization</a>
Description	When configured to <b>true</b> , this command disables TCPO for flows matching this AQP entry.
Default	false
Introduced	22.2.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## bandwidth-policer

Synopsis	Enter the <b>bandwidth-policer</b> context
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">partition number</a> <a href="#">policy app-qos-policy entry number</a> <a href="#">action bandwidth-policer</a>
Tree	<a href="#">bandwidth-policer</a>
Description	<p>Commands in this context assign an existing bandwidth policer as an action on flows matching this AQP entry.</p> <p>The match criteria for the AQP entry must specify a unidirectional traffic direction before a policer action can be configured. If a policer is used in one direction in an AQP match entry, the same policer name cannot be used by another AQP entry that uses different traffic direction match criteria.</p> <p>When multiple policers apply to a single flow, the final action on a packet is the worst case of all policer outcomes (for example, if one of the policers marks packet out of profile, the final marking will reflect that).</p>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## anl reference

Synopsis	Access network locator bandwidth policer
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">partition number</a> <a href="#">policy app-qos-policy entry number</a> <a href="#">action bandwidth-policer anl reference</a>
Tree	<a href="#">anl</a>
Description	This command creates an Application Assurance policy profile for a policer instance for each ANL that limits traffic bandwidth in the scope of that ANL. For ANL, only single-bucket bandwidth policers can be configured.
Reference	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">policer anl-bandwidth-policer string</a>
Notes	The following elements are part of a choice: <b>anl</b> , <b>dual-bucket</b> , or <b>single-bucket</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## dual-bucket reference

Synopsis	Dual bucket bandwidth limiting policer
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">partition number</a> <a href="#">policy app-qos-policy entry number</a> <a href="#">action bandwidth-policer dual-bucket reference</a>
Tree	<a href="#">dual-bucket</a>

Description	This command creates an Application Assurance policy profile for a dual bucket (PIR) bandwidth limiting policer.
Reference	<b>configure</b> <a href="#">application-assurance group number policer dual-bucket-bandwidth-policer string</a>
Notes	The following elements are part of a choice: <b>anl</b> , <b>dual-bucket</b> , or <b>single-bucket</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **single-bucket** *reference*

Synopsis	Single bucket bandwidth limiting policer
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-qos-policy entry number action bandwidth-policer single-bucket reference</a>
Tree	<a href="#">single-bucket</a>
Description	This command creates an Application Assurance policy profile for a single bucket (PIR) bandwidth limiting policer.
Reference	<b>configure</b> <a href="#">application-assurance group number policer single-bucket-bandwidth-policer string</a>
Notes	The following elements are part of a choice: <b>anl</b> , <b>dual-bucket</b> , or <b>single-bucket</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **dns-ip-cache** *reference*

Synopsis	DNS IP cache name
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-qos-policy entry number action dns-ip-cache reference</a>
Tree	<a href="#">dns-ip-cache</a>
Reference	<b>configure</b> <a href="#">application-assurance group number dns-ip-cache string</a>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **drop** *boolean*

Synopsis	Enable drop action for the AQP entry
----------	--------------------------------------

Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-qos-policy entry number action drop boolean</a>
Tree	<a href="#">drop</a>
Description	When configured to <b>true</b> , all flow traffic matching this AQP entry is dropped. The drop action is performed first and no other action is invoked on that flow even if multiple other actions exist for the flow because of one or more AQP entry matches. When configured to <b>false</b> , this command disables the drop action on flows matching this AQP entry.
Default	false
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## error-drop

Synopsis	Enable the <b>error-drop</b> context
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-qos-policy entry number action error-drop</a>
Tree	<a href="#">error-drop</a>
Description	Commands in this context configure a drop action for error flows (for instance, bad IP checksums or TCP/UDP port 0).
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## event-log *reference*

Synopsis	Event log action for the AQP entry
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-qos-policy entry number action error-drop event-log reference</a>
Tree	<a href="#">event-log</a>
Reference	<b>configure</b> <a href="#">application-assurance group number partition number event-log string</a>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## flow-count-limit-policer

Synopsis	Enter the <b>flow-count-limit-policer</b> context
----------	---

Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-qos-policy entry number action flow-count-limit-policer</a>
Tree	<a href="#">flow-count-limit-policer</a>
Description	<p>Commands in this context assign an existing flow count limit policer as an action on flows matching this AQP entry.</p> <p>The match criteria for the AQP entry must specify a unidirectional traffic direction before a policer action can be configured. If a policer is used in one direction in an AQP match entry, the same policer name cannot be used by another AQP entry that uses different traffic direction match criteria.</p> <p>When multiple policers are applied to a single flow, the final action on a packet is the worst case of all policer outcomes (for example, if one of the policers marks packet out of profile, the final marking will reflect that).</p>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **event-log** *reference*

Synopsis	Event log name
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-qos-policy entry number action flow-count-limit-policer event-log reference</a>
Tree	<a href="#">event-log</a>
Reference	<b>configure</b> <a href="#">application-assurance group number partition number event-log string</a>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **policer-name** *reference*

Synopsis	Policer name
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-qos-policy entry number action flow-count-limit-policer policer-name reference</a>
Tree	<a href="#">policer-name</a>
Description	This command specifies the name of the flow count limit policer for flows matching the AQP entry. The policer name is configured in the <b>configure application-assurance group policer</b> context.
Reference	<b>configure</b> <a href="#">application-assurance group number policer flow-count-limit-policer string</a>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**flow-setup-rate-policer**

Synopsis	Enter the <b>flow-setup-rate-policer</b> context
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-qos-policy entry number action flow-setup-rate-policer</a>
Tree	<a href="#">flow-setup-rate-policer</a>
Description	<p>Commands in this context assign an existing flow setup rate policer as an action on flows matching this AQP entry.</p> <p>The match criteria for the AQP entry must specify a unidirectional traffic direction before a policer action can be configured. If a policer is used in one direction in an AQP match entry, the same policer name cannot be used for another AQP entry that uses different traffic direction match criteria.</p> <p>When multiple policers are applied to a single flow, the final action on a packet is the worst case of all policer outcomes (for example, if one of the policers marks a packet out of profile, the final marking reflects that).</p>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**event-log** *reference*

Synopsis	Events log name for flow-setup rate policer
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-qos-policy entry number action flow-setup-rate-policer event-log reference</a>
Tree	<a href="#">event-log</a>
Reference	<b>configure</b> <a href="#">application-assurance group number partition number event-log string</a>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**policer-name** *reference*

Synopsis	Policer name
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-qos-policy entry number action flow-setup-rate-policer policer-name reference</a>
Tree	<a href="#">policer-name</a>
Description	This command specifies the name of the flow setup rate policer for flows matching this AQP entry.
Reference	<b>configure</b> <a href="#">application-assurance group number policer flow-setup-rate-policer string</a>
Introduced	21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## fragment-drop

Synopsis Enter the **fragment-drop** context

Context **configure** [application-assurance group number partition number policy app-qos-policy entry number action fragment-drop](#)

Tree [fragment-drop](#)

Description Commands in this context specify the drop action options to apply to fragments.

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## drop-scope *keyword*

Synopsis Fragment-drop scope

Context **configure** [application-assurance group number partition number policy app-qos-policy entry number action fragment-drop drop-scope keyword](#)

Tree [drop-scope](#)

Description This command specifies which fragments to drop as an action on flows matching this AQP entry.

Options all, out-of-order

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## event-log *reference*

Synopsis Event log name

Context **configure** [application-assurance group number partition number policy app-qos-policy entry number action fragment-drop event-log reference](#)

Tree [event-log](#)

Reference **configure** [application-assurance group number partition number event-log string](#)

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **gtp-filter** *reference*

Synopsis	GTP filter executed for flows matching this AQP entry
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">partition number</a> <a href="#">policy app-qos-policy entry number</a> <a href="#">action gtp-filter reference</a>
Tree	<a href="#">gtp-filter</a>
Reference	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">partition number</a> <a href="#">gtp gtp-filter string</a>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **http-enrich** *reference*

Synopsis	HTTP header enrichment action for the AQP entry
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">partition number</a> <a href="#">policy app-qos-policy entry number</a> <a href="#">action http-enrich reference</a>
Tree	<a href="#">http-enrich</a>
Description	This command configures the HTTP header enrichment template name that is applied as defined in the tmnxBsxHttpEnrichTable. An empty value specifies no HTTP header enrichment template.
Reference	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">http-enrich string</a>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **http-error-redirect** *reference*

Synopsis	HTTP error redirect for the AQP entry
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">partition number</a> <a href="#">policy app-qos-policy entry number</a> <a href="#">action http-error-redirect reference</a>
Tree	<a href="#">http-error-redirect</a>
Description	This command specifies the HTTP error redirect that is applied as defined in the redirect table. An empty value specifies no HTTP error redirect.
Reference	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">http-error-redirect string</a>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## http-notification *reference*

Synopsis	HTTP notification to use for flows matching AQP entry
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-qos-policy entry number action http-notification reference</a>
Tree	<a href="#">http-notification</a>
Reference	<b>configure</b> <a href="#">application-assurance group number http-notification string</a>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## http-redirect

Synopsis	Enter the <b>http-redirect</b> context
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-qos-policy entry number action http-redirect</a>
Tree	<a href="#">http-redirect</a>
Description	Commands in this context assign an existing HTTP redirect policy as an action on flows matching this AQP entry.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## flow-type *keyword*

Synopsis	Flow type for HTTP redirect of flows matching the entry
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-qos-policy entry number action http-redirect flow-type keyword</a>
Tree	<a href="#">flow-type</a>
Description	<p>This command assigns an existing HTTP redirect policy as an action on flows matching this AQP entry. The redirect only takes effect if the matching flows are HTTP and the condition specified is met.</p> <p>The condition specified by dropped flows means the flow is dropped due to an AQP action, such as flow rate, count policers, or drop actions. The admitted flows condition allows the operator to redirect HTTP traffic to a web portal while allowing non-HTTP traffic matching the same AQP rule to be forwarded.</p> <p>No HTTP redirect takes place if the HTTP redirect action and a drop/flow-police action are part of the default AQP policy. In this case, any flow drop actions take place before identification of the application/application-group.</p>
Options	dropped-flows, admitted-flows
Introduced	21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **name** *reference*

Synopsis HTTP redirect policy name

Context **configure** [application-assurance](#) [group](#) *number* [partition](#) *number* [policy](#) [app-qos-policy](#) [entry](#) *number* [action](#) [http-redirect](#) *name* *reference*

Tree [name](#)

Description This command specifies the name of an existing HTTP policy redirect.

Reference **configure** [application-assurance](#) [group](#) *number* [http-redirect](#) *string*

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **mirror-source**

Synopsis Enter the **mirror-source** context

Context **configure** [application-assurance](#) [group](#) *number* [partition](#) *number* [policy](#) [app-qos-policy](#) [entry](#) *number* [action](#) [mirror-source](#)

Tree [mirror-source](#)

Description Commands in this context configure an application-based policy mirroring service that uses the AQP entry of this AA ISA as a mirror source.

When configured, the AQP entry becomes a mirror source for IP packets seen by AA. The mirrored packet is an IP packet analyzed by AA and does not include encapsulations present on the incoming interfaces.

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **all-inclusive** *boolean*

Synopsis Mirror flows matching the AQP subscriber default policy

Context **configure** [application-assurance](#) [group](#) *number* [partition](#) *number* [policy](#) [app-qos-policy](#) [entry](#) *number* [action](#) [mirror-source](#) [all-inclusive](#) *boolean*

Tree [all-inclusive](#)

Description This command specifies that all packets during the identification phase that could match a given AQP rule are mirrored in addition to packets after an application identification completes that match the AQP rule. This ensures that all packets of a flow are mirrored at a cost of sending some unidentified packets, which after the application is identified no longer match this AQP entry.

Default	false
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **mirror-service** *reference*

Synopsis	Mirror source service ID for flows matching the entry
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-qos-policy entry number action mirror-source mirror-service reference</a>
Tree	<a href="#">mirror-service</a>
Description	This command specifies the mirror source service ID to use for flows that match this policy.
Reference	<b>configure</b> <a href="#">mirror mirror-dest string</a>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **overload-drop**

Synopsis	Enable the <b>overload-drop</b> context
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-qos-policy entry number action overload-drop</a>
Tree	<a href="#">overload-drop</a>
Description	Commands in this context configure a drop action for cases where flow records are not created (overload). This command is only applicable to ISA2 hardware.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **event-log** *reference*

Synopsis	Event log name
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-qos-policy entry number action overload-drop event-log reference</a>
Tree	<a href="#">event-log</a>
Reference	<b>configure</b> <a href="#">application-assurance group number partition number event-log string</a>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**remark**

Synopsis	Enter the <b>remark</b> context
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-qos-policy entry number action remark</a>
Tree	<a href="#">remark</a>
Description	Commands in this context configure the remark action on flows matching this AQP entry.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**dscp**

Synopsis	Enter the <b>dscp</b> context
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-qos-policy entry number action remark dscp</a>
Tree	<a href="#">dscp</a>
Description	<p>Commands in this context configure the DSCP remark action or actions on flows matching this AQP entry.</p> <p>All packets for all flows matching this AQP entry are remarked to the configured DSCP name.</p> <p>DSCP remark can only be applied when the entry remarks forwarding class or forwarding class and priority. In-profile and out-of-profile of a packet for DSCP remark is assessed after all AQP policing and priority remarking actions have taken place.</p>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**in-profile keyword**

Synopsis	DSCP name to remark matching in-profile flows
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-qos-policy entry number action remark dscp in-profile keyword</a>
Tree	<a href="#">in-profile</a>
Options	be, cp1, cp2, cp3, cp4, cp5, cp6, cp7, cs1, cp9, af11, cp11, af12, cp13, af13, cp15, cs2, cp17, af21, cp19, af22, cp21, af23, cp23, cs3, cp25, af31, cp27, af32, cp29, af33, cp31, cs4, cp33, af41, cp35, af42, cp37, af43, cp39, cs5, cp41, cp42, cp43, cp44, cp45, ef, cp47, nc1, cp49, cp50, cp51, cp52, cp53, cp54, cp55, nc2, cp57, cp58, cp59, cp60, cp61, cp62, cp63
Introduced	21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **out-profile** *keyword*

Synopsis DSCP name to remark matching out-of-profile flows

Context **configure** [application-assurance](#) [group](#) *number* [partition](#) *number* [policy](#) [app-qos-policy](#) [entry](#) *number* [action](#) [remark](#) [dscp](#) **out-profile** *keyword*

Tree [out-profile](#)

Options be, cp1, cp2, cp3, cp4, cp5, cp6, cp7, cs1, cp9, af11, cp11, af12, cp13, af13, cp15, cs2, cp17, af21, cp19, af22, cp21, af23, cp23, cs3, cp25, af31, cp27, af32, cp29, af33, cp31, cs4, cp33, af41, cp35, af42, cp37, af43, cp39, cs5, cp41, cp42, cp43, cp44, cp45, ef, cp47, nc1, cp49, cp50, cp51, cp52, cp53, cp54, cp55, nc2, cp57, cp58, cp59, cp60, cp61, cp62, cp63

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **fc** *keyword*

Synopsis FC remark action for flows matching this entry

Context **configure** [application-assurance](#) [group](#) *number* [partition](#) *number* [policy](#) [app-qos-policy](#) [entry](#) *number* [action](#) [remark](#) **fc** *keyword*

Tree [fc](#)

Options be, l2, af, l1, h2, ef, h1, nc

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **priority** *keyword*

Synopsis Priority to use to remark flows matching this entry

Context **configure** [application-assurance](#) [group](#) *number* [partition](#) *number* [policy](#) [app-qos-policy](#) [entry](#) *number* [action](#) [remark](#) **priority** *keyword*

Tree [priority](#)

Options low, high, auto

Default auto

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**sctp-filter** *reference*

Synopsis	SCTP filter to use for flows matching the AQP entry
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-qos-policy entry number action sctp-filter reference</a>
Tree	<a href="#">sctp-filter</a>
Reference	<b>configure</b> <a href="#">application-assurance group number partition number sctp-filter string</a>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**session-filter** *reference*

Synopsis	Session filter to use for flows matching the AQP entry
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-qos-policy entry number action session-filter reference</a>
Tree	<a href="#">session-filter</a>
Reference	<b>configure</b> <a href="#">application-assurance group number partition number session-filter string</a>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**tcp-mss-adjust** *number*

Synopsis	TCP MSS adjustment traffic action and size
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-qos-policy entry number action tcp-mss-adjust number</a>
Tree	<a href="#">tcp-mss-adjust</a>
Range	160 to 10240
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**tcp-validate** *reference*

Synopsis	TCP validation policy action for entry matching flows
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-qos-policy entry number action tcp-validate reference</a>
Tree	<a href="#">tcp-validate</a>

Description	This command assigns an existing TCP validation policy as an action on flows matching this AQP entry. TCP validation can only be called from AQP entries that: <ul style="list-style-type: none"> <li>• have no matching conditions that relate to information extracted from the incoming IP packets; for example, no application or IP address.</li> <li>• allow the following match conditions: none, aa-sub, characteristic, traffic-direction (both only), traffic-direction cannot be unidirectional (from or to sub). It can either be set to both or left unspecified.</li> </ul>
Reference	<b>configure</b> <a href="#">application-assurance group number partition number tcp-validate string</a>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **tls-enrich** *reference*

Synopsis	HTTP TLS enrichment action for the AQP entry
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-qos-policy entry number action tls-enrich reference</a>
Tree	<a href="#">tls-enrich</a>
Reference	<b>configure</b> <a href="#">application-assurance group number http-enrich string</a>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **url-filter**

Synopsis	Enter the <b>url-filter</b> context
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-qos-policy entry number action url-filter</a>
Tree	<a href="#">url-filter</a>
Description	Commands in this context configure a URL filter action for flows matching this entry.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **characteristic** *reference*

Synopsis	URL filter characteristic used for matching AQP entries
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-qos-policy entry number action url-filter characteristic reference</a>

Tree	<a href="#">characteristic</a>
Reference	<b>configure</b> <a href="#">application-assurance group number partition number policy app-service-options characteristic string</a>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **name reference**

Synopsis	URL filter name
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-qos-policy entry number action url-filter name reference</a>
Tree	<a href="#">name</a>
Reference	<b>configure</b> <a href="#">application-assurance group number url-filter string</a>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **admin-state keyword**

Synopsis	Administrative state of the AA AQP entry
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-qos-policy entry number admin-state keyword</a>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **description string**

Synopsis	Text description
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-qos-policy entry number description string</a>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## match

Synopsis	Enter the <b>match</b> context
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-qos-policy entry number match</a>
Tree	<a href="#">match</a>
Description	Commands in this context configure flow match rules for this AQP entry. A flow matches this AQP entry only if it matches all match rules defined (logical AND of all rules). If no match rule is specified, the entry will match all flows.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## aa-sub

Synopsis	Enter the <b>aa-sub</b> context
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-qos-policy entry number match aa-sub</a>
Tree	<a href="#">aa-sub</a>
Description	Commands in this context specify a Service Access Point (SAP) or an Enhanced Subscriber Management (ESM) subscriber as matching criteria.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## esm

Synopsis	Enter the <b>esm</b> context
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-qos-policy entry number match aa-sub esm</a>
Tree	<a href="#">esm</a>
Description	Commands in this context configure the ESM fields for the AA subscriber match entry.
Notes	The following elements are part of a choice: <b>esm</b> , <b>esm-mac</b> , <b>sap</b> , <b>spoke-sdp</b> , or <b>transit</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **eq string**

Synopsis	Exact match criterion used for the ESM subscriber
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-qos-policy entry number match aa-sub esm eq string</a>
Tree	<a href="#">eq</a>
String Length	1 to 32
Notes	The following elements are part of a choice: <b>eq</b> or <b>neq</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **neq string**

Synopsis	Non-match criterion used for ESM subscriber
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-qos-policy entry number match aa-sub esm neq string</a>
Tree	<a href="#">neq</a>
String Length	1 to 32
Notes	The following elements are part of a choice: <b>eq</b> or <b>neq</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **esm-mac**

Synopsis	Enter the <b>esm-mac</b> context
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-qos-policy entry number match aa-sub esm-mac</a>
Tree	<a href="#">esm-mac</a>
Description	Commands in this context configure the ESM MAC fields for the AA subscriber match entry.
Notes	The following elements are part of a choice: <b>esm</b> , <b>esm-mac</b> , <b>sap</b> , <b>spoke-sdp</b> , or <b>transit</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**eq string**

Synopsis	Exact match criterion used for ESM MAC subscriber
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-qos-policy entry number match aa-sub esm-mac eq string</a>
Tree	<a href="#">eq</a>
String Length	1 to 32
Notes	The following elements are part of a choice: <b>eq</b> or <b>neq</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**neq string**

Synopsis	Non-match criterion used for AA subscriber ESM MAC
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-qos-policy entry number match aa-sub esm-mac neq string</a>
Tree	<a href="#">neq</a>
String Length	1 to 32
Notes	The following elements are part of a choice: <b>eq</b> or <b>neq</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**sap**

Synopsis	Enter the <b>sap</b> context
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-qos-policy entry number match aa-sub sap</a>
Tree	<a href="#">sap</a>
Description	Commands in this context configure the SAP fields for the AA subscriber match entry.
Notes	The following elements are part of a choice: <b>esm</b> , <b>esm-mac</b> , <b>sap</b> , <b>spoke-sdp</b> , or <b>transit</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**eq string**

Synopsis	Exact match criterion used for the SAP subscriber
----------	---

Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <a href="#">number</a> <a href="#">partition</a> <a href="#">number</a> <a href="#">policy</a> <a href="#">app-qos-policy</a> <a href="#">entry</a> <a href="#">number</a> <a href="#">match</a> <a href="#">aa-sub</a> <a href="#">sap</a> <a href="#">eq</a> <a href="#">string</a>
Tree	<a href="#">eq</a>
String Length	1 to 45
Notes	The following elements are part of a choice: <b>eq</b> or <b>neq</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **neq** *string*

Synopsis	Non-match criterion used for the SAP subscriber
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <a href="#">number</a> <a href="#">partition</a> <a href="#">number</a> <a href="#">policy</a> <a href="#">app-qos-policy</a> <a href="#">entry</a> <a href="#">number</a> <a href="#">match</a> <a href="#">aa-sub</a> <a href="#">sap</a> <a href="#">neq</a> <a href="#">string</a>
Tree	<a href="#">neq</a>
String Length	1 to 45
Notes	The following elements are part of a choice: <b>eq</b> or <b>neq</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **spoke-sdp**

Synopsis	Enter the <b>spoke-sdp</b> context
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <a href="#">number</a> <a href="#">partition</a> <a href="#">number</a> <a href="#">policy</a> <a href="#">app-qos-policy</a> <a href="#">entry</a> <a href="#">number</a> <a href="#">match</a> <a href="#">aa-sub</a> <a href="#">spoke-sdp</a>
Tree	<a href="#">spoke-sdp</a>
Description	Commands in this context configure the spoke SDP fields for the AA subscriber match entry.
Notes	The following elements are part of a choice: <b>esm</b> , <b>esm-mac</b> , <b>sap</b> , <b>spoke-sdp</b> , or <b>transit</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **eq** *string*

Synopsis	Exact match criterion used for a spoke SDP subscriber
----------	---

Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <a href="#">number</a> <a href="#">partition</a> <a href="#">number</a> <a href="#">policy</a> <a href="#">app-qos-policy</a> <a href="#">entry</a> <a href="#">number</a> <a href="#">match</a> <a href="#">aa-sub</a> <a href="#">spoke-sdp</a> <a href="#">eq</a> <a href="#">string</a>
Tree	<a href="#">eq</a>
String Length	3 to 16
Notes	The following elements are part of a choice: <b>eq</b> or <b>neq</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **neq** *string*

Synopsis	Non-match criterion used for a spoke SDP subscriber
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <a href="#">number</a> <a href="#">partition</a> <a href="#">number</a> <a href="#">policy</a> <a href="#">app-qos-policy</a> <a href="#">entry</a> <a href="#">number</a> <a href="#">match</a> <a href="#">aa-sub</a> <a href="#">spoke-sdp</a> <a href="#">neq</a> <a href="#">string</a>
Tree	<a href="#">neq</a>
String Length	3 to 16
Notes	The following elements are part of a choice: <b>eq</b> or <b>neq</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **transit**

Synopsis	Enter the <b>transit</b> context
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <a href="#">number</a> <a href="#">partition</a> <a href="#">number</a> <a href="#">policy</a> <a href="#">app-qos-policy</a> <a href="#">entry</a> <a href="#">number</a> <a href="#">match</a> <a href="#">aa-sub</a> <a href="#">transit</a>
Tree	<a href="#">transit</a>
Description	Commands in this context configure the transit fields for the AA subscriber match entry.
Notes	The following elements are part of a choice: <b>esm</b> , <b>esm-mac</b> , <b>sap</b> , <b>spoke-sdp</b> , or <b>transit</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **eq** *string*

Synopsis	Exact match criterion used for a transit AA subscriber
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <a href="#">number</a> <a href="#">partition</a> <a href="#">number</a> <a href="#">policy</a> <a href="#">app-qos-policy</a> <a href="#">entry</a> <a href="#">number</a> <a href="#">match</a> <a href="#">aa-sub</a> <a href="#">transit</a> <a href="#">eq</a> <a href="#">string</a>

Tree	<a href="#">eq</a>
String Length	1 to 32
Notes	The following elements are part of a choice: <b>eq</b> or <b>neq</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **neq string**

Synopsis	Non-match criterion used for a transit AA subscriber
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-qos-policy entry number match aa-sub transit neq string</a>
Tree	<a href="#">neq</a>
String Length	1 to 32
Notes	The following elements are part of a choice: <b>eq</b> or <b>neq</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **aa-sub-tethering keyword**

Synopsis	Tethering detection status for flow match criterion
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-qos-policy entry number match aa-sub-tethering keyword</a>
Tree	<a href="#">aa-sub-tethering</a>
Description	This command configures the match criteria for subscribers in a tethering state.
Options	not-applicable, detected, not-detected
Default	not-applicable
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **app-group**

Synopsis	Enter the <b>app-group</b> context
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-qos-policy entry number match app-group</a>
Tree	<a href="#">app-group</a>

Description	Commands in this context add an application group to the match criteria used by this AQP entry.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **eq reference**

Synopsis	Exact match criterion used for the application group
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-qos-policy entry number match app-group eq reference</a>
Tree	<a href="#">eq</a>
Reference	<b>configure</b> <a href="#">application-assurance group number partition number policy app-group string</a>
Notes	The following elements are part of a choice: <b>eq</b> or <b>neq</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **neq reference**

Synopsis	Non-match criterion used for the application group
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-qos-policy entry number match app-group neq reference</a>
Tree	<a href="#">neq</a>
Reference	<b>configure</b> <a href="#">application-assurance group number partition number policy app-group string</a>
Notes	The following elements are part of a choice: <b>eq</b> or <b>neq</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **application**

Synopsis	Enter the <b>application</b> context
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-qos-policy entry number match application</a>
Tree	<a href="#">application</a>
Description	Commands in this context add an application to match criteria used by this AQP entry.
Introduced	21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **eq** *reference*

Synopsis Exact match criterion used for the application

Context **configure** [application-assurance group number partition number policy app-qos-policy entry number match application eq reference](#)

Tree [eq](#)

Reference **configure** [application-assurance group number partition number policy application string](#)

Notes The following elements are part of a choice: **eq** or **neq**.

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **neq** *reference*

Synopsis Non-match criterion used for the application

Context **configure** [application-assurance group number partition number policy app-qos-policy entry number match application neq reference](#)

Tree [neq](#)

Reference **configure** [application-assurance group number partition number policy application string](#)

Notes The following elements are part of a choice: **eq** or **neq**.

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **characteristic** [[characteristic-name](#)] *reference*

Synopsis Enter the **characteristic** list instance

Context **configure** [application-assurance group number partition number policy app-qos-policy entry number match characteristic reference](#)

Tree [characteristic](#)

Description Commands in this context configure an existing characteristic and its value to the match criteria used by this AQP entry.

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**[characteristic-name] reference**

Synopsis	ASO characteristic name for AQP entry matching
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-qos-policy entry number match characteristic reference</a>
Tree	<a href="#">characteristic</a>
Reference	<b>configure</b> <a href="#">application-assurance group number partition number policy app-service-options characteristic string</a>
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**eq reference**

Synopsis	Match criterion used for AQP match characteristic
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-qos-policy entry number match characteristic reference eq reference</a>
Tree	<a href="#">eq</a>
Reference	<b>configure</b> <a href="#">application-assurance group number partition number policy app-service-options characteristic string value string</a>
Notes	The following elements are part of a mandatory choice: <b>eq</b> or <b>neq</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**neq reference**

Synopsis	Non-match criterion used for AQP match characteristic
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-qos-policy entry number match characteristic reference neq reference</a>
Tree	<a href="#">neq</a>
Reference	<b>configure</b> <a href="#">application-assurance group number partition number policy app-service-options characteristic string value string</a>
Notes	The following elements are part of a mandatory choice: <b>eq</b> or <b>neq</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## charging-group

Synopsis	Enter the <b>charging-group</b> context
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">partition number</a> <a href="#">policy app-qos-policy entry number match</a> <a href="#">charging-group</a>
Tree	<a href="#">charging-group</a>
Description	Commands in this context add a charging group to match criteria used by this AQP entry.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## eq reference

Synopsis	Match criterion used for the charging group
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">partition number</a> <a href="#">policy app-qos-policy entry number match</a> <a href="#">charging-group eq reference</a>
Tree	<a href="#">eq</a>
Reference	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">partition number</a> <a href="#">policy charging-group string</a>
Notes	The following elements are part of a choice: <b>eq</b> or <b>neq</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## neq reference

Synopsis	Non-match criterion used for the charging group
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">partition number</a> <a href="#">policy app-qos-policy entry number match</a> <a href="#">charging-group neq reference</a>
Tree	<a href="#">neq</a>
Reference	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">partition number</a> <a href="#">policy charging-group string</a>
Notes	The following elements are part of a choice: <b>eq</b> or <b>neq</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**dscp**

Synopsis	Enter the <b>dscp</b> context
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">partition number</a> <a href="#">policy app-qos-policy entry number match dscp</a>
Tree	<a href="#">dscp</a>
Description	Commands in this context add a DSCP name to the match criteria used by this entry.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**eq keyword**

Synopsis	Exact match criterion used for the DSCP
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">partition number</a> <a href="#">policy app-qos-policy entry number match dscp eq keyword</a>
Tree	<a href="#">eq</a>
Options	be, cp1, cp2, cp3, cp4, cp5, cp6, cp7, cs1, cp9, af11, cp11, af12, cp13, af13, cp15, cs2, cp17, af21, cp19, af22, cp21, af23, cp23, cs3, cp25, af31, cp27, af32, cp29, af33, cp31, cs4, cp33, af41, cp35, af42, cp37, af43, cp39, cs5, cp41, cp42, cp43, cp44, cp45, ef, cp47, nc1, cp49, cp50, cp51, cp52, cp53, cp54, cp55, nc2, cp57, cp58, cp59, cp60, cp61, cp62, cp63
Notes	The following elements are part of a choice: <b>eq</b> or <b>neq</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**neq keyword**

Synopsis	Non-match criterion used for the DSCP
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">partition number</a> <a href="#">policy app-qos-policy entry number match dscp neq keyword</a>
Tree	<a href="#">neq</a>
Options	be, cp1, cp2, cp3, cp4, cp5, cp6, cp7, cs1, cp9, af11, cp11, af12, cp13, af13, cp15, cs2, cp17, af21, cp19, af22, cp21, af23, cp23, cs3, cp25, af31, cp27, af32, cp29, af33, cp31, cs4, cp33, af41, cp35, af42, cp37, af43, cp39, cs5, cp41, cp42, cp43, cp44, cp45, ef, cp47, nc1, cp49, cp50, cp51, cp52, cp53, cp54, cp55, nc2, cp57, cp58, cp59, cp60, cp61, cp62, cp63
Notes	The following elements are part of a choice: <b>eq</b> or <b>neq</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**dst-ip**

Synopsis	Enter the <b>dst-ip</b> context
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-qos-policy entry number match dst-ip</a>
Tree	<a href="#">dst-ip</a>
Description	Commands in this context configure a destination IP address to use as match criteria.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**eq**

Synopsis	Enter the <b>eq</b> context
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-qos-policy entry number match dst-ip eq</a>
Tree	<a href="#">eq</a>
Description	Commands in this context specify the exact match value as the match criterion. A successful match occurs when the flow matches the specified address or prefix.
Notes	The following elements are part of a choice: <b>eq</b> or <b>neq</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**ip-prefix** (*ipv4-prefix* | *ipv6-prefix*)

Synopsis	IP address prefix used for match criterion
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-qos-policy entry number match dst-ip eq ip-prefix (ipv4-prefix   ipv6-prefix)</a>
Tree	<a href="#">ip-prefix</a>
Notes	The following elements are part of a choice: <b>ip-prefix</b> or <b>ip-prefix-list</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**ip-prefix-list** *reference*

Synopsis	IP address prefix list used for match criterion
----------	---

Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">policy</a> <a href="#">app-qos-policy</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">dst-ip</a> <a href="#">eq</a> <a href="#">ip-prefix-list</a> <i>reference</i>
Tree	<a href="#">ip-prefix-list</a>
Reference	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">ip-prefix-list</a> <i>string</i>
Notes	The following elements are part of a choice: <b>ip-prefix</b> or <b>ip-prefix-list</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## neq

Synopsis	Enter the <b>neq</b> context
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">policy</a> <a href="#">app-qos-policy</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">dst-ip</a> <a href="#">neq</a>
Tree	<a href="#">neq</a>
Description	Commands in this context specify the non-match value as the match criterion. A successful match occurs when the flow does not match the specified address or prefix.
Notes	The following elements are part of a choice: <b>eq</b> or <b>neq</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## ip-prefix (*ipv4-prefix* | *ipv6-prefix*)

Synopsis	IP address prefix used for match criterion
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">policy</a> <a href="#">app-qos-policy</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">dst-ip</a> <a href="#">neq</a> <a href="#">ip-prefix</a> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> )
Tree	<a href="#">ip-prefix</a>
Notes	The following elements are part of a choice: <b>ip-prefix</b> or <b>ip-prefix-list</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## ip-prefix-list *reference*

Synopsis	IP address prefix list used for match criterion
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">policy</a> <a href="#">app-qos-policy</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">dst-ip</a> <a href="#">neq</a> <a href="#">ip-prefix-list</a> <i>reference</i>
Tree	<a href="#">ip-prefix-list</a>

Reference	<b>configure</b> <a href="#">application-assurance group number partition number ip-prefix-list string</a>
Notes	The following elements are part of a choice: <b>ip-prefix</b> or <b>ip-prefix-list</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## dst-port

Synopsis	Enter the <b>dst-port</b> context
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-qos-policy entry number match dst-port</a>
Tree	<a href="#">dst-port</a>
Description	Commands in this context configure a destination TCP/UDP port, a destination port list, or a destination range to use as match criteria.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## eq

Synopsis	Enter the <b>eq</b> context
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-qos-policy entry number match dst-port eq</a>
Tree	<a href="#">eq</a>
Description	Commands in this context specify the exact match criterion. A successful match occurs when the flow matches the specified port.
Notes	The following elements are part of a choice: <b>eq</b> or <b>neq</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## port-list *reference*

Synopsis	IP port list used as match criterion
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-qos-policy entry number match dst-port eq port-list reference</a>
Tree	<a href="#">port-list</a>
Reference	<b>configure</b> <a href="#">application-assurance group number partition number port-list string</a>
Notes	The following elements are part of a choice: <b>port-list</b> , <b>port-number</b> , or <b>range</b> .

Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **port-number** *number*

Synopsis	Server port number used as match criterion
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-qos-policy entry number match dst-port eq port-number number</a>
Tree	<a href="#">port-number</a>
Range	0   1 to 65535
Default	0
Notes	The following elements are part of a choice: <b>port-list</b> , <b>port-number</b> , or <b>range</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **range**

Synopsis	Enter the <b>range</b> context
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-qos-policy entry number match dst-port eq range</a>
Tree	<a href="#">range</a>
Description	Commands in this context specify the match value as the match criterion based on the starting or ending port number.
Notes	The following elements are part of a choice: <b>port-list</b> , <b>port-number</b> , or <b>range</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **end** *number*

Synopsis	TCP/UDP ending port number
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-qos-policy entry number match dst-port eq range end number</a>
Tree	<a href="#">end</a>
Range	0   1 to 65535
Default	1
Introduced	21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **start number**

Synopsis TCP/UDP starting port number

Context **configure** application-assurance group number partition number policy app-qos-policy entry number match dst-port eq range start number

Tree [start](#)

Range 0 | 1 to 65535

Default 0

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **neq**

Synopsis Enter the **neq** context

Context **configure** application-assurance group number partition number policy app-qos-policy entry number match dst-port neq

Tree [neq](#)

Description Commands in this context specify the non-match value as the match criterion. A successful match occurs when the flow does not match the specified port.

Notes The following elements are part of a choice: **eq** or **neq**.

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **port-list reference**

Synopsis IP port list used as match criterion

Context **configure** application-assurance group number partition number policy app-qos-policy entry number match dst-port neq port-list reference

Tree [port-list](#)

Reference **configure** application-assurance group number partition number port-list string

Notes The following elements are part of a choice: **port-list**, **port-number**, or **range**.

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**port-number** *number*

Synopsis	Server port number used as match criterion
Context	<b>configure</b> <a href="#">application-assurance group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">policy app-qos-policy entry</a> <i>number</i> <a href="#">match dst-port neq</a> <b>port-number</b> <i>number</i>
Tree	<a href="#">port-number</a>
Range	0   1 to 65535
Default	0
Notes	The following elements are part of a choice: <b>port-list</b> , <b>port-number</b> , or <b>range</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**range**

Synopsis	Enter the <b>range</b> context
Context	<b>configure</b> <a href="#">application-assurance group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">policy app-qos-policy entry</a> <i>number</i> <a href="#">match dst-port neq</a> <b>range</b>
Tree	<a href="#">range</a>
Description	Commands in this context specify the match value as the match criterion based on the starting or ending port number.
Notes	The following elements are part of a choice: <b>port-list</b> , <b>port-number</b> , or <b>range</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**end** *number*

Synopsis	TCP/UDP ending port number
Context	<b>configure</b> <a href="#">application-assurance group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">policy app-qos-policy entry</a> <i>number</i> <a href="#">match dst-port neq</a> <b>range</b> <b>end</b> <i>number</i>
Tree	<a href="#">end</a>
Range	0   1 to 65535
Default	1
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**start number**

Synopsis	TCP/UDP starting port number
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-qos-policy entry number match dst-port neq range start number</a>
Tree	<a href="#">start</a>
Range	0   1 to 65535
Default	0
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**flow-attribute** [[flow-attribute-name](#)] *string*

Synopsis	Enter the <b>flow-attribute</b> list instance
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-qos-policy entry number match flow-attribute string</a>
Tree	<a href="#">flow-attribute</a>
Description	Commands in this context configure a flow attribute to use as match criteria. The supported options are: <ul style="list-style-type: none"> <li>• abr_service</li> <li>• audio</li> <li>• download</li> <li>• encrypted</li> <li>• esni</li> <li>• real_time_communication</li> <li>• upload</li> <li>• video</li> </ul>
Max. Instances	10
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**[flow-attribute-name]** *string*

Synopsis	Flow attribute name used as match criterion
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-qos-policy entry number match flow-attribute string</a>

Tree	<a href="#">flow-attribute</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## confidence

Synopsis	Enter the <b>confidence</b> context
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-qos-policy entry number match flow-attribute string confidence</a>
Tree	<a href="#">confidence</a>
Description	Commands in this context configure the confidence level of the flow attribute for use as match criteria.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## eq number

Synopsis	Exact match criterion for the flow-attribute confidence
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-qos-policy entry number match flow-attribute string confidence eq number</a>
Tree	<a href="#">eq</a>
Range	0 to 100
Notes	The following elements are part of a choice: <b>eq</b> , <b>gte</b> , or <b>lt</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## gte number

Synopsis	Greater than or equal to for confidence match criterion
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-qos-policy entry number match flow-attribute string confidence gte number</a>
Tree	<a href="#">gte</a>
Range	0 to 100
Notes	The following elements are part of a choice: <b>eq</b> , <b>gte</b> , or <b>lt</b> .

Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**lt** *number*

Synopsis	Less than value for confidence match criterion
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-qos-policy entry number match flow-attribute string confidence lt number</a>
Tree	<a href="#">lt</a>
Range	1 to 100
Notes	The following elements are part of a choice: <b>eq</b> , <b>gte</b> , or <b>lt</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**ip-protocol**

Synopsis	Enter the <b>ip-protocol</b> context
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-qos-policy entry number match ip-protocol</a>
Tree	<a href="#">ip-protocol</a>
Description	Commands in this context configure the IP protocol to use in the application definition.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**eq** (*number* | *keyword*)

Synopsis	Exact match criterion used for the IP protocol
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-qos-policy entry number match ip-protocol eq (number   keyword)</a>
Tree	<a href="#">eq</a>
Range	0 to 255
Options	tcp-udp, icmp, igmp, ip, tcp, egp, igp, udp, rdp, ipv6, ipv6-route, ipv6-frag, idrp, rsvp, gre, ipv6-icmp, ipv6-no-nxt, ipv6-opts, iso-ip, eigrp, ospf-igp, ether-ip, encap, pnni, pim, vrrp, l2tp, stp, ptp, isis, crtp, crudp, sctp
Notes	The following elements are part of a choice: <b>eq</b> or <b>neq</b> .
Introduced	21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **neq** (*number* | *keyword*)

Synopsis Non-match criterion used for the IP protocol

Context **configure** [application-assurance group](#) *number* [partition](#) *number* [policy app-qos-policy entry](#) *number* [match ip-protocol neq](#) (*number* | *keyword*)

Tree [neq](#)

Range 0 to 255

Options tcp-udp, icmp, igmp, ip, tcp, egp, igp, udp, rdp, ipv6, ipv6-route, ipv6-frag, idrp, rsvp, gre, ipv6-icmp, ipv6-no-nxt, ipv6-opts, iso-ip, eigrp, ospf-igp, ether-ip, encap, pnni, pim, vrrp, l2tp, stp, ptp, isis, crtp, crudp, sctp

Notes The following elements are part of a choice: **eq** or **neq**.

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **src-ip**

Synopsis Enter the **src-ip** context

Context **configure** [application-assurance group](#) *number* [partition](#) *number* [policy app-qos-policy entry](#) *number* [match src-ip](#)

Tree [src-ip](#)

Description Commands in this context configure a source IP address to use as match criteria.

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **eq**

Synopsis Enter the **eq** context

Context **configure** [application-assurance group](#) *number* [partition](#) *number* [policy app-qos-policy entry](#) *number* [match src-ip eq](#)

Tree [eq](#)

Description Commands in this context specify the exact match value as the match criterion. A successful match occurs when the flow matches the specified address or prefix.

Notes The following elements are part of a choice: **eq** or **neq**.

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **ip-prefix** (*ipv4-prefix* | *ipv6-prefix*)

Synopsis IP address prefix used for match criterion

Context **configure** [application-assurance group number partition number policy app-qos-policy entry number match src-ip eq ip-prefix](#) (*ipv4-prefix* | *ipv6-prefix*)

Tree [ip-prefix](#)

Notes The following elements are part of a choice: **ip-prefix** or **ip-prefix-list**.

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **ip-prefix-list** *reference*

Synopsis IP address prefix list used for match criterion

Context **configure** [application-assurance group number partition number policy app-qos-policy entry number match src-ip eq ip-prefix-list reference](#)

Tree [ip-prefix-list](#)

Reference **configure** [application-assurance group number partition number ip-prefix-list string](#)

Notes The following elements are part of a choice: **ip-prefix** or **ip-prefix-list**.

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **neq**

Synopsis Enter the **neq** context

Context **configure** [application-assurance group number partition number policy app-qos-policy entry number match src-ip neq](#)

Tree [neq](#)

Description Commands in this context specify the non-match value as the match criterion. A successful match occurs when the flow does not match the specified address or prefix.

Notes The following elements are part of a choice: **eq** or **neq**.

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**ip-prefix** (*ipv4-prefix* | *ipv6-prefix*)

Synopsis	IP address prefix used for match criterion
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-qos-policy entry number match src-ip neq ip-prefix</a> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> )
Tree	<a href="#">ip-prefix</a>
Notes	The following elements are part of a choice: <b>ip-prefix</b> or <b>ip-prefix-list</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**ip-prefix-list** *reference*

Synopsis	IP address prefix list used for match criterion
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-qos-policy entry number match src-ip neq ip-prefix-list reference</a>
Tree	<a href="#">ip-prefix-list</a>
Reference	<b>configure</b> <a href="#">application-assurance group number partition number ip-prefix-list string</a>
Notes	The following elements are part of a choice: <b>ip-prefix</b> or <b>ip-prefix-list</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**src-port**

Synopsis	Enter the <b>src-port</b> context
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-qos-policy entry number match src-port</a>
Tree	<a href="#">src-port</a>
Description	Commands in this context specify a source IP port, a source port list, or a source range to use as match criteria.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**eq**

Synopsis	Enter the <b>eq</b> context
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-qos-policy entry number match src-port eq</a>

Tree	<a href="#">eq</a>
Description	Commands in this context specify the exact match criterion. A successful match occurs when the flow matches the specified port.
Notes	The following elements are part of a choice: <b>eq</b> or <b>neq</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **port-list** *reference*

Synopsis	IP port list used as match criterion
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-qos-policy entry number match src-port eq port-list reference</a>
Tree	<a href="#">port-list</a>
Reference	<b>configure</b> <a href="#">application-assurance group number partition number port-list string</a>
Notes	The following elements are part of a choice: <b>port-list</b> , <b>port-number</b> , or <b>range</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **port-number** *number*

Synopsis	Server port number used as match criterion
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-qos-policy entry number match src-port eq port-number number</a>
Tree	<a href="#">port-number</a>
Range	0   1 to 65535
Default	0
Notes	The following elements are part of a choice: <b>port-list</b> , <b>port-number</b> , or <b>range</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **range**

Synopsis	Enter the <b>range</b> context
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-qos-policy entry number match src-port eq range</a>
Tree	<a href="#">range</a>

Description	Commands in this context specify the match value as the match criterion based on the starting or ending port number.
Notes	The following elements are part of a choice: <b>port-list</b> , <b>port-number</b> , or <b>range</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **end number**

Synopsis	TCP/UDP ending port number
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-qos-policy entry number match src-port eq range end number</a>
Tree	<a href="#">end</a>
Range	0   1 to 65535
Default	1
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **start number**

Synopsis	TCP/UDP starting port number
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-qos-policy entry number match src-port eq range start number</a>
Tree	<a href="#">start</a>
Range	0   1 to 65535
Default	0
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **neq**

Synopsis	Enter the <b>neq</b> context
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-qos-policy entry number match src-port neq</a>
Tree	<a href="#">neq</a>
Description	Commands in this context specify the non-match value as the match criterion. A successful match occurs when the flow does not match the specified port.

Notes	The following elements are part of a choice: <b>eq</b> or <b>neq</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **port-list** *reference*

Synopsis	IP port list used as match criterion
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-qos-policy entry number match src-port neq port-list reference</a>
Tree	<a href="#">port-list</a>
Reference	<b>configure</b> <a href="#">application-assurance group number partition number port-list string</a>
Notes	The following elements are part of a choice: <b>port-list</b> , <b>port-number</b> , or <b>range</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **port-number** *number*

Synopsis	Server port number used as match criterion
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-qos-policy entry number match src-port neq port-number number</a>
Tree	<a href="#">port-number</a>
Range	0   1 to 65535
Default	0
Notes	The following elements are part of a choice: <b>port-list</b> , <b>port-number</b> , or <b>range</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **range**

Synopsis	Enter the <b>range</b> context
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-qos-policy entry number match src-port neq range</a>
Tree	<a href="#">range</a>
Description	Commands in this context specify the match value as the match criterion based on the starting or ending port number.
Notes	The following elements are part of a choice: <b>port-list</b> , <b>port-number</b> , or <b>range</b> .

Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**end number**

Synopsis	TCP/UDP ending port number
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-qos-policy entry number match src-port neq range end number</a>
Tree	<a href="#">end</a>
Range	0   1 to 65535
Default	1
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**start number**

Synopsis	TCP/UDP starting port number
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-qos-policy entry number match src-port neq range start number</a>
Tree	<a href="#">start</a>
Range	0   1 to 65535
Default	0
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**traffic-direction keyword**

Synopsis	Traffic direction to which AQP match entry is applied
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-qos-policy entry number match traffic-direction keyword</a>
Tree	<a href="#">traffic-direction</a>
Options	subscriber-to-network, network-to-subscriber, both
Default	both
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## app-service-options

Synopsis	Enter the <b>app-service-options</b> context
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-service-options</a>
Tree	<a href="#">app-service-options</a>
Description	Commands in this context configure application service option characteristics.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## characteristic [[characteristic-name](#)] *string*

Synopsis	Enter the <b>characteristic</b> list instance
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-service-options characteristic string</a>
Tree	<a href="#">characteristic</a>
Description	Commands in this context create the characteristic of the application service options.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## [[characteristic-name](#)] *string*

Synopsis	ASO characteristic name
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-service-options characteristic string</a>
Tree	<a href="#">characteristic</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## default-value *string*

Synopsis	ASO characteristic default value
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-service-options characteristic string default-value string</a>

Tree	<a href="#">default-value</a>
String Length	1 to 32
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **value** [[value-name](#)] *string*

Synopsis	Add a list entry for <b>value</b>
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-service-options characteristic string value string</a>
Tree	<a href="#">value</a>
Description	Commands in this context configure a characteristic value.
Max. Instances	64
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **[value-name]** *string*

Synopsis	ASO characteristic value name
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy app-service-options characteristic string value string</a>
Tree	<a href="#">value</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **application** [[application-name](#)] *string*

Synopsis	Enter the <b>application</b> list instance
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy application string</a>
Tree	<a href="#">application</a>
Description	Commands in this context configure the policy application of the Application Assurance group partition.

Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **[application-name]** *string*

Synopsis	Application name
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">policy</a> <a href="#">application</a> <i>string</i>
Tree	<a href="#">application</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **app-group** *reference*

Synopsis	Application group associated with the application
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">policy</a> <a href="#">application</a> <i>string</i> <a href="#">app-group</a> <i>reference</i>
Tree	<a href="#">app-group</a>
Reference	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">policy</a> <a href="#">app-group</a> <i>string</i>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **charging-group** *reference*

Synopsis	Charging group associated with the application
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">policy</a> <a href="#">application</a> <i>string</i> <a href="#">charging-group</a> <i>reference</i>
Tree	<a href="#">charging-group</a>
Reference	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">policy</a> <a href="#">charging-group</a> <i>string</i>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**description *string***

Synopsis	Text description
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">partition number</a> <a href="#">policy application string</a> <a href="#">description string</a>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**export-id *number***

Synopsis	Application export ID used for RADIUS accounting
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">partition number</a> <a href="#">policy application string</a> <a href="#">export-id number</a>
Tree	<a href="#">export-id</a>
Range	1 to 255
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**charging-filter**

Synopsis	Enter the <b>charging-filter</b> context
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">partition number</a> <a href="#">policy charging-filter</a>
Tree	<a href="#">charging-filter</a>
Introduced	22.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**entry [*entry-id*] *number***

Synopsis	Enter the <b>entry</b> list instance
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">partition number</a> <a href="#">policy charging-filter</a> <a href="#">entry number</a>
Tree	<a href="#">entry</a>
Introduced	22.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**[entry-id] number**

Synopsis	Charging filter entry ID in the AA partition policy
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">partition number</a> <a href="#">policy charging-filter entry number</a>
Tree	<a href="#">entry</a>
Description	This command defines a charging filter entry ID. Charging filter entries are an ordered list; the lowest numerical entry that matches the flow, defines the charging filter for this flow.
Range	1 to 65535
Notes	This element is part of a list key.
Introduced	22.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**admin-state keyword**

Synopsis	Administrative state of the AA charging filter entry
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">partition number</a> <a href="#">policy charging-filter entry number</a> <a href="#">admin-state keyword</a>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	22.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**charging-group reference**

Synopsis	Charging group to associate to flows matching the entry
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">partition number</a> <a href="#">policy charging-filter entry number</a> <a href="#">charging-group reference</a>
Tree	<a href="#">charging-group</a>
Description	This command associates a charging group to the flows that match the charging filter entry.
Reference	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">partition number</a> <a href="#">policy charging-group string</a>
Introduced	22.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### description *string*

Synopsis Text description

Context **configure** [application-assurance group number](#) [partition number](#) [policy charging-filter entry number](#) *description string*

Tree [description](#)

String Length 1 to 80

Introduced 22.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### match

Synopsis Enter the **match** context

Context **configure** [application-assurance group number](#) [partition number](#) [policy charging-filter entry number](#) *match*

Tree [match](#)

Introduced 22.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### app-group

Synopsis Enter the **app-group** context

Context **configure** [application-assurance group number](#) [partition number](#) [policy charging-filter entry number](#) *match app-group*

Tree [app-group](#)

Introduced 22.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### eq *reference*

Synopsis Exact value as the match criterion

Context **configure** [application-assurance group number](#) [partition number](#) [policy charging-filter entry number](#) *match app-group eq reference*

Tree [eq](#)

Description	This command specifies that the value configured and the value in the flow must be equal for a match to occur.
Reference	<b>configure</b> <a href="#">application-assurance group number partition number policy app-group string</a>
Notes	The following elements are part of a choice: <b>eq</b> or <b>neq</b> .
Introduced	22.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **neq reference**

Synopsis	Non-matching application to resolve to a charging group
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy charging-filter entry number match app-group neq reference</a>
Tree	<a href="#">neq</a>
Description	This command specifies that the value configured and the value in the flow must differ for a match to occur.
Reference	<b>configure</b> <a href="#">application-assurance group number partition number policy app-group string</a>
Notes	The following elements are part of a choice: <b>eq</b> or <b>neq</b> .
Introduced	22.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **application**

Synopsis	Enter the <b>application</b> context
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy charging-filter entry number match application</a>
Tree	<a href="#">application</a>
Introduced	22.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **eq reference**

Synopsis	Exact value as the match criterion
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy charging-filter entry number match application eq reference</a>
Tree	<a href="#">eq</a>

Description	This command specifies that the value configured and the value in the flow must be equal for a match to occur.
Reference	<b>configure</b> <a href="#">application-assurance group number partition number policy application string</a>
Notes	The following elements are part of a choice: <b>eq</b> or <b>neq</b> .
Introduced	22.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **neq** *reference*

Synopsis	Non-matching application to resolve to a charging group
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy charging-filter entry number match application neq reference</a>
Tree	<a href="#">neq</a>
Description	This command specifies that the value configured and the value in the flow must differ for a match to occur.
Reference	<b>configure</b> <a href="#">application-assurance group number partition number policy application string</a>
Notes	The following elements are part of a choice: <b>eq</b> or <b>neq</b> .
Introduced	22.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **flow-attribute** [[flow-attribute-name](#)] *string*

Synopsis	Enter the <b>flow-attribute</b> list instance
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy charging-filter entry number match flow-attribute string</a>
Tree	<a href="#">flow-attribute</a>
Max. Instances	10
Introduced	22.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **[flow-attribute-name]** *string*

Synopsis	Flow attribute name match criteria
----------	------------------------------------

Context	<b>configure</b> <a href="#">application-assurance group number partition number policy charging-filter entry number match flow-attribute string</a>
Tree	<a href="#">flow-attribute</a>
Description	This command adds a flow attribute to the match criteria used by this charging filter entry.
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	22.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## confidence

Synopsis	Enter the <b>confidence</b> context
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy charging-filter entry number match flow-attribute string confidence</a>
Tree	<a href="#">confidence</a>
Introduced	22.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## eq number

Synopsis	Exact value as the match criterion
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy charging-filter entry number match flow-attribute string confidence eq number</a>
Tree	<a href="#">eq</a>
Description	This command specifies that a successful match occurs when the flow attribute confidence level is equal to the specified value.
Range	0 to 100
Notes	The following elements are part of a choice: <b>eq</b> , <b>gte</b> , or <b>lt</b> .
Introduced	22.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## gte number

Synopsis	Confidence value to resolve to a charging group
----------	---

Context	<b>configure</b> <a href="#">application-assurance group number partition number policy charging-filter entry number match flow-attribute string confidence gte number</a>
Tree	<a href="#">gte</a>
Description	This command specifies that a successful match occurs when the flow attribute confidence level is greater than or equal to the specified value.
Range	0 to 100
Notes	The following elements are part of a choice: <b>eq</b> , <b>gte</b> , or <b>lt</b> .
Introduced	22.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **lt number**

Synopsis	Less than value as the match criterion
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy charging-filter entry number match flow-attribute string confidence lt number</a>
Tree	<a href="#">lt</a>
Description	This command specifies that a successful match occurs when the flow attribute confidence level is less than the specified value.
Range	1 to 100
Notes	The following elements are part of a choice: <b>eq</b> , <b>gte</b> , or <b>lt</b> .
Introduced	22.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **tethered-flow**

Synopsis	Enable the <b>tethered-flow</b> context
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy charging-filter entry number match tethered-flow</a>
Tree	<a href="#">tethered-flow</a>
Description	Commands in this context add the tethering status to the match criteria used by this charging filter entry.
Introduced	22.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**charging-group** [[charging-group-name](#)] *string*

Synopsis	Enter the <b>charging-group</b> list instance
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy charging-group string</a>
Tree	<a href="#">charging-group</a>
Description	Commands in this context create a charging group for an Application Assurance policy.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**[charging-group-name]** *string*

Synopsis	Charging group name
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy charging-group string</a>
Tree	<a href="#">charging-group</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy charging-group string description string</a>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**export-id** *number*

Synopsis	Charging group export ID used for RADIUS accounting
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy charging-group string export-id number</a>
Tree	<a href="#">export-id</a>

Description	This command assigns an export ID value to a charging group, an app application group, or an application to be used for accounting export identification in RADIUS accounting. This ID is encoded in the top 2 bytes of the RADIUS accounting VSA to identify which charging group the counter value represents.
Range	1 to 255
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **notify-start-stop** *keyword*

Synopsis	Start and stop notification for the charging group
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">policy</a> <a href="#">charging-group</a> <i>string</i> <b>notify-start-stop</b> <i>keyword</i>
Tree	<a href="#">notify-start-stop</a>
Options	none, flow, charging-group
Default	none
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **custom-protocol** [[custom-protocol-id](#)] *string*

Synopsis	Enter the <b>custom-protocol</b> list instance
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">policy</a> <a href="#">custom-protocol</a> <i>string</i>
Tree	<a href="#">custom-protocol</a>
Description	<p>Commands in this context configure custom protocols.</p> <p>Custom protocols allow the creation of TCP and UDP-based custom protocols that employ pattern-match at offset in the protocol signature definition.</p> <p>Operator-configurable custom protocols are evaluated ahead of any Nokia-provided protocol signature in order of custom protocol ID within the context the protocol is defined. The lower ID is matched first in case of flow matching multiple custom protocols.</p> <p>Custom protocols must be created before they can be used in an application definition but do not have to be enabled. To reference a custom protocol in an application definition, or any other CLI configuration one must use the protocol name that is a concatenation of “custom_” and, (for example, custom_01, custom_02 ... custom_10, and so on). This concatenation is also used when reporting custom protocol statistics.</p>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**[custom-protocol-id] string**

Synopsis	Custom protocol ID for the AA policy custom protocol
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy custom-protocol string</a>
Tree	<a href="#">custom-protocol</a>
Description	This command configures the index into the protocol list that defines a custom protocol for Application Assurance.
String Length	9
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**admin-state keyword**

Synopsis	Administrative state of the custom protocol
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy custom-protocol string admin-state keyword</a>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**description string**

Synopsis	Text description
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy custom-protocol string description string</a>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**expression** [[expr-index](#)] *number*

Synopsis	Enter the <b>expression</b> list instance
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">policy</a> <a href="#">custom-protocol</a> <a href="#">string</a> <a href="#">expression</a> <i>number</i>
Tree	<a href="#">expression</a>
Description	Commands in this context configure an expression string value for pattern-based custom protocols match.  A flow matches a custom protocol if the specified string is found at an offset of a TCP/UDP of the first payload packet.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**[[expr-index](#)]** *number*

Synopsis	Expression substring index for custom protocol matching
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">policy</a> <a href="#">custom-protocol</a> <a href="#">string</a> <a href="#">expression</a> <i>number</i>
Tree	<a href="#">expression</a>
Range	1
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**direction** *keyword*

Synopsis	Flow direction for custom-protocol expression matching
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">policy</a> <a href="#">custom-protocol</a> <a href="#">string</a> <a href="#">expression</a> <i>number</i> <a href="#">direction</a> <i>keyword</i>
Tree	<a href="#">direction</a>
Description	This command configures the protocol direction to match against for a custom protocol.
Options	client-to-server, server-to-client, any
Notes	This element is mandatory.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**eq string**

Synopsis	Exact match criterion for custom protocol expression
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">partition number</a> <a href="#">policy custom-protocol string expression number</a> <b>eq string</b>
Tree	<a href="#">eq</a>
String Length	1 to 255
Notes	This element is mandatory.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**offset number**

Synopsis	Offset in protocol flow to start custom-protocol match
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">partition number</a> <a href="#">policy custom-protocol string expression number</a> <b>offset number</b>
Tree	<a href="#">offset</a>
Description	This command configures the offset into the protocol payload where the expr-string match criteria starts.
Range	0 to 127
Default	0
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**ip-protocol keyword****WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	IP protocol number for custom-protocol match criterion
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">partition number</a> <a href="#">policy custom-protocol string ip-protocol</a> <b>keyword</b>
Tree	<a href="#">ip-protocol</a>
Description	This command configures the IP protocol number of the TCP and UDP-based custom protocols.
Options	tcp, udp
Notes	This element is mandatory.

Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **default-charging-group** *reference*

Synopsis	Default charging group
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy default-charging-group reference</a>
Tree	<a href="#">default-charging-group</a>
Description	This command associates a charging group with any applications or application groups that do not have an explicitly assigned charging group for the Application Assurance policy.
Reference	<b>configure</b> <a href="#">application-assurance group number partition number policy charging-group string</a>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **default-tethered-charging-group** *reference*

Synopsis	Default charging group for tethered traffic
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy default-tethered-charging-group reference</a>
Tree	<a href="#">default-tethered-charging-group</a>
Description	This command configures the default charging group to be assigned to all flows which are classified as tethered.  For flows that have been identified as tethered, the AA will replace the charging group configured at the application level with the charging group configured for tethered traffic (that is, configured with <b>default-tethered-charging-group</b> ).
Reference	<b>configure</b> <a href="#">application-assurance group number partition number policy charging-group string</a>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **policy-override**

Synopsis	Enter the <b>policy-override</b> context
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy-override</a>
Tree	<a href="#">policy-override</a>

Description	Commands in this context configure policy override parameters.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## aa-sub

Synopsis	Enter the <b>aa-sub</b> context
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">partition number</a> <a href="#">policy-override aa-sub</a>
Tree	<a href="#">aa-sub</a>
Description	Commands in this context configure the AA policy override subscriber fields.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## sap [[sap-id](#)] *string*

Synopsis	Enter the <b>sap</b> list instance
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">partition number</a> <a href="#">policy-override aa-sub</a> <a href="#">sap string</a>
Tree	<a href="#">sap</a>
Description	Commands in this context configure the Service Access Point (SAP) within the partition.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## [[sap-id](#)] *string*

Synopsis	AA subscriber SAP ID
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">partition number</a> <a href="#">policy-override aa-sub</a> <a href="#">sap string</a>
Tree	<a href="#">sap</a>
String Length	1 to 45
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**characteristic** [[characteristic-name](#)] *reference*

Synopsis	Enter the <b>characteristic</b> list instance
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy-override aa-sub sap string characteristic reference</a>
Tree	<a href="#">characteristic</a>
Description	Commands in this context configure an override characteristic and value.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**[characteristic-name]** *reference*

Synopsis	ASO characteristic name
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy-override aa-sub sap string characteristic reference</a>
Tree	<a href="#">characteristic</a>
Reference	<b>configure</b> <a href="#">application-assurance group number partition number policy app-service-options characteristic string</a>
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**value** *reference*

Synopsis	Characteristic value used in subscriber policy override
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy-override aa-sub sap string characteristic reference value reference</a>
Tree	<a href="#">value</a>
Reference	<b>configure</b> <a href="#">application-assurance group number partition number policy app-service-options characteristic string value string</a>
Notes	This element is mandatory.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**spoke-sdp** [[sdp-bind-id](#)] *string*

Synopsis	Enter the <b>spoke-sdp</b> list instance
----------	--

Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <a href="#">number</a> <a href="#">partition</a> <a href="#">number</a> <a href="#">policy-override</a> <a href="#">aa-sub</a> <a href="#">spoke-sdp</a> <a href="#">string</a>
Tree	<a href="#">spoke-sdp</a>
Description	Commands in this context configure the Service Distribution Point (SDP) for the policy override.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**[sdp-bind-id]** *string*

Synopsis	Spoke SDP ID for an AA subscriber
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <a href="#">number</a> <a href="#">partition</a> <a href="#">number</a> <a href="#">policy-override</a> <a href="#">aa-sub</a> <a href="#">spoke-sdp</a> <a href="#">string</a>
Tree	<a href="#">spoke-sdp</a>
String Length	3 to 16
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**characteristic** [[characteristic-name](#)] *reference*

Synopsis	Enter the <b>characteristic</b> list instance
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <a href="#">number</a> <a href="#">partition</a> <a href="#">number</a> <a href="#">policy-override</a> <a href="#">aa-sub</a> <a href="#">spoke-sdp</a> <a href="#">string</a> <a href="#">characteristic</a> <a href="#">reference</a>
Tree	<a href="#">characteristic</a>
Description	Commands in this context configure an override characteristic and value.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**[characteristic-name]** *reference*

Synopsis	ASO characteristic name
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <a href="#">number</a> <a href="#">partition</a> <a href="#">number</a> <a href="#">policy-override</a> <a href="#">aa-sub</a> <a href="#">spoke-sdp</a> <a href="#">string</a> <a href="#">characteristic</a> <a href="#">reference</a>
Tree	<a href="#">characteristic</a>

Reference	<b>configure</b> <a href="#">application-assurance group number partition number policy app-service-options characteristic string</a>
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### value reference

Synopsis	Characteristic value used in subscriber policy override
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy-override aa-sub spoke-sdp string characteristic reference value reference</a>
Tree	<a href="#">value</a>
Reference	<b>configure</b> <a href="#">application-assurance group number partition number policy app-service-options characteristic string value string</a>
Notes	This element is mandatory.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### transit [[transit-sub-name](#)] string

Synopsis	Enter the <b>transit</b> list instance
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy-override aa-sub transit string</a>
Tree	<a href="#">transit</a>
Description	Commands in this context configure the AA transit subscriber fields.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### [[transit-sub-name](#)] string

Synopsis	Transit subscriber name
Context	<b>configure</b> <a href="#">application-assurance group number partition number policy-override aa-sub transit string</a>
Tree	<a href="#">transit</a>
String Length	1 to 32
Notes	This element is part of a list key.

Introduced 21.10.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **characteristic** [[characteristic-name](#)] *reference*

Synopsis Enter the **characteristic** list instance  
 Context **configure** [application-assurance group number partition number policy-override aa-sub transit string characteristic reference](#)  
 Tree [characteristic](#)  
 Description Commands in this context configure an override characteristic and value.  
 Introduced 21.10.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **[characteristic-name]** *reference*

Synopsis ASO characteristic name  
 Context **configure** [application-assurance group number partition number policy-override aa-sub transit string characteristic reference](#)  
 Tree [characteristic](#)  
 Reference **configure** [application-assurance group number partition number policy app-service-options characteristic string](#)  
 Notes This element is part of a list key.  
 Introduced 21.10.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **value** *reference*

Synopsis Characteristic value used in subscriber policy override  
 Context **configure** [application-assurance group number partition number policy-override aa-sub transit string characteristic reference value reference](#)  
 Tree [value](#)  
 Reference **configure** [application-assurance group number partition number policy app-service-options characteristic string value string](#)  
 Notes This element is mandatory.  
 Introduced 21.10.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**port-list** [[port-list-name](#)] *string*

Synopsis	Enter the <b>port-list</b> list instance
Context	<b>configure</b> <a href="#">application-assurance group number partition number port-list string</a>
Tree	<a href="#">port-list</a>
Description	<p>Commands in this context define an AA group or partition named port list, which contains a list of port numbers or port ranges.</p> <p>The port list is then referenced in AA policy application filters, allowing increased flexibility in the use of server ports or HTTP proxy ports for application definition.</p>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**[port-list-name]** *string*

Synopsis	Port list name
Context	<b>configure</b> <a href="#">application-assurance group number partition number port-list string</a>
Tree	<a href="#">port-list</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">application-assurance group number partition number port-list string description string</a>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**port** [[port-number](#)] *number*

Synopsis	Add a list entry for <b>port</b>
----------	----------------------------------

Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <a href="#">number</a> <a href="#">partition</a> <a href="#">number</a> <a href="#">port-list</a> <a href="#">string</a> <a href="#">port</a> <a href="#">number</a>
Tree	<a href="#">port</a>
Description	Commands in this context specify the server TCP or UDP port number to use in the port list definition.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **[port-number]** *number*

Synopsis	Port number
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <a href="#">number</a> <a href="#">partition</a> <a href="#">number</a> <a href="#">port-list</a> <a href="#">string</a> <a href="#">port</a> <a href="#">number</a>
Tree	<a href="#">port</a>
Range	0 to 65535
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **range** [start](#) *number* [end](#) *number*

Synopsis	Add a list entry for <b>range</b>
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <a href="#">number</a> <a href="#">partition</a> <a href="#">number</a> <a href="#">port-list</a> <a href="#">string</a> <a href="#">range</a> <a href="#">start</a> <i>number</i> <a href="#">end</a> <i>number</i>
Tree	<a href="#">range</a>
Description	Commands in this context configure the AA group or partition named port-list range.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **start** *number*

Synopsis	Start value for the port range in the AA port list
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <a href="#">number</a> <a href="#">partition</a> <a href="#">number</a> <a href="#">port-list</a> <a href="#">string</a> <a href="#">range</a> <a href="#">start</a> <i>number</i> <a href="#">end</a> <i>number</i>
Tree	<a href="#">range</a>
Range	0 to 65534

Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**end number**

Synopsis	End value for the port range in the AA port list
Context	<b>configure</b> <a href="#">application-assurance group number partition number port-list string range</a> <a href="#">start number end number</a>
Tree	<a href="#">range</a>
Range	1 to 65535
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**sctp-filter** [[sctp-filter-name](#)] *string*

Synopsis	Enter the <b>sctp-filter</b> list instance
Context	<b>configure</b> <a href="#">application-assurance group number partition number sctp-filter string</a>
Tree	<a href="#">sctp-filter</a>
Description	Commands in this context configure the Stream Control Transmission Protocol (SCTP) fields.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**[sctp-filter-name]** *string*

Synopsis	SCTP filter name
Context	<b>configure</b> <a href="#">application-assurance group number partition number sctp-filter string</a>
Tree	<a href="#">sctp-filter</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">application-assurance group number partition number sctp-filter string description string</a>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**event-log** *reference*

Synopsis	Event log for packets dropped by the SCTP filter
Context	<b>configure</b> <a href="#">application-assurance group number partition number sctp-filter string event-log reference</a>
Tree	<a href="#">event-log</a>
Reference	<b>configure</b> <a href="#">application-assurance group number partition number event-log string</a>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**ppid**

Synopsis	Enter the <b>ppid</b> context
Context	<b>configure</b> <a href="#">application-assurance group number partition number sctp-filter string ppid</a>
Tree	<a href="#">ppid</a>
Description	Commands in this context configure actions for specific or default Payload Protocol Identifiers (PPIDs).
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**default-action** *keyword*

Synopsis	Default action for all SCTP PPIDs
Context	<b>configure</b> <a href="#">application-assurance group number partition number sctp-filter string ppid default-action keyword</a>
Tree	<a href="#">default-action</a>
Options	deny, permit

Default	permit
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **entry** [[entry-id](#)] *number*

Synopsis	Enter the <b>entry</b> list instance
Context	<b>configure</b> <a href="#">application-assurance group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">sctp-filter</a> <i>string</i> <a href="#">ppid</a> <a href="#">entry</a> <i>number</i>
Tree	<a href="#">entry</a>
Description	Commands in this context specify SCTP PPID values and the corresponding action to apply.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **[entry-id]** *number*

Synopsis	SCTP filter PPID entry ID
Context	<b>configure</b> <a href="#">application-assurance group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">sctp-filter</a> <i>string</i> <a href="#">ppid</a> <a href="#">entry</a> <i>number</i>
Tree	<a href="#">entry</a>
Range	1 to 255
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **action** *keyword*

Synopsis	SCTP filter PPID entry action
Context	<b>configure</b> <a href="#">application-assurance group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">sctp-filter</a> <i>string</i> <a href="#">ppid</a> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <i>keyword</i>
Tree	<a href="#">action</a>
Options	deny, permit
Notes	This element is mandatory.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**value** (*number* | *keyword*)**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	PPID entry value
Context	<b>configure</b> <a href="#">application-assurance group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">sctp-filter</a> <i>string</i> <a href="#">ppid</a> <a href="#">entry</a> <i>number</i> <b>value</b> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">value</a>
Range	0 to 4294967295
Options	iaa, m2ua, m3ua, sua, m2pa, v5ua, h.248, bicc/q.2150.3, tali, dua, asap, enr, h.323, q.ipc/q.2150.3, simco, ddp-segment-chunk, ddp-stream-session-control, s1-application-protocol, rua, hnbap, forces-hp, forces-mp, forces-lp, sbc-ap, nbap, x2ap, ircp, lcs-ap, mpich2, service-area-broadcast-protocol, fractal-generator-protocol, ping-pong-protocol, calcapp-protocol, scripting-service-protocol, netperformer-protocol-control-channel, netperformer-protocol-data-channel, echo, discard, daytime, character-generator, 3gpp-rna, 3gpp-m2ap, 3gpp-m3ap, ssh-over-sctp, diameter-in-a-sctp-data-chunk, diameter-in-a-dtls/sctp-data-chunk, r14p.-ber-encoded-asn.1-over-sctp, webrtc-control, domstring-last, binary-data-partial, binary-data-last, domstring-partial, 3gpp-pua, webrtc-string-empty, webrtc-binary-empty, 3gpp-xwap, 3gpp-xw-control-plane, 3gpp-ng-application-protocol, 3gpp-xn-application-protocol, 3gpp-f1-application-protocol, http-sctp, 3gpp-e1-application-protocol, ele2-lawful-interception, 3gpp-ngap-over-dtls-over-sctp, 3gpp-xnap-over-dtls-over-sctp, 3gpp-f1ap-over-dtls-over-sctp, 3gpp-e1ap-over-dtls-over-sctp, e2-cp, e2-up, e2-du, 3gpp-w1ap
Notes	This element is mandatory.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**ppid-range**

Synopsis	Enter the <b>ppid-range</b> context
Context	<b>configure</b> <a href="#">application-assurance group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">sctp-filter</a> <i>string</i> <a href="#">ppid-range</a>
Tree	<a href="#">ppid-range</a>
Description	Commands in this context specify the range of PPID values that are allowed by the AA SCTP filter firewall.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**max number**

Synopsis	Maximum PPID value
Context	<b>configure</b> <a href="#">application-assurance group number partition number sctp-filter string ppid-range max number</a>
Tree	<a href="#">max</a>
Description	This command configures the maximum SCTP Payload Protocol Identifier (PPID) to be permitted by the SCTP filter. The value must be greater or equal to the minimum PPID value.
Range	0 to 4294967295
Default	4294967295
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**min number**

Synopsis	Minimum PPID value
Context	<b>configure</b> <a href="#">application-assurance group number partition number sctp-filter string ppid-range min number</a>
Tree	<a href="#">min</a>
Description	This command configures the minimum SCTP Payload Protocol Identifier (PPID) to be permitted by the SCTP filter. The value must be less than or equal to the maximum PPID value.
Range	0 to 4294967295
Default	0
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**session-filter** [[session-filter-name](#)] *string*

Synopsis	Enter the <b>session-filter</b> list instance
Context	<b>configure</b> <a href="#">application-assurance group number partition number session-filter string</a>
Tree	<a href="#">session-filter</a>
Description	Commands in this context create a session filter.
Max. Instances	1000
Introduced	21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **[session-filter-name]** *string*

Synopsis Session filter name

Context **configure** [application-assurance](#) [group](#) *number* [partition](#) *number* [session-filter](#) *string*

Tree [session-filter](#)

String Length 1 to 32

Notes This element is part of a list key.

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **default-action**

Synopsis Enter the **default-action** context

Context **configure** [application-assurance](#) [group](#) *number* [partition](#) *number* [session-filter](#) *string* [default-action](#)

Tree [default-action](#)

Description Commands in this context specify the default action to take for packets that do not match any filter entries.

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **action** *keyword*

Synopsis Default action for packets not matching filter entries

Context **configure** [application-assurance](#) [group](#) *number* [partition](#) *number* [session-filter](#) *string* [default-action](#) [action](#) *keyword*

Tree [action](#)

Options deny, permit

Default deny

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**event-log** *reference*

Synopsis	Event logging of default action
Context	<b>configure</b> <a href="#">application-assurance group number partition number session-filter string default-action event-log reference</a>
Tree	<a href="#">event-log</a>
Reference	<b>configure</b> <a href="#">application-assurance group number partition number event-log string</a>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">application-assurance group number partition number session-filter string description string</a>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**entry** [[entry-id](#)] *number*

Synopsis	Enter the <b>entry</b> list instance
Context	<b>configure</b> <a href="#">application-assurance group number partition number session-filter string entry number</a>
Tree	<a href="#">entry</a>
Description	Commands in this context configure an AA session filter match entry.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**[entry-id]** *number*

Synopsis	Entry ID for the session filter entry
Context	<b>configure</b> <a href="#">application-assurance group number partition number session-filter string entry number</a>
Tree	<a href="#">entry</a>
Range	1 to 65535

Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## action

Synopsis	Enter the <b>action</b> context
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">partition number</a> <a href="#">session-filter string</a> <a href="#">entry number action</a>
Tree	<a href="#">action</a>
Description	Commands in this context configure the action for this entry.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## deny

Synopsis	Deny sessions matching the criteria
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">partition number</a> <a href="#">session-filter string</a> <a href="#">entry number action deny</a>
Tree	<a href="#">deny</a>
Notes	The following elements are part of a choice: <b>deny</b> , <b>http-redirect</b> , <b>permit</b> , or <b>tcp-optimizer</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## event-log reference

Synopsis	Event log name used to log the action
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">partition number</a> <a href="#">session-filter string</a> <a href="#">entry number action event-log reference</a>
Tree	<a href="#">event-log</a>
Reference	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">partition number</a> <a href="#">event-log string</a>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**http-redirect** *reference*

Synopsis	HTTP redirect for matching sessions
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">partition number</a> <a href="#">session-filter string</a> <a href="#">entry number action http-redirect reference</a>
Tree	<a href="#">http-redirect</a>
Reference	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">http-redirect string</a>
Notes	The following elements are part of a choice: <b>deny</b> , <b>http-redirect</b> , <b>permit</b> , or <b>tcp-optimizer</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**permit**

Synopsis	Permit sessions that match the criteria
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">partition number</a> <a href="#">session-filter string</a> <a href="#">entry number action permit</a>
Tree	<a href="#">permit</a>
Notes	The following elements are part of a choice: <b>deny</b> , <b>http-redirect</b> , <b>permit</b> , or <b>tcp-optimizer</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**tcp-optimizer** *reference*

Synopsis	TCP optimizer to handle sessions matching the criteria
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">partition number</a> <a href="#">session-filter string</a> <a href="#">entry number action tcp-optimizer reference</a>
Tree	<a href="#">tcp-optimizer</a>
Reference	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">tcp-optimizer string</a>
Notes	The following elements are part of a choice: <b>deny</b> , <b>http-redirect</b> , <b>permit</b> , or <b>tcp-optimizer</b> .
Introduced	22.2.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">application-assurance group number partition number session-filter string entry number description string</a>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**match**

Synopsis	Enter the <b>match</b> context
Context	<b>configure</b> <a href="#">application-assurance group number partition number session-filter string entry number match</a>
Tree	<a href="#">match</a>
Description	Commands in this context configure session conditions for this entry.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**dst-ip**

Synopsis	Enter the <b>dst-ip</b> context
Context	<b>configure</b> <a href="#">application-assurance group number partition number session-filter string entry number match dst-ip</a>
Tree	<a href="#">dst-ip</a>
Description	Commands in this context configure the destination IP address to match.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**dns-ip-cache** *reference*

Synopsis	Destination IPs in specified DNS IP Cache
Context	<b>configure</b> <a href="#">application-assurance group number partition number session-filter string entry number match dst-ip dns-ip-cache reference</a>
Tree	<a href="#">dns-ip-cache</a>
Reference	<b>configure</b> <a href="#">application-assurance group number dns-ip-cache string</a>

Notes	The following elements are part of a choice: <b>dns-ip-cache</b> , <b>ip-prefix</b> , or <b>ip-prefix-list</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **ip-prefix** (*ipv4-prefix* | *ipv6-prefix*)

Synopsis	Destination IP address prefix as match criterion
Context	<b>configure</b> <a href="#">application-assurance group number partition number session-filter string entry number match dst-ip ip-prefix</a> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> )
Tree	<a href="#">ip-prefix</a>
Notes	The following elements are part of a choice: <b>dns-ip-cache</b> , <b>ip-prefix</b> , or <b>ip-prefix-list</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **ip-prefix-list** *reference*

Synopsis	IP address prefix list as match criterion
Context	<b>configure</b> <a href="#">application-assurance group number partition number session-filter string entry number match dst-ip ip-prefix-list reference</a>
Tree	<a href="#">ip-prefix-list</a>
Reference	<b>configure</b> <a href="#">application-assurance group number partition number ip-prefix-list string</a>
Notes	The following elements are part of a choice: <b>dns-ip-cache</b> , <b>ip-prefix</b> , or <b>ip-prefix-list</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **dst-port**

Synopsis	Enter the <b>dst-port</b> context
Context	<b>configure</b> <a href="#">application-assurance group number partition number session-filter string entry number match dst-port</a>
Tree	<a href="#">dst-port</a>
Description	Commands in this context specify a destination TCP/UDP port, a destination port list, or a destination range to use as match criteria.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **eq** *number*

Synopsis	Match criterion used for destination or source port
Context	<b>configure</b> <a href="#">application-assurance group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">session-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">dst-port</a> <b>eq</b> <i>number</i>
Tree	<a href="#">eq</a>
Range	0   1 to 65535
Default	0
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , <b>port-list</b> , or <b>range</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **gt** *number*

Synopsis	Greater than match criterion for the port number
Context	<b>configure</b> <a href="#">application-assurance group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">session-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">dst-port</a> <b>gt</b> <i>number</i>
Tree	<a href="#">gt</a>
Range	0   1 to 65535
Default	0
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , <b>port-list</b> , or <b>range</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **lt** *number*

Synopsis	Less than match criterion for the port
Context	<b>configure</b> <a href="#">application-assurance group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">session-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">dst-port</a> <b>lt</b> <i>number</i>
Tree	<a href="#">lt</a>
Range	0   1 to 65535
Default	0
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , <b>port-list</b> , or <b>range</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**port-list reference**

Synopsis	Destination or source port list
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">partition number</a> <a href="#">session-filter string</a> <a href="#">entry number match dst-port port-list reference</a>
Tree	<a href="#">port-list</a>
Reference	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">partition number</a> <a href="#">port-list string</a>
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , <b>port-list</b> , or <b>range</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**range**

Synopsis	Enable the <b>range</b> context
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">partition number</a> <a href="#">session-filter string</a> <a href="#">entry number match dst-port range</a>
Tree	<a href="#">range</a>
Description	Commands in this context specify a destination IP port, a destination port list, or a destination range to use as match criteria.
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , <b>port-list</b> , or <b>range</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**end number**

Synopsis	Upper bound of the port range as match criterion
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">partition number</a> <a href="#">session-filter string</a> <a href="#">entry number match dst-port range end number</a>
Tree	<a href="#">end</a>
Range	0   1 to 65535
Default	1
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**start number**

Synopsis	Lower bound of the port range as match criterion
Context	<b>configure</b> <a href="#">application-assurance group number partition number session-filter string entry number match dst-port range start number</a>
Tree	<a href="#">start</a>
Range	0   1 to 65535
Default	0
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**ip-protocol** (*number* | *keyword*)

Synopsis	IP protocol as a match criterion
Context	<b>configure</b> <a href="#">application-assurance group number partition number session-filter string entry number match ip-protocol (number   keyword)</a>
Tree	<a href="#">ip-protocol</a>
Range	0 to 255
Options	tcp-udp, icmp, igmp, ip, tcp, egp, igp, udp, rdp, ipv6, ipv6-route, ipv6-frag, idrp, rsvp, gre, ipv6-icmp, ipv6-no-nxt, ipv6-opts, iso-ip, eigrp, ospf-igp, ether-ip, encap, pnni, pim, vrrp, l2tp, stp, ptp, isis, crtp, crudp, sctp
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**src-ip**

Synopsis	Enter the <b>src-ip</b> context
Context	<b>configure</b> <a href="#">application-assurance group number partition number session-filter string entry number match src-ip</a>
Tree	<a href="#">src-ip</a>
Description	Commands in this context specify a source IP address to use as match criteria.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**ip-prefix** (*ipv4-prefix* | *ipv6-prefix*)

Synopsis	Source IP address prefix as match criterion
----------	---

Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">session-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">src-ip</a> <a href="#">ip-prefix</a> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> )
Tree	<a href="#">ip-prefix</a>
Notes	The following elements are part of a choice: <b>ip-prefix</b> or <b>ip-prefix-list</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **ip-prefix-list** *reference*

Synopsis	Source IP address prefix list as match criterion
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">session-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">src-ip</a> <a href="#">ip-prefix-list</a> <i>reference</i>
Tree	<a href="#">ip-prefix-list</a>
Reference	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">ip-prefix-list</a> <i>string</i>
Notes	The following elements are part of a choice: <b>ip-prefix</b> or <b>ip-prefix-list</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **src-port**

Synopsis	Enter the <b>src-port</b> context
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">session-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">src-port</a>
Tree	<a href="#">src-port</a>
Description	Commands in this context specify a source IP port, a source port list, or a source range to use as match criteria.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **eq** *number*

Synopsis	Match criterion used for destination or source port
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">session-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">src-port</a> <a href="#">eq</a> <i>number</i>
Tree	<a href="#">eq</a>
Range	0   1 to 65535

Default	0
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , <b>port-list</b> , or <b>range</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**gt number**

Synopsis	Greater than match criterion for the port number
Context	<b>configure</b> <a href="#">application-assurance group</a> <i>number</i> <a href="#">partition number</a> <a href="#">session-filter string</a> <a href="#">entry number match src-port</a> <b>gt number</b>
Tree	<a href="#">gt</a>
Range	0   1 to 65535
Default	0
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , <b>port-list</b> , or <b>range</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**lt number**

Synopsis	Less than match criterion for the port
Context	<b>configure</b> <a href="#">application-assurance group</a> <i>number</i> <a href="#">partition number</a> <a href="#">session-filter string</a> <a href="#">entry number match src-port</a> <b>lt number</b>
Tree	<a href="#">lt</a>
Range	0   1 to 65535
Default	0
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , <b>port-list</b> , or <b>range</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**port-list reference**

Synopsis	Destination or source port list
Context	<b>configure</b> <a href="#">application-assurance group</a> <i>number</i> <a href="#">partition number</a> <a href="#">session-filter string</a> <a href="#">entry number match src-port</a> <b>port-list reference</b>
Tree	<a href="#">port-list</a>

Reference	<b>configure</b> <a href="#">application-assurance group number partition number port-list string</a>
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , <b>port-list</b> , or <b>range</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## range

Synopsis	Enable the <b>range</b> context
Context	<b>configure</b> <a href="#">application-assurance group number partition number session-filter string entry number match src-port range</a>
Tree	<a href="#">range</a>
Description	Commands in this context specify a destination IP port, a destination port list, or a destination range to use as match criteria.
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , <b>port-list</b> , or <b>range</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## end number

Synopsis	Upper bound of the port range as match criterion
Context	<b>configure</b> <a href="#">application-assurance group number partition number session-filter string entry number match src-port range end number</a>
Tree	<a href="#">end</a>
Range	0   1 to 65535
Default	1
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## start number

Synopsis	Lower bound of the port range as match criterion
Context	<b>configure</b> <a href="#">application-assurance group number partition number session-filter string entry number match src-port range start number</a>
Tree	<a href="#">start</a>
Range	0   1 to 65535
Default	0

Introduced 21.10.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **shallow-inspection** *boolean*

Synopsis Enable shallow inspection  
 Context **configure** [application-assurance group number partition number shallow-inspection boolean](#)  
 Tree [shallow-inspection](#)  
 Default false  
 Introduced 21.10.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **statistics**

Synopsis Enter the **statistics** context  
 Context **configure** [application-assurance group number partition number statistics](#)  
 Tree [statistics](#)  
 Description Commands in this context configure accounting and billing statistics for this AA group.  
 Introduced 21.10.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **aa-admit-deny**

Synopsis Enter the **aa-admit-deny** context  
 Context **configure** [application-assurance group number partition number statistics aa-admit-deny](#)  
 Tree [aa-admit-deny](#)  
 Description Commands in this context configure admit-deny statistics generation.  
 Introduced 21.10.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **accounting-policy** *reference*

Synopsis Accounting policy

Context	<b>configure</b> <a href="#">application-assurance group number partition number statistics aa-admit-deny accounting-policy reference</a>
Tree	<a href="#">accounting-policy</a>
Reference	<b>configure</b> <a href="#">log accounting-policy number</a>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**collect-stats** *boolean*

Synopsis	Collect statistics
Context	<b>configure</b> <a href="#">application-assurance group number partition number statistics aa-admit-deny collect-stats boolean</a>
Tree	<a href="#">collect-stats</a>
Default	false
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**gtp-filter-stats** *boolean*

Synopsis	Include GTP filter admit-deny statistics in records
Context	<b>configure</b> <a href="#">application-assurance group number partition number statistics aa-admit-deny gtp-filter-stats boolean</a>
Tree	<a href="#">gtp-filter-stats</a>
Default	false
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**policer-stats** *boolean*

Synopsis	Include admit-deny policer statistics in records
Context	<b>configure</b> <a href="#">application-assurance group number partition number statistics aa-admit-deny policer-stats boolean</a>
Tree	<a href="#">policer-stats</a>
Default	false
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**policer-stats-resources** *boolean*

Synopsis	Allocate resources for policer admit-deny statistics
Context	<b>configure</b> <a href="#">application-assurance group number partition number statistics aa-admit-deny policer-stats-resources</a> <i>boolean</i>
Tree	<a href="#">policer-stats-resources</a>
Default	false
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**sctp-filter-stats** *boolean*

Synopsis	Include SCTP filter admit-deny statistics in accounting
Context	<b>configure</b> <a href="#">application-assurance group number partition number statistics aa-admit-deny sctp-filter-stats</a> <i>boolean</i>
Tree	<a href="#">sctp-filter-stats</a>
Default	false
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**session-filter-stats** *boolean*

Synopsis	Include session filter admit-deny statistics in records
Context	<b>configure</b> <a href="#">application-assurance group number partition number statistics aa-admit-deny session-filter-stats</a> <i>boolean</i>
Tree	<a href="#">session-filter-stats</a>
Default	false
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**tcp-validate-stats** *boolean*

Synopsis	Include TCP validate admit-deny statistics in records
Context	<b>configure</b> <a href="#">application-assurance group number partition number statistics aa-admit-deny tcp-validate-stats</a> <i>boolean</i>
Tree	<a href="#">tcp-validate-stats</a>

Default	false
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## aa-app-group

Synopsis	Enter the <b>aa-app-group</b> context
Context	<b>configure</b> <a href="#">application-assurance group number partition number statistics aa-app-group</a>
Tree	<a href="#">aa-app-group</a>
Description	Commands in this context configure the AA application group statistics fields.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## accounting-policy *reference*

Synopsis	Accounting policy ID
Context	<b>configure</b> <a href="#">application-assurance group number partition number statistics aa-app-group accounting-policy reference</a>
Tree	<a href="#">accounting-policy</a>
Reference	<b>configure</b> <a href="#">log accounting-policy number</a>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## collect-stats *boolean*

Synopsis	Collect statistics
Context	<b>configure</b> <a href="#">application-assurance group number partition number statistics aa-app-group collect-stats boolean</a>
Tree	<a href="#">collect-stats</a>
Default	false
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## aa-application

Synopsis	Enter the <b>aa-application</b> context
----------	---

Context	<b>configure</b> <a href="#">application-assurance group number partition number statistics aa-application</a>
Tree	<a href="#">aa-application</a>
Description	Commands in this context configure the application statistics fields.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **accounting-policy** *reference*

Synopsis	Accounting policy ID
Context	<b>configure</b> <a href="#">application-assurance group number partition number statistics aa-application accounting-policy reference</a>
Tree	<a href="#">accounting-policy</a>
Reference	<b>configure</b> <a href="#">log accounting-policy number</a>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **collect-stats** *boolean*

Synopsis	Collect statistics
Context	<b>configure</b> <a href="#">application-assurance group number partition number statistics aa-application collect-stats boolean</a>
Tree	<a href="#">collect-stats</a>
Default	false
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **aa-partition**

Synopsis	Enter the <b>aa-partition</b> context
Context	<b>configure</b> <a href="#">application-assurance group number partition number statistics aa-partition</a>
Tree	<a href="#">aa-partition</a>
Description	Commands in this context configure the AA partition statistics fields.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **accounting-policy** *reference*

Synopsis	Accounting policy
Context	<b>configure</b> <a href="#">application-assurance group number partition number statistics aa-partition accounting-policy reference</a>
Tree	<a href="#">accounting-policy</a>
Reference	<b>configure</b> <a href="#">log accounting-policy number</a>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **collect-stats** *boolean*

Synopsis	Collect statistics
Context	<b>configure</b> <a href="#">application-assurance group number partition number statistics aa-partition collect-stats boolean</a>
Tree	<a href="#">collect-stats</a>
Default	false
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **tethering-stats** *boolean*

Synopsis	Collect tethering statistics
Context	<b>configure</b> <a href="#">application-assurance group number partition number statistics aa-partition tethering-stats boolean</a>
Tree	<a href="#">tethering-stats</a>
Default	false
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **traffic-type-stats** *boolean*

Synopsis	Collect traffic type statistics
Context	<b>configure</b> <a href="#">application-assurance group number partition number statistics aa-partition traffic-type-stats boolean</a>
Tree	<a href="#">traffic-type-stats</a>

Default	false
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## aa-protocol

Synopsis	Enter the <b>aa-protocol</b> context
Context	<b>configure</b> <a href="#">application-assurance group number partition number statistics aa-protocol</a>
Tree	<a href="#">aa-protocol</a>
Description	Commands in this context configure the AA protocol statistics fields.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## accounting-policy *reference*

Synopsis	Accounting policy ID
Context	<b>configure</b> <a href="#">application-assurance group number partition number statistics aa-protocol accounting-policy reference</a>
Tree	<a href="#">accounting-policy</a>
Reference	<b>configure</b> <a href="#">log accounting-policy number</a>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## admin-state *keyword*

Synopsis	Administrative state of protocol statistics
Context	<b>configure</b> <a href="#">application-assurance group number partition number statistics aa-protocol admin-state keyword</a>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**collect-stats** *boolean*

Synopsis	Collect statistics
Context	<b>configure</b> <a href="#">application-assurance group number partition number statistics aa-protocol collect-stats boolean</a>
Tree	<a href="#">collect-stats</a>
Default	false
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**aa-sub**

Synopsis	Enter the <b>aa-sub</b> context
Context	<b>configure</b> <a href="#">application-assurance group number partition number statistics aa-sub</a>
Tree	<a href="#">aa-sub</a>
Description	Commands in this context configure accounting and statistics collection parameters for Application Assurance subscribers.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**accounting-policy** *reference*

Synopsis	Accounting policy ID
Context	<b>configure</b> <a href="#">application-assurance group number partition number statistics aa-sub accounting-policy reference</a>
Tree	<a href="#">accounting-policy</a>
Reference	<b>configure</b> <a href="#">log accounting-policy number</a>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**aggregate-stats-export-using** *keyword*

Synopsis	Method of statistics export to be used
Context	<b>configure</b> <a href="#">application-assurance group number partition number statistics aa-sub aggregate-stats-export-using keyword</a>
Tree	<a href="#">aggregate-stats-export-using</a>
Options	accounting-policy, radius-accounting-policy

Max. Instances	2
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **app-group** [[app-group-name](#)] *reference*

Synopsis	Enter the <b>app-group</b> list instance
Context	<b>configure</b> <a href="#">application-assurance group number partition number statistics aa-sub app-group reference</a>
Tree	<a href="#">app-group</a>
Description	Commands in this context configure accounting and statistics collection parameters for AA application groups for a specific AA group/partition.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **[app-group-name]** *reference*

Synopsis	Application group name
Context	<b>configure</b> <a href="#">application-assurance group number partition number statistics aa-sub app-group reference</a>
Tree	<a href="#">app-group</a>
Reference	<b>configure</b> <a href="#">application-assurance group number partition number policy app-group string</a>
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **export-using** *keyword*

Synopsis	Method used to export statistics
Context	<b>configure</b> <a href="#">application-assurance group number partition number statistics aa-sub app-group reference export-using keyword</a>
Tree	<a href="#">export-using</a>
Options	accounting-policy, radius-accounting-policy
Max. Instances	2
Introduced	21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **application** [[application-name](#)] *reference*

Synopsis Enter the **application** list instance

Context **configure** [application-assurance group number partition number statistics aa-sub application reference](#)

Tree [application](#)

Description Commands in this context configure the AA subscriber accounting statistics for the export of AA applications for an AA group/partition.

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **[application-name]** *reference*

Synopsis Application name

Context **configure** [application-assurance group number partition number statistics aa-sub application reference](#)

Tree [application](#)

Reference **configure** [application-assurance group number partition number policy application string](#)

Notes This element is part of a list key.

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **export-using** *keyword*

Synopsis Method used to export statistics

Context **configure** [application-assurance group number partition number statistics aa-sub application reference export-using keyword](#)

Tree [export-using](#)

Options accounting-policy, radius-accounting-policy

Max. Instances 2

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**charging-group** [[charging-group-name](#)] *reference*

Synopsis	Enter the <b>charging-group</b> list instance
Context	<b>configure</b> <a href="#">application-assurance group number partition number statistics aa-sub charging-group reference</a>
Tree	<a href="#">charging-group</a>
Description	Commands in this context configure AA subscriber accounting statistics for the export of AA charging groups of an AA group/partition.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**[charging-group-name]** *reference*

Synopsis	Charging group name
Context	<b>configure</b> <a href="#">application-assurance group number partition number statistics aa-sub charging-group reference</a>
Tree	<a href="#">charging-group</a>
Description	This command specifies the AA charging group to be included in the exported accounting records.
Reference	<b>configure</b> <a href="#">application-assurance group number partition number policy charging-group string</a>
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**export-using** *keyword*

Synopsis	Method used to export statistics
Context	<b>configure</b> <a href="#">application-assurance group number partition number statistics aa-sub charging-group reference export-using keyword</a>
Tree	<a href="#">export-using</a>
Options	accounting-policy, radius-accounting-policy
Max. Instances	2
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**collect-stats** *boolean*

Synopsis	Collect statistics
Context	<b>configure</b> <a href="#">application-assurance group number partition number statistics aa-sub collect-stats</a> <i>boolean</i>
Tree	<a href="#">collect-stats</a>
Default	false
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**exclude-tcp-retrans** *boolean*

Synopsis	Exclude TCP retransmission and error statistics
Context	<b>configure</b> <a href="#">application-assurance group number partition number statistics aa-sub exclude-tcp-retrans</a> <i>boolean</i>
Tree	<a href="#">exclude-tcp-retrans</a>
Description	When configured to <b>true</b> , TCP errors and retransmission packets are not counted for the purpose of content-based billing. <b>Note:</b> This command is only applicable to EPC. This setting has no impact on app/app-group aggregate AA stats.
Default	false
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**max-throughput-stats** *boolean*

Synopsis	Collect maximum throughput statistics
Context	<b>configure</b> <a href="#">application-assurance group number partition number statistics aa-sub max-throughput-stats</a> <i>boolean</i>
Tree	<a href="#">max-throughput-stats</a>
Default	false
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**protocol** [[protocol-name](#)] *string*

Synopsis	Enter the <b>protocol</b> list instance
----------	---

Context	<b>configure</b> <a href="#">application-assurance group number partition number statistics aa-sub protocol string</a>
Tree	<a href="#">protocol</a>
Description	Commands in this context configure AA subscriber accounting statistics for the export of aa-sub protocols of an AA group/partition.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **[protocol-name]** *string*

Synopsis	AA protocol name
Context	<b>configure</b> <a href="#">application-assurance group number partition number statistics aa-sub protocol string</a>
Tree	<a href="#">protocol</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **export-using** *keyword*

Synopsis	Method used to export statistics
Context	<b>configure</b> <a href="#">application-assurance group number partition number statistics aa-sub protocol string export-using keyword</a>
Tree	<a href="#">export-using</a>
Options	accounting-policy, radius-accounting-policy
Max. Instances	2
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **radius-accounting-policy** *reference*

Synopsis	RADIUS accounting policy name
Context	<b>configure</b> <a href="#">application-assurance group number partition number statistics aa-sub radius-accounting-policy reference</a>
Tree	<a href="#">radius-accounting-policy</a>

Reference	<b>configure</b> <a href="#">application-assurance</a> <a href="#">radius-accounting-policy</a> <i>string</i>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **usage-monitoring** *boolean*

Synopsis	Collect usage monitoring statistics
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">statistics</a> <a href="#">aa-sub</a> <a href="#">usage-monitoring</a> <i>boolean</i>
Tree	<a href="#">usage-monitoring</a>
Description	When configured to <b>true</b> , this command allows the system to activate Gx usage monitoring at AA group/partition level, if enough usage monitoring resources exist for all existing subs.  When configured to <b>false</b> , this command silently removes all monitoring instances (no PCRF notifications) for AA subscribers and all subsequent AA Gx usage monitoring messages are ignored.
Default	false
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **aa-sub-study** [[study-type](#)] *keyword*

Synopsis	Enter the <b>aa-sub-study</b> list instance
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">statistics</a> <a href="#">aa-sub-study</a> <i>keyword</i>
Tree	<a href="#">aa-sub-study</a>
Description	Commands in this context configure accounting and statistics collection parameters per AA special study subscribers.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **[study-type]** *keyword*

Synopsis	Statistic type that the study is using
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">statistics</a> <a href="#">aa-sub-study</a> <i>keyword</i>
Tree	<a href="#">aa-sub-study</a>

Options	protocol, application
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## aa-sub

Synopsis	Enter the <b>aa-sub</b> context
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">statistics</a> <a href="#">aa-sub-study</a> <i>keyword</i> <a href="#">aa-sub</a>
Tree	<a href="#">aa-sub</a>
Description	Commands in this context add an existing subscriber identification to a group of special study subscribers.  Identifying a group of special study subscribers allows statistics and accounting records for those subscribers to be collected for protocols and applications through Application Assurance. When adding a subscriber to the special study group, accounting records and statistics generation commence immediately. When removing a subscriber from the group, special study statistics and accounting records for that subscriber in the current interval are lost.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## esm [[esm-sub-name](#)] *string*

Synopsis	Add a list entry for <b>esm</b>
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">statistics</a> <a href="#">aa-sub-study</a> <i>keyword</i> <a href="#">aa-sub</a> <a href="#">esm</a> <i>string</i>
Tree	<a href="#">esm</a>
Description	Commands in this context configure the ESM fields.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## [[esm-sub-name](#)] *string*

Synopsis	ESM subscriber name
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">statistics</a> <a href="#">aa-sub-study</a> <i>keyword</i> <a href="#">aa-sub</a> <a href="#">esm</a> <i>string</i>
Tree	<a href="#">esm</a>

String Length	1 to 32
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **esm-mac** [[esm-mac-sub-name](#)] *string*

Synopsis	Add a list entry for <b>esm-mac</b>
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <a href="#">number</a> <a href="#">partition</a> <a href="#">number</a> <a href="#">statistics</a> <a href="#">aa-sub-study</a> <i>keyword</i> <a href="#">aa-sub</a> <b>esm-mac</b> <i>string</i>
Tree	<a href="#">esm-mac</a>
Description	Commands in this context configure the ESM MAC fields.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **[esm-mac-sub-name]** *string*

Synopsis	ESM MAC subscriber name
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <a href="#">number</a> <a href="#">partition</a> <a href="#">number</a> <a href="#">statistics</a> <a href="#">aa-sub-study</a> <i>keyword</i> <a href="#">aa-sub</a> <b>esm-mac</b> <i>string</i>
Tree	<a href="#">esm-mac</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **sap** [[sap-id](#)] *string*

Synopsis	Add a list entry for <b>sap</b>
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <a href="#">number</a> <a href="#">partition</a> <a href="#">number</a> <a href="#">statistics</a> <a href="#">aa-sub-study</a> <i>keyword</i> <a href="#">aa-sub</a> <b>sap</b> <i>string</i>
Tree	<a href="#">sap</a>
Description	Commands in this context configure the Service Access Point (SAP) for the purpose of enabling special study statistics.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**[sap-id]** *string*

Synopsis	AA subscriber SAP ID
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">statistics</a> <a href="#">aa-sub-study</a> <i>keyword</i> <a href="#">aa-sub</a> <a href="#">sap</a> <i>string</i>
Tree	<a href="#">sap</a>
String Length	1 to 45
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**spoke-sdp** [[sdp-bind-id](#)] *string*

Synopsis	Add a list entry for <b>spoke-sdp</b>
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">statistics</a> <a href="#">aa-sub-study</a> <i>keyword</i> <a href="#">aa-sub</a> <a href="#">spoke-sdp</a> <i>string</i>
Tree	<a href="#">spoke-sdp</a>
Description	Commands in this context specify the spoke SDP ID and VC ID for the purpose of including the subscriber into AA special study statistics.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**[sdp-bind-id]** *string*

Synopsis	Spoke SDP ID for an AA subscriber
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">statistics</a> <a href="#">aa-sub-study</a> <i>keyword</i> <a href="#">aa-sub</a> <a href="#">spoke-sdp</a> <i>string</i>
Tree	<a href="#">spoke-sdp</a>
String Length	3 to 16
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**transit** [[transit-sub-name](#)] *string*

Synopsis	Add a list entry for <b>transit</b>
----------	-------------------------------------

Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <a href="#">number</a> <a href="#">partition</a> <a href="#">number</a> <a href="#">statistics</a> <a href="#">aa-sub-study</a> <i>keyword</i> <a href="#">aa-sub</a> <a href="#">transit</a> <i>string</i>
Tree	<a href="#">transit</a>
Description	Commands in the context specify an existing transit subscriber to be included in AA sub special study statistics.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**[transit-sub-name]** *string*

Synopsis	Transit subscriber name
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <a href="#">number</a> <a href="#">partition</a> <a href="#">number</a> <a href="#">statistics</a> <a href="#">aa-sub-study</a> <i>keyword</i> <a href="#">aa-sub</a> <a href="#">transit</a> <i>string</i>
Tree	<a href="#">transit</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**accounting-policy** *reference*

Synopsis	Accounting policy ID
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <a href="#">number</a> <a href="#">partition</a> <a href="#">number</a> <a href="#">statistics</a> <a href="#">aa-sub-study</a> <i>keyword</i> <a href="#">accounting-policy</a> <i>reference</i>
Tree	<a href="#">accounting-policy</a>
Reference	<b>configure</b> <a href="#">log</a> <a href="#">accounting-policy</a> <i>number</i>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**collect-stats** *boolean*

Synopsis	Collect statistics
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <a href="#">number</a> <a href="#">partition</a> <a href="#">number</a> <a href="#">statistics</a> <a href="#">aa-sub-study</a> <i>keyword</i> <a href="#">collect-stats</a> <i>boolean</i>
Tree	<a href="#">collect-stats</a>
Default	false

Introduced 21.10.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **tcp-validate** [[tcp-validate-name](#)] *string*

Synopsis Enter the **tcp-validate** list instance  
 Context **configure** [application-assurance group number partition number tcp-validate string](#)  
 Tree [tcp-validate](#)  
 Description Commands in this context configure a TCP validation policy.  
 Introduced 21.10.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **[tcp-validate-name]** *string*

Synopsis TCP validation policy name  
 Context **configure** [application-assurance group number partition number tcp-validate string](#)  
 Tree [tcp-validate](#)  
 String Length 1 to 32  
 Notes This element is part of a list key.  
 Introduced 21.10.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **description** *string*

Synopsis Text description  
 Context **configure** [application-assurance group number partition number tcp-validate string description string](#)  
 Tree [description](#)  
 String Length 1 to 80  
 Introduced 21.10.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **log**

Synopsis Enter the **log** context

Context	<b>configure</b> <a href="#">application-assurance group number partition number tcp-validate string log</a>
Tree	<a href="#">log</a>
Description	Commands in this context enable event logging of traffic dropped by TCP validation.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **all** *boolean*

Synopsis	Enable logging of all dropped TCP packets
Context	<b>configure</b> <a href="#">application-assurance group number partition number tcp-validate string log</a> <a href="#">all boolean</a>
Tree	<a href="#">all</a>
Description	When configured to <b>true</b> , all dropped TCP packets are logged, including the following: <ul style="list-style-type: none"> <li>• packets received after an RST and discarded</li> <li>• packets received before TCP session establishment (before SYN) and discarded</li> </ul> An event log must also be configured to enable logging of all dropped packets. When configured to <b>false</b> , discards related to the described cases are not captured in any event log.
Default	false
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **event-log** *reference*

Synopsis	Event log name
Context	<b>configure</b> <a href="#">application-assurance group number partition number tcp-validate string log</a> <a href="#">event-log reference</a>
Tree	<a href="#">event-log</a>
Reference	<b>configure</b> <a href="#">application-assurance group number partition number event-log string</a>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **strict** *boolean*

Synopsis	Enable strict checking of TCP traffic
----------	---------------------------------------

Context	<b>configure</b> <a href="#">application-assurance group number partition number tcp-validate string strict</a> <i>boolean</i>
Tree	<a href="#">strict</a>
Description	<p>When configured to <b>true</b>, the command specifies whether enforcement of TCP sequence and acknowledgment numbers are applied. If a packet does not meet the expected sequence or acknowledgment number, it is dropped. This command should only be enabled if the expected bit error rate or packet loss is low.</p> <p>For example, if acknowledgments are lost before being detected by AA, the server timeouts are triggered and retransmissions occur. If strict is enabled, these retransmissions resemble a reply attack and are dropped by AA.</p> <p>When configured to <b>false</b>, the command removes the TCP sequence and acknowledgment number enforcement.</p>
Default	false
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## tethering-detection

Synopsis	Enter the <b>tethering-detection</b> context
Context	<b>configure</b> <a href="#">application-assurance group number partition number tethering-detection</a>
Tree	<a href="#">tethering-detection</a>
Description	Commands in this context configure tethering detection for the group.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## admin-state *keyword*

Synopsis	Administrative state of tethering detection
Context	<b>configure</b> <a href="#">application-assurance group number partition number tethering-detection admin-state keyword</a>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## single-device

Synopsis	Enter the <b>single-device</b> context
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">partition number</a> <a href="#">tethering-detection single-device</a>
Tree	<a href="#">single-device</a>
Description	Commands in this context configure the single-device fields and expected TTL values for flow-level tethering detection.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## expected-ttl [[ttl](#)] *number*

Synopsis	Add a list entry for <b>expected-ttl</b>
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">partition number</a> <a href="#">tethering-detection single-device expected-ttl number</a>
Tree	<a href="#">expected-ttl</a>
Description	Commands in this context configure the TTL values for single-device tethering detection.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## [ttl](#) *number*

Synopsis	Expected TTL traffic value from host devices
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">partition number</a> <a href="#">tethering-detection single-device expected-ttl number</a>
Tree	<a href="#">expected-ttl</a>
Range	1 to 255
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## invert-match *boolean*

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Mark flows with expected TTL values as tethered
Context	<b>configure</b> <a href="#">application-assurance group number partition number tethering-detection single-device invert-match boolean</a>
Tree	<a href="#">invert-match</a>
Description	When configured to <b>true</b> , AA classifies flows with expected TTL values as coming from a connected device (tethered). When configured to <b>false</b> , AA classifies flows with expected TTL values as coming from the host device (untethered).
Default	false
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## ttl-monitor

Synopsis	Enter the <b>ttl-monitor</b> context
Context	<b>configure</b> <a href="#">application-assurance group number partition number tethering-detection ttl-monitor</a>
Tree	<a href="#">ttl-monitor</a>
Description	Commands in this context configure the scope of analysis for TCP and UDP traffic for tethering detection.
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## tcp-protocols *keyword*

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Scope of analysis for TCP traffic
Context	<b>configure</b> <a href="#">application-assurance group number partition number tethering-detection ttl-monitor tcp-protocols keyword</a>
Tree	<a href="#">tcp-protocols</a>
Description	This command configures whether AA analyzes all TCP traffic or only traffic from standard applications that generate consistent TTL values. Configuring AA to analyze all TCP traffic is typically recommended.
Options	standard – Protocols with reliable TTL-tethering state association all – All protocols

Default	standard
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### udp-protocols *keyword*

#### **WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Scope of analysis for UDP traffic
Context	<b>configure</b> <a href="#">application-assurance group number partition number tethering-detection ttl-monitor</a> <a href="#">udp-protocols keyword</a>
Tree	<a href="#">udp-protocols</a>
Description	This command configures whether AA analyzes all UDP traffic or only traffic from standard applications that generate consistent TTL values. Configuring AA to analyze only standard UDP traffic is recommended.
Options	standard – Protocols with reliable TTL-tethering state association all – All protocols
Default	standard
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### threshold-crossing-alert

Synopsis	Enter the <b>threshold-crossing-alert</b> context
Context	<b>configure</b> <a href="#">application-assurance group number partition number threshold-crossing-alert</a>
Tree	<a href="#">threshold-crossing-alert</a>
Description	Commands in this context configure the generation of threshold crossing alerts (TCAs).
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### criteria [*criteria-id*] *keyword direction keyword*

Synopsis	Enter the <b>criteria</b> list instance
Context	<b>configure</b> <a href="#">application-assurance group number partition number threshold-crossing-alert criteria keyword direction keyword</a>

Tree	<a href="#">criteria</a>
Description	Commands in this context configure the TCA criteria for the partition.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**[criteria-id] keyword**

Synopsis	Statistics TCA criteria ID
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">threshold-crossing-alert</a> <a href="#">criteria</a> <i>keyword</i> <a href="#">direction</a> <i>keyword</i>
Tree	<a href="#">criteria</a>
Options	error-drop, fragment-drop-out-of-order, fragment-drop-all, overload-drop, gtp-sanity-drop
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**direction keyword**

Synopsis	Direction of traffic for the criteria statistics TCA
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">threshold-crossing-alert</a> <a href="#">criteria</a> <i>keyword</i> <a href="#">direction</a> <i>keyword</i>
Tree	<a href="#">criteria</a>
Options	from-sub, to-sub
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**high-watermark number**

Synopsis	High watermark threshold
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">threshold-crossing-alert</a> <a href="#">criteria</a> <i>keyword</i> <a href="#">direction</a> <i>keyword</i> <a href="#">high-watermark</a> <i>number</i>
Tree	<a href="#">high-watermark</a>
Range	1 to 4294967295
Default	4294967295
Introduced	21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **low-watermark** *number*

Synopsis Low watermark threshold

Context **configure** [application-assurance group](#) *number* [partition](#) *number* [threshold-crossing-alert criteria](#) *keyword* [direction](#) *keyword* **low-watermark** *number*

Tree [low-watermark](#)

Range 0 to 4294967294

Default 0

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **gtp-filter** [[gtp-filter-name](#)] *reference* [criteria](#) *keyword* [direction](#) *keyword*

Synopsis Enter the **gtp-filter** list instance

Context **configure** [application-assurance group](#) *number* [partition](#) *number* [threshold-crossing-alert](#) [gtp-filter](#) *reference* [criteria](#) *keyword* [direction](#) *keyword*

Tree [gtp-filter](#)

Description Commands in this context configure TCA generation for a GTP filter.

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **[gtp-filter-name]** *reference*

Synopsis GTP filter name for TCA generation

Context **configure** [application-assurance group](#) *number* [partition](#) *number* [threshold-crossing-alert](#) [gtp-filter](#) *reference* [criteria](#) *keyword* [direction](#) *keyword*

Tree [gtp-filter](#)

Reference **configure** [application-assurance group](#) *number* [partition](#) *number* [gtp](#) [gtp-filter](#) *string*

Notes This element is part of a list key.

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**criteria** *keyword*

Synopsis	Criteria ID for GTP filter TCA
Context	<b>configure</b> <a href="#">application-assurance group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">threshold-crossing-alert</a> <a href="#">gtp-filter</a> <i>reference</i> <a href="#">criteria</a> <i>keyword</i> <a href="#">direction</a> <i>keyword</i>
Tree	<a href="#">gtp-filter</a>
Options	max-payload-length, message-type-default-action, header-sanity, message-type-gtpv2-default-action, imsi-apn-filter-default-action, validate-gtp-tunnels, validate-sequence-number, validate-src-ip-addr, missing-mandatory-ie, gtp-in-gtp, gtp-tunnel-database-full, gtp-tunnel-endpoint-limit
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**direction** *keyword*

Synopsis	Direction of traffic for the GTP filter TCA
Context	<b>configure</b> <a href="#">application-assurance group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">threshold-crossing-alert</a> <a href="#">gtp-filter</a> <i>reference</i> <a href="#">criteria</a> <i>keyword</i> <a href="#">direction</a> <i>keyword</i>
Tree	<a href="#">gtp-filter</a>
Options	from-sub, to-sub
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**high-watermark** *number*

Synopsis	High watermark threshold
Context	<b>configure</b> <a href="#">application-assurance group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">threshold-crossing-alert</a> <a href="#">gtp-filter</a> <i>reference</i> <a href="#">criteria</a> <i>keyword</i> <a href="#">direction</a> <i>keyword</i> <a href="#">high-watermark</a> <i>number</i>
Tree	<a href="#">high-watermark</a>
Range	1 to 4294967295
Default	4294967295
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**low-watermark** *number*

Synopsis	Low watermark threshold
Context	<b>configure</b> <a href="#">application-assurance group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">threshold-crossing-alert gtp-filter</a> <i>reference</i> <a href="#">criteria</a> <i>keyword</i> <a href="#">direction</a> <i>keyword</i> <b>low-watermark</b> <i>number</i>
Tree	<a href="#">low-watermark</a>
Range	0 to 4294967294
Default	0
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**gtp-filter-entry** [[gtp-filter-name](#)] *reference* [entry-id](#) *number* [direction](#) *keyword*

Synopsis	Enter the <b>gtp-filter-entry</b> list instance
Context	<b>configure</b> <a href="#">application-assurance group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">threshold-crossing-alert gtp-filter-entry</a> <i>reference</i> <a href="#">entry-id</a> <i>number</i> <a href="#">direction</a> <i>keyword</i>
Tree	<a href="#">gtp-filter-entry</a>
Description	Commands in this context configure the AA GTP filter entry TCA fields.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**[gtp-filter-name]** *reference*

Synopsis	AA GTP filter name for TCA configuration
Context	<b>configure</b> <a href="#">application-assurance group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">threshold-crossing-alert gtp-filter-entry</a> <i>reference</i> <a href="#">entry-id</a> <i>number</i> <a href="#">direction</a> <i>keyword</i>
Tree	<a href="#">gtp-filter-entry</a>
Reference	<b>configure</b> <a href="#">application-assurance group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">gtp gtp-filter</a> <i>string</i>
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**entry-id** *number*

Synopsis	Entry ID
Context	<b>configure</b> <a href="#">application-assurance group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">threshold-crossing-alert gtp-filter-entry</a> <i>reference</i> <a href="#">entry-id</a> <i>number</i> <a href="#">direction</a> <i>keyword</i>

Tree	<a href="#">gtp-filter-entry</a>
Description	This command configures the identifier for the statistics TCA GTP filter V1 message type entry, V2 message type entry, or imsi-apn filter entry.
Max. Range	0 to 4294967295
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **direction** *keyword*

Synopsis	Traffic direction for GTP filter entry TCA
Context	<b>configure</b> <a href="#">application-assurance group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">threshold-crossing-alert</a> <a href="#">gtp-filter-entry</a> <i>reference</i> <a href="#">entry-id</a> <i>number</i> <b>direction</b> <i>keyword</i>
Tree	<a href="#">gtp-filter-entry</a>
Options	from-sub, to-sub
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **high-watermark** *number*

Synopsis	High watermark threshold
Context	<b>configure</b> <a href="#">application-assurance group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">threshold-crossing-alert</a> <a href="#">gtp-filter-entry</a> <i>reference</i> <a href="#">entry-id</a> <i>number</i> <a href="#">direction</a> <i>keyword</i> <b>high-watermark</b> <i>number</i>
Tree	<a href="#">high-watermark</a>
Range	1 to 4294967295
Default	4294967295
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **low-watermark** *number*

Synopsis	Low watermark threshold
Context	<b>configure</b> <a href="#">application-assurance group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">threshold-crossing-alert</a> <a href="#">gtp-filter-entry</a> <i>reference</i> <a href="#">entry-id</a> <i>number</i> <a href="#">direction</a> <i>keyword</i> <b>low-watermark</b> <i>number</i>
Tree	<a href="#">low-watermark</a>

Range	0 to 4294967294
Default	0
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **policer** [*policer-name*] *string direction keyword*

Synopsis	Enter the <b>policer</b> list instance
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">partition number</a> <a href="#">threshold-crossing-alert policer</a> <i>string direction keyword</i>
Tree	<a href="#">policer</a>
Description	Commands in this context configure a TCA for the counter capturing drops or admit events.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **[policer-name]** *string*

Synopsis	Policer name for TCA generation
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">partition number</a> <a href="#">threshold-crossing-alert policer</a> <i>string direction keyword</i>
Tree	<a href="#">policer</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **direction** *keyword*

Synopsis	Direction of traffic for the policer TCA
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">partition number</a> <a href="#">threshold-crossing-alert policer</a> <i>string direction keyword</i>
Tree	<a href="#">policer</a>
Options	from-sub, to-sub
Notes	This element is part of a list key.
Introduced	21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### high-watermark *number*

Synopsis High watermark threshold

Context **configure** [application-assurance group](#) *number* [partition](#) *number* [threshold-crossing-alert policer](#) *string* [direction](#) *keyword* [high-watermark](#) *number*

Tree [high-watermark](#)

Range 1 to 4294967295

Default 4294967295

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### low-watermark *number*

Synopsis Low watermark threshold

Context **configure** [application-assurance group](#) *number* [partition](#) *number* [threshold-crossing-alert policer](#) *string* [direction](#) *keyword* [low-watermark](#) *number*

Tree [low-watermark](#)

Range 0 to 4294967294

Default 0

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### sctp-filter [[sctp-filter-name](#)] *reference* [criteria](#) *keyword* [direction](#) *keyword*

Synopsis Enter the **sctp-filter** list instance

Context **configure** [application-assurance group](#) *number* [partition](#) *number* [threshold-crossing-alert](#) [sctp-filter](#) *reference* [criteria](#) *keyword* [direction](#) *keyword*

Tree [sctp-filter](#)

Description Commands in this context configure TCA generation for an SCTP filter.

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**[sctp-filter-name]** *reference*

Synopsis	SCTP filter name for TCA generation
Context	<b>configure</b> <a href="#">application-assurance group number partition number threshold-crossing-alert sctp-filter reference criteria keyword direction keyword</a>
Tree	<a href="#">sctp-filter</a>
Reference	<b>configure</b> <a href="#">application-assurance group number partition number sctp-filter string</a>
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**criteria** *keyword*

Synopsis	Criteria ID for SCTP filter TCA
Context	<b>configure</b> <a href="#">application-assurance group number partition number threshold-crossing-alert sctp-filter reference criteria keyword direction keyword</a>
Tree	<a href="#">sctp-filter</a>
Options	ppid-default-action, packet-sanity, ppid-range
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**direction** *keyword*

Synopsis	Direction of traffic for SCTP filter TCA
Context	<b>configure</b> <a href="#">application-assurance group number partition number threshold-crossing-alert sctp-filter reference criteria keyword direction keyword</a>
Tree	<a href="#">sctp-filter</a>
Options	from-sub, to-sub
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**high-watermark** *number*

Synopsis	High watermark threshold
----------	--------------------------

Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <a href="#">number</a> <a href="#">partition</a> <a href="#">number</a> <a href="#">threshold-crossing-alert</a> <a href="#">sctp-filter</a> <a href="#">reference</a> <a href="#">criteria</a> <a href="#">keyword</a> <a href="#">direction</a> <a href="#">keyword</a> <a href="#">high-watermark</a> <a href="#">number</a>
Tree	<a href="#">high-watermark</a>
Range	1 to 4294967295
Default	4294967295
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **low-watermark** *number*

Synopsis	Low watermark threshold
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <a href="#">number</a> <a href="#">partition</a> <a href="#">number</a> <a href="#">threshold-crossing-alert</a> <a href="#">sctp-filter</a> <a href="#">reference</a> <a href="#">criteria</a> <a href="#">keyword</a> <a href="#">direction</a> <a href="#">keyword</a> <a href="#">low-watermark</a> <a href="#">number</a>
Tree	<a href="#">low-watermark</a>
Range	0 to 4294967294
Default	0
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **sctp-filter-entry** [[sctp-filter-name](#)] *reference* [entry-id](#) *reference* [direction](#) *keyword*

Synopsis	Enter the <b>sctp-filter-entry</b> list instance
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <a href="#">number</a> <a href="#">partition</a> <a href="#">number</a> <a href="#">threshold-crossing-alert</a> <a href="#">sctp-filter-entry</a> <a href="#">reference</a> <a href="#">entry-id</a> <a href="#">reference</a> <a href="#">direction</a> <a href="#">keyword</a>
Tree	<a href="#">sctp-filter-entry</a>
Description	Commands in this context configure the AA SCTP filter PPID entry TCA fields.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **[sctp-filter-name]** *reference*

Synopsis	AA SCTP filter name for TCA configuration
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <a href="#">number</a> <a href="#">partition</a> <a href="#">number</a> <a href="#">threshold-crossing-alert</a> <a href="#">sctp-filter-entry</a> <a href="#">reference</a> <a href="#">entry-id</a> <a href="#">reference</a> <a href="#">direction</a> <a href="#">keyword</a>
Tree	<a href="#">sctp-filter-entry</a>
Reference	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <a href="#">number</a> <a href="#">partition</a> <a href="#">number</a> <a href="#">sctp-filter</a> <a href="#">string</a>

Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **entry-id** *reference*

Synopsis	ID for SCTP filter entry TCA
Context	<b>configure</b> <a href="#">application-assurance group number partition number threshold-crossing-alert sctp-filter-entry reference entry-id reference direction keyword</a>
Tree	<a href="#">sctp-filter-entry</a>
Reference	<b>configure</b> <a href="#">application-assurance group number partition number sctp-filter string ppid entry number</a>
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **direction** *keyword*

Synopsis	Direction of traffic for TCA configuration
Context	<b>configure</b> <a href="#">application-assurance group number partition number threshold-crossing-alert sctp-filter-entry reference entry-id reference direction keyword</a>
Tree	<a href="#">sctp-filter-entry</a>
Options	from-sub, to-sub
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **high-watermark** *number*

Synopsis	High watermark threshold
Context	<b>configure</b> <a href="#">application-assurance group number partition number threshold-crossing-alert sctp-filter-entry reference entry-id reference direction keyword high-watermark number</a>
Tree	<a href="#">high-watermark</a>
Range	1 to 4294967295
Default	4294967295

Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **low-watermark** *number*

Synopsis	Low watermark threshold
Context	<b>configure</b> <a href="#">application-assurance group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">threshold-crossing-alert sctp-filter-entry</a> <i>reference</i> <a href="#">entry-id</a> <i>reference</i> <a href="#">direction</a> <i>keyword</i> <b>low-watermark</b> <i>number</i>
Tree	<a href="#">low-watermark</a>
Range	0 to 4294967294
Default	0
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **session-filter** [[session-filter-name](#)] *reference* [criteria](#) *keyword* [direction](#) *keyword*

Synopsis	Enter the <b>session-filter</b> list instance
Context	<b>configure</b> <a href="#">application-assurance group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">threshold-crossing-alert session-filter</a> <i>reference</i> <a href="#">criteria</a> <i>keyword</i> <a href="#">direction</a> <i>keyword</i>
Tree	<a href="#">session-filter</a>
Description	Commands in this context configure TCA generation for a session filter.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **[session-filter-name]** *reference*

Synopsis	AA session filter name for TCA configuration
Context	<b>configure</b> <a href="#">application-assurance group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">threshold-crossing-alert session-filter</a> <i>reference</i> <a href="#">criteria</a> <i>keyword</i> <a href="#">direction</a> <i>keyword</i>
Tree	<a href="#">session-filter</a>
Reference	<b>configure</b> <a href="#">application-assurance group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">session-filter</a> <i>string</i>
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**criteria** *keyword*

Synopsis	ID for session filter entry TCA
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <a href="#">number</a> <a href="#">partition</a> <a href="#">number</a> <a href="#">threshold-crossing-alert</a> <a href="#">session-filter</a> <a href="#">reference</a> <b>criteria</b> <a href="#">keyword</a> <a href="#">direction</a> <a href="#">keyword</a>
Tree	<a href="#">session-filter</a>
Options	default-action
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**direction** *keyword*

Synopsis	Direction of traffic for TCA configuration
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <a href="#">number</a> <a href="#">partition</a> <a href="#">number</a> <a href="#">threshold-crossing-alert</a> <a href="#">session-filter</a> <a href="#">reference</a> <b>criteria</b> <a href="#">keyword</a> <b>direction</b> <a href="#">keyword</a>
Tree	<a href="#">session-filter</a>
Options	from-sub, to-sub
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**high-watermark** *number*

Synopsis	High watermark threshold
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <a href="#">number</a> <a href="#">partition</a> <a href="#">number</a> <a href="#">threshold-crossing-alert</a> <a href="#">session-filter</a> <a href="#">reference</a> <b>criteria</b> <a href="#">keyword</a> <a href="#">direction</a> <a href="#">keyword</a> <b>high-watermark</b> <a href="#">number</a>
Tree	<a href="#">high-watermark</a>
Range	1 to 4294967295
Default	4294967295
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**low-watermark** *number*

Synopsis	Low watermark threshold
----------	-------------------------

Context	<b>configure</b> <a href="#">application-assurance group number partition number threshold-crossing-alert session-filter reference criteria keyword direction keyword low-watermark number</a>
Tree	<a href="#">low-watermark</a>
Range	0 to 4294967294
Default	0
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **session-filter-entry** [[session-filter-name](#)] *reference* [entry-id](#) *reference* [direction](#) *keyword*

Synopsis	Enter the <b>session-filter-entry</b> list instance
Context	<b>configure</b> <a href="#">application-assurance group number partition number threshold-crossing-alert session-filter-entry reference entry-id reference direction keyword</a>
Tree	<a href="#">session-filter-entry</a>
Description	Commands in this context configure the AA session filter entry TCA fields for the partition.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **[session-filter-name]** *reference*

Synopsis	AA session filter name for TCA configuration
Context	<b>configure</b> <a href="#">application-assurance group number partition number threshold-crossing-alert session-filter-entry reference entry-id reference direction keyword</a>
Tree	<a href="#">session-filter-entry</a>
Reference	<b>configure</b> <a href="#">application-assurance group number partition number session-filter string</a>
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **entry-id** *reference*

Synopsis	ID for session filter entry TCA
Context	<b>configure</b> <a href="#">application-assurance group number partition number threshold-crossing-alert session-filter-entry reference entry-id reference direction keyword</a>
Tree	<a href="#">session-filter-entry</a>

Reference	<b>configure</b> <a href="#">application-assurance group number partition number session-filter string entry number</a>
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **direction** *keyword*

Synopsis	Direction of traffic for TCA configuration
Context	<b>configure</b> <a href="#">application-assurance group number partition number threshold-crossing-alert session-filter-entry reference entry-id reference direction keyword</a>
Tree	<a href="#">session-filter-entry</a>
Options	from-sub, to-sub
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **high-watermark** *number*

Synopsis	High watermark threshold
Context	<b>configure</b> <a href="#">application-assurance group number partition number threshold-crossing-alert session-filter-entry reference entry-id reference direction keyword high-watermark number</a>
Tree	<a href="#">high-watermark</a>
Range	1 to 4294967295
Default	4294967295
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **low-watermark** *number*

Synopsis	Low watermark threshold
Context	<b>configure</b> <a href="#">application-assurance group number partition number threshold-crossing-alert session-filter-entry reference entry-id reference direction keyword low-watermark number</a>
Tree	<a href="#">low-watermark</a>
Range	0 to 4294967294

Default	0
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **tcp-validate** [[tcp-validate-name](#)] *reference* [direction](#) *keyword*

Synopsis	Enter the <b>tcp-validate</b> list instance
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">threshold-crossing-alert</a> <a href="#">tcp-validate</a> <i>reference</i> <a href="#">direction</a> <i>keyword</i>
Tree	<a href="#">tcp-validate</a>
Description	Commands in this context configure TCP validation policy TCA fields for the partition.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **[tcp-validate-name]** *reference*

Synopsis	AA TCP validate name for configuration
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">threshold-crossing-alert</a> <a href="#">tcp-validate</a> <i>reference</i> <a href="#">direction</a> <i>keyword</i>
Tree	<a href="#">tcp-validate</a>
Reference	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">tcp-validate</a> <i>string</i>
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **direction** *keyword*

Synopsis	Direction of traffic for TCA configuration
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">threshold-crossing-alert</a> <a href="#">tcp-validate</a> <i>reference</i> <a href="#">direction</a> <i>keyword</i>
Tree	<a href="#">tcp-validate</a>
Options	from-sub, to-sub
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**high-watermark** *number*

Synopsis	High watermark threshold
Context	<b>configure</b> <a href="#">application-assurance group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">threshold-crossing-alert tcp-validate</a> <a href="#">reference</a> <a href="#">direction</a> <a href="#">keyword</a> <b>high-watermark</b> <i>number</i>
Tree	<a href="#">high-watermark</a>
Range	1 to 4294967295
Default	4294967295
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**low-watermark** *number*

Synopsis	Low watermark threshold
Context	<b>configure</b> <a href="#">application-assurance group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">threshold-crossing-alert tcp-validate</a> <a href="#">reference</a> <a href="#">direction</a> <a href="#">keyword</a> <b>low-watermark</b> <i>number</i>
Tree	<a href="#">low-watermark</a>
Range	0 to 4294967294
Default	0
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**transit-ip-policy** [[ip-policy-id](#)] *number*

Synopsis	Enter the <b>transit-ip-policy</b> list instance
Context	<b>configure</b> <a href="#">application-assurance group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <b>transit-ip-policy</b> <i>number</i>
Tree	<a href="#">transit-ip-policy</a>
Description	Commands in this context define a transit AA subscriber IP policy. Transit AA subscribers are managed by the system through the use of this policy assigned to services, which determines how transit subs are created and removed for that service.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**[ip-policy-id]** *number*

Synopsis	IP transit policy ID
----------	----------------------

Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">transit-ip-policy</a> <i>number</i>
Tree	<a href="#">transit-ip-policy</a>
Range	1 to 65535
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **default-app-profile** *reference*

Synopsis	Default AA application profile
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">transit-ip-policy</a> <i>number</i> <a href="#">default-app-profile</a> <i>reference</i>
Tree	<a href="#">default-app-profile</a>
Reference	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">policy</a> <a href="#">app-profile</a> <i>string</i>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">transit-ip-policy</a> <i>number</i> <a href="#">description</a> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **detect-seen-ip** *boolean*

Synopsis	Detect transit subscribers based on IP address
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">transit-ip-policy</a> <i>number</i> <a href="#">detect-seen-ip</a> <i>boolean</i>
Tree	<a href="#">detect-seen-ip</a>
Default	false
Introduced	21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## dhcp

Synopsis Enter the **dhcp** context

Context **configure** [application-assurance group number](#) [partition number](#) [transit-ip-policy number](#) **dhcp**

Tree [dhcp](#)

Description Commands in this context enable dynamic DHCP-based management of transit aa-subs for the transit IP policy. Dynamic DHCP-based management and other types of management of transit subs for a transit IP policy are mutually exclusive.

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## admin-state *keyword*

Synopsis Administrative state for learning DHCP dynamic transits

Context **configure** [application-assurance group number](#) [partition number](#) [transit-ip-policy number](#) **dhcp** [admin-state keyword](#)

Tree [admin-state](#)

Options enable, disable

Default disable

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## diameter

Synopsis Enter the **diameter** context

Context **configure** [application-assurance group number](#) [partition number](#) [transit-ip-policy number](#) **diameter**

Tree [diameter](#)

Description Commands in this context configure dynamic Diameter-based management of transit AA subs for the transit IP policy. This is mutually exclusive to other types of management of transit subs for a given transit IP policy.

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**admin-state** *keyword*

Synopsis	Administrative state for Diameter dynamic transits
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">partition number</a> <a href="#">transit-ip-policy number</a> <a href="#">diameter admin-state keyword</a>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**application-policy** *reference*

Synopsis	Diameter application policy name for IP transit policy
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">partition number</a> <a href="#">transit-ip-policy number</a> <a href="#">diameter application-policy reference</a>
Tree	<a href="#">application-policy</a>
Reference	<b>configure</b> <a href="#">subscriber-mgmt diameter-gx-policy string</a>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**ipv6-address-prefix-length** *number*

Synopsis	Length of the AA transit IP policy IPv6 address prefix
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">partition number</a> <a href="#">transit-ip-policy number</a> <a href="#">ipv6-address-prefix-length number</a>
Tree	<a href="#">ipv6-address-prefix-length</a>
Range	32 to 64
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**radius**

Synopsis	Enter the <b>radius</b> context
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">partition number</a> <a href="#">transit-ip-policy number</a> <a href="#">radius</a>

Tree	<a href="#">radius</a>
Description	Commands in this context enable dynamic RADIUS-based management of transit aa-subs for the transit IP policy. This is mutually exclusive to other types of management of transit subs for a given transit IP policy.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **admin-state** *keyword*

Synopsis	Administrative state of learning RADIUS dynamic transit
Context	<b>configure</b> <a href="#">application-assurance group number partition number transit-ip-policy number radius admin-state keyword</a>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **authentication-policy** *reference*

Synopsis	RADIUS authentication policy
Context	<b>configure</b> <a href="#">application-assurance group number partition number transit-ip-policy number radius authentication-policy reference</a>
Tree	<a href="#">authentication-policy</a>
Reference	<b>configure</b> <a href="#">subscriber-mgmt radius-authentication-policy string</a>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **seen-ip-radius-acct-policy** *reference*

Synopsis	RADIUS accounting policy to enable seen-IP notification
Context	<b>configure</b> <a href="#">application-assurance group number partition number transit-ip-policy number radius seen-ip-radius-acct-policy reference</a>
Tree	<a href="#">seen-ip-radius-acct-policy</a>
Reference	<b>configure</b> <a href="#">application-assurance radius-accounting-policy string</a>
Introduced	21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **static-aa-sub** [**transit-aa-sub-name**] *string*

Synopsis Enter the **static-aa-sub** list instance

Context **configure** [application-assurance group number](#) [partition number](#) [transit-ip-policy number](#) [static-aa-sub string](#)

Tree [static-aa-sub](#)

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **[transit-aa-sub-name]** *string*

Synopsis Static transit subscriber name

Context **configure** [application-assurance group number](#) [partition number](#) [transit-ip-policy number](#) [static-aa-sub string](#)

Tree [static-aa-sub](#)

String Length 1 to 32

Notes This element is part of a list key.

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **app-profile** *reference*

Synopsis Application profile name

Context **configure** [application-assurance group number](#) [partition number](#) [transit-ip-policy number](#) [static-aa-sub string](#) [app-profile reference](#)

Tree [app-profile](#)

Reference **configure** [application-assurance group number](#) [partition number](#) [policy app-profile string](#)

Notes This element is mandatory.

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **ip** [**address**] (*ipv4-unicast-address* | *ipv6-prefix*)

Synopsis Add a list entry for **ip**

Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <a href="#">number</a> <a href="#">partition</a> <a href="#">number</a> <a href="#">transit-ip-policy</a> <a href="#">number</a> <a href="#">static-aa-sub</a> <a href="#">string</a> <a href="#">ip</a> ( <a href="#">ipv4-unicast-address</a>   <a href="#">ipv6-prefix</a> )
Tree	<a href="#">ip</a>
Description	Commands in this context configure the IP address for a static transit aa-sub.
Max. Instances	32
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### [**address**] ([ipv4-unicast-address](#) | [ipv6-prefix](#))

Synopsis	IP address for an AA static transit subscriber
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <a href="#">number</a> <a href="#">partition</a> <a href="#">number</a> <a href="#">transit-ip-policy</a> <a href="#">number</a> <a href="#">static-aa-sub</a> <a href="#">string</a> <a href="#">ip</a> ( <a href="#">ipv4-unicast-address</a>   <a href="#">ipv6-prefix</a> )
Tree	<a href="#">ip</a>
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **sub-ident-policy** *reference*

Synopsis	Subscriber identification policy
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <a href="#">number</a> <a href="#">partition</a> <a href="#">number</a> <a href="#">transit-ip-policy</a> <a href="#">number</a> <a href="#">sub-ident-policy</a> <i>reference</i>
Tree	<a href="#">sub-ident-policy</a>
Description	<p>This command defines the subscriber identification policy for the transit IP policy that will be associated with a SAP. The subscriber identification policy must be defined prior to associating the profile with a SAP in the <b>configure subscriber-mgmt sub-ident-policy</b> context. Subscribers are managed by the system through the use of subscriber identification strings. A subscriber identification string uniquely identifies a subscriber. For static hosts, the subscriber identification string is explicitly defined with each static subscriber host.</p> <p>For dynamic hosts, the subscriber identification string must be derived from the DHCP ACK message sent to the subscriber host. The default value for the string is the content of Option 82 CIRCUIT-ID and REMOTE-ID fields interpreted as an octet string. As an option, the DHCP ACK message may be processed by a subscriber identification policy which has the capability to parse the message into an alternative ASCII or octet string value.</p> <p>When multiple hosts on the same port are associated with the same subscriber identification string, they are considered to be host members of the same subscriber.</p>

A subscriber identification policy can also be used for identifying dynamic transit subscriber names.

Reference	<b>configure</b> <a href="#">subscriber-mgmt sub-ident-policy string</a>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **transit-auto-create**

Synopsis	Enter the <b>transit-auto-create</b> context
Context	<b>configure</b> <a href="#">application-assurance group number partition number transit-ip-policy number transit-auto-create</a>
Tree	<a href="#">transit-auto-create</a>
Description	Commands in this context enable the seen-IP auto creation of transit subscribers using the transit IP policy name and subscriber IP address as the aa-sub name. The default app-profile configured against the transit IP policy is applied to these subscribers.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **admin-state** *keyword*

Synopsis	Administrative state of the automatic dynamic transits
Context	<b>configure</b> <a href="#">application-assurance group number partition number transit-ip-policy number transit-auto-create admin-state keyword</a>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **inactivity-monitor** *boolean*

Synopsis	Monitor inactivity on auto-created transit subscribers
Context	<b>configure</b> <a href="#">application-assurance group number partition number transit-ip-policy number transit-auto-create inactivity-monitor boolean</a>
Tree	<a href="#">inactivity-monitor</a>
Description	When configured to <b>true</b> , this command enables the auto-removal of inactive transit subscribers. Periodically, AA removes any inactive auto-created subscribers. An inactive subscriber is defined as having no active flows in the last period.

When configured to **false**, this command disables the auto-removal of inactive transit subscribers.

Default	false
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **transit-prefix-policy** [[prefix-policy-id](#)] *number*

Synopsis	Enter the <b>transit-prefix-policy</b> list instance
Context	<b>configure</b> <a href="#">application-assurance group number partition number transit-prefix-policy number</a>
Tree	<a href="#">transit-prefix-policy</a>
Description	Commands in this context define a transit AA subscriber prefix policy. Transit AA subscribers are managed by the system through the use of this policy assigned to services, which determines how transit subscribers are created and removed for that service.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **[prefix-policy-id]** *number*

Synopsis	Transit prefix policy ID
Context	<b>configure</b> <a href="#">application-assurance group number partition number transit-prefix-policy number</a>
Tree	<a href="#">transit-prefix-policy</a>
Range	1 to 65535
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">application-assurance group number partition number transit-prefix-policy number description string</a>
Tree	<a href="#">description</a>
String Length	1 to 80

Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **entry** [**entry-id**] *number*

Synopsis	Enter the <b>entry</b> list instance
Context	<b>configure</b> <a href="#">application-assurance group number partition number transit-prefix-policy number entry number</a>
Tree	<a href="#">entry</a>
Description	Commands in this context configure the index to a specific entry of a transit prefix policy.
Max. Instances	4095
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **[entry-id]** *number*

Synopsis	ID for a transit prefix policy entry
Context	<b>configure</b> <a href="#">application-assurance group number partition number transit-prefix-policy number entry number</a>
Tree	<a href="#">entry</a>
Range	1 to 4294967295
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **aa-sub** *reference*

Synopsis	Name of the transit prefix AA subscriber
Context	<b>configure</b> <a href="#">application-assurance group number partition number transit-prefix-policy number entry number aa-sub reference</a>
Tree	<a href="#">aa-sub</a>
Reference	<b>configure</b> <a href="#">application-assurance group number partition number transit-prefix-policy number static-aa-sub string</a>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## match

Synopsis	Enter the <b>match</b> context
Context	<b>configure</b> <a href="#">application-assurance group number partition number transit-prefix-policy number entry number match</a>
Tree	<a href="#">match</a>
Description	Commands in this context configure transit prefix policy entry match criteria.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## aa-sub-ip (*ipv4-prefix* | *ipv6-prefix*)

Synopsis	AA subscriber IP address prefix
Context	<b>configure</b> <a href="#">application-assurance group number partition number transit-prefix-policy number entry number match aa-sub-ip (<i>ipv4-prefix</i>   <i>ipv6-prefix</i>)</a>
Tree	<a href="#">aa-sub-ip</a>
Description	This command configures a transit prefix subscriber IP address prefix. It is used when the site is on the local side, the same side of the system as the parent SAP. The local aa-sub-ip addresses represent the source IP in the from-SAP direction and destination IP in the to-SAP direction.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## network-ip (*ipv4-prefix* | *ipv6-prefix*)

Synopsis	Network IP address prefix
Context	<b>configure</b> <a href="#">application-assurance group number partition number transit-prefix-policy number entry number match network-ip (<i>ipv4-prefix</i>   <i>ipv6-prefix</i>)</a>
Tree	<a href="#">network-ip</a>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## static-aa-sub [[transit-aa-sub-name](#)] *string*

Synopsis	Enter the <b>static-aa-sub</b> list instance
Context	<b>configure</b> <a href="#">application-assurance group number partition number transit-prefix-policy number static-aa-sub string</a>

Tree	<a href="#">static-aa-sub</a>
Max. Instances	4095
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **[transit-aa-sub-name]** *string*

Synopsis	Static transit subscriber name
Context	<b>configure</b> <a href="#">application-assurance group number partition number transit-prefix-policy number static-aa-sub string</a>
Tree	<a href="#">static-aa-sub</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **app-profile** *reference*

Synopsis	Application profile name
Context	<b>configure</b> <a href="#">application-assurance group number partition number transit-prefix-policy number static-aa-sub string app-profile reference</a>
Tree	<a href="#">app-profile</a>
Reference	<b>configure</b> <a href="#">application-assurance group number partition number policy app-profile string</a>
Notes	This element is mandatory.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **is-remote** *boolean*

#### **WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Set transit subscriber as remote
Context	<b>configure</b> <a href="#">application-assurance group number partition number transit-prefix-policy number static-aa-sub string is-remote boolean</a>

Tree	<a href="#">is-remote</a>
Notes	This element is mandatory.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## wap1x

Synopsis	Enter the <b>wap1x</b> context
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">wap1x</a>
Tree	<a href="#">wap1x</a>
Description	Commands in this context configure the Wireless Application Protocol (WAP) 1.X.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## admin-state *keyword*

Synopsis	Administrative state of WAP1x detection
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">wap1x</a> <b>admin-state</b> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## policer

Synopsis	Enter the <b>policer</b> context
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">policer</a>
Tree	<a href="#">policer</a>
Description	<p>Commands in this context create application assurance policer profiles of a specified type. Policers can be bandwidth or flow-limiting and can have a granularity of system scope (limits traffic entering AA ISA for all or a subset of AA subscribers) or a subscriber scope (limits apply to each AA subscriber traffic).</p> <p>The policer type and granularity can only be configured during creation. They cannot be modified. The policer profile must be removed from all AQPs to be removed. Changes to</p>

policer profile parameters take effect immediately for policers instantiated as a result of AQP actions using this profile.

Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **anl-bandwidth-policer** [*policer-name*] *string*

Synopsis	Enter the <b>anl-bandwidth-policer</b> list instance
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">policer anl-bandwidth-policer</a> <i>string</i>
Tree	<a href="#">anl-bandwidth-policer</a>
Description	Commands in this context configure the AA ANL policer.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **[policer-name]** *string*

Synopsis	Policer name
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">policer anl-bandwidth-policer</a> <i>string</i>
Tree	<a href="#">anl-bandwidth-policer</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **action** *keyword*

Synopsis	Action for packets violating configured policer rate
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">policer anl-bandwidth-policer</a> <i>string</i> <a href="#">action</a> <i>keyword</i>
Tree	<a href="#">action</a>
Description	<p>This command configures the action to be performed by single-bucket bandwidth policers for non-conformant traffic.</p> <p>Dual bucket bandwidth policers cannot have their action configured and always mark traffic below CIR as in-profile, between CIR and PIR as out-of-profile, and drop traffic above PIR. Flow policers always discard non-conformant traffic.</p> <p>When multiple application assurance policers are configured against a single flow (including policers at both subscriber and system), the flow/packet is dropped if one of</p>

the policers requires the packet to be discarded. This occurs regardless of the action of the other policers.

Options	permit-deny, priority-mark
Default	permit-deny
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## adaptation-rule

Synopsis	Enter the <b>adaptation-rule</b> context
Context	<b>configure</b> <a href="#">application-assurance group number policer anl-bandwidth-policer string adaptation-rule</a>
Tree	<a href="#">adaptation-rule</a>
Description	Commands in this context configure the AA policer adaptation rule fields and define the method used by the system to derive the operational CIR and PIR values when the queue is provisioned. For the CIR and PIR values individually, the system attempts to find the best operational rate depending on the defined option. To change the CIR adaptation rule only, the current PIR rule must be part of the command executed.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## pir keyword

Synopsis	Peak information rate value for the adaptation rule
Context	<b>configure</b> <a href="#">application-assurance group number policer anl-bandwidth-policer string adaptation-rule pir keyword</a>
Tree	<a href="#">pir</a>
Description	This command configures the adaptation rule to be used while computing the operational PIR value. The adaptation rule specifies the rules to compute the operational values while maintaining minimum offset.
Options	max, min, closest
Default	closest
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## description string

Synopsis	Text description
----------	------------------

Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">policer</a> <a href="#">anl-bandwidth-policer</a> <i>string</i> <a href="#">description</a> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**mbs** *number*

Synopsis	ANL bandwidth policer maximum burst size
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">policer</a> <a href="#">anl-bandwidth-policer</a> <i>string</i> <a href="#">mbs</a> <i>number</i>
Tree	<a href="#">mbs</a>
Description	This command configures the maximum burst size (MBS) for the policer. Nokia recommends configuring MBS larger than twice the MTU for the traffic handled by the policer to allow for some burstiness of the traffic. MBS is configurable for single-bucket, dual-bucket bandwidth, and flow setup rate policers only.
Range	0 to 131071
Units	kilobytes
Default	0
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**rate-percentage** *number*

Synopsis	Rate used by Access-Network-Location policers
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">policer</a> <a href="#">anl-bandwidth-policer</a> <i>string</i> <a href="#">rate-percentage</a> <i>number</i>
Tree	<a href="#">rate-percentage</a>
Description	This command configures the stage 1 congestion percentage used by Access-Network-Location (ANL) policers. Because ANL total bandwidth is dynamically measured and estimated by AA, this command allows the operator to configure the ratio of that measured bandwidth to be used by the ANL policer as the policer rate.  No limiting is performed if not specified.
Range	0 to 200
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**rate-percentage-stage-2** *number*

Synopsis	Rate used by Access-Network-Location policers
Context	<b>configure</b> <a href="#">application-assurance group</a> <i>number</i> <a href="#">policer anl-bandwidth-policer</a> <i>string</i> <a href="#">rate-percentage-stage-2</a> <i>number</i>
Tree	<a href="#">rate-percentage-stage-2</a>
Description	This command configures the stage 2 congestion percentage rate used by Access-Network-Location (ANL) policers. Because ANL stage2 total bandwidth is dynamically measured and estimated by AA, this command allows the operator to configure the ratio of that measured bandwidth to be used by the ANL stage2 policer as the policer rate.  When unconfigured, limiting is not performed.
Range	0 to 200
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**dual-bucket-bandwidth-policer** [[policer-name](#)] *string*

Synopsis	Enter the <b>dual-bucket-bandwidth-policer</b> list instance
Context	<b>configure</b> <a href="#">application-assurance group</a> <i>number</i> <a href="#">policer dual-bucket-bandwidth-policer</a> <i>string</i>
Tree	<a href="#">dual-bucket-bandwidth-policer</a>
Description	Commands in this context configure the dual-bucket bandwidth policer.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**[policer-name]** *string*

Synopsis	Policer name
Context	<b>configure</b> <a href="#">application-assurance group</a> <i>number</i> <a href="#">policer dual-bucket-bandwidth-policer</a> <i>string</i>
Tree	<a href="#">dual-bucket-bandwidth-policer</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## adaptation-rule

Synopsis	Enter the <b>adaptation-rule</b> context
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">policer dual-bucket-bandwidth-policer string</a> <a href="#">adaptation-rule</a>
Tree	<a href="#">adaptation-rule</a>
Description	Commands in this context configure the AA policer adaptation rule fields and define the method used by the system to derive the operational CIR and PIR values when the queue is provisioned. For the CIR and PIR values individually, the system attempts to find the best operational rate depending on the defined option. To change the CIR adaptation rule only, the current PIR rule must be part of the command executed.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### cir keyword

Synopsis	Committed information rate value for adaptation rule
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">policer dual-bucket-bandwidth-policer string</a> <a href="#">adaptation-rule</a> <a href="#">cir</a> <a href="#">keyword</a>
Tree	<a href="#">cir</a>
Description	This command configures the CIR for the dual-bucket-bandwidth-policer adaptation rule policer. Nokia recommends configuring CIR larger than twice the maximum MTU for the traffic handled by the policer to allow for some burstiness of the traffic. The CIR is configurable for dual-bucket bandwidth policers only.
Options	max, min, closest
Default	closest
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### pir keyword

Synopsis	Peak information rate value for the adaptation rule
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">policer dual-bucket-bandwidth-policer string</a> <a href="#">adaptation-rule</a> <a href="#">pir</a> <a href="#">keyword</a>
Tree	<a href="#">pir</a>
Description	This command configures the adaptation rule to be used while computing the operational PIR value. The adaptation rule specifies the rules to compute the operational values while maintaining minimum offset.
Options	max, min, closest

Default	closest
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**cbs number**

Synopsis	Committed burst size when in congested state
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">policer dual-bucket-bandwidth-policer</a> <i>string</i> <a href="#">cbs number</a>
Tree	<a href="#">cbs</a>
Description	This command configures the committed burst size (CBS) for a policer. Nokia recommends that CBS is configured larger than twice the maximum MTU for the traffic handled by the policer to allow for some burstiness of the traffic. CBS is configurable for dual-bucket bandwidth policers only.
Range	0 to 131071
Units	kilobytes
Default	0
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**cir (number | keyword)**

Synopsis	Committed information rate value for the policer
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">policer dual-bucket-bandwidth-policer</a> <i>string</i> <a href="#">cir (number   keyword)</a>
Tree	<a href="#">cir</a>
Description	This command configures the CIR for the dual-bucket-bandwidth-policer policer. Nokia recommends that the CIR is configured larger than twice the maximum MTU for the traffic handled by the policer to allow for some burstiness of the traffic. The CIR is configurable for dual-bucket bandwidth policers only.
Range	0 to 100000000
Units	kilobps
Options	max
Default	0
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## congestion-override

Synopsis	Enter the <b>congestion-override</b> context
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">policer dual-bucket-bandwidth-policer string</a> <b>congestion-override</b>
Tree	<a href="#">congestion-override</a>
Description	Commands in this context configure the congestion bandwidth policer override rates.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## cbs number

Synopsis	Committed burst size in a congested stage 2 state
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">policer dual-bucket-bandwidth-policer string</a> <a href="#">congestion-override cbs</a> <b>number</b>
Tree	<a href="#">cbs</a>
Description	This command configures the committed burst size for a policer. The configured CBS should be larger than twice the maximum MTU for the traffic handled by the policer to allow for some burstiness of the traffic. CBS is configurable for dual-bucket bandwidth policers only.
Range	0 to 131071
Units	kilobytes
Default	0
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## cir (number | keyword)

Synopsis	Committed information rate value for policer override
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">policer dual-bucket-bandwidth-policer string</a> <a href="#">congestion-override cir</a> ( <i>number   keyword</i> )
Tree	<a href="#">cir</a>
Description	This command configures the CIR for the dual-bucket bandwidth policer congestion override. Nokia recommends that the CIR is configured larger than twice the maximum MTU for the traffic handled by the policer to allow for some burstiness of the traffic. The CIR is configurable for dual-bucket bandwidth policers only.
Range	0 to 100000000

Units	kilobps
Options	max
Default	0
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **mbs** *number*

Synopsis	Maximum burst size when in a congested state
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">policer dual-bucket-bandwidth-policer string congestion-override</a> <b>mbs</b> <i>number</i>
Tree	<a href="#">mbs</a>
Description	This command configures the maximum burst size (MBS) for the policer. Nokia recommends configuring MBS larger than twice the MTU for the traffic handled by the policer to allow for some burstiness of the traffic. MBS is configurable for single-bucket, dual-bucket bandwidth, and flow setup rate policers only.
Range	0 to 131071
Units	kilobytes
Default	0
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **pir** (*number* | *keyword*)

Synopsis	Peak information rate value for the congestion override
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">policer dual-bucket-bandwidth-policer string congestion-override</a> <b>pir</b> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">pir</a>
Range	1 to 100000000
Units	kilobps
Options	max
Default	max
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## congestion-override-stage-2

Synopsis	Enter the <b>congestion-override-stage-2</b> context
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">policer dual-bucket-bandwidth-policer string congestion-override-stage-2</a>
Tree	<a href="#">congestion-override-stage-2</a>
Description	This command enables the context to configure per-subscriber stage 2 congestion bandwidth policer override rates.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## cbs number

Synopsis	Committed burst size in a congested stage 2 state
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">policer dual-bucket-bandwidth-policer string congestion-override-stage-2 cbs number</a>
Tree	<a href="#">cbs</a>
Description	This command configures the committed burst size for a policer. The configured CBS should be larger than twice the maximum MTU for the traffic handled by the policer to allow for some burstiness of the traffic. CBS is configurable for dual-bucket bandwidth policers only.
Range	0 to 131071
Units	kilobytes
Default	0
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## cir (number | keyword)

Synopsis	Committed information rate value for policer override
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">policer dual-bucket-bandwidth-policer string congestion-override-stage-2 cir (number   keyword)</a>
Tree	<a href="#">cir</a>
Description	This command configures the CIR for the dual-bucket bandwidth policer congestion override. Nokia recommends that the CIR is configured larger than twice the maximum MTU for the traffic handled by the policer to allow for some burstiness of the traffic. The CIR is configurable for dual-bucket bandwidth policers only.
Range	0 to 100000000

Units	kilobps
Options	max
Default	0
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **mbs** *number*

Synopsis	Maximum burst size when in a congested state
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">policer dual-bucket-bandwidth-policer string congestion-override-stage-2</a> <b>mbs</b> <i>number</i>
Tree	<a href="#">mbs</a>
Description	This command configures the maximum burst size (MBS) for the policer. Nokia recommends configuring MBS larger than twice the MTU for the traffic handled by the policer to allow for some burstiness of the traffic. MBS is configurable for single-bucket, dual-bucket bandwidth, and flow setup rate policers only.
Range	0 to 131071
Units	kilobytes
Default	0
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **pir** (*number* | *keyword*)

Synopsis	Peak information rate value for the congestion override
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">policer dual-bucket-bandwidth-policer string congestion-override-stage-2</a> <b>pir</b> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">pir</a>
Range	1 to 100000000
Units	kilobps
Options	max
Default	max
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**description string**

Synopsis	Text description
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">policer dual-bucket-bandwidth-policer string</a> <a href="#">description string</a>

**mbs number**

Synopsis	Bandwidth policer maximum burst size
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">policer dual-bucket-bandwidth-policer string</a> <a href="#">mbs number</a>
Tree	<a href="#">mbs</a>
Description	This command configures the maximum burst size (MBS) for the policer. Nokia recommends configuring MBS larger than twice the MTU for the traffic handled by the policer to allow for some burstiness of the traffic. MBS is configurable for single-bucket, dual-bucket bandwidth, and flow setup rate policers only.
Range	0 to 131071
Units	kilobytes
Default	0
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**pir (number | keyword)**

Synopsis	Peak information rate value for the bandwidth policer
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">policer dual-bucket-bandwidth-policer string</a> <a href="#">pir (number   keyword)</a>
Tree	<a href="#">pir</a>
Range	1 to 100000000
Units	kilobps
Options	max
Default	max
Introduced	21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **time-of-day-override** [*tod-override-id*] *number*

Synopsis Enter the **time-of-day-override** list instance

Context **configure** *application-assurance group number policer dual-bucket-bandwidth-policer string time-of-day-override number*

Tree [time-of-day-override](#)

Description Commands in this context configure the time of day override policy for a given policer. Rate/mbs/cbs/flow-rate/flow-count configured in each override-id will override the default policer values at the specified time of day configured in the override.

Max. Instances 8

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **[tod-override-id]** *number*

Units	kilobps
Options	max
Default	max
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## time-range

Synopsis	Enter the <b>time-range</b> context
Context	<b>configure</b> <a href="#">application-assurance group number policer dual-bucket-bandwidth-policer string time-of-day-override number time-range</a>
Tree	<a href="#">time-range</a>
Description	Commands in this context configure the days of the week policer override is enabled as well as the time policer override starts and ends. When using a daily override the operator can select which days during the week from Sunday to Saturday it is applicable along with the start/end hour/min time range repeated over these days. When using a weekly override the operator can select between which days in the week the policy start up to the hours/min for both start day and end day.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## daily

Synopsis	Enable the <b>daily</b> context
Context	<b>configure</b> <a href="#">application-assurance group number policer dual-bucket-bandwidth-policer string time-of-day-override number time-range daily</a>
Tree	<a href="#">daily</a>
Description	Commands in this context configure the daily start and end times for policer override.
Notes	The following elements are part of a choice: <b>daily</b> or <b>weekly</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## all-days

Synopsis	Enable policer override on every day
Context	<b>configure</b> <a href="#">application-assurance group number policer dual-bucket-bandwidth-policer string time-of-day-override number time-range daily all-days</a>
Tree	<a href="#">all-days</a>
Notes	The following elements are part of a choice: <b>all-days</b> or <b>on</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**end string**

Synopsis	Daily end time
Context	<b>configure</b> <a href="#">application-assurance group</a> <a href="#">number</a> <a href="#">policer</a> <a href="#">dual-bucket-bandwidth-policer</a> <a href="#">string</a> <a href="#">time-of-day-override</a> <a href="#">number</a> <a href="#">time-range</a> <a href="#">daily</a> <a href="#">end</a> <a href="#">string</a>
Tree	<a href="#">end</a>
Description	This command configures the daily end time of the policer override. The time format must be [hh:mm]. The hh value is 00 to 24. The mm value is 00, 15, 30, or 45. If hh is 24, mm must be 00.
String Length	3 to 5
Notes	This element is mandatory.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**on keyword**

Synopsis	Policer override on selected days
Context	<b>configure</b> <a href="#">application-assurance group</a> <a href="#">number</a> <a href="#">policer</a> <a href="#">dual-bucket-bandwidth-policer</a> <a href="#">string</a> <a href="#">time-of-day-override</a> <a href="#">number</a> <a href="#">time-range</a> <a href="#">daily</a> <a href="#">on</a> <a href="#">keyword</a>
Tree	<a href="#">on</a>
Options	sunday, monday, tuesday, wednesday, thursday, friday, saturday
Max. Instances	6
Notes	The following elements are part of a choice: <b>all-days</b> or <b>on</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**start string**

Synopsis	Daily start time
Context	<b>configure</b> <a href="#">application-assurance group</a> <a href="#">number</a> <a href="#">policer</a> <a href="#">dual-bucket-bandwidth-policer</a> <a href="#">string</a> <a href="#">time-of-day-override</a> <a href="#">number</a> <a href="#">time-range</a> <a href="#">daily</a> <a href="#">start</a> <a href="#">string</a>
Tree	<a href="#">start</a>
Description	This command configures the daily start time of the policer override. The time format must be [hh:mm]. The hh value is 00 to 24. The mm value is 00, 15, 30, or 45. If hh is 24, mm must be 00.
String Length	3 to 5

Notes	This element is mandatory.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## weekly

Synopsis	Enable the <b>weekly</b> context
Context	<b>configure</b> <a href="#">application-assurance group number policer dual-bucket-bandwidth-policer string time-of-day-override number time-range weekly</a>
Tree	<a href="#">weekly</a>
Description	Commands in this context configure the weekly start and end times for policer override.
Notes	The following elements are part of a choice: <b>daily</b> or <b>weekly</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## end

Synopsis	Enable the <b>end</b> context
Context	<b>configure</b> <a href="#">application-assurance group number policer dual-bucket-bandwidth-policer string time-of-day-override number time-range weekly end</a>
Tree	<a href="#">end</a>
Description	Commands in this context configure the weekly end time for policer override. When using a weekly override, the operator can select between which days in the week the policy ends up to the hours or minutes for both start of the day and end of the day.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## day keyword

Synopsis	Weekly end day
Context	<b>configure</b> <a href="#">application-assurance group number policer dual-bucket-bandwidth-policer string time-of-day-override number time-range weekly end day keyword</a>
Tree	<a href="#">day</a>
Options	sunday, monday, tuesday, wednesday, thursday, friday, saturday
Notes	This element is mandatory.
Introduced	21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **time string**

Synopsis Weekly end time

**action** *keyword*

Synopsis	Action for packets violating configured policer rate
Context	<b>configure</b> <a href="#">application-assurance group</a> <i>number</i> <a href="#">policer flow-count-limit-policer</a> <i>string</i> <a href="#">action</a> <i>keyword</i>
Tree	<a href="#">action</a>
Description	This command configures the action to be performed by single-bucket bandwidth policers for non-conformant traffic.  Dual bucket bandwidth policers cannot have their action configured and always mark traffic below CIR as in-profile, between CIR and PIR as out-of-profile, and drop traffic above PIR. Flow policers always discard non-conformant traffic.  When multiple application assurance policers are configured against a single flow (including policers at both subscriber and system), the flow/packet is dropped if one of the policers requires the packet to be discarded. This occurs regardless of the action of the other policers.
Options	permit-deny, priority-mark
Default	permit-deny
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**description** *string*

### **time-range**

Synopsis	Enter the <b>time-range</b> context
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">policer</a> <a href="#">flow-count-limit-policer</a> <i>string</i> <a href="#">time-of-day-override</a> <i>number</i> <a href="#">time-range</a>
Tree	<a href="#">time-range</a>
Description	Commands in this context configure the days of the week policer override is enabled as well as the time policer override starts and ends. When using a daily override the operator can select which days during the week from Sunday to Saturday it is applicable along with the start/end hour/min time range repeated over these days. When using a weekly override the operator can select between which days in the week the policy start up to the hours/min for both start day and end day.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**daily**

Synopsis	Enable the <b>daily</b> context
Context	<b>configure</b> <a href="#">application-assurance group number policer flow-count-limit-policer string time-of-day-override number time-range daily</a>
Tree	<a href="#">daily</a>
Description	Commands in this context configure the daily start and end times for policer override.
Notes	The following elements are part of a choice: <b>daily</b> or <b>weekly</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**all-days**

Synopsis	Enable policer override on every day
Context	<b>configure</b> <a href="#">application-assurance group number policer flow-count-limit-policer string time-of-day-override number time-range daily all-days</a>
Tree	<a href="#">all-days</a>
Notes	The following elements are part of a choice: <b>all-days</b> or <b>on</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**end string**

Synopsis	Daily end time
Context	<b>configure</b> <a href="#">application-assurance group number policer flow-count-limit-policer string time-of-day-override number time-range daily end string</a>
Tree	<a href="#">end</a>
Description	This command configures the daily end time of the policer override.  The time format must be [hh:mm]. The hh value is 00 to 24. The mm value is 00, 15, 30, or 45. If hh is 24, mm must be 00.
String Length	3 to 5
Notes	This element is mandatory.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**on keyword**

Synopsis	Policer override on selected days
Context	<b>configure</b> <a href="#">application-assurance group</a> <i>number</i> <a href="#">policer flow-count-limit-policer</a> <i>string</i> <a href="#">time-of-day-override</a> <i>number</i> <a href="#">time-range</a> <a href="#">daily</a> <a href="#">on</a> <i>keyword</i>
Tree	<a href="#">on</a>
Options	sunday, monday, tuesday, wednesday, thursday, friday, saturday
Max. Instances	6
Notes	The following elements are part of a choice: <b>all-days</b> or <b>on</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**start string**

Synopsis	Daily start time
Context	<b>configure</b> <a href="#">application-assurance group</a> <i>number</i> <a href="#">policer flow-count-limit-policer</a> <i>string</i> <a href="#">time-of-day-override</a> <i>number</i> <a href="#">time-range</a> <a href="#">daily</a> <a href="#">start</a> <i>string</i>
Tree	<a href="#">start</a>
Description	This command configures the daily start time of the policer override. The time format must be [hh:mm]. The hh value is 00 to 24. The mm value is 00, 15, 30, or 45. If hh is 24, mm must be 00.
String Length	3 to 5
Notes	This element is mandatory.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**weekly**

Synopsis	Enable the <b>weekly</b> context
Context	<b>configure</b> <a href="#">application-assurance group</a> <i>number</i> <a href="#">policer flow-count-limit-policer</a> <i>string</i> <a href="#">time-of-day-override</a> <i>number</i> <a href="#">time-range</a> <a href="#">weekly</a>
Tree	<a href="#">weekly</a>
Description	Commands in this context configure the weekly start and end times for policer override.
Notes	The following elements are part of a choice: <b>daily</b> or <b>weekly</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**end**

Synopsis	Enable the <b>end</b> context
Context	<b>configure</b> <a href="#">application-assurance group</a> <i>number</i> <a href="#">policer flow-count-limit-policer</a> <i>string</i> <a href="#">time-of-day-override</a> <i>number</i> <a href="#">time-range</a> <a href="#">weekly end</a>
Tree	<a href="#">end</a>
Description	Commands in this context configure the weekly end time for policer override. When using a weekly override, the operator can select between which days in the week the policy ends up to the hours or minutes for both start of the day and end of the day.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**day keyword**

Synopsis	Weekly end day
Context	<b>configure</b> <a href="#">application-assurance group</a> <i>number</i> <a href="#">policer flow-count-limit-policer</a> <i>string</i> <a href="#">time-of-day-override</a> <i>number</i> <a href="#">time-range</a> <a href="#">weekly end</a> <i>day keyword</i>
Tree	<a href="#">day</a>
Options	sunday, monday, tuesday, wednesday, thursday, friday, saturday
Notes	This element is mandatory.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**time string**

Synopsis	Weekly end time
Context	<b>configure</b> <a href="#">application-assurance group</a> <i>number</i> <a href="#">policer flow-count-limit-policer</a> <i>string</i> <a href="#">time-of-day-override</a> <i>number</i> <a href="#">time-range</a> <a href="#">weekly end</a> <i>time string</i>
Tree	<a href="#">time</a>
Description	This command configures the weekly end time of the policer override.  The time format must be [hh:mm]. The hh value is 00 to 24. The mm value is 00, 15, 30, or 45. If hh is 24, mm must be 00.
String Length	3 to 5
Notes	This element is mandatory.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**start**

Synopsis	Enable the <b>start</b> context
Context	<b>configure</b> <a href="#">application-assurance group</a> <i>number</i> <a href="#">policer flow-count-limit-policer</a> <i>string</i> <a href="#">time-of-day-override</a> <i>number</i> <a href="#">time-range</a> <a href="#">weekly start</a>
Tree	<a href="#">start</a>
Description	Commands in this context configure the weekly start time for policer override.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**day** *keyword*

Synopsis	Weekly start day
Context	<b>configure</b> <a href="#">application-assurance group</a> <i>number</i> <a href="#">policer flow-count-limit-policer</a> <i>string</i> <a href="#">time-of-day-override</a> <i>number</i> <a href="#">time-range</a> <a href="#">weekly start</a> <i>day keyword</i>
Tree	<a href="#">day</a>
Options	sunday, monday, tuesday, wednesday, thursday, friday, saturday
Notes	This element is mandatory.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**time** *string*

Synopsis	Weekly start time
Context	<b>configure</b> <a href="#">application-assurance group</a> <i>number</i> <a href="#">policer flow-count-limit-policer</a> <i>string</i> <a href="#">time-of-day-override</a> <i>number</i> <a href="#">time-range</a> <a href="#">weekly start</a> <i>time string</i>
Tree	<a href="#">time</a>
Description	This command configures the weekly start time of the policer override. The time format must be [hh:mm]. The hh value is 00 to 24. The mm value is 00, 15, 30, or 45. If hh is 24, mm must be 00.
String Length	3 to 5
Notes	This element is mandatory.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**flow-setup-rate-policer** [*policer-name*] *string*

Synopsis	Enter the <b>flow-setup-rate-policer</b> list instance
Context	<b>configure</b> <a href="#">application-assurance group number policer flow-setup-rate-policer</a> <i>string</i>
Tree	<a href="#">flow-setup-rate-policer</a>
Description	Commands in this context configure the flow setup rate policer.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**[policer-name]** *string*

Synopsis	Policer name
Context	<b>configure</b> <a href="#">application-assurance group number policer flow-setup-rate-policer</a> <i>string</i>
Tree	<a href="#">flow-setup-rate-policer</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**action** *keyword*

Synopsis	Action for packets violating configured policer rate
Context	<b>configure</b> <a href="#">application-assurance group number policer flow-setup-rate-policer</a> <i>string</i> <a href="#">action</a> <i>keyword</i>
Tree	<a href="#">action</a>
Description	This command configures the action to be performed by single-bucket bandwidth policers for non-conformant traffic.  Dual bucket bandwidth policers cannot have their action configured and always mark traffic below CIR as in-profile, between CIR and PIR as out-of-profile, and drop traffic above PIR. Flow policers always discard non-conformant traffic.  When multiple application assurance policers are configured against a single flow (including policers at both subscriber and system), the flow/packet is dropped if one of the policers requires the packet to be discarded. This occurs regardless of the action of the other policers.
Options	permit-deny, priority-mark
Default	permit-deny
Introduced	21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## adaptation-rule

Synopsis Enter the **adaptation-rule** context

Context **configure** [application-assurance group number policer flow-setup-rate-policer string adaptation-rule](#)

Tree [adaptation-rule](#)

Description Commands in this context configure the AA policer adaptation rule fields and define the method used by the system to derive the operational CIR and PIR values when the queue is provisioned. For the CIR and PIR values individually, the system attempts to find the best operational rate depending on the defined option. To change the CIR adaptation rule only, the current PIR rule must be part of the command executed.

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## peak-flow-setup-rate *keyword*

Synopsis Peak flow setup rate adaptation rule

Context **configure** [application-assurance group number policer flow-setup-rate-policer string adaptation-rule peak-flow-setup-rate keyword](#)

Tree [peak-flow-setup-rate](#)

Options max, min, closest

Default closest

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## description *string*

Synopsis Text description

**action keyword**

Synopsis	Action for packets violating configured policer rate
Context	<b>configure</b> <a href="#">application-assurance group number policer single-bucket-bandwidth-policer string</a> <b>action keyword</b>
Tree	<a href="#">action</a>
Description	<p>This command configures the action to be performed by single-bucket bandwidth policers for non-conformant traffic.</p> <p>Dual bucket bandwidth policers cannot have their action configured and always mark traffic below CIR as in-profile, between CIR and PIR as out-of-profile, and drop traffic above PIR. Flow policers always discard non-conformant traffic.</p> <p>When multiple application assurance policers are configured against a single flow (including policers at both subscriber and system), the flow/packet is dropped if one of the policers requires the packet to be discarded. This occurs regardless of the action of the other policers.</p>
Options	permit-deny, priority-mark
Default	permit-deny
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**adaptation-rule**

Synopsis	Enter the <b>adaptation-rule</b> context
Context	<b>configure</b> <a href="#">application-assurance group number policer single-bucket-bandwidth-policer string</a> <b>adaptation-rule</b>
Tree	<a href="#">adaptation-rule</a>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**pir keyword**

Synopsis	Peak information rate value for the adaptation rule
Context	<b>configure</b> <a href="#">application-assurance group number policer single-bucket-bandwidth-policer string adaptation-rule</a> <b>pir keyword</b>
Tree	<a href="#">pir</a>
Description	This command configures the adaptation rule to be used while computing the operational PIR value. The adaptation rule specifies the rules to compute the operational values while maintaining minimum offset.
Options	max, min, closest

Default	closest
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## congestion-override

Synopsis	Enter the <b>congestion-override</b> context
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">policer single-bucket-bandwidth-policer string</a> <b>congestion-override</b>
Tree	<a href="#">congestion-override</a>
Description	Commands in this context configure the congestion bandwidth policer override rates.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## mbs number

Synopsis	Maximum burst size when in a congested state
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">policer single-bucket-bandwidth-policer string</a> <b>congestion-override mbs number</b>
Tree	<a href="#">mbs</a>
Description	This command configures the maximum burst size (MBS) for the policer. Nokia recommends configuring MBS larger than twice the MTU for the traffic handled by the policer to allow for some burstiness of the traffic. MBS is configurable for single-bucket, dual-bucket bandwidth, and flow setup rate policers only.
Range	0 to 131071
Units	kilobytes
Default	0
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## pir (number | keyword)

Synopsis	Peak information rate value for the congestion override
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">policer single-bucket-bandwidth-policer string</a> <b>congestion-override pir (number   keyword)</b>
Tree	<a href="#">pir</a>
Range	1 to 100000000

Units	kilobps
Options	max
Default	max
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## congestion-override-stage-2

Synopsis	Enter the <b>congestion-override-stage-2</b> context
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">policer single-bucket-bandwidth-policer string</a> <b>congestion-override-stage-2</b>
Tree	<a href="#">congestion-override-stage-2</a>
Description	Commands in this context configure per-subscriber stage 2 congestion bandwidth policer override rates.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## mbs *number*

Synopsis	Maximum burst size when in a congested state
Context	<b>configure</b> <a href="#">application-assurance group number</a> <a href="#">policer single-bucket-bandwidth-policer string</a> <b>congestion-override-stage-2</b> <b>mbs</b> <i>number</i>
Tree	<a href="#">mbs</a>
Description	This command configures the maximum burst size (MBS) for the policer. Nokia recommends configuring MBS larger than twice the MTU for the traffic handled by the policer to allow for some burstiness of the traffic. MBS is configurable for single-bucket, dual-bucket bandwidth, and flow setup rate policers only.
Range	0 to 131071
Units	kilobytes
Default	0
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## pir (*number* | *keyword*)

Synopsis	Peak information rate value for the congestion override
----------	---

Context	<b>configure</b> <a href="#">application-assurance group number policer single-bucket-bandwidth-policer string congestion-override-stage-2 pir</a> ( <i>number   keyword</i> )
Tree	<a href="#">pir</a>
Range	1 to 100000000
Units	kilobps
Options	max
Default	max
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">application-assurance group number policer single-bucket-bandwidth-policer string description string</a>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **granularity** *keyword*

#### **WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Policer granularity
Context	<b>configure</b> <a href="#">application-assurance group number policer single-bucket-bandwidth-policer string granularity keyword</a>
Tree	<a href="#">granularity</a>
Options	system, subscriber
Notes	This element is mandatory.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**mbs** *number*

Synopsis	Bandwidth policer maximum burst size
Context	<b>configure</b> <a href="#">application-assurance group</a> <i>number</i> <a href="#">policer single-bucket-bandwidth-policer</a> <i>string</i> <b>mbs</b> <i>number</i>
Tree	<a href="#">mbs</a>
Description	This command configures the maximum burst size (MBS) for the policer. Nokia recommends configuring MBS larger than twice the MTU for the traffic handled by the policer to allow for some burstiness of the traffic. MBS is configurable for single-bucket, dual-bucket bandwidth, and flow setup rate policers only.
Range	0 to 131071
Units	kilobytes
Default	0
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**pir** (*number* | *keyword*)

Synopsis	Peak information rate value for the bandwidth policer
Context	<b>configure</b> <a href="#">application-assurance group</a> <i>number</i> <a href="#">policer single-bucket-bandwidth-policer</a> <i>string</i> <b>pir</b> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">pir</a>
Range	1 to 100000000
Units	kilobps
Options	max

String Length	1 to 80
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**mbs** *number*

Synopsis	Bandwidth policer MBS for time of day override
Context	<b>configure</b> <a href="#">application-assurance group</a> <i>number</i> <a href="#">policer</a> <a href="#">single-bucket-bandwidth-policer</a> <i>string</i> <a href="#">time-of-day-override</a> <i>number</i> <b>mbs</b> <i>number</i>
Tree	<a href="#">mbs</a>
Description	This command configures the maximum burst size (MBS) for the policer. Nokia recommends configuring MBS larger than twice the MTU for the traffic handled by the policer to allow for some burstiness of the traffic. MBS is configurable for single-bucket, dual-bucket bandwidth, and flow setup rate policers only.
Range	0 to 131071
Units	kilobytes
Default	0
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**pir** (*number* | *keyword*)

Synopsis	Peak information rate value for time of day override
Context	<b>configure</b> <a href="#">application-assurance group</a> <i>number</i> <a href="#">policer</a> <a href="#">single-bucket-bandwidth-policer</a> <i>string</i> <a href="#">time-of-day-override</a> <i>number</i> <b>pir</b> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">pir</a>
Range	1 to 100000000
Units	kilobps
Options	max
Default	max
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**time-range**

Synopsis	Enter the <b>time-range</b> context
Context	<b>configure</b> <a href="#">application-assurance group</a> <i>number</i> <a href="#">policer</a> <a href="#">single-bucket-bandwidth-policer</a> <i>string</i> <a href="#">time-of-day-override</a> <i>number</i> <b>time-range</b>
Tree	<a href="#">time-range</a>
Description	Commands in this context configure the days of the week policer override is enabled as well as the time policer override starts and ends. When using a daily override the

operator can select which days during the week from Sunday to Saturday it is applicable along with the start/end hour/min time range repeated over these days. When using a weekly override the operator can select between which days in the week the policy start up to the hours/min for both start day and end day.

Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## daily

Synopsis	Enable the <b>daily</b> context
Context	<b>configure</b> <a href="#">application-assurance group number policer single-bucket-bandwidth-policer string time-of-day-override number time-range daily</a>
Tree	<a href="#">daily</a>
Description	Commands in this context configure the daily start and end times for policer override.
Notes	The following elements are part of a choice: <b>daily</b> or <b>weekly</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## all-days

Synopsis	Enable policer override on every day
Context	<b>configure</b> <a href="#">application-assurance group number policer single-bucket-bandwidth-policer string time-of-day-override number time-range daily all-days</a>
Tree	<a href="#">all-days</a>
Notes	The following elements are part of a choice: <b>all-days</b> or <b>on</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## end string

Synopsis	Daily end time
Context	<b>configure</b> <a href="#">application-assurance group number policer single-bucket-bandwidth-policer string time-of-day-override number time-range daily end string</a>
Tree	<a href="#">end</a>
Description	This command configures the daily end time of the policer override. The time format must be [hh:mm]. The hh value is 00 to 24. The mm value is 00, 15, 30, or 45. If hh is 24, mm must be 00.

String Length	3 to 5
Notes	This element is mandatory.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **on** *keyword*

Synopsis	Policer override on selected days
Context	<b>configure</b> <a href="#">application-assurance group</a> <i>number</i> <a href="#">policer</a> <a href="#">single-bucket-bandwidth-policer</a> <a href="#">string</a> <a href="#">time-of-day-override</a> <i>number</i> <a href="#">time-range</a> <a href="#">daily</a> <a href="#">on</a> <i>keyword</i>
Tree	<a href="#">on</a>
Options	sunday, monday, tuesday, wednesday, thursday, friday, saturday
Max. Instances	6
Notes	The following elements are part of a choice: <b>all-days</b> or <b>on</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **start** *string*

Synopsis	Daily start time
Context	<b>configure</b> <a href="#">application-assurance group</a> <i>number</i> <a href="#">policer</a> <a href="#">single-bucket-bandwidth-policer</a> <a href="#">string</a> <a href="#">time-of-day-override</a> <i>number</i> <a href="#">time-range</a> <a href="#">daily</a> <a href="#">start</a> <i>string</i>
Tree	<a href="#">start</a>
Description	This command configures the daily start time of the policer override. The time format must be [hh:mm]. The hh value is 00 to 24. The mm value is 00, 15, 30, or 45. If hh is 24, mm must be 00.
String Length	3 to 5
Notes	This element is mandatory.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **weekly**

Synopsis	Enable the <b>weekly</b> context
----------	----------------------------------

Context	<b>configure</b> <a href="#">application-assurance group number policer single-bucket-bandwidth-policer string time-of-day-override number time-range weekly</a>
Tree	<a href="#">weekly</a>
Description	Commands in this context configure the weekly start and end times for policer override.
Notes	The following elements are part of a choice: <b>daily</b> or <b>weekly</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## end

Synopsis	Enable the <b>end</b> context
Context	<b>configure</b> <a href="#">application-assurance group number policer single-bucket-bandwidth-policer string time-of-day-override number time-range weekly end</a>
Tree	<a href="#">end</a>
Description	Commands in this context configure the weekly end time for policer override. When using a weekly override, the operator can select between which days in the week the policy ends up to the hours or minutes for both start of the day and end of the day.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## day keyword

Synopsis	Weekly end day
Context	<b>configure</b> <a href="#">application-assurance group number policer single-bucket-bandwidth-policer string time-of-day-override number time-range weekly end day keyword</a>
Tree	<a href="#">day</a>
Options	sunday, monday, tuesday, wednesday, thursday, friday, saturday
Notes	This element is mandatory.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## time string

Synopsis	Weekly end time
Context	<b>configure</b> <a href="#">application-assurance group number policer single-bucket-bandwidth-policer string time-of-day-override number time-range weekly end time string</a>

Tree	<a href="#">time</a>
Description	This command configures the weekly end time of the policer override. The time format must be [hh:mm]. The hh value is 00 to 24. The mm value is 00, 15, 30, or 45. If hh is 24, mm must be 00.
String Length	3 to 5
Notes	This element is mandatory.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### start

Synopsis	Enable the <b>start</b> context
Context	<b>configure</b> <a href="#">application-assurance group number policer single-bucket-bandwidth-policer string time-of-day-override number time-range weekly start</a>
Tree	<a href="#">start</a>
Description	Commands in this context configure the weekly start time for policer override.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### day keyword

Synopsis	Weekly start day
Context	<b>configure</b> <a href="#">application-assurance group number policer single-bucket-bandwidth-policer string time-of-day-override number time-range weekly start day keyword</a>
Tree	<a href="#">day</a>
Options	sunday, monday, tuesday, wednesday, thursday, friday, saturday
Notes	This element is mandatory.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### time string

Synopsis	Weekly start time
Context	<b>configure</b> <a href="#">application-assurance group number policer single-bucket-bandwidth-policer string time-of-day-override number time-range weekly start time string</a>
Tree	<a href="#">time</a>

Description	This command configures the weekly start time of the policer override. The time format must be [hh:mm]. The hh value is 00 to 24. The mm value is 00, 15, 30, or 45. If hh is 24, mm must be 00.
String Length	3 to 5
Notes	This element is mandatory.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **tcp-optimizer** [**tcp-optimizer-name**] *string*

Synopsis	Enter the <b>tcp-optimizer</b> list instance
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <b>tcp-optimizer</b> <i>string</i>
Tree	<a href="#">tcp-optimizer</a>
Description	Commands in this context configure the TCP optimizer policy. When a TCP optimizer policy is removed or deleted, the existing flows using this policy are abandoned, and optimization is stopped.
Introduced	22.2.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **[tcp-optimizer-name]** *string*

Synopsis	TCP optimizer name
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <b>tcp-optimizer</b> <i>string</i>
Tree	<a href="#">tcp-optimizer</a>
Description	This command configures the name of the TCP optimizer policy.
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	22.2.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **dack-timeout** *number*

Synopsis	Delayed acknowledgment timeout for client and server
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <b>tcp-optimizer</b> <i>string</i> <b>dack-timeout</b> <i>number</i>
Tree	<a href="#">dack-timeout</a>

Description	This command configures a delay ACK (DACK) timeout for the TCP optimizer. By entering this command a default of 200 ms timeout is enabled for delayed acknowledgment. This value is not configurable.
Range	200
Units	milliseconds
Introduced	22.2.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">application-assurance group number tcp-optimizer string description string</a>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	22.2.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **initial-cwnd** *number*

Synopsis	Initial congestion window of the TCP optimizer
Context	<b>configure</b> <a href="#">application-assurance group number tcp-optimizer string initial-cwnd number</a>
Tree	<a href="#">initial-cwnd</a>
Description	This command configures the initial TCP congestion window (cwnd) used during the TCP Slow Start (SS) period.
Range	1 to 256
Default	8
Introduced	22.2.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **initial-ss-threshold** (*number* | *keyword*)

Synopsis	Initial TCP Slow Start threshold for client and server
Context	<b>configure</b> <a href="#">application-assurance group number tcp-optimizer string initial-ss-threshold (number   keyword)</a>
Tree	<a href="#">initial-ss-threshold</a>

Description	This command configures the initial Slow Start (SS) threshold for a specific TCP optimizer policy. Nokia recommends setting the threshold close to the access network Bandwidth Delay Product (BDP).
Range	0 to 1000000
Units	kilobytes
Options	auto
Default	1000000
Introduced	22.2.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **network-rtt-threshold** *number*

Synopsis	Network round trip time threshold
Context	<b>configure</b> <a href="#">application-assurance group</a> <i>number</i> <a href="#">tcp-optimizer</a> <i>string</i> <a href="#">network-rtt-threshold</a> <i>number</i>
Tree	<a href="#">network-rtt-threshold</a>
Description	This command configures the threshold of the Round Trip Time (RTT) delay of the network side (between AA and the content provider) above which TCP Optimization (TCPO) is performed. This enables the operator to disable optimization for content that is served from a location close to the TCP optimizer.
Range	1 to 100
Units	milliseconds
Introduced	22.2.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **tcp-stack** *keyword*

Synopsis	TCP stack congestion control algorithm
Context	<b>configure</b> <a href="#">application-assurance group</a> <i>number</i> <a href="#">tcp-optimizer</a> <i>string</i> <a href="#">tcp-stack</a> <i>keyword</i>
Tree	<a href="#">tcp-stack</a>
Description	This command configures the TCP stack used toward the subscriber.  <b>Note:</b> The TCP stack used toward the core network is new-reno, and it is not configurable. TCP BBR, BBRv2, TCP Illinois, and TCP Westwood implement a sender-side modification of the TCP congestion window algorithm that improves the performance of TCP Reno in wireless networks with lossy links.
Options	westwood, illinois, new-reno, bbr
Default	westwood

Introduced	22.2.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **url-filter** [[url-filter-name](#)] *string*

Synopsis	Enter the <b>url-filter</b> list instance
Context	<b>configure</b> <a href="#">application-assurance group number url-filter string</a>
Tree	<a href="#">url-filter</a>
Description	Commands in this context configure a URL filter action for flows of a specific type matching this entry. If no URL filters are specified, then no URL filters are evaluated.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **[url-filter-name]** *string*

Synopsis	URL filter name
Context	<b>configure</b> <a href="#">application-assurance group number url-filter string</a>
Tree	<a href="#">url-filter</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **admin-state** *keyword*

Synopsis	Administrative state of the AA URL filter
Context	<b>configure</b> <a href="#">application-assurance group number url-filter string admin-state keyword</a>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## apply-function-specific-behaviour *boolean*

Synopsis	Use function-specific behavior for action or redirect
Context	<b>configure</b> <a href="#">application-assurance group number url-filter string</a> <a href="#">apply-function-specific-behaviour boolean</a>
Tree	<a href="#">apply-function-specific-behaviour</a>
Description	When configured to <b>true</b> , the function-specific configurations for URL list, ICAP, and web service ( <b>url-list</b> , <b>icap</b> , and <b>web-service</b> ) are used for default action ( <b>default-action</b> ) and HTTP redirect ( <b>http-redirect</b> ).  When configured to <b>false</b> , the configuration at the URL filter level ( <b>url-filter</b> ) is used for default action and HTTP redirect.
Default	false
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## default-action

Synopsis	Enter the <b>default-action</b> context
Context	<b>configure</b> <a href="#">application-assurance group number url-filter string</a> <a href="#">default-action</a>
Tree	<a href="#">default-action</a>
Description	Commands in this context configure the default action to take effect when the URL filter cannot be used. This may occur in the following cases: <ul style="list-style-type: none"> <li>• for the local URL list when the URL list is shut down or the file is not loaded due to an error.</li> <li>• in the case of ICAP or web filtering when all TCP connections are busy or down.</li> </ul>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## allow

Synopsis	Allow all requests as the default URL filter action
Context	<b>configure</b> <a href="#">application-assurance group number url-filter string</a> <a href="#">default-action allow</a>
Tree	<a href="#">allow</a>
Description	When configured, the router allows all requests as the default URL filter action when the URL filter cannot be used.
Notes	The following elements are part of a choice: <b>allow</b> , <b>block-all</b> , or <b>block-http-redirect</b> .
Introduced	21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## block-all

Synopsis Block all requests as the default URL filter action

Context **configure** [application-assurance group number url-filter string default-action block-all](#)

Tree [block-all](#)

Description When configured, the router blocks all requests as the default URL filter action when the URL filter cannot be used.

Notes The following elements are part of a choice: **allow**, **block-all**, or **block-http-redirect**.

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## block-http-redirect *reference*

Synopsis HTTP URL name for block and redirect request action

Context **configure** [application-assurance group number url-filter string default-action block-http-redirect reference](#)

Tree [block-http-redirect](#)

Description This command specifies the URL that the user is directed to when the router blocks traffic. The information page can be different from the page the user is redirected to when the site that the user tried to access is found in the URL filter. This page is configured using the **configure application-assurance group url-filter http-redirect** command.

Reference **configure** [application-assurance group number http-redirect string](#)

Notes The following elements are part of a choice: **allow**, **block-all**, or **block-http-redirect**.

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## description *string*

Synopsis Text description

Context **configure** [application-assurance group number url-filter string description string](#)

Tree [description](#)

String Length 1 to 80

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **http-redirect** *reference*

Synopsis HTTP redirect for a blocked HTTP request

Context **configure** [application-assurance](#) [group](#) *number* [url-filter](#) *string* **http-redirect** *reference*

Tree [http-redirect](#)

Reference **configure** [application-assurance](#) [group](#) *number* **http-redirect** *string*

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **http-request-filtering** *keyword*

Synopsis HTTP filtering for all HTTP requests

Context **configure** [application-assurance](#) [group](#) *number* [url-filter](#) *string* **http-request-filtering** *keyword*

Tree [http-request-filtering](#)

Options all, first

Default all

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **icap**

Synopsis Enter the **icap** context

Context **configure** [application-assurance](#) [group](#) *number* [url-filter](#) *string* **icap**

Tree [icap](#)

Description Commands in this context configure the URL filter ICAP policy fields.

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **custom-x-header** *string*

Synopsis Custom x-header field name to include in ICAP requests

Context **configure** [application-assurance](#) [group](#) *number* [url-filter](#) *string* **icap** **custom-x-header** *string*

Tree	<a href="#">custom-x-header</a>
Description	This command configures the URL filter ICAP policy to include a new x-header field; the content of the x-header is populated based on the AQP URL filter action which can optionally specify the ASO characteristic value to include in the x-header.
String Length	1 to 32
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## default-action

Synopsis	Enter the <b>default-action</b> context
Context	<b>configure</b> <a href="#">application-assurance group number url-filter string icap default-action</a>
Tree	<a href="#">default-action</a>
Description	Commands in this context configure a default action for the URL filter. The default action takes effect when the URL filter cannot be used. This may happen when all TCP connections are busy or down.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## allow

Synopsis	Allow all requests as the default action
Context	<b>configure</b> <a href="#">application-assurance group number url-filter string icap default-action allow</a>
Tree	<a href="#">allow</a>
Description	When configured, this command allows all traffic when the URL filter cannot be used.
Notes	The following elements are part of a choice: <b>allow</b> , <b>block-all</b> , or <b>block-http-redirect</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## block-all

Synopsis	Block all requests as the default action
Context	<b>configure</b> <a href="#">application-assurance group number url-filter string icap default-action block-all</a>
Tree	<a href="#">block-all</a>
Description	When configured, this command blocks all traffic when the URL filter cannot be used.

Notes	The following elements are part of a choice: <b>allow</b> , <b>block-all</b> , or <b>block-http-redirect</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **block-http-redirect** *reference*

Synopsis	HTTP URL for redirection when URL filter cannot be used
Context	<b>configure</b> <a href="#">application-assurance group number url-filter string icap default-action block-http-redirect reference</a>
Tree	<a href="#">block-http-redirect</a>
Description	This command blocks traffic and redirects the user to an information page, which can be different than the page the user is redirected to when the site they attempted to access was found in the URL filter; this page is configured using the <b>configure application-assurance group url-filter http-redirect</b> command.
Reference	<b>configure</b> <a href="#">application-assurance group number http-redirect string</a>
Notes	The following elements are part of a choice: <b>allow</b> , <b>block-all</b> , or <b>block-http-redirect</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **http-redirect** *reference*

Synopsis	HTTP redirect object used when ICAP blocks HTTP request
Context	<b>configure</b> <a href="#">application-assurance group number url-filter string icap http-redirect reference</a>
Tree	<a href="#">http-redirect</a>
Reference	<b>configure</b> <a href="#">application-assurance group number http-redirect string</a>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **server** [[ip-address](#)] ([ipv4-address-no-zone](#) | [ipv6-address-no-zone](#)) [port number](#)

Synopsis	Enter the <b>server</b> list instance
Context	<b>configure</b> <a href="#">application-assurance group number url-filter string icap server (ipv4-address-no-zone   ipv6-address-no-zone) port number</a>
Tree	<a href="#">server</a>
Description	Commands in this context configure the IP address and server port of the ICAP server. In the current release, the system supports IPv4 addresses only for the ICAP server.

In the current release, the system supports IPv4 addresses only for the ICAP server.

Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **[ip-address]** (*ipv4-address-no-zone | ipv6-address-no-zone*)

Synopsis	ICAP server IP address
Context	<b>configure</b> <a href="#">application-assurance group number url-filter string icap server</a> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> ) <a href="#">port number</a>
Tree	<a href="#">server</a>
Description	This command configures the ICAP server address. In the current release, the system supports IPv4 addresses only for the ICAP server.
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **port number**

Synopsis	ICAP server port
Context	<b>configure</b> <a href="#">application-assurance group number url-filter string icap server</a> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> ) <a href="#">port number</a>
Tree	<a href="#">server</a>
Range	1 to 65535
MD-CLI	1344
Default	
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **admin-state keyword**

Synopsis	Administrative state of this URL filter ICAP server
Context	<b>configure</b> <a href="#">application-assurance group number url-filter string icap server</a> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> ) <a href="#">port number</a> <a href="#">admin-state keyword</a>
Tree	<a href="#">admin-state</a>
Options	enable, disable

Default	disable
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### description *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">application-assurance group number url-filter string icap server</a> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> ) <a href="#">port number description string</a>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### vlan-id *number*

#### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	VLAN ID of the ICAP server service port
Context	<b>configure</b> <a href="#">application-assurance group number url-filter string icap vlan-id number</a>
Tree	<a href="#">vlan-id</a>
Range	1 to 4094
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### local-filtering

Synopsis	Enter the <b>local-filtering</b> context
Context	<b>configure</b> <a href="#">application-assurance group number url-filter string local-filtering</a>
Tree	<a href="#">local-filtering</a>
Description	Commands in this context configure a URL filter policy for local filtering to filter traffic based on a list of URLs located on a file stored in the router compact flash.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**allow-list** *reference***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Local filtering URL list for allowed URLs
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">url-filter</a> <i>string</i> <a href="#">local-filtering</a> <a href="#">allow-list</a> <i>reference</i>
Tree	<a href="#">allow-list</a>
Reference	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">url-list</a> <i>string</i>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**deny-list** [[url-list-name](#)] *reference*

Synopsis	Enter the <b>deny-list</b> list instance
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">url-filter</a> <i>string</i> <a href="#">local-filtering</a> <a href="#">deny-list</a> <i>reference</i>
Tree	<a href="#">deny-list</a>
Description	Commands in this context configure a list of denied URLs to be added to the local URL filter policy.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**[url-list-name]** *reference*

Synopsis	URL list name
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">url-filter</a> <i>string</i> <a href="#">local-filtering</a> <a href="#">deny-list</a> <i>reference</i>
Tree	<a href="#">deny-list</a>
Description	This command adds a deny-list URL list to the local URL filter policy.
Reference	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">url-list</a> <i>string</i>
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## default-action

Synopsis	Enter the <b>default-action</b> context
Context	<b>configure</b> <a href="#">application-assurance group number url-filter string local-filtering deny-list reference default-action</a>
Tree	<a href="#">default-action</a>
Description	Commands in this context configure a default action for the URL filter. The default action takes effect when the URL filter cannot be used. This may happen in the case of a local URL list when the URL list is disabled or the file is not loaded due to an error.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## allow

Synopsis	Allow all requests as the default action
Context	<b>configure</b> <a href="#">application-assurance group number url-filter string local-filtering deny-list reference default-action allow</a>
Tree	<a href="#">allow</a>
Description	This command allows all traffic when the URL filter cannot be used.
Notes	The following elements are part of a choice: <b>allow</b> , <b>block-all</b> , or <b>block-http-redirect</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## block-all

Synopsis	Block all requests as the default action
Context	<b>configure</b> <a href="#">application-assurance group number url-filter string local-filtering deny-list reference default-action block-all</a>
Tree	<a href="#">block-all</a>
Description	This command blocks all traffic when the URL filter cannot be used.
Notes	The following elements are part of a choice: <b>allow</b> , <b>block-all</b> , or <b>block-http-redirect</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**block-http-redirect** *reference*

Synopsis	HTTP URL for redirection when URL filter cannot be used
Context	<b>configure</b> <a href="#">application-assurance group number url-filter string local-filtering deny-list reference default-action block-http-redirect reference</a>
Tree	<a href="#">block-http-redirect</a>
Description	This command blocks traffic and redirects the user to an information page, which can be different than the page the user is redirected to when the site they attempted to access was found in the URL filter; this page is configured using the <b>configure application-assurance group url-filter http-redirect</b> command.
Reference	<b>configure</b> <a href="#">application-assurance group number http-redirect string</a>
Notes	The following elements are part of a choice: <b>allow</b> , <b>block-all</b> , or <b>block-http-redirect</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**http-redirect** *reference*

Synopsis	HTTP redirect object applied to blocked HTTP requests
Context	<b>configure</b> <a href="#">application-assurance group number url-filter string local-filtering deny-list reference http-redirect reference</a>
Tree	<a href="#">http-redirect</a>
Reference	<b>configure</b> <a href="#">application-assurance group number http-redirect string</a>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**web-service**

Synopsis	Enter the <b>web-service</b> context
Context	<b>configure</b> <a href="#">application-assurance group number url-filter string web-service</a>
Tree	<a href="#">web-service</a>
Description	Commands in this context configure the URL filter policy using web-service filtering. The operator must configure the web service, hostname, DNS server to use, the AA interface VLAN ID, and provision the category profiles.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## category-set *number*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Web service category ID
Context	<b>configure</b> <a href="#">application-assurance group</a> <i>number</i> <a href="#">url-filter</a> <i>string</i> <a href="#">web-service category-set</a> <i>number</i>
Tree	<a href="#">category-set</a>
Range	1 to 65535
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## classification-overrides

Synopsis	Enter the <b>classification-overrides</b> context
Context	<b>configure</b> <a href="#">application-assurance group</a> <i>number</i> <a href="#">url-filter</a> <i>string</i> <a href="#">web-service classification-overrides</a>
Tree	<a href="#">classification-overrides</a>
Description	Commands in this context create a classification override and allow the operator to manually set the category of a hostname.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## entry [[entry-id](#)] *number*

Synopsis	Enter the <b>entry</b> list instance
Context	<b>configure</b> <a href="#">application-assurance group</a> <i>number</i> <a href="#">url-filter</a> <i>string</i> <a href="#">web-service classification-overrides entry</a> <i>number</i>
Tree	<a href="#">entry</a>
Description	Commands in this context configure a classification override, manually setting the category of a hostname.
Max. Instances	200
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**[entry-id] number**

Synopsis	Classification override entry ID
Context	<b>configure</b> <a href="#">application-assurance group number url-filter string web-service classification-overrides entry number</a>
Tree	<a href="#">entry</a>
Range	1 to 65535
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**category-name string**

Synopsis	Web service category name
Context	<b>configure</b> <a href="#">application-assurance group number url-filter string web-service classification-overrides entry number category-name string</a>
Tree	<a href="#">category-name</a>
String Length	1 to 32
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**expression string**

Synopsis	Hostname of the configured override category
Context	<b>configure</b> <a href="#">application-assurance group number url-filter string web-service classification-overrides entry number expression string</a>
Tree	<a href="#">expression</a>
String Length	1 to 255
Notes	This element is mandatory.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## classifier *keyword*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Web service classifier
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <a href="#">number</a> <a href="#">url-filter</a> <a href="#">string</a> <a href="#">web-service</a> <a href="#">classifier</a> <a href="#">keyword</a>
Tree	<a href="#">classifier</a>
Options	web-service-1
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## default-action

Synopsis	Enter the <b>default-action</b> context
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <a href="#">number</a> <a href="#">url-filter</a> <a href="#">string</a> <a href="#">web-service</a> <a href="#">default-action</a>
Tree	<a href="#">default-action</a>
Description	Commands in this context configure a default action for the URL filter. The default action takes effect when the URL filter cannot be used. This may happen when all TCP connections are busy or down.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## allow

Synopsis	Allow all requests as the default action
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <a href="#">number</a> <a href="#">url-filter</a> <a href="#">string</a> <a href="#">web-service</a> <a href="#">default-action</a> <a href="#">allow</a>
Tree	<a href="#">allow</a>
Description	This command allows all traffic when the web service is unavailable.
Notes	The following elements are part of a choice: <b>allow</b> , <b>block-all</b> , or <b>block-http-redirect</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## block-all

Synopsis	Block all requests as the default action
Context	<b>configure</b> <a href="#">application-assurance group number url-filter string web-service default-action block-all</a>
Tree	<a href="#">block-all</a>
Description	This command blocks all traffic when the web service is unavailable.
Notes	The following elements are part of a choice: <b>allow</b> , <b>block-all</b> , or <b>block-http-redirect</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## block-http-redirect *reference*

Synopsis	HTTP URL for redirection when traffic is blocked
Context	<b>configure</b> <a href="#">application-assurance group number url-filter string web-service default-action block-http-redirect reference</a>
Tree	<a href="#">block-http-redirect</a>
Description	This command specifies the HTTP URL to be redirected to when traffic is blocked. This URL can be different than the URL the user is redirected to when the site they attempted to access was found in the URL filter (which is configured in the <b>configure application-assurance group url-filter http-redirect</b> command).
Reference	<b>configure</b> <a href="#">application-assurance group number http-redirect string</a>
Notes	The following elements are part of a choice: <b>allow</b> , <b>block-all</b> , or <b>block-http-redirect</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## default-profile *reference*

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Web service default profile
Context	<b>configure</b> <a href="#">application-assurance group number url-filter string web-service default-profile reference</a>
Tree	<a href="#">default-profile</a>
Reference	<b>configure</b> <a href="#">application-assurance group number url-filter string web-service profile string</a>
Introduced	21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **dns-server** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis Web service DNS server

Context **configure** [application-assurance](#) [group](#) [number](#) [url-filter](#) [string](#) [web-service](#) [dns-server](#) (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Tree [dns-server](#)

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **fqdn** *string*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis Web service fully qualified domain name

Context **configure** [application-assurance](#) [group](#) [number](#) [url-filter](#) [string](#) [web-service](#) [fqdn](#) [string](#)

Tree [fqdn](#)

String Length 1 to 255

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **http-redirect** *reference*

Synopsis Web service HTTP redirect

Context **configure** [application-assurance](#) [group](#) [number](#) [url-filter](#) [string](#) [web-service](#) [http-redirect](#) [reference](#)

Tree [http-redirect](#)

Reference **configure** [application-assurance](#) [group](#) [number](#) [http-redirect](#) [string](#)

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**profile** [[profile-name](#)] *string*

Synopsis	Enter the <b>profile</b> list instance
Context	<b>configure</b> <a href="#">application-assurance group number url-filter string web-service profile string</a>
Tree	<a href="#">profile</a>
Description	Commands in this context configure the category profiles of the web service.
Max. Instances	8
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**[profile-name]** *string*

Synopsis	Web service profile name
Context	<b>configure</b> <a href="#">application-assurance group number url-filter string web-service profile string</a>
Tree	<a href="#">profile</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**block**

Synopsis	Enter the <b>block</b> context
Context	<b>configure</b> <a href="#">application-assurance group number url-filter string web-service profile string block</a>
Tree	<a href="#">block</a>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**category** [[category-name](#)] *string*

Synopsis	Add a list entry for <b>category</b>
Context	<b>configure</b> <a href="#">application-assurance group number url-filter string web-service profile string block category string</a>
Tree	<a href="#">category</a>

Description	Commands in this context configure the category that is blocked in the category profile.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **[category-name]** *string*

Synopsis	Web service profile category name to be blocked
Context	<b>configure</b> <a href="#">application-assurance group number url-filter string web-service profile string</a> <a href="#">block category string</a>
Tree	<a href="#">category</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">application-assurance group number url-filter string web-service profile string</a> <a href="#">description string</a>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **server** [[ip-address](#)] (*ipv4-address-no-zone | ipv6-address-no-zone*) [port number](#)

Synopsis	Enter the <b>server</b> list instance
Context	<b>configure</b> <a href="#">application-assurance group number url-filter string web-service server (ipv4-address-no-zone   ipv6-address-no-zone) port number</a>
Tree	<a href="#">server</a>
Max. Instances	4
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**[ip-address]** (*ipv4-address-no-zone | ipv6-address-no-zone*)

Synopsis	AA web service server IP address
Context	<b>configure</b> <a href="#">application-assurance group number url-filter string web-service server</a> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> ) <a href="#">port number</a>
Tree	<a href="#">server</a>
Notes	This element is part of a list key.
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**port number**

Synopsis	AA web service server port
Context	<b>configure</b> <a href="#">application-assurance group number url-filter string web-service server</a> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> ) <a href="#">port number</a>
Tree	<a href="#">server</a>
Range	1 to 65535
MD-CLI Default	8080
Notes	This element is part of a list key.
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**admin-state keyword**

Synopsis	Administrative state of URL filter web service server
Context	<b>configure</b> <a href="#">application-assurance group number url-filter string web-service server</a> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> ) <a href="#">port number admin-state keyword</a>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">application-assurance group</a> <i>number</i> <a href="#">url-filter</a> <i>string</i> <a href="#">web-service server</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <a href="#">port</a> <i>number</i> <a href="#">description</a> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**vlan-id** *number***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Web-service VLAN ID
Context	<b>configure</b> <a href="#">application-assurance group</a> <i>number</i> <a href="#">url-filter</a> <i>string</i> <a href="#">web-service</a> <a href="#">vlan-id</a> <i>number</i>
Tree	<a href="#">vlan-id</a>
Description	This command configures the VLAN ID on which the AA ISA emits the traffic mapping to a preconfigured AA interface.
Range	1 to 4094
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**url-list** [[url-list-name](#)] *string*

Synopsis	Enter the <b>url-list</b> list instance
Context	<b>configure</b> <a href="#">application-assurance group</a> <i>number</i> <a href="#">url-list</a> <i>string</i>
Tree	<a href="#">url-list</a>
Description	Commands in this context configure a URL list object. The URL list points to a file containing a list of URLs located on the system Compact Flash and is then referenced in a URL filter object to filter and redirect subscribers when a URL from this file is accessed.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**[url-list-name] string**

Synopsis	URL list name
Context	<b>configure</b> <a href="#">application-assurance group number url-list string</a>
Tree	<a href="#">url-list</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**admin-state keyword**

Synopsis	Administrative state of the URL list
Context	<b>configure</b> <a href="#">application-assurance group number url-list string admin-state keyword</a>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**description string**

Synopsis	Text description
Context	<b>configure</b> <a href="#">application-assurance group number url-list string description string</a>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**file string**

Synopsis	File name of the URL list on compact flash
Context	<b>configure</b> <a href="#">application-assurance group number url-list string file string</a>
Tree	<a href="#">file</a>
String Length	1 to 180
Introduced	21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### host-expressions *boolean*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis Allow URL list to contain hostnames with wildcards

Context **configure** [application-assurance group](#) *number url-list string host-expressions boolean*

Tree [host-expressions](#)

Description When configured to **true**, this command adds hostnames with wildcards to the URL list. When configured to **false**, the URL list containing hostnames with wildcards is removed from the configuration.

Default false

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### key *string*

Synopsis URL list decryption key

Context **configure** [application-assurance group](#) *number url-list string key string*

Tree [key](#)

Description This command configures the secret key for decrypting the URL list.

String Length 1 to 115

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### size *keyword*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis Size limit of the URL list

Context **configure** [application-assurance group](#) *number url-list string size keyword*

Tree [size](#)

Options	standard, extended
Default	standard
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## http-enrich

Synopsis	Enter the <b>http-enrich</b> context
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">http-enrich</a>
Tree	<a href="#">http-enrich</a>
Description	Commands in this context should not be used by the operators. Configuring them has no effect. Operators should use the commands in the <b>application-assurance group</b> context.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## field [[field-name](#)] *string*

Synopsis	Enter the <b>field</b> list instance
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">http-enrich</a> <a href="#">field</a> <i>string</i>
Tree	<a href="#">field</a>
Description	Commands in this context should not be used by the operators. Configuring them has no effect. Operators should use the commands in the <b>application-assurance group</b> context.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## [\[field-name\]](#) *string*

Synopsis	HTTP enrich field name (void, do not use)
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">http-enrich</a> <a href="#">field</a> <i>string</i>
Tree	<a href="#">field</a>
Description	This command should not be used by the operators. Configuring it has no effect. Operators should use the commands in the <b>application-assurance group</b> context.
String Length	1 to 32
Notes	This element is part of a list key.

Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **comment** *string*

Synopsis	User information comment
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">http-enrich field</a> <i>string</i> <b>comment</b> <i>string</i>
Tree	<a href="#">comment</a>
String Length	1 to 32
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **http-error-redirect**

Synopsis	Enter the <b>http-error-redirect</b> context
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">http-error-redirect</a>
Tree	<a href="#">http-error-redirect</a>
Description	Commands in this context should not be used by the operators. Configuring them has no effect. Operators should use the commands in the <b>application-assurance group</b> context.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **error-code** [[error-code-number](#)] *number*

Synopsis	Enter the <b>error-code</b> list instance
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">http-error-redirect</a> <a href="#">error-code</a> <i>number</i>
Tree	<a href="#">error-code</a>
Description	Commands in this context should not be used by the operators. Configuring them has no effect. Operators should use the commands in the <b>application-assurance group</b> context.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**[error-code-number]** *number*

Synopsis	Error code for HTTP error redirection
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">http-error-redirect</a> <a href="#">error-code</a> <i>number</i>
Tree	<a href="#">error-code</a>
Range	400 to 999
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**comment** *string*

Synopsis	User information comment
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">http-error-redirect</a> <a href="#">error-code</a> <i>number</i> <a href="#">comment</a> <i>string</i>
Tree	<a href="#">comment</a>
String Length	1 to 32
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**template** [[template-id](#)] *number*

Synopsis	Enter the <b>template</b> list instance
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">http-error-redirect</a> <a href="#">template</a> <i>number</i>
Tree	<a href="#">template</a>
Description	Commands in this context should not be used by the operators. Configuring them has no effect. Operators should use the commands in the <b>application-assurance group</b> context.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**[template-id]** *number*

Synopsis	HTTP error redirect template ID
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">http-error-redirect</a> <a href="#">template</a> <i>number</i>
Tree	<a href="#">template</a>
Max. Range	0 to 4294967295

Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **comment** *string*

Synopsis	User information comment
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">http-error-redirect</a> <a href="#">template</a> <i>number</i> <b>comment</b> <i>string</i>
Tree	<a href="#">comment</a>
String Length	1 to 32
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **http-notification**

Synopsis	Enter the <b>http-notification</b> context
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">http-notification</a>
Tree	<a href="#">http-notification</a>
Description	Commands in this context should not be used by the operators. Configuring them has no effect. Operators should use the commands in the <b>application-assurance group</b> context.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **template** [[template-id](#)] *number*

Synopsis	Enter the <b>template</b> list instance
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">http-notification</a> <a href="#">template</a> <i>number</i>
Tree	<a href="#">template</a>
Description	Commands in this context should not be used by the operators. Configuring them has no effect. Operators should use the commands in the <b>application-assurance group</b> context.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**[template-id] number**

Synopsis	HTTP notification template ID
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">http-notification</a> <a href="#">template</a> <i>number</i>
Tree	<a href="#">template</a>
Max. Range	0 to 4294967295
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**comment string**

Synopsis	User information comment
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">http-notification</a> <a href="#">template</a> <i>number</i> <a href="#">comment</a> <i>string</i>
Tree	<a href="#">comment</a>
String Length	1 to 32
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**http-redirect**

Synopsis	Enter the <b>http-redirect</b> context
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">http-redirect</a>
Tree	<a href="#">http-redirect</a>
Description	Commands in this context should not be used by the operators. Configuring them has no effect. Operators should use the commands in the <b>application-assurance group</b> context.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**template [template-id] number**

Synopsis	Enter the <b>template</b> list instance
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">http-redirect</a> <a href="#">template</a> <i>number</i>
Tree	<a href="#">template</a>

Description	Commands in this context should not be used by the operators. Configuring them has no effect. Operators should use the commands in the <b>application-assurance group</b> context.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### [**template-id**] *number*

Synopsis	HTTP redirect template ID
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">http-redirect template</a> <i>number</i>
Tree	<a href="#">template</a>
Description	This command specifies the HTTP policy redirect template ID. The available options are: <b>1</b> - JavaScript based redirect embedded in HTTP 200 OK response with a predefined number of arguments automatically appended to the redirect URL <b>2</b> - HTTP 302 redirect with a predefined number of arguments automatically appended to the redirect URL <b>3</b> - HTTP 302 redirect with no parameters appended to the URL (empty) <b>4</b> - Empty redirect format using JavaScript <b>5</b> - Redirect supporting macro substitution using HTTP 302 <b>6</b> - Redirect supporting macro substitution using JavaScript
Max. Range	0 to 4294967295
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **comment** *string*

Synopsis	User information comment
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">http-redirect template</a> <i>number</i> <b>comment</b> <i>string</i>
Tree	<a href="#">comment</a>
String Length	1 to 32
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**protocol** [[protocol-name](#)] *string*

Synopsis	Enter the <b>protocol</b> list instance
Context	<b>configure</b> <a href="#">application-assurance protocol</a> <i>string</i>
Tree	<a href="#">protocol</a>
Description	Commands in this context configure the administrative state of system-wide protocols. Some protocols are always enabled and cannot be disabled. These are "base protocols" that were present in R1 of the release. Some protocols are disabled by default and can be enabled. There are protocols that were introduced post R1, which are all enabled by default but may be disabled if not desired.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**[protocol-name]** *string*

Synopsis	AA protocol name
Context	<b>configure</b> <a href="#">application-assurance protocol</a> <i>string</i>
Tree	<a href="#">protocol</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**admin-state** *keyword*

Synopsis	Administrative state of the protocol
Context	<b>configure</b> <a href="#">application-assurance protocol</a> <i>string</i> <b>admin-state</b> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**radius-accounting-policy** [[rad-acct-plcy-name](#)] *string*

Synopsis	Enter the <b>radius-accounting-policy</b> list instance
Context	<b>configure</b> <a href="#">application-assurance radius-accounting-policy</a> <i>string</i>
Tree	<a href="#">radius-accounting-policy</a>

Description	Commands in this context configure an existing subscriber RADIUS-based accounting policy to use for AA. RADIUS accounting policies are configured in the <b>configure application-assurance radius-accounting-policy</b> context.
Max. Instances	8
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **[rad-acct-plcy-name]** *string*

Synopsis	AA RADIUS accounting policy name
Context	<b>configure</b> <a href="#">application-assurance radius-accounting-policy</a> <i>string</i>
Tree	<a href="#">radius-accounting-policy</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">application-assurance radius-accounting-policy</a> <i>string</i> <a href="#">description</a> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **interim-update-interval** *number*

Synopsis	AA RADIUS accounting policy interim update interval
Context	<b>configure</b> <a href="#">application-assurance radius-accounting-policy</a> <i>string</i> <a href="#">interim-update-interval</a> <i>number</i>
Tree	<a href="#">interim-update-interval</a>
Range	5 to 1080
Units	minutes
Introduced	21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## radius-accounting-server

Synopsis Enter the **radius-accounting-server** context

Context **configure** [application-assurance radius-accounting-policy](#) *string* [radius-accounting-server](#)

Tree [radius-accounting-server](#)

Description Commands in this context configure an existing subscriber RADIUS-based accounting policy to use for AA. RADIUS accounting policies are configured in the **configure application-assurance radius-accounting-policy** context.

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## access-algorithm *keyword*

Synopsis Access algorithm for the list of RADIUS servers

Context **configure** [application-assurance radius-accounting-policy](#) *string* [radius-accounting-server access-algorithm](#) *keyword*

Tree [access-algorithm](#)

Options direct, round-robin

Default direct

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## retry *number*

Synopsis Number of retries for contacting the RADIUS server

Context **configure** [application-assurance radius-accounting-policy](#) *string* [radius-accounting-server retry](#) *number*

Tree [retry](#)

Range 1 to 10

Default 3

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**router-instance** *string*

Synopsis	Router or VPRN service name
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">radius-accounting-server</a> <a href="#">router-instance</a> <i>string</i>
Tree	<a href="#">router-instance</a>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**server** [[server-index](#)] *number*

Synopsis	Enter the <b>server</b> list instance
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">radius-accounting-server</a> <a href="#">server</a> <i>number</i>
Tree	<a href="#">server</a>
Description	<p>Commands in this context configure the RADIUS server and the RADIUS server IP address, index, and key values.</p> <p>RADIUS servers are accessed in order from lowest to highest index for authentication requests until a response from a server is received. A higher indexed server is only queried if no response is received from a lower indexed server (which implies that the server is not available). If a response from a server is received, no other RADIUS servers are queried.</p>
Max. Instances	5
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**[server-index]** *number*

Synopsis	RADIUS accounting server index
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">radius-accounting-server</a> <a href="#">server</a> <i>number</i>
Tree	<a href="#">server</a>
Description	This command configures the index for the RADIUS server. The index determines the sequence in which the servers are queried for authentication requests. Servers are queried in order from lowest to highest index.
Range	1 to 5
Notes	This element is part of a list key.
Introduced	21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **address string**

Synopsis RADIUS server IP address

Context **configure** [application-assurance](#) [radius-accounting-policy](#) *string* [radius-accounting-server](#) [server](#) *number* [address](#) *string*

Tree [address](#)

Description This command configures the IP address of the RADIUS server. Two RADIUS servers cannot have the same IP address. An error message is generated if the server address is a duplicate.

Notes This element is mandatory.

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **port number**

Synopsis RADIUS server UDP port used for authentication

Context **configure** [application-assurance](#) [radius-accounting-policy](#) *string* [radius-accounting-server](#) [server](#) *number* [port](#) *number*

Tree [port](#)

Range 1 to 65535

Default 1813

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **secret string**

Synopsis RADIUS server secret key

Context **configure** [application-assurance](#) [radius-accounting-policy](#) *string* [radius-accounting-server](#) [server](#) *number* [secret](#) *string*

Tree [secret](#)

Description This command configures the secret key to access the RADIUS server. This secret key must match the password on the RADIUS server.

String Length 1 to 54

Notes This element is mandatory.

Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **source-address** *string*

Synopsis	Source IP address of RADIUS packets
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">radius-accounting-server</a> <b>source-address</b> <i>string</i>
Tree	<a href="#">source-address</a>
Description	<p>This command configures the source IP address of the RADIUS packet.</p> <p>The system IP address must be configured for the RADIUS client to work. The system IP address must only be configured if the source address is not specified. When this command reverts to its default, the source address is determined at the moment the request is sent.</p> <p>This address is also used in the <b>nas-ip-address</b> command in the <b>configure aaa radius isa-policy accounting include-attributes</b> and <b>configure aaa radius isa-policy authentication include-attributes</b> contexts as it is set to the system IP address if no source address was given.</p>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **timeout** *number*

Synopsis	RADIUS accounting server response timeout
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">radius-accounting-server</a> <b>timeout</b> <i>number</i>
Tree	<a href="#">timeout</a>
Range	1 to 90
Units	seconds
Default	5
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **significant-change** *number*

Synopsis	Change delta for RADIUS accounting record updates
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">radius-accounting-policy</a> <i>string</i> <b>significant-change</b> <i>number</i>

Tree	<a href="#">significant-change</a>
Description	This command configures the number of changes required to generate the record.
Range	1
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### usage-alert-thresholds

Synopsis	Enter the <b>usage-alert-thresholds</b> context
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">usage-alert-thresholds</a>
Tree	<a href="#">usage-alert-thresholds</a>
Description	Commands in this context configure the AA performance monitoring alerts.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### bit-rate-high-wmark (*number* | *keyword*)

Synopsis	High watermark for bit rate alarms
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">usage-alert-thresholds</a> <a href="#">bit-rate-high-wmark</a> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">bit-rate-high-wmark</a>
Description	This command configures the high watermark for bit rate alarms. The value must be larger than or equal to the low watermark value.
Range	1 to 100000
Units	megabps
Options	max
Default	max
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### bit-rate-low-wmark *number*

Synopsis	Low watermark for bit rate alarms
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">usage-alert-thresholds</a> <a href="#">bit-rate-low-wmark</a> <i>number</i>
Tree	<a href="#">bit-rate-low-wmark</a>

Description	This command configures the utilization of the flow records on the ISA-AA group when the full alarm is cleared by the agent.
Range	0 to 99999
Default	0
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **datapath-cpu-high-wmark** (*number* | *keyword*)

Synopsis	High watermark for datapath CPU alarms
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">usage-alert-thresholds</a> <a href="#">datapath-cpu-high-wmark</a> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">datapath-cpu-high-wmark</a>
Description	This command configures the system-wide high watermark threshold as a percentage of the per-ISA datapath core CPU utilization, where an alarm is raised by the agent. CPU usage is the average usage across all datapath cores.
Range	0 to 100
Units	percent
Options	max
Default	95
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **datapath-cpu-low-wmark** *number*

Synopsis	Low watermark for datapath CPU alarms
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">usage-alert-thresholds</a> <a href="#">datapath-cpu-low-wmark</a> <i>number</i>
Tree	<a href="#">datapath-cpu-low-wmark</a>
Description	This command configures the system-wide low watermark threshold as a percentage of the per-ISA datapath core CPU utilization, where an alarm is raised by the agent. CPU usage is the average usage across all datapath cores.
Range	0 to 100
Units	percent
Default	90
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**flow-setup-rate-high-wmark** (*number* | *keyword*)

Synopsis	High watermark for flow setup rate
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">usage-alert-thresholds</a> <a href="#">flow-setup-rate-high-wmark</a> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">flow-setup-rate-high-wmark</a>
Description	This command configures the system-wide high watermark threshold for per-ISA throughput in packets/second when an alarm is raised by the agent. The value must be larger than or equal to the <b>packet-rate-low-wmark</b> value.
Range	1 to 2000000
Options	max
Default	max
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**flow-setup-rate-low-wmark** *number*

Synopsis	Low watermark for flow setup rate
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">usage-alert-thresholds</a> <a href="#">flow-setup-rate-low-wmark</a> <i>number</i>
Tree	<a href="#">flow-setup-rate-low-wmark</a>
Description	This command configures the flow setup rate on the ISA-AA when a flow setup alarm is raised by the agent.
Range	0 to 1999999
Default	0
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**flow-table-high-wmark** *number*

Synopsis	Flow table high watermark
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">usage-alert-thresholds</a> <a href="#">flow-table-high-wmark</a> <i>number</i>
Tree	<a href="#">flow-table-high-wmark</a>
Description	This command configures the system-wide high watermark threshold as a percentage of the flow table size for the per-ISA utilization of the flow records when a full alarm is raised by the agent.
Range	0 to 100

Units	percent
Default	95
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **flow-table-low-wmark** *number*

Synopsis	Flow table low watermark
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">usage-alert-thresholds</a> <a href="#">flow-table-low-wmark</a> <i>number</i>
Tree	<a href="#">flow-table-low-wmark</a>
Description	This command configures the system-wide low watermark threshold as a percentage of the flow table size for per-ISA.
Range	0 to 100
Units	percent
Default	90
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **packet-rate-high-wmark** (*number* | *keyword*)

Synopsis	Packet rate high watermark
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">usage-alert-thresholds</a> <a href="#">packet-rate-high-wmark</a> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">packet-rate-high-wmark</a>
Description	This command configures the packet rate on the ISA-AA when a packet rate alarm is raised by the agent.
Range	1 to 148809524
Options	max
Default	max
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **packet-rate-low-wmark** *number*

Synopsis	Packet rate low watermark
Context	<b>configure</b> <a href="#">application-assurance</a> <a href="#">usage-alert-thresholds</a> <a href="#">packet-rate-low-wmark</a> <i>number</i>

---

Tree	<a href="#">packet-rate-low-wmark</a>
Description	This command configures the packet rate on the ISA-AA when a packet rate alarm is cleared by the agent.
Range	0 to 148809523
Default	0
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## 3.4 aps commands

```
configure
- aps number
- advertise-interval number
- annexb
- wait-to-restore-time number
- working-circuit reference
- apply-groups reference
- apply-groups-exclude reference
- hold-time number
- neighbor (ipv4-address-no-zone | ipv6-address-no-zone)
- protect-circuit reference
- revert
- time number
- switching-mode keyword
- working-circuit reference
```

### 3.4.1 aps command descriptions

#### **aps** [group-id] *number*

Synopsis	Enter the <b>aps</b> list instance
Context	<b>configure</b> <b>aps</b> <i>number</i>
Tree	<b>aps</b>
Introduced	20.10.R1
Platforms	7450 ESS, 7750 SR-7/12/12e, 7750 SR-a, 7750 SR-e

#### [group-id] *number*

Synopsis	APS group ID
Context	<b>configure</b> <b>aps</b> <i>number</i>
Tree	<b>aps</b>
Range	1 to 128
Notes	This element is part of a list key.
Introduced	20.10.R1
Platforms	7450 ESS, 7750 SR-7/12/12e, 7750 SR-a, 7750 SR-e

#### **advertise-interval** *number*

Synopsis	Time between subsequent advertisement messages
Context	<b>configure</b> <b>aps</b> <i>number</i> <b>advertise-interval</b> <i>number</i>
Tree	<b>advertise-interval</b>
Range	10 to 650
Units	deciseconds
Default	10
Introduced	20.10.R1
Platforms	7450 ESS, 7750 SR-7/12/12e, 7750 SR-a, 7750 SR-e

#### **annexb**

Synopsis	Enable the <b>annexb</b> context
Context	<b>configure</b> <b>aps</b> <i>number</i> <b>annexb</b>

Tree	<a href="#">annexb</a>
Notes	The following elements are part of a choice: <b>annexb</b> or ( <b>neighbor</b> , <b>protect-circuit</b> , <b>revert</b> , and <b>working-circuit</b> ).
Introduced	20.10.R1
Platforms	7450 ESS, 7750 SR-7/12/12e, 7750 SR-a, 7750 SR-e

### **wait-to-restore-time** *number*

Synopsis	Annex B mode operation wait to restore time
Context	<b>configure</b> <b>aps</b> <i>number</i> <a href="#">annexb</a> <b>wait-to-restore-time</b> <i>number</i>
Tree	<a href="#">wait-to-restore-time</a>
Description	This command specifies the delay after which the newly active section becomes the primary section after a switchover from the primary section to the secondary section occurs and the switch request clears normally.
Range	0 to 3600
Units	seconds
Default	300
Introduced	20.10.R1
Platforms	7450 ESS, 7750 SR-7/12/12e, 7750 SR-a, 7750 SR-e

### **working-circuit** *reference*

Synopsis	Working circuit port for the APS group
Context	<b>configure</b> <b>aps</b> <i>number</i> <a href="#">annexb</a> <b>working-circuit</b> <i>reference</i>
Tree	<a href="#">working-circuit</a>
Reference	<b>configure</b> <b>port</b> <i>string</i>
Max. Instances	2
Notes	This element is ordered by the user.
Introduced	20.10.R1
Platforms	7450 ESS, 7750 SR-7/12/12e, 7750 SR-a, 7750 SR-e

### **hold-time** *number*

Synopsis	Time to wait for an advertisement packet
Context	<b>configure</b> <b>aps</b> <i>number</i> <b>hold-time</b> <i>number</i>

Tree	<a href="#">hold-time</a>
Range	10 to 650
Units	deciseconds
Default	30
Introduced	20.10.R1
Platforms	7450 ESS, 7750 SR-7/12/12e, 7750 SR-a, 7750 SR-e

### **neighbor** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	Neighbor IP address for multi-chassis APS
Context	<b>configure</b> <a href="#">aps</a> <i>number</i> <a href="#">neighbor</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	<a href="#">neighbor</a>
Notes	The following elements are part of a choice: <b>annexb</b> or ( <b>neighbor</b> , <b>protect-circuit</b> , <b>revert</b> , and <b>working-circuit</b> ).
Introduced	20.10.R1
Platforms	7450 ESS, 7750 SR-7/12/12e, 7750 SR-a, 7750 SR-e

### **protect-circuit** *reference*

Synopsis	Protection circuit port for the APS group
Context	<b>configure</b> <a href="#">aps</a> <i>number</i> <a href="#">protect-circuit</a> <i>reference</i>
Tree	<a href="#">protect-circuit</a>
Reference	<b>configure</b> <a href="#">port</a> <i>string</i>
Notes	The following elements are part of a choice: <b>annexb</b> or ( <b>neighbor</b> , <b>protect-circuit</b> , <b>revert</b> , and <b>working-circuit</b> ).
Introduced	20.10.R1
Platforms	7450 ESS, 7750 SR-7/12/12e, 7750 SR-a, 7750 SR-e

### **revert**

Synopsis	Enable the <b>revert</b> context
Context	<b>configure</b> <a href="#">aps</a> <i>number</i> <a href="#">revert</a>
Tree	<a href="#">revert</a>
Notes	The following elements are part of a choice: <b>annexb</b> or ( <b>neighbor</b> , <b>protect-circuit</b> , <b>revert</b> , and <b>working-circuit</b> ).

Introduced	20.10.R1
Platforms	7450 ESS, 7750 SR-7/12/12e, 7750 SR-a, 7750 SR-e

**time** *number*

Synopsis	Wait time before switching back to the working circuit
Context	<b>configure</b> <a href="#">aps</a> <i>number</i> <a href="#">revert</a> <i>time</i> <i>number</i>
Tree	<a href="#">time</a>
Range	0   60 to 3600
Units	seconds
Default	300
Introduced	20.10.R1
Platforms	7450 ESS, 7750 SR-7/12/12e, 7750 SR-a, 7750 SR-e

**switching-mode** *keyword*

Synopsis	Switching mode for the APS port
Context	<b>configure</b> <a href="#">aps</a> <i>number</i> <a href="#">switching-mode</a> <i>keyword</i>
Tree	<a href="#">switching-mode</a>
Options	uni-directional, bi-directional
Default	bi-directional
Introduced	20.10.R1
Platforms	7450 ESS, 7750 SR-7/12/12e, 7750 SR-a, 7750 SR-e

**working-circuit** *reference*

Synopsis	Working circuit port for the APS group
Context	<b>configure</b> <a href="#">aps</a> <i>number</i> <a href="#">working-circuit</a> <i>reference</i>
Tree	<a href="#">working-circuit</a>
Reference	<b>configure</b> <a href="#">port</a> <i>string</i>
Notes	The following elements are part of a choice: <b>annexb</b> or ( <b>neighbor</b> , <b>protect-circuit</b> , <b>revert</b> , and <b>working-circuit</b> ).
Introduced	20.10.R1
Platforms	7450 ESS, 7750 SR-7/12/12e, 7750 SR-a, 7750 SR-e

## 3.5 bfd commands

```
configure
- bfd
  - apply-groups reference
  - apply-groups-exclude reference
  - bfd-template string
    - apply-groups reference
    - apply-groups-exclude reference
    - echo-receive number
    - multiplier number
    - receive-interval number
    - transmit-interval number
    - type keyword
  - seamless-bfd
    - reflector string
      - admin-state keyword
      - apply-groups reference
      - apply-groups-exclude reference
      - description string
      - discriminator number
      - local-state keyword
```

### 3.5.1 bfd command descriptions

#### **bfd**

Synopsis	Enter the <b>bfd</b> context
Context	<b>configure bfd</b>
Tree	<a href="#">bfd</a>
Introduced	16.0.R1
Platforms	All

#### **bfd-template** [[name](#)] *string*

Synopsis	Enter the <b>bfd-template</b> list instance
Context	<b>configure bfd bfd-template</b> <i>string</i>
Tree	<a href="#">bfd-template</a>
Introduced	16.0.R1
Platforms	All

#### **[name]** *string*

Synopsis	BFD template name
Context	<b>configure bfd bfd-template</b> <i>string</i>
Tree	<a href="#">bfd-template</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

#### **echo-receive** *number*

Synopsis	Echo receive interval
Context	<b>configure bfd bfd-template</b> <i>string</i> <b>echo-receive</b> <i>number</i>
Tree	<a href="#">echo-receive</a>
Range	100 to 100000
Units	milliseconds

---

Default	100
Introduced	16.0.R1
Platforms	All

### **multiplier** *number*

Synopsis	Detection multiplier
Context	<b>configure</b> <b>bfd bfd-template</b> <i>string multiplier number</i>
Tree	<a href="#">multiplier</a>
Range	1 to 20
Default	3
Introduced	16.0.R1
Platforms	All

### **receive-interval** *number*

Synopsis	Receive interval
Context	<b>configure</b> <b>bfd bfd-template</b> <i>string receive-interval number</i>
Tree	<a href="#">receive-interval</a>
Range	10 to 100000
Units	milliseconds
Default	100
Introduced	16.0.R1
Platforms	All

### **transmit-interval** *number*

Synopsis	Transmit interval
Context	<b>configure</b> <b>bfd bfd-template</b> <i>string transmit-interval number</i>
Tree	<a href="#">transmit-interval</a>
Range	10 to 100000
Units	milliseconds
Default	100
Introduced	16.0.R1
Platforms	All

**type keyword**

Synopsis	Local termination point for the BFD session
Context	<b>configure bfd bfd-template</b> <i>string type keyword</i>
Tree	<a href="#">type</a>
Options	cpm-np, fp
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**seamless-bfd**

Synopsis	Enter the <b>seamless-bfd</b> context
Context	<b>configure bfd seamless-bfd</b>
Tree	<a href="#">seamless-bfd</a>
Introduced	19.7.R1
Platforms	All

**reflector [name] string**

Synopsis	Enter the <b>reflector</b> list instance
Context	<b>configure bfd seamless-bfd reflector</b> <i>string</i>
Tree	<a href="#">reflector</a>
Max. Instances	1
Introduced	19.7.R1
Platforms	All

**[name] string**

Synopsis	S-BFD reflector name
Context	<b>configure bfd seamless-bfd reflector</b> <i>string</i>
Tree	<a href="#">reflector</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	19.7.R1

Platforms All

### **admin-state** *keyword*

Synopsis Administrative state of the seamless BFD reflector  
 Context **configure** [bfd seamless-bfd reflector](#) *string* **admin-state** *keyword*  
 Tree [admin-state](#)  
 Options enable, disable  
 Default disable  
 Introduced 19.7.R1  
 Platforms All

### **description** *string*

Synopsis Text description  
 Context **configure** [bfd seamless-bfd reflector](#) *string* **description** *string*  
 Tree [description](#)  
 String Length 1 to 80  
 Introduced 19.7.R1  
 Platforms All

### **discriminator** *number*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis Discriminator of the seamless BFD reflector  
 Context **configure** [bfd seamless-bfd reflector](#) *string* **discriminator** *number*  
 Tree [discriminator](#)  
 Range 524288 to 526335  
 Introduced 19.7.R1  
 Platforms All

**local-state** *keyword*

Synopsis	Local state of the seamless BFD reflector
Context	<b>configure</b> <b>bfd seamless-bfd reflector</b> <i>string</i> <b>local-state</b> <i>keyword</i>
Tree	<b>local-state</b>
Options	admin-down, up
Default	up
Introduced	19.7.R1
Platforms	All

## 3.6 bmp commands

```

configure
-  bmp
  - admin-state keyword
  - apply-groups reference
  - apply-groups-exclude reference
  - collector
    - admin-state keyword
    - apply-groups reference
    - apply-groups-exclude reference
    - connection
      - ipv4
        - address string
        - port number
      - ipv6
        - address string
        - port number
  - station string
    - admin-state keyword
    - apply-groups reference
    - apply-groups-exclude reference
    - connection
      - connect-retry number
      - local-address (ipv4-address-no-zone | ipv6-address-no-zone)
      - router-instance string
      - station-address
        - ip-address (ipv4-address-no-zone | ipv6-address-no-zone)
        - port number
      - tcp-keepalive
        - admin-state keyword
        - keep-count number
        - keep-idle number
        - keep-interval number
    - description string
  - family
    - evpn boolean
    - ipv4 boolean
    - ipv6 boolean
    - l2-vpn boolean
    - label-ipv4 boolean
    - label-ipv6 boolean
    - mcast-ipv4 boolean
    - mcast-ipv6 boolean
    - mcast-vpn-ipv4 boolean
    - mcast-vpn-ipv6 boolean
    - sr-policy-ipv4 boolean
    - sr-policy-ipv6 boolean
    - vpn-ipv4 boolean
    - vpn-ipv6 boolean
  - initiation-message string
  - report-local-routes boolean
  - stats-report-interval number

```

### 3.6.1 bmp command descriptions

#### **bmp**

Synopsis	Enter the <b>bmp</b> context
Context	<b>configure bmp</b>
Tree	<a href="#">bmp</a>
Introduced	16.0.R1
Platforms	All

#### **admin-state** *keyword*

Synopsis	Administrative state of the BMP operation
Context	<b>configure bmp admin-state</b> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	16.0.R1
Platforms	All

#### **collector**

Synopsis	Enter the <b>collector</b> context
Context	<b>configure bmp collector</b>
Tree	<a href="#">collector</a>
Introduced	19.10.R1
Platforms	VSR-NRC

#### **admin-state** *keyword*

Synopsis	Administrative state of the BMP collector
Context	<b>configure bmp collector admin-state</b> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable

Introduced 19.10.R1  
Platforms VSR-NRC

## connection

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis Enter the **connection** context  
Context **configure** bmp collector connection  
Tree [connection](#)  
Introduced 19.10.R1  
Platforms VSR-NRC

## ipv4

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis Enter the **ipv4** context  
Context **configure** bmp collector connection ipv4  
Tree [ipv4](#)  
Introduced 19.10.R1  
Platforms VSR-NRC

## address *string*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis IPv4 address  
Context **configure** bmp collector connection ipv4 address *string*  
Tree [address](#)  
Introduced 19.10.R1

Platforms VSR-NRC

### port number

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis IPv4 TCP destination port number

Context **configure** bmp collector connection ipv4 port number

Tree port

Range 1 to 65535

Default 4210

Introduced 19.10.R1

Platforms VSR-NRC

### ipv6

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis Enter the **ipv6** context

Context **configure** bmp collector connection ipv6

Tree ipv6

Introduced 19.10.R1

Platforms VSR-NRC

### address string

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis IPv6 address

Context **configure** bmp collector connection ipv6 address string

Tree address

Introduced 19.10.R1

Platforms VSR-NRC

### **port number**

#### **WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis IPv6 TCP destination port  
 Context **configure bmp collector connection ipv6 port number**  
 Tree [port](#)  
 Range 1 to 65535  
 Default 4210  
 Introduced 19.10.R1  
 Platforms VSR-NRC

### **station [name] string**

Synopsis Enter the **station** list instance  
 Context **configure bmp station string**  
 Tree [station](#)  
 Max. Instances 8  
 Introduced 16.0.R1  
 Platforms All

### **[name] string**

Synopsis BMP monitoring station name  
 Context **configure bmp station string**  
 Tree [station](#)  
 String Length 1 to 32  
 Notes This element is part of a list key.  
 Introduced 16.0.R1  
 Platforms All

**admin-state** *keyword*

Synopsis	Administrative state of the BMP monitoring station
Context	<b>configure</b> <b>bmp station</b> <i>string</i> <b>admin-state</b> <i>keyword</i>
Tree	<b>admin-state</b>
Options	enable, disable
Default	disable
Introduced	16.0.R1
Platforms	All

**connection**

Synopsis	Enter the <b>connection</b> context
Context	<b>configure</b> <b>bmp station</b> <i>string</i> <b>connection</b>
Tree	<b>connection</b>
Introduced	16.0.R1
Platforms	All

**connect-retry** *number*

Synopsis	Maximum time between connection attempts
Context	<b>configure</b> <b>bmp station</b> <i>string</i> <b>connection</b> <b>connect-retry</b> <i>number</i>
Tree	<b>connect-retry</b>
Range	1 to 65535
Units	seconds
Default	120
Introduced	16.0.R1
Platforms	All

**local-address** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	Local IP address to communicate with monitoring station
Context	<b>configure</b> <b>bmp station</b> <i>string</i> <b>connection</b> <b>local-address</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	<b>local-address</b>

Introduced 16.0.R1  
 Platforms All

### **router-instance** *string*

Synopsis Router instance used to reach the BMP station  
 Context **configure** [bmp station string connection router-instance string](#)  
 Tree [router-instance](#)  
 Default Base  
 Introduced 16.0.R4  
 Platforms All

### **station-address**

Synopsis Enter the **station-address** context  
 Context **configure** [bmp station string connection station-address](#)  
 Tree [station-address](#)  
 Introduced 16.0.R1  
 Platforms All

### **ip-address** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis IP address of the remote BMP monitoring station  
 Context **configure** [bmp station string connection station-address ip-address \(ipv4-address-no-zone | ipv6-address-no-zone\)](#)  
 Tree [ip-address](#)  
 Introduced 16.0.R1  
 Platforms All

### **port** *number*

Synopsis BMP monitoring station port  
 Context **configure** [bmp station string connection station-address port number](#)  
 Tree [port](#)  
 Range 1 to 65535  
 Introduced 16.0.R1

Platforms All

### tcp-keepalive

Synopsis Enter the **tcp-keepalive** context  
Context **configure** **bmp station** *string* **connection tcp-keepalive**  
Tree **tcp-keepalive**  
Introduced 16.0.R1  
Platforms All

### admin-state *keyword*

Synopsis Administrative state of the TCP keepalive  
Context **configure** **bmp station** *string* **connection tcp-keepalive admin-state** *keyword*  
Tree **admin-state**  
Options enable, disable  
Default disable  
Introduced 16.0.R1  
Platforms All

### keep-count *number*

Synopsis Keepalive threshold before connection is declared down  
Context **configure** **bmp station** *string* **connection tcp-keepalive keep-count** *number*  
Tree **keep-count**  
Range 3 to 100  
Default 4  
Introduced 16.0.R1  
Platforms All

### keep-idle *number*

Synopsis Time until the first TCP keepalive probe is sent  
Context **configure** **bmp station** *string* **connection tcp-keepalive keep-idle** *number*  
Tree **keep-idle**

Range	1 to 100000
Units	seconds
Default	600
Introduced	16.0.R1
Platforms	All

### **keep-interval** *number*

Synopsis	Time between two TCP keepalive probes
Context	<b>configure</b> <b>bmp station</b> <i>string</i> <b>connection tcp-keepalive keep-interval</b> <i>number</i>
Tree	<b>keep-interval</b>
Range	1 to 100000
Units	seconds
Default	15
Introduced	16.0.R1
Platforms	All

### **description** *string*

Synopsis	Text description
Context	<b>configure</b> <b>bmp station</b> <i>string</i> <b>description</b> <i>string</i>
Tree	<b>description</b>
String Length	1 to 80
Introduced	16.0.R1
Platforms	All

### **family**

Synopsis	Enter the <b>family</b> context
Context	<b>configure</b> <b>bmp station</b> <i>string</i> <b>family</b>
Tree	<b>family</b>
Description	Commands in this context specify the address families that are reported to a BMP monitoring station.
Introduced	16.0.R1
Platforms	All

### **evpn boolean**

Synopsis	Support EVPN address family
Context	<b>configure bmp station string family evpn boolean</b>
Tree	<a href="#">evpn</a>
Default	false
Introduced	16.0.R4
Platforms	All

### **ipv4 boolean**

Synopsis	Support IPv4 address family
Context	<b>configure bmp station string family ipv4 boolean</b>
Tree	<a href="#">ipv4</a>
Default	true
Introduced	16.0.R1
Platforms	All

### **ipv6 boolean**

Synopsis	Support IPv6 address family
Context	<b>configure bmp station string family ipv6 boolean</b>
Tree	<a href="#">ipv6</a>
Default	false
Introduced	16.0.R1
Platforms	All

### **l2-vpn boolean**

Synopsis	Support L2 VPN address family
Context	<b>configure bmp station string family l2-vpn boolean</b>
Tree	<a href="#">l2-vpn</a>
Default	false
Introduced	16.0.R4
Platforms	All

**label-ipv4** *boolean*

Synopsis	Support labeled IPv4 address family
Context	<b>configure</b> <b>bmp station</b> <i>string</i> <b>family label-ipv4</b> <i>boolean</i>
Tree	<a href="#">label-ipv4</a>
Default	false
Introduced	16.0.R1
Platforms	All

**label-ipv6** *boolean*

Synopsis	Support labeled IPv6 address family
Context	<b>configure</b> <b>bmp station</b> <i>string</i> <b>family label-ipv6</b> <i>boolean</i>
Tree	<a href="#">label-ipv6</a>
Default	false
Introduced	16.0.R1
Platforms	All

**mcast-ipv4** *boolean*

Synopsis	Support IPv4 multicast address family
Context	<b>configure</b> <b>bmp station</b> <i>string</i> <b>family mcast-ipv4</b> <i>boolean</i>
Tree	<a href="#">mcast-ipv4</a>
Default	false
Introduced	16.0.R4
Platforms	All

**mcast-ipv6** *boolean*

Synopsis	Support IPv6 multicast address family
Context	<b>configure</b> <b>bmp station</b> <i>string</i> <b>family mcast-ipv6</b> <i>boolean</i>
Tree	<a href="#">mcast-ipv6</a>
Default	false
Introduced	16.0.R4
Platforms	All

### **mcast-vpn-ipv4** *boolean*

Synopsis	Support IPv4 VPN multicast address family
Context	<b>configure</b> <a href="#">bmp station</a> <i>string</i> <a href="#">family mcast-vpn-ipv4</a> <i>boolean</i>
Tree	<a href="#">mcast-vpn-ipv4</a>
Default	false
Introduced	16.0.R4
Platforms	All

### **mcast-vpn-ipv6** *boolean*

Synopsis	Support IPv6 VPN multicast address family
Context	<b>configure</b> <a href="#">bmp station</a> <i>string</i> <a href="#">family mcast-vpn-ipv6</a> <i>boolean</i>
Tree	<a href="#">mcast-vpn-ipv6</a>
Default	false
Introduced	16.0.R4
Platforms	All

### **sr-policy-ipv4** *boolean*

Synopsis	Support SR policy IPv4 address family
Context	<b>configure</b> <a href="#">bmp station</a> <i>string</i> <a href="#">family sr-policy-ipv4</a> <i>boolean</i>
Tree	<a href="#">sr-policy-ipv4</a>
Default	false
Introduced	22.5.R1
Platforms	All

### **sr-policy-ipv6** *boolean*

Synopsis	Support SR policy IPv6 address family
Context	<b>configure</b> <a href="#">bmp station</a> <i>string</i> <a href="#">family sr-policy-ipv6</a> <i>boolean</i>
Tree	<a href="#">sr-policy-ipv6</a>
Default	false
Introduced	22.5.R1
Platforms	All

**vpn-ipv4** *boolean*

Synopsis	Support VPN IPv4 address family
Context	<b>configure</b> <a href="#">bmp station</a> <i>string</i> <a href="#">family vpn-ipv4</a> <i>boolean</i>
Tree	<a href="#">vpn-ipv4</a>
Default	false
Introduced	16.0.R1
Platforms	All

**vpn-ipv6** *boolean*

Synopsis	Support VPN IPv6 address family
Context	<b>configure</b> <a href="#">bmp station</a> <i>string</i> <a href="#">family vpn-ipv6</a> <i>boolean</i>
Tree	<a href="#">vpn-ipv6</a>
Default	false
Introduced	16.0.R1
Platforms	All

**initiation-message** *string*

Synopsis	Free form initiation message sent to monitoring station
Context	<b>configure</b> <a href="#">bmp station</a> <i>string</i> <a href="#">initiation-message</a> <i>string</i>
Tree	<a href="#">initiation-message</a>
String Length	1 to 255
Introduced	16.0.R1
Platforms	All

**report-local-routes** *boolean*

Synopsis	Allow local route reporting to BMP monitoring station
Context	<b>configure</b> <a href="#">bmp station</a> <i>string</i> <a href="#">report-local-routes</a> <i>boolean</i>
Tree	<a href="#">report-local-routes</a>
Default	false
Introduced	16.0.R1
Platforms	All

**stats-report-interval** *number*

Synopsis	Frequency of reports sent to the BMP monitoring station
Context	<b>configure</b> <b>bmp station</b> <i>string</i> <b>stats-report-interval</b> <i>number</i>
Tree	<b>stats-report-interval</b>
Range	15 to 65535
Units	seconds
Introduced	16.0.R1
Platforms	All

## 3.7 bof commands

```

bof
- auto-boot
- dhcp
  - client-id (keyword | hex-string | string)
  - inband
    - disabled boolean
    - null-encapsulation boolean
    - vlan number
    - vlan-discovery boolean
  - include-user-class boolean
  - ipv4 boolean
  - ipv6 boolean
  - management-port boolean
- ospf
  - mtu number
  - neid string
  - neip-ipv4 string
  - neip-ipv6 string
  - vendor-id number
  - port-mtu number
  - timeout number
- auto-configure
- ipv4
  - dhcp
    - client-id (hex-string | string)
    - include-user-class boolean
    - timeout number
  - ipv6
    - dhcp
      - client-id (hex-string | string)
      - client-type keyword
      - include-user-class boolean
      - timeout number
- configuration
  - encrypt boolean
  - encryption-key string
  - password string
  - primary-location string
  - secondary-location string
  - tertiary-location string
- console
  - speed number
  - wait-time number
- dns
  - domain string
  - primary-server (ipv4-address-no-zone | ipv6-address-no-zone)
  - secondary-server (ipv4-address-no-zone | ipv6-address-no-zone)
  - tertiary-server (ipv4-address-no-zone | ipv6-address-no-zone)
- image
  - primary-location string
  - secondary-location string
  - tertiary-location string
- li
  - local-save boolean
  - separate boolean
- license
  - primary-location string
- port string
  - autonegotiate keyword

```

## bof port duplex

- **duplex** *keyword*
- **speed** *number*
- **router** *string*
- **interface** *string*
  - **cpm** *keyword*
  - **ipv4**
    - **ip-address** *string*
    - **prefix-length** *number*
  - **ipv6**
    - **ipv6-address** *string*
    - **prefix-length** *number*
  - **ip-mtu** *number*
- **static-routes**
  - **route** (*ipv4-prefix | ipv6-prefix*)
    - **next-hop** (*ipv4-address-no-zone | ipv6-address-no-zone*)
- **system**
  - **base-mac-address** *string*
  - **persistent-indices** *boolean*
  - **profile** *keyword*

### 3.7.1 bof command descriptions

#### bof

Synopsis	Configure system boot options
Context	<a href="#">bof</a>
Tree	<a href="#">bof</a>
Description	<p>This command creates or edits the boot option file (BOF) for the specified local storage device.</p> <p>A BOF file specifies where the system searches for runtime images, configuration files, and other operational parameters during system initialization.</p> <p>BOF parameters can be modified. Changes can be saved to a specified compact flash. The BOF must be located in the root directory of either an internal or external compact flash local to the system and have the mandatory filename of bof.cfg.</p> <p>When modifications are made to in-memory parameters that are currently in use or operating, the changes are effective immediately. For example, if the IP address of the management port is changed, the change takes place immediately.</p> <p>Only one entry of the BOF configuration command statement can be saved once the statement has been found to be syntactically correct.</p> <p>When opening an existing BOF that is not the BOF used in the most recent boot, a message is issued notifying the user that the parameters will not affect the operation of the node.</p> <p>No default boot option file exists. The router boots with the factory default boot sequence and options.</p>
Introduced	20.10.R1
Platforms	All

#### auto-boot

**Note:**

The new value of this element takes effect when the router boots.

Synopsis	Enable the <b>auto-boot</b> context
Context	<a href="#">bof auto-boot</a>
Tree	<a href="#">auto-boot</a>
Introduced	20.10.R1
Platforms	7450 ESS-7, 7750 SR-1, 7750 SR-7, 7750 SR-1e, 7750 SR-2e, 7750 SR-s

## dhcp

**Note:**

The new value of this element takes effect when the router boots.

Synopsis	Enable the <b>dhcp</b> context
Context	<a href="#">bof auto-boot dhcp</a>
Tree	<a href="#">dhcp</a>
Notes	The following elements are part of a choice: <b>dhcp</b> or <b>ospf</b> .
Introduced	21.2.R1
Platforms	7450 ESS-7, 7750 SR-1, 7750 SR-7, 7750 SR-1e, 7750 SR-2e, 7750 SR-s

## client-id (*keyword* | *hex-string* | *string*)

**Note:**

The new value of this element takes effect when the router boots.

Synopsis	DHCP client ID
Context	<a href="#">bof auto-boot dhcp client-id</a> ( <i>keyword</i>   <i>hex-string</i>   <i>string</i> )
Tree	<a href="#">client-id</a>
String Length	3 to 118
Options	use-chassis-mac-address
Introduced	21.2.R1
Platforms	7450 ESS-7, 7750 SR-1, 7750 SR-7, 7750 SR-1e, 7750 SR-2e, 7750 SR-s

## inband

**Note:**

The new value of this element takes effect when the router boots.

Synopsis	Enable the <b>inband</b> context
Context	<a href="#">bof auto-boot dhcp inband</a>
Tree	<a href="#">inband</a>
Introduced	21.2.R1
Platforms	7450 ESS-7, 7750 SR-1, 7750 SR-7, 7750 SR-1e, 7750 SR-2e, 7750 SR-s

**disabled** *boolean***Note:**

The new value of this element takes effect when the router boots.

Synopsis	Do not use in-band ports
Context	<a href="#">bof auto-boot dhcp inband disabled</a> <i>boolean</i>
Tree	<a href="#">disabled</a>
Default	true
Notes	The following elements are part of a choice: <b>disabled</b> , <b>null-encapsulation</b> , <b>vlan</b> , or <b>vlan-discovery</b> .
Introduced	21.2.R1
Platforms	7450 ESS-7, 7750 SR-1, 7750 SR-7, 7750 SR-1e, 7750 SR-2e, 7750 SR-s

**null-encapsulation** *boolean***Note:**

The new value of this element takes effect when the router boots.

Synopsis	Use null encapsulation
Context	<a href="#">bof auto-boot dhcp inband null-encapsulation</a> <i>boolean</i>
Tree	<a href="#">null-encapsulation</a>
Default	true
Notes	The following elements are part of a choice: <b>disabled</b> , <b>null-encapsulation</b> , <b>vlan</b> , or <b>vlan-discovery</b> .
Introduced	21.2.R1
Platforms	7450 ESS-7, 7750 SR-1, 7750 SR-7, 7750 SR-1e, 7750 SR-2e, 7750 SR-s

**vlan** *number***Note:**

The new value of this element takes effect when the router boots.

Synopsis	In-band VLAN ID
Context	<a href="#">bof auto-boot dhcp inband vlan</a> <i>number</i>
Tree	<a href="#">vlan</a>
Range	1 to 4094

Notes	The following elements are part of a choice: <b>disabled</b> , <b>null-encapsulation</b> , <b>vlan</b> , or <b>vlan-discovery</b> .
Introduced	21.2.R1
Platforms	7450 ESS-7, 7750 SR-1, 7750 SR-7, 7750 SR-1e, 7750 SR-2e, 7750 SR-s

### **vlan-discovery** *boolean*

**Note:**

The new value of this element takes effect when the router boots.

Synopsis	Use VLAN discovery
Context	<a href="#">bof auto-boot dhcp inband vlan-discovery</a> <i>boolean</i>
Tree	<a href="#">vlan-discovery</a>
Default	true
Notes	The following elements are part of a choice: <b>disabled</b> , <b>null-encapsulation</b> , <b>vlan</b> , or <b>vlan-discovery</b> .
Introduced	21.2.R1
Platforms	7450 ESS-7, 7750 SR-1, 7750 SR-7, 7750 SR-1e, 7750 SR-2e, 7750 SR-s

### **include-user-class** *boolean*

**Note:**

The new value of this element takes effect when the router boots.

Synopsis	Include user class in auto boot provisioning
Context	<a href="#">bof auto-boot dhcp include-user-class</a> <i>boolean</i>
Tree	<a href="#">include-user-class</a>
Default	true
Introduced	21.2.R1
Platforms	7450 ESS-7, 7750 SR-1, 7750 SR-7, 7750 SR-1e, 7750 SR-2e, 7750 SR-s

### **ipv4** *boolean*

**Note:**

The new value of this element takes effect when the router boots.

Synopsis	Use auto boot with IPv4
----------	-------------------------

Context	<a href="#">bof auto-boot dhcp ipv4</a> <i>boolean</i>
Tree	<a href="#">ipv4</a>
Default	true
Introduced	21.2.R1
Platforms	7450 ESS-7, 7750 SR-1, 7750 SR-7, 7750 SR-1e, 7750 SR-2e, 7750 SR-s

## ipv6 *boolean*

### Note:

The new value of this element takes effect when the router boots.

Synopsis	Use auto boot with IPv6
Context	<a href="#">bof auto-boot dhcp ipv6</a> <i>boolean</i>
Tree	<a href="#">ipv6</a>
Default	true
Introduced	21.2.R1
Platforms	7450 ESS-7, 7750 SR-1, 7750 SR-7, 7750 SR-1e, 7750 SR-2e, 7750 SR-s

## management-port *boolean*

### Note:

The new value of this element takes effect when the router boots.

Synopsis	Use auto boot on the management port
Context	<a href="#">bof auto-boot dhcp management-port</a> <i>boolean</i>
Tree	<a href="#">management-port</a>
Default	true
Introduced	21.2.R1
Platforms	7450 ESS-7, 7750 SR-1, 7750 SR-7, 7750 SR-1e, 7750 SR-2e, 7750 SR-s

## ospf

### Note:

The new value of this element takes effect when the router boots.

Synopsis	Enable the <b>ospf</b> context
Context	<a href="#">bof auto-boot ospf</a>

Tree	<a href="#">ospf</a>
Notes	The following elements are part of a choice: <b>dhcp</b> or <b>ospf</b> .
Introduced	21.2.R1
Platforms	7450 ESS-7, 7750 SR-1, 7750 SR-7, 7750 SR-1e, 7750 SR-2e, 7750 SR-s

### **mtu number**

**Note:**

The new value of this element takes effect when the router boots.

Synopsis	OSPF MTU
Context	<a href="#">bof auto-boot ospf mtu number</a>
Tree	<a href="#">mtu</a>
Range	512 to 9786
Units	bytes
Default	1500
Introduced	21.2.R1
Platforms	7450 ESS-7, 7750 SR-1, 7750 SR-7, 7750 SR-1e, 7750 SR-2e, 7750 SR-s

### **neid string**

**Note:**

The new value of this element takes effect when the router boots.

Synopsis	Network element ID
Context	<a href="#">bof auto-boot ospf neid string</a>
Tree	<a href="#">neid</a>
String Length	3
Introduced	21.2.R1
Platforms	7450 ESS-7, 7750 SR-1, 7750 SR-7, 7750 SR-1e, 7750 SR-2e, 7750 SR-s

### **neip-ipv4 string**

**Note:**

The new value of this element takes effect when the router boots.

Synopsis	Network element IPv4 address
Context	<a href="#">bof auto-boot ospf neip-ipv4 string</a>
Tree	<a href="#">neip-ipv4</a>
Introduced	21.2.R1
Platforms	7450 ESS-7, 7750 SR-1, 7750 SR-7, 7750 SR-1e, 7750 SR-2e, 7750 SR-s

### **neip-ipv6 string**

**Note:**

The new value of this element takes effect when the router boots.

Synopsis	Network element IPv6 address
Context	<a href="#">bof auto-boot ospf neip-ipv6 string</a>
Tree	<a href="#">neip-ipv6</a>
Introduced	21.2.R1
Platforms	7450 ESS-7, 7750 SR-1, 7750 SR-7, 7750 SR-1e, 7750 SR-2e, 7750 SR-s

### **vendor-id number**

**Note:**

The new value of this element takes effect when the router boots.

Synopsis	Vendor ID
Context	<a href="#">bof auto-boot ospf vendor-id number</a>
Tree	<a href="#">vendor-id</a>
Range	1 to 254
Default	140
Introduced	21.2.R1
Platforms	7450 ESS-7, 7750 SR-1, 7750 SR-7, 7750 SR-1e, 7750 SR-2e, 7750 SR-s

### **port-mtu number**

**Note:**

The new value of this element takes effect when the router boots.

Synopsis	Port MTU setting
Context	<a href="#">bof auto-boot port-mtu number</a>

Tree	<a href="#">port-mtu</a>
Range	512 to 9800
Units	bytes
Introduced	21.2.R1
Platforms	7450 ESS-7, 7750 SR-1, 7750 SR-7, 7750 SR-1e, 7750 SR-2e, 7750 SR-s

## timeout *number*

### Note:

The new value of this element takes effect when the router boots.

Synopsis	ZTP timeout
Context	<a href="#">bof auto-boot timeout <i>number</i></a>
Tree	<a href="#">timeout</a>
Description	This command configures the Zero Touch Provisioning timeout, which is the total time allowed for the ZTP process to execute successfully. If the ZTP process is unsuccessful (in the case of auto-boot using OSPF, if no OSPF adjacency is found), the node is first rebooted, then the ZTP process is retried.
Range	30 to 1440
Units	minutes
Introduced	22.7.R1
Platforms	7450 ESS-7, 7750 SR-1, 7750 SR-7, 7750 SR-1e, 7750 SR-2e, 7750 SR-s

## auto-configure

Synopsis	Enter the <b>auto-configure</b> context
Context	<a href="#">bof auto-configure</a>
Tree	<a href="#">auto-configure</a>
Introduced	20.10.R1
Platforms	7450 ESS-7, 7750 SR-1, 7750 SR-7, 7750 SR-1e, 7750 SR-2e, 7750 SR-s

## ipv4

Synopsis	Enter the <b>ipv4</b> context
Context	<a href="#">bof auto-configure ipv4</a>
Tree	<a href="#">ipv4</a>

Introduced	20.10.R1
Platforms	7450 ESS-7, 7750 SR-1, 7750 SR-7, 7750 SR-1e, 7750 SR-2e, 7750 SR-s

## dhcp

### Note:

The new value of this element takes effect when the router boots.

Synopsis	Enable the <b>dhcp</b> context
Context	<a href="#">bof auto-configure ipv4 dhcp</a>
Tree	<a href="#">dhcp</a>
Introduced	20.10.R1
Platforms	7450 ESS-7, 7750 SR-1, 7750 SR-7, 7750 SR-1e, 7750 SR-2e, 7750 SR-s

## client-id (*hex-string* | *string*)

### WARNING:

Modifying this element recreates the parent element automatically for the new value to take effect.

### Note:

The new value of this element takes effect when the router boots.

Synopsis	DHCP client ID
Context	<a href="#">bof auto-configure ipv4 dhcp client-id</a> ( <i>hex-string</i>   <i>string</i> )
Tree	<a href="#">client-id</a>
String Length	3 to 256
Introduced	20.10.R1
Platforms	7450 ESS-7, 7750 SR-1, 7750 SR-7, 7750 SR-1e, 7750 SR-2e, 7750 SR-s

## include-user-class *boolean*

### WARNING:

Modifying this element recreates the parent element automatically for the new value to take effect.

**Note:**

The new value of this element takes effect when the router boots.

Synopsis	Include user class information
Context	<a href="#">bof auto-configure ipv4 dhcp include-user-class</a> <i>boolean</i>
Tree	<a href="#">include-user-class</a>
Introduced	20.10.R1
Platforms	7450 ESS-7, 7750 SR-1, 7750 SR-7, 7750 SR-1e, 7750 SR-2e, 7750 SR-s

**timeout** *number***WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

**Note:**

The new value of this element takes effect when the router boots.

Synopsis	DHCP timeout
Context	<a href="#">bof auto-configure ipv4 dhcp timeout</a> <i>number</i>
Tree	<a href="#">timeout</a>
Range	1 to 65535
Default	30
Introduced	20.10.R1
Platforms	7450 ESS-7, 7750 SR-1, 7750 SR-7, 7750 SR-1e, 7750 SR-2e, 7750 SR-s

**ipv6**

Synopsis	Enter the <b>ipv6</b> context
Context	<a href="#">bof auto-configure ipv6</a>
Tree	<a href="#">ipv6</a>
Introduced	20.10.R1
Platforms	7450 ESS-7, 7750 SR-1, 7750 SR-7, 7750 SR-1e, 7750 SR-2e, 7750 SR-s

## dhcp

**Note:**

The new value of this element takes effect when the router boots.

Synopsis	Enable the <b>dhcp</b> context
Context	<a href="#">bof auto-configure ipv6 dhcp</a>
Tree	<a href="#">dhcp</a>
Introduced	20.10.R1
Platforms	7450 ESS-7, 7750 SR-1, 7750 SR-7, 7750 SR-1e, 7750 SR-2e, 7750 SR-s

## client-id (*hex-string* | *string*)

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

**Note:**

The new value of this element takes effect when the router boots.

Synopsis	DHCP client ID
Context	<a href="#">bof auto-configure ipv6 dhcp client-id</a> ( <i>hex-string</i>   <i>string</i> )
Tree	<a href="#">client-id</a>
String Length	3 to 250
Introduced	20.10.R1
Platforms	7450 ESS-7, 7750 SR-1, 7750 SR-7, 7750 SR-1e, 7750 SR-2e, 7750 SR-s

## client-type *keyword*

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

**Note:**

The new value of this element takes effect when the router boots.

Synopsis	DHCP client type
Context	<a href="#">bof auto-configure ipv6 dhcp client-type</a> <i>keyword</i>
Tree	<a href="#">client-type</a>

Options	duid-enterprise, duid-link-local
Introduced	20.10.R1
Platforms	7450 ESS-7, 7750 SR-1, 7750 SR-7, 7750 SR-1e, 7750 SR-2e, 7750 SR-s

### **include-user-class** *boolean*

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

**Note:**

The new value of this element takes effect when the router boots.

Synopsis	Include user class information
Context	<a href="#">bof auto-configure ipv6 dhcp include-user-class</a> <i>boolean</i>
Tree	<a href="#">include-user-class</a>
Introduced	20.10.R1
Platforms	7450 ESS-7, 7750 SR-1, 7750 SR-7, 7750 SR-1e, 7750 SR-2e, 7750 SR-s

### **timeout** *number*

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

**Note:**

The new value of this element takes effect when the router boots.

Synopsis	DHCP timeout
Context	<a href="#">bof auto-configure ipv6 dhcp timeout</a> <i>number</i>
Tree	<a href="#">timeout</a>
Range	1 to 65535
Default	30
Introduced	20.10.R1
Platforms	7450 ESS-7, 7750 SR-1, 7750 SR-7, 7750 SR-1e, 7750 SR-2e, 7750 SR-s

## configuration

Synopsis	Enter the <b>configuration</b> context
Context	<a href="#">bof configuration</a>
Tree	<a href="#">configuration</a>
Introduced	20.10.R1
Platforms	All

## encrypt *boolean*

**Note:**

The new value of this element takes effect when the candidate is committed.

Synopsis	Enable encryption of BOF configuration files
Context	<a href="#">bof configuration encrypt <i>boolean</i></a>
Tree	<a href="#">encrypt</a>
Description	<p>When configured to <b>true</b>, this command enables encryption of the BOF using AES256 and SHA256.</p> <p>When the BOF is encrypted on the compact flash, it is still reachable using the BOF interactive menu during node startup, and fields can be modified using the BOF interactive menu.</p>
Default	false
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## encryption-key *string*

**Note:**

The new value of this element takes effect when the candidate is committed.

Synopsis	Secret key for encryption of configuration files
Context	<a href="#">bof configuration encryption-key <i>string</i></a>
Tree	<a href="#">encryption-key</a>
Description	<p>This command creates a key to be used by AES256 and SHA256 for configuration file encryption and hashing. This key is used for all configuration files (primary, secondary, and tertiary).</p> <p>After creating or deleting a key, save the configuration file with the current encryption key state.</p>

String Length 1 to 71  
Introduced 21.7.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **password** *string*

**Note:**

The new value of this element takes effect when the candidate is committed.

Synopsis Password for boot-time modification of boot options  
Context [bof configuration password string](#)  
Tree [password](#)  
String Length 1 to 71  
Introduced 21.7.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **primary-location** *string*

**Note:**

The new value of this element takes effect when the candidate is committed.

Synopsis Primary configuration location  
Context [bof configuration primary-location string](#)  
Tree [primary-location](#)  
String Length 1 to 199  
Introduced 20.10.R1  
Platforms All

### **secondary-location** *string*

**Note:**

The new value of this element takes effect when the candidate is committed.

Synopsis Secondary configuration location  
Context [bof configuration secondary-location string](#)  
Tree [secondary-location](#)  
String Length 1 to 199

Introduced	20.10.R1
Platforms	All

### **tertiary-location** *string*

**Note:**

The new value of this element takes effect when the candidate is committed.

Synopsis	Tertiary configuration location
Context	<a href="#">bof configuration tertiary-location</a> <i>string</i>
Tree	<a href="#">tertiary-location</a>
String Length	1 to 199
Introduced	20.10.R1
Platforms	All

### **console**

Synopsis	Enter the <b>console</b> context
Context	<a href="#">bof console</a>
Tree	<a href="#">console</a>
Introduced	20.10.R1
Platforms	All

### **speed** *number*

**Note:**

The new value of this element takes effect when the candidate is committed.

Synopsis	Console port speed
Context	<a href="#">bof console speed</a> <i>number</i>
Tree	<a href="#">speed</a>
Range	9600   19200   38400   57600   115200
Units	bps
Default	115200
Introduced	20.10.R1

Platforms 7450 ESS, 7750 SR-1, 7750 SR-7/12/12e, 7750 SR-a, 7750 SR-e, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s, 7950 XRS, VSR

### **wait-time** *number*

**Note:**

The new value of this element takes effect when the router boots.

Synopsis Wait time for interrupt to change boot parameters  
 Context [bof console wait-time number](#)  
 Tree [wait-time](#)  
 Range 1 to 10  
 Units seconds  
 Default 3  
 Introduced 20.10.R1  
 Platforms All

### **dns**

Synopsis Enter the **dns** context  
 Context [bof dns](#)  
 Tree [dns](#)  
 Introduced 20.10.R1  
 Platforms All

### **domain** *string*

**Note:**

The new value of this element takes effect when the candidate is committed.

Synopsis System DNS domain name for DNS address resolution  
 Context [bof dns domain string](#)  
 Tree [domain](#)  
 String Length 1 to 178  
 Introduced 20.10.R1  
 Platforms All

**primary-server** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)**Note:**

The new value of this element takes effect when the candidate is committed.

Synopsis	Primary DNS server
Context	<a href="#">bof dns primary-server</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	<a href="#">primary-server</a>
Introduced	20.10.R1
Platforms	All

**secondary-server** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)**Note:**

The new value of this element takes effect when the candidate is committed.

Synopsis	Secondary DNS server
Context	<a href="#">bof dns secondary-server</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	<a href="#">secondary-server</a>
Introduced	20.10.R1
Platforms	All

**tertiary-server** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)**Note:**

The new value of this element takes effect when the candidate is committed.

Synopsis	Tertiary DNS server
Context	<a href="#">bof dns tertiary-server</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	<a href="#">tertiary-server</a>
Introduced	20.10.R1
Platforms	All

**image**

Synopsis	Enter the <b>image</b> context
Context	<a href="#">bof image</a>

Tree	<a href="#">image</a>
Introduced	20.10.R1
Platforms	All

### **primary-location** *string*

**Note:**

The new value of this element takes effect when the router boots.

Synopsis	Primary image location
Context	<a href="#">bof image primary-location</a> <i>string</i>
Tree	<a href="#">primary-location</a>
String Length	1 to 199
Introduced	20.10.R1
Platforms	All

### **secondary-location** *string*

**Note:**

The new value of this element takes effect when the router boots.

Synopsis	Secondary image location
Context	<a href="#">bof image secondary-location</a> <i>string</i>
Tree	<a href="#">secondary-location</a>
String Length	1 to 199
Introduced	20.10.R1
Platforms	All

### **tertiary-location** *string*

**Note:**

The new value of this element takes effect when the router boots.

Synopsis	Tertiary image location
Context	<a href="#">bof image tertiary-location</a> <i>string</i>
Tree	<a href="#">tertiary-location</a>
String Length	1 to 199

Introduced 20.10.R1  
Platforms All

## li

Synopsis Enter the **li** context  
Context [bof li](#)  
Tree [li](#)  
Introduced 20.10.R1  
Platforms All

## local-save *boolean*

**Note:**

The new value of this element takes effect when the router boots.

Synopsis Save the LI configuration locally  
Context [bof li local-save \*boolean\*](#)  
Tree [local-save](#)  
Introduced 20.10.R1  
Platforms All

## separate *boolean*

**Note:**

The new value of this element takes effect when the router boots.

Synopsis Separate access to the LI information  
Context [bof li separate \*boolean\*](#)  
Tree [separate](#)  
Introduced 20.10.R1  
Platforms All

## license

Synopsis Enter the **license** context

Context	<a href="#">bof license</a>
Tree	<a href="#">license</a>
Introduced	20.10.R1
Platforms	All

### **primary-location** *string*

**Note:**

The new value of this element takes effect when the candidate is committed.

Synopsis	Primary license file location
Context	<a href="#">bof license primary-location</a> <i>string</i>
Tree	<a href="#">primary-location</a>
String Length	1 to 199
Introduced	20.10.R1
Platforms	All

### **port** [[router-name](#)] *string*

**Note:**

The new value of this element takes effect when the candidate is committed.

Synopsis	Enter the <b>port</b> list instance
Context	<a href="#">bof port</a> <i>string</i>
Tree	<a href="#">port</a>
Max. Instances	1
Introduced	20.10.R1
Platforms	All

### **[router-name]** *string*

Synopsis	Administrative router name
Context	<a href="#">bof port</a> <i>string</i>
Tree	<a href="#">port</a>
String Length	1 to 64

MD-CLI	management
Default	
Notes	This element is part of a list key.
Introduced	20.10.R1
Platforms	All

### **autonegotiate** *keyword*

**Note:**

The new value of this element takes effect when the candidate is committed.

Synopsis	Auto-negotiate speed and duplex type on Ethernet port
Context	<a href="#">bof port string autonegotiate keyword</a>
Tree	<a href="#">autonegotiate</a>
Options	false, true
Default	true
Introduced	20.10.R1
Platforms	All

### **duplex** *keyword*

**Note:**

The new value of this element takes effect when the candidate is committed.

Synopsis	Duplex type for the Ethernet port
Context	<a href="#">bof port string duplex keyword</a>
Tree	<a href="#">duplex</a>
Options	full, half
Default	full
Introduced	20.10.R1
Platforms	All

### **speed** *number*

**Note:**

The new value of this element takes effect when the candidate is committed.

Synopsis	Speed of the Ethernet port
Context	<code>bof port string speed number</code>
Tree	<code>speed</code>
Range	10   100   1000
Units	megabps
Default	100
Introduced	20.10.R1
Platforms	All

### **router** [`router-name`] *string*

**Note:**

The new value of this element takes effect when the candidate is committed.

Synopsis	Enter the <b>router</b> list instance
Context	<code>bof router string</code>
Tree	<code>router</code>
Description	This command creates a router instance which represents a virtual router in the system. There will always be at least two instances in the system. The Base or transport router and the management router are created when the system is initialized and cannot be deleted.
Max. Instances	1
Introduced	20.10.R1
Platforms	All

### **[router-name]** *string*

Synopsis	Administrative router name
Context	<code>bof router string</code>
Tree	<code>router</code>
String Length	1 to 64
MD-CLI Default	management
Notes	This element is part of a list key.
Introduced	20.10.R1
Platforms	All

**interface** [[interface-name](#)] *string***Note:**

The new value of this element takes effect when the candidate is committed.

Synopsis	Enter the <b>interface</b> list instance
Context	<a href="#">bof router</a> <i>string</i> <a href="#">interface</a> <i>string</i>
Tree	<a href="#">interface</a>
Description	Commands in this context create a logical IP routing or unnumbered MPLS-TP interface. Once created, an IP address, port, or system can be associated with the IP interface.
Max. Instances	1
Introduced	20.10.R1
Platforms	All

**[interface-name]** *string*

Synopsis	Router interface name
Context	<a href="#">bof router</a> <i>string</i> <a href="#">interface</a> <i>string</i>
Tree	<a href="#">interface</a>
String Length	1 to 32
MD-CLI Default	management
Notes	This element is part of a list key.
Introduced	20.10.R1
Platforms	All

**cpm** [[cpm-type](#)] *keyword***Note:**

The new value of this element takes effect when the candidate is committed.

Synopsis	Enter the <b>cpm</b> list instance
Context	<a href="#">bof router</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">cpm</a> <i>keyword</i>
Tree	<a href="#">cpm</a>
Introduced	20.10.R1

Platforms All

### [cpm-type] keyword

Synopsis CPM type  
 Context [bof router string interface string cpm keyword](#)  
 Tree [cpm](#)  
 Options active, standby, a, b, c, d  
 Notes This element is part of a list key.  
 Introduced 20.10.R1  
 Platforms All

### ipv4

**Note:**

The new value of this element takes effect when the candidate is committed.

Synopsis Enable the **ipv4** context  
 Context [bof router string interface string cpm keyword ipv4](#)  
 Tree [ipv4](#)  
 Introduced 20.10.R1  
 Platforms All

### ip-address string

**Note:**

The new value of this element takes effect when the candidate is committed.

Synopsis IPv4 address assigned to the interface  
 Context [bof router string interface string cpm keyword ipv4 ip-address string](#)  
 Tree [ip-address](#)  
 Description This command assigns an IP address to the management Ethernet port on a CPM. The active and standby IP addresses must be on the same subnet.  
 Notes This element is mandatory.  
 Introduced 20.10.R1  
 Platforms All

**prefix-length** *number***Note:**

The new value of this element takes effect when the candidate is committed.

Synopsis	IPv4 address prefix length
Context	<a href="#">bof router</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">cpm</a> <i>keyword</i> <a href="#">ipv4</a> <a href="#">prefix-length</a> <i>number</i>
Tree	<a href="#">prefix-length</a>
Range	0 to 32
Notes	This element is mandatory.
Introduced	20.10.R1
Platforms	All

**ipv6****Note:**

The new value of this element takes effect when the candidate is committed.

Synopsis	Enable the <b>ipv6</b> context
Context	<a href="#">bof router</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">cpm</a> <i>keyword</i> <a href="#">ipv6</a>
Tree	<a href="#">ipv6</a>
Introduced	20.10.R1
Platforms	All

**ipv6-address** *string***Note:**

The new value of this element takes effect when the candidate is committed.

Synopsis	IPv6 address assigned to the interface
Context	<a href="#">bof router</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">cpm</a> <i>keyword</i> <a href="#">ipv6</a> <a href="#">ipv6-address</a> <i>string</i>
Tree	<a href="#">ipv6-address</a>
Description	This command assigns an IP address to the management Ethernet port on a CPM. The active and standby IP addresses must be on the same subnet.
Introduced	20.10.R1
Platforms	All

## prefix-length *number*

**Note:**

The new value of this element takes effect when the candidate is committed.

Synopsis	IPv6 address prefix length
Context	<a href="#">bof router</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">cpm</a> <i>keyword</i> <a href="#">ipv6</a> <a href="#">prefix-length</a> <i>number</i>
Tree	<a href="#">prefix-length</a>
Range	0 to 128
Notes	This element is mandatory.
Introduced	20.10.R1
Platforms	All

## ip-mtu *number*

**Note:**

The new value of this element takes effect when the candidate is committed.

Synopsis	Interface IP MTU
Context	<a href="#">bof router</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ip-mtu</a> <i>number</i>
Tree	<a href="#">ip-mtu</a>
Description	<p>This command configures the MTU for IP packets transmitted out the interface of the management router instance associated to the management port.</p> <p>The operational MTU for the port is set to the lesser of the values configured with this command and the management port MTU.</p> <p>If the interface supports IPv6 packets, the command value must be set to 1280 or higher.</p>
Range	512 to 9786
Units	bytes
Introduced	20.10.R1
Platforms	All

## static-routes

Synopsis	Enter the <b>static-routes</b> context
Context	<a href="#">bof router</a> <i>string</i> <a href="#">static-routes</a>
Tree	<a href="#">static-routes</a>

Introduced 20.10.R1  
 Platforms All

## **route** [*ip-prefix*] (*ipv4-prefix* | *ipv6-prefix*)

**Note:**

The new value of this element takes effect when the candidate is committed.

Synopsis Enter the **route** list instance  
 Context **bof router string static-routes route** (*ipv4-prefix* | *ipv6-prefix*)  
 Tree **route**  
 Introduced 20.10.R1  
 Platforms All

## **[ip-prefix]** (*ipv4-prefix* | *ipv6-prefix*)

Synopsis IP prefix for the static route  
 Context **bof router string static-routes route** (*ipv4-prefix* | *ipv6-prefix*)  
 Tree **route**  
 Notes This element is part of a list key.  
 Introduced 20.10.R1  
 Platforms All

## **next-hop** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

**Note:**

The new value of this element takes effect when the candidate is committed.

Synopsis Next-hop IP address  
 Context **bof router string static-routes route** (*ipv4-prefix* | *ipv6-prefix*) **next-hop** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)  
 Tree **next-hop**  
 Notes This element is mandatory.

Introduced	20.10.R1
Platforms	All

## system

Synopsis	Enter the <b>system</b> context
Context	<a href="#">bof system</a>
Tree	<a href="#">system</a>
Introduced	20.10.R1
Platforms	All

## base-mac-address *string*

### Note:

The new value of this element takes effect when the router boots.

Synopsis	Base system MAC address
Context	<a href="#">bof system base-mac-address string</a>
Tree	<a href="#">base-mac-address</a>
Introduced	20.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS-20, 7950 XRS-20e, VSR

## persistent-indices *boolean*

### Note:

The new value of this element takes effect when the router boots.

Synopsis	Classic and mixed management mode persistent indices
Context	<a href="#">bof system persistent-indices boolean</a>
Tree	<a href="#">persistent-indices</a>
Introduced	20.10.R1
Platforms	All

## **profile** *keyword*

**Note:**

The new value of this element takes effect when the router boots.

Synopsis	System capabilities profile
Context	<a href="#">bof system profile</a> <i>keyword</i>
Tree	<a href="#">profile</a>
Options	profile-a, profile-b
Introduced	20.10.R1
Platforms	All

## 3.8 call-trace commands

```
configure
- call-trace
  - apply-groups reference
  - apply-groups-exclude reference
  - buffering boolean
  - location keyword
    - admin-state keyword
    - apply-groups reference
    - apply-groups-exclude reference
    - size-limit (number | keyword)
  - max-files-number number
  - primary-cf keyword
  - trace-profile string
    - applications
      - connectivity-management boolean
      - gx boolean
      - gy boolean
      - ladb boolean
      - msap boolean
      - nasreq boolean
      - ppp-event boolean
      - python boolean
      - radius-acct boolean
      - radius-auth boolean
    - apply-groups reference
    - apply-groups-exclude reference
    - description string
    - events keyword
    - output
      - debug
      - live
        - fqdn string
        - ip-address (ipv4-address-no-zone | ipv6-address-no-zone)
        - port number
        - router-instance string
      - local-storage
    - size-limit number
    - time-limit number
```

### 3.8.1 call-trace command descriptions

#### call-trace

Synopsis	Enter the <b>call-trace</b> context
Context	<b>configure</b> <a href="#">call-trace</a>
Tree	<a href="#">call-trace</a>
Description	Commands in this context configure the attributes of the call trace debugging functionality.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

#### buffering *boolean*

Synopsis	Buffer messages until the trace key is known
Context	<b>configure</b> <a href="#">call-trace</a> <a href="#">buffering</a> <i>boolean</i>
Tree	<a href="#">buffering</a>
Description	<p>When configured to <b>true</b>, the router buffers initial messages for sessions where the trace key is not yet known, for example, a username for a PPP session.</p> <p>When the trace key, for example, a username, indicates a match for a traced session, the router sends the buffered messages immediately. If the key does not match a trace, the router discards the buffered messages.</p> <p>When configured to <b>false</b>, the router does not buffer any messages and therefore initial messages may not be traced.</p>
Default	false
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

#### location [[location-type](#)] *keyword*

Synopsis	Enter the <b>location</b> list instance
Context	<b>configure</b> <a href="#">call-trace</a> <a href="#">location</a> <i>keyword</i>
Tree	<a href="#">location</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**[location-type] keyword**

Synopsis	Compact flash card to be used
Context	<b>configure</b> <a href="#">call-trace</a> <a href="#">location</a> <i>keyword</i>
Tree	<a href="#">location</a>
Options	cf1, cf2
Notes	This element is part of a list key.
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**admin-state keyword**

Synopsis	Administrative state of compact flash for log storage
Context	<b>configure</b> <a href="#">call-trace</a> <a href="#">location</a> <i>keyword</i> <a href="#">admin-state</a> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	enable
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**size-limit (number | keyword)**

Synopsis	Maximum cumulative size of call trace files on the card
Context	<b>configure</b> <a href="#">call-trace</a> <a href="#">location</a> <i>keyword</i> <a href="#">size-limit</a> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">size-limit</a>
Range	1 to 65536
Options	unlimited
Default	1000
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**max-files-number number**

Synopsis	Maximum number of files call trace can create
Context	<b>configure</b> <a href="#">call-trace</a> <a href="#">max-files-number</a> <i>number</i>

Tree	<a href="#">max-files-number</a>
Range	1 to 1024
Default	200
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **primary-cf** *keyword*

Synopsis	Primary CF card as local storage location
Context	<b>configure</b> <a href="#">call-trace</a> <a href="#">primary-cf</a> <i>keyword</i>
Tree	<a href="#">primary-cf</a>
Options	cf1, cf2
Default	cf1
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **trace-profile** [[name](#)] *string*

Synopsis	Enter the <b>trace-profile</b> list instance
Context	<b>configure</b> <a href="#">call-trace</a> <a href="#">trace-profile</a> <i>string</i>
Tree	<a href="#">trace-profile</a>
Description	Commands in this context configure the attributes of the call-trace profile list.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **[name]** *string*

Synopsis	Call trace profile name
Context	<b>configure</b> <a href="#">call-trace</a> <a href="#">trace-profile</a> <i>string</i>
Tree	<a href="#">trace-profile</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## applications

Synopsis	Enter the <b>applications</b> context
Context	<b>configure</b> <a href="#">call-trace</a> <a href="#">trace-profile</a> <i>string</i> <a href="#">applications</a>
Tree	<a href="#">applications</a>
Description	Commands in this context configure call trace attributes for the specified application.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## connectivity-management *boolean*

Synopsis	Trace messages used for connectivity protocols
Context	<b>configure</b> <a href="#">call-trace</a> <a href="#">trace-profile</a> <i>string</i> <a href="#">applications</a> <a href="#">connectivity-management</a> <i>boolean</i>
Tree	<a href="#">connectivity-management</a>
Description	When configured to <b>true</b> , this command enables call trace for connectivity protocols, such as DHCP, ARP, and DHCPv6, and events related to connectivity management; for example, migrant or data-triggered host creation, idling, or session timeout. When configured to <b>false</b> , connectivity protocols are not traced.
Default	true
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## gx *boolean*

Synopsis	Trace Diameter messages used for the Gx application
Context	<b>configure</b> <a href="#">call-trace</a> <a href="#">trace-profile</a> <i>string</i> <a href="#">applications</a> <a href="#">gx</a> <i>boolean</i>
Tree	<a href="#">gx</a>
Description	When configured to <b>true</b> , this command enables call trace for Diameter messages used for the Gx application. When configured to <b>false</b> , Diameter Gx messages are not traced.
Introduced	21.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## gy *boolean*

Synopsis	Trace Diameter messages used for the Gy application
----------	---

Context	<b>configure call-trace trace-profile</b> <i>string applications gy boolean</i>
Tree	<a href="#">gy</a>
Description	When configured to <b>true</b> , this command enables call trace for Diameter messages used for the Gy application. When configured to <b>false</b> , Diameter Gy messages are not traced.
Introduced	21.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**ludb boolean**

Synopsis	Trace local user database lookups
Context	<b>configure call-trace trace-profile</b> <i>string applications ludb boolean</i>
Tree	<a href="#">ludb</a>
Description	When configured to <b>true</b> , this command enables call trace for Local User Data Base (LUDB) lookups. When configured to <b>false</b> , LUDB lookups are not traced.
Default	true
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**msap boolean**

Synopsis	Trace MSAP creation events
Context	<b>configure call-trace trace-profile</b> <i>string applications msap boolean</i>
Tree	<a href="#">msap</a>
Description	When configured to <b>true</b> , this command enables tracing of Managed Service Access Point (MSAP) creation events. When configured to <b>false</b> , MSAP create events are not traced.
Default	true
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**nasreq boolean**

Synopsis	Trace Diameter messages used for NASREQ application
Context	<b>configure call-trace trace-profile</b> <i>string applications nasreq boolean</i>

Tree	<a href="#">nasreq</a>
Description	When configured to <b>true</b> , this command enables call trace for Diameter messages used for the Diameter Network Access Server Requirements (NASREQ) application. When configured to <b>false</b> , Diameter NASREQ messages are not traced.
Introduced	21.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **ppp-event** *boolean*

Synopsis	Allow tracing for PPP state machine related events
Context	<b>configure</b> <a href="#">call-trace</a> <a href="#">trace-profile</a> <i>string</i> <a href="#">applications</a> <a href="#">ppp-event</a> <i>boolean</i>
Tree	<a href="#">ppp-event</a>
Description	When configured to <b>true</b> , events related to the PPP state machine are traced. This configuration may result in a large amount of event messages. When configured to <b>false</b> , tracing is not activated for PPP state machine events.
Default	false
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **python** *boolean*

Synopsis	Trace Python script execution
Context	<b>configure</b> <a href="#">call-trace</a> <a href="#">trace-profile</a> <i>string</i> <a href="#">applications</a> <a href="#">python</a> <i>boolean</i>
Tree	<a href="#">python</a>
Description	When configured to <b>true</b> , this command enables tracing of Python script execution. When configured to <b>false</b> , Python script execution is not traced.
Default	true
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **radius-acct** *boolean*

Synopsis	Trace messages and events for RADIUS-based accounting
Context	<b>configure</b> <a href="#">call-trace</a> <a href="#">trace-profile</a> <i>string</i> <a href="#">applications</a> <a href="#">radius-acct</a> <i>boolean</i>
Tree	<a href="#">radius-acct</a>

Description	When configured to <b>true</b> , this command enables tracing of messages and events related to RADIUS-based accounting. When configured to <b>false</b> , RADIUS-based accounting messages and events are not traced.
Default	true
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **radius-auth** *boolean*

Synopsis	Trace RADIUS authentication messages and events
Context	<b>configure</b> <a href="#">call-trace</a> <a href="#">trace-profile</a> <i>string</i> <a href="#">applications</a> <a href="#">radius-auth</a> <i>boolean</i>
Tree	<a href="#">radius-auth</a>
Description	When configured to <b>true</b> , this command enables tracing of messages and events related to RADIUS authentication, including CoA and Disconnect. When configured to <b>false</b> , messages and events related to RADIUS authentication are not traced.
Default	true
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">call-trace</a> <a href="#">trace-profile</a> <i>string</i> <a href="#">description</a> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **events** *keyword*

Synopsis	Events to include in the captured trace
Context	<b>configure</b> <a href="#">call-trace</a> <a href="#">trace-profile</a> <i>string</i> <a href="#">events</a> <i>keyword</i>
Tree	<a href="#">events</a>
Options	public-only, all

Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## output

Synopsis	Enter the <b>output</b> context
Context	<b>configure</b> <a href="#">call-trace</a> <a href="#">trace-profile</a> <i>string</i> <b>output</b>
Tree	<a href="#">output</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## debug

Synopsis	Enable output to the debug log
Context	<b>configure</b> <a href="#">call-trace</a> <a href="#">trace-profile</a> <i>string</i> <b>output</b> <b>debug</b>
Tree	<a href="#">debug</a>
Notes	The following elements are part of a choice: <b>debug</b> , <b>live</b> , or <b>local-storage</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## live

Synopsis	Enable the <b>live</b> context
Context	<b>configure</b> <a href="#">call-trace</a> <a href="#">trace-profile</a> <i>string</i> <b>output</b> <b>live</b>
Tree	<a href="#">live</a>
Notes	The following elements are part of a choice: <b>debug</b> , <b>live</b> , or <b>local-storage</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## fqdn *string*

Synopsis	Fully qualified domain name of live output destination
Context	<b>configure</b> <a href="#">call-trace</a> <a href="#">trace-profile</a> <i>string</i> <b>output</b> <b>live</b> <b>fqdn</b> <i>string</i>
Tree	<a href="#">fqdn</a>
String Length	1 to 255

Notes	The following elements are part of a mandatory choice: <b>fqdn</b> or <b>ip-address</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **ip-address** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	IP address of the live output destination server
Context	<b>configure</b> <a href="#">call-trace</a> <a href="#">trace-profile</a> <i>string</i> <a href="#">output</a> <a href="#">live</a> <a href="#">ip-address</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	<a href="#">ip-address</a>
Notes	The following elements are part of a mandatory choice: <b>fqdn</b> or <b>ip-address</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **port number**

Synopsis	TCP IP port
Context	<b>configure</b> <a href="#">call-trace</a> <a href="#">trace-profile</a> <i>string</i> <a href="#">output</a> <a href="#">live</a> <a href="#">port</a> <i>number</i>
Tree	<a href="#">port</a>
Range	1 to 65536
Default	29770
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **router-instance** *string*

Synopsis	Router instance or VPRN service name
Context	<b>configure</b> <a href="#">call-trace</a> <a href="#">trace-profile</a> <i>string</i> <a href="#">output</a> <a href="#">live</a> <a href="#">router-instance</a> <i>string</i>
Tree	<a href="#">router-instance</a>
Default	Base
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## local-storage

Synopsis	Destination for output
Context	<b>configure</b> <a href="#">call-trace</a> <a href="#">trace-profile</a> <i>string</i> <a href="#">output</a> <a href="#">local-storage</a>
Tree	<a href="#">local-storage</a>
Notes	The following elements are part of a choice: <b>debug</b> , <b>live</b> , or <b>local-storage</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## size-limit *number*

Synopsis	Maximum data output for a single call trace operation
Context	<b>configure</b> <a href="#">call-trace</a> <a href="#">trace-profile</a> <i>string</i> <a href="#">size-limit</a> <i>number</i>
Tree	<a href="#">size-limit</a>
Range	1 to 1000
Units	megabytes
Default	10
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## time-limit *number*

Synopsis	Maximum time for a single call trace job
Context	<b>configure</b> <a href="#">call-trace</a> <a href="#">trace-profile</a> <i>string</i> <a href="#">time-limit</a> <i>number</i>
Tree	<a href="#">time-limit</a>
Range	1 to 604800
Units	seconds
Default	86400
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### 3.9 card commands

```

configure
- card number
- admin-state keyword
- apply-groups reference
- apply-groups-exclude reference
- card-type keyword
- fail-on-error boolean
- filter-profile keyword
- fp number
- apply-groups reference
- apply-groups-exclude reference
- egress
- hs-fixed-high-thresh-delta number
- hs-pool-policy reference
- wred-queue-control
- admin-state keyword
- buffer-allocation decimal-number
- reserved-cbs decimal-number
- slope-policy reference
- fp-resource-policy reference
- hi-bw-mcast-src
- alarm boolean
- default-paths-only boolean
- group number
- ingress
- access
- queue-group reference instance-id number
- accounting-policy reference
- apply-groups reference
- apply-groups-exclude reference
- collect-stats boolean
- description string
- policer-control-policy
- overrides
- apply-groups reference
- apply-groups-exclude reference
- max-rate (number | keyword)
- priority-mbs-thresholds
- min-threshold-separation (number | keyword)
- priority number
- apply-groups reference
- apply-groups-exclude reference
- mbs-contribution (number | keyword)
- policy-name reference
- policer-overrides
- policer reference
- apply-groups reference
- apply-groups-exclude reference
- cbs (number | keyword)
- mbs (number | keyword)
- packet-byte-offset number
- rate
- cir (number | keyword)
- pir (number | keyword)
- stat-mode keyword
- dist-cpu-protection
- dynamic-enforcement-policer-pool number
- mcast-path-management
- admin-state keyword

```

configure card fp ingress mcast-path-management bandwidth-policy

```

- bandwidth-policy reference
- network
- pool string
  - amber-alarm-threshold number
  - apply-groups reference
  - apply-groups-exclude reference
  - red-alarm-threshold number
  - resv-cbs
    - amber-alarm-action
      - max number
      - step number
    - cbs number
    - slope-policy reference
- queue-group reference instance-id number
  - accounting-policy reference
  - apply-groups reference
  - apply-groups-exclude reference
  - collect-stats boolean
  - description string
  - policer-control-policy
    - overrides
      - apply-groups reference
      - apply-groups-exclude reference
      - max-rate (number | keyword)
      - priority-mbs-thresholds
        - min-threshold-separation (number | keyword)
        - priority number
          - apply-groups reference
          - apply-groups-exclude reference
          - mbs-contribution (number | keyword)
      - policy-name reference
    - policer-overrides
    - policer reference
      - apply-groups reference
      - apply-groups-exclude reference
      - cbs (number | keyword)
      - mbs (number | keyword)
      - packet-byte-offset number
      - rate

### 3.9.1 card command descriptions

#### **card** [*slot-number*] *number*

Synopsis	Enter the <b>card</b> list instance
Context	<b>configure card</b> <i>number</i>
Tree	<a href="#">card</a>
Description	Commands in this context cover attributes for specific chassis slots for physical cards. Cards include IOM, IMM, and XCM.  In SR OS, cards cover IOM, IMM, and XCM.
Introduced	16.0.R1
Platforms	All

#### **[slot-number]** *number*

Synopsis	Slot number within the chassis
Context	<b>configure card</b> <i>number</i>
Tree	<a href="#">card</a>
Description	This command configures a unique value that identifies the card slot within a chassis in the system.
Range	1 to 20
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

#### **admin-state** *keyword*

Synopsis	Administrative state of the card
Context	<b>configure card</b> <i>number</i> <a href="#">admin-state</a> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	enable
Introduced	16.0.R1
Platforms	All

**card-type** keyword**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis      Card type

Context      **configure** *card number* **card-type** *keyword*

Tree          **card-type**

Description    This command adds an IOM, IMM, XCM to the device configuration for the slot.

The card type can be pre-provisioned, meaning that the card does not need to be installed in the chassis.

A card must be provisioned before any contained object can be configured: MDA, XIOM, XMA, MDA-s, connector, or port. A card can only be provisioned in a slot if the card type is allowed in the slot. An error message is generated if an attempt is made to provision a card type that is not allowed.

If a card is inserted that does not match the configured card type for the slot, a log event and facility alarm is raised. The alarm is cleared when the correct card type is installed or the configuration is modified. A log event and facility alarm are raised if an administratively enabled card is removed from the chassis. The alarm is cleared when the correct card type is installed or the configuration is modified. A log event is issued when a card is removed that is administratively disabled.

Because IMM's do not have the capability to install separate MDAs, the configuration of the MDAs is automatic. This configuration only includes the default options such as default buffer policies. Commands to manage the MDA remain in the MDA configuration context.

Some card hardware can support two different firmware loads. One load includes the base Ethernet functionality, including 10G WAN mode, but does not include 1588 port-based timestamping. The second load includes the base Ethernet functionality and 1588 port-based timestamping, but does not include 10G WAN mode. These are identified as two card types that are the same, except for a "-ptp" suffix to indicate the second loadset. A hard reset of the card occurs when switching between the two provisioned types.

An appropriate alarm is raised if a partial or complete card failure is detected. The alarm is cleared when the error condition ceases.

Options      xcm-x20, imm40-10gb-sfp, imm4-100gb-cxp, iom4-e, iom-a, imm-1pac-fp3, imm-2pac-fp3, iom4-e-hs, imm4-100gb-cfp4, iom-e, iom-v, iom4-e-b, iom-sar-hm, xcm2-x20, iom-1, xcm-14s, imm40-10gb-sfp-ptp, iom-ixr-r6, imm36-100g-qsfp28, imm48-sfp+2-qsfp28, iom5-e, xcm-7s, imm48-sfp++6-qsfp28, xcm-1s, xcm-2s, imm24-sfp++8-sfp28+2-qsfp28, iom-sar-hmc, imm14-10g-sfp++4-1g-tx, iom-ixr-r4, imm6-qsfpdd+48-sfp56, imm32-qsfp28+4-qsfpdd, i48-800g-qsfpdd-1x, imm36-qsfpdd, imm4-1g-tx+20-1g-sfp+6-10g-sfp+, iom-ixr-r6d, xcm2-7s, i24-800g-qsfpdd-1, imm36-800g-qsfpdd, xcm2-14s, i48-400g-qsfpdd-1, i80-200g-sfpdd+12-400g-qsfpdd-1, i40-200g-sfpdd+6-800g-qsfpdd-1, i80-200g-sfpdd+12-800g-qsfpdd-1x,

	xcm-2se, xcm-14s-b, xcm-7s-b, imm2-qsfdd+2-qsf28+24-sfp28, xcmc-2se, imm12-sfp28+2-qsf28, dms24-800g-qsfdd-1
Introduced	16.0.R1
Platforms	All

### **fail-on-error** *boolean*

Synopsis	Set operational state of the card to Failed upon error
Context	<b>configure</b> <b>card</b> <i>number</i> <b>fail-on-error</b> <i>boolean</i>
Tree	<b>fail-on-error</b>
Description	<p>When configured to <b>true</b>, this command controls the behavior of the card when any one of a specific set of card level errors is encountered in the system.</p> <p>When this command is set to <b>true</b>, and any one (or more) of the specific errors is detected, the operational state of the card is set to failed. This failed state persists until the <b>clear card</b> command is issued (reset) or the card is removed and reinserted (reseated). If the condition persists after reseating the card, contact Nokia support to investigate more.</p> <p>Nokia only recommends configuring this command to <b>true</b> when the network is designed to be able to route traffic around a failed card (redundant cards, nodes, or other paths exist).</p> <p>The list of specific errors includes the following:</p> <ul style="list-style-type: none"> <li>CHASSIS event ID# 2063 - tmnxEqCardPChipMemoryEvent</li> <li>CHASSIS event ID# 2076 - tmnxEqCardPChipCamEvent</li> <li>CHASSIS event ID# 2059 - tmnxEqCardPChipError (for ingress Ethernet only)</li> <li>CHASSIS event ID# 2098 - tmnxEqCardQChipBufMemoryEvent</li> <li>CHASSIS event ID# 2099 - tmnxEqCardQChipStatsMemoryEvent</li> <li>CHASSIS event ID# 2101 - tmnxEqCardQChipIntMemoryEvent</li> <li>CHASSIS event ID# 2103 - tmnxEqCardChipIfCellEvent</li> </ul> <p>On platforms with integrated CPM and IOM, IMM, or XCM, the node is rebooted if this command is set to <b>true</b> and one of the card level errors is encountered. The tmnxEqCardPChipError is only considered as a trigger for this command for ingress FCS errors (not egress FCS errors).</p> <p><b>Note:</b> On the detection of the event or error in the system, the reporting of the event (logs) and the fail-on-error behavior of the card are independent. Log event control configuration determines whether the events are reported in logs (or SNMP traps, and so on) and the fail-on-error configuration determines the behavior of the card. This implies that the card can be configured to fail-on-error even if the events are suppressed (some may be suppressed in the system by default). To facilitate post-failure analysis, Nokia recommends reporting the specific events or errors and that <b>configure log log-events</b> be enabled when this command is set to <b>true</b>.</p>
Default	false

Introduced	16.0.R1
Platforms	All

### **filter-profile** *keyword*

#### **WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Filter profile for the card
Context	<b>configure</b> <i>card number filter-profile keyword</i>
Tree	<i>filter-profile</i>
Description	This command controls the resources allocated to ingress and egress IPv4 and IPv6 filters on a per-line card basis on the SR-a platform.
Options	none, profile-a
Default	none
Introduced	19.10.R1
Platforms	7750 SR-a

### **fp** [*fp-number*] *number*

Synopsis	Enter the <b>fp</b> list instance
Context	<b>configure</b> <i>card number fp number</i>
Tree	<i>fp</i>
Description	Commands in this context configure forwarding plane (FP) specific options on the card.
Introduced	16.0.R1
Platforms	All

## hs-fixed-high-thresh-delta *number*

Synopsis High threshold delta on the forwarding plane  
 Context **configure** [card number](#) [fp number](#) [egress](#) [hs-fixed-high-thresh-delta](#) *number*  
 Tree [hs-fixed-high-thresh-delta](#)  
 Description This command specifies the egress aggregate shaper high burst limit threshold delta for this HSQ IOM FP.  

An aggregate rate can be applied to each egress HSQ queue group, HS secondary shaper, and (for subscribers configured with HS SLA expanded mode) primary shaper that manages the maximum burst limit over a specified shaping rate. Each aggregate shaper supports two thresholds that are used in conjunction with the low burst class setting. The system uses the lowest value attainable for each low threshold aggregate burst limit without causing shaper under run conditions.

The high burst limit threshold is determined by adding the configured value of this command to the aggregate low burst limit threshold value. An operator must set this configured value to at least two times the maximum frame size to prevent lower threshold class forwarding from also affecting the higher threshold classes when forwarding larger packet sizes. An insufficiently high threshold delta defeats the intended purpose of mapping classes to the higher threshold.

 Range 0 to 65536  
 Introduced 16.0.R1  
 Platforms 7750 SR-7/12/12e

## hs-pool-policy *reference*

Synopsis HS pool policy  
 Context **configure** [card number](#) [fp number](#) [egress](#) [hs-pool-policy](#) *reference*  
 Tree [hs-pool-policy](#)

Description	<p>This command specifies the HS pool policy for the FP.</p> <p>An HS pool policy contains the required parameters to create and size root and mid-tier buffer pools on an HSQ IOM, and applies a slope policy to each. A single HS pool policy is supported per port FP.</p> <p>This command is only applicable to the HSQ IOM (iom4-e-hs) and fails if configured on other card types.</p>
Reference	<b>configure</b> <a href="#">qos hs-pool-policy</a> <i>string</i>
Introduced	16.0.R1
Platforms	7750 SR-7/12/12e

### wred-queue-control

Synopsis	Enter the <b>wred-queue-control</b> context
Context	<b>configure</b> <a href="#">card number fp number egress wred-queue-control</a>
Tree	<a href="#">wred-queue-control</a>
Description	Commands in this context configure the aggregate Weighted Random Early Detection (WRED) queue options for all WRED queues on an egress forwarding plane.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### admin-state *keyword*

Synopsis	Administrative state of the WRED queue control function
Context	<b>configure</b> <a href="#">card number fp number egress wred-queue-control admin-state</a> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### buffer-allocation *decimal-number*

Synopsis	Buffer allocation for WRED queue buffer pools
Context	<b>configure</b> <a href="#">card number fp number egress wred-queue-control buffer-allocation</a> <i>decimal-number</i>
Tree	<a href="#">buffer-allocation</a>

Description	This command defines the percentage of buffers to set aside for WRED queue buffer pools.
Range	0.01 to 99.99
Units	percent
Default	25.00
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **reserved-cbs** *decimal-number*

Synopsis	Buffers for queues operating within CBS thresholds
Context	<b>configure</b> <i>card number fp number egress wred-queue-control reserved-cbs decimal-number</i>
Tree	<a href="#">reserved-cbs</a>
Description	<p>This command specifies the percentage of buffers within the WRED mega-pool to set aside for WRED queues operating within the configured CBS thresholds. The forwarding plane protects against WRED queue buffer starvation by setting aside a portion of the buffers within the WRED mega-pool.</p> <p>This threshold defines when a WRED queue requests buffers from the reserved portion of the WRED mega-pool and when it starts requesting buffers from the shared portion of the mega-pool. With proper oversubscription provisioning, a seldom active queue is not denied a buffer from the mega-pool when the shared portion of the mega-pool is congested.</p>
Range	0.01 to 99.99
Units	percent
Default	25.00
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **slope-policy** *reference*

Synopsis	Slope policy for the forwarding plane
Context	<b>configure</b> <i>card number fp number egress wred-queue-control slope-policy reference</i>
Tree	<a href="#">slope-policy</a>
Reference	<b>configure</b> <i>qos slope-policy string</i>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**fp-resource-policy** *reference***WARNING:**

Modifying this element resets the associated cards/XIOMs/MDAs for the new value to take effect. On the 7750 SR-1, the configuration must be saved and the router must be rebooted for the new value to take effect.

Synopsis	Resource policy to manage resources on the FP
Context	<b>configure</b> <i>card number fp number fp-resource-policy reference</i>
Tree	<a href="#">fp-resource-policy</a>
Description	<p>This command configures an FP resource policy used to manage resources on a forwarding plane that is FP4-based and later.</p> <p>The system creates a default policy that applies to all FP4 and later FPs. If an FP resource policy is removed from an FP, the system automatically applies the default policy to that FP. The system prevents the modification or deletion of the default policy, and the deletion of any user-created policy that is applied to an FP.</p>
Reference	<b>configure</b> <a href="#">qos fp-resource-policy string</a>
Introduced	20.2.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

**hi-bw-mcast-src**

Synopsis	Enable the <b>hi-bw-mcast-src</b> context
Context	<b>configure</b> <i>card number fp number hi-bw-mcast-src</i>
Tree	<a href="#">hi-bw-mcast-src</a>
Description	<p>Commands in this context configure the attributes to designate the FP as a high-bandwidth IP multicast source, expecting the ingress traffic to include high-bandwidth IP multicast traffic.</p> <p>When configured, the system attempts to allocate a dedicated multicast switch fabric plane (MSFP) to the forwarding plane. When a group is specified, all FPs in the group share the same MSFP.</p>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-7/12/12e, 7750 SR-s, 7950 XRS

**alarm** *boolean*

Synopsis	Raise an alarm when multiple traffic taps share a plane
Context	<b>configure</b> <i>card number fp number hi-bw-mcast-src alarm boolean</i>

Tree	<a href="#">alarm</a>
Description	<p>When configured to <b>true</b>, the router generates an event if the MDA must share an MSFP with another MDA in a different group. MDAs within the same group that share an MSFP do not generate an event. Additionally, if a failure occurs during normal operation or resources are removed, the system generates an event if it cannot maintain separation of MSFPs for the MDAs.</p> <p>When configured to <b>false</b>, the router does not generate events.</p>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-7/12/12e, 7750 SR-s, 7950 XRS

### **default-paths-only** *boolean*

Synopsis	Allocate the default paths to dedicated MSFPs
Context	<b>configure</b> <a href="#">card number</a> <a href="#">fp number</a> <a href="#">hi-bw-mcast-src</a> <b>default-paths-only</b> <i>boolean</i>
Tree	<a href="#">default-paths-only</a>
Description	<p>When configured to <b>true</b>, the system only attempts to allocate the two default paths (one high priority and one low priority) to dedicated MSFPs.</p> <p>When configured to <b>false</b>, the default path allocation is disabled.</p>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-7/12/12e, 7750 SR-s, 7950 XRS

Reference	<b>configure</b> <a href="#">qos</a> <a href="#">queue-group-templates</a> <a href="#">ingress</a> <a href="#">queue-group</a> <i>string</i>
Notes	This element is part of a list key.
Introduced	16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR

### **instance-id** *number*

Synopsis Instance ID

Context **configure** *card number fp number ingress access queue-group reference instance-id number*

Tree [queue-group](#)

Range 1 to 65535

MD-CLI 1

Default

Notes This element is part of a list key.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR

### **accounting-policy** *reference*

Synopsis Accounting policy for the FP ingress queue group

Context **configure** *card number fp number ingress access queue-group reference instance-id number accounting-policy reference*

Tree [accounting-policy](#)

Description This command configures an accounting policy for the FP ingress queue group. You can only apply accounting policies associated with service billing to SAPs. Only associate the accounting policy with one interface at a time.

Reference **configure** *log accounting-policy number*

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR

### **collect-stats** *boolean*

Synopsis Collect statistics on FP ingress queue group

Context **configure** *card number fp number ingress access queue-group reference instance-id number collect-stats boolean*

Tree [collect-stats](#)

Description When configured to **true**, the system collects accounting and statistical data for the queue group on the FP.

When configured to **false**, the system still accumulates the statistics; however, the CPU does not obtain the results and write them to the billing file.

If this command is set to **true** (after it had previously been set to **false**), the counters written to the billing file include the traffic collected when the command was set to **false**.

Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR

Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR

**max-rate** (*number* | *keyword*)

Synopsis	Maximum rate override
Context	<b>configure</b> <i>card number fp number ingress access queue-group reference instance-id number policer-control-policy overrides max-rate</i> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">max-rate</a>
Description	<p>This command defines the PIR leaky bucket decrement rate of the parent policer. Each time you apply the policer control policy to a SAP or subscriber instance a parent policer is created. Packets not discarded by the child policer associated with the SAP or subscriber instance are evaluated against the leaky bucket of the parent policer.</p> <p>For each packet, the system first decrements the bucket by the correct amount based on the decrement rate to derive the current bucket depth. The system compares the current depth to one of two discard thresholds associated with the packet. The first discard threshold is applied if the Fair Information Rate (FIR) leaky bucket of the child policer is in the confirming state. The second discard threshold is applied if the FIR leaky bucket of the child policer is in the exceed state.</p> <p>Only one of the two thresholds is applied per packet. If the current depth of the parent policer PIR bucket is less than the threshold value, the parent PIR bucket is in the conform state for that particular packet. If the depth is equal to or greater than the applied threshold, the bucket is in the violate state for the packet.</p> <p>If the result is conform, the bucket depth is increased by the size of the packet (plus or minus the per-packet offset setting in the child policer) and the parent policer does not discard the packet. If the result is violate, the bucket depth is not increased and the parent policer discards the packet. When the parent policer discards a packet, the bucket depth increases (PIR, CIR, and FIR) in the parent policer are canceled. This prevents packets that the parent policer discards from consuming the PIR, CIR, and FIR bandwidth of the child policers.</p>
Range	1 to 2000000000
Units	kilobps
Options	max
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR

**priority-mbs-thresholds**

### **policer-overrides**

Synopsis	Enter the <b>policer-overrides</b> context
Context	<b>configure</b> <a href="#">card</a> <a href="#">number</a> <a href="#">fp</a> <a href="#">number</a> <a href="#">ingress</a> <a href="#">access</a> <a href="#">queue-group</a> <a href="#">reference</a> <a href="#">instance-id</a> <a href="#">number</a> <a href="#">policer-overrides</a>
Tree	<a href="#">policer-overrides</a>

Description	Commands in this context configure specific overrides to one or more policers created on the SAP through SAP ingress QoS policies.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR

### **policer** [**policer-id**] *reference*

Synopsis	Enter the <b>policer</b> list instance
Context	<b>configure</b> <i>card number</i> <b>fp</b> <i>number</i> <b>ingress access queue-group</b> <i>reference</i> <b>instance-id</b> <i>number</i> <b>policer-overrides</b> <b>policer</b> <i>reference</i>
Tree	<b>policer</b>
Description	<p>Commands in this context create, modify, or delete a policer. Policers are created and used in a similar manner to queues. Unlike queues that have dedicated counters, policers allow various stat-mode settings that define the counters to be associated with the policer. Packet byte offset provides a policer with the ability to modify the size of each packet based on a defined number of bytes. All policers must be created within the QoS policies.</p> <p>After a policer is created, it cannot be deleted from the QoS policy unless all forwarding classes mapped to the policer are first moved to other policers or queues.</p> <p>The system allows a policer to be created on a SAP QoS policy regardless of the ability to support policers on objects where the policy is currently applied. The system only scans the current objects for policer support and sufficient resources to create the policer when a forwarding class is first mapped to the policer ID. If the policer cannot be created because one or more instances of the policy do not support policing or have insufficient resources to create the policer, the forwarding class mapping fails.</p>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR

### **[policer-id]** *reference*

Synopsis	Policer ID
Context	<b>configure</b> <i>card number</i> <b>fp</b> <i>number</i> <b>ingress access queue-group</b> <i>reference</i> <b>instance-id</b> <i>number</i> <b>policer-overrides</b> <b>policer</b> <i>reference</i>
Tree	<b>policer</b>

**cbs** (*number* | *keyword*)

Synopsis	CBS tolerance allowed by the policer
Context	<b>configure</b> <i>card number</i> <b>fp</b> <i>number</i> <b>ingress access queue-group</b> <i>reference</i> <b>instance-id</b> <i>number</i> <b>policer-overrides policer</b> <i>reference</i> <b>cbs</b> ( <i>number</i>   <i>keyword</i> )
Tree	<b>cbs</b>
Description	This command configures the CIR leaky bucket exceed threshold of the policer.  If the forwarding rate of the policer is equal to or less than the defined CIR, the CIR bucket depth hovers around the 0 depth, with spikes up to the maximum packet size in the offered load. If the forwarding rate increases beyond the profiling rate, the threshold caps the amount of data allowed to be in-profile above the rate.
Range	0 to 268435456
Units	bytes
Options	auto
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR

**mbs** (*number* | *keyword*)

Synopsis	Maximum burst tolerance allowed by the policer
Context	<b>configure</b> <i>card number</i> <b>fp</b> <i>number</i> <b>ingress access queue-group</b> <i>reference</i> <b>instance-id</b> <i>number</i> <b>policer-overrides policer</b> <i>reference</i> <b>mbs</b> ( <i>number</i>   <i>keyword</i> )
Tree	<b>mbs</b>
Description	This command configures the PIR leaky bucket violate threshold of the policer.  Ingress, trusted in-profile packets and untrusted high priority packets use the high priority violate threshold and trusted out-of-profile. Untrusted low priority packets use the low priority violate threshold.  If the offered rate of the policer is equal to or less than the defined rate, the PIR bucket depth hovers around the 0 depth, with spikes up to the maximum packet size in the offered load. If the offered rate increases beyond the metering rate, the threshold caps the amount of data allowed above the rate.  The low priority violate threshold provides a smaller burst size for the lower priority traffic associated with the policer. Because all lower priority traffic is discarded at the lower burst tolerance size, the remaining burst tolerance is available for higher priority traffic.
Range	0 to 268435456
Units	bytes
Options	auto
Introduced	16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR

### **packet-byte-offset** *number*

Synopsis Packet size adjustment

Context **configure** *card number fp number ingress access queue-group reference instance-id number policer-overrides policer reference packet-byte-offset number*

Tree [packet-byte-offset](#)

Description This command modifies the size of each packet handled by the policer by adding or subtracting a number of bytes. The actual packet size is not modified; only the size used to determine the bucket depth impact is changed.

Use this command to add downstream frame encapsulation or remove portions of packet headers.

When child policers add to or subtract from the packet size, the minimum threshold separation value of the parent policer must be modified by the same amount.

Range -32 to 31

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR

### **rate**

Synopsis Enter the **rate** context

Context **configure** *card number fp number ingress access queue-group reference instance-id number policer-overrides policer reference rate*

Tree [rate](#)

Description Commands in this context configure the metering and optional profiling rates of the policer.

The metering rate is used by the system to configure the PIR leaky bucket decrement rate and the profiling rate configures the CIR leaky bucket decrement rate. The decrement function empties the bucket; packets applied to the bucket attempt to fill it based on its packet size. If the bucket fills faster than the rate that it empties, the bucket depth eventually reaches its exceeded (CIR) or violate (PIR) threshold.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR

### **cir** (*number* | *keyword*)

Synopsis CIR for the policer

Context	<b>configure</b> <i>card number fp number ingress access queue-group reference instance-id number policer-overrides policer reference rate cir (number   keyword)</i>
Tree	<a href="#">cir</a>
Description	This command overrides the default CIR rate of the policer. When the policer is first created, the profiling rate defaults to 0 kb/s. When <b>max</b> is configured, the maximum policer rate used is equal to the maximum capacity of the card that the policer is configured for. If the policer rate is set to a value larger than the maximum rate possible for the card, the CIR used is equivalent to maximum.
Range	0 to 2000000000
Units	kilobps
Options	max
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR

### **pir** (*number | keyword*)

Synopsis	PIR for the policer
Context	<b>configure</b> <i>card number fp number ingress access queue-group reference instance-id number policer-overrides policer reference rate pir (number   keyword)</i>
Tree	<a href="#">pir</a>
Description	This command configures the metering rate of the policer for the PIR leaky bucket. When the policer is first created, the metering rate defaults to max. When <b>max</b> is configured, the maximum policer rate used is equal to the maximum capacity of the card that the policer is configured for. If the policer rate is set to a value larger than the maximum rate possible for the card, the PIR used is equivalent to maximum.
Range	1 to 2000000000
Units	kilobps
Options	max
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR

### **stat-mode** *keyword*

Synopsis	Stat mode for the policer
Context	<b>configure</b> <i>card number fp number ingress access queue-group reference instance-id number policer-overrides policer reference stat-mode keyword</i>

Tree	<a href="#">stat-mode</a>
Description	This command specifies the forwarding plane counters that allow offered, output, and discard accounting to occur for the policer.
Options	no-stats, minimal, offered-profile-no-cir, offered-total-cir, offered-priority-no-cir, offered-profile-cir, offered-priority-cir, offered-limited-profile-cir, offered-profile-capped-cir, offered-limited-capped-cir
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR

## dist-cpu-protection

Synopsis	Enter the <b>dist-cpu-protection</b> context
Context	<b>configure</b> <a href="#">card number</a> <a href="#">fp number</a> <a href="#">ingress</a> <a href="#">dist-cpu-protection</a>
Tree	<a href="#">dist-cpu-protection</a>
Description	Commands in this context configure the distributed CPU protection forwarding plane settings.
Introduced	21.2.R1
Platforms	All

## dynamic-enforcement-policer-pool *number*

Synopsis	Number of policers reserved as enforcement policers use
Context	<b>configure</b> <a href="#">card number</a> <a href="#">fp number</a> <a href="#">ingress</a> <a href="#">dist-cpu-protection</a> <a href="#">dynamic-enforcement-policer-pool</a> <i>number</i>
Tree	<a href="#">dynamic-enforcement-policer-pool</a>
Description	<p>This command reserves a set of policers for use as dynamic enforcement policers for the Distributed CPU Protection (DCP) feature. Policers are allocated from this pool and instantiated as per-object per-protocol dynamic enforcement policers after a local monitor is triggered for an object, such as a SAP or network interface.</p> <p>A change to this configured value automatically clears the high water mark, timestamp, and failed allocation count.</p> <p>If the command is configured to a value below the currently used or allocated number, all dynamic policers are returned to the free pool (and traffic returns to the local monitors).</p>
Range	1000 to 32000
Introduced	21.2.R1
Platforms	All

## mcast-path-management

Synopsis	Enter the <b>mcast-path-management</b> context
Context	<b>configure</b> <i>card number</i> <i>fp number</i> <i>ingress</i> <b>mcast-path-management</b>
Tree	<b>mcast-path-management</b>
Description	Commands in this context configure the IOM ingress multicast path management forwarding plane settings.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-7/12/12e, 7750 SR-s, 7950 XRS, VSR

## admin-state *keyword*

Synopsis	Administrative state of multicast path management
Context	<b>configure</b> <i>card number</i> <i>fp number</i> <i>ingress</i> <b>mcast-path-management</b> <b>admin-state</b> <i>keyword</i>
Tree	<b>admin-state</b>
Options	enable, disable
Default	disable
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-7/12/12e, 7750 SR-s, 7950 XRS, VSR

## bandwidth-policy *reference*

Synopsis	Bandwidth policy for ingress multicast path management
Context	<b>configure</b> <i>card number</i> <i>fp number</i> <i>ingress</i> <b>mcast-path-management</b> <b>bandwidth-policy</b> <i>reference</i>
Tree	<b>bandwidth-policy</b>
Description	<p>This command specifies the bandwidth policy associated with the forwarding plane.</p> <p>The bandwidth policy defines the dynamic rate table and the multicast paths bandwidth and queuing parameters.</p> <p>If a bandwidth policy is not explicitly associated with a forwarding plane, the default bandwidth policy is used with ingress multicast path management.</p>
Reference	<b>configure</b> <b>multicast-management</b> <b>bandwidth-policy</b> <i>string</i>
Introduced	16.0.R1

Platforms 7450 ESS, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-7/12/12e, 7750 SR-s, 7950 XRS, VSR

## network

Synopsis Enter the **network** context

**amber-alarm-threshold** *number*

Synopsis	Amber alarm threshold allowed on oversubscription
Context	<b>configure</b> <i>card number fp number ingress network pool string</i> <b>amber-alarm-threshold</b> <i>number</i>
Tree	<a href="#">amber-alarm-threshold</a>
Description	This command configures the threshold for the amber alarm on oversubscription. If both amber and red alarm thresholds are configured, the amber alarm threshold must be equal to or less than the red alarm threshold.
Range	1 to 1000
Units	percent
Introduced	19.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**red-alarm-threshold** *number*

Synopsis	Red alarm threshold allowed on oversubscription
Context	<b>configure</b> <i>card number fp number ingress network pool string</i> <b>red-alarm-threshold</b> <i>number</i>
Tree	<a href="#">red-alarm-threshold</a>
Description	This command configures the threshold for the red alarm on oversubscription. If both amber and red alarm thresholds are configured, the red alarm threshold must be equal to or exceed the amber alarm threshold.
Range	1 to 1000
Units	percent
Introduced	19.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**resv-cbs**

Synopsis	Enter the <b>resv-cbs</b> context
Context	<b>configure</b> <i>card number fp number ingress network pool string</i> <b>resv-cbs</b>
Tree	<a href="#">resv-cbs</a>
Description	Commands in this context specify the pool buffer settings. The commands do not set aside buffers within the buffer pool for CBS reservation. The CBS value per queue only determines the point at which enqueueing packets are subject to a RED slope. CBS oversubscription can result in a queue operating within its CBS configuration and still being unable to enqueue a packet due to unavailable buffers.

Introduced	19.5.R1
Platforms	All

### **amber-alarm-action**

Synopsis	Enter the <b>amber-alarm-action</b> context
Context	<b>configure</b> <i>card number fp number ingress network pool string resv-cbs</i> <b>amber-alarm-action</b>
Tree	<b>amber-alarm-action</b>
Description	<p>Commands in this context specify settings for the reserved Committed Burst Size (CBS) and step change when the amber alert threshold is exceeded.</p> <p>The reserved CBS defines the amount of buffer space within the pool that is not considered shared.</p>
Introduced	19.5.R1
Platforms	All

### **max number**

Synopsis	Maximum reserved CBS size of the pool
Context	<b>configure</b> <i>card number fp number ingress network pool string resv-cbs</i> <b>amber-alarm-action</b> <b>max number</b>
Tree	<b>max</b>
Description	<p>This command configures the maximum reserved CBS size of the pool.</p> <p>To enable adaptive CBS sizing, this command and the <b>step</b> command must be configured.</p> <p>The value for this command must not be more than the <b>configure card fp ingress network pool resv-cbs cbs</b> command.</p> <p>When the <b>configure card fp ingress network pool resv-cbs cbs</b> command is set to a value of zero (0), adaptive CBS sizing is disabled.</p>
Range	1 to 100
Units	percent
Introduced	19.5.R1
Platforms	All

### **step number**

Synopsis	Step-size percentage for reserved CBS size of the pool
----------	--

Context	<b>configure card number fp number ingress network pool string resv-cbs amber-alarm-action step number</b>
Tree	<a href="#">step</a>
Description	<p>This command configures the step-size percentage for the reserved CBS size of the pool.</p> <p>To enable adaptive CBS sizing, this command and the <b>max</b> command must be configured.</p> <p>When the <b>configure card fp ingress network pool resv-cbs cbs</b> command is set to a value of zero (0), adaptive CBS sizing is disabled.</p>
Range	1 to 100
Units	percent
Introduced	19.5.R1
Platforms	All

### **cbs number**

Synopsis	Pool size reserved for CBS
Context	<b>configure card number fp number ingress network pool string resv-cbs cbs number</b>
Tree	<a href="#">cbs</a>
Description	<p>This command configures the percentage of pool size reserved for CBS.</p> <p>For network, the default value is computed as the sum of the CBS request by the entities using the pool. For access, the default value is 30%.</p>
Range	0 to 100
Units	percent
Introduced	19.5.R1
Platforms	All

### **slope-policy reference**

Synopsis	Slope policy
Context	<b>configure card number fp number ingress network pool string slope-policy reference</b>
Tree	<a href="#">slope-policy</a>
Description	This command specifies the slope policy that defines the high and low priority RED slope parameters and the time average factor.
Reference	<b>configure qos slope-policy string</b>
Introduced	19.5.R1

Platforms All

### **queue-group** [[queue-group-name](#)] *reference* [instance-id](#) *number*

Synopsis Enter the **queue-group** list instance

Context **configure** [card](#) *number* [fp](#) *number* [ingress network](#) [queue-group](#) *reference* [instance-id](#) *number*

Tree [queue-group](#)

Description Commands in this context configure IOM ingress network forwarding plane queue-group settings.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR

### **[queue-group-name]** *reference*

Context **configure** *card number fp number ingress network queue-group reference instance-id number* **policer-control-policy**

Tree **policer-control-policy**

Description Commands in this context configure the IOM ingress network forwarding plane queue-group policer control policy settings.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR

## **overrides**

Synopsis Enable the **overrides** context

Context **configure** *card number fp number ingress network queue-group reference instance-id number* **policer-control-policy overrides**

Tree **overrides**

Description Commands in this context configure the IOM ingress network forwarding plane queue-group policer control policy override settings.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR

## **max-rate** (*number* | *keyword*)

Synopsis Maximum rate override

Context **configure** *card number fp number ingress network queue-group reference instance-id number* **policer-control-policy overrides max-rate** (*number* | *keyword*)

Tree **max-rate**

Description This command defines the PIR leaky bucket decrement rate of the parent policer. Each time you apply the policer control policy to a SAP or subscriber instance a parent policer is created. Packets not discarded by the child policer associated with the SAP or subscriber instance are evaluated against the leaky bucket of the parent policer.

For each packet, the system first decrements the bucket by the correct amount based on the decrement rate to derive the current bucket depth. The system compares the current depth to one of two discard thresholds associated with the packet. The first discard threshold is applied if the Fair Information Rate (FIR) leaky bucket of the child

policer is in the confirming state. The second discard threshold is applied if the FIR leaky bucket of the child policer is in the exceed state.

Only one of the two thresholds is applied per packet. If the current depth of the parent policer PIR bucket is less than the threshold value, the parent PIR bucket is in the conform state for that particular packet. If the depth is equal to or greater than the applied threshold, the bucket is in the violate state for the packet.

If the result is conform, the bucket depth is increased by the size of the packet (plus or minus the per-packet offset setting in the child policer) and the parent policer does not discard the packet. If the result is violate, the bucket depth is not increased and the parent policer discards the packet. When the parent policer discards a packet, the bucket depth increases (PIR, CIR, and FIR) in the parent policer are canceled. This prevents packets that the parent policer discards from consuming the PIR, CIR, and FIR bandwidth of the child policers.

Range	1 to 2000000000
Units	kilobps
Options	max
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR

## priority-mbs-thresholds

Synopsis	Enter the <b>priority-mbs-thresholds</b> context
Context	<b>configure</b> <a href="#">card</a> <a href="#">number</a> <a href="#">fp</a> <a href="#">number</a> <a href="#">ingress</a> <a href="#">network</a> <a href="#">queue-group</a> <a href="#">reference</a> <a href="#">instance-id</a> <a href="#">number</a> <a href="#">policer-control-policy</a> <a href="#">overrides</a> <a href="#">priority-mbs-thresholds</a>
Tree	<a href="#">priority-mbs-thresholds</a>
Description	Commands in this context configure settings to derive the shared portion and fair portion for each priority level.  The system uses the shared portion and fair portion values to calculate the discard-unfair and discard-all MBS thresholds that enforce priority-sensitive rate-based discards within the root arbiter parent policer.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR

## min-threshold-separation (*number* | *keyword*)

Synopsis	Minimum separation between any two active thresholds
Context	<b>configure</b> <a href="#">card</a> <a href="#">number</a> <a href="#">fp</a> <a href="#">number</a> <a href="#">ingress</a> <a href="#">network</a> <a href="#">queue-group</a> <a href="#">reference</a> <a href="#">instance-id</a> <a href="#">number</a> <a href="#">policer-control-policy</a> <a href="#">overrides</a> <a href="#">priority-mbs-thresholds</a> <a href="#">min-threshold-separation</a> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">min-threshold-separation</a>

Description	This command configures the minimum separation between any two active thresholds in the parent policer.
Range	0 to 16777216
Units	bytes
Options	auto
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR

### **priority** [*level*] *number*

Synopsis	Enter the <b>priority</b> list instance
Context	<b>configure</b> <i>card number fp number ingress network queue-group reference instance-id number policer-control-policy overrides priority-mbs-thresholds priority number</i>
Tree	<a href="#">priority</a>
Description	Commands in this context configure the list of priority MBS threshold priority settings for IOM ingress network forwarding plane queue-group policer control policy overrides.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR

### **[level]** *number*

Synopsis	Priority level, higher number is stricter

Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR

### **policer-overrides**

Synopsis	Enter the <b>policer-overrides</b> context
Context	<b>configure</b> <i>card number fp number ingress network queue-group reference instance-id number policer-overrides</i>
Tree	<i>policer-overrides</i>
Description	Commands in this context configure the policer overrides for the IOM ingress network forwarding plane queue-groups.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR

### **policer** [*policy-id*] *reference*

Synopsis	Enter the <b>policer</b> list instance
Context	<b>configure</b> <i>card number fp number ingress network queue-group reference instance-id number policer-overrides policer reference</i>
Tree	<i>policer</i>

Description	Commands in this context configure the list of policer override parameters for IOM ingress network forwarding plane queue-groups.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR

### [policer-id] *reference*

Synopsis	Policer ID
Context	<b>configure</b> <i>card number fp number ingress network queue-group reference instance-id number policer-overrides policer reference</i>
Tree	<i>policer</i>
Reference	<b>configure</b> <i>qos queue-group-templates ingress queue-group string policer number</i>
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR

### **cbs** (*number | keyword*)

Synopsis	CBS tolerance allowed by the policer
Context	<b>configure</b> <i>card number fp number ingress network queue-group reference instance-id number policer-overrides policer reference cbs (number   keyword)</i>
Tree	<i>cbs</i>
Description	This command configures the CIR leaky bucket exceed threshold of the policer.  If the forwarding rate of the policer is equal to or less than the defined CIR, the CIR bucket depth hovers around the 0 depth, with spikes up to the maximum packet size in the offered load. If the forwarding rate increases beyond the profiling rate, the threshold caps the amount of data allowed to be in-profile above the rate.
Range	0 to 268435456
Units	bytes
Options	auto
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR

### **mbs** (*number | keyword*)

Synopsis	Maximum burst tolerance allowed by the policer
----------	--

Context	<b>configure</b> <i>card number fp number ingress network queue-group reference instance-id number policer-overrides policer reference mbs (number   keyword)</i>
Tree	<a href="#">mbs</a>
Description	<p>This command configures the PIR leaky bucket violate threshold of the policer.</p> <p>Ingress, trusted in-profile packets and untrusted high priority packets use the high priority violate threshold and trusted out-of-profile. Untrusted low priority packets use the low priority violate threshold.</p> <p>If the offered rate of the policer is equal to or less than the defined rate, the PIR bucket depth hovers around the 0 depth, with spikes up to the maximum packet size in the offered load. If the offered rate increases beyond the metering rate, the threshold caps the amount of data allowed above the rate.</p> <p>The low priority violate threshold provides a smaller burst size for the lower priority traffic associated with the policer. Because all lower priority traffic is discarded at the lower burst tolerance size, the remaining burst tolerance is available for higher priority traffic.</p>
Range	0 to 268435456
Units	bytes
Options	auto
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR

### **packet-byte-offset** *number*

Synopsis	Packet size adjustment
Context	<b>configure</b> <i>card number fp number ingress network queue-group reference instance-id number policer-overrides policer reference packet-byte-offset number</i>
Tree	<a href="#">packet-byte-offset</a>
Description	<p>This command modifies the size of each packet handled by the policer by adding or subtracting a number of bytes. The actual packet size is not modified; only the size used to determine the bucket depth impact is changed.</p> <p>Use this command to add downstream frame encapsulation or remove portions of packet headers.</p> <p>When child policers add to or subtract from the packet size, the minimum threshold separation value of the parent policer must be modified by the same amount.</p>
Range	-32 to 31
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR

**rate**

Synopsis	Enter the <b>rate</b> context
Context	<b>configure</b> <a href="#">card number</a> <a href="#">fp number</a> <a href="#">ingress network queue-group reference</a> <a href="#">instance-id number</a> <a href="#">policer-overrides policer reference</a> <b>rate</b>
Tree	<a href="#">rate</a>
Description	<p>Commands in this context configure the metering and optional profiling rates of the policer.</p> <p>The metering rate is used by the system to configure the PIR leaky bucket decrement rate and the profiling rate configures the CIR leaky bucket decrement rate. The decrement function empties the bucket; packets applied to the bucket attempt to fill it based on its packet size. If the bucket fills faster than the rate that it empties, the bucket depth eventually reaches its exceeded (CIR) or violate (PIR) threshold.</p>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR

**cir** (*number* | *keyword*)

Synopsis	CIR for the policer
Context	<b>configure</b> <a href="#">card number</a> <a href="#">fp number</a> <a href="#">ingress network queue-group reference</a> <a href="#">instance-id number</a> <a href="#">policer-overrides policer reference</a> <b>rate</b> <a href="#">cir</a> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">cir</a>
Description	<p>This command overrides the default CIR rate of the policer.</p> <p>When the policer is first created, the profiling rate defaults to 0 kb/s.</p> <p>When <b>max</b> is configured, the maximum policer rate used is equal to the maximum capacity of the card that the policer is configured for. If the policer rate is set to a value larger than the maximum rate possible for the card, the CIR used is equivalent to maximum.</p>
Range	0 to 2000000000
Units	kilobps
Options	max
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR

**pir** (*number* | *keyword*)

Synopsis	PIR for the policer
Context	<b>configure</b> <a href="#">card number</a> <a href="#">fp number</a> <a href="#">ingress network queue-group reference</a> <a href="#">instance-id number</a> <a href="#">policer-overrides policer reference</a> <b>rate</b> <a href="#">pir</a> ( <i>number</i>   <i>keyword</i> )

Tree	<a href="#">pir</a>
Description	This command configures the metering rate of the policer for the PIR leaky bucket. When the policer is first created, the metering rate defaults to max. When <b>max</b> is configured, the maximum policer rate used is equal to the maximum capacity of the card that the policer is configured for. If the policer rate is set to a value larger than the maximum rate possible for the card, the PIR used is equivalent to maximum.
Range	1 to 2000000000
Units	kilobps
Options	max
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR

### **stat-mode** *keyword*

Synopsis	Stat mode for the policer
Context	<b>configure</b> <a href="#">card</a> <i>number</i> <a href="#">fp</a> <i>number</i> <a href="#">ingress</a> <a href="#">network</a> <a href="#">queue-group</a> <i>reference</i> <a href="#">instance-id</a> <i>number</i> <a href="#">policer-overrides</a> <a href="#">policer</a> <i>reference</i> <b>stat-mode</b> <i>keyword</i>
Tree	<a href="#">stat-mode</a>
Description	This command specifies the forwarding plane counters that allow offered, output, and discard accounting to occur for the policer.
Options	no-stats, minimal, offered-profile-no-cir, offered-total-cir, offered-priority-no-cir, offered-profile-cir, offered-priority-cir, offered-limited-profile-cir, offered-profile-capped-cir, offered-limited-capped-cir
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR

### **queue-policy** *reference*

Synopsis	Network queue policy
Context	<b>configure</b> <a href="#">card</a> <i>number</i> <a href="#">fp</a> <i>number</i> <a href="#">ingress</a> <a href="#">network</a> <a href="#">queue-policy</a> <i>reference</i>
Tree	<a href="#">queue-policy</a>
Reference	<b>configure</b> <a href="#">qos</a> <a href="#">network-queue</a> <i>string</i>
Introduced	19.5.R1
Platforms	All

## policy-accounting

Synopsis	Enter the <b>policy-accounting</b> context
Context	<b>configure</b> <i>card number</i> <i>fp number</i> <i>ingress</i> <i>policy-accounting</i>
Tree	<i>policy-accounting</i>
Description	Commands in this context configure policy accounting. Use policy accounting to collect statistics about the amount of traffic matching particular routes or to police traffic associated with certain routes as destinations of the traffic.
Introduced	20.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

## classes *number*

Synopsis	Number of accounting classes for the forwarding plane
Context	<b>configure</b> <i>card number</i> <i>fp number</i> <i>ingress</i> <i>policy-accounting</i> <i>classes</i> <i>number</i>
Tree	<i>classes</i>
Description	This command specifies the maximum number of source and destination classes that can be instantiated for accounting purposes on the interfaces of a specific card or FP. When unconfigured, resources are not reserved for source or destination classes.
Range	1000 to 128000
Introduced	21.2.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

## policers *number*

Synopsis	Number of policer resources for policy accounting
Context	<b>configure</b> <i>card number</i> <i>fp number</i> <i>ingress</i> <i>policy-accounting</i> <i>policers</i> <i>number</i>
Tree	<i>policers</i>
Range	1 to 64000
Introduced	20.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

## ingress-buffer-allocation *decimal-number*

Synopsis	Ingress buffer pool allocation for the forwarding plane
Context	<b>configure</b> <i>card number</i> <i>fp number</i> <i>ingress-buffer-allocation</i> <i>decimal-number</i>

Tree	<a href="#">ingress-buffer-allocation</a>
Description	This command configures an ingress buffer allocation for the FP. Ingress buffer allocation applies to user-accessible buffers (total buffers less those reserved for system use). The ingress buffer allocation determines how much of the user-accessible buffers are available for ingress purposes. The remaining buffers are available for egress purposes.
Range	20.00 to 80.00
Units	percent
Default	50.00
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR-7/12/12e, 7750 SR-a, 7750 SR-e, 7950 XRS

### **init-extract-prio-mode** *keyword*

Synopsis	Initial drop priority mode of extracted traffic
Context	<b>configure</b> <i>card number fp number</i> <a href="#">init-extract-prio-mode</a> <i>keyword</i>
Tree	<a href="#">init-extract-prio-mode</a>
Description	This command specifies the scheme to select the initial drop priority of extracted control plane traffic.  The initial drop priority of extracted packets can be either low or high priority. The drop priority can be altered subsequently by mechanisms such as CPU protection.  High priority traffic receives preferential treatment in control plane congestion situations over low priority traffic.
Options	uniform, l3-classify
Default	uniform
Introduced	16.0.R1
Platforms	All

### **stable-pool-sizing** *boolean*

Synopsis	Enable stable pool sizing for the forwarding plane
Context	<b>configure</b> <i>card number fp number</i> <a href="#">stable-pool-sizing</a> <i>boolean</i>
Tree	<a href="#">stable-pool-sizing</a>
Description	When configured to <b>true</b> , the router provides a stable buffer pool allocation environment for all default port buffer pools on the forwarding plane. This stable environment is provided at the expense of optimal buffer allocation between the various port buffer pools.

When configured to **false**, the router disables stable pool sizing on the forwarding plane. Existing buffer pools are resized according to normal pool sizing behavior.

Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### level keyword

#### WARNING:

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	License level of the card
Context	<b>configure</b> <b>card</b> <i>number</i> <b>level</b> <i>keyword</i>
Tree	<b>level</b>
Description	<p>This command configures the license level of the card.</p> <p>New generations of cards include variants controlled by hardware and software licensing. For these cards, the license level must be provisioned in addition to the card type. A card cannot become operational unless the provisioned license level matches the license level of the card installed into the slot. The set of license levels varies by card type.</p> <p>The provisioned level controls aspects related to connector provisioning and the consumption of hardware egress user queues and egress policers. Changes to the provisioned license level may be blocked if configuration exists that would not be permitted with the new target license level.</p> <p>If the license level is not specified, the level is set to the highest license level for that card.</p>
Options	unrestricted, he, er, cr, he1200g+, er1200g+, cr1200g+, he400g, er400g, cr400g, he400g+, er400g+, cr400g+, he800g+, er800g+, cr800g+, he4800g+, er4800g+, cr4800g+, he4800g, er4800g, cr4800g, he2400g+, er2400g+, cr2400g+, he2400g, er2400g, cr2400g, he9600g, er9600g, cr9600g, he14400g, er14400g, cr14400g, he14400g+, er14400g+, cr14400g+, he2800g+, er2800g+, cr2800g+, he6000g+, er6000g+, cr6000g+, he18000g+, er18000g+, cr18000g+, he19200g, er19200g, cr19200g
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1se

### mda [*mda-slot*] *number*

Synopsis	Enter the <b>mda</b> list instance
Context	<b>configure</b> <b>card</b> <i>number</i> <b>mda</b> <i>number</i>

Tree	<a href="#">mda</a>
Description	Commands in this context cover attributes for specific MDA and XMA.
Introduced	16.0.R1
Platforms	All

### **[mda-slot] number**

Synopsis	MDA or XMA slot
Context	<b>configure</b> <a href="#">card</a> <i>number</i> <a href="#">mda</a> <i>number</i>
Tree	<a href="#">mda</a>
Range	1 to 6
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

### **access**

Synopsis	Enter the <b>access</b> context
Context	<b>configure</b> <a href="#">card</a> <i>number</i> <a href="#">mda</a> <i>number</i> <a href="#">access</a>
Tree	<a href="#">access</a>
Description	Commands in this context configure egress and ingress pool policy parameters. Access egress and ingress pools are only allocated on channelized MDAs.
Introduced	16.0.R1
Platforms	All

### **egress**

Synopsis	Enter the <b>egress</b> context
Context	<b>configure</b> <a href="#">card</a> <i>number</i> <a href="#">mda</a> <i>number</i> <a href="#">access</a> <a href="#">egress</a>
Tree	<a href="#">egress</a>
Introduced	16.0.R1
Platforms	All

## ingress

Synopsis	Enter the <b>ingress</b> context
Context	<b>configure</b> <a href="#">card number</a> <a href="#">mda number</a> <a href="#">access ingress</a>
Tree	<a href="#">ingress</a>
Introduced	16.0.R1
Platforms	All

## admin-state *keyword*

Synopsis	Administrative state of the MDA
Context	<b>configure</b> <a href="#">card number</a> <a href="#">mda number</a> <a href="#">admin-state keyword</a>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	enable
Introduced	16.0.R1
Platforms	All

## egress-xpl

Synopsis	Enter the <b>egress-xpl</b> context
Context	<b>configure</b> <a href="#">card number</a> <a href="#">mda number</a> <a href="#">egress-xpl</a>
Tree	<a href="#">egress-xpl</a>
Description	Commands in this context specify settings for the fail-on-error feature.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## threshold *number*

Synopsis	Threshold value for XPL errors
Context	<b>configure</b> <a href="#">card number</a> <a href="#">mda number</a> <a href="#">egress-xpl threshold number</a>
Tree	<a href="#">threshold</a>
Description	This command configures the threshold for XPL errors. If the number of XPL errors exceeds the threshold value defined by the <b>window value</b> command, the MDA is placed in the failed state.
Range	1 to 1000000

Units	xpl errors
Default	1000
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **window number**

Synopsis	Time interval to measure XPL error frequency
Context	<b>configure</b> <i>card number mda number egress-xpl window number</i>
Tree	<a href="#">window</a>
Description	This command configures the time interval used to measure the frequency of XPL errors for the fail-on-error feature. If the number of XPL errors exceeds the threshold value in defined by this command, the MDA is placed in the Failed state.
Range	1 to 1440
Units	minutes
Default	60
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **event [type] keyword**

Synopsis	Enter the <b>event</b> list instance
Context	<b>configure</b> <i>card number mda number event keyword</i>
Tree	<a href="#">event</a>
Description	<p>Commands in this context allow the user to control the action taken when a specific hardware error event is raised against the target MDA. If no event action has been created for a specific event type, the management plane of the router ignores the hardware errors related to that event type.</p> <p>The log raised for any event, such as soft-error and memory-error, is tmnxEqHwEvent Detected.</p>
Introduced	19.7.R1
Platforms	All

### **[type] keyword**

Synopsis	MDA event type being monitored
Context	<b>configure</b> <i>card number mda number event keyword</i>

Tree	<a href="#">event</a>
Description	This command configures the type of event to be acted upon. <ul style="list-style-type: none"> <li>• <code>soft-error</code> — Defines the action to take when soft errors are detected on the MDA.</li> <li>• <code>internal-frame-loss</code> — Provides system detected frame loss in the traffic transiting the MDA.</li> <li>• <code>memory-error</code> — Provides the user options to handle MDA memory error events on MDAs. This feature is supported on FP2- and FP3-based Ethernet MDAs and IMMs.</li> <li>• <code>data-link-error</code> — Provides the user options to handle datapath link errors on an MDA.</li> </ul>
Options	<code>soft-error</code> , <code>internal-frame-loss</code> , <code>memory-error</code> , <code>datapath-link-error</code>
Notes	This element is part of a list key.
Introduced	19.7.R1
Platforms	All

### **action** *keyword*

Synopsis	Action when a specific hardware error event is raised
Context	<b>configure</b> <a href="#">card</a> <i>number</i> <a href="#">mda</a> <i>number</i> <a href="#">event</a> <i>keyword</i> <a href="#">action</a> <i>keyword</i>
Tree	<a href="#">action</a>
Description	This command defines the action taken when a specific hardware error event is detected on the target MDA.  When no event action is specified for an event type, the hardware errors related to the event type are ignored by the management plane of the router.  Actions include the following: <ul style="list-style-type: none"> <li>• <code>log-only</code> — Pass the log event to log management. No other action is taken.</li> <li>• <code>reset-md</code> — Reset the MDA.</li> <li>• <code>fail-md</code> — Set the operational state of the MDA to Failed. This Failed state persists until the <code>clear mda</code> command is issued (<code>reset</code>) or the MDA is removed and reinserted (<code>re-seated</code>).</li> </ul>
Options	<code>none</code> , <code>log-only</code> , <code>reset</code> , <code>fail</code>
Introduced	19.7.R1
Platforms	All

### **fail-on-error** *boolean*

Synopsis	Set operational state to Failed if an error is detected
Context	<b>configure</b> <a href="#">card</a> <i>number</i> <a href="#">mda</a> <i>number</i> <a href="#">fail-on-error</a> <i>boolean</i>

Tree	<a href="#">fail-on-error</a>
Description	<p>When configured to <b>true</b>, the fail-on-error feature is enabled on the MDA. When a defined rate of egress or ingress XPL errors occur on an MDA within a specified time interval, the MDA is placed in the Failed state. This can force an APS switchover or traffic to be rerouted.</p> <p>The purpose of this feature is to avoid situations where traffic is forced to use a physical link that suffers from errors but is still technically operational. The feature uses values configured in the <b>configure card mda egress-xpl</b> and <b>configure card mda ingress-xpl</b> contexts.</p> <p>See "Fail-on-error overview" in the <i>7450 ESS, 7750 SR, 7950 XRS, and VSR Troubleshooting Guide</i> for more information.</p>
Default	false
Introduced	16.0.R1
Platforms	All

## ingress-xpl

Synopsis	Enter the <b>ingress-xpl</b> context
Context	<b>configure card number mda number ingress-xpl</b>
Tree	<a href="#">ingress-xpl</a>
Description	Commands in this context specify settings for ingress XPL error occurrences.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## threshold *number*

Synopsis	Threshold value for XPL errors
Context	<b>configure card number mda number ingress-xpl threshold number</b>
Tree	<a href="#">threshold</a>
Description	This command configures the threshold for XPL errors. If the number of XPL errors exceeds the threshold value defined by the <b>window value</b> command, the MDA is placed in the failed state.
Range	1 to 1000000
Units	xpl errors
Default	1000
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**window number**

Synopsis	Time interval to measure XPL error frequency
Context	<b>configure</b> <i>card number mda number ingress-xpl window number</i>
Tree	<a href="#">window</a>
Description	This command configures the time interval used to measure the frequency of XPL errors for the fail-on-error feature. If the number of XPL errors exceeds the threshold value in defined by this command, the MDA is placed in the Failed state.
Range	1 to 1440
Units	minutes
Default	60
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**level keyword****WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	MDA card level

**mda-type keyword****WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	MDA type for the slot
Context	<b>configure</b> <i>card number</i> <i>mda number</i> <i>mda-type</i> <i>keyword</i>
Tree	<i>mda-type</i>
Description	<p>This command provisions a specific MDA type to the device configuration for the slot. The MDA can be pre-provisioned and an MDA must be provisioned before connectors or ports can be configured.</p> <p>A maximum of two MDAs can be provisioned on an IOM or XCM. XMAs are provisioned using MDA commands.</p> <p>A medium severity alarm is generated if an MDA is inserted that does not match the MDA type configured for the slot. This alarm is cleared when the correct MDA is inserted or the configuration is modified. A high severity alarm is raised when an administratively enabled MDA is removed from the chassis. This alarm is cleared if either the correct MDA type is inserted or the configuration is modified. A low severity alarm is issued if an MDA is removed that is administratively disabled.</p> <p>An MDA can only be provisioned in a slot if the MDA type is allowed in the MDA slot. An error message is generated when an MDA is provisioned in a slot where it is not allowed.</p> <p>Some MDA hardware can support two different firmware loads. One load includes the base Ethernet functionality, including 10G WAN mode, but does not include 1588 port-based timestamping. The second load includes the base Ethernet functionality and 1588 port-based timestamping, but does not include 10G WAN mode. These are identified as two MDA types that are the same, except for a “-ptp” suffix to indicate the second loadset. A hard reset of the MDA occurs when switching between the two provisioned types.</p> <p>An alarm is raised if partial or complete MDA failure is detected. The alarm is cleared when the error condition ceases.</p> <p>New generations of XMAs include variants controlled through hardware and software licensing. For these XMAs, the license level must be provisioned in addition to the MDA type. An XMA cannot become operational unless the provisioned license level matches the license level of the XMA installed into the slot.</p> <p>The set of license levels varies by MDA type. The provisioned level controls aspects related to connector provisioning and the consumption of hardware egress queues and egress policers. Changes to the provisioned license level may be blocked if configuration that would not be permitted with the new target license level exists. If the license level is not specified, the level is set to the highest license level for that XMA.</p>

## ingress

Synopsis Enter the **ingress** context

Context **configure** *card number mda number network ingress*

Tree	<a href="#">ingress</a>
Introduced	16.0.R1
Platforms	All

### **power-priority-level** *number*

Synopsis	Power priority level for the MDA
Context	<b>configure</b> <a href="#">card</a> <i>number</i> <a href="#">mda</a> <i>number</i> <a href="#">power-priority-level</a> <i>number</i>
Tree	<a href="#">power-priority-level</a>
Range	1 to 200
Default	150
Introduced	16.0.R1
Platforms	7750 SR-1s, 7750 SR-2s, 7750 SR-2se, 7750 SR-7s, 7750 SR-14s, 7950 XRS

### **reset-on-recoverable-error** *boolean*

Synopsis	Reset MDA for fatal memory parity error on a Q-chip
Context	<b>configure</b> <a href="#">card</a> <i>number</i> <a href="#">mda</a> <i>number</i> <a href="#">reset-on-recoverable-error</a> <i>boolean</i>
Tree	<a href="#">reset-on-recoverable-error</a>
Description	When configured to <b>true</b> , the MDA resets when a fatal memory parity error is detected on a Q-chip of the MDA, regardless of the setting of the <b>fail-on-error</b> configuration for the MDA.  When configured to <b>false</b> , the recovery action is taken instead of resetting the MDA.
Default	false
Introduced	16.0.R1
Platforms	7750 SR-1s, 7750 SR-2s, 7750 SR-2se, 7750 SR-7s, 7750 SR-14s, 7950 XRS

### **sync-e** *keyword*

Synopsis	Synchronous Ethernet capability
Context	<b>configure</b> <a href="#">card</a> <i>number</i> <a href="#">mda</a> <i>number</i> <a href="#">sync-e</a> <i>keyword</i>
Tree	<a href="#">sync-e</a>
Description	This command enables synchronous Ethernet on the MDA. When enabled, any port on the MDA can be used as a source port in the central frequency clock configuration, under the <b>configure system central-frequency-clock</b> context.
Options	true, false

Introduced	16.0.R1
Platforms	All

### **upgrade** [*upgrade-index*] *number*

Synopsis	Enter the <b>upgrade</b> list instance
Context	<b>configure</b> <i>card number mda number upgrade number</i>
Tree	<i>upgrade</i>
Description	<p>Commands in this context configure the license level upgrade for the MDA. You can apply multiple upgrades to an MDA. The first upgrade must use index 1, then index 2, and so on. When removing upgrades, remove the largest index first, followed by the next largest, and so on.</p> <p>Some upgrades require a hard reset of the MDA to take effect. In general, this is required when the full duplex bandwidth changes as a result of the upgrade.</p>
Introduced	16.0.R4
Platforms	7750 SR-1s, 7750 SR-2s, 7750 SR-2se, 7750 SR-7s, 7750 SR-14s, 7950 XRS

### **[upgrade-index]** *number*

Synopsis	Order of the upgrade instance
Context	<b>configure</b> <i>card number mda number upgrade number</i>
Tree	<i>upgrade</i>
Range	1 to 6
Notes	This element is part of a list key.
Introduced	16.0.R4
Platforms	7750 SR-1s, 7750 SR-2s, 7750 SR-2se, 7750 SR-7s, 7750 SR-14s, 7950 XRS

### **path** *keyword*

#### **WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Upgrade path of the MDA for the slot
Context	<b>configure</b> <i>card number mda number upgrade number path keyword</i>
Tree	<i>path</i>

Description	This command configures the upgrade path for the MDA in the slot. The path indicates the starting level and the new level that is applied due to the upgrade.
Options	cr1200g-cr1600g, cr1600g-cr2400g, er1200g-er1600g, er1600g-er2400g, he1200g-he1600g, he1600g-he2400g, cr1200g-er1200g, er1200g-he1200g, cr1600g-er1600g, er1600g-he1600g, cr2400g-er2400g, er2400g-he2400g, any2400g-2400g+, cr3600g-cr4800g, er3600g-er4800g, he3600g-he4800g, cr3600g-er3600g, er3600g-he3600g, cr4800g-er4800g, er4800g-he4800g, any3600g-3600gdd, any4800g-4800g+, cr600g-cr1200g, er600g-er1200g, he600g-he1200g, cr600g-er600g, er600g-he600g, any1200g-1200g+, any2400g-2400g+4t, cr-er9600g, er-he9600g, any9600g-9600g+, cr-er14400g, er-he14400g, any14400g-14400g+, he9600g-he12000g+, er9600g-er12000g+, cr9600g-cr12000g+, he14400g-he18000g+, er14400g-er18000g+, cr14400g-cr18000g+, cr-er12000g+, er-he12000g+, cr-er18000g+, er-he18000g+
Notes	This element is mandatory.
Introduced	16.0.R4
Platforms	7750 SR-1s, 7750 SR-2s, 7750 SR-2se, 7750 SR-7s, 7750 SR-14s, 7950 XRS

## xconnect

Synopsis	Enter the <b>xconnect</b> context
Context	<b>configure</b> <i>card number</i> <i>mda number</i> <b>xconnect</b>
Tree	<b>xconnect</b>
Introduced	21.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

## mac [*mac-id*] *number*

Synopsis	Enter the <b>mac</b> list instance
Context	<b>configure</b> <i>card number</i> <i>mda number</i> <b>xconnect</b> <b>mac</b> <i>number</i>
Tree	<b>mac</b>
Description	Commands in this context configure the attributes of the MDA loopback (cross-connect) in the MAC chip.
Introduced	21.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

## [*mac-id*] *number*

Synopsis	MAC ID for the MDA cross-connect
Context	<b>configure</b> <i>card number</i> <i>mda number</i> <b>xconnect</b> <b>mac</b> <i>number</i>

Tree	<a href="#">mac</a>
Range	1 to 12
Notes	This element is part of a list key.
Introduced	21.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

### **description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">card</a> <i>number</i> <a href="#">mda</a> <i>number</i> <a href="#">xconnect</a> <a href="#">mac</a> <i>number</i> <a href="#">description</a> <i>string</i>
Tree	<a href="#">description</a>
String Length	0 to 255
Introduced	21.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

### **loopback** [[loopback-id](#)] *number*

Synopsis	Enter the <b>loopback</b> list instance
Context	<b>configure</b> <a href="#">card</a> <i>number</i> <a href="#">mda</a> <i>number</i> <a href="#">xconnect</a> <a href="#">mac</a> <i>number</i> <a href="#">loopback</a> <i>number</i>
Tree	<a href="#">loopback</a>
Description	Commands in this context configure the attributes of the loopback on a MAC chip. The system and services can start using the loopback only when a port is associated with it (for example, port 1/1/m1/1, where m1 represents the MAC ID).
Introduced	21.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

### **[loopback-id]** *number*

Synopsis	Loopback ID for the MDA cross-connect
Context	<b>configure</b> <a href="#">card</a> <i>number</i> <a href="#">mda</a> <i>number</i> <a href="#">xconnect</a> <a href="#">mac</a> <i>number</i> <a href="#">loopback</a> <i>number</i>
Tree	<a href="#">loopback</a>
Range	1 to 2
Notes	This element is part of a list key.
Introduced	21.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

**bandwidth** *number***WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Maximum bandwidth for a Layer 2 rate for MAC loopback
Context	<b>configure</b> <i>card number mda number xconnect mac number loopback number bandwidth number</i>
Tree	<i>bandwidth</i>
Range	10   25   40   100   400   800
Units	gigabps
Default	100
Introduced	21.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

**description** *string*

Synopsis	Text description
Context	<b>configure</b> <i>card number mda number xconnect mac number loopback number description string</i>
Tree	<i>description</i>
String Length	0 to 255
Introduced	21.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

**power-save** *boolean*

Synopsis	Place card in power-save mode when not in use
Context	<b>configure</b> <i>card number power-save boolean</i>
Tree	<i>power-save</i>
Description	<p>When configured to <b>true</b>, this command enables the power-save mode on the card when it is not in use. The power-save mode allows the card to be installed and configured in a platform for future use, while having minimal impact on the overall power consumption.</p> <p>A card placed in the power-save mode is reset, forced into an idle state, and consumes minimal power. In power save mode, the download of a software image to the card is</p>

not allowed. The card must be administratively disabled before it is placed in the power-save mode.

Cards in the power save mode do not count in the intelligent power management budget and they also do not pass traffic.

When configured to **false**, this command removes the card from power-save mode.

Default	false
Introduced	19.5.R1
Platforms	7450 ESS, 7750 SR-7/12/12e, 7750 SR-a8, 7750 SR-2e, 7750 SR-3e, 7750 SR-2s, 7750 SR-2se, 7750 SR-7s, 7750 SR-14s, 7950 XRS

### **reset-on-recoverable-error** *boolean*

Synopsis	Reset card for fatal memory parity error on a Q-chip
Context	<b>configure</b> <i>card number</i> <b>reset-on-recoverable-error</b> <i>boolean</i>
Tree	<b>reset-on-recoverable-error</b>
Description	When configured to <b>true</b> , the card is reset when a fatal memory parity error is detected on a Q-chip of the card, regardless of the setting of the <b>fail-on-error</b> configuration for the card.  When configured to <b>false</b> , the recovery action is taken instead of resetting the card.
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR-7/12/12e

### **upgrade** [**upgrade-index**] *number*

Synopsis	Enter the <b>upgrade</b> list instance
Context	<b>configure</b> <i>card number</i> <b>upgrade</b> <i>number</i>
Tree	<b>upgrade</b>
Description	Commands in this context assign a license level upgrade to the card, XIOM, or XMA. There can be multiple upgrades applied to a card, XIOM, or XMA. The first upgrade must use index 1, and then next index 2, and so on. Also, when removing upgrades, the largest index must be removed first, and then the next largest removed, and so on.  The path indicates the starting level and the new level that will apply due to the upgrade. For example, "cr1200g-cr1600g" can be applied to an XMA that is currently at the cr1200g level and after application of the upgrade, the operational level of the XMA will be cr1600g.  There must be an upgrade license available for the path specified. Available upgrades can be checked using the <b>show licensing entitlements</b> command.

Some upgrades require a hard reset of the card or MDA to take effect. In general, this is required when the Full Duplex bandwidth is being changed.

Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-1se

### [upgrade-index] *number*

Synopsis	Order of the upgrade value
Context	<b>configure</b> <i>card number upgrade number</i>
Tree	<a href="#">upgrade</a>
Range	1 to 6
Notes	This element is part of a list key.
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-1se

### path *keyword*

#### **WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Upgrade path of the target module for the slot
Context	<b>configure</b> <i>card number upgrade number path keyword</i>
Tree	<a href="#">path</a>
Description	This command configures the upgrade path associated with the upgrade instance for the target module in the slot. The path indicates the starting level and the new level that applies during the upgrade.
Options	cr-er, er-he, cr400g-cr1200g+, er400g-er1200g+, he400g-he1200g+, cr-er1200g+, er-he1200g+, cr-er400g+, er-he400g+, cr-er800g+, er-he800g+, cr400g-cr800g+, er400g-er800g+, he400g-he800g+, cr800g-cr1200g+, er800g-er1200g+, he800g-he1200g+, cr-er2400g, er-he2400g, any2400g-2400g+, cr-er4800g, er-he4800g, any4800g-4800g+, cr-er9600g, er-he9600g, cr-er14400g, er-he14400g, he9600g-he14400g, er9600g-er14400g, cr9600g-cr14400g, any14400g-14400g+, any2400g-2800g+, any4800g-6000g+, any14400g-18000g+, he2400g-he2800g+, er2400g-er2800g+, cr2400g-cr2800g+, he4800g-he6000g+, er4800g-er6000g+, cr4800g-cr6000g+, he14400g-he19200g, er14400g-er19200g, cr14400g-cr19200g, cr-er2800g+, er-he2800g+, cr-er6000g+, er-he6000g+, cr-er19200g, er-he19200g
Notes	This element is mandatory.
Introduced	16.0.R4

Platforms 7450 ESS, 7750 SR, 7750 SR-1se

## virtual-scheduler-adjustment

Synopsis Enter the **virtual-scheduler-adjustment** context

Context **configure** [card](#) *number* [virtual-scheduler-adjustment](#)

Tree [virtual-scheduler-adjustment](#)

Description Commands in this context configure virtual scheduler options. This is applicable to queues and policiers associated to a scheduler.

Introduced 16.0.R1

Platforms All

## internal-scheduler-weight-mode *keyword*

Synopsis Internal scheduler weight mode

Context **configure** [card](#) *number* [virtual-scheduler-adjustment](#) [internal-scheduler-weight-mode](#) *keyword*

Tree [internal-scheduler-weight-mode](#)

Description This command specifies the internal scheduler (tier 0) weight mode for all ingress queues on a LAG on the card on which it is applied.

Options auto, force-equal, offered-load, capped-offered-load

Default auto

Introduced 16.0.R1

Platforms All

## interval

Synopsis Enter the **interval** context

Context **configure** [card](#) *number* [virtual-scheduler-adjustment](#) [interval](#)

Tree [interval](#)

Introduced 16.0.R1

Platforms All

## rate-calculation-minimum

Synopsis Enter the **rate-calculation-minimum** context

Context	<b>configure</b> <i>card number</i> <a href="#">virtual-scheduler-adjustment interval rate-calculation-minimum</a>
Tree	<a href="#">rate-calculation-minimum</a>
Description	<p>Commands in this context override the default minimum time that must elapse before a policer or queue's offered rate can be recalculated. A minimum time between offered rate calculations is enforced to both prevent inaccurate estimation of the offered rate and excessive input to the virtual scheduler process.</p> <p>To smooth out rapidly fluctuating offered rates, the system averages the measured offered rate with a window of previously measured offered traffic statistics and knowledge of the time between the samples.</p>
Introduced	16.0.R1
Platforms	All

### **fast-queue** *decimal-number*

Synopsis	Minimum rate calculation time for fast queues
Context	<b>configure</b> <i>card number</i> <a href="#">virtual-scheduler-adjustment interval rate-calculation-minimum fast-queue decimal-number</a>
Tree	<a href="#">fast-queue</a>
Range	0.01 to 1000.00
Units	percent
Default	100.00
Introduced	16.0.R1
Platforms	All

### **slow-queue** *decimal-number*

Synopsis	Minimum rate calculation time for slow queues
Context	<b>configure</b> <i>card number</i> <a href="#">virtual-scheduler-adjustment interval rate-calculation-minimum slow-queue decimal-number</a>
Tree	<a href="#">slow-queue</a>
Range	0.01 to 1000.00
Units	percent
Default	100.00
Introduced	16.0.R1
Platforms	All

**scheduler-run-minimum** *decimal-number*

Synopsis	Minimum time of the scheduler run
Context	<b>configure</b> <i>card number</i> <a href="#">virtual-scheduler-adjustment interval</a> <a href="#">scheduler-run-minimum decimal-number</a>
Tree	<a href="#">scheduler-run-minimum</a>
Description	<p>This command overrides the default minimum time that must elapse before a virtual scheduler can redistribute bandwidth based on changes to the offered rates of member policers or queues.</p> <p>A minimum run interval is enforced to manage the number of batched queue changes before reacting to the changed rates. Because the periodic function of determining policer or queue offered rates is performed sequentially, the interval allows the policer and queue rates to be determined before the bandwidth distribution to the policers and queues.</p>
Range	0.01 to 1000.00
Units	percent
Default	100.00
Introduced	16.0.R1
Platforms	All

**task-scheduling** *decimal-number*

Synopsis	Task scheduling interval
Context	<b>configure</b> <i>card number</i> <a href="#">virtual-scheduler-adjustment interval</a> <a href="#">task-scheduling decimal-number</a>
Tree	<a href="#">task-scheduling</a>
Description	<p>This command overrides the system default time interval for scheduling the hierarchical virtual scheduler task.</p> <p>By default, the system wakes the virtual scheduler task every 50 ms which is equivalent to five 10 ms timer ticks.</p>
Range	0.01 to 1000.00
Units	percent
Default	100.00
Introduced	16.0.R1
Platforms	All

**slow-queue-threshold-rate** *number*

Synopsis	Slow queue threshold rate
----------	---------------------------

Context	<b>configure card number virtual-scheduler-adjustment slow-queue-threshold-rate number</b>
Tree	<b>slow-queue-threshold-rate</b>
Description	<p>This command overrides the system default threshold rate used to place policers and queues in the slow queue category. Slow rate policers and queues use a different minimum rate calculation interval time than fast rate queues.</p> <p>The fast rate threshold is derived by multiplying the adjusted slow rate threshold by a factor of 1.5.</p> <p>Configuring a value of zero (0) forces all policers and queues to be treated as fast rate queues.</p>
Range	0 to 1000000
Units	kilobps
Default	1000
Introduced	16.0.R1
Platforms	All

### **xiom [xiom-slot] string**

Synopsis	Enter the <b>xiom</b> list instance
Context	<b>configure card number xiom string</b>
Tree	<b>xiom</b>
Introduced	20.2.R1
Platforms	7750 SR-1s, 7750 SR-2s, 7750 SR-2se, 7750 SR-7s, 7750 SR-14s

### **[xiom-slot] string**

Synopsis	XIOM slot ID
Context	<b>configure card number xiom string</b>
Tree	<b>xiom</b>
String Length	2
Notes	This element is part of a list key.
Introduced	20.2.R1
Platforms	7750 SR-1s, 7750 SR-2s, 7750 SR-2se, 7750 SR-7s, 7750 SR-14s

### **admin-state keyword**

Synopsis	Administrative state of the XIOM
----------	----------------------------------

Context	<b>configure card number xiom string admin-state keyword</b>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	enable
Introduced	20.2.R1
Platforms	7750 SR-1s, 7750 SR-2s, 7750 SR-2se, 7750 SR-7s, 7750 SR-14s

### **fail-on-error** *boolean*

Synopsis	Set operational state of the card to failed on error
Context	<b>configure card number xiom string fail-on-error boolean</b>
Tree	<a href="#">fail-on-error</a>
Description	When configured to <b>true</b> , the operational state of the card is set to failed when at least one of a specific set of card-level errors is detected. The failed state persists until the operator reseats the card or resets it using the <b>clear</b> command.
Default	false
Introduced	20.2.R1
Platforms	7750 SR-1s, 7750 SR-2s, 7750 SR-2se, 7750 SR-7s, 7750 SR-14s

### **level** *keyword*

#### **WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	License level of the XIOM
Context	<b>configure card number xiom string level keyword</b>
Tree	<a href="#">level</a>
Description	<p>This command provisions the license level of the XIOM, which controls aspects related to connector provisioning and consumption of hardware egress queues and policers.</p> <p>An XIOM only becomes operational if the provisioned license level matches the license level of the card installed into the slot.</p> <p>The set of license levels varies by XIOM type. Changes to the provisioned license level may be blocked if a configuration exists that is not permitted with the new target license level.</p> <p>If the license level is not specified, the level is set to the highest license level for the XIOM.</p>

Options	unrestricted, he800g+, er800g+, cr800g+, he1500g+, er1500g+, cr1500g+, he1600g+, er1600g+, cr1600g+, he2400g+, er2400g+, cr2400g+, he3000g+, er3000g+, cr3000g+, he2400g, er2400g, cr2400g, he4800g, er4800g, cr4800g, he6000g+, er6000g+, cr6000g+, he3200g+, er3200g+, cr3200g+
Introduced	20.2.R1
Platforms	7750 SR-1s, 7750 SR-2s, 7750 SR-2se, 7750 SR-7s, 7750 SR-14s

### **mda** [**mda-slot**] *number*

Synopsis	Enter the <b>mda</b> list instance
Context	<b>configure</b> <b>card</b> <i>number</i> <b>xiom</b> <i>string</i> <b>mda</b> <i>number</i>
Tree	<b>mda</b>
Introduced	20.2.R1
Platforms	7750 SR-1s, 7750 SR-2s, 7750 SR-2se, 7750 SR-7s, 7750 SR-14s

### **[mda-slot]** *number*

Synopsis	MDA slot number
Context	<b>configure</b> <b>card</b> <i>number</i> <b>xiom</b> <i>string</i> <b>mda</b> <i>number</i>
Tree	<b>mda</b>
Range	1 to 2
Notes	This element is part of a list key.
Introduced	20.2.R1
Platforms	7750 SR-1s, 7750 SR-2s, 7750 SR-2se, 7750 SR-7s, 7750 SR-14s

### **admin-state** *keyword*

Synopsis	Administrative state of the MDA
Context	<b>configure</b> <b>card</b> <i>number</i> <b>xiom</b> <i>string</i> <b>mda</b> <i>number</i> <b>admin-state</b> <i>keyword</i>
Tree	<b>admin-state</b>
Options	enable, disable
Default	enable
Introduced	20.2.R1
Platforms	7750 SR-1s, 7750 SR-2s, 7750 SR-2se, 7750 SR-7s, 7750 SR-14s

**mda-type** *keyword***WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	MDA-s type provisioned for the XIOM slot
Context	<b>configure</b> <i>card number xiom string mda number mda-type keyword</i>
Tree	<a href="#">mda-type</a>
Description	<p>This command provisions the MDA-s type for the XIOM slot.</p> <p>The MDA-s type can be preprovisioned, which means that the MDA-s does not have to be installed in the chassis.</p> <p>You can preprovision the MDA type before you install the MDA in the chassis. An MDA-s can only be provisioned in a slot that is vacant. No other MDA-s can be provisioned (configured) for that particular slot. An error message or log event is generated if the wrong MDA type is provisioned or inserted.</p>
Options	ms6-200gb-cfp2-dco, ms3-200gb-cfp2-dco, ms16-100gb-sfpdd+4-100gb-qsfp28, ms18-100gb-qsfp28, ms4-400gb-qsfpdd+4-100gb-qsfp28, ms24-10/100gb-sfpdd, ms2-400gb-qsfpdd+2-100gb-qsfp28, ms8-100gb-sfpdd+2-100gb-qsfp28, ms16-sdd+4-qsfp28-b, ms8-sdd+2-qsfp28-b, mse24-200g-sfpdd, mse6-800g-cfp2-dco, mse14-800g+4-400g, m36-800g-qsfpdd, mse6-800g-qsfpdd, m36-400g-qsfp112
Introduced	20.2.R1
Platforms	7750 SR-1s, 7750 SR-2s, 7750 SR-2se, 7750 SR-7s, 7750 SR-14s

**power-priority-level** *number*

Synopsis	Power priority level for the XIOM MDA-s
Context	<b>configure</b> <i>card number xiom string mda number power-priority-level number</i>
Tree	<a href="#">power-priority-level</a>
Description	<p>This command configures the power-priority level for the XIOM MDA-s.</p> <p>Consider the following suggestions when configuring the power-priority level:</p> <ul style="list-style-type: none"> <li>• The lowest number has the highest priority.</li> <li>• Use the priority numbers from 1 to 100 for modules that are essential for system operation.</li> <li>• Use the priority numbers from 101 to 200 for non-essential modules.</li> </ul>
Range	1 to 200
Default	150
Introduced	20.2.R1
Platforms	7750 SR-1s, 7750 SR-2s, 7750 SR-2se, 7750 SR-7s, 7750 SR-14s

**sync-e keyword**

Synopsis	Synchronous Ethernet capability
Context	<b>configure card number xiom string mda number sync-e keyword</b>
Tree	<b>sync-e</b>
Options	true, false
Introduced	20.2.R1
Platforms	7750 SR-1s, 7750 SR-2s, 7750 SR-2se, 7750 SR-7s, 7750 SR-14s

**xconnect**

Synopsis	Enter the <b>xconnect</b> context
Context	<b>configure card number xiom string mda number xconnect</b>
Tree	<b>xconnect</b>
Introduced	21.5.R1
Platforms	7750 SR-1s, 7750 SR-2s, 7750 SR-2se, 7750 SR-7s, 7750 SR-14s

**mac [mac-id] number**

Synopsis	Enter the <b>mac</b> list instance
Context	<b>configure card number xiom string mda number xconnect mac number</b>
Tree	<b>mac</b>
Introduced	21.5.R1
Platforms	7750 SR-1s, 7750 SR-2s, 7750 SR-2se, 7750 SR-7s, 7750 SR-14s

**[mac-id] number**

Synopsis	MAC ID for the MDA cross-connect
Context	<b>configure card number xiom string mda number xconnect mac number</b>
Tree	<b>mac</b>
Range	1 to 12
Notes	This element is part of a list key.
Introduced	21.5.R1
Platforms	7750 SR-1s, 7750 SR-2s, 7750 SR-2se, 7750 SR-7s, 7750 SR-14s

**description string**

Synopsis	Text description
Context	<b>configure</b> <a href="#">card number</a> <a href="#">xiom string</a> <a href="#">mda number</a> <a href="#">xconnect mac number</a> <a href="#">description string</a>
Tree	<a href="#">description</a>
String Length	0 to 255
Introduced	21.5.R1
Platforms	7750 SR-1s, 7750 SR-2s, 7750 SR-2se, 7750 SR-7s, 7750 SR-14s

**loopback [loopback-id] number**

Synopsis	Enter the <b>loopback</b> list instance
Context	<b>configure</b> <a href="#">card number</a> <a href="#">xiom string</a> <a href="#">mda number</a> <a href="#">xconnect mac number</a> <a href="#">loopback number</a>
Tree	<a href="#">loopback</a>
Description	Commands in this context configure a MAC loopback on a MAC chip. The system and services only start using the loopback when a port is associated with it. For example, port 1/1/m1/1, where m1 represents the MAC ID.
Introduced	21.5.R1
Platforms	7750 SR-1s, 7750 SR-2s, 7750 SR-2se, 7750 SR-7s, 7750 SR-14s

**[loopback-id] number**

Synopsis	Loopback ID for the MDA cross-connect
Context	<b>configure</b> <a href="#">card number</a> <a href="#">xiom string</a> <a href="#">mda number</a> <a href="#">xconnect mac number</a> <a href="#">loopback number</a>
Tree	<a href="#">loopback</a>
Range	1 to 2
Notes	This element is part of a list key.
Introduced	21.5.R1
Platforms	7750 SR-1s, 7750 SR-2s, 7750 SR-2se, 7750 SR-7s, 7750 SR-14s

**bandwidth** *number***WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Maximum bandwidth for a Layer 2 rate for MAC loopback
Context	<b>configure</b> <i>card number xiom string mda number xconnect mac number loopback number bandwidth number</i>
Tree	<a href="#">bandwidth</a>
Range	10   25   40   100   400   800
Units	gigabps
Default	100
Introduced	21.5.R1
Platforms	7750 SR-1s, 7750 SR-2s, 7750 SR-2se, 7750 SR-7s, 7750 SR-14s

**description** *string*

Synopsis	Text description
Context	<b>configure</b> <i>card number xiom string mda number xconnect mac number loopback number description string</i>
Tree	<a href="#">description</a>
String Length	0 to 255
Introduced	21.5.R1
Platforms	7750 SR-1s, 7750 SR-2s, 7750 SR-2se, 7750 SR-7s, 7750 SR-14s

**reset-on-recoverable-error** *boolean*

Synopsis	Reset XIOM for fatal memory parity error on a Q-chip
Context	<b>configure</b> <i>card number xiom string reset-on-recoverable-error boolean</i>
Tree	<a href="#">reset-on-recoverable-error</a>
Description	When configured to <b>true</b> , the XIOM is reset when a fatal memory parity error is detected on a Q-chip of the XIOM, regardless of the setting of the <b>fail-on-error</b> configuration for the XIOM.  When configured to <b>false</b> , the recovery action is taken instead of resetting the XIOM.
Default	false
Introduced	20.2.R1
Platforms	7750 SR-1s, 7750 SR-2s, 7750 SR-2se, 7750 SR-7s, 7750 SR-14s

**upgrade** [*upgrade-index*] *number*

Synopsis	Enter the <b>upgrade</b> list instance
Context	<b>configure</b> <i>card number xiom string upgrade number</i>
Tree	<i>upgrade</i>
Description	<p>Commands in this context assign a license level upgrade to the XIOM. Multiple upgrades can be applied to an XIOM. The first upgrade must use index 1, then index 2, and so on. When removing upgrades, the largest index must be removed first, followed by the next largest, and so on.</p> <p>Some upgrades require a hard reset of the XIOM to take effect. In general, this is required when the Full Duplex bandwidth is changed as a result of the upgrade.</p>
Introduced	20.2.R1
Platforms	7750 SR-1s, 7750 SR-2s, 7750 SR-2se, 7750 SR-7s, 7750 SR-14s

**[upgrade-index]** *number*

Synopsis	Order of the upgrade value
Context	<b>configure</b> <i>card number xiom string upgrade number</i>
Tree	<i>upgrade</i>
Range	1 to 6
Notes	This element is part of a list key.
Introduced	20.2.R1
Platforms	7750 SR-1s, 7750 SR-2s, 7750 SR-2se, 7750 SR-7s, 7750 SR-14s

**path** *keyword***WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Upgrade name
Context	<b>configure</b> <i>card number xiom string upgrade number path keyword</i>
Tree	<i>path</i>
Description	<p>This command specifies the upgrade name. An upgrade license must be available for the specified path.</p> <p>Available upgrades can be checked using the <b>show licensing entitlements</b> command.</p>
Options	cr800g-cr1500g+, er800g-er1500g+, he800g-he1500g+, cr1600g-cr2400g+, er1600g-er2400g+, he1600g-he2400g+, cr2400g-cr3000g+, er2400g-er3000g+,

he2400g-he3000g+, cr-er800g+, er-he800g+, cr-er1500g+, er-he1500g+, cr-er1600g+, er-he1600g+, cr-er2400g+, er-he2400g+, cr-er3000g+, er-he3000g+, cr4800g-cr6000g+, er4800g-er6000g+, he4800g-he6000g+, cr-er2400g, er-he2400g, cr-er4800g, er-he4800g, cr-er6000g+, er-he6000g+, cr1600g-cr3000g+, er1600g-er3000g+, he1600g-he3000g+, cr-er3200g+, er-he3200g+, cr3200g-cr6000g+, er3200g-er6000g+, he3200g-he6000g+

Notes	This element is mandatory.
Introduced	20.2.R1
Platforms	7750 SR-1s, 7750 SR-2s, 7750 SR-2se, 7750 SR-7s, 7750 SR-14s

### **xiom-type** keyword

#### **WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	XIOM type
Context	<b>configure</b> <b>card</b> <i>number</i> <b>xiom</b> <i>string</i> <b>xiom-type</b> <i>keyword</i>
Tree	<b>xiom-type</b>
Description	<p>This command associates the XIOM type with the slot.</p> <p>The XIOM type can be preprovisioned, which means that the XIOM does not have to be installed in the chassis.</p> <p>An XIOM must be provisioned before an MDA-s, a connector, or a port can be configured. An XIOM can only be provisioned in a slot that is vacant. After an XIOM is provisioned in the slot, no other XIOM can be provisioned (configured) for the slot.</p> <p>An XIOM can only be provisioned in a slot if the XIOM type is allowed in the slot. An error message is generated if an attempt is made to provision an XIOM type that is not allowed.</p> <p>If an XIOM is inserted that does not match the configured XIOM type for the slot, then a log event and a facility alarm are raised. The alarm is cleared when the correct XIOM type is installed or the configuration is modified.</p> <p>A log event and a facility alarm are raised if an administratively enabled XIOM is removed from the chassis. The alarm is cleared when the correct XIOM type is installed or the configuration is modified. A log event is issued when an XIOM is removed that is administratively disabled.</p> <p>XIOMs are controlled by hardware and software licensing. In addition to the XIOM type, the license level must be provisioned using the <b>level</b> command.</p>
Options	iom-s-3.0t, iom-s-1.5t, iom2-se-6.0t, iom2-se-3.0t, x2-s36-800g-qsfppdd-6.0t, x2-s36-400g-qsf112-3.0t
Introduced	20.2.R1
Platforms	7750 SR-1s, 7750 SR-2s, 7750 SR-2se, 7750 SR-7s, 7750 SR-14s

```

### 3.10.1 cflowd command descriptions

#### **cflowd**

Synopsis	Enable the <b>cflowd</b> context
Context	<b>configure cflowd</b>
Tree	<a href="#">cflowd</a>
Introduced	16.0.R1
Platforms	All

#### **active-flow-timeout** *number*

Synopsis	Maximum time before an active flow is exported
Context	<b>configure cflowd active-flow-timeout</b> <i>number</i>
Tree	<a href="#">active-flow-timeout</a>
Description	<p>This command configures the maximum time before an active flow is aged out of the active cache. If an individual flow is active for the configured time, the flow is exported and a new flow is created on the next packet sampled for the flow.</p> <p>This value is set for a flow when the flow is initially created in the active cache table and does not change dynamically.</p>
Range	30 to 36000
Units	seconds
Default	1800
Introduced	20.2.R1
Platforms	All

#### **admin-state** *keyword*

Synopsis	Administrative state of cflowd
Context	<b>configure cflowd admin-state</b> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	enable
Introduced	16.0.R1
Platforms	All

**analyze-gre-payload** *boolean*

Synopsis	Perform cflowd analysis on the inner IP packet
Context	<b>configure</b> <a href="#">cflowd analyze-gre-payload</a> <i>boolean</i>
Tree	<a href="#">analyze-gre-payload</a>
Default	false
Introduced	16.0.R1
Platforms	All

**analyze-l2tp-traffic** *boolean*

Synopsis	Analyze the inner IP header of an L2TP packet
Context	<b>configure</b> <a href="#">cflowd analyze-l2tp-traffic</a> <i>boolean</i>
Tree	<a href="#">analyze-l2tp-traffic</a>
Description	<p>When configured to <b>true</b>, cflowd looks for and analyzes the inner IP header of an L2TPv2 frame.</p> <p>L2TPv2 traffic is identified by either the source or destination UDP port numbering that is set to 1701.</p> <p>When configured to <b>false</b>, the analysis is not performed.</p>
Default	false
Introduced	19.10.R1
Platforms	All

**analyze-v4overv6-traffic** *boolean*

Synopsis	Analyze the inner IPv4 packet within an IPv6 packet
Context	<b>configure</b> <a href="#">cflowd analyze-v4overv6-traffic</a> <i>boolean</i>
Tree	<a href="#">analyze-v4overv6-traffic</a>
Description	<p>When configured to <b>true</b>, cflowd looks for and analyzes the inner IPv4 header of IPv4overIPv6 frames that include MAP-E as well as DSLite and SAM traffic.</p> <p>When configured to <b>false</b>, the analysis is not performed.</p>
Default	false
Introduced	19.10.R1
Platforms	All

**cache-size** *number*

Synopsis	Maximum number of active flows in the flow cache table
Context	<b>configure</b> <a href="#">cflowd</a> <b>cache-size</b> <i>number</i>
Tree	<a href="#">cache-size</a>
Range	1000 to 2000000
Units	flows
Introduced	16.0.R1
Platforms	All

**collector** [[ip-address](#)] (*ipv4-address-no-zone* | *ipv6-address-no-zone*) [port](#) *number*

Synopsis	Enter the <b>collector</b> list instance
Context	<b>configure</b> <a href="#">cflowd</a> <b>collector</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <a href="#">port</a> <i>number</i>
Tree	<a href="#">collector</a>
Max. Instances	8
Introduced	16.0.R1
Platforms	All

**[ip-address]** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	IP address of the remote cflowd collector host
Context	<b>configure</b> <a href="#">cflowd</a> <b>collector</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <a href="#">port</a> <i>number</i>
Tree	<a href="#">collector</a>
Description	This command specifies the IP address of the remote cflowd collector host to receive the exported cflowd data.
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

**port** *number*

Synopsis	UDP port number of the remote cflowd collector host
Context	<b>configure</b> <a href="#">cflowd</a> <b>collector</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <a href="#">port</a> <i>number</i>
Tree	<a href="#">collector</a>

---

Range	1 to 65535
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

### **admin-state** *keyword*

Synopsis	Administrative state of the cflowd collector
Context	<b>configure</b> <b>cflowd collector</b> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> ) <b>port number</b> <b>admin-state</b> <i>keyword</i>
Tree	<b>admin-state</b>
Options	enable, disable
Default	enable
Introduced	16.0.R1
Platforms	All

### **aggregation**

Synopsis	Enter the <b>aggregation</b> context
Context	<b>configure</b> <b>cflowd collector</b> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> ) <b>port number</b> <b>aggregation</b>
Tree	<b>aggregation</b>
Introduced	16.0.R1
Platforms	All

### **as-matrix** *boolean*

Synopsis	Base aggregation data based on AS information
Context	<b>configure</b> <b>cflowd collector</b> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> ) <b>port number</b> <b>aggregation as-matrix</b> <i>boolean</i>
Tree	<b>as-matrix</b>
Default	false
Introduced	16.0.R1
Platforms	All

### **destination-prefix** *boolean*

Synopsis	Aggregate data based on destination prefix information
Context	<b>configure cflowd collector</b> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> ) <b>port number</b> <b>aggregation destination-prefix</b> <i>boolean</i>
Tree	<a href="#">destination-prefix</a>
Default	false
Introduced	16.0.R1
Platforms	All

### **protocol-port** *boolean*

Synopsis	Aggregate flows based on the IP protocol and ports
Context	<b>configure cflowd collector</b> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> ) <b>port number</b> <b>aggregation protocol-port</b> <i>boolean</i>
Tree	<a href="#">protocol-port</a>
Default	false
Introduced	16.0.R1
Platforms	All

### **raw** *boolean*

Synopsis	Export flow data without aggregation
Context	<b>configure cflowd collector</b> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> ) <b>port number</b> <b>aggregation raw</b> <i>boolean</i>
Tree	<a href="#">raw</a>
Default	false
Introduced	16.0.R1
Platforms	All

### **source-destination-prefix** *boolean*

Synopsis	Aggregate data based on prefix information
Context	<b>configure cflowd collector</b> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> ) <b>port number</b> <b>aggregation source-destination-prefix</b> <i>boolean</i>
Tree	<a href="#">source-destination-prefix</a>
Default	false

Introduced	16.0.R1
Platforms	All

### **source-prefix** *boolean*

Synopsis	Aggregate flows based on the source prefix information
Context	<b>configure</b> <b>cflowd collector</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>port number</b> <b>aggregation source-prefix</b> <i>boolean</i>
Tree	<a href="#">source-prefix</a>
Default	false
Introduced	16.0.R1
Platforms	All

### **autonomous-system-type** *keyword*

Synopsis	Basis of the AS information included in flow data
Context	<b>configure</b> <b>cflowd collector</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>port number</b> <b>autonomous-system-type</b> <i>keyword</i>
Tree	<a href="#">autonomous-system-type</a>
Options	origin, peer
Default	origin
Introduced	16.0.R1
Platforms	All

### **description** *string*

Synopsis	Text description
Context	<b>configure</b> <b>cflowd collector</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>port number</b> <b>description</b> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R1
Platforms	All

## export-filter

Synopsis	Enter the <b>export-filter</b> context
Context	<b>configure cflowd collector</b> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> ) <b>port number</b> <b>export-filter</b>
Tree	<b>export-filter</b>
Description	Commands in this context configure the export filters that control which flows are sent to the Cflowd Collector.
Introduced	16.0.R1
Platforms	All

## family

Synopsis	Enter the <b>family</b> context
Context	<b>configure cflowd collector</b> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> ) <b>port number</b> <b>export-filter family</b>
Tree	<b>family</b>
Introduced	16.0.R1
Platforms	All

## ipv4 boolean

Synopsis	Filter IPv4 flow data from being sent to the collector
Context	<b>configure cflowd collector</b> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> ) <b>port number</b> <b>export-filter family ipv4 boolean</b>
Tree	<b>ipv4</b>
Default	false
Introduced	16.0.R1
Platforms	All

## ipv6 boolean

Synopsis	Filter IPv6 flow data from being sent to the collector
Context	<b>configure cflowd collector</b> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> ) <b>port number</b> <b>export-filter family ipv6 boolean</b>
Tree	<b>ipv6</b>
Default	false

Introduced 16.0.R1  
Platforms All

### ***l2-ip boolean***

Synopsis Filter L2 IP flow data from being sent to the collector  
Context **configure** [cflowd collector](#) ([ipv4-address-no-zone](#) | [ipv6-address-no-zone](#)) [port number](#)  
[export-filter family l2-ip boolean](#)  
Tree [l2-ip](#)  
Default false  
Introduced 16.0.R1  
Platforms All

### ***mcast-ipv4 boolean***

Synopsis Filter multicast IPv4 data from going to the collector  
Context **configure** [cflowd collector](#) ([ipv4-address-no-zone](#) | [ipv6-address-no-zone](#)) [port number](#)  
[export-filter family mcast-ipv4 boolean](#)  
Tree [mcast-ipv4](#)  
Default false  
Introduced 16.0.R1  
Platforms All

### ***mcast-ipv6 boolean***

Synopsis Filter multicast IPv6 data from going to the collector  
Context **configure** [cflowd collector](#) ([ipv4-address-no-zone](#) | [ipv6-address-no-zone](#)) [port number](#)  
[export-filter family mcast-ipv6 boolean](#)  
Tree [mcast-ipv6](#)  
Default false  
Introduced 16.0.R1  
Platforms All

### ***mpls boolean***

Synopsis Filter MPLS flow data from being sent to the collector

Context	<b>configure cflowd collector</b> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> ) <b>port number</b> <b>export-filter family mpls boolean</b>
Tree	<b>mpls</b>
Default	false
Introduced	16.0.R1
Platforms	All

## interface-list

Synopsis	Enter the <b>interface-list</b> context
Context	<b>configure cflowd collector</b> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> ) <b>port number</b> <b>export-filter interface-list</b>
Tree	<b>interface-list</b>
Description	Commands in this context configure the match conditions for the interface that control which flow data is exported to the associated Cflowd Collector.
Introduced	16.0.R4
Platforms	All

## router [**router-name**] *reference interface-name reference*

Synopsis	Enter the <b>router</b> list instance
Context	<b>configure cflowd collector</b> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> ) <b>port number</b> <b>export-filter interface-list router reference interface-name reference</b>
Tree	<b>router</b>
Description	Commands in this context configure the interface the router uses to send ingress sampled data flows to the associated Cflowd Collector.
Introduced	16.0.R4
Platforms	All

## [**router-name**] *reference*

Synopsis	Administrative router name
Context	<b>configure cflowd collector</b> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> ) <b>port number</b> <b>export-filter interface-list router reference interface-name reference</b>
Tree	<b>router</b>
Reference	<b>configure router string</b>

Notes	This element is part of a list key.
Introduced	16.0.R4
Platforms	All

### **interface-name** *reference*

Synopsis	Name for the router to the service interface or SAP
Context	<b>configure</b> <a href="#">cflowd collector</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <a href="#">port number</a> <a href="#">export-filter interface-list</a> <a href="#">router reference interface-name reference</a>
Tree	<a href="#">router</a>
Reference	<b>configure</b> <a href="#">router string interface string</a>
Notes	This element is part of a list key.
Introduced	16.0.R4
Platforms	All

### **direction** *keyword*

Synopsis	Flow match condition direction for the export filter
Context	<b>configure</b> <a href="#">cflowd collector</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <a href="#">port number</a> <a href="#">export-filter interface-list</a> <a href="#">router reference interface-name reference</a> <a href="#">direction keyword</a>
Tree	<a href="#">direction</a>
Description	This command configures the direction of the flows as a match condition for the associated export filter. The router only sends flows that match the specified direction to the associated Cflowd Collector.
Options	ingress, egress, both
Default	both
Introduced	23.10.R1
Platforms	All

### **service**

Synopsis	Enter the <b>service</b> context
Context	<b>configure</b> <a href="#">cflowd collector</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <a href="#">port number</a> <a href="#">export-filter interface-list</a> <a href="#">service</a>
Tree	<a href="#">service</a>

Description	Commands in this context configure which flow data this service interface sends to this Cflowd Collector.
Introduced	16.0.R4
Platforms	All

### **ies-group-interface** *service-name reference* *subscriber-interface-name reference* *group-interface-name reference*

Synopsis	Enter the <b>ies-group-interface</b> list instance
Context	<b>configure</b> <b>cflowd collector</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>port number</b> <b>export-filter interface-list service ies-group-interface service-name reference subscriber-interface-name reference group-interface-name reference</b>
Tree	<b>ies-group-interface</b>
Description	Commands in this context configure which IES group interface flow data the service sends to the Cflowd Collector.
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **service-name** *reference*

Synopsis	Administrative service name
Context	<b>configure</b> <b>cflowd collector</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>port number</b> <b>export-filter interface-list service ies-group-interface service-name reference subscriber-interface-name reference group-interface-name reference</b>
Tree	<b>ies-group-interface</b>
Reference	<b>configure</b> <b>service ies</b> <i>string</i>
Notes	This element is part of a list key.
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **subscriber-interface-name** *reference*

Synopsis	Subscriber interface name
Context	<b>configure</b> <b>cflowd collector</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>port number</b> <b>export-filter interface-list service ies-group-interface service-name reference subscriber-interface-name reference group-interface-name reference</b>
Tree	<b>ies-group-interface</b>

Reference	<b>configure</b> <a href="#">service ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i>
Notes	This element is part of a list key.
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **group-interface-name** *reference*

Synopsis	Group interface name
Context	<b>configure</b> <a href="#">cflowd collector</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <a href="#">port number</a> <a href="#">export-filter interface-list service ies-group-interface service-name</a> <i>reference</i> <a href="#">subscriber-interface-name</a> <i>reference</i> <a href="#">group-interface-name</a> <i>reference</i>
Tree	<a href="#">ies-group-interface</a>
Reference	<b>configure</b> <a href="#">service ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i>
Notes	This element is part of a list key.
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **direction** *keyword*

Synopsis	Flow match condition direction for the export filter
Context	<b>configure</b> <a href="#">cflowd collector</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <a href="#">port number</a> <a href="#">export-filter interface-list service ies-group-interface service-name</a> <i>reference</i> <a href="#">subscriber-interface-name</a> <i>reference</i> <a href="#">group-interface-name</a> <i>reference</i> <a href="#">direction</a> <i>keyword</i>
Tree	<a href="#">direction</a>
Description	This command configures the direction of the flows as a match condition for the associated export filter. The router only sends flows that match the specified direction to the associated Cflowd Collector.
Options	ingress, egress, both
Default	both
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **ies-interface** [service-name](#) *reference* [interface-name](#) *reference*

Synopsis	Enter the <b>ies-interface</b> list instance
----------	--

Context	<b>configure</b> <a href="#">cflowd collector</a> ( <a href="#">ipv4-address-no-zone</a>   <a href="#">ipv6-address-no-zone</a> ) <a href="#">port number</a> <a href="#">export-filter</a> <a href="#">interface-list</a> <a href="#">service</a> <a href="#">ies-interface</a> <a href="#">service-name</a> <a href="#">reference</a> <a href="#">interface-name</a> <a href="#">reference</a>
Tree	<a href="#">ies-interface</a>
Description	Commands in this context configure which IES service interface flow data the service sends to the Cflowd Collector.
Introduced	16.0.R4
Platforms	All

### **service-name** *reference*

Synopsis	Administrative service name
Context	<b>configure</b> <a href="#">cflowd collector</a> ( <a href="#">ipv4-address-no-zone</a>   <a href="#">ipv6-address-no-zone</a> ) <a href="#">port number</a> <a href="#">export-filter</a> <a href="#">interface-list</a> <a href="#">service</a> <a href="#">ies-interface</a> <a href="#">service-name</a> <a href="#">reference</a> <a href="#">interface-name</a> <a href="#">reference</a>
Tree	<a href="#">ies-interface</a>
Reference	<b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i>
Notes	This element is part of a list key.
Introduced	16.0.R4
Platforms	All

### **interface-name** *reference*

Synopsis	IP interface name
Context	<b>configure</b> <a href="#">cflowd collector</a> ( <a href="#">ipv4-address-no-zone</a>   <a href="#">ipv6-address-no-zone</a> ) <a href="#">port number</a> <a href="#">export-filter</a> <a href="#">interface-list</a> <a href="#">service</a> <a href="#">ies-interface</a> <a href="#">service-name</a> <a href="#">reference</a> <a href="#">interface-name</a> <a href="#">reference</a>
Tree	<a href="#">ies-interface</a>
Reference	<b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">interface</a> <i>string</i>
Notes	This element is part of a list key.
Introduced	16.0.R4
Platforms	All

### **direction** *keyword*

Synopsis	Flow match condition direction for the export filter
----------	--

Context	<b>configure</b> <a href="#">cflowd collector</a> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> ) <a href="#">port number</a> <a href="#">export-filter</a> <a href="#">interface-list</a> <a href="#">service ies-interface</a> <a href="#">service-name</a> <a href="#">reference</a> <a href="#">interface-name</a> <a href="#">reference</a> <a href="#">direction</a> <a href="#">keyword</a>
Tree	<a href="#">direction</a>
Description	This command configures the direction of the flows as a match condition for the associated export filter. The router only sends flows that match the specified direction to the associated Cflowd Collector.
Options	ingress, egress, both
Default	both
Introduced	23.10.R1
Platforms	All

### **vprn-group-interface** [service-name](#) [reference](#) [subscriber-interface-name](#) [reference](#) [group-interface-name](#) [reference](#)

Synopsis	Enter the <b>vprn-group-interface</b> list instance
Context	<b>configure</b> <a href="#">cflowd collector</a> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> ) <a href="#">port number</a> <a href="#">export-filter</a> <a href="#">interface-list</a> <a href="#">service vprn-group-interface</a> <a href="#">service-name</a> <a href="#">reference</a> <a href="#">subscriber-interface-name</a> <a href="#">reference</a> <a href="#">group-interface-name</a> <a href="#">reference</a>
Tree	<a href="#">vprn-group-interface</a>
Description	Commands in this context configure which VPRN group interface flow data the service sends to the Cflowd Collector.
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **service-name** [reference](#)

Synopsis	Administrative service name
Context	<b>configure</b> <a href="#">cflowd collector</a> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> ) <a href="#">port number</a> <a href="#">export-filter</a> <a href="#">interface-list</a> <a href="#">service vprn-group-interface</a> <a href="#">service-name</a> <a href="#">reference</a> <a href="#">subscriber-interface-name</a> <a href="#">reference</a> <a href="#">group-interface-name</a> <a href="#">reference</a>
Tree	<a href="#">vprn-group-interface</a>
Reference	<b>configure</b> <a href="#">service vprn</a> <a href="#">string</a>
Notes	This element is part of a list key.
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**subscriber-interface-name** *reference*

Synopsis	Subscriber interface name
Context	<b>configure</b> <a href="#">cflowd collector</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <a href="#">port number</a> <a href="#">export-filter</a> <a href="#">interface-list</a> <a href="#">service vprn-group-interface</a> <a href="#">service-name reference</a> <a href="#">subscriber-interface-name reference</a> <a href="#">group-interface-name reference</a>
Tree	<a href="#">vprn-group-interface</a>
Reference	<b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i>
Notes	This element is part of a list key.
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**group-interface-name** *reference*

Synopsis	Group interface name
Context	<b>configure</b> <a href="#">cflowd collector</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <a href="#">port number</a> <a href="#">export-filter</a> <a href="#">interface-list</a> <a href="#">service vprn-group-interface</a> <a href="#">service-name reference</a> <a href="#">subscriber-interface-name reference</a> <a href="#">group-interface-name reference</a>
Tree	<a href="#">vprn-group-interface</a>
Reference	<b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i>
Notes	This element is part of a list key.
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**direction** *keyword*

Synopsis	Flow match condition direction for the export filter
Context	<b>configure</b> <a href="#">cflowd collector</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <a href="#">port number</a> <a href="#">export-filter</a> <a href="#">interface-list</a> <a href="#">service vprn-group-interface</a> <a href="#">service-name reference</a> <a href="#">subscriber-interface-name reference</a> <a href="#">group-interface-name reference</a> <a href="#">direction</a> <i>keyword</i>
Tree	<a href="#">direction</a>
Description	This command configures the direction of the flows as a match condition for the associated export filter. The router only sends flows that match the specified direction to the associated Cflowd Collector.
Options	ingress, egress, both
Default	both
Introduced	23.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **vprn-interface** *service-name reference interface-name reference*

Synopsis Enter the **vprn-interface** list instance

Context **configure** **cflowd collector** (*ipv4-address-no-zone | ipv6-address-no-zone*) **port number** **export-filter interface-list service vprn-interface service-name reference interface-name reference**

Tree **vprn-interface**

Description Commands in this context configure which VPRN service interface flow data the service sends to the Cflowd Collector.

Introduced 16.0.R4

Platforms All

### **service-name** *reference*

Synopsis Administrative service name

Context **configure** **cflowd collector** (*ipv4-address-no-zone | ipv6-address-no-zone*) **port number** **export-filter interface-list service vprn-interface service-name reference interface-name reference**

Tree **vprn-interface**

Reference **configure** **service vprn** *string*

Notes This element is part of a list key.

Introduced 16.0.R4

Platforms All

### **interface-name** *reference*

Synopsis IP interface name

Context **configure** **cflowd collector** (*ipv4-address-no-zone | ipv6-address-no-zone*) **port number** **export-filter interface-list service vprn-interface service-name reference interface-name reference**

Tree **vprn-interface**

Reference **configure** **service vprn** *string* **interface** *string*

Notes This element is part of a list key.

Introduced 16.0.R4

Platforms All

**direction** *keyword*

Synopsis	Flow match condition direction for the export filter
Context	<b>configure</b> <b>cflowd collector</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>port number</b> <b>export-filter interface-list service vprn-interface service-name</b> <i>reference</i> <b>interface-name</b> <i>reference</i> <b>direction</b> <i>keyword</i>
Tree	<b>direction</b>
Description	This command configures the direction of the flows as a match condition for the associated export filter. The router only sends flows that match the specified direction to the associated Cflowd Collector.
Options	ingress, egress, both
Default	both
Introduced	23.10.R1
Platforms	All

**vprn-network-interface** *service-name* *reference* **network-interface-name** *reference*

Synopsis	Enter the <b>vprn-network-interface</b> list instance
Context	<b>configure</b> <b>cflowd collector</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>port number</b> <b>export-filter interface-list service vprn-network-interface service-name</b> <i>reference</i> <b>network-interface-name</b> <i>reference</i>
Tree	<b>vprn-network-interface</b>
Description	Commands in this context configure which VPRN network interfaces flow data the service sends to the Cflowd Collector.
Introduced	16.0.R4
Platforms	All

**service-name** *reference*

Synopsis	Administrative service name
Context	<b>configure</b> <b>cflowd collector</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>port number</b> <b>export-filter interface-list service vprn-network-interface service-name</b> <i>reference</i> <b>network-interface-name</b> <i>reference</i>
Tree	<b>vprn-network-interface</b>
Reference	<b>configure service vprn</b> <i>string</i>
Notes	This element is part of a list key.
Introduced	16.0.R4

Platforms All

### **network-interface-name** *reference*

Synopsis Network interface name

Context **configure** **cflowd collector** (*ipv4-address-no-zone* | *ipv6-address-no-zone*) **port number** **export-filter interface-list service vprn-network-interface service-name** *reference* **network-interface-name** *reference*

Tree [vprn-network-interface](#)

Description This command specifies the network interface name. Interface names must be unique within the group of defined IP interfaces for the **configure router interface** and **configure service ies interface** commands. An interface name cannot be in the form of an IP address. If the string contains special characters (#, \$, spaces, and so on), the entire string must be enclosed within double quotes and must start with a letter.

Reference **configure service vprn** *string* **network-interface** *string*

Notes This element is part of a list key.

Introduced 16.0.R4

Platforms All

### **direction** *keyword*

Synopsis Flow match condition direction for the export filter

Context **configure** **cflowd collector** (*ipv4-address-no-zone* | *ipv6-address-no-zone*) **port number** **export-filter interface-list service vprn-network-interface service-name** *reference* **network-interface-name** *reference* **direction** *keyword*

Tree [direction](#)

Description This command configures the direction of the flows as a match condition for the associated export filter. The router only sends flows that match the specified direction to the associated Cflowd Collector.

Options ingress, egress, both

Default both

Introduced 23.10.R1

Platforms All

### **router** [[router-instance](#)] *string*

Synopsis Add a list entry for **router**

Context	<b>configure cflowd collector</b> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> ) <b>port number export-filter router string</b>
Tree	<b>router</b>
Description	This command adds an entry to the list of router instances that can send flow data to the associated Cflowd Collector.
Introduced	16.0.R1
Platforms	All

### **[router-instance] string**

Synopsis	Router instance name
Context	<b>configure cflowd collector</b> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> ) <b>port number export-filter router string</b>
Tree	<b>router</b>
Description	This command specifies the router instance name. Only "Base" is supported.
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

### **router-instance string**

Synopsis	Router or service name
Context	<b>configure cflowd collector</b> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> ) <b>port number router-instance string</b>
Tree	<b>router-instance</b>
Description	This command specifies the routing instance used to route traffic to the associated collector IP address.  The "Base" routing instance is the fallback if no route is found. No fallback mechanism is supported for "Base" and "VPRN".
Default	management
Introduced	16.0.R1
Platforms	All

### **template-set keyword**

Synopsis	Templates sent to the collector
----------	---------------------------------

Context	<b>configure cflowd collector</b> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> ) <b>port number</b> <b>template-set keyword</b>
Tree	<b>template-set</b>
Description	This command specifies the set of templates sent to the collector when using cflowd Version 9 or Version 10.
Options	not-applicable, basic, mpls-ip, l2-ip, mpls-transport, compact, fastpath
Introduced	16.0.R1
Platforms	All

### **version number**

#### **WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Flow data collector version
Context	<b>configure cflowd collector</b> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> ) <b>port number</b> <b>version number</b>
Tree	<b>version</b>
Range	5   8 to 10
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

### **enhanced-distribution boolean**

Synopsis	Include ingress port ID in hashing algorithm for cflowd
Context	<b>configure cflowd enhanced-distribution boolean</b>
Tree	<b>enhanced-distribution</b>
Default	false
Introduced	16.0.R1
Platforms	7750 SR-2se, 7750 SR-7s, 7750 SR-14s, 7950 XRS

### **export-mode keyword**

Synopsis	Export mode for flow data
Context	<b>configure cflowd export-mode keyword</b>

Tree	<a href="#">export-mode</a>
Options	automatic, manual
Default	automatic
Introduced	16.0.R1
Platforms	All

### **inactive-flow-timeout** *number*

Synopsis	Time without matching packet before flow is inactive
Context	<b>configure</b> <a href="#">cflowd</a> <a href="#">inactive-flow-timeout</a> <i>number</i>
Tree	<a href="#">inactive-flow-timeout</a>
Description	This command configures the time interval that must elapse without a packet matching a flow before the flow is considered inactive.  This value is set for a flow when the flow is initially created in the active cache table and does not change dynamically.
Range	10 to 600
Units	seconds
Default	15
Introduced	20.2.R1
Platforms	All

### **inband-collector-export-only** *boolean*

Synopsis	Export the traffic to all collectors only via in-band interfaces
Context	<b>configure</b> <a href="#">cflowd</a> <a href="#">inband-collector-export-only</a> <i>boolean</i>
Tree	<a href="#">inband-collector-export-only</a>
Default	false
Introduced	16.0.R1
Platforms	All

### **overflow** *number*

Synopsis	Percentage of entries to remove from Cflowd cache when the maximum number of entries is exceeded
Context	<b>configure</b> <a href="#">cflowd</a> <a href="#">overflow</a> <i>number</i>
Tree	<a href="#">overflow</a>

Range	1 to 50
Units	percent
Default	1
Introduced	16.0.R1
Platforms	All

### **sample-profile** [\[profile-id\]](#) *number*

Synopsis	Enter the <b>sample-profile</b> list instance
Context	<b>configure</b> <a href="#">cflowd</a> <a href="#">sample-profile</a> <i>number</i>
Tree	<a href="#">sample-profile</a>
Max. Instances	5
Introduced	19.5.R1
Platforms	All

### [\[profile-id\]](#) *number*

Synopsis	The unique specifier of this sample-profile
Context	<b>configure</b> <a href="#">cflowd</a> <a href="#">sample-profile</a> <i>number</i>
Tree	<a href="#">sample-profile</a>
Range	1 to 5
Notes	This element is part of a list key.
Introduced	19.5.R1
Platforms	All

### **metering-process** *keyword*

Synopsis	Metering process for samples taken
Context	<b>configure</b> <a href="#">cflowd</a> <a href="#">sample-profile</a> <i>number</i> <a href="#">metering-process</a> <i>keyword</i>
Tree	<a href="#">metering-process</a>
Description	This command specifies the type of metering process to use for the samples taken from the associated interfaces.
Options	standard, fp-accelerated
Default	standard

Introduced	21.10.R1
Platforms	7750 SR-7s, 7750 SR-14s, 7950 XRS-20e

### **sample-rate** *number*

Synopsis	Cflowd sampling rate for sample profile ID
Context	<b>configure</b> <a href="#">cflowd</a> <a href="#">sample-profile</a> <i>number</i> <a href="#">sample-rate</a> <i>number</i>
Tree	<a href="#">sample-rate</a>
Description	This command defines the cflowd sampling rate for the sample profile ID.  The sample rate indicates that the associated interface samples 1 in N packets for cflowd analysis. You can only associate one rate profile below 1:256 with a specific IOM, IMM, or XMA.
Range	1 to 60000
Default	1000
Introduced	19.5.R1
Platforms	All

### **template-retransmit** *number*

Synopsis	Time to resend template information
Context	<b>configure</b> <a href="#">cflowd</a> <a href="#">template-retransmit</a> <i>number</i>
Tree	<a href="#">template-retransmit</a>
Range	10 to 600
Units	seconds
Default	600
Introduced	16.0.R1
Platforms	All

### **use-vrtr-if-index** *boolean*

Synopsis	Export flow data using virtual router interface indexes
Context	<b>configure</b> <a href="#">cflowd</a> <a href="#">use-vrtr-if-index</a> <i>boolean</i>
Tree	<a href="#">use-vrtr-if-index</a>
Default	false
Introduced	16.0.R1

Platforms All

## 3.11 chassis commands

```
configure
- chassis keyword chassis-number number
- apply-groups reference
- apply-groups-exclude reference
- monitor-filter-door boolean
- peq number
  - admin-state keyword
  - apply-groups reference
  - apply-groups-exclude reference
  - input-power-mode number
  - peq-type keyword
- power-connection-module number
  - apply-groups reference
  - apply-groups-exclude reference
  - pcm-type keyword
- power-shelf number
  - admin-state keyword
  - apply-groups reference
  - apply-groups-exclude reference
  - description string
  - power-module number
    - admin-state keyword
    - apply-groups reference
    - apply-groups-exclude reference
    - power-module-type keyword
  - power-shelf-type keyword
- power-supply number
  - apply-groups reference
  - apply-groups-exclude reference
  - power-supply-type keyword
```

### 3.11.1 chassis command descriptions

#### **chassis** [*chassis-class*] *keyword chassis-number number*

Synopsis	Enter the <b>chassis</b> list instance
Context	<b>configure chassis</b> <i>keyword chassis-number number</i>
Tree	<b>chassis</b>
Introduced	16.0.R1
Platforms	All

#### **[chassis-class]** *keyword*

Synopsis	Functional use of the physical chassis
Context	<b>configure chassis</b> <i>keyword chassis-number number</i>
Tree	<b>chassis</b>
Options	router, ethernet-satellite
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

#### **chassis-number** *number*

Synopsis	Unique index to identify this physical chassis
Context	<b>configure chassis</b> <i>keyword chassis-number number</i>
Tree	<b>chassis</b>
Range	1 to 100
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

#### **monitor-filter-door** *boolean*

Synopsis	Allow filter door monitoring
Context	<b>configure chassis</b> <i>keyword chassis-number number monitor-filter-door boolean</i>

Tree	<a href="#">monitor-filter-door</a>
Default	false
Introduced	16.0.R1
Platforms	7750 SR-7s, 7750 SR-14s

### **peq** [[peq-slot](#)] *number*

Synopsis	Enter the <b>peq</b> list instance
Context	<b>configure</b> <a href="#">chassis</a> <i>keyword</i> <a href="#">chassis-number</a> <i>number</i> <a href="#">peq</a> <i>number</i>
Tree	<a href="#">peq</a>
Introduced	16.0.R1
Platforms	7750 SR-12e, 7950 XRS

### **[peq-slot]** *number*

Synopsis	Unique identifier index for a power supply tray in the chassis
Context	<b>configure</b> <a href="#">chassis</a> <i>keyword</i> <a href="#">chassis-number</a> <i>number</i> <a href="#">peq</a> <i>number</i>
Tree	<a href="#">peq</a>
Range	1 to 31
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7750 SR-12e, 7950 XRS

### **admin-state** *keyword*

Synopsis	Administrative state of the PEQ
Context	<b>configure</b> <a href="#">chassis</a> <i>keyword</i> <a href="#">chassis-number</a> <i>number</i> <a href="#">peq</a> <i>number</i> <a href="#">admin-state</a> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	enable
Introduced	16.0.R1
Platforms	7750 SR-12e, 7950 XRS

**input-power-mode** *number*

Synopsis	Input power mode of the PEQ
Context	<b>configure</b> <a href="#">chassis</a> <i>keyword</i> <a href="#">chassis-number</a> <i>number</i> <a href="#">peq</a> <i>number</i> <a href="#">input-power-mode</a> <i>number</i>
Tree	<a href="#">input-power-mode</a>
Range	60   80
Units	amperes
Introduced	16.0.R1
Platforms	7750 SR-12e, 7950 XRS

**peq-type** *keyword***WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	APEQ type
Context	<b>configure</b> <a href="#">chassis</a> <i>keyword</i> <a href="#">chassis-number</a> <i>number</i> <a href="#">peq</a> <i>number</i> <a href="#">peq-type</a> <i>keyword</i>
Tree	<a href="#">peq-type</a>
Options	apeq-dc-2000, apeq-dc-2200-2800, apeq-ac-3000, apeq-hvdc-3000, apeq-dc-4275, ixr-ac-hvdc-3000, ixr-dc-3000, apeq-ac-4400
Introduced	16.0.R1
Platforms	7750 SR-12e, 7950 XRS

**power-connection-module** [[pcm-slot](#)] *number*

Synopsis	Enter the <b>power-connection-module</b> list instance
Context	<b>configure</b> <a href="#">chassis</a> <i>keyword</i> <a href="#">chassis-number</a> <i>number</i> <a href="#">power-connection-module</a> <i>number</i>
Tree	<a href="#">power-connection-module</a>
Introduced	16.0.R1
Platforms	7950 XRS-20e

**[pcm-slot]** *number*

Synopsis	Unique identifier index for a power control module in the chassis
Context	<b>configure</b> <a href="#">chassis</a> <i>keyword</i> <a href="#">chassis-number</a> <i>number</i> <a href="#">power-connection-module</a> <i>number</i>

Tree	<a href="#">power-connection-module</a>
Range	1 to 12
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7950 XRS-20e

### **pcm-type** *keyword*

#### **WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	PCM type
Context	<b>configure</b> <a href="#">chassis</a> <i>keyword</i> <a href="#">chassis-number</a> <i>number</i> <a href="#">power-connection-module</a> <i>number</i> <a href="#">pcm-type</a> <i>keyword</i>
Tree	<a href="#">pcm-type</a>
Options	dual, quad
Introduced	16.0.R1
Platforms	7950 XRS-20e

### **power-shelf** [[power-shelf-id](#)] *number*

Synopsis	Enter the <b>power-shelf</b> list instance
Context	<b>configure</b> <a href="#">chassis</a> <i>keyword</i> <a href="#">chassis-number</a> <i>number</i> <a href="#">power-shelf</a> <i>number</i>
Tree	<a href="#">power-shelf</a>
Introduced	16.0.R1
Platforms	7750 SR-s

### **[power-shelf-id]** *number*

Synopsis	Unique identifier index for a power shelf in chassis
Context	<b>configure</b> <a href="#">chassis</a> <i>keyword</i> <a href="#">chassis-number</a> <i>number</i> <a href="#">power-shelf</a> <i>number</i>
Tree	<a href="#">power-shelf</a>
Range	1 to 2
Notes	This element is part of a list key.
Introduced	16.0.R1

Platforms 7750 SR-s

### **admin-state** *keyword*

Synopsis Administrative state of the power shelf

Context **configure chassis** *keyword chassis-number number power-shelf number admin-state keyword*

Tree [admin-state](#)

Options enable, disable

Default enable

Introduced 16.0.R1

Platforms 7750 SR-s

### **description** *string*

Synopsis Text description

Context **configure chassis** *keyword chassis-number number power-shelf number description string*

Tree [description](#)

String Length 1 to 80

Introduced 16.0.R1

Platforms 7750 SR-s

### **power-module** [[power-module-id](#)] *number*

Synopsis Enter the **power-module** list instance

Context **configure chassis** *keyword chassis-number number power-shelf number power-module number*

Tree [power-module](#)

Introduced 16.0.R1

Platforms 7750 SR-s

### **[power-module-id]** *number*

Synopsis Unique identifier for a power module in chassis

Context **configure chassis** *keyword chassis-number number power-shelf number power-module number*

Tree	<a href="#">power-module</a>
Range	1 to 12
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7750 SR-s

### **admin-state** *keyword*

Synopsis	Administrative state of the power module
Context	<b>configure</b> <a href="#">chassis</a> <i>keyword</i> <a href="#">chassis-number</a> <i>number</i> <a href="#">power-shelf</a> <i>number</i> <a href="#">power-module</a> <i>number</i> <a href="#">admin-state</a> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	enable
Introduced	16.0.R1
Platforms	7750 SR-s

### **power-module-type** *keyword*

#### **WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Power module type
Context	<b>configure</b> <a href="#">chassis</a> <i>keyword</i> <a href="#">chassis-number</a> <i>number</i> <a href="#">power-shelf</a> <i>number</i> <a href="#">power-module</a> <i>number</i> <a href="#">power-module-type</a> <i>keyword</i>
Tree	<a href="#">power-module-type</a>
Options	ps-b-ac/hv-6000, ps-a-dc-4400, ps-a-dc-6000, ixr-ac-hvdc-3000, ixr-dc-3000
Introduced	16.0.R1
Platforms	7750 SR-s

### **power-shelf-type** *keyword*

#### **WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Power shelf type
Context	<b>configure chassis</b> <i>keyword chassis-number number power-shelf number power-shelf-type keyword</i>
Tree	<a href="#">power-shelf-type</a>
Options	ps-a10-shelf-dc, ps-b10-shelf-ac/hv, ps-a4-shelf-dc, ps-b3-shelf-ac/hv
Introduced	16.0.R1
Platforms	7750 SR-s

### **power-supply** [[power-supply-id](#)] *number*

Synopsis	Enter the <b>power-supply</b> list instance
Context	<b>configure chassis</b> <i>keyword chassis-number number power-supply number</i>
Tree	<a href="#">power-supply</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **[power-supply-id]** *number*

Synopsis	Unique identifier index for a power supply tray in the chassis
Context	<b>configure chassis</b> <i>keyword chassis-number number power-supply number</i>
Tree	<a href="#">power-supply</a>
Range	1 to 31
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **power-supply-type** *keyword*

Synopsis	Power supply type
Context	<b>configure chassis</b> <i>keyword chassis-number number power-supply number power-supply-type keyword</i>
Tree	<a href="#">power-supply-type</a>
Options	none, dc-single, ac-single, ac-multiple, auto, dc-multiple
Default	auto
Introduced	16.0.R1

Platforms 7450 ESS, 7750 SR-7/12

## 3.12 connection-profile commands

```
configure
- connection-profile
- apply-groups reference
- apply-groups-exclude reference
- vlan number
- apply-groups reference
- apply-groups-exclude reference
- description string
- qtag-range number
- apply-groups reference
- apply-groups-exclude reference
- end number
```

### 3.12.1 connection-profile command descriptions

#### connection-profile

Synopsis	Enter the <b>connection-profile</b> context
Context	<b>configure</b> <a href="#">connection-profile</a>
Tree	<a href="#">connection-profile</a>
Introduced	16.0.R1
Platforms	All

#### vlan [[connection-profile-id](#)] *number*

Synopsis	Enter the <b>vlan</b> list instance
Context	<b>configure</b> <a href="#">connection-profile</a> <a href="#">vlan</a> <i>number</i>
Tree	<a href="#">vlan</a>
Introduced	16.0.R7
Platforms	All

#### [[connection-profile-id](#)] *number*

Synopsis	Identifier of this connection profile
Context	<b>configure</b> <a href="#">connection-profile</a> <a href="#">vlan</a> <i>number</i>
Tree	<a href="#">vlan</a>
Range	1 to 8000
Notes	This element is part of a list key.
Introduced	16.0.R7
Platforms	All

#### description *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">connection-profile</a> <a href="#">vlan</a> <i>number</i> <a href="#">description</a> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R7

Platforms All

### **qtag-range** [**start**] *number*

Synopsis Enter the **qtag-range** list instance  
 Context **configure connection-profile vlan number qtag-range number**  
 Tree **qtag-range**  
 Introduced 16.0.R7  
 Platforms All

### **[start]** *number*

Synopsis Lower bound of VLAN range for connection profile  
 Context **configure connection-profile vlan number qtag-range number**  
 Tree **qtag-range**  
 Range 1 to 4094  
 Notes This element is part of a list key.  
 Introduced 16.0.R7  
 Platforms All

### **end** *number*

#### **WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis Upper bound of VLAN range for connection profile  
 Context **configure connection-profile vlan number qtag-range number end number**  
 Tree **end**  
 Range 1 to 4094  
 Introduced 16.0.R7  
 Platforms All

### 3.13.1 debug command descriptions

#### debug

Synopsis	Configure application or protocol tracing
Context	<a href="#">debug</a>
Tree	<a href="#">debug</a>
Description	Commands in this context enable detailed debugging information for various protocols and router functions.
Introduced	21.5.R1
Platforms	All

#### aaa

Synopsis	Enter the <b>aaa</b> context
Context	<a href="#">debug aaa</a>
Tree	<a href="#">aaa</a>
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

#### diameter

Synopsis	Enter the <b>diameter</b> context
Context	<a href="#">debug aaa diameter</a>
Tree	<a href="#">diameter</a>
Description	Commands in this context configure Diameter Base parameters.
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

#### application

Synopsis	Enter the <b>application</b> context
Context	<a href="#">debug aaa diameter application</a>
Tree	<a href="#">application</a>

Description	Commands in this context configure debugging for Diameter session-aware application messages and application message processing failures, for example, in the case of an unknown Diameter session ID.
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **failures** *boolean*

Synopsis	Debug Diameter application failures
Context	<a href="#">debug aaa diameter application failures</a> <i>boolean</i>
Tree	<a href="#">failures</a>
Default	false
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **policy** [[name](#)] *string*

Synopsis	Enter the <b>policy</b> list instance
Context	<a href="#">debug aaa diameter application policy</a> <i>string</i>
Tree	<a href="#">policy</a>
Max. Instances	32
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **[name]** *string*

Synopsis	Diameter application policy name
Context	<a href="#">debug aaa diameter application policy</a> <i>string</i>
Tree	<a href="#">policy</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**failures** *boolean*

Synopsis	Debug Diameter application failures
Context	<a href="#">debug aaa diameter application policy</a> <i>string</i> <b>failures</b> <i>boolean</i>
Tree	<a href="#">failures</a>
Default	true
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**messages** *boolean*

Synopsis	Debug Diameter application messages
Context	<a href="#">debug aaa diameter application policy</a> <i>string</i> <b>messages</b> <i>boolean</i>
Tree	<a href="#">messages</a>
Default	false
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**node** [[origin-host](#)] *string*

Synopsis	Enter the <b>node</b> list instance
Context	<a href="#">debug aaa diameter node</a> <i>string</i>
Tree	<a href="#">node</a>
Max. Instances	32
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**[origin-host]** *string*

Synopsis	Origin host of the Diameter node
Context	<a href="#">debug aaa diameter node</a> <i>string</i>
Tree	<a href="#">node</a>
String Length	1 to 80
Notes	This element is part of a list key.
Introduced	23.3.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **failures** *boolean*

Synopsis Debug Diameter node failures

Context [debug aaa diameter node](#) *string failures boolean*

Tree [failures](#)

Description When configured to **true**, the system debugs Diameter node-level failures that occur before the peer is determined. For example, when no route for a message is found in the realm routing table.

Default true

Introduced 23.3.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **peer** [[index](#)] *number*

Synopsis Enter the **peer** list instance

Context [debug aaa diameter node](#) *string peer number*

Tree [peer](#)

Introduced 23.3.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **[index]** *number*

Synopsis Index of the peer in the Diameter node

Context [debug aaa diameter node](#) *string peer number*

Tree [peer](#)

Range 1 to 5

Notes This element is part of a list key.

Introduced 23.3.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **failures** *boolean*

Synopsis Debug Diameter peer failures

Context [debug aaa diameter node](#) *string peer number failures boolean*

Tree	<a href="#">failures</a>
Default	true
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **messages** *boolean*

Synopsis	Debug Diameter peer messages
Context	<a href="#">debug aaa diameter node</a> <i>string</i> <a href="#">peer number</a> <a href="#">messages</a> <i>boolean</i>
Tree	<a href="#">messages</a>
Description	When configured to <b>true</b> , the system debugs peer-level messages that are required to bring up, maintain, and tear down a peering connection, for example, Capabilities Exchange and Device Watchdog messages.
Default	false
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **relayed-messages** *boolean*

Synopsis	Debug relayed Diameter messages
Context	<a href="#">debug aaa diameter node</a> <i>string</i> <a href="#">relayed-messages</a> <i>boolean</i>
Tree	<a href="#">relayed-messages</a>
Default	false
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **call-trace**

Synopsis	Enter the <b>call-trace</b> context
Context	<a href="#">debug call-trace</a>
Tree	<a href="#">call-trace</a>
Introduced	22.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**ipoe**

Synopsis	Enter the <b>ipoe</b> context
Context	<a href="#">debug call-trace ipoe</a>
Tree	<a href="#">ipoe</a>
Introduced	22.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**trace [name] string**

Synopsis	Enter the <b>trace</b> list instance
Context	<a href="#">debug call-trace ipoe trace string</a>
Tree	<a href="#">trace</a>
Max. Instances	50
Introduced	22.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**[name] string**

Synopsis	Unique trace name
Context	<a href="#">debug call-trace ipoe trace string</a>
Tree	<a href="#">trace</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	22.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**circuit-id string****WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Circuit ID of the sessions to trace
Context	<a href="#">debug call-trace ipoe trace string circuit-id string</a>
Tree	<a href="#">circuit-id</a>

Description	This command configures the circuit ID of the sessions to trace. The circuit ID filter is ignored if it is not part of the IPoE session key.
String Length	1 to 255
Notes	The following elements are part of a choice: <b>circuit-id</b> or <b>remote-id</b> .
Introduced	22.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### mac string

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	MAC address of the sessions to trace
Context	<a href="#">debug call-trace ipoe trace string mac string</a>
Tree	<a href="#">mac</a>
String Length	1 to 17
Introduced	22.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### max-jobs number

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Maximum number of trace jobs
Context	<a href="#">debug call-trace ipoe trace string max-jobs number</a>
Tree	<a href="#">max-jobs</a>
Range	1 to 50
Default	1
Introduced	22.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**profile string****WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Call trace profile applied for the trace
Context	<code>debug call-trace ipoe trace string profile string</code>
Tree	<code>profile</code>
String Length	1 to 32
Notes	This element is mandatory.
Introduced	22.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**remote-id string****WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Remote ID of the sessions to trace
Context	<code>debug call-trace ipoe trace string remote-id string</code>
Tree	<code>remote-id</code>
Description	This command configures the remote ID of the sessions to trace. The remote ID filter is ignored if it is not part of the IPoE session key.
String Length	1 to 255
Notes	The following elements are part of a choice: <b>circuit-id</b> or <b>remote-id</b> .
Introduced	22.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**sap string****WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	SAP ID of the sessions to trace
Context	<code>debug call-trace ipoe trace string sap string</code>

Tree	<a href="#">sap</a>
String Length	1 to 45
Introduced	22.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **trace-existing-sessions** *boolean*

#### **WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Enable call trace for existing sessions
Context	<a href="#">debug call-trace ipoe trace</a> <i>string</i> <a href="#">trace-existing-sessions</a> <i>boolean</i>
Tree	<a href="#">trace-existing-sessions</a>
Description	When configured to <b>true</b> , the system traces existing sessions. When configured to <b>false</b> , only new sessions are traced.
Default	false
Introduced	22.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **pppoe**

Synopsis	Enter the <b>pppoe</b> context
Context	<a href="#">debug call-trace pppoe</a>
Tree	<a href="#">pppoe</a>
Introduced	22.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **trace** [[name](#)] *string*

Synopsis	Enter the <b>trace</b> list instance
Context	<a href="#">debug call-trace pppoe trace</a> <i>string</i>
Tree	<a href="#">trace</a>
Max. Instances	50
Introduced	22.7.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### [name] *string*

Synopsis Unique trace name  
 Context [debug call-trace pppoe trace string](#)  
 Tree [trace](#)  
 String Length 1 to 32  
 Notes This element is part of a list key.  
 Introduced 22.7.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### circuit-id *string*

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis Circuit ID of the sessions to trace  
 Context [debug call-trace pppoe trace string circuit-id string](#)  
 Tree [circuit-id](#)  
 String Length 1 to 255  
 Introduced 22.7.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### mac *string*

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis MAC address of the sessions to trace  
 Context [debug call-trace pppoe trace string mac string](#)  
 Tree [mac](#)  
 String Length 1 to 17  
 Introduced 22.7.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### max-jobs *number*

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis Maximum number of trace jobs

Context [debug call-trace pppoe trace](#) *string max-jobs number*

Tree [max-jobs](#)

Range 1 to 50

Default 1

Introduced 22.7.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### profile *string*

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis Call trace profile applied for the trace

Context [debug call-trace pppoe trace](#) *string profile string*

Tree [profile](#)

String Length 1 to 32

Notes This element is mandatory.

Introduced 22.7.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### remote-id *string*

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis Remote ID of the sessions to trace

Context	<code>debug call-trace pppoe trace string remote-id string</code>
Tree	<code>remote-id</code>
String Length	1 to 255
Introduced	22.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**sap string****WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	SAP ID of the sessions to trace
Context	<code>debug call-trace pppoe trace string sap string</code>
Tree	<code>sap</code>
String Length	1 to 45
Introduced	22.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**trace-existing-sessions boolean****WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Enable call trace for existing sessions
Context	<code>debug call-trace pppoe trace string trace-existing-sessions boolean</code>
Tree	<code>trace-existing-sessions</code>
Description	When configured to <b>true</b> , the system traces existing sessions. When configured to <b>false</b> , only new sessions are traced.
Default	false
Introduced	22.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**user-name *string*****WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	PPPoE username of the sessions to trace
Context	<a href="#">debug call-trace pppoe trace</a> <i>string</i> <a href="#">user-name</a> <i>string</i>
Tree	<a href="#">user-name</a>
String Length	1 to 253
Introduced	22.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**wlan-gw**

Synopsis	Enter the <b>wlan-gw</b> context
Context	<a href="#">debug call-trace wlan-gw</a>
Tree	<a href="#">wlan-gw</a>
Introduced	22.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**ue [*name*] *string***

Synopsis	Enter the <b>ue</b> list instance
Context	<a href="#">debug call-trace wlan-gw ue</a> <i>string</i>
Tree	<a href="#">ue</a>
Max. Instances	50
Introduced	22.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**[*name*] *string***

Synopsis	Unique trace name
Context	<a href="#">debug call-trace wlan-gw ue</a> <i>string</i>
Tree	<a href="#">ue</a>
String Length	1 to 32

Notes	This element is part of a list key.
Introduced	22.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### mac string

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	MAC address of the sessions to trace
Context	<a href="#">debug call-trace wlan-gw ue string mac string</a>
Tree	<a href="#">mac</a>
Notes	This element is mandatory.
Introduced	22.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### profile string

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Call trace profile applied for the trace
Context	<a href="#">debug call-trace wlan-gw ue string profile string</a>
Tree	<a href="#">profile</a>
String Length	1 to 32
Notes	This element is mandatory.
Introduced	22.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### l2tp

Synopsis	Enter the <b>l2tp</b> context
Context	<a href="#">debug l2tp</a>
Tree	<a href="#">l2tp</a>

Introduced	23.7.R1
Platforms	All

### **predictable-id-assignment** *boolean*

Synopsis	Enable predictable tunnel and session ID assignment
Context	<a href="#">debug l2tp predictable-id-assignment</a> <i>boolean</i>
Tree	<a href="#">predictable-id-assignment</a>
Default	false
Introduced	23.7.R1
Platforms	All

### **lag** [[lag-name](#)] *string*

Synopsis	Enter the <b>lag</b> list instance
Context	<a href="#">debug lag</a> <i>string</i>
Tree	<a href="#">lag</a>
Description	Commands in this context configure debugging for Link Aggregation Group (LAG).
Introduced	22.7.R1
Platforms	All

### **[lag-name]** *string*

Synopsis	LAG name
Context	<a href="#">debug lag</a> <i>string</i>
Tree	<a href="#">lag</a>
Description	This command specifies the LAG name.  In model-driven interfaces, the LAG name is used for configuration references and <b>show</b> commands. A service provider or administrator can use the defined LAG name to identify and manage LAGs within the SR OS platforms.  The LAG name must always start with "lag-".
String Length	1 to 27
Notes	This element is part of a list key.
Introduced	22.7.R1
Platforms	All

**bfd** *boolean*

Synopsis	Enable debugging for BFD
Context	<a href="#">debug lag string bfd boolean</a>
Tree	<a href="#">bfd</a>
Default	false
Introduced	22.7.R1
Platforms	All

**config** *boolean*

Synopsis	Enable debugging for configuration changes
Context	<a href="#">debug lag string config boolean</a>
Tree	<a href="#">config</a>
Default	false
Introduced	22.7.R1
Platforms	All

**iom-updates** *boolean*

Synopsis	Enable debugging for IOM updates
Context	<a href="#">debug lag string iom-updates boolean</a>
Tree	<a href="#">iom-updates</a>
Default	false
Introduced	22.7.R1
Platforms	All

**lACP-packets** *boolean*

Synopsis	Enable debugging for LACP packets
Context	<a href="#">debug lag string lacp-packets boolean</a>
Tree	<a href="#">lacp-packets</a>
Default	false
Introduced	22.7.R1
Platforms	All

**multi-chassis** *boolean*

Synopsis	Enable debugging for multi-chassis LAG
Context	<a href="#">debug lag string multi-chassis boolean</a>
Tree	<a href="#">multi-chassis</a>
Default	false
Introduced	22.7.R1
Platforms	All

**multi-chassis-packets** *boolean*

Synopsis	Enable debugging for multi-chassis packets
Context	<a href="#">debug lag string multi-chassis-packets boolean</a>
Tree	<a href="#">multi-chassis-packets</a>
Default	false
Introduced	22.7.R1
Platforms	All

**port** [[port-id](#)] *string*

Synopsis	Enter the <b>port</b> list instance
Context	<a href="#">debug lag string port string</a>
Tree	<a href="#">port</a>
Introduced	22.7.R1
Platforms	All

**[port-id]** *string*

Synopsis	Unique identifier for the port in the LAG
Context	<a href="#">debug lag string port string</a>
Tree	<a href="#">port</a>
Notes	This element is part of a list key.
Introduced	22.7.R1
Platforms	All

**bfd** *boolean*

Synopsis	Enable debugging for BFD
Context	<a href="#">debug lag</a> <i>string port string bfd boolean</i>
Tree	<a href="#">bfd</a>
Default	false
Introduced	22.7.R1
Platforms	All

**config** *boolean*

Synopsis	Enable debugging for configuration changes
Context	<a href="#">debug lag</a> <i>string port string config boolean</i>
Tree	<a href="#">config</a>
Default	false
Introduced	22.7.R1
Platforms	All

**lACP-packets** *boolean*

Synopsis	Enable debugging for LACP packets
Context	<a href="#">debug lag</a> <i>string port string lACP-packets boolean</i>
Tree	<a href="#">lACP-packets</a>
Default	false
Introduced	22.7.R1
Platforms	All

**multi-chassis** *boolean*

Synopsis	Enable debugging for multi-chassis LAG
Context	<a href="#">debug lag</a> <i>string port string multi-chassis boolean</i>
Tree	<a href="#">multi-chassis</a>
Default	false
Introduced	22.7.R1
Platforms	All

**port-states** *boolean*

Synopsis	Enable debugging for port-state changes
Context	<a href="#">debug lag string port string port-states boolean</a>
Tree	<a href="#">port-states</a>
Default	false
Introduced	22.7.R1
Platforms	All

**redundancy** *boolean*

Synopsis	Enable debugging for redundancy
Context	<a href="#">debug lag string port string redundancy boolean</a>
Tree	<a href="#">redundancy</a>
Default	false
Introduced	22.7.R1
Platforms	All

**selection-logic** *boolean*

Synopsis	Enable debugging for selection logic
Context	<a href="#">debug lag string port string selection-logic boolean</a>
Tree	<a href="#">selection-logic</a>
Default	false
Introduced	22.7.R1
Platforms	All

**state-machine** *boolean*

Synopsis	Enable debugging for state-machine changes
Context	<a href="#">debug lag string port string state-machine boolean</a>
Tree	<a href="#">state-machine</a>
Default	false
Introduced	22.7.R1
Platforms	All

**timers** *boolean*

Synopsis	Enable debugging for timers
Context	<a href="#">debug lag</a> <i>string</i> <a href="#">port</a> <i>string</i> <a href="#">timers</a> <i>boolean</i>
Tree	<a href="#">timers</a>
Default	false
Introduced	22.7.R1
Platforms	All

**port-states** *boolean*

Synopsis	Enable debugging for port-state changes
Context	<a href="#">debug lag</a> <i>string</i> <a href="#">port-states</a> <i>boolean</i>
Tree	<a href="#">port-states</a>
Default	false
Introduced	22.7.R1
Platforms	All

**redundancy** *boolean*

Synopsis	Enable debugging for redundancy
Context	<a href="#">debug lag</a> <i>string</i> <a href="#">redundancy</a> <i>boolean</i>
Tree	<a href="#">redundancy</a>
Default	false
Introduced	22.7.R1
Platforms	All

**selection-logic** *boolean*

Synopsis	Enable debugging for selection logic
Context	<a href="#">debug lag</a> <i>string</i> <a href="#">selection-logic</a> <i>boolean</i>
Tree	<a href="#">selection-logic</a>
Default	false
Introduced	22.7.R1
Platforms	All

**state-machine** *boolean*

Synopsis	Enable debugging for state-machine changes
Context	<a href="#">debug lag</a> <i>string state-machine boolean</i>
Tree	<a href="#">state-machine</a>
Default	false
Introduced	22.7.R1
Platforms	All

**timers** *boolean*

Synopsis	Enable debugging for timers
Context	<a href="#">debug lag</a> <i>string timers boolean</i>
Tree	<a href="#">timers</a>
Default	false
Introduced	22.7.R1
Platforms	All

**nat**

Synopsis	Enter the <b>nat</b> context
Context	<a href="#">debug nat</a>
Tree	<a href="#">nat</a>
Introduced	22.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**I2-aware**

Synopsis	Enter the <b>I2-aware</b> context
Context	<a href="#">debug nat I2-aware</a>
Tree	<a href="#">I2-aware</a>
Introduced	22.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**subscriber** [[subscriber-id](#)] *string*

Synopsis	Add a list entry for <b>subscriber</b>
Context	<a href="#">debug nat l2-aware subscriber</a> <i>string</i>
Tree	<a href="#">subscriber</a>
Max. Instances	16
Introduced	22.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**[subscriber-id]** *string*

Synopsis	L2-aware subscriber ID
Context	<a href="#">debug nat l2-aware subscriber</a> <i>string</i>
Tree	<a href="#">subscriber</a>
String Length	1 to 64
Notes	This element is part of a list key.
Introduced	22.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**upnp**

Synopsis	Enter the <b>upnp</b> context
Context	<a href="#">debug nat l2-aware upnp</a>
Tree	<a href="#">upnp</a>
Introduced	22.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**subscriber** [[subscriber-id](#)] *string*

Synopsis	Enter the <b>subscriber</b> list instance
Context	<a href="#">debug nat l2-aware upnp subscriber</a> <i>string</i>
Tree	<a href="#">subscriber</a>
Max. Instances	10
Introduced	22.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **[subscriber-id]** *string*

Synopsis L2-aware subscriber ID  
Context [debug nat l2-aware upnp subscriber string](#)  
Tree [subscriber](#)  
String Length 1 to 64  
Notes This element is part of a list key.  
Introduced 22.10.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **events** *boolean*

Synopsis Enable UPnP event debugging  
Context [debug nat l2-aware upnp subscriber string events boolean](#)  
Tree [events](#)  
Default true  
Introduced 22.10.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **packets**

Synopsis Enable the **packets** context  
Context [debug nat l2-aware upnp subscriber string packets](#)  
Tree [packets](#)  
Introduced 22.10.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **detail** *boolean*

Synopsis Include IP, UDP, and TCP headers in UPnP packet debug  
Context [debug nat l2-aware upnp subscriber string packets detail boolean](#)  
Tree [detail](#)  
Default false

Introduced	22.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## large-scale

Synopsis	Enter the <b>large-scale</b> context
Context	<a href="#">debug nat large-scale</a>
Tree	<a href="#">large-scale</a>
Introduced	22.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## dual-stack-lite

Synopsis	Enter the <b>dual-stack-lite</b> context
Context	<a href="#">debug nat large-scale dual-stack-lite</a>
Tree	<a href="#">dual-stack-lite</a>
Introduced	22.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## subscriber [inside-router string b4-address string](#)

Synopsis	Add a list entry for <b>subscriber</b>
Context	<a href="#">debug nat large-scale dual-stack-lite subscriber inside-router string b4-address string</a>
Tree	<a href="#">subscriber</a>
Max. Instances	16
Introduced	22.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## inside-router [string](#)

Synopsis	Inside router instance name
Context	<a href="#">debug nat large-scale dual-stack-lite subscriber inside-router string b4-address string</a>
Tree	<a href="#">subscriber</a>
MD-CLI Default	Base

Notes	This element is part of a list key.
Introduced	22.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **b4-address** *string*

Synopsis	IPv6 B4 address of the DS-Lite subscriber
Context	<a href="#">debug nat large-scale dual-stack-lite subscriber inside-router</a> <i>string</i> <b>b4-address</b> <i>string</i>
Tree	<a href="#">subscriber</a>
Notes	This element is part of a list key.
Introduced	22.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **nat44**

Synopsis	Enter the <b>nat44</b> context
Context	<a href="#">debug nat large-scale nat44</a>
Tree	<a href="#">nat44</a>
Introduced	22.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **subscriber** [inside-router](#) *string* [ip-address](#) *string*

Synopsis	Add a list entry for <b>subscriber</b>
Context	<a href="#">debug nat large-scale nat44 subscriber inside-router</a> <i>string</i> <a href="#">ip-address</a> <i>string</i>
Tree	<a href="#">subscriber</a>
Max. Instances	16
Introduced	22.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **inside-router** *string*

Synopsis	Inside router instance name
Context	<a href="#">debug nat large-scale nat44 subscriber inside-router</a> <i>string</i> <a href="#">ip-address</a> <i>string</i>

Tree	<a href="#">subscriber</a>
MD-CLI Default	Base
Notes	This element is part of a list key.
Introduced	22.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **ip-address** *string*

Synopsis	Inside IPv4 address of the NAT44 subscriber
Context	<a href="#">debug nat large-scale nat44 subscriber inside-router</a> <i>string ip-address string</i>
Tree	<a href="#">subscriber</a>
Notes	This element is part of a list key.
Introduced	22.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **nat64**

Synopsis	Enter the <b>nat64</b> context
Context	<a href="#">debug nat large-scale nat64</a>
Tree	<a href="#">nat64</a>
Introduced	22.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **subscriber** [inside-router](#) *string ipv6-prefix string*

Synopsis	Add a list entry for <b>subscriber</b>
Context	<a href="#">debug nat large-scale nat64 subscriber inside-router</a> <i>string ipv6-prefix string</i>
Tree	<a href="#">subscriber</a>
Max. Instances	16
Introduced	22.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**inside-router** *string*

Synopsis	Inside router instance name
Context	<a href="#">debug nat large-scale nat64 subscriber inside-router</a> <i>string</i> <a href="#">ipv6-prefix</a> <i>string</i>
Tree	<a href="#">subscriber</a>
MD-CLI Default	Base
Notes	This element is part of a list key.
Introduced	22.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**ipv6-prefix** *string*

Synopsis	NAT64 IPv6 prefix of the subscriber
Context	<a href="#">debug nat large-scale nat64 subscriber inside-router</a> <i>string</i> <a href="#">ipv6-prefix</a> <i>string</i>
Tree	<a href="#">subscriber</a>
Notes	This element is part of a list key.
Introduced	22.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**nat-import**

Synopsis	Enter the <b>nat-import</b> context
Context	<a href="#">debug nat nat-import</a>
Tree	<a href="#">nat-import</a>
Introduced	22.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**route** [[ip-address](#)] ([ipv4-unicast-address](#) | *keyword*) [inside-router](#) *string*

Synopsis	Add a list entry for <b>route</b>
Context	<a href="#">debug nat nat-import route</a> ( <a href="#">ipv4-unicast-address</a>   <i>keyword</i> ) <a href="#">inside-router</a> <i>string</i>
Tree	<a href="#">route</a>
Max. Instances	32
Introduced	22.5.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **[ip-address]** (*ipv4-unicast-address* | *keyword*)

Synopsis IPv4 address of imported route, or any  
 Context [debug nat nat-import route](#) (*ipv4-unicast-address* | *keyword*) [inside-router](#) *string*  
 Tree [route](#)  
 Options any  
 Notes This element is part of a list key.  
 Introduced 22.5.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **inside-router** *string*

Synopsis Router name or VPRN service name, or any  
 Context [debug nat nat-import route](#) (*ipv4-unicast-address* | *keyword*) [inside-router](#) *string*  
 Tree [route](#)  
 Notes This element is part of a list key.  
 Introduced 22.5.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **pcp**

Synopsis Enter the **pcp** context  
 Context [debug nat pcp](#)  
 Tree [pcp](#)  
 Introduced 22.10.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **router** [[router-instance](#)] *string*

Synopsis Enter the **router** list instance  
 Context [debug nat pcp router](#) *string*  
 Tree [router](#)

Max. Instances	8
Introduced	22.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**[router-instance] string**

Synopsis	Inside router instance name
Context	<a href="#">debug nat pcp router string</a>
Tree	<a href="#">router</a>
Notes	This element is part of a list key.
Introduced	22.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**server [name] string**

Synopsis	Enter the <b>server</b> list instance
Context	<a href="#">debug nat pcp router string server string</a>
Tree	<a href="#">server</a>
Max. Instances	8
Introduced	22.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**[name] string**

Synopsis	PCP server name
Context	<a href="#">debug nat pcp router string server string</a>
Tree	<a href="#">server</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	22.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## packets

Synopsis	Enter the <b>packets</b> context
Context	<a href="#">debug nat pcp router</a> <i>string</i> <a href="#">server</a> <i>string</i> <b>packets</b>
Tree	<a href="#">packets</a>
Introduced	22.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## detail *boolean*

Synopsis	Enable the detailed PCP packet debug output
Context	<a href="#">debug nat pcp router</a> <i>string</i> <a href="#">server</a> <i>string</i> <a href="#">packets</a> <b>detail</b> <i>boolean</i>
Tree	<a href="#">detail</a>
Default	false
Introduced	22.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## direction *keyword*

Synopsis	Direction of the PCP packet debugging
Context	<a href="#">debug nat pcp router</a> <i>string</i> <a href="#">server</a> <i>string</i> <a href="#">packets</a> <b>direction</b> <i>keyword</i>
Tree	<a href="#">direction</a>
Options	ingress, egress, both
Default	ingress
Introduced	22.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## router [[router-instance](#)] *string*

Synopsis	Enter the <b>router</b> list instance
Context	<a href="#">debug router</a> <i>string</i>
Tree	<a href="#">router</a>
Introduced	22.5.R1
Platforms	All

**[router-instance] string**

Synopsis	Router name or VPRN service name
Context	<a href="#">debug router string</a>
Tree	<a href="#">router</a>
MD-CLI Default	Base
Notes	This element is part of a list key.
Introduced	22.5.R1
Platforms	All

**dhcp**

Synopsis	Enter the <b>dhcp</b> context
Context	<a href="#">debug router string dhcp</a>
Tree	<a href="#">dhcp</a>
Description	<p>Commands in this context enable DHCP debug for all packets in the specified routing instance or VPRN service, or for specific packets matching the specific MAC addresses, SAP identifiers, or interface names.</p> <p>When a DHCP packet matches a specified filter and is conforming the configured debug mode for that filter, the packet debug is available in the specified detail level. DHCP debug filter criteria are applied in the following order:</p> <ol style="list-style-type: none"> <li>1. MAC address</li> <li>2. SAP identifier</li> <li>3. interface names</li> <li>4. all packets</li> </ol> <p>Up to 8 MAC address filters, 8 SAP identifier filters, 4 interface name filters, and 4 all-packet filters can be specified simultaneously across all routing instances and VPRN services.</p>
Introduced	22.10.R1
Platforms	All

**all-packets**

Synopsis	Enable the <b>all-packets</b> context
Context	<a href="#">debug router string dhcp all-packets</a>
Tree	<a href="#">all-packets</a>
Introduced	22.10.R1

Platforms All

### **detail-level** *keyword*

Synopsis Detail level of the DHCP debug output  
 Context [debug router](#) *string dhcp all-packets detail-level keyword*  
 Tree [detail-level](#)  
 Options high, medium, low  
 Default high  
 Introduced 22.10.R1  
 Platforms All

### **mode** *keyword*

Synopsis DHCP packets present in the debug output  
 Context [debug router](#) *string dhcp all-packets mode keyword*  
 Tree [mode](#)  
 Options egress-ingress-and-dropped, dropped-only, ingress-and-dropped  
 Default egress-ingress-and-dropped  
 Introduced 22.10.R1  
 Platforms All

### **interface** [[interface-name](#)] *string*

Synopsis Enter the **interface** list instance  
 Context [debug router](#) *string dhcp interface string*  
 Tree [interface](#)  
 Introduced 22.10.R1  
 Platforms All

### **[interface-name]** *string*

Synopsis Interface name  
 Context [debug router](#) *string dhcp interface string*  
 Tree [interface](#)

---

String Length	1 to 32
Notes	This element is part of a list key.
Introduced	22.10.R1
Platforms	All

### **detail-level** *keyword*

Synopsis	Detail level of the DHCP debug output
Context	<a href="#">debug router</a> <i>string</i> <a href="#">dhcp interface</a> <i>string</i> <b>detail-level</b> <i>keyword</i>
Tree	<a href="#">detail-level</a>
Options	high, medium, low
Default	high
Introduced	22.10.R1
Platforms	All

### **mode** *keyword*

Synopsis	DHCP packets present in the debug output
Context	<a href="#">debug router</a> <i>string</i> <a href="#">dhcp interface</a> <i>string</i> <b>mode</b> <i>keyword</i>
Tree	<a href="#">mode</a>
Options	egress-ingress-and-dropped, dropped-only, ingress-and-dropped
Default	egress-ingress-and-dropped
Introduced	22.10.R1
Platforms	All

### **mac** [[address](#)] *string*

Synopsis	Enter the <b>mac</b> list instance
Context	<a href="#">debug router</a> <i>string</i> <a href="#">dhcp mac</a> <i>string</i>
Tree	<a href="#">mac</a>
Introduced	22.10.R1
Platforms	All

**[address] string**

Synopsis	MAC address matching the client hardware address field
Context	<a href="#">debug router string dhcp mac string</a>
Tree	<a href="#">mac</a>
Notes	This element is part of a list key.
Introduced	22.10.R1
Platforms	All

**detail-level keyword**

Synopsis	Detail level of the DHCP debug output
Context	<a href="#">debug router string dhcp mac string detail-level keyword</a>
Tree	<a href="#">detail-level</a>
Options	high, medium, low
Default	high
Introduced	22.10.R1
Platforms	All

**mode keyword**

Synopsis	DHCP packets present in the debug output
Context	<a href="#">debug router string dhcp mac string mode keyword</a>
Tree	<a href="#">mode</a>
Options	egress-ingress-and-dropped, dropped-only, ingress-and-dropped
Default	egress-ingress-and-dropped
Introduced	22.10.R1
Platforms	All

**sap [sap-id] string**

Synopsis	Enter the <b>sap</b> list instance
Context	<a href="#">debug router string dhcp sap string</a>
Tree	<a href="#">sap</a>
Introduced	22.10.R1
Platforms	All

**[sap-id] string**

Synopsis	SAP ID
Context	<a href="#">debug router string dhcp sap string</a>
Tree	<a href="#">sap</a>
String Length	1 to 45
Notes	This element is part of a list key.
Introduced	22.10.R1
Platforms	All

**detail-level keyword**

Synopsis	Detail level of the DHCP debug output
Context	<a href="#">debug router string dhcp sap string detail-level keyword</a>
Tree	<a href="#">detail-level</a>
Options	high, medium, low
Default	high
Introduced	22.10.R1
Platforms	All

**mode keyword**

Synopsis	DHCP packets present in the debug output
Context	<a href="#">debug router string dhcp sap string mode keyword</a>
Tree	<a href="#">mode</a>
Options	egress-ingress-and-dropped, dropped-only, ingress-and-dropped
Default	egress-ingress-and-dropped
Introduced	22.10.R1
Platforms	All

**igmp**

Synopsis	Enter the <b>igmp</b> context
Context	<a href="#">debug router string igmp</a>
Tree	<a href="#">igmp</a>

Introduced	22.10.R1
Platforms	All

## group-interface

Synopsis	Enable the <b>group-interface</b> context
Context	<a href="#">debug router string igmp group-interface</a>
Tree	<a href="#">group-interface</a>
Introduced	22.10.R1
Platforms	All

## all-group-interfaces

Synopsis	Trace all interfaces
Context	<a href="#">debug router string igmp group-interface all-group-interfaces</a>
Tree	<a href="#">all-group-interfaces</a>
Notes	The following elements are part of a mandatory choice: <b>all-group-interfaces</b> or ( <b>forwarding-service</b> and <b>group-interface-name</b> ).
Introduced	22.10.R1
Platforms	All

## forwarding-service *string*

Synopsis	ID of the forwarding service to trace
Context	<a href="#">debug router string igmp group-interface forwarding-service string</a>
Tree	<a href="#">forwarding-service</a>
String Length	1 to 64
Default	<code>.././router-instance</code>
Notes	The following elements are part of a mandatory choice: <b>all-group-interfaces</b> or ( <b>forwarding-service</b> and <b>group-interface-name</b> ).
Introduced	22.10.R1
Platforms	All

## group-interface-name *string*

Synopsis	Interface name
----------	----------------

Context	<code>debug router <i>string</i> igmp group-interface group-interface-name <i>string</i></code>
Tree	<code>group-interface-name</code>
String Length	1 to 32
Notes	The following elements are part of a mandatory choice: <b>all-group-interfaces</b> or ( <b>forwarding-service</b> and <b>group-interface-name</b> ).
Introduced	22.10.R1
Platforms	All

## host

Synopsis	Enable the <b>host</b> context
Context	<code>debug router <i>string</i> igmp host</code>
Tree	<code>host</code>
Introduced	22.10.R1
Platforms	All

## group-interface

Synopsis	Enter the <b>group-interface</b> context
Context	<code>debug router <i>string</i> igmp host group-interface</code>
Tree	<code>group-interface</code>
Introduced	22.10.R1
Platforms	All

## forwarding-service *string*

Synopsis	ID of the forwarding service to trace
Context	<code>debug router <i>string</i> igmp host group-interface forwarding-service <i>string</i></code>
Tree	<code>forwarding-service</code>
String Length	1 to 64
Default	<code>.././router-instance</code>
Introduced	22.10.R1
Platforms	All

### **group-interface-name** *string*

Synopsis	Interface name
Context	<a href="#">debug router</a> <i>string</i> <a href="#">igmp host group-interface</a> <a href="#">group-interface-name</a> <i>string</i>
Tree	<a href="#">group-interface-name</a>
String Length	1 to 32
Introduced	22.10.R1
Platforms	All

### **ip-address** *string*

Synopsis	IP address of the host to trace
Context	<a href="#">debug router</a> <i>string</i> <a href="#">igmp host ip-address</a> <i>string</i>
Tree	<a href="#">ip-address</a>
Introduced	22.10.R1
Platforms	All

### **interface**

Synopsis	Enable the <b>interface</b> context
Context	<a href="#">debug router</a> <i>string</i> <a href="#">igmp interface</a>
Tree	<a href="#">interface</a>
Introduced	22.10.R1
Platforms	All

### **all-interfaces**

Synopsis	Trace all interfaces
Context	<a href="#">debug router</a> <i>string</i> <a href="#">igmp interface all-interfaces</a>
Tree	<a href="#">all-interfaces</a>
Notes	The following elements are part of a mandatory choice: <b>all-interfaces</b> or <b>interface-name</b> .
Introduced	22.10.R1
Platforms	All

### **interface-name** *string*

Synopsis	Interface name
Context	<a href="#">debug router</a> <i>string</i> <a href="#">igmp interface interface-name</a> <i>string</i>
Tree	<a href="#">interface-name</a>
String Length	1 to 32
Notes	The following elements are part of a mandatory choice: <b>all-interfaces</b> or <b>interface-name</b> .
Introduced	22.10.R1
Platforms	All

### **mcs**

Synopsis	Enable the <b>mcs</b> context
Context	<a href="#">debug router</a> <i>string</i> <a href="#">igmp mcs</a>
Tree	<a href="#">mcs</a>
Description	Commands in this context enable debugging for IGMP multicast servers.
Introduced	22.10.R1
Platforms	All

### **all-interfaces**

Synopsis	Trace all interfaces
Context	<a href="#">debug router</a> <i>string</i> <a href="#">igmp mcs all-interfaces</a>
Tree	<a href="#">all-interfaces</a>
Notes	The following elements are part of a mandatory choice: <b>all-interfaces</b> or <b>interface-name</b> .
Introduced	22.10.R1
Platforms	All

### **interface-name** *string*

Synopsis	Interface name
Context	<a href="#">debug router</a> <i>string</i> <a href="#">igmp mcs interface-name</a> <i>string</i>
Tree	<a href="#">interface-name</a>
String Length	1 to 32

Notes	The following elements are part of a mandatory choice: <b>all-interfaces</b> or <b>interface-name</b> .
Introduced	22.10.R1
Platforms	All

### **miscellaneous** *boolean*

Synopsis	Enable tracing of miscellaneous events
Context	<a href="#">debug router</a> <i>string igmp miscellaneous boolean</i>
Tree	<a href="#">miscellaneous</a>
Default	false
Introduced	22.10.R1
Platforms	All

### **packet**

Synopsis	Enable the <b>packet</b> context
Context	<a href="#">debug router</a> <i>string igmp packet</i>
Tree	<a href="#">packet</a>
Introduced	22.10.R1
Platforms	All

### **all-origins**

Synopsis	Trace all origins
Context	<a href="#">debug router</a> <i>string igmp packet all-origins</i>
Tree	<a href="#">all-origins</a>
Notes	The following elements are part of a choice: <b>all-origins</b> , <b>group-interface-name</b> , <b>host-ip-address</b> , <b>interface-ip-address</b> , or <b>interface-name</b> .
Introduced	22.10.R1
Platforms	All

### **dropped** *boolean*

Synopsis	Enable tracing for dropped packets
Context	<a href="#">debug router</a> <i>string igmp packet dropped boolean</i>

Tree	<a href="#">dropped</a>
Default	true
Introduced	22.10.R1
Platforms	All

### **egress** *boolean*

Synopsis	Enable tracing for transmitted packets
Context	<a href="#">debug router</a> <i>string</i> <a href="#">igmp packet</a> <a href="#">egress</a> <i>boolean</i>
Tree	<a href="#">egress</a>
Default	true
Introduced	22.10.R1
Platforms	All

### **group-interface-name** *string*

Synopsis	Interface name
Context	<a href="#">debug router</a> <i>string</i> <a href="#">igmp packet</a> <a href="#">group-interface-name</a> <i>string</i>
Tree	<a href="#">group-interface-name</a>
String Length	1 to 32
Notes	The following elements are part of a choice: <b>all-origins</b> , <b>group-interface-name</b> , <b>host-ip-address</b> , <b>interface-ip-address</b> , or <b>interface-name</b> .
Introduced	22.10.R1
Platforms	All

### **host-ip-address** *string*

Synopsis	Address of the host to trace
Context	<a href="#">debug router</a> <i>string</i> <a href="#">igmp packet</a> <a href="#">host-ip-address</a> <i>string</i>
Tree	<a href="#">host-ip-address</a>
Notes	The following elements are part of a choice: <b>all-origins</b> , <b>group-interface-name</b> , <b>host-ip-address</b> , <b>interface-ip-address</b> , or <b>interface-name</b> .
Introduced	22.10.R2
Platforms	All

**ingress** *boolean*

Synopsis	Enable tracing for received packets
Context	<a href="#">debug router</a> <i>string</i> <a href="#">igmp packet ingress</a> <i>boolean</i>
Tree	<a href="#">ingress</a>
Default	true
Introduced	22.10.R1
Platforms	All

**interface-ip-address** *string*

Synopsis	Source address of the packet to trace
Context	<a href="#">debug router</a> <i>string</i> <a href="#">igmp packet interface-ip-address</a> <i>string</i>
Tree	<a href="#">interface-ip-address</a>
Notes	The following elements are part of a choice: <b>all-origins</b> , <b>group-interface-name</b> , <b>host-ip-address</b> , <b>interface-ip-address</b> , or <b>interface-name</b> .
Introduced	22.10.R2
Platforms	All

**interface-name** *string*

Synopsis	Interface name
Context	<a href="#">debug router</a> <i>string</i> <a href="#">igmp packet interface-name</a> <i>string</i>
Tree	<a href="#">interface-name</a>
String Length	1 to 32
Notes	The following elements are part of a choice: <b>all-origins</b> , <b>group-interface-name</b> , <b>host-ip-address</b> , <b>interface-ip-address</b> , or <b>interface-name</b> .
Introduced	22.10.R1
Platforms	All

**type** *keyword*

Synopsis	Packet type to trace
Context	<a href="#">debug router</a> <i>string</i> <a href="#">igmp packet type</a> <i>keyword</i>
Tree	<a href="#">type</a>
Options	all – All IGMP packets query – IGMP Query packets

	v1-report – IGMP version 1 Report packets
	v2-report – IGMP version 2 Report packets
	v2-leave – IGMP version 2 Leave packets
	v3-report – IGMP version 3 Report packets
Default	all
Introduced	22.10.R1
Platforms	All

**ip**

Synopsis	Enter the <b>ip</b> context
Context	<a href="#">debug router string ip</a>
Tree	<a href="#">ip</a>
Introduced	23.3.R1
Platforms	All

**icmp**

Synopsis	Enter the <b>icmp</b> context
Context	<a href="#">debug router string ip icmp</a>
Tree	<a href="#">icmp</a>
Introduced	23.3.R1
Platforms	All

**all-packets**

Synopsis	Enable the <b>all-packets</b> context
Context	<a href="#">debug router string ip icmp all-packets</a>
Tree	<a href="#">all-packets</a>
Introduced	23.3.R1
Platforms	All

**interface** [[interface-name](#)] *string*

Synopsis	Add a list entry for <b>interface</b>
Context	<a href="#">debug router string ip icmp interface string</a>

Tree	<a href="#">interface</a>
Introduced	23.3.R1
Platforms	All

**[interface-name]** *string*

Synopsis	Interface name
Context	<a href="#">debug router</a> <i>string</i> <a href="#">ip icmp interface</a> <i>string</i>
Tree	<a href="#">interface</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	23.3.R1
Platforms	All

**icmp6**

Synopsis	Enter the <b>icmp6</b> context
Context	<a href="#">debug router</a> <i>string</i> <a href="#">ip icmp6</a>
Tree	<a href="#">icmp6</a>
Introduced	23.3.R1
Platforms	All

**all-packets**

Synopsis	Enable the <b>all-packets</b> context
Context	<a href="#">debug router</a> <i>string</i> <a href="#">ip icmp6 all-packets</a>
Tree	<a href="#">all-packets</a>
Introduced	23.3.R1
Platforms	All

**interface** [[interface-name](#)] *string*

Synopsis	Add a list entry for <b>interface</b>
Context	<a href="#">debug router</a> <i>string</i> <a href="#">ip icmp6 interface</a> <i>string</i>
Tree	<a href="#">interface</a>

Introduced 23.3.R1  
Platforms All

### **[interface-name]** *string*

Synopsis Interface name  
Context [debug router string ip icmp6 interface string](#)  
Tree [interface](#)  
String Length 1 to 32  
Notes This element is part of a list key.  
Introduced 23.3.R1  
Platforms All

### **interface-events**

Synopsis Enter the **interface-events** context  
Context [debug router string ip interface-events](#)  
Tree [interface-events](#)  
Introduced 23.3.R1  
Platforms All

### **all-events**

Synopsis Enable the **all-events** context  
Context [debug router string ip interface-events all-events](#)  
Tree [all-events](#)  
Introduced 23.3.R1  
Platforms All

### **interface** [\[interface-name\]](#) *string*

Synopsis Add a list entry for **interface**  
Context [debug router string ip interface-events interface string](#)  
Tree [interface](#)  
Introduced 23.3.R1

Platforms All

### **[interface-name]** *string*

Synopsis Interface name  
Context [debug router](#) *string* [ip interface-events interface](#) *string*  
Tree [interface](#)  
String Length 1 to 32  
Notes This element is part of a list key.  
Introduced 23.3.R1  
Platforms All

### **neighbor**

Synopsis Enter the **neighbor** context  
Context [debug router](#) *string* [ip neighbor](#)  
Tree [neighbor](#)  
Introduced 23.3.R1  
Platforms All

### **all-events**

Synopsis Enable the **all-events** context  
Context [debug router](#) *string* [ip neighbor all-events](#)  
Tree [all-events](#)  
Introduced 23.3.R1  
Platforms All

### **address-family** *keyword*

Synopsis Debug the specified address family  
Context [debug router](#) *string* [ip neighbor all-events address-family](#) *keyword*  
Tree [address-family](#)  
Options ipv4, ipv6  
Introduced 23.3.R1

Platforms All

### **interface** [interface-name] *string*

Synopsis Enter the **interface** list instance  
 Context [debug router](#) *string* [ip neighbor interface](#) *string*  
 Tree [interface](#)  
 Introduced 23.3.R1  
 Platforms All

### **[interface-name]** *string*

Synopsis Interface name  
 Context [debug router](#) *string* [ip neighbor interface](#) *string*  
 Tree [interface](#)  
 String Length 1 to 32  
 Notes This element is part of a list key.  
 Introduced 23.3.R1  
 Platforms All

### **address-family** *keyword*

Synopsis Debug the specified address family  
 Context [debug router](#) *string* [ip neighbor interface](#) *string* [address-family](#) *keyword*  
 Tree [address-family](#)  
 Options ipv4, ipv6  
 Introduced 23.3.R1  
 Platforms All

### **packet**

Synopsis Enter the **packet** context  
 Context [debug router](#) *string* [ip packet](#)  
 Tree [packet](#)  
 Introduced 23.3.R1

---

Platforms All

### **all-packets**

Synopsis Enable the **all-packets** context

Context [debug router string ip packet all-packets](#)

Tree [all-packets](#)

Introduced 23.3.R1

Platforms All

### **address-family** *keyword*

Synopsis Debug the specified address family

Context [debug router string ip packet all-packets address-family keyword](#)

Tree [address-family](#)

Options ipv4, ipv6

Introduced 23.3.R1

Platforms All

### **headers** *boolean*

Synopsis Display information associated with packet header only

Context [debug router string ip packet all-packets headers boolean](#)

Tree [headers](#)

Default false

Introduced 23.3.R1

Platforms All

### **protocol-id** *number*

Synopsis IP protocol ID to trace

Context [debug router string ip packet all-packets protocol-id number](#)

Tree [protocol-id](#)

Range 0 to 255

Introduced 23.3.R1

Platforms All

### **interface** *[interface-name] string*

Synopsis Enter the **interface** list instance  
 Context [debug router string ip packet interface string](#)  
 Tree [interface](#)  
 Introduced 23.3.R1  
 Platforms All

### **[interface-name] string**

Synopsis Interface name  
 Context [debug router string ip packet interface string](#)  
 Tree [interface](#)  
 String Length 1 to 32  
 Notes This element is part of a list key.  
 Introduced 23.3.R1  
 Platforms All

### **address-family keyword**

Synopsis Debug the specified address family  
 Context [debug router string ip packet interface string address-family keyword](#)  
 Tree [address-family](#)  
 Options ipv4, ipv6  
 Introduced 23.3.R1  
 Platforms All

### **headers boolean**

Synopsis Display information associated with packet header only  
 Context [debug router string ip packet interface string headers boolean](#)  
 Tree [headers](#)  
 Default false

Introduced	23.3.R1
Platforms	All

### **protocol-id** *number*

Synopsis	IP protocol ID to trace
Context	<a href="#">debug router</a> <i>string ip packet interface string protocol-id number</i>
Tree	<a href="#">protocol-id</a>
Range	0 to 255
Introduced	23.3.R1
Platforms	All

### **route-table**

Synopsis	Enable the <b>route-table</b> context
Context	<a href="#">debug router</a> <i>string ip route-table</i>
Tree	<a href="#">route-table</a>
Introduced	23.3.R1
Platforms	All

### **all**

Synopsis	Allow trace for all route updates
Context	<a href="#">debug router</a> <i>string ip route-table all</i>
Tree	<a href="#">all</a>
Notes	The following elements are part of a mandatory choice: <b>all</b> or <b>filter</b> .
Introduced	23.3.R1
Platforms	All

### **filter**

Synopsis	Enter the <b>filter</b> context
Context	<a href="#">debug router</a> <i>string ip route-table filter</i>
Tree	<a href="#">filter</a>
Notes	The following elements are part of a mandatory choice: <b>all</b> or <b>filter</b> .

Introduced	23.3.R1
Platforms	All

## ipv4

Synopsis	Enter the <b>ipv4</b> context
Context	<a href="#">debug router string ip route-table filter ipv4</a>
Tree	<a href="#">ipv4</a>
Introduced	23.3.R1
Platforms	All

## prefix [[prefix](#)] *string*

Synopsis	Enter the <b>prefix</b> list instance
Context	<a href="#">debug router string ip route-table filter ipv4 prefix string</a>
Tree	<a href="#">prefix</a>
Max. Instances	1
Introduced	23.3.R1
Platforms	All

## [[prefix](#)] *string*

Synopsis	IPv4 prefix
Context	<a href="#">debug router string ip route-table filter ipv4 prefix string</a>
Tree	<a href="#">prefix</a>
Notes	This element is part of a list key.
Introduced	23.3.R1
Platforms	All

## longest-prefix-match *boolean*

Synopsis	Allow match for greatest prefix values
Context	<a href="#">debug router string ip route-table filter ipv4 prefix string longest-prefix-match boolean</a>
Tree	<a href="#">longest-prefix-match</a>

Default	false
Introduced	23.3.R1
Platforms	All

## ipv6

Synopsis	Enter the <b>ipv6</b> context
Context	<a href="#">debug router string ip route-table filter ipv6</a>
Tree	<a href="#">ipv6</a>
Introduced	23.3.R1
Platforms	All

## prefix [[prefix](#)] *string*

Synopsis	Enter the <b>prefix</b> list instance
Context	<a href="#">debug router string ip route-table filter ipv6 prefix string</a>
Tree	<a href="#">prefix</a>
Max. Instances	1
Introduced	23.3.R1
Platforms	All

## [[prefix](#)] *string*

Synopsis	IPv6 prefix
Context	<a href="#">debug router string ip route-table filter ipv6 prefix string</a>
Tree	<a href="#">prefix</a>
Notes	This element is part of a list key.
Introduced	23.3.R1
Platforms	All

## longest-prefix-match *boolean*

Synopsis	Allow match for greatest prefix values
Context	<a href="#">debug router string ip route-table filter ipv6 prefix string longest-prefix-match boolean</a>

---

Tree	<a href="#">longest-prefix-match</a>
Default	false
Introduced	23.3.R1
Platforms	All

## tunnel-table

Synopsis	Enable the <b>tunnel-table</b> context
Context	<a href="#">debug router string ip tunnel-table</a>
Tree	<a href="#">tunnel-table</a>
Introduced	23.3.R1
Platforms	All

## all

Synopsis	Allow trace for all tunnel updates
Context	<a href="#">debug router string ip tunnel-table all</a>
Tree	<a href="#">all</a>
Notes	The following elements are part of a mandatory choice: <b>all</b> or <b>filter</b> .
Introduced	23.3.R1
Platforms	All

## filter

Synopsis	Enter the <b>filter</b> context
Context	<a href="#">debug router string ip tunnel-table filter</a>
Tree	<a href="#">filter</a>
Notes	The following elements are part of a mandatory choice: <b>all</b> or <b>filter</b> .
Introduced	23.3.R1
Platforms	All

## id

Synopsis	Enter the <b>id</b> context
Context	<a href="#">debug router string ip tunnel-table filter id</a>

Tree	<a href="#">id</a>
Introduced	23.3.R1
Platforms	All

**sdp-id** *number*

Synopsis	SDP ID for tracing
Context	<a href="#">debug router</a> <i>string</i> <a href="#">ip tunnel-table filter id</a> <a href="#">sdp-id</a> <i>number</i>
Tree	<a href="#">sdp-id</a>
Range	1 to 32767
Notes	The following elements are part of a choice: <b>sdp-id</b> or <b>tunnel-id</b> .
Introduced	23.3.R1
Platforms	All

**tunnel-id** *number*

Synopsis	Tunnel ID for tracing
Context	<a href="#">debug router</a> <i>string</i> <a href="#">ip tunnel-table filter id</a> <a href="#">tunnel-id</a> <i>number</i>
Tree	<a href="#">tunnel-id</a>
Max. Range	0 to 4294967295
Notes	The following elements are part of a choice: <b>sdp-id</b> or <b>tunnel-id</b> .
Introduced	23.3.R1
Platforms	All

**ipv4**

Synopsis	Enter the <b>ipv4</b> context
Context	<a href="#">debug router</a> <i>string</i> <a href="#">ip tunnel-table filter</a> <a href="#">ipv4</a>
Tree	<a href="#">ipv4</a>
Introduced	23.3.R1
Platforms	All

**prefix** [[prefix](#)] *string*

Synopsis	Enter the <b>prefix</b> list instance
----------	---------------------------------------

Context	<a href="#">debug router string ip tunnel-table filter ipv4 prefix string</a>
Tree	<a href="#">prefix</a>
Max. Instances	1
Introduced	23.3.R1
Platforms	All

**[prefix] string**

Synopsis	IPv4 prefix
Context	<a href="#">debug router string ip tunnel-table filter ipv4 prefix string</a>
Tree	<a href="#">prefix</a>
Notes	This element is part of a list key.
Introduced	23.3.R1
Platforms	All

**longest-prefix-match boolean**

Synopsis	Allow match for greatest prefix values
Context	<a href="#">debug router string ip tunnel-table filter ipv4 prefix string longest-prefix-match boolean</a>
Tree	<a href="#">longest-prefix-match</a>
Default	false
Introduced	23.3.R1
Platforms	All

**tunnel-type (keyword | keyword)**

Synopsis	Tunnel type
Context	<a href="#">debug router string ip tunnel-table filter ipv4 prefix string tunnel-type (keyword   keyword)</a>
Tree	<a href="#">tunnel-type</a>
Options	none, invalid, sdp, rsvp, ldp, ospf, isis, bypass, gre, bgp, sr-te, fpe, udp, ospfv3, mpls-fwd-policy, sr-policy, rib-api, bgp-epe, srv6-isis, srv6-policy
Options	all
Default	all
Introduced	23.3.R1

Platforms All

## ipv6

Synopsis Enter the **ipv6** context  
 Context [debug router string ip tunnel-table filter ipv6](#)  
 Tree [ipv6](#)  
 Introduced 23.3.R1  
 Platforms All

## prefix [[prefix](#)] *string*

Synopsis Enter the **prefix** list instance  
 Context [debug router string ip tunnel-table filter ipv6 prefix string](#)  
 Tree [prefix](#)  
 Max. Instances 1  
 Introduced 23.3.R1  
 Platforms All

## [[prefix](#)] *string*

Synopsis IPv6 prefix  
 Context [debug router string ip tunnel-table filter ipv6 prefix string](#)  
 Tree [prefix](#)  
 Notes This element is part of a list key.  
 Introduced 23.3.R1  
 Platforms All

## longest-prefix-match *boolean*

Synopsis Allow match for greatest prefix values  
 Context [debug router string ip tunnel-table filter ipv6 prefix string longest-prefix-match boolean](#)  
 Tree [longest-prefix-match](#)  
 Default false

Introduced	23.3.R1
Platforms	All

### **tunnel-type** (*keyword* | *keyword*)

Synopsis	Tunnel type
Context	<a href="#">debug router</a> <i>string</i> <a href="#">ip tunnel-table filter ipv6 prefix</a> <i>string</i> <b>tunnel-type</b> ( <i>keyword</i>   <i>keyword</i> )
Tree	<a href="#">tunnel-type</a>
Options	none, invalid, sdp, rsvp, ldp, ospf, isis, bypass, gre, bgp, sr-te, fpe, udp, ospfv3, mpls-fwd-policy, sr-policy, rib-api, bgp-epe, srv6-isis, srv6-policy
Options	all
Default	all
Introduced	23.3.R1
Platforms	All

### **l2tp**

Synopsis	Enter the <b>l2tp</b> context
Context	<a href="#">debug router</a> <i>string</i> <b>l2tp</b>
Tree	<a href="#">l2tp</a>
Introduced	23.7.R1
Platforms	All

### **assignment-id** [[assignment-id](#)] *string*

Synopsis	Enter the <b>assignment-id</b> list instance
Context	<a href="#">debug router</a> <i>string</i> <a href="#">l2tp</a> <b>assignment-id</b> <i>string</i>
Tree	<a href="#">assignment-id</a>
Max. Instances	8
Introduced	23.7.R1
Platforms	All

### **[assignment-id]** *string*

Synopsis	Assignment ID of the L2TP tunnel to debug
----------	---

Context	<code>debug router string l2tp assignment-id string</code>
Tree	<code>assignment-id</code>
String Length	1 to 63
Notes	This element is part of a list key.
Introduced	23.7.R1
Platforms	All

## events

Synopsis	Enable the <b>events</b> context
Context	<code>debug router string l2tp assignment-id string events</code>
Tree	<code>events</code>
Introduced	23.7.R1
Platforms	All

## all

Synopsis	Enable debugging for all events
Context	<code>debug router string l2tp assignment-id string events all</code>
Tree	<code>all</code>
Notes	The following elements are part of a mandatory choice: <b>all</b> or ( <b>call-disconnect-notification</b> , <b>finite-state-machine</b> , <b>lac</b> , <b>lns</b> , and <b>stop-control-connection-notification</b> ).
Introduced	23.7.R1
Platforms	All

## call-disconnect-notification *boolean*

Synopsis	Enable L2TP CDN event debugging
Context	<code>debug router string l2tp assignment-id string events call-disconnect-notification boolean</code>
Tree	<code>call-disconnect-notification</code>
Default	false
Notes	The following elements are part of a mandatory choice: <b>all</b> or ( <b>call-disconnect-notification</b> , <b>finite-state-machine</b> , <b>lac</b> , <b>lns</b> , and <b>stop-control-connection-notification</b> ).
Introduced	23.7.R1

Platforms All

### **finite-state-machine** *boolean*

Synopsis Enable L2TP FSM event debugging

Context [debug router](#) *string* [l2tp assignment-id](#) *string* [events finite-state-machine](#) *boolean*

Tree [finite-state-machine](#)

Default false

Notes The following elements are part of a mandatory choice: **all** or (**call-disconnect-notification**, **finite-state-machine**, **lac**, **lns**, and **stop-control-connection-notification**).

Introduced 23.7.R1

Platforms All

### **lac**

Synopsis Enter the **lac** context

Context [debug router](#) *string* [l2tp assignment-id](#) *string* [events lac](#)

Tree [lac](#)

Notes The following elements are part of a mandatory choice: **all** or (**call-disconnect-notification**, **finite-state-machine**, **lac**, **lns**, and **stop-control-connection-notification**).

Introduced 23.7.R1

Platforms All

### **state-recovery** *boolean*

Synopsis Enable L2TP LAC state recovery event debugging

Context [debug router](#) *string* [l2tp assignment-id](#) *string* [events lac state-recovery](#) *boolean*

Tree [state-recovery](#)

Default false

Introduced 23.7.R1

Platforms All

**state-recovery-failed** *boolean*

Synopsis	Enable L2TP LAC state recovery failed event debugging
Context	<a href="#">debug router</a> <i>string</i> <a href="#">l2tp assignment-id</a> <i>string</i> <a href="#">events lac state-recovery-failed</a> <i>boolean</i>
Tree	<a href="#">state-recovery-failed</a>
Default	false
Introduced	23.7.R1
Platforms	All

**Ins**

Synopsis	Enter the <b>Ins</b> context
Context	<a href="#">debug router</a> <i>string</i> <a href="#">l2tp assignment-id</a> <i>string</i> <a href="#">events Ins</a>
Tree	<a href="#">Ins</a>
Notes	The following elements are part of a mandatory choice: <b>all</b> or ( <b>call-disconnect-notification</b> , <b>finite-state-machine</b> , <b>lac</b> , <b>Ins</b> , and <b>stop-control-connection-notification</b> ).
Introduced	23.7.R1
Platforms	All

**ppp**

Synopsis	Enable the <b>ppp</b> context
Context	<a href="#">debug router</a> <i>string</i> <a href="#">l2tp assignment-id</a> <i>string</i> <a href="#">events Ins ppp</a>
Tree	<a href="#">ppp</a>
Introduced	23.7.R1
Platforms	All

**terminate-only** *boolean*

Synopsis	Debug events for ungracefully terminated sessions only
Context	<a href="#">debug router</a> <i>string</i> <a href="#">l2tp assignment-id</a> <i>string</i> <a href="#">events Ins ppp terminate-only</a> <i>boolean</i>
Tree	<a href="#">terminate-only</a>
Default	false
Introduced	23.7.R1
Platforms	All

**stop-control-connection-notification** *boolean*

Synopsis	Enable L2TP StopCCN event debugging
Context	<a href="#">debug router</a> <i>string</i> <a href="#">l2tp assignment-id</a> <i>string</i> <a href="#">events stop-control-connection-notification</a> <i>boolean</i>
Tree	<a href="#">stop-control-connection-notification</a>
Default	false
Notes	The following elements are part of a mandatory choice: <b>all</b> or ( <b>call-disconnect-notification</b> , <b>finite-state-machine</b> , <b>lac</b> , <b>lns</b> , and <b>stop-control-connection-notification</b> ).
Introduced	23.7.R1
Platforms	All

**packets**

Synopsis	Enable the <b>packets</b> context
Context	<a href="#">debug router</a> <i>string</i> <a href="#">l2tp assignment-id</a> <i>string</i> <a href="#">packets</a>
Tree	<a href="#">packets</a>
Introduced	23.7.R1
Platforms	All

**all**

Synopsis	Enable debugging for all session packets
Context	<a href="#">debug router</a> <i>string</i> <a href="#">l2tp assignment-id</a> <i>string</i> <a href="#">packets all</a>
Tree	<a href="#">all</a>
Notes	The following elements are part of a mandatory choice: <b>all</b> or ( <b>l2tp</b> and <b>lns</b> ).
Introduced	23.7.R1
Platforms	All

**detail-level** *keyword*

Synopsis	Detail level of the L2TP packet debug output
Context	<a href="#">debug router</a> <i>string</i> <a href="#">l2tp assignment-id</a> <i>string</i> <a href="#">packets detail-level</a> <i>keyword</i>
Tree	<a href="#">detail-level</a>
Options	low, high

---

Default	low
Introduced	23.7.R1
Platforms	All

### **direction** *keyword*

Synopsis	Direction of the L2TP packet debugging
Context	<a href="#">debug router</a> <i>string</i> <a href="#">l2tp assignment-id</a> <i>string</i> <a href="#">packets</a> <a href="#">direction</a> <i>keyword</i>
Tree	<a href="#">direction</a>
Options	ingress, egress, both
Default	both
Introduced	23.7.R1
Platforms	All

### **l2tp** *boolean*

Synopsis	Enable L2TP packet debugging
Context	<a href="#">debug router</a> <i>string</i> <a href="#">l2tp assignment-id</a> <i>string</i> <a href="#">packets</a> <a href="#">l2tp</a> <i>boolean</i>
Tree	<a href="#">l2tp</a>
Default	false
Notes	The following elements are part of a mandatory choice: <b>all</b> or ( <b>l2tp</b> and <b>lns</b> ).
Introduced	23.7.R1
Platforms	All

### **lns**

Synopsis	Enter the <b>lns</b> context
Context	<a href="#">debug router</a> <i>string</i> <a href="#">l2tp assignment-id</a> <i>string</i> <a href="#">packets</a> <a href="#">lns</a>
Tree	<a href="#">lns</a>
Notes	The following elements are part of a mandatory choice: <b>all</b> or ( <b>l2tp</b> and <b>lns</b> ).
Introduced	23.7.R1
Platforms	All

### **dhcp-client *boolean***

Synopsis	Enable DHCP client packet debugging
Context	<a href="#">debug router</a> <i>string</i> <a href="#">l2tp assignment-id</a> <i>string</i> <a href="#">packets</a> <a href="#">Ins</a> <a href="#">dhcp-client</a> <i>boolean</i>
Tree	<a href="#">dhcp-client</a>
Default	false
Introduced	23.7.R1
Platforms	All

### **ppp**

Synopsis	Enter the <b>ppp</b> context
Context	<a href="#">debug router</a> <i>string</i> <a href="#">l2tp assignment-id</a> <i>string</i> <a href="#">packets</a> <a href="#">Ins</a> <a href="#">ppp</a>
Tree	<a href="#">ppp</a>
Introduced	23.7.R1
Platforms	All

### **all**

Synopsis	Enable PPP debugging for all PPP session packets
Context	<a href="#">debug router</a> <i>string</i> <a href="#">l2tp assignment-id</a> <i>string</i> <a href="#">packets</a> <a href="#">Ins</a> <a href="#">ppp</a> <a href="#">all</a>
Tree	<a href="#">all</a>
Notes	The following elements are part of a choice: <b>all</b> or ( <b>chap</b> , <b>ipcp</b> , <b>ipv6cp</b> , <b>lcp</b> , <b>other</b> , and <b>pap</b> ).
Introduced	23.7.R1
Platforms	All

### **chap *boolean***

Synopsis	Enable PPP debugging for CHAP authentication packets
Context	<a href="#">debug router</a> <i>string</i> <a href="#">l2tp assignment-id</a> <i>string</i> <a href="#">packets</a> <a href="#">Ins</a> <a href="#">ppp</a> <a href="#">chap</a> <i>boolean</i>
Tree	<a href="#">chap</a>
Default	false
Notes	The following elements are part of a choice: <b>all</b> or ( <b>chap</b> , <b>ipcp</b> , <b>ipv6cp</b> , <b>lcp</b> , <b>other</b> , and <b>pap</b> ).
Introduced	23.7.R1

Platforms All

### **ipcp** *boolean*

Synopsis Enable PPP debugging for IPCP NCP packets

Context [debug router](#) *string* [l2tp assignment-id](#) *string* [packets](#) [ins ppp ipcp](#) *boolean*

Tree [ipcp](#)

Default false

Notes The following elements are part of a choice: **all** or (**chap**, **ipcp**, **ipv6cp**, **lcp**, **other**, and **pap**).

Introduced 23.7.R1

Platforms All

### **ipv6cp** *boolean*

Synopsis Enable PPP debugging for IPv6CP NCP packets

Context [debug router](#) *string* [l2tp assignment-id](#) *string* [packets](#) [ins ppp ipv6cp](#) *boolean*

Tree [ipv6cp](#)

Default false

Notes The following elements are part of a choice: **all** or (**chap**, **ipcp**, **ipv6cp**, **lcp**, **other**, and **pap**).

Introduced 23.7.R1

Platforms All

### **lcp** *boolean*

Synopsis Enable PPP debugging for LCP link establishment packets

Context [debug router](#) *string* [l2tp assignment-id](#) *string* [packets](#) [ins ppp lcp](#) *boolean*

Tree [lcp](#)

Default false

Notes The following elements are part of a choice: **all** or (**chap**, **ipcp**, **ipv6cp**, **lcp**, **other**, and **pap**).

Introduced 23.7.R1

Platforms All

**other** *boolean*

Synopsis	Enable other PPP protocol packet debugging
Context	<a href="#">debug router</a> <i>string</i> <a href="#">l2tp assignment-id</a> <i>string</i> <a href="#">packets</a> <a href="#">ins</a> <a href="#">ppp</a> <a href="#">other</a> <i>boolean</i>
Tree	<a href="#">other</a>
Default	false
Notes	The following elements are part of a choice: <b>all</b> or ( <b>chap</b> , <b>ipcp</b> , <b>ipv6cp</b> , <b>lcp</b> , <b>other</b> , and <b>pap</b> ).
Introduced	23.7.R1
Platforms	All

**pap** *boolean*

Synopsis	Enable PPP debugging for PAP authentication packets
Context	<a href="#">debug router</a> <i>string</i> <a href="#">l2tp assignment-id</a> <i>string</i> <a href="#">packets</a> <a href="#">ins</a> <a href="#">ppp</a> <a href="#">pap</a> <i>boolean</i>
Tree	<a href="#">pap</a>
Default	false
Notes	The following elements are part of a choice: <b>all</b> or ( <b>chap</b> , <b>ipcp</b> , <b>ipv6cp</b> , <b>lcp</b> , <b>other</b> , and <b>pap</b> ).
Introduced	23.7.R1
Platforms	All

**events**

Synopsis	Enable the <b>events</b> context
Context	<a href="#">debug router</a> <i>string</i> <a href="#">l2tp</a> <a href="#">events</a>
Tree	<a href="#">events</a>
Introduced	23.7.R1
Platforms	All

**all**

Synopsis	Enable debugging for all events
Context	<a href="#">debug router</a> <i>string</i> <a href="#">l2tp</a> <a href="#">events</a> <a href="#">all</a>
Tree	<a href="#">all</a>

---

Notes	The following elements are part of a mandatory choice: <b>all</b> or ( <b>call-disconnect-notification</b> , <b>finite-state-machine</b> , <b>lac</b> , <b>lns</b> , <b>session-setup</b> , and <b>stop-control-connection-notification</b> ).
Introduced	23.7.R1
Platforms	All

### **call-disconnect-notification** *boolean*

Synopsis	Enable L2TP CDN event debugging
Context	<a href="#">debug router</a> <i>string</i> <a href="#">l2tp events</a> <a href="#">call-disconnect-notification</a> <i>boolean</i>
Tree	<a href="#">call-disconnect-notification</a>
Default	false
Notes	The following elements are part of a mandatory choice: <b>all</b> or ( <b>call-disconnect-notification</b> , <b>finite-state-machine</b> , <b>lac</b> , <b>lns</b> , <b>session-setup</b> , and <b>stop-control-connection-notification</b> ).
Introduced	23.7.R1
Platforms	All

### **finite-state-machine** *boolean*

Synopsis	Enable L2TP FSM event debugging
Context	<a href="#">debug router</a> <i>string</i> <a href="#">l2tp events</a> <a href="#">finite-state-machine</a> <i>boolean</i>
Tree	<a href="#">finite-state-machine</a>
Default	false
Notes	The following elements are part of a mandatory choice: <b>all</b> or ( <b>call-disconnect-notification</b> , <b>finite-state-machine</b> , <b>lac</b> , <b>lns</b> , <b>session-setup</b> , and <b>stop-control-connection-notification</b> ).
Introduced	23.7.R1
Platforms	All

### **lac**

Synopsis	Enter the <b>lac</b> context
Context	<a href="#">debug router</a> <i>string</i> <a href="#">l2tp events</a> <a href="#">lac</a>
Tree	<a href="#">lac</a>

Notes	The following elements are part of a mandatory choice: <b>all</b> or ( <b>call-disconnect-notification</b> , <b>finite-state-machine</b> , <b>lac</b> , <b>Ins</b> , <b>session-setup</b> , and <b>stop-control-connection-notification</b> ).
Introduced	23.7.R1
Platforms	All

### **state-recovery** *boolean*

Synopsis	Enable L2TP LAC state recovery event debugging
Context	<a href="#">debug router</a> <i>string</i> <a href="#">l2tp events lac state-recovery</a> <i>boolean</i>
Tree	<a href="#">state-recovery</a>
Default	false
Introduced	23.7.R1
Platforms	All

### **state-recovery-failed** *boolean*

Synopsis	Enable L2TP LAC state recovery failed event debugging
Context	<a href="#">debug router</a> <i>string</i> <a href="#">l2tp events lac state-recovery-failed</a> <i>boolean</i>
Tree	<a href="#">state-recovery-failed</a>
Default	false
Introduced	23.7.R1
Platforms	All

## **Ins**

Synopsis	Enter the <b>Ins</b> context
Context	<a href="#">debug router</a> <i>string</i> <a href="#">l2tp events Ins</a>
Tree	<a href="#">Ins</a>
Notes	The following elements are part of a mandatory choice: <b>all</b> or ( <b>call-disconnect-notification</b> , <b>finite-state-machine</b> , <b>lac</b> , <b>Ins</b> , <b>session-setup</b> , and <b>stop-control-connection-notification</b> ).
Introduced	23.7.R1
Platforms	All

## ppp

Synopsis	Enable the <b>ppp</b> context
Context	<a href="#">debug router</a> <i>string</i> <a href="#">l2tp events</a> <a href="#">lns</a> <a href="#">ppp</a>
Tree	<a href="#">ppp</a>
Introduced	23.7.R1
Platforms	All

## terminate-only *boolean*

Synopsis	Debug events for ungracefully terminated sessions only
Context	<a href="#">debug router</a> <i>string</i> <a href="#">l2tp events</a> <a href="#">lns</a> <a href="#">ppp</a> <a href="#">terminate-only</a> <i>boolean</i>
Tree	<a href="#">terminate-only</a>
Default	false
Introduced	23.7.R1
Platforms	All

## session-setup

Synopsis	Enter the <b>session-setup</b> context
Context	<a href="#">debug router</a> <i>string</i> <a href="#">l2tp events</a> <a href="#">session-setup</a>
Tree	<a href="#">session-setup</a>
Notes	The following elements are part of a mandatory choice: <b>all</b> or ( <b>call-disconnect-notification</b> , <b>finite-state-machine</b> , <b>lac</b> , <b>lns</b> , <b>session-setup</b> , and <b>stop-control-connection-notification</b> ).
Introduced	23.7.R1
Platforms	All

## attempted-tunnels *boolean*

Synopsis	Enable debugging for attempted LNS tunnels
Context	<a href="#">debug router</a> <i>string</i> <a href="#">l2tp events</a> <a href="#">session-setup</a> <a href="#">attempted-tunnels</a> <i>boolean</i>
Tree	<a href="#">attempted-tunnels</a>
Default	false
Introduced	23.7.R1
Platforms	All

**skipped-tunnels** *boolean*

Synopsis	Enable debugging for skipped LNS tunnels
Context	<a href="#">debug router</a> <i>string</i> <a href="#">l2tp events session-setup</a> <a href="#">skipped-tunnels</a> <i>boolean</i>
Tree	<a href="#">skipped-tunnels</a>
Default	false
Introduced	23.7.R1
Platforms	All

**stop-control-connection-notification** *boolean*

Synopsis	Enable L2TP StopCCN event debugging
Context	<a href="#">debug router</a> <i>string</i> <a href="#">l2tp events stop-control-connection-notification</a> <i>boolean</i>
Tree	<a href="#">stop-control-connection-notification</a>
Default	false
Notes	The following elements are part of a mandatory choice: <b>all</b> or ( <b>call-disconnect-notification</b> , <b>finite-state-machine</b> , <b>lac</b> , <b>lns</b> , <b>session-setup</b> , and <b>stop-control-connection-notification</b> ).
Introduced	23.7.R1
Platforms	All

**group** [[tunnel-group-name](#)] *string*

Synopsis	Enter the <b>group</b> list instance
Context	<a href="#">debug router</a> <i>string</i> <a href="#">l2tp group</a> <i>string</i>
Tree	<a href="#">group</a>
Max. Instances	8
Introduced	23.7.R1
Platforms	All

**[tunnel-group-name]** *string*

Synopsis	Tunnel group name of the L2TP tunnel to debug
Context	<a href="#">debug router</a> <i>string</i> <a href="#">l2tp group</a> <i>string</i>
Tree	<a href="#">group</a>

String Length	1 to 64
Notes	This element is part of a list key.
Introduced	23.7.R1
Platforms	All

## events

Synopsis	Enable the <b>events</b> context
Context	<a href="#">debug router</a> <i>string</i> <a href="#">l2tp group</a> <i>string</i> <b>events</b>
Tree	<a href="#">events</a>
Introduced	23.7.R1
Platforms	All

## all

Synopsis	Enable debugging for all events
Context	<a href="#">debug router</a> <i>string</i> <a href="#">l2tp group</a> <i>string</i> <b>events all</b>
Tree	<a href="#">all</a>
Notes	The following elements are part of a mandatory choice: <b>all</b> or ( <b>call-disconnect-notification</b> , <b>finite-state-machine</b> , <b>lac</b> , <b>lms</b> , <b>session-setup</b> , and <b>stop-control-connection-notification</b> ).
Introduced	23.7.R1
Platforms	All

## call-disconnect-notification *boolean*

Synopsis	Enable L2TP CDN event debugging
Context	<a href="#">debug router</a> <i>string</i> <a href="#">l2tp group</a> <i>string</i> <b>events call-disconnect-notification</b> <i>boolean</i>
Tree	<a href="#">call-disconnect-notification</a>
Default	false
Notes	The following elements are part of a mandatory choice: <b>all</b> or ( <b>call-disconnect-notification</b> , <b>finite-state-machine</b> , <b>lac</b> , <b>lms</b> , <b>session-setup</b> , and <b>stop-control-connection-notification</b> ).
Introduced	23.7.R1
Platforms	All

### **finite-state-machine** *boolean*

Synopsis	Enable L2TP FSM event debugging
Context	<a href="#">debug router</a> <i>string</i> <a href="#">l2tp group</a> <i>string</i> <a href="#">events finite-state-machine</a> <i>boolean</i>
Tree	<a href="#">finite-state-machine</a>
Default	false
Notes	The following elements are part of a mandatory choice: <b>all</b> or ( <b>call-disconnect-notification</b> , <b>finite-state-machine</b> , <b>lac</b> , <b>Ins</b> , <b>session-setup</b> , and <b>stop-control-connection-notification</b> ).
Introduced	23.7.R1
Platforms	All

### **lac**

Synopsis	Enter the <b>lac</b> context
Context	<a href="#">debug router</a> <i>string</i> <a href="#">l2tp group</a> <i>string</i> <a href="#">events lac</a>
Tree	<a href="#">lac</a>
Notes	The following elements are part of a mandatory choice: <b>all</b> or ( <b>call-disconnect-notification</b> , <b>finite-state-machine</b> , <b>lac</b> , <b>Ins</b> , <b>session-setup</b> , and <b>stop-control-connection-notification</b> ).
Introduced	23.7.R1
Platforms	All

### **state-recovery** *boolean*

Synopsis	Enable L2TP LAC state recovery event debugging
Context	<a href="#">debug router</a> <i>string</i> <a href="#">l2tp group</a> <i>string</i> <a href="#">events lac state-recovery</a> <i>boolean</i>
Tree	<a href="#">state-recovery</a>
Default	false
Introduced	23.7.R1
Platforms	All

### **state-recovery-failed** *boolean*

Synopsis	Enable L2TP LAC state recovery failed event debugging
Context	<a href="#">debug router</a> <i>string</i> <a href="#">l2tp group</a> <i>string</i> <a href="#">events lac state-recovery-failed</a> <i>boolean</i>

Tree	<a href="#">state-recovery-failed</a>
Default	false
Introduced	23.7.R1
Platforms	All

## Ins

Synopsis	Enter the <b>Ins</b> context
Context	<a href="#">debug router string l2tp group string events Ins</a>
Tree	<a href="#">Ins</a>
Notes	The following elements are part of a mandatory choice: <b>all</b> or ( <b>call-disconnect-notification</b> , <b>finite-state-machine</b> , <b>lac</b> , <b>Ins</b> , <b>session-setup</b> , and <b>stop-control-connection-notification</b> ).
Introduced	23.7.R1
Platforms	All

## ppp

Synopsis	Enable the <b>ppp</b> context
Context	<a href="#">debug router string l2tp group string events Ins ppp</a>
Tree	<a href="#">ppp</a>
Introduced	23.7.R1
Platforms	All

## terminate-only *boolean*

Synopsis	Debug events for ungracefully terminated sessions only
Context	<a href="#">debug router string l2tp group string events Ins ppp terminate-only boolean</a>
Tree	<a href="#">terminate-only</a>
Default	false
Introduced	23.7.R1
Platforms	All

## session-setup

Synopsis	Enter the <b>session-setup</b> context
----------	--

Context	<a href="#">debug router</a> <i>string</i> <a href="#">l2tp group</a> <i>string</i> <a href="#">events</a> <a href="#">session-setup</a>
Tree	<a href="#">session-setup</a>
Notes	The following elements are part of a mandatory choice: <b>all</b> or ( <b>call-disconnect-notification</b> , <b>finite-state-machine</b> , <b>lac</b> , <b>lns</b> , <b>session-setup</b> , and <b>stop-control-connection-notification</b> ).
Introduced	23.7.R1
Platforms	All

### **attempted-tunnels** *boolean*

Synopsis	Enable debugging for attempted LNS tunnels
Context	<a href="#">debug router</a> <i>string</i> <a href="#">l2tp group</a> <i>string</i> <a href="#">events</a> <a href="#">session-setup</a> <a href="#">attempted-tunnels</a> <i>boolean</i>
Tree	<a href="#">attempted-tunnels</a>
Default	false
Introduced	23.7.R1
Platforms	All

### **skipped-tunnels** *boolean*

Synopsis	Enable debugging for skipped LNS tunnels
Context	<a href="#">debug router</a> <i>string</i> <a href="#">l2tp group</a> <i>string</i> <a href="#">events</a> <a href="#">session-setup</a> <a href="#">skipped-tunnels</a> <i>boolean</i>
Tree	<a href="#">skipped-tunnels</a>
Default	false
Introduced	23.7.R1
Platforms	All

### **stop-control-connection-notification** *boolean*

Synopsis	Enable L2TP StopCCN event debugging
Context	<a href="#">debug router</a> <i>string</i> <a href="#">l2tp group</a> <i>string</i> <a href="#">events</a> <a href="#">stop-control-connection-notification</a> <i>boolean</i>
Tree	<a href="#">stop-control-connection-notification</a>
Default	false
Notes	The following elements are part of a mandatory choice: <b>all</b> or ( <b>call-disconnect-notification</b> , <b>finite-state-machine</b> , <b>lac</b> , <b>lns</b> , <b>session-setup</b> , and <b>stop-control-connection-notification</b> ).
Introduced	23.7.R1

Platforms All

## packets

Synopsis Enable the **packets** context  
 Context [debug router string l2tp group string packets](#)  
 Tree [packets](#)  
 Introduced 23.7.R1  
 Platforms All

## all

Synopsis Enable debugging for all session packets  
 Context [debug router string l2tp group string packets all](#)  
 Tree [all](#)  
 Notes The following elements are part of a mandatory choice: **all** or (**l2tp** and **ins**).  
 Introduced 23.7.R1  
 Platforms All

## detail-level *keyword*

Synopsis Detail level of the L2TP packet debug output  
 Context [debug router string l2tp group string packets detail-level keyword](#)  
 Tree [detail-level](#)  
 Options low, high  
 Default low  
 Introduced 23.7.R1  
 Platforms All

## direction *keyword*

Synopsis Direction of the L2TP packet debugging  
 Context [debug router string l2tp group string packets direction keyword](#)  
 Tree [direction](#)  
 Options ingress, egress, both

---

Default	both
Introduced	23.7.R1
Platforms	All

### **I2tp** *boolean*

Synopsis	Enable L2TP packet debugging
Context	<a href="#">debug router</a> <i>string</i> <a href="#">I2tp group</a> <i>string</i> <a href="#">packets I2tp</a> <i>boolean</i>
Tree	<a href="#">I2tp</a>
Default	false
Notes	The following elements are part of a mandatory choice: <b>all</b> or ( <b>I2tp</b> and <b>Ins</b> ).
Introduced	23.7.R1
Platforms	All

### **Ins**

Synopsis	Enter the <b>Ins</b> context
Context	<a href="#">debug router</a> <i>string</i> <a href="#">I2tp group</a> <i>string</i> <a href="#">packets Ins</a>
Tree	<a href="#">Ins</a>
Notes	The following elements are part of a mandatory choice: <b>all</b> or ( <b>I2tp</b> and <b>Ins</b> ).
Introduced	23.7.R1
Platforms	All

### **dhcp-client** *boolean*

Synopsis	Enable DHCP client packet debugging
Context	<a href="#">debug router</a> <i>string</i> <a href="#">I2tp group</a> <i>string</i> <a href="#">packets Ins dhcp-client</a> <i>boolean</i>
Tree	<a href="#">dhcp-client</a>
Default	false
Introduced	23.7.R1
Platforms	All

### **ppp**

Synopsis	Enter the <b>ppp</b> context
----------	------------------------------

---

Context	<a href="#">debug router string l2tp group string packets lns ppp</a>
Tree	<a href="#">ppp</a>
Introduced	23.7.R1
Platforms	All

## **all**

Synopsis	Enable PPP debugging for all PPP session packets
Context	<a href="#">debug router string l2tp group string packets lns ppp all</a>
Tree	<a href="#">all</a>
Notes	The following elements are part of a choice: <b>all</b> or ( <b>chap</b> , <b>ipcp</b> , <b>ipv6cp</b> , <b>lcp</b> , <b>other</b> , and <b>pap</b> ).
Introduced	23.7.R1
Platforms	All

## **chap boolean**

Synopsis	Enable PPP debugging for CHAP authentication packets
Context	<a href="#">debug router string l2tp group string packets lns ppp chap boolean</a>
Tree	<a href="#">chap</a>
Default	false
Notes	The following elements are part of a choice: <b>all</b> or ( <b>chap</b> , <b>ipcp</b> , <b>ipv6cp</b> , <b>lcp</b> , <b>other</b> , and <b>pap</b> ).
Introduced	23.7.R1
Platforms	All

## **ipcp boolean**

Synopsis	Enable PPP debugging for IPCP NCP packets
Context	<a href="#">debug router string l2tp group string packets lns ppp ipcp boolean</a>
Tree	<a href="#">ipcp</a>
Default	false
Notes	The following elements are part of a choice: <b>all</b> or ( <b>chap</b> , <b>ipcp</b> , <b>ipv6cp</b> , <b>lcp</b> , <b>other</b> , and <b>pap</b> ).
Introduced	23.7.R1

Platforms All

### **ipv6cp** *boolean*

Synopsis Enable PPP debugging for IPv6CP NCP packets

Context [debug router](#) *string* [l2tp group](#) *string* [packets](#) [ins ppp](#) [ipv6cp](#) *boolean*

Tree [ipv6cp](#)

Default false

Notes The following elements are part of a choice: **all** or (**chap**, **ipcp**, **ipv6cp**, **lcp**, **other**, and **pap**).

Introduced 23.7.R1

Platforms All

### **lcp** *boolean*

Synopsis Enable PPP debugging for LCP link establishment packets

Context [debug router](#) *string* [l2tp group](#) *string* [packets](#) [ins ppp](#) [lcp](#) *boolean*

Tree [lcp](#)

Default false

Notes The following elements are part of a choice: **all** or (**chap**, **ipcp**, **ipv6cp**, **lcp**, **other**, and **pap**).

Introduced 23.7.R1

Platforms All

### **other** *boolean*

Synopsis Enable other PPP protocol packet debugging

Context [debug router](#) *string* [l2tp group](#) *string* [packets](#) [ins ppp](#) [other](#) *boolean*

Tree [other](#)

Default false

Notes The following elements are part of a choice: **all** or (**chap**, **ipcp**, **ipv6cp**, **lcp**, **other**, and **pap**).

Introduced 23.7.R1

Platforms All

**pap boolean**

Synopsis	Enable PPP debugging for PAP authentication packets
Context	<a href="#">debug router string l2tp group string packets lns ppp pap boolean</a>
Tree	<a href="#">pap</a>
Default	false
Notes	The following elements are part of a choice: <b>all</b> or ( <b>chap</b> , <b>ipcp</b> , <b>ipv6cp</b> , <b>lcp</b> , <b>other</b> , and <b>pap</b> ).
Introduced	23.7.R1
Platforms	All

**ip-peer [ip-address] (ipv4-address-no-zone | ipv6-address-no-zone)**

Synopsis	Enter the <b>ip-peer</b> list instance
Context	<a href="#">debug router string l2tp ip-peer (ipv4-address-no-zone   ipv6-address-no-zone)</a>
Tree	<a href="#">ip-peer</a>
Max. Instances	8
Introduced	23.7.R1
Platforms	All

**[ip-address] (ipv4-address-no-zone | ipv6-address-no-zone)**

Synopsis	IP address of the L2TP peer to debug
Context	<a href="#">debug router string l2tp ip-peer (ipv4-address-no-zone   ipv6-address-no-zone)</a>
Tree	<a href="#">ip-peer</a>
Notes	This element is part of a list key.
Introduced	23.7.R1
Platforms	All

**events**

Synopsis	Enable the <b>events</b> context
Context	<a href="#">debug router string l2tp ip-peer (ipv4-address-no-zone   ipv6-address-no-zone) events</a>
Tree	<a href="#">events</a>
Introduced	23.7.R1

Platforms All

## all

Synopsis Enable debugging for all events

Context [debug router string l2tp ip-peer \(ipv4-address-no-zone | ipv6-address-no-zone\) events all](#)

Tree [all](#)

Notes The following elements are part of a mandatory choice: **all** or (**call-disconnect-notification**, **finite-state-machine**, **lac**, **lns**, and **stop-control-connection-notification**).

Introduced 23.7.R1

Platforms All

## call-disconnect-notification *boolean*

Synopsis Enable L2TP CDN event debugging

Context [debug router string l2tp ip-peer \(ipv4-address-no-zone | ipv6-address-no-zone\) events call-disconnect-notification boolean](#)

Tree [call-disconnect-notification](#)

Default false

Notes The following elements are part of a mandatory choice: **all** or (**call-disconnect-notification**, **finite-state-machine**, **lac**, **lns**, and **stop-control-connection-notification**).

Introduced 23.7.R1

Platforms All

## finite-state-machine *boolean*

Synopsis Enable L2TP FSM event debugging

Context [debug router string l2tp ip-peer \(ipv4-address-no-zone | ipv6-address-no-zone\) events finite-state-machine boolean](#)

Tree [finite-state-machine](#)

Default false

Notes The following elements are part of a mandatory choice: **all** or (**call-disconnect-notification**, **finite-state-machine**, **lac**, **lns**, and **stop-control-connection-notification**).

Introduced 23.7.R1

Platforms All

## lac

Synopsis Enter the **lac** context

Context [debug router string l2tp ip-peer \(ipv4-address-no-zone | ipv6-address-no-zone\) events lac](#)

Tree [lac](#)

Notes The following elements are part of a mandatory choice: **all** or (**call-disconnect-notification**, **finite-state-machine**, **lac**, **lms**, and **stop-control-connection-notification**).

Introduced 23.7.R1

Platforms All

## state-recovery *boolean*

Synopsis Enable L2TP LAC state recovery event debugging

Context [debug router string l2tp ip-peer \(ipv4-address-no-zone | ipv6-address-no-zone\) events lac state-recovery boolean](#)

Tree [state-recovery](#)

Default false

Introduced 23.7.R1

Platforms All

## state-recovery-failed *boolean*

Synopsis Enable L2TP LAC state recovery failed event debugging

Context [debug router string l2tp ip-peer \(ipv4-address-no-zone | ipv6-address-no-zone\) events lac state-recovery-failed boolean](#)

Tree [state-recovery-failed](#)

Default false

Introduced 23.7.R1

Platforms All

## lms

Synopsis Enter the **lms** context

Context	<a href="#">debug router string l2tp ip-peer (ipv4-address-no-zone   ipv6-address-no-zone) events</a> <a href="#">lns</a>
Tree	<a href="#">lns</a>
Notes	The following elements are part of a mandatory choice: <b>all</b> or ( <b>call-disconnect-notification</b> , <b>finite-state-machine</b> , <b>lac</b> , <b>lns</b> , and <b>stop-control-connection-notification</b> ).
Introduced	23.7.R1
Platforms	All

## ppp

Synopsis	Enable the <b>ppp</b> context
Context	<a href="#">debug router string l2tp ip-peer (ipv4-address-no-zone   ipv6-address-no-zone) events</a> <a href="#">lns ppp</a>
Tree	<a href="#">ppp</a>
Introduced	23.7.R1
Platforms	All

## terminate-only *boolean*

Synopsis	Debug events for ungracefully terminated sessions only
Context	<a href="#">debug router string l2tp ip-peer (ipv4-address-no-zone   ipv6-address-no-zone) events</a> <a href="#">lns ppp terminate-only boolean</a>
Tree	<a href="#">terminate-only</a>
Default	false
Introduced	23.7.R1
Platforms	All

## stop-control-connection-notification *boolean*

Synopsis	Enable L2TP StopCCN event debugging
Context	<a href="#">debug router string l2tp ip-peer (ipv4-address-no-zone   ipv6-address-no-zone) events</a> <a href="#">stop-control-connection-notification boolean</a>
Tree	<a href="#">stop-control-connection-notification</a>
Default	false

Notes	The following elements are part of a mandatory choice: <b>all</b> or ( <b>call-disconnect-notification</b> , <b>finite-state-machine</b> , <b>lac</b> , <b>Ins</b> , and <b>stop-control-connection-notification</b> ).
Introduced	23.7.R1
Platforms	All

## packets

Synopsis	Enable the <b>packets</b> context
Context	<code>debug router string l2tp ip-peer (ipv4-address-no-zone   ipv6-address-no-zone) packets</code>
Tree	<code>packets</code>
Introduced	23.7.R1
Platforms	All

## all

Synopsis	Enable debugging for all session packets
Context	<code>debug router string l2tp ip-peer (ipv4-address-no-zone   ipv6-address-no-zone) packets all</code>
Tree	<code>all</code>
Notes	The following elements are part of a mandatory choice: <b>all</b> or ( <b>l2tp</b> and <b>Ins</b> ).
Introduced	23.7.R1
Platforms	All

## detail-level *keyword*

Synopsis	Detail level of the L2TP packet debug output
Context	<code>debug router string l2tp ip-peer (ipv4-address-no-zone   ipv6-address-no-zone) packets detail-level keyword</code>
Tree	<code>detail-level</code>
Options	low, high
Default	low
Introduced	23.7.R1
Platforms	All

**direction** *keyword*

Synopsis	Direction of the L2TP packet debugging
Context	<a href="#">debug router</a> <i>string</i> <a href="#">l2tp ip-peer</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <a href="#">packets</a> <a href="#">direction</a> <i>keyword</i>
Tree	<a href="#">direction</a>
Options	ingress, egress, both
Default	both
Introduced	23.7.R1
Platforms	All

**l2tp** *boolean*

Synopsis	Enable L2TP packet debugging
Context	<a href="#">debug router</a> <i>string</i> <a href="#">l2tp ip-peer</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <a href="#">packets</a> <a href="#">l2tp</a> <i>boolean</i>
Tree	<a href="#">l2tp</a>
Default	false
Notes	The following elements are part of a mandatory choice: <b>all</b> or ( <b>l2tp</b> and <b>ins</b> ).
Introduced	23.7.R1
Platforms	All

**ins**

Synopsis	Enter the <b>ins</b> context
Context	<a href="#">debug router</a> <i>string</i> <a href="#">l2tp ip-peer</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <a href="#">packets</a> <a href="#">ins</a>
Tree	<a href="#">ins</a>
Notes	The following elements are part of a mandatory choice: <b>all</b> or ( <b>l2tp</b> and <b>ins</b> ).
Introduced	23.7.R1
Platforms	All

**dhcp-client** *boolean*

Synopsis	Enable DHCP client packet debugging
Context	<a href="#">debug router</a> <i>string</i> <a href="#">l2tp ip-peer</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <a href="#">packets</a> <a href="#">ins</a> <a href="#">dhcp-client</a> <i>boolean</i>

Tree	<a href="#">dhcp-client</a>
Default	false
Introduced	23.7.R1
Platforms	All

## ppp

Synopsis	Enter the <b>ppp</b> context
Context	<a href="#">debug router string l2tp ip-peer (ipv4-address-no-zone   ipv6-address-no-zone) packets</a> <a href="#">Ins ppp</a>
Tree	<a href="#">ppp</a>
Introduced	23.7.R1
Platforms	All

## all

Synopsis	Enable PPP debugging for all PPP session packets
Context	<a href="#">debug router string l2tp ip-peer (ipv4-address-no-zone   ipv6-address-no-zone) packets</a> <a href="#">Ins ppp all</a>
Tree	<a href="#">all</a>
Notes	The following elements are part of a choice: <b>all</b> or ( <b>chap</b> , <b>ipcp</b> , <b>ipv6cp</b> , <b>lcp</b> , <b>other</b> , and <b>pap</b> ).
Introduced	23.7.R1
Platforms	All

## chap *boolean*

Synopsis	Enable PPP debugging for CHAP authentication packets
Context	<a href="#">debug router string l2tp ip-peer (ipv4-address-no-zone   ipv6-address-no-zone) packets</a> <a href="#">Ins ppp chap <i>boolean</i></a>
Tree	<a href="#">chap</a>
Default	false
Notes	The following elements are part of a choice: <b>all</b> or ( <b>chap</b> , <b>ipcp</b> , <b>ipv6cp</b> , <b>lcp</b> , <b>other</b> , and <b>pap</b> ).
Introduced	23.7.R1
Platforms	All

### **ipcp** *boolean*

Synopsis	Enable PPP debugging for IPCP NCP packets
Context	<a href="#">debug router</a> <i>string</i> <a href="#">l2tp ip-peer</a> ( <a href="#">ipv4-address-no-zone</a>   <a href="#">ipv6-address-no-zone</a> ) <a href="#">packets</a> <a href="#">lns ppp ipcp</a> <i>boolean</i>
Tree	<a href="#">ipcp</a>
Default	false
Notes	The following elements are part of a choice: <b>all</b> or ( <b>chap</b> , <b>ipcp</b> , <b>ipv6cp</b> , <b>lcp</b> , <b>other</b> , and <b>pap</b> ).
Introduced	23.7.R1
Platforms	All

### **ipv6cp** *boolean*

Synopsis	Enable PPP debugging for IPv6CP NCP packets
Context	<a href="#">debug router</a> <i>string</i> <a href="#">l2tp ip-peer</a> ( <a href="#">ipv4-address-no-zone</a>   <a href="#">ipv6-address-no-zone</a> ) <a href="#">packets</a> <a href="#">lns ppp ipv6cp</a> <i>boolean</i>
Tree	<a href="#">ipv6cp</a>
Default	false
Notes	The following elements are part of a choice: <b>all</b> or ( <b>chap</b> , <b>ipcp</b> , <b>ipv6cp</b> , <b>lcp</b> , <b>other</b> , and <b>pap</b> ).
Introduced	23.7.R1
Platforms	All

### **lcp** *boolean*

Synopsis	Enable PPP debugging for LCP link establishment packets
Context	<a href="#">debug router</a> <i>string</i> <a href="#">l2tp ip-peer</a> ( <a href="#">ipv4-address-no-zone</a>   <a href="#">ipv6-address-no-zone</a> ) <a href="#">packets</a> <a href="#">lns ppp lcp</a> <i>boolean</i>
Tree	<a href="#">lcp</a>
Default	false
Notes	The following elements are part of a choice: <b>all</b> or ( <b>chap</b> , <b>ipcp</b> , <b>ipv6cp</b> , <b>lcp</b> , <b>other</b> , and <b>pap</b> ).
Introduced	23.7.R1
Platforms	All

**other boolean**

Synopsis	Enable other PPP protocol packet debugging
Context	<a href="#">debug router</a> <i>string</i> <a href="#">l2tp ip-peer</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <a href="#">packets</a> <a href="#">Ins</a> <a href="#">ppp other</a> <i>boolean</i>
Tree	<a href="#">other</a>
Default	false
Notes	The following elements are part of a choice: <b>all</b> or ( <b>chap</b> , <b>ipcp</b> , <b>ipv6cp</b> , <b>lcp</b> , <b>other</b> , and <b>pap</b> ).
Introduced	23.7.R1
Platforms	All

**pap boolean**

Synopsis	Enable PPP debugging for PAP authentication packets
Context	<a href="#">debug router</a> <i>string</i> <a href="#">l2tp ip-peer</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <a href="#">packets</a> <a href="#">Ins</a> <a href="#">ppp pap</a> <i>boolean</i>
Tree	<a href="#">pap</a>
Default	false
Notes	The following elements are part of a choice: <b>all</b> or ( <b>chap</b> , <b>ipcp</b> , <b>ipv6cp</b> , <b>lcp</b> , <b>other</b> , and <b>pap</b> ).
Introduced	23.7.R1
Platforms	All

**packets**

Synopsis	Enable the <b>packets</b> context
Context	<a href="#">debug router</a> <i>string</i> <a href="#">l2tp</a> <a href="#">packets</a>
Tree	<a href="#">packets</a>
Introduced	23.7.R1
Platforms	All

**all**

Synopsis	Enable debugging for all session packets
Context	<a href="#">debug router</a> <i>string</i> <a href="#">l2tp</a> <a href="#">packets</a> <a href="#">all</a>
Tree	<a href="#">all</a>

---

Notes	The following elements are part of a mandatory choice: <b>all</b> or ( <b>l2tp</b> and <b>lns</b> ).
Introduced	23.7.R1
Platforms	All

### **detail-level** *keyword*

Synopsis	Detail level of the L2TP packet debug output
Context	<a href="#">debug router</a> <i>string l2tp packets detail-level keyword</i>
Tree	<a href="#">detail-level</a>
Options	low, high
Default	low
Introduced	23.7.R1
Platforms	All

### **direction** *keyword*

Synopsis	Direction of the L2TP packet debugging
Context	<a href="#">debug router</a> <i>string l2tp packets direction keyword</i>
Tree	<a href="#">direction</a>
Options	ingress, egress, both
Default	both
Introduced	23.7.R1
Platforms	All

### **l2tp** *boolean*

Synopsis	Enable L2TP packet debugging
Context	<a href="#">debug router</a> <i>string l2tp packets l2tp boolean</i>
Tree	<a href="#">l2tp</a>
Default	false
Notes	The following elements are part of a mandatory choice: <b>all</b> or ( <b>l2tp</b> and <b>lns</b> ).
Introduced	23.7.R1
Platforms	All

## Ins

Synopsis	Enter the <b>Ins</b> context
Context	<a href="#">debug router string l2tp packets Ins</a>
Tree	<a href="#">Ins</a>
Notes	The following elements are part of a mandatory choice: <b>all</b> or ( <b>l2tp</b> and <b>Ins</b> ).
Introduced	23.7.R1
Platforms	All

## dhcp-client *boolean*

Synopsis	Enable DHCP client packet debugging
Context	<a href="#">debug router string l2tp packets Ins dhcp-client boolean</a>
Tree	<a href="#">dhcp-client</a>
Default	false
Introduced	23.7.R1
Platforms	All

## ppp

Synopsis	Enter the <b>ppp</b> context
Context	<a href="#">debug router string l2tp packets Ins ppp</a>
Tree	<a href="#">ppp</a>
Introduced	23.7.R1
Platforms	All

## all

Synopsis	Enable PPP debugging for all PPP session packets
Context	<a href="#">debug router string l2tp packets Ins ppp all</a>
Tree	<a href="#">all</a>
Notes	The following elements are part of a choice: <b>all</b> or ( <b>chap</b> , <b>ipcp</b> , <b>ipv6cp</b> , <b>lcp</b> , <b>other</b> , and <b>pap</b> ).
Introduced	23.7.R1
Platforms	All

### **chap** *boolean*

Synopsis	Enable PPP debugging for CHAP authentication packets
Context	<a href="#">debug router</a> <i>string</i> <a href="#">l2tp packets</a> <a href="#">ins ppp chap</a> <i>boolean</i>
Tree	<a href="#">chap</a>
Default	false
Notes	The following elements are part of a choice: <b>all</b> or ( <b>chap</b> , <b>ipcp</b> , <b>ipv6cp</b> , <b>lcp</b> , <b>other</b> , and <b>pap</b> ).
Introduced	23.7.R1
Platforms	All

### **ipcp** *boolean*

Synopsis	Enable PPP debugging for IPCP NCP packets
Context	<a href="#">debug router</a> <i>string</i> <a href="#">l2tp packets</a> <a href="#">ins ppp ipcp</a> <i>boolean</i>
Tree	<a href="#">ipcp</a>
Default	false
Notes	The following elements are part of a choice: <b>all</b> or ( <b>chap</b> , <b>ipcp</b> , <b>ipv6cp</b> , <b>lcp</b> , <b>other</b> , and <b>pap</b> ).
Introduced	23.7.R1
Platforms	All

### **ipv6cp** *boolean*

Synopsis	Enable PPP debugging for IPv6CP NCP packets
Context	<a href="#">debug router</a> <i>string</i> <a href="#">l2tp packets</a> <a href="#">ins ppp ipv6cp</a> <i>boolean</i>
Tree	<a href="#">ipv6cp</a>
Default	false
Notes	The following elements are part of a choice: <b>all</b> or ( <b>chap</b> , <b>ipcp</b> , <b>ipv6cp</b> , <b>lcp</b> , <b>other</b> , and <b>pap</b> ).
Introduced	23.7.R1
Platforms	All

### **lcp** *boolean*

Synopsis	Enable PPP debugging for LCP link establishment packets
----------	---

Context	<code>debug router string l2tp packets lns ppp lcp boolean</code>
Tree	<code>lcp</code>
Default	false
Notes	The following elements are part of a choice: <b>all</b> or ( <b>chap</b> , <b>ipcp</b> , <b>ipv6cp</b> , <b>lcp</b> , <b>other</b> , and <b>pap</b> ).
Introduced	23.7.R1
Platforms	All

### **other** *boolean*

Synopsis	Enable other PPP protocol packet debugging
Context	<code>debug router string l2tp packets lns ppp other boolean</code>
Tree	<code>other</code>
Default	false
Notes	The following elements are part of a choice: <b>all</b> or ( <b>chap</b> , <b>ipcp</b> , <b>ipv6cp</b> , <b>lcp</b> , <b>other</b> , and <b>pap</b> ).
Introduced	23.7.R1
Platforms	All

### **pap** *boolean*

Synopsis	Enable PPP debugging for PAP authentication packets
Context	<code>debug router string l2tp packets lns ppp pap boolean</code>
Tree	<code>pap</code>
Default	false
Notes	The following elements are part of a choice: <b>all</b> or ( <b>chap</b> , <b>ipcp</b> , <b>ipv6cp</b> , <b>lcp</b> , <b>other</b> , and <b>pap</b> ).
Introduced	23.7.R1
Platforms	All

### **tunnel** [`connection-id`] *number*

Synopsis	Enter the <b>tunnel</b> list instance
Context	<code>debug router string l2tp tunnel number</code>
Tree	<code>tunnel</code>

Max. Instances	8
Introduced	23.7.R1
Platforms	All

### [**connection-id**] *number*

Synopsis	Local control connection ID of the L2TP tunnel to debug
Context	<a href="#">debug router</a> <i>string l2tp tunnel number</i>
Tree	<a href="#">tunnel</a>
Max. Range	0 to 4294967295
Notes	This element is part of a list key.
Introduced	23.7.R1
Platforms	All

### **events**

Synopsis	Enable the <b>events</b> context
Context	<a href="#">debug router</a> <i>string l2tp tunnel number events</i>
Tree	<a href="#">events</a>
Introduced	23.7.R1
Platforms	All

### **all**

Synopsis	Enable debugging for all events
Context	<a href="#">debug router</a> <i>string l2tp tunnel number events all</i>
Tree	<a href="#">all</a>
Notes	The following elements are part of a mandatory choice: <b>all</b> or ( <b>call-disconnect-notification</b> , <b>finite-state-machine</b> , <b>lac</b> , <b>lns</b> , and <b>stop-control-connection-notification</b> ).
Introduced	23.7.R1
Platforms	All

### **call-disconnect-notification** *boolean*

Synopsis	Enable L2TP CDN event debugging
Context	<a href="#">debug router</a> <i>string</i> <a href="#">l2tp tunnel</a> <i>number</i> <a href="#">events call-disconnect-notification</a> <i>boolean</i>
Tree	<a href="#">call-disconnect-notification</a>
Default	false
Notes	The following elements are part of a mandatory choice: <b>all</b> or ( <b>call-disconnect-notification</b> , <b>finite-state-machine</b> , <b>lac</b> , <b>lns</b> , and <b>stop-control-connection-notification</b> ).
Introduced	23.7.R1
Platforms	All

### **finite-state-machine** *boolean*

Synopsis	Enable L2TP FSM event debugging
Context	<a href="#">debug router</a> <i>string</i> <a href="#">l2tp tunnel</a> <i>number</i> <a href="#">events finite-state-machine</a> <i>boolean</i>
Tree	<a href="#">finite-state-machine</a>
Default	false
Notes	The following elements are part of a mandatory choice: <b>all</b> or ( <b>call-disconnect-notification</b> , <b>finite-state-machine</b> , <b>lac</b> , <b>lns</b> , and <b>stop-control-connection-notification</b> ).
Introduced	23.7.R1
Platforms	All

### **lac**

Synopsis	Enter the <b>lac</b> context
Context	<a href="#">debug router</a> <i>string</i> <a href="#">l2tp tunnel</a> <i>number</i> <a href="#">events lac</a>
Tree	<a href="#">lac</a>
Notes	The following elements are part of a mandatory choice: <b>all</b> or ( <b>call-disconnect-notification</b> , <b>finite-state-machine</b> , <b>lac</b> , <b>lns</b> , and <b>stop-control-connection-notification</b> ).
Introduced	23.7.R1
Platforms	All

**state-recovery *boolean***

Synopsis	Enable L2TP LAC state recovery event debugging
Context	<a href="#">debug router</a> <i>string</i> <a href="#">l2tp tunnel</a> <i>number</i> <a href="#">events lac state-recovery</a> <i>boolean</i>
Tree	<a href="#">state-recovery</a>
Default	false
Introduced	23.7.R1
Platforms	All

**state-recovery-failed *boolean***

Synopsis	Enable L2TP LAC state recovery failed event debugging
Context	<a href="#">debug router</a> <i>string</i> <a href="#">l2tp tunnel</a> <i>number</i> <a href="#">events lac state-recovery-failed</a> <i>boolean</i>
Tree	<a href="#">state-recovery-failed</a>
Default	false
Introduced	23.7.R1
Platforms	All

**Ins**

Synopsis	Enter the <b>Ins</b> context
Context	<a href="#">debug router</a> <i>string</i> <a href="#">l2tp tunnel</a> <i>number</i> <a href="#">events Ins</a>
Tree	<a href="#">Ins</a>
Notes	The following elements are part of a mandatory choice: <b>all</b> or ( <b>call-disconnect-notification</b> , <b>finite-state-machine</b> , <b>lac</b> , <b>Ins</b> , and <b>stop-control-connection-notification</b> ).
Introduced	23.7.R1
Platforms	All

**ppp**

Synopsis	Enable the <b>ppp</b> context
Context	<a href="#">debug router</a> <i>string</i> <a href="#">l2tp tunnel</a> <i>number</i> <a href="#">events Ins ppp</a>
Tree	<a href="#">ppp</a>
Introduced	23.7.R1
Platforms	All

**terminate-only** *boolean*

Synopsis	Debug events for ungracefully terminated sessions only
Context	<a href="#">debug router</a> <i>string</i> <a href="#">l2tp tunnel</a> <i>number</i> <a href="#">events</a> <a href="#">lns</a> <a href="#">ppp</a> <b>terminate-only</b> <i>boolean</i>
Tree	<a href="#">terminate-only</a>
Default	false
Introduced	23.7.R1
Platforms	All

**stop-control-connection-notification** *boolean*

Synopsis	Enable L2TP StopCCN event debugging
Context	<a href="#">debug router</a> <i>string</i> <a href="#">l2tp tunnel</a> <i>number</i> <a href="#">events</a> <a href="#">stop-control-connection-notification</a> <i>boolean</i>
Tree	<a href="#">stop-control-connection-notification</a>
Default	false
Notes	The following elements are part of a mandatory choice: <b>all</b> or ( <b>call-disconnect-notification</b> , <b>finite-state-machine</b> , <b>lac</b> , <b>lns</b> , and <b>stop-control-connection-notification</b> ).
Introduced	23.7.R1
Platforms	All

**packets**

Synopsis	Enable the <b>packets</b> context
Context	<a href="#">debug router</a> <i>string</i> <a href="#">l2tp tunnel</a> <i>number</i> <b>packets</b>
Tree	<a href="#">packets</a>
Introduced	23.7.R1
Platforms	All

**all**

Synopsis	Enable debugging for all session packets
Context	<a href="#">debug router</a> <i>string</i> <a href="#">l2tp tunnel</a> <i>number</i> <a href="#">packets</a> <b>all</b>
Tree	<a href="#">all</a>
Notes	The following elements are part of a mandatory choice: <b>all</b> or ( <b>l2tp</b> and <b>lns</b> ).

---

Introduced	23.7.R1
Platforms	All

### **detail-level** *keyword*

Synopsis	Detail level of the L2TP packet debug output
Context	<a href="#">debug router</a> <i>string</i> <a href="#">l2tp tunnel</a> <i>number</i> <a href="#">packets</a> <a href="#">detail-level</a> <i>keyword</i>
Tree	<a href="#">detail-level</a>
Options	low, high
Default	low
Introduced	23.7.R1
Platforms	All

### **direction** *keyword*

Synopsis	Direction of the L2TP packet debugging
Context	<a href="#">debug router</a> <i>string</i> <a href="#">l2tp tunnel</a> <i>number</i> <a href="#">packets</a> <a href="#">direction</a> <i>keyword</i>
Tree	<a href="#">direction</a>
Options	ingress, egress, both
Default	both
Introduced	23.7.R1
Platforms	All

### **l2tp** *boolean*

Synopsis	Enable L2TP packet debugging
Context	<a href="#">debug router</a> <i>string</i> <a href="#">l2tp tunnel</a> <i>number</i> <a href="#">packets</a> <a href="#">l2tp</a> <i>boolean</i>
Tree	<a href="#">l2tp</a>
Default	false
Notes	The following elements are part of a mandatory choice: <b>all</b> or ( <b>l2tp</b> and <b>ins</b> ).
Introduced	23.7.R1
Platforms	All

## Ins

Synopsis	Enter the <b>Ins</b> context
Context	<a href="#">debug router string l2tp tunnel number packets Ins</a>
Tree	<a href="#">Ins</a>
Notes	The following elements are part of a mandatory choice: <b>all</b> or ( <b>l2tp</b> and <b>Ins</b> ).
Introduced	23.7.R1
Platforms	All

## dhcp-client *boolean*

Synopsis	Enable DHCP client packet debugging
Context	<a href="#">debug router string l2tp tunnel number packets Ins dhcp-client boolean</a>
Tree	<a href="#">dhcp-client</a>
Default	false
Introduced	23.7.R1
Platforms	All

## ppp

Synopsis	Enter the <b>ppp</b> context
Context	<a href="#">debug router string l2tp tunnel number packets Ins ppp</a>
Tree	<a href="#">ppp</a>
Introduced	23.7.R1
Platforms	All

## all

Synopsis	Enable PPP debugging for all PPP session packets
Context	<a href="#">debug router string l2tp tunnel number packets Ins ppp all</a>
Tree	<a href="#">all</a>
Notes	The following elements are part of a choice: <b>all</b> or ( <b>chap</b> , <b>ipcp</b> , <b>ipv6cp</b> , <b>lcp</b> , <b>other</b> , and <b>pap</b> ).
Introduced	23.7.R1
Platforms	All

### **chap** *boolean*

Synopsis	Enable PPP debugging for CHAP authentication packets
Context	<a href="#">debug router</a> <i>string l2tp tunnel number packets lns ppp chap boolean</i>
Tree	<a href="#">chap</a>
Default	false
Notes	The following elements are part of a choice: <b>all</b> or ( <b>chap</b> , <b>ipcp</b> , <b>ipv6cp</b> , <b>lcp</b> , <b>other</b> , and <b>pap</b> ).
Introduced	23.7.R1
Platforms	All

### **ipcp** *boolean*

Synopsis	Enable PPP debugging for IPCP NCP packets
Context	<a href="#">debug router</a> <i>string l2tp tunnel number packets lns ppp ipcp boolean</i>
Tree	<a href="#">ipcp</a>
Default	false
Notes	The following elements are part of a choice: <b>all</b> or ( <b>chap</b> , <b>ipcp</b> , <b>ipv6cp</b> , <b>lcp</b> , <b>other</b> , and <b>pap</b> ).
Introduced	23.7.R1
Platforms	All

### **ipv6cp** *boolean*

Synopsis	Enable PPP debugging for IPv6CP NCP packets
Context	<a href="#">debug router</a> <i>string l2tp tunnel number packets lns ppp ipv6cp boolean</i>
Tree	<a href="#">ipv6cp</a>
Default	false
Notes	The following elements are part of a choice: <b>all</b> or ( <b>chap</b> , <b>ipcp</b> , <b>ipv6cp</b> , <b>lcp</b> , <b>other</b> , and <b>pap</b> ).
Introduced	23.7.R1
Platforms	All

### **lcp** *boolean*

Synopsis	Enable PPP debugging for LCP link establishment packets
----------	---

Context	<a href="#">debug router</a> <i>string l2tp tunnel number packets</i> <a href="#">lcp</a> <i>boolean</i>
Tree	<a href="#">lcp</a>
Default	false
Notes	The following elements are part of a choice: <b>all</b> or ( <b>chap</b> , <b>ipcp</b> , <b>ipv6cp</b> , <b>lcp</b> , <b>other</b> , and <b>pap</b> ).
Introduced	23.7.R1
Platforms	All

### **other** *boolean*

Synopsis	Enable other PPP protocol packet debugging
Context	<a href="#">debug router</a> <i>string l2tp tunnel number packets</i> <a href="#">lcp</a> <i>boolean</i>
Tree	<a href="#">other</a>
Default	false
Notes	The following elements are part of a choice: <b>all</b> or ( <b>chap</b> , <b>ipcp</b> , <b>ipv6cp</b> , <b>lcp</b> , <b>other</b> , and <b>pap</b> ).
Introduced	23.7.R1
Platforms	All

### **pap** *boolean*

Synopsis	Enable PPP debugging for PAP authentication packets
Context	<a href="#">debug router</a> <i>string l2tp tunnel number packets</i> <a href="#">lcp</a> <i>boolean</i>
Tree	<a href="#">pap</a>
Default	false
Notes	The following elements are part of a choice: <b>all</b> or ( <b>chap</b> , <b>ipcp</b> , <b>ipv6cp</b> , <b>lcp</b> , <b>other</b> , and <b>pap</b> ).
Introduced	23.7.R1
Platforms	All

### **udp-peer** [[ip-address](#)] (*ipv4-address-no-zone* | *ipv6-address-no-zone*) [udp-port](#) *number*

Synopsis	Enter the <b>udp-peer</b> list instance
Context	<a href="#">debug router</a> <i>string l2tp udp-peer (ipv4-address-no-zone   ipv6-address-no-zone) udp-port number</i>
Tree	<a href="#">udp-peer</a>

Max. Instances	8
Introduced	23.7.R1
Platforms	All

### [**ip-address**] (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	IP address of the L2TP peer to debug
Context	<a href="#">debug router string l2tp udp-peer</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <a href="#">udp-port number</a>
Tree	<a href="#">udp-peer</a>
Notes	This element is part of a list key.
Introduced	23.7.R1
Platforms	All

### **udp-port number**

Synopsis	UDP port of the L2TP peer to debug
Context	<a href="#">debug router string l2tp udp-peer</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <a href="#">udp-port number</a>
Tree	<a href="#">udp-peer</a>
Range	0 to 65535
Notes	This element is part of a list key.
Introduced	23.7.R1
Platforms	All

### **events**

Synopsis	Enable the <b>events</b> context
Context	<a href="#">debug router string l2tp udp-peer</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <a href="#">udp-port number events</a>
Tree	<a href="#">events</a>
Introduced	23.7.R1
Platforms	All

**all**

Synopsis	Enable debugging for all events
Context	<a href="#">debug router string l2tp udp-peer (ipv4-address-no-zone   ipv6-address-no-zone) udp-port number events all</a>
Tree	<a href="#">all</a>
Notes	The following elements are part of a mandatory choice: <b>all</b> or ( <b>call-disconnect-notification</b> , <b>finite-state-machine</b> , <b>lac</b> , <b>lns</b> , and <b>stop-control-connection-notification</b> ).
Introduced	23.7.R1
Platforms	All

**call-disconnect-notification** *boolean*

Synopsis	Enable L2TP CDN event debugging
Context	<a href="#">debug router string l2tp udp-peer (ipv4-address-no-zone   ipv6-address-no-zone) udp-port number events call-disconnect-notification boolean</a>
Tree	<a href="#">call-disconnect-notification</a>
Default	false
Notes	The following elements are part of a mandatory choice: <b>all</b> or ( <b>call-disconnect-notification</b> , <b>finite-state-machine</b> , <b>lac</b> , <b>lns</b> , and <b>stop-control-connection-notification</b> ).
Introduced	23.7.R1
Platforms	All

**finite-state-machine** *boolean*

Synopsis	Enable L2TP FSM event debugging
Context	<a href="#">debug router string l2tp udp-peer (ipv4-address-no-zone   ipv6-address-no-zone) udp-port number events finite-state-machine boolean</a>
Tree	<a href="#">finite-state-machine</a>
Default	false
Notes	The following elements are part of a mandatory choice: <b>all</b> or ( <b>call-disconnect-notification</b> , <b>finite-state-machine</b> , <b>lac</b> , <b>lns</b> , and <b>stop-control-connection-notification</b> ).
Introduced	23.7.R1
Platforms	All

## lac

Synopsis	Enter the <b>lac</b> context
Context	<a href="#">debug router string l2tp udp-peer (ipv4-address-no-zone   ipv6-address-no-zone) udp-port number events lac</a>
Tree	<a href="#">lac</a>
Notes	The following elements are part of a mandatory choice: <b>all</b> or ( <b>call-disconnect-notification</b> , <b>finite-state-machine</b> , <b>lac</b> , <b>lns</b> , and <b>stop-control-connection-notification</b> ).
Introduced	23.7.R1
Platforms	All

## state-recovery *boolean*

Synopsis	Enable L2TP LAC state recovery event debugging
Context	<a href="#">debug router string l2tp udp-peer (ipv4-address-no-zone   ipv6-address-no-zone) udp-port number events lac state-recovery boolean</a>
Tree	<a href="#">state-recovery</a>
Default	false
Introduced	23.7.R1
Platforms	All

## state-recovery-failed *boolean*

Synopsis	Enable L2TP LAC state recovery failed event debugging
Context	<a href="#">debug router string l2tp udp-peer (ipv4-address-no-zone   ipv6-address-no-zone) udp-port number events lac state-recovery-failed boolean</a>
Tree	<a href="#">state-recovery-failed</a>
Default	false
Introduced	23.7.R1
Platforms	All

## lns

Synopsis	Enter the <b>lns</b> context
Context	<a href="#">debug router string l2tp udp-peer (ipv4-address-no-zone   ipv6-address-no-zone) udp-port number events lns</a>
Tree	<a href="#">lns</a>

Notes	The following elements are part of a mandatory choice: <b>all</b> or ( <b>call-disconnect-notification</b> , <b>finite-state-machine</b> , <b>lac</b> , <b>Ins</b> , and <b>stop-control-connection-notification</b> ).
Introduced	23.7.R1
Platforms	All

## ppp

Synopsis	Enable the <b>ppp</b> context
Context	<a href="#">debug router string l2tp udp-peer (ipv4-address-no-zone   ipv6-address-no-zone) udp-port number events Ins ppp</a>
Tree	<a href="#">ppp</a>
Introduced	23.7.R1
Platforms	All

## terminate-only *boolean*

Synopsis	Debug events for ungracefully terminated sessions only
Context	<a href="#">debug router string l2tp udp-peer (ipv4-address-no-zone   ipv6-address-no-zone) udp-port number events Ins ppp terminate-only boolean</a>
Tree	<a href="#">terminate-only</a>
Default	false
Introduced	23.7.R1
Platforms	All

## stop-control-connection-notification *boolean*

Synopsis	Enable L2TP StopCCN event debugging
Context	<a href="#">debug router string l2tp udp-peer (ipv4-address-no-zone   ipv6-address-no-zone) udp-port number events stop-control-connection-notification boolean</a>
Tree	<a href="#">stop-control-connection-notification</a>
Default	false
Notes	The following elements are part of a mandatory choice: <b>all</b> or ( <b>call-disconnect-notification</b> , <b>finite-state-machine</b> , <b>lac</b> , <b>Ins</b> , and <b>stop-control-connection-notification</b> ).
Introduced	23.7.R1
Platforms	All

## packets

Synopsis	Enable the <b>packets</b> context
Context	<code>debug router string l2tp udp-peer (ipv4-address-no-zone   ipv6-address-no-zone) udp-port number packets</code>
Tree	<code>packets</code>
Introduced	23.7.R1
Platforms	All

## all

Synopsis	Enable debugging for all session packets
Context	<code>debug router string l2tp udp-peer (ipv4-address-no-zone   ipv6-address-no-zone) udp-port number packets all</code>
Tree	<code>all</code>
Notes	The following elements are part of a mandatory choice: <b>all</b> or ( <b>l2tp</b> and <b>Ins</b> ).
Introduced	23.7.R1
Platforms	All

## detail-level *keyword*

Synopsis	Detail level of the L2TP packet debug output
Context	<code>debug router string l2tp udp-peer (ipv4-address-no-zone   ipv6-address-no-zone) udp-port number packets detail-level keyword</code>
Tree	<code>detail-level</code>
Options	low, high
Default	low
Introduced	23.7.R1
Platforms	All

## direction *keyword*

Synopsis	Direction of the L2TP packet debugging
Context	<code>debug router string l2tp udp-peer (ipv4-address-no-zone   ipv6-address-no-zone) udp-port number packets direction keyword</code>
Tree	<code>direction</code>

Options	ingress, egress, both
Default	both
Introduced	23.7.R1
Platforms	All

### **I2tp** *boolean*

Synopsis	Enable L2TP packet debugging
Context	<a href="#">debug router</a> <i>string</i> <a href="#">I2tp</a> <a href="#">udp-peer</a> ( <a href="#">ipv4-address-no-zone</a>   <a href="#">ipv6-address-no-zone</a> ) <a href="#">udp-port</a> <i>number</i> <a href="#">packets</a> <a href="#">I2tp</a> <i>boolean</i>
Tree	<a href="#">I2tp</a>
Default	false
Notes	The following elements are part of a mandatory choice: <b>all</b> or ( <b>I2tp</b> and <b>Ins</b> ).
Introduced	23.7.R1
Platforms	All

### **Ins**

Synopsis	Enter the <b>Ins</b> context
Context	<a href="#">debug router</a> <i>string</i> <a href="#">I2tp</a> <a href="#">udp-peer</a> ( <a href="#">ipv4-address-no-zone</a>   <a href="#">ipv6-address-no-zone</a> ) <a href="#">udp-port</a> <i>number</i> <a href="#">packets</a> <a href="#">Ins</a>
Tree	<a href="#">Ins</a>
Notes	The following elements are part of a mandatory choice: <b>all</b> or ( <b>I2tp</b> and <b>Ins</b> ).
Introduced	23.7.R1
Platforms	All

### **dhcp-client** *boolean*

Synopsis	Enable DHCP client packet debugging
Context	<a href="#">debug router</a> <i>string</i> <a href="#">I2tp</a> <a href="#">udp-peer</a> ( <a href="#">ipv4-address-no-zone</a>   <a href="#">ipv6-address-no-zone</a> ) <a href="#">udp-port</a> <i>number</i> <a href="#">packets</a> <a href="#">Ins</a> <a href="#">dhcp-client</a> <i>boolean</i>
Tree	<a href="#">dhcp-client</a>
Default	false
Introduced	23.7.R1
Platforms	All

## ppp

Synopsis	Enter the <b>ppp</b> context
Context	<code>debug router string l2tp udp-peer (ipv4-address-no-zone   ipv6-address-no-zone) udp-port number packets</code> Ins <b>ppp</b>
Tree	<b>ppp</b>
Introduced	23.7.R1
Platforms	All

## all

Synopsis	Enable PPP debugging for all PPP session packets
Context	<code>debug router string l2tp udp-peer (ipv4-address-no-zone   ipv6-address-no-zone) udp-port number packets</code> Ins <b>ppp all</b>
Tree	<b>all</b>
Notes	The following elements are part of a choice: <b>all</b> or ( <b>chap</b> , <b>ipcp</b> , <b>ipv6cp</b> , <b>lcp</b> , <b>other</b> , and <b>pap</b> ).
Introduced	23.7.R1
Platforms	All

## chap *boolean*

Synopsis	Enable PPP debugging for CHAP authentication packets
Context	<code>debug router string l2tp udp-peer (ipv4-address-no-zone   ipv6-address-no-zone) udp-port number packets</code> Ins <b>ppp chap boolean</b>
Tree	<b>chap</b>
Default	false
Notes	The following elements are part of a choice: <b>all</b> or ( <b>chap</b> , <b>ipcp</b> , <b>ipv6cp</b> , <b>lcp</b> , <b>other</b> , and <b>pap</b> ).
Introduced	23.7.R1
Platforms	All

## ipcp *boolean*

Synopsis	Enable PPP debugging for IPCP NCP packets
Context	<code>debug router string l2tp udp-peer (ipv4-address-no-zone   ipv6-address-no-zone) udp-port number packets</code> Ins <b>ppp ipcp boolean</b>

Tree	<a href="#">ipcp</a>
Default	false
Notes	The following elements are part of a choice: <b>all</b> or ( <b>chap</b> , <b>ipcp</b> , <b>ipv6cp</b> , <b>lcp</b> , <b>other</b> , and <b>pap</b> ).
Introduced	23.7.R1
Platforms	All

### **ipv6cp** *boolean*

Synopsis	Enable PPP debugging for IPv6CP NCP packets
Context	<a href="#">debug router</a> <i>string</i> <a href="#">l2tp</a> <a href="#">udp-peer</a> ( <a href="#">ipv4-address-no-zone</a>   <a href="#">ipv6-address-no-zone</a> ) <a href="#">udp-port</a> <i>number</i> <a href="#">packets</a> <a href="#">ins</a> <a href="#">ppp</a> <b>ipv6cp</b> <i>boolean</i>
Tree	<a href="#">ipv6cp</a>
Default	false
Notes	The following elements are part of a choice: <b>all</b> or ( <b>chap</b> , <b>ipcp</b> , <b>ipv6cp</b> , <b>lcp</b> , <b>other</b> , and <b>pap</b> ).
Introduced	23.7.R1
Platforms	All

### **lcp** *boolean*

Synopsis	Enable PPP debugging for LCP link establishment packets
Context	<a href="#">debug router</a> <i>string</i> <a href="#">l2tp</a> <a href="#">udp-peer</a> ( <a href="#">ipv4-address-no-zone</a>   <a href="#">ipv6-address-no-zone</a> ) <a href="#">udp-port</a> <i>number</i> <a href="#">packets</a> <a href="#">ins</a> <a href="#">ppp</a> <b>lcp</b> <i>boolean</i>
Tree	<a href="#">lcp</a>
Default	false
Notes	The following elements are part of a choice: <b>all</b> or ( <b>chap</b> , <b>ipcp</b> , <b>ipv6cp</b> , <b>lcp</b> , <b>other</b> , and <b>pap</b> ).
Introduced	23.7.R1
Platforms	All

### **other** *boolean*

Synopsis	Enable other PPP protocol packet debugging
Context	<a href="#">debug router</a> <i>string</i> <a href="#">l2tp</a> <a href="#">udp-peer</a> ( <a href="#">ipv4-address-no-zone</a>   <a href="#">ipv6-address-no-zone</a> ) <a href="#">udp-port</a> <i>number</i> <a href="#">packets</a> <a href="#">ins</a> <a href="#">ppp</a> <b>other</b> <i>boolean</i>
Tree	<a href="#">other</a>

Default	false
Notes	The following elements are part of a choice: <b>all</b> or ( <b>chap</b> , <b>ipcp</b> , <b>ipv6cp</b> , <b>lcp</b> , <b>other</b> , and <b>pap</b> ).
Introduced	23.7.R1
Platforms	All

### **pap** *boolean*

Synopsis	Enable PPP debugging for PAP authentication packets
Context	<a href="#">debug router</a> <i>string</i> <a href="#">l2tp udp-peer</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <a href="#">udp-port number</a> <a href="#">packets</a> <a href="#">lns ppp pap</a> <i>boolean</i>
Tree	<a href="#">pap</a>
Default	false
Notes	The following elements are part of a choice: <b>all</b> or ( <b>chap</b> , <b>ipcp</b> , <b>ipv6cp</b> , <b>lcp</b> , <b>other</b> , and <b>pap</b> ).
Introduced	23.7.R1
Platforms	All

### **ldp**

Synopsis	Enter the <b>ldp</b> context
Context	<a href="#">debug router</a> <i>string</i> <a href="#">ldp</a>
Tree	<a href="#">ldp</a>
Introduced	23.3.R1
Platforms	All

### **interface** [[interface-name](#)] *string*

Synopsis	Enter the <b>interface</b> list instance
Context	<a href="#">debug router</a> <i>string</i> <a href="#">ldp interface</a> <i>string</i>
Tree	<a href="#">interface</a>
Introduced	23.3.R1
Platforms	All

**[interface-name] string**

Synopsis	Interface name
Context	<a href="#">debug router string ldp interface string</a>
Tree	<a href="#">interface</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	23.3.R1
Platforms	All

**ipv4**

Synopsis	Enable the <b>ipv4</b> context
Context	<a href="#">debug router string ldp interface string ipv4</a>
Tree	<a href="#">ipv4</a>
Introduced	23.3.R1
Platforms	All

**event**

Synopsis	Enter the <b>event</b> context
Context	<a href="#">debug router string ldp interface string ipv4 event</a>
Tree	<a href="#">event</a>
Introduced	23.3.R1
Platforms	All

**messages**

Synopsis	Enable the <b>messages</b> context
Context	<a href="#">debug router string ldp interface string ipv4 event messages</a>
Tree	<a href="#">messages</a>
Introduced	23.3.R1
Platforms	All

## packet

Synopsis	Enter the <b>packet</b> context
Context	<a href="#">debug router string ldp interface string ipv4 packet</a>
Tree	<a href="#">packet</a>
Introduced	23.3.R1
Platforms	All

## hello

Synopsis	Enable the <b>hello</b> context
Context	<a href="#">debug router string ldp interface string ipv4 packet hello</a>
Tree	<a href="#">hello</a>
Introduced	23.3.R1
Platforms	All

## detail *boolean*

Synopsis	Display detailed information
Context	<a href="#">debug router string ldp interface string ipv4 packet hello detail boolean</a>
Tree	<a href="#">detail</a>
Default	false
Introduced	23.3.R1
Platforms	All

## ipv6

Synopsis	Enable the <b>ipv6</b> context
Context	<a href="#">debug router string ldp interface string ipv6</a>
Tree	<a href="#">ipv6</a>
Introduced	23.3.R1
Platforms	All

## event

Synopsis	Enter the <b>event</b> context
----------	--------------------------------

---

Context	<code>debug router string ldp interface string ipv6 event</code>
Tree	<code>event</code>
Introduced	23.3.R1
Platforms	All

## messages

Synopsis	Enable the <b>messages</b> context
Context	<code>debug router string ldp interface string ipv6 event messages</code>
Tree	<code>messages</code>
Introduced	23.3.R1
Platforms	All

## packet

Synopsis	Enter the <b>packet</b> context
Context	<code>debug router string ldp interface string ipv6 packet</code>
Tree	<code>packet</code>
Introduced	23.3.R1
Platforms	All

## hello

Synopsis	Enable the <b>hello</b> context
Context	<code>debug router string ldp interface string ipv6 packet hello</code>
Tree	<code>hello</code>
Introduced	23.3.R1
Platforms	All

## detail *boolean*

Synopsis	Display detailed information
Context	<code>debug router string ldp interface string ipv6 packet hello detail boolean</code>
Tree	<code>detail</code>
Default	false

Introduced 23.3.R1  
 Platforms All

### **peer** [[ip-address](#)] (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis Enter the **peer** list instance  
 Context [debug router string ldp peer](#) (*ipv4-address-no-zone* | *ipv6-address-no-zone*)  
 Tree [peer](#)  
 Introduced 23.3.R1  
 Platforms All

### **[ip-address]** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis Peer IP address  
 Context [debug router string ldp peer](#) (*ipv4-address-no-zone* | *ipv6-address-no-zone*)  
 Tree [peer](#)  
 Notes This element is part of a list key.  
 Introduced 23.3.R1  
 Platforms All

### **event**

Synopsis Enter the **event** context  
 Context [debug router string ldp peer](#) (*ipv4-address-no-zone* | *ipv6-address-no-zone*) [event](#)  
 Tree [event](#)  
 Introduced 23.3.R1  
 Platforms All

### **bindings**

Synopsis Enable the **bindings** context  
 Context [debug router string ldp peer](#) (*ipv4-address-no-zone* | *ipv6-address-no-zone*) [event](#) [bindings](#)  
 Tree [bindings](#)  
 Introduced 23.3.R1

Platforms All

## messages

Synopsis Enable the **messages** context

Context [debug router string ldp peer \(ipv4-address-no-zone | ipv6-address-no-zone\) event messages](#)

Tree [messages](#)

Introduced 23.3.R1

Platforms All

## packet

Synopsis Enter the **packet** context

Context [debug router string ldp peer \(ipv4-address-no-zone | ipv6-address-no-zone\) packet](#)

Tree [packet](#)

Introduced 23.3.R1

Platforms All

## hello

Synopsis Enable the **hello** context

Context [debug router string ldp peer \(ipv4-address-no-zone | ipv6-address-no-zone\) packet hello](#)

Tree [hello](#)

Introduced 23.3.R1

Platforms All

## detail *boolean*

Synopsis Display detailed information

Context [debug router string ldp peer \(ipv4-address-no-zone | ipv6-address-no-zone\) packet hello detail \*boolean\*](#)

Tree [detail](#)

Default false

Introduced 23.3.R1

Platforms All

## init

Synopsis	Enable the <b>init</b> context
Context	<a href="#">debug router string ldp peer (ipv4-address-no-zone   ipv6-address-no-zone) packet init</a>
Tree	<a href="#">init</a>
Introduced	23.3.R1
Platforms	All

## detail *boolean*

Synopsis	Display detailed information
Context	<a href="#">debug router string ldp peer (ipv4-address-no-zone   ipv6-address-no-zone) packet init detail boolean</a>
Tree	<a href="#">detail</a>
Default	false
Introduced	23.3.R1
Platforms	All

## keepalive

Synopsis	Enable the <b>keepalive</b> context
Context	<a href="#">debug router string ldp peer (ipv4-address-no-zone   ipv6-address-no-zone) packet keepalive</a>
Tree	<a href="#">keepalive</a>
Introduced	23.3.R1
Platforms	All

## label

Synopsis	Enable the <b>label</b> context
Context	<a href="#">debug router string ldp peer (ipv4-address-no-zone   ipv6-address-no-zone) packet label</a>
Tree	<a href="#">label</a>
Introduced	23.3.R1
Platforms	All

## detail *boolean*

Synopsis	Display detailed information
Context	<a href="#">debug router</a> <i>string</i> <a href="#">ldp peer</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <a href="#">packet label</a> <a href="#">detail</a> <i>boolean</i>
Tree	<a href="#">detail</a>
Default	false
Introduced	23.3.R1
Platforms	All

## mld

Synopsis	Enter the <b>mld</b> context
Context	<a href="#">debug router</a> <i>string</i> <a href="#">mld</a>
Tree	<a href="#">mld</a>
Introduced	22.10.R1
Platforms	All

## group-interface

Synopsis	Enable the <b>group-interface</b> context
Context	<a href="#">debug router</a> <i>string</i> <a href="#">mld</a> <a href="#">group-interface</a>
Tree	<a href="#">group-interface</a>
Introduced	22.10.R1
Platforms	All

## all-group-interfaces

Synopsis	Trace all interfaces
Context	<a href="#">debug router</a> <i>string</i> <a href="#">mld</a> <a href="#">group-interface</a> <a href="#">all-group-interfaces</a>
Tree	<a href="#">all-group-interfaces</a>
Notes	The following elements are part of a mandatory choice: <b>all-group-interfaces</b> or ( <b>forwarding-service</b> and <b>group-interface-name</b> ).
Introduced	22.10.R1
Platforms	All

### forwarding-service *string*

Synopsis	ID of the forwarding service to trace
Context	<code>debug router <i>string</i> mld group-interface forwarding-service <i>string</i></code>
Tree	<code>forwarding-service</code>
String Length	1 to 64
Default	<code>../router-instance</code>
Notes	The following elements are part of a mandatory choice: <b>all-group-interfaces</b> or ( <b>forwarding-service</b> and <b>group-interface-name</b> ).
Introduced	22.10.R1
Platforms	All

### group-interface-name *string*

Synopsis	Interface name
Context	<code>debug router <i>string</i> mld group-interface group-interface-name <i>string</i></code>
Tree	<code>group-interface-name</code>
String Length	1 to 32
Notes	The following elements are part of a mandatory choice: <b>all-group-interfaces</b> or ( <b>forwarding-service</b> and <b>group-interface-name</b> ).
Introduced	22.10.R1
Platforms	All

### host

Synopsis	Enable the <b>host</b> context
Context	<code>debug router <i>string</i> mld host</code>
Tree	<code>host</code>
Introduced	22.10.R1
Platforms	All

### group-interface

Synopsis	Enter the <b>group-interface</b> context
Context	<code>debug router <i>string</i> mld host group-interface</code>
Tree	<code>group-interface</code>

Introduced 22.10.R1  
Platforms All

### **forwarding-service** *string*

Synopsis ID of the forwarding service to trace  
Context [debug router](#) *string* [mld host group-interface forwarding-service](#) *string*  
Tree [forwarding-service](#)  
String Length 1 to 64  
Default [../router-instance](#)  
Introduced 22.10.R1  
Platforms All

### **group-interface-name** *string*

Synopsis Interface name  
Context [debug router](#) *string* [mld host group-interface group-interface-name](#) *string*  
Tree [group-interface-name](#)  
String Length 1 to 32  
Introduced 22.10.R1  
Platforms All

### **ip-address** *string*

Synopsis IP address of the host to trace  
Context [debug router](#) *string* [mld host ip-address](#) *string*  
Tree [ip-address](#)  
Introduced 22.10.R1  
Platforms All

### **interface**

Synopsis Enable the **interface** context  
Context [debug router](#) *string* [mld interface](#)  
Tree [interface](#)

Introduced	22.10.R1
Platforms	All

## all-interfaces

Synopsis	Trace all interfaces
Context	<a href="#">debug router</a> <i>string</i> <a href="#">mld interface all-interfaces</a>
Tree	<a href="#">all-interfaces</a>
Notes	The following elements are part of a mandatory choice: <b>all-interfaces</b> or <b>interface-name</b> .
Introduced	22.10.R1
Platforms	All

## interface-name *string*

Synopsis	Interface name
Context	<a href="#">debug router</a> <i>string</i> <a href="#">mld interface interface-name string</a>
Tree	<a href="#">interface-name</a>
String Length	1 to 32
Notes	The following elements are part of a mandatory choice: <b>all-interfaces</b> or <b>interface-name</b> .
Introduced	22.10.R1
Platforms	All

## mcs

Synopsis	Enable the <b>mcs</b> context
Context	<a href="#">debug router</a> <i>string</i> <a href="#">mld mcs</a>
Tree	<a href="#">mcs</a>
Introduced	22.10.R1
Platforms	All

## all-interfaces

Synopsis	Trace all interfaces
Context	<a href="#">debug router</a> <i>string</i> <a href="#">mld mcs all-interfaces</a>

---

Tree	<a href="#">all-interfaces</a>
Notes	The following elements are part of a mandatory choice: <b>all-interfaces</b> or <b>interface-name</b> .
Introduced	22.10.R1
Platforms	All

### **interface-name** *string*

Synopsis	Interface name
Context	<a href="#">debug router</a> <i>string</i> <a href="#">mld mcs</a> <a href="#">interface-name</a> <i>string</i>
Tree	<a href="#">interface-name</a>
String Length	1 to 32
Notes	The following elements are part of a mandatory choice: <b>all-interfaces</b> or <b>interface-name</b> .
Introduced	22.10.R1
Platforms	All

### **miscellaneous** *boolean*

Synopsis	Enable the tracing of miscellaneous events
Context	<a href="#">debug router</a> <i>string</i> <a href="#">mld miscellaneous</a> <i>boolean</i>
Tree	<a href="#">miscellaneous</a>
Default	false
Introduced	22.10.R1
Platforms	All

### **packet**

Synopsis	Enable the <b>packet</b> context
Context	<a href="#">debug router</a> <i>string</i> <a href="#">mld packet</a>
Tree	<a href="#">packet</a>
Introduced	22.10.R1
Platforms	All

## all-origins

Synopsis	Allow trace for all origins
Context	<a href="#">debug router</a> <i>string</i> <a href="#">mld packet all-origins</a>
Tree	<a href="#">all-origins</a>
Notes	The following elements are part of a choice: <b>all-origins</b> , <b>group-interface-name</b> , <b>host-ip-address</b> , <b>interface-ip-address</b> , or <b>interface-name</b> .
Introduced	22.10.R1
Platforms	All

## dropped *boolean*

Synopsis	Enable tracing for dropped packets
Context	<a href="#">debug router</a> <i>string</i> <a href="#">mld packet dropped</a> <i>boolean</i>
Tree	<a href="#">dropped</a>
Default	true
Introduced	22.10.R1
Platforms	All

## egress *boolean*

Synopsis	Enable tracing for transmitted packets
Context	<a href="#">debug router</a> <i>string</i> <a href="#">mld packet egress</a> <i>boolean</i>
Tree	<a href="#">egress</a>
Default	true
Introduced	22.10.R1
Platforms	All

## group-interface-name *string*

Synopsis	Interface name
Context	<a href="#">debug router</a> <i>string</i> <a href="#">mld packet group-interface-name</a> <i>string</i>
Tree	<a href="#">group-interface-name</a>
String Length	1 to 32
Notes	The following elements are part of a choice: <b>all-origins</b> , <b>group-interface-name</b> , <b>host-ip-address</b> , <b>interface-ip-address</b> , or <b>interface-name</b> .

Introduced 22.10.R1  
Platforms All

### **host-ip-address** *string*

Synopsis Address of the host to trace  
Context [debug router](#) *string* [mld packet](#) [host-ip-address](#) *string*  
Tree [host-ip-address](#)  
Notes The following elements are part of a choice: **all-origins**, **group-interface-name**, **host-ip-address**, **interface-ip-address**, or **interface-name**.  
Introduced 22.10.R2  
Platforms All

### **ingress** *boolean*

Synopsis Enable tracing for received packets  
Context [debug router](#) *string* [mld packet](#) [ingress](#) *boolean*  
Tree [ingress](#)  
Default true  
Introduced 22.10.R1  
Platforms All

### **interface-ip-address** *string*

Synopsis Source address of the packet to trace  
Context [debug router](#) *string* [mld packet](#) [interface-ip-address](#) *string*  
Tree [interface-ip-address](#)  
Notes The following elements are part of a choice: **all-origins**, **group-interface-name**, **host-ip-address**, **interface-ip-address**, or **interface-name**.  
Introduced 22.10.R2  
Platforms All

### **interface-name** *string*

Synopsis Interface name  
Context [debug router](#) *string* [mld packet](#) [interface-name](#) *string*

Tree	<a href="#">interface-name</a>
String Length	1 to 32
Notes	The following elements are part of a choice: <b>all-origins</b> , <b>group-interface-name</b> , <b>host-ip-address</b> , <b>interface-ip-address</b> , or <b>interface-name</b> .
Introduced	22.10.R1
Platforms	All

### **type** *keyword*

Synopsis	Packet type
Context	<a href="#">debug router</a> <i>string</i> <a href="#">mld packet type</a> <i>keyword</i>
Tree	<a href="#">type</a>
Options	all – All MLD packets query – MLD Query packets v1-report – MLD version 1 Report packets v2-report – MLD version 2 Report packets
Default	all
Introduced	22.10.R1
Platforms	All

### **msdp**

Synopsis	Enter the <b>msdp</b> context
Context	<a href="#">debug router</a> <i>string</i> <a href="#">msdp</a>
Tree	<a href="#">msdp</a>
Description	Commands in this context configure debugging for the Multicast Source Discovery Protocol (MSDP).
Introduced	22.10.R1
Platforms	All

### **packet**

Synopsis	Enable the <b>packet</b> context
Context	<a href="#">debug router</a> <i>string</i> <a href="#">msdp packet</a>
Tree	<a href="#">packet</a>
Introduced	22.10.R1

Platforms All

### all-packet-types

Synopsis Enable MSDP debugging for all packets  
 Context [debug router string msdp packet all-packet-types](#)  
 Tree [all-packet-types](#)  
 Notes The following elements are part of a choice: **all-packet-types** or **packet-types**.  
 Introduced 22.10.R1  
 Platforms All

### packet-types

Synopsis Enter the **packet-types** context  
 Context [debug router string msdp packet packet-types](#)  
 Tree [packet-types](#)  
 Notes The following elements are part of a choice: **all-packet-types** or **packet-types**.  
 Introduced 22.10.R1  
 Platforms All

### keep-alive

Synopsis Enable the **keep-alive** context  
 Context [debug router string msdp packet packet-types keep-alive](#)  
 Tree [keep-alive](#)  
 Introduced 22.10.R1  
 Platforms All

### peer-address (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis Peer address used to trace packets  
 Context [debug router string msdp packet packet-types keep-alive peer-address \(\*ipv4-address-no-zone\* | \*ipv6-address-no-zone\*\)](#)  
 Tree [peer-address](#)  
 Introduced 22.10.R1

Platforms All

### sa-request

Synopsis Enable the **sa-request** context  
Context [debug router string msdp packet packet-types sa-request](#)  
Tree [sa-request](#)  
Introduced 22.10.R1  
Platforms All

### peer-address (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis Peer address used to trace packets  
Context [debug router string msdp packet packet-types sa-request peer-address \(\*ipv4-address-no-zone\* | \*ipv6-address-no-zone\*\)](#)  
Tree [peer-address](#)  
Introduced 22.10.R1  
Platforms All

### sa-response

Synopsis Enable the **sa-response** context  
Context [debug router string msdp packet packet-types sa-response](#)  
Tree [sa-response](#)  
Introduced 22.10.R1  
Platforms All

### peer-address (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis Peer address used to trace packets  
Context [debug router string msdp packet packet-types sa-response peer-address \(\*ipv4-address-no-zone\* | \*ipv6-address-no-zone\*\)](#)  
Tree [peer-address](#)  
Introduced 22.10.R1  
Platforms All

## source-active

Synopsis	Enable the <b>source-active</b> context
Context	<a href="#">debug router string msdp packet packet-types source-active</a>
Tree	<a href="#">source-active</a>
Introduced	22.10.R1
Platforms	All

## peer-address (*ipv4-address-no-zone | ipv6-address-no-zone*)

Synopsis	Peer address used to trace packets
Context	<a href="#">debug router string msdp packet packet-types source-active peer-address (<i>ipv4-address-no-zone   ipv6-address-no-zone</i>)</a>
Tree	<a href="#">peer-address</a>
Introduced	22.10.R1
Platforms	All

## pim

Synopsis	Enable the <b>pim</b> context
Context	<a href="#">debug router string msdp pim</a>
Tree	<a href="#">pim</a>
Description	Commands in this context enable MSDP PIM debugging.
Introduced	22.10.R1
Platforms	All

## group-address *string*

Synopsis	IP multicast group address used to trace events
Context	<a href="#">debug router string msdp pim group-address string</a>
Tree	<a href="#">group-address</a>
Introduced	22.10.R1
Platforms	All

## rtm

Synopsis	Enable the <b>rtm</b> context
Context	<a href="#">debug router string msdp rtm</a>
Tree	<a href="#">rtm</a>
Description	Commands in this context enable MSDP route table manager (RTM) debugging.
Introduced	22.10.R1
Platforms	All

## rp-address *string*

Synopsis	IP multicast RP address used to trace events
Context	<a href="#">debug router string msdp rtm rp-address string</a>
Tree	<a href="#">rp-address</a>
Introduced	22.10.R1
Platforms	All

## sa-db

Synopsis	Enable the <b>sa-db</b> context
Context	<a href="#">debug router string msdp sa-db</a>
Tree	<a href="#">sa-db</a>
Description	Commands in this context enable MSDP source-active database debugging.
Introduced	22.10.R1
Platforms	All

## group-address *string*

Synopsis	IP multicast group address used to trace events
Context	<a href="#">debug router string msdp sa-db group-address string</a>
Tree	<a href="#">group-address</a>
Introduced	22.10.R1
Platforms	All

### **rp-address** *string*

Synopsis	IP multicast RP address used to trace events
Context	<a href="#">debug router</a> <i>string</i> <a href="#">msdp sa-db rp-address</a> <i>string</i>
Tree	<a href="#">rp-address</a>
Introduced	22.10.R1
Platforms	All

### **source-address** *string*

Synopsis	Source address used to trace events
Context	<a href="#">debug router</a> <i>string</i> <a href="#">msdp sa-db source-address</a> <i>string</i>
Tree	<a href="#">source-address</a>
Introduced	22.10.R1
Platforms	All

### **mtrace**

Synopsis	Enter the <b>mtrace</b> context
Context	<a href="#">debug router</a> <i>string</i> <a href="#">mtrace</a>
Tree	<a href="#">mtrace</a>
Introduced	22.10.R1
Platforms	All

### **miscellaneous**

Synopsis	Enable the <b>miscellaneous</b> context
Context	<a href="#">debug router</a> <i>string</i> <a href="#">mtrace miscellaneous</a>
Tree	<a href="#">miscellaneous</a>
Introduced	22.10.R1
Platforms	All

### **packet**

Synopsis	Enable the <b>packet</b> context
Context	<a href="#">debug router</a> <i>string</i> <a href="#">mtrace packet</a>

---

Tree	<a href="#">packet</a>
Introduced	22.10.R1
Platforms	All

### **all-packet-types**

Synopsis	Enable debugging for all packets
Context	<a href="#">debug router string mtrace packet all-packet-types</a>
Tree	<a href="#">all-packet-types</a>
Notes	The following elements are part of a choice: <b>all-packet-types</b> or <b>packet-types</b> .
Introduced	22.10.R1
Platforms	All

### **packet-types**

Synopsis	Enter the <b>packet-types</b> context
Context	<a href="#">debug router string mtrace packet packet-types</a>
Tree	<a href="#">packet-types</a>
Notes	The following elements are part of a choice: <b>all-packet-types</b> or <b>packet-types</b> .
Introduced	22.10.R1
Platforms	All

### **query *boolean***

Synopsis	Debug query packets
Context	<a href="#">debug router string mtrace packet packet-types query boolean</a>
Tree	<a href="#">query</a>
Default	false
Introduced	22.10.R1
Platforms	All

### **request *boolean***

Synopsis	Debug request packets
Context	<a href="#">debug router string mtrace packet packet-types request boolean</a>

---

Tree	<a href="#">request</a>
Default	false
Introduced	22.10.R1
Platforms	All

### **response** *boolean*

Synopsis	Debug response packets
Context	<a href="#">debug router</a> <i>string</i> <a href="#">mtrace</a> <a href="#">packet</a> <a href="#">packet-types</a> <a href="#">response</a> <i>boolean</i>
Tree	<a href="#">response</a>
Default	false
Introduced	22.10.R1
Platforms	All

### **mtrace2**

Synopsis	Enter the <b>mtrace2</b> context
Context	<a href="#">debug router</a> <i>string</i> <a href="#">mtrace2</a>
Tree	<a href="#">mtrace2</a>
Introduced	22.10.R1
Platforms	All

### **miscellaneous**

Synopsis	Enable the <b>miscellaneous</b> context
Context	<a href="#">debug router</a> <i>string</i> <a href="#">mtrace2</a> <a href="#">miscellaneous</a>
Tree	<a href="#">miscellaneous</a>
Introduced	22.10.R1
Platforms	All

### **packet**

Synopsis	Enable the <b>packet</b> context
Context	<a href="#">debug router</a> <i>string</i> <a href="#">mtrace2</a> <a href="#">packet</a>
Tree	<a href="#">packet</a>

Introduced	22.10.R1
Platforms	All

## **all-packet-types**

Synopsis	Enable debugging for all packets
Context	<a href="#">debug router</a> <i>string</i> <a href="#">mtrace2</a> <a href="#">packet</a> <a href="#">all-packet-types</a>
Tree	<a href="#">all-packet-types</a>
Notes	The following elements are part of a choice: <b>all-packet-types</b> or <b>packet-types</b> .
Introduced	22.10.R1
Platforms	All

## **packet-types**

Synopsis	Enter the <b>packet-types</b> context
Context	<a href="#">debug router</a> <i>string</i> <a href="#">mtrace2</a> <a href="#">packet</a> <a href="#">packet-types</a>
Tree	<a href="#">packet-types</a>
Notes	The following elements are part of a choice: <b>all-packet-types</b> or <b>packet-types</b> .
Introduced	22.10.R1
Platforms	All

## **query** *boolean*

Synopsis	Debug query packets
Context	<a href="#">debug router</a> <i>string</i> <a href="#">mtrace2</a> <a href="#">packet</a> <a href="#">packet-types</a> <a href="#">query</a> <i>boolean</i>
Tree	<a href="#">query</a>
Default	false
Introduced	22.10.R1
Platforms	All

## **request** *boolean*

Synopsis	Debug request packets
Context	<a href="#">debug router</a> <i>string</i> <a href="#">mtrace2</a> <a href="#">packet</a> <a href="#">packet-types</a> <a href="#">request</a> <i>boolean</i>
Tree	<a href="#">request</a>

---

Default	false
Introduced	22.10.R1
Platforms	All

### **response** *boolean*

Synopsis	Debug response packets
Context	<a href="#">debug router</a> <i>string</i> <a href="#">mtrace2 packet packet-types response</a> <i>boolean</i>
Tree	<a href="#">response</a>
Default	false
Introduced	22.10.R1
Platforms	All

### **pim**

Synopsis	Enter the <b>pim</b> context
Context	<a href="#">debug router</a> <i>string</i> <a href="#">pim</a>
Tree	<a href="#">pim</a>
Introduced	22.10.R1
Platforms	All

### **events**

Synopsis	Enable the <b>events</b> context
Context	<a href="#">debug router</a> <i>string</i> <a href="#">pim events</a>
Tree	<a href="#">events</a>
Introduced	22.10.R1
Platforms	All

### **adjacency**

Synopsis	Enable the <b>adjacency</b> context
Context	<a href="#">debug router</a> <i>string</i> <a href="#">pim events adjacency</a>
Tree	<a href="#">adjacency</a>

Notes	The following elements are part of a choice: ( <b>adjacency</b> , <b>assert</b> , <b>auto-rp</b> , <b>bgp</b> , <b>bier-inband</b> , <b>bsr</b> , <b>data</b> , <b>db</b> , <b>dynml dp</b> , <b>extranet</b> , <b>graft</b> , <b>interface</b> , <b>jp</b> , <b>mofrr</b> , <b>mrrib</b> , <b>msg</b> , <b>mvpn-rtcach e</b> , <b>red</b> , <b>register</b> , <b>rpfv</b> , <b>rtm</b> , <b>s-pmsi</b> , and <b>tunnel-interface</b> ) or <b>all</b> .
Introduced	22.10.R1
Platforms	All

**all**

Synopsis	Enable the <b>all</b> context
Context	<a href="#">debug router string pim events all</a>
Tree	<a href="#">all</a>
Notes	The following elements are part of a choice: ( <b>adjacency</b> , <b>assert</b> , <b>auto-rp</b> , <b>bgp</b> , <b>bier-inband</b> , <b>bsr</b> , <b>data</b> , <b>db</b> , <b>dynml dp</b> , <b>extranet</b> , <b>graft</b> , <b>interface</b> , <b>jp</b> , <b>mofrr</b> , <b>mrrib</b> , <b>msg</b> , <b>mvpn-rtcach e</b> , <b>red</b> , <b>register</b> , <b>rpfv</b> , <b>rtm</b> , <b>s-pmsi</b> , and <b>tunnel-interface</b> ) or <b>all</b> .
Introduced	22.10.R1
Platforms	All

**detail *boolean***

Synopsis	Enable detail tracing
Context	<a href="#">debug router string pim events all detail boolean</a>
Tree	<a href="#">detail</a>
Default	false
Introduced	22.10.R1
Platforms	All

**group-address (*ipv4-address-no-zone* | *ipv6-address-no-zone*)**

Synopsis	IP multicast group address used to trace events
Context	<a href="#">debug router string pim events all group-address (<i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i>)</a>
Tree	<a href="#">group-address</a>
Introduced	22.10.R1
Platforms	All

**source-address** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	Source address used to trace events
Context	<a href="#">debug router string pim events all source-address</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	<a href="#">source-address</a>
Introduced	22.10.R1
Platforms	All

**assert**

Synopsis	Enable the <b>assert</b> context
Context	<a href="#">debug router string pim events assert</a>
Tree	<a href="#">assert</a>
Notes	The following elements are part of a choice: ( <b>adjacency</b> , <b>assert</b> , <b>auto-rp</b> , <b>bgp</b> , <b>bier-inband</b> , <b>bsr</b> , <b>data</b> , <b>db</b> , <b>dynml dp</b> , <b>extranet</b> , <b>graft</b> , <b>interface</b> , <b>jp</b> , <b>mofrr</b> , <b>mrrib</b> , <b>msg</b> , <b>mvpn-rtcache</b> , <b>red</b> , <b>register</b> , <b>rpfv</b> , <b>rtm</b> , <b>s-pmsi</b> , and <b>tunnel-interface</b> ) or <b>all</b> .
Introduced	22.10.R1
Platforms	All

**detail** *boolean*

Synopsis	Enable detail tracing
Context	<a href="#">debug router string pim events assert detail boolean</a>
Tree	<a href="#">detail</a>
Default	false
Introduced	22.10.R1
Platforms	All

**group-address** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	IP multicast group address used to trace events
Context	<a href="#">debug router string pim events assert group-address</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	<a href="#">group-address</a>
Introduced	22.10.R1
Platforms	All

**source-address** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	Source address used to trace events
Context	<code>debug router string pim events assert source-address</code> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	<code>source-address</code>
Introduced	22.10.R1
Platforms	All

**auto-rp**

Synopsis	Enable the <b>auto-rp</b> context
Context	<code>debug router string pim events auto-rp</code>
Tree	<code>auto-rp</code>
Notes	The following elements are part of a choice: ( <b>adjacency</b> , <b>assert</b> , <b>auto-rp</b> , <b>bgp</b> , <b>bier-inband</b> , <b>bsr</b> , <b>data</b> , <b>db</b> , <b>dynml dp</b> , <b>extranet</b> , <b>graft</b> , <b>interface</b> , <b>jp</b> , <b>mofrr</b> , <b>mrrib</b> , <b>msg</b> , <b>mvpn-rtcach e</b> , <b>red</b> , <b>register</b> , <b>rpfv</b> , <b>rtm</b> , <b>s-pmsi</b> , and <b>tunnel-interface</b> ) or <b>all</b> .
Introduced	22.10.R1
Platforms	All

**bgp**

Synopsis	Enable the <b>bgp</b> context
Context	<code>debug router string pim events bgp</code>
Tree	<code>bgp</code>
Notes	The following elements are part of a choice: ( <b>adjacency</b> , <b>assert</b> , <b>auto-rp</b> , <b>bgp</b> , <b>bier-inband</b> , <b>bsr</b> , <b>data</b> , <b>db</b> , <b>dynml dp</b> , <b>extranet</b> , <b>graft</b> , <b>interface</b> , <b>jp</b> , <b>mofrr</b> , <b>mrrib</b> , <b>msg</b> , <b>mvpn-rtcach e</b> , <b>red</b> , <b>register</b> , <b>rpfv</b> , <b>rtm</b> , <b>s-pmsi</b> , and <b>tunnel-interface</b> ) or <b>all</b> .
Introduced	22.10.R1
Platforms	All

**group-address** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	IP multicast group address used to trace events
Context	<code>debug router string pim events bgp group-address</code> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	<code>group-address</code>

Introduced 22.10.R1  
 Platforms All

### **peer-address** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis BGP peer address used to trace events  
 Context [debug router string pim events bgp peer-address](#) (*ipv4-address-no-zone* | *ipv6-address-no-zone*)  
 Tree [peer-address](#)  
 Introduced 22.10.R1  
 Platforms All

### **source-address** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis Source address used to trace events  
 Context [debug router string pim events bgp source-address](#) (*ipv4-address-no-zone* | *ipv6-address-no-zone*)  
 Tree [source-address](#)  
 Introduced 22.10.R1  
 Platforms All

### **bier-inband**

Synopsis Enable the **bier-inband** context  
 Context [debug router string pim events bier-inband](#)  
 Tree [bier-inband](#)  
 Notes The following elements are part of a choice: (**adjacency**, **assert**, **auto-rp**, **bgp**, **bier-inband**, **bsr**, **data**, **db**, **dynmlp**, **extranet**, **graft**, **interface**, **jp**, **mofrr**, **mrrib**, **msg**, **mvpn-rtcach**, **red**, **register**, **rpfv**, **rtm**, **s-pmsi**, and **tunnel-interface**) or **all**.  
 Introduced 22.10.R1  
 Platforms All

### **detail** *boolean*

Synopsis Enable detail tracing  
 Context [debug router string pim events bier-inband detail boolean](#)

Tree	<a href="#">detail</a>
Default	false
Introduced	22.10.R1
Platforms	All

## bsr

Synopsis	Enable the <b>bsr</b> context
Context	<a href="#">debug router string pim events bsr</a>
Tree	<a href="#">bsr</a>
Description	Commands in this context enable debugging for the PIM bootstrap mechanism.
Notes	The following elements are part of a choice: ( <b>adjacency</b> , <b>assert</b> , <b>auto-rp</b> , <b>bgp</b> , <b>bier-inband</b> , <b>bsr</b> , <b>data</b> , <b>db</b> , <b>dynml dp</b> , <b>extranet</b> , <b>graft</b> , <b>interface</b> , <b>jp</b> , <b>mofrr</b> , <b>mrrib</b> , <b>msg</b> , <b>mvpn-rtcache</b> , <b>red</b> , <b>register</b> , <b>rpfv</b> , <b>rtm</b> , <b>s-pmsi</b> , and <b>tunnel-interface</b> ) or <b>all</b> .
Introduced	22.10.R1
Platforms	All

## detail *boolean*

Synopsis	Enable detail tracing
Context	<a href="#">debug router string pim events bsr detail boolean</a>
Tree	<a href="#">detail</a>
Default	false
Introduced	22.10.R1
Platforms	All

## data

Synopsis	Enable the <b>data</b> context
Context	<a href="#">debug router string pim events data</a>
Tree	<a href="#">data</a>
Description	Commands in this context enable PIM data exception debugging.
Notes	The following elements are part of a choice: ( <b>adjacency</b> , <b>assert</b> , <b>auto-rp</b> , <b>bgp</b> , <b>bier-inband</b> , <b>bsr</b> , <b>data</b> , <b>db</b> , <b>dynml dp</b> , <b>extranet</b> , <b>graft</b> , <b>interface</b> , <b>jp</b> , <b>mofrr</b> , <b>mrrib</b> , <b>msg</b> , <b>mvpn-rtcache</b> , <b>red</b> , <b>register</b> , <b>rpfv</b> , <b>rtm</b> , <b>s-pmsi</b> , and <b>tunnel-interface</b> ) or <b>all</b> .
Introduced	22.10.R1

Platforms All

### **detail** *boolean*

Synopsis Enable detail tracing  
Context [debug router string pim events data detail boolean](#)  
Tree [detail](#)  
Default false  
Introduced 22.10.R1  
Platforms All

### **group-address** (*ipv4-address-no-zone | ipv6-address-no-zone*)

Synopsis IP multicast group address used to trace events  
Context [debug router string pim events data group-address \(ipv4-address-no-zone | ipv6-address-no-zone\)](#)  
Tree [group-address](#)  
Introduced 22.10.R1  
Platforms All

### **source-address** (*ipv4-address-no-zone | ipv6-address-no-zone*)

Synopsis Source address used to trace events  
Context [debug router string pim events data source-address \(ipv4-address-no-zone | ipv6-address-no-zone\)](#)  
Tree [source-address](#)  
Introduced 22.10.R1  
Platforms All

### **db**

Synopsis Enable the **db** context  
Context [debug router string pim events db](#)  
Tree [db](#)  
Description Commands in this context enable PIM database debugging.

Notes	The following elements are part of a choice: ( <b>adjacency</b> , <b>assert</b> , <b>auto-rp</b> , <b>bgp</b> , <b>bier-inband</b> , <b>bsr</b> , <b>data</b> , <b>db</b> , <b>dynml dp</b> , <b>extranet</b> , <b>graft</b> , <b>interface</b> , <b>jp</b> , <b>mofrr</b> , <b>mrrib</b> , <b>msg</b> , <b>mvpn-rtcache</b> , <b>red</b> , <b>register</b> , <b>rpfv</b> , <b>rtm</b> , <b>s-pmsi</b> , and <b>tunnel-interface</b> ) or <b>all</b> .
Introduced	22.10.R1
Platforms	All

### **detail** *boolean*

Synopsis	Enable detail tracing
Context	<a href="#">debug router</a> <i>string</i> <a href="#">pim events db detail</a> <i>boolean</i>
Tree	<a href="#">detail</a>
Default	false
Introduced	22.10.R1
Platforms	All

### **group-address** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	IP multicast group address used to trace events
Context	<a href="#">debug router</a> <i>string</i> <a href="#">pim events db group-address</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	<a href="#">group-address</a>
Introduced	22.10.R1
Platforms	All

### **source-address** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	Source address used to trace events
Context	<a href="#">debug router</a> <i>string</i> <a href="#">pim events db source-address</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	<a href="#">source-address</a>
Introduced	22.10.R1
Platforms	All

### **dynml dp**

Synopsis	Enable the <b>dynml dp</b> context
----------	------------------------------------

Context	<a href="#">debug router</a> <i>string</i> <a href="#">pim events</a> <a href="#">dynmldp</a>
Tree	<a href="#">dynmldp</a>
Description	Commands in this context enable dynamic MLDP debugging.
Notes	The following elements are part of a choice: ( <b>adjacency</b> , <b>assert</b> , <b>auto-rp</b> , <b>bgp</b> , <b>bier-inband</b> , <b>bsr</b> , <b>data</b> , <b>db</b> , <b>dynmldp</b> , <b>extranet</b> , <b>graft</b> , <b>interface</b> , <b>jp</b> , <b>mofrr</b> , <b>mrrib</b> , <b>msg</b> , <b>mvpn-rtcache</b> , <b>red</b> , <b>register</b> , <b>rpfv</b> , <b>rtm</b> , <b>s-pmsi</b> , and <b>tunnel-interface</b> ) or <b>all</b> .
Introduced	22.10.R1
Platforms	All

**detail** *boolean*

Synopsis	Enable detail tracing
Context	<a href="#">debug router</a> <i>string</i> <a href="#">pim events</a> <a href="#">dynmldp</a> <b>detail</b> <i>boolean</i>
Tree	<a href="#">detail</a>
Default	false
Introduced	22.10.R1
Platforms	All

**extranet**

Synopsis	Enable the <b>extranet</b> context
Context	<a href="#">debug router</a> <i>string</i> <a href="#">pim events</a> <b>extranet</b>
Tree	<a href="#">extranet</a>
Notes	The following elements are part of a choice: ( <b>adjacency</b> , <b>assert</b> , <b>auto-rp</b> , <b>bgp</b> , <b>bier-inband</b> , <b>bsr</b> , <b>data</b> , <b>db</b> , <b>dynmldp</b> , <b>extranet</b> , <b>graft</b> , <b>interface</b> , <b>jp</b> , <b>mofrr</b> , <b>mrrib</b> , <b>msg</b> , <b>mvpn-rtcache</b> , <b>red</b> , <b>register</b> , <b>rpfv</b> , <b>rtm</b> , <b>s-pmsi</b> , and <b>tunnel-interface</b> ) or <b>all</b> .
Introduced	22.10.R1
Platforms	All

**detail** *boolean*

Synopsis	Enable detail tracing
Context	<a href="#">debug router</a> <i>string</i> <a href="#">pim events</a> <a href="#">extranet</a> <b>detail</b> <i>boolean</i>
Tree	<a href="#">detail</a>
Default	false
Introduced	22.10.R1

Platforms All

## graft

Synopsis Enable the **graft** context

Context [debug router string pim events graft](#)

Tree [graft](#)

Notes The following elements are part of a choice: (**adjacency**, **assert**, **auto-rp**, **bgp**, **bier-inband**, **bsr**, **data**, **db**, **dynmldp**, **extranet**, **graft**, **interface**, **jp**, **mofrr**, **mrrib**, **msg**, **mvpn-rtcache**, **red**, **register**, **rpfv**, **rtm**, **s-pmsi**, and **tunnel-interface**) or **all**.

Introduced 22.10.R1

Platforms All

## detail *boolean*

Synopsis Enable detail tracing

Context [debug router string pim events graft detail boolean](#)

Tree [detail](#)

Default false

Introduced 22.10.R1

Platforms All

## group-address (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis IP multicast group address used to trace events

Context [debug router string pim events graft group-address \(\*ipv4-address-no-zone\* | \*ipv6-address-no-zone\*\)](#)

Tree [group-address](#)

Introduced 22.10.R1

Platforms All

## source-address (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis Source address used to trace events

Context [debug router string pim events graft source-address \(\*ipv4-address-no-zone\* | \*ipv6-address-no-zone\*\)](#)

Tree	<a href="#">source-address</a>
Introduced	22.10.R1
Platforms	All

## interface

Synopsis	Enable the <b>interface</b> context
Context	<a href="#">debug router string pim events interface</a>
Tree	<a href="#">interface</a>
Notes	The following elements are part of a choice: ( <b>adjacency</b> , <b>assert</b> , <b>auto-rp</b> , <b>bgp</b> , <b>bier-inband</b> , <b>bsr</b> , <b>data</b> , <b>db</b> , <b>dynmldp</b> , <b>extranet</b> , <b>graft</b> , <b>interface</b> , <b>jp</b> , <b>mofrr</b> , <b>mrrib</b> , <b>msg</b> , <b>mvpn-rtcache</b> , <b>red</b> , <b>register</b> , <b>rpfv</b> , <b>rtm</b> , <b>s-pmsi</b> , and <b>tunnel-interface</b> ) or <b>all</b> .
Introduced	22.10.R1
Platforms	All

## interface-name *string*

Synopsis	Interface name
Context	<a href="#">debug router string pim events interface interface-name string</a>
Tree	<a href="#">interface-name</a>
String Length	1 to 32
Introduced	22.10.R1
Platforms	All

## jp

Synopsis	Enable the <b>jp</b> context
Context	<a href="#">debug router string pim events jp</a>
Tree	<a href="#">jp</a>
Description	Commands in this context enable debugging for PIM join and prune mechanisms.
Notes	The following elements are part of a choice: ( <b>adjacency</b> , <b>assert</b> , <b>auto-rp</b> , <b>bgp</b> , <b>bier-inband</b> , <b>bsr</b> , <b>data</b> , <b>db</b> , <b>dynmldp</b> , <b>extranet</b> , <b>graft</b> , <b>interface</b> , <b>jp</b> , <b>mofrr</b> , <b>mrrib</b> , <b>msg</b> , <b>mvpn-rtcache</b> , <b>red</b> , <b>register</b> , <b>rpfv</b> , <b>rtm</b> , <b>s-pmsi</b> , and <b>tunnel-interface</b> ) or <b>all</b> .
Introduced	22.10.R1
Platforms	All

**detail** *boolean*

Synopsis	Enable detail tracing
Context	<a href="#">debug router string pim events jp detail boolean</a>
Tree	<a href="#">detail</a>
Default	false
Introduced	22.10.R1
Platforms	All

**group-address** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	IP multicast group address used to trace events
Context	<a href="#">debug router string pim events jp group-address (ipv4-address-no-zone   ipv6-address-no-zone)</a>
Tree	<a href="#">group-address</a>
Introduced	22.10.R1
Platforms	All

**source-address** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	Source address used to trace events
Context	<a href="#">debug router string pim events jp source-address (ipv4-address-no-zone   ipv6-address-no-zone)</a>
Tree	<a href="#">source-address</a>
Introduced	22.10.R1
Platforms	All

**mofrr**

Synopsis	Enable the <b>mofrr</b> context
Context	<a href="#">debug router string pim events mofrr</a>
Tree	<a href="#">mofrr</a>
Description	Commands in this context enable debugging for PIM Multicast-only Fast Reroute (MoFRR).

Notes	The following elements are part of a choice: ( <b>adjacency</b> , <b>assert</b> , <b>auto-rp</b> , <b>bgp</b> , <b>bier-inband</b> , <b>bsr</b> , <b>data</b> , <b>db</b> , <b>dynmldp</b> , <b>extranet</b> , <b>graft</b> , <b>interface</b> , <b>jp</b> , <b>mofrr</b> , <b>mrrib</b> , <b>msg</b> , <b>mvpn-rtcache</b> , <b>red</b> , <b>register</b> , <b>rpfv</b> , <b>rtm</b> , <b>s-pmsi</b> , and <b>tunnel-interface</b> ) or <b>all</b> .
Introduced	22.10.R1
Platforms	All

## mrrib

Synopsis	Enable the <b>mrrib</b> context
Context	<a href="#">debug router</a> <i>string</i> <a href="#">pim events</a> <a href="#">mrrib</a>
Tree	<a href="#">mrrib</a>
Description	Commands in this context enable Multicast Routing Information Base (MRIB) debugging.
Notes	The following elements are part of a choice: ( <b>adjacency</b> , <b>assert</b> , <b>auto-rp</b> , <b>bgp</b> , <b>bier-inband</b> , <b>bsr</b> , <b>data</b> , <b>db</b> , <b>dynmldp</b> , <b>extranet</b> , <b>graft</b> , <b>interface</b> , <b>jp</b> , <b>mofrr</b> , <b>mrrib</b> , <b>msg</b> , <b>mvpn-rtcache</b> , <b>red</b> , <b>register</b> , <b>rpfv</b> , <b>rtm</b> , <b>s-pmsi</b> , and <b>tunnel-interface</b> ) or <b>all</b> .
Introduced	22.10.R1
Platforms	All

## detail *boolean*

Synopsis	Enable detail tracing
Context	<a href="#">debug router</a> <i>string</i> <a href="#">pim events</a> <a href="#">mrrib</a> <a href="#">detail</a> <i>boolean</i>
Tree	<a href="#">detail</a>
Default	false
Introduced	22.10.R1
Platforms	All

## group-address (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	IP multicast group address used to trace events
Context	<a href="#">debug router</a> <i>string</i> <a href="#">pim events</a> <a href="#">mrrib</a> <a href="#">group-address</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	<a href="#">group-address</a>
Introduced	22.10.R1
Platforms	All

**source-address** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	Source address used to trace events
Context	<code>debug router string pim events mrrib source-address</code> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	<code>source-address</code>
Introduced	22.10.R1
Platforms	All

**msg**

Synopsis	Enable the <b>msg</b> context
Context	<code>debug router string pim events msg</code>
Tree	<code>msg</code>
Notes	The following elements are part of a choice: ( <b>adjacency</b> , <b>assert</b> , <b>auto-rp</b> , <b>bgp</b> , <b>bier-inband</b> , <b>bsr</b> , <b>data</b> , <b>db</b> , <b>dynmldp</b> , <b>extranet</b> , <b>graft</b> , <b>interface</b> , <b>jp</b> , <b>mofrr</b> , <b>mrrib</b> , <b>msg</b> , <b>mvpn-rtcache</b> , <b>red</b> , <b>register</b> , <b>rpfv</b> , <b>rtm</b> , <b>s-pmsi</b> , and <b>tunnel-interface</b> ) or <b>all</b> .
Introduced	22.10.R1
Platforms	All

**mvpn-rtcache**

Synopsis	Enable the <b>mvpn-rtcache</b> context
Context	<code>debug router string pim events mvpn-rtcache</code>
Tree	<code>mvpn-rtcache</code>
Description	Commands in this context enable debugging for the PIM MVPN route cache.
Notes	The following elements are part of a choice: ( <b>adjacency</b> , <b>assert</b> , <b>auto-rp</b> , <b>bgp</b> , <b>bier-inband</b> , <b>bsr</b> , <b>data</b> , <b>db</b> , <b>dynmldp</b> , <b>extranet</b> , <b>graft</b> , <b>interface</b> , <b>jp</b> , <b>mofrr</b> , <b>mrrib</b> , <b>msg</b> , <b>mvpn-rtcache</b> , <b>red</b> , <b>register</b> , <b>rpfv</b> , <b>rtm</b> , <b>s-pmsi</b> , and <b>tunnel-interface</b> ) or <b>all</b> .
Introduced	22.10.R1
Platforms	All

**group-address** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	Group address used to trace events
Context	<code>debug router string pim events mvpn-rtcache group-address</code> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )

Tree	<a href="#">group-address</a>
Introduced	22.10.R1
Platforms	All

### **peer-address** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	Peer address used to trace events
Context	<a href="#">debug router string pim events mvpn-rtcache peer-address</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	<a href="#">peer-address</a>
Introduced	22.10.R1
Platforms	All

### **red**

Synopsis	Enable the <b>red</b> context
Context	<a href="#">debug router string pim events red</a>
Tree	<a href="#">red</a>
Description	Commands in this context enable debugging for PIM redundancy messages to the standby CPM.
Notes	The following elements are part of a choice: ( <b>adjacency</b> , <b>assert</b> , <b>auto-rp</b> , <b>bgp</b> , <b>bier-inband</b> , <b>bsr</b> , <b>data</b> , <b>db</b> , <b>dynml dp</b> , <b>extranet</b> , <b>graft</b> , <b>interface</b> , <b>jp</b> , <b>mofrr</b> , <b>mrrib</b> , <b>msg</b> , <b>mvpn-rtcache</b> , <b>red</b> , <b>register</b> , <b>rpfv</b> , <b>rtm</b> , <b>s-pmsi</b> , and <b>tunnel-interface</b> ) or <b>all</b> .
Introduced	22.10.R1
Platforms	All

### **detail** *boolean*

Synopsis	Enable detail tracing
Context	<a href="#">debug router string pim events red detail boolean</a>
Tree	<a href="#">detail</a>
Default	false
Introduced	22.10.R1
Platforms	All

## register

Synopsis	Enable the <b>register</b> context
Context	<a href="#">debug router</a> <i>string</i> <a href="#">pim events</a> <a href="#">register</a>
Tree	<a href="#">register</a>
Notes	The following elements are part of a choice: ( <b>adjacency</b> , <b>assert</b> , <b>auto-rp</b> , <b>bgp</b> , <b>bier-inband</b> , <b>bsr</b> , <b>data</b> , <b>db</b> , <b>dynmldp</b> , <b>extranet</b> , <b>graft</b> , <b>interface</b> , <b>jp</b> , <b>mofrr</b> , <b>mrrib</b> , <b>msg</b> , <b>mvpn-rtcach</b> , <b>red</b> , <b>register</b> , <b>rpfv</b> , <b>rtm</b> , <b>s-pmsi</b> , and <b>tunnel-interface</b> ) or <b>all</b> .
Introduced	22.10.R1
Platforms	All

## detail *boolean*

Synopsis	Enable detail tracing
Context	<a href="#">debug router</a> <i>string</i> <a href="#">pim events</a> <a href="#">register detail</a> <i>boolean</i>
Tree	<a href="#">detail</a>
Default	false
Introduced	22.10.R1
Platforms	All

## group-address (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	IP multicast group address used to trace events
Context	<a href="#">debug router</a> <i>string</i> <a href="#">pim events</a> <a href="#">register group-address</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	<a href="#">group-address</a>
Introduced	22.10.R1
Platforms	All

## source-address (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	Source address used to trace events
Context	<a href="#">debug router</a> <i>string</i> <a href="#">pim events</a> <a href="#">register source-address</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	<a href="#">source-address</a>
Introduced	22.10.R1
Platforms	All

## rpfv

Synopsis	Enable the <b>rpfv</b> context
Context	<code>debug router <i>string</i> pim events rpfv</code>
Tree	<code>rpfv</code>
Description	Commands in this context enable PIM RPF vector debugging.
Notes	The following elements are part of a choice: ( <b>adjacency</b> , <b>assert</b> , <b>auto-rp</b> , <b>bgp</b> , <b>bier-inband</b> , <b>bsr</b> , <b>data</b> , <b>db</b> , <b>dynmldp</b> , <b>extranet</b> , <b>graft</b> , <b>interface</b> , <b>jp</b> , <b>mofrr</b> , <b>mrrib</b> , <b>msg</b> , <b>mvpn-rtcache</b> , <b>red</b> , <b>register</b> , <b>rpfv</b> , <b>rtm</b> , <b>s-pmsi</b> , and <b>tunnel-interface</b> ) or <b>all</b> .
Introduced	22.10.R1
Platforms	All

## detail *boolean*

Synopsis	Enable detail tracing
Context	<code>debug router <i>string</i> pim events rpfv detail <i>boolean</i></code>
Tree	<code>detail</code>
Default	false
Introduced	22.10.R1
Platforms	All

## rtm

Synopsis	Enable the <b>rtm</b> context
Context	<code>debug router <i>string</i> pim events rtm</code>
Tree	<code>rtm</code>
Notes	The following elements are part of a choice: ( <b>adjacency</b> , <b>assert</b> , <b>auto-rp</b> , <b>bgp</b> , <b>bier-inband</b> , <b>bsr</b> , <b>data</b> , <b>db</b> , <b>dynmldp</b> , <b>extranet</b> , <b>graft</b> , <b>interface</b> , <b>jp</b> , <b>mofrr</b> , <b>mrrib</b> , <b>msg</b> , <b>mvpn-rtcache</b> , <b>red</b> , <b>register</b> , <b>rpfv</b> , <b>rtm</b> , <b>s-pmsi</b> , and <b>tunnel-interface</b> ) or <b>all</b> .
Introduced	22.10.R1
Platforms	All

## detail *boolean*

Synopsis	Enable detail tracing
Context	<code>debug router <i>string</i> pim events rtm detail <i>boolean</i></code>

Tree	<a href="#">detail</a>
Default	false
Introduced	22.10.R1
Platforms	All

## s-pmsi

Synopsis	Enable the <b>s-pmsi</b> context
Context	<a href="#">debug router string pim events s-pmsi</a>
Tree	<a href="#">s-pmsi</a>
Description	Commands in this context enable debugging for the PIM selective provider multicast service interface.
Notes	The following elements are part of a choice: ( <b>adjacency</b> , <b>assert</b> , <b>auto-rp</b> , <b>bgp</b> , <b>bier-inband</b> , <b>bsr</b> , <b>data</b> , <b>db</b> , <b>dynmldp</b> , <b>extranet</b> , <b>graft</b> , <b>interface</b> , <b>jp</b> , <b>mofrr</b> , <b>mrrib</b> , <b>msg</b> , <b>mvpn-rtcache</b> , <b>red</b> , <b>register</b> , <b>rpfv</b> , <b>rtm</b> , <b>s-pmsi</b> , and <b>tunnel-interface</b> ) or <b>all</b> .
Introduced	22.10.R1
Platforms	All

## detail *boolean*

Synopsis	Enable detail tracing
Context	<a href="#">debug router string pim events s-pmsi detail boolean</a>
Tree	<a href="#">detail</a>
Default	false
Introduced	22.10.R1
Platforms	All

## vpn-source-address (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	VPN source address used to trace events
Context	<a href="#">debug router string pim events s-pmsi vpn-source-address (<i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i>)</a>
Tree	<a href="#">vpn-source-address</a>
Introduced	22.10.R1
Platforms	All

## tunnel-interface

Synopsis	Enable the <b>tunnel-interface</b> context
Context	<a href="#">debug router string pim events tunnel-interface</a>
Tree	<a href="#">tunnel-interface</a>
Notes	The following elements are part of a choice: ( <b>adjacency, assert, auto-rp, bgp, bier-inband, bsr, data, db, dynlisp, extranet, graft, interface, jp, mofrr, mrrib, msg, mvpn-rtcach, red, register, rpfv, rtm, s-pmsi, and tunnel-interface</b> ) or <b>all</b> .
Introduced	22.10.R1
Platforms	All

## ldp-p2mp-id *number*

Synopsis	LDP P2MP ID
Context	<a href="#">debug router string pim events tunnel-interface ldp-p2mp-id number</a>
Tree	<a href="#">ldp-p2mp-id</a>
Range	1 to 8192
Introduced	22.10.R1
Platforms	All

## rsvp-p2mp *string*

Synopsis	RSVP P2MP LSP name
Context	<a href="#">debug router string pim events tunnel-interface rsvp-p2mp string</a>
Tree	<a href="#">rsvp-p2mp</a>
String Length	1 to 32
Introduced	22.10.R1
Platforms	All

## sender-address *string*

Synopsis	IP address of the sender
Context	<a href="#">debug router string pim events tunnel-interface sender-address string</a>
Tree	<a href="#">sender-address</a>
Introduced	22.10.R1

Platforms All

## packet

Synopsis Enable the **packet** context  
Context [debug router string pim packet](#)  
Tree [packet](#)  
Introduced 22.10.R1  
Platforms All

## all-origins

Synopsis Enable trace for all origins  
Context [debug router string pim packet all-origins](#)  
Tree [all-origins](#)  
Notes The following elements are part of a choice: **all-origins** or **interface-name**.  
Introduced 22.10.R1  
Platforms All

## all-packet-types

Synopsis Enable PIM debugging for all packets  
Context [debug router string pim packet all-packet-types](#)  
Tree [all-packet-types](#)  
Notes The following elements are part of a choice: **all-packet-types** or **packet-types**.  
Introduced 22.10.R1  
Platforms All

## egress *boolean*

Synopsis Enable tracing for transmitted packets  
Context [debug router string pim packet egress boolean](#)  
Tree [egress](#)  
Default true  
Introduced 22.10.R1

Platforms All

### **ingress** *boolean*

Synopsis Enable tracing for received packets  
 Context [debug router](#) *string* [pim packet ingress](#) *boolean*  
 Tree [ingress](#)  
 Default true  
 Introduced 22.10.R1  
 Platforms All

### **interface-name** *string*

Synopsis Interface name  
 Context [debug router](#) *string* [pim packet interface-name](#) *string*  
 Tree [interface-name](#)  
 String Length 1 to 32  
 Notes The following elements are part of a choice: **all-origins** or **interface-name**.  
 Introduced 22.10.R1  
 Platforms All

### **ipv4** *boolean*

Synopsis Enable tracing for PIM IPv4 packets  
 Context [debug router](#) *string* [pim packet ipv4](#) *boolean*  
 Tree [ipv4](#)  
 Default true  
 Introduced 22.10.R1  
 Platforms All

### **ipv6** *boolean*

Synopsis Enable tracing for PIM IPv6 packets  
 Context [debug router](#) *string* [pim packet ipv6](#) *boolean*  
 Tree [ipv6](#)

---

Default	true
Introduced	22.10.R1
Platforms	All

## packet-types

Synopsis	Enter the <b>packet-types</b> context
Context	<a href="#">debug router</a> <i>string</i> <a href="#">pim packet packet-types</a>
Tree	<a href="#">packet-types</a>
Notes	The following elements are part of a choice: <b>all-packet-types</b> or <b>packet-types</b> .
Introduced	22.10.R1
Platforms	All

## assert

Synopsis	Enable the <b>assert</b> context
Context	<a href="#">debug router</a> <i>string</i> <a href="#">pim packet packet-types assert</a>
Tree	<a href="#">assert</a>
Introduced	22.10.R1
Platforms	All

## all-origins

Synopsis	Enable trace for all origins
Context	<a href="#">debug router</a> <i>string</i> <a href="#">pim packet packet-types assert all-origins</a>
Tree	<a href="#">all-origins</a>
Notes	The following elements are part of a choice: <b>all-origins</b> or <b>interface-name</b> .
Introduced	22.10.R1
Platforms	All

## interface-name *string*

Synopsis	Interface name
Context	<a href="#">debug router</a> <i>string</i> <a href="#">pim packet packet-types assert interface-name</a> <i>string</i>
Tree	<a href="#">interface-name</a>

---

String Length	1 to 32
Notes	The following elements are part of a choice: <b>all-origins</b> or <b>interface-name</b> .
Introduced	22.10.R1
Platforms	All

### **auto-rp-announcement**

Synopsis	Enable the <b>auto-rp-announcement</b> context
Context	<a href="#">debug router</a> <i>string</i> <a href="#">pim packet</a> <a href="#">packet-types</a> <a href="#">auto-rp-announcement</a>
Tree	<a href="#">auto-rp-announcement</a>
Introduced	22.10.R1
Platforms	All

### **all-origins**

Synopsis	Enable trace for all origins
Context	<a href="#">debug router</a> <i>string</i> <a href="#">pim packet</a> <a href="#">packet-types</a> <a href="#">auto-rp-announcement</a> <a href="#">all-origins</a>
Tree	<a href="#">all-origins</a>
Notes	The following elements are part of a choice: <b>all-origins</b> or <b>interface-name</b> .
Introduced	22.10.R1
Platforms	All

### **interface-name** *string*

Synopsis	Interface name
Context	<a href="#">debug router</a> <i>string</i> <a href="#">pim packet</a> <a href="#">packet-types</a> <a href="#">auto-rp-announcement</a> <a href="#">interface-name</a> <i>string</i>
Tree	<a href="#">interface-name</a>
String Length	1 to 32
Notes	The following elements are part of a choice: <b>all-origins</b> or <b>interface-name</b> .
Introduced	22.10.R1
Platforms	All

## auto-rp-mapping

Synopsis	Enable the <b>auto-rp-mapping</b> context
Context	<a href="#">debug router</a> <i>string</i> <a href="#">pim packet packet-types</a> <a href="#">auto-rp-mapping</a>
Tree	<a href="#">auto-rp-mapping</a>
Introduced	22.10.R1
Platforms	All

## all-origins

Synopsis	Enable trace for all origins
Context	<a href="#">debug router</a> <i>string</i> <a href="#">pim packet packet-types</a> <a href="#">auto-rp-mapping</a> <a href="#">all-origins</a>
Tree	<a href="#">all-origins</a>
Notes	The following elements are part of a choice: <b>all-origins</b> or <b>interface-name</b> .
Introduced	22.10.R1
Platforms	All

## interface-name *string*

Synopsis	Interface name
Context	<a href="#">debug router</a> <i>string</i> <a href="#">pim packet packet-types</a> <a href="#">auto-rp-mapping</a> <a href="#">interface-name</a> <i>string</i>
Tree	<a href="#">interface-name</a>
String Length	1 to 32
Notes	The following elements are part of a choice: <b>all-origins</b> or <b>interface-name</b> .
Introduced	22.10.R1
Platforms	All

## bsr

Synopsis	Enable the <b>bsr</b> context
Context	<a href="#">debug router</a> <i>string</i> <a href="#">pim packet packet-types</a> <a href="#">bsr</a>
Tree	<a href="#">bsr</a>
Introduced	22.10.R1
Platforms	All

## all-origins

Synopsis	Enable trace for all origins
Context	<a href="#">debug router</a> <i>string</i> <a href="#">pim packet packet-types</a> <a href="#">bsr all-origins</a>
Tree	<a href="#">all-origins</a>
Notes	The following elements are part of a choice: <b>all-origins</b> or <b>interface-name</b> .
Introduced	22.10.R1
Platforms	All

## interface-name *string*

Synopsis	Interface name
Context	<a href="#">debug router</a> <i>string</i> <a href="#">pim packet packet-types</a> <a href="#">bsr interface-name</a> <i>string</i>
Tree	<a href="#">interface-name</a>
String Length	1 to 32
Notes	The following elements are part of a choice: <b>all-origins</b> or <b>interface-name</b> .
Introduced	22.10.R1
Platforms	All

## crp

Synopsis	Enable the <b>crp</b> context
Context	<a href="#">debug router</a> <i>string</i> <a href="#">pim packet packet-types</a> <a href="#">crp</a>
Tree	<a href="#">crp</a>
Introduced	22.10.R1
Platforms	All

## all-origins

Synopsis	Enable trace for all origins
Context	<a href="#">debug router</a> <i>string</i> <a href="#">pim packet packet-types</a> <a href="#">crp all-origins</a>
Tree	<a href="#">all-origins</a>
Notes	The following elements are part of a choice: <b>all-origins</b> or <b>interface-name</b> .
Introduced	22.10.R1
Platforms	All

### **interface-name** *string*

Synopsis	Interface name
Context	<a href="#">debug router</a> <i>string</i> <a href="#">pim packet packet-types crp</a> <a href="#">interface-name</a> <i>string</i>
Tree	<a href="#">interface-name</a>
String Length	1 to 32
Notes	The following elements are part of a choice: <b>all-origins</b> or <b>interface-name</b> .
Introduced	22.10.R1
Platforms	All

### **graft**

Synopsis	Enable the <b>graft</b> context
Context	<a href="#">debug router</a> <i>string</i> <a href="#">pim packet packet-types</a> <a href="#">graft</a>
Tree	<a href="#">graft</a>
Introduced	22.10.R1
Platforms	All

### **all-origins**

Synopsis	Enable trace for all origins
Context	<a href="#">debug router</a> <i>string</i> <a href="#">pim packet packet-types</a> <a href="#">graft</a> <a href="#">all-origins</a>
Tree	<a href="#">all-origins</a>
Notes	The following elements are part of a choice: <b>all-origins</b> or <b>interface-name</b> .
Introduced	22.10.R1
Platforms	All

### **interface-name** *string*

Synopsis	Interface name
Context	<a href="#">debug router</a> <i>string</i> <a href="#">pim packet packet-types</a> <a href="#">graft</a> <a href="#">interface-name</a> <i>string</i>
Tree	<a href="#">interface-name</a>
String Length	1 to 32
Notes	The following elements are part of a choice: <b>all-origins</b> or <b>interface-name</b> .
Introduced	22.10.R1

Platforms All

## graft-ack

Synopsis Enable the **graft-ack** context  
Context [debug router string pim packet packet-types graft-ack](#)  
Tree [graft-ack](#)  
Introduced 22.10.R1  
Platforms All

## all-origins

Synopsis Enable trace for all origins  
Context [debug router string pim packet packet-types graft-ack all-origins](#)  
Tree [all-origins](#)  
Notes The following elements are part of a choice: **all-origins** or **interface-name**.  
Introduced 22.10.R1  
Platforms All

## interface-name *string*

Synopsis Interface name  
Context [debug router string pim packet packet-types graft-ack interface-name string](#)  
Tree [interface-name](#)  
String Length 1 to 32  
Notes The following elements are part of a choice: **all-origins** or **interface-name**.  
Introduced 22.10.R1  
Platforms All

## hello

Synopsis Enable the **hello** context  
Context [debug router string pim packet packet-types hello](#)  
Tree [hello](#)  
Introduced 22.10.R1

Platforms All

## all-origins

Synopsis Enable trace for all origins  
 Context [debug router string pim packet packet-types hello all-origins](#)  
 Tree [all-origins](#)  
 Notes The following elements are part of a choice: **all-origins** or **interface-name**.  
 Introduced 22.10.R1  
 Platforms All

## interface-name *string*

Synopsis Interface name  
 Context [debug router string pim packet packet-types hello interface-name string](#)  
 Tree [interface-name](#)  
 String Length 1 to 32  
 Notes The following elements are part of a choice: **all-origins** or **interface-name**.  
 Introduced 22.10.R1  
 Platforms All

## jp

Synopsis Enable the **jp** context  
 Context [debug router string pim packet packet-types jp](#)  
 Tree [jp](#)  
 Introduced 22.10.R1  
 Platforms All

## all-origins

Synopsis Enable trace for all origins  
 Context [debug router string pim packet packet-types jp all-origins](#)  
 Tree [all-origins](#)  
 Notes The following elements are part of a choice: **all-origins** or **interface-name**.

Introduced 22.10.R1  
Platforms All

### **interface-name** *string*

Synopsis Interface name  
Context [debug router](#) *string* [pim packet packet-types jp](#) [interface-name](#) *string*  
Tree [interface-name](#)  
String Length 1 to 32  
Notes The following elements are part of a choice: **all-origins** or **interface-name**.  
Introduced 22.10.R1  
Platforms All

### **mdt-tlv**

Synopsis Enable the **mdt-tlv** context  
Context [debug router](#) *string* [pim packet packet-types](#) [mdt-tlv](#)  
Tree [mdt-tlv](#)  
Introduced 22.10.R1  
Platforms All

### **all-origins**

Synopsis Enable trace for all origins  
Context [debug router](#) *string* [pim packet packet-types](#) [mdt-tlv](#) [all-origins](#)  
Tree [all-origins](#)  
Notes The following elements are part of a choice: **all-origins** or **interface-name**.  
Introduced 22.10.R1  
Platforms All

### **interface-name** *string*

Synopsis Interface name  
Context [debug router](#) *string* [pim packet packet-types](#) [mdt-tlv](#) [interface-name](#) *string*  
Tree [interface-name](#)

---

String Length	1 to 32
Notes	The following elements are part of a choice: <b>all-origins</b> or <b>interface-name</b> .
Introduced	22.10.R1
Platforms	All

## register

Synopsis	Enable the <b>register</b> context
Context	<a href="#">debug router</a> <i>string</i> <a href="#">pim packet packet-types register</a>
Tree	<a href="#">register</a>
Introduced	22.10.R1
Platforms	All

## all-origins

Synopsis	Enable trace for all origins
Context	<a href="#">debug router</a> <i>string</i> <a href="#">pim packet packet-types register all-origins</a>
Tree	<a href="#">all-origins</a>
Notes	The following elements are part of a choice: <b>all-origins</b> or <b>interface-name</b> .
Introduced	22.10.R1
Platforms	All

## interface-name *string*

Synopsis	Interface name
Context	<a href="#">debug router</a> <i>string</i> <a href="#">pim packet packet-types register interface-name</a> <i>string</i>
Tree	<a href="#">interface-name</a>
String Length	1 to 32
Notes	The following elements are part of a choice: <b>all-origins</b> or <b>interface-name</b> .
Introduced	22.10.R1
Platforms	All

## register-stop

Synopsis	Enable the <b>register-stop</b> context
----------	---

Context	<a href="#">debug router</a> <i>string</i> <a href="#">pim packet packet-types register-stop</a>
Tree	<a href="#">register-stop</a>
Introduced	22.10.R1
Platforms	All

## all-origins

Synopsis	Enable trace for all origins
Context	<a href="#">debug router</a> <i>string</i> <a href="#">pim packet packet-types register-stop all-origins</a>
Tree	<a href="#">all-origins</a>
Notes	The following elements are part of a choice: <b>all-origins</b> or <b>interface-name</b> .
Introduced	22.10.R1
Platforms	All

## interface-name *string*

Synopsis	Interface name
Context	<a href="#">debug router</a> <i>string</i> <a href="#">pim packet packet-types register-stop interface-name</a> <i>string</i>
Tree	<a href="#">interface-name</a>
String Length	1 to 32
Notes	The following elements are part of a choice: <b>all-origins</b> or <b>interface-name</b> .
Introduced	22.10.R1
Platforms	All

## radius

Synopsis	Enter the <b>radius</b> context
Context	<a href="#">debug router</a> <i>string</i> <a href="#">radius</a>
Tree	<a href="#">radius</a>
Introduced	22.5.R1
Platforms	All

## proxy [[name](#)] *string*

Synopsis	Enter the <b>proxy</b> list instance
----------	--------------------------------------

Context	<a href="#">debug router</a> <i>string</i> <a href="#">radius proxy</a> <i>string</i>
Tree	<a href="#">proxy</a>
Max. Instances	8
Introduced	22.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**[name]** *string*

Synopsis	RADIUS proxy server name
Context	<a href="#">debug router</a> <i>string</i> <a href="#">radius proxy</a> <i>string</i>
Tree	<a href="#">proxy</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	22.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**all-packet-types**

Synopsis	Enable RADIUS proxy debugging for all packets
Context	<a href="#">debug router</a> <i>string</i> <a href="#">radius proxy</a> <i>string</i> <b>all-packet-types</b>
Tree	<a href="#">all-packet-types</a>
Notes	The following elements are part of a mandatory choice: <b>all-packet-types</b> or <b>packet-types</b> .
Introduced	22.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**client-address** [\[address\]](#) (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	Add a list entry for <b>client-address</b>
Context	<a href="#">debug router</a> <i>string</i> <a href="#">radius proxy</a> <i>string</i> <b>client-address</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	<a href="#">client-address</a>
Max. Instances	10
Introduced	22.7.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **[address]** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis IP address of the RADIUS client

Context [debug router](#) *string* [radius proxy](#) *string* [client-address](#) (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Tree [client-address](#)

Notes This element is part of a list key.

Introduced 22.7.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **detail-level** *keyword*

Synopsis Detail level of the RADIUS proxy debug output

Context [debug router](#) *string* [radius proxy](#) *string* [detail-level](#) *keyword*

Tree [detail-level](#)

Options low, high

Default low

Introduced 22.7.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **direction** *keyword*

Synopsis Direction of the RADIUS proxy packet debugging

Context [debug router](#) *string* [radius proxy](#) *string* [direction](#) *keyword*

Tree [direction](#)

Options ingress, egress, both

Default both

Introduced 22.7.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **dropped-only** *boolean*

Synopsis Show dropped packets only

Context	<a href="#">debug router</a> <i>string</i> <a href="#">radius proxy</a> <i>string</i> <a href="#">dropped-only</a> <i>boolean</i>
Tree	<a href="#">dropped-only</a>
Default	false
Introduced	22.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## packet-types

Synopsis	Enter the <b>packet-types</b> context
Context	<a href="#">debug router</a> <i>string</i> <a href="#">radius proxy</a> <i>string</i> <a href="#">packet-types</a>
Tree	<a href="#">packet-types</a>
Notes	The following elements are part of a mandatory choice: <b>all-packet-types</b> or <b>packet-types</b> .
Introduced	22.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## access-accept *boolean*

Synopsis	Debug Access-Accept packets
Context	<a href="#">debug router</a> <i>string</i> <a href="#">radius proxy</a> <i>string</i> <a href="#">packet-types</a> <a href="#">access-accept</a> <i>boolean</i>
Tree	<a href="#">access-accept</a>
Default	false
Introduced	22.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## access-challenge *boolean*

Synopsis	Debug Access-Challenge packets
Context	<a href="#">debug router</a> <i>string</i> <a href="#">radius proxy</a> <i>string</i> <a href="#">packet-types</a> <a href="#">access-challenge</a> <i>boolean</i>
Tree	<a href="#">access-challenge</a>
Default	false
Introduced	22.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**access-reject *boolean***

Synopsis	Debug Access-Reject packets
Context	<a href="#">debug router</a> <i>string</i> <a href="#">radius proxy</a> <i>string</i> <a href="#">packet-types</a> <a href="#">access-reject</a> <i>boolean</i>
Tree	<a href="#">access-reject</a>
Default	false
Introduced	22.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**access-request *boolean***

Synopsis	Debug Access-Request packets
Context	<a href="#">debug router</a> <i>string</i> <a href="#">radius proxy</a> <i>string</i> <a href="#">packet-types</a> <a href="#">access-request</a> <i>boolean</i>
Tree	<a href="#">access-request</a>
Default	false
Introduced	22.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**accounting-request *boolean***

Synopsis	Debug Accounting-Request packets
Context	<a href="#">debug router</a> <i>string</i> <a href="#">radius proxy</a> <i>string</i> <a href="#">packet-types</a> <a href="#">accounting-request</a> <i>boolean</i>
Tree	<a href="#">accounting-request</a>
Default	false
Introduced	22.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**accounting-response *boolean***

Synopsis	Debug Accounting-Response packets
Context	<a href="#">debug router</a> <i>string</i> <a href="#">radius proxy</a> <i>string</i> <a href="#">packet-types</a> <a href="#">accounting-response</a> <i>boolean</i>
Tree	<a href="#">accounting-response</a>
Default	false
Introduced	22.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**other** *boolean*

Synopsis	Debug other packet types
Context	<a href="#">debug router</a> <i>string</i> <a href="#">radius proxy</a> <i>string</i> <a href="#">packet-types</a> <i>other</i> <i>boolean</i>
Tree	<a href="#">other</a>
Default	false
Introduced	22.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**servers**

Synopsis	Enable the <b>servers</b> context
Context	<a href="#">debug router</a> <i>string</i> <a href="#">radius</a> <i>servers</i>
Tree	<a href="#">servers</a>
Introduced	22.5.R1
Platforms	All

**attribute** [*name*] *string*

Synopsis	Enter the <b>attribute</b> list instance
Context	<a href="#">debug router</a> <i>string</i> <a href="#">radius</a> <i>servers</i> <a href="#">attribute</a> <i>string</i>
Tree	<a href="#">attribute</a>
Max. Instances	10
Introduced	22.5.R1
Platforms	All

**[name]** *string*

Synopsis	Attribute filter name
Context	<a href="#">debug router</a> <i>string</i> <a href="#">radius</a> <i>servers</i> <a href="#">attribute</a> <i>string</i>
Tree	<a href="#">attribute</a>
Notes	This element is part of a list key.
Introduced	22.5.R1
Platforms	All

**extended-type** *number*

Synopsis	RADIUS attribute extended type
Context	<a href="#">debug router</a> <i>string</i> <a href="#">radius servers attribute</a> <i>string</i> <b>extended-type</b> <i>number</i>
Tree	<a href="#">extended-type</a>
Range	1 to 255
Introduced	22.5.R1
Platforms	All

**transaction** *boolean*

Synopsis	Debug request and response transaction
Context	<a href="#">debug router</a> <i>string</i> <a href="#">radius servers attribute</a> <i>string</i> <b>transaction</b> <i>boolean</i>
Tree	<a href="#">transaction</a>
Default	false
Introduced	22.5.R1
Platforms	All

**type** *number*

Synopsis	RADIUS attribute type
Context	<a href="#">debug router</a> <i>string</i> <a href="#">radius servers attribute</a> <i>string</i> <b>type</b> <i>number</i>
Tree	<a href="#">type</a>
Range	1 to 255
Notes	This element is mandatory.
Introduced	22.5.R1
Platforms	All

**value**

Synopsis	Enter the <b>value</b> context
Context	<a href="#">debug router</a> <i>string</i> <a href="#">radius servers attribute</a> <i>string</i> <b>value</b>
Tree	<a href="#">value</a>
Introduced	22.5.R1
Platforms	All

**address** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	Attribute value specified as an IP address
Context	<a href="#">debug router string radius servers attribute string value address</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	<a href="#">address</a>
Notes	The following elements are part of a choice: <b>address</b> , <b>hex</b> , <b>integer</b> , <b>prefix</b> , or <b>string</b> .
Introduced	22.5.R1
Platforms	All

**hex string**

Synopsis	Attribute value specified as a hexadecimal string
Context	<a href="#">debug router string radius servers attribute string value hex string</a>
Tree	<a href="#">hex</a>
String Length	1 to 253
Notes	The following elements are part of a choice: <b>address</b> , <b>hex</b> , <b>integer</b> , <b>prefix</b> , or <b>string</b> .
Introduced	22.5.R1
Platforms	All

**integer number**

Synopsis	Attribute value specified as an integer
Context	<a href="#">debug router string radius servers attribute string value integer number</a>
Tree	<a href="#">integer</a>
Max. Range	0 to 4294967295
Notes	The following elements are part of a choice: <b>address</b> , <b>hex</b> , <b>integer</b> , <b>prefix</b> , or <b>string</b> .
Introduced	22.5.R1
Platforms	All

**prefix** (*ipv4-prefix* | *ipv6-prefix*)

Synopsis	Attribute value specified as an IP prefix
Context	<a href="#">debug router string radius servers attribute string value prefix</a> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> )
Tree	<a href="#">prefix</a>

---

Notes	The following elements are part of a choice: <b>address</b> , <b>hex</b> , <b>integer</b> , <b>prefix</b> , or <b>string</b> .
Introduced	22.5.R1
Platforms	All

### **string** *string*

Synopsis	Attribute value specified as a string
Context	<a href="#">debug router</a> <a href="#">string</a> <a href="#">radius servers</a> <a href="#">attribute</a> <a href="#">string</a> <a href="#">value</a> <a href="#">string</a> <a href="#">string</a>
Tree	<a href="#">string</a>
String Length	1 to 253
Notes	The following elements are part of a choice: <b>address</b> , <b>hex</b> , <b>integer</b> , <b>prefix</b> , or <b>string</b> .
Introduced	22.5.R1
Platforms	All

### **vendor-specific**

Synopsis	Enter the <b>vendor-specific</b> context
Context	<a href="#">debug router</a> <a href="#">string</a> <a href="#">radius servers</a> <a href="#">attribute</a> <a href="#">string</a> <a href="#">vendor-specific</a>
Tree	<a href="#">vendor-specific</a>
Introduced	22.5.R1
Platforms	All

### **encoding**

Synopsis	Enter the <b>encoding</b> context
Context	<a href="#">debug router</a> <a href="#">string</a> <a href="#">radius servers</a> <a href="#">attribute</a> <a href="#">string</a> <a href="#">vendor-specific</a> <a href="#">encoding</a>
Tree	<a href="#">encoding</a>
Introduced	22.5.R1
Platforms	All

### **length-size** *number*

Synopsis	Size of the vendor-length field
Context	<a href="#">debug router</a> <a href="#">string</a> <a href="#">radius servers</a> <a href="#">attribute</a> <a href="#">string</a> <a href="#">vendor-specific</a> <a href="#">encoding</a> <a href="#">length-size</a> <a href="#">number</a>

Tree	<a href="#">length-size</a>
Range	0 to 2
Default	1
Introduced	22.5.R1
Platforms	All

### **type-size** *number*

Synopsis	Size of the vendor-type field
Context	<a href="#">debug router string radius servers attribute string vendor-specific encoding type-size number</a>
Tree	<a href="#">type-size</a>
Range	1 to 4
Default	1
Introduced	22.5.R1
Platforms	All

### **vendor** (*number* | *keyword*)

Synopsis	RADIUS vendor ID
Context	<a href="#">debug router string radius servers attribute string vendor-specific vendor (number   keyword)</a>
Tree	<a href="#">vendor</a>
Range	1 to 16777215
Options	nokia
Introduced	22.5.R1
Platforms	All

### **vendor-type** *number*

Synopsis	RADIUS vendor specific type
Context	<a href="#">debug router string radius servers attribute string vendor-specific vendor-type number</a>
Tree	<a href="#">vendor-type</a>
Max. Range	0 to 4294967295
Introduced	22.5.R1

Platforms All

### **detail-level** *keyword*

Synopsis Detail level of the RADIUS debug output  
Context [debug router](#) *string* [radius servers](#) **detail-level** *keyword*  
Tree [detail-level](#)  
Options low, medium, high  
Default medium  
Introduced 22.5.R1  
Platforms All

### **packet-types**

Synopsis Enter the **packet-types** context  
Context [debug router](#) *string* [radius servers](#) **packet-types**  
Tree [packet-types](#)  
Introduced 22.7.R1  
Platforms All

### **accounting** *boolean*

Synopsis Debug accounting packets  
Context [debug router](#) *string* [radius servers](#) **packet-types** **accounting** *boolean*  
Tree [accounting](#)  
Default true  
Introduced 22.7.R1  
Platforms All

### **authentication** *boolean*

Synopsis Debug authentication packets  
Context [debug router](#) *string* [radius servers](#) **packet-types** **authentication** *boolean*  
Tree [authentication](#)  
Default true

Introduced 22.7.R1  
 Platforms All

### **coa boolean**

Synopsis Debug CoA and DM packets  
 Context [debug router string radius servers packet-types coa boolean](#)  
 Tree [coa](#)  
 Default true  
 Introduced 22.7.R1  
 Platforms All

### **server-address [address] (ipv4-address-no-zone | ipv6-address-no-zone)**

Synopsis Add a list entry for **server-address**  
 Context [debug router string radius servers server-address \(ipv4-address-no-zone | ipv6-address-no-zone\)](#)  
 Tree [server-address](#)  
 Max. 10  
 Instances  
 Introduced 22.5.R1  
 Platforms All

### **[address] (ipv4-address-no-zone | ipv6-address-no-zone)**

Synopsis IP address of the RADIUS server  
 Context [debug router string radius servers server-address \(ipv4-address-no-zone | ipv6-address-no-zone\)](#)  
 Tree [server-address](#)  
 Notes This element is part of a list key.  
 Introduced 22.5.R1  
 Platforms All

### **vrrp**

Synopsis Enter the **vrrp** context

---

Context	<a href="#">debug router string vrrp</a>
Tree	<a href="#">vrrp</a>
Introduced	22.10.R1
Platforms	All

## events

Synopsis	Enter the <b>events</b> context
Context	<a href="#">debug router string vrrp events</a>
Tree	<a href="#">events</a>
Description	Commands in this context enable debugging for VRRP events and state changes.
Introduced	22.10.R1
Platforms	All

## all-events

Synopsis	Enable the <b>all-events</b> context
Context	<a href="#">debug router string vrrp events all-events</a>
Tree	<a href="#">all-events</a>
Introduced	22.10.R1
Platforms	All

## interface [[interface-name](#)] *string*

Synopsis	Enter the <b>interface</b> list instance
Context	<a href="#">debug router string vrrp events interface string</a>
Tree	<a href="#">interface</a>
Introduced	22.10.R1
Platforms	All

## [\[interface-name\]](#) *string*

Synopsis	Interface name
Context	<a href="#">debug router string vrrp events interface string</a>
Tree	<a href="#">interface</a>

String Length	1 to 32
Notes	This element is part of a list key.
Introduced	22.10.R1
Platforms	All

## all-vrids

Synopsis	Enable the <b>all-vrids</b> context
Context	<a href="#">debug router string vrrp events interface string all-vrids</a>
Tree	<a href="#">all-vrids</a>
Introduced	23.3.R1
Platforms	All

## ipv4

Synopsis	Enter the <b>ipv4</b> context
Context	<a href="#">debug router string vrrp events interface string ipv4</a>
Tree	<a href="#">ipv4</a>
Introduced	22.10.R1
Platforms	All

## vrid [[virtual-router-id](#)] *number*

Synopsis	Add a list entry for <b>vrid</b>
Context	<a href="#">debug router string vrrp events interface string ipv4 vrid number</a>
Tree	<a href="#">vrid</a>
Max. Instances	4
Introduced	22.10.R1
Platforms	All

## [\[virtual-router-id\]](#) *number*

Synopsis	Virtual router ID to debug
Context	<a href="#">debug router string vrrp events interface string ipv4 vrid number</a>

Tree	<a href="#">vrid</a>
Range	1 to 255
Notes	This element is part of a list key.
Introduced	22.10.R1
Platforms	All

## ipv6

Synopsis	Enter the <b>ipv6</b> context
Context	<a href="#">debug router</a> <i>string</i> <a href="#">vrrp events interface</a> <i>string</i> <a href="#">ipv6</a>
Tree	<a href="#">ipv6</a>
Introduced	22.10.R1
Platforms	All

## **vrid** [[virtual-router-id](#)] *number*

Synopsis	Add a list entry for <b>vrid</b>
Context	<a href="#">debug router</a> <i>string</i> <a href="#">vrrp events interface</a> <i>string</i> <a href="#">ipv6</a> <a href="#">vrid</a> <i>number</i>
Tree	<a href="#">vrid</a>
Max. Instances	4
Introduced	22.10.R1
Platforms	All

## [\[virtual-router-id\]](#) *number*

Synopsis	Virtual router ID to debug
Context	<a href="#">debug router</a> <i>string</i> <a href="#">vrrp events interface</a> <i>string</i> <a href="#">ipv6</a> <a href="#">vrid</a> <i>number</i>
Tree	<a href="#">vrid</a>
Range	1 to 255
Notes	This element is part of a list key.
Introduced	22.10.R1
Platforms	All

## packet

Synopsis	Enter the <b>packet</b> context
Context	<a href="#">debug router</a> <i>string</i> <a href="#">vrrp packet</a>
Tree	<a href="#">packet</a>
Description	Commands in this context enable debugging for VRRP packet exchanges.
Introduced	22.10.R1
Platforms	All

## all-packets

Synopsis	Enable the <b>all-packets</b> context
Context	<a href="#">debug router</a> <i>string</i> <a href="#">vrrp packet all-packets</a>
Tree	<a href="#">all-packets</a>
Introduced	22.10.R1
Platforms	All

## interface [[interface-name](#)] *string*

Synopsis	Enter the <b>interface</b> list instance
Context	<a href="#">debug router</a> <i>string</i> <a href="#">vrrp packet interface</a> <i>string</i>
Tree	<a href="#">interface</a>
Introduced	22.10.R1
Platforms	All

## [[interface-name](#)] *string*

Synopsis	Interface name
Context	<a href="#">debug router</a> <i>string</i> <a href="#">vrrp packet interface</a> <i>string</i>
Tree	<a href="#">interface</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	22.10.R1
Platforms	All

## all-vrids

Synopsis	Enable the <b>all-vrids</b> context
Context	<a href="#">debug router</a> <i>string</i> <a href="#">vrrp packet interface</a> <i>string</i> <b>all-vrids</b>
Tree	<a href="#">all-vrids</a>
Introduced	23.3.R1
Platforms	All

## ipv4

Synopsis	Enter the <b>ipv4</b> context
Context	<a href="#">debug router</a> <i>string</i> <a href="#">vrrp packet interface</a> <i>string</i> <b>ipv4</b>
Tree	<a href="#">ipv4</a>
Introduced	22.10.R1
Platforms	All

## vrid [[virtual-router-id](#)] *number*

Synopsis	Add a list entry for <b>vrid</b>
Context	<a href="#">debug router</a> <i>string</i> <a href="#">vrrp packet interface</a> <i>string</i> <b>ipv4 vrid</b> <i>number</i>
Tree	<a href="#">vrid</a>
Max. Instances	4
Introduced	22.10.R1
Platforms	All

## [\[virtual-router-id\]](#) *number*

Synopsis	Virtual router ID to debug
Context	<a href="#">debug router</a> <i>string</i> <a href="#">vrrp packet interface</a> <i>string</i> <b>ipv4 vrid</b> <i>number</i>
Tree	<a href="#">vrid</a>
Range	1 to 255
Notes	This element is part of a list key.
Introduced	22.10.R1
Platforms	All

## ipv6

Synopsis	Enter the <b>ipv6</b> context
Context	<code>debug router string vrrp packet interface string ipv6</code>
Tree	<code>ipv6</code>
Introduced	22.10.R1
Platforms	All

## vrid [*virtual-router-id*] *number*

Synopsis	Add a list entry for <b>vrid</b>
Context	<code>debug router string vrrp packet interface string ipv6 vrid number</code>
Tree	<code>vrid</code>
Max. Instances	4
Introduced	22.10.R1
Platforms	All

## [*virtual-router-id*] *number*

Synopsis	Virtual router ID to debug
Context	<code>debug router string vrrp packet interface string ipv6 vrid number</code>
Tree	<code>vrid</code>
Range	1 to 255
Notes	This element is part of a list key.
Introduced	22.10.R1
Platforms	All

## wpp

Synopsis	Enter the <b>wpp</b> context
Context	<code>debug router string wpp</code>
Tree	<code>wpp</code>
Introduced	22.7.R1
Platforms	All

## packets

Synopsis	Enable the <b>packets</b> context
Context	<a href="#">debug router string wpp packets</a>
Tree	<a href="#">packets</a>
Introduced	22.7.R1
Platforms	All

## detail-level *keyword*

Synopsis	Detail level of the WPP packet debug output
Context	<a href="#">debug router string wpp packets detail-level keyword</a>
Tree	<a href="#">detail-level</a>
Options	low, high
Default	low
Introduced	22.7.R1
Platforms	All

## portal [[name](#)] *string*

Synopsis	Enter the <b>portal</b> list instance
Context	<a href="#">debug router string wpp portal string</a>
Tree	<a href="#">portal</a>
Introduced	22.7.R1
Platforms	All

## [\[name\]](#) *string*

Synopsis	WPP portal name
Context	<a href="#">debug router string wpp portal string</a>
Tree	<a href="#">portal</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	22.7.R1
Platforms	All

## packets

Synopsis	Enter the <b>packets</b> context
Context	<a href="#">debug router</a> <i>string</i> <a href="#">wpp portal</a> <i>string</i> <a href="#">packets</a>
Tree	<a href="#">packets</a>
Introduced	22.7.R1
Platforms	All

## detail-level *keyword*

Synopsis	Detail level of the WPP packet debug output
Context	<a href="#">debug router</a> <i>string</i> <a href="#">wpp portal</a> <i>string</i> <a href="#">packets detail-level</a> <i>keyword</i>
Tree	<a href="#">detail-level</a>
Options	low, high
Default	low
Introduced	22.7.R1
Platforms	All

## service

Synopsis	Enter the <b>service</b> context
Context	<a href="#">debug service</a>
Tree	<a href="#">service</a>
Introduced	22.10.R1
Platforms	All

## ies [[service-name](#)] *string*

Synopsis	Enter the <b>ies</b> list instance
Context	<a href="#">debug service ies</a> <i>string</i>
Tree	<a href="#">ies</a>
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**[service-name] string**

Synopsis	Administrative service name
Context	<a href="#">debug service ies string</a>
Tree	<a href="#">ies</a>
String Length	1 to 64
Notes	This element is part of a list key.
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**ppp**

Synopsis	Enter the <b>ppp</b> context
Context	<a href="#">debug service ies string ppp</a>
Tree	<a href="#">ppp</a>
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**circuit-id [id] string**

Synopsis	Add a list entry for <b>circuit-id</b>
Context	<a href="#">debug service ies string ppp circuit-id string</a>
Tree	<a href="#">circuit-id</a>
Max. Instances	8
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**[id] string**

Synopsis	Circuit ID of the PPPoE session to debug
Context	<a href="#">debug service ies string ppp circuit-id string</a>
Tree	<a href="#">circuit-id</a>
String Length	1 to 255
Notes	This element is part of a list key.
Introduced	23.3.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## events

Synopsis Enable the **events** context

Context [debug service ies string ppp events](#)

Tree [events](#)

Introduced 23.3.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## all

Synopsis Enable PPP debugging for all events

Context [debug service ies string ppp events all](#)

Tree [all](#)

Notes The following elements are part of a mandatory choice: **all** or (**dhcp-client**, **l2tp**, **local-address-assignment**, and **ppp**).

Introduced 23.3.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## dhcp-client

Synopsis Enable the **dhcp-client** context

Context [debug service ies string ppp events dhcp-client](#)

Tree [dhcp-client](#)

Notes The following elements are part of a mandatory choice: **all** or (**dhcp-client**, **l2tp**, **local-address-assignment**, and **ppp**).

Introduced 23.3.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## terminate-only *boolean*

Synopsis Debug events for ungraceful terminated sessions only

Context [debug service ies string ppp events dhcp-client terminate-only boolean](#)

Tree [terminate-only](#)

Default false

Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## I2tp

Synopsis	Enable the <b>I2tp</b> context
Context	<a href="#">debug service ies string ppp events I2tp</a>
Tree	<a href="#">I2tp</a>
Description	Commands in this context configure debugging events for L2TP sessions.
Notes	The following elements are part of a mandatory choice: <b>all</b> or ( <b>dhcp-client</b> , <b>I2tp</b> , <b>local-address-assignment</b> , and <b>ppp</b> ).
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## terminate-only *boolean*

Synopsis	Debug events for ungraceful terminated sessions only
Context	<a href="#">debug service ies string ppp events I2tp terminate-only boolean</a>
Tree	<a href="#">terminate-only</a>
Default	false
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## local-address-assignment

Synopsis	Enable the <b>local-address-assignment</b> context
Context	<a href="#">debug service ies string ppp events local-address-assignment</a>
Tree	<a href="#">local-address-assignment</a>
Notes	The following elements are part of a mandatory choice: <b>all</b> or ( <b>dhcp-client</b> , <b>I2tp</b> , <b>local-address-assignment</b> , and <b>ppp</b> ).
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## terminate-only *boolean*

Synopsis	Debug events for ungraceful terminated sessions only
----------	--

Context	<a href="#">debug service ies string ppp events local-address-assignment terminate-only boolean</a>
Tree	<a href="#">terminate-only</a>
Default	false
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## ppp

Synopsis	Enable the <b>ppp</b> context
Context	<a href="#">debug service ies string ppp events ppp</a>
Tree	<a href="#">ppp</a>
Notes	The following elements are part of a mandatory choice: <b>all</b> or ( <b>dhcp-client</b> , <b>l2tp</b> , <b>local-address-assignment</b> , and <b>ppp</b> ).
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## terminate-only boolean

Synopsis	Debug events for ungraceful terminated sessions only
Context	<a href="#">debug service ies string ppp events ppp terminate-only boolean</a>
Tree	<a href="#">terminate-only</a>
Default	false
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## mac [address] string

Synopsis	Add a list entry for <b>mac</b>
Context	<a href="#">debug service ies string ppp mac string</a>
Tree	<a href="#">mac</a>
Max. Instances	8
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**[address] string**

Synopsis	MAC address of the PPPoE session to debug
Context	<a href="#">debug service ies string ppp mac string</a>
Tree	<a href="#">mac</a>
Notes	This element is part of a list key.
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**packets**

Synopsis	Enable the <b>packets</b> context
Context	<a href="#">debug service ies string ppp packets</a>
Tree	<a href="#">packets</a>
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**all**

Synopsis	Enable PPP debugging for all packets
Context	<a href="#">debug service ies string ppp packets all</a>
Tree	<a href="#">all</a>
Notes	The following elements are part of a mandatory choice: <b>all</b> or ( <b>dhcp-client</b> , <b>discovery</b> , and <b>ppp-session</b> ).
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**detail-level keyword**

Synopsis	Detail level of the PPP packet debug output
Context	<a href="#">debug service ies string ppp packets detail-level keyword</a>
Tree	<a href="#">detail-level</a>
Options	low, medium, high
Default	high
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**dhcp-client *boolean***

Synopsis	Enable DHCP client packet debugging
Context	<a href="#">debug service ies string ppp packets dhcp-client boolean</a>
Tree	<a href="#">dhcp-client</a>
Default	false
Notes	The following elements are part of a mandatory choice: <b>all</b> or ( <b>dhcp-client</b> , <b>discovery</b> , and <b>ppp-session</b> ).
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**discovery**

Synopsis	Enter the <b>discovery</b> context
Context	<a href="#">debug service ies string ppp packets discovery</a>
Tree	<a href="#">discovery</a>
Notes	The following elements are part of a mandatory choice: <b>all</b> or ( <b>dhcp-client</b> , <b>discovery</b> , and <b>ppp-session</b> ).
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**all**

Synopsis	Enable PPP debugging for all discovery packets
Context	<a href="#">debug service ies string ppp packets discovery all</a>
Tree	<a href="#">all</a>
Notes	The following elements are part of a choice: <b>all</b> or ( <b>padi</b> , <b>pado</b> , <b>padr</b> , <b>pads</b> , and <b>padt</b> ).
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**padi *boolean***

Synopsis	Enable PPP debugging for PADI discovery packets
Context	<a href="#">debug service ies string ppp packets discovery padi boolean</a>
Tree	<a href="#">padi</a>

---

Default	false
Notes	The following elements are part of a choice: <b>all</b> or ( <b>padi</b> , <b>pado</b> , <b>padr</b> , <b>pads</b> , and <b>padt</b> ).
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **pado** *boolean*

Synopsis	Enable PPP debugging for PADO discovery packets
Context	<a href="#">debug service ies string ppp packets discovery pado</a> <i>boolean</i>
Tree	<a href="#">pado</a>
Default	false
Notes	The following elements are part of a choice: <b>all</b> or ( <b>padi</b> , <b>pado</b> , <b>padr</b> , <b>pads</b> , and <b>padt</b> ).
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **padr** *boolean*

Synopsis	Enable PPP debugging for PADR discovery packets
Context	<a href="#">debug service ies string ppp packets discovery padr</a> <i>boolean</i>
Tree	<a href="#">padr</a>
Default	false
Notes	The following elements are part of a choice: <b>all</b> or ( <b>padi</b> , <b>pado</b> , <b>padr</b> , <b>pads</b> , and <b>padt</b> ).
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **pads** *boolean*

Synopsis	Enable PPP debugging for PADS discovery packets
Context	<a href="#">debug service ies string ppp packets discovery pads</a> <i>boolean</i>
Tree	<a href="#">pads</a>
Default	false
Notes	The following elements are part of a choice: <b>all</b> or ( <b>padi</b> , <b>pado</b> , <b>padr</b> , <b>pads</b> , and <b>padt</b> ).
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **padt** *boolean*

Synopsis	Enable PPP debugging for PADT discovery packets
Context	<a href="#">debug service ies</a> <i>string</i> <a href="#">ppp packets discovery</a> <b>padt</b> <i>boolean</i>
Tree	<a href="#">padt</a>
Default	false
Notes	The following elements are part of a choice: <b>all</b> or ( <b>padi</b> , <b>pado</b> , <b>padr</b> , <b>pads</b> , and <b>padt</b> ).
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **mode** *keyword*

Synopsis	PPP packets present in the debug output
Context	<a href="#">debug service ies</a> <i>string</i> <a href="#">ppp packets</a> <b>mode</b> <i>keyword</i>
Tree	<a href="#">mode</a>
Options	dropped-only, ingress-and-dropped, egress-ingress-and-dropped
Default	dropped-only
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **ppp-session**

Synopsis	Enter the <b>ppp-session</b> context
Context	<a href="#">debug service ies</a> <i>string</i> <a href="#">ppp packets</a> <b>ppp-session</b>
Tree	<a href="#">ppp-session</a>
Notes	The following elements are part of a mandatory choice: <b>all</b> or ( <b>dhcp-client</b> , <b>discovery</b> , and <b>ppp-session</b> ).
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **all**

Synopsis	Enable PPP debugging for all PPP session packets
Context	<a href="#">debug service ies</a> <i>string</i> <a href="#">ppp packets</a> <b>ppp-session</b> <b>all</b>
Tree	<a href="#">all</a>

---

Notes	The following elements are part of a choice: <b>all</b> or ( <b>chap</b> , <b>ipcp</b> , <b>ipv6cp</b> , <b>lcp</b> , and <b>pap</b> ).
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **chap** *boolean*

Synopsis	Enable PPP debugging for CHAP authentication packets
Context	<a href="#">debug service ies string ppp packets ppp-session chap</a> <i>boolean</i>
Tree	<a href="#">chap</a>
Default	false
Notes	The following elements are part of a choice: <b>all</b> or ( <b>chap</b> , <b>ipcp</b> , <b>ipv6cp</b> , <b>lcp</b> , and <b>pap</b> ).
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **ipcp** *boolean*

Synopsis	Enable PPP debugging for IPCP NCP packets
Context	<a href="#">debug service ies string ppp packets ppp-session ipcp</a> <i>boolean</i>
Tree	<a href="#">ipcp</a>
Default	false
Notes	The following elements are part of a choice: <b>all</b> or ( <b>chap</b> , <b>ipcp</b> , <b>ipv6cp</b> , <b>lcp</b> , and <b>pap</b> ).
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **ipv6cp** *boolean*

Synopsis	Enable PPP debugging for IPv6CP NCP packets
Context	<a href="#">debug service ies string ppp packets ppp-session ipv6cp</a> <i>boolean</i>
Tree	<a href="#">ipv6cp</a>
Default	false
Notes	The following elements are part of a choice: <b>all</b> or ( <b>chap</b> , <b>ipcp</b> , <b>ipv6cp</b> , <b>lcp</b> , and <b>pap</b> ).
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **lcp boolean**

Synopsis	Enable PPP debugging for LCP link establishment packets
Context	<a href="#">debug service ies string ppp packets ppp-session lcp boolean</a>
Tree	<a href="#">lcp</a>
Default	false
Notes	The following elements are part of a choice: <b>all</b> or ( <b>chap</b> , <b>ipcp</b> , <b>ipv6cp</b> , <b>lcp</b> , and <b>pap</b> ).
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **pap boolean**

Synopsis	Enable PPP debugging for PAP authentication packets
Context	<a href="#">debug service ies string ppp packets ppp-session pap boolean</a>
Tree	<a href="#">pap</a>
Default	false
Notes	The following elements are part of a choice: <b>all</b> or ( <b>chap</b> , <b>ipcp</b> , <b>ipv6cp</b> , <b>lcp</b> , and <b>pap</b> ).
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **remote-id [id] string**

Synopsis	Add a list entry for <b>remote-id</b>
Context	<a href="#">debug service ies string ppp remote-id string</a>
Tree	<a href="#">remote-id</a>
Max. Instances	8
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **[id] string**

Synopsis	Remote ID of the PPPoE session to debug
Context	<a href="#">debug service ies string ppp remote-id string</a>
Tree	<a href="#">remote-id</a>
String Length	1 to 255

Notes	This element is part of a list key.
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **sap** [[sap-id](#)] *string*

Synopsis	Add a list entry for <b>sap</b>
Context	<a href="#">debug service ies string ppp sap string</a>
Tree	<a href="#">sap</a>
Max. Instances	8
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **[sap-id]** *string*

Synopsis	SAP ID of the PPPoE session to debug
Context	<a href="#">debug service ies string ppp sap string</a>
Tree	<a href="#">sap</a>
String Length	1 to 45
Notes	This element is part of a list key.
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **user-name** [[name](#)] *string*

Synopsis	Add a list entry for <b>user-name</b>
Context	<a href="#">debug service ies string ppp user-name string</a>
Tree	<a href="#">user-name</a>
Max. Instances	8
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**[name] string**

Synopsis	Username of the PPPoE session to debug
Context	<a href="#">debug service ies string ppp user-name string</a>
Tree	<a href="#">user-name</a>
Description	This command configures the username of the PPPoE session to debug. Only packets after the PAP or CHAP authentication are logged. If the purpose is to include PPPoE discovery packets in the debug log, configure a MAC filter instead.
String Length	1 to 255
Notes	This element is part of a list key.
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**vpls [service-name] string**

Synopsis	Enter the <b>vpls</b> list instance
Context	<a href="#">debug service vpls string</a>
Tree	<a href="#">vpls</a>
Introduced	22.10.R1
Platforms	All

**[service-name] string**

Synopsis	Administrative service name
Context	<a href="#">debug service vpls string</a>
Tree	<a href="#">vpls</a>
String Length	1 to 64
Notes	This element is part of a list key.
Introduced	22.10.R1
Platforms	All

**igmp-snooping**

Synopsis	Enter the <b>igmp-snooping</b> context
Context	<a href="#">debug service vpls string igmp-snooping</a>
Tree	<a href="#">igmp-snooping</a>

Introduced 22.10.R1  
Platforms All

## **packet**

Synopsis Enable the **packet** context  
Context [debug service vpls string igmp-snooping packet](#)  
Tree [packet](#)  
Introduced 22.10.R1  
Platforms All

## **detail keyword**

Synopsis Detail level of the debug output  
Context [debug service vpls string igmp-snooping packet detail keyword](#)  
Tree [detail](#)  
Options low, medium, high  
Default medium  
Introduced 22.10.R1  
Platforms All

## **dropped boolean**

Synopsis Enable tracing for dropped packets  
Context [debug service vpls string igmp-snooping packet dropped boolean](#)  
Tree [dropped](#)  
Default true  
Introduced 22.10.R1  
Platforms All

## **egress boolean**

Synopsis Enable tracing for transmitted packets  
Context [debug service vpls string igmp-snooping packet egress boolean](#)  
Tree [egress](#)

Default	true
Introduced	22.10.R1
Platforms	All

**evpn-mpls** *boolean*

Synopsis	Allow debugging for EVPN-MPLS destinations
Context	<a href="#">debug service vpls</a> <i>string</i> <a href="#">igmp-snooping packet evpn-mpls</a> <i>boolean</i>
Tree	<a href="#">evpn-mpls</a>
Default	false
Introduced	22.10.R1
Platforms	All

**evpn-vxlan** [[ip-address](#)] (*ipv4-address-no-zone* | *ipv6-address-no-zone*) *vni number*

Synopsis	Add a list entry for <b>evpn-vxlan</b>
Context	<a href="#">debug service vpls</a> <i>string</i> <a href="#">igmp-snooping packet evpn-vxlan</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <i>vni number</i>
Tree	<a href="#">evpn-vxlan</a>
Max. Instances	8
Introduced	22.10.R1
Platforms	All

**[ip-address]** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	IP address of the VXLAN Tunnel Endpoint
Context	<a href="#">debug service vpls</a> <i>string</i> <a href="#">igmp-snooping packet evpn-vxlan</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <i>vni number</i>
Tree	<a href="#">evpn-vxlan</a>
Notes	This element is part of a list key.
Introduced	22.10.R1
Platforms	All

**vni number**

Synopsis	VXLAN Network Identifier of the VXLAN binding
Context	<a href="#">debug service vpls string igmp-snooping packet evpn-vxlan</a> ( <a href="#">ipv4-address-no-zone</a>   <a href="#">ipv6-address-no-zone</a> ) <a href="#">vni number</a>
Tree	<a href="#">evpn-vxlan</a>
Range	1 to 16777215
Notes	This element is part of a list key.
Introduced	22.10.R1
Platforms	All

**ingress boolean**

Synopsis	Enable tracing for received packets
Context	<a href="#">debug service vpls string igmp-snooping packet ingress boolean</a>
Tree	<a href="#">ingress</a>
Default	true
Introduced	22.10.R1
Platforms	All

**mac [mac-address] string**

Synopsis	Add a list entry for <b>mac</b>
Context	<a href="#">debug service vpls string igmp-snooping packet mac string</a>
Tree	<a href="#">mac</a>
Max. Instances	8
Introduced	22.10.R1
Platforms	All

**[mac-address] string**

Synopsis	MAC address
Context	<a href="#">debug service vpls string igmp-snooping packet mac string</a>
Tree	<a href="#">mac</a>
Notes	This element is part of a list key.

Introduced 22.10.R1  
 Platforms All

### **sap** [[sap-id](#)] *string*

Synopsis Add a list entry for **sap**  
 Context [debug service vpls string igmp-snooping packet sap string](#)  
 Tree [sap](#)  
 Max. Instances 8  
 Introduced 22.10.R1  
 Platforms All

### **[sap-id]** *string*

Synopsis SAP ID  
 Context [debug service vpls string igmp-snooping packet sap string](#)  
 Tree [sap](#)  
 String Length 1 to 45  
 Notes This element is part of a list key.  
 Introduced 22.10.R1  
 Platforms All

### **sdp-bind** [[sdp-bind-id](#)] *string*

Synopsis Add a list entry for **sdp-bind**  
 Context [debug service vpls string igmp-snooping packet sdp-bind string](#)  
 Tree [sdp-bind](#)  
 Max. Instances 8  
 Introduced 22.10.R1  
 Platforms All

### **[sdp-bind-id]** *string*

Synopsis SDP bind ID

Context	<a href="#">debug service vpls string igmp-snooping packet sdp-bind string</a>
Tree	<a href="#">sdp-bind</a>
String Length	3 to 16
Notes	This element is part of a list key.
Introduced	22.10.R1
Platforms	All

## mld-snooping

Synopsis	Enter the <b>mld-snooping</b> context
Context	<a href="#">debug service vpls string mld-snooping</a>
Tree	<a href="#">mld-snooping</a>
Introduced	22.10.R1
Platforms	All

## packet

Synopsis	Enable the <b>packet</b> context
Context	<a href="#">debug service vpls string mld-snooping packet</a>
Tree	<a href="#">packet</a>
Introduced	22.10.R1
Platforms	All

## detail *keyword*

Synopsis	Detail level of the debug output
Context	<a href="#">debug service vpls string mld-snooping packet detail keyword</a>
Tree	<a href="#">detail</a>
Options	low, medium, high
Default	medium
Introduced	22.10.R1
Platforms	All

**dropped** *boolean*

Synopsis	Enable tracing for dropped packets
Context	<a href="#">debug service vpls</a> <i>string</i> <a href="#">mld-snooping packet dropped</a> <i>boolean</i>
Tree	<a href="#">dropped</a>
Default	true
Introduced	22.10.R1
Platforms	All

**egress** *boolean*

Synopsis	Enable tracing for transmitted packets
Context	<a href="#">debug service vpls</a> <i>string</i> <a href="#">mld-snooping packet egress</a> <i>boolean</i>
Tree	<a href="#">egress</a>
Default	true
Introduced	22.10.R1
Platforms	All

**evpn-mpls** *boolean*

Synopsis	Allow debugging for EVPN-MPLS destinations
Context	<a href="#">debug service vpls</a> <i>string</i> <a href="#">mld-snooping packet evpn-mpls</a> <i>boolean</i>
Tree	<a href="#">evpn-mpls</a>
Default	false
Introduced	22.10.R1
Platforms	All

**evpn-vxlan** [[ip-address](#)] (*ipv4-address-no-zone* | *ipv6-address-no-zone*) [vni](#) *number*

Synopsis	Add a list entry for <b>evpn-vxlan</b>
Context	<a href="#">debug service vpls</a> <i>string</i> <a href="#">mld-snooping packet evpn-vxlan</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <a href="#">vni</a> <i>number</i>
Tree	<a href="#">evpn-vxlan</a>
Max. Instances	8
Introduced	22.10.R1

Platforms All

### **[ip-address]** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis IP address of the VXLAN Tunnel Endpoint

Context [debug service vpls string mld-snooping packet evpn-vxlan](#) (*ipv4-address-no-zone* | *ipv6-address-no-zone*) [vni number](#)

Tree [evpn-vxlan](#)

Notes This element is part of a list key.

Introduced 22.10.R1

Platforms All

### **vni number**

Synopsis VXLAN Network Identifier of the VXLAN binding

Context [debug service vpls string mld-snooping packet evpn-vxlan](#) (*ipv4-address-no-zone* | *ipv6-address-no-zone*) [vni number](#)

Tree [evpn-vxlan](#)

Range 1 to 16777215

Notes This element is part of a list key.

Introduced 22.10.R1

Platforms All

### **ingress boolean**

Synopsis Enable tracing for received packets

Context [debug service vpls string mld-snooping packet ingress boolean](#)

Tree [ingress](#)

Default true

Introduced 22.10.R1

Platforms All

### **mac** [[mac-address](#)] *string*

Synopsis Add a list entry for **mac**

Context [debug service vpls string mld-snooping packet mac string](#)

Tree	<a href="#">mac</a>
Max. Instances	8
Introduced	22.10.R1
Platforms	All

**[mac-address]** *string*

Synopsis	MAC address
Context	<a href="#">debug service vpls string mld-snooping packet mac string</a>
Tree	<a href="#">mac</a>
Notes	This element is part of a list key.
Introduced	22.10.R1
Platforms	All

**sap** [[sap-id](#)] *string*

Synopsis	Add a list entry for <b>sap</b>
Context	<a href="#">debug service vpls string mld-snooping packet sap string</a>
Tree	<a href="#">sap</a>
Max. Instances	8
Introduced	22.10.R1
Platforms	All

**[sap-id]** *string*

Synopsis	SAP ID
Context	<a href="#">debug service vpls string mld-snooping packet sap string</a>
Tree	<a href="#">sap</a>
String Length	1 to 45
Notes	This element is part of a list key.
Introduced	22.10.R1
Platforms	All

**sdp-bind** [**sdp-bind-id**] *string*

Synopsis	Add a list entry for <b>sdp-bind</b>
Context	<a href="#">debug service vpls</a> <i>string</i> <a href="#">mld-snooping packet sdp-bind</a> <i>string</i>
Tree	<a href="#">sdp-bind</a>
Max. Instances	8
Introduced	22.10.R1
Platforms	All

**[sdp-bind-id]** *string*

Synopsis	SDP bind ID
Context	<a href="#">debug service vpls</a> <i>string</i> <a href="#">mld-snooping packet sdp-bind</a> <i>string</i>
Tree	<a href="#">sdp-bind</a>
String Length	3 to 16
Notes	This element is part of a list key.
Introduced	22.10.R1
Platforms	All

**mrp**

Synopsis	Enter the <b>mrp</b> context
Context	<a href="#">debug service vpls</a> <i>string</i> <a href="#">mrp</a>
Tree	<a href="#">mrp</a>
Introduced	23.10.R1
Platforms	All

**events**

Synopsis	Enable the <b>events</b> context
Context	<a href="#">debug service vpls</a> <i>string</i> <a href="#">mrp events</a>
Tree	<a href="#">events</a>
Introduced	23.10.R1
Platforms	All

## all-events

Synopsis	Trace all MRP events
Context	<a href="#">debug service vpls</a> <i>string</i> <a href="#">mrp events all-events</a>
Tree	<a href="#">all-events</a>
Description	When specified, the system traces all MRP events, including applicant, leave all, periodic and registrant state machines, and received and transmitted MRP PDUs.
Notes	The following elements are part of a choice: <b>all-events</b> or <b>event-types</b> .
Introduced	23.10.R1
Platforms	All

## event-types

Synopsis	Enter the <b>event-types</b> context
Context	<a href="#">debug service vpls</a> <i>string</i> <a href="#">mrp events event-types</a>
Tree	<a href="#">event-types</a>
Notes	The following elements are part of a choice: <b>all-events</b> or <b>event-types</b> .
Introduced	23.10.R1
Platforms	All

## applicant-sm *boolean*

Synopsis	Trace the applicant state machine
Context	<a href="#">debug service vpls</a> <i>string</i> <a href="#">mrp events event-types applicant-sm</a> <i>boolean</i>
Tree	<a href="#">applicant-sm</a>
Default	false
Introduced	23.10.R1
Platforms	All

## leave-all-sm *boolean*

Synopsis	Trace leave all state machine changes
Context	<a href="#">debug service vpls</a> <i>string</i> <a href="#">mrp events event-types leave-all-sm</a> <i>boolean</i>
Tree	<a href="#">leave-all-sm</a>
Default	false

Introduced 23.10.R1  
Platforms All

### **mrpdu** *boolean*

Synopsis Trace received and transmitted PDUs  
Context [debug service vpls](#) *string* [mrp events event-types](#) [mrpdu](#) *boolean*  
Tree [mrpdu](#)  
Default false  
Introduced 23.10.R1  
Platforms All

### **periodic-sm** *boolean*

Synopsis Trace periodic state machine changes  
Context [debug service vpls](#) *string* [mrp events event-types](#) [periodic-sm](#) *boolean*  
Tree [periodic-sm](#)  
Default false  
Introduced 23.10.R1  
Platforms All

### **registrant-sm** *boolean*

Synopsis Trace registrant state machine changes  
Context [debug service vpls](#) *string* [mrp events event-types](#) [registrant-sm](#) *boolean*  
Tree [registrant-sm](#)  
Default false  
Introduced 23.10.R1  
Platforms All

### **mmp-mac** [[mac](#)] *string*

Synopsis Add a list entry for **mmp-mac**  
Context [debug service vpls](#) *string* [mrp mmp-mac](#) *string*  
Tree [mmp-mac](#)

Max. Instances	256
Introduced	23.10.R1
Platforms	All

**[mac]** *string*

Synopsis	MAC address to trace
Context	<a href="#">debug service vpls string mrrp mrrp-mac string</a>
Tree	<a href="#">mrrp-mac</a>
Notes	This element is part of a list key.
Introduced	23.10.R1
Platforms	All

**mvrp-vlan** [[vlan](#)] *number*

Synopsis	Add a list entry for <b>mvrp-vlan</b>
Context	<a href="#">debug service vpls string mrrp mvrp-vlan number</a>
Tree	<a href="#">mvrp-vlan</a>
Max. Instances	256
Introduced	23.10.R1
Platforms	All

**[vlan]** *number*

Synopsis	VLAN ID to trace
Context	<a href="#">debug service vpls string mrrp mvrp-vlan number</a>
Tree	<a href="#">mvrp-vlan</a>
Range	0 to 4094
Notes	This element is part of a list key.
Introduced	23.10.R1
Platforms	All

**sap** [[sap-id](#)] *string*

Synopsis	Add a list entry for <b>sap</b>
Context	<a href="#">debug service vpls</a> <i>string</i> <a href="#">mrp sap</a> <i>string</i>
Tree	<a href="#">sap</a>
Max. Instances	256
Introduced	23.10.R1
Platforms	All

**[sap-id]** *string*

Synopsis	SAP ID to trace
Context	<a href="#">debug service vpls</a> <i>string</i> <a href="#">mrp sap</a> <i>string</i>
Tree	<a href="#">sap</a>
String Length	1 to 45
Notes	This element is part of a list key.
Introduced	23.10.R1
Platforms	All

**sdp-bind** [[sdp-bind-id](#)] *string*

Synopsis	Add a list entry for <b>sdp-bind</b>
Context	<a href="#">debug service vpls</a> <i>string</i> <a href="#">mrp sdp-bind</a> <i>string</i>
Tree	<a href="#">sdp-bind</a>
Max. Instances	256
Introduced	23.10.R1
Platforms	All

**[sdp-bind-id]** *string*

Synopsis	SDP ID to trace
Context	<a href="#">debug service vpls</a> <i>string</i> <a href="#">mrp sdp-bind</a> <i>string</i>
Tree	<a href="#">sdp-bind</a>
String Length	3 to 16

Notes	This element is part of a list key.
Introduced	23.10.R1
Platforms	All

## pim-snooping

Synopsis	Enter the <b>pim-snooping</b> context
Context	<a href="#">debug service vpls string pim-snooping</a>
Tree	<a href="#">pim-snooping</a>
Introduced	22.10.R1
Platforms	All

## events

Synopsis	Enable the <b>events</b> context
Context	<a href="#">debug service vpls string pim-snooping events</a>
Tree	<a href="#">events</a>
Introduced	22.10.R1
Platforms	All

## adjacency

Synopsis	Enable the <b>adjacency</b> context
Context	<a href="#">debug service vpls string pim-snooping events adjacency</a>
Tree	<a href="#">adjacency</a>
Notes	The following elements are part of a choice: ( <b>adjacency</b> , <b>db</b> , <b>jp</b> , <b>mcs</b> , <b>port</b> , and <b>red</b> ) or <b>all</b> .
Introduced	22.10.R1
Platforms	All

## all

Synopsis	Enable the <b>all</b> context
Context	<a href="#">debug service vpls string pim-snooping events all</a>
Tree	<a href="#">all</a>

Notes	The following elements are part of a choice: ( <b>adjacency</b> , <b>db</b> , <b>jp</b> , <b>mcs</b> , <b>port</b> , and <b>red</b> ) or <b>all</b> .
Introduced	22.10.R1
Platforms	All

**detail** *boolean*

Synopsis	Enable detail tracing
Context	<a href="#">debug service vpls</a> <i>string</i> <a href="#">pim-snooping events all detail</a> <i>boolean</i>
Tree	<a href="#">detail</a>
Default	false
Introduced	22.10.R1
Platforms	All

**group-address** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	IP multicast group address used to trace events
Context	<a href="#">debug service vpls</a> <i>string</i> <a href="#">pim-snooping events all group-address</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	<a href="#">group-address</a>
Introduced	22.10.R1
Platforms	All

**source-address** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	Source address used to trace events
Context	<a href="#">debug service vpls</a> <i>string</i> <a href="#">pim-snooping events all source-address</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	<a href="#">source-address</a>
Introduced	22.10.R1
Platforms	All

**db**

Synopsis	Enable the <b>db</b> context
Context	<a href="#">debug service vpls</a> <i>string</i> <a href="#">pim-snooping events db</a>

Tree	<a href="#">db</a>
Notes	The following elements are part of a choice: ( <b>adjacency</b> , <b>db</b> , <b>jp</b> , <b>mcs</b> , <b>port</b> , and <b>red</b> ) or <b>all</b> .
Introduced	22.10.R1
Platforms	All

**detail *boolean***

Synopsis	Enable detail tracing
Context	<a href="#">debug service vpls</a> <i>string</i> <a href="#">pim-snooping events db detail <i>boolean</i></a>
Tree	<a href="#">detail</a>
Default	false
Introduced	22.10.R1
Platforms	All

**group-address (*ipv4-address-no-zone* | *ipv6-address-no-zone*)**

Synopsis	IP multicast group address used to trace events
Context	<a href="#">debug service vpls</a> <i>string</i> <a href="#">pim-snooping events db group-address (<i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i>)</a>
Tree	<a href="#">group-address</a>
Introduced	22.10.R1
Platforms	All

**source-address (*ipv4-address-no-zone* | *ipv6-address-no-zone*)**

Synopsis	Source address used to trace events
Context	<a href="#">debug service vpls</a> <i>string</i> <a href="#">pim-snooping events db source-address (<i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i>)</a>
Tree	<a href="#">source-address</a>
Introduced	22.10.R1
Platforms	All

**jp**

Synopsis	Enable the <b>jp</b> context
----------	------------------------------

Context	<a href="#">debug service vpls string pim-snooping events jp</a>
Tree	<a href="#">jp</a>
Description	Commands in this context enable debugging for PIM join and prune mechanisms.
Notes	The following elements are part of a choice: ( <b>adjacency</b> , <b>db</b> , <b>jp</b> , <b>mcs</b> , <b>port</b> , and <b>red</b> ) or <b>all</b> .
Introduced	22.10.R1
Platforms	All

**detail** *boolean*

Synopsis	Enable detail tracing
Context	<a href="#">debug service vpls string pim-snooping events jp detail boolean</a>
Tree	<a href="#">detail</a>
Default	false
Introduced	22.10.R1
Platforms	All

**group-address** (*ipv4-address-no-zone | ipv6-address-no-zone*)

Synopsis	IP multicast group address used to trace events
Context	<a href="#">debug service vpls string pim-snooping events jp group-address (ipv4-address-no-zone   ipv6-address-no-zone)</a>
Tree	<a href="#">group-address</a>
Introduced	22.10.R1
Platforms	All

**source-address** (*ipv4-address-no-zone | ipv6-address-no-zone*)

Synopsis	Source address used to trace events
Context	<a href="#">debug service vpls string pim-snooping events jp source-address (ipv4-address-no-zone   ipv6-address-no-zone)</a>
Tree	<a href="#">source-address</a>
Introduced	22.10.R1
Platforms	All

**mcs**

Synopsis	Enable the <b>mcs</b> context
Context	<a href="#">debug service vpls</a> <i>string</i> <a href="#">pim-snooping events mcs</a>
Tree	<a href="#">mcs</a>
Description	Commands in this context enable debugging for PIM snooping multi-chassis synchronization.
Notes	The following elements are part of a choice: ( <b>adjacency</b> , <b>db</b> , <b>jp</b> , <b>mcs</b> , <b>port</b> , and <b>red</b> ) or <b>all</b> .
Introduced	22.10.R1
Platforms	All

**detail** *boolean*

Synopsis	Enable detail tracing
Context	<a href="#">debug service vpls</a> <i>string</i> <a href="#">pim-snooping events mcs detail</a> <i>boolean</i>
Tree	<a href="#">detail</a>
Default	false
Introduced	22.10.R1
Platforms	All

**port**

Synopsis	Enable the <b>port</b> context
Context	<a href="#">debug service vpls</a> <i>string</i> <a href="#">pim-snooping events port</a>
Tree	<a href="#">port</a>
Notes	The following elements are part of a choice: ( <b>adjacency</b> , <b>db</b> , <b>jp</b> , <b>mcs</b> , <b>port</b> , and <b>red</b> ) or <b>all</b> .
Introduced	22.10.R1
Platforms	All

**detail** *boolean*

Synopsis	Enable detail tracing
Context	<a href="#">debug service vpls</a> <i>string</i> <a href="#">pim-snooping events port detail</a> <i>boolean</i>
Tree	<a href="#">detail</a>

Default	false
Introduced	22.10.R1
Platforms	All

### evpn-mpls

Synopsis	Enable tracing for EVPN-MPLS ports
Context	<a href="#">debug service vpls string pim-snooping events port evpn-mpls</a>
Tree	<a href="#">evpn-mpls</a>
Notes	The following elements are part of a mandatory choice: <b>evpn-mpls</b> , <b>sap-id</b> , <b>sdp-bind-id</b> , or ( <b>vni</b> and <b>vtep</b> ).
Introduced	22.10.R1
Platforms	All

### sap-id string

Synopsis	SAP ID
Context	<a href="#">debug service vpls string pim-snooping events port sap-id string</a>
Tree	<a href="#">sap-id</a>
String Length	1 to 45
Notes	The following elements are part of a mandatory choice: <b>evpn-mpls</b> , <b>sap-id</b> , <b>sdp-bind-id</b> , or ( <b>vni</b> and <b>vtep</b> ).
Introduced	22.10.R1
Platforms	All

### sdp-bind-id string

Synopsis	SDP bind ID
Context	<a href="#">debug service vpls string pim-snooping events port sdp-bind-id string</a>
Tree	<a href="#">sdp-bind-id</a>
String Length	3 to 16
Notes	The following elements are part of a mandatory choice: <b>evpn-mpls</b> , <b>sap-id</b> , <b>sdp-bind-id</b> , or ( <b>vni</b> and <b>vtep</b> ).
Introduced	22.10.R1
Platforms	All

**vni number**

Synopsis	VXLAN Network Identifier of the VXLAN binding
Context	<code>debug service vpls string pim-snooping events port vni number</code>
Tree	<code>vni</code>
Range	1 to 16777215
Notes	The following elements are part of a mandatory choice: <b>evpn-mpls</b> , <b>sap-id</b> , <b>sdp-bind-id</b> , or ( <b>vni</b> and <b>vtep</b> ).
Introduced	22.10.R1
Platforms	All

**vtep (ipv4-address-no-zone | ipv6-address-no-zone)**

Synopsis	IP address of the tunnel endpoint
Context	<code>debug service vpls string pim-snooping events port vtep (ipv4-address-no-zone   ipv6-address-no-zone)</code>
Tree	<code>vtep</code>
Notes	The following elements are part of a mandatory choice: <b>evpn-mpls</b> , <b>sap-id</b> , <b>sdp-bind-id</b> , or ( <b>vni</b> and <b>vtep</b> ).
Introduced	22.10.R1
Platforms	All

**red**

Synopsis	Enable the <b>red</b> context
Context	<code>debug service vpls string pim-snooping events red</code>
Tree	<code>red</code>
Description	Commands in this context enable debugging for PIM messages sent to the standby CPM.
Notes	The following elements are part of a choice: ( <b>adjacency</b> , <b>db</b> , <b>jp</b> , <b>mcs</b> , <b>port</b> , and <b>red</b> ) or <b>all</b> .
Introduced	22.10.R1
Platforms	All

### **detail** *boolean*

Synopsis	Enable detail tracing
Context	<a href="#">debug service vpls</a> <i>string</i> <a href="#">pim-snooping events red detail</a> <i>boolean</i>
Tree	<a href="#">detail</a>
Default	false
Introduced	22.10.R1
Platforms	All

### **packet**

Synopsis	Enable the <b>packet</b> context
Context	<a href="#">debug service vpls</a> <i>string</i> <a href="#">pim-snooping packet</a>
Tree	<a href="#">packet</a>
Introduced	22.10.R1
Platforms	All

### **all-origins**

Synopsis	Allow tracing on all ports
Context	<a href="#">debug service vpls</a> <i>string</i> <a href="#">pim-snooping packet all-origins</a>
Tree	<a href="#">all-origins</a>
Notes	The following elements are part of a choice: <b>all-origins</b> or <b>port</b> .
Introduced	22.10.R1
Platforms	All

### **all-packet-types**

Synopsis	Enable PIM debugging for all packets
Context	<a href="#">debug service vpls</a> <i>string</i> <a href="#">pim-snooping packet all-packet-types</a>
Tree	<a href="#">all-packet-types</a>
Notes	The following elements are part of a choice: <b>all-packet-types</b> or <b>packet-types</b> .
Introduced	22.10.R1
Platforms	All

## packet-types

Synopsis	Enter the <b>packet-types</b> context
Context	<a href="#">debug service vpls string pim-snooping packet packet-types</a>
Tree	<a href="#">packet-types</a>
Notes	The following elements are part of a choice: <b>all-packet-types</b> or <b>packet-types</b> .
Introduced	22.10.R1
Platforms	All

## hello *boolean*

Synopsis	Debug Hello packets
Context	<a href="#">debug service vpls string pim-snooping packet packet-types hello boolean</a>
Tree	<a href="#">hello</a>
Default	false
Introduced	22.10.R1
Platforms	All

## jp *boolean*

Synopsis	Debug join and prune packets
Context	<a href="#">debug service vpls string pim-snooping packet packet-types jp boolean</a>
Tree	<a href="#">jp</a>
Default	false
Introduced	22.10.R1
Platforms	All

## port

Synopsis	Enable the <b>port</b> context
Context	<a href="#">debug service vpls string pim-snooping packet port</a>
Tree	<a href="#">port</a>
Notes	The following elements are part of a choice: <b>all-origins</b> or <b>port</b> .
Introduced	22.10.R1
Platforms	All

## evpn-mpls

Synopsis	Enable tracing for EVPN-MPLS ports
Context	<a href="#">debug service vpls</a> <i>string</i> <a href="#">pim-snooping packet port evpn-mpls</a>
Tree	<a href="#">evpn-mpls</a>
Notes	The following elements are part of a mandatory choice: <b>evpn-mpls</b> , <b>sap-id</b> , <b>sdp-bind-id</b> , or ( <b>vni</b> and <b>vtep</b> ).
Introduced	22.10.R1
Platforms	All

## sap-id *string*

Synopsis	SAP ID
Context	<a href="#">debug service vpls</a> <i>string</i> <a href="#">pim-snooping packet port sap-id</a> <i>string</i>
Tree	<a href="#">sap-id</a>
String Length	1 to 45
Notes	The following elements are part of a mandatory choice: <b>evpn-mpls</b> , <b>sap-id</b> , <b>sdp-bind-id</b> , or ( <b>vni</b> and <b>vtep</b> ).
Introduced	22.10.R1
Platforms	All

## sdp-bind-id *string*

Synopsis	SDP bind ID
Context	<a href="#">debug service vpls</a> <i>string</i> <a href="#">pim-snooping packet port sdp-bind-id</a> <i>string</i>
Tree	<a href="#">sdp-bind-id</a>
String Length	3 to 16
Notes	The following elements are part of a mandatory choice: <b>evpn-mpls</b> , <b>sap-id</b> , <b>sdp-bind-id</b> , or ( <b>vni</b> and <b>vtep</b> ).
Introduced	22.10.R1
Platforms	All

## vni *number*

Synopsis	VXLAN Network Identifier of the VXLAN binding
Context	<a href="#">debug service vpls</a> <i>string</i> <a href="#">pim-snooping packet port vni</a> <i>number</i>

Tree	<a href="#">vni</a>
Range	1 to 16777215
Notes	The following elements are part of a mandatory choice: <b>evpn-mpls</b> , <b>sap-id</b> , <b>sdp-bind-id</b> , or ( <b>vni</b> and <b>vtep</b> ).
Introduced	22.10.R1
Platforms	All

### **vtep** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	IP address of the tunnel endpoint
Context	<a href="#">debug service vpls string pim-snooping packet port vtep</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	<a href="#">vtep</a>
Notes	The following elements are part of a mandatory choice: <b>evpn-mpls</b> , <b>sap-id</b> , <b>sdp-bind-id</b> , or ( <b>vni</b> and <b>vtep</b> ).
Introduced	22.10.R1
Platforms	All

### **ppp**

Synopsis	Enter the <b>ppp</b> context
Context	<a href="#">debug service vpls string ppp</a>
Tree	<a href="#">ppp</a>
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **circuit-id** [*id*] *string*

Synopsis	Add a list entry for <b>circuit-id</b>
Context	<a href="#">debug service vpls string ppp circuit-id string</a>
Tree	<a href="#">circuit-id</a>
Max. Instances	8
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**[id]** *string*

Synopsis	Circuit ID of the PPPoE session to debug
Context	<a href="#">debug service vpls string ppp circuit-id string</a>
Tree	<a href="#">circuit-id</a>
String Length	1 to 255
Notes	This element is part of a list key.
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**events**

Synopsis	Enable the <b>events</b> context
Context	<a href="#">debug service vpls string ppp events</a>
Tree	<a href="#">events</a>
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**all**

Synopsis	Enable PPP debugging for all events
Context	<a href="#">debug service vpls string ppp events all</a>
Tree	<a href="#">all</a>
Notes	The following elements are part of a mandatory choice: <b>all</b> or ( <b>dhcp-client</b> , <b>l2tp</b> , <b>local-address-assignment</b> , and <b>ppp</b> ).
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**dhcp-client**

Synopsis	Enable the <b>dhcp-client</b> context
Context	<a href="#">debug service vpls string ppp events dhcp-client</a>
Tree	<a href="#">dhcp-client</a>
Notes	The following elements are part of a mandatory choice: <b>all</b> or ( <b>dhcp-client</b> , <b>l2tp</b> , <b>local-address-assignment</b> , and <b>ppp</b> ).

Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **terminate-only** *boolean*

Synopsis	Debug events for ungraceful terminated sessions only
Context	<a href="#">debug service vpls</a> <i>string</i> <a href="#">ppp events dhcp-client terminate-only</a> <i>boolean</i>
Tree	<a href="#">terminate-only</a>
Default	false
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **l2tp**

Synopsis	Enable the <b>l2tp</b> context
Context	<a href="#">debug service vpls</a> <i>string</i> <a href="#">ppp events l2tp</a>
Tree	<a href="#">l2tp</a>
Description	Commands in this context configure debugging events for L2TP sessions.
Notes	The following elements are part of a mandatory choice: <b>all</b> or ( <b>dhcp-client</b> , <b>l2tp</b> , <b>local-address-assignment</b> , and <b>ppp</b> ).
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **terminate-only** *boolean*

Synopsis	Debug events for ungraceful terminated sessions only
Context	<a href="#">debug service vpls</a> <i>string</i> <a href="#">ppp events l2tp terminate-only</a> <i>boolean</i>
Tree	<a href="#">terminate-only</a>
Default	false
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **local-address-assignment**

Synopsis	Enable the <b>local-address-assignment</b> context
----------	--

Context	<a href="#">debug service vpls string ppp events local-address-assignment</a>
Tree	<a href="#">local-address-assignment</a>
Notes	The following elements are part of a mandatory choice: <b>all</b> or ( <b>dhcp-client</b> , <b>l2tp</b> , <b>local-address-assignment</b> , and <b>ppp</b> ).
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **terminate-only** *boolean*

Synopsis	Debug events for ungraceful terminated sessions only
Context	<a href="#">debug service vpls string ppp events local-address-assignment terminate-only boolean</a>
Tree	<a href="#">terminate-only</a>
Default	false
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **ppp**

Synopsis	Enable the <b>ppp</b> context
Context	<a href="#">debug service vpls string ppp events ppp</a>
Tree	<a href="#">ppp</a>
Notes	The following elements are part of a mandatory choice: <b>all</b> or ( <b>dhcp-client</b> , <b>l2tp</b> , <b>local-address-assignment</b> , and <b>ppp</b> ).
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **terminate-only** *boolean*

Synopsis	Debug events for ungraceful terminated sessions only
Context	<a href="#">debug service vpls string ppp events ppp terminate-only boolean</a>
Tree	<a href="#">terminate-only</a>
Default	false
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**mac** [address] *string*

Synopsis	Add a list entry for <b>mac</b>
Context	<a href="#">debug service vpls</a> <i>string</i> <a href="#">ppp mac</a> <i>string</i>
Tree	<a href="#">mac</a>
Max. Instances	8
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**[address]** *string*

Synopsis	MAC address of the PPPoE session to debug
Context	<a href="#">debug service vpls</a> <i>string</i> <a href="#">ppp mac</a> <i>string</i>
Tree	<a href="#">mac</a>
Notes	This element is part of a list key.
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**packets**

Synopsis	Enable the <b>packets</b> context
Context	<a href="#">debug service vpls</a> <i>string</i> <a href="#">ppp packets</a>
Tree	<a href="#">packets</a>
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**all**

Synopsis	Enable PPP debugging for all packets
Context	<a href="#">debug service vpls</a> <i>string</i> <a href="#">ppp packets all</a>
Tree	<a href="#">all</a>
Notes	The following elements are part of a mandatory choice: <b>all</b> or ( <b>dhcp-client</b> , <b>discovery</b> , and <b>ppp-session</b> ).
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**detail-level** *keyword*

Synopsis	Detail level of the PPP packet debug output
Context	<a href="#">debug service vpls string ppp packets detail-level keyword</a>
Tree	<a href="#">detail-level</a>
Options	low, medium, high
Default	high
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**dhcp-client** *boolean*

Synopsis	Enable DHCP client packet debugging
Context	<a href="#">debug service vpls string ppp packets dhcp-client boolean</a>
Tree	<a href="#">dhcp-client</a>
Default	false
Notes	The following elements are part of a mandatory choice: <b>all</b> or ( <b>dhcp-client</b> , <b>discovery</b> , and <b>ppp-session</b> ).
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**discovery**

Synopsis	Enter the <b>discovery</b> context
Context	<a href="#">debug service vpls string ppp packets discovery</a>
Tree	<a href="#">discovery</a>
Notes	The following elements are part of a mandatory choice: <b>all</b> or ( <b>dhcp-client</b> , <b>discovery</b> , and <b>ppp-session</b> ).
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**all**

Synopsis	Enable PPP debugging for all discovery packets
Context	<a href="#">debug service vpls string ppp packets discovery all</a>

---

Tree	<a href="#">all</a>
Notes	The following elements are part of a choice: <b>all</b> or ( <b>padi</b> , <b>pado</b> , <b>padr</b> , <b>pads</b> , and <b>padt</b> ).
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **padi** *boolean*

Synopsis	Enable PPP debugging for PADI discovery packets
Context	<a href="#">debug service vpls</a> <i>string</i> <a href="#">ppp packets discovery padi</a> <i>boolean</i>
Tree	<a href="#">padi</a>
Default	false
Notes	The following elements are part of a choice: <b>all</b> or ( <b>padi</b> , <b>pado</b> , <b>padr</b> , <b>pads</b> , and <b>padt</b> ).
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **pado** *boolean*

Synopsis	Enable PPP debugging for PADO discovery packets
Context	<a href="#">debug service vpls</a> <i>string</i> <a href="#">ppp packets discovery pado</a> <i>boolean</i>
Tree	<a href="#">pado</a>
Default	false
Notes	The following elements are part of a choice: <b>all</b> or ( <b>padi</b> , <b>pado</b> , <b>padr</b> , <b>pads</b> , and <b>padt</b> ).
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **padr** *boolean*

Synopsis	Enable PPP debugging for PADR discovery packets
Context	<a href="#">debug service vpls</a> <i>string</i> <a href="#">ppp packets discovery padr</a> <i>boolean</i>
Tree	<a href="#">padr</a>
Default	false
Notes	The following elements are part of a choice: <b>all</b> or ( <b>padi</b> , <b>pado</b> , <b>padr</b> , <b>pads</b> , and <b>padt</b> ).
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **pads** *boolean*

Synopsis	Enable PPP debugging for PADS discovery packets
Context	<a href="#">debug service vpls</a> <i>string</i> <a href="#">ppp packets discovery pads</a> <i>boolean</i>
Tree	<a href="#">pads</a>
Default	false
Notes	The following elements are part of a choice: <b>all</b> or ( <b>padi</b> , <b>pado</b> , <b>padr</b> , <b>pads</b> , and <b>padt</b> ).
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **padt** *boolean*

Synopsis	Enable PPP debugging for PADT discovery packets
Context	<a href="#">debug service vpls</a> <i>string</i> <a href="#">ppp packets discovery padt</a> <i>boolean</i>
Tree	<a href="#">padt</a>
Default	false
Notes	The following elements are part of a choice: <b>all</b> or ( <b>padi</b> , <b>pado</b> , <b>padr</b> , <b>pads</b> , and <b>padt</b> ).
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **mode** *keyword*

Synopsis	PPP packets present in the debug output
Context	<a href="#">debug service vpls</a> <i>string</i> <a href="#">ppp packets mode</a> <i>keyword</i>
Tree	<a href="#">mode</a>
Options	dropped-only, ingress-and-dropped, egress-ingress-and-dropped
Default	dropped-only
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **ppp-session**

Synopsis	Enter the <b>ppp-session</b> context
Context	<a href="#">debug service vpls</a> <i>string</i> <a href="#">ppp packets ppp-session</a>
Tree	<a href="#">ppp-session</a>

Notes	The following elements are part of a mandatory choice: <b>all</b> or ( <b>dhcp-client</b> , <b>discovery</b> , and <b>ppp-session</b> ).
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**all**

Synopsis	Enable PPP debugging for all PPP session packets
Context	<a href="#">debug service vpls string ppp packets ppp-session all</a>
Tree	<a href="#">all</a>
Notes	The following elements are part of a choice: <b>all</b> or ( <b>chap</b> , <b>ipcp</b> , <b>ipv6cp</b> , <b>lcp</b> , and <b>pap</b> ).
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**chap *boolean***

Synopsis	Enable PPP debugging for CHAP authentication packets
Context	<a href="#">debug service vpls string ppp packets ppp-session chap boolean</a>
Tree	<a href="#">chap</a>
Default	false
Notes	The following elements are part of a choice: <b>all</b> or ( <b>chap</b> , <b>ipcp</b> , <b>ipv6cp</b> , <b>lcp</b> , and <b>pap</b> ).
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**ipcp *boolean***

Synopsis	Enable PPP debugging for IPCP NCP packets
Context	<a href="#">debug service vpls string ppp packets ppp-session ipcp boolean</a>
Tree	<a href="#">ipcp</a>
Default	false
Notes	The following elements are part of a choice: <b>all</b> or ( <b>chap</b> , <b>ipcp</b> , <b>ipv6cp</b> , <b>lcp</b> , and <b>pap</b> ).
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **ipv6cp** *boolean*

Synopsis	Enable PPP debugging for IPv6CP NCP packets
Context	<a href="#">debug service vpls</a> <i>string</i> <a href="#">ppp packets</a> <a href="#">ppp-session</a> <a href="#">ipv6cp</a> <i>boolean</i>
Tree	<a href="#">ipv6cp</a>
Default	false
Notes	The following elements are part of a choice: <b>all</b> or ( <b>chap</b> , <b>ipcp</b> , <b>ipv6cp</b> , <b>lcp</b> , and <b>pap</b> ).
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **lcp** *boolean*

Synopsis	Enable PPP debugging for LCP link establishment packets
Context	<a href="#">debug service vpls</a> <i>string</i> <a href="#">ppp packets</a> <a href="#">ppp-session</a> <a href="#">lcp</a> <i>boolean</i>
Tree	<a href="#">lcp</a>
Default	false
Notes	The following elements are part of a choice: <b>all</b> or ( <b>chap</b> , <b>ipcp</b> , <b>ipv6cp</b> , <b>lcp</b> , and <b>pap</b> ).
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **pap** *boolean*

Synopsis	Enable PPP debugging for PAP authentication packets
Context	<a href="#">debug service vpls</a> <i>string</i> <a href="#">ppp packets</a> <a href="#">ppp-session</a> <a href="#">pap</a> <i>boolean</i>
Tree	<a href="#">pap</a>
Default	false
Notes	The following elements are part of a choice: <b>all</b> or ( <b>chap</b> , <b>ipcp</b> , <b>ipv6cp</b> , <b>lcp</b> , and <b>pap</b> ).
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **remote-id** [*id*] *string*

Synopsis	Add a list entry for <b>remote-id</b>
Context	<a href="#">debug service vpls</a> <i>string</i> <a href="#">ppp</a> <a href="#">remote-id</a> <i>string</i>
Tree	<a href="#">remote-id</a>

Max. Instances	8
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**[id] string**

Synopsis	Remote ID of the PPPoE session to debug
Context	<a href="#">debug service vpls string ppp remote-id string</a>
Tree	<a href="#">remote-id</a>
String Length	1 to 255
Notes	This element is part of a list key.
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**sap [sap-id] string**

Synopsis	Add a list entry for <b>sap</b>
Context	<a href="#">debug service vpls string ppp sap string</a>
Tree	<a href="#">sap</a>
Max. Instances	8
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**[sap-id] string**

Synopsis	SAP ID of the PPPoE session to debug
Context	<a href="#">debug service vpls string ppp sap string</a>
Tree	<a href="#">sap</a>
String Length	1 to 45
Notes	This element is part of a list key.
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**user-name** [*name*] *string*

Synopsis	Add a list entry for <b>user-name</b>
Context	<a href="#">debug service vpls</a> <i>string</i> <a href="#">ppp user-name</a> <i>string</i>
Tree	<a href="#">user-name</a>
Max. Instances	8
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**[name]** *string*

Synopsis	Username of the PPPoE session to debug
Context	<a href="#">debug service vpls</a> <i>string</i> <a href="#">ppp user-name</a> <i>string</i>
Tree	<a href="#">user-name</a>
Description	This command configures the username of the PPPoE session to debug. Only packets after the PAP or CHAP authentication are logged. If the purpose is to include PPPoE discovery packets in the debug log, configure a MAC filter instead.
String Length	1 to 255
Notes	This element is part of a list key.
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**proxy-arp**

Synopsis	Enter the <b>proxy-arp</b> context
Context	<a href="#">debug service vpls</a> <i>string</i> <a href="#">proxy-arp</a>
Tree	<a href="#">proxy-arp</a>
Introduced	23.10.R1
Platforms	All

**all**

Synopsis	Debug the proxy ARP function for all addresses
Context	<a href="#">debug service vpls</a> <i>string</i> <a href="#">proxy-arp</a> <a href="#">all</a>
Tree	<a href="#">all</a>

---

Notes	The following elements are part of a choice: <b>all</b> , <b>ip</b> , or <b>mac</b> .
Introduced	23.10.R1
Platforms	All

## ip

Synopsis	Enter the <b>ip</b> context
Context	<a href="#">debug service vpls string proxy-arp ip</a>
Tree	<a href="#">ip</a>
Notes	The following elements are part of a choice: <b>all</b> , <b>ip</b> , or <b>mac</b> .
Introduced	23.10.R1
Platforms	All

## address [ipv4-address] string

Synopsis	Add a list entry for <b>address</b>
Context	<a href="#">debug service vpls string proxy-arp ip address string</a>
Tree	<a href="#">address</a>
Max. Instances	256
Introduced	23.10.R1
Platforms	All

## [ipv4-address] string

Synopsis	IPv4 address of the proxy ARP session to debug
Context	<a href="#">debug service vpls string proxy-arp ip address string</a>
Tree	<a href="#">address</a>
Notes	This element is part of a list key.
Introduced	23.10.R1
Platforms	All

## mac

Synopsis	Enter the <b>mac</b> context
----------	------------------------------

Context	<code>debug service vpls string proxy-arp mac</code>
Tree	<code>mac</code>
Notes	The following elements are part of a choice: <b>all</b> , <b>ip</b> , or <b>mac</b> .
Introduced	23.10.R1
Platforms	All

### **address** [`address`] *string*

Synopsis	Add a list entry for <b>address</b>
Context	<code>debug service vpls string proxy-arp mac address string</code>
Tree	<code>address</code>
Max. Instances	256
Introduced	23.10.R1
Platforms	All

### **[address]** *string*

Synopsis	MAC address of the proxy ARP session to debug
Context	<code>debug service vpls string proxy-arp mac address string</code>
Tree	<code>address</code>
Notes	This element is part of a list key.
Introduced	23.10.R1
Platforms	All

### **proxy-nd**

Synopsis	Enter the <b>proxy-nd</b> context
Context	<code>debug service vpls string proxy-nd</code>
Tree	<code>proxy-nd</code>
Introduced	23.10.R1
Platforms	All

## all

Synopsis	Debug the proxy ND function for all addresses
Context	<a href="#">debug service vpls</a> <i>string</i> <a href="#">proxy-nd all</a>
Tree	<a href="#">all</a>
Notes	The following elements are part of a choice: <b>all</b> , <b>ip</b> , or <b>mac</b> .
Introduced	23.10.R1
Platforms	All

## ip

Synopsis	Enter the <b>ip</b> context
Context	<a href="#">debug service vpls</a> <i>string</i> <a href="#">proxy-nd ip</a>
Tree	<a href="#">ip</a>
Notes	The following elements are part of a choice: <b>all</b> , <b>ip</b> , or <b>mac</b> .
Introduced	23.10.R1
Platforms	All

## address [[ipv6-address](#)] *string*

Synopsis	Add a list entry for <b>address</b>
Context	<a href="#">debug service vpls</a> <i>string</i> <a href="#">proxy-nd ip address</a> <i>string</i>
Tree	<a href="#">address</a>
Max. Instances	256
Introduced	23.10.R1
Platforms	All

## [\[ipv6-address\]](#) *string*

Synopsis	IPv6 address of the proxy ND session to debug
Context	<a href="#">debug service vpls</a> <i>string</i> <a href="#">proxy-nd ip address</a> <i>string</i>
Tree	<a href="#">address</a>
Notes	This element is part of a list key.
Introduced	23.10.R1
Platforms	All

## mac

Synopsis	Enter the <b>mac</b> context
Context	<a href="#">debug service vpls string proxy-nd mac</a>
Tree	<a href="#">mac</a>
Notes	The following elements are part of a choice: <b>all</b> , <b>ip</b> , or <b>mac</b> .
Introduced	23.10.R1
Platforms	All

## address [[address](#)] *string*

Synopsis	Add a list entry for <b>address</b>
Context	<a href="#">debug service vpls string proxy-nd mac address string</a>
Tree	<a href="#">address</a>
Max. Instances	256
Introduced	23.10.R1
Platforms	All

## [[address](#)] *string*

Synopsis	MAC address of the proxy ND session to debug
Context	<a href="#">debug service vpls string proxy-nd mac address string</a>
Tree	<a href="#">address</a>
Notes	This element is part of a list key.
Introduced	23.10.R1
Platforms	All

## spb

Synopsis	Enable the <b>spb</b> context
Context	<a href="#">debug service vpls string spb</a>
Tree	<a href="#">spb</a>
Introduced	23.10.R1
Platforms	All

## events

Synopsis	Enable the <b>events</b> context
Context	<a href="#">debug service vpls string spb events</a>
Tree	<a href="#">events</a>
Introduced	23.10.R1
Platforms	All

## adjacency

Synopsis	Enable the <b>adjacency</b> context
Context	<a href="#">debug service vpls string spb events adjacency</a>
Tree	<a href="#">adjacency</a>
Introduced	23.10.R1
Platforms	All

## sap string

Synopsis	SAP ID
Context	<a href="#">debug service vpls string spb events adjacency sap string</a>
Tree	<a href="#">sap</a>
String Length	1 to 45
Notes	The following elements are part of a choice: <b>sap</b> , <b>sdp-bind-id</b> , or <b>system-id</b> .
Introduced	23.10.R1
Platforms	All

## sdp-bind-id string

Synopsis	SAP bind ID
Context	<a href="#">debug service vpls string spb events adjacency sdp-bind-id string</a>
Tree	<a href="#">sdp-bind-id</a>
String Length	3 to 16
Notes	The following elements are part of a choice: <b>sap</b> , <b>sdp-bind-id</b> , or <b>system-id</b> .
Introduced	23.10.R1
Platforms	All

## **system-id** *string*

Synopsis	System ID
Context	<a href="#">debug service vpls</a> <i>string</i> <a href="#">spb events adjacency</a> <a href="#">system-id</a> <i>string</i>
Tree	<a href="#">system-id</a>
String Length	14
Default	0000.0000.0000
Notes	The following elements are part of a choice: <b>sap</b> , <b>sdp-bind-id</b> , or <b>system-id</b> .
Introduced	23.10.R1
Platforms	All

## **l2db** *boolean*

Synopsis	Trace SPB L2DB events
Context	<a href="#">debug service vpls</a> <i>string</i> <a href="#">spb events l2db</a> <i>boolean</i>
Tree	<a href="#">l2db</a>
Default	false
Introduced	23.10.R1
Platforms	All

## **lsdb**

Synopsis	Enable the <b>lsdb</b> context
Context	<a href="#">debug service vpls</a> <i>string</i> <a href="#">spb events lsdb</a>
Tree	<a href="#">lsdb</a>
Introduced	23.10.R1
Platforms	All

## **hostname** (*lsp-id* | *system-id*)

Synopsis	Host name
Context	<a href="#">debug service vpls</a> <i>string</i> <a href="#">spb events lsdb</a> <a href="#">hostname</a> ( <i>lsp-id</i>   <i>system-id</i> )
Tree	<a href="#">hostname</a>
String Length	20
Default	0000.0000.0000.00-00

---

Introduced	23.10.R1
Platforms	All

## **spf**

Synopsis	Enable the <b>spf</b> context
Context	<a href="#">debug service vpls string spb events spf</a>
Tree	<a href="#">spf</a>
Introduced	23.10.R1
Platforms	All

## **system-id string**

Synopsis	System ID
Context	<a href="#">debug service vpls string spb events spf system-id string</a>
Tree	<a href="#">system-id</a>
String Length	14
Default	0000.0000.0000
Introduced	23.10.R1
Platforms	All

## **interface**

Synopsis	Enable the <b>interface</b> context
Context	<a href="#">debug service vpls string spb interface</a>
Tree	<a href="#">interface</a>
Introduced	23.10.R1
Platforms	All

## **sap string**

Synopsis	SAP ID
Context	<a href="#">debug service vpls string spb interface sap string</a>
Tree	<a href="#">sap</a>
String Length	1 to 45

---

Notes	The following elements are part of a choice: <b>sap</b> or <b>sdp-bind-id</b> .
Introduced	23.10.R1
Platforms	All

### **sdp-bind-id** *string*

Synopsis	SDP bind ID
Context	<a href="#">debug service vpls</a> <i>string</i> <a href="#">spb interface</a> <a href="#">sdp-bind-id</a> <i>string</i>
Tree	<a href="#">sdp-bind-id</a>
String Length	3 to 16
Notes	The following elements are part of a choice: <b>sap</b> or <b>sdp-bind-id</b> .
Introduced	23.10.R1
Platforms	All

### **packet**

Synopsis	Enable the <b>packet</b> context
Context	<a href="#">debug service vpls</a> <i>string</i> <a href="#">spb</a> <a href="#">packet</a>
Tree	<a href="#">packet</a>
Introduced	23.10.R1
Platforms	All

### **detail** *boolean*

Synopsis	Enable detailed tracing
Context	<a href="#">debug service vpls</a> <i>string</i> <a href="#">spb</a> <a href="#">packet</a> <a href="#">detail</a> <i>boolean</i>
Tree	<a href="#">detail</a>
Default	false
Introduced	23.10.R1
Platforms	All

### **sap** *string*

Synopsis	SAP ID
Context	<a href="#">debug service vpls</a> <i>string</i> <a href="#">spb</a> <a href="#">packet</a> <a href="#">sap</a> <i>string</i>

Tree	<a href="#">sap</a>
String Length	1 to 45
Notes	The following elements are part of a choice: <b>sap</b> or <b>sdp-bind-id</b> .
Introduced	23.10.R1
Platforms	All

### **sdp-bind-id** *string*

Synopsis	SDP bind ID
Context	<a href="#">debug service vpls string spb packet sdp-bind-id string</a>
Tree	<a href="#">sdp-bind-id</a>
String Length	3 to 16
Notes	The following elements are part of a choice: <b>sap</b> or <b>sdp-bind-id</b> .
Introduced	23.10.R1
Platforms	All

### **type** *keyword*

Synopsis	Packet type
Context	<a href="#">debug service vpls string spb packet type keyword</a>
Tree	<a href="#">type</a>
Options	none, ptop-hello, l1-hello, l1-psnp, l1-csnp, l1-lsp
Default	none
Introduced	23.10.R1
Platforms	All

### **stp**

Synopsis	Enter the <b>stp</b> context
Context	<a href="#">debug service vpls string stp</a>
Tree	<a href="#">stp</a>
Introduced	23.10.R1
Platforms	All

## events

Synopsis	Enable the <b>events</b> context
Context	<a href="#">debug service vpls</a> <i>string</i> <a href="#">stp events</a>
Tree	<a href="#">events</a>
Introduced	23.10.R1
Platforms	All

## all-events

Synopsis	Trace all STP events
Context	<a href="#">debug service vpls</a> <i>string</i> <a href="#">stp events</a> <a href="#">all-events</a>
Tree	<a href="#">all-events</a>
Notes	The following elements are part of a choice: <b>all-events</b> or <b>event-types</b> .
Introduced	23.10.R1
Platforms	All

## event-types

Synopsis	Enter the <b>event-types</b> context
Context	<a href="#">debug service vpls</a> <i>string</i> <a href="#">stp events</a> <a href="#">event-types</a>
Tree	<a href="#">event-types</a>
Notes	The following elements are part of a choice: <b>all-events</b> or <b>event-types</b> .
Introduced	23.10.R1
Platforms	All

## bpdu *boolean*

Synopsis	Trace received and transmitted BPDUs
Context	<a href="#">debug service vpls</a> <i>string</i> <a href="#">stp events</a> <a href="#">event-types</a> <a href="#">bpdu</a> <i>boolean</i>
Tree	<a href="#">bpdu</a>
Default	false
Introduced	23.10.R1
Platforms	All

**core-connectivity** *boolean*

Synopsis	Trace STO core connectivity events
Context	<a href="#">debug service vpls</a> <i>string</i> <a href="#">stp events event-types core-connectivity</a> <i>boolean</i>
Tree	<a href="#">core-connectivity</a>
Default	false
Introduced	23.10.R1
Platforms	All

**exception** *boolean*

Synopsis	Trace STP exception events
Context	<a href="#">debug service vpls</a> <i>string</i> <a href="#">stp events event-types exception</a> <i>boolean</i>
Tree	<a href="#">exception</a>
Default	false
Introduced	23.10.R1
Platforms	All

**fsm-state-changes** *boolean*

Synopsis	Trace STP FSM state change events
Context	<a href="#">debug service vpls</a> <i>string</i> <a href="#">stp events event-types fsm-state-changes</a> <i>boolean</i>
Tree	<a href="#">fsm-state-changes</a>
Default	false
Introduced	23.10.R1
Platforms	All

**fsm-timers** *boolean*

Synopsis	Trace STP FSM timer events
Context	<a href="#">debug service vpls</a> <i>string</i> <a href="#">stp events event-types fsm-timers</a> <i>boolean</i>
Tree	<a href="#">fsm-timers</a>
Default	false
Introduced	23.10.R1
Platforms	All

**port-role** *boolean*

Synopsis	Trace STP port role events
Context	<a href="#">debug service vpls</a> <i>string</i> <a href="#">stp events event-types</a> <a href="#">port-role</a> <i>boolean</i>
Tree	<a href="#">port-role</a>
Default	false
Introduced	23.10.R1
Platforms	All

**port-state** *boolean*

Synopsis	Trace STP port state events
Context	<a href="#">debug service vpls</a> <i>string</i> <a href="#">stp events event-types</a> <a href="#">port-state</a> <i>boolean</i>
Tree	<a href="#">port-state</a>
Default	false
Introduced	23.10.R1
Platforms	All

**sap** [[sap-id](#)] *string*

Synopsis	Add a list entry for <b>sap</b>
Context	<a href="#">debug service vpls</a> <i>string</i> <a href="#">stp sap</a> <i>string</i>
Tree	<a href="#">sap</a>
Max. Instances	256
Introduced	23.10.R1
Platforms	All

**[sap-id]** *string*

Synopsis	SAP ID
Context	<a href="#">debug service vpls</a> <i>string</i> <a href="#">stp sap</a> <i>string</i>
Tree	<a href="#">sap</a>
String Length	1 to 45
Notes	This element is part of a list key.

Introduced 23.10.R1  
 Platforms All

### **sdp-bind** [[sdp-bind-id](#)] *string*

Synopsis Add a list entry for **sdp-bind**  
 Context [debug service vpls string stp sdp-bind string](#)  
 Tree [sdp-bind](#)  
 Max. Instances 256  
 Introduced 23.10.R1  
 Platforms All

### **[sdp-bind-id]** *string*

Synopsis SDP bind ID  
 Context [debug service vpls string stp sdp-bind string](#)  
 Tree [sdp-bind](#)  
 String Length 3 to 16  
 Notes This element is part of a list key.  
 Introduced 23.10.R1  
 Platforms All

### **vprn** [[service-name](#)] *string*

Synopsis Enter the **vprn** list instance  
 Context [debug service vprn string](#)  
 Tree [vprn](#)  
 Introduced 23.3.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **[service-name]** *string*

Synopsis Administrative service name  
 Context [debug service vprn string](#)

Tree	<a href="#">vprn</a>
String Length	1 to 64
Notes	This element is part of a list key.
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## ppp

Synopsis	Enter the <b>ppp</b> context
Context	<a href="#">debug service vprn string ppp</a>
Tree	<a href="#">ppp</a>
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## **circuit-id** [[id](#)] *string*

Synopsis	Add a list entry for <b>circuit-id</b>
Context	<a href="#">debug service vprn string ppp circuit-id string</a>
Tree	<a href="#">circuit-id</a>
Max. Instances	8
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## **[id]** *string*

Synopsis	Circuit ID of the PPPoE session to debug
Context	<a href="#">debug service vprn string ppp circuit-id string</a>
Tree	<a href="#">circuit-id</a>
String Length	1 to 255
Notes	This element is part of a list key.
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## events

Synopsis	Enable the <b>events</b> context
Context	<a href="#">debug service vprn string ppp events</a>
Tree	<a href="#">events</a>
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## all

Synopsis	Enable PPP debugging for all events
Context	<a href="#">debug service vprn string ppp events all</a>
Tree	<a href="#">all</a>
Notes	The following elements are part of a mandatory choice: <b>all</b> or ( <b>dhcp-client</b> , <b>l2tp</b> , <b>local-address-assignment</b> , and <b>ppp</b> ).
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## dhcp-client

Synopsis	Enable the <b>dhcp-client</b> context
Context	<a href="#">debug service vprn string ppp events dhcp-client</a>
Tree	<a href="#">dhcp-client</a>
Notes	The following elements are part of a mandatory choice: <b>all</b> or ( <b>dhcp-client</b> , <b>l2tp</b> , <b>local-address-assignment</b> , and <b>ppp</b> ).
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## terminate-only *boolean*

Synopsis	Debug events for ungraceful terminated sessions only
Context	<a href="#">debug service vprn string ppp events dhcp-client terminate-only boolean</a>
Tree	<a href="#">terminate-only</a>
Default	false
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## I2tp

Synopsis	Enable the <b>I2tp</b> context
Context	<a href="#">debug service vprn string ppp events I2tp</a>
Tree	<a href="#">I2tp</a>
Description	Commands in this context configure debugging events for L2TP sessions.
Notes	The following elements are part of a mandatory choice: <b>all</b> or ( <b>dhcp-client</b> , <b>I2tp</b> , <b>local-address-assignment</b> , and <b>ppp</b> ).
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## terminate-only *boolean*

Synopsis	Debug events for ungraceful terminated sessions only
Context	<a href="#">debug service vprn string ppp events I2tp terminate-only boolean</a>
Tree	<a href="#">terminate-only</a>
Default	false
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## local-address-assignment

Synopsis	Enable the <b>local-address-assignment</b> context
Context	<a href="#">debug service vprn string ppp events local-address-assignment</a>
Tree	<a href="#">local-address-assignment</a>
Notes	The following elements are part of a mandatory choice: <b>all</b> or ( <b>dhcp-client</b> , <b>I2tp</b> , <b>local-address-assignment</b> , and <b>ppp</b> ).
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## terminate-only *boolean*

Synopsis	Debug events for ungraceful terminated sessions only
Context	<a href="#">debug service vprn string ppp events local-address-assignment terminate-only boolean</a>
Tree	<a href="#">terminate-only</a>

Default	false
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## ppp

Synopsis	Enable the <b>ppp</b> context
Context	<a href="#">debug service vprn string ppp events ppp</a>
Tree	<a href="#">ppp</a>
Notes	The following elements are part of a mandatory choice: <b>all</b> or ( <b>dhcp-client</b> , <b>l2tp</b> , <b>local-address-assignment</b> , and <b>ppp</b> ).
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## terminate-only *boolean*

Synopsis	Debug events for ungraceful terminated sessions only
Context	<a href="#">debug service vprn string ppp events ppp terminate-only boolean</a>
Tree	<a href="#">terminate-only</a>
Default	false
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## mac [[address](#)] *string*

Synopsis	Add a list entry for <b>mac</b>
Context	<a href="#">debug service vprn string ppp mac string</a>
Tree	<a href="#">mac</a>
Max. Instances	8
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## [[address](#)] *string*

Synopsis	MAC address of the PPPoE session to debug
----------	---

Context	<a href="#">debug service vprn string ppp mac string</a>
Tree	<a href="#">mac</a>
Notes	This element is part of a list key.
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## packets

Synopsis	Enable the <b>packets</b> context
Context	<a href="#">debug service vprn string ppp packets</a>
Tree	<a href="#">packets</a>
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## all

Synopsis	Enable PPP debugging for all packets
Context	<a href="#">debug service vprn string ppp packets all</a>
Tree	<a href="#">all</a>
Notes	The following elements are part of a mandatory choice: <b>all</b> or ( <b>dhcp-client</b> , <b>discovery</b> , and <b>ppp-session</b> ).
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## detail-level *keyword*

Synopsis	Detail level of the PPP packet debug output
Context	<a href="#">debug service vprn string ppp packets detail-level keyword</a>
Tree	<a href="#">detail-level</a>
Options	low, medium, high
Default	high
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**dhcp-client *boolean***

Synopsis	Enable DHCP client packet debugging
Context	<a href="#">debug service vprn</a> <i>string</i> <a href="#">ppp packets dhcp-client</a> <i>boolean</i>
Tree	<a href="#">dhcp-client</a>
Default	false
Notes	The following elements are part of a mandatory choice: <b>all</b> or ( <b>dhcp-client</b> , <b>discovery</b> , and <b>ppp-session</b> ).
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**discovery**

Synopsis	Enter the <b>discovery</b> context
Context	<a href="#">debug service vprn</a> <i>string</i> <a href="#">ppp packets discovery</a>
Tree	<a href="#">discovery</a>
Notes	The following elements are part of a mandatory choice: <b>all</b> or ( <b>dhcp-client</b> , <b>discovery</b> , and <b>ppp-session</b> ).
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**all**

Synopsis	Enable PPP debugging for all discovery packets
Context	<a href="#">debug service vprn</a> <i>string</i> <a href="#">ppp packets discovery</a> <i>all</i>
Tree	<a href="#">all</a>
Notes	The following elements are part of a choice: <b>all</b> or ( <b>padi</b> , <b>pado</b> , <b>padr</b> , <b>pads</b> , and <b>padt</b> ).
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**padi *boolean***

Synopsis	Enable PPP debugging for PADI discovery packets
Context	<a href="#">debug service vprn</a> <i>string</i> <a href="#">ppp packets discovery padi</a> <i>boolean</i>
Tree	<a href="#">padi</a>
Default	false

Notes	The following elements are part of a choice: <b>all</b> or ( <b>padi</b> , <b>pado</b> , <b>padr</b> , <b>pads</b> , and <b>padt</b> ).
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**pado boolean**

Synopsis	Enable PPP debugging for PADO discovery packets
Context	<a href="#">debug service vprn</a> <i>string</i> <a href="#">ppp packets discovery pado</a> <i>boolean</i>
Tree	<a href="#">pado</a>
Default	false
Notes	The following elements are part of a choice: <b>all</b> or ( <b>padi</b> , <b>pado</b> , <b>padr</b> , <b>pads</b> , and <b>padt</b> ).
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**padr boolean**

Synopsis	Enable PPP debugging for PADR discovery packets
Context	<a href="#">debug service vprn</a> <i>string</i> <a href="#">ppp packets discovery padr</a> <i>boolean</i>
Tree	<a href="#">padr</a>
Default	false
Notes	The following elements are part of a choice: <b>all</b> or ( <b>padi</b> , <b>pado</b> , <b>padr</b> , <b>pads</b> , and <b>padt</b> ).
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**pads boolean**

Synopsis	Enable PPP debugging for PADS discovery packets
Context	<a href="#">debug service vprn</a> <i>string</i> <a href="#">ppp packets discovery pads</a> <i>boolean</i>
Tree	<a href="#">pads</a>
Default	false
Notes	The following elements are part of a choice: <b>all</b> or ( <b>padi</b> , <b>pado</b> , <b>padr</b> , <b>pads</b> , and <b>padt</b> ).
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **padt** *boolean*

Synopsis	Enable PPP debugging for PADT discovery packets
Context	<a href="#">debug service vprn</a> <i>string</i> <a href="#">ppp packets discovery padt</a> <i>boolean</i>
Tree	<a href="#">padt</a>
Default	false
Notes	The following elements are part of a choice: <b>all</b> or ( <b>padi</b> , <b>pado</b> , <b>padr</b> , <b>pads</b> , and <b>padt</b> ).
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **mode** *keyword*

Synopsis	PPP packets present in the debug output
Context	<a href="#">debug service vprn</a> <i>string</i> <a href="#">ppp packets mode</a> <i>keyword</i>
Tree	<a href="#">mode</a>
Options	dropped-only, ingress-and-dropped, egress-ingress-and-dropped
Default	dropped-only
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **ppp-session**

Synopsis	Enter the <b>ppp-session</b> context
Context	<a href="#">debug service vprn</a> <i>string</i> <a href="#">ppp packets ppp-session</a>
Tree	<a href="#">ppp-session</a>
Notes	The following elements are part of a mandatory choice: <b>all</b> or ( <b>dhcp-client</b> , <b>discovery</b> , and <b>ppp-session</b> ).
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **all**

Synopsis	Enable PPP debugging for all PPP session packets
Context	<a href="#">debug service vprn</a> <i>string</i> <a href="#">ppp packets ppp-session all</a>
Tree	<a href="#">all</a>
Notes	The following elements are part of a choice: <b>all</b> or ( <b>chap</b> , <b>ipcp</b> , <b>ipv6cp</b> , <b>lcp</b> , and <b>pap</b> ).

Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **chap** *boolean*

Synopsis	Enable PPP debugging for CHAP authentication packets
Context	<a href="#">debug service vprn</a> <i>string</i> <a href="#">ppp packets</a> <a href="#">ppp-session</a> <a href="#">chap</a> <i>boolean</i>
Tree	<a href="#">chap</a>
Default	false
Notes	The following elements are part of a choice: <b>all</b> or ( <b>chap</b> , <b>ipcp</b> , <b>ipv6cp</b> , <b>lcp</b> , and <b>pap</b> ).
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **ipcp** *boolean*

Synopsis	Enable PPP debugging for IPCP NCP packets
Context	<a href="#">debug service vprn</a> <i>string</i> <a href="#">ppp packets</a> <a href="#">ppp-session</a> <a href="#">ipcp</a> <i>boolean</i>
Tree	<a href="#">ipcp</a>
Default	false
Notes	The following elements are part of a choice: <b>all</b> or ( <b>chap</b> , <b>ipcp</b> , <b>ipv6cp</b> , <b>lcp</b> , and <b>pap</b> ).
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **ipv6cp** *boolean*

Synopsis	Enable PPP debugging for IPv6CP NCP packets
Context	<a href="#">debug service vprn</a> <i>string</i> <a href="#">ppp packets</a> <a href="#">ppp-session</a> <a href="#">ipv6cp</a> <i>boolean</i>
Tree	<a href="#">ipv6cp</a>
Default	false
Notes	The following elements are part of a choice: <b>all</b> or ( <b>chap</b> , <b>ipcp</b> , <b>ipv6cp</b> , <b>lcp</b> , and <b>pap</b> ).
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**lcp boolean**

Synopsis	Enable PPP debugging for LCP link establishment packets
Context	<a href="#">debug service vprn</a> <i>string</i> <a href="#">ppp packets</a> <a href="#">ppp-session</a> <a href="#">lcp</a> <i>boolean</i>
Tree	<a href="#">lcp</a>
Default	false
Notes	The following elements are part of a choice: <b>all</b> or ( <b>chap</b> , <b>ipcp</b> , <b>ipv6cp</b> , <b>lcp</b> , and <b>pap</b> ).
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**pap boolean**

Synopsis	Enable PPP debugging for PAP authentication packets
Context	<a href="#">debug service vprn</a> <i>string</i> <a href="#">ppp packets</a> <a href="#">ppp-session</a> <a href="#">pap</a> <i>boolean</i>
Tree	<a href="#">pap</a>
Default	false
Notes	The following elements are part of a choice: <b>all</b> or ( <b>chap</b> , <b>ipcp</b> , <b>ipv6cp</b> , <b>lcp</b> , and <b>pap</b> ).
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**remote-id [id] string**

Synopsis	Add a list entry for <b>remote-id</b>
Context	<a href="#">debug service vprn</a> <i>string</i> <a href="#">ppp remote-id</a> <i>string</i>
Tree	<a href="#">remote-id</a>
Max. Instances	8
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**[id] string**

Synopsis	Remote ID of the PPPoE session to debug
Context	<a href="#">debug service vprn</a> <i>string</i> <a href="#">ppp remote-id</a> <i>string</i>
Tree	<a href="#">remote-id</a>
String Length	1 to 255

---

Notes	This element is part of a list key.
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**sap** [[sap-id](#)] *string*

Synopsis	Add a list entry for <b>sap</b>
Context	<a href="#">debug service vprn</a> <i>string</i> <a href="#">ppp sap</a> <i>string</i>
Tree	<a href="#">sap</a>
Max. Instances	8
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**[sap-id]** *string*

Synopsis	SAP ID of the PPPoE session to debug
Context	<a href="#">debug service vprn</a> <i>string</i> <a href="#">ppp sap</a> <i>string</i>
Tree	<a href="#">sap</a>
String Length	1 to 45
Notes	This element is part of a list key.
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**user-name** [[name](#)] *string*

Synopsis	Add a list entry for <b>user-name</b>
Context	<a href="#">debug service vprn</a> <i>string</i> <a href="#">ppp user-name</a> <i>string</i>
Tree	<a href="#">user-name</a>
Max. Instances	8
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**[name]** *string*

Synopsis	Username of the PPPoE session to debug
Context	<code>debug service vprn string ppp user-name string</code>
Tree	<code>user-name</code>
Description	This command configures the username of the PPPoE session to debug. Only packets after the PAP or CHAP authentication are logged. If the purpose is to include PPPoE discovery packets in the debug log, configure a MAC filter instead.
String Length	1 to 255
Notes	This element is part of a list key.
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**subscriber-mgmt**

Synopsis	Enter the <b>subscriber-mgmt</b> context
Context	<code>debug subscriber-mgmt</code>
Tree	<code>subscriber-mgmt</code>
Introduced	22.7.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**gtp**

Synopsis	Enter the <b>gtp</b> context
Context	<code>debug subscriber-mgmt gtp</code>
Tree	<code>gtp</code>
Description	This command enables the context to configure box-wide GTP parameters and profiles.
Introduced	22.7.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**events** *boolean*

Synopsis	Enable GTP event debugging
Context	<code>debug subscriber-mgmt gtp events boolean</code>
Tree	<code>events</code>
Default	false

---

Introduced	22.7.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **imsi** [[imsi-instance](#)] *string*

Synopsis	Add a list entry for <b>imsi</b>
Context	<a href="#">debug subscriber-mgmt gtp imsi</a> <i>string</i>
Tree	<a href="#">imsi</a>
Max. Instances	8
Introduced	22.7.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **[imsi-instance]** *string*

Synopsis	IMSI of GTP sessions to debug
Context	<a href="#">debug subscriber-mgmt gtp imsi</a> <i>string</i>
Tree	<a href="#">imsi</a>
String Length	0 to 15
Notes	This element is part of a list key.
Introduced	22.7.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **packets**

Synopsis	Enable the <b>packets</b> context
Context	<a href="#">debug subscriber-mgmt gtp packets</a>
Tree	<a href="#">packets</a>
Introduced	22.7.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **detail-level** *keyword*

Synopsis	Detail level of the GTP packet debug output
Context	<a href="#">debug subscriber-mgmt gtp packets detail-level</a> <i>keyword</i>

Tree	<a href="#">detail-level</a>
Options	high, low
Default	low
Introduced	22.7.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**mode keyword**

Synopsis	GTP packets to include in the debug output
Context	<a href="#">debug subscriber-mgmt gtp packets mode keyword</a>
Tree	<a href="#">mode</a>
Options	all, dropped
Default	dropped
Introduced	22.7.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**peer [address] (ipv4-address-no-zone | ipv6-address-no-zone) router string**

Synopsis	Enter the <b>peer</b> list instance
Context	<a href="#">debug subscriber-mgmt gtp peer (ipv4-address-no-zone   ipv6-address-no-zone) router string</a>
Tree	<a href="#">peer</a>
Max. Instances	8
Introduced	22.7.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**[address] (ipv4-address-no-zone | ipv6-address-no-zone)**

Synopsis	Remote IP address of the GTP peer
Context	<a href="#">debug subscriber-mgmt gtp peer (ipv4-address-no-zone   ipv6-address-no-zone) router string</a>
Tree	<a href="#">peer</a>
Notes	This element is part of a list key.
Introduced	22.7.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **router string**

Synopsis	Router instance where GTP peer packets are expected
Context	<a href="#">debug subscriber-mgmt gtp peer</a> ( <a href="#">ipv4-address-no-zone</a>   <a href="#">ipv6-address-no-zone</a> ) <a href="#">router string</a>
Tree	<a href="#">peer</a>
Notes	This element is part of a list key.
Introduced	22.7.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **udp-port number**

Synopsis	UDP source (Rx packets) / destination (Tx packets) port
Context	<a href="#">debug subscriber-mgmt gtp peer</a> ( <a href="#">ipv4-address-no-zone</a>   <a href="#">ipv6-address-no-zone</a> ) <a href="#">router string</a> <a href="#">udp-port number</a>
Tree	<a href="#">udp-port</a>
Description	This command configures the UDP source port of received packets or the UDP destination port of transmitted packets.
Range	0   1 to 65535
Default	2123
Introduced	22.7.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **system**

Synopsis	Enter the <b>system</b> context
Context	<a href="#">debug system</a>
Tree	<a href="#">system</a>
Description	Commands in this context enable debugging of general system level functions and router management protocols.
Introduced	21.5.R1
Platforms	All

### **grpc**

Synopsis	Enter the <b>grpc</b> context
----------	-------------------------------

---

Context	<a href="#">debug system grpc</a>
Tree	<a href="#">grpc</a>
Introduced	21.5.R1
Platforms	All

## client

Synopsis	Enter the <b>client</b> context
Context	<a href="#">debug system grpc client</a>
Tree	<a href="#">client</a>
Introduced	21.5.R1
Platforms	All

## all

Synopsis	Set debugging for all clients
Context	<a href="#">debug system grpc client all</a>
Tree	<a href="#">all</a>
Notes	The following elements are part of a choice: <b>all</b> or <b>ip-address</b> .
Introduced	21.5.R1
Platforms	All

## ip-address (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	IP address for debugging
Context	<a href="#">debug system grpc client ip-address</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	<a href="#">ip-address</a>
Notes	The following elements are part of a choice: <b>all</b> or <b>ip-address</b> .
Introduced	21.5.R1
Platforms	All

## type keyword

Synopsis	RPCs or service types to debug
Context	<a href="#">debug system grpc type keyword</a>

Tree	<a href="#">type</a>
Options	gnmi-capabilities, gnmi-get, gnmi-set, gnmi-subscribe, rib-api-modify, rib-api-getversion, gnoi-cert-mgmt-rpcs, gnoi-file-rpcs, gnoi-system-rpcs
Max. Instances	10
Introduced	21.5.R1
Platforms	All

## grpc-tunnel

Synopsis	Enter the <b>grpc-tunnel</b> context
Context	<a href="#">debug system grpc-tunnel</a>
Tree	<a href="#">grpc-tunnel</a>
Introduced	22.10.R1
Platforms	All

## tunnel

Synopsis	Enter the <b>tunnel</b> context
Context	<a href="#">debug system grpc-tunnel tunnel</a>
Tree	<a href="#">tunnel</a>
Introduced	22.10.R1
Platforms	All

## all

Synopsis	Set debug output for all tunnels
Context	<a href="#">debug system grpc-tunnel tunnel all</a>
Tree	<a href="#">all</a>
Notes	The following elements are part of a choice: <b>all</b> or <b>name</b> .
Introduced	22.10.R1
Platforms	All

## name *string*

Synopsis	Name of the tunnel to restrict the debug output
----------	---

---

Context	<a href="#">debug system grpc-tunnel tunnel name string</a>
Tree	<a href="#">name</a>
String Length	1 to 32
Notes	The following elements are part of a choice: <b>all</b> or <b>name</b> .
Introduced	22.10.R1
Platforms	All

## http-connections

Synopsis	Enable the <b>http-connections</b> context
Context	<a href="#">debug system http-connections</a>
Tree	<a href="#">http-connections</a>
Introduced	22.10.R1
Platforms	All

## client-ip-prefix (*ipv4-prefix* | *ipv6-prefix* | *keyword*)

Synopsis	HTTP client IP prefix
Context	<a href="#">debug system http-connections client-ip-prefix</a> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i>   <i>keyword</i> )
Tree	<a href="#">client-ip-prefix</a>
Options	any
Default	any
Introduced	22.10.R1
Platforms	All

## management-interface

Synopsis	Enter the <b>management-interface</b> context
Context	<a href="#">debug system management-interface</a>
Tree	<a href="#">management-interface</a>
Introduced	21.5.R1
Platforms	All

## netconf keyword

Synopsis	Debugging verbosity for NETCONF
Context	<a href="#">debug system management-interface netconf keyword</a>
Tree	<a href="#">netconf</a>
Options	error, warning, info
Introduced	21.5.R1
Platforms	All

## remote-management

Synopsis	Enter the <b>remote-management</b> context
Context	<a href="#">debug system management-interface remote-management</a>
Tree	<a href="#">remote-management</a>
Description	Commands in this context configure the SR OS node to use the remote management service. Configuring remote management enables the SR OS node to report itself to a remote manager service running on a remote server, so that it is included in the dynamic list of available nodes. The manager service streamlines the management of multiple SR OS nodes running different SR OS versions using the same client application providing a similar shell to the MD-CLI.
Introduced	21.7.R1
Platforms	All

## manager

Synopsis	Enter the <b>manager</b> context
Context	<a href="#">debug system management-interface remote-management manager</a>
Tree	<a href="#">manager</a>
Description	Commands in this context configure specific manager-related commands.  Commands configured in this context take precedence over command values specified directly in the <b>configure management-interface remote-management</b> context.  If a command is not configured in this context, the command setting is inherited from the higher level context.
Introduced	21.7.R1
Platforms	All

**all**

Synopsis	Enable debug of all managers
Context	<a href="#">debug system management-interface remote-management manager all</a>
Tree	<a href="#">all</a>
Notes	The following elements are part of a choice: <b>all</b> or <b>manager-name</b> .
Introduced	21.7.R1
Platforms	All

**manager-name** [[name](#)] *string*

Synopsis	Add a list entry for <b>manager-name</b>
Context	<a href="#">debug system management-interface remote-management manager manager-name string</a>
Tree	<a href="#">manager-name</a>
Notes	The following elements are part of a choice: <b>all</b> or <b>manager-name</b> .
Introduced	21.7.R1
Platforms	All

**[name]** *string*

Synopsis	Manager name
Context	<a href="#">debug system management-interface remote-management manager manager-name string</a>
Tree	<a href="#">manager-name</a>
String Length	1 to 64
Notes	This element is part of a list key.
Introduced	21.7.R1
Platforms	All

**service** *boolean*

Synopsis	Enable service level debug
Context	<a href="#">debug system management-interface remote-management service boolean</a>
Tree	<a href="#">service</a>
Default	false

Introduced	21.7.R1
Platforms	All

## wlan-gw

Synopsis	Enter the <b>wlan-gw</b> context
Context	<a href="#">debug wlan-gw</a>
Tree	<a href="#">wlan-gw</a>
Introduced	22.5.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

## group [id] number

Synopsis	Enter the <b>group</b> list instance
Context	<a href="#">debug wlan-gw group number</a>
Tree	<a href="#">group</a>
Max. Instances	1
Introduced	22.5.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

## [id] number

Synopsis	WLAN-GW group ID in the system
Context	<a href="#">debug wlan-gw group number</a>
Tree	<a href="#">group</a>
Range	1 to 4
Notes	This element is part of a list key.
Introduced	22.5.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

## learn-ap-mac

Synopsis	Enable the <b>learn-ap-mac</b> context
Context	<a href="#">debug wlan-gw group number learn-ap-mac</a>

Tree	<a href="#">learn-ap-mac</a>
Introduced	22.5.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **tunnel-remote-address** (*ipv4-address-no-zone | ipv6-address-no-zone*)

Synopsis	IP address of the remote tunnel endpoint
Context	<a href="#">debug wlan-gw group number learn-ap-mac tunnel-remote-address</a> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> )
Tree	<a href="#">tunnel-remote-address</a>
Notes	This element is mandatory.
Introduced	22.5.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **statistic** [*type*] *keyword name string*

Synopsis	Enter the <b>statistic</b> list instance
Context	<a href="#">debug wlan-gw group number statistic keyword name string</a>
Tree	<a href="#">statistic</a>
Introduced	22.5.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **[type]** *keyword*

Synopsis	Type of statistic to trace
Context	<a href="#">debug wlan-gw group number statistic keyword name string</a>
Tree	<a href="#">statistic</a>
Options	<ul style="list-style-type: none"> <li>packet-error – Packet related error</li> <li>host-error – Host related error</li> <li>bd-error – Bridge domain related error</li> <li>forwarding – Number of forwarded packets</li> <li>reassembly – Reassembly related statistic</li> <li>aa – AA related statistic</li> <li>radius – RADIUS related statistic</li> <li>arp – ARP related statistic</li> <li>dhcp4 – DHCP related statistic</li> <li>dhcp6 – DHCPv6 related statistic</li> <li>icmp4 – ICMP related statistic</li> <li>icmp6 – ICMPv6 related statistic</li> </ul>

Notes	This element is part of a list key.
Introduced	22.5.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**name string**

Synopsis	Name of the statistic to trace
Context	<code>debug wlan-gw group number statistic keyword name string</code>
Tree	<code>statistic</code>
String Length	1 to 64
Notes	This element is part of a list key.
Introduced	22.5.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**capture-packet boolean**

Synopsis	Set a single packet capture trigger for the statistic
Context	<code>debug wlan-gw group number statistic keyword name string capture-packet boolean</code>
Tree	<code>capture-packet</code>
Default	false
Introduced	22.5.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**ue**

Synopsis	Enable the <b>ue</b> context
Context	<code>debug wlan-gw group number ue</code>
Tree	<code>ue</code>
Introduced	22.5.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**bridge-domain number**

Synopsis	Bridge domain of the UEs to debug
Context	<code>debug wlan-gw group number ue bridge-domain number</code>

---

Tree	<a href="#">bridge-domain</a>
Range	1 to 4294967295
Introduced	22.5.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **mac-address** *string*

Synopsis	MAC address of the UE to debug
Context	<a href="#">debug wlan-gw group number ue mac-address string</a>
Tree	<a href="#">mac-address</a>
Introduced	22.5.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **protocols**

Synopsis	Enable the <b>protocols</b> context
Context	<a href="#">debug wlan-gw group number ue protocols</a>
Tree	<a href="#">protocols</a>
Introduced	22.5.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **arp** *boolean*

Synopsis	Enable debugging for the ARP protocol
Context	<a href="#">debug wlan-gw group number ue protocols arp boolean</a>
Tree	<a href="#">arp</a>
Default	false
Introduced	22.5.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **dhcp4** *boolean*

Synopsis	Enable debugging for the DHCP protocol
Context	<a href="#">debug wlan-gw group number ue protocols dhcp4 boolean</a>
Tree	<a href="#">dhcp4</a>

---

Default	false
Introduced	22.5.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **dhcp6 boolean**

Synopsis	Enable debugging for the DHCPv6 protocol
Context	<a href="#">debug wlan-gw group number ue protocols dhcp6 boolean</a>
Tree	<a href="#">dhcp6</a>
Default	false
Introduced	22.5.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **icmp4 boolean**

Synopsis	Enable debugging for the ICMP protocol
Context	<a href="#">debug wlan-gw group number ue protocols icmp4 boolean</a>
Tree	<a href="#">icmp4</a>
Default	false
Introduced	22.5.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **icmp6 boolean**

Synopsis	Enable debugging for the ICMPv6 protocol
Context	<a href="#">debug wlan-gw group number ue protocols icmp6 boolean</a>
Tree	<a href="#">icmp6</a>
Default	false
Introduced	22.5.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **radius boolean**

Synopsis	Enable debugging for the RADIUS protocol
Context	<a href="#">debug wlan-gw group number ue protocols radius boolean</a>

Tree	<a href="#">radius</a>
Default	false
Introduced	22.5.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

## 3.14 esa commands

```
configure
- esa number
  - admin-state keyword
  - apply-groups reference
  - apply-groups-exclude reference
  - description string
  - host-port string
  - vm number
    - admin-state keyword
    - apply-groups reference
    - apply-groups-exclude reference
    - cores number
    - description string
    - host-port reference
    - memory number
    - vm-type keyword
```

### 3.14.1 esa command descriptions

#### **esa** [[esa-id](#)] *number*

Synopsis	Enter the <b>esa</b> list instance
Context	<b>configure</b> <a href="#">esa</a> <i>number</i>
Tree	<a href="#">esa</a>
Description	Commands in this context configure the Extended Services Appliance (ESA) instance.
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s

#### **[esa-id]** *number*

Synopsis	ESA ID
Context	<b>configure</b> <a href="#">esa</a> <i>number</i>
Tree	<a href="#">esa</a>
Range	1 to 16
Notes	This element is part of a list key.
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s

#### **admin-state** *keyword*

Synopsis	Administrative state of the ESA
Context	<b>configure</b> <a href="#">esa</a> <i>number</i> <a href="#">admin-state</a> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s

#### **description** *string*

Synopsis	Text description
----------	------------------

Context	<b>configure</b> <i>esa number description string</i>
Tree	<i>description</i>
String Length	1 to 80
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s

### **host-port** [*host-port*] *string*

Synopsis	Add a list entry for <b>host-port</b>
Context	<b>configure</b> <i>esa number host-port string</i>
Tree	<i>host-port</i>
Max. Instances	4
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s

### **[host-port]** *string*

Synopsis	Ethernet port associated with the ESA
Context	<b>configure</b> <i>esa number host-port string</i>
Tree	<i>host-port</i>
Description	This command configures an Ethernet port associated with the ESA-VM instance. The port ID must be the same as the port ID associated with the ESA context on which the ESA-VM is configured.
Notes	This element is part of a list key.
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s

### **vm** [*vm-id*] *number*

Synopsis	Enter the <b>vm</b> list instance
Context	<b>configure</b> <i>esa number vm number</i>
Tree	<i>vm</i>
Description	Commands in this context configure the ESA-VM instance.
Introduced	20.5.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s

### **[vm-id] number**

Synopsis VM ID  
 Context **configure** *esa number vm number*  
 Tree *vm*  
 Range 1 to 4  
 Notes This element is part of a list key.  
 Introduced 20.5.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s

### **admin-state keyword**

Synopsis Administrative state of the ESA-VM instance  
 Context **configure** *esa number vm number admin-state keyword*  
 Tree *admin-state*  
 Description This command configures the administrative state of the ESA-VM instance. The state affects the operational state of the instance and all entities contained within the instance; however, configuration settings or statistics are not changed, reset, or removed.  
 Options enable, disable  
 Default disable  
 Introduced 20.5.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s

### **cores number**

#### **WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis Number of CPU physical cores allocated to the ESA-VM  
 Context **configure** *esa number vm number cores number*  
 Tree *cores*  
 Description This command specifies the number of CPU physical cores allocated to the ESA-VM instance. If an invalid value is configured for the number of cores, the VM remains in a failed state.

Range	0 to 128
Default	0
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s

### **description** *string*

Synopsis	Text description
Context	<b>configure</b> <i>esa number vm number description string</i>
Tree	<i>description</i>
String Length	1 to 80
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s

### **host-port** *reference*

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Ethernet port associated with the ESA-VM instance
Context	<b>configure</b> <i>esa number vm number host-port reference</i>
Tree	<i>host-port</i>
Description	This command configures an Ethernet port associated with the ESA-VM instance. The port ID must be the same as the port ID associated with the ESA context on which the ESA-VM is configured.
Reference	<b>configure</b> <i>esa number host-port string</i>
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s

### **memory** *number*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Amount of memory allocated to the ESA-VM
----------	--

---

Context	<b>configure</b> <i>esa number vm number memory number</i>
Tree	<i>memory</i>
Range	0 to 256
Units	gigabytes
Default	0
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s

### **vm-type** *keyword*

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	ESA-VM type
Context	<b>configure</b> <i>esa number vm number vm-type keyword</i>
Tree	<i>vm-type</i>
Options	aa, bb, tunnel, video
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s

## 3.15 eth-cfm commands

```

configure
- eth-cfm
- apply-groups reference
- apply-groups-exclude reference
- default-domain
- apply-groups reference
- apply-groups-exclude reference
- bridge-identifier string vlan (number | keyword)
- apply-groups reference
- apply-groups-exclude reference
- id-permission keyword
- mhf-creation
- level (number | keyword)
- mhf-type keyword
- mip-ltr-priority (number | keyword)
- domain string
- apply-groups reference
- apply-groups-exclude reference
- association string
- apply-groups reference
- apply-groups-exclude reference
- auto-mep-discovery boolean
- bridge-identifier string
- apply-groups reference
- apply-groups-exclude reference
- id-permission keyword
- mhf-creation keyword
- mip-ltr-priority number
- vlan number
- ccm-hold-time
- down number
- ccm-interval keyword
- facility-id-permission keyword
- icc-based string
- integer number
- ma-index number
- remote-mep number
- apply-groups reference
- apply-groups-exclude reference
- remote-mac string
- string string
- vid number
- vpn-id string
- dns string
- format keyword
- level number
- mac string
- md-index number
- name string

```

### 3.15.1 eth-cfm command descriptions

#### eth-cfm

Synopsis	Enter the <b>eth-cfm</b> context
Context	<b>configure eth-cfm</b>
Tree	<a href="#">eth-cfm</a>
Description	Commands in this context configure ETH-CFM parameters.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

#### default-domain

Synopsis	Enter the <b>default-domain</b> context
Context	<b>configure eth-cfm default-domain</b>
Tree	<a href="#">default-domain</a>
Description	<p>Commands in this context configure MIP creation parameters per index (<b>bridge-identifier</b> <i>bridge-id</i> <b>vlan</b> <i>vlan-id</i>) if the MIP creation statement exists as part of the service connection.</p> <p>The MIP creation statement must be present on the connection before any configuration can occur for a MIP under this context. Whether a MIP uses the <b>default-domain</b> creation method is determined by the MIP authoritative nature of the <b>eth-cfm domain association</b>. The <b>eth-cfm default-domain</b> MIP creation is considered only if the <b>eth-cfm domain association</b> is not authoritative.</p>
Introduced	21.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

#### bridge-identifier [[bridge-name](#)] *string* **vlan** (*number* | *keyword*)

Synopsis	Enter the <b>bridge-identifier</b> list instance
Context	<b>configure eth-cfm default-domain bridge-identifier</b> <i>string</i> <b>vlan</b> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">bridge-identifier</a>
Description	<p>Commands in this context configure the references required to link the CFM function with the service context, allowing the entry of MIP-specific parameters for the index in the default domain table.</p> <p>The <b>info</b> and <b>info detail</b> commands do not display any entries for the instance unless they have previously been accessed. The possible candidates for the instance can be located using the <b>show eth-cfm default-domain</b> command.</p>

Introduced	21.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **[bridge-name]** *string*

Synopsis	Bridge name in the default domain table
Context	<b>configure</b> <b>eth-cfm</b> <b>default-domain</b> <b>bridge-identifier</b> <i>string</i> <b>vlan</b> ( <i>number</i>   <i>keyword</i> )
Tree	<b>bridge-identifier</b>
Description	This command specifies the bridge name to enter in the default domain associated with the MIP.
String Length	1 to 64
Notes	This element is part of a list key.
Introduced	21.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **vlan** (*number* | *keyword*)

Synopsis	VLAN ID for the default domain
Context	<b>configure</b> <b>eth-cfm</b> <b>default-domain</b> <b>bridge-identifier</b> <i>string</i> <b>vlan</b> ( <i>number</i>   <i>keyword</i> )
Tree	<b>bridge-identifier</b>
Description	This command configures a VLAN ID for the default domain.
Range	1 to 4094
Options	none
Notes	This element is part of a list key.
Introduced	21.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **id-permission** *keyword*

Synopsis	Strategy for the inclusion of Sender ID TLV information
Context	<b>configure</b> <b>eth-cfm</b> <b>default-domain</b> <b>bridge-identifier</b> <i>string</i> <b>vlan</b> ( <i>number</i>   <i>keyword</i> ) <b>id-permission</b> <i>keyword</i>
Tree	<b>id-permission</b>
Description	This command specifies how the Sender ID TLV information is included for installed MEPs and MIPs. The Sender ID TLV is supported for ETH-CCM, ETH-LB, and ETH-LB PDUs.

Options	none, chassis, defer
Default	defer
Introduced	21.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## mhf-creation

Synopsis	Enter the <b>mhf-creation</b> context
Context	<b>configure eth-cfm default-domain bridge-identifier string vlan</b> ( <i>number</i>   <i>keyword</i> ) <b>mhf-creation</b>
Tree	<b>mhf-creation</b>
Description	Commands in this context configure the MIP method of creation. MIP creation mode and other factors are part of the MIP creation authority ( <b>association</b> or <b>default-domain</b> ) logic. The MIP creation algorithm may result in multiple potential MIPs. Only the lowest-level valid MIP is instantiated.
Introduced	21.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## level (*number* | *keyword*)

Synopsis	Requested level of the MIP
Context	<b>configure eth-cfm default-domain bridge-identifier string vlan</b> ( <i>number</i>   <i>keyword</i> ) <b>mhf-creation level</b> ( <i>number</i>   <i>keyword</i> )
Tree	<b>level</b>
Description	This command configures the requested level of the MIP. This is used by the MIP creation algorithm to determine its validity in comparison to other ETH-CFM MIPs and MEPs. If the level is configured as <b>defer</b> , the level value is inherited from the global read-only system values.
Range	0 to 7
Options	defer
Default	defer
Introduced	21.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## mhf-type *keyword*

Synopsis	MIP creation mode
----------	-------------------

Context	<b>configure eth-cfm default-domain bridge-identifier string vlan</b> ( <i>number   keyword</i> ) <b>mhf-creation mhf-type keyword</b>
Tree	<b>mhf-type</b>
Options	none, default, explicit, defer
Default	defer
Introduced	21.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **mip-ltr-priority** (*number | keyword*)

Synopsis	Priority of the Linktrace Response
Context	<b>configure eth-cfm default-domain bridge-identifier string vlan</b> ( <i>number   keyword</i> ) <b>mip-ltr-priority</b> ( <i>number   keyword</i> )
Tree	<b>mip-ltr-priority</b>
Description	This command allows the operator to set the priority of the Linktrace Response Message (ETH-LTR) from a MIP for this association.
Range	0 to 7
Options	defer
Default	defer
Introduced	21.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **domain** [**md-admin-name**] *string*

Synopsis	Enter the <b>domain</b> list instance
Context	<b>configure eth-cfm domain string</b>
Tree	<b>domain</b>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **[md-admin-name]** *string*

Synopsis	Unique domain name
Context	<b>configure eth-cfm domain string</b>
Tree	<b>domain</b>
String Length	1 to 64

Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **association** [[ma-admin-name](#)] *string*

Synopsis	Enter the <b>association</b> list instance
Context	<b>configure</b> <a href="#">eth-cfm domain</a> <i>string</i> <a href="#">association</a> <i>string</i>
Tree	<a href="#">association</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **[ma-admin-name]** *string*

Synopsis	Domain association name
Context	<b>configure</b> <a href="#">eth-cfm domain</a> <i>string</i> <a href="#">association</a> <i>string</i>
Tree	<a href="#">association</a>
String Length	1 to 64
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **auto-mep-discovery** *boolean*

Synopsis	Allow remote MEP automatic discovery
Context	<b>configure</b> <a href="#">eth-cfm domain</a> <i>string</i> <a href="#">association</a> <i>string</i> <a href="#">auto-mep-discovery</a> <i>boolean</i>
Tree	<a href="#">auto-mep-discovery</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **bridge-identifier** [[bridge-name](#)] *string*

Synopsis	Enter the <b>bridge-identifier</b> list instance
Context	<b>configure</b> <a href="#">eth-cfm domain</a> <i>string</i> <a href="#">association</a> <i>string</i> <a href="#">bridge-identifier</a> <i>string</i>

Tree	<a href="#">bridge-identifier</a>
Max. Instances	1
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**[bridge-name]** *string*

Synopsis	Bridge name that links to the service
Context	<b>configure</b> <a href="#">eth-cfm domain</a> <i>string</i> <a href="#">association</a> <i>string</i> <a href="#">bridge-identifier</a> <i>string</i>
Tree	<a href="#">bridge-identifier</a>
String Length	1 to 64
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**id-permission** *keyword*

Synopsis	Strategy for the inclusion of Sender ID TLV information
Context	<b>configure</b> <a href="#">eth-cfm domain</a> <i>string</i> <a href="#">association</a> <i>string</i> <a href="#">bridge-identifier</a> <i>string</i> <b>id-permission</b> <i>keyword</i>
Tree	<a href="#">id-permission</a>
Description	This command specifies how the Sender ID TLV information is included for installed MEPs and MIPs. The Sender ID TLV is supported for ETH-CCM, ETH-LB, and ETH-LB PDUs.
Options	none, chassis
Default	none
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**mhf-creation** *keyword*

Synopsis	MIP method of creation
Context	<b>configure</b> <a href="#">eth-cfm domain</a> <i>string</i> <a href="#">association</a> <i>string</i> <a href="#">bridge-identifier</a> <i>string</i> <b>mhf-creation</b> <i>keyword</i>
Tree	<a href="#">mhf-creation</a>

Options	none, default, explicit, static
Default	none
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **mip-ltr-priority** *number*

Synopsis	Priority of the Linktrace Response Message (ETH-LTR) from a MIP
Context	<b>configure</b> <a href="#">eth-cfm domain</a> <i>string</i> <a href="#">association</a> <i>string</i> <a href="#">bridge-identifier</a> <i>string</i> <b>mip-ltr-priority</b> <i>number</i>
Tree	<a href="#">mip-ltr-priority</a>
Range	0 to 7
Default	7
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **vlan** *number*

Synopsis	VLAN ID for the default domain index
Context	<b>configure</b> <a href="#">eth-cfm domain</a> <i>string</i> <a href="#">association</a> <i>string</i> <a href="#">bridge-identifier</a> <i>string</i> <b>vlan</b> <i>number</i>
Tree	<a href="#">vlan</a>
Range	1 to 4094
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **ccm-hold-time**

Synopsis	Enter the <b>ccm-hold-time</b> context
Context	<b>configure</b> <a href="#">eth-cfm domain</a> <i>string</i> <a href="#">association</a> <i>string</i> <b>ccm-hold-time</b>
Tree	<a href="#">ccm-hold-time</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **down** *number*

Synopsis	Additional time before a MEP declares a fault, in CCM timeout conditions
----------	--

Context	<b>configure eth-cfm domain string association string ccm-hold-time down number</b>
Tree	<b>down</b>
Range	1 to 1000
Units	centiseconds
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **ccm-interval keyword**

Synopsis	CCM transmission interval for all MEPs in association
Context	<b>configure eth-cfm domain string association string ccm-interval keyword</b>
Tree	<b>ccm-interval</b>
Options	300hz, 10ms, 100ms, 1s, 10s, 60s, 600s
Default	10s
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **facility-id-permission keyword**

Synopsis	Sender ID TLV information for facility base MEPs
Context	<b>configure eth-cfm domain string association string facility-id-permission keyword</b>
Tree	<b>facility-id-permission</b>
Options	none, chassis
Default	none
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **icc-based string**

#### **WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Maintenance Association name in ICC-based format
Context	<b>configure eth-cfm domain string association string icc-based string</b>
Tree	<b>icc-based</b>

String Length	8 to 13
Notes	The following elements are part of a mandatory choice: <b>icc-based</b> , <b>integer</b> , <b>string</b> , <b>vid</b> , or <b>vpn-id</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **integer number**

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Maintenance Association name in integer format
Context	<b>configure eth-cfm domain string association string integer number</b>
Tree	<a href="#">integer</a>
Range	0 to 65535
Notes	The following elements are part of a mandatory choice: <b>icc-based</b> , <b>integer</b> , <b>string</b> , <b>vid</b> , or <b>vpn-id</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **ma-index number**

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Maintenance Association (MA) table index
Context	<b>configure eth-cfm domain string association string ma-index number</b>
Tree	<a href="#">ma-index</a>
Range	1 to 4294967295
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **remote-mep [mep-id] number**

Synopsis	Enter the <b>remote-mep</b> list instance
----------	---

Context	<b>configure eth-cfm domain string association string remote-mep number</b>
Tree	<b>remote-mep</b>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**[mep-id] number**

Synopsis	Remote MEP ID
Context	<b>configure eth-cfm domain string association string remote-mep number</b>
Tree	<b>remote-mep</b>
Range	1 to 8191
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**remote-mac string**

Synopsis	Remote MAC Address for transmitting CFM packets to remote MEPs
Context	<b>configure eth-cfm domain string association string remote-mep number remote-mac string</b>
Tree	<b>remote-mac</b>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**string string****WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Maintenance Association name in raw ASCII string format
Context	<b>configure eth-cfm domain string association string string string</b>
Tree	<b>string</b>
String Length	1 to 45
Notes	The following elements are part of a mandatory choice: <b>icc-based</b> , <b>integer</b> , <b>string</b> , <b>vid</b> , or <b>vpn-id</b> .

Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**vid number****WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Primary VLAN ID for the Maintenance Association name
Context	<b>configure</b> <i>eth-cfm domain string association string vid number</i>
Tree	<i>vid</i>
Range	0 to 4094
Notes	The following elements are part of a mandatory choice: <b>icc-based</b> , <b>integer</b> , <b>string</b> , <b>vid</b> , or <b>vpn-id</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**vpn-id string****WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	VPN ID for the Maintenance Association name
Context	<b>configure</b> <i>eth-cfm domain string association string vpn-id string</i>
Tree	<i>vpn-id</i>
String Length	0 to 15
Notes	The following elements are part of a mandatory choice: <b>icc-based</b> , <b>integer</b> , <b>string</b> , <b>vid</b> , or <b>vpn-id</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**dns string****WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Domain name like text string derived from a DNS name
Context	<b>configure</b> <i>eth-cfm domain string dns string</i>
Tree	<i>dns</i>
String Length	1 to 43
Notes	The following elements are part of a mandatory choice: <b>dns</b> , <b>format</b> , <b>mac</b> , or <b>name</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**format keyword****WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Maintenance domain name not to be provided
Context	<b>configure</b> <i>eth-cfm domain string format keyword</i>
Tree	<i>format</i>
Options	none
Notes	The following elements are part of a mandatory choice: <b>dns</b> , <b>format</b> , <b>mac</b> , or <b>name</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**level number****WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Maintenance Domain Level (MD Level)
Context	<b>configure</b> <i>eth-cfm domain string level number</i>
Tree	<i>level</i>
Range	0 to 7

Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### mac string

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Maintenance domain MAC name
Context	<b>configure</b> eth-cfm domain string mac string
Tree	mac
String Length	13 to 23
Notes	The following elements are part of a mandatory choice: <b>dns</b> , <b>format</b> , <b>mac</b> , or <b>name</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### md-index number

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	The index of the Maintenance Domain (MD)
Context	<b>configure</b> eth-cfm domain string md-index number
Tree	md-index
Range	1 to 4294967295
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### name string

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

---

Synopsis	Maintenance Domain name
Context	<b>configure eth-cfm domain</b> <i>string name string</i>
Tree	<i>name</i>
String Length	1 to 43
Notes	The following elements are part of a mandatory choice: <b>dns</b> , <b>format</b> , <b>mac</b> , or <b>name</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## 3.16 eth-ring commands

```

configure
- eth-ring number
- admin-state keyword
- apply-groups reference
- apply-groups-exclude reference
- ccm-hold-time
- down number
- up number
- compatible-version number
- description string
- guard-time number
- node-id string
- path string
- admin-state keyword
- apply-groups reference
- apply-groups-exclude reference
- description string
- eth-cfm
- mep md-admin-name reference ma-admin-name reference mep-id number
- admin-state keyword
- alarm-notification
- fng-alarm-time number
- fng-reset-time number
- apply-groups reference
- apply-groups-exclude reference
- ccm boolean
- ccm-ltm-priority number
- ccm-padding-size number
- control-mep boolean
- description string
- eth-test
- bit-error-threshold number
- test-pattern
- crc-tlv boolean
- pattern keyword
- grace
- eth-ed
- max-rx-defect-window number
- priority number
- rx-eth-ed boolean
- tx-eth-ed boolean
- eth-vsm-grace
- rx-eth-vsm-grace boolean
- tx-eth-vsm-grace boolean
- low-priority-defect keyword
- mac-address string
- one-way-delay-threshold number
- port-and-raps-tag string
- rpl-end boolean
- revert-time number
- rpl-node keyword
- sub-ring
- interconnect
- propagate-topology-change boolean
- ring-id reference
- vpls
- type keyword

```

### 3.16.1 eth-ring command descriptions

#### **eth-ring** [[ring-index](#)] *number*

Synopsis	Enter the <b>eth-ring</b> list instance
Context	<b>configure</b> <a href="#">eth-ring</a> <i>number</i>
Tree	<a href="#">eth-ring</a>
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

#### **[ring-index]** *number*

Synopsis	Ring ID
Context	<b>configure</b> <a href="#">eth-ring</a> <i>number</i>
Tree	<a href="#">eth-ring</a>
Range	1 to 128
Notes	This element is part of a list key.
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

#### **admin-state** *keyword*

Synopsis	Administrative state of the Ethernet ring
Context	<b>configure</b> <a href="#">eth-ring</a> <i>number</i> <a href="#">admin-state</a> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

#### **ccm-hold-time**

Synopsis	Enter the <b>ccm-hold-time</b> context
Context	<b>configure</b> <a href="#">eth-ring</a> <i>number</i> <a href="#">ccm-hold-time</a>
Tree	<a href="#">ccm-hold-time</a>

---

Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **down** *number*

Synopsis	Hold timer for down event dampening
Context	<b>configure</b> <i>eth-ring number ccm-hold-time down number</i>
Tree	<i>down</i>
Range	1 to 5000
Units	centiseconds
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **up** *number*

Synopsis	Hold timer for recovery reporting
Context	<b>configure</b> <i>eth-ring number ccm-hold-time up number</i>
Tree	<i>up</i>
Range	0 to 5000
Units	deciseconds
Default	20
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **compatible-version** *number*

Synopsis	Compatibility version for the Ethernet ring
Context	<b>configure</b> <i>eth-ring number compatible-version number</i>
Tree	<i>compatible-version</i>
Range	1 to 2
Default	2
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**description** *string*

Synopsis	Text description
Context	<b>configure eth-ring number description string</b>
Tree	<a href="#">description</a>
String Length	0 to 80
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**guard-time** *number*

Synopsis	Ethernet ring guard time
Context	<b>configure eth-ring number guard-time number</b>
Tree	<a href="#">guard-time</a>
Range	1 to 20
Units	deciseconds
Default	5
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**node-id** *string*

Synopsis	MAC address of the RPL link
Context	<b>configure eth-ring number node-id string</b>
Tree	<a href="#">node-id</a>
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**path** [[path-index](#)] *string*

Synopsis	Enter the <b>path</b> list instance
Context	<b>configure eth-ring number path string</b>
Tree	<a href="#">path</a>
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**[path-index]** *string*

Synopsis	Path ID
Context	<b>configure eth-ring number path string</b>
Tree	<a href="#">path</a>
String Length	1
Notes	This element is part of a list key.
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**admin-state** *keyword*

Synopsis	Administrative state of the Ethernet ring path
Context	<b>configure eth-ring number path string admin-state keyword</b>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**description** *string*

Synopsis	Text description
Context	<b>configure eth-ring number path string description string</b>
Tree	<a href="#">description</a>
String Length	0 to 80
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**eth-cfm**

Synopsis	Enter the <b>eth-cfm</b> context
Context	<b>configure eth-ring number path string eth-cfm</b>
Tree	<a href="#">eth-cfm</a>
Introduced	21.7.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **mep** *md-admin-name reference* *ma-admin-name reference* *mep-id number*

Synopsis Enter the **mep** list instance

Context **configure** *eth-ring number path string eth-cfm mep md-admin-name reference ma-admin-name reference mep-id number*

Tree [mep](#)

Introduced 21.7.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **md-admin-name** *reference*

Synopsis Maintenance Domain (MD) name

Context **configure** *eth-ring number path string eth-cfm mep md-admin-name reference ma-admin-name reference mep-id number*

Tree [mep](#)

Reference **configure** *eth-cfm domain string*

Notes This element is part of a list key.

Introduced 21.7.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **ma-admin-name** *reference*

Synopsis Maintenance Association (MA) name

Context **configure** *eth-ring number path string eth-cfm mep md-admin-name reference ma-admin-name reference mep-id number*

Tree [mep](#)

Reference **configure** *eth-cfm domain string association string*

Notes This element is part of a list key.

Introduced 21.7.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **mep-id** *number*

Synopsis Maintenance Endpoint (MEP) ID

Context	<b>configure</b> <a href="#">eth-ring</a> <i>number</i> <a href="#">path</a> <i>string</i> <a href="#">eth-cfm mep</a> <a href="#">md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i>
Tree	<a href="#">mep</a>
Range	1 to 8191
Notes	This element is part of a list key.
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **admin-state** *keyword*

Synopsis	Administrative state of the MEP
Context	<b>configure</b> <a href="#">eth-ring</a> <i>number</i> <a href="#">path</a> <i>string</i> <a href="#">eth-cfm mep</a> <a href="#">md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <a href="#">admin-state</a> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **alarm-notification**

Synopsis	Enter the <b>alarm-notification</b> context
Context	<b>configure</b> <a href="#">eth-ring</a> <i>number</i> <a href="#">path</a> <i>string</i> <a href="#">eth-cfm mep</a> <a href="#">md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <a href="#">alarm-notification</a>
Tree	<a href="#">alarm-notification</a>
Description	<p>Commands in this context configure the Fault Notification Generator (FNG) time values to raise an alarm or reset the CCM defect alarm.</p> <p>Use these timers for network management processes. The timers are not tied into delaying the notification to the fault management system on the network element and do not affect fault propagation mechanisms.</p>
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **fng-alarm-time** *number*

Synopsis	Time that must expire before an FNG alarm is raised
----------	---

Context	<b>configure</b> <a href="#">eth-ring</a> <i>number</i> <a href="#">path</a> <i>string</i> <a href="#">eth-cfm</a> <a href="#">mep</a> <a href="#">md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <a href="#">alarm-notification</a> <a href="#">fng-alarm-time</a> <i>number</i>
Tree	<a href="#">fng-alarm-time</a>
Range	250   500   1000
Units	centiseconds
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **fng-reset-time** *number*

Synopsis	Time that must expire before an FNG alarm is reset
Context	<b>configure</b> <a href="#">eth-ring</a> <i>number</i> <a href="#">path</a> <i>string</i> <a href="#">eth-cfm</a> <a href="#">mep</a> <a href="#">md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <a href="#">alarm-notification</a> <a href="#">fng-reset-time</a> <i>number</i>
Tree	<a href="#">fng-reset-time</a>
Range	250   500   1000
Units	centiseconds
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **ccm** *boolean*

Synopsis	Generate CCM messages
Context	<b>configure</b> <a href="#">eth-ring</a> <i>number</i> <a href="#">path</a> <i>string</i> <a href="#">eth-cfm</a> <a href="#">mep</a> <a href="#">md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <a href="#">ccm</a> <i>boolean</i>
Tree	<a href="#">ccm</a>
Default	false
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **ccm-ltm-priority** *number*

Synopsis	Priority of CCM and LTM messages transmitted by the MEP
Context	<b>configure</b> <a href="#">eth-ring</a> <i>number</i> <a href="#">path</a> <i>string</i> <a href="#">eth-cfm</a> <a href="#">mep</a> <a href="#">md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <a href="#">ccm-ltm-priority</a> <i>number</i>
Tree	<a href="#">ccm-ltm-priority</a>
Range	0 to 7

Default	7
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **ccm-padding-size** *number*

Synopsis	Number of octets of padding to insert in CCM packets
Context	<b>configure</b> <a href="#">eth-ring number path string eth-cfm mep md-admin-name reference ma-admin-name reference mep-id number ccm-padding-size number</a>
Tree	<a href="#">ccm-padding-size</a>
Description	This command sets the byte size of the optional Data TLV to be included in the ETH-CC PDU.  This command increases the size of the ETH-CC PDU by the configured value. The base size of the ETH-CC PDU, including the Interface Status TLV and Port Status TLV, is 83 bytes not including the Layer 2 encapsulation. CCM padding is not supported when the CCM interval (configured through <b>configure eth-cfm domain association ccm-interval</b> ) is less than 1 second.
Range	3 to 1500
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **control-mep** *boolean*

Synopsis	Enable Ethernet ring control on the MEP
Context	<b>configure</b> <a href="#">eth-ring number path string eth-cfm mep md-admin-name reference ma-admin-name reference mep-id number control-mep boolean</a>
Tree	<a href="#">control-mep</a>
Default	false
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">eth-ring number path string eth-cfm mep md-admin-name reference ma-admin-name reference mep-id number description string</a>
Tree	<a href="#">description</a>
String Length	1 to 80

Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## eth-test

Synopsis	Enable the <b>eth-test</b> context
Context	<b>configure eth-ring number path string eth-cfm mep md-admin-name reference ma-admin-name reference mep-id number eth-test</b>
Tree	<a href="#">eth-test</a>
Description	Commands in this context configure information used by the Ethernet Test (ETH-TST) packet. The commands must be configured on both the sender and the receiver nodes. The test packets are used with the <b>oam eth-cfm eth-test</b> command.
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## bit-error-threshold *number*

Synopsis	Lowest priority defect allowed to generate fault alarm
Context	<b>configure eth-ring number path string eth-cfm mep md-admin-name reference ma-admin-name reference mep-id number eth-test bit-error-threshold number</b>
Tree	<a href="#">bit-error-threshold</a>
Range	0 to 11840
Units	bit errors
Default	1
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## test-pattern

Synopsis	Enter the <b>test-pattern</b> context
Context	<b>configure eth-ring number path string eth-cfm mep md-admin-name reference ma-admin-name reference mep-id number eth-test test-pattern</b>
Tree	<a href="#">test-pattern</a>
Description	Commands in this context specify the test pattern for the ETH-TST frames. The pattern does not have to be the same on the sender and the receiver.
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**crc-tlv** *boolean*

Synopsis	Generate a CRC checksum
Context	<b>configure</b> <a href="#">eth-ring</a> <i>number</i> <a href="#">path</a> <i>string</i> <a href="#">eth-cfm</a> <a href="#">mep</a> <a href="#">md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <a href="#">eth-test</a> <a href="#">test-pattern</a> <b>crc-tlv</b> <i>boolean</i>
Tree	<a href="#">crc-tlv</a>
Default	false
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**pattern** *keyword*

Synopsis	Test pattern for Ethernet Test frames
Context	<b>configure</b> <a href="#">eth-ring</a> <i>number</i> <a href="#">path</a> <i>string</i> <a href="#">eth-cfm</a> <a href="#">mep</a> <a href="#">md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <a href="#">eth-test</a> <a href="#">test-pattern</a> <b>pattern</b> <i>keyword</i>
Tree	<a href="#">pattern</a>
Description	This command specifies the test pattern of the Ethernet Test (ETH-TST) frames. This does not have to be configured the same on the sender and the receiver.
Options	all-zeros, all-ones
Default	all-zeros
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**grace**

Synopsis	Enter the <b>grace</b> context
Context	<b>configure</b> <a href="#">eth-ring</a> <i>number</i> <a href="#">path</a> <i>string</i> <a href="#">eth-cfm</a> <a href="#">mep</a> <a href="#">md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <a href="#">grace</a>
Tree	<a href="#">grace</a>
Description	Commands in this context configure the Nokia ETH-CFM Grace function and the ITU-T Y.1731 Ethernet Expected Default (ETH-ED) function.
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**eth-ed**

Synopsis	Enter the <b>eth-ed</b> context
Context	<b>configure</b> <a href="#">eth-ring</a> <i>number</i> <a href="#">path</a> <i>string</i> <a href="#">eth-cfm</a> <a href="#">mep</a> <a href="#">md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <a href="#">grace</a> <a href="#">eth-ed</a>
Tree	<a href="#">eth-ed</a>
Description	Commands in this context configure the ITU-T Y.1731 ETH-ED function.
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**max-rx-defect-window** *number*

Synopsis	Maximum received ETH-ED expected defect window duration
Context	<b>configure</b> <a href="#">eth-ring</a> <i>number</i> <a href="#">path</a> <i>string</i> <a href="#">eth-cfm</a> <a href="#">mep</a> <a href="#">md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <a href="#">grace</a> <a href="#">eth-ed</a> <a href="#">max-rx-defect-window</a> <i>number</i>
Tree	<a href="#">max-rx-defect-window</a>
Range	1 to 86400
Units	seconds
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**priority** *number*

Synopsis	Transmission priority for ETH-ED PDUs
Context	<b>configure</b> <a href="#">eth-ring</a> <i>number</i> <a href="#">path</a> <i>string</i> <a href="#">eth-cfm</a> <a href="#">mep</a> <a href="#">md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <a href="#">grace</a> <a href="#">eth-ed</a> <a href="#">priority</a> <i>number</i>
Tree	<a href="#">priority</a>
Range	0 to 7
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**rx-eth-ed** *boolean*

Synopsis	Receive and process ETH-ED ITU-T Y.1731 PDUs on the MEP
Context	<b>configure</b> <a href="#">eth-ring</a> <i>number</i> <a href="#">path</a> <i>string</i> <a href="#">eth-cfm</a> <a href="#">mep</a> <a href="#">md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <a href="#">grace</a> <a href="#">eth-ed</a> <a href="#">rx-eth-ed</a> <i>boolean</i>
Tree	<a href="#">rx-eth-ed</a>

Description	This command enables the reception and processing of the ITU-T Y.1731 ETH-ED PDU on the MEP.
Default	true
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **tx-eth-ed** *boolean*

Synopsis	Transmit ETH-ED PDUs from the MEP
Context	<b>configure</b> <a href="#">eth-ring</a> <i>number</i> <a href="#">path</a> <i>string</i> <a href="#">eth-cfm mep md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <a href="#">grace eth-ed tx-eth-ed</a> <i>boolean</i>
Tree	<a href="#">tx-eth-ed</a>
Default	false
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **eth-vsm-grace**

Synopsis	Enter the <b>eth-vsm-grace</b> context
Context	<b>configure</b> <a href="#">eth-ring</a> <i>number</i> <a href="#">path</a> <i>string</i> <a href="#">eth-cfm mep md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <a href="#">grace eth-vsm-grace</a>
Tree	<a href="#">eth-vsm-grace</a>
Description	Commands in this context configure the Nokia ETH-CFM Grace function.
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **rx-eth-vsm-grace** *boolean*

Synopsis	Receive and process Nokia ETH-CFM Grace PDU on the MEP
Context	<b>configure</b> <a href="#">eth-ring</a> <i>number</i> <a href="#">path</a> <i>string</i> <a href="#">eth-cfm mep md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <a href="#">grace eth-vsm-grace rx-eth-vsm-grace</a> <i>boolean</i>
Tree	<a href="#">rx-eth-vsm-grace</a>
Description	When configured to <b>true</b> , the router enables the Nokia Grace function, which is a vendor-specific PDU that informs MEP peers that the local node may be entering a period of expected defect. When configured to <b>false</b> , the router disables the Nokia Grace function.
Default	true

Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **tx-eth-vsm-grace** *boolean*

Synopsis	Transmit ETH-ED PDUs from the MEP
Context	<b>configure</b> <a href="#">eth-ring</a> <i>number</i> <a href="#">path</a> <i>string</i> <a href="#">eth-cfm mep</a> <a href="#">md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <a href="#">grace eth-vsm-grace tx-eth-vsm-grace</a> <i>boolean</i>
Tree	<a href="#">tx-eth-vsm-grace</a>
Description	<p>When configured to <b>true</b>, the router can transmit the Nokia ETH-CFM Grace PDU from the MEP when a system soft reset notification is received for one or more cards.</p> <p>The Nokia Grace function is a vendor-specific PDU that informs MEP peers that the local node may be entering a period of expected defect.</p> <p>The operator must configure the <b>configure system eth-cfm grace</b> command to instruct the system that the node is capable of transmitting expected-defect windows to peers. The system can only transmit one form of ETH-CFM grace (Nokia ETH-CFM Grace or ITU-T Y.1731 ETH-ED).</p> <p>When configured to <b>false</b>, the router disables the transmission of the Nokia ETH-CFM Grace PDU from the MEP.</p>
Default	true
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **low-priority-defect** *keyword*

Synopsis	Lowest priority defect allowed to generate fault alarm
Context	<b>configure</b> <a href="#">eth-ring</a> <i>number</i> <a href="#">path</a> <i>string</i> <a href="#">eth-cfm mep</a> <a href="#">md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <a href="#">low-priority-defect</a> <i>keyword</i>
Tree	<a href="#">low-priority-defect</a>
Options	all-def, mac-rem-err-xcon, rem-err-xcon, err-xcon, xcon, no-xcon
Default	all-def
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **mac-address** *string*

Synopsis	MAC address of the MEP
----------	------------------------

Context	<b>configure eth-ring number path string eth-cfm mep md-admin-name reference ma-admin-name reference mep-id number mac-address string</b>
Tree	<a href="#">mac-address</a>
Description	This command specifies the MAC address of the MEP. When unconfigured, the MAC address of the port (if the MEP is on a SAP) or the MAC address of a bridge (if the MEP is on a spoke) is used.
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **one-way-delay-threshold number**

Synopsis	Threshold time limit for the one-way delay test
Context	<b>configure eth-ring number path string eth-cfm mep md-admin-name reference ma-admin-name reference mep-id number one-way-delay-threshold number</b>
Tree	<a href="#">one-way-delay-threshold</a>
Range	0 to 600
Units	seconds
Default	3
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **port-and-raps-tag string**

#### **WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Port ID and Ring APS tag ID
Context	<b>configure eth-ring number path string port-and-raps-tag string</b>
Tree	<a href="#">port-and-raps-tag</a>
String Length	1 to 45
Notes	This element is mandatory.
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## rpl-end *boolean*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Enable path as a Ring Protection Link (RPL) end
Context	<b>configure eth-ring number path string rpl-end boolean</b>
Tree	<a href="#">rpl-end</a>
Default	false
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## revert-time *number*

Synopsis	Revert time for the Ethernet ring
Context	<b>configure eth-ring number revert-time number</b>
Tree	<a href="#">revert-time</a>
Range	0   60 to 720
Units	seconds
Default	300
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## rpl-node *keyword*

Synopsis	Ring Protection Link (RPL) type for the Ethernet ring
Context	<b>configure eth-ring number rpl-node keyword</b>
Tree	<a href="#">rpl-node</a>
Options	owner, neighbor
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## sub-ring

Synopsis	Enter the <b>sub-ring</b> context
Context	<b>configure eth-ring number sub-ring</b>

Tree	<a href="#">sub-ring</a>
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## interconnect

Synopsis	Enter the <b>interconnect</b> context
Context	<b>configure</b> <a href="#">eth-ring</a> <i>number</i> <a href="#">sub-ring</a> <b>interconnect</b>
Tree	<a href="#">interconnect</a>
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## propagate-topology-change *boolean*

Synopsis	Propagate topology changes
Context	<b>configure</b> <a href="#">eth-ring</a> <i>number</i> <a href="#">sub-ring</a> <b>interconnect</b> <a href="#">propagate-topology-change</a> <i>boolean</i>
Tree	<a href="#">propagate-topology-change</a>
Default	false
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## ring-id *reference*

Synopsis	Ring instance of the connection ring for the sub-ring
Context	<b>configure</b> <a href="#">eth-ring</a> <i>number</i> <a href="#">sub-ring</a> <b>interconnect</b> <a href="#">ring-id</a> <i>reference</i>
Tree	<a href="#">ring-id</a>
Reference	<b>configure</b> <a href="#">eth-ring</a> <i>number</i>
Notes	The following elements are part of a choice: <b>ring-id</b> or <b>vpls</b> .
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## vpls

Synopsis	Connect sub-ring to VPLS ID that contains sub-ring SAP
Context	<b>configure</b> <a href="#">eth-ring</a> <i>number</i> <a href="#">sub-ring</a> <b>interconnect</b> <a href="#">vpls</a>

---

Tree	<a href="#">vpls</a>
Notes	The following elements are part of a choice: <b>ring-id</b> or <b>vpls</b> .
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**type** *keyword*

Synopsis	Sub-ring type
Context	<b>configure</b> <a href="#">eth-ring</a> <i>number</i> <a href="#">sub-ring</a> <a href="#">type</a> <i>keyword</i>
Tree	<a href="#">type</a>
Options	virtual-link, non-virtual-link
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## 3.17 filter commands

```

configure
- filter

### 3.17.1 filter command descriptions

#### filter

Synopsis	Enter the <b>filter</b> context
Context	<b>configure filter</b>
Tree	<a href="#">filter</a>
Introduced	16.0.R1
Platforms	All

#### dhcp-filter [[filter-id](#)] *number*

Synopsis	Enter the <b>dhcp-filter</b> list instance
Context	<b>configure filter dhcp-filter</b> <i>number</i>
Tree	<a href="#">dhcp-filter</a>
Introduced	16.0.R1
Platforms	All

#### [\[filter-id\]](#) *number*

Synopsis	Unique DHCP filter policy ID
Context	<b>configure filter dhcp-filter</b> <i>number</i>
Tree	<a href="#">dhcp-filter</a>
Range	1 to 65535
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

#### default-action

Synopsis	Enable the <b>default-action</b> context
Context	<b>configure filter dhcp-filter</b> <i>number</i> <a href="#">default-action</a>
Tree	<a href="#">default-action</a>
Introduced	16.0.R1

Platforms All

## bypass-host-creation

Synopsis Host creation options to bypass

Context **configure filter dhcp-filter number default-action bypass-host-creation**

Tree [bypass-host-creation](#)

Notes The following elements are part of a mandatory choice: **bypass-host-creation** or **drop**.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## drop

Synopsis DHCP host creation when the filter entry is matched

Context **configure filter dhcp-filter number default-action drop**

Tree [drop](#)

Notes The following elements are part of a mandatory choice: **bypass-host-creation** or **drop**.

Introduced 16.0.R1

Platforms All

## description *string*

Synopsis Text description

Context **configure filter dhcp-filter number description string**

Tree [description](#)

String Length 1 to 80

Introduced 16.0.R1

Platforms All

## entry [[entry-id](#)] *number*

Synopsis Enter the **entry** list instance

Context **configure filter dhcp-filter number entry number**

Tree [entry](#)

Max. Instances	10
Introduced	16.0.R1
Platforms	All

**[entry-id] number**

Synopsis	DHCP filter entry ID
Context	<b>configure</b> filter dhcp-filter number entry number
Tree	<a href="#">entry</a>
Range	1 to 65535
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

**action**

Synopsis	Enable the <b>action</b> context
Context	<b>configure</b> filter dhcp-filter number entry number action
Tree	<a href="#">action</a>
Introduced	16.0.R1
Platforms	All

**bypass-host-creation**

Synopsis	Host creation options to bypass
Context	<b>configure</b> filter dhcp-filter number entry number action <a href="#">bypass-host-creation</a>
Tree	<a href="#">bypass-host-creation</a>
Notes	The following elements are part of a mandatory choice: <b>bypass-host-creation</b> or <b>drop</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**drop**

Synopsis	DHCP host creation when the filter entry is matched
----------	---

Context	<b>configure filter dhcp-filter number entry number action drop</b>
Tree	<b>drop</b>
Notes	The following elements are part of a mandatory choice: <b>bypass-host-creation</b> or <b>drop</b> .
Introduced	16.0.R1
Platforms	All

## option

Synopsis	Enable the <b>option</b> context
Context	<b>configure filter dhcp-filter number entry number option</b>
Tree	<b>option</b>
Introduced	16.0.R1
Platforms	All

## absent

Synopsis	Require the absence of related option
Context	<b>configure filter dhcp-filter number entry number option absent</b>
Tree	<b>absent</b>
Notes	The following elements are part of a mandatory choice: <b>absent</b> , <b>match</b> , or <b>present</b> .
Introduced	16.0.R1
Platforms	All

## match

Synopsis	Enable the <b>match</b> context
Context	<b>configure filter dhcp-filter number entry number option match</b>
Tree	<b>match</b>
Notes	The following elements are part of a mandatory choice: <b>absent</b> , <b>match</b> , or <b>present</b> .
Introduced	16.0.R1
Platforms	All

## exact *boolean*

Synopsis	Use an exact match pattern (not partial)
----------	--

Context	<b>configure filter dhcp-filter number entry number option match exact boolean</b>
Tree	<b>exact</b>
Default	false
Introduced	16.0.R1
Platforms	All

### **hex string**

Synopsis	Matching pattern for the filtered option
Context	<b>configure filter dhcp-filter number entry number option match hex string</b>
Tree	<b>hex</b>
String Length	1 to 256
Notes	The following elements are part of a mandatory choice: <b>hex</b> or <b>string</b> .
Introduced	16.0.R1
Platforms	All

### **invert boolean**

Synopsis	Invert (partial) matching criteria
Context	<b>configure filter dhcp-filter number entry number option match invert boolean</b>
Tree	<b>invert</b>
Default	false
Introduced	16.0.R1
Platforms	All

### **string string**

Synopsis	Matching pattern for the filtered option
Context	<b>configure filter dhcp-filter number entry number option match string string</b>
Tree	<b>string</b>
String Length	1 to 127
Notes	The following elements are part of a mandatory choice: <b>hex</b> or <b>string</b> .
Introduced	16.0.R1
Platforms	All

**number** *number*

Synopsis	Number for DHCP or DHCPv6 option to filter on
Context	<b>configure filter dhcp-filter</b> <i>number entry number option number number</i>
Tree	<a href="#">number</a>
Range	0 to 255
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

**present**

Synopsis	Require the presence of related option
Context	<b>configure filter dhcp-filter</b> <i>number entry number option present</i>
Tree	<a href="#">present</a>
Notes	The following elements are part of a mandatory choice: <b>absent</b> , <b>match</b> , or <b>present</b> .
Introduced	16.0.R1
Platforms	All

**dhcp6-filter** [[filter-id](#)] *number*

Synopsis	Enter the <b>dhcp6-filter</b> list instance
Context	<b>configure filter dhcp6-filter</b> <i>number</i>
Tree	<a href="#">dhcp6-filter</a>
Introduced	16.0.R1
Platforms	All

**[filter-id]** *number*

Synopsis	Unique DHCP filter policy ID
Context	<b>configure filter dhcp6-filter</b> <i>number</i>
Tree	<a href="#">dhcp6-filter</a>
Range	1 to 65535
Notes	This element is part of a list key.
Introduced	16.0.R1

Platforms All

### default-action

Synopsis Enable the **default-action** context  
 Context **configure filter dhcp6-filter number default-action**  
 Tree [default-action](#)  
 Introduced 16.0.R1  
 Platforms All

### bypass-host-creation

Synopsis Enable the **bypass-host-creation** context  
 Context **configure filter dhcp6-filter number default-action bypass-host-creation**  
 Tree [bypass-host-creation](#)  
 Notes The following elements are part of a mandatory choice: **bypass-host-creation** or **drop**.  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### na boolean

Synopsis Bypass the DHCPv6 NA host creation  
 Context **configure filter dhcp6-filter number default-action bypass-host-creation na boolean**  
 Tree [na](#)  
 Default true  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### pd boolean

Synopsis Bypass the DHCPv6 PD host creation  
 Context **configure filter dhcp6-filter number default-action bypass-host-creation pd boolean**  
 Tree [pd](#)  
 Default true  
 Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## drop

Synopsis Drop DHCPv6 message (do not process)  
 Context **configure filter dhcp6-filter number default-action drop**  
 Tree [drop](#)  
 Notes The following elements are part of a mandatory choice: **bypass-host-creation** or **drop**.  
 Introduced 16.0.R1  
 Platforms All

## description *string*

Synopsis Text description  
 Context **configure filter dhcp6-filter number description string**  
 Tree [description](#)  
 String Length 1 to 80  
 Introduced 16.0.R1  
 Platforms All

## entry [[entry-id](#)] *number*

Synopsis Enter the **entry** list instance  
 Context **configure filter dhcp6-filter number entry number**  
 Tree [entry](#)  
 Max. Instances 10  
 Introduced 16.0.R1  
 Platforms All

## [[entry-id](#)] *number*

Synopsis DHCP filter entry ID  
 Context **configure filter dhcp6-filter number entry number**  
 Tree [entry](#)

Range	1 to 65535
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

## action

Synopsis	Enable the <b>action</b> context
Context	<b>configure filter dhcp6-filter number entry number action</b>
Tree	<a href="#">action</a>
Introduced	16.0.R1
Platforms	All

## bypass-host-creation

Synopsis	Enable the <b>bypass-host-creation</b> context
Context	<b>configure filter dhcp6-filter number entry number action bypass-host-creation</b>
Tree	<a href="#">bypass-host-creation</a>
Notes	The following elements are part of a mandatory choice: <b>bypass-host-creation</b> or <b>drop</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## na *boolean*

Synopsis	Bypass the DHCPv6 NA host creation
Context	<b>configure filter dhcp6-filter number entry number action bypass-host-creation na boolean</b>
Tree	<a href="#">na</a>
Default	true
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## pd *boolean*

Synopsis	Bypass the DHCPv6 PD host creation
----------	------------------------------------

Context	<b>configure filter dhcp6-filter</b> <i>number</i> <b>entry</b> <i>number</i> <b>action</b> <b>bypass-host-creation</b> <b>pd</b> <i>boolean</i>
Tree	<a href="#">pd</a>
Default	true
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## drop

Synopsis	Drop DHCPv6 message (do not process)
Context	<b>configure filter dhcp6-filter</b> <i>number</i> <b>entry</b> <i>number</i> <b>action</b> <b>drop</b>
Tree	<a href="#">drop</a>
Notes	The following elements are part of a mandatory choice: <b>bypass-host-creation</b> or <b>drop</b> .
Introduced	16.0.R1
Platforms	All

## option

Synopsis	Enable the <b>option</b> context
Context	<b>configure filter dhcp6-filter</b> <i>number</i> <b>entry</b> <i>number</i> <b>option</b>
Tree	<a href="#">option</a>
Introduced	16.0.R1
Platforms	All

## absent

Synopsis	Require the absence of related option
Context	<b>configure filter dhcp6-filter</b> <i>number</i> <b>entry</b> <i>number</i> <b>option</b> <b>absent</b>
Tree	<a href="#">absent</a>
Notes	The following elements are part of a mandatory choice: <b>absent</b> , <b>match</b> , or <b>present</b> .
Introduced	16.0.R1
Platforms	All

## match

Synopsis	Enable the <b>match</b> context
Context	<b>configure filter dhcp6-filter number entry number option match</b>
Tree	<a href="#">match</a>
Notes	The following elements are part of a mandatory choice: <b>absent</b> , <b>match</b> , or <b>present</b> .
Introduced	16.0.R1
Platforms	All

## exact *boolean*

Synopsis	Use an exact match pattern (not partial)
Context	<b>configure filter dhcp6-filter number entry number option match exact boolean</b>
Tree	<a href="#">exact</a>
Default	false
Introduced	16.0.R1
Platforms	All

## hex *string*

Synopsis	Matching pattern for the filtered option
Context	<b>configure filter dhcp6-filter number entry number option match hex string</b>
Tree	<a href="#">hex</a>
String Length	1 to 256
Notes	The following elements are part of a mandatory choice: <b>hex</b> or <b>string</b> .
Introduced	16.0.R1
Platforms	All

## invert *boolean*

Synopsis	Invert (partial) matching criteria
Context	<b>configure filter dhcp6-filter number entry number option match invert boolean</b>
Tree	<a href="#">invert</a>
Default	false
Introduced	16.0.R1

Platforms All

### **string** *string*

Synopsis Matching pattern for the filtered option  
 Context **configure** [filter](#) [dhcp6-filter](#) *number* [entry](#) *number* [option](#) [match](#) *string* *string*  
 Tree [string](#)  
 String Length 1 to 127  
 Notes The following elements are part of a mandatory choice: **hex** or **string**.  
 Introduced 16.0.R1  
 Platforms All

### **number** *number*

Synopsis Number for DHCP or DHCPv6 option to filter on  
 Context **configure** [filter](#) [dhcp6-filter](#) *number* [entry](#) *number* [option](#) [number](#) *number*  
 Tree [number](#)  
 Range 0 to 255  
 Notes This element is mandatory.  
 Introduced 16.0.R1  
 Platforms All

### **present**

Synopsis Require the presence of related option  
 Context **configure** [filter](#) [dhcp6-filter](#) *number* [entry](#) *number* [option](#) [present](#)  
 Tree [present](#)  
 Notes The following elements are part of a mandatory choice: **absent**, **match**, or **present**.  
 Introduced 16.0.R1  
 Platforms All

### **gre-tunnel-template** [[gre-tunnel-template-name](#)] *string*

Synopsis Enter the **gre-tunnel-template** list instance  
 Context **configure** [filter](#) [gre-tunnel-template](#) *string*

Tree	<a href="#">gre-tunnel-template</a>
Max. Instances	8191
Introduced	16.0.R1
Platforms	All

### **[gre-tunnel-template-name]** *string*

Synopsis	GRE tunnel template ID
Context	<b>configure</b> <a href="#">filter gre-tunnel-template</a> <i>string</i>
Tree	<a href="#">gre-tunnel-template</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

### **description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">filter gre-tunnel-template</a> <i>string</i> <a href="#">description</a> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R2
Platforms	All

### **ipv4**

Synopsis	Enter the <b>ipv4</b> context
Context	<b>configure</b> <a href="#">filter gre-tunnel-template</a> <i>string</i> <a href="#">ipv4</a>
Tree	<a href="#">ipv4</a>
Notes	The following elements are part of a choice: <b>ipv4</b> or <b>ipv6</b> .
Introduced	16.0.R1
Platforms	All

**destination-address** [[address](#)] *string*

Synopsis	Add a list entry for <b>destination-address</b>
Context	<b>configure</b> filter <a href="#">gre-tunnel-template</a> <i>string</i> <a href="#">ipv4</a> <a href="#">destination-address</a> <i>string</i>
Tree	<a href="#">destination-address</a>
Description	This command defines a destination for the GRE IP header used to encapsulate the matching IPv4/IPv6 packet.  A single destination address can be specified for an IPv6 <b>gre-tunnel-template</b> .  Traffic matching the associated IPv4 or IPv6 filter is hashed across any available ECMP or UCMP route next hop available to the destination address. If no destination address is available, then matching traffic follows the configured <b>pbr-down-action-override</b> action, if configured. If no <b>pbr-down-action-override</b> is configured traffic is discarded.
Max. Instances	32
Introduced	16.0.R1
Platforms	All

**[address]** *string*

Synopsis	Destination IPv4 address
Context	<b>configure</b> filter <a href="#">gre-tunnel-template</a> <i>string</i> <a href="#">ipv4</a> <a href="#">destination-address</a> <i>string</i>
Tree	<a href="#">destination-address</a>
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

**gre-key** (*keyword* | *number*)

Synopsis	GRE key
Context	<b>configure</b> filter <a href="#">gre-tunnel-template</a> <i>string</i> <a href="#">ipv4</a> <a href="#">gre-key</a> ( <i>keyword</i>   <i>number</i> )
Tree	<a href="#">gre-key</a>
Max. Range	0 to 4294967295
Options	if-index
Introduced	16.0.R1
Platforms	All

**skip-ttl-decrement** *boolean*

Synopsis	Decrement TTL
Context	<b>configure</b> filter gre-tunnel-template <i>string</i> ipv4 skip-ttl-decrement <i>boolean</i>
Tree	skip-ttl-decrement
Default	false
Introduced	16.0.R1
Platforms	All

**source-address** *string*

Synopsis	Source IP address of the GRE encapsulated
Context	<b>configure</b> filter gre-tunnel-template <i>string</i> ipv4 source-address <i>string</i>
Tree	source-address
Introduced	16.0.R1
Platforms	All

**ipv6**

Synopsis	Enter the <b>ipv6</b> context
Context	<b>configure</b> filter gre-tunnel-template <i>string</i> ipv6
Tree	ipv6
Notes	The following elements are part of a choice: <b>ipv4</b> or <b>ipv6</b> .
Introduced	22.7.R1
Platforms	All

**destination-address** [*address*] *string*

Synopsis	Add a list entry for <b>destination-address</b>
Context	<b>configure</b> filter gre-tunnel-template <i>string</i> ipv6 destination-address <i>string</i>
Tree	destination-address
Max. Instances	1
Introduced	22.7.R1
Platforms	All

**[address]** *string*

Synopsis	IPv6 destination address
Context	<b>configure filter gre-tunnel-template</b> <i>string ipv6 destination-address string</i>
Tree	<a href="#">destination-address</a>
Notes	This element is part of a list key.
Introduced	22.7.R1
Platforms	All

**gre-key** *keyword*

Synopsis	Include a key value in GRE header
Context	<b>configure filter gre-tunnel-template</b> <i>string ipv6 gre-key keyword</i>
Tree	<a href="#">gre-key</a>
Description	This command includes a key value in the GRE header of ifIndex of the ingress interface.
Options	if-index
Introduced	22.7.R1
Platforms	All

**skip-hop-decrement** *boolean*

Synopsis	Decrement TTL of the received packet
Context	<b>configure filter gre-tunnel-template</b> <i>string ipv6 skip-hop-decrement boolean</i>
Tree	<a href="#">skip-hop-decrement</a>
Description	When configured to <b>true</b> , the system decrements the TTL of the IP packet matching the IPv4 or IPv6 filter when it is encapsulated into the GRE tunnel header. When configured to <b>false</b> , the system increases the TTL of the received packet.
Default	false
Introduced	22.7.R1
Platforms	All

**source-address** *string*

Synopsis	Source IPv6 address of the GRE encapsulated
----------	---

---

Context	<b>configure filter gre-tunnel-template</b> <i>string</i> <b>ipv6 source-address</b> <i>string</i>
Tree	<a href="#">source-address</a>
Introduced	22.7.R1
Platforms	All

### **ip-exception** [[filter-name](#)] *string*

Synopsis	Enter the <b>ip-exception</b> list instance
Context	<b>configure filter ip-exception</b> <i>string</i>
Tree	<a href="#">ip-exception</a>
Introduced	20.10.R1
Platforms	VSR

### **[filter-name]** *string*

Synopsis	Filter name
Context	<b>configure filter ip-exception</b> <i>string</i>
Tree	<a href="#">ip-exception</a>
String Length	1 to 64
Notes	This element is part of a list key.
Introduced	20.10.R1
Platforms	VSR

### **description** *string*

Synopsis	Text description
Context	<b>configure filter ip-exception</b> <i>string</i> <b>description</b> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	20.10.R1
Platforms	VSR

### **entry** [[entry-id](#)] *number*

Synopsis	Enter the <b>entry</b> list instance
----------	--------------------------------------

Context	<b>configure filter ip-exception string entry number</b>
Tree	<b>entry</b>
Introduced	20.10.R1
Platforms	VSR

**[entry-id] number**

Synopsis	ID for a match criteria and the corresponding action
Context	<b>configure filter ip-exception string entry number</b>
Tree	<b>entry</b>
Range	1 to 2097151
Notes	This element is part of a list key.
Introduced	20.10.R1
Platforms	VSR

**description string**

Synopsis	Text description
Context	<b>configure filter ip-exception string entry number description string</b>
Tree	<b>description</b>
String Length	1 to 80
Introduced	20.10.R1
Platforms	VSR

**match**

Synopsis	Enter the <b>match</b> context
Context	<b>configure filter ip-exception string entry number match</b>
Tree	<b>match</b>
Introduced	20.10.R1
Platforms	VSR

**dst-ip**

Synopsis	Enter the <b>dst-ip</b> context
----------	---------------------------------

Context	<b>configure filter ip-exception string entry number match dst-ip</b>
Tree	<b>dst-ip</b>
Introduced	20.10.R1
Platforms	VSR

### **address** (*ipv4-prefix-with-host-bits | ipv4-address*)

Synopsis	IP address to match
Context	<b>configure filter ip-exception string entry number match dst-ip address</b> ( <i>ipv4-prefix-with-host-bits   ipv4-address</i> )
Tree	<b>address</b>
Introduced	20.10.R1
Platforms	VSR

### **mask string**

Synopsis	Mask applied as an AND to the IP address
Context	<b>configure filter ip-exception string entry number match dst-ip mask string</b>
Tree	<b>mask</b>
Introduced	20.10.R1
Platforms	VSR

### **dst-port**

Synopsis	Enter the <b>dst-port</b> context
Context	<b>configure filter ip-exception string entry number match dst-port</b>
Tree	<b>dst-port</b>
Introduced	20.10.R1
Platforms	VSR

### **eq number**

Synopsis	Exact match criterion
Context	<b>configure filter ip-exception string entry number match dst-port eq number</b>
Tree	<b>eq</b>
Range	0 to 65535

---

Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	20.10.R1
Platforms	VSR

### **gt** *number*

Synopsis	Condition on being greater than the specified value.
Context	<b>configure</b> <a href="#">filter ip-exception</a> <i>string</i> <a href="#">entry number</a> <a href="#">match dst-port</a> <b>gt</b> <i>number</i>
Tree	<a href="#">gt</a>
Range	0 to 65534
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	20.10.R1
Platforms	VSR

### **lt** *number*

Synopsis	Condition on being less than the specified value.
Context	<b>configure</b> <a href="#">filter ip-exception</a> <i>string</i> <a href="#">entry number</a> <a href="#">match dst-port</a> <b>lt</b> <i>number</i>
Tree	<a href="#">lt</a>
Range	1 to 65535
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	20.10.R1
Platforms	VSR

### **range**

Synopsis	Enable the <b>range</b> context
Context	<b>configure</b> <a href="#">filter ip-exception</a> <i>string</i> <a href="#">entry number</a> <a href="#">match dst-port</a> <b>range</b>
Tree	<a href="#">range</a>
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	20.10.R1
Platforms	VSR

### **end number**

Synopsis	Upper bound of the port range to match
Context	<b>configure filter ip-exception string entry number match dst-port range end number</b>
Tree	<a href="#">end</a>
Range	1 to 65535
Notes	This element is mandatory.
Introduced	20.10.R1
Platforms	VSR

### **start number**

Synopsis	Lower bound of the port range to match
Context	<b>configure filter ip-exception string entry number match dst-port range start number</b>
Tree	<a href="#">start</a>
Range	0 to 65534
Notes	This element is mandatory.
Introduced	20.10.R1
Platforms	VSR

### **icmp**

Synopsis	Enter the <b>icmp</b> context
Context	<b>configure filter ip-exception string entry number match icmp</b>
Tree	<a href="#">icmp</a>
Introduced	20.10.R1
Platforms	VSR

### **code number**

Synopsis	ICMP code value to match
Context	<b>configure filter ip-exception string entry number match icmp code number</b>
Tree	<a href="#">code</a>
Range	0 to 255
Introduced	20.10.R1

Platforms VSR

### **type number**

Synopsis ICMP type value to match  
 Context **configure filter ip-exception string entry number match icmp type number**  
 Tree [type](#)  
 Range 0 to 255  
 Introduced 20.10.R1  
 Platforms VSR

### **protocol (number | keyword)**

Synopsis IP protocol to match.  
 Context **configure filter ip-exception string entry number match protocol (number | keyword)**  
 Tree [protocol](#)  
 Range 0 to 255  
 Options tcp-udp, icmp, igmp, ip, tcp, egp, igp, udp, rdp, ipv6, ipv6-route, ipv6-frag, idrp, rsvp, gre, ipv6-icmp, ipv6-no-nxt, ipv6-opts, iso-ip, eigrp, ospf-igp, ether-ip, encap, pnni, pim, vrrp, l2tp, stp, ptp, isis, crtp, crudp, sctp  
 Introduced 20.10.R1  
 Platforms VSR

### **src-ip**

Synopsis Enter the **src-ip** context  
 Context **configure filter ip-exception string entry number match src-ip**  
 Tree [src-ip](#)  
 Introduced 20.10.R1  
 Platforms VSR

### **address (ipv4-prefix-with-host-bits | ipv4-address)**

Synopsis IP address to match  
 Context **configure filter ip-exception string entry number match src-ip address (ipv4-prefix-with-host-bits | ipv4-address)**

Tree	<a href="#">address</a>
Introduced	20.10.R1
Platforms	VSR

**mask string**

Synopsis	Mask applied as an AND to the IP address
Context	<b>configure</b> <a href="#">filter ip-exception string entry number match src-ip mask string</a>
Tree	<a href="#">mask</a>
Introduced	20.10.R1
Platforms	VSR

**src-port**

Synopsis	Enter the <b>src-port</b> context
Context	<b>configure</b> <a href="#">filter ip-exception string entry number match src-port</a>
Tree	<a href="#">src-port</a>
Introduced	20.10.R1
Platforms	VSR

**eq number**

Synopsis	Exact match criterion
Context	<b>configure</b> <a href="#">filter ip-exception string entry number match src-port eq number</a>
Tree	<a href="#">eq</a>
Range	0 to 65535
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	20.10.R1
Platforms	VSR

**gt number**

Synopsis	Condition on being greater than the specified value.
Context	<b>configure</b> <a href="#">filter ip-exception string entry number match src-port gt number</a>
Tree	<a href="#">gt</a>

Range	0 to 65534
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	20.10.R1
Platforms	VSR

### **lt** *number*

Synopsis	Condition on being less than the specified value.
Context	<b>configure</b> <a href="#">filter ip-exception</a> <a href="#">string</a> <a href="#">entry</a> <a href="#">number</a> <a href="#">match</a> <a href="#">src-port</a> <b>lt</b> <a href="#">number</a>
Tree	<a href="#">lt</a>
Range	1 to 65535
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	20.10.R1
Platforms	VSR

### **range**

Synopsis	Enable the <b>range</b> context
Context	<b>configure</b> <a href="#">filter ip-exception</a> <a href="#">string</a> <a href="#">entry</a> <a href="#">number</a> <a href="#">match</a> <a href="#">src-port</a> <b>range</b>
Tree	<a href="#">range</a>
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	20.10.R1
Platforms	VSR

### **end** *number*

Synopsis	Upper bound of the port range to match
Context	<b>configure</b> <a href="#">filter ip-exception</a> <a href="#">string</a> <a href="#">entry</a> <a href="#">number</a> <a href="#">match</a> <a href="#">src-port</a> <a href="#">range</a> <b>end</b> <a href="#">number</a>
Tree	<a href="#">end</a>
Range	1 to 65535
Notes	This element is mandatory.
Introduced	20.10.R1
Platforms	VSR

**start number**

Synopsis	Lower bound of the port range to match
Context	<b>configure filter ip-exception string entry number match src-port range start number</b>
Tree	<a href="#">start</a>
Range	0 to 65534
Notes	This element is mandatory.
Introduced	20.10.R1
Platforms	VSR

**filter-id number****WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Filter ID
Context	<b>configure filter ip-exception string filter-id number</b>
Tree	<a href="#">filter-id</a>
Range	1 to 65535
Introduced	20.10.R1
Platforms	VSR

**ip-filter [filter-name] string**

Synopsis	Enter the <b>ip-filter</b> list instance
Context	<b>configure filter ip-filter string</b>
Tree	<a href="#">ip-filter</a>
Introduced	16.0.R1
Platforms	All

**[filter-name] string**

Synopsis	Filter name
Context	<b>configure filter ip-filter string</b>
Tree	<a href="#">ip-filter</a>
String Length	1 to 64

---

Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

### **chain-to-system-filter** *boolean*

Synopsis	Chain filter policy to the active IPvX system filter policy
Context	<b>configure filter ip-filter</b> <i>string</i> <b>chain-to-system-filter</b> <i>boolean</i>
Tree	<a href="#">chain-to-system-filter</a>
Default	false
Introduced	16.0.R1
Platforms	All

### **default-action** *keyword*

Synopsis	Action for packets that do not match any entry
Context	<b>configure filter ip-filter</b> <i>string</i> <b>default-action</b> <i>keyword</i>
Tree	<a href="#">default-action</a>
Options	drop, accept
Default	drop
Introduced	16.0.R1
Platforms	All

### **description** *string*

Synopsis	Text description
Context	<b>configure filter ip-filter</b> <i>string</i> <b>description</b> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R1
Platforms	All

### **embed**

Synopsis	Enter the <b>embed</b> context
----------	--------------------------------

Context	<b>configure filter ip-filter string embed</b>
Tree	<b>embed</b>
Description	Commands in this context embed a previously defined IPv4 embedded filter policy or Hybrid OpenFlow switch instance into an exclusive, template, or system filter policy at the specified offset value. Rules derived from the BGP FlowSpec can also be embedded into template filter policies only.
Introduced	16.0.R1
Platforms	All

### **filter [name] reference offset number**

Synopsis	Enter the <b>filter</b> list instance
Context	<b>configure filter ip-filter string embed filter reference offset number</b>
Tree	<b>filter</b>
Introduced	16.0.R1
Platforms	All

### **[name] reference**

Synopsis	IPv4 policy to be embedded in the filter
Context	<b>configure filter ip-filter string embed filter reference offset number</b>
Tree	<b>filter</b>
Reference	<b>configure filter ip-filter string</b>
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

### **offset number**

Synopsis	Offset of the inserted entries
Context	<b>configure filter ip-filter string embed filter reference offset number</b>
Tree	<b>filter</b>
Range	0 to 2097150
Notes	This element is part of a list key.
Introduced	16.0.R1

Platforms All

### **admin-state** *keyword*

Synopsis Administrative state of the embedded filter

Context **configure** filter ip-filter *string* embed filter *reference* offset *number* admin-state *keyword*

Tree [admin-state](#)

Options enable, disable

Default enable

Introduced 16.0.R1

Platforms All

### **flowspec** [offset](#) *number*

Synopsis Enter the **flowspec** list instance

Context **configure** filter ip-filter *string* embed flowspec [offset](#) *number*

Tree [flowspec](#)

Introduced 16.0.R1

Platforms All

### **offset** *number*

Synopsis Offset of the inserted entries

Context **configure** filter ip-filter *string* embed flowspec [offset](#) *number*

Tree [flowspec](#)

Range 0 to 2097151

Notes This element is part of a list key.

Introduced 16.0.R1

Platforms All

### **admin-state** *keyword*

Synopsis Administrative state of the embedded filter

Context **configure** filter ip-filter *string* embed flowspec [offset](#) *number* admin-state *keyword*

Tree [admin-state](#)

Options	enable, disable
Default	enable
Introduced	16.0.R1
Platforms	All

### **group** *number*

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Interface group ID for an external configured set of flowspec rules
Context	<b>configure</b> filter ip-filter <i>string</i> embed flowspec offset <i>number</i> group <i>number</i>
Tree	group
Range	0 to 16383
Introduced	16.0.R1
Platforms	All

### **router-instance** *string*

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Virtual router for an external configured set of flowspec rules
Context	<b>configure</b> filter ip-filter <i>string</i> embed flowspec offset <i>number</i> router-instance <i>string</i>
Tree	router-instance
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

### **openflow** [*of-switch*] *reference* offset *number*

Synopsis	Enter the <b>openflow</b> list instance
Context	<b>configure</b> filter ip-filter <i>string</i> embed openflow <i>reference</i> offset <i>number</i>
Tree	openflow
Introduced	16.0.R4

Platforms All

### **[of-switch]** *reference*

Synopsis Referenced Hybrid OpenFlow Switch (OFS) name

Context **configure** filter ip-filter string embed openflow reference offset number

Tree openflow

Reference **configure** openflow of-switch string

Notes This element is part of a list key.

Introduced 16.0.R4

Platforms All

### **offset** *number*

Synopsis Offset of the inserted entries

Context **configure** filter ip-filter string embed openflow reference offset number

Tree openflow

Range 0 to 2097150

Notes This element is part of a list key.

Introduced 16.0.R4

Platforms All

### **admin-state** *keyword*

Synopsis Administrative state of the embedded filter

Context **configure** filter ip-filter string embed openflow reference offset number admin-state keyword

Tree admin-state

Options enable, disable

Default enable

Introduced 16.0.R4

Platforms All

## grt

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Global routing context
Context	<b>configure filter ip-filter string embed openflow reference offset number grt</b>
Tree	<a href="#">grt</a>
Notes	The following elements are part of a choice: <b>grt</b> , <b>system</b> , ( <b>sap</b> and <b>vpls</b> ), or <b>vpn</b> .
Introduced	16.0.R4
Platforms	All

## sap reference

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	SAP context
Context	<b>configure filter ip-filter string embed openflow reference offset number sap reference</b>
Tree	<a href="#">sap</a>
Reference	<b>configure service vpls string sap string</b>
Notes	The following elements are part of a choice: <b>grt</b> , <b>system</b> , ( <b>sap</b> and <b>vpls</b> ), or <b>vpn</b> .
Introduced	16.0.R4
Platforms	All

## system

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	System context
Context	<b>configure filter ip-filter string embed openflow reference offset number system</b>
Tree	<a href="#">system</a>
Notes	The following elements are part of a choice: <b>grt</b> , <b>system</b> , ( <b>sap</b> and <b>vpls</b> ), or <b>vpn</b> .
Introduced	16.0.R4

Platforms All

### **vpls** *reference*

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis VPLS context

Context **configure** filter ip-filter *string* embed openflow *reference* offset *number* vpls *reference*

Tree vpls

Reference **configure** service vpls *string*

Notes The following elements are part of a choice: **grt**, **system**, (**sap** and **vpls**), or **vprn**.

Introduced 16.0.R4

Platforms All

### **vprn** *reference*

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis VPRN context

Context **configure** filter ip-filter *string* embed openflow *reference* offset *number* vprn *reference*

Tree vprn

Reference **configure** service vprn *string*

Notes The following elements are part of a choice: **grt**, **system**, (**sap** and **vpls**), or **vprn**.

Introduced 16.0.R4

Platforms All

### **entry** [*entry-id*] *number*

Synopsis Enter the **entry** list instance

Context **configure** filter ip-filter *string* entry *number*

Tree entry

Introduced 16.0.R1

Platforms All

### [entry-id] *number*

Synopsis ID for a match criteria and the corresponding action  
 Context **configure filter ip-filter string entry number**  
 Tree [entry](#)  
 Range 1 to 2097151  
 Notes This element is part of a list key.  
 Introduced 16.0.R1  
 Platforms All

### action

Synopsis Enable the **action** context  
 Context **configure filter ip-filter string entry number action**  
 Tree [action](#)  
 Introduced 16.0.R1  
 Platforms All

### accept

Synopsis Accept regular routing to forward a matching packet  
 Context **configure filter ip-filter string entry number action accept**  
 Tree [accept](#)  
 Notes The following elements are part of a mandatory choice: **accept**, **drop**, **forward**, **gtp-local-breakout**, **http-redirect**, **ignore-match**, **nat**, **reassemble**, or **tcp-mss-adjust**.  
 Introduced 16.0.R1  
 Platforms All

### accept-when

Synopsis Enable the **accept-when** context  
 Context **configure filter ip-filter string entry number action accept-when**  
 Tree [accept-when](#)

---

Introduced	19.5.R1
Platforms	All

## **pattern**

Synopsis	Enable the <b>pattern</b> context
Context	<b>configure filter ip-filter string entry number action accept-when pattern</b>
Tree	<a href="#">pattern</a>
Introduced	19.5.R1
Platforms	All

## **expression string**

Synopsis	Pattern expression to match
Context	<b>configure filter ip-filter string entry number action accept-when pattern expression string</b>
Tree	<a href="#">expression</a>
String Length	3 to 18
Notes	This element is mandatory.
Introduced	19.5.R1
Platforms	All

## **mask string**

Synopsis	Mask for the pattern expression
Context	<b>configure filter ip-filter string entry number action accept-when pattern mask string</b>
Tree	<a href="#">mask</a>
String Length	3 to 18
Notes	This element is mandatory.
Introduced	19.5.R1
Platforms	All

## **offset-type keyword**

Synopsis	Starting point reference for offset value of pattern
----------	--

Context	<b>configure</b> filter ip-filter <i>string</i> entry <i>number</i> action accept-when pattern offset-type <i>keyword</i>
Tree	offset-type
Options	layer-3, layer-4, data, dns-qtype
Notes	This element is mandatory.
Introduced	19.5.R1
Platforms	All

### offset-value *number*

Synopsis	Offset value for the pattern expression
Context	<b>configure</b> filter ip-filter <i>string</i> entry <i>number</i> action accept-when pattern offset-value <i>number</i>
Tree	offset-value
Range	0 to 255
Notes	This element is mandatory.
Introduced	19.5.R1
Platforms	All

### drop

Synopsis	Drop a packet matching this entry
Context	<b>configure</b> filter ip-filter <i>string</i> entry <i>number</i> action drop
Tree	drop
Notes	The following elements are part of a mandatory choice: <b>accept</b> , <b>drop</b> , <b>forward</b> , <b>gtp-local-breakout</b> , <b>http-redirect</b> , <b>ignore-match</b> , <b>nat</b> , <b>reassemble</b> , or <b>tcp-mss-adjust</b> .
Introduced	16.0.R1
Platforms	All

### drop-when

Synopsis	Enable the <b>drop-when</b> context
Context	<b>configure</b> filter ip-filter <i>string</i> entry <i>number</i> action drop-when
Tree	drop-when
Introduced	16.0.R1

Platforms All

### extracted-traffic

Synopsis Drop traffic extracted to CPM  
 Context **configure filter ip-filter string entry number action drop-when extracted-traffic**  
 Tree [extracted-traffic](#)  
 Introduced 16.0.R1  
 Platforms All

### packet-length

Synopsis Enable the **packet-length** context  
 Context **configure filter ip-filter string entry number action drop-when packet-length**  
 Tree [packet-length](#)  
 Notes The following elements are part of a choice: **packet-length** or **tll**.  
 Introduced 16.0.R1  
 Platforms All

### eq number

Synopsis Exact match criterion for the length  
 Context **configure filter ip-filter string entry number action drop-when packet-length eq number**  
 Tree [eq](#)  
 Range 0 to 65535  
 Notes The following elements are part of a mandatory choice: **eq**, **gt**, **lt**, or **range**.  
 Introduced 16.0.R1  
 Platforms All

### gt number

Synopsis Greater than match criterion for the length  
 Context **configure filter ip-filter string entry number action drop-when packet-length gt number**  
 Tree [gt](#)  
 Range 0 to 65534

Notes	The following elements are part of a mandatory choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	All

**lt number**

Synopsis	Less than match criterion for the length
Context	<b>configure filter ip-filter string entry number action drop-when packet-length lt number</b>
Tree	<b>lt</b>
Range	1 to 65535
Notes	The following elements are part of a mandatory choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	All

**range**

Synopsis	Enable the <b>range</b> context
Context	<b>configure filter ip-filter string entry number action drop-when packet-length range</b>
Tree	<b>range</b>
Notes	The following elements are part of a mandatory choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	All

**end number**

Synopsis	Upper bound of the length range
Context	<b>configure filter ip-filter string entry number action drop-when packet-length range end number</b>
Tree	<b>end</b>
Range	1 to 65535
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

**start number**

Synopsis	Lower bound of the length range
Context	<b>configure</b> filter ip-filter string entry number action drop-when packet-length range start number
Tree	start
Range	0 to 65534
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

**pattern**

Synopsis	Enable the <b>pattern</b> context
Context	<b>configure</b> filter ip-filter string entry number action drop-when pattern
Tree	pattern
Introduced	16.0.R4
Platforms	All

**expression string**

Synopsis	Pattern expression to match
Context	<b>configure</b> filter ip-filter string entry number action drop-when pattern expression string
Tree	expression
String Length	3 to 18
Notes	This element is mandatory.
Introduced	16.0.R4
Platforms	All

**mask string**

Synopsis	Mask for the pattern expression
Context	<b>configure</b> filter ip-filter string entry number action drop-when pattern mask string
Tree	mask
String Length	3 to 18
Notes	This element is mandatory.

Introduced	16.0.R4
Platforms	All

### **offset-type** *keyword*

Synopsis	Starting point reference for offset value of pattern
Context	<b>configure</b> <a href="#">filter</a> <a href="#">ip-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">drop-when</a> <a href="#">pattern</a> <b>offset-type</b> <i>keyword</i>
Tree	<a href="#">offset-type</a>
Options	layer-3, layer-4, data, dns-qtype
Notes	This element is mandatory.
Introduced	16.0.R4
Platforms	All

### **offset-value** *number*

Synopsis	Offset value for the pattern expression
Context	<b>configure</b> <a href="#">filter</a> <a href="#">ip-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">drop-when</a> <a href="#">pattern</a> <b>offset-value</b> <i>number</i>
Tree	<a href="#">offset-value</a>
Range	0 to 255
Notes	This element is mandatory.
Introduced	16.0.R4
Platforms	All

### **ttl**

Synopsis	Enable the <b>ttl</b> context
Context	<b>configure</b> <a href="#">filter</a> <a href="#">ip-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">drop-when</a> <b>ttl</b>
Tree	<a href="#">ttl</a>
Notes	The following elements are part of a choice: <b>packet-length</b> or <b>ttl</b> .
Introduced	16.0.R1
Platforms	All

### **eq number**

Synopsis	Equal to condition match value
Context	<b>configure filter ip-filter string entry number action drop-when ttl eq number</b>
Tree	<a href="#">eq</a>
Range	0 to 255
Notes	The following elements are part of a mandatory choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	All

### **gt number**

Synopsis	Greater than condition match value
Context	<b>configure filter ip-filter string entry number action drop-when ttl gt number</b>
Tree	<a href="#">gt</a>
Range	0 to 254
Notes	The following elements are part of a mandatory choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	All

### **lt number**

Synopsis	Less than condition match value
Context	<b>configure filter ip-filter string entry number action drop-when ttl lt number</b>
Tree	<a href="#">lt</a>
Range	1 to 255
Notes	The following elements are part of a mandatory choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	All

### **range**

Synopsis	Enable the <b>range</b> context
Context	<b>configure filter ip-filter string entry number action drop-when ttl range</b>
Tree	<a href="#">range</a>

Description	This command in this context specify an inclusive range. When range is used, the start of the range (the first value entered) must be smaller than the end of the range (the second value entered).
Notes	The following elements are part of a mandatory choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	All

### **end number**

Synopsis	Upper bound of the range
Context	<b>configure filter ip-filter string entry number action drop-when ttl range end number</b>
Tree	<b>end</b>
Range	1 to 255
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

### **start number**

Synopsis	Lower bound of the range
Context	<b>configure filter ip-filter string entry number action drop-when ttl range start number</b>
Tree	<b>start</b>
Range	0 to 254
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

### **fc keyword**

Synopsis	Class name to be forwarded for matching packets
Context	<b>configure filter ip-filter string entry number action fc keyword</b>
Tree	<b>fc</b>
Options	be, l2, af, l1, h2, ef, h1, nc
Introduced	16.0.R1
Platforms	All

## forward

Synopsis	Enter the <b>forward</b> context
Context	<b>configure filter ip-filter</b> <i>string</i> <b>entry</b> <i>number</i> <b>action forward</b>
Tree	<b>forward</b>
Notes	The following elements are part of a mandatory choice: <b>accept</b> , <b>drop</b> , <b>forward</b> , <b>gtp-local-breakout</b> , <b>http-redirect</b> , <b>ignore-match</b> , <b>nat</b> , <b>reassemble</b> , or <b>tcp-mss-adjust</b> .
Introduced	16.0.R1
Platforms	All

## bonding-connection *number*

Synopsis	Connection ID over which packet is forwarded
Context	<b>configure filter ip-filter</b> <i>string</i> <b>entry</b> <i>number</i> <b>action forward bonding-connection</b> <i>number</i>
Tree	<b>bonding-connection</b>
Range	1 to 2
Notes	The following elements are part of a choice: <b>bonding-connection</b> , <b>esi-l2</b> , <b>esi-l3</b> , <b>gre-tunnel</b> , <b>lsp</b> , <b>mpls-policy</b> , <b>next-hop</b> , <b>redirect-policy</b> , <b>router-instance</b> , <b>sap</b> , <b>sdp</b> , <b>srte-policy</b> , <b>srv6-policy</b> , or <b>vprn-target</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## esi-l2

Synopsis	Enable the <b>esi-l2</b> context
Context	<b>configure filter ip-filter</b> <i>string</i> <b>entry</b> <i>number</i> <b>action forward esi-l2</b>
Tree	<b>esi-l2</b>
Notes	The following elements are part of a choice: <b>bonding-connection</b> , <b>esi-l2</b> , <b>esi-l3</b> , <b>gre-tunnel</b> , <b>lsp</b> , <b>mpls-policy</b> , <b>next-hop</b> , <b>redirect-policy</b> , <b>router-instance</b> , <b>sap</b> , <b>sdp</b> , <b>srte-policy</b> , <b>srv6-policy</b> , or <b>vprn-target</b> .
Introduced	16.0.R1
Platforms	All

## esi-value *string*

Synopsis	ESI of the first ESI-identified appliance
----------	---

Context	<b>configure filter ip-filter string entry number action forward esi-l2 esi-value string</b>
Tree	<b>esi-value</b>
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

### vpls reference

Synopsis	VPLS service name
Context	<b>configure filter ip-filter string entry number action forward esi-l2 vpls reference</b>
Tree	<b>vpls</b>
Reference	<b>configure service vpls string</b>
Notes	This element is mandatory.
Introduced	16.0.R3
Platforms	All

### esi-l3

Synopsis	Enable the <b>esi-l3</b> context
Context	<b>configure filter ip-filter string entry number action forward esi-l3</b>
Tree	<b>esi-l3</b>
Notes	The following elements are part of a choice: <b>bonding-connection, esi-l2, esi-l3, gre-tunnel, lsp, mpls-policy, next-hop, redirect-policy, router-instance, sap, sdp, srte-policy, srv6-policy, or vprn-target.</b>
Introduced	16.0.R1
Platforms	All

### esi-value string

#### WARNING:

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	ESI of the first ESI-identified appliance
Context	<b>configure filter ip-filter string entry number action forward esi-l3 esi-value string</b>
Tree	<b>esi-value</b>

Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

### **sf-ip string**

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	IP address of the service function to forward traffic
Context	<b>configure filter ip-filter string entry number action forward esi-l3 sf-ip string</b>
Tree	<a href="#">sf-ip</a>
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

### **vas-interface reference**

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Egress R-VPLS IP interface name
Context	<b>configure filter ip-filter string entry number action forward esi-l3 vas-interface reference</b>
Tree	<a href="#">vas-interface</a>
Reference	<b>configure service vprn string interface string</b>
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

### **vprn reference**

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	VPRN service name
Context	<b>configure filter ip-filter</b> <i>string entry number action forward esi-l3 vprn reference</i>
Tree	<a href="#">vprn</a>
Reference	<b>configure service vprn</b> <i>string</i>
Notes	This element is mandatory.
Introduced	16.0.R4
Platforms	All

### **gre-tunnel** *reference*

Synopsis	GRE tunnel template ID that sets the location where an encapsulated matching packet is transported
Context	<b>configure filter ip-filter</b> <i>string entry number action forward gre-tunnel reference</i>
Tree	<a href="#">gre-tunnel</a>
Reference	<b>configure filter gre-tunnel-template</b> <i>string</i>
Notes	The following elements are part of a choice: <b>bonding-connection</b> , <b>esi-l2</b> , <b>esi-l3</b> , <b>gre-tunnel</b> , <b>lsp</b> , <b>mpls-policy</b> , <b>next-hop</b> , <b>redirect-policy</b> , <b>router-instance</b> , <b>sap</b> , <b>sdp</b> , <b>srte-policy</b> , <b>srv6-policy</b> , or <b>vprn-target</b> .
Introduced	16.0.R1
Platforms	All

### **lsp** *string*

Synopsis	LSP that is specified to forward a packet matching this entry
Context	<b>configure filter ip-filter</b> <i>string entry number action forward lsp string</i>
Tree	<a href="#">lsp</a>
String Length	1 to 64
Notes	The following elements are part of a choice: <b>bonding-connection</b> , <b>esi-l2</b> , <b>esi-l3</b> , <b>gre-tunnel</b> , <b>lsp</b> , <b>mpls-policy</b> , <b>next-hop</b> , <b>redirect-policy</b> , <b>router-instance</b> , <b>sap</b> , <b>sdp</b> , <b>srte-policy</b> , <b>srv6-policy</b> , or <b>vprn-target</b> .
Introduced	16.0.R1
Platforms	All

### **mpls-policy**

Synopsis	Enable the <b>mpls-policy</b> context
----------	---------------------------------------

Context	<b>configure filter ip-filter string entry number action forward mpls-policy</b>
Tree	<a href="#">mpls-policy</a>
Notes	The following elements are part of a choice: <b>bonding-connection, esi-l2, esi-l3, gre-tunnel, lsp, mpls-policy, next-hop, redirect-policy, router-instance, sap, sdp, srte-policy, srv6-policy, or vprn-target.</b>
Introduced	19.10.R1
Platforms	All

### endpoint string

Synopsis	MPLS forwarding policy endpoint IPv4 address
Context	<b>configure filter ip-filter string entry number action forward mpls-policy endpoint string</b>
Tree	<a href="#">endpoint</a>
Notes	This element is mandatory.
Introduced	19.10.R1
Platforms	All

### next-hop

Synopsis	Enable the <b>next-hop</b> context
Context	<b>configure filter ip-filter string entry number action forward next-hop</b>
Tree	<a href="#">next-hop</a>
Notes	The following elements are part of a choice: <b>bonding-connection, esi-l2, esi-l3, gre-tunnel, lsp, mpls-policy, next-hop, redirect-policy, router-instance, sap, sdp, srte-policy, srv6-policy, or vprn-target.</b>
Introduced	16.0.R1
Platforms	All

### interface-name string

#### WARNING:

This element is deprecated and will be removed in a future release.

Synopsis	IP interface name that forwards matching packets
Context	<b>configure filter ip-filter string entry number action forward next-hop interface-name string</b>
Tree	<a href="#">interface-name</a>

String Length	1 to 32
Notes	The following elements are part of a mandatory choice: <b>interface-name</b> , <b>nh-ip</b> , or <b>nh-ip-vrf</b> .
Introduced	16.0.R1
Deprecated	23.10.R2
Platforms	All

## nh-ip

Synopsis	Enable the <b>nh-ip</b> context
Context	<b>configure</b> filter ip-filter <i>string</i> entry <i>number</i> action forward next-hop nh-ip
Tree	nh-ip
Notes	The following elements are part of a mandatory choice: <b>interface-name</b> , <b>nh-ip</b> , or <b>nh-ip-vrf</b> .
Introduced	16.0.R1
Platforms	All

## address *string*

### WARNING:

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	IPv4 address of next hop to forward matching packets
Context	<b>configure</b> filter ip-filter <i>string</i> entry <i>number</i> action forward next-hop nh-ip address <i>string</i>
Tree	address
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

## indirect *boolean*

Synopsis	Allow next hop to be indirectly reachable
Context	<b>configure</b> filter ip-filter <i>string</i> entry <i>number</i> action forward next-hop nh-ip indirect <i>boolean</i>
Tree	indirect

Default	false
Introduced	16.0.R1
Platforms	All

## nh-ip-vrf

Synopsis	Enable the <b>nh-ip-vrf</b> context
Context	<b>configure filter ip-filter string entry number action forward next-hop nh-ip-vrf</b>
Tree	<a href="#">nh-ip-vrf</a>
Notes	The following elements are part of a mandatory choice: <b>interface-name</b> , <b>nh-ip</b> , or <b>nh-ip-vrf</b> .
Introduced	16.0.R1
Platforms	All

## address string

### WARNING:

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	IPv4 address of next hop to forward matching packets
Context	<b>configure filter ip-filter string entry number action forward next-hop nh-ip-vrf address string</b>
Tree	<a href="#">address</a>
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

## indirect boolean

Synopsis	Allow next hop to be indirectly reachable
Context	<b>configure filter ip-filter string entry number action forward next-hop nh-ip-vrf indirect boolean</b>
Tree	<a href="#">indirect</a>
Default	false
Introduced	16.0.R1

Platforms All

### router-instance *string*

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Routing context for route lookup for forwarding packets
Context	<b>configure</b> <a href="#">filter</a> <a href="#">ip-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">forward</a> <a href="#">next-hop</a> <a href="#">nh-ip-vrf</a> <a href="#">router-instance</a> <i>string</i>
Tree	<a href="#">router-instance</a>
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

### redirect-policy *reference*

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Next hop or forward next hop router that forwards a packet that matches this entry
Context	<b>configure</b> <a href="#">filter</a> <a href="#">ip-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">forward</a> <a href="#">redirect-policy</a> <i>reference</i>
Tree	<a href="#">redirect-policy</a>
Reference	<b>configure</b> <a href="#">filter</a> <a href="#">redirect-policy</a> <i>string</i>
Notes	The following elements are part of a choice: <b>bonding-connection</b> , <b>esi-l2</b> , <b>esi-l3</b> , <b>gre-tunnel</b> , <b>lsp</b> , <b>mpls-policy</b> , <b>next-hop</b> , <b>redirect-policy</b> , <b>router-instance</b> , <b>sap</b> , <b>sdp</b> , <b>srte-policy</b> , <b>srv6-policy</b> , or <b>vprn-target</b> .
Introduced	16.0.R1
Platforms	All

### router-instance *string*

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Router name or VPRN service name
Context	<b>configure filter ip-filter</b> <i>string</i> <b>entry number</b> <i>action forward router-instance</i> <i>string</i>
Tree	<a href="#">router-instance</a>
Notes	The following elements are part of a choice: <b>bonding-connection</b> , <b>esi-l2</b> , <b>esi-l3</b> , <b>gre-tunnel</b> , <b>lsp</b> , <b>mpls-policy</b> , <b>next-hop</b> , <b>redirect-policy</b> , <b>router-instance</b> , <b>sap</b> , <b>sdp</b> , <b>srte-policy</b> , <b>srv6-policy</b> , or <b>vprn-target</b> .
Introduced	16.0.R1
Platforms	All

## sap

Synopsis	Enable the <b>sap</b> context
Context	<b>configure filter ip-filter</b> <i>string</i> <b>entry number</b> <i>action forward sap</i>
Tree	<a href="#">sap</a>
Notes	The following elements are part of a choice: <b>bonding-connection</b> , <b>esi-l2</b> , <b>esi-l3</b> , <b>gre-tunnel</b> , <b>lsp</b> , <b>mpls-policy</b> , <b>next-hop</b> , <b>redirect-policy</b> , <b>router-instance</b> , <b>sap</b> , <b>sdp</b> , <b>srte-policy</b> , <b>srv6-policy</b> , or <b>vprn-target</b> .
Introduced	16.0.R1
Platforms	All

## sap-id reference

Synopsis	VPLS Ethernet SAP ID used to forward matching packets
Context	<b>configure filter ip-filter</b> <i>string</i> <b>entry number</b> <i>action forward sap sap-id</i> <i>reference</i>
Tree	<a href="#">sap-id</a>
Reference	<b>configure service vpls</b> <i>string sap</i> <i>string</i>
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

## vpls reference

Synopsis	VPLS associated with the SAP
Context	<b>configure filter ip-filter</b> <i>string</i> <b>entry number</b> <i>action forward sap vpls</i> <i>reference</i>
Tree	<a href="#">vpls</a>
Reference	<b>configure service vpls</b> <i>string</i>

Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

## sdp

Synopsis	Enable the <b>sdp</b> context
Context	<b>configure</b> <a href="#">filter ip-filter</a> <i>string</i> <a href="#">entry number</a> <a href="#">action forward sdp</a>
Tree	<a href="#">sdp</a>
Notes	The following elements are part of a choice: <b>bonding-connection</b> , <b>esi-l2</b> , <b>esi-l3</b> , <b>gre-tunnel</b> , <b>lsp</b> , <b>mpls-policy</b> , <b>next-hop</b> , <b>redirect-policy</b> , <b>router-instance</b> , <b>sap</b> , <b>sdp</b> , <b>srte-policy</b> , <b>srv6-policy</b> , or <b>vprn-target</b> .
Introduced	16.0.R1
Platforms	All

## sdp-bind-id *string*

Synopsis	VPLS SDP bind ID used to forward matching packets
Context	<b>configure</b> <a href="#">filter ip-filter</a> <i>string</i> <a href="#">entry number</a> <a href="#">action forward sdp sdp-bind-id</a> <i>string</i>
Tree	<a href="#">sdp-bind-id</a>
String Length	3 to 16
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

## vpls *reference*

Synopsis	VPLS associated with the SDP
Context	<b>configure</b> <a href="#">filter ip-filter</a> <i>string</i> <a href="#">entry number</a> <a href="#">action forward sdp vpls</a> <i>reference</i>
Tree	<a href="#">vpls</a>
Reference	<b>configure</b> <a href="#">service vpls</a> <i>string</i>
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

## srte-policy

Synopsis	Enable the <b>srte-policy</b> context
Context	<b>configure</b> <a href="#">filter</a> <a href="#">ip-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">forward</a> <a href="#">srte-policy</a>
Tree	<a href="#">srte-policy</a>
Notes	The following elements are part of a choice: <b>bonding-connection</b> , <b>esi-l2</b> , <b>esi-l3</b> , <b>gre-tunnel</b> , <b>lsp</b> , <b>mpls-policy</b> , <b>next-hop</b> , <b>redirect-policy</b> , <b>router-instance</b> , <b>sap</b> , <b>sdp</b> , <b>srte-policy</b> , <b>srv6-policy</b> , or <b>vprn-target</b> .
Introduced	19.10.R1
Platforms	All

## color *number*

Synopsis	SR-TE policy color ID
Context	<b>configure</b> <a href="#">filter</a> <a href="#">ip-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">forward</a> <a href="#">srte-policy</a> <a href="#">color</a> <i>number</i>
Tree	<a href="#">color</a>
Range	0 to 4294967295
Notes	This element is mandatory.
Introduced	19.10.R1
Platforms	All

## endpoint *string*

Synopsis	SR-TE policy endpoint IPv4 address
Context	<b>configure</b> <a href="#">filter</a> <a href="#">ip-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">forward</a> <a href="#">srte-policy</a> <a href="#">endpoint</a> <i>string</i>
Tree	<a href="#">endpoint</a>
Notes	This element is mandatory.
Introduced	19.10.R1
Platforms	All

## srv6-policy

Synopsis	Enable the <b>srv6-policy</b> context
Context	<b>configure</b> <a href="#">filter</a> <a href="#">ip-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">forward</a> <a href="#">srv6-policy</a>
Tree	<a href="#">srv6-policy</a>

Description	Command in this context configure the redirection of packets to an active SRv6 policy.
Notes	The following elements are part of a choice: <b>bonding-connection</b> , <b>esi-l2</b> , <b>esi-l3</b> , <b>gre-tunnel</b> , <b>lsp</b> , <b>mpls-policy</b> , <b>next-hop</b> , <b>redirect-policy</b> , <b>router-instance</b> , <b>sap</b> , <b>sdp</b> , <b>srte-policy</b> , <b>srv6-policy</b> , or <b>vpn-target</b> .
Introduced	23.7.R1
Platforms	7750 SR, 7750 SR-s, 7950 XRS

### **color number**

Synopsis	SRv6 policy color
Context	<b>configure filter ip-filter string entry number action forward srv6-policy color number</b>
Tree	<a href="#">color</a>
Range	0 to 4294967295
Notes	This element is mandatory.
Introduced	23.7.R1
Platforms	7750 SR, 7750 SR-s, 7950 XRS

### **endpoint string**

Synopsis	SRv6 policy endpoint IPv6 address
Context	<b>configure filter ip-filter string entry number action forward srv6-policy endpoint string</b>
Tree	<a href="#">endpoint</a>
Notes	This element is mandatory.
Introduced	23.7.R1
Platforms	7750 SR, 7750 SR-s, 7950 XRS

### **service-sid string**

Synopsis	SRv6 service segment identifier
Context	<b>configure filter ip-filter string entry number action forward srv6-policy service-sid string</b>
Tree	<a href="#">service-sid</a>
Notes	This element is mandatory.
Introduced	23.7.R1
Platforms	7750 SR, 7750 SR-s, 7950 XRS

## vprn-target

Synopsis	Enable the <b>vprn-target</b> context
Context	<b>configure</b> <a href="#">filter</a> <a href="#">ip-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">forward</a> <a href="#">vprn-target</a>
Tree	<a href="#">vprn-target</a>
Notes	The following elements are part of a choice: <b>bonding-connection</b> , <b>esi-l2</b> , <b>esi-l3</b> , <b>gre-tunnel</b> , <b>lsp</b> , <b>mpls-policy</b> , <b>next-hop</b> , <b>redirect-policy</b> , <b>router-instance</b> , <b>sap</b> , <b>sdp</b> , <b>srte-policy</b> , <b>srv6-policy</b> , or <b>vprn-target</b> .
Introduced	16.0.R1
Platforms	All

## adv-prefix *string*

Synopsis	Advertised IP prefix for target destination
Context	<b>configure</b> <a href="#">filter</a> <a href="#">ip-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">forward</a> <a href="#">vprn-target</a> <a href="#">adv-prefix</a> <i>string</i>
Tree	<a href="#">adv-prefix</a>
Introduced	16.0.R1
Platforms	All

## bgp-nh *string*

Synopsis	Target BGP next hop IP address
Context	<b>configure</b> <a href="#">filter</a> <a href="#">ip-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">forward</a> <a href="#">vprn-target</a> <a href="#">bgp-nh</a> <i>string</i>
Tree	<a href="#">bgp-nh</a>
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

## lsp *string*

Synopsis	LSP that is specified to forward a packet matching this entry
Context	<b>configure</b> <a href="#">filter</a> <a href="#">ip-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">forward</a> <a href="#">vprn-target</a> <a href="#">lsp</a> <i>string</i>
Tree	<a href="#">lsp</a>
String Length	1 to 64
Introduced	16.0.R1

Platforms All

### **vprn** *reference*

Synopsis Routing context used for route lookup

Context **configure** [filter ip-filter](#) *string* [entry number](#) [action forward](#) [vprn-target](#) [vprn](#) *reference*

Tree [vprn](#)

Reference **configure** [service vprn](#) *string*

Notes This element is mandatory.

Introduced 16.0.R4

Platforms All

### **gtp-local-breakout**

Synopsis Break out matching traffic locally from a GTP tunnel for GTP-subscriber-hosts, or forward for other entities

Context **configure** [filter ip-filter](#) *string* [entry number](#) [action gtp-local-breakout](#)

Tree [gtp-local-breakout](#)

Notes The following elements are part of a mandatory choice: **accept**, **drop**, **forward**, **gtp-local-breakout**, **http-redirect**, **ignore-match**, **nat**, **reassemble**, or **tcp-mss-adjust**.

Introduced 16.0.R1

Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **http-redirect**

Synopsis Enable the **http-redirect** context

Context **configure** [filter ip-filter](#) *string* [entry number](#) [action http-redirect](#)

Tree [http-redirect](#)

Description Commands in this context configure the filter entry action for HTTP redirection.

Notes The following elements are part of a mandatory choice: **accept**, **drop**, **forward**, **gtp-local-breakout**, **http-redirect**, **ignore-match**, **nat**, **reassemble**, or **tcp-mss-adjust**.

Introduced 16.0.R1

Platforms All

**allow-override** *boolean*

Synopsis	Override the HTTP redirect URL by a RADIUS VSA
Context	<b>configure</b> filter ip-filter <i>string</i> entry <i>number</i> action http-redirect allow-override <i>boolean</i>
Tree	allow-override
Description	This command specifies whether the RADIUS VSA can override the configured HTTP redirect URL for this filter entry. When configured to <b>true</b> , the RADIUS VSA can override the HTTP redirect URL. When configured to <b>false</b> , the HTTP redirect URL is not overridden. This does not apply if the CPF option is specified for the URL.
Default	false
Introduced	16.0.R1
Platforms	All

**url** (*keyword* | *http-redirect-url*)**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	URL used for HTTP redirect action
Context	<b>configure</b> filter ip-filter <i>string</i> entry <i>number</i> action http-redirect url ( <i>keyword</i>   <i>http-redirect-url</i> )
Tree	url
Description	This command specifies the URL to use for HTTP redirection for this filter entry. A URL can be specified or the CPF option can be used for BNG CUPS ESM sessions only. The following macro substitutions may be used: \$URL — request-URI in the HTTP GET request received \$MAC — a string that represents the MAC address of the subscriber host \$IP — a string that represents the IP address of the subscriber host \$SUB — a string that represents the subscriber ID \$SAP — a string that represents a SAP ID \$SAPDESC — description string configured on the SAP \$CID — a string that represents the circuit ID or interface ID of the subscriber host (hexadecimal format) \$RID — a string that represents the remote ID of the subscriber host

	(hexadecimal format)
String Length	1 to 255
Options	from-cpf
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

## ignore-match

Synopsis	Ignore match criteria for the entry
Context	<b>configure filter ip-filter</b> <i>string entry number action ignore-match</i>
Tree	<a href="#">ignore-match</a>
Notes	The following elements are part of a mandatory choice: <b>accept</b> , <b>drop</b> , <b>forward</b> , <b>gtp-local-breakout</b> , <b>http-redirect</b> , <b>ignore-match</b> , <b>nat</b> , <b>reassemble</b> , or <b>tcp-mss-adjust</b> .
Introduced	16.0.R1
Platforms	All

## l2-aware-nat-bypass *boolean*

Synopsis	Divert traffic from an L2-Aware NAT subscriber
Context	<b>configure filter ip-filter</b> <i>string entry number action l2-aware-nat-bypass boolean</i>
Tree	<a href="#">l2-aware-nat-bypass</a>
Description	<p>When configured to <b>true</b>, the filter action selectively diverts traffic from a L2-Aware NAT subscriber away from NAT. This action is only applicable to L2-Aware NAT subscribers and must be configured together with action <b>accept</b>. Traffic identified in the match condition bypasses L2-Aware NAT. An example is to bypass NAT for on-net destinations (within the customer network).</p> <p>For selective NAT bypass to take effect, in addition to IP filter configuration, the L2-Aware NAT subscriber must be specifically enabled for selective bypass via the <b>allow-bypass</b> configuration option in the <b>configure subscriber-mgmt sub-profile nat allow-bypass</b> context.</p> <p>When configured to <b>false</b>, traffic that is not classified for bypass automatically diverts to L2-Aware NAT, unless it is explicitly configured in the IP filter action to be dropped.</p>
Default	false
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## nat

Synopsis	Enable the <b>nat</b> context
Context	<b>configure</b> filter ip-filter string entry number action nat
Tree	nat
Notes	The following elements are part of a mandatory choice: <b>accept</b> , <b>drop</b> , <b>forward</b> , <b>gtp-local-breakout</b> , <b>http-redirect</b> , <b>ignore-match</b> , <b>nat</b> , <b>reassemble</b> , or <b>tcp-mss-adjust</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## nat-policy reference

**WARNING:**

Modifying this element clears ISA state, such as flow state, for the new value to take effect.

Synopsis	NAT policy name when action is NAT
Context	<b>configure</b> filter ip-filter string entry number action nat nat-policy reference
Tree	nat-policy
Reference	<b>configure</b> service nat nat-policy string
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## rate-limit

Synopsis	Enable the <b>rate-limit</b> context
Context	<b>configure</b> filter ip-filter string entry number action rate-limit
Tree	rate-limit
Introduced	16.0.R1
Platforms	All

## extracted-traffic

Synopsis	Limit the rate of traffic extracted to the CPM
Context	<b>configure</b> filter ip-filter string entry number action rate-limit extracted-traffic
Tree	extracted-traffic
Introduced	22.2.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS

### **mbs** (*number* | *keyword*)

Synopsis Maximum burst size

Context **configure filter ip-filter string entry number action rate-limit mbs** (*number* | *keyword*)

Tree [mbs](#)

Range 0 to 268435456

Units bytes

Options auto

Default auto

Introduced 23.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR

### **packet-length**

Synopsis Enable the **packet-length** context

Context **configure filter ip-filter string entry number action rate-limit packet-length**

Tree [packet-length](#)

Notes The following elements are part of a choice: **packet-length** or **ttl**.

Introduced 16.0.R1

Platforms All

### **eq** *number*

Synopsis Exact match criterion for the length

Context **configure filter ip-filter string entry number action rate-limit packet-length eq number**

Tree [eq](#)

Range 0 to 65535

Notes The following elements are part of a mandatory choice: **eq**, **gt**, **lt**, or **range**.

Introduced 16.0.R1

Platforms All

**gt number**

Synopsis	Greater than match criterion for the length
Context	<b>configure filter ip-filter string entry number action rate-limit packet-length gt number</b>
Tree	<a href="#">gt</a>
Range	0 to 65534
Notes	The following elements are part of a mandatory choice: <b>eq, gt, lt, or range</b> .
Introduced	16.0.R1
Platforms	All

**lt number**

Synopsis	Less than match criterion for the length
Context	<b>configure filter ip-filter string entry number action rate-limit packet-length lt number</b>
Tree	<a href="#">lt</a>
Range	1 to 65535
Notes	The following elements are part of a mandatory choice: <b>eq, gt, lt, or range</b> .
Introduced	16.0.R1
Platforms	All

**range**

Synopsis	Enable the <b>range</b> context
Context	<b>configure filter ip-filter string entry number action rate-limit packet-length range</b>
Tree	<a href="#">range</a>
Notes	The following elements are part of a mandatory choice: <b>eq, gt, lt, or range</b> .
Introduced	16.0.R1
Platforms	All

**end number**

Synopsis	Upper bound of the length range
Context	<b>configure filter ip-filter string entry number action rate-limit packet-length range end number</b>
Tree	<a href="#">end</a>
Range	1 to 65535

Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

**start number**

Synopsis	Lower bound of the length range
Context	<b>configure</b> filter ip-filter string entry number action rate-limit packet-length range start number
Tree	start
Range	0 to 65534
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

**pattern**

Synopsis	Enable the <b>pattern</b> context
Context	<b>configure</b> filter ip-filter string entry number action rate-limit pattern
Tree	pattern
Introduced	16.0.R4
Platforms	All

**expression string**

Synopsis	Pattern expression to match
Context	<b>configure</b> filter ip-filter string entry number action rate-limit pattern expression string
Tree	expression
String Length	3 to 18
Notes	This element is mandatory.
Introduced	16.0.R4
Platforms	All

**mask** *string*

Synopsis	Mask for the pattern expression
Context	<b>configure</b> <a href="#">filter</a> <a href="#">ip-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">rate-limit</a> <a href="#">pattern</a> <b>mask</b> <i>string</i>
Tree	<a href="#">mask</a>
String Length	3 to 18
Notes	This element is mandatory.
Introduced	16.0.R4
Platforms	All

**offset-type** *keyword*

Synopsis	Starting point reference for offset value of pattern
Context	<b>configure</b> <a href="#">filter</a> <a href="#">ip-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">rate-limit</a> <a href="#">pattern</a> <b>offset-type</b> <i>keyword</i>
Tree	<a href="#">offset-type</a>
Options	layer-3, layer-4, data, dns-qtype
Notes	This element is mandatory.
Introduced	16.0.R4
Platforms	All

**offset-value** *number*

Synopsis	Offset value for the pattern expression
Context	<b>configure</b> <a href="#">filter</a> <a href="#">ip-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">rate-limit</a> <a href="#">pattern</a> <b>offset-value</b> <i>number</i>
Tree	<a href="#">offset-value</a>
Range	0 to 255
Notes	This element is mandatory.
Introduced	16.0.R4
Platforms	All

**pir** (*number* | *keyword*)

Synopsis	Peak information rate
Context	<b>configure</b> <a href="#">filter</a> <a href="#">ip-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">rate-limit</a> <b>pir</b> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">pir</a>

Range	0 to 2000000000
Units	kilobps
Options	max
Notes	The following elements are part of a mandatory choice: <b>pir</b> or <b>pps-pir</b> .
Introduced	16.0.R1
Platforms	All

### **pps-pir** (*number* | *keyword*)

Synopsis	Peak information rate
Context	<b>configure</b> filter ip-filter <i>string</i> entry <i>number</i> action rate-limit pps-pir ( <i>number</i>   <i>keyword</i> )
Tree	pps-pir
Range	0 to 1000000000
Units	packets per second
Options	max
Notes	The following elements are part of a mandatory choice: <b>pir</b> or <b>pps-pir</b> .
Introduced	22.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS

### **ttl**

Synopsis	Enable the <b>ttl</b> context
Context	<b>configure</b> filter ip-filter <i>string</i> entry <i>number</i> action rate-limit ttl
Tree	ttl
Notes	The following elements are part of a choice: <b>packet-length</b> or <b>ttl</b> .
Introduced	16.0.R1
Platforms	All

### **eq** *number*

Synopsis	Equal to condition match value
Context	<b>configure</b> filter ip-filter <i>string</i> entry <i>number</i> action rate-limit ttl eq <i>number</i>
Tree	eq
Range	0 to 255

Notes	The following elements are part of a mandatory choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	All

### **gt** *number*

Synopsis	Greater than condition match value
Context	<b>configure</b> <b>filter</b> <b>ip-filter</b> <i>string</i> <b>entry</b> <i>number</i> <b>action</b> <b>rate-limit</b> <b>tll</b> <b>gt</b> <i>number</i>
Tree	<b>gt</b>
Range	0 to 254
Notes	The following elements are part of a mandatory choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	All

### **lt** *number*

Synopsis	Less than condition match value
Context	<b>configure</b> <b>filter</b> <b>ip-filter</b> <i>string</i> <b>entry</b> <i>number</i> <b>action</b> <b>rate-limit</b> <b>tll</b> <b>lt</b> <i>number</i>
Tree	<b>lt</b>
Range	1 to 255
Notes	The following elements are part of a mandatory choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	All

### **range**

Synopsis	Enable the <b>range</b> context
Context	<b>configure</b> <b>filter</b> <b>ip-filter</b> <i>string</i> <b>entry</b> <i>number</i> <b>action</b> <b>rate-limit</b> <b>tll</b> <b>range</b>
Tree	<b>range</b>
Description	This command in this context specify an inclusive range. When range is used, the start of the range (the first value entered) must be smaller than the end of the range (the second value entered).
Notes	The following elements are part of a mandatory choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	All

**end number**

Synopsis	Upper bound of the range
Context	<b>configure filter ip-filter string entry number action rate-limit ttl range end number</b>
Tree	<b>end</b>
Range	1 to 255
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

**start number**

Synopsis	Lower bound of the range
Context	<b>configure filter ip-filter string entry number action rate-limit ttl range start number</b>
Tree	<b>start</b>
Range	0 to 254
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

**reassemble**

Synopsis	Forward matching packets to reassembly function
Context	<b>configure filter ip-filter string entry number action reassemble</b>
Tree	<b>reassemble</b>
Notes	The following elements are part of a mandatory choice: <b>accept</b> , <b>drop</b> , <b>forward</b> , <b>gtp-local-breakout</b> , <b>http-redirect</b> , <b>ignore-match</b> , <b>nat</b> , <b>reassemble</b> , or <b>tcp-mss-adjust</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**remark**

Synopsis	Enable the <b>remark</b> context
Context	<b>configure filter ip-filter string entry number action remark</b>
Tree	<b>remark</b>

Introduced	16.0.R1
Platforms	All

### **dscp keyword**

Synopsis	Destination SAP
Context	<b>configure filter ip-filter</b> <i>string entry number action remark dscp keyword</i>
Tree	<a href="#">dscp</a>
Options	be, cp1, cp2, cp3, cp4, cp5, cp6, cp7, cs1, cp9, af11, cp11, af12, cp13, af13, cp15, cs2, cp17, af21, cp19, af22, cp21, af23, cp23, cs3, cp25, af31, cp27, af32, cp29, af33, cp31, cs4, cp33, af41, cp35, af42, cp37, af43, cp39, cs5, cp41, cp42, cp43, cp44, cp45, ef, cp47, nc1, cp49, cp50, cp51, cp52, cp53, cp54, cp55, nc2, cp57, cp58, cp59, cp60, cp61, cp62, cp63
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

### **secondary**

Synopsis	Enable the <b>secondary</b> context
Context	<b>configure filter ip-filter</b> <i>string entry number action secondary</i>
Tree	<a href="#">secondary</a>
Introduced	16.0.R1
Platforms	All

### **forward**

Synopsis	Enter the <b>forward</b> context
Context	<b>configure filter ip-filter</b> <i>string entry number action secondary forward</i>
Tree	<a href="#">forward</a>
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

## next-hop

Synopsis	Enable the <b>next-hop</b> context
Context	<b>configure filter ip-filter string entry number action secondary forward next-hop</b>
Tree	<a href="#">next-hop</a>
Notes	The following elements are part of a choice: <b>next-hop</b> , <b>sap</b> , <b>sdp</b> , or <b>vprn-target</b> .
Introduced	16.0.R1
Platforms	All

## nh-ip-vrf

Synopsis	Enable the <b>nh-ip-vrf</b> context
Context	<b>configure filter ip-filter string entry number action secondary forward next-hop nh-ip-vrf</b>
Tree	<a href="#">nh-ip-vrf</a>
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

## address string

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	IPv4 address of next hop to forward matching packets
Context	<b>configure filter ip-filter string entry number action secondary forward next-hop nh-ip-vrf address string</b>
Tree	<a href="#">address</a>
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

## indirect boolean

Synopsis	Allow next hop to be indirectly reachable
Context	<b>configure filter ip-filter string entry number action secondary forward next-hop nh-ip-vrf indirect boolean</b>

Tree	<a href="#">indirect</a>
Default	false
Introduced	16.0.R1
Platforms	All

### router-instance *string*

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Routing context for route lookup for forwarding packets
Context	<b>configure</b> <a href="#">filter</a> <a href="#">ip-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">secondary</a> <a href="#">forward</a> <a href="#">next-hop</a> <a href="#">nh-ip-vrf</a> <a href="#">router-instance</a> <i>string</i>
Tree	<a href="#">router-instance</a>
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

### sap

Synopsis	Enable the <b>sap</b> context
Context	<b>configure</b> <a href="#">filter</a> <a href="#">ip-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">secondary</a> <a href="#">forward</a> <a href="#">sap</a>
Tree	<a href="#">sap</a>
Notes	The following elements are part of a choice: <b>next-hop</b> , <b>sap</b> , <b>sdp</b> , or <b>vprn-target</b> .
Introduced	16.0.R1
Platforms	All

### sap-id *reference*

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	SAP ID used to forward packets matching the entry
Context	<b>configure</b> <a href="#">filter</a> <a href="#">ip-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">secondary</a> <a href="#">forward</a> <a href="#">sap</a> <a href="#">sap-id</a> <i>reference</i>

Tree	<a href="#">sap-id</a>
Reference	<b>configure</b> <a href="#">service vpls string sap string</a>
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

### vpls reference

Synopsis	VPLS the sdp-bind-id belongs to
Context	<b>configure</b> <a href="#">filter ip-filter string entry number action secondary forward sap vpls reference</a>
Tree	<a href="#">vpls</a>
Reference	<b>configure</b> <a href="#">service vpls string</a>
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

### sdp

Synopsis	Enable the <b>sdp</b> context
Context	<b>configure</b> <a href="#">filter ip-filter string entry number action secondary forward sdp</a>
Tree	<a href="#">sdp</a>
Notes	The following elements are part of a choice: <b>next-hop</b> , <b>sap</b> , <b>sdp</b> , or <b>vprn-target</b> .
Introduced	16.0.R1
Platforms	All

### sdp-bind-id *string*

#### WARNING:

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	VPLS SDP bind ID used to forward matching packets
Context	<b>configure</b> <a href="#">filter ip-filter string entry number action secondary forward sdp sdp-bind-id string</a>
Tree	<a href="#">sdp-bind-id</a>
String Length	3 to 16

Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

### **vpls** *reference*

Synopsis	VPLS associated with the SDP
Context	<b>configure</b> <a href="#">filter ip-filter string entry number action secondary forward sdp vpls reference</a>
Tree	<a href="#">vpls</a>
Reference	<b>configure</b> <a href="#">service vpls string</a>
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

### **vprn-target**

Synopsis	Enable the <b>vprn-target</b> context
Context	<b>configure</b> <a href="#">filter ip-filter string entry number action secondary forward vprn-target</a>
Tree	<a href="#">vprn-target</a>
Notes	The following elements are part of a choice: <b>next-hop</b> , <b>sap</b> , <b>sdp</b> , or <b>vprn-target</b> .
Introduced	21.7.R1
Platforms	All

### **adv-prefix** *string*

Synopsis	Advertised IP prefix for the target destination
Context	<b>configure</b> <a href="#">filter ip-filter string entry number action secondary forward vprn-target adv-prefix string</a>
Tree	<a href="#">adv-prefix</a>
Introduced	21.7.R1
Platforms	All

### **bgp-nh** *string*

Synopsis	Target BGP next hop IP address
----------	--------------------------------

Context	<b>configure</b> filter ip-filter <i>string</i> entry <i>number</i> action secondary forward vprn-target bgp-nh <i>string</i>
Tree	bgp-nh
Notes	This element is mandatory.
Introduced	21.7.R1
Platforms	All

### lsp string

Synopsis	LSP that is specified to forward a packet matching this entry
Context	<b>configure</b> filter ip-filter <i>string</i> entry <i>number</i> action secondary forward vprn-target lsp <i>string</i>
Tree	lsp
String Length	1 to 64
Introduced	21.7.R1
Platforms	All

### vprn reference

Synopsis	Routing context used for route lookup
Context	<b>configure</b> filter ip-filter <i>string</i> entry <i>number</i> action secondary forward vprn-target vprn <i>reference</i>
Tree	vprn
Reference	<b>configure</b> service vprn <i>string</i>
Notes	This element is mandatory.
Introduced	21.7.R1
Platforms	All

### remark

Synopsis	Enable the <b>remark</b> context
Context	<b>configure</b> filter ip-filter <i>string</i> entry <i>number</i> action secondary remark
Tree	remark
Introduced	16.0.R1
Platforms	All

**dscp keyword**

Synopsis	Destination SAP
Context	<b>configure filter ip-filter string entry number action secondary remark dscp keyword</b>
Tree	<b>dscp</b>
Options	be, cp1, cp2, cp3, cp4, cp5, cp6, cp7, cs1, cp9, af11, cp11, af12, cp13, af13, cp15, cs2, cp17, af21, cp19, af22, cp21, af23, cp23, cs3, cp25, af31, cp27, af32, cp29, af33, cp31, cs4, cp33, af41, cp35, af42, cp37, af43, cp39, cs5, cp41, cp42, cp43, cp44, cp45, ef, cp47, nc1, cp49, cp50, cp51, cp52, cp53, cp54, cp55, nc2, cp57, cp58, cp59, cp60, cp61, cp62, cp63
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

**tcp-mss-adjust**

Synopsis	Adjust MSS option of TCP matching packets to configured value of tcp-mss in router interface context
Context	<b>configure filter ip-filter string entry number action tcp-mss-adjust</b>
Tree	<b>tcp-mss-adjust</b>
Notes	The following elements are part of a mandatory choice: <b>accept, drop, forward, gtp-local-breakout, http-redirect, ignore-match, nat, reassemble, or tcp-mss-adjust.</b>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**description string**

Synopsis	Text description
Context	<b>configure filter ip-filter string entry number description string</b>
Tree	<b>description</b>
String Length	1 to 80
Introduced	16.0.R1
Platforms	All

**egress-pbr** *keyword***WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	PBR that has an effect when this filter is applied on egress
Context	<b>configure</b> <a href="#">filter ip-filter</a> <i>string</i> <a href="#">entry number</a> <a href="#">egress-pbr</a> <i>keyword</i>
Tree	<a href="#">egress-pbr</a>
Options	true, true-with-l4lb
Introduced	16.0.R1
Platforms	All

**filter-sample** *boolean*

Synopsis	Sample matching traffic if IP interface is set to cflowd ACL mode
Context	<b>configure</b> <a href="#">filter ip-filter</a> <i>string</i> <a href="#">entry number</a> <a href="#">filter-sample</a> <i>boolean</i>
Tree	<a href="#">filter-sample</a>
Default	false
Introduced	16.0.R1
Platforms	All

**interface-sample** *boolean*

Synopsis	Sample matching traffic if IP interface is set to cflowd interface mode
Context	<b>configure</b> <a href="#">filter ip-filter</a> <i>string</i> <a href="#">entry number</a> <a href="#">interface-sample</a> <i>boolean</i>
Tree	<a href="#">interface-sample</a>
Default	true
Introduced	16.0.R1
Platforms	All

**log** *reference*

Synopsis	Log that is used for packets matching this entry
Context	<b>configure</b> <a href="#">filter ip-filter</a> <i>string</i> <a href="#">entry number</a> <a href="#">log</a> <i>reference</i>
Tree	<a href="#">log</a>
Reference	<b>configure</b> <a href="#">filter log</a> <i>number</i>

Introduced	16.0.R1
Platforms	All

## match

Synopsis	Enter the <b>match</b> context
Context	<b>configure filter ip-filter</b> <i>string entry number match</i>
Tree	<a href="#">match</a>
Description	Commands in this context configure match criteria for the filter entry. When the match criteria are satisfied, the action associated with the match criteria is executed.
Introduced	16.0.R1
Platforms	All

## destination-class *number*

Synopsis	Destination class as a match criterion
Context	<b>configure filter ip-filter</b> <i>string entry number match destination-class number</i>
Tree	<a href="#">destination-class</a>
Description	This command configures the BGP destination class value as a match criterion. Filtering egress traffic on the destination class requires the <b>destination-class-lookup</b> command (under the <b>ingress</b> context for the service interface) to be enabled (set to <b>true</b> ).
Range	1 to 255
Introduced	20.7.R1
Platforms	All

## dscp *keyword*

Synopsis	DSCP used as an IP filter match criterion
Context	<b>configure filter ip-filter</b> <i>string entry number match dscp keyword</i>
Tree	<a href="#">dscp</a>
Options	be, cp1, cp2, cp3, cp4, cp5, cp6, cp7, cs1, cp9, af11, cp11, af12, cp13, af13, cp15, cs2, cp17, af21, cp19, af22, cp21, af23, cp23, cs3, cp25, af31, cp27, af32, cp29, af33, cp31, cs4, cp33, af41, cp35, af42, cp37, af43, cp39, cs5, cp41, cp42, cp43, cp44, cp45, ef, cp47, nc1, cp49, cp50, cp51, cp52, cp53, cp54, cp55, nc2, cp57, cp58, cp59, cp60, cp61, cp62, cp63
Introduced	16.0.R1
Platforms	All

## dst-ip

Synopsis	Enter the <b>dst-ip</b> context
Context	<b>configure filter ip-filter string entry number match dst-ip</b>
Tree	<a href="#">dst-ip</a>
Notes	The following elements are part of a choice: <b>ip</b> or ( <b>dst-ip</b> and <b>src-ip</b> ).
Introduced	16.0.R1
Platforms	All

## address (*ipv4-prefix-with-host-bits | ipv4-address*)

Synopsis	IPv4 address used as the match criterion
Context	<b>configure filter ip-filter string entry number match dst-ip address (<i>ipv4-prefix-with-host-bits   ipv4-address</i>)</b>
Tree	<a href="#">address</a>
Notes	The following elements are part of a choice: ( <b>address</b> and <b>mask</b> ) or <b>ip-prefix-list</b> .
Introduced	16.0.R1
Platforms	All

## ip-prefix-list *reference*

Synopsis	IPv4 address prefix list used as match criterion
Context	<b>configure filter ip-filter string entry number match dst-ip ip-prefix-list reference</b>
Tree	<a href="#">ip-prefix-list</a>
Reference	<b>configure filter match-list ip-prefix-list string</b>
Notes	The following elements are part of a choice: ( <b>address</b> and <b>mask</b> ) or <b>ip-prefix-list</b> .
Introduced	16.0.R1
Platforms	All

## mask *string*

Synopsis	IPv4 address mask used as the match criterion
Context	<b>configure filter ip-filter string entry number match dst-ip mask string</b>
Tree	<a href="#">mask</a>
Notes	The following elements are part of a choice: ( <b>address</b> and <b>mask</b> ) or <b>ip-prefix-list</b> .

Introduced	16.0.R1
Platforms	All

## **dst-port**

Synopsis	Enter the <b>dst-port</b> context
Context	<b>configure filter ip-filter string entry number match dst-port</b>
Tree	<a href="#">dst-port</a>
Description	Commands in this context configure match criteria for the destination port.
Notes	The following elements are part of a choice: <b>port</b> or ( <b>dst-port</b> and <b>src-port</b> ).
Introduced	16.0.R1
Platforms	All

## **eq number**

Synopsis	Exact value as the match criterion
Context	<b>configure filter ip-filter string entry number match dst-port eq number</b>
Tree	<a href="#">eq</a>
Range	0 to 65535
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , <b>port-list</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	All

## **gt number**

Synopsis	Greater than value as the match criterion
Context	<b>configure filter ip-filter string entry number match dst-port gt number</b>
Tree	<a href="#">gt</a>
Range	0 to 65534
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , <b>port-list</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	All

### **lt number**

Synopsis	Less than value as the match criterion
Context	<b>configure filter ip-filter string entry number match dst-port lt number</b>
Tree	<b>lt</b>
Range	1 to 65535
Notes	The following elements are part of a choice: <b>eq, gt, lt, port-list, or range.</b>
Introduced	16.0.R1
Platforms	All

### **port-list reference**

Synopsis	Name of the port list as the match criterion
Context	<b>configure filter ip-filter string entry number match dst-port port-list reference</b>
Tree	<b>port-list</b>
Reference	<b>configure filter match-list port-list string</b>
Notes	The following elements are part of a choice: <b>eq, gt, lt, port-list, or range.</b>
Introduced	16.0.R1
Platforms	All

### **range**

Synopsis	Enable the <b>range</b> context
Context	<b>configure filter ip-filter string entry number match dst-port range</b>
Tree	<b>range</b>
Notes	The following elements are part of a choice: <b>eq, gt, lt, port-list, or range.</b>
Introduced	16.0.R1
Platforms	All

### **end number**

Synopsis	Upper bound of the port range
Context	<b>configure filter ip-filter string entry number match dst-port range end number</b>
Tree	<b>end</b>
Range	1 to 65535

Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

**start number**

Synopsis	Lower bound of the port range
Context	<b>configure filter ip-filter string entry number match dst-port range start number</b>
Tree	<a href="#">start</a>
Range	0 to 65534
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

**fragment keyword**

Synopsis	Match criterion for fragmented packets
Context	<b>configure filter ip-filter string entry number match fragment keyword</b>
Tree	<a href="#">fragment</a>
Options	false, true, first-only, non-first-only
Introduced	16.0.R1
Platforms	All

**icmp**

Synopsis	Enter the <b>icmp</b> context
Context	<b>configure filter ip-filter string entry number match icmp</b>
Tree	<a href="#">icmp</a>
Introduced	16.0.R1
Platforms	All

**code number**

Synopsis	ICMP code value to match
Context	<b>configure filter ip-filter string entry number match icmp code number</b>

---

Tree	<a href="#">code</a>
Range	0 to 255
Introduced	16.0.R1
Platforms	All

### **type** *number*

Synopsis	ICMP type value to match
Context	<b>configure</b> <a href="#">filter</a> <a href="#">ip-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">icmp</a> <i>type</i> <i>number</i>
Tree	<a href="#">type</a>
Range	0 to 255
Introduced	16.0.R1
Platforms	All

### **ip**

Synopsis	Enter the <b>ip</b> context
Context	<b>configure</b> <a href="#">filter</a> <a href="#">ip-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">ip</a>
Tree	<a href="#">ip</a>
Notes	The following elements are part of a choice: <b>ip</b> or ( <b>dst-ip</b> and <b>src-ip</b> ).
Introduced	21.10.R1
Platforms	All

### **address** (*ipv4-prefix-with-host-bits* | *ipv4-address*)

Synopsis	IPv4 address used as the match criterion
Context	<b>configure</b> <a href="#">filter</a> <a href="#">ip-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">ip</a> <a href="#">address</a> ( <i>ipv4-prefix-with-host-bits</i>   <i>ipv4-address</i> )
Tree	<a href="#">address</a>
Notes	The following elements are part of a choice: ( <b>address</b> and <b>mask</b> ) or <b>ip-prefix-list</b> .
Introduced	21.10.R1
Platforms	All

## **ip-prefix-list** *reference*

Synopsis	IPv4 address prefix list used as match criterion
Context	<b>configure</b> filter ip-filter <i>string</i> entry <i>number</i> match ip ip-prefix-list <i>reference</i>
Tree	<a href="#">ip-prefix-list</a>
Reference	<b>configure</b> filter match-list ip-prefix-list <i>string</i>
Notes	The following elements are part of a choice: ( <b>address</b> and <b>mask</b> ) or <b>ip-prefix-list</b> .
Introduced	21.10.R1
Platforms	All

## **mask** *string*

Synopsis	IPv4 address mask used as the match criterion
Context	<b>configure</b> filter ip-filter <i>string</i> entry <i>number</i> match ip mask <i>string</i>
Tree	<a href="#">mask</a>
Notes	The following elements are part of a choice: ( <b>address</b> and <b>mask</b> ) or <b>ip-prefix-list</b> .
Introduced	21.10.R1
Platforms	All

## **ip-option**

Synopsis	Enable the <b>ip-option</b> context
Context	<b>configure</b> filter ip-filter <i>string</i> entry <i>number</i> match ip-option
Tree	<a href="#">ip-option</a>
Introduced	16.0.R1
Platforms	All

## **mask** *number*

Synopsis	Mask that is ANDed with ip-option value in the packet header
Context	<b>configure</b> filter ip-filter <i>string</i> entry <i>number</i> match ip-option mask <i>number</i>
Tree	<a href="#">mask</a>
Range	1 to 255
Default	255
Introduced	16.0.R1

Platforms All

### **type** *number*

Synopsis Specific IP option to match

Context **configure filter ip-filter** *string entry number match ip-option type number*

Tree [type](#)

Range 0 to 255

Notes This element is mandatory.

Introduced 16.0.R1

Platforms All

### **multiple-option** *boolean*

Synopsis Match based on presence of multiple options in header

Context **configure filter ip-filter** *string entry number match multiple-option boolean*

Tree [multiple-option](#)

Introduced 16.0.R1

Platforms All

### **option-present** *boolean*

Synopsis Match on the presence of any IP option in the packet

Context **configure filter ip-filter** *string entry number match option-present boolean*

Tree [option-present](#)

Introduced 16.0.R1

Platforms All

### **packet-length**

Synopsis Enable the **packet-length** context

Context **configure filter ip-filter** *string entry number match packet-length*

Tree [packet-length](#)

Description Commands in this context specify the match criterion for the IPv4 packet length. The IPv4 packet length represents the total packet length which includes the IPv4 header and the payload.

---

Introduced	19.5.R1
Platforms	All

### **eq** *number*

Synopsis	Exact match criterion for the length
Context	<b>configure</b> <b>filter</b> <b>ip-filter</b> <i>string</i> <b>entry</b> <i>number</i> <b>match</b> <b>packet-length</b> <b>eq</b> <i>number</i>
Tree	<b>eq</b>
Range	0 to 65535
Notes	The following elements are part of a mandatory choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	19.5.R1
Platforms	All

### **gt** *number*

Synopsis	Greater than match criterion for the length
Context	<b>configure</b> <b>filter</b> <b>ip-filter</b> <i>string</i> <b>entry</b> <i>number</i> <b>match</b> <b>packet-length</b> <b>gt</b> <i>number</i>
Tree	<b>gt</b>
Range	0 to 65534
Notes	The following elements are part of a mandatory choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	19.5.R1
Platforms	All

### **lt** *number*

Synopsis	Less than match criterion for the length
Context	<b>configure</b> <b>filter</b> <b>ip-filter</b> <i>string</i> <b>entry</b> <i>number</i> <b>match</b> <b>packet-length</b> <b>lt</b> <i>number</i>
Tree	<b>lt</b>
Range	1 to 65535
Notes	The following elements are part of a mandatory choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	19.5.R1
Platforms	All

## range

Synopsis	Enable the <b>range</b> context
Context	<b>configure filter ip-filter string entry number match packet-length range</b>
Tree	<a href="#">range</a>
Notes	The following elements are part of a mandatory choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	19.5.R1
Platforms	All

## end number

Synopsis	Upper bound of the length range
Context	<b>configure filter ip-filter string entry number match packet-length range end number</b>
Tree	<a href="#">end</a>
Range	1 to 65535
Notes	This element is mandatory.
Introduced	19.5.R1
Platforms	All

## start number

Synopsis	Lower bound of the length range
Context	<b>configure filter ip-filter string entry number match packet-length range start number</b>
Tree	<a href="#">start</a>
Range	0 to 65534
Notes	This element is mandatory.
Introduced	19.5.R1
Platforms	All

## port

Synopsis	Enter the <b>port</b> context
Context	<b>configure filter ip-filter string entry number match port</b>
Tree	<a href="#">port</a>
Notes	The following elements are part of a choice: <b>port</b> or ( <b>dst-port</b> and <b>src-port</b> ).

Introduced	16.0.R1
Platforms	All

**eq number**

Synopsis	Exact value as the match criterion
Context	<b>configure filter ip-filter string entry number match port eq number</b>
Tree	<a href="#">eq</a>
Range	0 to 65535
Notes	The following elements are part of a choice: <b>eq, gt, lt, port-list, or range.</b>
Introduced	16.0.R1
Platforms	All

**gt number**

Synopsis	Greater than value as the match criterion
Context	<b>configure filter ip-filter string entry number match port gt number</b>
Tree	<a href="#">gt</a>
Range	0 to 65534
Notes	The following elements are part of a choice: <b>eq, gt, lt, port-list, or range.</b>
Introduced	16.0.R1
Platforms	All

**lt number**

Synopsis	Less than value as the match criterion
Context	<b>configure filter ip-filter string entry number match port lt number</b>
Tree	<a href="#">lt</a>
Range	1 to 65535
Notes	The following elements are part of a choice: <b>eq, gt, lt, port-list, or range.</b>
Introduced	16.0.R1
Platforms	All

**port-list** *reference*

Synopsis	Name of the port list as the match criterion
Context	<b>configure</b> filter ip-filter <i>string</i> entry <i>number</i> match port port-list <i>reference</i>
Tree	port-list
Reference	<b>configure</b> filter match-list port-list <i>string</i>
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , <b>port-list</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	All

**range**

Synopsis	Enable the <b>range</b> context
Context	<b>configure</b> filter ip-filter <i>string</i> entry <i>number</i> match port range
Tree	range
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , <b>port-list</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	All

**end** *number*

Synopsis	Upper bound of the port range
Context	<b>configure</b> filter ip-filter <i>string</i> entry <i>number</i> match port range end <i>number</i>
Tree	end
Range	1 to 65535
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

**start** *number*

Synopsis	Lower bound of the port range
Context	<b>configure</b> filter ip-filter <i>string</i> entry <i>number</i> match port range start <i>number</i>
Tree	start
Range	0 to 65534

Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

### **protocol** (*number* | *keyword*)

Synopsis	IP protocol identifier as a match criterion
Context	<b>configure filter ip-filter</b> <i>string</i> <b>entry</b> <i>number</i> <b>match protocol</b> ( <i>number</i>   <i>keyword</i> )
Tree	<b>protocol</b>
Range	0 to 255
Options	tcp-udp, icmp, igmp, ip, tcp, egp, igp, udp, rdp, ipv6, ipv6-route, ipv6-frag, idrp, rsvp, gre, ipv6-icmp, ipv6-no-nxt, ipv6-opts, iso-ip, eigrp, ospf-igp, ether-ip, encap, pnni, pim, vrrp, l2tp, stp, ptp, isis, crtp, crudp, sctp
Notes	The following elements are part of a choice: <b>protocol</b> or <b>protocol-list</b> .
Introduced	16.0.R1
Platforms	All

### **protocol-list** *reference*

Synopsis	Name of the protocol list as a match criterion
Context	<b>configure filter ip-filter</b> <i>string</i> <b>entry</b> <i>number</i> <b>match protocol-list</b> <i>reference</i>
Tree	<b>protocol-list</b>
Reference	<b>configure filter match-list protocol-list</b> <i>string</i>
Notes	The following elements are part of a choice: <b>protocol</b> or <b>protocol-list</b> .
Introduced	20.7.R1
Platforms	All

### **src-ip**

Synopsis	Enter the <b>src-ip</b> context
Context	<b>configure filter ip-filter</b> <i>string</i> <b>entry</b> <i>number</i> <b>match src-ip</b>
Tree	<b>src-ip</b>
Notes	The following elements are part of a choice: <b>ip</b> or ( <b>dst-ip</b> and <b>src-ip</b> ).
Introduced	16.0.R1
Platforms	All

**address** (*ipv4-prefix-with-host-bits* | *ipv4-address*)

Synopsis	IPv4 address used as the match criterion
Context	<b>configure filter ip-filter</b> <i>string entry number match src-ip address</i> ( <i>ipv4-prefix-with-host-bits</i>   <i>ipv4-address</i> )
Tree	<a href="#">address</a>
Notes	The following elements are part of a choice: ( <b>address</b> and <b>mask</b> ) or <b>ip-prefix-list</b> .
Introduced	16.0.R1
Platforms	All

**ip-prefix-list** *reference*

Synopsis	IPv4 address prefix list used as match criterion
Context	<b>configure filter ip-filter</b> <i>string entry number match src-ip ip-prefix-list reference</i>
Tree	<a href="#">ip-prefix-list</a>
Reference	<b>configure filter match-list ip-prefix-list</b> <i>string</i>
Notes	The following elements are part of a choice: ( <b>address</b> and <b>mask</b> ) or <b>ip-prefix-list</b> .
Introduced	16.0.R1
Platforms	All

**mask** *string*

Synopsis	IPv4 address mask used as the match criterion
Context	<b>configure filter ip-filter</b> <i>string entry number match src-ip mask string</i>
Tree	<a href="#">mask</a>
Notes	The following elements are part of a choice: ( <b>address</b> and <b>mask</b> ) or <b>ip-prefix-list</b> .
Introduced	16.0.R1
Platforms	All

**src-mac**

Synopsis	Enable the <b>src-mac</b> context
Context	<b>configure filter ip-filter</b> <i>string entry number match src-mac</i>
Tree	<a href="#">src-mac</a>
Introduced	19.5.R1

Platforms All

### **address string**

Synopsis MAC address used as the match criterion  
 Context **configure filter ip-filter string entry number match src-mac address string**  
 Tree [address](#)  
 Notes This element is mandatory.  
 Introduced 19.5.R1  
 Platforms All

### **mask string**

Synopsis MAC address mask as the match criterion  
 Context **configure filter ip-filter string entry number match src-mac mask string**  
 Tree [mask](#)  
 Default ff:ff:ff:ff:ff:ff  
 Introduced 19.5.R1  
 Platforms All

### **src-port**

Synopsis Enter the **src-port** context  
 Context **configure filter ip-filter string entry number match src-port**  
 Tree [src-port](#)  
 Description Commands in this context configure match criteria for the source port.  
 Notes The following elements are part of a choice: **port** or (**dst-port** and **src-port**).  
 Introduced 16.0.R1  
 Platforms All

### **eq number**

Synopsis Exact value as the match criterion  
 Context **configure filter ip-filter string entry number match src-port eq number**  
 Tree [eq](#)

Range	0 to 65535
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , <b>port-list</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	All

**gt number**

Synopsis	Greater than value as the match criterion
Context	<b>configure</b> <a href="#">filter ip-filter string entry number match src-port</a> <b>gt number</b>
Tree	<a href="#">gt</a>
Range	0 to 65534
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , <b>port-list</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	All

**lt number**

Synopsis	Less than value as the match criterion
Context	<b>configure</b> <a href="#">filter ip-filter string entry number match src-port</a> <b>lt number</b>
Tree	<a href="#">lt</a>
Range	1 to 65535
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , <b>port-list</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	All

**port-list reference**

Synopsis	Name of the port list as the match criterion
Context	<b>configure</b> <a href="#">filter ip-filter string entry number match src-port</a> <b>port-list reference</b>
Tree	<a href="#">port-list</a>
Reference	<b>configure</b> <a href="#">filter match-list port-list string</a>
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , <b>port-list</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	All

## range

Synopsis	Enable the <b>range</b> context
Context	<b>configure filter ip-filter string entry number match src-port range</b>
Tree	<a href="#">range</a>
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , <b>port-list</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	All

## end number

Synopsis	Upper bound of the port range
Context	<b>configure filter ip-filter string entry number match src-port range end number</b>
Tree	<a href="#">end</a>
Range	1 to 65535
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

## start number

Synopsis	Lower bound of the port range
Context	<b>configure filter ip-filter string entry number match src-port range start number</b>
Tree	<a href="#">start</a>
Range	0 to 65534
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

## src-route-option boolean

Synopsis	Match based on presence of source route option
Context	<b>configure filter ip-filter string entry number match src-route-option boolean</b>
Tree	<a href="#">src-route-option</a>
Introduced	16.0.R1

Platforms All

### **tcp-established**

Synopsis Match packets containing the TCP flag as ACK or RST

Context **configure filter ip-filter string entry number match tcp-established**

Tree [tcp-established](#)

Notes The following elements are part of a choice: **tcp-established** or **tcp-flags**.

Introduced 22.10.R1

Platforms All

### **tcp-flags**

Synopsis Enter the **tcp-flags** context

Context **configure filter ip-filter string entry number match tcp-flags**

Tree [tcp-flags](#)

Notes The following elements are part of a choice: **tcp-established** or **tcp-flags**.

Introduced 16.0.R1

Platforms All

### **ack boolean**

Synopsis Match TCP ACK as per value of the ACK TCP flag bit

Context **configure filter ip-filter string entry number match tcp-flags ack boolean**

Tree [ack](#)

Introduced 16.0.R1

Platforms All

### **cwr boolean**

Synopsis Match TCP CWR as per value of the CWR TCP flag bit

Context **configure filter ip-filter string entry number match tcp-flags cwr boolean**

Tree [cwr](#)

Introduced 16.0.R1

Platforms All

**ece boolean**

Synopsis	Match TCP ECE as per value of the ECE TCP flag bit
Context	<b>configure filter ip-filter string entry number match tcp-flags ece boolean</b>
Tree	<a href="#">ece</a>
Introduced	16.0.R1
Platforms	All

**fin boolean**

Synopsis	Match TCP FIN as per value of the FIN TCP flag bit
Context	<b>configure filter ip-filter string entry number match tcp-flags fin boolean</b>
Tree	<a href="#">fin</a>
Introduced	16.0.R1
Platforms	All

**ns boolean**

Synopsis	Match TCP NS as per value of the NS TCP flag bit
Context	<b>configure filter ip-filter string entry number match tcp-flags ns boolean</b>
Tree	<a href="#">ns</a>
Introduced	16.0.R1
Platforms	All

**psh boolean**

Synopsis	Match TCP PSH as per value of the PSH TCP flag bit
Context	<b>configure filter ip-filter string entry number match tcp-flags psh boolean</b>
Tree	<a href="#">psh</a>
Introduced	16.0.R1
Platforms	All

**rst boolean**

Synopsis	Match TCP RST as per value of the RST TCP flag bit
----------	--

Context	<b>configure filter ip-filter string entry number match tcp-flags rst boolean</b>
Tree	<a href="#">rst</a>
Introduced	16.0.R1
Platforms	All

**syn boolean**

Synopsis	Match TCP SYN as per value of the SYN TCP flag bit
Context	<b>configure filter ip-filter string entry number match tcp-flags syn boolean</b>
Tree	<a href="#">syn</a>
Introduced	16.0.R1
Platforms	All

**urg boolean**

Synopsis	Match TCP URG as per value of the URG TCP flag bit
Context	<b>configure filter ip-filter string entry number match tcp-flags urg boolean</b>
Tree	<a href="#">urg</a>
Introduced	16.0.R1
Platforms	All

**ttl**

Synopsis	Enable the <b>ttl</b> context
Context	<b>configure filter ip-filter string entry number match ttl</b>
Tree	<a href="#">ttl</a>
Introduced	21.10.R1
Platforms	All

**eq number**

Synopsis	Equal to condition match value
Context	<b>configure filter ip-filter string entry number match ttl eq number</b>
Tree	<a href="#">eq</a>
Range	0 to 255

---

Notes	The following elements are part of a mandatory choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	21.10.R1
Platforms	All

### **gt** *number*

Synopsis	Greater than condition match value
Context	<b>configure</b> <a href="#">filter</a> <a href="#">ip-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">ttl</a> <b>gt</b> <i>number</i>
Tree	<a href="#">gt</a>
Range	0 to 254
Notes	The following elements are part of a mandatory choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	21.10.R1
Platforms	All

### **lt** *number*

Synopsis	Less than condition match value
Context	<b>configure</b> <a href="#">filter</a> <a href="#">ip-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">ttl</a> <b>lt</b> <i>number</i>
Tree	<a href="#">lt</a>
Range	1 to 255
Notes	The following elements are part of a mandatory choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	21.10.R1
Platforms	All

### **range**

Synopsis	Enable the <b>range</b> context
Context	<b>configure</b> <a href="#">filter</a> <a href="#">ip-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">ttl</a> <b>range</b>
Tree	<a href="#">range</a>
Description	This command in this context specify an inclusive range. When range is used, the start of the range (the first value entered) must be smaller than the end of the range (the second value entered).
Notes	The following elements are part of a mandatory choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	21.10.R1
Platforms	All

**end number**

Synopsis	Upper bound of the range
Context	<b>configure filter ip-filter string entry number match ttl range end number</b>
Tree	<a href="#">end</a>
Range	1 to 255
Notes	This element is mandatory.
Introduced	21.10.R1
Platforms	All

**start number**

Synopsis	Lower bound of the range
Context	<b>configure filter ip-filter string entry number match ttl range start number</b>
Tree	<a href="#">start</a>
Range	0 to 254
Notes	This element is mandatory.
Introduced	21.10.R1
Platforms	All

**pbr-down-action-override keyword**

Synopsis	Action when PBR or PBF target for this entry is not available
Context	<b>configure filter ip-filter string entry number pbr-down-action-override keyword</b>
Tree	<a href="#">pbr-down-action-override</a>
Options	drop, forward, filter-default-action
Introduced	16.0.R1
Platforms	All

**sample-profile reference**

Synopsis	Cflowd sample profile ID to match packets
Context	<b>configure filter ip-filter string entry number sample-profile reference</b>
Tree	<a href="#">sample-profile</a>

Description	This command allows traffic matching an IPv4 or IPv6 filter to be sampled for cflowd processing using a specific sample profile ID. This option is only compatible if the associated interface is configured for interface-based sampling and is only supported for ingress sampling. An IP filter can only specify a single alternate sample profile ID for cflowd sampling, but the ID can be used in multiple entries.
Reference	<b>configure</b> <a href="#">cflowd sample-profile</a> <i>number</i>
Introduced	20.10.R1
Platforms	All

### **sticky-dest** (*number* | *keyword*)

Synopsis	Time before action with available PBR or PBF destination and highest priority
Context	<b>configure</b> <a href="#">filter ip-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <b>sticky-dest</b> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">sticky-dest</a>
Range	0 to 65535
Units	seconds
Options	no-hold-time-up
Introduced	16.0.R1
Platforms	All

### **filter-id** *number*

#### **WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	IP filter ID
Context	<b>configure</b> <a href="#">filter ip-filter</a> <i>string</i> <a href="#">filter-id</a> <i>number</i>
Tree	<a href="#">filter-id</a>
Range	1 to 65535
Introduced	16.0.R1
Platforms	All

### **scope** *keyword*

Synopsis	Scope of the filter definition
Context	<b>configure</b> <a href="#">filter ip-filter</a> <i>string</i> <a href="#">scope</a> <i>keyword</i>

Tree	<a href="#">scope</a>
Description	This command configures the filter policy scope. If the scope of the policy is <b>template</b> and is applied to one or more services or network interfaces, the scope cannot be changed.
Options	exclusive, template, embedded, system, cpm
Default	template
Introduced	16.0.R1
Platforms	All

### **shared-policer** *boolean*

Synopsis	Share policer among active ports in the LAG
Context	<b>configure</b> <a href="#">filter ip-filter</a> <i>string</i> <b>shared-policer</b> <i>boolean</i>
Tree	<a href="#">shared-policer</a>
Description	When configured to <b>true</b> , and when the filter policy is configured on a LAG endpoint, the system programs the policer rates in the filter policy per line card FP of the LAG based on the number of active ports in the LAG for each FP.  When configured to <b>false</b> , and when the filter policy is configured on a LAG endpoint, the system programs the same policer rate on each line card FP of the LAG.
Default	false
Introduced	22.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS

### **subscriber-mgmt**

Synopsis	Enter the <b>subscriber-mgmt</b> context
Context	<b>configure</b> <a href="#">filter ip-filter</a> <i>string</i> <b>subscriber-mgmt</b>
Tree	<a href="#">subscriber-mgmt</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **host-specific-entry**

Synopsis	Enter the <b>host-specific-entry</b> context
Context	<b>configure</b> <a href="#">filter ip-filter</a> <i>string</i> <b>subscriber-mgmt</b> <b>host-specific-entry</b>
Tree	<a href="#">host-specific-entry</a>

Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## credit-control

Synopsis	Enter the <b>credit-control</b> context
Context	<b>configure filter ip-filter string subscriber-mgmt host-specific-entry credit-control</b>
Tree	<a href="#">credit-control</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## range

Synopsis	Enable the <b>range</b> context
Context	<b>configure filter ip-filter string subscriber-mgmt host-specific-entry credit-control range</b>
Tree	<a href="#">range</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## end number

Synopsis	Upper bound of range for credit control filter entries
Context	<b>configure filter ip-filter string subscriber-mgmt host-specific-entry credit-control range end number</b>
Tree	<a href="#">end</a>
Range	1 to 2097151
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## start number

Synopsis	Lower bound of range for credit control filter entries
Context	<b>configure filter ip-filter string subscriber-mgmt host-specific-entry credit-control range start number</b>
Tree	<a href="#">start</a>

Range	1 to 2097151
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## filter-rule

Synopsis	Enter the <b>filter-rule</b> context
Context	<b>configure filter ip-filter string subscriber-mgmt host-specific-entry filter-rule</b>
Tree	<a href="#">filter-rule</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## range

Synopsis	Enable the <b>range</b> context
Context	<b>configure filter ip-filter string subscriber-mgmt host-specific-entry filter-rule range</b>
Tree	<a href="#">range</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## end number

Synopsis	Upper bound of range for inserting filter rule entries
Context	<b>configure filter ip-filter string subscriber-mgmt host-specific-entry filter-rule range end number</b>
Tree	<a href="#">end</a>
Range	1 to 2097151
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## start number

Synopsis	Lower bound of range for inserting filter rule entries
----------	--

Context	<b>configure filter ip-filter string subscriber-mgmt host-specific-entry filter-rule range start number</b>
Tree	<a href="#">start</a>
Range	1 to 2097151
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## watermark

Synopsis	Enter the <b>watermark</b> context
Context	<b>configure filter ip-filter string subscriber-mgmt host-specific-entry watermark</b>
Tree	<a href="#">watermark</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## high number

Synopsis	High watermark for host-specific entries, to raise a table full alarm
Context	<b>configure filter ip-filter string subscriber-mgmt host-specific-entry watermark high number</b>
Tree	<a href="#">high</a>
Range	0 to 100
Default	95
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## low number

Synopsis	Low watermark for host-specific entries, to clear a table full alarm
Context	<b>configure filter ip-filter string subscriber-mgmt host-specific-entry watermark low number</b>
Tree	<a href="#">low</a>
Range	0 to 100
Default	90
Introduced	16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## shared-entry

Synopsis Enter the **shared-entry** context  
Context **configure filter ip-filter string subscriber-mgmt shared-entry**  
Tree [shared-entry](#)  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## filter-rule

Synopsis Enter the **filter-rule** context  
Context **configure filter ip-filter string subscriber-mgmt shared-entry filter-rule**  
Tree [filter-rule](#)  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## range

Synopsis Enable the **range** context  
Context **configure filter ip-filter string subscriber-mgmt shared-entry filter-rule range**  
Tree [range](#)  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## end number

Synopsis Upper bound of range for inserting shared host rules  
Context **configure filter ip-filter string subscriber-mgmt shared-entry filter-rule range end number**  
Tree [end](#)  
Range 1 to 2097151  
Notes This element is mandatory.  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **start number**

Synopsis	Lower bound of range for inserting shared host rules
Context	<b>configure filter ip-filter string subscriber-mgmt shared-entry filter-rule range start number</b>
Tree	<a href="#">start</a>
Range	1 to 2097151
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **pcc-rule**

Synopsis	Enter the <b>pcc-rule</b> context
Context	<b>configure filter ip-filter string subscriber-mgmt shared-entry pcc-rule</b>
Tree	<a href="#">pcc-rule</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **range**

Synopsis	Enable the <b>range</b> context
Context	<b>configure filter ip-filter string subscriber-mgmt shared-entry pcc-rule range</b>
Tree	<a href="#">range</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **end number**

Synopsis	Upper bound of the range for PCC rule filter entries
Context	<b>configure filter ip-filter string subscriber-mgmt shared-entry pcc-rule range end number</b>
Tree	<a href="#">end</a>
Range	1 to 2097151
Notes	This element is mandatory.
Introduced	16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **start number**

Synopsis Lower bound of the range for PCC rule filter entries

Context **configure filter ip-filter string subscriber-mgmt shared-entry pcc-rule range start number**

Tree [start](#)

Range 1 to 2097151

Notes This element is mandatory.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **watermark**

Synopsis Enable the **watermark** context

Context **configure filter ip-filter string subscriber-mgmt shared-entry watermark**

Tree [watermark](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **high number**

Synopsis Limit of RADIUS shared filters before generating high watermark notification

Context **configure filter ip-filter string subscriber-mgmt shared-entry watermark high number**

Tree [high](#)

Range 1 to 8000

Notes This element is mandatory.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **low number**

Synopsis Limit of RADIUS or Diameter shared filters before clearing high watermark notification

Context **configure filter ip-filter string subscriber-mgmt shared-entry watermark low number**

Tree [low](#)

Range	0 to 7999
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**type** *keyword*

Synopsis	Set of match criteria for the filter policy
Context	<b>configure</b> filter ip-filter <i>string</i> <b>type</b> <i>keyword</i>
Tree	<a href="#">type</a>
Description	This command configures the filter policy type that defines the list of match criteria supported in a filter policy.
Options	normal, src-mac, packet-length, destination-class
Default	normal
Introduced	19.5.R1
Platforms	All

**ipv6-exception** [[filter-name](#)] *string*

Synopsis	Enter the <b>ipv6-exception</b> list instance
Context	<b>configure</b> filter ipv6-exception <i>string</i>
Tree	<a href="#">ipv6-exception</a>
Introduced	20.10.R1
Platforms	VSR

**[filter-name]** *string*

Synopsis	Filter name
Context	<b>configure</b> filter ipv6-exception <i>string</i>
Tree	<a href="#">ipv6-exception</a>
String Length	1 to 64
Notes	This element is part of a list key.
Introduced	20.10.R1
Platforms	VSR

**description string**

Synopsis	Text description
Context	<b>configure filter ipv6-exception string description string</b>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	20.10.R1
Platforms	VSR

**entry [entry-id] number**

Synopsis	Enter the <b>entry</b> list instance
Context	<b>configure filter ipv6-exception string entry number</b>
Tree	<a href="#">entry</a>
Introduced	20.10.R1
Platforms	VSR

**[entry-id] number**

Synopsis	ID for a match criteria and the corresponding action
Context	<b>configure filter ipv6-exception string entry number</b>
Tree	<a href="#">entry</a>
Range	1 to 2097151
Notes	This element is part of a list key.
Introduced	20.10.R1
Platforms	VSR

**description string**

Synopsis	Text description
Context	<b>configure filter ipv6-exception string entry number description string</b>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	20.10.R1
Platforms	VSR

## match

Synopsis	Enter the <b>match</b> context
Context	<b>configure filter ipv6-exception</b> <i>string entry number match</i>
Tree	<a href="#">match</a>
Introduced	20.10.R1
Platforms	VSR

## dst-ip

Synopsis	Enter the <b>dst-ip</b> context
Context	<b>configure filter ipv6-exception</b> <i>string entry number match dst-ip</i>
Tree	<a href="#">dst-ip</a>
Introduced	20.10.R1
Platforms	VSR

## address (*ipv6-prefix-with-host-bits* | *ipv6-address*)

Synopsis	IPv6 address used as the match criterion
Context	<b>configure filter ipv6-exception</b> <i>string entry number match dst-ip address</i> ( <i>ipv6-prefix-with-host-bits</i>   <i>ipv6-address</i> )
Tree	<a href="#">address</a>
Notes	The following elements are part of a choice: ( <b>address</b> and <b>mask</b> ) or <b>ipv6-prefix-list</b> .
Introduced	20.10.R1
Platforms	VSR

## ipv6-prefix-list *reference*

Synopsis	IPv6 address prefix list used as match criterion
Context	<b>configure filter ipv6-exception</b> <i>string entry number match dst-ip ipv6-prefix-list reference</i>
Tree	<a href="#">ipv6-prefix-list</a>
Reference	<b>configure filter match-list ipv6-prefix-list</b> <i>string</i>
Notes	The following elements are part of a choice: ( <b>address</b> and <b>mask</b> ) or <b>ipv6-prefix-list</b> .
Introduced	20.10.R1
Platforms	VSR

### **mask string**

Synopsis	IPv6 address mask used as the match criterion
Context	<b>configure filter ipv6-exception string entry number match dst-ip mask string</b>
Tree	<a href="#">mask</a>
Notes	The following elements are part of a choice: ( <b>address</b> and <b>mask</b> ) or <b>ipv6-prefix-list</b> .
Introduced	20.10.R1
Platforms	VSR

### **dst-port**

Synopsis	Enter the <b>dst-port</b> context
Context	<b>configure filter ipv6-exception string entry number match dst-port</b>
Tree	<a href="#">dst-port</a>
Description	Commands in this context configure match criteria for the destination port.
Notes	The following elements are part of a choice: <b>port</b> or ( <b>dst-port</b> and <b>src-port</b> ).
Introduced	20.10.R1
Platforms	VSR

### **eq number**

Synopsis	Exact value as the match criterion
Context	<b>configure filter ipv6-exception string entry number match dst-port eq number</b>
Tree	<a href="#">eq</a>
Range	0 to 65535
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , <b>port-list</b> , or <b>range</b> .
Introduced	20.10.R1
Platforms	VSR

### **gt number**

Synopsis	Greater than value as the match criterion
Context	<b>configure filter ipv6-exception string entry number match dst-port gt number</b>
Tree	<a href="#">gt</a>
Range	0 to 65534

Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , <b>port-list</b> , or <b>range</b> .
Introduced	20.10.R1
Platforms	VSR

### **lt number**

Synopsis	Less than value as the match criterion
Context	<b>configure filter ipv6-exception string entry number match dst-port lt number</b>
Tree	<b>lt</b>
Range	1 to 65535
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , <b>port-list</b> , or <b>range</b> .
Introduced	20.10.R1
Platforms	VSR

### **port-list reference**

Synopsis	Name of the port list as the match criterion
Context	<b>configure filter ipv6-exception string entry number match dst-port port-list reference</b>
Tree	<b>port-list</b>
Reference	<b>configure filter match-list port-list string</b>
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , <b>port-list</b> , or <b>range</b> .
Introduced	20.10.R1
Platforms	VSR

### **range**

Synopsis	Enable the <b>range</b> context
Context	<b>configure filter ipv6-exception string entry number match dst-port range</b>
Tree	<b>range</b>
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , <b>port-list</b> , or <b>range</b> .
Introduced	20.10.R1
Platforms	VSR

### **end number**

Synopsis	Upper bound of the port range
Context	<b>configure filter ipv6-exception</b> <i>string entry number match dst-port range end number</i>
Tree	<a href="#">end</a>
Range	1 to 65535
Notes	This element is mandatory.
Introduced	20.10.R1
Platforms	VSR

### **start number**

Synopsis	Lower bound of the port range
Context	<b>configure filter ipv6-exception</b> <i>string entry number match dst-port range start number</i>
Tree	<a href="#">start</a>
Range	0 to 65534
Notes	This element is mandatory.
Introduced	20.10.R1
Platforms	VSR

### **icmp**

Synopsis	Enter the <b>icmp</b> context
Context	<b>configure filter ipv6-exception</b> <i>string entry number match icmp</i>
Tree	<a href="#">icmp</a>
Introduced	20.10.R1
Platforms	VSR

### **code number**

Synopsis	ICMPv6 code value to match
Context	<b>configure filter ipv6-exception</b> <i>string entry number match icmp code number</i>
Tree	<a href="#">code</a>
Range	0 to 255
Introduced	20.10.R1

Platforms VSR

### **type** *number*

Synopsis ICMPv6 type value to match  
 Context **configure filter ipv6-exception** *string entry number match icmp type number*  
 Tree [type](#)  
 Range 0 to 255  
 Introduced 20.10.R1  
 Platforms VSR

### **next-header** (*number* | *keyword*)

Synopsis IP protocol to match  
 Context **configure filter ipv6-exception** *string entry number match next-header* (*number* | *keyword*)  
 Tree [next-header](#)  
 Range 0 to 255  
 Options tcp-udp, icmp, igmp, ip, tcp, egp, igp, udp, rdp, ipv6, ipv6-route, ipv6-frag, idrp, rsvp, gre, ipv6-icmp, ipv6-no-nxt, ipv6-opts, iso-ip, eigrp, ospf-igp, ether-ip, encap, pnni, pim, vrrp, l2tp, stp, ptp, isis, crtp, crudp, sctp  
 Introduced 20.10.R1  
 Platforms VSR

### **port**

Synopsis Enter the **port** context  
 Context **configure filter ipv6-exception** *string entry number match port*  
 Tree [port](#)  
 Notes The following elements are part of a choice: **port** or (**dst-port** and **src-port**).  
 Introduced 20.10.R1  
 Platforms VSR

### **eq** *number*

Synopsis Exact value as the match criterion

Context	<b>configure filter ipv6-exception</b> <i>string</i> <b>entry</b> <i>number</i> <b>match port eq</b> <i>number</i>
Tree	<b>eq</b>
Range	0 to 65535
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , <b>port-list</b> , or <b>range</b> .
Introduced	20.10.R1
Platforms	VSR

### **gt** *number*

Synopsis	Greater than value as the match criterion
Context	<b>configure filter ipv6-exception</b> <i>string</i> <b>entry</b> <i>number</i> <b>match port gt</b> <i>number</i>
Tree	<b>gt</b>
Range	0 to 65534
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , <b>port-list</b> , or <b>range</b> .
Introduced	20.10.R1
Platforms	VSR

### **lt** *number*

Synopsis	Less than value as the match criterion
Context	<b>configure filter ipv6-exception</b> <i>string</i> <b>entry</b> <i>number</i> <b>match port lt</b> <i>number</i>
Tree	<b>lt</b>
Range	1 to 65535
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , <b>port-list</b> , or <b>range</b> .
Introduced	20.10.R1
Platforms	VSR

### **port-list** *reference*

Synopsis	Name of the port list as the match criterion
Context	<b>configure filter ipv6-exception</b> <i>string</i> <b>entry</b> <i>number</i> <b>match port port-list</b> <i>reference</i>
Tree	<b>port-list</b>
Reference	<b>configure filter match-list port-list</b> <i>string</i>
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , <b>port-list</b> , or <b>range</b> .

Introduced	20.10.R1
Platforms	VSR

## range

Synopsis	Enable the <b>range</b> context
Context	<b>configure filter ipv6-exception</b> <i>string entry number match port range</i>
Tree	<a href="#">range</a>
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , <b>port-list</b> , or <b>range</b> .
Introduced	20.10.R1
Platforms	VSR

## end number

Synopsis	Upper bound of the port range
Context	<b>configure filter ipv6-exception</b> <i>string entry number match port range end number</i>
Tree	<a href="#">end</a>
Range	1 to 65535
Notes	This element is mandatory.
Introduced	20.10.R1
Platforms	VSR

## start number

Synopsis	Lower bound of the port range
Context	<b>configure filter ipv6-exception</b> <i>string entry number match port range start number</i>
Tree	<a href="#">start</a>
Range	0 to 65534
Notes	This element is mandatory.
