### 3.45.1 subscriber-mgmt command descriptions

#### subscriber-mgmt

Synopsis	Enter the <b>subscriber-mgmt</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a>
Tree	<a href="#">subscriber-mgmt</a>
Description	Commands in this context configure subscriber management attributes, policies, and profiles.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

#### accu-stats-policy [\[name\]](#) *string*

Synopsis	Enter the <b>accu-stats-policy</b> list instance
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">accu-stats-policy</a> <i>string</i>
Tree	<a href="#">accu-stats-policy</a>
Description	<p>Commands in this context configure a storage policy for cumulative statistics for subscribers.</p> <p>The policy defines the direction for the policer or the queue to be stored.</p> <p>The policy stores subscriber statistics even if the subscriber session has ended. The subscriber statistics can be viewed even if the subscriber is offline.</p> <p>When the subscriber session ends, the statistics are added to the past statistics stored in memory so that all previous session statistics are accumulated. The accumulated statistics are not persistent; they are only stored in memory and reset to zero when the chassis reboots.</p>
Max. Instances	32
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

#### [\[name\]](#) *string*

Synopsis	Policy name
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">accu-stats-policy</a> <i>string</i>

String Length	1 to 80
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **egress** [[type](#)] *keyword id number*

Synopsis	Add a list entry for <b>egress</b>
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">accu-stats-policy</a> <i>string</i> <a href="#">egress</a> <i>keyword id number</i>
Tree	<a href="#">egress</a>
Max. Instances	4
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **[type]** *keyword*

Synopsis	Type
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">accu-stats-policy</a> <i>string</i> <a href="#">egress</a> <i>keyword id number</i>
Tree	<a href="#">egress</a>
Options	queue, policer
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**id number**

Synopsis	Queue or policer ID
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">accu-stats-policy</a> <i>string</i> <a href="#">egress</a> <i>keyword</i> <i>id number</i>
Tree	<a href="#">egress</a>
Range	1 to 63
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**ingress** [[type](#)] *keyword* *id number*

Synopsis	Add a list entry for <b>ingress</b>
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">accu-stats-policy</a> <i>string</i> <a href="#">ingress</a> <i>keyword</i> <i>id number</i>
Tree	<a href="#">ingress</a>
Max. Instances	4
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**[type]** *keyword*

Synopsis	Type
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">accu-stats-policy</a> <i>string</i> <a href="#">ingress</a> <i>keyword</i> <i>id number</i>
Tree	<a href="#">ingress</a>
Options	queue, policer
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**id number**

Synopsis	Queue or policer ID
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">accu-stats-policy</a> <i>string</i> <a href="#">ingress</a> <i>keyword</i> <i>id number</i>
Tree	<a href="#">ingress</a>
Range	1 to 63

Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## ancp

Synopsis	Enter the <b>ancp</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt ancp</a>
Tree	<a href="#">ancp</a>
Description	Commands in this context configure Access Node Control Protocol (ANCP) settings.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## ancp-policy [[name](#)] *string*

Synopsis	Enter the <b>ancp-policy</b> list instance
Context	<b>configure</b> <a href="#">subscriber-mgmt ancp ancp-policy</a> <i>string</i>
Tree	<a href="#">ancp-policy</a>
Description	<p>Commands in this context configure the specified ANCP policy, which can be associated with either an ANCP string (static) or a subscriber-profile (dynamic), and define the behavior of hosts belonging to these profiles.</p> <p>ANCP policies control rates and subscribers based on port-up/port-down messages from the access node. When configured, the node stops SHCV to a host that is part of a port that is down (by port-down message). When a port-up message is received for the port that was down, the node initiates the SHCV process immediately to verify connectivity.</p> <p>When ANCP is used with ESM, all hosts of a subscriber are updated with the ANCP string last associated with the subscriber.</p>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## [[name](#)] *string*

Synopsis	Policy name
Context	<b>configure</b> <a href="#">subscriber-mgmt ancp ancp-policy</a> <i>string</i>
Tree	<a href="#">ancp-policy</a>
String Length	1 to 32

Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## egress

Synopsis	Enter the <b>egress</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt ancp ancp-policy</a> <i>string</i> <a href="#">egress</a>
Tree	<a href="#">egress</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## rate-adjustment *number*

Synopsis	Rate adjustment for the scheduler
Context	<b>configure</b> <a href="#">subscriber-mgmt ancp ancp-policy</a> <i>string</i> <a href="#">egress rate-adjustment</a> <i>number</i>
Tree	<a href="#">rate-adjustment</a>
Description	This command configures the rate adjustment for the scheduler. This setting is used when the rate returned by the DSLAM is calculated with a different encapsulation than the SR node. The node adjusts the rate by the percentage specified as:  $\text{DSLAM\_RATE} * (\text{adjustment rate})/100 - (\text{rate reduction})$
Range	1 to 200
Units	percent
Default	100
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## rate-modify

Synopsis	Enter the <b>rate-modify</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt ancp ancp-policy</a> <i>string</i> <a href="#">egress rate-modify</a>
Tree	<a href="#">rate-modify</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**agg-rate**

Synopsis	Maximum total rate for all subscriber egress queues
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ancp</a> <a href="#">ancp-policy</a> <i>string</i> <a href="#">egress</a> <a href="#">rate-modify</a> <a href="#">agg-rate</a>
Tree	<a href="#">agg-rate</a>
Description	This command specifies the maximum total rate for all subscriber egress queues for each subscriber associated with the policy.
Notes	The following elements are part of a choice: <b>agg-rate</b> or <b>scheduler</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**scheduler** *string*

Synopsis	Scheduler to be applied for rate modification
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ancp</a> <a href="#">ancp-policy</a> <i>string</i> <a href="#">egress</a> <a href="#">rate-modify</a> <a href="#">scheduler</a> <i>string</i>
Tree	<a href="#">scheduler</a>
String Length	1 to 32
Notes	The following elements are part of a choice: <b>agg-rate</b> or <b>scheduler</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**rate-monitor**

Synopsis	Enter the <b>rate-monitor</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ancp</a> <a href="#">ancp-policy</a> <i>string</i> <a href="#">egress</a> <a href="#">rate-monitor</a>
Tree	<a href="#">rate-monitor</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**alarm** *boolean*

Synopsis	Generate SNMP notification when monitor event is raised
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ancp</a> <a href="#">ancp-policy</a> <i>string</i> <a href="#">egress</a> <a href="#">rate-monitor</a> <a href="#">alarm</a> <i>boolean</i>
Tree	<a href="#">alarm</a>
Description	When configured to <b>true</b> , the system generates an alarm (trap) to the management system including the rate, the ANCP policy name, and the ANCP string when the monitored rate is below the configured rate.

When configured to **false**, no alarm is generated.

Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **rate number**

Synopsis	Rate below which the system generates an event
Context	<b>configure</b> <a href="#">subscriber-mgmt ancp ancp-policy</a> <i>string</i> <a href="#">egress rate-monitor rate number</a>
Tree	<a href="#">rate</a>
Range	1 to 4294967295
Units	kilobps
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **rate-reduction number**

Synopsis	Constant rate reduction to specified DSLAM rate
Context	<b>configure</b> <a href="#">subscriber-mgmt ancp ancp-policy</a> <i>string</i> <a href="#">egress rate-reduction number</a>
Tree	<a href="#">rate-reduction</a>
Description	This command configures a constant rate reduction to the rate specified by the DSLAM. This setting is used if the node must adjust the rate to a value that is offset (for example by a fixed multicast dedicated bandwidth) compared to the total available on the DSLAM. The rate is calculated as:  $\text{DSLAM\_RATE} * (\text{adjustment rate})/100 - (\text{rate reduction})$
Range	1 to 4294967295
Units	kilobps
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **ingress**

Synopsis	Enter the <b>ingress</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt ancp ancp-policy</a> <i>string</i> <a href="#">ingress</a>
Tree	<a href="#">ingress</a>
Introduced	16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **rate-adjustment** *number*

Synopsis Rate adjustment for the scheduler

Context **configure** [subscriber-mgmt](#) [ancp](#) [ancp-policy](#) *string* [ingress](#) **rate-adjustment** *number*

Tree [rate-adjustment](#)

Description This command configures the rate adjustment for the scheduler. This setting is used when the rate returned by the DSLAM is calculated with a different encapsulation than the SR node. The node adjusts the rate by the percentage specified as:  
$$\text{DSLAM\_RATE} * (\text{adjustment rate})/100 \text{ — (rate reduction)}$$

Range 1 to 200

Units percent

Default 100

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **rate-modify**

Synopsis Enter the **rate-modify** context

Context **configure** [subscriber-mgmt](#) [ancp](#) [ancp-policy](#) *string* [ingress](#) **rate-modify**

Tree [rate-modify](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **scheduler** *string*

Synopsis Scheduler to be applied for rate modification

Context **configure** [subscriber-mgmt](#) [ancp](#) [ancp-policy](#) *string* [ingress](#) **rate-modify** **scheduler** *string*

Tree [scheduler](#)

String Length 1 to 32

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**rate-monitor**

Synopsis	Enter the <b>rate-monitor</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ancp</a> <a href="#">ancp-policy</a> <i>string</i> <a href="#">ingress</a> <a href="#">rate-monitor</a>
Tree	<a href="#">rate-monitor</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**alarm** *boolean*

Synopsis	Generate SNMP notification when monitor event is raised
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ancp</a> <a href="#">ancp-policy</a> <i>string</i> <a href="#">ingress</a> <a href="#">rate-monitor</a> <a href="#">alarm</a> <i>boolean</i>
Tree	<a href="#">alarm</a>
Description	When configured to <b>true</b> , the system generates an alarm (trap) to the management system including the rate, the ANCP policy name, and the ANCP string when the monitored rate is below the configured rate.  When configured to <b>false</b> , no alarm is generated.
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**rate** *number*

Synopsis	Rate below which the system generates an event
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ancp</a> <a href="#">ancp-policy</a> <i>string</i> <a href="#">ingress</a> <a href="#">rate-monitor</a> <a href="#">rate</a> <i>number</i>
Tree	<a href="#">rate</a>
Range	1 to 4294967295
Units	kilobps
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**rate-reduction** *number*

Synopsis	Constant rate reduction to specified DSLAM rate
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ancp</a> <a href="#">ancp-policy</a> <i>string</i> <a href="#">ingress</a> <a href="#">rate-reduction</a> <i>number</i>
Tree	<a href="#">rate-reduction</a>

Description	This command configures a constant rate reduction to the rate specified by the DSLAM. This setting is used if the node must adjust the rate to a value that is offset (for example by a fixed multicast dedicated bandwidth) compared to the total available on the DSLAM. The rate is calculated as: $\text{DSLAM\_RATE} * (\text{adjustment rate})/100 - (\text{rate reduction})$
Range	1 to 4294967295
Units	kilobps
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## port-down

Synopsis	Enter the <b>port-down</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt ancp ancp-policy</a> <i>string</i> <b>port-down</b>
Tree	<a href="#">port-down</a>
Description	Commands in this context configure the actions taken on port-down.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## suspend-shcv

Synopsis	Enable the <b>suspend-shcv</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt ancp ancp-policy</a> <i>string</i> <b>port-down suspend-shcv</b>
Tree	<a href="#">suspend-shcv</a>
Description	Commands in this context specify the configuration to suspend SHCV for the hosts defined with the ANCP policy.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## alarm *boolean*

Synopsis	Send an alarm before suspending SHCV
Context	<b>configure</b> <a href="#">subscriber-mgmt ancp ancp-policy</a> <i>string</i> <b>port-down suspend-shcv alarm</b> <i>boolean</i>
Tree	<a href="#">alarm</a>
Default	false

Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **hold-time** *number*

Synopsis	Time that SHCV is suspended
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ancp</a> <a href="#">ancp-policy</a> <i>string</i> <a href="#">port-down</a> <a href="#">suspend-shcv</a> <b>hold-time</b> <i>number</i>
Tree	<a href="#">hold-time</a>
Description	This command configures the time that the node suspends SHCV. When unconfigured, SHCV is suspended until a port-up message is received.
Range	1 to 7200
Units	seconds
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **ancp-static-map**

Synopsis	Enter the <b>ancp-static-map</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ancp</a> <b>ancp-static-map</b>
Tree	<a href="#">ancp-static-map</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **multi-service-site-entry** [[ancp-string](#)] *string* [customer-name](#) *reference* [customer-site-name](#) *reference*

Synopsis	Enter the <b>multi-service-site-entry</b> list instance
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ancp</a> <a href="#">ancp-static-map</a> <b>multi-service-site-entry</b> <i>string</i> <a href="#">customer-name</a> <i>reference</i> <a href="#">customer-site-name</a> <i>reference</i>
Tree	<a href="#">multi-service-site-entry</a>
Description	Commands in this context configure the ANCP key mapping (usually the circuit ID of the DSLAM port) to a customer, site, and scheduler name when Multi-Service site (MSS) is used.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**[ancp-string]** *string*

Synopsis	ANCP string
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ancp</a> <a href="#">ancp-static-map</a> <a href="#">multi-service-site-entry</a> <i>string</i> <a href="#">customer-name</a> <i>reference</i> <a href="#">customer-site-name</a> <i>reference</i>
Tree	<a href="#">multi-service-site-entry</a>
String Length	1 to 63
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**customer-name** *reference*

Synopsis	Customer ID
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ancp</a> <a href="#">ancp-static-map</a> <a href="#">multi-service-site-entry</a> <i>string</i> <a href="#">customer-name</a> <i>reference</i> <a href="#">customer-site-name</a> <i>reference</i>
Tree	<a href="#">multi-service-site-entry</a>
Reference	<b>configure</b> <a href="#">service</a> <a href="#">customer</a> <i>string</i>
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**customer-site-name** *reference*

Synopsis	Service customer multi-service site name
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ancp</a> <a href="#">ancp-static-map</a> <a href="#">multi-service-site-entry</a> <i>string</i> <a href="#">customer-name</a> <i>reference</i> <a href="#">customer-site-name</a> <i>reference</i>
Tree	<a href="#">multi-service-site-entry</a>
Reference	<b>configure</b> <a href="#">service</a> <a href="#">customer</a> <i>string</i> <a href="#">multi-service-site</a> <i>string</i>
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**ancp-policy** *reference*

Synopsis	ANCP policy name
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ancp</a> <a href="#">ancp-static-map</a> <a href="#">multi-service-site-entry</a> <i>string</i> <a href="#">customer-name</a> <i>reference</i> <a href="#">customer-site-name</a> <i>reference</i> <a href="#">ancp-policy</a> <i>reference</i>
Tree	<a href="#">ancp-policy</a>
Reference	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ancp</a> <a href="#">ancp-policy</a> <i>string</i>
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**sap-entry** [[ancp-string](#)] *string* [sap-id](#) *string*

Synopsis	Enter the <b>sap-entry</b> list instance
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ancp</a> <a href="#">ancp-static-map</a> <a href="#">sap-entry</a> <i>string</i> <a href="#">sap-id</a> <i>string</i>
Tree	<a href="#">sap-entry</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**[ancp-string]** *string*

Synopsis	ANCP key name
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ancp</a> <a href="#">ancp-static-map</a> <a href="#">sap-entry</a> <i>string</i> <a href="#">sap-id</a> <i>string</i>
Tree	<a href="#">sap-entry</a>
String Length	1 to 63
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**sap-id** *string*

Synopsis	SAP ID
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ancp</a> <a href="#">ancp-static-map</a> <a href="#">sap-entry</a> <i>string</i> <a href="#">sap-id</a> <i>string</i>
Tree	<a href="#">sap-entry</a>
String Length	1 to 45
Notes	This element is part of a list key.

Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **ancp-policy** *reference*

Synopsis ANCP policy name  
Context **configure** [subscriber-mgmt ancp ancp-static-map sap-entry string sap-id string ancp-policy reference](#)  
Tree [ancp-policy](#)  
Reference **configure** [subscriber-mgmt ancp ancp-policy string](#)  
Notes This element is mandatory.  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **authentication-origin**

Synopsis Enter the **authentication-origin** context  
Context **configure** [subscriber-mgmt authentication-origin](#)  
Tree [authentication-origin](#)  
Introduced 21.2.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **overrides**

Synopsis Enter the **overrides** context  
Context **configure** [subscriber-mgmt authentication-origin overrides](#)  
Tree [overrides](#)  
Introduced 21.2.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **priority** [*id*] *number*

Synopsis Enter the **priority** list instance  
Context **configure** [subscriber-mgmt authentication-origin overrides priority number](#)  
Tree [priority](#)

Description	Commands in this context arrange the relative order of authentication priorities.
Introduced	21.2.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**[id] number**

Synopsis	Authentication origin priority override
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">authentication-origin overrides</a> <a href="#">priority</a> <i>number</i>
Tree	<a href="#">priority</a>
Description	This command configures the insert position of the authentication origin priority override.
Range	1 to 4294967295
Notes	This element is part of a list key.
Introduced	21.2.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**source keyword**

Synopsis	Source of authentication priority
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">authentication-origin overrides</a> <a href="#">priority</a> <i>number</i> <a href="#">source</a> <i>keyword</i>
Tree	<a href="#">source</a>
Description	This command specifies the prioritization of authentication sources.
Options	python, diameter-gx, ludb, radius, diameter-nasreq, gtp, dhcp, local-address-assignment, pfc, config
Notes	This element is mandatory.
Introduced	21.2.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**auto-sub-id**

Synopsis	Enter the <b>auto-sub-id</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">auto-sub-id</a>
Tree	<a href="#">auto-sub-id</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **implicit-generation** *boolean*

Synopsis	Generate implicitly a subscriber ID when not provided
Context	<b>configure</b> <a href="#">subscriber-mgmt auto-sub-id implicit-generation</a> <i>boolean</i>
Tree	<a href="#">implicit-generation</a>
Default	true
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **ipoe-key** *keyword*

Synopsis	Auto-generated subscriber ID key1 for IPoE hosts
Context	<b>configure</b> <a href="#">subscriber-mgmt auto-sub-id ipoe-key</a> <i>keyword</i>
Tree	<a href="#">ipoe-key</a>
Options	mac, sap-id, circuit-id, remote-id, dual-stack-remote-id, service-name
Max. Instances	4
Notes	This element is ordered by the user.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **ppp-key** *keyword*

Synopsis	Auto-generated subscriber identifier key1 for PPP hosts
Context	<b>configure</b> <a href="#">subscriber-mgmt auto-sub-id ppp-key</a> <i>keyword</i>
Tree	<a href="#">ppp-key</a>
Options	mac, sap-id, circuit-id, remote-id, session-id
Max. Instances	5
Notes	This element is ordered by the user.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**bgp-peering-policy** [*name*] *string*

Synopsis	Enter the <b>bgp-peering-policy</b> list instance
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">bgp-peering-policy</a> <i>string</i>
Tree	<a href="#">bgp-peering-policy</a>
Max. Instances	255
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**[name]** *string*

Synopsis	BGP peer policy name
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">bgp-peering-policy</a> <i>string</i>
Tree	<a href="#">bgp-peering-policy</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**advertise-inactive** *boolean*

Synopsis	Advertise inactive BGP routes to other BGP peers
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">bgp-peering-policy</a> <i>string</i> <a href="#">advertise-inactive</a> <i>boolean</i>
Tree	<a href="#">advertise-inactive</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**aggregator-id-zero** *boolean*

Synopsis	Add router ID to BGP aggregator path attribute
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">bgp-peering-policy</a> <i>string</i> <a href="#">aggregator-id-zero</a> <i>boolean</i>
Tree	<a href="#">aggregator-id-zero</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**as-override** *boolean*

Synopsis	Replace the peer ASN with the local ASN in AS Path
Context	<b>configure</b> <a href="#">subscriber-mgmt bgp-peering-policy</a> <i>string</i> <b>as-override</b> <i>boolean</i>
Tree	<a href="#">as-override</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**asn-4-byte** *boolean*

Synopsis	Enable the use of 4-byte ASNs
Context	<b>configure</b> <a href="#">subscriber-mgmt bgp-peering-policy</a> <i>string</i> <b>asn-4-byte</b> <i>boolean</i>
Tree	<a href="#">asn-4-byte</a>
Introduced	16.0.R3
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**authentication-key** *string*

Synopsis	BGP authentication key for all peers
Context	<b>configure</b> <a href="#">subscriber-mgmt bgp-peering-policy</a> <i>string</i> <b>authentication-key</b> <i>string</i>
Tree	<a href="#">authentication-key</a>
String Length	1 to 370
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**authentication-keychain** *reference*

Synopsis	Keychain name used for the TCP session
Context	<b>configure</b> <a href="#">subscriber-mgmt bgp-peering-policy</a> <i>string</i> <b>authentication-keychain</b> <i>reference</i>
Tree	<a href="#">authentication-keychain</a>
Reference	<b>configure</b> <a href="#">system security keychains</a> <b>keychain</b> <i>string</i>
Introduced	16.0.R3
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**bfd-liveness** *boolean*

Synopsis	Enable BFD
Context	<b>configure</b> <a href="#">subscriber-mgmt bgp-peering-policy</a> <i>string</i> <a href="#">bfd-liveness</a> <i>boolean</i>
Tree	<a href="#">bfd-liveness</a>
Description	<p>When configured to <b>true</b>, this command enables the use of Bi-directional Forwarding Detection (BFD) to control the state of an ESM dynamic BGP peer that is set up with the BGP peering policy. The parameters used for the BFD session are configured in the BFD context of the group interface or retail subscriber interface.</p> <p>When configured to <b>false</b>, this command disables the use of BFD for new ESM dynamic BGP peers that are set up with the BGP peering policy.</p>
Default	false
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**client-reflect** *boolean*

Synopsis	Enable client reflection of routes to all client peers
Context	<b>configure</b> <a href="#">subscriber-mgmt bgp-peering-policy</a> <i>string</i> <a href="#">client-reflect</a> <i>boolean</i>
Tree	<a href="#">client-reflect</a>
Introduced	16.0.R3
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**cluster** *string*

Synopsis	Cluster ID for route reflector server
Context	<b>configure</b> <a href="#">subscriber-mgmt bgp-peering-policy</a> <i>string</i> <a href="#">cluster</a> <i>string</i>
Tree	<a href="#">cluster</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**connect-retry** *number*

Synopsis	BGP connect retry timer value
Context	<b>configure</b> <a href="#">subscriber-mgmt bgp-peering-policy</a> <i>string</i> <a href="#">connect-retry</a> <i>number</i>
Tree	<a href="#">connect-retry</a>
Range	1 to 65535

Units	seconds
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**damping** *boolean*

Synopsis	Use BGP route damping for learned routes
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">bgp-peering-policy</a> <i>string</i> <b>damping</b> <i>boolean</i>
Tree	<a href="#">damping</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">bgp-peering-policy</a> <i>string</i> <b>description</b> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**export** *reference*

Synopsis	Export route policies to control advertised routes
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">bgp-peering-policy</a> <i>string</i> <b>export</b> <i>reference</i>
Tree	<a href="#">export</a>
Reference	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i>
Max. Instances	15
Notes	This element is ordered by the user.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## family

Synopsis	Enter the <b>family</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">bgp-peering-policy</a> <i>string</i> <b>family</b>
Tree	<a href="#">family</a>
Description	Commands in this context specify the BGP address families supported by the ESM dynamic BGP peers. When no address family is configured, the IPv4 address family is supported on BGPv4 peers and the IPv6 address family is supported on BGPv6 peers.
Introduced	23.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## ipv4 *boolean*

Synopsis	Advertise MP-BGP support for the IPv4 address family
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">bgp-peering-policy</a> <i>string</i> <b>family</b> <a href="#">ipv4</a> <i>boolean</i>
Tree	<a href="#">ipv4</a>
Default	false
Introduced	23.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## ipv6 *boolean*

Synopsis	Advertise MP-BGP support for the IPv6 address family
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">bgp-peering-policy</a> <i>string</i> <b>family</b> <a href="#">ipv6</a> <i>boolean</i>
Tree	<a href="#">ipv6</a>
Default	false
Introduced	23.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## fast-external-failover *boolean*

Synopsis	Enable/disable BGP fast external failover.
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">bgp-peering-policy</a> <i>string</i> <b>fast-external-failover</b> <i>boolean</i>
Tree	<a href="#">fast-external-failover</a>
Introduced	16.0.R3
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **hold-time** *number*

Synopsis	BGP hold time before closing connection
Context	<b>configure</b> <b>subscriber-mgmt</b> <b>bgp-peering-policy</b> <i>string</i> <b>hold-time</b> <i>number</i>
Tree	<b>hold-time</b>
Range	0   3 to 65535
Units	seconds
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **import** *reference*

Synopsis	Import route policies to control advertised routes
Context	<b>configure</b> <b>subscriber-mgmt</b> <b>bgp-peering-policy</b> <i>string</i> <b>import</b> <i>reference</i>
Tree	<b>import</b>
Reference	<b>configure</b> <b>policy-options</b> <b>policy-statement</b> <i>string</i>
Max. Instances	15
Notes	This element is ordered by the user.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **keepalive** *number*

Synopsis	BGP keepalive timer
Context	<b>configure</b> <b>subscriber-mgmt</b> <b>bgp-peering-policy</b> <i>string</i> <b>keepalive</b> <i>number</i>
Tree	<b>keepalive</b>
Range	0 to 21845
Units	seconds
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **local-address** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	Local IP address used when communicating with BGP peers
----------	---

Context	<b>configure subscriber-mgmt bgp-peering-policy</b> <i>string</i> <b>local-address</b> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> )
Tree	<b>local-address</b>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## local-as

Synopsis	Enter the <b>local-as</b> context
Context	<b>configure subscriber-mgmt bgp-peering-policy</b> <i>string</i> <b>local-as</b>
Tree	<b>local-as</b>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## as-number *number*

Synopsis	AS number to be advertised to peer
Context	<b>configure subscriber-mgmt bgp-peering-policy</b> <i>string</i> <b>local-as as-number</b> <i>number</i>
Tree	<b>as-number</b>
Range	1 to 4294967295
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## private *boolean*

Synopsis	Hide local AS number in paths learned from peering
Context	<b>configure subscriber-mgmt bgp-peering-policy</b> <i>string</i> <b>local-as private</b> <i>boolean</i>
Tree	<b>private</b>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## local-preference *number*

Synopsis	Local preference for incoming routes if not specified
Context	<b>configure subscriber-mgmt bgp-peering-policy</b> <i>string</i> <b>local-preference</b> <i>number</i>

---

Tree	<a href="#">local-preference</a>
Range	0 to 4294967295
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **loop-detect** *keyword*

Synopsis	Strategy for loop detection in the AS path
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">bgp-peering-policy</a> <i>string</i> <a href="#">loop-detect</a> <i>keyword</i>
Tree	<a href="#">loop-detect</a>
Options	drop-peer, ignore-loop, off, discard-route
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **med-out** (*number* | *keyword*)

Synopsis	Multi-Exit Discriminator (MED) advertising
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">bgp-peering-policy</a> <i>string</i> <a href="#">med-out</a> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">med-out</a>
Max. Range	0 to 4294967295
Options	igp-cost
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **min-route-advertisement** *number*

Synopsis	Minimum interval for prefix to be advertised to a peer
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">bgp-peering-policy</a> <i>string</i> <a href="#">min-route-advertisement</a> <i>number</i>
Tree	<a href="#">min-route-advertisement</a>
Range	1 to 255
Units	seconds
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**multihop** *number*

Synopsis	TTL value entered in IP header of packets sent to peer
Context	<b>configure</b> <b>subscriber-mgmt</b> <b>bgp-peering-policy</b> <i>string</i> <b>multihop</b> <i>number</i>
Tree	<b>multihop</b>
Range	1 to 255
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**next-hop-self** *boolean*

Synopsis	Set net hop path attribute to self when advertising
Context	<b>configure</b> <b>subscriber-mgmt</b> <b>bgp-peering-policy</b> <i>string</i> <b>next-hop-self</b> <i>boolean</i>
Tree	<b>next-hop-self</b>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**passive** *boolean*

Synopsis	Wait passively for BGP peer to connect
Context	<b>configure</b> <b>subscriber-mgmt</b> <b>bgp-peering-policy</b> <i>string</i> <b>passive</b> <i>boolean</i>
Tree	<b>passive</b>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**peer-as** *number*

Synopsis	AS number for remote peer
Context	<b>configure</b> <b>subscriber-mgmt</b> <b>bgp-peering-policy</b> <i>string</i> <b>peer-as</b> <i>number</i>
Tree	<b>peer-as</b>
Range	1 to 4294967295
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**preference** *number*

Synopsis	Route preference for routes learned via configured peer
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">bgp-peering-policy</a> <i>string</i> <a href="#">preference</a> <i>number</i>
Tree	<a href="#">preference</a>
Range	1 to 255
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**prefix-limits** [[family](#)] *keyword*

Synopsis	Enter the <b>prefix-limits</b> list instance
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">bgp-peering-policy</a> <i>string</i> <a href="#">prefix-limits</a> <i>keyword</i>
Tree	<a href="#">prefix-limits</a>
Description	Commands in this context limit the number of BGP routes per address family received from a BGP peer and define the actions when crossing the configured maximum.
Introduced	23.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**[family]** *keyword*

Synopsis	Address family to which the limit applies
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">bgp-peering-policy</a> <i>string</i> <a href="#">prefix-limits</a> <i>keyword</i>
Tree	<a href="#">prefix-limits</a>
Options	ipv4, ipv6
Notes	This element is part of a list key.
Introduced	23.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**idle-timeout** *number*

Synopsis	Time BGP peering remains idle before reconnecting
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">bgp-peering-policy</a> <i>string</i> <a href="#">prefix-limits</a> <i>keyword</i> <a href="#">idle-timeout</a> <i>number</i>
Tree	<a href="#">idle-timeout</a>
Description	This command configures the time in minutes before a BGP peer is automatically re-established after reaching the prefix limit.

When unconfigured, the BGP peer stays down until the operator performs a reset. This command and **log-only** cannot be configured simultaneously.

Range	1 to 1024
Introduced	23.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **log-only** *boolean*

Synopsis	Send warning message at threshold instead of take-down
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">bgp-peering-policy</a> <i>string</i> <a href="#">prefix-limits</a> <i>keyword</i> <a href="#">log-only</a> <i>boolean</i>
Tree	<a href="#">log-only</a>
Description	<p>When configured to <b>true</b>, the router disables the BGP session from being taken down upon reaching the prefix limit. Instead, only a warning message is sent when the limit is reached. A warning message is also sent when the configured threshold percentage of the limit is reached.</p> <p>This command and <b>idle-timeout</b> cannot be configured simultaneously.</p> <p>When configured to <b>false</b>, the router generates a log event and takes the BGP session down upon reaching the prefix limit.</p>
Default	false
Introduced	23.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **maximum** *number*

Synopsis	Maximum number of routes to be learned from a peer
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">bgp-peering-policy</a> <i>string</i> <a href="#">prefix-limits</a> <i>keyword</i> <a href="#">maximum</a> <i>number</i>
Tree	<a href="#">maximum</a>
Description	<p>This command configures the maximum number of BGP routes of the specified address family that can be received from a peer before administrative action is taken.</p> <p>When <b>log-only</b> is unconfigured, the BGP session is taken down whenever the limit of any family is exceeded even if the limits of the other family has not been exceeded.</p>
Range	1 to 4294967295
Notes	This element is mandatory.
Introduced	23.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **post-import** *boolean*

Synopsis	Apply limit only to routes accepted by import policies
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">bgp-peering-policy</a> <i>string</i> <a href="#">prefix-limits</a> <i>keyword</i> <a href="#">post-import</a> <i>boolean</i>
Tree	<a href="#">post-import</a>
Description	When configured to <b>true</b> , the system limits the number of routes that are accepted by import policies. Routes rejected by import policies are not counted against the configured limit.  When configured to <b>false</b> , the system limits the number of routes to all routes received from the peer.
Default	false
Introduced	23.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **threshold** *number*

Synopsis	Percentage threshold that triggers a warning message
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">bgp-peering-policy</a> <i>string</i> <a href="#">prefix-limits</a> <i>keyword</i> <a href="#">threshold</a> <i>number</i>
Tree	<a href="#">threshold</a>
Range	1 to 100
Default	90
Introduced	23.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **remove-private**

Synopsis	Enable the <b>remove-private</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">bgp-peering-policy</a> <i>string</i> <a href="#">remove-private</a>
Tree	<a href="#">remove-private</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **limited** *boolean*

Synopsis	Remove private AS numbers up to first public ASN encountered
----------	--

Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">bgp-peering-policy</a> <i>string</i> <a href="#">remove-private</a> <a href="#">limited</a> <i>boolean</i>
Tree	<a href="#">limited</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **send-communities**

Synopsis	Enter the <b>send-communities</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">bgp-peering-policy</a> <i>string</i> <a href="#">send-communities</a>
Tree	<a href="#">send-communities</a>
Introduced	16.0.R3
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **extended** *boolean*

Synopsis	Send communities which includes VRF target handling
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">bgp-peering-policy</a> <i>string</i> <a href="#">send-communities</a> <a href="#">extended</a> <i>boolean</i>
Tree	<a href="#">extended</a>
Introduced	16.0.R3
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **standard** *boolean*

Synopsis	Send standard communities that existed before VPRNs
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">bgp-peering-policy</a> <i>string</i> <a href="#">send-communities</a> <a href="#">standard</a> <i>boolean</i>
Tree	<a href="#">standard</a>
Introduced	16.0.R3
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **ttl-security** *number*

Synopsis	Minimum TTL value for incoming BGP packet
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">bgp-peering-policy</a> <i>string</i> <a href="#">ttl-security</a> <i>number</i>

Tree	<a href="#">ttl-security</a>
Range	1 to 255
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**type** *keyword*

Synopsis	Peer type
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">bgp-peering-policy</a> <i>string</i> <a href="#">type</a> <i>keyword</i>
Tree	<a href="#">type</a>
Options	no-type, internal, external
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**category-map** [[category-map-name](#)] *string*

Synopsis	Enter the <b>category-map</b> list instance
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">category-map</a> <i>string</i>
Tree	<a href="#">category-map</a>
Max. Instances	255
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**[category-map-name]** *string*

Synopsis	Category map name
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">category-map</a> <i>string</i>
Tree	<a href="#">category-map</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**activity-threshold** *number*

Synopsis	Threshold to determine whether an activity is ongoing
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <b>activity-threshold</b> <i>number</i>
Tree	<a href="#">activity-threshold</a>
Range	1 to 100000000
Units	kilobps
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**category** [[category-name](#)] *string*

Synopsis	Enter the <b>category</b> list instance
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <b>category</b> <i>string</i>
Tree	<a href="#">category</a>
Max. Instances	16
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**[category-name]** *string*

Synopsis	Category name
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <b>category</b> <i>string</i>
Tree	<a href="#">category</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**credit-type-override** *keyword*

Synopsis	Credit type override in category map
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <b>category</b> <i>string</i> <b>credit-type-override</b> <i>keyword</i>
Tree	<a href="#">credit-type-override</a>

Options	volume, time
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## default-credit

Synopsis	Enter the <b>default-credit</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <b>default-credit</b>
Tree	<a href="#">default-credit</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## time *number*

Synopsis	Default time credit
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <b>default-credit</b> <i>time number</i>
Tree	<a href="#">time</a>
Range	1 to 4294967295
Units	seconds
Notes	The following elements are part of a choice: <b>time</b> or <b>volume</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## volume

Synopsis	Enable the <b>volume</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <b>default-credit</b> <b>volume</b>
Tree	<a href="#">volume</a>
Notes	The following elements are part of a choice: <b>time</b> or <b>volume</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**unit keyword**

Synopsis	Unit for the default volume credit
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map string category string default-credit volume unit keyword</a>
Tree	<a href="#">unit</a>
Options	bytes, kilobytes, megabytes, gigabytes
Default	bytes
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**value number**

Synopsis	Default volume credit
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map string category string default-credit volume value number</a>
Tree	<a href="#">value</a>
Range	1 to 4294967295
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**description string**

Synopsis	Text description
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map string category string description string</a>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**egress**

Synopsis	Enter the <b>egress</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map string category string egress</a>
Tree	<a href="#">egress</a>

---

Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **policer** *number*

Synopsis	Egress policers for this category
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">egress</a> <a href="#">policer</a> <i>number</i>
Tree	<a href="#">policer</a>
Range	1 to 63
Max. Instances	63
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **queue** *number*

Synopsis	Egress queues for this category
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">egress</a> <a href="#">queue</a> <i>number</i>
Tree	<a href="#">queue</a>
Range	1 to 8
Max. Instances	8
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **exhausted-credit-service-level**

Synopsis	Enter the <b>exhausted-credit-service-level</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level</a>
Tree	<a href="#">exhausted-credit-service-level</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## egress

Synopsis	Enter the <b>egress</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level</a> <a href="#">egress</a>
Tree	<a href="#">egress</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## ip-filter

Synopsis	Enter the <b>ip-filter</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level</a> <a href="#">egress</a> <a href="#">ip-filter</a>
Tree	<a href="#">ip-filter</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## entry [*id*] *number*

Synopsis	Enter the <b>entry</b> list instance
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level</a> <a href="#">egress</a> <a href="#">ip-filter</a> <a href="#">entry</a> <i>number</i>
Tree	<a href="#">entry</a>
Max. Instances	10
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## [*id*] *number*

Synopsis	IP filter entry ID
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level</a> <a href="#">egress</a> <a href="#">ip-filter</a> <a href="#">entry</a> <i>number</i>
Tree	<a href="#">entry</a>
Range	1 to 65535
Notes	This element is part of a list key.

Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## action

Synopsis Enter the **action** context  
Context **configure** [subscriber-mgmt](#) [category-map](#) *string* [category](#) *string* [exhausted-credit-service-level](#) [egress](#) [ip-filter](#) [entry](#) *number* **action**  
Tree [action](#)  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## drop

Synopsis Packets matching the filter entry are dropped  
Context **configure** [subscriber-mgmt](#) [category-map](#) *string* [category](#) *string* [exhausted-credit-service-level](#) [egress](#) [ip-filter](#) [entry](#) *number* **action** **drop**  
Tree [drop](#)  
Notes The following elements are part of a choice: **drop**, **forward**, or **http-redirect**.  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## forward

Synopsis Packets matching the filter entry are forwarded  
Context **configure** [subscriber-mgmt](#) [category-map](#) *string* [category](#) *string* [exhausted-credit-service-level](#) [egress](#) [ip-filter](#) [entry](#) *number* **action** **forward**  
Tree [forward](#)  
Notes The following elements are part of a choice: **drop**, **forward**, or **http-redirect**.  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## http-redirect

Synopsis Enable the **http-redirect** context

Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level egress ip-filter entry</a> <i>number</i> <a href="#">action</a> <a href="#">http-redirect</a>
Tree	<a href="#">http-redirect</a>
Notes	The following elements are part of a choice: <b>drop</b> , <b>forward</b> , or <b>http-redirect</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**allow-override** *boolean*

Synopsis	Allow URL to be overridden by RADIUS/Diameter
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level egress ip-filter entry</a> <i>number</i> <a href="#">action</a> <a href="#">http-redirect</a> <a href="#">allow-override</a> <i>boolean</i>
Tree	<a href="#">allow-override</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**url** *string*

Synopsis	URL that is used to redirect the packets
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level egress ip-filter entry</a> <i>number</i> <a href="#">action</a> <a href="#">http-redirect</a> <a href="#">url</a> <i>string</i>
Tree	<a href="#">url</a>
String Length	1 to 255
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level egress ip-filter entry</a> <i>number</i> <a href="#">description</a> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## match

Synopsis Enter the **match** context

Context **configure** [subscriber-mgmt](#) [category-map](#) *string* [category](#) *string* [exhausted-credit-service-level](#) [egress](#) [ip-filter](#) [entry](#) *number* **match**

Tree [match](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## dscp keyword

Synopsis DSCP to match

Context **configure** [subscriber-mgmt](#) [category-map](#) *string* [category](#) *string* [exhausted-credit-service-level](#) [egress](#) [ip-filter](#) [entry](#) *number* **match** **dscp** *keyword*

Tree [dscp](#)

Options be, cp1, cp2, cp3, cp4, cp5, cp6, cp7, cs1, cp9, af11, cp11, af12, cp13, af13, cp15, cs2, cp17, af21, cp19, af22, cp21, af23, cp23, cs3, cp25, af31, cp27, af32, cp29, af33, cp31, cs4, cp33, af41, cp35, af42, cp37, af43, cp39, cs5, cp41, cp42, cp43, cp44, cp45, ef, cp47, nc1, cp49, cp50, cp51, cp52, cp53, cp54, cp55, nc2, cp57, cp58, cp59, cp60, cp61, cp62, cp63

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## dst-port

Synopsis Enter the **dst-port** context

Context **configure** [subscriber-mgmt](#) [category-map](#) *string* [category](#) *string* [exhausted-credit-service-level](#) [egress](#) [ip-filter](#) [entry](#) *number* **match** **dst-port**

Tree [dst-port](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## eq number

Synopsis Port equal

Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level egress ip-filter entry</a> <i>number</i> <a href="#">match dst-port eq</a> <i>number</i>
Tree	<a href="#">eq</a>
Range	0 to 65535
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **gt** *number*

Synopsis	Port greater than
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level egress ip-filter entry</a> <i>number</i> <a href="#">match dst-port gt</a> <i>number</i>
Tree	<a href="#">gt</a>
Range	0 to 65534
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **lt** *number*

Synopsis	Port less than
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level egress ip-filter entry</a> <i>number</i> <a href="#">match dst-port lt</a> <i>number</i>
Tree	<a href="#">lt</a>
Range	1 to 65535
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **range**

Synopsis	Enable the <b>range</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level egress ip-filter entry</a> <i>number</i> <a href="#">match dst-port range</a>
Tree	<a href="#">range</a>

Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**end number**

Synopsis	Upper bound of the port range to match
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level egress ip-filter entry</a> <i>number</i> <a href="#">match dst-port range end</a> <i>number</i>
Tree	<a href="#">end</a>
Range	0 to 65535
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**start number**

Synopsis	Lower bound of the port range to match
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level egress ip-filter entry</a> <i>number</i> <a href="#">match dst-port range start</a> <i>number</i>
Tree	<a href="#">start</a>
Range	0 to 65535
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**fragment keyword**

Synopsis	Fragmentation to match
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level egress ip-filter entry</a> <i>number</i> <a href="#">match fragment</a> <i>keyword</i>
Tree	<a href="#">fragment</a>
Options	false, true
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## icmp

Synopsis	Enter the <b>icmp</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level egress ip-filter entry</a> <i>number</i> <a href="#">match icmp</a>
Tree	<a href="#">icmp</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## code number

Synopsis	ICMP code to match
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level egress ip-filter entry</a> <i>number</i> <a href="#">match icmp code</a> <i>number</i>
Tree	<a href="#">code</a>
Range	0 to 255
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## type number

Synopsis	ICMP type to match
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level egress ip-filter entry</a> <i>number</i> <a href="#">match icmp type</a> <i>number</i>
Tree	<a href="#">type</a>
Range	0 to 255
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## ip-option

Synopsis	Enter the <b>ip-option</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level egress ip-filter entry</a> <i>number</i> <a href="#">match ip-option</a>
Tree	<a href="#">ip-option</a>
Introduced	16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **mask** *number*

Synopsis IP option mask

Context **configure** [subscriber-mgmt](#) [category-map](#) *string* [category](#) *string* [exhausted-credit-service-level](#) [egress](#) [ip-filter](#) [entry](#) *number* [match](#) [ip-option](#) [mask](#) *number*

Tree [mask](#)

Range 0 to 255

Default 0

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **type** *number*

Synopsis First IP option value for the IP header

Context **configure** [subscriber-mgmt](#) [category-map](#) *string* [category](#) *string* [exhausted-credit-service-level](#) [egress](#) [ip-filter](#) [entry](#) *number* [match](#) [ip-option](#) [type](#) *number*

Tree [type](#)

Range 0 to 255

Default 0

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **multiple-option** *boolean*

Synopsis Match the multiple option

Context **configure** [subscriber-mgmt](#) [category-map](#) *string* [category](#) *string* [exhausted-credit-service-level](#) [egress](#) [ip-filter](#) [entry](#) *number* [match](#) [multiple-option](#) *boolean*

Tree [multiple-option](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **option-present** *boolean*

Synopsis Match the present option

Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level egress ip-filter entry</a> <i>number</i> <a href="#">match option-present</a> <i>boolean</i>
Tree	<a href="#">option-present</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **protocol** (*number* | *keyword*)

Synopsis	IPv4 protocol to match
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level egress ip-filter entry</a> <i>number</i> <a href="#">match protocol</a> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">protocol</a>
Range	0 to 255
Options	tcp-udp, icmp, igmp, ip, tcp, egp, igp, udp, rdp, ipv6, ipv6-route, ipv6-frag, idrp, rsvp, gre, ipv6-icmp, ipv6-no-nxt, ipv6-opts, iso-ip, eigrp, ospf-igp, ether-ip, encap, pnni, pim, vrrp, l2tp, stp, ptp, isis, crtp, crudp, sctp
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **src-ip** *string*

Synopsis	Source IP address and mask to match
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level egress ip-filter entry</a> <i>number</i> <a href="#">match src-ip</a> <i>string</i>
Tree	<a href="#">src-ip</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **src-port**

Synopsis	Enter the <b>src-port</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level egress ip-filter entry</a> <i>number</i> <a href="#">match src-port</a>
Tree	<a href="#">src-port</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**eq number**

Synopsis	Port equal
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string category string</i> <a href="#">exhausted-credit-service-level egress ip-filter entry</a> <i>number match src-port eq number</i>
Tree	<a href="#">eq</a>
Range	0 to 65535
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**gt number**

Synopsis	Port greater than
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string category string</i> <a href="#">exhausted-credit-service-level egress ip-filter entry</a> <i>number match src-port gt number</i>
Tree	<a href="#">gt</a>
Range	0 to 65534
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**lt number**

Synopsis	Port less than
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string category string</i> <a href="#">exhausted-credit-service-level egress ip-filter entry</a> <i>number match src-port lt number</i>
Tree	<a href="#">lt</a>
Range	1 to 65535
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**range**

Synopsis	Enable the <b>range</b> context
----------	---------------------------------

Context	<b>configure subscriber-mgmt category-map</b> <i>string category string</i> <a href="#">exhausted-credit-service-level egress ip-filter entry</a> <i>number match src-port range</i>
Tree	<a href="#">range</a>
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **end number**

Synopsis	Upper bound of the port range to match
Context	<b>configure subscriber-mgmt category-map</b> <i>string category string</i> <a href="#">exhausted-credit-service-level egress ip-filter entry</a> <i>number match src-port range</i> <b>end</b> <i>number</i>
Tree	<a href="#">end</a>
Range	0 to 65535
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **start number**

Synopsis	Lower bound of the port range to match
Context	<b>configure subscriber-mgmt category-map</b> <i>string category string</i> <a href="#">exhausted-credit-service-level egress ip-filter entry</a> <i>number match src-port range</i> <b>start</b> <i>number</i>
Tree	<a href="#">start</a>
Range	0 to 65535
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **tcp-flags**

Synopsis	Enter the <b>tcp-flags</b> context
Context	<b>configure subscriber-mgmt category-map</b> <i>string category string</i> <a href="#">exhausted-credit-service-level egress ip-filter entry</a> <i>number match</i> <b>tcp-flags</b>
Tree	<a href="#">tcp-flags</a>
Introduced	16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **ack** *boolean*

Synopsis Check for ACK bit

Context **configure** [subscriber-mgmt](#) [category-map](#) *string* [category](#) *string* [exhausted-credit-service-level](#) [egress](#) [ip-filter](#) [entry](#) *number* [match](#) [tcp-flags](#) **ack** *boolean*

Tree [ack](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **syn** *boolean*

Synopsis Check for SYN bit

Context **configure** [subscriber-mgmt](#) [category-map](#) *string* [category](#) *string* [exhausted-credit-service-level](#) [egress](#) [ip-filter](#) [entry](#) *number* [match](#) [tcp-flags](#) **syn** *boolean*

Tree [entry](#)

Max. 10

Instances

Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**[id]** *number*

Synopsis	IP filter entry ID
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level egress ipv6-filter entry</a> <i>number</i>
Tree	<a href="#">entry</a>
Range	1 to 65535
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**action**

Synopsis	Enter the <b>action</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level egress ipv6-filter entry</a> <i>number</i> <b>action</b>
Tree	<a href="#">action</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**drop**

Synopsis	Packets matching the filter entry are dropped
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level egress ipv6-filter entry</a> <i>number</i> <b>action drop</b>
Tree	<a href="#">drop</a>
Notes	The following elements are part of a choice: <b>drop</b> or <b>forward</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**forward**

Synopsis	Packets matching the filter entry are forwarded
----------	---

Context	<b>configure subscriber-mgmt category-map</b> <i>string category string exhausted-credit-service-level egress ipv6-filter entry number action forward</i>
Tree	<a href="#">forward</a>
Notes	The following elements are part of a choice: <b>drop</b> or <b>forward</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **description** *string*

Synopsis	Text description
Context	<b>configure subscriber-mgmt category-map</b> <i>string category string exhausted-credit-service-level egress ipv6-filter entry number description string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **match**

Synopsis	Enter the <b>match</b> context
Context	<b>configure subscriber-mgmt category-map</b> <i>string category string exhausted-credit-service-level egress ipv6-filter entry number match</i>
Tree	<a href="#">match</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **dscp** *keyword*

Synopsis	DSCP to match
Context	<b>configure subscriber-mgmt category-map</b> <i>string category string exhausted-credit-service-level egress ipv6-filter entry number match dscp keyword</i>
Tree	<a href="#">dscp</a>
Options	be, cp1, cp2, cp3, cp4, cp5, cp6, cp7, cs1, cp9, af11, cp11, af12, cp13, af13, cp15, cs2, cp17, af21, cp19, af22, cp21, af23, cp23, cs3, cp25, af31, cp27, af32, cp29, af33, cp31, cs4, cp33, af41, cp35, af42, cp37, af43, cp39, cs5, cp41, cp42, cp43, cp44, cp45, ef, cp47, nc1, cp49, cp50, cp51, cp52, cp53, cp54, cp55, nc2, cp57, cp58, cp59, cp60, cp61, cp62, cp63

Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **dst-port**

Synopsis	Enter the <b>dst-port</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level</a> <a href="#">egress</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <b>dst-port</b>
Tree	<a href="#">dst-port</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **eq number**

Synopsis	Port equal
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level</a> <a href="#">egress</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <b>dst-port</b> <b>eq</b> <i>number</i>
Tree	<a href="#">eq</a>
Range	0 to 65535
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **gt number**

Synopsis	Port greater than
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level</a> <a href="#">egress</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <b>dst-port</b> <b>gt</b> <i>number</i>
Tree	<a href="#">gt</a>
Range	0 to 65534
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **lt number**

Synopsis	Port less than
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level egress</a> <a href="#">ipv6-filter entry</a> <i>number</i> <a href="#">match dst-port</a> <b>lt</b> <i>number</i>
Tree	<a href="#">lt</a>
Range	1 to 65535
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **range**

Synopsis	Enable the <b>range</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level egress</a> <a href="#">ipv6-filter entry</a> <i>number</i> <a href="#">match dst-port</a> <b>range</b>
Tree	<a href="#">range</a>
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **end number**

Synopsis	Upper bound of the port range to match
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level egress</a> <a href="#">ipv6-filter entry</a> <i>number</i> <a href="#">match dst-port</a> <b>range</b> <b>end</b> <i>number</i>
Tree	<a href="#">end</a>
Range	0 to 65535
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **start number**

Synopsis	Lower bound of the port range to match
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level egress</a> <a href="#">ipv6-filter entry</a> <i>number</i> <a href="#">match dst-port</a> <b>range</b> <b>start</b> <i>number</i>

Tree	<a href="#">start</a>
Range	0 to 65535
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## icmp

Synopsis	Enter the <b>icmp</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level egress</a> <a href="#">ipv6-filter entry</a> <i>number</i> <a href="#">match icmp</a>
Tree	<a href="#">icmp</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## code number

Synopsis	ICMP code to match
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level egress</a> <a href="#">ipv6-filter entry</a> <i>number</i> <a href="#">match icmp code</a> <i>number</i>
Tree	<a href="#">code</a>
Range	0 to 255
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## type number

Synopsis	ICMP type to match
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level egress</a> <a href="#">ipv6-filter entry</a> <i>number</i> <a href="#">match icmp type</a> <i>number</i>
Tree	<a href="#">type</a>
Range	0 to 255
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**next-header** (*number* | *keyword*)

Synopsis	IP protocol to match
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level egress</a> <a href="#">ipv6-filter entry</a> <i>number</i> <a href="#">match next-header</a> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">next-header</a>
Range	0 to 255
Options	tcp-udp, icmp, igmp, ip, tcp, egp, igp, udp, rdp, ipv6, ipv6-route, ipv6-frag, idrp, rsvp, gre, ipv6-icmp, ipv6-no-nxt, ipv6-opts, iso-ip, eigrp, ospf-igp, ether-ip, encap, pnni, pim, vrrp, l2tp, stp, ptp, isis, crtp, crudp, sctp
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**src-ip** *string*

Synopsis	Source IP address and mask as the match condition
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level egress</a> <a href="#">ipv6-filter entry</a> <i>number</i> <a href="#">match src-ip</a> <i>string</i>
Tree	<a href="#">src-ip</a>
Default	0::0 0::0
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**src-port**

Synopsis	Enter the <b>src-port</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level egress</a> <a href="#">ipv6-filter entry</a> <i>number</i> <a href="#">match src-port</a>
Tree	<a href="#">src-port</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**eq** *number*

Synopsis	Port equal
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level egress</a> <a href="#">ipv6-filter entry</a> <i>number</i> <a href="#">match src-port eq</a> <i>number</i>
Tree	<a href="#">eq</a>

Range	0 to 65535
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**gt number**

Synopsis	Port greater than
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level</a> <a href="#">egress</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">src-port</a> <b>gt</b> <i>number</i>
Tree	<a href="#">gt</a>
Range	0 to 65534
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**lt number**

Synopsis	Port less than
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level</a> <a href="#">egress</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">src-port</a> <b>lt</b> <i>number</i>
Tree	<a href="#">lt</a>
Range	1 to 65535
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**range**

Synopsis	Enable the <b>range</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level</a> <a href="#">egress</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">src-port</a> <b>range</b>
Tree	<a href="#">range</a>
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **end number**

Synopsis Upper bound of the port range to match

Context **configure** [subscriber-mgmt category-map](#) *string* [category](#) *string* [exhausted-credit-service-level egress ipv6-filter entry](#) *number* [match src-port range end](#) *number*

Tree [end](#)

Range 0 to 65535

Notes This element is mandatory.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **start number**

Synopsis Lower bound of the port range to match

Context **configure** [subscriber-mgmt category-map](#) *string* [category](#) *string* [exhausted-credit-service-level egress ipv6-filter entry](#) *number* [match src-port range start](#) *number*

Tree [start](#)

Range 0 to 65535

Notes This element is mandatory.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **tcp-flags**

Synopsis Enter the **tcp-flags** context

Context **configure** [subscriber-mgmt category-map](#) *string* [category](#) *string* [exhausted-credit-service-level egress ipv6-filter entry](#) *number* [match tcp-flags](#)

Tree [tcp-flags](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **ack boolean**

Synopsis Check for ACK bit

Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level egress ipv6-filter entry</a> <i>number</i> <a href="#">match tcp-flags ack</a> <i>boolean</i>
Tree	<a href="#">ack</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**syn** *boolean*

Synopsis	Check for SYN bit
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level egress ipv6-filter entry</a> <i>number</i> <a href="#">match tcp-flags syn</a> <i>boolean</i>
Tree	<a href="#">syn</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**ingress**

Synopsis	Enter the <b>ingress</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level ingress</a>
Tree	<a href="#">ingress</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**ip-filter**

Synopsis	Enter the <b>ip-filter</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level ingress ip-filter</a>
Tree	<a href="#">ip-filter</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**entry** [*id*] *number*

Synopsis	Enter the <b>entry</b> list instance
----------	--------------------------------------

Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level ingress ip-filter entry</a> <i>number</i>
Tree	<a href="#">entry</a>
Max. Instances	10
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**[id]** *number*

Synopsis	IP filter entry ID
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level ingress ip-filter entry</a> <i>number</i>
Tree	<a href="#">entry</a>
Range	1 to 65535
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**action**

Synopsis	Enter the <b>action</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level ingress ip-filter entry</a> <i>number</i> <b>action</b>
Tree	<a href="#">action</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**drop**

Synopsis	Packets matching the filter entry are dropped
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level ingress ip-filter entry</a> <i>number</i> <b>action</b> <a href="#">drop</a>
Tree	<a href="#">drop</a>
Notes	The following elements are part of a choice: <b>drop</b> , <b>forward</b> , or <b>http-redirect</b> .
Introduced	16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## forward

Synopsis Packets matching the filter entry are forwarded

Context **configure** [subscriber-mgmt](#) [category-map](#) *string* [category](#) *string* [exhausted-credit-service-level](#) [ingress](#) [ip-filter](#) [entry](#) *number* [action](#) [forward](#)

Tree [forward](#)

Notes The following elements are part of a choice: **drop**, **forward**, or **http-redirect**.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## http-redirect

Synopsis Enable the **http-redirect** context

Context **configure** [subscriber-mgmt](#) [category-map](#) *string* [category](#) *string* [exhausted-credit-service-level](#) [ingress](#) [ip-filter](#) [entry](#) *number* [action](#) [http-redirect](#)

Tree [http-redirect](#)

Notes The following elements are part of a choice: **drop**, **forward**, or **http-redirect**.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## allow-override *boolean*

Synopsis Allow URL to be overridden by RADIUS/Diameter

Context **configure** [subscriber-mgmt](#) [category-map](#) *string* [category](#) *string* [exhausted-credit-service-level](#) [ingress](#) [ip-filter](#) [entry](#) *number* [action](#) [http-redirect](#) [allow-override](#) *boolean*

Tree [allow-override](#)

Default false

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## url *string*

Synopsis URL that is used to redirect the packets

Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level ingress ip-filter entry</a> <i>number</i> <a href="#">action</a> <a href="#">http-redirect url</a> <i>string</i>
Tree	<a href="#">url</a>
String Length	1 to 255
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level ingress ip-filter entry</a> <i>number</i> <a href="#">description</a> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **match**

Synopsis	Enter the <b>match</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level ingress ip-filter entry</a> <i>number</i> <a href="#">match</a>
Tree	<a href="#">match</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **dscp** *keyword*

Synopsis	DSCP to match
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level ingress ip-filter entry</a> <i>number</i> <a href="#">match</a> <a href="#">dscp</a> <i>keyword</i>
Tree	<a href="#">dscp</a>
Options	be, cp1, cp2, cp3, cp4, cp5, cp6, cp7, cs1, cp9, af11, cp11, af12, cp13, af13, cp15, cs2, cp17, af21, cp19, af22, cp21, af23, cp23, cs3, cp25, af31, cp27, af32, cp29, af33, cp31, cs4, cp33, af41, cp35, af42, cp37, af43, cp39, cs5, cp41, cp42, cp43, cp44, cp45, ef,

	cp47, nc1, cp49, cp50, cp51, cp52, cp53, cp54, cp55, nc2, cp57, cp58, cp59, cp60, cp61, cp62, cp63
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **dst-ip string**

Synopsis	Destination IP address and mask to match
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map string category string</a> <a href="#">exhausted-credit-service-level ingress ip-filter entry number match dst-ip string</a>
Tree	<a href="#">dst-ip</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **dst-port**

Synopsis	Enter the <b>dst-port</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map string category string</a> <a href="#">exhausted-credit-service-level ingress ip-filter entry number match dst-port</a>
Tree	<a href="#">dst-port</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **eq number**

Synopsis	Port equal
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map string category string</a> <a href="#">exhausted-credit-service-level ingress ip-filter entry number match dst-port eq number</a>
Tree	<a href="#">eq</a>
Range	0 to 65535
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **gt number**

Synopsis	Port greater than
----------	-------------------

Context	<b>configure subscriber-mgmt category-map</b> <i>string category string exhausted-credit-service-level ingress ip-filter entry number match dst-port gt number</i>
Tree	<a href="#">gt</a>
Range	0 to 65534
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **lt** *number*

Synopsis	Port less than
Context	<b>configure subscriber-mgmt category-map</b> <i>string category string exhausted-credit-service-level ingress ip-filter entry number match dst-port lt number</i>
Tree	<a href="#">lt</a>
Range	1 to 65535
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **range**

Synopsis	Enable the <b>range</b> context
Context	<b>configure subscriber-mgmt category-map</b> <i>string category string exhausted-credit-service-level ingress ip-filter entry number match dst-port range</i>
Tree	<a href="#">range</a>
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **end** *number*

Synopsis	Upper bound of the port range to match
Context	<b>configure subscriber-mgmt category-map</b> <i>string category string exhausted-credit-service-level ingress ip-filter entry number match dst-port range end number</i>
Tree	<a href="#">end</a>
Range	0 to 65535

Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**start number**

Synopsis	Lower bound of the port range to match
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level ingress ip-filter entry</a> <i>number match dst-port range start number</i>
Tree	<a href="#">start</a>
Range	0 to 65535
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**fragment keyword**

Synopsis	Fragmentation to match
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level ingress ip-filter entry</a> <i>number match fragment keyword</i>
Tree	<a href="#">fragment</a>
Options	false, true
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**icmp**

Synopsis	Enter the <b>icmp</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level ingress ip-filter entry</a> <i>number match icmp</i>
Tree	<a href="#">icmp</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**code number**

Synopsis	ICMP code to match
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level ingress ip-filter entry</a> <i>number</i> <a href="#">match icmp code</a> <i>number</i>
Tree	<a href="#">code</a>
Range	0 to 255
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**type number**

Synopsis	ICMP type to match
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level ingress ip-filter entry</a> <i>number</i> <a href="#">match icmp type</a> <i>number</i>
Tree	<a href="#">type</a>
Range	0 to 255
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**ip-option**

Synopsis	Enter the <b>ip-option</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level ingress ip-filter entry</a> <i>number</i> <a href="#">match ip-option</a>
Tree	<a href="#">ip-option</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**mask number**

Synopsis	IP option mask
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level ingress ip-filter entry</a> <i>number</i> <a href="#">match ip-option mask</a> <i>number</i>
Tree	<a href="#">mask</a>
Range	0 to 255
Default	0

Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**type** *number*

Synopsis	First IP option value for the IP header
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level</a> <a href="#">ingress</a> <a href="#">ip-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">ip-option</a> <b>type</b> <i>number</i>
Tree	<a href="#">type</a>
Range	0 to 255
Default	0
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**multiple-option** *boolean*

Synopsis	Match the multiple option
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level</a> <a href="#">ingress</a> <a href="#">ip-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">multiple-option</a> <b>boolean</b>
Tree	<a href="#">multiple-option</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**option-present** *boolean*

Synopsis	Match the present option
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level</a> <a href="#">ingress</a> <a href="#">ip-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">option-present</a> <b>boolean</b>
Tree	<a href="#">option-present</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**protocol** (*number* | *keyword*)

Synopsis	IPv4 protocol to match
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level</a> <a href="#">ingress</a> <a href="#">ip-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">protocol</a> ( <i>number</i>   <i>keyword</i> )

Tree	<a href="#">protocol</a>
Range	0 to 255
Options	tcp-udp, icmp, igmp, ip, tcp, egp, igp, udp, rdp, ipv6, ipv6-route, ipv6-frag, idrp, rsvp, gre, ipv6-icmp, ipv6-no-nxt, ipv6-opts, iso-ip, eigrp, ospf-igp, ether-ip, encap, pnni, pim, vrrp, l2tp, stp, ptp, isis, crtp, crudp, sctp
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### src-port

Synopsis	Enter the <b>src-port</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level ingress ip-filter entry</a> <i>number</i> <a href="#">match src-port</a>
Tree	<a href="#">src-port</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### eq number

Synopsis	Port equal
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level ingress ip-filter entry</a> <i>number</i> <a href="#">match src-port eq</a> <i>number</i>
Tree	<a href="#">eq</a>
Range	0 to 65535
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### gt number

Synopsis	Port greater than
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level ingress ip-filter entry</a> <i>number</i> <a href="#">match src-port gt</a> <i>number</i>
Tree	<a href="#">gt</a>
Range	0 to 65534
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .

Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**lt number**

Synopsis	Port less than
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level ingress ip-filter entry</a> <i>number</i> <a href="#">match src-port</a> <b>lt</b> <i>number</i>
Tree	<b>lt</b>
Range	1 to 65535
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**range**

Synopsis	Enable the <b>range</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level ingress ip-filter entry</a> <i>number</i> <a href="#">match src-port</a> <b>range</b>
Tree	<b>range</b>
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**end number**

Synopsis	Upper bound of the port range to match
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level ingress ip-filter entry</a> <i>number</i> <a href="#">match src-port</a> <b>range end</b> <i>number</i>
Tree	<b>end</b>
Range	0 to 65535
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **start** *number*

Synopsis	Lower bound of the port range to match
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level ingress ip-filter entry</a> <i>number</i> <a href="#">match src-port range</a> <b>start</b> <i>number</i>
Tree	<a href="#">start</a>
Range	0 to 65535
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **tcp-flags**

Synopsis	Enter the <b>tcp-flags</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level ingress ip-filter entry</a> <i>number</i> <a href="#">match tcp-flags</a>
Tree	<a href="#">tcp-flags</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **ack** *boolean*

Synopsis	Check for ACK bit
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level ingress ip-filter entry</a> <i>number</i> <a href="#">match tcp-flags</a> <b>ack</b> <i>boolean</i>
Tree	<a href="#">ack</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **syn** *boolean*

Synopsis	Check for SYN bit
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level ingress ip-filter entry</a> <i>number</i> <a href="#">match tcp-flags</a> <b>syn</b> <i>boolean</i>
Tree	<a href="#">syn</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**ipv6-filter**

Synopsis	Enter the <b>ipv6-filter</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level ingress</a> <a href="#">ipv6-filter</a>
Tree	<a href="#">ipv6-filter</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**entry** [*id*] *number*

Synopsis	Enter the <b>entry</b> list instance
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level ingress</a> <a href="#">ipv6-filter entry</a> <i>number</i>
Tree	<a href="#">entry</a>
Max. Instances	10
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**[id]** *number*

Synopsis	IP filter entry ID
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level ingress</a> <a href="#">ipv6-filter entry</a> <i>number</i>
Tree	<a href="#">entry</a>
Range	1 to 65535
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**action**

Synopsis	Enter the <b>action</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level ingress</a> <a href="#">ipv6-filter entry</a> <i>number</i> <a href="#">action</a>
Tree	<a href="#">action</a>

Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## drop

Synopsis	Packets matching the filter entry are dropped
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level</a> <a href="#">ingress</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">drop</a>
Tree	<a href="#">drop</a>
Notes	The following elements are part of a choice: <b>drop</b> or <b>forward</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## forward

Synopsis	Packets matching the filter entry are forwarded
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level</a> <a href="#">ingress</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">forward</a>
Tree	<a href="#">forward</a>
Notes	The following elements are part of a choice: <b>drop</b> or <b>forward</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## description *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level</a> <a href="#">ingress</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">description</a> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## match

Synopsis	Enter the <b>match</b> context
----------	--------------------------------

Context	<b>configure subscriber-mgmt category-map</b> <i>string category string exhausted-credit-service-level ingress ipv6-filter entry number match</i>
Tree	<a href="#">match</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **dscp keyword**

Synopsis	DSCP to match
Context	<b>configure subscriber-mgmt category-map</b> <i>string category string exhausted-credit-service-level ingress ipv6-filter entry number match dscp keyword</i>
Tree	<a href="#">dscp</a>
Options	be, cp1, cp2, cp3, cp4, cp5, cp6, cp7, cs1, cp9, af11, cp11, af12, cp13, af13, cp15, cs2, cp17, af21, cp19, af22, cp21, af23, cp23, cs3, cp25, af31, cp27, af32, cp29, af33, cp31, cs4, cp33, af41, cp35, af42, cp37, af43, cp39, cs5, cp41, cp42, cp43, cp44, cp45, ef, cp47, nc1, cp49, cp50, cp51, cp52, cp53, cp54, cp55, nc2, cp57, cp58, cp59, cp60, cp61, cp62, cp63
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **dst-ip string**

Synopsis	Destination IP address and mask to match
Context	<b>configure subscriber-mgmt category-map</b> <i>string category string exhausted-credit-service-level ingress ipv6-filter entry number match dst-ip string</i>
Tree	<a href="#">dst-ip</a>
Default	0::0 0::0
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **dst-port**

Synopsis	Enter the <b>dst-port</b> context
Context	<b>configure subscriber-mgmt category-map</b> <i>string category string exhausted-credit-service-level ingress ipv6-filter entry number match dst-port</i>
Tree	<a href="#">dst-port</a>
Introduced	16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **eq** *number*

Synopsis Port equal

Context **configure** [subscriber-mgmt category-map](#) *string* [category](#) *string* [exhausted-credit-service-level ingress ipv6-filter entry](#) *number match dst-port eq number*

Tree [eq](#)

Range 0 to 65535

Notes The following elements are part of a choice: **eq**, **gt**, **lt**, or **range**.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **gt** *number*

Synopsis Port greater than

Context **configure** [subscriber-mgmt category-map](#) *string* [category](#) *string* [exhausted-credit-service-level ingress ipv6-filter entry](#) *number match dst-port gt number*

Tree [gt](#)

Range 0 to 65534

Notes The following elements are part of a choice: **eq**, **gt**, **lt**, or **range**.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **lt** *number*

Synopsis Port less than

Context **configure** [subscriber-mgmt category-map](#) *string* [category](#) *string* [exhausted-credit-service-level ingress ipv6-filter entry](#) *number match dst-port lt number*

Tree [lt](#)

Range 1 to 65535

Notes The following elements are part of a choice: **eq**, **gt**, **lt**, or **range**.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## range

Synopsis	Enable the <b>range</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level</a> <a href="#">ingress</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">dst-port</a> <a href="#">range</a>
Tree	<a href="#">range</a>
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## end number

Synopsis	Upper bound of the port range to match
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level</a> <a href="#">ingress</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">dst-port</a> <a href="#">range</a> <a href="#">end</a> <i>number</i>
Tree	<a href="#">end</a>
Range	0 to 65535
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## start number

Synopsis	Lower bound of the port range to match
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level</a> <a href="#">ingress</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">dst-port</a> <a href="#">range</a> <a href="#">start</a> <i>number</i>
Tree	<a href="#">start</a>
Range	0 to 65535
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## icmp

Synopsis	Enter the <b>icmp</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level</a> <a href="#">ingress</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">icmp</a>

Tree	<a href="#">icmp</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**code number**

Synopsis	ICMP code to match
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level ingress ipv6-filter entry</a> <i>number</i> <a href="#">match icmp code</a> <i>number</i>
Tree	<a href="#">code</a>
Range	0 to 255
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**type number**

Synopsis	ICMP type to match
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level ingress ipv6-filter entry</a> <i>number</i> <a href="#">match icmp type</a> <i>number</i>
Tree	<a href="#">type</a>
Range	0 to 255
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**next-header** (*number* | *keyword*)

Synopsis	IP protocol to match
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level ingress ipv6-filter entry</a> <i>number</i> <a href="#">match next-header</a> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">next-header</a>
Range	0 to 255
Options	tcp-udp, icmp, igmp, ip, tcp, egp, igp, udp, rdp, ipv6, ipv6-route, ipv6-frag, idrp, rsvp, gre, ipv6-icmp, ipv6-no-nxt, ipv6-opts, iso-ip, eigrp, ospf-igp, ether-ip, encap, pnni, pim, vrrp, l2tp, stp, ptp, isis, crtp, crudp, sctp
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## src-port

Synopsis	Enter the <b>src-port</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level</a> <a href="#">ingress</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">src-port</a>
Tree	<a href="#">src-port</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## eq number

Synopsis	Port equal
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level</a> <a href="#">ingress</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">src-port</a> <a href="#">eq</a> <i>number</i>
Tree	<a href="#">eq</a>
Range	0 to 65535
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## gt number

Synopsis	Port greater than
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level</a> <a href="#">ingress</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">src-port</a> <a href="#">gt</a> <i>number</i>
Tree	<a href="#">gt</a>
Range	0 to 65534
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## lt number

Synopsis	Port less than
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level</a> <a href="#">ingress</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">src-port</a> <a href="#">lt</a> <i>number</i>

Tree	<a href="#">lt</a>
Range	1 to 65535
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## range

Synopsis	Enable the <b>range</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string category string exhausted-credit-service-level ingress ipv6-filter entry number match src-port range</i>
Tree	<a href="#">range</a>
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## end number

Synopsis	Upper bound of the port range to match
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string category string exhausted-credit-service-level ingress ipv6-filter entry number match src-port range end number</i>
Tree	<a href="#">end</a>
Range	0 to 65535
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## start number

Synopsis	Lower bound of the port range to match
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string category string exhausted-credit-service-level ingress ipv6-filter entry number match src-port range start number</i>
Tree	<a href="#">start</a>
Range	0 to 65535
Notes	This element is mandatory.

Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## tcp-flags

Synopsis	Enter the <b>tcp-flags</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level</a> <a href="#">ingress</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">tcp-flags</a>
Tree	<a href="#">tcp-flags</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## ack *boolean*

Synopsis	Check for ACK bit
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level</a> <a href="#">ingress</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">tcp-flags</a> <a href="#">ack</a> <i>boolean</i>
Tree	<a href="#">ack</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## syn *boolean*

Synopsis	Check for SYN bit
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level</a> <a href="#">ingress</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">tcp-flags</a> <a href="#">syn</a> <i>boolean</i>
Tree	<a href="#">syn</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## pir (*number* | *keyword*)

Synopsis	PIR
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level</a> <a href="#">pir</a> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">pir</a>
Range	1 to 100000000

Options	max
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## ingress

Synopsis	Enter the <b>ingress</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string category string ingress</i>
Tree	<a href="#">ingress</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## *policer number*

Synopsis	Ingress policers used in this category
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string category string ingress policer number</i>
Tree	<a href="#">policer</a>
Range	1 to 63
Max.	63
Instances	
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## *queue number*

Synopsis	Ingress queues used in this category
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string category string ingress queue number</i>
Tree	<a href="#">queue</a>
Range	1 to 32
Max.	32
Instances	
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**out-of-credit-action-override** *keyword*

Synopsis	Out of credit action that is overridden in category map
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <b>out-of-credit-action-override</b> <i>keyword</i>
Tree	<a href="#">out-of-credit-action-override</a>
Options	continue, disconnect-host, block-category, change-service-level
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**rating-group** *number*

Synopsis	Rating group for this category
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <b>rating-group</b> <i>number</i>
Tree	<a href="#">rating-group</a>
Range	0 to 4294967295
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**credit-exhaust-threshold** *number*

Synopsis	Percentage for credit exhaust threshold
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <b>credit-exhaust-threshold</b> <i>number</i>
Tree	<a href="#">credit-exhaust-threshold</a>
Range	50 to 100
Units	percent
Default	100
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**credit-type** *keyword*

Synopsis	Credit type
Context	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <b>credit-type</b> <i>keyword</i>
Tree	<a href="#">credit-type</a>
Options	volume, time

Default	volume
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">category-map</a> <i>string</i> <b>description</b> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**gx-session-level-usage** *boolean*

Synopsis	Allow Gx session level Usage Monitoring
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">category-map</a> <i>string</i> <b>gx-session-level-usage</b> <i>boolean</i>
Tree	<a href="#">gx-session-level-usage</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**credit-control-policy** [[name](#)] *string*

Synopsis	Enter the <b>credit-control-policy</b> list instance
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">credit-control-policy</a> <i>string</i>
Tree	<a href="#">credit-control-policy</a>
Max. Instances	255
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**[name]** *string*

Synopsis	Credit control policy name
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">credit-control-policy</a> <i>string</i>

Tree	<a href="#">credit-control-policy</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **default-category-map** *reference*

Synopsis	Default category map for this policy
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">credit-control-policy</a> <i>string</i> <a href="#">default-category-map</a> <i>reference</i>
Tree	<a href="#">default-category-map</a>
Reference	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">category-map</a> <i>string</i>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">credit-control-policy</a> <i>string</i> <a href="#">description</a> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **error-handling-action** *keyword*

Synopsis	Error handling action for the policy
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">credit-control-policy</a> <i>string</i> <a href="#">error-handling-action</a> <i>keyword</i>
Tree	<a href="#">error-handling-action</a>
Options	continue, block
Default	continue
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**out-of-credit-action** *keyword*

Synopsis	Action when out of credit is reached
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">credit-control-policy</a> <i>string</i> <b>out-of-credit-action</b> <i>keyword</i>
Tree	<a href="#">out-of-credit-action</a>
Options	continue, disconnect-host, block-category, change-service-level
Default	continue
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**server**

Synopsis	Enter the <b>server</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">credit-control-policy</a> <i>string</i> <b>server</b>
Tree	<a href="#">server</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**diameter** *reference*

Synopsis	Diameter policy that specifies Diameter peers to use
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">credit-control-policy</a> <i>string</i> <b>server</b> <a href="#">diameter</a> <i>reference</i>
Tree	<a href="#">diameter</a>
Reference	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gy-policy</a> <i>string</i>
Notes	The following elements are part of a choice: <b>diameter</b> or <b>radius</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**radius**

Synopsis	Use RADIUS servers in the authentication policy
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">credit-control-policy</a> <i>string</i> <b>server</b> <a href="#">radius</a>
Tree	<a href="#">radius</a>
Notes	The following elements are part of a choice: <b>diameter</b> or <b>radius</b> .
Introduced	16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **diameter-gx-policy** [*name*] *string*

Synopsis Enter the **diameter-gx-policy** list instance

Context **configure** [subscriber-mgmt](#) [diameter-gx-policy](#) *string*

Tree [diameter-gx-policy](#)

Max. Instances 32

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **[name]** *string*

Synopsis Diameter application policy name

Context **configure** [subscriber-mgmt](#) [diameter-gx-policy](#) *string*

Tree [diameter-gx-policy](#)

String Length 1 to 32

Notes This element is part of a list key.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **description** *string*

Synopsis Text description

Context **configure** [subscriber-mgmt](#) [diameter-gx-policy](#) *string* [description](#) *string*

Tree [description](#)

String Length 1 to 80

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **gx**

Synopsis Enter the **gx** context

Context **configure** [subscriber-mgmt](#) [diameter-gx-policy](#) *string* **gx**

---

Tree	<a href="#">gx</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **avp-subscription-id**

Synopsis	Enter the <b>avp-subscription-id</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">gx</a> <a href="#">avp-subscription-id</a>
Tree	<a href="#">avp-subscription-id</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **origin** *keyword*

Synopsis	Format of the Subscription-Id-Data AVP
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">gx</a> <a href="#">avp-subscription-id</a> <a href="#">origin</a> <i>keyword</i>
Tree	<a href="#">origin</a>
Options	<a href="#">subscriber-id</a> , <a href="#">circuit-id</a> , <a href="#">imsi</a> , <a href="#">msisdn</a> , <a href="#">imei</a> , <a href="#">dual-stack-remote-id</a> , <a href="#">mac</a> , <a href="#">username</a> , <a href="#">nas-port-id</a>
Default	<a href="#">subscriber-id</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **type** *keyword*

Synopsis	Format of the Subscription-Id-Type AVP
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">gx</a> <a href="#">avp-subscription-id</a> <a href="#">type</a> <i>keyword</i>
Tree	<a href="#">type</a>
Options	<a href="#">e164</a> , <a href="#">imsi</a> , <a href="#">nai</a> , <a href="#">private</a>
Default	<a href="#">private</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**ccrt-replay**

Synopsis	Enable the <b>ccrt-replay</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">gx</a> <a href="#">ccrt-replay</a>
Tree	<a href="#">ccrt-replay</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**interval** *number*

Synopsis	Time between consecutive CCR-T replay attempts
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">gx</a> <a href="#">ccrt-replay</a> <a href="#">interval</a> <i>number</i>
Tree	<a href="#">interval</a>
Range	60 to 86400
Default	3600
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**max-lifetime** *number*

Synopsis	Maximum time that CCR-t messages are replayed
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">gx</a> <a href="#">ccrt-replay</a> <a href="#">max-lifetime</a> <i>number</i>
Tree	<a href="#">max-lifetime</a>
Description	This command specifies the maximum time that CCR-t messages for Diameter Gx sessions that belong to the Diameter application policy are replayed.
Range	1 to 24
Units	hours
Default	24
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**credit-mcs-interval** *number*

Synopsis	Volume syncing interval for usage monitoring
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">gx</a> <a href="#">credit-mcs-interval</a> <i>number</i>
Tree	<a href="#">credit-mcs-interval</a>

Description	This command configures the MCS interval at which the accounting data of subscriber hosts is updated.
Range	5 to 60
Units	minutes
Default	10
Introduced	19.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### destination-realm-learning *boolean*

Synopsis	Learn the destination realm from the incoming messages
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">gx</a> <a href="#">destination-realm-learning</a> <i>boolean</i>
Tree	<a href="#">destination-realm-learning</a>
Description	<p>When configured to <b>true</b>, destination realm learning is enabled on the application level. The destination realm is a mandatory configuration parameter used in outgoing Credit Control Request messages (CCR). The configured destination realm is always used in the initial request (CCR-I) message. The consecutive request message of a Gx session can use the destination realm learned from the replies.</p> <p>When configured to <b>false</b>, destination realm learning is disabled and the configured destination realm is used in outgoing request messages.</p>
Default	true
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### features

Synopsis	Enter the <b>features</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">gx</a> <a href="#">features</a>
Tree	<a href="#">features</a>
Introduced	20.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### extended-bandwidth *boolean*

Synopsis	Negotiate support for extended bandwidth AVPs
----------	---

Context	<b>configure subscriber-mgmt diameter-gx-policy</b> <i>string</i> <b>gx features extended-bandwidth</b> <i>boolean</i>
Tree	<a href="#">extended-bandwidth</a>
Description	<p>When configured to <b>true</b>, negotiation occurs for the support of extended AVPs that are capable of supporting bandwidth values greater than <math>(2^{32} - 1)</math> b/s. The extended AVPs allow bitrates in kb/s and are as follows:</p> <ul style="list-style-type: none"> <li>• Extended-GBR-DL (AVP code 2850)</li> <li>• Extended-GBR-UL (AVP code 2851)</li> <li>• Extended-Max-Requested-BW-DL (AVP code 554)</li> <li>• Extended-Max-Requested-BW-UL (AVP code 555)</li> <li>• Extended-APN-AMBR-DL (AVP code 2848)</li> <li>• Extended-APN-AMBR-UL (AVP code 2849)</li> </ul> <p>When configured to <b>false</b>, the extended AVPs are not supported.</p>
Default	false
Introduced	20.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## include-avp

Synopsis	Enter the <b>include-avp</b> context
Context	<b>configure subscriber-mgmt diameter-gx-policy</b> <i>string</i> <b>gx include-avp</b>
Tree	<a href="#">include-avp</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## an-gw-address *boolean*

Synopsis	Include the IP address of this gateway
Context	<b>configure subscriber-mgmt diameter-gx-policy</b> <i>string</i> <b>gx include-avp an-gw-address</b> <i>boolean</i>
Tree	<a href="#">an-gw-address</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**apn-ambr** *boolean*

Synopsis	Include the APN aggregate maximum bitrate
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">gx</a> <a href="#">include-avp</a> <a href="#">apn-ambr</a> <i>boolean</i>
Tree	<a href="#">apn-ambr</a>
Default	false
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**called-station-id** *boolean*

Synopsis	Include the called station ID
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">gx</a> <a href="#">include-avp</a> <a href="#">called-station-id</a> <i>boolean</i>
Tree	<a href="#">called-station-id</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**calling-station-id**

Synopsis	Enable the <b>calling-station-id</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">gx</a> <a href="#">include-avp</a> <a href="#">calling-station-id</a>
Tree	<a href="#">calling-station-id</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**type** *keyword*

Synopsis	Format of the Calling-Station-ID AVP
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">gx</a> <a href="#">include-avp</a> <a href="#">calling-station-id</a> <i>type</i> <i>keyword</i>
Tree	<a href="#">type</a>
Options	sap-string, mac, sap-id, remote-id, llid
Default	sap-string
Introduced	16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **ip-can-type** *boolean*

Synopsis Include the IP CAN type

Context **configure** [subscriber-mgmt](#) [diameter-gx-policy](#) *string* [gx](#) [include-avp](#) [ip-can-type](#) *boolean*

Tree [ip-can-type](#)

Default false

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **logical-access-id** *boolean*

Synopsis Include the logical access id

Context **configure** [subscriber-mgmt](#) [diameter-gx-policy](#) *string* [gx](#) [include-avp](#) [logical-access-id](#) *boolean*

Tree [logical-access-id](#)

Default false

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **nas-port**

Synopsis Enable the **nas-port** context

Context **configure** [subscriber-mgmt](#) [diameter-gx-policy](#) *string* [gx](#) [include-avp](#) [nas-port](#)

Tree [nas-port](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **bit-spec** *string*

Synopsis NAS-Port AVP format

Context **configure** [subscriber-mgmt](#) [diameter-gx-policy](#) *string* [gx](#) [include-avp](#) [nas-port](#) [bit-spec](#) *string*

Tree [bit-spec](#)

---

String Length	1 to 255
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **nas-port-id**

Synopsis	Enable the <b>nas-port-id</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">gx</a> <a href="#">include-avp</a> <a href="#">nas-port-id</a>
Tree	<a href="#">nas-port-id</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **prefix-string** *string*

Synopsis	Prefix string for NAS-Port-Id AVP
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">gx</a> <a href="#">include-avp</a> <a href="#">nas-port-id</a> <a href="#">prefix-string</a> <i>string</i>
Tree	<a href="#">prefix-string</a>
String Length	1 to 8
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **suffix**

Synopsis	Enter the <b>suffix</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">gx</a> <a href="#">include-avp</a> <a href="#">nas-port-id</a> <a href="#">suffix</a>
Tree	<a href="#">suffix</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **circuit-id**

Synopsis	Add Circuit ID as suffix
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">gx</a> <a href="#">include-avp</a> <a href="#">nas-port-id</a> <a href="#">suffix</a> <a href="#">circuit-id</a>

Tree	<a href="#">circuit-id</a>
Notes	The following elements are part of a choice: <b>circuit-id</b> , <b>not-included</b> , <b>remote-id</b> , or <b>user-string</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### not-included

Synopsis	Do not add a suffix
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">gx</a> <a href="#">include-avp</a> <a href="#">nas-port-id</a> <a href="#">suffix</a> <a href="#">not-included</a>
Tree	<a href="#">not-included</a>
Notes	The following elements are part of a choice: <b>circuit-id</b> , <b>not-included</b> , <b>remote-id</b> , or <b>user-string</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### remote-id

Synopsis	Add Remote ID as suffix
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">gx</a> <a href="#">include-avp</a> <a href="#">nas-port-id</a> <a href="#">suffix</a> <a href="#">remote-id</a>
Tree	<a href="#">remote-id</a>
Notes	The following elements are part of a choice: <b>circuit-id</b> , <b>not-included</b> , <b>remote-id</b> , or <b>user-string</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### user-string *string*

Synopsis	Add a user configurable string as suffix
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">gx</a> <a href="#">include-avp</a> <a href="#">nas-port-id</a> <a href="#">suffix</a> <a href="#">user-string</a> <i>string</i>
Tree	<a href="#">user-string</a>
String Length	1 to 64
Notes	The following elements are part of a choice: <b>circuit-id</b> , <b>not-included</b> , <b>remote-id</b> , or <b>user-string</b> .

Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **nas-port-type**

Synopsis	Enable the <b>nas-port-type</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">gx</a> <a href="#">include-avp</a> <a href="#">nas-port-type</a>
Tree	<a href="#">nas-port-type</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **type number**

Synopsis	NAS-Port-Type AVP value
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">gx</a> <a href="#">include-avp</a> <a href="#">nas-port-type</a> <a href="#">type</a> <a href="#">number</a>
Tree	<a href="#">type</a>
Range	0 to 255
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **pdn-connection-id boolean**

Synopsis	Include the PDN connection id
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">gx</a> <a href="#">include-avp</a> <a href="#">pdn-connection-id</a> <a href="#">boolean</a>
Tree	<a href="#">pdn-connection-id</a>
Default	false
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **physical-access-id boolean**

Synopsis	Include the physical access ID
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">gx</a> <a href="#">include-avp</a> <a href="#">physical-access-id</a> <a href="#">boolean</a>

Tree	<a href="#">physical-access-id</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**rai boolean**

Synopsis	Include the routing area identity
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">gx include-avp rai boolean</a>
Tree	<a href="#">rai</a>
Default	false
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**rat-type boolean**

Synopsis	Include the RAT type
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">gx include-avp rat-type boolean</a>
Tree	<a href="#">rat-type</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**sgsn-mcc-mnc boolean**

Synopsis	Include the 3GPP-SGSN-MCC-MNC AVP
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">gx include-avp sgsn-mcc-mnc boolean</a>
Tree	<a href="#">sgsn-mcc-mnc</a>
Description	When configured to <b>true</b> , this command enables the inclusion of the 3GPP-SGSN-MCC-MNC AVP, which contains the MCC and MNC as configured under <b>configure subscriber-mgmt gtp serving-network</b> .
Default	false
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**supported-features** *boolean*

Synopsis	Include the supported features
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">gx</a> <a href="#">include-avp</a> <a href="#">supported-features</a> <i>boolean</i>
Tree	<a href="#">supported-features</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**user-equipment-info**

Synopsis	Enable the <b>user-equipment-info</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">gx</a> <a href="#">include-avp</a> <a href="#">user-equipment-info</a>
Tree	<a href="#">user-equipment-info</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**type** *keyword*

Synopsis	Information for User-Equipment-Info attribute
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">gx</a> <a href="#">include-avp</a> <a href="#">user-equipment-info</a> <i>type</i> <i>keyword</i>
Tree	<a href="#">type</a>
Options	imeisv, mac, eui64, modified-eui64
Default	mac
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**user-location-info** *boolean*

Synopsis	Include the 3GPP-User-Location-Information AVP
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">gx</a> <a href="#">include-avp</a> <a href="#">user-location-info</a> <i>boolean</i>
Tree	<a href="#">user-location-info</a>

Description	When configured to <b>true</b> , this command enables the inclusion of the 3GPP-User-Location-Information AVP as signaled in the incoming GTP setup message.
Default	false
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **mac-format** *string*

Synopsis	MAC address format
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">gx</a> <b>mac-format</b> <i>string</i>
Tree	<a href="#">mac-format</a>
String Length	2 to 7
Default	aa:
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **report-ip-address-event** *boolean*

Synopsis	Enable CCR-u messages on IP address allocation events
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">gx</a> <b>report-ip-address-event</b> <i>boolean</i>
Tree	<a href="#">report-ip-address-event</a>
Default	true
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **three-gpp-qos-mapping**

Synopsis	Enter the <b>three-gpp-qos-mapping</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">gx</a> <b>three-gpp-qos-mapping</b>
Tree	<a href="#">three-gpp-qos-mapping</a>
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

## apn-ambr-dl

Synopsis	Enter the <b>apn-ambr-dl</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">gx</a> <a href="#">three-gpp-qos-mapping</a> <a href="#">apn-ambr-dl</a>
Tree	<a href="#">apn-ambr-dl</a>
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

## aggregate-rate

Synopsis	Map to an aggregate rate
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">gx</a> <a href="#">three-gpp-qos-mapping</a> <a href="#">apn-ambr-dl</a> <a href="#">aggregate-rate</a>
Tree	<a href="#">aggregate-rate</a>
Notes	The following elements are part of a choice: <b>aggregate-rate</b> , <b>arbiter</b> , <b>hs-sla-agg-rate</b> , <b>ignore-override</b> , <b>policer</b> , <b>queue</b> , or <b>scheduler</b> .
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

## arbiter *string*

Synopsis	Arbiter name to be overridden
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">gx</a> <a href="#">three-gpp-qos-mapping</a> <a href="#">apn-ambr-dl</a> <a href="#">arbiter</a> <i>string</i>
Tree	<a href="#">arbiter</a>
String Length	1 to 32
Notes	The following elements are part of a choice: <b>aggregate-rate</b> , <b>arbiter</b> , <b>hs-sla-agg-rate</b> , <b>ignore-override</b> , <b>policer</b> , <b>queue</b> , or <b>scheduler</b> .
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

## hs-sla-agg-rate

Synopsis	Map to an HS SLA aggregate rate
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">gx</a> <a href="#">three-gpp-qos-mapping</a> <a href="#">apn-ambr-dl</a> <a href="#">hs-sla-agg-rate</a>
Tree	<a href="#">hs-sla-agg-rate</a>

Notes	The following elements are part of a choice: <b>aggregate-rate</b> , <b>arbiter</b> , <b>hs-sla-agg-rate</b> , <b>ignore-override</b> , <b>policer</b> , <b>queue</b> , or <b>scheduler</b> .
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### ignore-override

Synopsis	no override on apn-ambr-dl
Context	<b>configure</b> <b>subscriber-mgmt</b> <b>diameter-gx-policy</b> <i>string</i> <b>gx</b> <b>three-gpp-qos-mapping</b> <b>apn-ambr-dl</b> <b>ignore-override</b>
Tree	<a href="#">ignore-override</a>
Notes	The following elements are part of a choice: <b>aggregate-rate</b> , <b>arbiter</b> , <b>hs-sla-agg-rate</b> , <b>ignore-override</b> , <b>policer</b> , <b>queue</b> , or <b>scheduler</b> .
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### policer *number*

Synopsis	Policer ID to be overridden
Context	<b>configure</b> <b>subscriber-mgmt</b> <b>diameter-gx-policy</b> <i>string</i> <b>gx</b> <b>three-gpp-qos-mapping</b> <b>apn-ambr-dl</b> <b>policer</b> <i>number</i>
Tree	<a href="#">policer</a>
Range	1 to 63
Notes	The following elements are part of a choice: <b>aggregate-rate</b> , <b>arbiter</b> , <b>hs-sla-agg-rate</b> , <b>ignore-override</b> , <b>policer</b> , <b>queue</b> , or <b>scheduler</b> .
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### queue *number*

Synopsis	Queue ID to be overridden
Context	<b>configure</b> <b>subscriber-mgmt</b> <b>diameter-gx-policy</b> <i>string</i> <b>gx</b> <b>three-gpp-qos-mapping</b> <b>apn-ambr-dl</b> <b>queue</b> <i>number</i>
Tree	<a href="#">queue</a>
Range	1 to 8
Notes	The following elements are part of a choice: <b>aggregate-rate</b> , <b>arbiter</b> , <b>hs-sla-agg-rate</b> , <b>ignore-override</b> , <b>policer</b> , <b>queue</b> , or <b>scheduler</b> .

Introduced 16.0.R1  
Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **scheduler** *string*

Synopsis Name of the scheduler to be overridden  
Context **configure** [subscriber-mgmt](#) [diameter-gx-policy](#) *string* [gx](#) [three-gpp-qos-mapping](#) [apn-ambr-dl](#) **scheduler** *string*  
Tree [scheduler](#)  
String Length 1 to 32  
Notes The following elements are part of a choice: **aggregate-rate**, **arbiter**, **hs-sla-agg-rate**, **ignore-override**, **policer**, **queue**, or **scheduler**.  
Introduced 16.0.R1  
Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **apn-ambr-ul**

Synopsis Enter the **apn-ambr-ul** context  
Context **configure** [subscriber-mgmt](#) [diameter-gx-policy](#) *string* [gx](#) [three-gpp-qos-mapping](#) [apn-ambr-ul](#)  
Tree [apn-ambr-ul](#)  
Introduced 16.0.R1  
Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **arbiter** *string*

Synopsis Arbiter name to be overridden  
Context **configure** [subscriber-mgmt](#) [diameter-gx-policy](#) *string* [gx](#) [three-gpp-qos-mapping](#) [apn-ambr-ul](#) **arbiter** *string*  
Tree [arbiter](#)  
String Length 1 to 32  
Notes The following elements are part of a choice: **arbiter**, **ignore-override**, **policer**, **queue**, or **scheduler**.  
Introduced 16.0.R1  
Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## ignore-override

Synopsis	no override on apn-ambr-ul
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">gx</a> <a href="#">three-gpp-qos-mapping</a> <a href="#">apn-ambr-ul</a> <b>ignore-override</b>
Tree	<a href="#">ignore-override</a>
Notes	The following elements are part of a choice: <b>arbiter</b> , <b>ignore-override</b> , <b>policer</b> , <b>queue</b> , or <b>scheduler</b> .
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

## policer *number*

Synopsis	Policer ID to be overridden
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">gx</a> <a href="#">three-gpp-qos-mapping</a> <a href="#">apn-ambr-ul</a> <b>policer</b> <i>number</i>
Tree	<a href="#">policer</a>
Range	1 to 63
Notes	The following elements are part of a choice: <b>arbiter</b> , <b>ignore-override</b> , <b>policer</b> , <b>queue</b> , or <b>scheduler</b> .
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

## queue *number*

Synopsis	Queue ID to be overridden
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">gx</a> <a href="#">three-gpp-qos-mapping</a> <a href="#">apn-ambr-ul</a> <b>queue</b> <i>number</i>
Tree	<a href="#">queue</a>
Range	1 to 32
Notes	The following elements are part of a choice: <b>arbiter</b> , <b>ignore-override</b> , <b>policer</b> , <b>queue</b> , or <b>scheduler</b> .
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**scheduler** *string*

Synopsis	Name of the scheduler to be overridden
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">gx</a> <a href="#">three-gpp-qos-mapping</a> <a href="#">apn-ambr-ul</a> <a href="#">scheduler</a> <i>string</i>
Tree	<a href="#">scheduler</a>
String Length	1 to 32
Notes	The following elements are part of a choice: <b>arbiter</b> , <b>ignore-override</b> , <b>policer</b> , <b>queue</b> , or <b>scheduler</b> .
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**node**

Synopsis	Enter the <b>node</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">node</a>
Tree	<a href="#">node</a>
Notes	The following elements are part of a choice: <b>node</b> or <b>peer-policy</b> .
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**destination-realm** *string*

Synopsis	Destination-Realm AVP used by the Diameter peer policy
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">node</a> <a href="#">destination-realm</a> <i>string</i>
Tree	<a href="#">destination-realm</a>
String Length	1 to 80
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**origin-host** *reference***WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Origin-Host AVP used by the Diameter policy
----------	---

Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">node</a> <a href="#">origin-host</a> <i>reference</i>
Tree	<a href="#">origin-host</a>
Reference	<b>configure</b> <a href="#">aaa</a> <a href="#">diameter</a> <a href="#">node</a> <i>string</i>
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## on-failure

Synopsis	Enter the <b>on-failure</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">on-failure</a>
Tree	<a href="#">on-failure</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## failover *boolean*

Synopsis	Session peer failover
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">on-failure</a> <a href="#">failover</a> <i>boolean</i>
Tree	<a href="#">failover</a>
Default	true
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## handling *keyword*

Synopsis	Session peer failure handling
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">on-failure</a> <a href="#">handling</a> <i>keyword</i>
Tree	<a href="#">handling</a>
Options	terminate, continue, retry-and-terminate
Default	terminate
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**tx-timer** *number*

Synopsis	Maximum wait time for a pending session request
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <b>tx-timer</b> <i>number</i>
Tree	<a href="#">tx-timer</a>
Range	10 to 1000
Units	seconds
Default	10
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**diameter-gy-policy** [[name](#)] *string*

Synopsis	Enter the <b>diameter-gy-policy</b> list instance
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gy-policy</a> <i>string</i>
Tree	<a href="#">diameter-gy-policy</a>
Max. Instances	32
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**[name]** *string*

Synopsis	Diameter application policy name
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gy-policy</a> <i>string</i>
Tree	<a href="#">diameter-gy-policy</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gy-policy</a> <i>string</i> <b>description</b> <i>string</i>
Tree	<a href="#">description</a>

String Length 1 to 80  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## gy

Synopsis Enter the **gy** context  
 Context **configure** [subscriber-mgmt](#) [diameter-gy-policy](#) *string* **gy**  
 Tree [gy](#)  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## avp-subscription-id

Synopsis Enter the **avp-subscription-id** context  
 Context **configure** [subscriber-mgmt](#) [diameter-gy-policy](#) *string* **gy** **avp-subscription-id**  
 Tree [avp-subscription-id](#)  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## origin keyword

Synopsis Origin for the Subscription-Id-Data AVP  
 Context **configure** [subscriber-mgmt](#) [diameter-gy-policy](#) *string* **gy** **avp-subscription-id** **origin** *keyword*  
 Tree [origin](#)  
 Options subscriber-id, circuit-id, imsi, msisdn, imei, dual-stack-remote-id, mac, username, nas-port-id  
 Default subscriber-id  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## type keyword

Synopsis Origin for the Subscription-Id-Type AVP

Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gy-policy</a> <i>string</i> <a href="#">gy</a> <a href="#">avp-subscription-id</a> <i>type</i> <i>keyword</i>
Tree	<a href="#">type</a>
Options	e164, imsi, nai, private
Default	private
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **ccrt-replay**

Synopsis	Enable the <b>ccrt-replay</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gy-policy</a> <i>string</i> <a href="#">gy</a> <a href="#">ccrt-replay</a>
Tree	<a href="#">ccrt-replay</a>
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **interval** *number*

Synopsis	Interval at which CCR-t messages are replayed
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gy-policy</a> <i>string</i> <a href="#">gy</a> <a href="#">ccrt-replay</a> <i>interval</i> <i>number</i>
Tree	<a href="#">interval</a>
Description	This command specifies the interval at which CCR-t messages for Diameter Gy sessions that belong to the Diameter application policy are replayed, until a valid CCA-t response is received or until the configured maximum lifetime period expires.
Range	60 to 86400
Default	3600
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **max-lifetime** *number*

Synopsis	Maximum time that CCR-t messages are replayed
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gy-policy</a> <i>string</i> <a href="#">gy</a> <a href="#">ccrt-replay</a> <i>max-lifetime</i> <i>number</i>
Tree	<a href="#">max-lifetime</a>
Description	This command specifies the maximum period of time that CCR-t messages for Diameter Gy sessions that belong to the Diameter application policy are replayed.

Range	1 to 24
Units	hours
Default	24
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **destination-realm-learning** *boolean*

Synopsis	Learn the destination realm from the incoming messages
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gy-policy</a> <i>string</i> <a href="#">gy</a> <a href="#">destination-realm-learning</a> <i>boolean</i>
Tree	<a href="#">destination-realm-learning</a>
Description	<p>When configured to <b>true</b>, destination realm learning is enabled on the application level.</p> <p>The destination realm is a mandatory configuration parameter used in outgoing Credit Control Request messages (CCR). The configured destination realm is always used in the initial request (CCR-I) message. The consecutive request message of a Gy session can use the destination realm learned from the replies.</p> <p>When configured to <b>false</b>, destination realm learning is disabled and the configured destination realm is used in outgoing request messages.</p>
Default	true
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **extended-failure-handling**

Synopsis	Enter the <b>extended-failure-handling</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gy-policy</a> <i>string</i> <a href="#">gy</a> <a href="#">extended-failure-handling</a>
Tree	<a href="#">extended-failure-handling</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **admin-state** *keyword*

Synopsis	Administrative state of Extended Failure Handling
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gy-policy</a> <i>string</i> <a href="#">gy</a> <a href="#">extended-failure-handling</a> <a href="#">admin-state</a> <i>keyword</i>
Tree	<a href="#">admin-state</a>

---

Options	enable, disable
Default	disable
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **interim-credit**

Synopsis	Enter the <b>interim-credit</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gy-policy</a> <i>string</i> <a href="#">gy</a> <a href="#">extended-failure-handling</a> <a href="#">interim-credit</a>
Tree	<a href="#">interim-credit</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **max-attempts** (*number* | *keyword*)

Synopsis	Attempts to retry setting up a session to the OCS
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gy-policy</a> <i>string</i> <a href="#">gy</a> <a href="#">extended-failure-handling</a> <a href="#">interim-credit</a> <a href="#">max-attempts</a> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">max-attempts</a>
Range	1 to 4294967295
Options	infinite
Default	10
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **reporting** *boolean*

Synopsis	Report interim Credit
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gy-policy</a> <i>string</i> <a href="#">gy</a> <a href="#">extended-failure-handling</a> <a href="#">interim-credit</a> <a href="#">reporting</a> <i>boolean</i>
Tree	<a href="#">reporting</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**validity-time** (*number* | *keyword*)

Synopsis	Validity time for interim credit
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gy-policy</a> <i>string</i> <a href="#">gy</a> <a href="#">extended-failure-handling</a> <a href="#">interim-credit</a> <b>validity-time</b> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">validity-time</a>
Range	1 to 4294967295
Units	seconds
Options	none
Default	1800
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**volume**

Synopsis	Enter the <b>volume</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gy-policy</a> <i>string</i> <a href="#">gy</a> <a href="#">extended-failure-handling</a> <a href="#">interim-credit</a> <b>volume</b>
Tree	<a href="#">volume</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**credits** *number*

Synopsis	Default volume credit value
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gy-policy</a> <i>string</i> <a href="#">gy</a> <a href="#">extended-failure-handling</a> <a href="#">interim-credit</a> <a href="#">volume</a> <b>credits</b> <i>number</i>
Tree	<a href="#">credits</a>
Range	1 to 4294967295
Default	500
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**units** *keyword*

Synopsis	Default volume credit units
----------	-----------------------------

Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gy-policy</a> <i>string</i> <a href="#">gy</a> <a href="#">extended-failure-handling</a> <a href="#">interim-credit</a> <a href="#">volume</a> <a href="#">units</a> <i>keyword</i>
Tree	<a href="#">units</a>
Options	bytes, kilobytes, megabytes, gigabytes
Default	megabytes
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **new-session-id** *boolean*

Synopsis	Enable use of a new session ID for CCR-i messages
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gy-policy</a> <i>string</i> <a href="#">gy</a> <a href="#">extended-failure-handling</a> <a href="#">new-session-id</a> <i>boolean</i>
Tree	<a href="#">new-session-id</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **include-avp**

Synopsis	Enter the <b>include-avp</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gy-policy</a> <i>string</i> <a href="#">gy</a> <a href="#">include-avp</a>
Tree	<a href="#">include-avp</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **aaa-user-name** *boolean*

Synopsis	Include RADIUS user name AVP in Diameter Gy messages
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gy-policy</a> <i>string</i> <a href="#">gy</a> <a href="#">include-avp</a> <a href="#">aaa-user-name</a> <i>boolean</i>
Tree	<a href="#">aaa-user-name</a>
Default	false
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### address-avp *boolean*

Synopsis	DCCA AVPs that contain the host address or prefix
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gy-policy</a> <i>string</i> <a href="#">gy</a> <a href="#">include-avp</a> <a href="#">address-avp</a> <i>boolean</i>
Tree	<a href="#">address-avp</a>
Default	true
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### called-station-id

Synopsis	Enable the <b>called-station-id</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gy-policy</a> <i>string</i> <a href="#">gy</a> <a href="#">include-avp</a> <a href="#">called-station-id</a>
Tree	<a href="#">called-station-id</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### id *string*

Synopsis	Called station ID
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gy-policy</a> <i>string</i> <a href="#">gy</a> <a href="#">include-avp</a> <a href="#">called-station-id</a> <i>id</i> <i>string</i>
Tree	<a href="#">id</a>
String Length	1 to 64
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### charging-rule-base-name

Synopsis	Enter the <b>charging-rule-base-name</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gy-policy</a> <i>string</i> <a href="#">gy</a> <a href="#">include-avp</a> <a href="#">charging-rule-base-name</a>
Tree	<a href="#">charging-rule-base-name</a>
Introduced	16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## category-map

Synopsis Use the category map name in use for this session

Context **configure** [subscriber-mgmt](#) [diameter-gy-policy](#) *string* [gy](#) [include-avp](#) [charging-rule-base-name](#) [category-map](#)

Tree [category-map](#)

Notes The following elements are part of a choice: **category-map**, **not-included**, or **user-string**.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## not-included

Synopsis Do not include Charging-Rule-Base-Name AVP in Diameter DCCA CCR messages

Context **configure** [subscriber-mgmt](#) [diameter-gy-policy](#) *string* [gy](#) [include-avp](#) [charging-rule-base-name](#) [not-included](#)

Tree [not-included](#)

Notes The following elements are part of a choice: **category-map**, **not-included**, or **user-string**.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## user-string *string*

Synopsis String for charging rule base name

Context **configure** [subscriber-mgmt](#) [diameter-gy-policy](#) *string* [gy](#) [include-avp](#) [charging-rule-base-name](#) [user-string](#) *string*

Tree [user-string](#)

String Length 1 to 64

Notes The following elements are part of a choice: **category-map**, **not-included**, or **user-string**.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**ggsn-address**

Synopsis	Enable the <b>ggsn-address</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gy-policy</a> <i>string</i> <a href="#">gy</a> <a href="#">include-avp</a> <a href="#">ggsn-address</a>
Tree	<a href="#">ggsn-address</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**type** *keyword*

Synopsis	Address type of GGSN address AVP
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gy-policy</a> <i>string</i> <a href="#">gy</a> <a href="#">include-avp</a> <a href="#">ggsn-address</a> <i>type</i> <i>keyword</i>
Tree	<a href="#">type</a>
Options	ipv4, ipv6
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**pdp-context-type** *boolean*

Synopsis	Include the DCCA PDP-Context-Type AVP Parameter
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gy-policy</a> <i>string</i> <a href="#">gy</a> <a href="#">include-avp</a> <a href="#">pdp-context-type</a> <i>boolean</i>
Tree	<a href="#">pdp-context-type</a>
Default	true
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**ps-information** *boolean*

Synopsis	Enable reporting of AVPs in grouped PS-Information AVP
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gy-policy</a> <i>string</i> <a href="#">gy</a> <a href="#">include-avp</a> <a href="#">ps-information</a> <i>boolean</i>
Tree	<a href="#">ps-information</a>
Default	false
Introduced	16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **service-context-id**

Synopsis Enable the **service-context-id** context

Context **configure** [subscriber-mgmt](#) [diameter-gy-policy](#) *string* [gy](#) [include-avp](#) [service-context-id](#)

Tree [service-context-id](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **id string**

Synopsis Name for the service context ID AVP

Context **configure** [subscriber-mgmt](#) [diameter-gy-policy](#) *string* [gy](#) [include-avp](#) [service-context-id](#) [id](#) *string*

Tree [id](#)

String Length 1 to 32

Notes This element is mandatory.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **three-gpp-charging-characteristics boolean**

Synopsis DCCA 3GPP charging characteristics AVP parameter

Context **configure** [subscriber-mgmt](#) [diameter-gy-policy](#) *string* [gy](#) [include-avp](#) [three-gpp-charging-characteristics](#) *boolean*

Tree [three-gpp-charging-characteristics](#)

Default true

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **three-gpp-charging-id keyword**

Synopsis DCCA 3GPP charging ID AVP parameter

Context **configure** [subscriber-mgmt](#) [diameter-gy-policy](#) *string* [gy](#) [include-avp](#) [three-gpp-charging-id](#) *keyword*

Tree	<a href="#">three-gpp-charging-id</a>
Options	false, auto, esm-info, id
Default	auto
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **three-gpp-ggsn-ipv4-address** *boolean*

Synopsis	Include the 3GPP-GGSN Address in Diameter Gy messages
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gy-policy</a> <i>string</i> <a href="#">gy</a> <a href="#">include-avp</a> <a href="#">three-gpp-ggsn-ipv4-address</a> <i>boolean</i>
Tree	<a href="#">three-gpp-ggsn-ipv4-address</a>
Description	When configured to <b>true</b> , this command includes the 3GPP GGSN Address AVP in the Diameter Gy messages. The value is set to the source IPv4 address that is used for outgoing diameter messages.
Default	true
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **three-gpp-ggsn-ipv6-address** *boolean*

Synopsis	Include the 3GPP-GGSN-Ipv6 address
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gy-policy</a> <i>string</i> <a href="#">gy</a> <a href="#">include-avp</a> <a href="#">three-gpp-ggsn-ipv6-address</a> <i>boolean</i>
Tree	<a href="#">three-gpp-ggsn-ipv6-address</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **three-gpp-gprs-negotiated-qos-profile** *boolean*

Synopsis	Include the 3GPP GPRS-QoS-Negotiated-Profile AVP
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gy-policy</a> <i>string</i> <a href="#">gy</a> <a href="#">include-avp</a> <a href="#">three-gpp-gprs-negotiated-qos-profile</a> <i>boolean</i>
Tree	<a href="#">three-gpp-gprs-negotiated-qos-profile</a>
Default	true

Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **three-gpp-imsi** *keyword*

Synopsis	Origin of the information to send in the IMSI AVP
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gy-policy</a> <i>string</i> <a href="#">gy</a> <a href="#">include-avp</a> <b>three-gpp-imsi</b> <i>keyword</i>
Tree	<a href="#">three-gpp-imsi</a>
Options	false, subscriber-id, circuit-id, imsi
Default	subscriber-id
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **three-gpp-nsapi** *boolean*

Synopsis	Include the 3GPP-NSAPI
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gy-policy</a> <i>string</i> <a href="#">gy</a> <a href="#">include-avp</a> <b>three-gpp-nsapi</b> <i>boolean</i>
Tree	<a href="#">three-gpp-nsapi</a>
Default	true
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **three-gpp-rat-type**

Synopsis	Enable the <b>three-gpp-rat-type</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gy-policy</a> <i>string</i> <a href="#">gy</a> <a href="#">include-avp</a> <b>three-gpp-rat-type</b>
Tree	<a href="#">three-gpp-rat-type</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **type** *number*

Synopsis	Value for 3GPP-RAT-Type AVP
----------	-----------------------------

Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gy-policy</a> <i>string</i> <a href="#">gy</a> <a href="#">include-avp</a> <a href="#">three-gpp-rat-type</a> <a href="#">type</a> <i>number</i>
Tree	<a href="#">type</a>
Range	1 to 255
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **three-gpp-selection-mode** *boolean*

Synopsis	DCCA 3GPP selection mode AVP parameter
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gy-policy</a> <i>string</i> <a href="#">gy</a> <a href="#">include-avp</a> <a href="#">three-gpp-selection-mode</a> <i>boolean</i>
Tree	<a href="#">three-gpp-selection-mode</a>
Default	true
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **three-gpp-session-stop-indicator** *boolean*

Synopsis	DCCA 3GPP session stop indicator AVP parameter
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gy-policy</a> <i>string</i> <a href="#">gy</a> <a href="#">include-avp</a> <a href="#">three-gpp-session-stop-indicator</a> <i>boolean</i>
Tree	<a href="#">three-gpp-session-stop-indicator</a>
Default	true
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **three-gpp-user-location-info** *boolean*

Synopsis	DCCA 3GPP session stop indicator AVP parameter
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gy-policy</a> <i>string</i> <a href="#">gy</a> <a href="#">include-avp</a> <a href="#">three-gpp-user-location-info</a> <i>boolean</i>
Tree	<a href="#">three-gpp-user-location-info</a>
Default	false
Introduced	16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **user-equipment-info-type**

Synopsis Enable the **user-equipment-info-type** context

Context **configure** [subscriber-mgmt](#) [diameter-gy-policy](#) *string* [gy](#) [include-avp](#) [user-equipment-info-type](#)

Tree [user-equipment-info-type](#)

Introduced 16.0.R1

Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **type** *keyword*

Synopsis Information to include in User-Equipment-Info attribute

Context **configure** [subscriber-mgmt](#) [diameter-gy-policy](#) *string* [gy](#) [include-avp](#) [user-equipment-info-type](#) **type** *keyword*

Tree [type](#)

Options imeisv

Notes This element is mandatory.

Introduced 16.0.R1

Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **mac-format** *string*

Synopsis MAC address format

Context **configure** [subscriber-mgmt](#) [diameter-gy-policy](#) *string* [gy](#) [mac-format](#) *string*

Tree [mac-format](#)

String Length 2 to 7

Default aa:

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **out-of-credit-reporting** *keyword*

Synopsis Reporting reason when final granted units are consumed

Context **configure** [subscriber-mgmt](#) [diameter-gy-policy](#) *string* [gy](#) [out-of-credit-reporting](#) *keyword*

Tree	<a href="#">out-of-credit-reporting</a>
Options	final, quota-exhausted
Default	final
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **vendor-support** *keyword*

Synopsis	Vendor support type announced in capability exchange
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gy-policy</a> <i>string</i> <a href="#">gy</a> <b>vendor-support</b> <i>keyword</i>
Tree	<a href="#">vendor-support</a>
Options	vodafone, three-gpp
Default	three-gpp
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **node**

Synopsis	Enter the <b>node</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gy-policy</a> <i>string</i> <a href="#">node</a>
Tree	<a href="#">node</a>
Notes	The following elements are part of a choice: <b>node</b> or <b>peer-policy</b> .
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **destination-realm** *string*

Synopsis	Destination-Realm AVP used by the Diameter peer policy
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gy-policy</a> <i>string</i> <a href="#">node</a> <a href="#">destination-realm</a> <i>string</i>
Tree	<a href="#">destination-realm</a>
String Length	1 to 80
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**origin-host** *reference***WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Origin-Host AVP used by the Diameter policy
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gy-policy</a> <i>string</i> <a href="#">node</a> <a href="#">origin-host</a> <i>reference</i>
Tree	<a href="#">origin-host</a>
Reference	<b>configure</b> <a href="#">aaa</a> <a href="#">diameter</a> <a href="#">node</a> <i>string</i>
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**on-failure**

Synopsis	Enter the <b>on-failure</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gy-policy</a> <i>string</i> <a href="#">on-failure</a>
Tree	<a href="#">on-failure</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**failover** *boolean*

Synopsis	Session peer failover
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gy-policy</a> <i>string</i> <a href="#">on-failure</a> <a href="#">failover</a> <i>boolean</i>
Tree	<a href="#">failover</a>
Default	true
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**handling** *keyword*

Synopsis	Session peer failure handling
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gy-policy</a> <i>string</i> <a href="#">on-failure</a> <a href="#">handling</a> <i>keyword</i>
Tree	<a href="#">handling</a>
Options	terminate, continue, retry-and-terminate
Default	terminate

Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**tx-timer** *number*

Synopsis	Maximum wait time for a pending session request
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gy-policy</a> <i>string</i> <b>tx-timer</b> <i>number</i>
Tree	<a href="#">tx-timer</a>
Range	10 to 1000
Units	seconds
Default	10
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**diameter-nasreq-policy** [*name*] *string*

Synopsis	Enter the <b>diameter-nasreq-policy</b> list instance
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-nasreq-policy</a> <i>string</i>
Tree	<a href="#">diameter-nasreq-policy</a>
Max. Instances	32
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**[name]** *string*

Synopsis	Diameter application policy name
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-nasreq-policy</a> <i>string</i>
Tree	<a href="#">diameter-nasreq-policy</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-nasreq-policy</a> <i>string</i> <a href="#">description</a> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**nasreq**

Synopsis	Enter the <b>nasreq</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-nasreq-policy</a> <i>string</i> <a href="#">nasreq</a>
Tree	<a href="#">nasreq</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**include-avp**

Synopsis	Enter the <b>include-avp</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-nasreq-policy</a> <i>string</i> <a href="#">nasreq</a> <a href="#">include-avp</a>
Tree	<a href="#">include-avp</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**called-station-id** *boolean*

Synopsis	Include the called station ID AVP
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-nasreq-policy</a> <i>string</i> <a href="#">nasreq</a> <a href="#">include-avp</a> <a href="#">called-station-id</a> <i>boolean</i>
Tree	<a href="#">called-station-id</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**calling-station-id**

Synopsis	Enable the <b>calling-station-id</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-nasreq-policy</a> <i>string</i> <a href="#">nasreq</a> <a href="#">include-avp</a> <a href="#">calling-station-id</a>
Tree	<a href="#">calling-station-id</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**type** *keyword*

Synopsis	Format of the Calling-Station-ID AVP
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-nasreq-policy</a> <i>string</i> <a href="#">nasreq</a> <a href="#">include-avp</a> <a href="#">calling-station-id</a> <i>type</i> <i>keyword</i>
Tree	<a href="#">type</a>
Options	sap-string, mac, sap-id, remote-id, llid
Default	sap-string
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**circuit-id** *boolean*

Synopsis	Include the Agent-Circuit-ID AVP
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-nasreq-policy</a> <i>string</i> <a href="#">nasreq</a> <a href="#">include-avp</a> <a href="#">circuit-id</a> <i>boolean</i>
Tree	<a href="#">circuit-id</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**imei** *boolean*

Synopsis	Include the IMEI
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-nasreq-policy</a> <i>string</i> <a href="#">nasreq</a> <a href="#">include-avp</a> <a href="#">imei</a> <i>boolean</i>
Tree	<a href="#">imei</a>
Default	false

Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

## nas-port

Synopsis	Enable the <b>nas-port</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-nasreq-policy</a> <i>string</i> <a href="#">nasreq</a> <a href="#">include-avp</a> <a href="#">nas-port</a>
Tree	<a href="#">nas-port</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## bit-spec *string*

Synopsis	NAS-Port AVP format
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-nasreq-policy</a> <i>string</i> <a href="#">nasreq</a> <a href="#">include-avp</a> <a href="#">nas-port</a> <a href="#">bit-spec</a> <i>string</i>
Tree	<a href="#">bit-spec</a>
String Length	1 to 255
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## nas-port-id

Synopsis	Enable the <b>nas-port-id</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-nasreq-policy</a> <i>string</i> <a href="#">nasreq</a> <a href="#">include-avp</a> <a href="#">nas-port-id</a>
Tree	<a href="#">nas-port-id</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## prefix-string *string*

Synopsis	Prefix string for NAS-Port-Id AVP
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-nasreq-policy</a> <i>string</i> <a href="#">nasreq</a> <a href="#">include-avp</a> <a href="#">nas-port-id</a> <a href="#">prefix-string</a> <i>string</i>

---

Tree	<a href="#">prefix-string</a>
String Length	1 to 8
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## suffix

Synopsis	Enter the <b>suffix</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-nasreq-policy</a> <i>string</i> <a href="#">nasreq</a> <a href="#">include-avp</a> <a href="#">nas-port-id</a> <a href="#">suffix</a>
Tree	<a href="#">suffix</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## circuit-id

Synopsis	Add Circuit ID as suffix
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-nasreq-policy</a> <i>string</i> <a href="#">nasreq</a> <a href="#">include-avp</a> <a href="#">nas-port-id</a> <a href="#">suffix</a> <a href="#">circuit-id</a>
Tree	<a href="#">circuit-id</a>
Notes	The following elements are part of a choice: <b>circuit-id</b> , <b>not-included</b> , <b>remote-id</b> , or <b>user-string</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## not-included

Synopsis	Do not add a suffix
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-nasreq-policy</a> <i>string</i> <a href="#">nasreq</a> <a href="#">include-avp</a> <a href="#">nas-port-id</a> <a href="#">suffix</a> <a href="#">not-included</a>
Tree	<a href="#">not-included</a>
Notes	The following elements are part of a choice: <b>circuit-id</b> , <b>not-included</b> , <b>remote-id</b> , or <b>user-string</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**remote-id**

Synopsis	Add Remote ID as suffix
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-nasreq-policy</a> <i>string</i> <a href="#">nasreq</a> <a href="#">include-avp</a> <a href="#">nas-port-id</a> <a href="#">suffix</a> <a href="#">remote-id</a>
Tree	<a href="#">remote-id</a>
Notes	The following elements are part of a choice: <b>circuit-id</b> , <b>not-included</b> , <b>remote-id</b> , or <b>user-string</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**user-string** *string*

Synopsis	Add a user configurable string as suffix
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-nasreq-policy</a> <i>string</i> <a href="#">nasreq</a> <a href="#">include-avp</a> <a href="#">nas-port-id</a> <a href="#">suffix</a> <a href="#">user-string</a> <i>string</i>
Tree	<a href="#">user-string</a>
String Length	1 to 64
Notes	The following elements are part of a choice: <b>circuit-id</b> , <b>not-included</b> , <b>remote-id</b> , or <b>user-string</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**nas-port-type**

Synopsis	Enable the <b>nas-port-type</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-nasreq-policy</a> <i>string</i> <a href="#">nasreq</a> <a href="#">include-avp</a> <a href="#">nas-port-type</a>
Tree	<a href="#">nas-port-type</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**type** (*keyword* | *number*)

Synopsis	NAS-Port-Type AVP value
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-nasreq-policy</a> <i>string</i> <a href="#">nasreq</a> <a href="#">include-avp</a> <a href="#">nas-port-type</a> <a href="#">type</a> ( <i>keyword</i>   <i>number</i> )
Tree	<a href="#">type</a>

Range	0 to 255
Options	rfc-aligned
Default	rfc-aligned
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**rat-type** *boolean*

Synopsis	Include the Radio Access Technology (RAT) type AVP
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-nasreq-policy</a> <i>string</i> <a href="#">nasreq</a> <a href="#">include-avp</a> <a href="#">rat-type</a> <i>boolean</i>
Tree	<a href="#">rat-type</a>
Default	false
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**remote-id** *boolean*

Synopsis	Include the agent remote ID AVP
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-nasreq-policy</a> <i>string</i> <a href="#">nasreq</a> <a href="#">include-avp</a> <a href="#">remote-id</a> <i>boolean</i>
Tree	<a href="#">remote-id</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**user-location-info** *boolean*

Synopsis	Include the 3GPP-User-Location-Information AVP
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-nasreq-policy</a> <i>string</i> <a href="#">nasreq</a> <a href="#">include-avp</a> <a href="#">user-location-info</a> <i>boolean</i>
Tree	<a href="#">user-location-info</a>
Description	When configured to <b>true</b> , this command enables the inclusion of the 3GPP-User-Location-Information AVP as signaled in the incoming GTP setup message.
Default	false
Introduced	16.0.R1

Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **mac-format** *string*

Synopsis MAC address format

Context **configure** [subscriber-mgmt](#) [diameter-nasreq-policy](#) *string* [nasreq](#) [mac-format](#) *string*

Tree [mac-format](#)

String Length 2 to 7

Default aa:

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **password** *string*

Synopsis AA-request password

Context **configure** [subscriber-mgmt](#) [diameter-nasreq-policy](#) *string* [nasreq](#) [password](#) *string*

Tree [password](#)

String Length 1 to 115

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **user-name**

Synopsis Enter the **user-name** context

Context **configure** [subscriber-mgmt](#) [diameter-nasreq-policy](#) *string* [nasreq](#) [user-name](#)

Tree [user-name](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **domain-name** *string*

Synopsis Domain name

Context **configure** [subscriber-mgmt](#) [diameter-nasreq-policy](#) *string* [nasreq](#) [user-name](#) [domain-name](#) *string*

Tree [domain-name](#)

String Length 1 to 128

Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **format** *keyword*

Synopsis	Format type for username
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-nasreq-policy</a> <i>string</i> <a href="#">nasreq</a> <a href="#">user-name</a> <b>format</b> <i>keyword</i>
Tree	<a href="#">format</a>
Options	mac, circuit-id, tuple, ascii-converted-circuit-id, ascii-converted-tuple, dhcp-client-vendor-opts, mac-giaddr, nas-port-id
Default	mac
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **operation** *keyword*

Synopsis	Operation to perform
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-nasreq-policy</a> <i>string</i> <a href="#">nasreq</a> <a href="#">user-name</a> <b>operation</b> <i>keyword</i>
Tree	<a href="#">operation</a>
Options	append, strip, replace, default
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **node**

Synopsis	Enter the <b>node</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-nasreq-policy</a> <i>string</i> <b>node</b>
Tree	<a href="#">node</a>
Notes	The following elements are part of a choice: <b>node</b> or <b>peer-policy</b> .
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**destination-realm** *string*

Synopsis	Destination-Realm AVP used by the Diameter peer policy
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-nasreq-policy</a> <i>string</i> <a href="#">node</a> <a href="#">destination-realm</a> <i>string</i>
Tree	<a href="#">destination-realm</a>
String Length	1 to 80
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**origin-host** *reference***WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Origin-Host AVP used by the Diameter policy
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-nasreq-policy</a> <i>string</i> <a href="#">node</a> <a href="#">origin-host</a> <i>reference</i>
Tree	<a href="#">origin-host</a>
Reference	<b>configure</b> <a href="#">aaa</a> <a href="#">diameter</a> <a href="#">node</a> <i>string</i>
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**on-failure**

Synopsis	Enter the <b>on-failure</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-nasreq-policy</a> <i>string</i> <a href="#">on-failure</a>
Tree	<a href="#">on-failure</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**failover** *boolean*

Synopsis	Session peer failover
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-nasreq-policy</a> <i>string</i> <a href="#">on-failure</a> <a href="#">failover</a> <i>boolean</i>
Tree	<a href="#">failover</a>
Default	true
Introduced	16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **handling** *keyword*

Synopsis Session peer failure handling

Context **configure** [subscriber-mgmt](#) [diameter-nasreq-policy](#) *string* [on-failure](#) [handling](#) *keyword*

Tree [handling](#)

Options terminate, continue, retry-and-terminate

Default terminate

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **tx-timer** *number*

Synopsis Maximum wait time for a pending session request

Context **configure** [subscriber-mgmt](#) [diameter-nasreq-policy](#) *string* [tx-timer](#) *number*

Tree [tx-timer](#)

Range 10 to 1000

Units seconds

Default 10

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **explicit-subscriber-map**

Synopsis Enter the **explicit-subscriber-map** context

Context **configure** [subscriber-mgmt](#) [explicit-subscriber-map](#)

Tree [explicit-subscriber-map](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **entry** [[subscriber-id](#)] *string*

Synopsis Enter the **entry** list instance

Context **configure** [subscriber-mgmt](#) [explicit-subscriber-map](#) [entry](#) *string*

Tree	<a href="#">entry</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**[subscriber-id]** *string*

Synopsis	Subscriber Identification string
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">explicit-subscriber-map</a> <a href="#">entry</a> <i>string</i>
Tree	<a href="#">entry</a>
String Length	1 to 64
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**alias** *string*

Synopsis	Alias for subscriber identification string
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">explicit-subscriber-map</a> <a href="#">entry</a> <i>string</i> <a href="#">alias</a> <i>string</i>
Tree	<a href="#">alias</a>
String Length	1 to 64
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**app-profile** *reference*

Synopsis	Application profile name
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">explicit-subscriber-map</a> <a href="#">entry</a> <i>string</i> <a href="#">app-profile</a> <i>reference</i>
Tree	<a href="#">app-profile</a>
Reference	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">policy</a> <a href="#">app-profile</a> <i>string</i>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**sla-profile** *reference*

Synopsis	SLA profile name
----------	------------------

Context	<b>configure</b> <a href="#">subscriber-mgmt explicit-subscriber-map entry</a> <i>string</i> <a href="#">sla-profile</a> <i>reference</i>
Tree	<a href="#">sla-profile</a>
Reference	<b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **sub-profile** *reference*

Synopsis	Subscriber profile name
Context	<b>configure</b> <a href="#">subscriber-mgmt explicit-subscriber-map entry</a> <i>string</i> <a href="#">sub-profile</a> <i>reference</i>
Tree	<a href="#">sub-profile</a>
Reference	<b>configure</b> <a href="#">subscriber-mgmt sub-profile</a> <i>string</i>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **group-interface-statistics**

Synopsis	Enter the <b>group-interface-statistics</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt group-interface-statistics</a>
Tree	<a href="#">group-interface-statistics</a>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **admin-state** *keyword*

Synopsis	Administrative state for statistics collection
Context	<b>configure</b> <a href="#">subscriber-mgmt group-interface-statistics admin-state</a> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**group-interface-template** [*name*] *string*

Synopsis	Enter the <b>group-interface-template</b> list instance
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">group-interface-template</a> <i>string</i>
Tree	<a href="#">group-interface-template</a>
Description	Commands in this context configure a template for automatically-generated group interfaces that is used when creating CUPS sessions. A template with the name "default" is used when no other instance is created, however, the "default" template must be explicitly provisioned.
Max. Instances	256
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**[name]** *string*

Synopsis	Identifies this group interface template template
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">group-interface-template</a> <i>string</i>
Tree	<a href="#">group-interface-template</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">group-interface-template</a> <i>string</i> <a href="#">description</a> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**ip-mtu** *number*

Synopsis	IP MTU applied to outgoing packets
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">group-interface-template</a> <i>string</i> <a href="#">ip-mtu</a> <i>number</i>

---

Tree	<a href="#">ip-mtu</a>
Description	This command configures the IP maximum transmission unit (MTU) for the associated router IP interface.
Range	512 to 9786
Units	bytes
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## ipv4

Synopsis	Enter the <b>ipv4</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt group-interface-template</a> <i>string</i> <a href="#">ipv4</a>
Tree	<a href="#">ipv4</a>
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## icmp

Synopsis	Enter the <b>icmp</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt group-interface-template</a> <i>string</i> <a href="#">ipv4</a> <a href="#">icmp</a>
Tree	<a href="#">icmp</a>
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## mask-reply *boolean*

Synopsis	Allow responses to ICMP mask requests on the interface
Context	<b>configure</b> <a href="#">subscriber-mgmt group-interface-template</a> <i>string</i> <a href="#">ipv4</a> <a href="#">icmp</a> <a href="#">mask-reply</a> <i>boolean</i>
Tree	<a href="#">mask-reply</a>
Default	true
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## param-problem

Synopsis	Enter the <b>param-problem</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">group-interface-template</a> <i>string</i> <a href="#">ipv4</a> <a href="#">icmp</a> <a href="#">param-problem</a>
Tree	<a href="#">param-problem</a>
Description	Commands in this context specify the settings for ICMP Parameter Problem messages generated by the interface.
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## admin-state *keyword*

Synopsis	Administrative state of sent Parameter Problem messages
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">group-interface-template</a> <i>string</i> <a href="#">ipv4</a> <a href="#">icmp</a> <a href="#">param-problem</a> <a href="#">admin-state</a> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	enable
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## number *number*

Synopsis	Maximum number of Parameter Problem messages to send
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">group-interface-template</a> <i>string</i> <a href="#">ipv4</a> <a href="#">icmp</a> <a href="#">param-problem</a> <a href="#">number</a> <i>number</i>
Tree	<a href="#">number</a>
Range	10 to 1000
Default	100
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## seconds *number*

Synopsis	Time used to limit number of Parameter Problem messages
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">group-interface-template</a> <i>string</i> <a href="#">ipv4</a> <a href="#">icmp</a> <a href="#">param-problem</a> <a href="#">seconds</a> <i>number</i>

Tree	<a href="#">seconds</a>
Range	1 to 60
Units	seconds
Default	10
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## redirects

Synopsis	Enter the <b>redirects</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">group-interface-template</a> <i>string</i> <a href="#">ipv4</a> <a href="#">icmp</a> <a href="#">redirects</a>
Tree	<a href="#">redirects</a>
Description	<p>Commands in this context configure the settings for ICMP redirect messages generated by the interface.</p> <p>The system sends ICMP redirect messages to alert the sending node that a more optimal route is available on another router on the same subnetwork.</p>
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## admin-state *keyword*

Synopsis	Administrative state of sending ICMP redirect messages
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">group-interface-template</a> <i>string</i> <a href="#">ipv4</a> <a href="#">icmp</a> <a href="#">redirects</a> <a href="#">admin-state</a> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	enable
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## number *number*

Synopsis	Maximum number of ICMP redirect messages to send
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">group-interface-template</a> <i>string</i> <a href="#">ipv4</a> <a href="#">icmp</a> <a href="#">redirects</a> <a href="#">number</a> <i>number</i>
Tree	<a href="#">number</a>

Range	10 to 1000
Default	100
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **seconds** *number*

Synopsis	Time used to limit the number of ICMP redirect messages
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">group-interface-template</a> <i>string</i> <a href="#">ipv4 icmp redirects seconds</a> <i>number</i>
Tree	<a href="#">seconds</a>
Range	1 to 60
Units	seconds
Default	10
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **ttl-expired**

Synopsis	Enter the <b>ttl-expired</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">group-interface-template</a> <i>string</i> <a href="#">ipv4 icmp ttl-expired</a>
Tree	<a href="#">ttl-expired</a>
Description	Commands in this context configure the settings for ICMP TTL expired messages generated by the interface.
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **admin-state** *keyword*

Synopsis	Administrative state of sending TTL expired messages
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">group-interface-template</a> <i>string</i> <a href="#">ipv4 icmp ttl-expired admin-state</a> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	enable
Introduced	20.5.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **number** *number*

Synopsis Maximum number of TTL expired messages to send

Context **configure** [subscriber-mgmt](#) [group-interface-template](#) *string* [ipv4](#) [icmp](#) [ttl-expired](#) *number*

Tree [number](#)

Range 10 to 2000

Default 100

Introduced 20.5.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **seconds** *number*

Synopsis Time used to limit the number of TTL expired messages

Context **configure** [subscriber-mgmt](#) [group-interface-template](#) *string* [ipv4](#) [icmp](#) [ttl-expired](#) [seconds](#) *number*

Tree [seconds](#)

Range 1 to 60

Units seconds

Default 10

Introduced 20.5.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **unreachables**

Synopsis Enter the **unreachables** context

Context **configure** [subscriber-mgmt](#) [group-interface-template](#) *string* [ipv4](#) [icmp](#) [unreachables](#)

Tree [unreachables](#)

Description Commands in this context specify the settings for ICMP host and network destination unreachable messages generated by the interface.

Introduced 20.5.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**admin-state** *keyword*

Synopsis	Administrative state of sending unreachable messages
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">group-interface-template</a> <i>string</i> <a href="#">ipv4</a> <a href="#">icmp</a> <a href="#">unreachables</a> <b>admin-state</b> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	enable
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**number** *number*

Synopsis	Maximum number of unreachable messages to send
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">group-interface-template</a> <i>string</i> <a href="#">ipv4</a> <a href="#">icmp</a> <a href="#">unreachables</a> <b>number</b> <i>number</i>
Tree	<a href="#">number</a>
Range	10 to 2000
Default	100
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**seconds** *number*

Synopsis	Time to limit the number of ICMP unreachable messages
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">group-interface-template</a> <i>string</i> <a href="#">ipv4</a> <a href="#">icmp</a> <a href="#">unreachables</a> <b>seconds</b> <i>number</i>
Tree	<a href="#">seconds</a>
Range	1 to 60
Units	seconds
Default	10
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**neighbor-discovery**

Synopsis	Enter the <b>neighbor-discovery</b> context
----------	---

Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">group-interface-template</a> <i>string</i> <a href="#">ipv4</a> <a href="#">neighbor-discovery</a>
Tree	<a href="#">neighbor-discovery</a>
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **proxy-arp-policy** *reference*

Synopsis	Proxy ARP policy name
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">group-interface-template</a> <i>string</i> <a href="#">ipv4</a> <a href="#">neighbor-discovery</a> <a href="#">proxy-arp-policy</a> <i>reference</i>
Tree	<a href="#">proxy-arp-policy</a>
Reference	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i>
Max. Instances	5
Notes	This element is ordered by the user.
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **remote-proxy-arp** *boolean*

Synopsis	Enable remote proxy ARP on the interface
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">group-interface-template</a> <i>string</i> <a href="#">ipv4</a> <a href="#">neighbor-discovery</a> <a href="#">remote-proxy-arp</a> <i>boolean</i>
Tree	<a href="#">remote-proxy-arp</a>
Default	false
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **urpf-check**

Synopsis	Enable the <b>urpf-check</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">group-interface-template</a> <i>string</i> <a href="#">ipv4</a> <a href="#">urpf-check</a>
Tree	<a href="#">urpf-check</a>
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**mode keyword**

Synopsis	Unicast RPF check mode
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">group-interface-template</a> <i>string</i> <a href="#">ipv4</a> <a href="#">urpf-check</a> <i>mode</i> <i>keyword</i>
Tree	<a href="#">mode</a>
Options	strict, loose, strict-no-ecmp
Default	strict
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**ipv6**

Synopsis	Enter the <b>ipv6</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">group-interface-template</a> <i>string</i> <a href="#">ipv6</a>
Tree	<a href="#">ipv6</a>
Introduced	20.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**urpf-check**

Synopsis	Enable the <b>urpf-check</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">group-interface-template</a> <i>string</i> <a href="#">ipv6</a> <a href="#">urpf-check</a>
Tree	<a href="#">urpf-check</a>
Introduced	20.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**mode keyword**

Synopsis	Unicast RPF check mode
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">group-interface-template</a> <i>string</i> <a href="#">ipv6</a> <a href="#">urpf-check</a> <i>mode</i> <i>keyword</i>
Tree	<a href="#">mode</a>
Options	strict, loose, strict-no-ecmp
Default	strict
Introduced	20.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## trigger-packet

Synopsis Enter the **trigger-packet** context

Context **configure** [subscriber-mgmt](#) [group-interface-template](#) *string* [trigger-packet](#)

Tree [trigger-packet](#)

Introduced 23.7.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## data *boolean*

Synopsis Sample and forward data packets

Context **configure** [subscriber-mgmt](#) [group-interface-template](#) *string* [trigger-packet](#) [data](#) *boolean*

Tree [data](#)

Description When configured to **true**, the router processes data-trigger packets on dynamic SAPs. Data-trigger packets must also be enabled on the capture SAP.

Default false

Introduced 23.7.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## gtp

Synopsis Enter the **gtp** context

Context **configure** [subscriber-mgmt](#) [gtp](#)

Tree [gtp](#)

Description This command enables the context to configure box-wide GTP parameters and profiles.

Introduced 16.0.R1

Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## apn-policy [*name*] *string*

Synopsis Enter the **apn-policy** list instance

Context **configure** [subscriber-mgmt](#) [gtp](#) [apn-policy](#) *string*

Tree [apn-policy](#)

Max. Instances	128
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**[name]** *string*

Synopsis	APN policy name for a new incoming GTP connection
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">apn-policy</a> <i>string</i>
Tree	<a href="#">apn-policy</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**apn** [[apn-name](#)] *string*

Synopsis	Enter the <b>apn</b> list instance
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">apn-policy</a> <i>string</i> <b>apn</b> <i>string</i>
Tree	<a href="#">apn</a>
Max. Instances	1024
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**[apn-name]** *string*

Synopsis	GTP APN name
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">apn-policy</a> <i>string</i> <b>apn</b> <i>string</i>
Tree	<a href="#">apn</a>
String Length	1 to 80
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

## ambr-qos-mapping

Synopsis	Enter the <b>ambr-qos-mapping</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">apn-policy</a> <i>string</i> <a href="#">apn</a> <i>string</i> <a href="#">ambr-qos-mapping</a>
Tree	<a href="#">ambr-qos-mapping</a>
Introduced	16.0.R7
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

## downlink

Synopsis	Enable the <b>downlink</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">apn-policy</a> <i>string</i> <a href="#">apn</a> <i>string</i> <a href="#">ambr-qos-mapping</a> <a href="#">downlink</a>
Tree	<a href="#">downlink</a>
Introduced	16.0.R7
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

## aggregate-rate

Synopsis	Map the downlink APN-AMBR rate to an aggregate rate
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">apn-policy</a> <i>string</i> <a href="#">apn</a> <i>string</i> <a href="#">ambr-qos-mapping</a> <a href="#">downlink</a> <a href="#">aggregate-rate</a>
Tree	<a href="#">aggregate-rate</a>
Notes	The following elements are part of a mandatory choice: <b>aggregate-rate</b> , <b>arbiter</b> , <b>policer</b> , <b>queue</b> , or <b>scheduler</b> .
Introduced	16.0.R7
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

## arbiter *string*

Synopsis	Name of arbiter to be overridden
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">apn-policy</a> <i>string</i> <a href="#">apn</a> <i>string</i> <a href="#">ambr-qos-mapping</a> <a href="#">downlink</a> <a href="#">arbiter</a> <i>string</i>
Tree	<a href="#">arbiter</a>
String Length	1 to 32
Notes	The following elements are part of a mandatory choice: <b>aggregate-rate</b> , <b>arbiter</b> , <b>policer</b> , <b>queue</b> , or <b>scheduler</b> .
Introduced	16.0.R7

Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **policer number**

Synopsis ID of policer to be overridden

Context **configure subscriber-mgmt gtp apn-policy string apn string ambr-qos-mapping downlink policer number**

Tree [policer](#)

Range 1 to 63

Notes The following elements are part of a mandatory choice: **aggregate-rate**, **arbiter**, **policer**, **queue**, or **scheduler**.

Introduced 16.0.R7

Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **queue number**

Synopsis Map the downlink APN-AMBR rate to a queue PIR override

Context **configure subscriber-mgmt gtp apn-policy string apn string ambr-qos-mapping downlink queue number**

Tree [queue](#)

Range 1 to 8

Notes The following elements are part of a mandatory choice: **aggregate-rate**, **arbiter**, **policer**, **queue**, or **scheduler**.

Introduced 16.0.R7

Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **scheduler string**

Synopsis Name of the scheduler to be overridden

Context **configure subscriber-mgmt gtp apn-policy string apn string ambr-qos-mapping downlink scheduler string**

Tree [scheduler](#)

String Length 1 to 32

Notes The following elements are part of a mandatory choice: **aggregate-rate**, **arbiter**, **policer**, **queue**, or **scheduler**.

Introduced 16.0.R7

Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## uplink

Synopsis Enable the **uplink** context

Context **configure** [subscriber-mgmt](#) [gtp](#) [apn-policy](#) [string](#) [apn](#) [string](#) [ambr-qos-mapping](#) [uplink](#)

Tree [uplink](#)

Introduced 16.0.R7

Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## arbiter *string*

Synopsis Name of arbiter to be overridden

Context **configure** [subscriber-mgmt](#) [gtp](#) [apn-policy](#) [string](#) [apn](#) [string](#) [ambr-qos-mapping](#) [uplink](#)  
[arbiter](#) *string*

Tree [arbiter](#)

String Length 1 to 32

Notes The following elements are part of a mandatory choice: **arbiter**, **policer**, **queue**, or **scheduler**.

Introduced 16.0.R7

Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## policer *number*

Synopsis Map the uplink APN-AMBR rate to a policer PIR override

Context **configure** [subscriber-mgmt](#) [gtp](#) [apn-policy](#) [string](#) [apn](#) [string](#) [ambr-qos-mapping](#) [uplink](#)  
[policer](#) *number*

Tree [policer](#)

Range 1 to 63

Notes The following elements are part of a mandatory choice: **arbiter**, **policer**, **queue**, or **scheduler**.

Introduced 16.0.R7

Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**queue number**

Synopsis	Map the uplink APN-AMBR rate to a queue PIR override
Context	<b>configure subscriber-mgmt gtp apn-policy string apn string ambr-qos-mapping uplink queue number</b>
Tree	<a href="#">queue</a>
Range	1 to 32
Notes	The following elements are part of a mandatory choice: <b>arbiter</b> , <b>policer</b> , <b>queue</b> , or <b>scheduler</b> .
Introduced	16.0.R7
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**scheduler string**

Synopsis	Name of scheduler to be overridden
Context	<b>configure subscriber-mgmt gtp apn-policy string apn string ambr-qos-mapping uplink scheduler string</b>
Tree	<a href="#">scheduler</a>
String Length	1 to 32
Notes	The following elements are part of a mandatory choice: <b>arbiter</b> , <b>policer</b> , <b>queue</b> , or <b>scheduler</b> .
Introduced	16.0.R7
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**defaults**

Synopsis	Enter the <b>defaults</b> context
Context	<b>configure subscriber-mgmt gtp apn-policy string apn string defaults</b>
Tree	<a href="#">defaults</a>
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**group-interface**

Synopsis	Enable the <b>group-interface</b> context
Context	<b>configure subscriber-mgmt gtp apn-policy string apn string defaults group-interface</b>
Tree	<a href="#">group-interface</a>

Introduced 16.0.R1  
 Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **name** *string*

Synopsis Group interface name  
 Context **configure** [subscriber-mgmt](#) [gtp](#) [apn-policy](#) *string* [apn](#) *string* [defaults](#) [group-interface](#) [name](#) *string*  
 Tree [name](#)  
 String Length 1 to 32  
 Notes This element is mandatory.  
 Introduced 16.0.R1  
 Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **svc-name** *string*

Synopsis Service name where the group interface resides  
 Context **configure** [subscriber-mgmt](#) [gtp](#) [apn-policy](#) *string* [apn](#) *string* [defaults](#) [group-interface](#) [svc-name](#) *string*  
 Tree [svc-name](#)  
 String Length 1 to 64  
 Notes This element is mandatory.  
 Introduced 16.0.R1  
 Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **diameter-nasreq-policy** *reference*

Synopsis NASREQ authentication policy name  
 Context **configure** [subscriber-mgmt](#) [gtp](#) [apn-policy](#) *string* [apn](#) *string* [diameter-nasreq-policy](#) *reference*  
 Tree [diameter-nasreq-policy](#)  
 Reference **configure** [subscriber-mgmt](#) [diameter-nasreq-policy](#) *string*  
 Notes The following elements are part of a choice: **diameter-nasreq-policy**, **radius-auth-policy**, or **user-db**.  
 Introduced 16.0.R1  
 Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **radius-auth-policy** *reference*

Synopsis	RADIUS authentication policy name
Context	<b>configure</b> <a href="#">subscriber-mgmt gtp apn-policy</a> <i>string</i> <a href="#">apn</a> <i>string</i> <a href="#">radius-auth-policy</a> <i>reference</i>
Tree	<a href="#">radius-auth-policy</a>
Reference	<b>configure</b> <a href="#">subscriber-mgmt radius-authentication-policy</a> <i>string</i>
Notes	The following elements are part of a choice: <b>diameter-nasreq-policy</b> , <b>radius-auth-policy</b> , or <b>user-db</b> .
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **skip-gtp-ipv4-allocation** *boolean*

Synopsis	defer IPv4 address allocation to DHCP
Context	<b>configure</b> <a href="#">subscriber-mgmt gtp apn-policy</a> <i>string</i> <a href="#">apn</a> <i>string</i> <a href="#">skip-gtp-ipv4-allocation</a> <i>boolean</i>
Tree	<a href="#">skip-gtp-ipv4-allocation</a>
Default	false
Introduced	16.0.R4
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **user-db** *reference*

Synopsis	Local user database name
Context	<b>configure</b> <a href="#">subscriber-mgmt gtp apn-policy</a> <i>string</i> <a href="#">apn</a> <i>string</i> <a href="#">user-db</a> <i>reference</i>
Tree	<a href="#">user-db</a>
Reference	<b>configure</b> <a href="#">subscriber-mgmt local-user-db</a> <i>string</i>
Notes	The following elements are part of a choice: <b>diameter-nasreq-policy</b> , <b>radius-auth-policy</b> , or <b>user-db</b> .
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **max-held-uplink-sessions** *number*

Synopsis	Maximum GTP sessions held while UE is disconnected
Context	<b>configure</b> <a href="#">subscriber-mgmt gtp max-held-uplink-sessions</a> <i>number</i>

---

Tree	<a href="#">max-held-uplink-sessions</a>
Range	0 to 500000
Default	2000
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**peer-profile** [[name](#)] *string*

Synopsis	Enter the <b>peer-profile</b> list instance
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i>
Tree	<a href="#">peer-profile</a>
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**[name]** *string*

Synopsis	Peer profile name
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i>
Tree	<a href="#">peer-profile</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">description</a> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**interface-type** *keyword*

Synopsis	3GPP interface type for connections toward this peer
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">interface-type</a> <i>keyword</i>
Tree	<a href="#">interface-type</a>
Options	gn, s2a, s2b, s11
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**ip-ttl** *number*

Synopsis	IP header TTL value for GTP control messages
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">ip-ttl</a> <i>number</i>
Tree	<a href="#">ip-ttl</a>
Range	1 to 255
Default	255
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**keep-alive**

Synopsis	Enter the <b>keep-alive</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">keep-alive</a>
Tree	<a href="#">keep-alive</a>
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**admin-state** *keyword*

Synopsis	Administrative state of GTP-C echo request messages
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">keep-alive</a> <a href="#">admin-state</a> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	enable
Introduced	16.0.R4
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **interval** *number*

Synopsis	Frequency for sending keepalives
Context	<b>configure</b> <b>subscriber-mgmt</b> <b>gtp</b> <b>peer-profile</b> <i>string</i> <b>keep-alive</b> <b>interval</b> <i>number</i>
Tree	<b>interval</b>
Range	60 to 180
Units	seconds
Default	60
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **retry-count** *number*

Synopsis	Time between echo retries toward the same peer
Context	<b>configure</b> <b>subscriber-mgmt</b> <b>gtp</b> <b>peer-profile</b> <i>string</i> <b>keep-alive</b> <b>retry-count</b> <i>number</i>
Tree	<b>retry-count</b>
Range	1 to 15
Default	4
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **timeout** *number*

Synopsis	Timeout after which echo request is deemed unanswered
Context	<b>configure</b> <b>subscriber-mgmt</b> <b>gtp</b> <b>peer-profile</b> <i>string</i> <b>keep-alive</b> <b>timeout</b> <i>number</i>
Tree	<b>timeout</b>
Range	1 to 20
Units	seconds
Default	5
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **message-retransmit**

Synopsis	Enter the <b>message-retransmit</b> context
----------	---

Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">message-retransmit</a>
Tree	<a href="#">message-retransmit</a>
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **retry-count** *number*

Synopsis	Maximum unanswered retries before message deemed failed
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">message-retransmit</a> <a href="#">retry-count</a> <i>number</i>
Tree	<a href="#">retry-count</a>
Range	1 to 8
Default	3
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **timeout** *number*

Synopsis	Timeout after which a message is considered unanswered
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">message-retransmit</a> <a href="#">timeout</a> <i>number</i>
Tree	<a href="#">timeout</a>
Range	1 to 30
Units	seconds
Default	5
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **python-policy** *reference*

Synopsis	Python policy for MGW profile packets sent or received
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">python-policy</a> <i>reference</i>
Tree	<a href="#">python-policy</a>
Reference	<b>configure</b> <a href="#">python</a> <a href="#">python-policy</a> <i>string</i>
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**s11**

Synopsis	Enter the <b>s11</b> context
Context	<b>configure subscriber-mgmt gtp peer-profile</b> <i>string</i> <b>s11</b>
Tree	<b>s11</b>
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**change-reporting-action** (*number* | *keyword*)

Synopsis	Value of change reporting action IE sends to the peer
Context	<b>configure subscriber-mgmt gtp peer-profile</b> <i>string</i> <b>s11 change-reporting-action</b> ( <i>number</i>   <i>keyword</i> )
Tree	<b>change-reporting-action</b>
Description	<p>This command specifies the value of the change reporting action IE sends to the peer in applicable messages. The peer needs to indicate support first using the appropriate flag in the indication IE.</p> <p>This can be overridden by AAA, if AAA explicitly request notification changes for either ECGI, TAI or both. If AAA does not request any notification changes or only the generic location changes, the configured value is used.</p> <p>When unconfigured, this command indicates that the IE is not sent, unless specified by AAA.</p>
Range	0 to 255
Options	cgi-sai, rai, tai, ecgi, cgi-sai-rai, tai-ecgi
Introduced	16.0.R5
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**end-marker-count** *number*

Synopsis	Number of GTP-U end marker packets that are sent
Context	<b>configure subscriber-mgmt gtp peer-profile</b> <i>string</i> <b>s11 end-marker-count</b> <i>number</i>
Tree	<b>end-marker-count</b>
Description	This command specifies the number of end marker packets that are sent when it is certain no more packets will be sent over the corresponding GTP-U tunnel, such as after a completed mobility event.
Range	0 to 5
Default	1

Introduced	16.0.R5
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **ipv4-mtu** *number*

Synopsis	IPv4-MTU PCO sent in S11 GTP messages
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string s11</i> <b>ipv4-mtu</b> <i>number</i>
Tree	<a href="#">ipv4-mtu</a>
Range	512 to 9000
Default	1400
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **qos**

Synopsis	Enter the <b>qos</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string s11</i> <b>qos</b>
Tree	<a href="#">qos</a>
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **ambr**

Synopsis	Enter the <b>ambr</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string s11</i> <b>qos</b> <b>ambr</b>
Tree	<a href="#">ambr</a>
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **down-link** *number*

Synopsis	Downlink Aggregated Maximum Bit Rate (AMBR)
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string s11</i> <b>qos</b> <b>ambr</b> <b>down-link</b> <i>number</i>
Tree	<a href="#">down-link</a>
Range	0 to 10000000

Units	kilobps
Default	20000
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **up-link** *number*

Synopsis	Uplink Aggregated Maximum Bit Rate (AMBR)
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string s11 qos ambr up-link number</i>
Tree	<a href="#">up-link</a>
Range	0 to 10000000
Units	kilobps
Default	10000
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **arp** *number*

Synopsis	Allocation or retention priority
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string s11 qos arp number</i>
Tree	<a href="#">arp</a>
Range	1 to 15
Default	1
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **down-link**

Synopsis	Enter the <b>down-link</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string s11 qos down-link</i>
Tree	<a href="#">down-link</a>
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **gbr number**

Synopsis	Guaranteed Bit Rate (GBR)
Context	<b>configure subscriber-mgmt gtp peer-profile</b> <i>string s11 qos down-link gbr number</i>
Tree	<a href="#">gbr</a>
Range	0 to 100000
Units	kilobps
Default	0
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **mbr number**

Synopsis	Maximum Bit Rate (MBR)
Context	<b>configure subscriber-mgmt gtp peer-profile</b> <i>string s11 qos down-link mbr number</i>
Tree	<a href="#">mbr</a>
Range	0 to 100000
Units	kilobps
Default	0
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **qci number**

Synopsis	QoS Class Identifier (QCI) to send in GTP messages
Context	<b>configure subscriber-mgmt gtp peer-profile</b> <i>string s11 qos qci number</i>
Tree	<a href="#">qci</a>
Range	1 to 9
Default	8
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **up-link**

Synopsis	Enter the <b>up-link</b> context
Context	<b>configure subscriber-mgmt gtp peer-profile</b> <i>string s11 qos up-link</i>

Tree	<a href="#">up-link</a>
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**gbr number**

Synopsis	Guaranteed Bit Rate (GBR)
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">s11</a> <a href="#">qos</a> <a href="#">up-link</a> <a href="#">gbr</a> <i>number</i>
Tree	<a href="#">gbr</a>
Range	0 to 100000
Units	kilobps
Default	0
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**mbr number**

Synopsis	Maximum Bit Rate (MBR)
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">s11</a> <a href="#">qos</a> <a href="#">up-link</a> <a href="#">mbr</a> <i>number</i>
Tree	<a href="#">mbr</a>
Range	0 to 100000
Units	kilobps
Default	0
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**uplink**

Synopsis	Enter the <b>uplink</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a>
Tree	<a href="#">uplink</a>
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

## charging-characteristics

Synopsis	Enter the <b>charging-characteristics</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a> <a href="#">charging-characteristics</a>
Tree	<a href="#">charging-characteristics</a>
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

## home

Synopsis	Enter the <b>home</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a> <a href="#">charging-characteristics</a> <a href="#">home</a>
Tree	<a href="#">home</a>
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

## bit0 *boolean*

Synopsis	Set bit in charging characteristics information element
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a> <a href="#">charging-characteristics</a> <a href="#">home</a> <a href="#">bit0</a> <i>boolean</i>
Tree	<a href="#">bit0</a>
Default	false
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

## bit1 *boolean*

Synopsis	Set bit in charging characteristics information element
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a> <a href="#">charging-characteristics</a> <a href="#">home</a> <a href="#">bit1</a> <i>boolean</i>
Tree	<a href="#">bit1</a>
Default	false
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**bit10** *boolean*

Synopsis	Set bit in charging characteristics information element
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a> <a href="#">charging-characteristics</a> <a href="#">home</a> <a href="#">bit10</a> <i>boolean</i>
Tree	<a href="#">bit10</a>
Default	false
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**bit11** *boolean*

Synopsis	Set bit in charging characteristics information element
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a> <a href="#">charging-characteristics</a> <a href="#">home</a> <a href="#">bit11</a> <i>boolean</i>
Tree	<a href="#">bit11</a>
Default	false
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**bit12** *boolean*

Synopsis	Set bit in charging characteristics information element
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a> <a href="#">charging-characteristics</a> <a href="#">home</a> <a href="#">bit12</a> <i>boolean</i>
Tree	<a href="#">bit12</a>
Default	false
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**bit13** *boolean*

Synopsis	Set bit in charging characteristics information element
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a> <a href="#">charging-characteristics</a> <a href="#">home</a> <a href="#">bit13</a> <i>boolean</i>
Tree	<a href="#">bit13</a>
Default	false

Introduced 16.0.R1  
Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **bit14** *boolean*

Synopsis Set bit in charging characteristics information element  
Context **configure** [subscriber-mgmt](#) [gtp](#) [peer-profile](#) *string* [uplink](#) [charging-characteristics](#) [home](#)  
[bit14](#) *boolean*  
Tree [bit14](#)  
Default false  
Introduced 16.0.R1  
Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **bit15** *boolean*

Synopsis Set bit in charging characteristics information element  
Context **configure** [subscriber-mgmt](#) [gtp](#) [peer-profile](#) *string* [uplink](#) [charging-characteristics](#) [home](#)  
[bit15](#) *boolean*  
Tree [bit15](#)  
Default false  
Introduced 16.0.R1  
Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **bit2** *boolean*

Synopsis Set bit in charging characteristics information element  
Context **configure** [subscriber-mgmt](#) [gtp](#) [peer-profile](#) *string* [uplink](#) [charging-characteristics](#) [home](#)  
[bit2](#) *boolean*  
Tree [bit2](#)  
Default false  
Introduced 16.0.R1  
Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **bit3** *boolean*

Synopsis Set bit in charging characteristics information element

---

Context	<b>configure subscriber-mgmt gtp peer-profile</b> <i>string</i> <b>uplink charging-characteristics home bit3</b> <i>boolean</i>
Tree	<b>bit3</b>
Default	false
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**bit4** *boolean*

Synopsis	Set bit in charging characteristics information element
Context	<b>configure subscriber-mgmt gtp peer-profile</b> <i>string</i> <b>uplink charging-characteristics home bit4</b> <i>boolean</i>
Tree	<b>bit4</b>
Default	false
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**bit5** *boolean*

Synopsis	Set bit in charging characteristics information element
Context	<b>configure subscriber-mgmt gtp peer-profile</b> <i>string</i> <b>uplink charging-characteristics home bit5</b> <i>boolean</i>
Tree	<b>bit5</b>
Default	false
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**bit6** *boolean*

Synopsis	Set bit in charging characteristics information element
Context	<b>configure subscriber-mgmt gtp peer-profile</b> <i>string</i> <b>uplink charging-characteristics home bit6</b> <i>boolean</i>
Tree	<b>bit6</b>
Default	false
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**bit7** *boolean*

Synopsis	Set bit in charging characteristics information element
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a> <a href="#">charging-characteristics</a> <a href="#">home</a> <a href="#">bit7</a> <i>boolean</i>
Tree	<a href="#">bit7</a>
Default	false
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**bit8** *boolean*

Synopsis	Set bit in charging characteristics information element
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a> <a href="#">charging-characteristics</a> <a href="#">home</a> <a href="#">bit8</a> <i>boolean</i>
Tree	<a href="#">bit8</a>
Default	false
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**bit9** *boolean*

Synopsis	Set bit in charging characteristics information element
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a> <a href="#">charging-characteristics</a> <a href="#">home</a> <a href="#">bit9</a> <i>boolean</i>
Tree	<a href="#">bit9</a>
Default	false
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**roaming**

Synopsis	Enter the <b>roaming</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a> <a href="#">charging-characteristics</a> <a href="#">roaming</a>
Tree	<a href="#">roaming</a>

Introduced 16.0.R1  
Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **bit0** *boolean*

Synopsis Set bit in charging characteristics information element  
Context **configure** [subscriber-mgmt](#) [gtp](#) [peer-profile](#) *string* [uplink](#) [charging-characteristics](#) [roaming](#) **bit0** *boolean*  
Tree [bit0](#)  
Default false  
Introduced 16.0.R1  
Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **bit1** *boolean*

Synopsis Set bit in charging characteristics information element  
Context **configure** [subscriber-mgmt](#) [gtp](#) [peer-profile](#) *string* [uplink](#) [charging-characteristics](#) [roaming](#) **bit1** *boolean*  
Tree [bit1](#)  
Default false  
Introduced 16.0.R1  
Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **bit10** *boolean*

Synopsis Set bit in charging characteristics information element  
Context **configure** [subscriber-mgmt](#) [gtp](#) [peer-profile](#) *string* [uplink](#) [charging-characteristics](#) [roaming](#) **bit10** *boolean*  
Tree [bit10](#)  
Default false  
Introduced 16.0.R1  
Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **bit11** *boolean*

Synopsis Set bit in charging characteristics information element

---

Context	<b>configure subscriber-mgmt gtp peer-profile</b> <i>string</i> <b>uplink charging-characteristics roaming bit11</b> <i>boolean</i>
Tree	<b>bit11</b>
Default	false
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **bit12** *boolean*

Synopsis	Set bit in charging characteristics information element
Context	<b>configure subscriber-mgmt gtp peer-profile</b> <i>string</i> <b>uplink charging-characteristics roaming bit12</b> <i>boolean</i>
Tree	<b>bit12</b>
Default	false
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **bit13** *boolean*

Synopsis	Set bit in charging characteristics information element
Context	<b>configure subscriber-mgmt gtp peer-profile</b> <i>string</i> <b>uplink charging-characteristics roaming bit13</b> <i>boolean</i>
Tree	<b>bit13</b>
Default	false
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **bit14** *boolean*

Synopsis	Set bit in charging characteristics information element
Context	<b>configure subscriber-mgmt gtp peer-profile</b> <i>string</i> <b>uplink charging-characteristics roaming bit14</b> <i>boolean</i>
Tree	<b>bit14</b>
Default	false
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**bit15 boolean**

Synopsis	Set bit in charging characteristics information element
Context	<b>configure</b> <a href="#">subscriber-mgmt gtp peer-profile</a> <i>string</i> <a href="#">uplink charging-characteristics roaming</a> <a href="#">bit15</a> <i>boolean</i>
Tree	<a href="#">bit15</a>
Default	false
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**bit2 boolean**

Synopsis	Set bit in charging characteristics information element
Context	<b>configure</b> <a href="#">subscriber-mgmt gtp peer-profile</a> <i>string</i> <a href="#">uplink charging-characteristics roaming</a> <a href="#">bit2</a> <i>boolean</i>
Tree	<a href="#">bit2</a>
Default	false
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**bit3 boolean**

Synopsis	Set bit in charging characteristics information element
Context	<b>configure</b> <a href="#">subscriber-mgmt gtp peer-profile</a> <i>string</i> <a href="#">uplink charging-characteristics roaming</a> <a href="#">bit3</a> <i>boolean</i>
Tree	<a href="#">bit3</a>
Default	false
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**bit4 boolean**

Synopsis	Set bit in charging characteristics information element
Context	<b>configure</b> <a href="#">subscriber-mgmt gtp peer-profile</a> <i>string</i> <a href="#">uplink charging-characteristics roaming</a> <a href="#">bit4</a> <i>boolean</i>
Tree	<a href="#">bit4</a>

---

Default	false
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**bit5** *boolean*

Synopsis	Set bit in charging characteristics information element
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a> <a href="#">charging-characteristics</a> <a href="#">roaming</a> <b>bit5</b> <i>boolean</i>
Tree	<a href="#">bit5</a>
Default	false
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**bit6** *boolean*

Synopsis	Set bit in charging characteristics information element
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a> <a href="#">charging-characteristics</a> <a href="#">roaming</a> <b>bit6</b> <i>boolean</i>
Tree	<a href="#">bit6</a>
Default	false
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**bit7** *boolean*

Synopsis	Set bit in charging characteristics information element
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a> <a href="#">charging-characteristics</a> <a href="#">roaming</a> <b>bit7</b> <i>boolean</i>
Tree	<a href="#">bit7</a>
Default	false
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**bit8** *boolean*

Synopsis	Set bit in charging characteristics information element
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a> <a href="#">charging-characteristics</a> <a href="#">roaming</a> <b>bit8</b> <i>boolean</i>
Tree	<a href="#">bit8</a>
Default	false
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**bit9** *boolean*

Synopsis	Set bit in charging characteristics information element
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a> <a href="#">charging-characteristics</a> <a href="#">roaming</a> <b>bit9</b> <i>boolean</i>
Tree	<a href="#">bit9</a>
Default	false
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**ggsn**

Synopsis	Enter the <b>ggsn</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a> <b>ggsn</b>
Tree	<a href="#">ggsn</a>
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**qos**

Synopsis	Enter the <b>qos</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a> <b>ggsn</b> <b>qos</b>
Tree	<a href="#">qos</a>
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**ambr**

Synopsis	Enable the <b>ambr</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a> <a href="#">ggsn</a> <a href="#">qos</a> <a href="#">ambr</a>
Tree	<a href="#">ambr</a>
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**down-link** *number*

Synopsis	Downlink Aggregated Maximum Bit Rate (AMBR)
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a> <a href="#">ggsn</a> <a href="#">qos</a> <a href="#">ambr</a> <a href="#">down-link</a> <i>number</i>
Tree	<a href="#">down-link</a>
Range	0 to 10000000
Units	kilobps
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**up-link** *number*

Synopsis	Uplink Aggregated Maximum Bit Rate (AMBR)
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a> <a href="#">ggsn</a> <a href="#">qos</a> <a href="#">ambr</a> <a href="#">up-link</a> <i>number</i>
Tree	<a href="#">up-link</a>
Range	0 to 10000000
Units	kilobps
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**arp** *number*

Synopsis	Allocation or retention priority
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a> <a href="#">ggsn</a> <a href="#">qos</a> <a href="#">arp</a> <i>number</i>
Tree	<a href="#">arp</a>

Range	1 to 3
Default	1
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **down-link**

Synopsis	Enter the <b>down-link</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a> <a href="#">ggsn</a> <a href="#">qos</a> <a href="#">down-link</a>
Tree	<a href="#">down-link</a>
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **gbr number**

Synopsis	Guaranteed Bit Rate (GBR)
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a> <a href="#">ggsn</a> <a href="#">qos</a> <a href="#">down-link</a> <a href="#">gbr</a> <i>number</i>
Tree	<a href="#">gbr</a>
Range	0 to 100000
Units	kilobps
Default	2000
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **mbr number**

Synopsis	Maximum Bit Rate (MBR)
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a> <a href="#">ggsn</a> <a href="#">qos</a> <a href="#">down-link</a> <a href="#">mbr</a> <i>number</i>
Tree	<a href="#">mbr</a>
Range	0 to 100000
Units	kilobps
Default	2000
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

## up-link

Synopsis	Enter the <b>up-link</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a> <a href="#">ggsn</a> <a href="#">qos</a> <a href="#">up-link</a>
Tree	<a href="#">up-link</a>
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

## gbr number

Synopsis	Guaranteed Bit Rate (GBR)
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a> <a href="#">ggsn</a> <a href="#">qos</a> <a href="#">up-link</a> <a href="#">gbr</a> <i>number</i>
Tree	<a href="#">gbr</a>
Range	0 to 100000
Units	kilobps
Default	5000
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

## mbr number

Synopsis	Maximum Bit Rate (MBR)
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a> <a href="#">ggsn</a> <a href="#">qos</a> <a href="#">up-link</a> <a href="#">mbr</a> <i>number</i>
Tree	<a href="#">mbr</a>
Range	0 to 100000
Units	kilobps
Default	5000
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

## pgw

Synopsis	Enter the <b>pgw</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a> <a href="#">pgw</a>
Tree	<a href="#">pgw</a>

Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

## qos

Synopsis	Enter the <b>qos</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a> <a href="#">pgw</a> <a href="#">qos</a>
Tree	<a href="#">qos</a>
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

## ambr

Synopsis	Enter the <b>ambr</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a> <a href="#">pgw</a> <a href="#">qos</a> <a href="#">ambr</a>
Tree	<a href="#">ambr</a>
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

## down-link *number*

Synopsis	Downlink Aggregated Maximum Bit Rate (AMBR)
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a> <a href="#">pgw</a> <a href="#">qos</a> <a href="#">ambr</a> <a href="#">down-link</a> <i>number</i>
Tree	<a href="#">down-link</a>
Range	0 to 10000000
Units	kilobps
Default	20000
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

## up-link *number*

Synopsis	Uplink Aggregated Maximum Bit Rate (AMBR)
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a> <a href="#">pgw</a> <a href="#">qos</a> <a href="#">ambr</a> <a href="#">up-link</a> <i>number</i>
Tree	<a href="#">up-link</a>

Range	0 to 10000000
Units	kilobps
Default	10000
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**arp number**

Synopsis	Allocation or retention priority
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a> <a href="#">pgw</a> <a href="#">qos</a> <i>arp number</i>
Tree	<a href="#">arp</a>
Range	1 to 15
Default	1
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**down-link**

Synopsis	Enter the <b>down-link</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a> <a href="#">pgw</a> <a href="#">qos</a> <i>down-link</i>
Tree	<a href="#">down-link</a>
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**gbr number**

Synopsis	Guaranteed Bit Rate (GBR)
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a> <a href="#">pgw</a> <a href="#">qos</a> <a href="#">down-link</a> <i>gbr number</i>
Tree	<a href="#">gbr</a>
Range	0 to 100000
Units	kilobps
Default	0
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **mbr number**

Synopsis	Maximum Bit Rate (MBR)
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a> <a href="#">pgw</a> <a href="#">qos</a> <a href="#">down-link</a> <i>mbr number</i>
Tree	<a href="#">mbr</a>
Range	0 to 100000
Units	kilobps
Default	0
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **qci number**

Synopsis	QoS Class Identifier (QCI) to send in GTP messages
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a> <a href="#">pgw</a> <a href="#">qos</a> <i>qci number</i>
Tree	<a href="#">qci</a>
Range	1 to 9
Default	8
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **up-link**

Synopsis	Enter the <b>up-link</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a> <a href="#">pgw</a> <a href="#">qos</a> <i>up-link</i>
Tree	<a href="#">up-link</a>
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **gbr number**

Synopsis	Guaranteed Bit Rate (GBR)
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a> <a href="#">pgw</a> <a href="#">qos</a> <a href="#">up-link</a> <i>gbr number</i>
Tree	<a href="#">gbr</a>
Range	0 to 100000

Units	kilobps
Default	0
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**mbr number**

Synopsis	Maximum Bit Rate (MBR)
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a> <a href="#">pgw</a> <a href="#">qos</a> <a href="#">up-link</a> <i>mbr number</i>
Tree	<a href="#">mbr</a>
Range	0 to 100000
Units	kilobps
Default	0
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**protocol-configuration-options keyword**

Synopsis	Information Element for Protocol Configuration Options
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a> <a href="#">protocol-configuration-options</a> <i>keyword</i>
Tree	<a href="#">protocol-configuration-options</a>
Options	pco, apco
Default	pco
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**rat-type (number | keyword)**

Synopsis	Default Radio Access Type (RAT) signaled in GTP setup
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a> <a href="#">rat-type</a> ( <i>number   keyword</i> )
Tree	<a href="#">rat-type</a>
Description	This command configures the default Radio Access Technology (RAT) type signaled during GTP setup. RAT identifies the underlying physical connection method for a radio-based communication network. This can be overridden by RADIUS.
Range	0 to 255

Options	utran, geran, wlan, gan, hspa, eutran, virtual
Default	wlan
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **report-wlan-location** *boolean*

Synopsis	Report WLAN or cellular location of UE during setup
Context	<b>configure</b> <b>subscriber-mgmt</b> <b>gtp</b> <b>peer-profile</b> <i>string</i> <b>uplink</b> <b>report-wlan-location</b> <i>boolean</i>
Tree	<a href="#">report-wlan-location</a>
Description	When configured to <b>true</b> , this command enables reporting of the WLAN location or cellular location of the UE in the signaling interface (S2a or Gn) between the WLAN GW and the mobile gateway (PGW or GGSN).  When configured to <b>false</b> , this command disables location reporting.
Default	false
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **session-hold-time** (*number* | *keyword*)

Synopsis	Time to hold a GTP session after its UE is disconnected
Context	<b>configure</b> <b>subscriber-mgmt</b> <b>gtp</b> <b>peer-profile</b> <i>string</i> <b>uplink</b> <b>session-hold-time</b> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">session-hold-time</a>
Range	0 to 3600
Units	seconds
Options	remaining-lease-time
Default	30
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **serving-network**

Synopsis	Enable the <b>serving-network</b> context
Context	<b>configure</b> <b>subscriber-mgmt</b> <b>gtp</b> <b>serving-network</b>
Tree	<a href="#">serving-network</a>

---

Description	Commands in this context configure the 3GPP serving network that the node is part of.
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **mcc string**

Synopsis	Mobile Country Code (MCC) portion of serving network
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">serving-network</a> <b>mcc</b> <i>string</i>
Tree	<a href="#">mcc</a>
String Length	3
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **mnc string**

Synopsis	Mobile Network Code (MNC) portion of serving network
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">serving-network</a> <b>mnc</b> <i>string</i>
Tree	<a href="#">mnc</a>
String Length	2 to 3
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **host-lockout-policy** [[name](#)] *string*

Synopsis	Enter the <b>host-lockout-policy</b> list instance
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <b>host-lockout-policy</b> <i>string</i>
Tree	<a href="#">host-lockout-policy</a>
Max. Instances	128
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**[name]** *string*

Synopsis	Host lockout policy name to associate with the SAP
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">host-lockout-policy</a> <i>string</i>
Tree	<a href="#">host-lockout-policy</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">host-lockout-policy</a> <i>string</i> <a href="#">description</a> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**host-key** *keyword***WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Parameters in host identification for lockout on a SAP
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">host-lockout-policy</a> <i>string</i> <a href="#">host-key</a> <i>keyword</i>
Tree	<a href="#">host-key</a>
Options	all, mac
Default	all
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**lockout-reset-time** *number*

Synopsis	Lockout reset time settings
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">host-lockout-policy</a> <i>string</i> <a href="#">lockout-reset-time</a> <i>number</i>

Tree	<a href="#">lockout-reset-time</a>
Range	1 to 86400
Units	seconds
Default	60
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## lockout-time

Synopsis	Enter the <b>lockout-time</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">host-lockout-policy</a> <i>string</i> <a href="#">lockout-time</a>
Tree	<a href="#">lockout-time</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## max number

Synopsis	Maximum lockout time
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">host-lockout-policy</a> <i>string</i> <a href="#">lockout-time</a> <i>max number</i>
Tree	<a href="#">max</a>
Range	1 to 86400
Units	seconds
Default	3600
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## min number

Synopsis	Minimum lockout time
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">host-lockout-policy</a> <i>string</i> <a href="#">lockout-time</a> <i>min number</i>
Tree	<a href="#">min</a>
Range	1 to 86400
Units	seconds
Default	10
Introduced	16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **max-lockout-hosts** *number*

Synopsis Max lockout hosts  
 Context **configure** [subscriber-mgmt](#) [host-lockout-policy](#) *string* [max-lockout-hosts](#) *number*  
 Tree [max-lockout-hosts](#)  
 Range 1 to 32000  
 Default 100  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **host-tracking-policy** [[name](#)] *string*

Synopsis Enter the **host-tracking-policy** list instance  
 Context **configure** [subscriber-mgmt](#) [host-tracking-policy](#) *string*  
 Tree [host-tracking-policy](#)  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **[name]** *string*

Synopsis Host tracking policy name  
 Context **configure** [subscriber-mgmt](#) [host-tracking-policy](#) *string*  
 Tree [host-tracking-policy](#)  
 String Length 1 to 32  
 Notes This element is part of a list key.  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **description** *string*

Synopsis Text description  
 Context **configure** [subscriber-mgmt](#) [host-tracking-policy](#) *string* [description](#) *string*  
 Tree [description](#)

---

String Length	1 to 80
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **egress-rate-modify**

Synopsis	Enter the <b>egress-rate-modify</b> context
Context	<b>configure subscriber-mgmt host-tracking-policy</b> <i>string</i> <b>egress-rate-modify</b>
Tree	<a href="#">egress-rate-modify</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **agg-rate**

Synopsis	Maximum total rate for all subscriber egress queues
Context	<b>configure subscriber-mgmt host-tracking-policy</b> <i>string</i> <b>egress-rate-modify agg-rate</b>
Tree	<a href="#">agg-rate</a>
Description	This command specifies the maximum total rate for all subscriber egress queues for each subscriber associated with the policy.
Notes	The following elements are part of a choice: <b>agg-rate</b> or <b>scheduler</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **scheduler** *string*

Synopsis	Scheduler to be applied for rate modification
Context	<b>configure subscriber-mgmt host-tracking-policy</b> <i>string</i> <b>egress-rate-modify scheduler</b> <i>string</i>
Tree	<a href="#">scheduler</a>
String Length	1 to 32
Notes	The following elements are part of a choice: <b>agg-rate</b> or <b>scheduler</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**http-redirect-policy** [*name*] *string*

Synopsis	Enter the <b>http-redirect-policy</b> list instance
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">http-redirect-policy</a> <i>string</i>
Tree	<a href="#">http-redirect-policy</a>
Max. Instances	16
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**[name]** *string*

Synopsis	HTTP redirect policy name
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">http-redirect-policy</a> <i>string</i>
Tree	<a href="#">http-redirect-policy</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**aa-url-parameter** *string*

Synopsis	AA URL parameter included for HTTP portal redirect
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">http-redirect-policy</a> <i>string</i> <a href="#">aa-url-parameter</a> <i>string</i>
Tree	<a href="#">aa-url-parameter</a>
String Length	1 to 247
Introduced	22.2.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**application-assurance** *reference*

Synopsis	AA application profile used for portal authentication
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">http-redirect-policy</a> <i>string</i> <a href="#">application-assurance</a> <i>reference</i>
Tree	<a href="#">application-assurance</a>
Reference	<b>configure</b> <a href="#">application-assurance</a> <i>group</i> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">policy</a> <a href="#">app-profile</a> <i>string</i>
Introduced	22.2.R1

Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **description** *string*

Synopsis Text description  
 Context **configure** **subscriber-mgmt** **http-redirect-policy** *string* **description** *string*  
 Tree [description](#)  
 String Length 1 to 80  
 Introduced 16.0.R1  
 Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **dst-port** *number*

Synopsis Destination port number of the HTTP request to match  
 Context **configure** **subscriber-mgmt** **http-redirect-policy** *string* **dst-port** *number*  
 Tree [dst-port](#)  
 Range 1 to 65535  
 Default 80  
 Introduced 16.0.R1  
 Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **forward-entry** **dst-ip** (*ipv4-prefix* | *ipv6-prefix*) **protocol** *keyword* **dst-port** *number*

Synopsis Add a list entry for **forward-entry**  
 Context **configure** **subscriber-mgmt** **http-redirect-policy** *string* **forward-entry** **dst-ip** (*ipv4-prefix* | *ipv6-prefix*) **protocol** *keyword* **dst-port** *number*  
 Tree [forward-entry](#)  
 Introduced 16.0.R1  
 Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **dst-ip** (*ipv4-prefix* | *ipv6-prefix*)

Synopsis Destination address  
 Context **configure** **subscriber-mgmt** **http-redirect-policy** *string* **forward-entry** **dst-ip** (*ipv4-prefix* | *ipv6-prefix*) **protocol** *keyword* **dst-port** *number*  
 Tree [forward-entry](#)

Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **protocol** *keyword*

Synopsis	Destination protocol
Context	<b>configure</b> <b>subscriber-mgmt</b> <b>http-redirect-policy</b> <i>string</i> <b>forward-entry</b> <b>dst-ip</b> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> ) <b>protocol</b> <i>keyword</i> <b>dst-port</b> <i>number</i>
Tree	<b>forward-entry</b>
Options	tcp, udp
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **dst-port** *number*

Synopsis	Destination port
Context	<b>configure</b> <b>subscriber-mgmt</b> <b>http-redirect-policy</b> <i>string</i> <b>forward-entry</b> <b>dst-ip</b> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> ) <b>protocol</b> <i>keyword</i> <b>dst-port</b> <i>number</i>
Tree	<b>forward-entry</b>
Range	1 to 65535
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **ignore-app-profile** *boolean*

Synopsis	Ignore application profile attribute in the RADIUS Access-Accept message
Context	<b>configure</b> <b>subscriber-mgmt</b> <b>http-redirect-policy</b> <i>string</i> <b>ignore-app-profile</b> <i>boolean</i>
Tree	<b>ignore-app-profile</b>
Default	false
Introduced	19.7.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**portal-hold-time** *number*

Synopsis	Time to hold redirect forwarding resources
Context	<b>configure</b> <b>subscriber-mgmt</b> <b>http-redirect-policy</b> <i>string</i> <b>portal-hold-time</b> <i>number</i>
Tree	<b>portal-hold-time</b>
Range	1 to 60
Units	seconds
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**url** *string*

Synopsis	HTTP URL to which the matching traffic is redirected
Context	<b>configure</b> <b>subscriber-mgmt</b> <b>http-redirect-policy</b> <i>string</i> <b>url</b> <i>string</i>
Tree	<b>url</b>
Description	This command configures the HTTP redirect URL to which the matching traffic is redirected. Use the following variables to insert subscriber session data in the URL: <ul style="list-style-type: none"> <li>• \$URL (Request-URI in the HTTP GET Request received)</li> <li>• \$MAC (a string that represents the MAC address of the subscriber host)</li> <li>• \$IP (a string that represents the IP address of the subscriber host)</li> <li>• \$NASIP (a string that represents the RADIUS IP address of the ISA/ESA-VM)</li> </ul>
String Length	1 to 255
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**igmp-policy** [*name*] *string*

Synopsis	Enter the <b>igmp-policy</b> list instance
Context	<b>configure</b> <b>subscriber-mgmt</b> <b>igmp-policy</b> <i>string</i>
Tree	<b>igmp-policy</b>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**[name]** *string*

Synopsis	Policy name
----------	-------------

Context	<b>configure subscriber-mgmt igmp-policy</b> <i>string</i>
Tree	<a href="#">igmp-policy</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **description** *string*

Synopsis	Text description
Context	<b>configure subscriber-mgmt igmp-policy</b> <i>string</i> <b>description</b> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **egress-rate-modify**

Synopsis	Enter the <b>egress-rate-modify</b> context
Context	<b>configure subscriber-mgmt igmp-policy</b> <i>string</i> <b>egress-rate-modify</b>
Tree	<a href="#">egress-rate-modify</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **agg-rate**

Synopsis	Maximum total rate for all subscriber egress queues
Context	<b>configure subscriber-mgmt igmp-policy</b> <i>string</i> <b>egress-rate-modify</b> <b>agg-rate</b>
Tree	<a href="#">agg-rate</a>
Description	This command specifies the maximum total rate for all subscriber egress queues for each subscriber associated with the policy.
Notes	The following elements are part of a choice: <b>agg-rate</b> or <b>scheduler</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**scheduler** *string*

Synopsis	Scheduler to be applied for rate modification
Context	<b>configure</b> <a href="#">subscriber-mgmt igmp-policy</a> <i>string</i> <a href="#">egress-rate-modify scheduler</a> <i>string</i>
Tree	<a href="#">scheduler</a>
String Length	1 to 32
Notes	The following elements are part of a choice: <b>agg-rate</b> or <b>scheduler</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**fast-leave** *boolean*

Synopsis	Enable fast leave
Context	<b>configure</b> <a href="#">subscriber-mgmt igmp-policy</a> <i>string</i> <a href="#">fast-leave</a> <i>boolean</i>
Tree	<a href="#">fast-leave</a>
Default	true
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**import-policy** *reference*

Synopsis	Import policy that filters IGMP packets
Context	<b>configure</b> <a href="#">subscriber-mgmt igmp-policy</a> <i>string</i> <a href="#">import-policy</a> <i>reference</i>
Tree	<a href="#">import-policy</a>
Reference	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**maximum-number-group-sources** *number*

Synopsis	Maximum number of group sources for this interface
Context	<b>configure</b> <a href="#">subscriber-mgmt igmp-policy</a> <i>string</i> <a href="#">maximum-number-group-sources</a> <i>number</i>
Tree	<a href="#">maximum-number-group-sources</a>
Description	This command configures the maximum number of group sources for which IGMP or MLD can have local receiver information based on received IGMP or MLD reports on this interface. When this configuration is changed dynamically to a lower value than

the currently accepted number of group sources, the group sources that are already accepted are not deleted. Only new group sources are not allowed.

Range	1 to 32000
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **maximum-number-groups** *number*

Synopsis	Maximum number of groups for this interface
Context	<b>configure</b> <a href="#">subscriber-mgmt igmp-policy</a> <i>string</i> <b>maximum-number-groups</b> <i>number</i>
Tree	<a href="#">maximum-number-groups</a>
Range	1 to 16000
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **maximum-number-sources** *number*

Synopsis	Maximum number of sources that are allowed per group
Context	<b>configure</b> <a href="#">subscriber-mgmt igmp-policy</a> <i>string</i> <b>maximum-number-sources</b> <i>number</i>
Tree	<a href="#">maximum-number-sources</a>
Range	1 to 1000
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **multicast-reporter**

Synopsis	Enter the <b>multicast-reporter</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt igmp-policy</a> <i>string</i> <b>multicast-reporter</b>
Tree	<a href="#">multicast-reporter</a>
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **admin-state** *keyword*

Synopsis	Administrative state of the multicast reporter
Context	<b>configure</b> <a href="#">subscriber-mgmt igmp-policy</a> <i>string</i> <b>multicast-reporter</b> <b>admin-state</b> <i>keyword</i>

Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **destination** *reference*

Synopsis	Multicast reporter destination
Context	<b>configure</b> <a href="#">subscriber-mgmt igmp-policy</a> <i>string</i> <a href="#">multicast-reporter destination</a> <i>reference</i>
Tree	<a href="#">destination</a>
Reference	<b>configure</b> <a href="#">multicast-management multicast-reporting-destination</a> <i>string</i>
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **optional-fields**

Synopsis	Enter the <b>optional-fields</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt igmp-policy</a> <i>string</i> <a href="#">multicast-reporter optional-fields</a>
Tree	<a href="#">optional-fields</a>
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **host-mac** *boolean*

Synopsis	Include host mac address
Context	<b>configure</b> <a href="#">subscriber-mgmt igmp-policy</a> <i>string</i> <a href="#">multicast-reporter optional-fields host-mac</a> <i>boolean</i>
Tree	<a href="#">host-mac</a>
Default	false
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**pppoe-session-id** *boolean*

Synopsis	Include PPPoE session ID in multicast reporting message
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">igmp-policy</a> <i>string</i> <a href="#">multicast-reporter</a> <a href="#">optional-fields</a> <a href="#">pppoe-session-id</a> <i>boolean</i>
Tree	<a href="#">pppoe-session-id</a>
Default	false
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**sap-id** *boolean*

Synopsis	Include sap ID
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">igmp-policy</a> <i>string</i> <a href="#">multicast-reporter</a> <a href="#">optional-fields</a> <a href="#">sap-id</a> <i>boolean</i>
Tree	<a href="#">sap-id</a>
Default	false
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**svc-id** *boolean*

Synopsis	Include service ID
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">igmp-policy</a> <i>string</i> <a href="#">multicast-reporter</a> <a href="#">optional-fields</a> <a href="#">svc-id</a> <i>boolean</i>
Tree	<a href="#">svc-id</a>
Default	false
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**query-interval** *number*

Synopsis	Time between two consecutive host-query messages
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">igmp-policy</a> <i>string</i> <a href="#">query-interval</a> <i>number</i>
Tree	<a href="#">query-interval</a>
Range	2 to 1024
Introduced	16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **query-last-member-interval** *number*

Synopsis Time between group-specific query messages  
 Context **configure** [subscriber-mgmt igmp-policy](#) *string* [query-last-member-interval](#) *number*  
 Tree [query-last-member-interval](#)  
 Range 1 to 1023  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **query-response-interval** *number*

Synopsis Time to wait for a response to the host-query messages  
 Context **configure** [subscriber-mgmt igmp-policy](#) *string* [query-response-interval](#) *number*  
 Tree [query-response-interval](#)  
 Range 1 to 1023  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **redirection-policy** *reference*

Synopsis Multicast redirection action applied to the subscriber  
 Context **configure** [subscriber-mgmt igmp-policy](#) *string* [redirection-policy](#) *reference*  
 Tree [redirection-policy](#)  
 Reference **configure** [policy-options policy-statement](#) *string*  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **replication** *keyword*

Synopsis Multicast replication mode for subscriber multicast  
 Context **configure** [subscriber-mgmt igmp-policy](#) *string* [replication](#) *keyword*  
 Tree [replication](#)  
 Options per-sap, per-host, per-spi

Default	per-sap
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **router-alert-check** *boolean*

Synopsis	Enable router alert checking for IGMP or MLD messages
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">igmp-policy</a> <i>string</i> <a href="#">router-alert-check</a> <i>boolean</i>
Tree	<a href="#">router-alert-check</a>
Default	true
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **static**

Synopsis	Enter the <b>static</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">igmp-policy</a> <i>string</i> <a href="#">static</a>
Tree	<a href="#">static</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **group** [[group-address](#)] *string*

Synopsis	Enter the <b>group</b> list instance
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">igmp-policy</a> <i>string</i> <a href="#">static</a> <a href="#">group</a> <i>string</i>
Tree	<a href="#">group</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **[group-address]** *string*

Synopsis	Group address of static IGMP multicast channel
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">igmp-policy</a> <i>string</i> <a href="#">static</a> <a href="#">group</a> <i>string</i>
Tree	<a href="#">group</a>

Description	This command configures an address that receives data on an interface. The IP address must be unique for each static group.
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **source** [[source-address](#)] *string*

Synopsis	Add a list entry for <b>source</b>
Context	<b>configure</b> <a href="#">subscriber-mgmt igmp-policy</a> <i>string</i> <a href="#">static group</a> <i>string</i> <a href="#">source</a> <i>string</i>
Tree	<a href="#">source</a>
Notes	The following elements are part of a mandatory choice: <b>source</b> or <b>starg</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **[source-address]** *string*

Synopsis	Source IP address of multicast channel sending data
Context	<b>configure</b> <a href="#">subscriber-mgmt igmp-policy</a> <i>string</i> <a href="#">static group</a> <i>string</i> <a href="#">source</a> <i>string</i>
Tree	<a href="#">source</a>
Notes	This element is part of a list key.
Introduced	16.0.R2
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **starg**

Synopsis	any source address (*,G)
Context	<b>configure</b> <a href="#">subscriber-mgmt igmp-policy</a> <i>string</i> <a href="#">static group</a> <i>string</i> <a href="#">starg</a>
Tree	<a href="#">starg</a>
Notes	The following elements are part of a mandatory choice: <b>source</b> or <b>starg</b> .
Introduced	16.0.R2
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**use-multicast-destination-mac** *boolean*

Synopsis	Use multicast destination mac address for outgoing traffic.
Context	<b>configure</b> <a href="#">subscriber-mgmt igmp-policy</a> <i>string</i> <a href="#">use-multicast-destination-mac</a> <i>boolean</i>
Tree	<a href="#">use-multicast-destination-mac</a>
Default	false
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**version** *keyword*

Synopsis	IGMP protocol version
Context	<b>configure</b> <a href="#">subscriber-mgmt igmp-policy</a> <i>string</i> <a href="#">version</a> <i>keyword</i>
Tree	<a href="#">version</a>
Options	1, 2, 3
Default	3
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**ipoe-session-policy** [[name](#)] *string*

Synopsis	Enter the <b>ipoe-session-policy</b> list instance
Context	<b>configure</b> <a href="#">subscriber-mgmt ipoe-session-policy</a> <i>string</i>
Tree	<a href="#">ipoe-session-policy</a>
Max. Instances	256
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**[name]** *string*

Synopsis	IPoE session policy name
Context	<b>configure</b> <a href="#">subscriber-mgmt ipoe-session-policy</a> <i>string</i>
Tree	<a href="#">ipoe-session-policy</a>
String Length	1 to 32
Notes	This element is part of a list key.

Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **circuit-id-from-auth** *boolean*

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis Use circuit ID from authentication server to identify session  
 Context **configure** [subscriber-mgmt ipoe-session-policy](#) *string* [circuit-id-from-auth](#) *boolean*  
 Tree [circuit-id-from-auth](#)  
 Default false  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **description** *string*

Synopsis Text description  
 Context **configure** [subscriber-mgmt ipoe-session-policy](#) *string* [description](#) *string*  
 Tree [description](#)  
 String Length 1 to 80  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **session-key**

Synopsis Enter the **session-key** context  
 Context **configure** [subscriber-mgmt ipoe-session-policy](#) *string* [session-key](#)  
 Tree [session-key](#)  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**cid** *boolean***WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Use the Circuit ID as part of the index
Context	<b>configure</b> <a href="#">subscriber-mgmt ipoe-session-policy</a> <i>string</i> <a href="#">session-key cid</a> <i>boolean</i>
Tree	<a href="#">cid</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**mac** *boolean*

Synopsis	Use the MAC address as part of the index
Context	<b>configure</b> <a href="#">subscriber-mgmt ipoe-session-policy</a> <i>string</i> <a href="#">session-key mac</a> <i>boolean</i>
Tree	<a href="#">mac</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**rid** *boolean***WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Use the remote ID as part of the index
Context	<b>configure</b> <a href="#">subscriber-mgmt ipoe-session-policy</a> <i>string</i> <a href="#">session-key rid</a> <i>boolean</i>
Tree	<a href="#">rid</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**sap** *boolean*

Synopsis	Use the SAP ID as part of the index
Context	<b>configure</b> <a href="#">subscriber-mgmt ipoe-session-policy</a> <i>string</i> <a href="#">session-key sap</a> <i>boolean</i>
Tree	<a href="#">sap</a>
Introduced	16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **session-timeout** (*number* | *keyword*)

Synopsis Timeout for IPoE sessions

Context **configure** [subscriber-mgmt ipoe-session-policy](#) *string* **session-timeout** (*number* | *keyword*)

Tree [session-timeout](#)

Range 1 to 31104000

Options unlimited

Default unlimited

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **isa-filter** [[name](#)] *string*

Synopsis Enter the **isa-filter** list instance

Context **configure** [subscriber-mgmt isa-filter](#) *string*

Tree [isa-filter](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### [[name](#)] *string*

Synopsis ISA filter name

Context **configure** [subscriber-mgmt isa-filter](#) *string*

Tree [isa-filter](#)

String Length 1 to 32

Notes This element is part of a list key.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **description** *string*

Synopsis Text description

Context	<b>configure</b> <a href="#">subscriber-mgmt isa-filter</a> <i>string</i> <a href="#">description</a> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## ipv4

Synopsis	Enter the <b>ipv4</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt isa-filter</a> <i>string</i> <a href="#">ipv4</a>
Tree	<a href="#">ipv4</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## default-action *keyword*

Synopsis	Action for non-matching entry
Context	<b>configure</b> <a href="#">subscriber-mgmt isa-filter</a> <i>string</i> <a href="#">ipv4</a> <a href="#">default-action</a> <i>keyword</i>
Tree	<a href="#">default-action</a>
Options	drop – Drop packets forward – Forward packets
Default	drop
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## entry [*id*] *number*

Synopsis	Enter the <b>entry</b> list instance
Context	<b>configure</b> <a href="#">subscriber-mgmt isa-filter</a> <i>string</i> <a href="#">ipv4</a> <a href="#">entry</a> <i>number</i>
Tree	<a href="#">entry</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## [*id*] *number*

Synopsis	ISA filter entry ID
----------	---------------------

---

Context	<b>configure</b> <a href="#">subscriber-mgmt isa-filter</a> <i>string</i> <a href="#">ipv4 entry</a> <i>number</i>
Tree	<a href="#">entry</a>
Range	1 to 1024
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## action

Synopsis	Enable the <b>action</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt isa-filter</a> <i>string</i> <a href="#">ipv4 entry</a> <i>number</i> <a href="#">action</a>
Tree	<a href="#">action</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## drop

Synopsis	A packet matching the entry will be dropped
Context	<b>configure</b> <a href="#">subscriber-mgmt isa-filter</a> <i>string</i> <a href="#">ipv4 entry</a> <i>number</i> <a href="#">action</a> <a href="#">drop</a>
Tree	<a href="#">drop</a>
Notes	The following elements are part of a mandatory choice: <b>drop</b> , <b>forward</b> , or <b>http-redirect</b> .
Introduced	16.0.R5
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## forward

Synopsis	A packet matching the entry will be forwarded
Context	<b>configure</b> <a href="#">subscriber-mgmt isa-filter</a> <i>string</i> <a href="#">ipv4 entry</a> <i>number</i> <a href="#">action</a> <a href="#">forward</a>
Tree	<a href="#">forward</a>
Notes	The following elements are part of a mandatory choice: <b>drop</b> , <b>forward</b> , or <b>http-redirect</b> .
Introduced	16.0.R5
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## http-redirect

Synopsis	Enable the <b>http-redirect</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt isa-filter string ipv4 entry number action http-redirect</a>
Tree	<a href="#">http-redirect</a>
Description	Commands in this context apply the HTTP redirect functionality to HTTP flows that match the entry. Other packets are dropped.
Notes	The following elements are part of a mandatory choice: <b>drop</b> , <b>forward</b> , or <b>http-redirect</b> .
Introduced	20.5.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

## url string

### WARNING:

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	HTTP URL to which the matching traffic is redirected
Context	<b>configure</b> <a href="#">subscriber-mgmt isa-filter string ipv4 entry number action http-redirect url string</a>
Tree	<a href="#">url</a>
Description	This command specifies the URL to which HTTP flows matching the entry are redirected. The URL can be overridden by AAA.  Only macros \$URL, \$MAC, \$IP are supported. For unsupported macros, the string is not modified.
String Length	1 to 255
Notes	This element is mandatory.
Introduced	20.5.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

## description string

Synopsis	Text description
Context	<b>configure</b> <a href="#">subscriber-mgmt isa-filter string ipv4 entry number description string</a>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## match

Synopsis Enter the **match** context

Context **configure** [subscriber-mgmt isa-filter string ipv4 entry number match](#)

Tree [match](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## dst-ip string

Synopsis Destination IPv4 prefix

Context **configure** [subscriber-mgmt isa-filter string ipv4 entry number match dst-ip string](#)

Tree [dst-ip](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## dst-port

Synopsis Enter the **dst-port** context

Context **configure** [subscriber-mgmt isa-filter string ipv4 entry number match dst-port](#)

Tree [dst-port](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## equals number

Synopsis Exact port number

Context **configure** [subscriber-mgmt isa-filter string ipv4 entry number match dst-port equals number](#)

Tree [equals](#)

Range 0 | 1 to 65535

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**protocol** *keyword*

Synopsis	Protocol
Context	<b>configure</b> <a href="#">subscriber-mgmt isa-filter string ipv4 entry number match protocol keyword</a>
Tree	<a href="#">protocol</a>
Options	icmp – Match only ICMP packets tcp – Match only TCP packets udp – Match only UDP packets gre – Match only GRE packets
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**ipv6**

Synopsis	Enter the <b>ipv6</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt isa-filter string ipv6</a>
Tree	<a href="#">ipv6</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**default-action** *keyword*

Synopsis	Action for non-matching entry
Context	<b>configure</b> <a href="#">subscriber-mgmt isa-filter string ipv6 default-action keyword</a>
Tree	<a href="#">default-action</a>
Options	drop – Drop packets forward – Forward packets
Default	drop
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**entry** [*id*] *number*

Synopsis	Enter the <b>entry</b> list instance
Context	<b>configure</b> <a href="#">subscriber-mgmt isa-filter string ipv6 entry number</a>
Tree	<a href="#">entry</a>

Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**[id]** *number*

Synopsis	ISA filter entry ID
Context	<b>configure</b> <a href="#">subscriber-mgmt isa-filter</a> <i>string</i> <a href="#">ipv6 entry</a> <i>number</i>
Tree	<a href="#">entry</a>
Range	1 to 1024
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**action**

Synopsis	Enable the <b>action</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt isa-filter</a> <i>string</i> <a href="#">ipv6 entry</a> <i>number</i> <b>action</b>
Tree	<a href="#">action</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**drop**

Synopsis	A packet matching the entry will be dropped
Context	<b>configure</b> <a href="#">subscriber-mgmt isa-filter</a> <i>string</i> <a href="#">ipv6 entry</a> <i>number</i> <b>action</b> <b>drop</b>
Tree	<a href="#">drop</a>
Notes	The following elements are part of a mandatory choice: <b>drop</b> , <b>forward</b> , or <b>http-redirect</b> .
Introduced	16.0.R5
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**forward**

Synopsis	A packet matching the entry will be forwarded
Context	<b>configure</b> <a href="#">subscriber-mgmt isa-filter</a> <i>string</i> <a href="#">ipv6 entry</a> <i>number</i> <b>action</b> <b>forward</b>
Tree	<a href="#">forward</a>

Notes	The following elements are part of a mandatory choice: <b>drop</b> , <b>forward</b> , or <b>http-redirect</b> .
Introduced	16.0.R5
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## http-redirect

Synopsis	Enable the <b>http-redirect</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">isa-filter</a> <i>string</i> <a href="#">ipv6</a> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">http-redirect</a>
Tree	<a href="#">http-redirect</a>
Description	Commands in this context apply the HTTP redirect functionality to HTTP flows that match the entry. Other packets are dropped.
Notes	The following elements are part of a mandatory choice: <b>drop</b> , <b>forward</b> , or <b>http-redirect</b> .
Introduced	20.5.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

## url *string*

### WARNING:

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	HTTP URL to which the matching traffic is redirected
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">isa-filter</a> <i>string</i> <a href="#">ipv6</a> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">http-redirect</a> <a href="#">url</a> <i>string</i>
Tree	<a href="#">url</a>
Description	This command specifies the URL to which HTTP flows matching the entry are redirected. The URL can be overridden by AAA.  Only macros \$URL, \$MAC, \$IP are supported. For unsupported macros, the string is not modified.
String Length	1 to 255
Notes	This element is mandatory.
Introduced	20.5.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

## description *string*

Synopsis	Text description
----------	------------------

Context	<b>configure subscriber-mgmt isa-filter</b> <i>string ipv6 entry number description string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## match

Synopsis	Enter the <b>match</b> context
Context	<b>configure subscriber-mgmt isa-filter</b> <i>string ipv6 entry number match</i>
Tree	<a href="#">match</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## dst-ip *string*

Synopsis	Destination IPv6 prefix
Context	<b>configure subscriber-mgmt isa-filter</b> <i>string ipv6 entry number match dst-ip string</i>
Tree	<a href="#">dst-ip</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## dst-port

Synopsis	Enter the <b>dst-port</b> context
Context	<b>configure subscriber-mgmt isa-filter</b> <i>string ipv6 entry number match dst-port</i>
Tree	<a href="#">dst-port</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## equals *number*

Synopsis	Exact port number
Context	<b>configure subscriber-mgmt isa-filter</b> <i>string ipv6 entry number match dst-port equals number</i>
Tree	<a href="#">equals</a>

Range	0   1 to 65535
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**protocol** *keyword*

Synopsis	Protocol
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">isa-filter</a> <i>string</i> <a href="#">ipv6</a> <a href="#">entry</a> <a href="#">number</a> <a href="#">match</a> <b>protocol</b> <i>keyword</i>
Tree	<a href="#">protocol</a>
Options	icmp – Match only ICMP packets tcp – Match only TCP packets udp – Match only UDP packets gre – Match only GRE packets
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**type** *keyword***WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Limit what the ISA filter can be used for
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">isa-filter</a> <i>string</i> <b>type</b> <i>keyword</i>
Tree	<a href="#">type</a>
Options	dsm – Limited to DSM applications
Default	dsm
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**isa-policer** [[name](#)] *string*

Synopsis	Enter the <b>isa-policer</b> list instance
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">isa-policer</a> <i>string</i>
Tree	<a href="#">isa-policer</a>
Max. Instances	128

Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **[name]** *string*

Synopsis ISA policer name  
 Context **configure** [subscriber-mgmt isa-policer](#) *string*  
 Tree [isa-policer](#)  
 String Length 1 to 32  
 Notes This element is part of a list key.  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **action** *keyword*

Synopsis Action for in-profile and out-of-profile packets  
 Context **configure** [subscriber-mgmt isa-policer](#) *string* **action** *keyword*  
 Tree [action](#)  
 Options permit-deny – Permit or deny packets based on policer outcome  
 priority-mark – Mark packets as in or out of profile based on policer outcome  
 Default permit-deny  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **adaptation-rule**

Synopsis Enter the **adaptation-rule** context  
 Context **configure** [subscriber-mgmt isa-policer](#) *string* **adaptation-rule**  
 Tree [adaptation-rule](#)  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **cir** *keyword*

Synopsis Committed information rate

Context	<b>configure subscriber-mgmt isa-policer</b> <i>string</i> <b>adaptation-rule cir</b> <i>keyword</i>
Tree	<b>cir</b>
Options	max, min, closest
Default	closest
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**pir** *keyword*

Synopsis	Peak Information Rate
Context	<b>configure subscriber-mgmt isa-policer</b> <i>string</i> <b>adaptation-rule pir</b> <i>keyword</i>
Tree	<b>pir</b>
Options	max, min, closest
Default	closest
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**cbs** *number*

Synopsis	Committed burst size
Context	<b>configure subscriber-mgmt isa-policer</b> <i>string</i> <b>cbs</b> <i>number</i>
Tree	<b>cbs</b>
Range	0 to 131071
Units	kilobytes
Default	0
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**description** *string*

Synopsis	Text description
Context	<b>configure subscriber-mgmt isa-policer</b> <i>string</i> <b>description</b> <i>string</i>
Tree	<b>description</b>
String Length	1 to 80
Introduced	16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **mbs** *number*

Synopsis Maximum Burst Size  
 Context **configure** [subscriber-mgmt isa-policer](#) *string* [mbs](#) *number*  
 Tree [mbs](#)  
 Range 0 to 131071  
 Units kilobytes  
 Default 0  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **rate**

Synopsis Enter the **rate** context  
 Context **configure** [subscriber-mgmt isa-policer](#) *string* [rate](#)  
 Tree [rate](#)  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **cir** (*number* | *keyword*)

Synopsis Committed information rate  
 Context **configure** [subscriber-mgmt isa-policer](#) *string* [rate](#) [cir](#) (*number* | *keyword*)  
 Tree [cir](#)  
 Range 0 to 100000000  
 Units kilobps  
 Options max  
 Default 0  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**pir** (*number* | *keyword*)

Synopsis	Peak Information Rate
Context	<b>configure</b> <a href="#">subscriber-mgmt isa-policer</a> <i>string</i> <a href="#">rate</a> <a href="#">pir</a> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">pir</a>
Range	1 to 100000000
Units	kilobps
Options	max
Default	max
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**type** *keyword***WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Policing technique
Context	<b>configure</b> <a href="#">subscriber-mgmt isa-policer</a> <i>string</i> <a href="#">type</a> <i>keyword</i>
Tree	<a href="#">type</a>
Options	single-bucket-bandwidth – Police traffic using a single bucket dual-bucket-bandwidth – Police traffic using dual buckets
Default	single-bucket-bandwidth
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**isa-service-chaining**

Synopsis	Enter the <b>isa-service-chaining</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt isa-service-chaining</a>
Tree	<a href="#">isa-service-chaining</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**evpn [id] string**

Synopsis	Enter the <b>evpn</b> list instance
Context	<b>configure</b> <a href="#">subscriber-mgmt isa-service-chaining evpn string</a>
Tree	<a href="#">evpn</a>
Max. Instances	1024
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**[id] string**

Synopsis	EVPN service ID
Context	<b>configure</b> <a href="#">subscriber-mgmt isa-service-chaining evpn string</a>
Tree	<a href="#">evpn</a>
String Length	1 to 64
Notes	This element is part of a list key.
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**admin-state keyword**

Synopsis	Administrative state of EVPN
Context	<b>configure</b> <a href="#">subscriber-mgmt isa-service-chaining evpn string admin-state keyword</a>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**bgp**

Synopsis	Enter the <b>bgp</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt isa-service-chaining evpn string bgp</a>
Tree	<a href="#">bgp</a>
Introduced	16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## route-distinguisher

Synopsis Enter the **route-distinguisher** context

Context **configure** [subscriber-mgmt](#) [isa-service-chaining](#) [evpn](#) *string* [bgp](#) [route-distinguisher](#)

Tree [route-distinguisher](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## rd (*keyword* | *vpn-route-distinguisher*)

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis RD component for NLRI

Context **configure** [subscriber-mgmt](#) [isa-service-chaining](#) [evpn](#) *string* [bgp](#) [route-distinguisher](#) [rd](#) (*keyword* | *vpn-route-distinguisher*)

Tree [rd](#)

Options auto-rd

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## route-target

Synopsis Enable the **route-target** context

Context **configure** [subscriber-mgmt](#) [isa-service-chaining](#) [evpn](#) *string* [bgp](#) [route-target](#)

Tree [route-target](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**export string****WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Extended community name for default export policy
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">isa-service-chaining</a> <a href="#">evpn</a> <a href="#">string</a> <a href="#">bgp</a> <a href="#">route-target</a> <a href="#">export</a> <a href="#">string</a>
Tree	<a href="#">export</a>
String Length	10 to 32
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**import string****WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Extended community name for default import policy
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">isa-service-chaining</a> <a href="#">evpn</a> <a href="#">string</a> <a href="#">bgp</a> <a href="#">route-target</a> <a href="#">import</a> <a href="#">string</a>
Tree	<a href="#">import</a>
String Length	10 to 32
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**description string**

Synopsis	Text description
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">isa-service-chaining</a> <a href="#">evpn</a> <a href="#">string</a> <a href="#">description</a> <a href="#">string</a>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## export

Synopsis	Enter the <b>export</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">isa-service-chaining</a> <a href="#">evpn</a> <i>string</i> <b>export</b>
Tree	<a href="#">export</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## advertise-pools

Synopsis	Enter the <b>advertise-pools</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">isa-service-chaining</a> <a href="#">evpn</a> <i>string</i> <b>export</b> <b>advertise-pools</b>
Tree	<a href="#">advertise-pools</a>
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## admin-state *keyword*

Synopsis	Administrative state of NAT pool route advertisement
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">isa-service-chaining</a> <a href="#">evpn</a> <i>string</i> <b>export</b> <b>advertise-pools</b> <a href="#">admin-state</a> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## pool [router-instance](#) *string* **name** *string*

Synopsis	Add a list entry for <b>pool</b>
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">isa-service-chaining</a> <a href="#">evpn</a> <i>string</i> <b>export</b> <b>advertise-pools</b> <b>pool</b> <a href="#">router-instance</a> <i>string</i> <b>name</b> <i>string</i>
Tree	<a href="#">pool</a>
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **router-instance** *string*

Synopsis	Router-instance of the NAT pool
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">isa-service-chaining</a> <a href="#">evpn</a> <i>string</i> <a href="#">export</a> <a href="#">advertise-pools</a> <a href="#">pool</a> <a href="#">router-instance</a> <i>string</i> <a href="#">name</a> <i>string</i>
Tree	<a href="#">pool</a>
Notes	This element is part of a list key.
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **name** *string*

Synopsis	NAT pool name
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">isa-service-chaining</a> <a href="#">evpn</a> <i>string</i> <a href="#">export</a> <a href="#">advertise-pools</a> <a href="#">pool</a> <a href="#">router-instance</a> <i>string</i> <a href="#">name</a> <i>string</i>
Tree	<a href="#">pool</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **gateway-address-range**

Synopsis	Enable the <b>gateway-address-range</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">isa-service-chaining</a> <a href="#">evpn</a> <i>string</i> <a href="#">export</a> <a href="#">gateway-address-range</a>
Tree	<a href="#">gateway-address-range</a>
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **end** *string*

Synopsis	Upper bound of the gateway address range
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">isa-service-chaining</a> <a href="#">evpn</a> <i>string</i> <a href="#">export</a> <a href="#">gateway-address-range</a> <a href="#">end</a> <i>string</i>
Tree	<a href="#">end</a>

Notes	This element is mandatory.
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **start string**

Synopsis	Lower bound of the gateway address range
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">isa-service-chaining</a> <a href="#">evpn</a> <i>string</i> <a href="#">export</a> <a href="#">gateway-address-range</a> <b>start</b> <i>string</i>
Tree	<a href="#">start</a>
Notes	This element is mandatory.
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **vxlan**

Synopsis	Enter the <b>vxlan</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">isa-service-chaining</a> <a href="#">evpn</a> <i>string</i> <a href="#">export</a> <b>vxlan</b>
Tree	<a href="#">vxlan</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **vni number**

#### **WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	VNI of the VXLAN created by the EVPN service
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">isa-service-chaining</a> <a href="#">evpn</a> <i>string</i> <a href="#">export</a> <a href="#">vxlan</a> <b>vni</b> <i>number</i>
Tree	<a href="#">vni</a>
Range	1 to 16777215
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**import-mode** *keyword***WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Import mode for the EVPN
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">isa-service-chaining</a> <a href="#">evpn</a> <i>string</i> <a href="#">import-mode</a> <i>keyword</i>
Tree	<a href="#">import-mode</a>
Options	none, bridged, routed
Default	none
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**prefix-route-resolution** *keyword***WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	How prefix routes should be resolved
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">isa-service-chaining</a> <a href="#">evpn</a> <i>string</i> <a href="#">prefix-route-resolution</a> <i>keyword</i>
Tree	<a href="#">prefix-route-resolution</a>
Options	recursive, non-recursive
Default	recursive
Introduced	16.0.R6
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**mac-prefix** *string*

Synopsis	MAC prefix for all NAT groups for Service Chaining
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">isa-service-chaining</a> <a href="#">mac-prefix</a> <i>string</i>
Tree	<a href="#">mac-prefix</a>
String Length	8
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**vas-filter** [*name*] *string*

Synopsis	Enter the <b>vas-filter</b> list instance
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">isa-service-chaining</a> <a href="#">vas-filter</a> <i>string</i>
Tree	<a href="#">vas-filter</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**[name]** *string*

Synopsis	VAS filter name
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">isa-service-chaining</a> <a href="#">vas-filter</a> <i>string</i>
Tree	<a href="#">vas-filter</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">isa-service-chaining</a> <a href="#">vas-filter</a> <i>string</i> <a href="#">description</a> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**entry** [*id*] *number*

Synopsis	Enter the <b>entry</b> list instance
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">isa-service-chaining</a> <a href="#">vas-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i>
Tree	<a href="#">entry</a>
Max. Instances	64
Introduced	16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **[id]** *number*

Synopsis VAS filter entry ID

Context **configure** [subscriber-mgmt](#) [isa-service-chaining](#) [vas-filter](#) *string* [entry](#) *number*

Tree [entry](#)

Range 1 to 65535

Notes This element is part of a list key.

Introduced 16.0.R4

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **action** [[direction](#)] *keyword*

Synopsis Enter the **action** list instance

Context **configure** [subscriber-mgmt](#) [isa-service-chaining](#) [vas-filter](#) *string* [entry](#) *number* [action](#) *keyword*

Tree [action](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **[direction]** *keyword*

Synopsis Direction for the action in a VAS filter entry

Context **configure** [subscriber-mgmt](#) [isa-service-chaining](#) [vas-filter](#) *string* [entry](#) *number* [action](#) *keyword*

Tree [action](#)

Options upstream, downstream

Notes This element is part of a list key.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **fail-action** *keyword*

Synopsis Action for unresolved SF-IP or ESI

Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">isa-service-chaining</a> <a href="#">vas-filter</a> <i>string</i> <i>entry</i> <i>number</i> <i>action</i> <i>keyword</i> <a href="#">fail-action</a> <i>keyword</i>
Tree	<a href="#">fail-action</a>
Options	drop, accept
Default	accept
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## forward

Synopsis	Enable the <b>forward</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">isa-service-chaining</a> <a href="#">vas-filter</a> <i>string</i> <i>entry</i> <i>number</i> <i>action</i> <i>keyword</i> <a href="#">forward</a>
Tree	<a href="#">forward</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## esi string

Synopsis	ESI for the action in the VAS filter entry
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">isa-service-chaining</a> <a href="#">vas-filter</a> <i>string</i> <i>entry</i> <i>number</i> <i>action</i> <i>keyword</i> <a href="#">forward</a> <a href="#">esi</a> <i>string</i>
Tree	<a href="#">esi</a>
Default	00:00:00:00:00:00:00:00:00
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## sf-ip (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	Forwarding SF IP address for the action
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">isa-service-chaining</a> <a href="#">vas-filter</a> <i>string</i> <i>entry</i> <i>number</i> <i>action</i> <i>keyword</i> <a href="#">forward</a> <a href="#">sf-ip</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	<a href="#">sf-ip</a>
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## **svc reference**

Synopsis	EVPN service used for forwarding packets
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">isa-service-chaining</a> <a href="#">vas-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <i>keyword</i> <a href="#">forward</a> <a href="#">svc</a> <i>reference</i>
Tree	<a href="#">svc</a>
Reference	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">isa-service-chaining</a> <a href="#">evpn</a> <i>string</i>
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## **insert-nsh**

Synopsis	Enter the <b>insert-nsh</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">isa-service-chaining</a> <a href="#">vas-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <i>keyword</i> <a href="#">insert-nsh</a>
Tree	<a href="#">insert-nsh</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## **meta-data**

Synopsis	Enter the <b>meta-data</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">isa-service-chaining</a> <a href="#">vas-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <i>keyword</i> <a href="#">insert-nsh</a> <a href="#">meta-data</a>
Tree	<a href="#">meta-data</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## **insert-subscriber-id**

Synopsis	Insert the subscriber-id in the NSH
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">isa-service-chaining</a> <a href="#">vas-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <i>keyword</i> <a href="#">insert-nsh</a> <a href="#">meta-data</a> <a href="#">insert-subscriber-id</a>
Tree	<a href="#">insert-subscriber-id</a>
Notes	The following elements are part of a choice: <b>insert-subscriber-id</b> or <b>opaque-data</b> .

Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **opaque-data** *string*

Synopsis	Opaque meta-data for the NSH
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">isa-service-chaining</a> <a href="#">vas-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <i>keyword</i> <a href="#">insert-nsh</a> <a href="#">meta-data</a> <a href="#">opaque-data</a> <i>string</i>
Tree	<a href="#">opaque-data</a>
String Length	10 18 26 34
Notes	The following elements are part of a choice: <b>insert-subscriber-id</b> or <b>opaque-data</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **svc-path**

Synopsis	Enable the <b>svc-path</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">isa-service-chaining</a> <a href="#">vas-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <i>keyword</i> <a href="#">insert-nsh</a> <a href="#">svc-path</a>
Tree	<a href="#">svc-path</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **path-id** *number*

Synopsis	Path ID in the base part of NSH
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">isa-service-chaining</a> <a href="#">vas-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <i>keyword</i> <a href="#">insert-nsh</a> <a href="#">svc-path</a> <a href="#">path-id</a> <i>number</i>
Tree	<a href="#">path-id</a>
Range	1 to 16777215
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**svc-index** *number*

Synopsis	Service index inserted in the base part of NSH
Context	<b>configure</b> <b>subscriber-mgmt</b> <b>isa-service-chaining</b> <b>vas-filter</b> <i>string</i> <b>entry</b> <i>number</i> <b>action</b> <i>keyword</i> <b>insert-nsh</b> <b>svc-path</b> <b>svc-index</b> <i>number</i>
Tree	<a href="#">svc-index</a>
Range	1 to 255
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**admin-state** *keyword*

Synopsis	Administrative state of the VAS filter
Context	<b>configure</b> <b>subscriber-mgmt</b> <b>isa-service-chaining</b> <b>vas-filter</b> <i>string</i> <b>entry</b> <i>number</i> <b>admin-state</b> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**description** *string*

Synopsis	Text description
Context	<b>configure</b> <b>subscriber-mgmt</b> <b>isa-service-chaining</b> <b>vas-filter</b> <i>string</i> <b>entry</b> <i>number</i> <b>description</b> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**match****WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Enter the <b>match</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">isa-service-chaining</a> <a href="#">vas-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">match</a>
Tree	<a href="#">match</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **foreign-ip** (*ipv4-unicast-prefix* | *ipv4-unicast-address*)

#### **WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Foreign IP address or prefix for match criterion
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">isa-service-chaining</a> <a href="#">vas-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">foreign-ip</a> ( <i>ipv4-unicast-prefix</i>   <i>ipv4-unicast-address</i> )
Tree	<a href="#">foreign-ip</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **foreign-port** *number*

#### **WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Foreign TCP or UDP port as the match criterion
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">isa-service-chaining</a> <a href="#">vas-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">foreign-port</a> <i>number</i>
Tree	<a href="#">foreign-port</a>
Range	1 to 65535
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**protocol** *keyword***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	IP protocol to match the VAS filter
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">isa-service-chaining</a> <a href="#">vas-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <b>protocol</b> <i>keyword</i>
Tree	<a href="#">protocol</a>
Options	tcp-udp – TCP and UDP none – Matching disabled by the IP protocol icmp – ICMP tcp – TCP udp – UDP
Default	none
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**local-user-db** [[name](#)] *string*

Synopsis	Enter the <b>local-user-db</b> list instance
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i>
Tree	<a href="#">local-user-db</a>
Max. Instances	127
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**[name]** *string*

Synopsis	Local user database name
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i>
Tree	<a href="#">local-user-db</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**admin-state** *keyword*

Synopsis	Administrative state of the local user database
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <b>admin-state</b> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <b>description</b> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**ipoe**

Synopsis	Enter the <b>ipoe</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <b>ipoe</b>
Tree	<a href="#">ipoe</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**host** [[host-name](#)] *string*

Synopsis	Enter the <b>host</b> list instance
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <b>host</b> <i>string</i>
Tree	<a href="#">host</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**[host-name]** *string*

Synopsis	Host name
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i>
Tree	<a href="#">host</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**admin-state** *keyword*

Synopsis	Administrative state of the host
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <b>admin-state</b> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**authentication**

Synopsis	Enter the <b>authentication</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <b>authentication</b>
Tree	<a href="#">authentication</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**auth-domain-name** *string*

Synopsis	Domain name appended to the username for the host
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <b>authentication</b> <a href="#">auth-domain-name</a> <i>string</i>
Tree	<a href="#">auth-domain-name</a>
String Length	1 to 32

Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **gx-policy** *string*

Synopsis Diameter application policy  
 Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string* [ipoe](#) [host](#) *string* [authentication](#) [gx-policy](#) *string*  
 Tree [gx-policy](#)  
 String Length 1 to 32  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **nasreq-auth-policy** *string*

Synopsis Diameter NASREQ application policy for authentication  
 Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string* [ipoe](#) [host](#) *string* [authentication](#) [nasreq-auth-policy](#) *string*  
 Tree [nasreq-auth-policy](#)  
 String Length 1 to 32  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **radius-auth-policy** *string*

Synopsis Host authentication policy  
 Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string* [ipoe](#) [host](#) *string* [authentication](#) [radius-auth-policy](#) *string*  
 Tree [radius-auth-policy](#)  
 String Length 1 to 32  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **gtp-interface**

Synopsis Enable the **gtp-interface** context

Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">gtp-interface</a>
Tree	<a href="#">gtp-interface</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**name** *string*

Synopsis	IP interface name
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">gtp-interface</a> <a href="#">name</a> <i>string</i>
Tree	<a href="#">name</a>
String Length	1 to 32
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**service-id** *number*

Synopsis	Service ID
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">gtp-interface</a> <a href="#">service-id</a> <i>number</i>
Tree	<a href="#">service-id</a>
Range	1 to 2147483647   2147483648   2147483649   2147483650   2147483651 to 2147483690   2147483691 to 2148007980   2148007981 to 2148012076   2148012077 to 2148016172   2148016173 to 2148278316   2148278317   2148278318 to 2148278381   2148278382   2148278383 to 2148278386
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**host-identification**

Synopsis	Enter the <b>host-identification</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">host-identification</a>
Tree	<a href="#">host-identification</a>
Introduced	16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## circuit-id

Synopsis Enter the **circuit-id** context

Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string* [ipoe](#) [host](#) *string* [host-identification](#) [circuit-id](#)

Tree [circuit-id](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## ascii-string *string*

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis Circuit ID as ASCII string

Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string* [ipoe](#) [host](#) *string* [host-identification](#) [circuit-id](#) [ascii-string](#) *string*

Tree [ascii-string](#)

String Length 1 to 127

Notes The following elements are part of a choice: **ascii-string** or **hex-string**.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## hex-string *string*

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis Circuit ID as hexadecimal string

Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string* [ipoe](#) [host](#) *string* [host-identification](#) [circuit-id](#) [hex-string](#) *string*

Tree [hex-string](#)

String Length 1 to 256

Notes	The following elements are part of a choice: <b>ascii-string</b> or <b>hex-string</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### derived-id *string*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Derived ID string
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <a href="#">string</a> <a href="#">ipoe</a> <a href="#">host</a> <a href="#">string</a> <a href="#">host-identification</a> <a href="#">derived-id</a> <a href="#">string</a>
Tree	<a href="#">derived-id</a>
String Length	1 to 255
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### encap-tag-range

Synopsis	Enable the <b>encap-tag-range</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <a href="#">string</a> <a href="#">ipoe</a> <a href="#">host</a> <a href="#">string</a> <a href="#">host-identification</a> <a href="#">encap-tag-range</a>
Tree	<a href="#">encap-tag-range</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### from *string*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Start tag
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <a href="#">string</a> <a href="#">ipoe</a> <a href="#">host</a> <a href="#">string</a> <a href="#">host-identification</a> <a href="#">encap-tag-range</a> <a href="#">from</a> <a href="#">string</a>
Tree	<a href="#">from</a>
String Length	1 to 11

Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### to string

#### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	End tag
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <a href="#">string</a> <a href="#">ipoe</a> <a href="#">host</a> <a href="#">string</a> <a href="#">host-identification</a> <a href="#">encap-tag-range</a> <a href="#">to</a> <a href="#">string</a>
Tree	<a href="#">to</a>
String Length	1 to 11
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### encap-tag-separate-range

Synopsis	Enter the <b>encap-tag-separate-range</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <a href="#">string</a> <a href="#">ipoe</a> <a href="#">host</a> <a href="#">string</a> <a href="#">host-identification</a> <a href="#">encap-tag-separate-range</a>
Tree	<a href="#">encap-tag-separate-range</a>
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### inner

Synopsis	Enter the <b>inner</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <a href="#">string</a> <a href="#">ipoe</a> <a href="#">host</a> <a href="#">string</a> <a href="#">host-identification</a> <a href="#">encap-tag-separate-range</a> <a href="#">inner</a>
Tree	<a href="#">inner</a>
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## end number

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Upper bound of the inner encapsulation tag range
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">host-identification</a> <a href="#">encap-tag-separate-range</a> <a href="#">inner</a> <b>end</b> <i>number</i>
Tree	<a href="#">end</a>
Description	This command configures an inner end tag for the range of encapsulation tags used for host identification.
Range	0 to 4094
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## start number

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Lower bound of the inner encapsulation tag range
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">host-identification</a> <a href="#">encap-tag-separate-range</a> <a href="#">inner</a> <b>start</b> <i>number</i>
Tree	<a href="#">start</a>
Description	This command configures an inner start tag for the range of encapsulation tags used for host identification.
Range	0 to 4094
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## outer

Synopsis	Enter the <b>outer</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">host-identification</a> <a href="#">encap-tag-separate-range</a> <b>outer</b>
Tree	<a href="#">outer</a>

Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**end number****WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Upper bound of the outer encapsulation tag range
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <a href="#">string ipoe host</a> <a href="#">string host-identification</a> <a href="#">encap-tag-separate-range</a> <a href="#">outer end</a> <i>number</i>
Tree	<a href="#">end</a>
Description	This command configures an outer end tag for the range of encapsulation tags used for host identification.
Range	0 to 4094
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**start number****WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Lower bound of the outer encapsulation tag range
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <a href="#">string ipoe host</a> <a href="#">string host-identification</a> <a href="#">encap-tag-separate-range</a> <a href="#">outer start</a> <i>number</i>
Tree	<a href="#">start</a>
Description	This command configures an outer start tag for the range of encapsulation tags used for host identification.
Range	0 to 4094
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**ip-prefix** (*ipv4-prefix-with-host-bits* | *ipv6-prefix-with-host-bits*)**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	IP interface name
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">host-identification</a> <a href="#">ip-prefix</a> ( <i>ipv4-prefix-with-host-bits</i>   <i>ipv6-prefix-with-host-bits</i> )
Tree	<a href="#">ip-prefix</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**mac string****WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	MAC address
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">host-identification</a> <a href="#">mac string</a>
Tree	<a href="#">mac</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**option60**

Synopsis	Enter the <b>option60</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">host-identification</a> <a href="#">option60</a>
Tree	<a href="#">option60</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## ascii-string *string*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Option 60 as ASCII string
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">host-identification</a> <a href="#">option60</a> <a href="#">ascii-string</a> <i>string</i>
Tree	<a href="#">ascii-string</a>
String Length	1 to 32
Notes	The following elements are part of a choice: <b>ascii-string</b> or <b>hex-string</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## hex-string *string*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Option as a hexadecimal string
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">host-identification</a> <a href="#">option60</a> <a href="#">hex-string</a> <i>string</i>
Tree	<a href="#">hex-string</a>
String Length	1 to 64
Notes	The following elements are part of a choice: <b>ascii-string</b> or <b>hex-string</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## remote-id

Synopsis	Enter the <b>remote-id</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">host-identification</a> <a href="#">remote-id</a>
Tree	<a href="#">remote-id</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## ascii-string *string*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Remote ID as ASCII string
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <a href="#">string</a> <a href="#">ipoe</a> <a href="#">host</a> <a href="#">string</a> <a href="#">host-identification</a> <a href="#">remote-id</a> <a href="#">ascii-string</a> <a href="#">string</a>
Tree	<a href="#">ascii-string</a>
String Length	1 to 255
Notes	The following elements are part of a choice: <b>ascii-string</b> or <b>hex-string</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## hex-string *string*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Remote ID as hexadecimal string
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <a href="#">string</a> <a href="#">ipoe</a> <a href="#">host</a> <a href="#">string</a> <a href="#">host-identification</a> <a href="#">remote-id</a> <a href="#">hex-string</a> <a href="#">string</a>
Tree	<a href="#">hex-string</a>
String Length	1 to 512
Notes	The following elements are part of a choice: <b>ascii-string</b> or <b>hex-string</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## sap-id *string*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	SAP ID
----------	--------

Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">host-identification</a> <a href="#">sap-id</a> <i>string</i>
Tree	<a href="#">sap-id</a>
String Length	1 to 255
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **service-id** *number*

#### **WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Service ID
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">host-identification</a> <a href="#">service-id</a> <i>number</i>
Tree	<a href="#">service-id</a>
Range	1 to 2147483647   2147483648   2147483649   2147483650   2147483651 to 2147483690   2147483691 to 2148007980   2148007981 to 2148012076   2148012077 to 2148016172   2148016173 to 2148278316   2148278317   2148278318 to 2148278381   2148278382   2148278383 to 2148278386
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **string** *string*

#### **WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	VSO string
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">host-identification</a> <a href="#">string</a> <i>string</i>
Tree	<a href="#">string</a>
String Length	1 to 255
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## system-id *string*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	System ID
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">host-identification</a> <a href="#">system-id</a> <i>string</i>
Tree	<a href="#">system-id</a>
String Length	1 to 255
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## identification

Synopsis	Enable the <b>identification</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">identification</a>
Tree	<a href="#">identification</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## ancp-string *string*

Synopsis	ANCP string
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">identification</a> <a href="#">ancp-string</a> <i>string</i>
Tree	<a href="#">ancp-string</a>
String Length	1 to 63
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## app-profile-string *string*

Synopsis	Application profile string
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">identification</a> <a href="#">app-profile-string</a> <i>string</i>
Tree	<a href="#">app-profile-string</a>

String Length 1 to 16  
 Introduced 21.10.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **category-map-name** *string*

Synopsis Category map name  
 Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string* [ipoe](#) [host](#) *string* [identification](#) [category-map-name](#) *string*  
 Tree [category-map-name](#)  
 String Length 1 to 32  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **int-dest-id** *string*

Synopsis Intermediate destination ID  
 Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string* [ipoe](#) [host](#) *string* [identification](#) [int-dest-id](#) *string*  
 Tree [int-dest-id](#)  
 String Length 1 to 32  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **option-number** *number*

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis Identification strings for the subscriber  
 Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string* [ipoe](#) [host](#) *string* [identification](#) [option-number](#) *number*  
 Tree [option-number](#)  
 Range 1 to 254  
 Default 254  
 Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **sla-profile-string** *string*

Synopsis SLA profile string

Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string* [ipoe](#) [host](#) *string* [identification](#) [sla-profile-string](#) *string*

Tree [sla-profile-string](#)

String Length 1 to 32

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **spi-sharing-group-id** *number*

Synopsis SPI sharing group ID

Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string* [ipoe](#) [host](#) *string* [identification](#) [spi-sharing-group-id](#) *number*

Tree [spi-sharing-group-id](#)

Range 0 to 65535

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **sub-profile-string** *string*

Synopsis Sub profile string

Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string* [ipoe](#) [host](#) *string* [identification](#) [sub-profile-string](#) *string*

Tree [sub-profile-string](#)

String Length 1 to 32

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **subscriber-id** *string*

Synopsis Subscriber ID

Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string* [ipoe](#) [host](#) *string* [identification](#) [subscriber-id](#) *string*

Tree	<a href="#">subscriber-id</a>
String Length	1 to 64
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## ipv4

Synopsis	Enter the <b>ipv4</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt local-user-db string ipoe host string ipv4</a>
Tree	<a href="#">ipv4</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## address

Synopsis	Enter the <b>address</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt local-user-db string ipoe host string ipv4 address</a>
Tree	<a href="#">address</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## gi-address *keyword*

Synopsis	Use gi-address to select a pool with the given scope
Context	<b>configure</b> <a href="#">subscriber-mgmt local-user-db string ipoe host string ipv4 address gi-address keyword</a>
Tree	<a href="#">gi-address</a>
Options	subnet-scope, pool-scope
Notes	The following elements are part of a choice: <b>gi-address</b> , <b>ip-address</b> , <b>pool</b> , or <b>use-pool-from-client</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## ip-address *string*

Synopsis	Fixed IPv4 address of the host
----------	--------------------------------

Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">ipv4</a> <a href="#">address</a> <a href="#">ip-address</a> <i>string</i>
Tree	<a href="#">ip-address</a>
Notes	The following elements are part of a choice: <b>gi-address</b> , <b>ip-address</b> , <b>pool</b> , or <b>use-pool-from-client</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## pool

Synopsis	Enable the <b>pool</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">ipv4</a> <a href="#">address</a> <a href="#">pool</a>
Tree	<a href="#">pool</a>
Notes	The following elements are part of a choice: <b>gi-address</b> , <b>ip-address</b> , <b>pool</b> , or <b>use-pool-from-client</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## delimiter *string*

Synopsis	Delimiter separating primary and secondary pool names
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">ipv4</a> <a href="#">address</a> <a href="#">pool</a> <a href="#">delimiter</a> <i>string</i>
Tree	<a href="#">delimiter</a>
String Length	1
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## primary *string*

Synopsis	Primary pool name
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">ipv4</a> <a href="#">address</a> <a href="#">pool</a> <a href="#">primary</a> <i>string</i>
Tree	<a href="#">primary</a>
String Length	1 to 32
Notes	This element is mandatory.

Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **secondary string**

Synopsis Secondary pool name  
Context **configure** [subscriber-mgmt](#) [local-user-db](#) [string ipoe](#) [host](#) [string ipv4](#) [address](#) [pool](#) [secondary](#) [string](#)  
Tree [secondary](#)  
String Length 1 to 32  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **use-pool-from-client**

Synopsis Enable the **use-pool-from-client** context  
Context **configure** [subscriber-mgmt](#) [local-user-db](#) [string ipoe](#) [host](#) [string ipv4](#) [address](#) [use-pool-from-client](#)  
Tree [use-pool-from-client](#)  
Notes The following elements are part of a choice: **gi-address**, **ip-address**, **pool**, or **use-pool-from-client**.  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **delimiter string**

Synopsis Delimiter character to combine primary and secondary pool names  
Context **configure** [subscriber-mgmt](#) [local-user-db](#) [string ipoe](#) [host](#) [string ipv4](#) [address](#) [use-pool-from-client](#) [delimiter](#) [string](#)  
Tree [delimiter](#)  
String Length 1  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**gi-address** *string*

Synopsis	GI addresses based on the host entry in the LUDB
Context	<b>configure</b> <a href="#">subscriber-mgmt local-user-db</a> <i>string ipoe host string ipv4 gi-address string</i>
Tree	<a href="#">gi-address</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**option** [[number](#)] (*number | keyword*)

Synopsis	Enter the <b>option</b> list instance
Context	<b>configure</b> <a href="#">subscriber-mgmt local-user-db</a> <i>string ipoe host string ipv4 option (number   keyword)</i>
Tree	<a href="#">option</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**[number]** (*number | keyword*)

Synopsis	DHCP option to send identification strings to client
Context	<b>configure</b> <a href="#">subscriber-mgmt local-user-db</a> <i>string ipoe host string ipv4 option (number   keyword)</i>
Tree	<a href="#">option</a>
Range	1 to 254
Options	subnet-mask, default-router, dns-server, domain-name, netbios-name-server, netbios-node-type, lease-time, lease-renew-time, lease-rebind-time
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**ascii-string** *string*

Synopsis	DHCP option specified as an ASCII string
Context	<b>configure</b> <a href="#">subscriber-mgmt local-user-db</a> <i>string ipoe host string ipv4 option (number   keyword) ascii-string string</i>
Tree	<a href="#">ascii-string</a>
String Length	1 to 127

Notes	The following elements are part of a mandatory choice: <b>ascii-string</b> , <b>duration</b> , <b>empty</b> , <b>hex-string</b> , <b>ipv4-address</b> , or <b>netbios-node-type</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **duration** *number*

Synopsis	DHCP option as time duration
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string ipoe host string ipv4 option (number   keyword)</i> <b>duration</b> <i>number</i>
Tree	<a href="#">duration</a>
Range	10 to 315446399
Units	seconds
Notes	The following elements are part of a mandatory choice: <b>ascii-string</b> , <b>duration</b> , <b>empty</b> , <b>hex-string</b> , <b>ipv4-address</b> , or <b>netbios-node-type</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **empty**

Synopsis	Empty DHCP option.
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string ipoe host string ipv4 option (number   keyword)</i> <b>empty</b>
Tree	<a href="#">empty</a>
Notes	The following elements are part of a mandatory choice: <b>ascii-string</b> , <b>duration</b> , <b>empty</b> , <b>hex-string</b> , <b>ipv4-address</b> , or <b>netbios-node-type</b> .
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **hex-string** *string*

Synopsis	DHCP option specified as hexadecimal string
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string ipoe host string ipv4 option (number   keyword)</i> <b>hex-string</b> <i>string</i>
Tree	<a href="#">hex-string</a>
String Length	1 to 256

Notes	The following elements are part of a mandatory choice: <b>ascii-string</b> , <b>duration</b> , <b>empty</b> , <b>hex-string</b> , <b>ipv4-address</b> , or <b>netbios-node-type</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **ipv4-address** *string*

Synopsis	DHCP option as a list of IPv4 addresses
Context	<b>configure</b> <a href="#">subscriber-mgmt local-user-db</a> <i>string ipoe host string ipv4 option (number   keyword) ipv4-address string</i>
Tree	<a href="#">ipv4-address</a>
Max. Instances	4
Notes	The following elements are part of a mandatory choice: <b>ascii-string</b> , <b>duration</b> , <b>empty</b> , <b>hex-string</b> , <b>ipv4-address</b> , or <b>netbios-node-type</b> . This element is ordered by the user.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **netbios-node-type** *keyword*

Synopsis	DHCP option as NetBIOS node type
Context	<b>configure</b> <a href="#">subscriber-mgmt local-user-db</a> <i>string ipoe host string ipv4 option (number   keyword) netbios-node-type keyword</i>
Tree	<a href="#">netbios-node-type</a>
Options	b-node, p-node, m-node, h-node
Notes	The following elements are part of a mandatory choice: <b>ascii-string</b> , <b>duration</b> , <b>empty</b> , <b>hex-string</b> , <b>ipv4-address</b> , or <b>netbios-node-type</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **server** *string*

Synopsis	IPv4 address of the DHCP server
Context	<b>configure</b> <a href="#">subscriber-mgmt local-user-db</a> <i>string ipoe host string ipv4 server string</i>
Tree	<a href="#">server</a>
Introduced	16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## ipv6

Synopsis Enter the **ipv6** context  
 Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string* [ipoe](#) [host](#) *string* **ipv6**  
 Tree [ipv6](#)  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## address *string*

Synopsis Fixed IPv6 address of the host  
 Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string* [ipoe](#) [host](#) *string* **ipv6** [address](#) *string*  
 Tree [address](#)  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## address-pool *string*

Synopsis IPv6 address pool name  
 Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string* [ipoe](#) [host](#) *string* **ipv6** [address-pool](#) *string*  
 Tree [address-pool](#)  
 String Length 1 to 32  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## delegated-prefix *string*

Synopsis IPv6 delegated prefix of this host  
 Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string* [ipoe](#) [host](#) *string* **ipv6** [delegated-prefix](#) *string*  
 Tree [delegated-prefix](#)  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**delegated-prefix-length** *number*

Synopsis	Delegated prefix length
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">ipv6</a> <a href="#">delegated-prefix-length</a> <i>number</i>
Tree	<a href="#">delegated-prefix-length</a>
Range	48 to 64
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**delegated-prefix-pool** *string*

Synopsis	Delegated prefix pool
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">ipv6</a> <a href="#">delegated-prefix-pool</a> <i>string</i>
Tree	<a href="#">delegated-prefix-pool</a>
String Length	1 to 32
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**link-address** *string*

Synopsis	Link address used for prefix selection at DHCP server
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">ipv6</a> <a href="#">link-address</a> <i>string</i>
Tree	<a href="#">link-address</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**option** [[number](#)] (*number* | *keyword*)

Synopsis	Enter the <b>option</b> list instance
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">ipv6</a> <a href="#">option</a> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">option</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**[number]** (*number* | *keyword*)

Synopsis	The number of the DHCPv6 option.
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">ipv6</a> <a href="#">option</a> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">option</a>
Range	23
Options	dns-server
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**hex-string** *string*

Synopsis	DHCP option specified as hexadecimal string
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">ipv6</a> <a href="#">option</a> ( <i>number</i>   <i>keyword</i> ) <a href="#">hex-string</a> <i>string</i>
Tree	<a href="#">hex-string</a>
String Length	1 to 256
Notes	The following elements are part of a mandatory choice: <b>hex-string</b> or <b>ipv6-address</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**ipv6-address** *string*

Synopsis	DHCP option specified as a list of IPv6 addresses
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">ipv6</a> <a href="#">option</a> ( <i>number</i>   <i>keyword</i> ) <a href="#">ipv6-address</a> <i>string</i>
Tree	<a href="#">ipv6-address</a>
Max. Instances	4
Notes	The following elements are part of a mandatory choice: <b>hex-string</b> or <b>ipv6-address</b> . This element is ordered by the user.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **router-advertisement-policy** *string*

Synopsis	IPv6 router advertisement policy
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">ipv6</a> <a href="#">router-advertisement-policy</a> <i>string</i>
Tree	<a href="#">router-advertisement-policy</a>
String Length	1 to 32
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **server** *string*

Synopsis	IPv6 address of the DHCP server
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">ipv6</a> <a href="#">server</a> <i>string</i>
Tree	<a href="#">server</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **slaac-prefix** *string*

Synopsis	IPv6 SLAAC prefix of this host
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">ipv6</a> <a href="#">slaac-prefix</a> <i>string</i>
Tree	<a href="#">slaac-prefix</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **slaac-prefix-pool** *string*

Synopsis	IPv6 SLAAC prefix pool of this host
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">ipv6</a> <a href="#">slaac-prefix-pool</a> <i>string</i>
Tree	<a href="#">slaac-prefix-pool</a>
String Length	1 to 32
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**timers**

Synopsis	Enter the <b>timers</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string ipoe host string ipv6</i> <b>timers</b>
Tree	<a href="#">timers</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**preferred-lifetime** (*number | keyword*)

Synopsis	Time for a lease to remain preferred
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string ipoe host string ipv6</i> <b>timers preferred-lifetime</b> ( <i>number   keyword</i> )
Tree	<a href="#">preferred-lifetime</a>
Range	300 to 315446399
Units	seconds
Options	infinite
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**rebind** *number*

Synopsis	Rebind timer (T2)
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string ipoe host string ipv6</i> <b>timers rebind</b> <i>number</i>
Tree	<a href="#">rebind</a>
Range	0 to 1209600
Units	seconds
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**renew** *number*

Synopsis	Renew timer (T1)
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string ipoe host string ipv6</i> <b>timers renew</b> <i>number</i>

Tree	<a href="#">renew</a>
Range	0 to 604800
Units	seconds
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **valid-lifetime** (*number* | *keyword*)

Synopsis	Time for a lease to remain valid
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">ipv6</a> <a href="#">timers</a> <b>valid-lifetime</b> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">valid-lifetime</a>
Range	300 to 315446399
Units	seconds
Options	infinite
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **match-radius-proxy-cache**

Synopsis	Enter the <b>match-radius-proxy-cache</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <b>match-radius-proxy-cache</b>
Tree	<a href="#">match-radius-proxy-cache</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **fail-action** *keyword*

Synopsis	Action when no match is found
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">match-radius-proxy-cache</a> <b>fail-action</b> <i>keyword</i>
Tree	<a href="#">fail-action</a>
Options	continue, drop
Default	drop
Introduced	16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **mac-format** *string*

Synopsis MAC address format

Context **configure** [subscriber-mgmt](#) [local-user-db](#) [string](#) [ipoe](#) [host](#) [string](#) [match-radius-proxy-cache](#) **mac-format** *string*

Tree [mac-format](#)

String Length 2 to 7

Default aa:

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **match**

Synopsis Enter the **match** context

Context **configure** [subscriber-mgmt](#) [local-user-db](#) [string](#) [ipoe](#) [host](#) [string](#) [match-radius-proxy-cache](#) **match**

Tree [match](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **circuit-id** *boolean*

Synopsis Match circuit ID in DHCP Option 82

Context **configure** [subscriber-mgmt](#) [local-user-db](#) [string](#) [ipoe](#) [host](#) [string](#) [match-radius-proxy-cache](#) [match](#) **circuit-id** *boolean*

Tree [circuit-id](#)

Notes The following elements are part of a choice: **circuit-id**, (**ipv4-option** and **ipv6-option**), **mac**, or **remote-id**.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **ipv4-option** *number*

Synopsis DHCP option number

Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">match-radius-proxy-cache</a> <a href="#">match</a> <a href="#">ipv4-option</a> <i>number</i>
Tree	<a href="#">ipv4-option</a>
Range	1 to 254
Notes	The following elements are part of a choice: <b>circuit-id</b> , ( <b>ipv4-option</b> and <b>ipv6-option</b> ), <b>mac</b> , or <b>remote-id</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **ipv6-option** *number*

Synopsis	DHCPv6 option number
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">match-radius-proxy-cache</a> <a href="#">match</a> <a href="#">ipv6-option</a> <i>number</i>
Tree	<a href="#">ipv6-option</a>
Range	1 to 65535
Notes	The following elements are part of a choice: <b>circuit-id</b> , ( <b>ipv4-option</b> and <b>ipv6-option</b> ), <b>mac</b> , or <b>remote-id</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **mac** *boolean*

Synopsis	Match MAC address of DHCP client
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">match-radius-proxy-cache</a> <a href="#">match</a> <a href="#">mac</a> <i>boolean</i>
Tree	<a href="#">mac</a>
Default	true
Notes	The following elements are part of a choice: <b>circuit-id</b> , ( <b>ipv4-option</b> and <b>ipv6-option</b> ), <b>mac</b> , or <b>remote-id</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **remote-id** *boolean*

Synopsis	Match remote ID in DHCP Option 82
----------	-----------------------------------

Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">match-radius-proxy-cache</a> <a href="#">match</a> <a href="#">remote-id</a> <i>boolean</i>
Tree	<a href="#">remote-id</a>
Notes	The following elements are part of a choice: <b>circuit-id</b> , ( <b>ipv4-option</b> and <b>ipv6-option</b> ), <b>mac</b> , or <b>remote-id</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## server

Synopsis	Enable the <b>server</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">match-radius-proxy-cache</a> <a href="#">server</a>
Tree	<a href="#">server</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## name *string*

Synopsis	Local user database server name
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">match-radius-proxy-cache</a> <a href="#">server</a> <a href="#">name</a> <i>string</i>
Tree	<a href="#">name</a>
String Length	1 to 32
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## service *number*

Synopsis	Service ID
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">match-radius-proxy-cache</a> <a href="#">server</a> <a href="#">service</a> <i>number</i>
Tree	<a href="#">service</a>
Range	1 to 2147483647
Introduced	16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **mld-import** [*policy-name*] *string*

Synopsis Add a list entry for **mld-import**

Context **configure** **subscriber-mgmt** **local-user-db** *string* **ipoe** **host** *string* **mld-import** *string*

Tree **mld-import**

Max. Instances 14

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **[policy-name]** *string*

Synopsis MLD import policy used to control the multicast group

Context **configure** **subscriber-mgmt** **local-user-db** *string* **ipoe** **host** *string* **mld-import** *string*

Tree **mld-import**

String Length 1 to 32

Notes This element is part of a list key.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **msap-defaults**

Synopsis Enter the **msap-defaults** context

Context **configure** **subscriber-mgmt** **local-user-db** *string* **ipoe** **host** *string* **msap-defaults**

Tree **msap-defaults**

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **group-interface**

Synopsis Enable the **group-interface** context

Context **configure** **subscriber-mgmt** **local-user-db** *string* **ipoe** **host** *string* **msap-defaults** **group-interface**

Tree **group-interface**

Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **name** *string*

Synopsis	IP interface name
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">msap-defaults</a> <a href="#">group-interface</a> <a href="#">name</a> <i>string</i>
Tree	<a href="#">name</a>
String Length	1 to 32
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **prefix** *keyword*

Synopsis	Prefix to the IP interface name
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">msap-defaults</a> <a href="#">group-interface</a> <a href="#">prefix</a> <i>keyword</i>
Tree	<a href="#">prefix</a>
Options	port-id
Notes	The following elements are part of a choice: <b>prefix</b> or <b>suffix</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **suffix** *keyword*

Synopsis	Suffix for the group interface
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">msap-defaults</a> <a href="#">group-interface</a> <a href="#">suffix</a> <i>keyword</i>
Tree	<a href="#">suffix</a>
Options	port-id
Notes	The following elements are part of a choice: <b>prefix</b> or <b>suffix</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**policy string**

Synopsis	MSAP policy
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">msap-defaults</a> <a href="#">policy</a> <i>string</i>
Tree	<a href="#">policy</a>
String Length	1 to 32
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**service number**

Synopsis	Service ID
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">msap-defaults</a> <a href="#">service</a> <i>number</i>
Tree	<a href="#">service</a>
Range	1 to 2147483647   2147483648   2147483649   2147483650   2147483651 to 2147483690   2147483691 to 2148007980   2148007981 to 2148012076   2148012077 to 2148016172   2148016173 to 2148278316   2148278317   2148278318 to 2148278381   2148278382   2148278383 to 2148278386
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**radius-accounting-policy**

Synopsis	Enter the <b>radius-accounting-policy</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">radius-accounting-policy</a>
Tree	<a href="#">radius-accounting-policy</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**duplicate string**

Synopsis	RADIUS accounting policy for generating duplicate accounting information
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">radius-accounting-policy</a> <a href="#">duplicate</a> <i>string</i>

Tree	<a href="#">duplicate</a>
String Length	1 to 32
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**name** *string*

Synopsis	RADIUS accounting policy name
Context	<b>configure</b> <a href="#">subscriber-mgmt local-user-db</a> <i>string</i> <a href="#">ipoe host</a> <i>string</i> <a href="#">radius-accounting-policy name</a> <i>string</i>
Tree	<a href="#">name</a>
String Length	1 to 32
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**retail-service-id** *number*

Synopsis	Configure the retail service-id
Context	<b>configure</b> <a href="#">subscriber-mgmt local-user-db</a> <i>string</i> <a href="#">ipoe host</a> <i>string</i> <a href="#">retail-service-id</a> <i>number</i>
Tree	<a href="#">retail-service-id</a>
Range	1 to 2147483647   2147483648   2147483649   2147483650   2147483651 to 2147483690   2147483691 to 2148007980   2148007981 to 2148012076   2148012077 to 2148016172   2148016173 to 2148278316   2148278317   2148278318 to 2148278381   2148278382   2148278383 to 2148278386
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**rip-policy** *string*

Synopsis	RIP policy
Context	<b>configure</b> <a href="#">subscriber-mgmt local-user-db</a> <i>string</i> <a href="#">ipoe host</a> <i>string</i> <a href="#">rip-policy</a> <i>string</i>
Tree	<a href="#">rip-policy</a>
String Length	1 to 32
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## to-client-options

Synopsis	Enter the <b>to-client-options</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt local-user-db</a> <i>string</i> <a href="#">ipoe host</a> <i>string</i> <b>to-client-options</b>
Tree	<a href="#">to-client-options</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## ipv4-option [[number](#)] (*number* | *keyword*)

Synopsis	Enter the <b>ipv4-option</b> list instance
Context	<b>configure</b> <a href="#">subscriber-mgmt local-user-db</a> <i>string</i> <a href="#">ipoe host</a> <i>string</i> <b>to-client-options</b> <a href="#">ipv4-option</a> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">ipv4-option</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## [[number](#)] (*number* | *keyword*)

Synopsis	DHCP option to send identification strings to client
Context	<b>configure</b> <a href="#">subscriber-mgmt local-user-db</a> <i>string</i> <a href="#">ipoe host</a> <i>string</i> <b>to-client-options</b> <a href="#">ipv4-option</a> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">ipv4-option</a>
Range	1 to 254
Options	subnet-mask, default-router, dns-server, domain-name, netbios-name-server, netbios-node-type, lease-time, lease-renew-time, lease-rebind-time
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## ascii-string *string*

Synopsis	DHCP option specified as an ASCII string
Context	<b>configure</b> <a href="#">subscriber-mgmt local-user-db</a> <i>string</i> <a href="#">ipoe host</a> <i>string</i> <b>to-client-options</b> <a href="#">ipv4-option</a> ( <i>number</i>   <i>keyword</i> ) <a href="#">ascii-string</a> <i>string</i>
Tree	<a href="#">ascii-string</a>
String Length	1 to 127

Notes	The following elements are part of a mandatory choice: <b>ascii-string</b> , <b>duration</b> , <b>empty</b> , <b>hex-string</b> , <b>ipv4-address</b> , or <b>netbios-node-type</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **duration** *number*

Synopsis	DHCP option as time duration
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">to-client-options</a> <a href="#">ipv4-option</a> ( <i>number</i>   <i>keyword</i> ) <b>duration</b> <i>number</i>
Tree	<a href="#">duration</a>
Range	10 to 315446399
Units	seconds
Notes	The following elements are part of a mandatory choice: <b>ascii-string</b> , <b>duration</b> , <b>empty</b> , <b>hex-string</b> , <b>ipv4-address</b> , or <b>netbios-node-type</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **empty**

Synopsis	Empty DHCP option
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">to-client-options</a> <a href="#">ipv4-option</a> ( <i>number</i>   <i>keyword</i> ) <b>empty</b>
Tree	<a href="#">empty</a>
Notes	The following elements are part of a mandatory choice: <b>ascii-string</b> , <b>duration</b> , <b>empty</b> , <b>hex-string</b> , <b>ipv4-address</b> , or <b>netbios-node-type</b> .
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **hex-string** *string*

Synopsis	DHCP option specified as hexadecimal string
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">to-client-options</a> <a href="#">ipv4-option</a> ( <i>number</i>   <i>keyword</i> ) <b>hex-string</b> <i>string</i>
Tree	<a href="#">hex-string</a>
String Length	1 to 256

Notes	The following elements are part of a mandatory choice: <b>ascii-string</b> , <b>duration</b> , <b>empty</b> , <b>hex-string</b> , <b>ipv4-address</b> , or <b>netbios-node-type</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **ipv4-address** *string*

Synopsis	DHCP option as a list of IPv4 addresses
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">to-client-options</a> <a href="#">ipv4-option</a> ( <i>number</i>   <i>keyword</i> ) <a href="#">ipv4-address</a> <i>string</i>
Tree	<a href="#">ipv4-address</a>
Max. Instances	4
Notes	The following elements are part of a mandatory choice: <b>ascii-string</b> , <b>duration</b> , <b>empty</b> , <b>hex-string</b> , <b>ipv4-address</b> , or <b>netbios-node-type</b> . This element is ordered by the user.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **netbios-node-type** *keyword*

Synopsis	DHCP option as NetBIOS node type
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">to-client-options</a> <a href="#">ipv4-option</a> ( <i>number</i>   <i>keyword</i> ) <a href="#">netbios-node-type</a> <i>keyword</i>
Tree	<a href="#">netbios-node-type</a>
Options	b-node, p-node, m-node, h-node
Notes	The following elements are part of a mandatory choice: <b>ascii-string</b> , <b>duration</b> , <b>empty</b> , <b>hex-string</b> , <b>ipv4-address</b> , or <b>netbios-node-type</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **ipv6-option** [[number](#)] (*number* | *keyword*)

Synopsis	Enter the <b>ipv6-option</b> list instance
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">to-client-options</a> <a href="#">ipv6-option</a> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">ipv6-option</a>

Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **[number]** (*number* | *keyword*)

Synopsis	DHCP option to send as identification string
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">to-client-options</a> <a href="#">ipv6-option</a> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">ipv6-option</a>
Range	1 to 65535
Options	dns-server, domain-name
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **ascii-string** *string*

Synopsis	DHCP option specified as an ASCII string
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">to-client-options</a> <a href="#">ipv6-option</a> ( <i>number</i>   <i>keyword</i> ) <a href="#">ascii-string</a> <i>string</i>
Tree	<a href="#">ascii-string</a>
String Length	1 to 127
Notes	The following elements are part of a mandatory choice: <b>ascii-string</b> , <b>domain-string</b> , <b>empty</b> , <b>hex-string</b> , or <b>ipv6-address</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **domain-string** *string*

Synopsis	DHCP option specified as a domain name
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">to-client-options</a> <a href="#">ipv6-option</a> ( <i>number</i>   <i>keyword</i> ) <a href="#">domain-string</a> <i>string</i>
Tree	<a href="#">domain-string</a>
String Length	1 to 127
Notes	The following elements are part of a mandatory choice: <b>ascii-string</b> , <b>domain-string</b> , <b>empty</b> , <b>hex-string</b> , or <b>ipv6-address</b> .

Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## empty

Synopsis	Empty DHCP option
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <a href="#">string</a> <a href="#">ipoe</a> <a href="#">host</a> <a href="#">string</a> <a href="#">to-client-options</a> <a href="#">ipv6-option</a> ( <a href="#">number</a>   <a href="#">keyword</a> ) <a href="#">empty</a>
Tree	<a href="#">empty</a>
Notes	The following elements are part of a mandatory choice: <b>ascii-string</b> , <b>domain-string</b> , <b>empty</b> , <b>hex-string</b> , or <b>ipv6-address</b> .
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## hex-string *string*

Synopsis	DHCP option specified as hexadecimal string
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <a href="#">string</a> <a href="#">ipoe</a> <a href="#">host</a> <a href="#">string</a> <a href="#">to-client-options</a> <a href="#">ipv6-option</a> ( <a href="#">number</a>   <a href="#">keyword</a> ) <a href="#">hex-string</a> <a href="#">string</a>
Tree	<a href="#">hex-string</a>
String Length	1 to 256
Notes	The following elements are part of a mandatory choice: <b>ascii-string</b> , <b>domain-string</b> , <b>empty</b> , <b>hex-string</b> , or <b>ipv6-address</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## ipv6-address *string*

Synopsis	DHCP option specified as a list of IPv6 addresses
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <a href="#">string</a> <a href="#">ipoe</a> <a href="#">host</a> <a href="#">string</a> <a href="#">to-client-options</a> <a href="#">ipv6-option</a> ( <a href="#">number</a>   <a href="#">keyword</a> ) <a href="#">ipv6-address</a> <a href="#">string</a>
Tree	<a href="#">ipv6-address</a>
Max. Instances	4
Notes	The following elements are part of a mandatory choice: <b>ascii-string</b> , <b>domain-string</b> , <b>empty</b> , <b>hex-string</b> , or <b>ipv6-address</b> . This element is ordered by the user.

Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## to-server-options

Synopsis Enter the **to-server-options** context  
 Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string* [ipoe](#) [host](#) *string* [to-server-options](#)  
 Tree [to-server-options](#)  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## ipv6-option [[number](#)] (*number* | *keyword*)

Synopsis Enter the **ipv6-option** list instance  
 Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string* [ipoe](#) [host](#) *string* [to-server-options](#) [ipv6-option](#) (*number* | *keyword*)  
 Tree [ipv6-option](#)  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## [[number](#)] (*number* | *keyword*)

Synopsis DHCP option to send as identification string  
 Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string* [ipoe](#) [host](#) *string* [to-server-options](#) [ipv6-option](#) (*number* | *keyword*)  
 Tree [ipv6-option](#)  
 Range 1 to 65535  
 Options dns-server, domain-name  
 Notes This element is part of a list key.  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## ascii-string *string*

Synopsis DHCP option specified as an ASCII string

Context	<b>configure subscriber-mgmt local-user-db string ipoe host string to-server-options ipv6-option</b> ( <i>number</i>   <i>keyword</i> ) <b>ascii-string string</b>
Tree	<b>ascii-string</b>
String Length	1 to 127
Notes	The following elements are part of a mandatory choice: <b>ascii-string</b> , <b>domain-string</b> , <b>empty</b> , <b>hex-string</b> , or <b>ipv6-address</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **domain-string string**

Synopsis	DHCP option specified as a domain name
Context	<b>configure subscriber-mgmt local-user-db string ipoe host string to-server-options ipv6-option</b> ( <i>number</i>   <i>keyword</i> ) <b>domain-string string</b>
Tree	<b>domain-string</b>
String Length	1 to 127
Notes	The following elements are part of a mandatory choice: <b>ascii-string</b> , <b>domain-string</b> , <b>empty</b> , <b>hex-string</b> , or <b>ipv6-address</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **empty**

Synopsis	Empty DHCP option
Context	<b>configure subscriber-mgmt local-user-db string ipoe host string to-server-options ipv6-option</b> ( <i>number</i>   <i>keyword</i> ) <b>empty</b>
Tree	<b>empty</b>
Notes	The following elements are part of a mandatory choice: <b>ascii-string</b> , <b>domain-string</b> , <b>empty</b> , <b>hex-string</b> , or <b>ipv6-address</b> .
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **hex-string string**

Synopsis	DHCP option specified as hexadecimal string
Context	<b>configure subscriber-mgmt local-user-db string ipoe host string to-server-options ipv6-option</b> ( <i>number</i>   <i>keyword</i> ) <b>hex-string string</b>

Tree	<a href="#">hex-string</a>
String Length	1 to 256
Notes	The following elements are part of a mandatory choice: <b>ascii-string</b> , <b>domain-string</b> , <b>empty</b> , <b>hex-string</b> , or <b>ipv6-address</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **ipv6-address** *string*

Synopsis	DHCP option specified as a list of IPv6 addresses
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">to-server-options</a> <a href="#">ipv6-option</a> ( <i>number</i>   <i>keyword</i> ) <a href="#">ipv6-address</a> <i>string</i>
Tree	<a href="#">ipv6-address</a>
Max. Instances	4
Notes	The following elements are part of a mandatory choice: <b>ascii-string</b> , <b>domain-string</b> , <b>empty</b> , <b>hex-string</b> , or <b>ipv6-address</b> . This element is ordered by the user.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **wpp**

Synopsis	Enter the <b>wpp</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">wpp</a>
Tree	<a href="#">wpp</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **initial**

Synopsis	Enter the <b>initial</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">wpp</a> <a href="#">initial</a>
Tree	<a href="#">initial</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **app-profile** *string*

Synopsis	Initial application profile name
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">wpp</a> <b>initial</b> <a href="#">app-profile</a> <i>string</i>
Tree	<a href="#">app-profile</a>
String Length	1 to 32
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **sla-profile** *string*

Synopsis	Initial SLA profile
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">wpp</a> <b>initial</b> <a href="#">sla-profile</a> <i>string</i>
Tree	<a href="#">sla-profile</a>
String Length	1 to 32
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **sub-profile** *string*

Synopsis	Initial subscriber profile
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">wpp</a> <b>initial</b> <a href="#">sub-profile</a> <i>string</i>
Tree	<a href="#">sub-profile</a>
String Length	1 to 32
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **portal**

Synopsis	Enter the <b>portal</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">wpp</a> <b>portal</b>
Tree	<a href="#">portal</a>
Introduced	16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **name** *string*

Synopsis Web portal server name

Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string* [ipoe](#) [host](#) *string* [wpp](#) [portal](#) **name** *string*

Tree [name](#)

String Length 1 to 32

Notes The following elements are part of a choice: **portal-group** or (**name** and **router-instance**).

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **portal-group** *string*

Synopsis WPP portal group for this interface

Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string* [ipoe](#) [host](#) *string* [wpp](#) [portal](#) **portal-group** *string*

Tree [portal-group](#)

String Length 1 to 32

Notes The following elements are part of a choice: **portal-group** or (**name** and **router-instance**).

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **router-instance** (*keyword* | *number*)

Synopsis Virtual router instance of the WPP portal for the host

Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string* [ipoe](#) [host](#) *string* [wpp](#) [portal](#) **router-instance** (*keyword* | *number*)

Tree [router-instance](#)

Range 1 to 2147483647

Options base

Default base

Notes The following elements are part of a choice: **portal-group** or (**name** and **router-instance**).

Introduced 16.0.R4  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **restore-to-initial-on-disconnect** *keyword*

Synopsis Restore initial profiles after a host has disconnected  
Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string* [ipoe](#) [host](#) *string* [wpp](#) **restore-to-initial-on-disconnect** *keyword*  
Tree [restore-to-initial-on-disconnect](#)  
Options restore, no-restore  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **mask type** *keyword*

Synopsis Enter the **mask** list instance  
Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string* [ipoe](#) **mask type** *keyword*  
Tree [mask](#)  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **type** *keyword*

Synopsis Matching type to identify a host  
Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string* [ipoe](#) **mask type** *keyword*  
Tree [mask](#)  
Options circuit-id, remote-id, sap-id, string, system-id, option60  
Notes This element is part of a list key.  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **prefix**

Synopsis Enable the **prefix** context  
Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string* [ipoe](#) **mask type** *keyword* **prefix**

Tree	<a href="#">prefix</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **length** *number*

Synopsis	PPP mask prefix length
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">mask</a> <a href="#">type</a> <i>keyword</i> <a href="#">prefix</a> <a href="#">length</a> <i>number</i>
Tree	<a href="#">length</a>
Range	1 to 127
Notes	The following elements are part of a mandatory choice: <b>length</b> or <b>string</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **string** *string*

Synopsis	Prefix string
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">mask</a> <a href="#">type</a> <i>keyword</i> <a href="#">prefix</a> <a href="#">string</a> <i>string</i>
Tree	<a href="#">string</a>
String Length	1 to 127
Notes	The following elements are part of a mandatory choice: <b>length</b> or <b>string</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **suffix**

Synopsis	Enable the <b>suffix</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">mask</a> <a href="#">type</a> <i>keyword</i> <a href="#">suffix</a>
Tree	<a href="#">suffix</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**length** *number*

Synopsis	PPP mask suffix length
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">mask</a> <a href="#">type</a> <a href="#">keyword</a> <a href="#">suffix</a> <a href="#">length</a> <i>number</i>
Tree	<a href="#">length</a>
Range	1 to 127
Notes	The following elements are part of a mandatory choice: <b>length</b> or <b>string</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**string** *string*

Synopsis	Suffix string
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">mask</a> <a href="#">type</a> <a href="#">keyword</a> <a href="#">suffix</a> <a href="#">string</a> <i>string</i>
Tree	<a href="#">string</a>
String Length	1 to 127
Notes	The following elements are part of a mandatory choice: <b>length</b> or <b>string</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**match-list** *keyword***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	IPoE host match type
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">match-list</a> <i>keyword</i>
Tree	<a href="#">match-list</a>
Options	circuit-id, mac, remote-id, sap-id, service-id, string, system-id, option60, encap-tag-range, dual-stack-remote-id, derived-id, ip, encap-tag-separate-range
Max. Instances	4
Notes	This element is ordered by the user.
Introduced	16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## ppp

Synopsis Enter the **ppp** context  
 Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string* **ppp**  
 Tree [ppp](#)  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## host [[host-name](#)] *string*

Synopsis Enter the **host** list instance  
 Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string* **ppp** **host** *string*  
 Tree [host](#)  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## [\[host-name\]](#) *string*

Synopsis Host name  
 Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string* **ppp** **host** *string*  
 Tree [host](#)  
 String Length 1 to 32  
 Notes This element is part of a list key.  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## access-loop-encapsulation

Synopsis Enable the **access-loop-encapsulation** context  
 Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string* **ppp** **host** *string* **access-loop-encapsulation**  
 Tree [access-loop-encapsulation](#)  
 Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## encap-offset

Synopsis Enter the **encap-offset** context

Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string* [ppp host](#) *string* [access-loop-encapsulation](#) **encap-offset**

Tree [encap-offset](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## type *keyword*

Synopsis Egress encapsulation type

Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string* [ppp host](#) *string* [access-loop-encapsulation](#) **encap-offset** *type* *keyword*

Tree [type](#)

Options pppoa-llc, pppoa-null, pppoeoa-llc, pppoeoa-llc-fcs, pppoeoa-llc-tagged, pppoeoa-llc-tagged-fcs, pppoeoa-null, pppoeoa-null-fcs, pppoeoa-null-tagged, pppoeoa-null-tagged-fcs, ipoa-llc, ipoa-null, ipoeoa-llc, ipoeoa-llc-fcs, ipoeoa-llc-tagged, ipoeoa-llc-tagged-fcs, ipoeoa-null, ipoeoa-null-fcs, ipoeoa-null-tagged, ipoeoa-null-tagged-fcs, pppoe, pppoe-tagged, ipoe, ipoe-tagged

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## rate-down *number*

Synopsis Last mile link downstream rate in the access loop

Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string* [ppp host](#) *string* [access-loop-encapsulation](#) **rate-down** *number*

Tree [rate-down](#)

Range 1 to 100000

Units kilobps

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## access-loop-information

Synopsis	Enter the <b>access-loop-information</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt local-user-db string</a> <a href="#">ppp host string</a> <a href="#">access-loop-information</a>
Tree	<a href="#">access-loop-information</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## circuit-id

Synopsis	Enable the <b>circuit-id</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt local-user-db string</a> <a href="#">ppp host string</a> <a href="#">access-loop-information</a> <a href="#">circuit-id</a>
Tree	<a href="#">circuit-id</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## ascii-string *string*

Synopsis	Circuit ID as an ASCII string
Context	<b>configure</b> <a href="#">subscriber-mgmt local-user-db string</a> <a href="#">ppp host string</a> <a href="#">access-loop-information</a> <a href="#">circuit-id</a> <a href="#">ascii-string</a> <i>string</i>
Tree	<a href="#">ascii-string</a>
String Length	1 to 63
Notes	The following elements are part of a mandatory choice: <b>ascii-string</b> , <b>sap-id</b> , or <b>use-sap-id</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## use-sap-id

Synopsis	Use sap-id as circuit-id.
Context	<b>configure</b> <a href="#">subscriber-mgmt local-user-db string</a> <a href="#">ppp host string</a> <a href="#">access-loop-information</a> <a href="#">circuit-id</a> <a href="#">use-sap-id</a>
Tree	<a href="#">use-sap-id</a>
Notes	The following elements are part of a mandatory choice: <b>ascii-string</b> , <b>sap-id</b> , or <b>use-sap-id</b> .

Introduced	20.2.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## remote-id

Synopsis	Enable the <b>remote-id</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp host</a> <i>string</i> <a href="#">access-loop-information</a> <b>remote-id</b>
Tree	<a href="#">remote-id</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## ascii-string *string*

Synopsis	String format for the remote ID
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp host</a> <i>string</i> <a href="#">access-loop-information</a> <b>remote-id</b> <b>ascii-string</b> <i>string</i>
Tree	<a href="#">ascii-string</a>
String Length	1 to 63
Notes	The following elements are part of a mandatory choice: <b>ascii-string</b> , <b>mac</b> , or <b>use-mac-address</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## use-mac-address

Synopsis	Use MAC address as remote-id.
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp host</a> <i>string</i> <a href="#">access-loop-information</a> <b>remote-id</b> <b>use-mac-address</b>
Tree	<a href="#">use-mac-address</a>
Notes	The following elements are part of a mandatory choice: <b>ascii-string</b> , <b>mac</b> , or <b>use-mac-address</b> .
Introduced	20.2.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**admin-state** *keyword*

Synopsis	Administrative state of the host
Context	<b>configure</b> <a href="#">subscriber-mgmt local-user-db</a> <i>string</i> <a href="#">ppp host</a> <i>string</i> <b>admin-state</b> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**authentication**

Synopsis	Enter the <b>authentication</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt local-user-db</a> <i>string</i> <a href="#">ppp host</a> <i>string</i> <b>authentication</b>
Tree	<a href="#">authentication</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**gx-policy** *string*

Synopsis	Diameter application policy
Context	<b>configure</b> <a href="#">subscriber-mgmt local-user-db</a> <i>string</i> <a href="#">ppp host</a> <i>string</i> <b>authentication</b> <a href="#">gx-policy</a> <i>string</i>
Tree	<a href="#">gx-policy</a>
String Length	1 to 32
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**nasreq-auth-policy** *string*

Synopsis	Diameter NASREQ application policy for authentication
Context	<b>configure</b> <a href="#">subscriber-mgmt local-user-db</a> <i>string</i> <a href="#">ppp host</a> <i>string</i> <b>authentication</b> <a href="#">nasreq-auth-policy</a> <i>string</i>
Tree	<a href="#">nasreq-auth-policy</a>
String Length	1 to 32
Introduced	16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **padi-auth-policy** *string*

Synopsis Authentication policy name

Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string* [ppp host](#) *string* [authentication](#) [padi-auth-policy](#) *string*

Tree [padi-auth-policy](#)

String Length 1 to 32

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **pre-auth-policy** *string*

Synopsis Pre-authentication policy of this host

Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string* [ppp host](#) *string* [authentication](#) [pre-auth-policy](#) *string*

Tree [pre-auth-policy](#)

String Length 1 to 32

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **radius-auth-policy** *string*

Synopsis Host authentication policy

Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string* [ppp host](#) *string* [authentication](#) [radius-auth-policy](#) *string*

Tree [radius-auth-policy](#)

String Length 1 to 32

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **user-db** *string*

Synopsis Local user DB to use for PPP PAP/CHAP authentication

Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string* [ppp host](#) *string* [authentication](#) [user-db](#) *string*

Tree	<a href="#">user-db</a>
String Length	1 to 32
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## host-identification

Synopsis	Enter the <b>host-identification</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt local-user-db string ppp host string host-identification</a>
Tree	<a href="#">host-identification</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## circuit-id

Synopsis	Enter the <b>circuit-id</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt local-user-db string ppp host string host-identification circuit-id</a>
Tree	<a href="#">circuit-id</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## ascii-string *string*

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Circuit ID as ASCII string
Context	<b>configure</b> <a href="#">subscriber-mgmt local-user-db string ppp host string host-identification circuit-id ascii-string string</a>
Tree	<a href="#">ascii-string</a>
String Length	1 to 127
Notes	The following elements are part of a choice: <b>ascii-string</b> or <b>hex-string</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## hex-string *string*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Circuit ID as hexadecimal string
Context	<b>configure</b> <a href="#">subscriber-mgmt local-user-db string</a> <a href="#">ppp host string</a> <a href="#">host-identification circuit-id hex-string string</a>
Tree	<a href="#">hex-string</a>
String Length	1 to 256
Notes	The following elements are part of a choice: <b>ascii-string</b> or <b>hex-string</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## derived-id *string*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Derived ID string
Context	<b>configure</b> <a href="#">subscriber-mgmt local-user-db string</a> <a href="#">ppp host string</a> <a href="#">host-identification derived-id string</a>
Tree	<a href="#">derived-id</a>
String Length	1 to 255
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## encap-tag-range

Synopsis	Enable the <b>encap-tag-range</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt local-user-db string</a> <a href="#">ppp host string</a> <a href="#">host-identification encap-tag-range</a>
Tree	<a href="#">encap-tag-range</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**from string****WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Start tag
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <a href="#">string</a> <a href="#">ppp</a> <a href="#">host</a> <a href="#">string</a> <a href="#">host-identification</a> <a href="#">encap-tag-range</a> <a href="#">from</a> <a href="#">string</a>
Tree	<a href="#">from</a>
String Length	1 to 11
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**to string****WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	End tag
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <a href="#">string</a> <a href="#">ppp</a> <a href="#">host</a> <a href="#">string</a> <a href="#">host-identification</a> <a href="#">encap-tag-range</a> <a href="#">to</a> <a href="#">string</a>
Tree	<a href="#">to</a>
String Length	1 to 11
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**encap-tag-separate-range**

Synopsis	Enter the <b>encap-tag-separate-range</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <a href="#">string</a> <a href="#">ppp</a> <a href="#">host</a> <a href="#">string</a> <a href="#">host-identification</a> <a href="#">encap-tag-separate-range</a>
Tree	<a href="#">encap-tag-separate-range</a>
Introduced	20.5.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## inner

Synopsis Enter the **inner** context

Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string* [ppp host](#) *string* [host-identification](#) [encap-tag-separate-range](#) **inner**

Tree [inner](#)

Introduced 20.5.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## end number

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis Upper bound of the inner encapsulation tag range

Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string* [ppp host](#) *string* [host-identification](#) [encap-tag-separate-range](#) **inner** **end** *number*

Tree [end](#)

Description This command configures an inner end tag for the range of encapsulation tags used for host identification.

Range 0 to 4094

Introduced 20.5.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## start number

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis Lower bound of the inner encapsulation tag range

Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string* [ppp host](#) *string* [host-identification](#) [encap-tag-separate-range](#) **inner** **start** *number*

Tree [start](#)

Description	This command configures an inner start tag for the range of encapsulation tags used for host identification.
Range	0 to 4094
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## outer

Synopsis	Enter the <b>outer</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt local-user-db string ppp host string host-identification encap-tag-separate-range outer</a>
Tree	<a href="#">outer</a>
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## end number

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Upper bound of the outer encapsulation tag range
Context	<b>configure</b> <a href="#">subscriber-mgmt local-user-db string ppp host string host-identification encap-tag-separate-range outer end number</a>
Tree	<a href="#">end</a>
Description	This command configures an outer end tag for the range of encapsulation tags used for host identification.
Range	0 to 4094
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## start number

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Lower bound of the outer encapsulation tag range
----------	--

Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp</a> <a href="#">host</a> <i>string</i> <a href="#">host-identification</a> <a href="#">encap-tag-separate-range</a> <a href="#">outer</a> <a href="#">start</a> <i>number</i>
Tree	<a href="#">start</a>
Description	This command configures an outer start tag for the range of encapsulation tags used for host identification.
Range	0 to 4094
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### mac *string*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	MAC address
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp</a> <a href="#">host</a> <i>string</i> <a href="#">host-identification</a> <a href="#">mac</a> <i>string</i>
Tree	<a href="#">mac</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### remote-id

Synopsis	Enter the <b>remote-id</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp</a> <a href="#">host</a> <i>string</i> <a href="#">host-identification</a> <a href="#">remote-id</a>
Tree	<a href="#">remote-id</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### ascii-string *string*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Remote ID as ASCII string
----------	---------------------------

Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp</a> <a href="#">host</a> <i>string</i> <a href="#">host-identification</a> <a href="#">remote-id</a> <a href="#">ascii-string</a> <i>string</i>
Tree	<a href="#">ascii-string</a>
String Length	1 to 255
Notes	The following elements are part of a choice: <b>ascii-string</b> or <b>hex-string</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### hex-string *string*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Remote ID as hexadecimal string
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp</a> <a href="#">host</a> <i>string</i> <a href="#">host-identification</a> <a href="#">remote-id</a> <a href="#">hex-string</a> <i>string</i>
Tree	<a href="#">hex-string</a>
String Length	1 to 512
Notes	The following elements are part of a choice: <b>ascii-string</b> or <b>hex-string</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### sap-id *string*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	SAP ID
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp</a> <a href="#">host</a> <i>string</i> <a href="#">host-identification</a> <a href="#">sap-id</a> <i>string</i>
Tree	<a href="#">sap-id</a>
String Length	1 to 255
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**service-name** *string***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Administrative service name
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp</a> <a href="#">host</a> <i>string</i> <a href="#">host-identification</a> <a href="#">service-name</a> <i>string</i>
Tree	<a href="#">service-name</a>
String Length	1 to 255
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**user-name**

Synopsis	Enable the <b>user-name</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp</a> <a href="#">host</a> <i>string</i> <a href="#">host-identification</a> <a href="#">user-name</a>
Tree	<a href="#">user-name</a>
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**format** *keyword***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Username format
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp</a> <a href="#">host</a> <i>string</i> <a href="#">host-identification</a> <a href="#">user-name</a> <a href="#">format</a> <i>keyword</i>
Tree	<a href="#">format</a>
Options	full, no-domain, domain-only
Default	full
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**name** *string***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Host username
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp</a> <a href="#">host</a> <i>string</i> <a href="#">host-identification</a> <a href="#">user-name</a> <i>name</i> <i>string</i>
Tree	<a href="#">name</a>
String Length	1 to 253
Notes	This element is mandatory.
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**identification**

Synopsis	Enable the <b>identification</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp</a> <a href="#">host</a> <i>string</i> <a href="#">identification</a>
Tree	<a href="#">identification</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**ancp-string** *string*

Synopsis	ANCP string
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp</a> <a href="#">host</a> <i>string</i> <a href="#">identification</a> <a href="#">ancp-string</a> <i>string</i>
Tree	<a href="#">ancp-string</a>
String Length	1 to 63
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**app-profile-string** *string*

Synopsis	Application profile string
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp</a> <a href="#">host</a> <i>string</i> <a href="#">identification</a> <a href="#">app-profile-string</a> <i>string</i>

Tree	<a href="#">app-profile-string</a>
String Length	1 to 16
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **category-map-name** *string*

Synopsis	Category map name
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp</a> <a href="#">host</a> <i>string</i> <a href="#">identification</a> <a href="#">category-map-name</a> <i>string</i>
Tree	<a href="#">category-map-name</a>
String Length	1 to 32
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **int-dest-id** *string*

Synopsis	Intermediate destination ID
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp</a> <a href="#">host</a> <i>string</i> <a href="#">identification</a> <a href="#">int-dest-id</a> <i>string</i>
Tree	<a href="#">int-dest-id</a>
String Length	1 to 32
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **option-number** *number*

#### **WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Identification strings for the subscriber
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp</a> <a href="#">host</a> <i>string</i> <a href="#">identification</a> <a href="#">option-number</a> <i>number</i>
Tree	<a href="#">option-number</a>
Range	1 to 254
Default	254

Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **sla-profile-string** *string*

Synopsis SLA profile string  
Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string* [ppp](#) [host](#) *string* [identification](#) [sla-profile-string](#) *string*  
Tree [sla-profile-string](#)  
String Length 1 to 32  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **spi-sharing-group-id** *number*

Synopsis SPI sharing group ID  
Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string* [ppp](#) [host](#) *string* [identification](#) [spi-sharing-group-id](#) *number*  
Tree [spi-sharing-group-id](#)  
Range 0 to 65535  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **sub-profile-string** *string*

Synopsis Sub profile string  
Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string* [ppp](#) [host](#) *string* [identification](#) [sub-profile-string](#) *string*  
Tree [sub-profile-string](#)  
String Length 1 to 32  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **subscriber-id** *string*

Synopsis Subscriber ID

Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp</a> <a href="#">host</a> <i>string</i> <a href="#">identification</a> <a href="#">subscriber-id</a> <i>string</i>
Tree	<a href="#">subscriber-id</a>
String Length	1 to 64
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## ipv4

Synopsis	Enter the <b>ipv4</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp</a> <a href="#">host</a> <i>string</i> <a href="#">ipv4</a>
Tree	<a href="#">ipv4</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## address

Synopsis	Enter the <b>address</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp</a> <a href="#">host</a> <i>string</i> <a href="#">ipv4</a> <a href="#">address</a>
Tree	<a href="#">address</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## gi-address *keyword*

Synopsis	Use <b>gi-address</b> to select a pool with the given scope
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp</a> <a href="#">host</a> <i>string</i> <a href="#">ipv4</a> <a href="#">address</a> <a href="#">gi-address</a> <i>keyword</i>
Tree	<a href="#">gi-address</a>
Options	subnet-scope, pool-scope
Notes	The following elements are part of a choice: <b>gi-address</b> , ( <b>ip-address</b> and <b>prefix-length</b> ), <b>pool</b> , or <b>use-pool-from-client</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**ip-address string**

Synopsis	Fixed IPv4 address of the host
Context	<b>configure</b> <a href="#">subscriber-mgmt local-user-db string</a> <a href="#">ppp host string</a> <a href="#">ipv4 address ip-address string</a>
Tree	<a href="#">ip-address</a>
Notes	The following elements are part of a choice: <b>gi-address</b> , ( <b>ip-address</b> and <b>prefix-length</b> ), <b>pool</b> , or <b>use-pool-from-client</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**pool**

Synopsis	Enable the <b>pool</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt local-user-db string</a> <a href="#">ppp host string</a> <a href="#">ipv4 address pool</a>
Tree	<a href="#">pool</a>
Notes	The following elements are part of a choice: <b>gi-address</b> , ( <b>ip-address</b> and <b>prefix-length</b> ), <b>pool</b> , or <b>use-pool-from-client</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**delimiter string**

Synopsis	Delimiter separating primary and secondary pool names
Context	<b>configure</b> <a href="#">subscriber-mgmt local-user-db string</a> <a href="#">ppp host string</a> <a href="#">ipv4 address pool delimiter string</a>
Tree	<a href="#">delimiter</a>
String Length	1
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**primary string**

Synopsis	Primary pool name
Context	<b>configure</b> <a href="#">subscriber-mgmt local-user-db string</a> <a href="#">ppp host string</a> <a href="#">ipv4 address pool primary string</a>
Tree	<a href="#">primary</a>

String Length	1 to 32
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **secondary string**

Synopsis	Secondary pool name
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <a href="#">string</a> <a href="#">ppp</a> <a href="#">host</a> <a href="#">string</a> <a href="#">ipv4</a> <a href="#">address</a> <a href="#">pool</a> <a href="#">secondary</a> <a href="#">string</a>
Tree	<a href="#">secondary</a>
String Length	1 to 32
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **prefix-length number**

Synopsis	IPv4 host address prefix length
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <a href="#">string</a> <a href="#">ppp</a> <a href="#">host</a> <a href="#">string</a> <a href="#">ipv4</a> <a href="#">address</a> <a href="#">prefix-length</a> <a href="#">number</a>
Tree	<a href="#">prefix-length</a>
Range	1 to 32
Default	32
Notes	The following elements are part of a choice: <b>gi-address</b> , ( <b>ip-address</b> and <b>prefix-length</b> ), <b>pool</b> , or <b>use-pool-from-client</b> .
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **use-pool-from-client**

Synopsis	Enable the <b>use-pool-from-client</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <a href="#">string</a> <a href="#">ppp</a> <a href="#">host</a> <a href="#">string</a> <a href="#">ipv4</a> <a href="#">address</a> <a href="#">use-pool-from-client</a>
Tree	<a href="#">use-pool-from-client</a>
Notes	The following elements are part of a choice: <b>gi-address</b> , ( <b>ip-address</b> and <b>prefix-length</b> ), <b>pool</b> , or <b>use-pool-from-client</b> .

Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **delimiter** *string*

Synopsis	Delimiter character to combine primary and secondary pool names
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp host</a> <i>string</i> <a href="#">ipv4 address use-pool-from-client</a> <b>delimiter</b> <i>string</i>
Tree	<a href="#">delimiter</a>
String Length	1
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **ignore-df-bit** *boolean*

Synopsis	Ignore the DF bit in the IPv4 header when fragmenting
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp host</a> <i>string</i> <a href="#">ipv4</a> <b>ignore-df-bit</b> <i>boolean</i>
Tree	<a href="#">ignore-df-bit</a>
Description	<p>When configured to <b>true</b>, the router ignores the DF bit in the IPv4 header for frames egressing the subscriber interface. The frames are fragmented according to the applicable egress MTU. The DF bit is reset for frames that are fragmented.</p> <p>This command applies to PPPoE PTA and L2TP LNS frames only. It is not applicable for L2TP LAC frames.</p> <p>When configured to <b>false</b>, the router does not ignore the DF bit in the IPv4 header for frames egressing the subscriber interface.</p>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **option** [[number](#)] (*number* | *keyword*)

Synopsis	Enter the <b>option</b> list instance
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp host</a> <i>string</i> <a href="#">ipv4</a> <b>option</b> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">option</a>
Introduced	16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### [number] (*number* | *keyword*)

Synopsis DHCP option to send identification strings to client

Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string* [ppp host](#) *string* [ipv4 option](#) (*number* | *keyword*)

Tree [option](#)

Range 1 to 254

Options subnet-mask, default-router, dns-server, domain-name, netbios-name-server, netbios-node-type, lease-time, lease-renew-time, lease-rebind-time

Notes This element is part of a list key.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **ascii-string** *string*

Synopsis DHCP option specified as an ASCII string

Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string* [ppp host](#) *string* [ipv4 option](#) (*number* | *keyword*) [ascii-string](#) *string*

Tree [ascii-string](#)

String Length 1 to 127

Notes The following elements are part of a mandatory choice: **ascii-string**, **duration**, **empty**, **hex-string**, **ipv4-address**, or **netbios-node-type**.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **duration** *number*

Synopsis DHCP option as time duration

Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string* [ppp host](#) *string* [ipv4 option](#) (*number* | *keyword*) [duration](#) *number*

Tree [duration](#)

Range 10 to 315446399

Units seconds

Notes The following elements are part of a mandatory choice: **ascii-string**, **duration**, **empty**, **hex-string**, **ipv4-address**, or **netbios-node-type**.

Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## empty

Synopsis	Empty DHCP option.
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <a href="#">string</a> <a href="#">ppp host</a> <a href="#">string</a> <a href="#">ipv4 option</a> ( <a href="#">number</a>   <a href="#">keyword</a> ) <a href="#">empty</a>
Tree	<a href="#">empty</a>
Notes	The following elements are part of a mandatory choice: <b>ascii-string</b> , <b>duration</b> , <b>empty</b> , <b>hex-string</b> , <b>ipv4-address</b> , or <b>netbios-node-type</b> .
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## hex-string *string*

Synopsis	DHCP option specified as hexadecimal string
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <a href="#">string</a> <a href="#">ppp host</a> <a href="#">string</a> <a href="#">ipv4 option</a> ( <a href="#">number</a>   <a href="#">keyword</a> ) <a href="#">hex-string</a> <a href="#">string</a>
Tree	<a href="#">hex-string</a>
String Length	1 to 256
Notes	The following elements are part of a mandatory choice: <b>ascii-string</b> , <b>duration</b> , <b>empty</b> , <b>hex-string</b> , <b>ipv4-address</b> , or <b>netbios-node-type</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## ipv4-address *string*

Synopsis	DHCP option as a list of IPv4 addresses
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <a href="#">string</a> <a href="#">ppp host</a> <a href="#">string</a> <a href="#">ipv4 option</a> ( <a href="#">number</a>   <a href="#">keyword</a> ) <a href="#">ipv4-address</a> <a href="#">string</a>
Tree	<a href="#">ipv4-address</a>
Max. Instances	4
Notes	The following elements are part of a mandatory choice: <b>ascii-string</b> , <b>duration</b> , <b>empty</b> , <b>hex-string</b> , <b>ipv4-address</b> , or <b>netbios-node-type</b> . This element is ordered by the user.

Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **netbios-node-type** *keyword*

Synopsis	DHCP option as NetBIOS node type
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp host</a> <i>string</i> <a href="#">ipv4 option</a> ( <i>number</i>   <i>keyword</i> ) <b>netbios-node-type</b> <i>keyword</i>
Tree	<a href="#">netbios-node-type</a>
Options	b-node, p-node, m-node, h-node
Notes	The following elements are part of a mandatory choice: <b>ascii-string</b> , <b>duration</b> , <b>empty</b> , <b>hex-string</b> , <b>ipv4-address</b> , or <b>netbios-node-type</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **ipv6**

Synopsis	Enter the <b>ipv6</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp host</a> <i>string</i> <b>ipv6</b>
Tree	<a href="#">ipv6</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **address** *string*

Synopsis	Fixed IPv6 address of the host
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp host</a> <i>string</i> <b>ipv6</b> <b>address</b> <i>string</i>
Tree	<a href="#">address</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **address-pool** *string*

Synopsis	IPv6 address pool name
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp host</a> <i>string</i> <b>ipv6</b> <b>address-pool</b> <i>string</i>
Tree	<a href="#">address-pool</a>

String Length 1 to 32  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **delegated-prefix** *string*

Synopsis IPv6 delegated prefix of this host  
Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string* [ppp host](#) *string* [ipv6](#) [delegated-prefix](#) *string*  
Tree [delegated-prefix](#)  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **delegated-prefix-length** *number*

Synopsis Delegated prefix length  
Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string* [ppp host](#) *string* [ipv6](#) [delegated-prefix-length](#) *number*  
Tree [delegated-prefix-length](#)  
Range 48 to 64  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **delegated-prefix-pool** *string*

Synopsis Delegated prefix pool  
Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string* [ppp host](#) *string* [ipv6](#) [delegated-prefix-pool](#) *string*  
Tree [delegated-prefix-pool](#)  
String Length 1 to 32  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **force-ipv6cp** *boolean*

Synopsis Force IPv6 control protocol

Context	<b>configure</b> <a href="#">subscriber-mgmt local-user-db string ppp host string ipv6 force-ipv6cp</a> <i>boolean</i>
Tree	<a href="#">force-ipv6cp</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **option** [[number](#)] (*number* | *keyword*)

Synopsis	Enter the <b>option</b> list instance
Context	<b>configure</b> <a href="#">subscriber-mgmt local-user-db string ppp host string ipv6 option</a> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">option</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **[number]** (*number* | *keyword*)

Synopsis	The number of the DHCPv6 option.
Context	<b>configure</b> <a href="#">subscriber-mgmt local-user-db string ppp host string ipv6 option</a> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">option</a>
Range	23
Options	dns-server
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **hex-string** *string*

Synopsis	DHCP option specified as hexadecimal string
Context	<b>configure</b> <a href="#">subscriber-mgmt local-user-db string ppp host string ipv6 option</a> ( <i>number</i>   <i>keyword</i> ) <a href="#">hex-string</a> <i>string</i>
Tree	<a href="#">hex-string</a>
String Length	1 to 256
Notes	The following elements are part of a mandatory choice: <b>hex-string</b> or <b>ipv6-address</b> .

Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **ipv6-address** *string*

Synopsis	DHCP option specified as a list of IPv6 addresses
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp host</a> <i>string</i> <a href="#">ipv6 option</a> ( <i>number</i>   <i>keyword</i> ) <a href="#">ipv6-address</a> <i>string</i>
Tree	<a href="#">ipv6-address</a>
Max. Instances	4
Notes	The following elements are part of a mandatory choice: <b>hex-string</b> or <b>ipv6-address</b> . This element is ordered by the user.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **router-advertisement-policy** *string*

Synopsis	IPv6 router advertisement policy
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp host</a> <i>string</i> <a href="#">ipv6 router-advertisement-policy</a> <i>string</i>
Tree	<a href="#">router-advertisement-policy</a>
String Length	1 to 32
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **slaac-prefix** *string*

Synopsis	IPv6 SLAAC prefix of this host
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp host</a> <i>string</i> <a href="#">ipv6 slaac-prefix</a> <i>string</i>
Tree	<a href="#">slaac-prefix</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **slaac-prefix-pool** *string*

Synopsis	IPv6 SLAAC prefix pool of this host
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp</a> <a href="#">host</a> <i>string</i> <a href="#">ipv6</a> <a href="#">slaac-prefix-pool</a> <i>string</i>
Tree	<a href="#">slaac-prefix-pool</a>
String Length	1 to 32
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **timers**

Synopsis	Enter the <b>timers</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp</a> <a href="#">host</a> <i>string</i> <a href="#">ipv6</a> <a href="#">timers</a>
Tree	<a href="#">timers</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **preferred-lifetime** (*number* | *keyword*)

Synopsis	Time for a lease to remain preferred
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp</a> <a href="#">host</a> <i>string</i> <a href="#">ipv6</a> <a href="#">timers</a> <a href="#">preferred-lifetime</a> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">preferred-lifetime</a>
Range	300 to 315446399
Units	seconds
Options	infinite
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **rebind** *number*

Synopsis	Rebind timer (T2)
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp</a> <a href="#">host</a> <i>string</i> <a href="#">ipv6</a> <a href="#">timers</a> <a href="#">rebind</a> <i>number</i>
Tree	<a href="#">rebind</a>
Range	0 to 1209600

Units	seconds
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**renew number**

Synopsis	Renew timer (T1)
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp host</a> <i>string</i> <a href="#">ipv6 timers</a> <a href="#">renew number</a>
Tree	<a href="#">renew</a>
Range	0 to 604800
Units	seconds
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**valid-lifetime** (*number* | *keyword*)

Synopsis	Time for a lease to remain valid
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp host</a> <i>string</i> <a href="#">ipv6 timers</a> <a href="#">valid-lifetime</a> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">valid-lifetime</a>
Range	300 to 315446399
Units	seconds
Options	infinite
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**l2tp**

Synopsis	Enter the <b>l2tp</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp host</a> <i>string</i> <a href="#">l2tp</a>
Tree	<a href="#">l2tp</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## group

Synopsis	Enable the <b>group</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp host</a> <i>string</i> <a href="#">l2tp group</a>
Tree	<a href="#">group</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## name *string*

Synopsis	L2TP tunnel group name
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp host</a> <i>string</i> <a href="#">l2tp group name</a> <i>string</i>
Tree	<a href="#">name</a>
String Length	1 to 63
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## service-id *number*

Synopsis	Service ID for the L2TP tunnel group
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp host</a> <i>string</i> <a href="#">l2tp group service-id</a> <i>number</i>
Tree	<a href="#">service-id</a>
Range	1 to 2147483647
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## Ins-interface

Synopsis	Enable the <b>Ins-interface</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp host</a> <i>string</i> <a href="#">Ins-interface</a>
Tree	<a href="#">Ins-interface</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**name** *string*

Synopsis	IP interface name
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp host</a> <i>string</i> <a href="#">lms-interface</a> <i>name</i> <i>string</i>
Tree	<a href="#">name</a>
String Length	1 to 32
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**service-id** *number*

Synopsis	Service ID
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp host</a> <i>string</i> <a href="#">lms-interface</a> <i>service-id</i> <i>number</i>
Tree	<a href="#">service-id</a>
Range	1 to 2147483647   2147483648   2147483649   2147483650   2147483651 to 2147483690   2147483691 to 2148007980   2148007981 to 2148012076   2148012077 to 2148016172   2148016173 to 2148278316   2148278317   2148278318 to 2148278381   2148278382   2148278383 to 2148278386
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**mld-import** [[policy-name](#)] *string*

Synopsis	Add a list entry for <b>mld-import</b>
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp host</a> <i>string</i> <b>mld-import</b> <i>string</i>
Tree	<a href="#">mld-import</a>
Max. Instances	14
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**[policy-name] string**

Synopsis	MLD import policy used to control the multicast group
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp host</a> <i>string</i> <a href="#">mld-import</a> <i>string</i>
Tree	<a href="#">mld-import</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**msap-defaults**

Synopsis	Enter the <b>msap-defaults</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp host</a> <i>string</i> <a href="#">msap-defaults</a>
Tree	<a href="#">msap-defaults</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**group-interface**

Synopsis	Enable the <b>group-interface</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp host</a> <i>string</i> <a href="#">msap-defaults</a> <a href="#">group-interface</a>
Tree	<a href="#">group-interface</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**name string**

Synopsis	IP interface name
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp host</a> <i>string</i> <a href="#">msap-defaults</a> <a href="#">group-interface</a> <a href="#">name</a> <i>string</i>
Tree	<a href="#">name</a>
String Length	1 to 32
Notes	This element is mandatory.
Introduced	16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **prefix** *keyword*

Synopsis Prefix to the IP interface name

Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string* [ppp host](#) *string* [msap-defaults](#) [group-interface](#) **prefix** *keyword*

Tree [prefix](#)

Options port-id

Notes The following elements are part of a choice: **prefix** or **suffix**.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **suffix** *keyword*

Synopsis Suffix for the group interface

Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string* [ppp host](#) *string* [msap-defaults](#) [group-interface](#) **suffix** *keyword*

Tree [suffix](#)

Options port-id

Notes The following elements are part of a choice: **prefix** or **suffix**.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **policy** *string*

Synopsis MSAP policy

Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string* [ppp host](#) *string* [msap-defaults](#) **policy** *string*

Tree [policy](#)

String Length 1 to 32

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**service number**

Synopsis	Service ID
Context	<b>configure</b> <a href="#">subscriber-mgmt local-user-db</a> <i>string</i> <a href="#">ppp host</a> <i>string</i> <a href="#">msap-defaults service number</a>
Tree	<a href="#">service</a>
Range	1 to 2147483647   2147483648   2147483649   2147483650   2147483651 to 2147483690   2147483691 to 2148007980   2148007981 to 2148012076   2148012077 to 2148016172   2148016173 to 2148278316   2148278317   2148278318 to 2148278381   2148278382   2148278383 to 2148278386
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**pado-delay number**

Synopsis	Delay timeout before sending a PADO
Context	<b>configure</b> <a href="#">subscriber-mgmt local-user-db</a> <i>string</i> <a href="#">ppp host</a> <i>string</i> <a href="#">pado-delay number</a>
Tree	<a href="#">pado-delay</a>
Range	1 to 30
Units	deciseconds
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**password**

Synopsis	Enter the <b>password</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt local-user-db</a> <i>string</i> <a href="#">ppp host</a> <i>string</i> <a href="#">password</a>
Tree	<a href="#">password</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**chap string**

Synopsis	CHAP protocol
Context	<b>configure</b> <a href="#">subscriber-mgmt local-user-db</a> <i>string</i> <a href="#">ppp host</a> <i>string</i> <a href="#">password chap</a> <i>string</i>
Tree	<a href="#">chap</a>
String Length	1 to 115

Notes	The following elements are part of a choice: <b>chap</b> , <b>ignore</b> , or <b>pap</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## ignore

Synopsis	Ignore the PAP and CHAP passwords
Context	<b>configure</b> <a href="#">subscriber-mgmt local-user-db string</a> <a href="#">ppp host string</a> <a href="#">password ignore</a>
Tree	<a href="#">ignore</a>
Notes	The following elements are part of a choice: <b>chap</b> , <b>ignore</b> , or <b>pap</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## pap *string*

Synopsis	PAP for the password
Context	<b>configure</b> <a href="#">subscriber-mgmt local-user-db string</a> <a href="#">ppp host string</a> <a href="#">password pap string</a>
Tree	<a href="#">pap</a>
String Length	1 to 115
Notes	The following elements are part of a choice: <b>chap</b> , <b>ignore</b> , or <b>pap</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## ppp-policy-parameters

Synopsis	Enter the <b>ppp-policy-parameters</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt local-user-db string</a> <a href="#">ppp host string</a> <a href="#">ppp-policy-parameters</a>
Tree	<a href="#">ppp-policy-parameters</a>
Introduced	22.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## keepalive

Synopsis	Enable the <b>keepalive</b> context
----------	-------------------------------------

Context	<b>configure subscriber-mgmt local-user-db</b> <i>string</i> <b>ppp host</b> <i>string</i> <b>ppp-policy-parameters</b> <b>keepalive</b>
Tree	<b>keepalive</b>
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **hold-up-multiplier** *number*

Synopsis	PPP LCP keepalive hold up multiplier override
Context	<b>configure subscriber-mgmt local-user-db</b> <i>string</i> <b>ppp host</b> <i>string</i> <b>ppp-policy-parameters</b> <b>keepalive hold-up-multiplier</b> <i>number</i>
Tree	<b>hold-up-multiplier</b>
Description	This command configures the number of LCP echo replies that can be missed before the PPP session is brought down and overrides the value configured in the <b>configure subscriber-mgmt ppp-policy</b> context for PPPoE PTA sessions or in the <b>configure l2tp group</b> context for L2TP LNS sessions.
Range	1 to 5
Default	3
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **interval** *number*

Synopsis	PPP LCP keepalive interval override
Context	<b>configure subscriber-mgmt local-user-db</b> <i>string</i> <b>ppp host</b> <i>string</i> <b>ppp-policy-parameters</b> <b>keepalive interval</b> <i>number</i>
Tree	<b>interval</b>
Description	This command configures the time interval in seconds at which LCP echo requests are transmitted for the PPP session and overrides the value configured in the <b>configure subscriber-mgmt ppp-policy</b> context for PPPoE PTA sessions or the <b>configure l2tp group</b> context for L2TP LNS sessions.
Range	4 to 300
Units	seconds
Default	30
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**max-sessions-per-mac** *number*

Synopsis	Maximum number of sessions per MAC address
Context	<b>configure</b> <a href="#">subscriber-mgmt local-user-db string ppp host string ppp-policy-parameters max-sessions-per-mac</a> <i>number</i>
Tree	<a href="#">max-sessions-per-mac</a>
Description	This command sets the maximum PPP sessions that can be opened for a specified MAC address.
Range	1 to 8191
Introduced	22.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**radius-accounting-policy**

Synopsis	Enter the <b>radius-accounting-policy</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt local-user-db string ppp host string radius-accounting-policy</a>
Tree	<a href="#">radius-accounting-policy</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**duplicate** *string*

Synopsis	RADIUS accounting policy for generating duplicate accounting information
Context	<b>configure</b> <a href="#">subscriber-mgmt local-user-db string ppp host string radius-accounting-policy duplicate</a> <i>string</i>
Tree	<a href="#">duplicate</a>
String Length	1 to 32
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**name** *string*

Synopsis	RADIUS accounting policy name
Context	<b>configure</b> <a href="#">subscriber-mgmt local-user-db string ppp host string radius-accounting-policy name</a> <i>string</i>
Tree	<a href="#">name</a>
String Length	1 to 32

Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **retail-service-id** *number*

Synopsis Configure the retail service-id  
Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string* [ppp](#) [host](#) *string* **retail-service-id** *number*  
Tree [retail-service-id](#)  
Range 1 to 2147483647 | 2147483648 | 2147483649 | 2147483650 | 2147483651 to 2147483690 | 2147483691 to 2148007980 | 2148007981 to 2148012076 | 2148012077 to 2148016172 | 2148016173 to 2148278316 | 2148278317 | 2148278318 to 2148278381 | 2148278382 | 2148278383 to 2148278386  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **rip-policy** *string*

Synopsis RIP policy  
Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string* [ppp](#) [host](#) *string* **rip-policy** *string*  
Tree [rip-policy](#)  
String Length 1 to 32  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **steering-profile** *string*

Synopsis Steering profile  
Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string* [ppp](#) [host](#) *string* **steering-profile** *string*  
Tree [steering-profile](#)  
String Length 1 to 32  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **to-client-options**

Synopsis Enter the **to-client-options** context

Context	<b>configure</b> <a href="#">subscriber-mgmt local-user-db string ppp host string to-client-options</a>
Tree	<a href="#">to-client-options</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **ipv6-option** [[number](#)] (*number* | *keyword*)

Synopsis	Enter the <b>ipv6-option</b> list instance
Context	<b>configure</b> <a href="#">subscriber-mgmt local-user-db string ppp host string to-client-options ipv6-option</a> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">ipv6-option</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **[number]** (*number* | *keyword*)

Synopsis	DHCP option to send as identification string
Context	<b>configure</b> <a href="#">subscriber-mgmt local-user-db string ppp host string to-client-options ipv6-option</a> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">ipv6-option</a>
Range	1 to 65535
Options	dns-server, domain-name
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **ascii-string** *string*

Synopsis	DHCP option specified as an ASCII string
Context	<b>configure</b> <a href="#">subscriber-mgmt local-user-db string ppp host string to-client-options ipv6-option</a> ( <i>number</i>   <i>keyword</i> ) <a href="#">ascii-string</a> <i>string</i>
Tree	<a href="#">ascii-string</a>
String Length	1 to 127
Notes	The following elements are part of a mandatory choice: <b>ascii-string</b> , <b>domain-string</b> , <b>empty</b> , <b>hex-string</b> , or <b>ipv6-address</b> .
Introduced	16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### domain-string *string*

Synopsis DHCP option specified as a domain name

Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string* [ppp host](#) *string* [to-client-options](#) [ipv6-option](#) (*number* | *keyword*) [domain-string](#) *string*

Tree [domain-string](#)

String Length 1 to 127

Notes The following elements are part of a mandatory choice: **ascii-string**, **domain-string**, **empty**, **hex-string**, or **ipv6-address**.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### empty

Synopsis Empty DHCP option

Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string* [ppp host](#) *string* [to-client-options](#) [ipv6-option](#) (*number* | *keyword*) [empty](#)

Tree [empty](#)

Notes The following elements are part of a mandatory choice: **ascii-string**, **domain-string**, **empty**, **hex-string**, or **ipv6-address**.

Introduced 16.0.R4

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### hex-string *string*

Synopsis DHCP option specified as hexadecimal string

Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string* [ppp host](#) *string* [to-client-options](#) [ipv6-option](#) (*number* | *keyword*) [hex-string](#) *string*

Tree [hex-string](#)

String Length 1 to 256

Notes The following elements are part of a mandatory choice: **ascii-string**, **domain-string**, **empty**, **hex-string**, or **ipv6-address**.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**ipv6-address** *string*

Synopsis	DHCP option specified as a list of IPv6 addresses
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp</a> <a href="#">host</a> <i>string</i> <a href="#">to-client-options</a> <a href="#">ipv6-option</a> ( <i>number</i>   <i>keyword</i> ) <a href="#">ipv6-address</a> <i>string</i>
Tree	<a href="#">ipv6-address</a>
Max. Instances	4
Notes	The following elements are part of a mandatory choice: <b>ascii-string</b> , <b>domain-string</b> , <b>empty</b> , <b>hex-string</b> , or <b>ipv6-address</b> . This element is ordered by the user.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**mask** *type* *keyword*

Synopsis	Enter the <b>mask</b> list instance
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp</a> <a href="#">mask</a> <i>type</i> <i>keyword</i>
Tree	<a href="#">mask</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**type** *keyword*

Synopsis	Matching type to identify a host
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp</a> <a href="#">mask</a> <i>type</i> <i>keyword</i>
Tree	<a href="#">mask</a>
Options	circuit-id, mac, remote-id, user-name, service-name, sap-id
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**prefix**

Synopsis	Enable the <b>prefix</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp</a> <a href="#">mask</a> <i>type</i> <i>keyword</i> <a href="#">prefix</a>

Tree	<a href="#">prefix</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **length** *number*

Synopsis	PPP mask prefix length
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp</a> <a href="#">mask</a> <a href="#">type</a> <i>keyword</i> <a href="#">prefix</a> <a href="#">length</a> <i>number</i>
Tree	<a href="#">length</a>
Range	1 to 127
Notes	The following elements are part of a mandatory choice: <b>length</b> or <b>string</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **string** *string*

Synopsis	Prefix string
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp</a> <a href="#">mask</a> <a href="#">type</a> <i>keyword</i> <a href="#">prefix</a> <a href="#">string</a> <i>string</i>
Tree	<a href="#">string</a>
String Length	1 to 127
Notes	The following elements are part of a mandatory choice: <b>length</b> or <b>string</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **suffix**

Synopsis	Enable the <b>suffix</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp</a> <a href="#">mask</a> <a href="#">type</a> <i>keyword</i> <a href="#">suffix</a>
Tree	<a href="#">suffix</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**length** *number*

Synopsis	PPP mask suffix length
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp</a> <a href="#">mask</a> <a href="#">type</a> <i>keyword</i> <a href="#">suffix</a> <a href="#">length</a> <i>number</i>
Tree	<a href="#">length</a>
Range	1 to 127
Notes	The following elements are part of a mandatory choice: <b>length</b> or <b>string</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**string** *string*

Synopsis	Suffix string
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp</a> <a href="#">mask</a> <a href="#">type</a> <i>keyword</i> <a href="#">suffix</a> <a href="#">string</a> <i>string</i>
Tree	<a href="#">string</a>
String Length	1 to 127
Notes	The following elements are part of a mandatory choice: <b>length</b> or <b>string</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**match-list** *keyword***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	PPP host match type
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp</a> <a href="#">match-list</a> <i>keyword</i>
Tree	<a href="#">match-list</a>
Options	circuit-id, mac, remote-id, user-name, service-name, sap-id, encap-tag-range, derived-id, encap-tag-separate-range
Max. Instances	3
Notes	This element is ordered by the user.
Introduced	16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **mld-policy** [*name*] *string*

Synopsis Enter the **mld-policy** list instance  
 Context **configure** **subscriber-mgmt** **mld-policy** *string*  
 Tree **mld-policy**  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **[name]** *string*

Synopsis Policy name  
 Context **configure** **subscriber-mgmt** **mld-policy** *string*  
 Tree **mld-policy**  
 String Length 1 to 32  
 Notes This element is part of a list key.  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **description** *string*

Synopsis Text description  
 Context **configure** **subscriber-mgmt** **mld-policy** *string* **description** *string*  
 Tree **description**  
 String Length 1 to 80  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **egress-rate-modify**

Synopsis Enter the **egress-rate-modify** context  
 Context **configure** **subscriber-mgmt** **mld-policy** *string* **egress-rate-modify**  
 Tree **egress-rate-modify**  
 Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## **agg-rate**

Synopsis Maximum total rate for all subscriber egress queues

Context **configure subscriber-mgmt mld-policy string egress-rate-modify agg-rate**

Tree **agg-rate**

Description This command specifies the maximum total rate for all subscriber egress queues for each subscriber associated with the policy.

Notes The following elements are part of a choice: **agg-rate** or **scheduler**.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## **scheduler string**

Synopsis Scheduler to be applied for rate modification

Context **configure subscriber-mgmt mld-policy string egress-rate-modify scheduler string**

Tree **scheduler**

String Length 1 to 32

Notes The following elements are part of a choice: **agg-rate** or **scheduler**.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## **fast-leave boolean**

Synopsis Enable fast leave

Context **configure subscriber-mgmt mld-policy string fast-leave boolean**

Tree **fast-leave**

Default true

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## **import-policy reference**

Synopsis Import policy to filter MLD packets

Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">mld-policy</a> <i>string</i> <a href="#">import-policy</a> <i>reference</i>
Tree	<a href="#">import-policy</a>
Reference	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **maximum-number-group-sources** *number*

Synopsis	Maximum number of group sources for this interface
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">mld-policy</a> <i>string</i> <a href="#">maximum-number-group-sources</a> <i>number</i>
Tree	<a href="#">maximum-number-group-sources</a>
Description	This command configures the maximum number of group sources for which IGMP or MLD can have local receiver information based on received IGMP or MLD reports on this interface. When this configuration is changed dynamically to a lower value than the currently accepted number of group sources, the group sources that are already accepted are not deleted. Only new group sources are not allowed.
Range	1 to 32000
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **maximum-number-groups** *number*

Synopsis	Maximum number of groups for this interface
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">mld-policy</a> <i>string</i> <a href="#">maximum-number-groups</a> <i>number</i>
Tree	<a href="#">maximum-number-groups</a>
Range	1 to 16000
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **maximum-number-sources** *number*

Synopsis	Maximum number of sources that are allowed per group
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">mld-policy</a> <i>string</i> <a href="#">maximum-number-sources</a> <i>number</i>
Tree	<a href="#">maximum-number-sources</a>
Range	1 to 1000
Introduced	16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **query-interval** *number*

Synopsis Time between two consecutive host-query messages  
Context **configure** [subscriber-mgmt](#) [mld-policy](#) *string* [query-interval](#) *number*  
Tree [query-interval](#)  
Range 2 to 1024  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **query-last-member-interval** *number*

Synopsis Time between group-specific query messages  
Context **configure** [subscriber-mgmt](#) [mld-policy](#) *string* [query-last-member-interval](#) *number*  
Tree [query-last-member-interval](#)  
Range 1 to 1023  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **query-response-interval** *number*

Synopsis Time to wait for a response to the host-query messages  
Context **configure** [subscriber-mgmt](#) [mld-policy](#) *string* [query-response-interval](#) *number*  
Tree [query-response-interval](#)  
Range 1 to 1023  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **redirection-policy** *reference*

Synopsis Multicast redirection action applied to the subscriber  
Context **configure** [subscriber-mgmt](#) [mld-policy](#) *string* [redirection-policy](#) *reference*  
Tree [redirection-policy](#)  
Reference **configure** [policy-options](#) [policy-statement](#) *string*

Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **replication** *keyword*

Synopsis Multicast replication mode for subscriber multicast  
Context **configure** [subscriber-mgmt](#) [mld-policy](#) *string* [replication](#) *keyword*  
Tree [replication](#)  
Options per-sap, per-host, per-spi  
Default per-sap  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **router-alert-check** *boolean*

Synopsis Enable router alert checking for IGMP or MLD messages  
Context **configure** [subscriber-mgmt](#) [mld-policy](#) *string* [router-alert-check](#) *boolean*  
Tree [router-alert-check](#)  
Default true  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **static**

Synopsis Enter the **static** context  
Context **configure** [subscriber-mgmt](#) [mld-policy](#) *string* [static](#)  
Tree [static](#)  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **group** [[group-address](#)] *string*

Synopsis Enter the **group** list instance  
Context **configure** [subscriber-mgmt](#) [mld-policy](#) *string* [static](#) [group](#) *string*  
Tree [group](#)

Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### [group-address] *string*

Synopsis Group address of multicast channel  
 Context **configure** [subscriber-mgmt](#) [mld-policy](#) *string* [static](#) [group](#) *string*  
 Tree [group](#)  
 Notes This element is part of a list key.  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **source** [[source-address](#)] *string*

Synopsis Add a list entry for **source**  
 Context **configure** [subscriber-mgmt](#) [mld-policy](#) *string* [static](#) [group](#) *string* **source** *string*  
 Tree [source](#)  
 Notes The following elements are part of a mandatory choice: **source** or **starg**.  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### [[source-address](#)] *string*

Synopsis Source IP address  
 Context **configure** [subscriber-mgmt](#) [mld-policy](#) *string* [static](#) [group](#) *string* [source](#) *string*  
 Tree [source](#)  
 Notes This element is part of a list key.  
 Introduced 16.0.R2  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **starg**

Synopsis Any source address (\*,G)  
 Context **configure** [subscriber-mgmt](#) [mld-policy](#) *string* [static](#) [group](#) *string* **starg**  
 Tree [starg](#)

Notes	The following elements are part of a mandatory choice: <b>source</b> or <b>starg</b> .
Introduced	16.0.R2
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **use-multicast-destination-mac** *boolean*

Synopsis	Use multicast destination mac address for outgoing traffic.
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">mld-policy</a> <i>string</i> <b>use-multicast-destination-mac</b> <i>boolean</i>
Tree	<a href="#">use-multicast-destination-mac</a>
Default	false
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **version** *keyword*

Synopsis	MLD protocol version
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">mld-policy</a> <i>string</i> <b>version</b> <i>keyword</i>
Tree	<a href="#">version</a>
Options	1, 2
Default	2
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **msap-policy** [[name](#)] *string*

Synopsis	Enter the <b>msap-policy</b> list instance
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <b>msap-policy</b> <i>string</i>
Tree	<a href="#">msap-policy</a>
Max. Instances	256
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**[name]** *string*

Synopsis	Managed SAP policy name
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i>
Tree	<a href="#">msap-policy</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**cpu-protection**

Synopsis	Enter the <b>cpu-protection</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">cpu-protection</a>
Tree	<a href="#">cpu-protection</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s

**ip-src-monitoring**

Synopsis	Apply the IP source monitoring
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">cpu-protection</a> <a href="#">ip-src-monitoring</a>
Tree	<a href="#">ip-src-monitoring</a>
Notes	The following elements are part of a choice: <b>ip-src-monitoring</b> or <b>mac-monitoring</b> .
Introduced	16.0.R2
Platforms	7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s

**mac-monitoring**

Synopsis	Apply the per-source rate limit
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">cpu-protection</a> <a href="#">mac-monitoring</a>
Tree	<a href="#">mac-monitoring</a>
Notes	The following elements are part of a choice: <b>ip-src-monitoring</b> or <b>mac-monitoring</b> .
Introduced	16.0.R2
Platforms	7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s

### **policy-id** *reference*

Synopsis	CPM protection policy
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">cpu-protection</a> <a href="#">policy-id</a> <i>reference</i>
Tree	<a href="#">policy-id</a>
Reference	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpu-protection</a> <a href="#">policy</a> <i>number</i>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s

### **description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">description</a> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **dist-cpu-protection** *string*

Synopsis	Distributed CPU protection policy
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">dist-cpu-protection</a> <i>string</i>
Tree	<a href="#">dist-cpu-protection</a>
String Length	1 to 32
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **ies-vprn-only-sap-parameters**

Synopsis	Enter the <b>ies-vprn-only-sap-parameters</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">ies-vprn-only-sap-parameters</a>
Tree	<a href="#">ies-vprn-only-sap-parameters</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**anti-spoof** *keyword*

Synopsis	Anti-spoof filtering for the MSAP
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">ies-vprn-only-sap-parameters</a> <a href="#">anti-spoof</a> <i>keyword</i>
Tree	<a href="#">anti-spoof</a>
Options	source-ip-and-mac-addr, next-hop-ip-and-mac-addr
Default	source-ip-and-mac-addr
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**egress**

Synopsis	Enter the <b>egress</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">ies-vprn-only-sap-parameters</a> <a href="#">egress</a>
Tree	<a href="#">egress</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**qos**

Synopsis	Enter the <b>qos</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">ies-vprn-only-sap-parameters</a> <a href="#">egress</a> <a href="#">qos</a>
Tree	<a href="#">qos</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**policy-name** *reference*

Synopsis	QoS policy ID or name to associate with the MSAPs
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">ies-vprn-only-sap-parameters</a> <a href="#">egress</a> <a href="#">qos</a> <a href="#">policy-name</a> <i>reference</i>
Tree	<a href="#">policy-name</a>
Reference	<b>configure</b> <a href="#">qos</a> <a href="#">sap-egress</a> <i>string</i>
Introduced	16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## ingress

Synopsis Enter the **ingress** context

Context **configure** [subscriber-mgmt](#) [msap-policy](#) *string* [ies-vprn-only-sap-parameters](#) [ingress](#)

Tree [ingress](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## qos

Synopsis Enter the **qos** context

Context **configure** [subscriber-mgmt](#) [msap-policy](#) *string* [ies-vprn-only-sap-parameters](#) [ingress](#)  
[qos](#)

Tree [qos](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## policy-name *reference*

Synopsis QoS policy ID or name to associate with the MSAPs

Context **configure** [subscriber-mgmt](#) [msap-policy](#) *string* [ies-vprn-only-sap-parameters](#) [ingress](#)  
[qos](#) [policy-name](#) *reference*

Tree [policy-name](#)

Reference **configure** [qos](#) [sap-ingress](#) *string*

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## queuing-type *keyword*

Synopsis Queuing type

Context **configure** [subscriber-mgmt](#) [msap-policy](#) *string* [ies-vprn-only-sap-parameters](#) [ingress](#)  
[qos](#) [queuing-type](#) *keyword*

Tree [queuing-type](#)

Options shared, service

Default	shared
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## igmp-host-tracking

Synopsis	Enter the <b>igmp-host-tracking</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">igmp-host-tracking</a>
Tree	<a href="#">igmp-host-tracking</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## expiry-time *number*

Synopsis	Time that the system continues to track inactive hosts
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">igmp-host-tracking</a> <a href="#">expiry-time</a> <i>number</i>
Tree	<a href="#">expiry-time</a>
Range	1 to 65535
Units	seconds
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## import-policy *reference*

Synopsis	Import policy that filters IGMP packets
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">igmp-host-tracking</a> <a href="#">import-policy</a> <i>reference</i>
Tree	<a href="#">import-policy</a>
Reference	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## maximum-number-group-sources *number*

Synopsis	Maximum number of multicast groups to track per group
----------	---

---

Context	<b>configure</b> <b>subscriber-mgmt</b> <b>msap-policy</b> <i>string</i> <b>igmp-host-tracking</b> <b>maximum-number-group-sources</b> <i>number</i>
Tree	<a href="#">maximum-number-group-sources</a>
Range	1 to 32000
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **maximum-number-groups** *number*

Synopsis	Maximum number of multicast groups to be tracked
Context	<b>configure</b> <b>subscriber-mgmt</b> <b>msap-policy</b> <i>string</i> <b>igmp-host-tracking</b> <b>maximum-number-groups</b> <i>number</i>
Tree	<a href="#">maximum-number-groups</a>
Range	1 to 16000
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **maximum-number-sources** *number*

Synopsis	Maximum number of multicast sources to be tracked
Context	<b>configure</b> <b>subscriber-mgmt</b> <b>msap-policy</b> <i>string</i> <b>igmp-host-tracking</b> <b>maximum-number-sources</b> <i>number</i>
Tree	<a href="#">maximum-number-sources</a>
Range	1 to 1000
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **lag-link-map-profile** *number*

Synopsis	Map profile for LAG link
Context	<b>configure</b> <b>subscriber-mgmt</b> <b>msap-policy</b> <i>string</i> <b>lag-link-map-profile</b> <i>number</i>
Tree	<a href="#">lag-link-map-profile</a>
Range	1 to 64
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**sticky-msaps** *boolean*

Synopsis	Prevent MSAPs from being deleted
Context	<b>configure</b> <b>subscriber-mgmt</b> <b>msap-policy</b> <i>string</i> <b>sticky-msaps</b> <i>boolean</i>
Tree	<a href="#">sticky-msaps</a>
Description	<p>When configured to <b>true</b>, MSAPs associated with the specified MSAP policy are not removed unless a manual <b>clear</b> command is issued.</p> <p>This feature is useful if historical statistics records on MSAPs need to be retained. It can also reduce host creation time because the MSAP is already created.</p> <p>When configured to <b>false</b>, MSAPs can be automatically removed when a host creation fails or when a subscriber is no longer associated with the MSAP, for example, when a subscriber ends the session.</p>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**sticky-msaps-idle-timeout** *number*

Synopsis	Timeout used for sticky MSAPs
Context	<b>configure</b> <b>subscriber-mgmt</b> <b>msap-policy</b> <i>string</i> <b>sticky-msaps-idle-timeout</b> <i>number</i>
Tree	<a href="#">sticky-msaps-idle-timeout</a>
Description	<p>This command configures the timeout interval which determines when idle sticky MSAPs can be removed.</p> <p>By default, MSAPs are deleted shortly after the subscriber session ends. The system is prevented from automatically deleting sticky MSAPs after the session ends, allowing for a faster subsequent subscriber connection without MSAP creation; however, sticky MSAPs require SAP resources. The configuration of this command allows for the removal of sticky MSAPs that are idle for the specified time period.</p> <p>When unconfigured, no timeout interval is applied.</p>
Range	5 to 604800
Units	seconds
Introduced	20.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**sub-sla-mgmt**

Synopsis	Enter the <b>sub-sla-mgmt</b> context
Context	<b>configure</b> <b>subscriber-mgmt</b> <b>msap-policy</b> <i>string</i> <b>sub-sla-mgmt</b>

Tree	<a href="#">sub-sla-mgmt</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## defaults

Synopsis	Enter the <b>defaults</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">sub-sla-mgmt</a> <b>defaults</b>
Tree	<a href="#">defaults</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## app-profile *reference*

Synopsis	Application profile name
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">sub-sla-mgmt</a> <b>defaults</b> <a href="#">app-profile</a> <i>reference</i>
Tree	<a href="#">app-profile</a>
Reference	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">policy</a> <a href="#">app-profile</a> <i>string</i>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## int-dest-id

Synopsis	Enter the <b>int-dest-id</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">sub-sla-mgmt</a> <b>defaults</b> <a href="#">int-dest-id</a>
Tree	<a href="#">int-dest-id</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## string *string*

Synopsis	String to be used as the int-dest-id
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">sub-sla-mgmt</a> <b>defaults</b> <a href="#">int-dest-id</a> <a href="#">string</a> <i>string</i>
Tree	<a href="#">string</a>

String Length	1 to 32
Notes	The following elements are part of a choice: <b>string</b> or <b>top-q-tag</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### top-q-tag

Synopsis	Derive string from top most delineating Dot1Q tag
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">sub-sla-mgmt</a> <a href="#">defaults</a> <a href="#">int-dest-id</a> <a href="#">top-q-tag</a>
Tree	<a href="#">top-q-tag</a>
Notes	The following elements are part of a choice: <b>string</b> or <b>top-q-tag</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### sla-profile *reference*

Synopsis	Default SLA profile
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">sub-sla-mgmt</a> <a href="#">defaults</a> <a href="#">sla-profile</a> <i>reference</i>
Tree	<a href="#">sla-profile</a>
Reference	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sla-profile</a> <i>string</i>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### sub-profile *reference*

Synopsis	Subscriber profile
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">sub-sla-mgmt</a> <a href="#">defaults</a> <a href="#">sub-profile</a> <i>reference</i>
Tree	<a href="#">sub-profile</a>
Reference	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sub-profile</a> <i>string</i>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## subscriber-id

Synopsis	Enter the <b>subscriber-id</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">sub-sla-mgmt</a> defaults <a href="#">subscriber-id</a>
Tree	<a href="#">subscriber-id</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## auto-id

Synopsis	Autogenerated sub-id as default sub-id
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">sub-sla-mgmt</a> defaults <a href="#">subscriber-id</a> <a href="#">auto-id</a>
Tree	<a href="#">auto-id</a>
Notes	The following elements are part of a choice: <b>auto-id</b> , <b>sap-id</b> , or <b>string</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## sap-id

Synopsis	SAP-id as default sub-id
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">sub-sla-mgmt</a> defaults <a href="#">subscriber-id</a> <a href="#">sap-id</a>
Tree	<a href="#">sap-id</a>
Notes	The following elements are part of a choice: <b>auto-id</b> , <b>sap-id</b> , or <b>string</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## string *string*

Synopsis	String to be used as default sub-id
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">sub-sla-mgmt</a> defaults <a href="#">subscriber-id</a> <a href="#">string</a> <i>string</i>
Tree	<a href="#">string</a>
String Length	1 to 64
Notes	The following elements are part of a choice: <b>auto-id</b> , <b>sap-id</b> , or <b>string</b> .

Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### single-sub-parameters

Synopsis Enter the **single-sub-parameters** context  
 Context **configure** [subscriber-mgmt msap-policy string sub-sla-mgmt single-sub-parameters](#)  
 Tree [single-sub-parameters](#)  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### non-sub-traffic-profiles

Synopsis Enable the **non-sub-traffic-profiles** context  
 Context **configure** [subscriber-mgmt msap-policy string sub-sla-mgmt single-sub-parameters non-sub-traffic-profiles](#)

Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## lease-populate *number*

Synopsis	Maximum number of DHCPv4 leases per managed SAP
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <a href="#">string</a> <a href="#">vpls-only-sap-parameters</a> <a href="#">dhcp</a> <a href="#">lease-populate</a> <i>number</i>
Tree	<a href="#">lease-populate</a>
Range	1 to 131071
Default	1
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## option-82

Synopsis	Enter the <b>option-82</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <a href="#">string</a> <a href="#">vpls-only-sap-parameters</a> <a href="#">dhcp</a> <a href="#">option-82</a>
Tree	<a href="#">option-82</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## action *keyword*

Synopsis	DHCP relay forwarding policy action
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <a href="#">string</a> <a href="#">vpls-only-sap-parameters</a> <a href="#">dhcp</a> <a href="#">option-82</a> <a href="#">action</a> <i>keyword</i>
Tree	<a href="#">action</a>
Options	replace, drop, keep
Default	keep
Introduced	16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **circuit-id** *keyword*

Synopsis Circuit ID suboption of the IPOE relay

Context **configure** [subscriber-mgmt](#) [msap-policy](#) *string* [vpls-only-sap-parameters](#) [dhcp option-82](#) **circuit-id** *keyword*

Tree [circuit-id](#)

Options none, [ascii-tuple](#), [vlan-ascii-tuple](#)

Default [ascii-tuple](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **remote-id**

Synopsis Enter the **remote-id** context

Context **configure** [subscriber-mgmt](#) [msap-policy](#) *string* [vpls-only-sap-parameters](#) [dhcp option-82](#) **remote-id**

Tree [remote-id](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **mac**

Synopsis MAC address of the remote end encoded in the sub-option

Context **configure** [subscriber-mgmt](#) [msap-policy](#) *string* [vpls-only-sap-parameters](#) [dhcp option-82](#) **remote-id** **mac**

Tree [mac](#)

Notes The following elements are part of a choice: **mac** or **string**.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **string** *string*

Synopsis String to encode in the suboption

Context	<b>configure</b> <a href="#">subscriber-mgmt msap-policy string vpls-only-sap-parameters dhcp option-82 remote-id string string</a>
Tree	<a href="#">string</a>
String Length	1 to 32
Notes	The following elements are part of a choice: <b>mac</b> or <b>string</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### vendor-specific-option

Synopsis	Enter the <b>vendor-specific-option</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt msap-policy string vpls-only-sap-parameters dhcp option-82 vendor-specific-option</a>
Tree	<a href="#">vendor-specific-option</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### client-mac-address *boolean*

Synopsis	Send MAC address in Nokia vendor-specific sub-option
Context	<b>configure</b> <a href="#">subscriber-mgmt msap-policy string vpls-only-sap-parameters dhcp option-82 vendor-specific-option client-mac-address boolean</a>
Tree	<a href="#">client-mac-address</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### sap-id *boolean*

Synopsis	Send SAP ID in the Nokia vendor-specific sub-option
Context	<b>configure</b> <a href="#">subscriber-mgmt msap-policy string vpls-only-sap-parameters dhcp option-82 vendor-specific-option sap-id boolean</a>
Tree	<a href="#">sap-id</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**service-id** *boolean*

Synopsis	Send service ID in the Nokia vendor-specific sub-option
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">vpls-only-sap-parameters</a> <a href="#">dhcp option-82</a> <a href="#">vendor-specific-option</a> <a href="#">service-id</a> <i>boolean</i>
Tree	<a href="#">service-id</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**string** *string*

Synopsis	String in the sub-option of the DHCP relay packet
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">vpls-only-sap-parameters</a> <a href="#">dhcp option-82</a> <a href="#">vendor-specific-option</a> <a href="#">string</a> <i>string</i>
Tree	<a href="#">string</a>
Description	This command specifies the string in the Nokia vendor-specific sub-option of the DHCP relay packet.
String Length	1 to 32
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**system-id** *boolean*

Synopsis	Send system ID in the Nokia vendor-specific sub-option
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">vpls-only-sap-parameters</a> <a href="#">dhcp option-82</a> <a href="#">vendor-specific-option</a> <a href="#">system-id</a> <i>boolean</i>
Tree	<a href="#">system-id</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**proxy-server**

Synopsis	Enter the <b>proxy-server</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">vpls-only-sap-parameters</a> <a href="#">dhcp proxy-server</a>

Tree	<a href="#">proxy-server</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **admin-state** *keyword*

Synopsis	Administrative state of the DHCP proxy server
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">vpls-only-sap-parameters</a> <a href="#">dhcp proxy-server</a> <b>admin-state</b> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **emulated-server** *string*

Synopsis	IP address used as DHCP server address in SAP context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">vpls-only-sap-parameters</a> <a href="#">dhcp proxy-server</a> <b>emulated-server</b> <i>string</i>
Tree	<a href="#">emulated-server</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **lease-time**

Synopsis	Enter the <b>lease-time</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">vpls-only-sap-parameters</a> <a href="#">dhcp proxy-server</a> <b>lease-time</b>
Tree	<a href="#">lease-time</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **radius-override** *boolean*

Synopsis	Use lease time information provided by RADIUS server
----------	--

Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">vpls-only-sap-parameters</a> <a href="#">dhcp proxy-server</a> <a href="#">lease-time</a> <a href="#">radius-override</a> <i>boolean</i>
Tree	<a href="#">radius-override</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **value** *number*

Synopsis	DHCP lease time
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">vpls-only-sap-parameters</a> <a href="#">dhcp proxy-server</a> <a href="#">lease-time</a> <i>value</i> <i>number</i>
Tree	<a href="#">value</a>
Range	300 to 315446399
Units	seconds
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **egress**

Synopsis	Enter the <b>egress</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">vpls-only-sap-parameters</a> <a href="#">egress</a>
Tree	<a href="#">egress</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **qos**

Synopsis	Enter the <b>qos</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">vpls-only-sap-parameters</a> <a href="#">egress</a> <a href="#">qos</a>
Tree	<a href="#">qos</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **policy-name** *reference*

Synopsis	QoS policy ID or name to associate with the MSAPs
Context	<b>configure</b> <a href="#">subscriber-mgmt msap-policy</a> <i>string</i> <a href="#">vpls-only-sap-parameters egress qos</a> <a href="#">policy-name</a> <i>reference</i>
Tree	<a href="#">policy-name</a>
Reference	<b>configure</b> <a href="#">qos sap-egress</a> <i>string</i>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **igmp-snooping**

Synopsis	Enter the <b>igmp-snooping</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt msap-policy</a> <i>string</i> <a href="#">vpls-only-sap-parameters igmp-snooping</a>
Tree	<a href="#">igmp-snooping</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **fast-leave** *boolean*

Synopsis	Allow IGMP fast leave processing
Context	<b>configure</b> <a href="#">subscriber-mgmt msap-policy</a> <i>string</i> <a href="#">vpls-only-sap-parameters igmp-snooping</a> <a href="#">fast-leave</a> <i>boolean</i>
Tree	<a href="#">fast-leave</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **import-policy** *reference*

Synopsis	Import policy that filters IGMP packets
Context	<b>configure</b> <a href="#">subscriber-mgmt msap-policy</a> <i>string</i> <a href="#">vpls-only-sap-parameters igmp-snooping</a> <a href="#">import-policy</a> <i>reference</i>
Tree	<a href="#">import-policy</a>
Reference	<b>configure</b> <a href="#">policy-options policy-statement</a> <i>string</i>
Introduced	16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **maximum-number-groups** (*keyword | number*)

Synopsis Maximum number of multicast groups

Context **configure** [subscriber-mgmt](#) [msap-policy](#) *string* [vpls-only-sap-parameters](#) [igmp-snooping](#) [maximum-number-groups](#) (*keyword | number*)

Tree [maximum-number-groups](#)

Range 1 to 16000

Options unlimited

Default unlimited

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **mcac**

Synopsis Enter the **mcac** context

Context **configure** [subscriber-mgmt](#) [msap-policy](#) *string* [vpls-only-sap-parameters](#) [igmp-snooping](#) [mcac](#)

Tree [mcac](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **bandwidth**

Synopsis Enter the **bandwidth** context

Context **configure** [subscriber-mgmt](#) [msap-policy](#) *string* [vpls-only-sap-parameters](#) [igmp-snooping](#) [mcac](#) [bandwidth](#)

Tree [bandwidth](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **mandatory** (*number | keyword*)

Synopsis Pre-reserved bandwidth for all mandatory channels

Context **configure** [subscriber-mgmt](#) [msap-policy](#) *string* [vpls-only-sap-parameters](#) [igmp-snooping](#) [mcac](#) [bandwidth](#) [mandatory](#) (*number | keyword*)

Tree	<a href="#">mandatory</a>
Range	0 to 2147483647
Options	unlimited
Default	unlimited
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **total** (*number* | *keyword*)

Synopsis	Maximum allowed bandwidth
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">vpls-only-sap-parameters</a> <a href="#">igmp-snooping</a> <a href="#">mcac</a> <a href="#">bandwidth</a> <b>total</b> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">total</a>
Range	0 to 2147483647
Options	unlimited
Default	unlimited
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **interface-policy** *reference*

Synopsis	MCAC interface policy name
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">vpls-only-sap-parameters</a> <a href="#">igmp-snooping</a> <a href="#">mcac</a> <a href="#">interface-policy</a> <i>reference</i>
Tree	<a href="#">interface-policy</a>
Reference	<b>configure</b> <a href="#">mcac</a> <a href="#">interface-policy</a> <i>string</i>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **mc-constraints**

Synopsis	Enter the <b>mc-constraints</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">vpls-only-sap-parameters</a> <a href="#">igmp-snooping</a> <a href="#">mcac</a> <a href="#">mc-constraints</a>
Tree	<a href="#">mc-constraints</a>
Introduced	16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **level** [**level-id**] *number*

Synopsis Enter the **level** list instance

Context **configure subscriber-mgmt msap-policy** *string* **vpls-only-sap-parameters igmp-snooping mcac mc-constraints level** *number*

Tree **level**

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **[level-id]** *number*

Synopsis Bandwidth level ID for an MCAC constraint

Context **configure subscriber-mgmt msap-policy** *string* **vpls-only-sap-parameters igmp-snooping mcac mc-constraints level** *number*

Tree **level**

Range 1 to 8

Notes This element is part of a list key.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **bandwidth** *number*

Synopsis Bandwidth available for this level

Context **configure subscriber-mgmt msap-policy** *string* **vpls-only-sap-parameters igmp-snooping mcac mc-constraints level** *number* **bandwidth** *number*

Tree **bandwidth**

Max. Range 0 to 4294967295

Units kilobps

Default 1

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**number-down** [**number-lag-port-down**] *number*

Synopsis	Enter the <b>number-down</b> list instance
Context	<b>configure</b> <b>subscriber-mgmt</b> <b>msap-policy</b> <i>string</i> <b>vpls-only-sap-parameters</b> <b>igmp-snooping</b> <b>mcac</b> <b>mc-constraints</b> <b>number-down</b> <i>number</i>
Tree	<b>number-down</b>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**[number-lag-port-down]** *number*

Synopsis	Number of lag ports down
Context	<b>configure</b> <b>subscriber-mgmt</b> <b>msap-policy</b> <i>string</i> <b>vpls-only-sap-parameters</b> <b>igmp-snooping</b> <b>mcac</b> <b>mc-constraints</b> <b>number-down</b> <i>number</i>
Tree	<b>number-down</b>
Range	1 to 64
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**level** *number*

Synopsis	Level to be associated with this number of lag ports that are down
Context	<b>configure</b> <b>subscriber-mgmt</b> <b>msap-policy</b> <i>string</i> <b>vpls-only-sap-parameters</b> <b>igmp-snooping</b> <b>mcac</b> <b>mc-constraints</b> <b>number-down</b> <i>number</i> <b>level</b> <i>number</i>
Tree	<b>level</b>
Range	1 to 8
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**use-lag-port-weight** *boolean*

Synopsis	Use LAG port weight to calculate MCAC constraints
Context	<b>configure</b> <b>subscriber-mgmt</b> <b>msap-policy</b> <i>string</i> <b>vpls-only-sap-parameters</b> <b>igmp-snooping</b> <b>mcac</b> <b>mc-constraints</b> <b>use-lag-port-weight</b> <i>boolean</i>
Tree	<b>use-lag-port-weight</b>

Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **policy reference**

Synopsis	Multicast CAC policy name
Context	<b>configure</b> <a href="#">subscriber-mgmt msap-policy string</a> <a href="#">vpls-only-sap-parameters igmp-snooping mcac policy reference</a>
Tree	<a href="#">policy</a>
Reference	<b>configure</b> <a href="#">mcac policy string</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **mvr**

Synopsis	Enter the <b>mvr</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt msap-policy string</a> <a href="#">vpls-only-sap-parameters igmp-snooping mvr</a>
Tree	<a href="#">mvr</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **from-vpls reference**

Synopsis	MVR VPLS from which the multicast channels are taken
Context	<b>configure</b> <a href="#">subscriber-mgmt msap-policy string</a> <a href="#">vpls-only-sap-parameters igmp-snooping mvr from-vpls reference</a>
Tree	<a href="#">from-vpls</a>
Reference	<b>configure</b> <a href="#">service vpls string</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **query-interval number**

Synopsis	Time between two consecutive host-query messages
----------	--

Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">vpls-only-sap-parameters</a> <a href="#">igmp-snooping</a> <a href="#">query-interval</a> <i>number</i>
Tree	<a href="#">query-interval</a>
Range	2 to 1024
Units	seconds
Default	125
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **query-last-member-interval** *number*

Synopsis	Time between group-specific query messages
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">vpls-only-sap-parameters</a> <a href="#">igmp-snooping</a> <a href="#">query-last-member-interval</a> <i>number</i>
Tree	<a href="#">query-last-member-interval</a>
Range	1 to 50
Units	deciseconds
Default	10
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **query-response-interval** *number*

Synopsis	Time to wait for a response to the host-query messages
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">vpls-only-sap-parameters</a> <a href="#">igmp-snooping</a> <a href="#">query-response-interval</a> <i>number</i>
Tree	<a href="#">query-response-interval</a>
Range	1 to 1023
Units	seconds
Default	10
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **robust-count** *number*

Synopsis	Number of retries after expected message loss
----------	---

Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">vpls-only-sap-parameters</a> <a href="#">igmp-snooping</a> <a href="#">robust-count</a> <i>number</i>
Tree	<a href="#">robust-count</a>
Range	2 to 7
Default	2
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**send-queries** *boolean*

Synopsis	Generate IGMP general queries
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">vpls-only-sap-parameters</a> <a href="#">igmp-snooping</a> <a href="#">send-queries</a> <i>boolean</i>
Tree	<a href="#">send-queries</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**version** *keyword*

Synopsis	IGMP version
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">vpls-only-sap-parameters</a> <a href="#">igmp-snooping</a> <a href="#">version</a> <i>keyword</i>
Tree	<a href="#">version</a>
Options	1, 2, 3
Default	3
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**ingress**

Synopsis	Enter the <b>ingress</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">vpls-only-sap-parameters</a> <a href="#">ingress</a>
Tree	<a href="#">ingress</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**qos**

Synopsis	Enter the <b>qos</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">vpls-only-sap-parameters</a> <a href="#">ingress</a> <a href="#">qos</a>
Tree	<a href="#">qos</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**policy-name** *reference*

Synopsis	QoS policy ID or name to associate with the MSAPs
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">vpls-only-sap-parameters</a> <a href="#">ingress</a> <a href="#">qos</a> <a href="#">policy-name</a> <i>reference</i>
Tree	<a href="#">policy-name</a>
Reference	<b>configure</b> <a href="#">qos</a> <a href="#">sap-ingress</a> <i>string</i>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**queuing-type** *keyword*

Synopsis	Queuing type
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">vpls-only-sap-parameters</a> <a href="#">ingress</a> <a href="#">qos</a> <a href="#">queuing-type</a> <i>keyword</i>
Tree	<a href="#">queuing-type</a>
Options	multipoint-shared, service
Default	multipoint-shared
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**mac-da-hashing** *boolean*

Synopsis	Include hashing on MAC DA ISO subscriber ID
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">vpls-only-sap-parameters</a> <a href="#">mac-da-hashing</a> <i>boolean</i>
Tree	<a href="#">mac-da-hashing</a>
Default	false

Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **split-horizon-group** *string*

Synopsis Name of the split horizon group for the MSAP  
 Context **configure** [subscriber-mgmt](#) [msap-policy](#) *string* [vpls-only-sap-parameters](#) [split-horizon-group](#) *string*  
 Tree [split-horizon-group](#)  
 String Length 1 to 32  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **pfcp**

Synopsis Enter the **pfcp** context  
 Context **configure** [subscriber-mgmt](#) [pfcp](#)  
 Tree [pfcp](#)  
 Introduced 20.5.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **association** [[name](#)] *string*

Synopsis Enter the **association** list instance  
 Context **configure** [subscriber-mgmt](#) [pfcp](#) [association](#) *string*  
 Tree [association](#)  
 Description Commands in this context configure a PFCP association towards a BNG CUPS CPF.  
 Max. Instances 2  
 Introduced 20.5.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **[name]** *string*

Synopsis PFCP association name  
 Context **configure** [subscriber-mgmt](#) [pfcp](#) [association](#) *string*

Tree	<a href="#">association</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **admin-state** *keyword*

Synopsis	Administrative state of the PFCP association
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">pfc</a> <a href="#">association</a> <i>string</i> <a href="#">admin-state</a> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **association-release-timeout** (*keyword* | *number*)

Synopsis	Time to wait for a response to a release request
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">pfc</a> <a href="#">association</a> <i>string</i> <a href="#">association-release-timeout</a> ( <i>keyword</i>   <i>number</i> )
Tree	<a href="#">association-release-timeout</a>
Description	<p>This command configures the time to wait to clean up the PFCP association after it has been disabled. After administratively disabling a PFCP association, the system requests a shutdown to the BNG CPF. If the BNG CPF does not gracefully remove the association before expiry of the timer, the full association and all related sessions are forcefully removed.</p> <p>The PFCP protocol encoding does not allow the full range of configured values. The system automatically rounds up the configured value to the nearest value allowed by the protocol. For more information about the protocol encoding, see 3GPP TS 29.244 8.2.78.1.</p>
Range	30 to 3600
Units	seconds
Options	none
Default	3600
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**bfd-expedited-path-down** *boolean*

Synopsis	Track BFD sessions to expedite PFCP path down detection
Context	<b>configure</b> <a href="#">subscriber-mgmt pfcp association</a> <i>string</i> <a href="#">bfd-expedited-path-down</a> <i>boolean</i>
Tree	<a href="#">bfd-expedited-path-down</a>
Description	When configured to <b>true</b> , the system tracks BFD sessions to expedite PFCP path down detection on BFD down events. This requires the configuration of <b>path-restoration-time</b> .
Default	false
Introduced	22.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">subscriber-mgmt pfcp association</a> <i>string</i> <a href="#">description</a> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**heartbeat**

Synopsis	Enter the <b>heartbeat</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt pfcp association</a> <i>string</i> <a href="#">heartbeat</a>
Tree	<a href="#">heartbeat</a>
Description	Commands in this context configure the parameters for transmitting PFCP Heartbeat Request messages to a PFCP peer.
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**interval** *number*

Synopsis	Time between two successful heartbeat request messages
Context	<b>configure</b> <a href="#">subscriber-mgmt pfcp association</a> <i>string</i> <a href="#">heartbeat</a> <i>interval</i> <i>number</i>
Tree	<a href="#">interval</a>

Range	5 to 180
Units	seconds
Default	60
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **retries** *number*

Synopsis	Number of retries after the heartbeat timeout expires
Context	<b>configure</b> <a href="#">subscriber-mgmt pfcf association</a> <i>string</i> <a href="#">heartbeat</a> <b>retries</b> <i>number</i>
Tree	<a href="#">retries</a>
Description	This command configures the number of times the same Heartbeat Request is sent before the PFCF path to the peer is considered down.
Range	0 to 30
Default	4
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **timeout** *number*

Synopsis	Time the system waits for a heartbeat response message
Context	<b>configure</b> <a href="#">subscriber-mgmt pfcf association</a> <i>string</i> <a href="#">heartbeat</a> <b>timeout</b> <i>number</i>
Tree	<a href="#">timeout</a>
Description	This command configures the timeout after which a Heartbeat Request is considered unanswered.
Range	1 to 20
Units	seconds
Default	5
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **interface**

Synopsis	Enter the <b>interface</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt pfcf association</a> <i>string</i> <b>interface</b>

Tree	<a href="#">interface</a>
Description	Commands in this context configure the interface from which PFCP messages will be sent and on which PFCP messages will be received.
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **name** *string*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Name of the interface to use for the association
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">pfc</a> <a href="#">association</a> <i>string</i> <a href="#">interface</a> <i>name</i> <i>string</i>
Tree	<a href="#">name</a>
String Length	1 to 32
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **router-instance** *string*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Router context for the PFCP association
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">pfc</a> <a href="#">association</a> <i>string</i> <a href="#">interface</a> <a href="#">router-instance</a> <i>string</i>
Tree	<a href="#">router-instance</a>
Description	This command configures the name of the interface, along with its routing instance, used as binding interface for PFCP.
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **nat**

Synopsis	Enter the <b>nat</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">pfc</a> <a href="#">association</a> <i>string</i> <b>nat</b>

Tree	<a href="#">nat</a>
Description	Commands in this context configure NAT or WLAN-GW groups for BNG CUPS PFCP association.
Introduced	20.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **nat-group** *reference*

Synopsis	NAT group used for CUPS NAT functionality
Context	<b>configure</b> <a href="#">subscriber-mgmt pfcp association</a> <i>string</i> <a href="#">nat nat-group</a> <i>reference</i>
Tree	<a href="#">nat-group</a>
Reference	<b>configure</b> <a href="#">isa nat-group</a> <i>number</i>
Notes	The following elements are part of a choice: <b>nat-group</b> or <b>wlan-gw-group</b> .
Introduced	20.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **wlan-gw-group** *reference*

Synopsis	WLAN gateway group used for CUPS NAT functionality
Context	<b>configure</b> <a href="#">subscriber-mgmt pfcp association</a> <i>string</i> <a href="#">nat wlan-gw-group</a> <i>reference</i>
Tree	<a href="#">wlan-gw-group</a>
Reference	<b>configure</b> <a href="#">isa wlan-gw-group</a> <i>number</i>
Notes	The following elements are part of a choice: <b>nat-group</b> or <b>wlan-gw-group</b> .
Introduced	20.10.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **node-id**

Synopsis	Enter the <b>node-id</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt pfcp association</a> <i>string</i> <a href="#">node-id</a>
Tree	<a href="#">node-id</a>
Description	Commands in this context configure the UPF Node Identifier as sent in PFCP. It can either be configured to use the linked interface source IP or a preconfigured FQDN.
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## fqdn string

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	FQDN that identifies the local system for PFCP
Context	<b>configure</b> <a href="#">subscriber-mgmt pfcp association</a> <i>string</i> <a href="#">node-id</a> <a href="#">fqdn</a> <i>string</i>
Tree	<a href="#">fqdn</a>
String Length	1 to 255
Notes	The following elements are part of a choice: <b>fqdn</b> or <b>use-ip-address</b> .
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## use-ip-address

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Use the IP address of interface for the association
Context	<b>configure</b> <a href="#">subscriber-mgmt pfcp association</a> <i>string</i> <a href="#">node-id</a> <a href="#">use-ip-address</a>
Tree	<a href="#">use-ip-address</a>
Description	When configured, the binding interface address is used as identification of the local system for PFCP.
Notes	The following elements are part of a choice: <b>fqdn</b> or <b>use-ip-address</b> .
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## path-restoration-time number

Synopsis	Time to wait before declaring the path down
Context	<b>configure</b> <a href="#">subscriber-mgmt pfcp association</a> <i>string</i> <a href="#">path-restoration-time</a> <i>number</i>
Tree	<a href="#">path-restoration-time</a>
Description	This command configures the time for which sessions are kept after a PFCP path failure is detected. If the path recovers without a restart before this time expires, the sessions are kept. Otherwise, they are removed.

Range	1 to 11520
Units	minutes
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## peer

Synopsis	Enter the <b>peer</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt pfcg association</a> <i>string</i> <b>peer</b>
Tree	<a href="#">peer</a>
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## ip-address (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	PFCP peer IP address
Context	<b>configure</b> <a href="#">subscriber-mgmt pfcg association</a> <i>string</i> <b>peer ip-address</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	<a href="#">ip-address</a>
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## python-policy *reference*

Synopsis	Python policy to process PFCP messages
Context	<b>configure</b> <a href="#">subscriber-mgmt pfcg association</a> <i>string</i> <b>python-policy</b> <i>reference</i>
Tree	<a href="#">python-policy</a>
Reference	<b>configure</b> <a href="#">python</a> <b>python-policy</b> <i>string</i>
Introduced	22.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**tx**

Synopsis	Enter the <b>tx</b> context
Context	<b>configure subscriber-mgmt pfcg association string tx</b>
Tree	<b>tx</b>
Description	Commands in this context configure how PFCP messages are sent.
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**retries number**

Synopsis	Number of retries
Context	<b>configure subscriber-mgmt pfcg association string tx retries number</b>
Tree	<b>retries</b>
Description	This command configures the number of times a message is retried before it is considered lost, also known as N1.
Range	0 to 7
Default	3
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**timeout number**

Synopsis	Retransmission timer
Context	<b>configure subscriber-mgmt pfcg association string tx timeout number</b>
Tree	<b>timeout</b>
Description	This command configures the time after which a message is considered unanswered, also known as T1.
Range	1 to 30
Units	seconds
Default	1
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**ttl number**

Synopsis	TTL value in the IP header of egress PFCP packets
Context	<b>configure</b> <a href="#">subscriber-mgmt pfcp association</a> <i>string tx ttl number</i>
Tree	<a href="#">ttl</a>
Range	1 to 255
Default	255
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**pim-policy [name] string**

Synopsis	Enter the <b>pim-policy</b> list instance
Context	<b>configure</b> <a href="#">subscriber-mgmt pim-policy</a> <i>string</i>
Tree	<a href="#">pim-policy</a>
Max. Instances	1
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**[name] string**

Synopsis	Policy name
Context	<b>configure</b> <a href="#">subscriber-mgmt pim-policy</a> <i>string</i>
Tree	<a href="#">pim-policy</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**description string**

Synopsis	Text description
Context	<b>configure</b> <a href="#">subscriber-mgmt pim-policy</a> <i>string description string</i>
Tree	<a href="#">description</a>
String Length	1 to 80

Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **ppp-policy** [*name*] *string*

Synopsis	Enter the <b>ppp-policy</b> list instance
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ppp-policy</a> <i>string</i>
Tree	<a href="#">ppp-policy</a>
Max. Instances	256
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **[name]** *string*

Synopsis	PPP policy name
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ppp-policy</a> <i>string</i>
Tree	<a href="#">ppp-policy</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **allow-same-circuit-id-for-dhcp** *boolean*

Synopsis	Enable support for IPv4 address allocation on a SAP
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ppp-policy</a> <i>string</i> <a href="#">allow-same-circuit-id-for-dhcp</a> <i>boolean</i>
Tree	<a href="#">allow-same-circuit-id-for-dhcp</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **cookies** *boolean*

Synopsis	Enable/disable the use of AC-Cookie tags.
----------	---

Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ppp-policy</a> <i>string</i> <a href="#">cookies</a> <i>boolean</i>
Tree	<a href="#">cookies</a>
Default	true
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **default-pap-password** *string*

Synopsis	Default PAP password when no password from PPP client
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ppp-policy</a> <i>string</i> <a href="#">default-pap-password</a> <i>string</i>
Tree	<a href="#">default-pap-password</a>
String Length	1 to 115
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **default-user-name** *string*

Synopsis	Default username used for authentication
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ppp-policy</a> <i>string</i> <a href="#">default-user-name</a> <i>string</i>
Tree	<a href="#">default-user-name</a>
Description	This command configures the default username for authentication when not provided in PAP/CHAP authentication (no Name field in CHAP Response message or PeerId-Length=0 in PAP Authenticate-Request).  The PPP session terminates when no username is provided in the PAP/CHAP authentication and no default username is configured.
String Length	1 to 253
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ppp-policy</a> <i>string</i> <a href="#">description</a> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **force-ppp-mtu-gt-1492** *boolean*

Synopsis Enable PPPoE MRU negotiations greater than 1492 bytes

Context **configure** [subscriber-mgmt](#) [ppp-policy](#) *string* [force-ppp-mtu-gt-1492](#) *boolean*

Tree [force-ppp-mtu-gt-1492](#)

Description When configured to **true**, this command enables PPPoE MRU negotiations greater than 1492 bytes without the need to receive a “PPP-Max-Payload” tag in PADI/PADR from the client as defined in RFC 4638, *Accommodating a Maximum Transit Unit/Maximum Receive Unit (MTU/MRU) Greater Than 1492 in the Point-to-Point Protocol over Ethernet (PPPoE)*.

When configured to **false**, this command disables PPPoE MRU negotiations greater than 1492 bytes.

Default false

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **ipcp-subnet-negotiation** *boolean*

Synopsis Allow IPCP subnet negotiation for PPPoE hosts

Context **configure** [subscriber-mgmt](#) [ppp-policy](#) *string* [ipcp-subnet-negotiation](#) *boolean*

Tree [ipcp-subnet-negotiation](#)

Default false

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **keepalive**

Synopsis Enter the **keepalive** context

Context **configure** [subscriber-mgmt](#) [ppp-policy](#) *string* [keepalive](#)

Tree [keepalive](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**hold-up-multiplier** *number*

Synopsis	PPP keepalive multiplier
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ppp-policy</a> <i>string</i> <a href="#">keepalive</a> <b>hold-up-multiplier</b> <i>number</i>
Tree	<a href="#">hold-up-multiplier</a>
Range	1 to 5
Default	3
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**interval** *number*

Synopsis	PPP keepalive interval
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ppp-policy</a> <i>string</i> <a href="#">keepalive</a> <b>interval</b> <i>number</i>
Tree	<a href="#">interval</a>
Range	4 to 300
Units	seconds
Default	30
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**lcp-ignore-identifier** *boolean*

Synopsis	Ignore identifier values in the LCP Echo Reply
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ppp-policy</a> <i>string</i> <a href="#">lcp-ignore-identifier</a> <i>boolean</i>
Tree	<a href="#">lcp-ignore-identifier</a>
Description	When configured to <b>true</b> , BNG ignores the Identifier field of the Echo-Reply message and keeps the PPP session up.  When configured to <b>false</b> , BNG does not ignore the identifier value, discards any incorrect messages, and the PPP session terminates because of the echo timeout.
Default	false
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**lcp-ignore-magic-numbers** *boolean*

Synopsis	Ignore LCP peer magic number mismatch
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ppp-policy</a> <i>string</i> <a href="#">lcp-ignore-magic-numbers</a> <i>boolean</i>
Tree	<a href="#">lcp-ignore-magic-numbers</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**max-sessions-per-cid**

Synopsis	Enable the <b>max-sessions-per-cid</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ppp-policy</a> <i>string</i> <a href="#">max-sessions-per-cid</a>
Tree	<a href="#">max-sessions-per-cid</a>
Description	<p>Commands in this context specify the configuration settings for PPPoE sessions based on the Agent Circuit ID.</p> <p>When this context is configured, the limit for PPPoE sessions per Agent Circuit ID must be configured. The limit does not apply to sessions without an Agent Circuit ID; however, sessions without an Agent Circuit ID can only be established when the <b>allow-sessions-without-cid</b> command is configured to <b>true</b>.</p> <p>When this context is unconfigured, no limit is placed on the number of PPPoE sessions with the same Agent Circuit ID on the same SAP or MSAP and PPPoE sessions with or without an Agent Circuit ID can be established.</p>
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**allow-sessions-without-cid** *boolean*

Synopsis	Allow PPPoE sessions without an Agent Circuit ID
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ppp-policy</a> <i>string</i> <a href="#">max-sessions-per-cid</a> <a href="#">allow-sessions-without-cid</a> <i>boolean</i>
Tree	<a href="#">allow-sessions-without-cid</a>
Description	<p>When configured to <b>true</b>, PPPoE sessions without an Agent Circuit ID can be established on a SAP. The limit configured for the maximum number of sessions allowed per Agent Circuit ID does not apply to these sessions.</p> <p>When configured to <b>false</b>, PPPoE sessions without an Agent Circuit ID are denied.</p> <p>The command is valid only when a limit is configured for the maximum sessions per Agent Circuit ID on a SAP.</p>
Default	false

Introduced	20.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **limit** *number*

Synopsis	Maximum sessions per Agent Circuit ID and per SAP
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ppp-policy</a> <i>string</i> <a href="#">max-sessions-per-cid</a> <i>limit</i> <i>number</i>
Tree	<a href="#">limit</a>
Description	<p>This command configures the maximum number of PPPoE sessions that can be active with the same Agent Circuit ID on the same SAP or MSAP. This limit is enforced in the discovery phase, prior to PAP or CHAP authentication, based on the Agent Circuit ID sub-option present in the vendor-specific PPPoE access loop identification tag added in PADI and PADR messages by a PPPoE intermediate agent.</p> <p>PPPoE sessions without an Agent Circuit ID are not subject to the configured limit; however, sessions without an Agent Circuit ID can only be established when the <b>allow-sessions-without-cid</b> command is configured to <b>true</b>.</p>
Range	1 to 8190
Notes	This element is mandatory.
Introduced	20.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **max-sessions-per-mac** *number*

Synopsis	Maximum number of sessions per MAC address
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ppp-policy</a> <i>string</i> <a href="#">max-sessions-per-mac</a> <i>number</i>
Tree	<a href="#">max-sessions-per-mac</a>
Description	<p>This command sets the maximum PPP sessions that can be opened for a specified MAC address.</p> <p>To enable IPv4 address allocation using the internal DHCPv4 client for multiple PPPoE sessions on a single SAP and having the same MAC address and circuit-ID, the optional CLI parameter <b>allow-same-circuit-id-for-dhcp</b> should be added. The SR OS local DHCP server detects the additional vendor-specific options inserted by the internal DHCPv4 client and use an extended unique key for lease allocation.</p>
Range	1 to 8191
Default	1
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## mlppp

Synopsis	Enter the <b>mlppp</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ppp-policy</a> <i>string</i> <a href="#">mlppp</a>
Tree	<a href="#">mlppp</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s

## accept-mrru *boolean*

Synopsis	Accept multilink MRRU LCP option
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ppp-policy</a> <i>string</i> <a href="#">mlppp</a> <a href="#">accept-mrru</a> <i>boolean</i>
Tree	<a href="#">accept-mrru</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s

## endpoint

Synopsis	Enter the <b>endpoint</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ppp-policy</a> <i>string</i> <a href="#">mlppp</a> <a href="#">endpoint</a>
Tree	<a href="#">endpoint</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s

## ip (*ipv4-address* | *keyword*)

Synopsis	Endpoint ID as an IP address
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ppp-policy</a> <i>string</i> <a href="#">mlppp</a> <a href="#">endpoint</a> <a href="#">ip</a> ( <i>ipv4-address</i>   <i>keyword</i> )
Tree	<a href="#">ip</a>
Options	system
Notes	The following elements are part of a choice: <b>ip</b> or <b>mac</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s

**mac** (*mac-address* | *keyword*)

Synopsis	Endpoint ID as a MAC address
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ppp-policy</a> <i>string</i> <a href="#">mlppp</a> <a href="#">endpoint</a> <a href="#">mac</a> ( <i>mac-address</i>   <i>keyword</i> )
Tree	<a href="#">mac</a>
Options	system
Notes	The following elements are part of a choice: <b>ip</b> or <b>mac</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s

**short-sequence-numbers** *boolean*

Synopsis	Request a peer to send short sequence numbers
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ppp-policy</a> <i>string</i> <a href="#">mlppp</a> <a href="#">short-sequence-numbers</a> <i>boolean</i>
Tree	<a href="#">short-sequence-numbers</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s

**ncp-renegotiation** *keyword*

Synopsis	Behavior for subsequent NCP renegotiation messages
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ppp-policy</a> <i>string</i> <a href="#">ncp-renegotiation</a> <i>keyword</i>
Tree	<a href="#">ncp-renegotiation</a>
Options	ignore, terminate-session
Default	terminate-session
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**pado-ac-name** *string*

Synopsis	Access Concentrator name used in PPPoE PADO message
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ppp-policy</a> <i>string</i> <a href="#">pado-ac-name</a> <i>string</i>
Tree	<a href="#">pado-ac-name</a>

---

String Length	1 to 128
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **pado-delay** *number*

Synopsis	Delay timeout before sending a PADO
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ppp-policy</a> <i>string</i> <a href="#">pado-delay</a> <i>number</i>
Tree	<a href="#">pado-delay</a>
Range	1 to 30
Units	deciseconds
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **ppp-authentication** *keyword*

Synopsis	PPP authentication protocol to negotiate
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ppp-policy</a> <i>string</i> <a href="#">ppp-authentication</a> <i>keyword</i>
Tree	<a href="#">ppp-authentication</a>
Options	pap, chap, pref-chap, pref-pap
Default	pref-chap
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **ppp-chap-challenge-length**

Synopsis	Enter the <b>ppp-chap-challenge-length</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ppp-policy</a> <i>string</i> <a href="#">ppp-chap-challenge-length</a>
Tree	<a href="#">ppp-chap-challenge-length</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **max** *number*

Synopsis	Maximum length for the PPP CHAP challenge
----------	---

Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ppp-policy</a> <i>string</i> <a href="#">ppp-chap-challenge-length</a> <i>max</i> <i>number</i>
Tree	<a href="#">max</a>
Range	8 to 64
Default	64
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**min** *number*

Synopsis	Minimum length for the PPP CHAP challenge
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ppp-policy</a> <i>string</i> <a href="#">ppp-chap-challenge-length</a> <i>min</i> <i>number</i>
Tree	<a href="#">min</a>
Range	8 to 64
Default	32
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**ppp-initial-delay** *boolean*

Synopsis	Select delay timeout before starting the PPP stack
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ppp-policy</a> <i>string</i> <a href="#">ppp-initial-delay</a> <i>boolean</i>
Tree	<a href="#">ppp-initial-delay</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**ppp-mtu** *number*

Synopsis	Maximum PPP MTU size
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ppp-policy</a> <i>string</i> <a href="#">ppp-mtu</a> <i>number</i>
Tree	<a href="#">ppp-mtu</a>
Range	512 to 9212
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## ppp-options

Synopsis	Enter the <b>ppp-options</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ppp-policy</a> <i>string</i> <a href="#">ppp-options</a>
Tree	<a href="#">ppp-options</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## custom-option [protocol](#) *keyword* [option-number](#) *number*

Synopsis	Enter the <b>custom-option</b> list instance
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ppp-policy</a> <i>string</i> <a href="#">ppp-options</a> <a href="#">custom-option</a> <a href="#">protocol</a> <i>keyword</i> <a href="#">option-number</a> <i>number</i>
Tree	<a href="#">custom-option</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## [protocol](#) *keyword*

Synopsis	Protocol for the custom PPP option
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ppp-policy</a> <i>string</i> <a href="#">ppp-options</a> <a href="#">custom-option</a> <a href="#">protocol</a> <i>keyword</i> <a href="#">option-number</a> <i>number</i>
Tree	<a href="#">custom-option</a>
Options	lcp, ipcp, ipv6cp
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## [option-number](#) *number*

Synopsis	PPP option number
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ppp-policy</a> <i>string</i> <a href="#">ppp-options</a> <a href="#">custom-option</a> <a href="#">protocol</a> <i>keyword</i> <a href="#">option-number</a> <i>number</i>
Tree	<a href="#">custom-option</a>
Range	0 to 255
Notes	This element is part of a list key.

Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **address** *string*

Synopsis	IP address of the custom PPP option
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ppp-policy</a> <i>string</i> <a href="#">ppp-options</a> <a href="#">custom-option</a> <a href="#">protocol</a> <i>keyword</i> <a href="#">option-number</a> <i>number</i> <a href="#">address</a> <i>string</i>
Tree	<a href="#">address</a>
Notes	The following elements are part of a mandatory choice: <b>address</b> , <b>ascii-string</b> , <b>empty</b> , or <b>hex-string</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **ascii-string** *string*

Synopsis	ASCII string for the customer PPP option
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ppp-policy</a> <i>string</i> <a href="#">ppp-options</a> <a href="#">custom-option</a> <a href="#">protocol</a> <i>keyword</i> <a href="#">option-number</a> <i>number</i> <a href="#">ascii-string</a> <i>string</i>
Tree	<a href="#">ascii-string</a>
String Length	1 to 127
Notes	The following elements are part of a mandatory choice: <b>address</b> , <b>ascii-string</b> , <b>empty</b> , or <b>hex-string</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **empty**

Synopsis	Configure an empty PPP option.
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ppp-policy</a> <i>string</i> <a href="#">ppp-options</a> <a href="#">custom-option</a> <a href="#">protocol</a> <i>keyword</i> <a href="#">option-number</a> <i>number</i> <a href="#">empty</a>
Tree	<a href="#">empty</a>
Notes	The following elements are part of a mandatory choice: <b>address</b> , <b>ascii-string</b> , <b>empty</b> , or <b>hex-string</b> .
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**hex-string** *string*

Synopsis	Hexadecimal string for the custom PPP option
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ppp-policy</a> <i>string</i> <a href="#">ppp-options</a> <a href="#">custom-option</a> <a href="#">protocol</a> <a href="#">keyword</a> <a href="#">option-number</a> <i>number</i> <b>hex-string</b> <i>string</i>
Tree	<a href="#">hex-string</a>
String Length	1 to 256
Notes	The following elements are part of a mandatory choice: <b>address</b> , <b>ascii-string</b> , <b>empty</b> , or <b>hex-string</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**re-establish-session** *boolean*

Synopsis	Reconnect and override an existing session
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ppp-policy</a> <i>string</i> <a href="#">re-establish-session</a> <i>boolean</i>
Tree	<a href="#">re-establish-session</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**reject-unconfigured-ncp** *boolean*

Synopsis	Enable/disable reject unconfigured NCP.
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ppp-policy</a> <i>string</i> <a href="#">reject-unconfigured-ncp</a> <i>boolean</i>
Tree	<a href="#">reject-unconfigured-ncp</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**reply-on-padt** *boolean*

Synopsis	Enable/disable reply on PADT packets.
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ppp-policy</a> <i>string</i> <a href="#">reply-on-padt</a> <i>boolean</i>
Tree	<a href="#">reply-on-padt</a>
Default	false

Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **session-timeout** *number*

Synopsis	Session timeout interval
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ppp-policy</a> <i>string</i> <a href="#">session-timeout</a> <i>number</i>
Tree	<a href="#">session-timeout</a>
Range	1 to 31104000
Units	seconds
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **sid-allocation** *keyword*

Synopsis	PPPoE session ID allocation method
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ppp-policy</a> <i>string</i> <a href="#">sid-allocation</a> <i>keyword</i>
Tree	<a href="#">sid-allocation</a>
Description	This command determines the allocation of session IDs for a PPPoE session with a given MAC address that is active on a given SAP.
Options	sequential, random
Default	sequential
Introduced	20.2.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **unique-sid** *keyword*

Synopsis	Mode in which a unique session ID is allocated
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ppp-policy</a> <i>string</i> <a href="#">unique-sid</a> <i>keyword</i>
Tree	<a href="#">unique-sid</a>
Description	This command specifies how unique session IDs are assigned to PPPoE sessions that are active on a single SAP.  This command is used with the <b>sid-allocation</b> command to determine the assignment of session IDs to subsequent PPPoE sessions.
Options	per-sap, per-sap-mac, per-msap
Default	per-sap-mac

Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **pppoe-client-policy** [*name*] *string*

Synopsis	Enter the <b>pppoe-client-policy</b> list instance
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">pppoe-client-policy</a> <i>string</i>
Tree	<a href="#">pppoe-client-policy</a>
Max. Instances	256
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **[name]** *string*

Synopsis	PPPoE client policy name
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">pppoe-client-policy</a> <i>string</i>
Tree	<a href="#">pppoe-client-policy</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">pppoe-client-policy</a> <i>string</i> <a href="#">description</a> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **keepalive**

Synopsis	Enter the <b>keepalive</b> context
----------	------------------------------------

---

Context	<b>configure</b> <a href="#">subscriber-mgmt pppoe-client-policy</a> <i>string</i> <a href="#">keepalive</a>
Tree	<a href="#">keepalive</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **hold-up-multiplier** *number*

Synopsis	PPPoE keepalive multiplier
Context	<b>configure</b> <a href="#">subscriber-mgmt pppoe-client-policy</a> <i>string</i> <a href="#">keepalive</a> <a href="#">hold-up-multiplier</a> <i>number</i>
Tree	<a href="#">hold-up-multiplier</a>
Range	1 to 5
Default	3
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **interval** *number*

Synopsis	PPPoE keepalive interval
Context	<b>configure</b> <a href="#">subscriber-mgmt pppoe-client-policy</a> <i>string</i> <a href="#">keepalive</a> <a href="#">interval</a> <i>number</i>
Tree	<a href="#">interval</a>
Range	10 to 300
Units	seconds
Default	30
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **mru** *number*

Synopsis	PPPoE MRU
Context	<b>configure</b> <a href="#">subscriber-mgmt pppoe-client-policy</a> <i>string</i> <a href="#">mru</a> <i>number</i>
Tree	<a href="#">mru</a>
Range	512 to 9154
Default	1492
Introduced	16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **mtu number**

Synopsis PPPoE MTU  
Context **configure** [subscriber-mgmt pppoe-client-policy](#) *string* [mtu number](#)  
Tree [mtu](#)  
Range 512 to 9154  
Default 1492  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **python-policy reference**

Synopsis Python policy for all messages to and from PPPoE client  
Context **configure** [subscriber-mgmt pppoe-client-policy](#) *string* [python-policy reference](#)  
Tree [python-policy](#)  
Reference **configure** [python python-policy](#) *string*  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **restart-backoff**

Synopsis Enter the **restart-backoff** context  
Context **configure** [subscriber-mgmt pppoe-client-policy](#) *string* [restart-backoff](#)  
Tree [restart-backoff](#)  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **initial-time number**

Synopsis Initial backoff time  
Context **configure** [subscriber-mgmt pppoe-client-policy](#) *string* [restart-backoff](#) *initial-time number*  
Tree [initial-time](#)  
Range 10 to 3600

---

Units	seconds
Default	30
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **max-time** *number*

Synopsis	Maximum backoff time
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">pppoe-client-policy</a> <i>string</i> <a href="#">restart-backoff</a> <b>max-time</b> <i>number</i>
Tree	<a href="#">max-time</a>
Range	10 to 3600
Units	seconds
Default	600
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **stack**

Synopsis	Enter the <b>stack</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">pppoe-client-policy</a> <i>string</i> <b>stack</b>
Tree	<a href="#">stack</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **ipv4** *boolean*

Synopsis	Start IPCP to retrieve an IPv4 address
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">pppoe-client-policy</a> <i>string</i> <a href="#">stack</a> <b>ipv4</b> <i>boolean</i>
Tree	<a href="#">ipv4</a>
Default	true
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**ipv6-slaac *boolean***

Synopsis	Start IPv6CP and use SLAAC to retrieve an IPv6 prefix
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">pppoe-client-policy</a> <i>string</i> <a href="#">stack</a> <a href="#">ipv6-slaac</a> <i>boolean</i>
Tree	<a href="#">ipv6-slaac</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**radius-accounting-policy [*name*] *string***

Synopsis	Enter the <b>radius-accounting-policy</b> list instance
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i>
Tree	<a href="#">radius-accounting-policy</a>
Max. Instances	32
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**[*name*] *string***

Synopsis	RADIUS-based accounting policy name
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i>
Tree	<a href="#">radius-accounting-policy</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**acct-tunnel-connection-fmt *string***

Synopsis	String sent in the accounting message
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">acct-tunnel-connection-fmt</a> <i>string</i>
Tree	<a href="#">acct-tunnel-connection-fmt</a>
String Length	1 to 253

Default	%n
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### custom-record

Synopsis	Enter the <b>custom-record</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">custom-record</a>
Tree	<a href="#">custom-record</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### queue [*id*] *number*

Synopsis	Enter the <b>queue</b> list instance
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">custom-record</a> <a href="#">queue</a> <i>number</i>
Tree	<a href="#">queue</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### [*id*] *number*

Synopsis	Queue ID for which counters are collected in the record
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">custom-record</a> <a href="#">queue</a> <i>number</i>
Tree	<a href="#">queue</a>
Range	1 to 32
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### e-counters

Synopsis	Enter the <b>e-counters</b> context
----------	-------------------------------------

---

Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">custom-record</a> <a href="#">queue</a> <a href="#">number</a> <a href="#">e-counters</a>
Tree	<a href="#">e-counters</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **in-profile-octets-discarded-count** *boolean*

Synopsis	Include the in-profile octets discarded count
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">custom-record</a> <a href="#">queue</a> <a href="#">number</a> <a href="#">e-counters</a> <a href="#">in-profile-octets-discarded-count</a> <i>boolean</i>
Tree	<a href="#">in-profile-octets-discarded-count</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **in-profile-octets-forwarded-count** *boolean*

Synopsis	Include the in-profile octets forwarded count
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">custom-record</a> <a href="#">queue</a> <a href="#">number</a> <a href="#">e-counters</a> <a href="#">in-profile-octets-forwarded-count</a> <i>boolean</i>
Tree	<a href="#">in-profile-octets-forwarded-count</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **in-profile-packets-discarded-count** *boolean*

Synopsis	Include the in-profile packets discarded count
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">custom-record</a> <a href="#">queue</a> <a href="#">number</a> <a href="#">e-counters</a> <a href="#">in-profile-packets-discarded-count</a> <i>boolean</i>
Tree	<a href="#">in-profile-packets-discarded-count</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**in-profile-packets-forwarded-count** *boolean*

Synopsis	Include the in-profile packets forwarded count
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">custom-record</a> <a href="#">queue</a> <a href="#">number</a> <a href="#">e-counters</a> <a href="#">in-profile-packets-forwarded-count</a> <i>boolean</i>
Tree	<a href="#">in-profile-packets-forwarded-count</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**out-profile-octets-discarded-count** *boolean*

Synopsis	Include the out-profile octets discarded count
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">custom-record</a> <a href="#">queue</a> <a href="#">number</a> <a href="#">e-counters</a> <a href="#">out-profile-octets-discarded-count</a> <i>boolean</i>
Tree	<a href="#">out-profile-octets-discarded-count</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**out-profile-octets-forwarded-count** *boolean*

Synopsis	Include the out-of-profile octets forwarded count
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">custom-record</a> <a href="#">queue</a> <a href="#">number</a> <a href="#">e-counters</a> <a href="#">out-profile-octets-forwarded-count</a> <i>boolean</i>
Tree	<a href="#">out-profile-octets-forwarded-count</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**out-profile-packets-discarded-count** *boolean*

Synopsis	Include the out-profile packets discarded count
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">custom-record</a> <a href="#">queue</a> <a href="#">number</a> <a href="#">e-counters</a> <a href="#">out-profile-packets-discarded-count</a> <i>boolean</i>
Tree	<a href="#">out-profile-packets-discarded-count</a>
Default	false

Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **out-profile-packets-forwarded-count** *boolean*

Synopsis Include the out-of-profile packets forwarded count  
Context **configure** [subscriber-mgmt](#) [radius-accounting-policy](#) *string* [custom-record](#) [queue](#) [number](#) [e-counters](#) [out-profile-packets-forwarded-count](#) *boolean*  
Tree [out-profile-packets-forwarded-count](#)  
Default false  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **i-counters**

Synopsis Enter the **i-counters** context  
Context **configure** [subscriber-mgmt](#) [radius-accounting-policy](#) *string* [custom-record](#) [queue](#) [number](#) [i-counters](#)  
Tree [i-counters](#)  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **all-octets-offered-count** *boolean*

Synopsis Include the all octets offered count  
Context **configure** [subscriber-mgmt](#) [radius-accounting-policy](#) *string* [custom-record](#) [queue](#) [number](#) [i-counters](#) [all-octets-offered-count](#) *boolean*  
Tree [all-octets-offered-count](#)  
Default false  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **all-packets-offered-count** *boolean*

Synopsis Include all packets offered count  
Context **configure** [subscriber-mgmt](#) [radius-accounting-policy](#) *string* [custom-record](#) [queue](#) [number](#) [i-counters](#) [all-packets-offered-count](#) *boolean*

---

Tree	<a href="#">all-packets-offered-count</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **high-octets-discarded-count** *boolean*

Synopsis	Include the high octets discarded count
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">custom-record</a> <a href="#">queue</a> <i>number</i> <a href="#">i-counters</a> <a href="#">high-octets-discarded-count</a> <i>boolean</i>
Tree	<a href="#">high-octets-discarded-count</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **high-octets-offered-count** *boolean*

Synopsis	Include the high octets offered count
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">custom-record</a> <a href="#">queue</a> <i>number</i> <a href="#">i-counters</a> <a href="#">high-octets-offered-count</a> <i>boolean</i>
Tree	<a href="#">high-octets-offered-count</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **high-packets-discarded-count** *boolean*

Synopsis	Include the high packets discarded count
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">custom-record</a> <a href="#">queue</a> <i>number</i> <a href="#">i-counters</a> <a href="#">high-packets-discarded-count</a> <i>boolean</i>
Tree	<a href="#">high-packets-discarded-count</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### high-packets-offered-count *boolean*

Synopsis	Include the high packets offered count
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">custom-record</a> <a href="#">queue</a> <a href="#">number</a> <a href="#">i-counters</a> <a href="#">high-packets-offered-count</a> <i>boolean</i>
Tree	<a href="#">high-packets-offered-count</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### in-profile-octets-forwarded-count *boolean*

Synopsis	Include the in-profile octets forwarded count
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">custom-record</a> <a href="#">queue</a> <a href="#">number</a> <a href="#">i-counters</a> <a href="#">in-profile-octets-forwarded-count</a> <i>boolean</i>
Tree	<a href="#">in-profile-octets-forwarded-count</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### in-profile-packets-forwarded-count *boolean*

Synopsis	Include the in-profile packets forwarded count
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">custom-record</a> <a href="#">queue</a> <a href="#">number</a> <a href="#">i-counters</a> <a href="#">in-profile-packets-forwarded-count</a> <i>boolean</i>
Tree	<a href="#">in-profile-packets-forwarded-count</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### low-octets-discarded-count *boolean*

Synopsis	Include the low octets discarded count
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">custom-record</a> <a href="#">queue</a> <a href="#">number</a> <a href="#">i-counters</a> <a href="#">low-octets-discarded-count</a> <i>boolean</i>
Tree	<a href="#">low-octets-discarded-count</a>
Default	false

Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **low-octets-offered-count** *boolean*

Synopsis Include the low octets offered count  
Context **configure** [subscriber-mgmt](#) [radius-accounting-policy](#) *string* [custom-record](#) [queue](#)  
*number* [i-counters](#) **low-octets-offered-count** *boolean*  
Tree [low-octets-offered-count](#)  
Default false  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **low-packets-discarded-count** *boolean*

Synopsis Include the low packets discarded count  
Context **configure** [subscriber-mgmt](#) [radius-accounting-policy](#) *string* [custom-record](#) [queue](#)  
*number* [i-counters](#) **low-packets-discarded-count** *boolean*  
Tree [low-packets-discarded-count](#)  
Default false  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **low-packets-offered-count** *boolean*

Synopsis Include the low packets offered count  
Context **configure** [subscriber-mgmt](#) [radius-accounting-policy](#) *string* [custom-record](#) [queue](#)  
*number* [i-counters](#) **low-packets-offered-count** *boolean*  
Tree [low-packets-offered-count](#)  
Default false  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **out-profile-octets-forwarded-count** *boolean*

Synopsis Include the out-of-profile octets forwarded count

Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">custom-record</a> <a href="#">queue</a> <a href="#">number</a> <a href="#">i-counters</a> <a href="#">out-profile-octets-forwarded-count</a> <i>boolean</i>
Tree	<a href="#">out-profile-octets-forwarded-count</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **out-profile-packets-forwarded-count** *boolean*

Synopsis	Include the out-of-profile packets forwarded count
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">custom-record</a> <a href="#">queue</a> <a href="#">number</a> <a href="#">i-counters</a> <a href="#">out-profile-packets-forwarded-count</a> <i>boolean</i>
Tree	<a href="#">out-profile-packets-forwarded-count</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **uncoloured-octets-offered-count** *boolean*

Synopsis	Include the uncolored octets offered count
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">custom-record</a> <a href="#">queue</a> <a href="#">number</a> <a href="#">i-counters</a> <a href="#">uncoloured-octets-offered-count</a> <i>boolean</i>
Tree	<a href="#">uncoloured-octets-offered-count</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **uncoloured-packets-offered-count** *boolean*

Synopsis	Include the uncolored packets offered count
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">custom-record</a> <a href="#">queue</a> <a href="#">number</a> <a href="#">i-counters</a> <a href="#">uncoloured-packets-offered-count</a> <i>boolean</i>
Tree	<a href="#">uncoloured-packets-offered-count</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## ref-queue

Synopsis	Enter the <b>ref-queue</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">custom-record</a> <a href="#">ref-queue</a>
Tree	<a href="#">ref-queue</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## all

Synopsis	Apply significant change to counters for all queues
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">custom-record</a> <a href="#">ref-queue</a> <a href="#">all</a>
Tree	<a href="#">all</a>
Notes	The following elements are part of a choice: <b>all</b> or <b>id</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## e-counters

Synopsis	Enter the <b>e-counters</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">custom-record</a> <a href="#">ref-queue</a> <a href="#">e-counters</a>
Tree	<a href="#">e-counters</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## in-profile-octets-discarded-count *boolean*

Synopsis	Include the in-profile octets discarded count
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">custom-record</a> <a href="#">ref-queue</a> <a href="#">e-counters</a> <a href="#">in-profile-octets-discarded-count</a> <i>boolean</i>
Tree	<a href="#">in-profile-octets-discarded-count</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**in-profile-octets-forwarded-count** *boolean*

Synopsis	Include the in-profile octets forwarded count
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">custom-record</a> <a href="#">ref-queue</a> <a href="#">e-counters</a> <a href="#">in-profile-octets-forwarded-count</a> <i>boolean</i>
Tree	<a href="#">in-profile-octets-forwarded-count</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**in-profile-packets-discarded-count** *boolean*

Synopsis	Include the in-profile packets discarded count
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">custom-record</a> <a href="#">ref-queue</a> <a href="#">e-counters</a> <a href="#">in-profile-packets-discarded-count</a> <i>boolean</i>
Tree	<a href="#">in-profile-packets-discarded-count</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**in-profile-packets-forwarded-count** *boolean*

Synopsis	Include the in-profile packets forwarded count
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">custom-record</a> <a href="#">ref-queue</a> <a href="#">e-counters</a> <a href="#">in-profile-packets-forwarded-count</a> <i>boolean</i>
Tree	<a href="#">in-profile-packets-forwarded-count</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**out-profile-octets-discarded-count** *boolean*

Synopsis	Include the out-profile octets discarded count
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">custom-record</a> <a href="#">ref-queue</a> <a href="#">e-counters</a> <a href="#">out-profile-octets-discarded-count</a> <i>boolean</i>
Tree	<a href="#">out-profile-octets-discarded-count</a>

---

Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**out-profile-octets-forwarded-count** *boolean*

Synopsis	Include the out-of-profile octets forwarded count
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">custom-record</a> <a href="#">ref-queue</a> <a href="#">e-counters</a> <a href="#">out-profile-octets-forwarded-count</a> <i>boolean</i>
Tree	<a href="#">out-profile-octets-forwarded-count</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**out-profile-packets-discarded-count** *boolean*

Synopsis	Include the out-profile packets discarded count
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">custom-record</a> <a href="#">ref-queue</a> <a href="#">e-counters</a> <a href="#">out-profile-packets-discarded-count</a> <i>boolean</i>
Tree	<a href="#">out-profile-packets-discarded-count</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**out-profile-packets-forwarded-count** *boolean*

Synopsis	Include the out-of-profile packets forwarded count
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">custom-record</a> <a href="#">ref-queue</a> <a href="#">e-counters</a> <a href="#">out-profile-packets-forwarded-count</a> <i>boolean</i>
Tree	<a href="#">out-profile-packets-forwarded-count</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## i-counters

Synopsis	Enter the <b>i-counters</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">custom-record</a> <a href="#">ref-queue</a> <a href="#">i-counters</a>
Tree	<a href="#">i-counters</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## all-octets-offered-count *boolean*

Synopsis	Include the all octets offered count
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">custom-record</a> <a href="#">ref-queue</a> <a href="#">i-counters</a> <a href="#">all-octets-offered-count</a> <i>boolean</i>
Tree	<a href="#">all-octets-offered-count</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## all-packets-offered-count *boolean*

Synopsis	Include all packets offered count
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">custom-record</a> <a href="#">ref-queue</a> <a href="#">i-counters</a> <a href="#">all-packets-offered-count</a> <i>boolean</i>
Tree	<a href="#">all-packets-offered-count</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## high-octets-discarded-count *boolean*

Synopsis	Include the high octets discarded count
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">custom-record</a> <a href="#">ref-queue</a> <a href="#">i-counters</a> <a href="#">high-octets-discarded-count</a> <i>boolean</i>
Tree	<a href="#">high-octets-discarded-count</a>
Default	false
Introduced	16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **high-octets-offered-count** *boolean*

Synopsis Include the high octets offered count

Context **configure** [subscriber-mgmt](#) [radius-accounting-policy](#) *string* [custom-record](#) [ref-queue](#) [i-counters](#) **high-octets-offered-count** *boolean*

Tree [high-octets-offered-count](#)

Default false

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **high-packets-discarded-count** *boolean*

Synopsis Include the high packets discarded count

Context **configure** [subscriber-mgmt](#) [radius-accounting-policy](#) *string* [custom-record](#) [ref-queue](#) [i-counters](#) **high-packets-discarded-count** *boolean*

Tree [high-packets-discarded-count](#)

Default false

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **high-packets-offered-count** *boolean*

Synopsis Include the high packets offered count

Context **configure** [subscriber-mgmt](#) [radius-accounting-policy](#) *string* [custom-record](#) [ref-queue](#) [i-counters](#) **high-packets-offered-count** *boolean*

Tree [high-packets-offered-count](#)

Default false

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **in-profile-octets-forwarded-count** *boolean*

Synopsis Include the in-profile octets forwarded count

Context **configure** [subscriber-mgmt](#) [radius-accounting-policy](#) *string* [custom-record](#) [ref-queue](#) [i-counters](#) **in-profile-octets-forwarded-count** *boolean*

---

Tree	<a href="#">in-profile-octets-forwarded-count</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **in-profile-packets-forwarded-count** *boolean*

Synopsis	Include the in-profile packets forwarded count
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">custom-record</a> <a href="#">ref-queue</a> <a href="#">i-counters</a> <a href="#">in-profile-packets-forwarded-count</a> <i>boolean</i>
Tree	<a href="#">in-profile-packets-forwarded-count</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **low-octets-discarded-count** *boolean*

Synopsis	Include the low octets discarded count
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">custom-record</a> <a href="#">ref-queue</a> <a href="#">i-counters</a> <a href="#">low-octets-discarded-count</a> <i>boolean</i>
Tree	<a href="#">low-octets-discarded-count</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **low-octets-offered-count** *boolean*

Synopsis	Include the low octets offered count
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">custom-record</a> <a href="#">ref-queue</a> <a href="#">i-counters</a> <a href="#">low-octets-offered-count</a> <i>boolean</i>
Tree	<a href="#">low-octets-offered-count</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **low-packets-discarded-count** *boolean*

Synopsis	Include the low packets discarded count
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">custom-record</a> <a href="#">ref-queue</a> <a href="#">i-counters</a> <b>low-packets-discarded-count</b> <i>boolean</i>
Tree	<a href="#">low-packets-discarded-count</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **low-packets-offered-count** *boolean*

Synopsis	Include the low packets offered count
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">custom-record</a> <a href="#">ref-queue</a> <a href="#">i-counters</a> <b>low-packets-offered-count</b> <i>boolean</i>
Tree	<a href="#">low-packets-offered-count</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **out-profile-octets-forwarded-count** *boolean*

Synopsis	Include the out-of-profile octets forwarded count
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">custom-record</a> <a href="#">ref-queue</a> <a href="#">i-counters</a> <b>out-profile-octets-forwarded-count</b> <i>boolean</i>
Tree	<a href="#">out-profile-octets-forwarded-count</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **out-profile-packets-forwarded-count** *boolean*

Synopsis	Include the out-of-profile packets forwarded count
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">custom-record</a> <a href="#">ref-queue</a> <a href="#">i-counters</a> <b>out-profile-packets-forwarded-count</b> <i>boolean</i>
Tree	<a href="#">out-profile-packets-forwarded-count</a>
Default	false

Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **uncoloured-octets-offered-count** *boolean*

Synopsis Include the uncolored octets offered count  
 Context **configure** [subscriber-mgmt](#) [radius-accounting-policy](#) *string* [custom-record](#) [ref-queue](#) [i-counters](#) [uncoloured-octets-offered-count](#) *boolean*  
 Tree [uncoloured-octets-offered-count](#)  
 Default false  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **uncoloured-packets-offered-count** *boolean*

Synopsis Include the uncolored packets offered count  
 Context **configure** [subscriber-mgmt](#) [radius-accounting-policy](#) *string* [custom-record](#) [ref-queue](#) [i-counters](#) [uncoloured-packets-offered-count](#) *boolean*  
 Tree [uncoloured-packets-offered-count](#)  
 Default false  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **id** *reference*

Synopsis Queue ID  
 Context **configure** [subscriber-mgmt](#) [radius-accounting-policy](#) *string* [custom-record](#) [ref-queue](#) [id](#) *reference*  
 Tree [id](#)  
 Reference **configure** [subscriber-mgmt](#) [radius-accounting-policy](#) *string* [custom-record](#) [queue](#) *number*  
 Notes The following elements are part of a choice: **all** or **id**.  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**significant-change** *number*

Synopsis	Significant change required to generate the record
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">custom-record</a> <a href="#">significant-change</a> <i>number</i>
Tree	<a href="#">significant-change</a>
Range	0 to 4294967295
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**delay-start-time** *number*

Synopsis	Accounting start delay
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">delay-start-time</a> <i>number</i>
Tree	<a href="#">delay-start-time</a>
Range	1 to 10
Units	seconds
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">description</a> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**host-accounting**

Synopsis	Enter the <b>host-accounting</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">host-accounting</a>
Tree	<a href="#">host-accounting</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**admin-state** *keyword*

Synopsis	Administrative state of per-host accounting
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">host-accounting</a> <a href="#">admin-state</a> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**interim-update** *boolean*

Synopsis	Allow interim-update accounting messages to be sent
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">host-accounting</a> <a href="#">interim-update</a> <i>boolean</i>
Tree	<a href="#">interim-update</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**include-radius-attribute**

Synopsis	Enter the <b>include-radius-attribute</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute</a>
Tree	<a href="#">include-radius-attribute</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**access-loop-options** *boolean*

Synopsis	Include access loop information
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute</a> <a href="#">access-loop-options</a> <i>boolean</i>
Tree	<a href="#">access-loop-options</a>
Default	false

Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **acct-authentic** *boolean*

Synopsis Enable/disable include of the acct-authentic attribute.  
Context **configure** [subscriber-mgmt](#) [radius-accounting-policy](#) *string* [include-radius-attribute](#) [acct-authentic](#) *boolean*  
Tree [acct-authentic](#)  
Default false  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **acct-delay-time** *boolean*

Synopsis Include the acct-delay-time RADIUS attribute  
Context **configure** [subscriber-mgmt](#) [radius-accounting-policy](#) *string* [include-radius-attribute](#) [acct-delay-time](#) *boolean*  
Tree [acct-delay-time](#)  
Default false  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **acct-triggered-reason** *boolean*

Synopsis Include Alc-Acct-Triggered-Reason attribute  
Context **configure** [subscriber-mgmt](#) [radius-accounting-policy](#) *string* [include-radius-attribute](#) [acct-triggered-reason](#) *boolean*  
Tree [acct-triggered-reason](#)  
Default false  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **all-authorized-session-addresses** *boolean*

Synopsis Include all address/prefix attributes

Context	<b>configure subscriber-mgmt radius-accounting-policy</b> <i>string</i> <b>include-radius-attribute all-authorized-session-addresses</b> <i>boolean</i>
Tree	<a href="#">all-authorized-session-addresses</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**apn boolean**

Synopsis	Enable/disable include of the APN attribute.
Context	<b>configure subscriber-mgmt radius-accounting-policy</b> <i>string</i> <b>include-radius-attribute apn</b> <i>boolean</i>
Tree	<a href="#">apn</a>
Default	false
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**bearer-fteid boolean**

Synopsis	Include bearer-fteid attribute
Context	<b>configure subscriber-mgmt radius-accounting-policy</b> <i>string</i> <b>include-radius-attribute bearer-fteid</b> <i>boolean</i>
Tree	<a href="#">bearer-fteid</a>
Default	false
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**bonding-active-connections boolean**

Synopsis	Include the RADIUS Alc-Bonding-Active-Connection VSA
Context	<b>configure subscriber-mgmt radius-accounting-policy</b> <i>string</i> <b>include-radius-attribute bonding-active-connections</b> <i>boolean</i>
Tree	<a href="#">bonding-active-connections</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**bonding-id** *boolean*

Synopsis	Include the Alc-Bonding-Id VSA
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute</a> <a href="#">bonding-id</a> <i>boolean</i>
Tree	<a href="#">bonding-id</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**brg-num-active-sessions** *boolean*

Synopsis	Include the RADIUS Alc-BRG-Num-Active-Sessions VSA
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute</a> <a href="#">brg-num-active-sessions</a> <i>boolean</i>
Tree	<a href="#">brg-num-active-sessions</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**called-station-id** *boolean*

Synopsis	Include called-station-id attribute
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute</a> <a href="#">called-station-id</a> <i>boolean</i>
Tree	<a href="#">called-station-id</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**calling-station-id**

Synopsis	Enable the <b>calling-station-id</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute</a> <a href="#">calling-station-id</a>
Tree	<a href="#">calling-station-id</a>

Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **type** *keyword*

Synopsis	Format of the Calling-Station-ID attribute
Context	<b>configure</b> <b>subscriber-mgmt</b> <b>radius-accounting-policy</b> <i>string</i> <b>include-radius-attribute</b> <b>calling-station-id</b> <b>type</b> <i>keyword</i>
Tree	<b>type</b>
Options	sap-string, mac, sap-id, remote-id, llid
Default	sap-string
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **circuit-id** *boolean*

Synopsis	Include circuit-id attribute
Context	<b>configure</b> <b>subscriber-mgmt</b> <b>radius-accounting-policy</b> <i>string</i> <b>include-radius-attribute</b> <b>circuit-id</b> <i>boolean</i>
Tree	<b>circuit-id</b>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **delegated-ipv6-prefix** *boolean*

Synopsis	Include delegated-ipv6-prefix attribute
Context	<b>configure</b> <b>subscriber-mgmt</b> <b>radius-accounting-policy</b> <i>string</i> <b>include-radius-attribute</b> <b>delegated-ipv6-prefix</b> <i>boolean</i>
Tree	<b>delegated-ipv6-prefix</b>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**detailed-acct-attributes** *boolean*

Synopsis	Include more detailed accounting attributes
Context	<b>configure</b> <a href="#">subscriber-mgmt radius-accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute detailed-acct-attributes</a> <i>boolean</i>
Tree	<a href="#">detailed-acct-attributes</a>
Default	true
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**dhcp-vendor-class-id** *boolean*

Synopsis	Include the RADIUS Alc-DHCP-Vendor-Class-Id VSA
Context	<b>configure</b> <a href="#">subscriber-mgmt radius-accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute dhcp-vendor-class-id</a> <i>boolean</i>
Tree	<a href="#">dhcp-vendor-class-id</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**error-code** *boolean*

Synopsis	Include detailed error codes
Context	<b>configure</b> <a href="#">subscriber-mgmt radius-accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute error-code</a> <i>boolean</i>
Tree	<a href="#">error-code</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**firewall-info** *boolean*

Synopsis	Include the Firewall Information VSA in AAA protocols
Context	<b>configure</b> <a href="#">subscriber-mgmt radius-accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute firewall-info</a> <i>boolean</i>
Tree	<a href="#">firewall-info</a>
Default	false

Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **framed-interface-id** *boolean*

Synopsis Include framed-interface-id attribute  
Context **configure** [subscriber-mgmt](#) [radius-accounting-policy](#) *string* [include-radius-attribute](#) [framed-interface-id](#) *boolean*  
Tree [framed-interface-id](#)  
Default false  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **framed-ip-address** *boolean*

Synopsis Include framed-ip-address attribute  
Context **configure** [subscriber-mgmt](#) [radius-accounting-policy](#) *string* [include-radius-attribute](#) [framed-ip-address](#) *boolean*  
Tree [framed-ip-address](#)  
Default false  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **framed-ip-netmask** *boolean*

Synopsis Include framed-ip-netmask attribute  
Context **configure** [subscriber-mgmt](#) [radius-accounting-policy](#) *string* [include-radius-attribute](#) [framed-ip-netmask](#) *boolean*  
Tree [framed-ip-netmask](#)  
Default false  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **framed-ipv6-prefix** *boolean*

Synopsis Include framed-ipv6-prefix attribute

Context	<b>configure</b> <a href="#">subscriber-mgmt radius-accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute framed-ipv6-prefix</a> <i>boolean</i>
Tree	<a href="#">framed-ipv6-prefix</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **framed-ipv6-route** *boolean*

Synopsis	Include framed-ipv6-route attribute
Context	<b>configure</b> <a href="#">subscriber-mgmt radius-accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute framed-ipv6-route</a> <i>boolean</i>
Tree	<a href="#">framed-ipv6-route</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **framed-route** *boolean*

Synopsis	Include framed-route attribute
Context	<b>configure</b> <a href="#">subscriber-mgmt radius-accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute framed-route</a> <i>boolean</i>
Tree	<a href="#">framed-route</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **imei** *boolean*

Synopsis	Enable/disable include of the IMEI attribute.
Context	<b>configure</b> <a href="#">subscriber-mgmt radius-accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute imei</a> <i>boolean</i>
Tree	<a href="#">imei</a>
Default	false
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **imsi** *boolean*

Synopsis	Include the IMSI attribute for FWA sessions
Context	<b>configure</b> <a href="#">subscriber-mgmt radius-accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute</a> <a href="#">imsi</a> <i>boolean</i>
Tree	<a href="#">imsi</a>
Default	false
Introduced	22.2.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **ipv6-address** *boolean*

Synopsis	Include the IPv6 address attribute
Context	<b>configure</b> <a href="#">subscriber-mgmt radius-accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute</a> <a href="#">ipv6-address</a> <i>boolean</i>
Tree	<a href="#">ipv6-address</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **lanext-bridge-id** *boolean*

Synopsis	Include Alc-Bridge-Id in RADIUS accounting packets
Context	<b>configure</b> <a href="#">subscriber-mgmt radius-accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute</a> <a href="#">lanext-bridge-id</a> <i>boolean</i>
Tree	<a href="#">lanext-bridge-id</a>
Default	false
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **lanext-device-type** *boolean*

Synopsis	Include Alc-HLE-Device-type in accounting packets
Context	<b>configure</b> <a href="#">subscriber-mgmt radius-accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute</a> <a href="#">lanext-device-type</a> <i>boolean</i>
Tree	<a href="#">lanext-device-type</a>

---

Default	false
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **lanext-route-distinguisher** *boolean*

Synopsis	Include route distinguisher (Alc-RD) in RADIUS packets
Context	<b>configure</b> <b>subscriber-mgmt</b> <b>radius-accounting-policy</b> <i>string</i> <b>include-radius-attribute</b> <b>lanext-route-distinguisher</b> <i>boolean</i>
Tree	<a href="#">lanext-route-distinguisher</a>
Default	false
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **lanext-route-target** *boolean*

Synopsis	Include route target (Alc-RT) in RADIUS packets
Context	<b>configure</b> <b>subscriber-mgmt</b> <b>radius-accounting-policy</b> <i>string</i> <b>include-radius-attribute</b> <b>lanext-route-target</b> <i>boolean</i>
Tree	<a href="#">lanext-route-target</a>
Default	false
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **lanext-vni** *boolean*

Synopsis	Enable/disable include of the lanext-vni attribute.
Context	<b>configure</b> <b>subscriber-mgmt</b> <b>radius-accounting-policy</b> <i>string</i> <b>include-radius-attribute</b> <b>lanext-vni</b> <i>boolean</i>
Tree	<a href="#">lanext-vni</a>
Default	false
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**mac-address** *boolean*

Synopsis	Include the client MAC address in the RADIUS message
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute</a> <a href="#">mac-address</a> <i>boolean</i>
Tree	<a href="#">mac-address</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**msisdn** *boolean*

Synopsis	Enable/disable include of the MSISDN attribute.
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute</a> <a href="#">msisdn</a> <i>boolean</i>
Tree	<a href="#">msisdn</a>
Default	false
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**nas-identifier** *boolean*

Synopsis	Enable/disable include of the NAS-Identifier attribute.
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute</a> <a href="#">nas-identifier</a> <i>boolean</i>
Tree	<a href="#">nas-identifier</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**nas-port**

Synopsis	Enable the <b>nas-port</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute</a> <a href="#">nas-port</a>
Tree	<a href="#">nas-port</a>
Introduced	16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **bit-spec** *string*

Synopsis RADIUS NAS-Port attribute

Context **configure** [subscriber-mgmt](#) [radius-accounting-policy](#) *string* [include-radius-attribute](#) [nas-port](#) **bit-spec** *string*

Tree [bit-spec](#)

String Length 1 to 255

Notes This element is mandatory.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **nas-port-id**

Synopsis Enable the **nas-port-id** context

Context **configure** [subscriber-mgmt](#) [radius-accounting-policy](#) *string* [include-radius-attribute](#) [nas-port-id](#)

Tree [nas-port-id](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **prefix-string** *string*

Synopsis String to be prefixed to the NAS-Port-Id attribute

Context **configure** [subscriber-mgmt](#) [radius-accounting-policy](#) *string* [include-radius-attribute](#) [nas-port-id](#) **prefix-string** *string*

Tree [prefix-string](#)

String Length 1 to 8

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **suffix** *keyword*

Synopsis String to be suffixed to the NAS-Port-Id attribute

Context	<b>configure</b> <a href="#">subscriber-mgmt radius-accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute nas-port-id suffix</a> <i>keyword</i>
Tree	<a href="#">suffix</a>
Options	circuit-id, remote-id
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **nas-port-type**

Synopsis	Enable the <b>nas-port-type</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt radius-accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute nas-port-type</a>
Tree	<a href="#">nas-port-type</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **type** (*keyword* | *number*)

Synopsis	Value for RADIUS NAS-Port-Type attribute
Context	<b>configure</b> <a href="#">subscriber-mgmt radius-accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute nas-port-type</a> <a href="#">type</a> ( <i>keyword</i>   <i>number</i> )
Tree	<a href="#">type</a>
Range	0 to 255
Options	rfc-aligned
Default	rfc-aligned
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **nat-port-range** *boolean*

Synopsis	Include NAT port range attribute
Context	<b>configure</b> <a href="#">subscriber-mgmt radius-accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute nat-port-range</a> <i>boolean</i>
Tree	<a href="#">nat-port-range</a>
Default	false
Introduced	16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **remote-id** *boolean*

Synopsis Include remote-id attribute

Context **configure** **subscriber-mgmt** **radius-accounting-policy** *string* **include-radius-attribute** **remote-id** *boolean*

Tree [remote-id](#)

Default false

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **sla-profile** *boolean*

Synopsis Include sla-profile attribute

Context **configure** **subscriber-mgmt** **radius-accounting-policy** *string* **include-radius-attribute** **sla-profile** *boolean*

Tree [sla-profile](#)

Default false

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **spi-sharing-id** *boolean*

Synopsis Include spi-sharing-id attribute

Context **configure** **subscriber-mgmt** **radius-accounting-policy** *string* **include-radius-attribute** **spi-sharing-id** *boolean*

Tree [spi-sharing-id](#)

Default false

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **std-acct-attributes** *boolean*

Synopsis Include standard accounting attributes

Context **configure** **subscriber-mgmt** **radius-accounting-policy** *string* **include-radius-attribute** **std-acct-attributes** *boolean*

---

Tree	<a href="#">std-acct-attributes</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **steering-profile** *boolean*

Synopsis	Include the RADIUS Alc-Steering-Profile VSA
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute steering-profile</a> <i>boolean</i>
Tree	<a href="#">steering-profile</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **sub-profile** *boolean*

Synopsis	Include sub-profile attribute
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute sub-profile</a> <i>boolean</i>
Tree	<a href="#">sub-profile</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **subscriber-id** *boolean*

Synopsis	Include subscriber-id attribute
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute subscriber-id</a> <i>boolean</i>
Tree	<a href="#">subscriber-id</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**tunnel-client-attrs** *boolean*

Synopsis	Enable/disable include of tunnel-client attributes.
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute</a> <a href="#">tunnel-client-attrs</a> <i>boolean</i>
Tree	<a href="#">tunnel-client-attrs</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**tunnel-server-attrs** *boolean*

Synopsis	Enable/disable include of tunnel-server attributes.
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute</a> <a href="#">tunnel-server-attrs</a> <i>boolean</i>
Tree	<a href="#">tunnel-server-attrs</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**uli** *boolean*

Synopsis	Generate the ULI RADIUS attribute
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute</a> <a href="#">uli</a> <i>boolean</i>
Tree	<a href="#">uli</a>
Default	false
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**user-name** *boolean*

Synopsis	Include the user-name attribute
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute</a> <a href="#">user-name</a> <i>boolean</i>
Tree	<a href="#">user-name</a>
Default	false

Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **v6-aggregate-stats** *boolean*

Synopsis Report IPv6 aggregated forwarded octet and packet counters  
Context **configure** [subscriber-mgmt](#) [radius-accounting-policy](#) *string* [include-radius-attribute](#) [v6-aggregate-stats](#) *boolean*  
Tree [v6-aggregate-stats](#)  
Default false  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **wifi-num-attached-ues** *boolean*

Synopsis Include the RADIUS Alc-Num-Attached-UEs VSA  
Context **configure** [subscriber-mgmt](#) [radius-accounting-policy](#) *string* [include-radius-attribute](#) [wifi-num-attached-ues](#) *boolean*  
Tree [wifi-num-attached-ues](#)  
Default false  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **wifi-rssi** *boolean*

Synopsis Include 802.11 received signal strength indicator  
Context **configure** [subscriber-mgmt](#) [radius-accounting-policy](#) *string* [include-radius-attribute](#) [wifi-rssi](#) *boolean*  
Tree [wifi-rssi](#)  
Default false  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **wifi-ssid-vlan** *boolean*

Synopsis Include per-SSID VLAN ID in the Alc-Wlan-SSID-VLAN VSA

Context	<b>configure</b> <a href="#">subscriber-mgmt radius-accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute wifi-ssid-vlan</a> <i>boolean</i>
Tree	<a href="#">wifi-ssid-vlan</a>
Default	false
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **xconnect-tunnel-home-address** *boolean*

Synopsis	Include the Alc-Xconnect-Tunnel-Home-Ipv6 attribute
Context	<b>configure</b> <a href="#">subscriber-mgmt radius-accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute xconnect-tunnel-home-address</a> <i>boolean</i>
Tree	<a href="#">xconnect-tunnel-home-address</a>
Default	false
Introduced	16.0.R3
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **mcs-interval**

Synopsis	Enter the <b>mcs-interval</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt radius-accounting-policy</a> <i>string</i> <a href="#">mcs-interval</a>
Tree	<a href="#">mcs-interval</a>
Introduced	19.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **interval** (*keyword* | *number*)

Synopsis	MCS synchronization interval of usage counters
Context	<b>configure</b> <a href="#">subscriber-mgmt radius-accounting-policy</a> <i>string</i> <a href="#">mcs-interval</a> <a href="#">interval</a> ( <i>keyword</i>   <i>number</i> )
Tree	<a href="#">interval</a>
Description	This command specifies the interval at which the active BNG in a dual-homed deployment synchronizes subscriber accounting data using MCS to the standby BNG. The MCS interval is a statically configured value or equal to the configured RADIUS accounting update-interval.
Range	5 to 60
Units	minutes

---

Options	none, use-update-interval
Introduced	19.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **queue-instance-accounting**

Synopsis	Enter the <b>queue-instance-accounting</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">queue-instance-accounting</a>
Tree	<a href="#">queue-instance-accounting</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **admin-state** *keyword*

Synopsis	Administrative state of per-queue instance accounting
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">queue-instance-accounting</a> <a href="#">admin-state</a> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	enable
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **interim-update** *boolean*

Synopsis	Send accounting messages for the queue instance
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">queue-instance-accounting</a> <a href="#">interim-update</a> <i>boolean</i>
Tree	<a href="#">interim-update</a>
Default	true
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **radius-server-policy** *reference*

Synopsis	Referenced RADIUS server policy
----------	---------------------------------

Context	<b>configure</b> <a href="#">subscriber-mgmt radius-accounting-policy</a> <i>string</i> <a href="#">radius-server-policy</a> <i>reference</i>
Tree	<a href="#">radius-server-policy</a>
Reference	<b>configure</b> <a href="#">aaa radius server-policy</a> <i>string</i>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### session-accounting

Synopsis	Enter the <b>session-accounting</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt radius-accounting-policy</a> <i>string</i> <a href="#">session-accounting</a>
Tree	<a href="#">session-accounting</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### admin-state *keyword*

Synopsis	Administrative state of per-session accounting
Context	<b>configure</b> <a href="#">subscriber-mgmt radius-accounting-policy</a> <i>string</i> <a href="#">session-accounting admin-state</a> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### host-update *boolean*

Synopsis	Allow host updates
Context	<b>configure</b> <a href="#">subscriber-mgmt radius-accounting-policy</a> <i>string</i> <a href="#">session-accounting host-update</a> <i>boolean</i>
Tree	<a href="#">host-update</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **interim-update** *boolean*

Synopsis	Allow interim-update accounting messages to be sent
Context	<b>configure</b> <a href="#">subscriber-mgmt radius-accounting-policy</a> <i>string</i> <a href="#">session-accounting interim-update</a> <i>boolean</i>
Tree	<a href="#">interim-update</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **session-id-format** *keyword*

Synopsis	Format used in accounting session ID attributes
Context	<b>configure</b> <a href="#">subscriber-mgmt radius-accounting-policy</a> <i>string</i> <a href="#">session-id-format</a> <i>keyword</i>
Tree	<a href="#">session-id-format</a>
Options	description, number
Default	description
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **triggered-updates**

Synopsis	Enter the <b>triggered-updates</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt radius-accounting-policy</a> <i>string</i> <a href="#">triggered-updates</a>
Tree	<a href="#">triggered-updates</a>
Description	Commands in this context configure non-periodic accounting updates that are triggered by specific events.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **gtp-change**

Synopsis	Enter the <b>gtp-change</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt radius-accounting-policy</a> <i>string</i> <a href="#">triggered-updates gtp-change</a>
Tree	<a href="#">gtp-change</a>

Description	Commands in this context configure which GTP-related changes trigger an interim accounting update.  This command is mutually exclusive with the legacy <b>gtp-mobility</b> command, which triggers interim accounting updates for all changes.
Notes	The following elements are part of a choice: <b>gtp-change</b> or <b>gtp-mobility</b> .
Introduced	23.3.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **s1-release** *boolean*

Synopsis	Send an IU for S1 release (idle) procedure
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">triggered-updates</a> <a href="#">gtp-change</a> <b>s1-release</b> <i>boolean</i>
Tree	<a href="#">s1-release</a>
Default	false
Introduced	23.3.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **service-request** *boolean*

Synopsis	Send an IU for service request (reactivation) procedure
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">triggered-updates</a> <a href="#">gtp-change</a> <b>service-request</b> <i>boolean</i>
Tree	<a href="#">service-request</a>
Default	false
Introduced	23.3.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **teidc-change** *boolean*

Synopsis	Send an IU when GTP-C TEIDs are changed
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">triggered-updates</a> <a href="#">gtp-change</a> <b>teidc-change</b> <i>boolean</i>
Tree	<a href="#">teidc-change</a>
Description	When configured to <b>true</b> , the router sends an interim accounting update when GTP-C TEIDs are changed. Changes to GTP-C TEIDs typically indicate an MME change.
Default	false

Introduced 23.3.R1  
 Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **teidu-change** *boolean*

Synopsis Send an IU when GTP-U TEIDs are changed  
 Context **configure** [subscriber-mgmt](#) [radius-accounting-policy](#) *string* [triggered-updates](#) [gtp-change](#) [teidu-change](#) *boolean*  
 Tree [teidu-change](#)  
 Description When configured to **true**, the router sends an interim accounting update when GTP-U TEIDs are changed. This update typically happens during mobility, idling, or service request procedures  
 Default false  
 Introduced 23.3.R1  
 Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **uli-change** *boolean*

Synopsis Send an IU when a user location change is detected  
 Context **configure** [subscriber-mgmt](#) [radius-accounting-policy](#) *string* [triggered-updates](#) [gtp-change](#) [uli-change](#) *boolean*  
 Tree [uli-change](#)  
 Default false  
 Introduced 23.3.R1  
 Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **gtp-mobility** *boolean*

#### **WARNING:**

This element is deprecated and will be removed in a future release.

Synopsis Send updates for mobility events  
 Context **configure** [subscriber-mgmt](#) [radius-accounting-policy](#) *string* [triggered-updates](#) [gtp-mobility](#) *boolean*  
 Tree [gtp-mobility](#)  
 Default false  
 Notes The following elements are part of a choice: **gtp-change** or **gtp-mobility**.

Introduced	16.0.R5
Deprecated	23.3.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

## update-interval

Synopsis	Enter the <b>update-interval</b> context
Context	<b>configure subscriber-mgmt radius-accounting-policy</b> <i>string</i> <b>update-interval</b>
Tree	<b>update-interval</b>
Description	Commands in this context configure the attributes of the intermediate update interval.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## interval *number*

Synopsis	Intermediate update interval
Context	<b>configure subscriber-mgmt radius-accounting-policy</b> <i>string</i> <b>update-interval</b> <i>interval number</i>
Tree	<b>interval</b>
Description	<p>This command specifies the interval at which accounting data of subscriber hosts is updated in a RADIUS Accounting Interim-Update message. When specifying the accounting mode in the RADIUS accounting policy, the interim-update command for subscriber hosts must be set to true in one of the following context:</p> <ul style="list-style-type: none"> <li>• <b>configure subscriber-mgmt radius-accounting-policy host-accounting</b></li> <li>• <b>configure subscriber-mgmt radius-accounting-policy queue-instance-accounting</b></li> <li>• <b>configure subscriber-mgmt radius-accounting-policy session-accounting</b></li> </ul> <p>A RADIUS-specified interim interval (attribute [85] Acct-Interim-Interval) overrides the CLI configured value.</p>
Range	5 to 259200
Units	minutes
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## jitter (*keyword* | *number*)

Synopsis	Maximum random delay for intermediate update interval
----------	---

Context	<b>configure</b> <a href="#">subscriber-mgmt radius-accounting-policy</a> <i>string</i> <a href="#">update-interval jitter</a> ( <i>keyword</i>   <i>number</i> )
Tree	<a href="#">jitter</a>
Description	This command specifies the absolute maximum random delay introduced on the update interval between two accounting interim update messages. The effective maximum random delay value is the minimum of the configured absolute jitter value and 10% of the configured update-interval.  A value of zero sends the accounting interim update message without introducing an additional random delay.
Range	0 to 3600
Units	seconds
Options	auto
Default	auto
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **radius-authentication-policy** [[name](#)] *string*

Synopsis	Enter the <b>radius-authentication-policy</b> list instance
Context	<b>configure</b> <a href="#">subscriber-mgmt radius-authentication-policy</a> <i>string</i>
Tree	<a href="#">radius-authentication-policy</a>
Max. Instances	32
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **[name]** *string*

Synopsis	RADIUS authentication policy name
Context	<b>configure</b> <a href="#">subscriber-mgmt radius-authentication-policy</a> <i>string</i>
Tree	<a href="#">radius-authentication-policy</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">subscriber-mgmt radius-authentication-policy</a> <i>string</i> <a href="#">description</a> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **fallback**

Synopsis	Enter the <b>fallback</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt radius-authentication-policy</a> <i>string</i> <a href="#">fallback</a>
Tree	<a href="#">fallback</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **action**

Synopsis	Enter the <b>action</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt radius-authentication-policy</a> <i>string</i> <a href="#">fallback</a> <a href="#">action</a>
Tree	<a href="#">action</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **accept**

Synopsis	Automatically accept all authentication requests
Context	<b>configure</b> <a href="#">subscriber-mgmt radius-authentication-policy</a> <i>string</i> <a href="#">fallback</a> <a href="#">action</a> <a href="#">accept</a>
Tree	<a href="#">accept</a>
Notes	The following elements are part of a choice: <b>accept</b> or <b>user-db</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**user-db** *string*

Synopsis	Local user database used to authenticate to the server
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-authentication-policy</a> <i>string</i> <a href="#">fallback</a> <a href="#">action</a> <a href="#">user-db</a> <i>string</i>
Tree	<a href="#">user-db</a>
String Length	1 to 32
Notes	The following elements are part of a choice: <b>accept</b> or <b>user-db</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**force-probing** *boolean*

Synopsis	Enable force probing
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-authentication-policy</a> <i>string</i> <a href="#">fallback</a> <a href="#">force-probing</a> <i>boolean</i>
Tree	<a href="#">force-probing</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**include-radius-attribute**

Synopsis	Enter the <b>include-radius-attribute</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-authentication-policy</a> <i>string</i> <a href="#">include-radius-attribute</a>
Tree	<a href="#">include-radius-attribute</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**access-loop-options** *boolean*

Synopsis	Include access loop information
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-authentication-policy</a> <i>string</i> <a href="#">include-radius-attribute</a> <a href="#">access-loop-options</a> <i>boolean</i>
Tree	<a href="#">access-loop-options</a>
Default	false
Introduced	16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **acct-session-id**

Synopsis Enable the **acct-session-id** context

Context **configure subscriber-mgmt radius-authentication-policy** *string* *include-radius-attribute acct-session-id*

Tree [acct-session-id](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **type** *keyword*

Synopsis Format of the accounting session ID attribute

Context **configure subscriber-mgmt radius-authentication-policy** *string* *include-radius-attribute acct-session-id type keyword*

Tree [type](#)

Options host, session

Default host

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **apn** *boolean*

Synopsis Enable/disable include of the APN attribute.

Context **configure subscriber-mgmt radius-authentication-policy** *string* *include-radius-attribute apn boolean*

Tree [apn](#)

Default false

Introduced 16.0.R1

Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **called-station-id** *boolean*

Synopsis Include called-station-id attribute

Context **configure subscriber-mgmt radius-authentication-policy** *string* *include-radius-attribute called-station-id boolean*

Tree	<a href="#">called-station-id</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## calling-station-id

Synopsis	Enable the <b>calling-station-id</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-authentication-policy</a> <i>string</i> <a href="#">include-radius-attribute</a> <a href="#">calling-station-id</a>
Tree	<a href="#">calling-station-id</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## type *keyword*

Synopsis	Format of the Calling-Station-ID attribute
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-authentication-policy</a> <i>string</i> <a href="#">include-radius-attribute</a> <a href="#">calling-station-id</a> <i>type</i> <i>keyword</i>
Tree	<a href="#">type</a>
Options	sap-string, mac, sap-id, remote-id, llid
Default	sap-string
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## circuit-id *boolean*

Synopsis	Include circuit-id attribute
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-authentication-policy</a> <i>string</i> <a href="#">include-radius-attribute</a> <a href="#">circuit-id</a> <i>boolean</i>
Tree	<a href="#">circuit-id</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **dhcp-options** *boolean*

Synopsis	Generate the DHCP options RADIUS attribute
Context	<b>configure</b> <a href="#">subscriber-mgmt radius-authentication-policy</a> <i>string</i> <a href="#">include-radius-attribute dhcp-options</a> <i>boolean</i>
Tree	<a href="#">dhcp-options</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **dhcp-vendor-class-id** *boolean*

Synopsis	Include the RADIUS Alc-DHCP-Vendor-Class-Id VSA
Context	<b>configure</b> <a href="#">subscriber-mgmt radius-authentication-policy</a> <i>string</i> <a href="#">include-radius-attribute dhcp-vendor-class-id</a> <i>boolean</i>
Tree	<a href="#">dhcp-vendor-class-id</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **dhcp6-options** *boolean*

Synopsis	Generate the DHCPv6 options RADIUS attribute
Context	<b>configure</b> <a href="#">subscriber-mgmt radius-authentication-policy</a> <i>string</i> <a href="#">include-radius-attribute dhcp6-options</a> <i>boolean</i>
Tree	<a href="#">dhcp6-options</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **gprs-negotiated-qos-profile** *boolean*

Synopsis	Generate GPRS negotiated QoS profile RADIUS attribute
Context	<b>configure</b> <a href="#">subscriber-mgmt radius-authentication-policy</a> <i>string</i> <a href="#">include-radius-attribute gprs-negotiated-qos-profile</a> <i>boolean</i>
Tree	<a href="#">gprs-negotiated-qos-profile</a>
Default	false

Introduced 16.0.R1  
Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **imei** *boolean*

Synopsis Enable/disable include of the IMEI attribute.  
Context **configure** **subscriber-mgmt** **radius-authentication-policy** *string* **include-radius-attribute** **imei** *boolean*  
Tree **imei**  
Default false  
Introduced 16.0.R1  
Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **imsi** *boolean*

Synopsis Include the IMSI attribute for FWA sessions  
Context **configure** **subscriber-mgmt** **radius-authentication-policy** *string* **include-radius-attribute** **imsi** *boolean*  
Tree **imsi**  
Default false  
Introduced 22.2.R1  
Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **mac-address** *boolean*

Synopsis Include the client MAC address in the RADIUS message  
Context **configure** **subscriber-mgmt** **radius-authentication-policy** *string* **include-radius-attribute** **mac-address** *boolean*  
Tree **mac-address**  
Default false  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **msisdn** *boolean*

Synopsis Enable/disable include of the MSISDN attribute.

Context	<b>configure subscriber-mgmt radius-authentication-policy</b> <i>string</i> <b>include-radius-attribute msisdn</b> <i>boolean</i>
Tree	<b>msisdn</b>
Default	false
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **nas-identifier** *boolean*

Synopsis	Enable/disable include of the NAS-Identifier attribute.
Context	<b>configure subscriber-mgmt radius-authentication-policy</b> <i>string</i> <b>include-radius-attribute nas-identifier</b> <i>boolean</i>
Tree	<b>nas-identifier</b>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **nas-port**

Synopsis	Enable the <b>nas-port</b> context
Context	<b>configure subscriber-mgmt radius-authentication-policy</b> <i>string</i> <b>include-radius-attribute nas-port</b>
Tree	<b>nas-port</b>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **bit-spec** *string*

Synopsis	RADIUS NAS-Port attribute
Context	<b>configure subscriber-mgmt radius-authentication-policy</b> <i>string</i> <b>include-radius-attribute nas-port bit-spec</b> <i>string</i>
Tree	<b>bit-spec</b>
String Length	1 to 255
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## nas-port-id

Synopsis	Enable the <b>nas-port-id</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-authentication-policy</a> <i>string</i> <a href="#">include-radius-attribute</a> <a href="#">nas-port-id</a>
Tree	<a href="#">nas-port-id</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## prefix-string *string*

Synopsis	String to be prefixed to the NAS-Port-Id attribute
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-authentication-policy</a> <i>string</i> <a href="#">include-radius-attribute</a> <a href="#">nas-port-id</a> <a href="#">prefix-string</a> <i>string</i>
Tree	<a href="#">prefix-string</a>
String Length	1 to 8
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## suffix *keyword*

Synopsis	String to be suffixed to the NAS-Port-Id attribute
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-authentication-policy</a> <i>string</i> <a href="#">include-radius-attribute</a> <a href="#">nas-port-id</a> <a href="#">suffix</a> <i>keyword</i>
Tree	<a href="#">suffix</a>
Options	circuit-id, remote-id
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## nas-port-type

Synopsis	Enable the <b>nas-port-type</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-authentication-policy</a> <i>string</i> <a href="#">include-radius-attribute</a> <a href="#">nas-port-type</a>
Tree	<a href="#">nas-port-type</a>
Introduced	16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **type** (*keyword* | *number*)

Synopsis Value for RADIUS NAS-Port-Type attribute

Context **configure** [subscriber-mgmt radius-authentication-policy](#) *string* [include-radius-attribute nas-port-type](#) *type* (*keyword* | *number*)

Tree [type](#)

Range 0 to 255

Options rfc-aligned

Default rfc-aligned

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **pppoe-service-name** *boolean*

Synopsis Generate the pppoe-service-name RADIUS attribute

Context **configure** [subscriber-mgmt radius-authentication-policy](#) *string* [include-radius-attribute pppoe-service-name](#) *boolean*

Tree [pppoe-service-name](#)

Default false

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **rat-type** *boolean*

Synopsis Generate the RAT type RADIUS attribute

Context **configure** [subscriber-mgmt radius-authentication-policy](#) *string* [include-radius-attribute rat-type](#) *boolean*

Tree [rat-type](#)

Default false

Introduced 16.0.R1

Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**remote-id** *boolean*

Synopsis	Include remote-id attribute
Context	<b>configure</b> <b>subscriber-mgmt</b> <b>radius-authentication-policy</b> <i>string</i> <b>include-radius-attribute</b> <b>remote-id</b> <i>boolean</i>
Tree	<a href="#">remote-id</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**sap-session-index** *boolean*

Synopsis	Generate the per-SAP unique session index
Context	<b>configure</b> <b>subscriber-mgmt</b> <b>radius-authentication-policy</b> <i>string</i> <b>include-radius-attribute</b> <b>sap-session-index</b> <i>boolean</i>
Tree	<a href="#">sap-session-index</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**tunnel-server-attrs** *boolean*

Synopsis	Enable/disable include of tunnel-server attributes.
Context	<b>configure</b> <b>subscriber-mgmt</b> <b>radius-authentication-policy</b> <i>string</i> <b>include-radius-attribute</b> <b>tunnel-server-attrs</b> <i>boolean</i>
Tree	<a href="#">tunnel-server-attrs</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**uli** *boolean*

Synopsis	Generate the ULI RADIUS attribute
Context	<b>configure</b> <b>subscriber-mgmt</b> <b>radius-authentication-policy</b> <i>string</i> <b>include-radius-attribute</b> <b>uli</b> <i>boolean</i>
Tree	<a href="#">uli</a>
Default	false

Introduced 16.0.R1  
Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **wifi-num-attached-ues** *boolean*

Synopsis Include the RADIUS Alc-Num-Attached-UEs VSA  
Context **configure** [subscriber-mgmt](#) [radius-authentication-policy](#) *string* [include-radius-attribute](#) [wifi-num-attached-ues](#) *boolean*  
Tree [wifi-num-attached-ues](#)  
Default false  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **wifi-ssid-vlan** *boolean*

Synopsis Include per-SSID VLAN ID in the Alc-Wlan-SSID-VLAN VSA  
Context **configure** [subscriber-mgmt](#) [radius-authentication-policy](#) *string* [include-radius-attribute](#) [wifi-ssid-vlan](#) *boolean*  
Tree [wifi-ssid-vlan](#)  
Default false  
Introduced 16.0.R1  
Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **xconnect-tunnel-home-address** *boolean*

Synopsis Include the Alc-Xconnect-Tunnel-Home-Ipv6 attribute  
Context **configure** [subscriber-mgmt](#) [radius-authentication-policy](#) *string* [include-radius-attribute](#) [xconnect-tunnel-home-address](#) *boolean*  
Tree [xconnect-tunnel-home-address](#)  
Default false  
Introduced 16.0.R5  
Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **password** *string*

Synopsis RADIUS request password

Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-authentication-policy</a> <i>string</i> <a href="#">password</a> <i>string</i>
Tree	<a href="#">password</a>
String Length	1 to 115
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### ppp-user-name

Synopsis	Enter the <b>ppp-user-name</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-authentication-policy</a> <i>string</i> <a href="#">ppp-user-name</a>
Tree	<a href="#">ppp-user-name</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### domain-name *string*

Synopsis	Domain name
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-authentication-policy</a> <i>string</i> <a href="#">ppp-user-name</a> <a href="#">domain-name</a> <i>string</i>
Tree	<a href="#">domain-name</a>
String Length	1 to 128
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### domain-operation *keyword*

Synopsis	Operation to perform on the PAP or CHAP username
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-authentication-policy</a> <i>string</i> <a href="#">ppp-user-name</a> <a href="#">domain-operation</a> <i>keyword</i>
Tree	<a href="#">domain-operation</a>
Description	This command specifies the operation to perform on the PAP or CHAP username. When unconfigured, there is no operation and the PAP or CHAP username is not changed.
Options	append, strip, replace, default
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**pppoe-access-method** *keyword*

Synopsis	PPPoE access method
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-authentication-policy</a> <i>string</i> <a href="#">pppoe-access-method</a> <i>keyword</i>
Tree	<a href="#">pppoe-access-method</a>
Options	none, padi, pap-chap
Default	padi
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**radius-server-policy** *reference*

Synopsis	Referenced RADIUS server policy
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-authentication-policy</a> <i>string</i> <a href="#">radius-server-policy</a> <i>reference</i>
Tree	<a href="#">radius-server-policy</a>
Reference	<b>configure</b> <a href="#">aaa</a> <a href="#">radius</a> <a href="#">server-policy</a> <i>string</i>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**re-authentication** *boolean*

Synopsis	Enable re-authentication on IPOE renewal
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-authentication-policy</a> <i>string</i> <a href="#">re-authentication</a> <i>boolean</i>
Tree	<a href="#">re-authentication</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**send-acct-stop-on-fail**

Synopsis	Enter the <b>send-acct-stop-on-fail</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-authentication-policy</a> <i>string</i> <a href="#">send-acct-stop-on-fail</a>
Tree	<a href="#">send-acct-stop-on-fail</a>
Introduced	16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **on-accept-failure** *boolean*

Synopsis Send an accounting stop message when a failure occurs

Context **configure** **subscriber-mgmt** **radius-authentication-policy** *string* **send-acct-stop-on-fail on-accept-failure** *boolean*

Tree [on-accept-failure](#)

Description When configured to **true**, the system sends an accounting stop message when a failure occurs after the reception of a RADIUS Access-Accept message (such as a duplicate IP address).

Default false

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **on-reject** *boolean*

Synopsis Send an accounting stop message for Access-Reject

Context **configure** **subscriber-mgmt** **radius-authentication-policy** *string* **send-acct-stop-on-fail on-reject** *boolean*

Tree [on-reject](#)

Description When configured to **true**, the system sends an accounting stop message when an Access-Reject message is received.

Default false

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **on-request-failure** *boolean*

Synopsis Send an accounting stop message for failures

Context **configure** **subscriber-mgmt** **radius-authentication-policy** *string* **send-acct-stop-on-fail on-request-failure** *boolean*

Tree [on-request-failure](#)

Description When configured to **true**, the system sends an accounting stop message when a RADIUS Access-Request message cannot be sent (for example, there is no server configured, or timeout).

Default false

Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**user-name**

Synopsis	Enter the <b>user-name</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-authentication-policy</a> <i>string</i> <a href="#">user-name</a>
Tree	<a href="#">user-name</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**domain-name** *string*

Synopsis	Domain name
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-authentication-policy</a> <i>string</i> <a href="#">user-name</a> <a href="#">domain-name</a> <i>string</i>
Tree	<a href="#">domain-name</a>
String Length	1 to 128
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**domain-operation** *keyword*

Synopsis	Operation to perform on the username
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-authentication-policy</a> <i>string</i> <a href="#">user-name</a> <a href="#">domain-operation</a> <i>keyword</i>
Tree	<a href="#">domain-operation</a>
Description	This command specifies the operation to perform on the username. When unconfigured, there is no operation and the username is not changed.
Options	append, strip, replace, default
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**format** *keyword*

Synopsis	User name format in the RADIUS message
----------	--

Context	<b>configure subscriber-mgmt radius-authentication-policy</b> <i>string</i> <i>user-name</i> <i>format</i> <i>keyword</i>
Tree	<a href="#">format</a>
Options	mac, circuit-id, tuple, ascii-converted-circuit-id, ascii-converted-tuple, dhcp-client-vendor-opts, mac-giaddr, ppp-user-name
Default	mac
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **gtp-format** *keyword*

Synopsis	Username format used for FWA sessions
Context	<b>configure subscriber-mgmt radius-authentication-policy</b> <i>string</i> <i>user-name</i> <a href="#">gtp-format</a> <i>keyword</i>
Tree	<a href="#">gtp-format</a>
Description	This command specifies the username format to use for FWA sessions. If a PAP message is present in the PCO IE of the Create Session request, the system uses that for authentication instead of the format specified for this command. If you specify a format that includes APN, the separator is an @ character; for example, msisdn@apn.
Options	imsi, imsi-apn, msisdn, msisdn-apn
Default	imsi
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **mac-format** *string*

Synopsis	MAC address format when contacting a RADIUS server
Context	<b>configure subscriber-mgmt radius-authentication-policy</b> <i>string</i> <i>user-name</i> <a href="#">mac-format</a> <i>string</i>
Tree	<a href="#">mac-format</a>
String Length	2 to 7
Default	aa:
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**rip-policy** [*name*] *string*

Synopsis	Enter the <b>rip-policy</b> list instance
Context	<b>configure</b> <a href="#">subscriber-mgmt rip-policy</a> <i>string</i>
Tree	<a href="#">rip-policy</a>
Max. Instances	255
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**[name]** *string*

Synopsis	RIP policy name
Context	<b>configure</b> <a href="#">subscriber-mgmt rip-policy</a> <i>string</i>
Tree	<a href="#">rip-policy</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**authentication-key** *string*

Synopsis	Authentication key
Context	<b>configure</b> <a href="#">subscriber-mgmt rip-policy</a> <i>string</i> <a href="#">authentication-key</a> <i>string</i>
Tree	<a href="#">authentication-key</a>
String Length	1 to 51
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**authentication-type** *keyword*

Synopsis	Authentication type used between RIP neighbors
Context	<b>configure</b> <a href="#">subscriber-mgmt rip-policy</a> <i>string</i> <a href="#">authentication-type</a> <i>keyword</i>
Tree	<a href="#">authentication-type</a>
Options	password, message-digest, message-digest-20
Introduced	16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **description** *string*

Synopsis Text description  
 Context **configure** [subscriber-mgmt rip-policy](#) *string* [description](#) *string*  
 Tree [description](#)  
 String Length 1 to 80  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **router-advertisement-policy** [[name](#)] *string*

Synopsis Enter the **router-advertisement-policy** list instance  
 Context **configure** [subscriber-mgmt router-advertisement-policy](#) *string*  
 Tree [router-advertisement-policy](#)  
 Max. Instances 16  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **[name]** *string*

Synopsis Router advertisement policy name  
 Context **configure** [subscriber-mgmt router-advertisement-policy](#) *string*  
 Tree [router-advertisement-policy](#)  
 String Length 1 to 32  
 Notes This element is part of a list key.  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **force-mcast** *keyword*

Synopsis Protocol with forced multicast  
 Context **configure** [subscriber-mgmt router-advertisement-policy](#) *string* [force-mcast](#) *keyword*

---

Tree	<a href="#">force-mcast</a>
Options	ip, ip-mac
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **max-advertisement-interval** *number*

Synopsis	Maximum advertisement interval
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">router-advertisement-policy</a> <i>string</i> <a href="#">max-advertisement-interval</a> <i>number</i>
Tree	<a href="#">max-advertisement-interval</a>
Range	900 to 1800
Units	seconds
Default	1800
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **min-advertisement-interval** *number*

Synopsis	Minimum advertisement interval
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">router-advertisement-policy</a> <i>string</i> <a href="#">min-advertisement-interval</a> <i>number</i>
Tree	<a href="#">min-advertisement-interval</a>
Range	900 to 1350
Units	seconds
Default	900
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **options**

Synopsis	Enter the <b>options</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">router-advertisement-policy</a> <i>string</i> <a href="#">options</a>
Tree	<a href="#">options</a>
Introduced	16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **current-hop-limit** *number*

Synopsis Hop limit to be advertised

Context **configure** [subscriber-mgmt](#) [router-advertisement-policy](#) *string* [options](#) [current-hop-limit](#) *number*

Tree [current-hop-limit](#)

Range 0 to 255

Default 64

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **dns**

Synopsis Enter the **dns** context

Context **configure** [subscriber-mgmt](#) [router-advertisement-policy](#) *string* [options](#) [dns](#)

Tree [dns](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **include-rdnss** *boolean*

Synopsis Include the RDNSS server option 25

Context **configure** [subscriber-mgmt](#) [router-advertisement-policy](#) *string* [options](#) [dns](#) [include-rdnss](#) *boolean*

Tree [include-rdnss](#)

Default false

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **rdnss-lifetime** (*number* | *keyword*)

Synopsis Maximum time for the RDNSS address to remain valid

Context **configure** [subscriber-mgmt](#) [router-advertisement-policy](#) *string* [options](#) [dns](#) [rdnss-lifetime](#) (*number* | *keyword*)

Tree	<a href="#">rdnss-lifetime</a>
Range	900 to 3600
Units	seconds
Options	infinite
Default	3600
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **managed-configuration** *boolean*

Synopsis	Managed address configuration flag
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">router-advertisement-policy</a> <i>string</i> <a href="#">options</a> <a href="#">managed-configuration</a> <i>boolean</i>
Tree	<a href="#">managed-configuration</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **mtu** (*number* | *keyword*)

Synopsis	Advertised MTU value
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">router-advertisement-policy</a> <i>string</i> <a href="#">options</a> <a href="#">mtu</a> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">mtu</a>
Range	1280 to 9212
Units	bytes
Options	not-included
Default	not-included
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **other-stateful-configuration** *boolean*

Synopsis	Other stateful configuration flag
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">router-advertisement-policy</a> <i>string</i> <a href="#">options</a> <a href="#">other-stateful-configuration</a> <i>boolean</i>

Tree	<a href="#">other-stateful-configuration</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **reachable-time** *number*

Synopsis	Reachable time for advertisements
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">router-advertisement-policy</a> <i>string</i> <a href="#">options</a> <a href="#">reachable-time</a> <i>number</i>
Tree	<a href="#">reachable-time</a>
Range	0 to 3600000
Units	milliseconds
Default	0
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **retransmit-timer** *number*

Synopsis	Retransmit time in router advertisements from interface
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">router-advertisement-policy</a> <i>string</i> <a href="#">options</a> <a href="#">retransmit-timer</a> <i>number</i>
Tree	<a href="#">retransmit-timer</a>
Range	0 to 1800000
Units	seconds
Default	0
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **router-lifetime** (*number* | *keyword*)

Synopsis	Router lifetime
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">router-advertisement-policy</a> <i>string</i> <a href="#">options</a> <a href="#">router-lifetime</a> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">router-lifetime</a>
Range	2700 to 9000

Units	seconds
Options	no-default-router
Default	4500
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### prefix-options

Synopsis	Enter the <b>prefix-options</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">router-advertisement-policy</a> <i>string</i> <a href="#">prefix-options</a>
Tree	<a href="#">prefix-options</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### stateful

Synopsis	Enter the <b>stateful</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">router-advertisement-policy</a> <i>string</i> <a href="#">prefix-options</a> <a href="#">stateful</a>
Tree	<a href="#">stateful</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### auto-lifetimes *boolean*

Synopsis	Use automatic lifetimes for stateful prefixes
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">router-advertisement-policy</a> <i>string</i> <a href="#">prefix-options</a> <a href="#">stateful</a> <a href="#">auto-lifetimes</a> <i>boolean</i>
Tree	<a href="#">auto-lifetimes</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### on-link *boolean*

Synopsis	Assign the prefix to an interface on the specified link
----------	---

Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">router-advertisement-policy</a> <i>string</i> <a href="#">prefix-options</a> <a href="#">stateful</a> <a href="#">on-link</a> <i>boolean</i>
Tree	<a href="#">on-link</a>
Default	true
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **preferred-lifetime** (*number* | *keyword*)

Synopsis	Time for a prefix to remain preferred
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">router-advertisement-policy</a> <i>string</i> <a href="#">prefix-options</a> <a href="#">stateful</a> <a href="#">preferred-lifetime</a> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">preferred-lifetime</a>
Range	0 to 4294967294
Units	seconds
Options	infinite
Default	3600
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **valid-lifetime** (*number* | *keyword*)

Synopsis	Time for a prefix to remain valid
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">router-advertisement-policy</a> <i>string</i> <a href="#">prefix-options</a> <a href="#">stateful</a> <a href="#">valid-lifetime</a> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">valid-lifetime</a>
Range	0 to 4294967294
Units	seconds
Options	infinite
Default	86400
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **stateless**

Synopsis	Enter the <b>stateless</b> context
----------	------------------------------------

Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">router-advertisement-policy</a> <i>string</i> <a href="#">prefix-options</a> <a href="#">stateless</a>
Tree	<a href="#">stateless</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**on-link** *boolean*

Synopsis	Assign the prefix to an interface on the specified link
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">router-advertisement-policy</a> <i>string</i> <a href="#">prefix-options</a> <a href="#">stateless</a> <a href="#">on-link</a> <i>boolean</i>
Tree	<a href="#">on-link</a>
Default	true
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**preferred-lifetime** (*number* | *keyword*)

Synopsis	Time for a prefix to remain preferred
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">router-advertisement-policy</a> <i>string</i> <a href="#">prefix-options</a> <a href="#">stateless</a> <a href="#">preferred-lifetime</a> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">preferred-lifetime</a>
Range	0 to 4294967294
Units	seconds
Options	infinite
Default	3600
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**valid-lifetime** (*number* | *keyword*)

Synopsis	Time for a prefix to remain valid
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">router-advertisement-policy</a> <i>string</i> <a href="#">prefix-options</a> <a href="#">stateless</a> <a href="#">valid-lifetime</a> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">valid-lifetime</a>
Range	0 to 4294967294
Units	seconds

Options	infinite
Default	86400
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **sap-template** [*name*] *string*

Synopsis	Enter the <b>sap-template</b> list instance
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sap-template</a> <i>string</i>
Tree	<a href="#">sap-template</a>
Description	Commands in this context configure a template for automatically-generated subscriber SAPs that is used when creating CUPS sessions. A template with name "default" is used when no other instance is created, however, the "default" template must be explicitly provisioned.
Max. Instances	256
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **[name]** *string*

Synopsis	SAP template name
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sap-template</a> <i>string</i>
Tree	<a href="#">sap-template</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **cpu-protection**

Synopsis	Enter the <b>cpu-protection</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sap-template</a> <i>string</i> <a href="#">cpu-protection</a>
Tree	<a href="#">cpu-protection</a>
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s

## ip-src-monitoring

Synopsis	Apply CPU protection policy on IP sources
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sap-template</a> <i>string</i> <a href="#">cpu-protection</a> <a href="#">ip-src-monitoring</a>
Tree	<a href="#">ip-src-monitoring</a>
Notes	The following elements are part of a choice: <b>ip-src-monitoring</b> or <b>mac-monitoring</b> .
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s

## mac-monitoring

Synopsis	Apply CPU protection policy on MAC sources
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sap-template</a> <i>string</i> <a href="#">cpu-protection</a> <a href="#">mac-monitoring</a>
Tree	<a href="#">mac-monitoring</a>
Notes	The following elements are part of a choice: <b>ip-src-monitoring</b> or <b>mac-monitoring</b> .
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s

## policy-id *reference*

Synopsis	CPU protection policy ID
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sap-template</a> <i>string</i> <a href="#">cpu-protection</a> <a href="#">policy-id</a> <i>reference</i>
Tree	<a href="#">policy-id</a>
Reference	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpu-protection</a> <a href="#">policy</a> <i>number</i>
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s

## description *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sap-template</a> <i>string</i> <a href="#">description</a> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**dist-cpu-protection** *reference*

Synopsis	Distributed CPU protection policy name
Context	<b>configure</b> <a href="#">subscriber-mgmt sap-template</a> <i>string</i> <b>dist-cpu-protection</b> <i>reference</i>
Tree	<a href="#">dist-cpu-protection</a>
Reference	<b>configure</b> <a href="#">system security</a> <a href="#">dist-cpu-protection</a> <i>policy</i> <i>string</i>
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**hold-time** (*number* | *keyword*)

Synopsis	Time to hold a SAP after last PFCP session is removed
Context	<b>configure</b> <a href="#">subscriber-mgmt sap-template</a> <i>string</i> <b>hold-time</b> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">hold-time</a>
Description	This command configures the time for which an SAP will be kept after the last session has been removed. Idle SAPs can be forcefully removed by the command <b>clear subscriber-mgmt sap-template template-name idle-saps</b> .
Range	0   30 to 2592000
Units	seconds
Options	infinite
Default	30
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**shcv-policy** [[name](#)] *string*

Synopsis	Enter the <b>shcv-policy</b> list instance
Context	<b>configure</b> <a href="#">subscriber-mgmt shcv-policy</a> <i>string</i>
Tree	<a href="#">shcv-policy</a>
Max. Instances	64
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**[name]** *string*

Synopsis	SHCV policy name
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">shcv-policy</a> <i>string</i>
Tree	<a href="#">shcv-policy</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">shcv-policy</a> <i>string</i> <b>description</b> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**layer-3**

Synopsis	Enter the <b>layer-3</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">shcv-policy</a> <i>string</i> <b>layer-3</b>
Tree	<a href="#">layer-3</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**source-ip-origin** *keyword*

Synopsis	Source IP address to be used for SHCV messages
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">shcv-policy</a> <i>string</i> <a href="#">layer-3</a> <b>source-ip-origin</b> <i>keyword</i>
Tree	<a href="#">source-ip-origin</a>
Options	interface – IP address of the interface vrrp – Primary IP address of the VRRP
Default	interface
Introduced	16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **unnumbered-source-ip** *string*

Synopsis Source IPv4 address for unnumbered subscriber hosts

Context **configure** [subscriber-mgmt shcv-policy string layer-3 unnumbered-source-ip string](#)

Tree [unnumbered-source-ip](#)

Description This command configures the source IPv4 address (also known as the sender IP address) used in SHCV ARP requests for unnumbered hosts. When unconfigured, 0.0.0.0 is used as the source IPv4 address in SHCV ARP requests.

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **periodic**

Synopsis Enter the **periodic** context

Context **configure** [subscriber-mgmt shcv-policy string periodic](#)

Tree [periodic](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **action** *keyword*

Synopsis Action when periodic connectivity verification fails

Context **configure** [subscriber-mgmt shcv-policy string periodic action keyword](#)

Tree [action](#)

Options alarm, remove

Default alarm

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **admin-state** *keyword*

Synopsis Administrative state of periodic connectivity check

Context **configure** [subscriber-mgmt shcv-policy string periodic admin-state keyword](#)

Tree [admin-state](#)

Options	enable, disable
Default	enable
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **interval** *number*

Synopsis	Time interval which all known sources are verified
Context	<b>configure</b> <b>subscriber-mgmt</b> <b>shcv-policy</b> <i>string</i> <b>periodic</b> <b>interval</b> <i>number</i>
Tree	<b>interval</b>
Description	This command specifies the time interval which all known sources are verified. The actual rate is dependent on the number of known hosts and intervals.
Range	1 to 6000
Units	minutes
Default	30
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **retry-count** *number*

Synopsis	Number of retransmissions in connectivity verification
Context	<b>configure</b> <b>subscriber-mgmt</b> <b>shcv-policy</b> <i>string</i> <b>periodic</b> <b>retry-count</b> <i>number</i>
Tree	<b>retry-count</b>
Range	1 to 29
Default	2
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **timeout** *number*

Synopsis	Timeout before connectivity verification retransmitted
Context	<b>configure</b> <b>subscriber-mgmt</b> <b>shcv-policy</b> <i>string</i> <b>periodic</b> <b>timeout</b> <i>number</i>
Tree	<b>timeout</b>
Range	1 to 60
Units	seconds

Default	10
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## trigger

Synopsis	Enter the <b>trigger</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt shcv-policy</a> <i>string</i> <b>trigger</b>
Tree	<a href="#">trigger</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## host-limit-exceeded

Synopsis	Enter the <b>host-limit-exceeded</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt shcv-policy</a> <i>string</i> <a href="#">trigger</a> <b>host-limit-exceeded</b>
Tree	<a href="#">host-limit-exceeded</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## admin-state *keyword*

Synopsis	Administrative state of trigger for host-limit exceeded
Context	<b>configure</b> <a href="#">subscriber-mgmt shcv-policy</a> <i>string</i> <a href="#">trigger</a> <b>host-limit-exceeded</b> <b>admin-state</b> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	enable
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## retry-count *number*

Synopsis	Number of retransmissions in periodic connectivity test
Context	<b>configure</b> <a href="#">subscriber-mgmt shcv-policy</a> <i>string</i> <a href="#">trigger</a> <b>host-limit-exceeded</b> <b>retry-count</b> <i>number</i>

Tree	<a href="#">retry-count</a>
Range	1 to 29
Default	1
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **timeout** *number*

Synopsis	Timeout before a retransmission
Context	<b>configure</b> <a href="#">subscriber-mgmt shcv-policy</a> <i>string</i> <a href="#">trigger host-limit-exceeded</a> <a href="#">timeout</a> <i>number</i>
Tree	<a href="#">timeout</a>
Range	1 to 60
Units	seconds
Default	1
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **inactivity**

Synopsis	Enter the <b>inactivity</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt shcv-policy</a> <i>string</i> <a href="#">trigger inactivity</a>
Tree	<a href="#">inactivity</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **admin-state** *keyword*

Synopsis	Administrative state of the trigger for inactive hosts
Context	<b>configure</b> <a href="#">subscriber-mgmt shcv-policy</a> <i>string</i> <a href="#">trigger inactivity</a> <a href="#">admin-state</a> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	enable
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**retry-count** *number*

Synopsis	Number of retransmissions in periodic connectivity test
Context	<b>configure</b> <a href="#">subscriber-mgmt shcv-policy</a> <i>string</i> <a href="#">trigger inactivity</a> <a href="#">retry-count</a> <i>number</i>
Tree	<a href="#">retry-count</a>
Range	1 to 29
Default	2
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**timeout** *number*

Synopsis	Timeout before a retransmission
Context	<b>configure</b> <a href="#">subscriber-mgmt shcv-policy</a> <i>string</i> <a href="#">trigger inactivity</a> <a href="#">timeout</a> <i>number</i>
Tree	<a href="#">timeout</a>
Range	1 to 60
Units	seconds
Default	10
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**ip-conflict**

Synopsis	Enter the <b>ip-conflict</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt shcv-policy</a> <i>string</i> <a href="#">trigger ip-conflict</a>
Tree	<a href="#">ip-conflict</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**admin-state** *keyword*

Synopsis	Administrative state of the trigger for IP conflict
Context	<b>configure</b> <a href="#">subscriber-mgmt shcv-policy</a> <i>string</i> <a href="#">trigger ip-conflict</a> <a href="#">admin-state</a> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable

---

Default	enable
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **retry-count** *number*

Synopsis	Number of retransmissions in periodic connectivity test
Context	<b>configure</b> <b>subscriber-mgmt shcv-policy</b> <i>string</i> <b>trigger ip-conflict</b> <b>retry-count</b> <i>number</i>
Tree	<b>retry-count</b>
Range	1 to 29
Default	1
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **timeout** *number*

Synopsis	Timeout before a retransmission
Context	<b>configure</b> <b>subscriber-mgmt shcv-policy</b> <i>string</i> <b>trigger ip-conflict</b> <b>timeout</b> <i>number</i>
Tree	<b>timeout</b>
Range	1 to 60
Units	seconds
Default	1
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **mac-learning**

Synopsis	Enter the <b>mac-learning</b> context
Context	<b>configure</b> <b>subscriber-mgmt shcv-policy</b> <i>string</i> <b>trigger</b> <b>mac-learning</b>
Tree	<b>mac-learning</b>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**admin-state** *keyword*

Synopsis	Administrative state of trigger for MAC learning
Context	<b>configure</b> <a href="#">subscriber-mgmt shcv-policy</a> <i>string</i> <a href="#">trigger mac-learning admin-state</a> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	enable
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**retry-count** *number*

Synopsis	Number of retransmissions in periodic connectivity test
Context	<b>configure</b> <a href="#">subscriber-mgmt shcv-policy</a> <i>string</i> <a href="#">trigger mac-learning retry-count</a> <i>number</i>
Tree	<a href="#">retry-count</a>
Range	1 to 29
Default	2
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**timeout** *number*

Synopsis	Timeout before a retransmission
Context	<b>configure</b> <a href="#">subscriber-mgmt shcv-policy</a> <i>string</i> <a href="#">trigger mac-learning timeout</a> <i>number</i>
Tree	<a href="#">timeout</a>
Range	1 to 60
Units	seconds
Default	10
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**mobility**

Synopsis	Enter the <b>mobility</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt shcv-policy</a> <i>string</i> <a href="#">trigger mobility</a>
Tree	<a href="#">mobility</a>

---

Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**admin-state** *keyword*

Synopsis	Administrative state of trigger for SAP IP/MAC conflict
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">shcv-policy</a> <i>string</i> <a href="#">trigger</a> <a href="#">mobility</a> <b>admin-state</b> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	enable
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**retry-count** *number*

Synopsis	Number of retransmissions in periodic connectivity test
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">shcv-policy</a> <i>string</i> <a href="#">trigger</a> <a href="#">mobility</a> <b>retry-count</b> <i>number</i>
Tree	<a href="#">retry-count</a>
Range	1 to 29
Default	1
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**timeout** *number*

Synopsis	Timeout before a retransmission
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">shcv-policy</a> <i>string</i> <a href="#">trigger</a> <a href="#">mobility</a> <b>timeout</b> <i>number</i>
Tree	<a href="#">timeout</a>
Range	1 to 60
Units	seconds
Default	1
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**vpls**

Synopsis	Enter the <b>vpls</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt shcv-policy string vpls</a>
Tree	<a href="#">vpls</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**source-ip** *string*

Synopsis	Source IPv4 address for connectivity verification
Context	<b>configure</b> <a href="#">subscriber-mgmt shcv-policy string vpls source-ip string</a>
Tree	<a href="#">source-ip</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**source-mac** *string***WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Source MAC address for connectivity verification
Context	<b>configure</b> <a href="#">subscriber-mgmt shcv-policy string vpls source-mac string</a>
Tree	<a href="#">source-mac</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**sla-profile** [[name](#)] *string*

Synopsis	Enter the <b>sla-profile</b> list instance
Context	<b>configure</b> <a href="#">subscriber-mgmt sla-profile string</a>
Tree	<a href="#">sla-profile</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**[name]** *string*

Synopsis	SLA profile name
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sla-profile</a> <i>string</i>
Tree	<a href="#">sla-profile</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**control**

Synopsis	Enter the <b>control</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sla-profile</a> <i>string</i> <b>control</b>
Tree	<a href="#">control</a>
Description	Commands in this context determine which sessions can use the SLA profile. By default, only sessions set up by the local system can use the SLA profile, but the SLA profile can also be enabled for sessions set up by a BNG CUPS Control Plane Function (CPF).
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**cups** *boolean*

Synopsis	Allow the CUPS control plane to use the profile
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sla-profile</a> <i>string</i> <a href="#">control</a> <b>cups</b> <i>boolean</i>
Tree	<a href="#">cups</a>
Description	When configured to <b>true</b> , the profile can be used by sessions set up by a BNG CUPS Control Plane Function (CPF).
Default	false
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**local** *boolean*

Synopsis	Allow the local control plane to use the profile
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sla-profile</a> <i>string</i> <a href="#">control</a> <b>local</b> <i>boolean</i>

Tree	<a href="#">local</a>
Description	When configured to <b>true</b> , the profile can be used by sessions set up by the local system.
Default	true
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **credit-control-policy** *reference*

Synopsis	Credit policy for this SLA profile
Context	<b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">credit-control-policy</a> <i>reference</i>
Tree	<a href="#">credit-control-policy</a>
Reference	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">credit-control-policy</a> <i>string</i>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **def-instance-sharing** *keyword*

Synopsis	Default SPI sharing method for IPoE or PPPoE sessions
Context	<b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">def-instance-sharing</a> <i>keyword</i>
Tree	<a href="#">def-instance-sharing</a>
Options	per-sap, per-session
Default	per-sap
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">description</a> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## egress

Synopsis	Enter the <b>egress</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">egress</a>
Tree	<a href="#">egress</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## bonding-selection

Synopsis	Enter the <b>bonding-selection</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">egress</a> <a href="#">bonding-selection</a>
Tree	<a href="#">bonding-selection</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## rate-thresholds

Synopsis	Enter the <b>rate-thresholds</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">egress</a> <a href="#">bonding-selection</a> <a href="#">rate-thresholds</a>
Tree	<a href="#">rate-thresholds</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## high *number*

Synopsis	High threshold rate percentage
Context	<b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">egress</a> <a href="#">bonding-selection</a> <a href="#">rate-thresholds</a> <a href="#">high</a> <i>number</i>
Tree	<a href="#">high</a>
Range	56 to 99
Units	percent
Default	90
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **low number**

Synopsis	Low threshold rate percentage
Context	<b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">egress bonding-selection rate-thresholds</a> <a href="#">low number</a>
Tree	<a href="#">low</a>
Range	55 to 98
Units	percent
Default	80
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **weight**

Synopsis	Enter the <b>weight</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">egress bonding-selection weight</a>
Tree	<a href="#">weight</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **change number**

Synopsis	Weight change of the preferred connection
Context	<b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">egress bonding-selection weight change</a> <a href="#">number</a>
Tree	<a href="#">change</a>
Range	0 to 10
Units	percent
Default	5
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **initial number**

Synopsis	Initial weight of the preferred connection
Context	<b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">egress bonding-selection weight initial</a> <a href="#">number</a>

Tree	<a href="#">initial</a>
Range	1 to 100
Units	percent
Default	100
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **ip-filter** *reference*

Synopsis	IPv4 filter policy name
Context	<b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">egress ip-filter</a> <i>reference</i>
Tree	<a href="#">ip-filter</a>
Reference	<b>configure</b> <a href="#">filter ip-filter</a> <i>string</i>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **ipv6-filter** *reference*

Synopsis	IPv6 filter policy name
Context	<b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">egress ipv6-filter</a> <i>reference</i>
Tree	<a href="#">ipv6-filter</a>
Reference	<b>configure</b> <a href="#">filter ipv6-filter</a> <i>string</i>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **qos**

Synopsis	Enter the <b>qos</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">egress qos</a>
Tree	<a href="#">qos</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**hs-agg-rate** *number*

Synopsis	Maximum rate for expanded egress HS queues
Context	<b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">egress qos hs-agg-rate</a> <i>number</i>
Tree	<a href="#">hs-agg-rate</a>
Range	1 to 100000000
Units	kilobps
Introduced	16.0.R1
Platforms	7750 SR-7/12/12e

**qos-marking-from-sap** *boolean*

Synopsis	Set policy where egress QoS marking rules are applied
Context	<b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">egress qos qos-marking-from-sap</a> <i>boolean</i>
Tree	<a href="#">qos-marking-from-sap</a>
Default	true
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**sap-egress**

Synopsis	Enter the <b>sap-egress</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">egress qos sap-egress</a>
Tree	<a href="#">sap-egress</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**overrides**

Synopsis	Enter the <b>overrides</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">egress qos sap-egress overrides</a>
Tree	<a href="#">overrides</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**hs-queue-stat-mode** *keyword*

Synopsis	Egress HS queue stats mode
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sla-profile</a> <i>string</i> <a href="#">egress</a> <a href="#">qos</a> <a href="#">sap-egress</a> overrides <a href="#">hs-queue-stat-mode</a> <i>keyword</i>
Tree	<a href="#">hs-queue-stat-mode</a>
Options	v4-v6
Introduced	16.0.R1
Platforms	7750 SR-7/12/12e

**hs-wrr-group** [*id*] *reference*

Synopsis	Enter the <b>hs-wrr-group</b> list instance
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sla-profile</a> <i>string</i> <a href="#">egress</a> <a href="#">qos</a> <a href="#">sap-egress</a> overrides <a href="#">hs-wrr-group</a> <i>reference</i>
Tree	<a href="#">hs-wrr-group</a>
Introduced	16.0.R1
Platforms	7750 SR-7/12/12e

**[id]** *reference*

Synopsis	HS WRR group ID to override in the QoS policy table
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sla-profile</a> <i>string</i> <a href="#">egress</a> <a href="#">qos</a> <a href="#">sap-egress</a> overrides <a href="#">hs-wrr-group</a> <i>reference</i>
Tree	<a href="#">hs-wrr-group</a>
Reference	<b>configure</b> <a href="#">qos</a> <a href="#">sap-egress</a> <i>string</i> <a href="#">hs-wrr-group</a> <i>number</i>
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7750 SR-7/12/12e

**hs-class-weight** *number*

Synopsis	Class weight override for WRR group
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sla-profile</a> <i>string</i> <a href="#">egress</a> <a href="#">qos</a> <a href="#">sap-egress</a> overrides <a href="#">hs-wrr-group</a> <i>reference</i> <a href="#">hs-class-weight</a> <i>number</i>
Tree	<a href="#">hs-class-weight</a>
Range	1   2   4   8

Introduced 16.0.R1  
 Platforms 7750 SR-7/12/12e

### **rate** (*number* | *keyword*)

Synopsis PIR rate override for WRR group  
 Context **configure** *subscriber-mgmt sla-profile string egress qos sap-egress overrides hs-wrr-group reference rate* (*number* | *keyword*)  
 Tree [rate](#)  
 Range 1 to 2000000000  
 Units kilobps  
 Options max  
 Introduced 16.0.R1  
 Platforms 7750 SR-7/12/12e

### **policer** [*id*] *reference*

Synopsis Enter the **policer** list instance  
 Context **configure** *subscriber-mgmt sla-profile string egress qos sap-egress overrides policer reference*  
 Tree [policer](#)  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **[id]** *reference*

Synopsis Policer ID  
 Context **configure** *subscriber-mgmt sla-profile string egress qos sap-egress overrides policer reference*  
 Tree [policer](#)  
 Reference **configure** *qos sap-egress string policer number*  
 Notes This element is part of a list key.  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**cbs** (*number* | *keyword*)

Synopsis	CBS
Context	<b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">egress qos sap-egress overrides policer</a> <i>reference</i> <a href="#">cbs</a> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">cbs</a>
Range	0 to 268435456
Units	bytes
Options	auto
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**mbs** (*number* | *keyword*)

Synopsis	MBS
Context	<b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">egress qos sap-egress overrides policer</a> <i>reference</i> <a href="#">mbs</a> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">mbs</a>
Range	0 to 268435456
Units	bytes
Options	auto
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**packet-byte-offset** *number*

Synopsis	Packet byte offset
Context	<b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">egress qos sap-egress overrides policer</a> <i>reference</i> <a href="#">packet-byte-offset</a> <i>number</i>
Tree	<a href="#">packet-byte-offset</a>
Range	-64 to 31
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**rate**

Synopsis	Enter the <b>rate</b> context
----------	-------------------------------

Context	<b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">egress qos sap-egress overrides policer</a> <a href="#">reference rate</a>
Tree	<a href="#">rate</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**cir** (*number* | *keyword*)

Synopsis	CIR override for the packet byte offset
Context	<b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">egress qos sap-egress overrides policer</a> <a href="#">reference rate</a> <a href="#">cir</a> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">cir</a>
Range	0 to 2000000000
Units	kilobps
Options	max
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**pir** (*number* | *keyword*)

Synopsis	PIR override for the packet byte offset
Context	<b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">egress qos sap-egress overrides policer</a> <a href="#">reference rate</a> <a href="#">pir</a> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">pir</a>
Range	1 to 2000000000
Units	kilobps
Options	max
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**stat-mode** *keyword*

Synopsis	Stat mode for the policer
Context	<b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">egress qos sap-egress overrides policer</a> <a href="#">reference</a> <a href="#">stat-mode</a> <i>keyword</i>
Tree	<a href="#">stat-mode</a>

Options	no-stats, minimal, offered-profile-no-cir, offered-total-cir, offered-profile-cir, offered-limited-capped-cir, offered-profile-capped-cir, v4-v6, offered-total-cir-exceed, offered-four-profile-no-cir, offered-total-cir-four-profile
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **queue** [*id*] *reference*

Synopsis	Enter the <b>queue</b> list instance
Context	<b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">egress qos sap-egress overrides queue reference</a>
Tree	<a href="#">queue</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **[id]** *reference*

Synopsis	Queue ID
Context	<b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">egress qos sap-egress overrides queue reference</a>
Tree	<a href="#">queue</a>
Reference	<b>configure</b> <a href="#">qos sap-egress</a> <i>string</i> <a href="#">queue number</a>
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **avg-frame-overhead** *decimal-number*

Synopsis	Average frame overhead
Context	<b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">egress qos sap-egress overrides queue reference</a> <a href="#">avg-frame-overhead</a> <i>decimal-number</i>
Tree	<a href="#">avg-frame-overhead</a>
Range	0.00 to 100.00
Units	percent
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**cbs** (*number* | *keyword*)

Synopsis	CBS
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sla-profile</a> <i>string</i> <a href="#">egress</a> <a href="#">qos</a> <a href="#">sap-egress</a> <a href="#">overrides</a> <a href="#">queue</a> <i>reference</i> <a href="#">cbs</a> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">cbs</a>
Range	0 to 1048576
Units	kilobytes
Options	auto
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**high-prio-only** (*number* | *keyword*)

Synopsis	High priority burst size
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sla-profile</a> <i>string</i> <a href="#">egress</a> <a href="#">qos</a> <a href="#">sap-egress</a> <a href="#">overrides</a> <a href="#">queue</a> <i>reference</i> <a href="#">high-prio-only</a> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">high-prio-only</a>
Range	0 to 100
Units	percent
Options	auto
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**hs-class-weight** *number*

Synopsis	Class-weight override for expanded egress HS queues
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sla-profile</a> <i>string</i> <a href="#">egress</a> <a href="#">qos</a> <a href="#">sap-egress</a> <a href="#">overrides</a> <a href="#">queue</a> <i>reference</i> <a href="#">hs-class-weight</a> <i>number</i>
Tree	<a href="#">hs-class-weight</a>
Range	1   2   4   8
Introduced	16.0.R1
Platforms	7750 SR-7/12/12e

**hs-wred-queue**

Synopsis	Enter the <b>hs-wred-queue</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sla-profile</a> <i>string</i> <a href="#">egress</a> <a href="#">qos</a> <a href="#">sap-egress</a> <a href="#">overrides</a> <a href="#">queue</a> <i>reference</i> <a href="#">hs-wred-queue</a>
Tree	<a href="#">hs-wred-queue</a>
Introduced	16.0.R4
Platforms	7750 SR-7/12/12e

**policy reference**

Synopsis	Name of the slope-policy override applied to HS queue
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sla-profile</a> <i>string</i> <a href="#">egress</a> <a href="#">qos</a> <a href="#">sap-egress</a> <a href="#">overrides</a> <a href="#">queue</a> <i>reference</i> <a href="#">hs-wred-queue</a> <a href="#">policy</a> <i>reference</i>
Tree	<a href="#">policy</a>
Reference	<b>configure</b> <a href="#">qos</a> <a href="#">slope-policy</a> <i>string</i>
Introduced	16.0.R4
Platforms	7750 SR-7/12/12e

**hs-wrr-weight** *number*

Synopsis	Maximum rate for expanded egress HS queues
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sla-profile</a> <i>string</i> <a href="#">egress</a> <a href="#">qos</a> <a href="#">sap-egress</a> <a href="#">overrides</a> <a href="#">queue</a> <i>reference</i> <a href="#">hs-wrr-weight</a> <i>number</i>
Tree	<a href="#">hs-wrr-weight</a>
Range	1 to 127
Introduced	16.0.R1
Platforms	7750 SR-7/12/12e

**mbs** (*number* | *keyword*)

Synopsis	MBS
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sla-profile</a> <i>string</i> <a href="#">egress</a> <a href="#">qos</a> <a href="#">sap-egress</a> <a href="#">overrides</a> <a href="#">queue</a> <i>reference</i> <a href="#">mbs</a> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">mbs</a>
Range	0 to 1073741824
Units	bytes

Options	auto
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## rate

Synopsis	Enter the <b>rate</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">egress qos sap-egress overrides queue reference</a> <b>rate</b>
Tree	<a href="#">rate</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## cir (*number* | *keyword*)

Synopsis	CIR for the queue
Context	<b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">egress qos sap-egress overrides queue reference</a> <b>rate cir</b> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">cir</a>
Range	0 to 2000000000
Units	kilobps
Options	max
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## pir (*number* | *keyword*)

Synopsis	PIR for the queue
Context	<b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">egress qos sap-egress overrides queue reference</a> <b>rate pir</b> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">pir</a>
Range	1 to 2000000000
Units	kilobps
Options	max
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**stat-mode** *keyword*

Synopsis	Stat mode for the policer
Context	<b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">egress qos sap-egress overrides queue reference</a> <a href="#">stat-mode</a> <i>keyword</i>
Tree	<a href="#">stat-mode</a>
Options	v4-v6
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**policy-name** *reference*

Synopsis	SAP-egress QoS policy
Context	<b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">egress qos sap-egress policy-name</a> <i>reference</i>
Tree	<a href="#">policy-name</a>
Reference	<b>configure</b> <a href="#">qos sap-egress</a> <i>string</i>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**port-parent-location** *keyword*

Synopsis	Scheduling type for queued traffic
Context	<b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">egress qos sap-egress port-parent-location</a> <i>keyword</i>
Tree	<a href="#">port-parent-location</a>
Options	port, vport
Default	port
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**scheduler-policy**

Synopsis	Enter the <b>scheduler-policy</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">egress qos scheduler-policy</a>
Tree	<a href="#">scheduler-policy</a>

Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## overrides

Synopsis Enter the **overrides** context  
 Context **configure** [subscriber-mgmt sla-profile](#) *string* [egress qos scheduler-policy overrides](#)  
 Tree [overrides](#)  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## scheduler [[scheduler-name](#)] *reference*

Synopsis Enter the **scheduler** list instance  
 Context **configure** [subscriber-mgmt sla-profile](#) *string* [egress qos scheduler-policy overrides](#) [scheduler](#) *reference*  
 Tree [scheduler](#)  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## [[scheduler-name](#)] *reference*

Synopsis Scheduler policy name  
 Context **configure** [subscriber-mgmt sla-profile](#) *string* [egress qos scheduler-policy overrides](#) [scheduler](#) *reference*  
 Tree [scheduler](#)  
 Reference **configure** [qos scheduler-policy](#) *string* [tier number scheduler](#) *string*  
 Notes This element is part of a list key.  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## rate

Synopsis Enter the **rate** context  
 Context **configure** [subscriber-mgmt sla-profile](#) *string* [egress qos scheduler-policy overrides](#) [scheduler](#) *reference* [rate](#)

Tree	<a href="#">rate</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**cir** (*number* | *keyword*)

Synopsis	Administrative CIR
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sla-profile</a> <i>string</i> <a href="#">egress</a> <a href="#">qos</a> <a href="#">scheduler-policy</a> <a href="#">overrides</a> <a href="#">scheduler</a> <a href="#">reference</a> <a href="#">rate</a> <a href="#">cir</a> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">cir</a>
Range	0 to 3200000000
Units	kilobps
Options	sum, max
Default	sum
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**pir** (*number* | *keyword*)

Synopsis	Administrative PIR
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sla-profile</a> <i>string</i> <a href="#">egress</a> <a href="#">qos</a> <a href="#">scheduler-policy</a> <a href="#">overrides</a> <a href="#">scheduler</a> <a href="#">reference</a> <a href="#">rate</a> <a href="#">pir</a> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">pir</a>
Range	1 to 3200000000
Units	kilobps
Options	max
Default	max
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**policy-name** *reference*

Synopsis	Scheduler policy name
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sla-profile</a> <i>string</i> <a href="#">egress</a> <a href="#">qos</a> <a href="#">scheduler-policy</a> <a href="#">policy-name</a> <a href="#">reference</a>
Tree	<a href="#">policy-name</a>

Reference	<b>configure qos scheduler-policy</b> <i>string</i>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **use-ingress-l2tp-dscp** *boolean*

Synopsis	Use outer L2TP header for LAC sessions
Context	<b>configure subscriber-mgmt sla-profile</b> <i>string</i> <b>egress qos use-ingress-l2tp-dscp</b> <i>boolean</i>
Tree	<a href="#">use-ingress-l2tp-dscp</a>
Description	When configured to <b>true</b> , egress classification is based on the outer L2TP header DSCP instead of the inner IP header for LAC sessions. This command is ignored for non-LAC sessions.
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **report-rate**

Synopsis	Enter the <b>report-rate</b> context
Context	<b>configure subscriber-mgmt sla-profile</b> <i>string</i> <b>egress report-rate</b>
Tree	<a href="#">report-rate</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **agg-rate**

Synopsis	Report the aggregate rate
Context	<b>configure subscriber-mgmt sla-profile</b> <i>string</i> <b>egress report-rate agg-rate</b>
Tree	<a href="#">agg-rate</a>
Notes	The following elements are part of a choice: <b>agg-rate</b> , <b>policer</b> , <b>pppoe-actual-rate</b> , <b>rfc5515-actual-rate</b> , or <b>scheduler</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **policer** *number*

Synopsis	Report the rate of the specified policer
Context	<b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">egress report-rate</a> <a href="#">policer</a> <i>number</i>
Tree	<a href="#">policer</a>
Range	1 to 63
Notes	The following elements are part of a choice: <b>agg-rate</b> , <b>policer</b> , <b>pppoe-actual-rate</b> , <b>rfc5515-actual-rate</b> , or <b>scheduler</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **pppoe-actual-rate**

Synopsis	Report rate from the DSL characteristics PPPoE tags
Context	<b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">egress report-rate</a> <a href="#">pppoe-actual-rate</a>
Tree	<a href="#">pppoe-actual-rate</a>
Notes	The following elements are part of a choice: <b>agg-rate</b> , <b>policer</b> , <b>pppoe-actual-rate</b> , <b>rfc5515-actual-rate</b> , or <b>scheduler</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **rfc5515-actual-rate**

Synopsis	Report the rate as specified in RFC 5515
Context	<b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">egress report-rate</a> <a href="#">rfc5515-actual-rate</a>
Tree	<a href="#">rfc5515-actual-rate</a>
Notes	The following elements are part of a choice: <b>agg-rate</b> , <b>policer</b> , <b>pppoe-actual-rate</b> , <b>rfc5515-actual-rate</b> , or <b>scheduler</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **scheduler** *string*

Synopsis	Report the rate of the specified scheduler
Context	<b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">egress report-rate</a> <a href="#">scheduler</a> <i>string</i>
Tree	<a href="#">scheduler</a>

String Length	1 to 32
Notes	The following elements are part of a choice: <b>agg-rate</b> , <b>policer</b> , <b>pppoe-actual-rate</b> , <b>rfc5515-actual-rate</b> , or <b>scheduler</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## host-limits

Synopsis	Enter the <b>host-limits</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">host-limits</a>
Tree	<a href="#">host-limits</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## ipv4

Synopsis	Enter the <b>ipv4</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">host-limits</a> <a href="#">ipv4</a>
Tree	<a href="#">ipv4</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## arp *number*

Synopsis	Maximum number of IPv4 ARP hosts
Context	<b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">host-limits</a> <a href="#">ipv4</a> <a href="#">arp</a> <i>number</i>
Tree	<a href="#">arp</a>
Description	This command configures the maximum number of IPv4 ARP hosts per SLA profile instance.  The operational maximum value may be smaller due to equipped hardware dependencies.
Range	0 to 131071
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **dhcp number**

Synopsis	Maximum number of IPv4 DHCP hosts
Context	<b>configure subscriber-mgmt sla-profile</b> <i>string</i> <b>host-limits ipv4 dhcp number</b>
Tree	<b>dhcp</b>
Description	This command configures the maximum number of IPv4 DHCP hosts per SLA profile instance.  The operational maximum value may be smaller due to equipped hardware dependencies.
Range	0 to 131071
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **overall number**

Synopsis	Maximum number of IPv4 hosts
Context	<b>configure subscriber-mgmt sla-profile</b> <i>string</i> <b>host-limits ipv4 overall number</b>
Tree	<b>overall</b>
Description	This command configures the maximum number of IPv4 hosts per SLA profile instance.  The operational maximum value may be smaller due to equipped hardware dependencies.
Range	0 to 131071
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **ppp number**

Synopsis	Maximum number of IPv4 PPP hosts
Context	<b>configure subscriber-mgmt sla-profile</b> <i>string</i> <b>host-limits ipv4 ppp number</b>
Tree	<b>ppp</b>
Description	This command configures the maximum number of IPv4 PPP hosts per SLA profile instance.  The operational maximum value may be smaller due to equipped hardware dependencies.
Range	0 to 131071
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**ipv6**

Synopsis	Enter the <b>ipv6</b> context
Context	<b>configure subscriber-mgmt sla-profile string host-limits ipv6</b>
Tree	<a href="#">ipv6</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**overall number**

Synopsis	Maximum number of IPv6 hosts
Context	<b>configure subscriber-mgmt sla-profile string host-limits ipv6 overall number</b>
Tree	<a href="#">overall</a>
Description	This command configures the maximum number of IPv6 hosts per SLA profile instance. The operational maximum value may be smaller due to equipped hardware dependencies.
Range	0 to 131071
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**pd-ipoe-dhcp number**

Synopsis	Maximum number of IPv6 IPoE DHCP PD hosts
Context	<b>configure subscriber-mgmt sla-profile string host-limits ipv6 pd-ipoe-dhcp number</b>
Tree	<a href="#">pd-ipoe-dhcp</a>
Description	This command configures the maximum number of IPv6 IPoE DHCP Prefix Delegation hosts (IA-PD) per SLA profile instance. The operational maximum value may be smaller due to equipped hardware dependencies.
Range	0 to 131071
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**pd-overall number**

Synopsis	Maximum number of IPv6 DHCP PD hosts
----------	--------------------------------------

Context	<b>configure subscriber-mgmt sla-profile</b> <i>string</i> <b>host-limits ipv6 pd-overall</b> <i>number</i>
Tree	<a href="#">pd-overall</a>
Description	The command configures the maximum number of IPv6 DHCP Prefix Delegation hosts (IA-PD) per SLA profile instance. The operational maximum value may be smaller due to equipped hardware dependencies.
Range	0 to 131071
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **pd-ppp-dhcp** *number*

Synopsis	Maximum number of IPv6 PPPoE DHCP PD hosts
Context	<b>configure subscriber-mgmt sla-profile</b> <i>string</i> <b>host-limits ipv6 pd-ppp-dhcp</b> <i>number</i>
Tree	<a href="#">pd-ppp-dhcp</a>
Description	This command configures the maximum number of IPv6 PPPoE DHCP Prefix Delegation hosts (IA-PD) per SLA profile instance. The operational maximum value may be smaller due to equipped hardware dependencies.
Range	0 to 131071
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **wan-ipoe-dhcp** *number*

Synopsis	Maximum number of IPv6 IPoE DHCP WAN hosts
Context	<b>configure subscriber-mgmt sla-profile</b> <i>string</i> <b>host-limits ipv6 wan-ipoe-dhcp</b> <i>number</i>
Tree	<a href="#">wan-ipoe-dhcp</a>
Description	This command configures the maximum number of IPv6 IPoE DHCP WAN hosts (IA-NA) per SLA profile instance. The operational maximum value may be smaller due to equipped hardware dependencies.
Range	0 to 131071
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **wan-ipoe-slaac** *number*

Synopsis	Maximum number of IPv6 IPoE SLAAC WAN hosts
Context	<b>configure</b> <b>subscriber-mgmt sla-profile</b> <i>string</i> <b>host-limits ipv6 wan-ipoe-slaac</b> <i>number</i>
Tree	<a href="#">wan-ipoe-slaac</a>
Description	This command configures the maximum number of IPv6 IPoE SLAAC WAN hosts per SLA profile instance.  The operational maximum value may be smaller due to equipped hardware dependencies.
Range	0 to 131071
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **wan-overall** *number*

Synopsis	Maximum number of IPv6 WAN hosts
Context	<b>configure</b> <b>subscriber-mgmt sla-profile</b> <i>string</i> <b>host-limits ipv6 wan-overall</b> <i>number</i>
Tree	<a href="#">wan-overall</a>
Description	This command configures the maximum number of IPv6 WAN hosts per SLA profile instance.  The operational maximum value may be smaller due to equipped hardware dependencies.
Range	0 to 131071
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **wan-ppp-dhcp** *number*

Synopsis	Maximum number IPv6 PPPoE DHCP WAN hosts
Context	<b>configure</b> <b>subscriber-mgmt sla-profile</b> <i>string</i> <b>host-limits ipv6 wan-ppp-dhcp</b> <i>number</i>
Tree	<a href="#">wan-ppp-dhcp</a>
Description	This command configures the maximum number of IPv6 PPPoE DHCP WAN hosts (IA-NA) per SLA profile instance.  The operational maximum value may be smaller due to equipped hardware dependencies.
Range	0 to 131071
Introduced	16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **wan-ppp-slaac** *number*

Synopsis Maximum number of IPv6 PPPoE SLAAC WAN hosts

Context **configure** **subscriber-mgmt sla-profile** *string* **host-limits ipv6 wan-ppp-slaac** *number*

Tree [wan-ppp-slaac](#)

Description This command configures the maximum number of IPv6 PPPoE DHCP WAN hosts per SLA profile instance.  
The operational maximum value may be smaller due to equipped hardware dependencies.

Range 0 to 131071

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **lac-overall** *number*

Synopsis Maximum number of L2TP LAC hosts

Context **configure** **subscriber-mgmt sla-profile** *string* **host-limits lac-overall** *number*

Tree [lac-overall](#)

Description This command configures the maximum number of L2TP LAC hosts per SLA profile instance.  
The operational maximum value may be smaller due to equipped hardware dependencies.

Range 0 to 131071

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **overall** *number*

Synopsis Maximum number of subscriber hosts

Context **configure** **subscriber-mgmt sla-profile** *string* **host-limits overall** *number*

Tree [overall](#)

Description This command configures the maximum number of subscriber hosts per SLA profile instance.  
The operational maximum value may be smaller due to equipped hardware dependencies.

Range	1 to 131071
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**remove-oldest** *boolean*

Synopsis	Remove oldest
Context	<b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">host-limits</a> <b>remove-oldest</b> <i>boolean</i>
Tree	<a href="#">remove-oldest</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**idle-timeout**

Synopsis	Enable the <b>idle-timeout</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <b>idle-timeout</b>
Tree	<a href="#">idle-timeout</a>
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**category** [[category-name](#)] *reference*

Synopsis	Enter the <b>category</b> list instance
Context	<b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">idle-timeout</a> <b>category</b> <i>reference</i>
Tree	<a href="#">category</a>
Max. Instances	16
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**[category-name]** *reference*

Synopsis	Category name
Context	<b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">idle-timeout</a> <b>category</b> <i>reference</i>
Tree	<a href="#">category</a>

Description	This command specifies the category name where the queues and policers are defined for the idle-timeout monitoring for subscriber hosts.
Reference	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string category string</i>
Notes	This element is part of a list key.
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **action** *keyword*

Synopsis	Action when the idle-timeout is reached
Context	<b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string idle-timeout category reference action keyword</i>
Tree	<a href="#">action</a>
Description	This command specifies the action to be executed when the idle-timeout is reached. The action is performed for all hosts associated with the SLA profile instance.
Options	terminate, shcv
Default	terminate
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **timeout** *number*

Synopsis	Time the category can stay below its activity threshold
Context	<b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string idle-timeout category reference timeout number</i>
Tree	<a href="#">timeout</a>
Range	60 to 15552000
Units	seconds
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **category-map-name** *reference*

#### **WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Category map name
Context	<b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">idle-timeout</a> <a href="#">category-map-name</a> <i>reference</i>
Tree	<a href="#">category-map-name</a>
Reference	<b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i>
Notes	This element is mandatory.
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## ingress

Synopsis	Enter the <b>ingress</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">ingress</a>
Tree	<a href="#">ingress</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## ip-filter reference

Synopsis	IPv4 filter policy name
Context	<b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">ingress ip-filter</a> <i>reference</i>
Tree	<a href="#">ip-filter</a>
Reference	<b>configure</b> <a href="#">filter ip-filter</a> <i>string</i>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## ipv6-filter reference

Synopsis	IPv6 filter policy name
Context	<b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">ingress ipv6-filter</a> <i>reference</i>
Tree	<a href="#">ipv6-filter</a>
Reference	<b>configure</b> <a href="#">filter ipv6-filter</a> <i>string</i>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## qos

Synopsis	Enter the <b>qos</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">ingress qos</a>
Tree	<a href="#">qos</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## sap-ingress

Synopsis	Enter the <b>sap-ingress</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">ingress qos sap-ingress</a>
Tree	<a href="#">sap-ingress</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## overrides

Synopsis	Enter the <b>overrides</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">ingress qos sap-ingress overrides</a>
Tree	<a href="#">overrides</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## policer [*id*] *reference*

Synopsis	Enter the <b>policer</b> list instance
Context	<b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">ingress qos sap-ingress overrides</a> <a href="#">policer</a> <i>reference</i>
Tree	<a href="#">policer</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## [*id*] *reference*

Synopsis	Policer ID
----------	------------

Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sla-profile</a> <i>string</i> <a href="#">ingress</a> <a href="#">qos</a> <a href="#">sap-ingress</a> <a href="#">overrides</a> <a href="#">policer</a> <i>reference</i>
Tree	<a href="#">policer</a>
Reference	<b>configure</b> <a href="#">qos</a> <a href="#">sap-ingress</a> <i>string</i> <a href="#">policer</a> <i>number</i>
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**cbs** (*number* | *keyword*)

Synopsis	CBS
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sla-profile</a> <i>string</i> <a href="#">ingress</a> <a href="#">qos</a> <a href="#">sap-ingress</a> <a href="#">overrides</a> <a href="#">policer</a> <i>reference</i> <a href="#">cbs</a> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">cbs</a>
Range	0 to 268435456
Units	bytes
Options	auto
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**mbs** (*number* | *keyword*)

Synopsis	MBS
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sla-profile</a> <i>string</i> <a href="#">ingress</a> <a href="#">qos</a> <a href="#">sap-ingress</a> <a href="#">overrides</a> <a href="#">policer</a> <i>reference</i> <a href="#">mbs</a> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">mbs</a>
Range	0 to 268435456
Units	bytes
Options	auto
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**packet-byte-offset** *number*

Synopsis	Packet byte offset
----------	--------------------

Context	<b>configure subscriber-mgmt sla-profile</b> <i>string</i> <b>ingress qos sap-ingress overrides policer</b> <i>reference</i> <b>packet-byte-offset</b> <i>number</i>
Tree	<a href="#">packet-byte-offset</a>
Range	-32 to 31
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**rate**

Synopsis	Enter the <b>rate</b> context
Context	<b>configure subscriber-mgmt sla-profile</b> <i>string</i> <b>ingress qos sap-ingress overrides policer</b> <i>reference</i> <b>rate</b>
Tree	<a href="#">rate</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**cir** (*number* | *keyword*)

Synopsis	CIR override for the packet byte offset
Context	<b>configure subscriber-mgmt sla-profile</b> <i>string</i> <b>ingress qos sap-ingress overrides policer</b> <i>reference</i> <b>rate cir</b> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">cir</a>
Range	0 to 2000000000
Units	kilobps
Options	max
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**pir** (*number* | *keyword*)

Synopsis	PIR override for the packet byte offset
Context	<b>configure subscriber-mgmt sla-profile</b> <i>string</i> <b>ingress qos sap-ingress overrides policer</b> <i>reference</i> <b>rate pir</b> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">pir</a>
Range	1 to 2000000000
Units	kilobps

Options	max
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **stat-mode** *keyword*

Synopsis	Stat mode for the policer
Context	<b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">ingress qos sap-ingress overrides policer</a> <i>reference</i> <b>stat-mode</b> <i>keyword</i>
Tree	<a href="#">stat-mode</a>
Options	no-stats, minimal, offered-profile-no-cir, offered-total-cir, offered-priority-no-cir, offered-profile-cir, offered-priority-cir, offered-limited-profile-cir, offered-profile-capped-cir, offered-limited-capped-cir, v4-v6
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **queue** [*id*] *reference*

Synopsis	Enter the <b>queue</b> list instance
Context	<b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">ingress qos sap-ingress overrides queue</a> <i>reference</i>
Tree	<a href="#">queue</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **[id]** *reference*

Synopsis	Queue ID
Context	<b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">ingress qos sap-ingress overrides queue</a> <i>reference</i>
Tree	<a href="#">queue</a>
Reference	<b>configure</b> <a href="#">qos sap-ingress</a> <i>string</i> <a href="#">queue</a> <i>number</i>
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**cbs** (*number* | *keyword*)

Synopsis	CBS
Context	<b>configure</b> <b>subscriber-mgmt sla-profile</b> <i>string</i> <b>ingress qos sap-ingress overrides queue</b> <i>reference</i> <b>cbs</b> ( <i>number</i>   <i>keyword</i> )
Tree	<b>cbs</b>
Range	0 to 1048576
Units	kilobytes
Options	auto
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**high-prio-only** (*number* | *keyword*)

Synopsis	High priority burst size
Context	<b>configure</b> <b>subscriber-mgmt sla-profile</b> <i>string</i> <b>ingress qos sap-ingress overrides queue</b> <i>reference</i> <b>high-prio-only</b> ( <i>number</i>   <i>keyword</i> )
Tree	<b>high-prio-only</b>
Range	0 to 100
Units	percent
Options	auto
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**mbs** (*number* | *keyword*)

Synopsis	MBS
Context	<b>configure</b> <b>subscriber-mgmt sla-profile</b> <i>string</i> <b>ingress qos sap-ingress overrides queue</b> <i>reference</i> <b>mbs</b> ( <i>number</i>   <i>keyword</i> )
Tree	<b>mbs</b>
Range	0 to 1073741824
Units	bytes
Options	auto
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## rate

Synopsis	Enter the <b>rate</b> context
Context	<b>configure</b> <b>subscriber-mgmt sla-profile</b> <i>string</i> <b>ingress qos sap-ingress overrides queue</b> <i>reference rate</i>
Tree	<a href="#">rate</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## cir (*number* | *keyword*)

Synopsis	CIR for the queue
Context	<b>configure</b> <b>subscriber-mgmt sla-profile</b> <i>string</i> <b>ingress qos sap-ingress overrides queue</b> <i>reference rate cir (number   keyword)</i>
Tree	<a href="#">cir</a>
Range	0 to 2000000000
Units	kilobps
Options	max
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## pir (*number* | *keyword*)

Synopsis	PIR for the queue
Context	<b>configure</b> <b>subscriber-mgmt sla-profile</b> <i>string</i> <b>ingress qos sap-ingress overrides queue</b> <i>reference rate pir (number   keyword)</i>
Tree	<a href="#">pir</a>
Range	1 to 2000000000
Units	kilobps
Options	max
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## stat-mode *keyword*

Synopsis	Stat mode for the policer
----------	---------------------------

Context	<b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">ingress qos sap-ingress overrides queue reference</a> <a href="#">stat-mode</a> <i>keyword</i>
Tree	<a href="#">stat-mode</a>
Options	v4-v6
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **policy-name** *reference*

Synopsis	SAP-ingress QoS policy
Context	<b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">ingress qos sap-ingress policy-name</a> <i>reference</i>
Tree	<a href="#">policy-name</a>
Reference	<b>configure</b> <a href="#">qos sap-ingress</a> <i>string</i>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **queuing-type** *keyword*

Synopsis	Queuing type
Context	<b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">ingress qos sap-ingress queuing-type</a> <i>keyword</i>
Tree	<a href="#">queuing-type</a>
Options	service, shared, multipoint-shared
Default	service
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **report-rate**

Synopsis	Enter the <b>report-rate</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">ingress report-rate</a>
Tree	<a href="#">report-rate</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## agg-rate

Synopsis	Report the aggregate rate
Context	<b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">ingress report-rate</a> <a href="#">agg-rate</a>
Tree	<a href="#">agg-rate</a>
Notes	The following elements are part of a choice: <b>agg-rate</b> , <b>policer</b> , <b>pppoe-actual-rate</b> , <b>rfc5515-actual-rate</b> , or <b>scheduler</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## policer *number*

Synopsis	Report the rate of the specified policer
Context	<b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">ingress report-rate</a> <a href="#">policer</a> <i>number</i>
Tree	<a href="#">policer</a>
Range	1 to 63
Notes	The following elements are part of a choice: <b>agg-rate</b> , <b>policer</b> , <b>pppoe-actual-rate</b> , <b>rfc5515-actual-rate</b> , or <b>scheduler</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## pppoe-actual-rate

Synopsis	Report rate from the DSL characteristics PPPoE tags
Context	<b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">ingress report-rate</a> <a href="#">pppoe-actual-rate</a>
Tree	<a href="#">pppoe-actual-rate</a>
Notes	The following elements are part of a choice: <b>agg-rate</b> , <b>policer</b> , <b>pppoe-actual-rate</b> , <b>rfc5515-actual-rate</b> , or <b>scheduler</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## rfc5515-actual-rate

Synopsis	Report the rate as specified in RFC 5515
Context	<b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">ingress report-rate</a> <a href="#">rfc5515-actual-rate</a>
Tree	<a href="#">rfc5515-actual-rate</a>

Notes	The following elements are part of a choice: <b>agg-rate</b> , <b>policer</b> , <b>pppoe-actual-rate</b> , <b>rfc5515-actual-rate</b> , or <b>scheduler</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **scheduler** *string*

Synopsis	Report the rate of the specified scheduler
Context	<b>configure</b> <b>subscriber-mgmt sla-profile</b> <i>string</i> <b>ingress report-rate scheduler</b> <i>string</i>
Tree	<b>scheduler</b>
String Length	1 to 32
Notes	The following elements are part of a choice: <b>agg-rate</b> , <b>policer</b> , <b>pppoe-actual-rate</b> , <b>rfc5515-actual-rate</b> , or <b>scheduler</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **one-time-http-redirectation**

Synopsis	Enter the <b>one-time-http-redirectation</b> context
Context	<b>configure</b> <b>subscriber-mgmt sla-profile</b> <i>string</i> <b>one-time-http-redirectation</b>
Tree	<b>one-time-http-redirectation</b>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **ip-filter** *reference*

Synopsis	IPv4 filter policy name
Context	<b>configure</b> <b>subscriber-mgmt sla-profile</b> <i>string</i> <b>one-time-http-redirectation ip-filter</b> <i>reference</i>
Tree	<b>ip-filter</b>
Reference	<b>configure filter ip-filter</b> <i>string</i>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **pfc-p-mappings**

Synopsis	Enter the <b>pfc-p-mappings</b> context
----------	---

Context	<b>configure subscriber-mgmt sla-profile</b> <i>string</i> <a href="#">pfc-mappings</a>
Tree	<a href="#">pfc-mappings</a>
Description	Commands in this context configure the mapping of packet forwarding control protocol (PFCP) QoS IEs (such as QoS enforcement rule (QER) GBR/MBR IEs), to local QoS overrides (such as queue and policer rates).
Introduced	21.10.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### session-qer

Synopsis	Enter the <b>session-qer</b> context
Context	<b>configure subscriber-mgmt sla-profile</b> <i>string</i> <a href="#">pfc-mappings</a> <a href="#">session-qer</a>
Tree	<a href="#">session-qer</a>
Description	<p>Commands in this context configure the mapping of the PFCP session QER rate to the local QoS rate.</p> <p>If a signaled PFCP QER rate applies to all data-plane rules, it is interpreted as the session QER rate and is mapped to the QoS overrides in the configuration. Examples of such QER rates are APN-AMBR for 4G FWA sessions and session-AMBR for 5G FWA sessions.</p> <p>A QER that contains a QER correlation ID does not use the QER mapping because it is assumed not to be a per-session construct.</p>
Introduced	21.10.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### downlink

Synopsis	Enter the <b>downlink</b> context
Context	<b>configure subscriber-mgmt sla-profile</b> <i>string</i> <a href="#">pfc-mappings</a> <a href="#">session-qer</a> <a href="#">downlink</a>
Tree	<a href="#">downlink</a>
Description	Commands in this context configure the downlink MBR/GBR to QoS override mapping.
Introduced	21.10.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### aggregate-rate

Synopsis	Map MBR/GBR to a rate override for the aggregate rate
----------	---

Context	<b>configure subscriber-mgmt sla-profile</b> <i>string</i> <a href="#">pfc-p-mappings</a> <a href="#">session-qer</a> <a href="#">downlink aggregate-rate</a>
Tree	<a href="#">aggregate-rate</a>
Notes	The following elements are part of a choice: <b>aggregate-rate</b> , <b>arbiter</b> , <b>policer</b> , <b>queue</b> , or <b>scheduler</b> .
Introduced	21.10.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **arbiter** *string*

Synopsis	Arbiter target of MBR/GBR override
Context	<b>configure subscriber-mgmt sla-profile</b> <i>string</i> <a href="#">pfc-p-mappings</a> <a href="#">session-qer</a> <a href="#">downlink arbiter</a> <i>string</i>
Tree	<a href="#">arbiter</a>
String Length	1 to 32
Notes	The following elements are part of a choice: <b>aggregate-rate</b> , <b>arbiter</b> , <b>policer</b> , <b>queue</b> , or <b>scheduler</b> .
Introduced	21.10.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **policer** *number*

Synopsis	Policer target of MBR/GBR override
Context	<b>configure subscriber-mgmt sla-profile</b> <i>string</i> <a href="#">pfc-p-mappings</a> <a href="#">session-qer</a> <a href="#">downlink policer</a> <i>number</i>
Tree	<a href="#">policer</a>
Range	1 to 8
Notes	The following elements are part of a choice: <b>aggregate-rate</b> , <b>arbiter</b> , <b>policer</b> , <b>queue</b> , or <b>scheduler</b> .
Introduced	21.10.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **queue** *number*

Synopsis	Queue target of MBR/GBR override
Context	<b>configure subscriber-mgmt sla-profile</b> <i>string</i> <a href="#">pfc-p-mappings</a> <a href="#">session-qer</a> <a href="#">downlink queue</a> <i>number</i>

Tree	<a href="#">queue</a>
Range	1 to 8
Notes	The following elements are part of a choice: <b>aggregate-rate</b> , <b>arbiter</b> , <b>policer</b> , <b>queue</b> , or <b>scheduler</b> .
Introduced	21.10.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **scheduler** *string*

Synopsis	Scheduler target of MBR/GBR override
Context	<b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">pfc-mappings</a> <a href="#">session-qer</a> <a href="#">downlink scheduler</a> <i>string</i>
Tree	<a href="#">scheduler</a>
String Length	1 to 32
Notes	The following elements are part of a choice: <b>aggregate-rate</b> , <b>arbiter</b> , <b>policer</b> , <b>queue</b> , or <b>scheduler</b> .
Introduced	21.10.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **uplink**

Synopsis	Enter the <b>uplink</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">pfc-mappings</a> <a href="#">session-qer</a> <a href="#">uplink</a>
Tree	<a href="#">uplink</a>
Description	Commands in this context configure the uplink MBR/GBR to QoS override mapping.
Introduced	21.10.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **arbiter** *string*

Synopsis	Arbiter target of MBR/GBR override
Context	<b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">pfc-mappings</a> <a href="#">session-qer</a> <a href="#">uplink arbiter</a> <i>string</i>
Tree	<a href="#">arbiter</a>
String Length	1 to 32
Notes	The following elements are part of a choice: <b>arbiter</b> , <b>policer</b> , <b>queue</b> , or <b>scheduler</b> .

Introduced	21.10.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **policer** *number*

Synopsis	Policer target of MBR/GBR override
Context	<b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">pfc-p-mappings</a> <a href="#">session-qer</a> <a href="#">uplink</a> <a href="#">policer number</a>
Tree	<a href="#">policer</a>
Range	1 to 63
Notes	The following elements are part of a choice: <b>arbiter</b> , <b>policer</b> , <b>queue</b> , or <b>scheduler</b> .
Introduced	21.10.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **queue** *number*

Synopsis	Queue target of MBR/GBR override
Context	<b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">pfc-p-mappings</a> <a href="#">session-qer</a> <a href="#">uplink</a> <a href="#">queue number</a>
Tree	<a href="#">queue</a>
Range	1 to 32
Notes	The following elements are part of a choice: <b>arbiter</b> , <b>policer</b> , <b>queue</b> , or <b>scheduler</b> .
Introduced	21.10.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **scheduler** *string*

Synopsis	Scheduler target of MBR/GBR override
Context	<b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">pfc-p-mappings</a> <a href="#">session-qer</a> <a href="#">uplink scheduler string</a>
Tree	<a href="#">scheduler</a>
String Length	1 to 32
Notes	The following elements are part of a choice: <b>arbiter</b> , <b>policer</b> , <b>queue</b> , or <b>scheduler</b> .
Introduced	21.10.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

## session-limits

Synopsis	Enter the <b>session-limits</b> context
Context	<b>configure subscriber-mgmt sla-profile string session-limits</b>
Tree	<a href="#">session-limits</a>
Introduced	20.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## ipoe number

Synopsis	Maximum number of IPoE sessions
Context	<b>configure subscriber-mgmt sla-profile string session-limits ipoe number</b>
Tree	<a href="#">ipoe</a>
Description	This command configures the maximum number of IPoE sessions per SLA profile instance.
Range	0 to 131071
Introduced	20.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## l2tp

Synopsis	Enter the <b>l2tp</b> context
Context	<b>configure subscriber-mgmt sla-profile string session-limits l2tp</b>
Tree	<a href="#">l2tp</a>
Introduced	20.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## lns number

Synopsis	Maximum number of L2TP LNS sessions
Context	<b>configure subscriber-mgmt sla-profile string session-limits l2tp lns number</b>
Tree	<a href="#">lns</a>
Description	This command configures the maximum number of L2TP LNS sessions per SLA profile instance.
Range	0 to 131071

Introduced	20.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**lts number**

Synopsis	Maximum number of L2TP LTS sessions
Context	<b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">session-limits l2tp lts number</a>
Tree	<a href="#">lts</a>
Description	This command configures the maximum number of L2TP LTS sessions per SLA profile instance.
Range	0 to 131071
Introduced	20.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**overall number**

Synopsis	Maximum number of L2TP sessions
Context	<b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">session-limits l2tp overall number</a>
Tree	<a href="#">overall</a>
Description	This command configures the maximum number of L2TP sessions per SLA profile instance.
Range	0 to 131071
Introduced	20.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**overall number**

Synopsis	Maximum number of subscriber sessions
Context	<b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">session-limits overall number</a>
Tree	<a href="#">overall</a>
Range	0 to 131071
Introduced	20.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## pppoe

Synopsis	Enter the <b>pppoe</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">session-limits pppoe</a>
Tree	<a href="#">pppoe</a>
Introduced	20.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## lac number

Synopsis	Maximum number of PPPoE L2TP LAC sessions
Context	<b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">session-limits pppoe lac number</a>
Tree	<a href="#">lac</a>
Description	This command configures the maximum number of PPPoE L2TP LAC sessions per SLA profile instance.
Range	0 to 131071
Introduced	20.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## local number

Synopsis	Maximum number of PPPoE local terminated sessions
Context	<b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">session-limits pppoe local number</a>
Tree	<a href="#">local</a>
Description	This command configures the maximum number of PPPoE local terminated sessions (PTA) per SLA profile instance.
Range	0 to 131071
Introduced	20.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## overall number

Synopsis	Maximum number of PPPoE sessions
Context	<b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">session-limits pppoe overall number</a>
Tree	<a href="#">overall</a>

Description	This command configures the maximum number of PPPoE sessions per SLA profile instance.
Range	0 to 131071
Introduced	20.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **steering-profile** [[name](#)] *string*

Synopsis	Enter the <b>steering-profile</b> list instance
Context	<b>configure subscriber-mgmt steering-profile</b> <i>string</i>
Tree	<a href="#">steering-profile</a>
Max. Instances	32
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **[name]** *string*

Synopsis	Steering profile name
Context	<b>configure subscriber-mgmt steering-profile</b> <i>string</i>
Tree	<a href="#">steering-profile</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **access**

Synopsis	Enter the <b>access</b> context
Context	<b>configure subscriber-mgmt steering-profile</b> <i>string</i> <b>access</b>
Tree	<a href="#">access</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **router-instance** *string*

Synopsis	Router instance to be used as an access VAS router
Context	<b>configure</b> <a href="#">subscriber-mgmt steering-profile</a> <i>string</i> <a href="#">access</a> <a href="#">router-instance</a> <i>string</i>
Tree	<a href="#">router-instance</a>
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">subscriber-mgmt steering-profile</a> <i>string</i> <a href="#">description</a> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **network**

Synopsis	Enter the <b>network</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt steering-profile</a> <i>string</i> <a href="#">network</a>
Tree	<a href="#">network</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **next-hop** *string*

Synopsis	Next-hop IP address used for network next-hop
Context	<b>configure</b> <a href="#">subscriber-mgmt steering-profile</a> <i>string</i> <a href="#">network</a> <a href="#">next-hop</a> <i>string</i>
Tree	<a href="#">next-hop</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **router-instance** *string*

Synopsis	Router instance to be used as an access VAS router
----------	--

Context	<b>configure</b> <a href="#">subscriber-mgmt steering-profile</a> <i>string</i> <a href="#">network router-instance</a> <i>string</i>
Tree	<a href="#">router-instance</a>
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **sub-ident-policy** [[name](#)] *string*

Synopsis	Enter the <b>sub-ident-policy</b> list instance
Context	<b>configure</b> <a href="#">subscriber-mgmt sub-ident-policy</a> <i>string</i>
Tree	<a href="#">sub-ident-policy</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **[name]** *string*

Synopsis	Subscriber identification policy name
Context	<b>configure</b> <a href="#">subscriber-mgmt sub-ident-policy</a> <i>string</i>
Tree	<a href="#">sub-ident-policy</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **app-profile-map**

Synopsis	Enter the <b>app-profile-map</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt sub-ident-policy</a> <i>string</i> <a href="#">app-profile-map</a>
Tree	<a href="#">app-profile-map</a>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **entry** [[app-profile-string](#)] *string*

Synopsis	Enter the <b>entry</b> list instance
Context	<b>configure</b> <a href="#">subscriber-mgmt sub-ident-policy</a> <i>string</i> <a href="#">app-profile-map</a> <b>entry</b> <i>string</i>

Tree	<a href="#">entry</a>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **[app-profile-string]** *string*

Synopsis	Application profile string
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sub-ident-policy</a> <i>string</i> <a href="#">app-profile-map</a> <a href="#">entry</a> <i>string</i>
Tree	<a href="#">entry</a>
String Length	1 to 16
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **app-profile** *reference*

Synopsis	Application profile name
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sub-ident-policy</a> <i>string</i> <a href="#">app-profile-map</a> <a href="#">entry</a> <i>string</i> <a href="#">app-profile</a> <i>reference</i>
Tree	<a href="#">app-profile</a>
Reference	<b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">policy</a> <a href="#">app-profile</a> <i>string</i>
Notes	This element is mandatory.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **use-direct-map-as-default** *boolean*

Synopsis	Enable direct mapping of application profile as default
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sub-ident-policy</a> <i>string</i> <a href="#">app-profile-map</a> <a href="#">use-direct-map-as-default</a> <i>boolean</i>
Tree	<a href="#">use-direct-map-as-default</a>
Default	false
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sub-ident-policy</a> <i>string</i> <a href="#">description</a> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**primary**

Synopsis	Enter the <b>primary</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sub-ident-policy</a> <i>string</i> <a href="#">primary</a>
Tree	<a href="#">primary</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**admin-state** *keyword*

Synopsis	Administrative state of script execution
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sub-ident-policy</a> <i>string</i> <a href="#">primary</a> <a href="#">admin-state</a> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**script-url** *string*

Synopsis	Identification script URL
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sub-ident-policy</a> <i>string</i> <a href="#">primary</a> <a href="#">script-url</a> <i>string</i>
Tree	<a href="#">script-url</a>
String Length	1 to 180
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## secondary

Synopsis	Enter the <b>secondary</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt sub-ident-policy string secondary</a>
Tree	<a href="#">secondary</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## admin-state *keyword*

Synopsis	Administrative state of script execution
Context	<b>configure</b> <a href="#">subscriber-mgmt sub-ident-policy string secondary admin-state keyword</a>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## script-url *string*

Synopsis	Identification script URL
Context	<b>configure</b> <a href="#">subscriber-mgmt sub-ident-policy string secondary script-url string</a>
Tree	<a href="#">script-url</a>
String Length	1 to 180
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## sla-profile-map

Synopsis	Enter the <b>sla-profile-map</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt sub-ident-policy string sla-profile-map</a>
Tree	<a href="#">sla-profile-map</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**entry** [[sla-profile-string](#)] *string*

Synopsis	Enter the <b>entry</b> list instance
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sub-ident-policy</a> <i>string</i> <a href="#">sla-profile-map</a> <a href="#">entry</a> <i>string</i>
Tree	<a href="#">entry</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**[sla-profile-string]** *string*

Synopsis	SLA profile string
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sub-ident-policy</a> <i>string</i> <a href="#">sla-profile-map</a> <a href="#">entry</a> <i>string</i>
Tree	<a href="#">entry</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**sla-profile** *reference*

Synopsis	SLA profile
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sub-ident-policy</a> <i>string</i> <a href="#">sla-profile-map</a> <a href="#">entry</a> <i>string</i> <a href="#">sla-profile</a> <i>reference</i>
Tree	<a href="#">sla-profile</a>
Reference	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sla-profile</a> <i>string</i>
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**use-direct-map-as-default** *boolean*

Synopsis	Allow direct mapping of SLA profile as default
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sub-ident-policy</a> <i>string</i> <a href="#">sla-profile-map</a> <a href="#">use-direct-map-as-default</a> <i>boolean</i>
Tree	<a href="#">use-direct-map-as-default</a>

Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **strings-from-option** *number*

Synopsis	IPOE option to get the identification strings
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sub-ident-policy</a> <i>string</i> <a href="#">strings-from-option</a> <i>number</i>
Tree	<a href="#">strings-from-option</a>
Range	1 to 254
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **sub-profile-map**

Synopsis	Enter the <b>sub-profile-map</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sub-ident-policy</a> <i>string</i> <a href="#">sub-profile-map</a>
Tree	<a href="#">sub-profile-map</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **entry** [[sub-profile-string](#)] *string*

Synopsis	Enter the <b>entry</b> list instance
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sub-ident-policy</a> <i>string</i> <a href="#">sub-profile-map</a> <a href="#">entry</a> <i>string</i>
Tree	<a href="#">entry</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **[sub-profile-string]** *string*

Synopsis	Subscriber identification string
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sub-ident-policy</a> <i>string</i> <a href="#">sub-profile-map</a> <a href="#">entry</a> <i>string</i>
Tree	<a href="#">entry</a>
String Length	1 to 32

Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **sub-profile** *reference*

Synopsis	Subscriber profile
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sub-ident-policy</a> <i>string</i> <a href="#">sub-profile-map</a> <a href="#">entry</a> <i>string</i> <a href="#">sub-profile</a> <i>reference</i>
Tree	<a href="#">sub-profile</a>
Reference	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sub-profile</a> <i>string</i>
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **use-direct-map-as-default** *boolean*

Synopsis	Allow direct mapping of subscriber profile as default
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sub-ident-policy</a> <i>string</i> <a href="#">sub-profile-map</a> <a href="#">use-direct-map-as-default</a> <i>boolean</i>
Tree	<a href="#">use-direct-map-as-default</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **tertiary**

Synopsis	Enter the <b>tertiary</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sub-ident-policy</a> <i>string</i> <a href="#">tertiary</a>
Tree	<a href="#">tertiary</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **admin-state** *keyword*

Synopsis	Administrative state of script execution
----------	--

Context	<b>configure subscriber-mgmt sub-ident-policy</b> <i>string tertiary admin-state keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **script-url** *string*

Synopsis	Identification script URL
Context	<b>configure subscriber-mgmt sub-ident-policy</b> <i>string tertiary script-url string</i>
Tree	<a href="#">script-url</a>
String Length	1 to 180
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **sub-mcac-policy** [*name*] *string*

Synopsis	Enter the <b>sub-mcac-policy</b> list instance
Context	<b>configure subscriber-mgmt sub-mcac-policy</b> <i>string</i>
Tree	<a href="#">sub-mcac-policy</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s

### **[name]** *string*

Synopsis	Policy name
Context	<b>configure subscriber-mgmt sub-mcac-policy</b> <i>string</i>
Tree	<a href="#">sub-mcac-policy</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s

**admin-state** *keyword*

Synopsis	Administrative state of the subscriber MCAC policy
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sub-mcac-policy</a> <i>string</i> <a href="#">admin-state</a> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s

**bandwidth**

Synopsis	Enter the <b>bandwidth</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sub-mcac-policy</a> <i>string</i> <a href="#">bandwidth</a>
Tree	<a href="#">bandwidth</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s

**mandatory** (*number* | *keyword*)

Synopsis	Pre-reserved bandwidth for all mandatory channels
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sub-mcac-policy</a> <i>string</i> <a href="#">bandwidth</a> <a href="#">mandatory</a> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">mandatory</a>
Range	0 to 2147483647
Options	unlimited
Default	unlimited
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s

**total** (*number* | *keyword*)

Synopsis	Maximum allowed bandwidth
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sub-mcac-policy</a> <i>string</i> <a href="#">bandwidth</a> <a href="#">total</a> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">total</a>
Range	0 to 2147483647

Options	unlimited
Default	unlimited
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s

### **description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sub-mcac-policy</a> <i>string</i> <a href="#">description</a> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s

### **sub-profile** [[name](#)] *string*

Synopsis	Enter the <b>sub-profile</b> list instance
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sub-profile</a> <i>string</i>
Tree	<a href="#">sub-profile</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **[name]** *string*

Synopsis	Subscriber profile name
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sub-profile</a> <i>string</i>
Tree	<a href="#">sub-profile</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **accounting-policy** *reference*

Synopsis	Accounting policy
----------	-------------------

Context	<b>configure</b> <a href="#">subscriber-mgmt sub-profile</a> <i>string</i> <a href="#">accounting-policy</a> <i>reference</i>
Tree	<a href="#">accounting-policy</a>
Reference	<b>configure</b> <a href="#">log accounting-policy</a> <i>number</i>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **accu-stats-policy** *reference*

Synopsis	Accumulated statistics policy
Context	<b>configure</b> <a href="#">subscriber-mgmt sub-profile</a> <i>string</i> <a href="#">accu-stats-policy</a> <i>reference</i>
Tree	<a href="#">accu-stats-policy</a>
Reference	<b>configure</b> <a href="#">subscriber-mgmt accu-stats-policy</a> <i>string</i>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **ancp**

Synopsis	Enter the <b>ancp</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt sub-profile</a> <i>string</i> <a href="#">ancp</a>
Tree	<a href="#">ancp</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **ancp-policy** *reference*

Synopsis	ANCP policy for this subscriber profile
Context	<b>configure</b> <a href="#">subscriber-mgmt sub-profile</a> <i>string</i> <a href="#">ancp</a> <a href="#">ancp-policy</a> <i>reference</i>
Tree	<a href="#">ancp-policy</a>
Reference	<b>configure</b> <a href="#">subscriber-mgmt ancp ancp-policy</a> <i>string</i>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **collect-stats** *boolean*

Synopsis	Collect statistics
----------	--------------------

Context	<b>configure subscriber-mgmt sub-profile</b> <i>string</i> <b>collect-stats</b> <i>boolean</i>
Tree	<b>collect-stats</b>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## control

Synopsis	Enter the <b>control</b> context
Context	<b>configure subscriber-mgmt sub-profile</b> <i>string</i> <b>control</b>
Tree	<b>control</b>
Description	Commands in this context determine which sessions can use the subscriber profile. By default, only sessions set up by the local system can use the profile, however, the profile can also be enabled for sessions set up by a BNG CUPS CPF.
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## cups *boolean*

Synopsis	Allow the CUPS control plane to use the profile
Context	<b>configure subscriber-mgmt sub-profile</b> <i>string</i> <b>control cups</b> <i>boolean</i>
Tree	<b>cups</b>
Description	When configured to <b>true</b> , the profile can be used by sessions set up by a BNG CUPS Control Plane Function (CPF).
Default	false
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## local *boolean*

Synopsis	Allow the local control plane to use the profile
Context	<b>configure subscriber-mgmt sub-profile</b> <i>string</i> <b>control local</b> <i>boolean</i>
Tree	<b>local</b>
Description	When configured to <b>true</b> , the profile can be used by sessions set up by the local system.
Default	true

Introduced 20.5.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **description** *string*

Synopsis Text description  
 Context **configure** [subscriber-mgmt](#) [sub-profile](#) *string* [description](#) *string*  
 Tree [description](#)  
 String Length 1 to 80  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **egress**

Synopsis Enter the **egress** context  
 Context **configure** [subscriber-mgmt](#) [sub-profile](#) *string* [egress](#)  
 Tree [egress](#)  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **lag-per-link-hash**

Synopsis Enter the **lag-per-link-hash** context  
 Context **configure** [subscriber-mgmt](#) [sub-profile](#) *string* [egress](#) [lag-per-link-hash](#)  
 Tree [lag-per-link-hash](#)  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **class** *number*

Synopsis Class used to select a LAG link  
 Context **configure** [subscriber-mgmt](#) [sub-profile](#) *string* [egress](#) [lag-per-link-hash](#) *class* *number*  
 Tree [class](#)  
 Range 1 to 3  
 Default 1

Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **weight** *number*

Synopsis	Weight associated with SAP when selecting a LAG link
Context	<b>configure</b> <a href="#">subscriber-mgmt sub-profile</a> <i>string</i> <a href="#">egress lag-per-link-hash</a> <a href="#">weight</a> <i>number</i>
Tree	<a href="#">weight</a>
Range	1 to 1024
Default	1
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **qos**

Synopsis	Enter the <b>qos</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt sub-profile</a> <i>string</i> <a href="#">egress</a> <a href="#">qos</a>
Tree	<a href="#">qos</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **agg-rate**

Synopsis	Enter the <b>agg-rate</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt sub-profile</a> <i>string</i> <a href="#">egress</a> <a href="#">qos</a> <a href="#">agg-rate</a>
Tree	<a href="#">agg-rate</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **adaptation-rule** *keyword*

Synopsis	Adaptation rule for operational PIR value of subscriber
Context	<b>configure</b> <a href="#">subscriber-mgmt sub-profile</a> <i>string</i> <a href="#">egress</a> <a href="#">qos</a> <a href="#">agg-rate</a> <a href="#">adaptation-rule</a> <i>keyword</i>
Tree	<a href="#">adaptation-rule</a>

Description	This command configures the adaptation rule for the PIR value of the subscriber aggregate rate. This rule determines which configured value is adapted to <b>oper-aggregate</b> based on hardware capabilities.
Options	max, min, closest
Default	closest
Introduced	21.7.R1
Platforms	7750 SR-1, 7750 SR-s

### **burst-limit** (*number* | *keyword*)

Synopsis	Burst limit of the subscriber aggregate rate
Context	<b>configure</b> <a href="#">subscriber-mgmt sub-profile</a> <i>string</i> <a href="#">egress qos agg-rate burst-limit</a> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">burst-limit</a>
Range	1 to 14000000
Units	bytes
Options	auto
Default	auto
Introduced	21.7.R1
Platforms	7750 SR-1, 7750 SR-s

### **min-resv-bw** *number*

Synopsis	Reserved minimum total rate of all egress queues
Context	<b>configure</b> <a href="#">subscriber-mgmt sub-profile</a> <i>string</i> <a href="#">egress qos agg-rate min-resv-bw</a> <i>number</i>
Tree	<a href="#">min-resv-bw</a>
Range	0 to 800000000
Units	kilobps
Default	1
Introduced	19.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **queue-frame-based-accounting** *boolean*

Synopsis	Use frame-based accounting to evaluate rate limit
----------	---

Context	<b>configure</b> <a href="#">subscriber-mgmt sub-profile string</a> <a href="#">egress qos agg-rate queue-frame-based-accounting</a> <a href="#">boolean</a>
Tree	<a href="#">queue-frame-based-accounting</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**rate number**

Synopsis	Maximum total rate of all egress queues
Context	<b>configure</b> <a href="#">subscriber-mgmt sub-profile string</a> <a href="#">egress qos agg-rate rate</a> <a href="#">number</a>
Tree	<a href="#">rate</a>
Range	1 to 800000000
Units	kilobps
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**encap-offset**

Synopsis	Enable the <b>encap-offset</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt sub-profile string</a> <a href="#">egress qos encap-offset</a>
Tree	<a href="#">encap-offset</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**type keyword**

Synopsis	Offset type
Context	<b>configure</b> <a href="#">subscriber-mgmt sub-profile string</a> <a href="#">egress qos encap-offset type</a> <a href="#">keyword</a>
Tree	<a href="#">type</a>
Options	pppoa-llc, pppoa-null, pppoeoa-llc, pppoeoa-llc-fcs, pppoeoa-llc-tagged, pppoeoa-llc-tagged-fcs, pppoeoa-null, pppoeoa-null-fcs, pppoeoa-null-tagged, pppoeoa-null-tagged-fcs, ipoa-llc, ipoa-null, ipoeoa-llc, ipoeoa-llc-fcs, ipoeoa-llc-tagged, ipoeoa-llc-tagged-fcs, ipoeoa-null, ipoeoa-null-fcs, ipoeoa-null-tagged, ipoeoa-null-tagged-fcs, pppoe, pppoe-tagged, ipoe, ipoe-tagged
Introduced	16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **hs-agg-rate** *number*

Synopsis Maximum rate for single egress HS queues  
 Context **configure** [subscriber-mgmt](#) [sub-profile](#) *string* [egress qos](#) **hs-agg-rate** *number*  
 Tree [hs-agg-rate](#)  
 Range 1 to 100000000  
 Units kilobps  
 Introduced 16.0.R1  
 Platforms 7750 SR-7/12/12e

### **hs-low-burst-max-class** *number*

Synopsis Scheduling classes to map the low burst limit threshold  
 Context **configure** [subscriber-mgmt](#) [sub-profile](#) *string* [egress qos](#) **hs-low-burst-max-class** *number*  
 Tree [hs-low-burst-max-class](#)  
 Range 1 to 6  
 Default 6  
 Introduced 16.0.R4  
 Platforms 7750 SR-7/12/12e

### **hs-min-resv-bw** *number*

Synopsis Reserved minimum total rate of all egress queues  
 Context **configure** [subscriber-mgmt](#) [sub-profile](#) *string* [egress qos](#) **hs-min-resv-bw** *number*  
 Tree [hs-min-resv-bw](#)  
 Range 0 to 100000000  
 Units kilobps  
 Default 1  
 Introduced 19.10.R1  
 Platforms 7750 SR-7/12/12e

## **policer-control-policy**

Synopsis	Enter the <b>policer-control-policy</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt sub-profile</a> <i>string</i> <a href="#">egress qos</a> <a href="#">policer-control-policy</a>
Tree	<a href="#">policer-control-policy</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## **overrides**

Synopsis	Enter the <b>overrides</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt sub-profile</a> <i>string</i> <a href="#">egress qos</a> <a href="#">policer-control-policy</a> <a href="#">overrides</a>
Tree	<a href="#">overrides</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## **root**

Synopsis	Enable the <b>root</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt sub-profile</a> <i>string</i> <a href="#">egress qos</a> <a href="#">policer-control-policy</a> <a href="#">overrides</a> <a href="#">root</a>
Tree	<a href="#">root</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## **max-rate** (*number* | *keyword*)

Synopsis	Maximum rate
Context	<b>configure</b> <a href="#">subscriber-mgmt sub-profile</a> <i>string</i> <a href="#">egress qos</a> <a href="#">policer-control-policy</a> <a href="#">overrides</a> <a href="#">root</a> <b>max-rate</b> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">max-rate</a>
Range	1 to 20000000000
Units	kilobps
Options	max
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## priority-mbs-thresholds

Synopsis	Enter the <b>priority-mbs-thresholds</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt sub-profile string</a> <a href="#">egress qos policer-control-policy overrides root priority-mbs-thresholds</a>
Tree	<a href="#">priority-mbs-thresholds</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## min-thresh-separation (*number* | *keyword*)

Synopsis	Minimum threshold separation
Context	<b>configure</b> <a href="#">subscriber-mgmt sub-profile string</a> <a href="#">egress qos policer-control-policy overrides root priority-mbs-thresholds min-thresh-separation (<i>number</i>   <i>keyword</i>)</a>
Tree	<a href="#">min-thresh-separation</a>
Range	0 to 16777216
Units	bytes
Options	auto
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## priority [*level*] *number*

Synopsis	Enter the <b>priority</b> list instance
Context	<b>configure</b> <a href="#">subscriber-mgmt sub-profile string</a> <a href="#">egress qos policer-control-policy overrides root priority-mbs-thresholds priority number</a>
Tree	<a href="#">priority</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## [*level*] *number*

Synopsis	Strict priority level
Context	<b>configure</b> <a href="#">subscriber-mgmt sub-profile string</a> <a href="#">egress qos policer-control-policy overrides root priority-mbs-thresholds priority number</a>
Tree	<a href="#">priority</a>

Range	1 to 8
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **mbs-contribution** (*number* | *keyword*)

Synopsis	MBS size
Context	<b>configure</b> <a href="#">subscriber-mgmt sub-profile</a> <i>string</i> <a href="#">egress qos policer-control-policy overrides</a> <a href="#">root priority-mbs-thresholds priority</a> <i>number</i> <b>mbs-contribution</b> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">mbs-contribution</a>
Range	0 to 16777216
Units	bytes
Options	auto
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **policy-name** *reference*

Synopsis	Policer control policy name
Context	<b>configure</b> <a href="#">subscriber-mgmt sub-profile</a> <i>string</i> <a href="#">egress qos policer-control-policy</a> <a href="#">policy-name</a> <i>reference</i>
Tree	<a href="#">policy-name</a>
Reference	<b>configure</b> <a href="#">qos policer-control-policy</a> <i>string</i>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **scheduler-policy**

Synopsis	Enter the <b>scheduler-policy</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt sub-profile</a> <i>string</i> <a href="#">egress qos scheduler-policy</a>
Tree	<a href="#">scheduler-policy</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## overrides

Synopsis	Enter the <b>overrides</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt sub-profile</a> <i>string</i> <a href="#">egress qos scheduler-policy overrides</a>
Tree	<a href="#">overrides</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## scheduler [[scheduler-name](#)] *reference*

Synopsis	Enter the <b>scheduler</b> list instance
Context	<b>configure</b> <a href="#">subscriber-mgmt sub-profile</a> <i>string</i> <a href="#">egress qos scheduler-policy overrides</a> <a href="#">scheduler</a> <i>reference</i>
Tree	<a href="#">scheduler</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## [[scheduler-name](#)] *reference*

Synopsis	Scheduler policy name
Context	<b>configure</b> <a href="#">subscriber-mgmt sub-profile</a> <i>string</i> <a href="#">egress qos scheduler-policy overrides</a> <a href="#">scheduler</a> <i>reference</i>
Tree	<a href="#">scheduler</a>
Reference	<b>configure</b> <a href="#">qos scheduler-policy</a> <i>string</i> <a href="#">tier number scheduler</a> <i>string</i>
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## rate

Synopsis	Enter the <b>rate</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt sub-profile</a> <i>string</i> <a href="#">egress qos scheduler-policy overrides</a> <a href="#">scheduler</a> <i>reference</i> <a href="#">rate</a>
Tree	<a href="#">rate</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**cir** (*number* | *keyword*)

Synopsis	CIR to override administrative CIR used by scheduler
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sub-profile</a> <i>string</i> <a href="#">egress</a> <a href="#">qos</a> <a href="#">scheduler-policy</a> <a href="#">overrides</a> <a href="#">scheduler</a> <i>reference</i> <a href="#">rate</a> <b>cir</b> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">cir</a>
Range	0 to 3200000000
Units	kilobps
Options	sum, max
Default	sum
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**pir** (*number* | *keyword*)

Synopsis	PIR to override administrative PIR used by scheduler
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sub-profile</a> <i>string</i> <a href="#">egress</a> <a href="#">qos</a> <a href="#">scheduler-policy</a> <a href="#">overrides</a> <a href="#">scheduler</a> <i>reference</i> <a href="#">rate</a> <b>pir</b> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">pir</a>
Range	1 to 3200000000
Units	kilobps
Options	max
Default	max
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**policy-name** *reference*

Synopsis	Scheduler policy name
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sub-profile</a> <i>string</i> <a href="#">egress</a> <a href="#">qos</a> <a href="#">scheduler-policy</a> <b>policy-name</b> <i>reference</i>
Tree	<a href="#">policy-name</a>
Reference	<b>configure</b> <a href="#">qos</a> <a href="#">scheduler-policy</a> <i>string</i>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**firewall-policy** *reference*

Synopsis	Firewall policy
Context	<b>configure</b> <a href="#">subscriber-mgmt sub-profile string</a> <a href="#">firewall-policy reference</a>
Tree	<a href="#">firewall-policy</a>
Reference	<b>configure</b> <a href="#">service nat firewall-policy string</a>
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**host-limits**

Synopsis	Enter the <b>host-limits</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt sub-profile string</a> <a href="#">host-limits</a>
Tree	<a href="#">host-limits</a>
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**ipv4**

Synopsis	Enter the <b>ipv4</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt sub-profile string</a> <a href="#">host-limits ipv4</a>
Tree	<a href="#">ipv4</a>
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**arp** *number*

Synopsis	Maximum number of IPv4 ARP hosts
Context	<b>configure</b> <a href="#">subscriber-mgmt sub-profile string</a> <a href="#">host-limits ipv4 arp number</a>
Tree	<a href="#">arp</a>
Description	This command configures the maximum number of IPv4 ARP hosts per subscriber instance.  The operational maximum value may be smaller due to equipped hardware dependencies.
Range	0 to 131071

Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **dhcp number**

Synopsis	Maximum number of IPv4 DHCP hosts
Context	<b>configure</b> <a href="#">subscriber-mgmt sub-profile</a> <i>string</i> <a href="#">host-limits ipv4 dhcp number</a>
Tree	<a href="#">dhcp</a>
Description	This command configures the maximum number of IPv4 DHCP hosts per subscriber instance.  The operational maximum value may be smaller due to equipped hardware dependencies.
Range	0 to 131071
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **overall number**

Synopsis	Maximum number of IPv4 hosts
Context	<b>configure</b> <a href="#">subscriber-mgmt sub-profile</a> <i>string</i> <a href="#">host-limits ipv4 overall number</a>
Tree	<a href="#">overall</a>
Description	This command configures the maximum number of IPv4 hosts per subscriber instance.  The operational maximum value may be smaller due to equipped hardware dependencies.
Range	0 to 131071
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **ppp number**

Synopsis	Maximum number of IPv4 PPP hosts
Context	<b>configure</b> <a href="#">subscriber-mgmt sub-profile</a> <i>string</i> <a href="#">host-limits ipv4 ppp number</a>
Tree	<a href="#">ppp</a>
Description	This command configures the maximum number of IPv4 PPP hosts per subscriber instance.

The operational maximum value may be smaller due to equipped hardware dependencies.

Range	0 to 131071
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## ipv6

Synopsis	Enter the <b>ipv6</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt sub-profile string</a> <a href="#">host-limits ipv6</a>
Tree	<a href="#">ipv6</a>
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## overall number

Synopsis	Maximum number of IPv6 hosts
Context	<b>configure</b> <a href="#">subscriber-mgmt sub-profile string</a> <a href="#">host-limits ipv6 overall number</a>
Tree	<a href="#">overall</a>
Description	This command configures the maximum number of IPv6 hosts per subscriber instance. The operational maximum value may be smaller due to equipped hardware dependencies.
Range	0 to 131071
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## pd-ipoe-dhcp number

Synopsis	Maximum number of IPv6 IPoE DHCP PD hosts
Context	<b>configure</b> <a href="#">subscriber-mgmt sub-profile string</a> <a href="#">host-limits ipv6 pd-ipoe-dhcp number</a>
Tree	<a href="#">pd-ipoe-dhcp</a>
Description	This command configures the maximum number of IPv6 IPoE DHCP Prefix Delegation hosts (IA-PD) per subscriber instance. The operational maximum value may be smaller due to equipped hardware dependencies.
Range	0 to 131071

Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **pd-overall** *number*

Synopsis	Maximum number of IPv6 DHCP PD hosts
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sub-profile</a> <i>string</i> <a href="#">host-limits</a> <a href="#">ipv6</a> <a href="#">pd-overall</a> <i>number</i>
Tree	<a href="#">pd-overall</a>
Description	The command configures the maximum number of IPv6 DHCP Prefix Delegation hosts (IA-PD) per subscriber instance.  The operational maximum value may be smaller due to equipped hardware dependencies.
Range	0 to 131071
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **pd-ppp-dhcp** *number*

Synopsis	Maximum number of IPv6 PPPoE DHCP PD hosts
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sub-profile</a> <i>string</i> <a href="#">host-limits</a> <a href="#">ipv6</a> <a href="#">pd-ppp-dhcp</a> <i>number</i>
Tree	<a href="#">pd-ppp-dhcp</a>
Description	This command configures the maximum number of IPv6 PPPoE DHCP Prefix Delegation hosts (IA-PD) per subscriber instance.  The operational maximum value may be smaller due to equipped hardware dependencies.
Range	0 to 131071
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **wan-ipoe-dhcp** *number*

Synopsis	Maximum number of IPv6 IPoE DHCP WAN hosts
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sub-profile</a> <i>string</i> <a href="#">host-limits</a> <a href="#">ipv6</a> <a href="#">wan-ipoe-dhcp</a> <i>number</i>
Tree	<a href="#">wan-ipoe-dhcp</a>
Description	This command configures the maximum number of IPv6 IPoE DHCP WAN hosts (IA-NA) per subscriber instance.

The operational maximum value may be smaller due to equipped hardware dependencies.

Range	0 to 131071
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **wan-ipoe-slaac** *number*

Synopsis	Maximum number of IPv6 IPoE SLAAC WAN hosts
Context	<b>configure</b> <a href="#">subscriber-mgmt sub-profile</a> <i>string</i> <a href="#">host-limits ipv6 wan-ipoe-slaac</a> <i>number</i>
Tree	<a href="#">wan-ipoe-slaac</a>
Description	This command configures the maximum number of IPv6 IPoE SLAAC WAN hosts per subscriber instance.  The operational maximum value may be smaller due to equipped hardware dependencies.
Range	0 to 131071
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **wan-overall** *number*

Synopsis	Maximum number of IPv6 WAN hosts
Context	<b>configure</b> <a href="#">subscriber-mgmt sub-profile</a> <i>string</i> <a href="#">host-limits ipv6 wan-overall</a> <i>number</i>
Tree	<a href="#">wan-overall</a>
Description	This command configures the maximum number of IPv6 WAN hosts per subscriber instance.  The operational maximum value may be smaller due to equipped hardware dependencies.
Range	0 to 131071
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **wan-ppp-dhcp** *number*

Synopsis	Maximum number of IPv6 PPPoE DHCP WAN hosts
Context	<b>configure</b> <a href="#">subscriber-mgmt sub-profile</a> <i>string</i> <a href="#">host-limits ipv6 wan-ppp-dhcp</a> <i>number</i>
Tree	<a href="#">wan-ppp-dhcp</a>

Description	This command configures the maximum number of IPv6 PPPoE DHCP WAN hosts per subscriber instance.  The operational maximum value may be smaller due to equipped hardware dependencies.
Range	0 to 131071
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **wan-ppp-slaac** *number*

Synopsis	Maximum number of IPv6 PPPoE SLAAC WAN hosts
Context	<b>configure</b> <a href="#">subscriber-mgmt sub-profile</a> <i>string</i> <a href="#">host-limits ipv6 wan-ppp-slaac</a> <i>number</i>
Tree	<a href="#">wan-ppp-slaac</a>
Description	This command configures the maximum number of IPv6 PPPoE SLAAC WAN hosts per subscriber instance.  The operational maximum value may be smaller due to equipped hardware dependencies.
Range	0 to 131071
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **lac-overall** *number*

Synopsis	Maximum number of L2TP LAC hosts
Context	<b>configure</b> <a href="#">subscriber-mgmt sub-profile</a> <i>string</i> <a href="#">host-limits lac-overall</a> <i>number</i>
Tree	<a href="#">lac-overall</a>
Description	This command configures the maximum number of L2TP LAC hosts per subscriber instance.  The operational maximum value may be smaller due to equipped hardware dependencies.
Range	0 to 131071
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **overall** *number*

Synopsis	Maximum number of subscriber hosts
----------	------------------------------------

Context	<b>configure</b> <a href="#">subscriber-mgmt sub-profile</a> <i>string</i> <a href="#">host-limits overall</a> <i>number</i>
Tree	<a href="#">overall</a>
Description	This command configures the maximum number of subscriber hosts per subscriber instance.  The operational maximum value may be smaller due to equipped hardware dependencies.
Range	1 to 131071
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **host-tracking-policy** *reference*

Synopsis	Host tracking policy
Context	<b>configure</b> <a href="#">subscriber-mgmt sub-profile</a> <i>string</i> <a href="#">host-tracking-policy</a> <i>reference</i>
Tree	<a href="#">host-tracking-policy</a>
Reference	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">host-tracking-policy</a> <i>string</i>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **hs-sla-mode** *keyword*

Synopsis	HS board subscriber SLA mode
Context	<b>configure</b> <a href="#">subscriber-mgmt sub-profile</a> <i>string</i> <a href="#">hs-sla-mode</a> <i>keyword</i>
Tree	<a href="#">hs-sla-mode</a>
Options	expanded, single
Default	expanded
Introduced	16.0.R1
Platforms	7750 SR-7/12/12e

### **igmp-policy** *reference*

Synopsis	IGMP policy
Context	<b>configure</b> <a href="#">subscriber-mgmt sub-profile</a> <i>string</i> <a href="#">igmp-policy</a> <i>reference</i>
Tree	<a href="#">igmp-policy</a>
Reference	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">igmp-policy</a> <i>string</i>

Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## ingress

Synopsis Enter the **ingress** context  
Context **configure** [subscriber-mgmt sub-profile](#) *string* [ingress](#)  
Tree [ingress](#)  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## qos

Synopsis Enter the **qos** context  
Context **configure** [subscriber-mgmt sub-profile](#) *string* [ingress](#) [qos](#)  
Tree [qos](#)  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## policer-control-policy

Synopsis Enter the **policer-control-policy** context  
Context **configure** [subscriber-mgmt sub-profile](#) *string* [ingress](#) [qos](#) [policer-control-policy](#)  
Tree [policer-control-policy](#)  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## overrides

Synopsis Enter the **overrides** context  
Context **configure** [subscriber-mgmt sub-profile](#) *string* [ingress](#) [qos](#) [policer-control-policy](#) [overrides](#)  
Tree [overrides](#)  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## root

Synopsis	Enable the <b>root</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sub-profile</a> <i>string</i> <a href="#">ingress</a> <a href="#">qos</a> <a href="#">policer-control-policy</a> <a href="#">overrides</a> <a href="#">root</a>
Tree	<a href="#">root</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## max-rate (*number* | *keyword*)

Synopsis	Maximum rate
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sub-profile</a> <i>string</i> <a href="#">ingress</a> <a href="#">qos</a> <a href="#">policer-control-policy</a> <a href="#">overrides</a> <a href="#">root</a> <a href="#">max-rate</a> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">max-rate</a>
Range	1 to 20000000000
Units	kilobps
Options	max
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## priority-mbs-thresholds

Synopsis	Enter the <b>priority-mbs-thresholds</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sub-profile</a> <i>string</i> <a href="#">ingress</a> <a href="#">qos</a> <a href="#">policer-control-policy</a> <a href="#">overrides</a> <a href="#">root</a> <a href="#">priority-mbs-thresholds</a>
Tree	<a href="#">priority-mbs-thresholds</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## min-thresh-separation (*number* | *keyword*)

Synopsis	Minimum threshold separation
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sub-profile</a> <i>string</i> <a href="#">ingress</a> <a href="#">qos</a> <a href="#">policer-control-policy</a> <a href="#">overrides</a> <a href="#">root</a> <a href="#">priority-mbs-thresholds</a> <a href="#">min-thresh-separation</a> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">min-thresh-separation</a>

Range	0 to 16777216
Units	bytes
Options	auto
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **priority** [*level*] *number*

Synopsis	Enter the <b>priority</b> list instance
Context	<b>configure</b> <a href="#">subscriber-mgmt sub-profile</a> <i>string</i> <a href="#">ingress qos policer-control-policy overrides root priority-mbs-thresholds</a> <b>priority</b> <i>number</i>
Tree	<a href="#">priority</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **[level]** *number*

Synopsis	Strict priority level
Context	<b>configure</b> <a href="#">subscriber-mgmt sub-profile</a> <i>string</i> <a href="#">ingress qos policer-control-policy overrides root priority-mbs-thresholds</a> <b>priority</b> <i>number</i>
Tree	<a href="#">priority</a>
Range	1 to 8
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **mbs-contribution** (*number* | *keyword*)

Synopsis	MBS size
Context	<b>configure</b> <a href="#">subscriber-mgmt sub-profile</a> <i>string</i> <a href="#">ingress qos policer-control-policy overrides root priority-mbs-thresholds</a> <b>priority</b> <i>number</i> <b>mbs-contribution</b> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">mbs-contribution</a>
Range	0 to 16777216
Units	bytes
Options	auto

Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **policy-name** *reference*

Synopsis Policer control policy name  
 Context **configure** [subscriber-mgmt sub-profile](#) *string* [ingress qos policer-control-policy policy-name](#) *reference*  
 Tree [policy-name](#)  
 Reference **configure** [qos policer-control-policy](#) *string*  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **scheduler-policy**

Synopsis Enter the **scheduler-policy** context  
 Context **configure** [subscriber-mgmt sub-profile](#) *string* [ingress qos scheduler-policy](#)  
 Tree [scheduler-policy](#)  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **overrides**

Synopsis Enter the **overrides** context  
 Context **configure** [subscriber-mgmt sub-profile](#) *string* [ingress qos scheduler-policy overrides](#)  
 Tree [overrides](#)  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **scheduler** [[scheduler-name](#)] *reference*

Synopsis Enter the **scheduler** list instance  
 Context **configure** [subscriber-mgmt sub-profile](#) *string* [ingress qos scheduler-policy overrides](#) [scheduler](#) *reference*  
 Tree [scheduler](#)  
 Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### [scheduler-name] *reference*

Synopsis Scheduler policy name

Context **configure** [subscriber-mgmt sub-profile string ingress qos scheduler-policy overrides scheduler reference](#)

Tree [scheduler](#)

Reference **configure** [qos scheduler-policy string tier number scheduler string](#)

Notes This element is part of a list key.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### rate

Synopsis Enter the **rate** context

Context **configure** [subscriber-mgmt sub-profile string ingress qos scheduler-policy overrides scheduler reference rate](#)

Tree [rate](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### cir (*number* | *keyword*)

Synopsis CIR to override administrative CIR used by scheduler

Context **configure** [subscriber-mgmt sub-profile string ingress qos scheduler-policy overrides scheduler reference rate cir \(number | keyword\)](#)

Tree [cir](#)

Range 0 to 3200000000

Units kilobps

Options sum, max

Default sum

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**pir** (*number* | *keyword*)

Synopsis	PIR to override administrative PIR used by scheduler
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sub-profile</a> <i>string</i> <a href="#">ingress</a> <a href="#">qos</a> <a href="#">scheduler-policy</a> <a href="#">overrides</a> <a href="#">scheduler</a> <a href="#">reference</a> <a href="#">rate</a> <b>pir</b> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">pir</a>
Range	1 to 3200000000
Units	kilobps
Options	max
Default	max
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**policy-name** *reference*

Synopsis	Scheduler policy name
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sub-profile</a> <i>string</i> <a href="#">ingress</a> <a href="#">qos</a> <a href="#">scheduler-policy</a> <a href="#">policy-name</a> <i>reference</i>
Tree	<a href="#">policy-name</a>
Reference	<b>configure</b> <a href="#">qos</a> <a href="#">scheduler-policy</a> <i>string</i>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**mld-policy** *reference*

Synopsis	MLD policy
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sub-profile</a> <i>string</i> <a href="#">mld-policy</a> <i>reference</i>
Tree	<a href="#">mld-policy</a>
Reference	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">mld-policy</a> <i>string</i>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**nat**

Synopsis	Enter the <b>nat</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sub-profile</a> <i>string</i> <b>nat</b>

Tree	<a href="#">nat</a>
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **access-mode** *keyword*

Synopsis	The subscriber NAT access mode
Context	<b>configure</b> <a href="#">subscriber-mgmt sub-profile string nat access-mode keyword</a>
Tree	<a href="#">access-mode</a>
Options	auto – Automatically derived from the access SAP's anti-spoof type bridged – Force to bridged mode
Default	auto
Introduced	19.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **allow-bypass** *boolean*

Synopsis	Allow traffic to bypass NAT
Context	<b>configure</b> <a href="#">subscriber-mgmt sub-profile string nat allow-bypass boolean</a>
Tree	<a href="#">allow-bypass</a>
Description	When configured to <b>true</b> , the system enables L2-Aware NAT subscribers for NAT bypass. When enabled, the IP filter configuration applied in the subscriber profile determines whether the traffic is bypassed.  When configured to <b>false</b> , traffic is subject to L2-Aware NAT operation.
Default	false
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **policy** *reference*

Synopsis	NAT policy associated with the subscriber profile
Context	<b>configure</b> <a href="#">subscriber-mgmt sub-profile string nat policy reference</a>
Tree	<a href="#">policy</a>
Reference	<b>configure service nat nat-policy string</b>
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **prefix-list** *reference*

Synopsis	NAT prefix list name
Context	<b>configure</b> <a href="#">subscriber-mgmt sub-profile</a> <i>string</i> <a href="#">nat prefix-list</a> <i>reference</i>
Tree	<a href="#">prefix-list</a>
Reference	<b>configure</b> <a href="#">service nat prefix-list</a> <i>string</i>
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **pim-policy** *reference*

Synopsis	Protocol Independent Multicast (PIM) policy
Context	<b>configure</b> <a href="#">subscriber-mgmt sub-profile</a> <i>string</i> <a href="#">pim-policy</a> <i>reference</i>
Tree	<a href="#">pim-policy</a>
Reference	<b>configure</b> <a href="#">subscriber-mgmt pim-policy</a> <i>string</i>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **preference** *number*

Synopsis	Relative preference value for the subscriber profile
Context	<b>configure</b> <a href="#">subscriber-mgmt sub-profile</a> <i>string</i> <a href="#">preference</a> <i>number</i>
Tree	<a href="#">preference</a>
Range	1 to 10
Default	5
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **radius-accounting**

Synopsis	Enter the <b>radius-accounting</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt sub-profile</a> <i>string</i> <a href="#">radius-accounting</a>
Tree	<a href="#">radius-accounting</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **policy reference**

Synopsis	RADIUS accounting policies
Context	<b>configure</b> <a href="#">subscriber-mgmt sub-profile</a> <i>string</i> <a href="#">radius-accounting policy reference</a>
Tree	<a href="#">policy</a>
Reference	<b>configure</b> <a href="#">subscriber-mgmt radius-accounting-policy</a> <i>string</i>
Max. Instances	5
Notes	This element is ordered by the user.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **session-optimized-stop** *boolean*

Synopsis	Optimize PPPoE session accounting stop behavior
Context	<b>configure</b> <a href="#">subscriber-mgmt sub-profile</a> <i>string</i> <a href="#">radius-accounting session-optimized-stop</a> <i>boolean</i>
Tree	<a href="#">session-optimized-stop</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **secondary-shaper-hashing** *boolean*

Synopsis	Include LAG hashing on secondary shaper
Context	<b>configure</b> <a href="#">subscriber-mgmt sub-profile</a> <i>string</i> <a href="#">secondary-shaper-hashing</a> <i>boolean</i>
Tree	<a href="#">secondary-shaper-hashing</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **session-limits**

Synopsis	Enter the <b>session-limits</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt sub-profile</a> <i>string</i> <a href="#">session-limits</a>

Tree	<a href="#">session-limits</a>
Introduced	20.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **ipoe number**

Synopsis	Maximum number of IPoE sessions
Context	<b>configure</b> <a href="#">subscriber-mgmt sub-profile string session-limits ipoe number</a>
Tree	<a href="#">ipoe</a>
Description	This command configures the maximum number of IPoE sessions per subscriber instance.
Range	0 to 131071
Introduced	20.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **l2tp**

Synopsis	Enter the <b>l2tp</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt sub-profile string session-limits l2tp</a>
Tree	<a href="#">l2tp</a>
Introduced	20.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **lns number**

Synopsis	Maximum number of L2TP LNS sessions
Context	<b>configure</b> <a href="#">subscriber-mgmt sub-profile string session-limits l2tp lns number</a>
Tree	<a href="#">l2tp lns</a>
Description	This command configures the maximum number of L2TP LNS sessions per subscriber instance.
Range	0 to 131071
Introduced	20.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**lts number**

Synopsis	Maximum number of L2TP LTS sessions
Context	<b>configure</b> <a href="#">subscriber-mgmt sub-profile</a> <i>string</i> <a href="#">session-limits l2tp lts</a> <i>number</i>
Tree	<a href="#">lts</a>
Description	This command configures the maximum number of L2TP LTS sessions per subscriber instance.
Range	0 to 131071
Introduced	20.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**overall number**

Synopsis	Maximum number of L2TP sessions
Context	<b>configure</b> <a href="#">subscriber-mgmt sub-profile</a> <i>string</i> <a href="#">session-limits l2tp overall</a> <i>number</i>
Tree	<a href="#">overall</a>
Description	This command configures the maximum number of L2TP sessions per subscriber instance.
Range	0 to 131071
Introduced	20.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**overall number**

Synopsis	Maximum number of subscriber sessions
Context	<b>configure</b> <a href="#">subscriber-mgmt sub-profile</a> <i>string</i> <a href="#">session-limits overall</a> <i>number</i>
Tree	<a href="#">overall</a>
Description	This command configures the maximum number of subscriber sessions per subscriber instance.
Range	0 to 131071
Introduced	20.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**pppoe**

Synopsis	Enter the <b>pppoe</b> context
----------	--------------------------------

Context	<b>configure</b> <a href="#">subscriber-mgmt sub-profile string session-limits pppoe</a>
Tree	<a href="#">pppoe</a>
Introduced	20.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**lac number**

Synopsis	Maximum number of PPPoE L2TP LAC sessions
Context	<b>configure</b> <a href="#">subscriber-mgmt sub-profile string session-limits pppoe lac number</a>
Tree	<a href="#">lac</a>
Description	This command configures the maximum number of PPPoE L2TP LAC sessions per subscriber instance.
Range	0 to 131071
Introduced	20.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**local number**

Synopsis	Maximum number of PPPoE local-terminated sessions
Context	<b>configure</b> <a href="#">subscriber-mgmt sub-profile string session-limits pppoe local number</a>
Tree	<a href="#">local</a>
Description	This command configures the maximum number of PPPoE local-terminated sessions (PTA) per subscriber instance.
Range	0 to 131071
Introduced	20.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**overall number**

Synopsis	Maximum number of PPPoE sessions
Context	<b>configure</b> <a href="#">subscriber-mgmt sub-profile string session-limits pppoe overall number</a>
Tree	<a href="#">overall</a>
Description	This command configures the maximum number of PPPoE sessions per subscriber instance.
Range	0 to 131071
Introduced	20.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## sla-profile-map

Synopsis Enter the **sla-profile-map** context  
 Context **configure** [subscriber-mgmt](#) [sub-profile](#) *string* [sla-profile-map](#)  
 Tree [sla-profile-map](#)  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## entry [[sla-profile-string](#)] *string*

Synopsis Enter the **entry** list instance  
 Context **configure** [subscriber-mgmt](#) [sub-profile](#) *string* [sla-profile-map](#) **entry** *string*  
 Tree [entry](#)  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## [\[sla-profile-string\]](#) *string*

Synopsis SLA profile string  
 Context **configure** [subscriber-mgmt](#) [sub-profile](#) *string* [sla-profile-map](#) **entry** *string*  
 Tree [entry](#)  
 String Length 1 to 32  
 Notes This element is part of a list key.  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## sla-profile *reference*

Synopsis SLA profile  
 Context **configure** [subscriber-mgmt](#) [sub-profile](#) *string* [sla-profile-map](#) **entry** *string* [sla-profile](#) *reference*  
 Tree [sla-profile](#)  
 Reference **configure** [subscriber-mgmt](#) [sla-profile](#) *string*

Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **use-direct-map-as-default** *boolean*

Synopsis	Allow direct mapping of SLA profile as default
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sub-profile</a> <i>string</i> <a href="#">sla-profile-map</a> <a href="#">use-direct-map-as-default</a> <i>boolean</i>
Tree	<a href="#">use-direct-map-as-default</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **sub-mcac-policy** *reference*

Synopsis	Subscriber MCAC policy
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sub-profile</a> <i>string</i> <a href="#">sub-mcac-policy</a> <i>reference</i>
Tree	<a href="#">sub-mcac-policy</a>
Reference	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sub-mcac-policy</a> <i>string</i>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s

### **upnp-policy** *reference*

Synopsis	UPnP policy for the subscriber profile
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sub-profile</a> <i>string</i> <a href="#">upnp-policy</a> <i>reference</i>
Tree	<a href="#">upnp-policy</a>
Description	This command specifies the Universal Plug 'n Play policy (UPnP) IGD service for the subscriber profile. All ESM hosts of the subscriber can use the UPnP protocol to create port mapping. This feature only supports L2-Aware NAT hosts. The UPnP parameters are defined in the referenced UPnP policy configured in the <b>configure service upnp</b> context.
Reference	<b>configure</b> <a href="#">service</a> <a href="#">upnp</a> <i>policy</i> <i>string</i>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**volume-stats-type** *keyword*

Synopsis	Include non-IP headers in the accounting statistics
Context	<b>configure</b> <a href="#">subscriber-mgmt sub-profile string</a> <a href="#">volume-stats-type</a> <i>keyword</i>
Tree	<a href="#">volume-stats-type</a>
Options	l2, ip
Default	l2
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**vport-hashing** *boolean*

Synopsis	Include LAG hashing on Vport
Context	<b>configure</b> <a href="#">subscriber-mgmt sub-profile string</a> <a href="#">vport-hashing</a> <i>boolean</i>
Tree	<a href="#">vport-hashing</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**subscriber-interface-statistics**

Synopsis	Enter the <b>subscriber-interface-statistics</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt subscriber-interface-statistics</a>
Tree	<a href="#">subscriber-interface-statistics</a>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**admin-state** *keyword*

Synopsis	Administrative state for statistics collection
Context	<b>configure</b> <a href="#">subscriber-mgmt subscriber-interface-statistics</a> <a href="#">admin-state</a> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## svlan-statistics

Synopsis Enter the **svlan-statistics** context  
Context **configure** [subscriber-mgmt svlan-statistics](#)  
Tree [svlan-statistics](#)  
Introduced 16.0.R4  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## admin-state *keyword*

Synopsis Administrative state of statistics collection  
Context **configure** [subscriber-mgmt svlan-statistics admin-state](#) *keyword*  
Tree [admin-state](#)  
Options enable, disable  
Default disable  
Introduced 16.0.R4  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## system-behavior

Synopsis Enter the **system-behavior** context  
Context **configure** [subscriber-mgmt system-behavior](#)  
Tree [system-behavior](#)  
Description Commands in this context configure the attributes of system-wide subscriber management behavior.  
Introduced 21.7.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## legacy-dns-nbns *boolean*

Synopsis Restrict authentication origins for name servers  
Context **configure** [subscriber-mgmt system-behavior legacy-dns-nbns](#) *boolean*  
Tree [legacy-dns-nbns](#)

Description	<p>When configured to <b>true</b>, this command enables legacy DNS NBNS behavior, which restricts the supported default extended authentication origins for DNS and NBNS name servers. The main differences include:</p> <ul style="list-style-type: none"> <li>• only support DHCP server as origin for DHCP relay: IPoE DHCPv4/DHCPv6 and PPPoE DHCPv6</li> <li>• Local Address Assignment (LAA) is highest priority origin: IPoE and PPPoE SLAAC DNSv6 and PPPoE DNSv4</li> <li>• no default DNS for IPoE DHCPv4 proxy</li> </ul> <p>When configured to <b>false</b>, this command reverts to the recommended default extended DNS and NBNS name server origin priorities.</p>
Default	false
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## up-resiliency

Synopsis	Enter the <b>up-resiliency</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt up-resiliency</a>
Tree	<a href="#">up-resiliency</a>
Description	Commands in this context configure the inter-UPF resiliency in a CUPS system.
Introduced	22.2.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## fate-sharing-group-template [\[name\]](#) *string*

Synopsis	Enter the <b>fate-sharing-group-template</b> list instance
Context	<b>configure</b> <a href="#">subscriber-mgmt up-resiliency fate-sharing-group-template</a> <i>string</i>
Tree	<a href="#">fate-sharing-group-template</a>
Description	Commands in this context configure resiliency parameters per FSG.
Max. Instances	256
Introduced	22.2.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## [\[name\]](#) *string*

Synopsis	FSG template ID
----------	-----------------

Context	<b>configure</b> <a href="#">subscriber-mgmt up-resiliency fate-sharing-group-template</a> <i>string</i>
Tree	<a href="#">fate-sharing-group-template</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	22.2.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">subscriber-mgmt up-resiliency fate-sharing-group-template</a> <i>string</i> <a href="#">description</a> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	22.2.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **gratuitous-arp** *keyword*

Synopsis	Granularity for sending GARP packets on switchover
Context	<b>configure</b> <a href="#">subscriber-mgmt up-resiliency fate-sharing-group-template</a> <i>string</i> <a href="#">gratuitous-arp</a> <i>keyword</i>
Tree	<a href="#">gratuitous-arp</a>
Options	one-per-outer-tag – Send a single Gratuitous ARP for all q-in-q SAPs sharing the same outer tag on any one of those SAP one-per-sap – Send a single Gratuitous ARP per SAP
Default	one-per-sap
Introduced	22.2.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **path-restoration-state** *keyword*

Synopsis	Method for managing FSGs during headless mode
Context	<b>configure</b> <a href="#">subscriber-mgmt up-resiliency fate-sharing-group-template</a> <i>string</i> <a href="#">path-restoration-state</a> <i>keyword</i>
Tree	<a href="#">path-restoration-state</a>

Description	This command configures how the BNG-UP manages the state of active FSGs, if the BNG-UP becomes headless (PFCP path is in restoration/headless). The BNG-UP can always move all active FSGs to standby, or decide whether to move them to standby based on a series of heuristic tests. If any test indicates that the BNG-UP cannot forward traffic for the FSG, or if another BNG-UP becomes active, the BNG-UP moves the FSG to standby.  This only applies to active FSGs; the BNG-UP never makes a standby FSG active without CPF intervention.
Options	standby – Always change FSG state to standby auto – Change FSG state based on a series of heuristic tests
Default	auto
Introduced	23.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## redundant-interface

Synopsis	Enter the <b>redundant-interface</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">up-resiliency</a> <a href="#">fate-sharing-group-template</a> <i>string</i> <a href="#">redundant-interface</a>
Tree	<a href="#">redundant-interface</a>
Description	Commands in this context configure downstream traffic shunting from a standby BNG-UP to an active BNG-UP. Downstream traffic that is received for standby sessions is sent over the redundant interface to the active BNG-UP. This requires the configuration of the <b>multi-chassis-shunt-id</b> in the service that receives the session traffic.
Introduced	22.2.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## name *string*

Synopsis	Redundant interface name
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">up-resiliency</a> <a href="#">fate-sharing-group-template</a> <i>string</i> <a href="#">redundant-interface</a> <i>name</i> <i>string</i>
Tree	<a href="#">name</a>
Description	This command configures the name of the redundant interface. It must exist in the service that contains the redundant interface.
String Length	1 to 32
Introduced	22.2.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**service string**

Synopsis	Service that contains the redundant interface
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">up-resiliency</a> <a href="#">fate-sharing-group-template</a> <i>string</i> <a href="#">redundant-interface</a> <b>service</b> <i>string</i>
Tree	<a href="#">service</a>
Description	This command configures the service that contains the redundant interface. It can be different from the service where the session traffic is terminated.
String Length	1 to 64
Introduced	22.2.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**uplink-forwarding-while-standby boolean**

Synopsis	Allows a standby BNG-UP to forward packets
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">up-resiliency</a> <a href="#">fate-sharing-group-template</a> <i>string</i> <a href="#">uplink-forwarding-while-standby</a> <i>boolean</i>
Tree	<a href="#">uplink-forwarding-while-standby</a>
Description	This command allows a standby BNG-UP to forward uplink traffic. To prevent the possibility of packet replication towards the network, this command should only be enabled if the access network is provisioned not to replicate unicast packets to the BNG-UP.
Default	false
Introduced	22.2.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**vrgw**

Synopsis	Enter the <b>vrgw</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <b>vrgw</b>
Tree	<a href="#">vrgw</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**brg-profile** [[brg-profile-name](#)] *string*

Synopsis	Enter the <b>brg-profile</b> list instance
----------	--

Context	<b>configure</b> <a href="#">subscriber-mgmt vrgw brg-profile</a> <i>string</i>
Tree	<a href="#">brg-profile</a>
Max. Instances	16
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **[brg-profile-name]** *string*

Synopsis	BRG profile name
Context	<b>configure</b> <a href="#">subscriber-mgmt vrgw brg-profile</a> <i>string</i>
Tree	<a href="#">brg-profile</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **connectivity-verification**

Synopsis	Enter the <b>connectivity-verification</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt vrgw brg-profile</a> <i>string</i> <a href="#">connectivity-verification</a>
Tree	<a href="#">connectivity-verification</a>
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **admin-state** *keyword*

Synopsis	Administrative state of BRG connectivity verification
Context	<b>configure</b> <a href="#">subscriber-mgmt vrgw brg-profile</a> <i>string</i> <a href="#">connectivity-verification</a> <b>admin-state</b> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	enable
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**count** *number*

Synopsis	Connection attempts before BRG is considered down
Context	<b>configure</b> <a href="#">subscriber-mgmt vrgw brg-profile</a> <i>string</i> <a href="#">connectivity-verification count</a> <i>number</i>
Tree	<a href="#">count</a>
Range	1 to 5
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**retry-time** *number*

Synopsis	Wait time before a new connectivity verification cycle
Context	<b>configure</b> <a href="#">subscriber-mgmt vrgw brg-profile</a> <i>string</i> <a href="#">connectivity-verification retry-time</a> <i>number</i>
Tree	<a href="#">retry-time</a>
Range	300 to 3600
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**timeout** *number*

Synopsis	Timeout after which a message is considered unanswered
Context	<b>configure</b> <a href="#">subscriber-mgmt vrgw brg-profile</a> <i>string</i> <a href="#">connectivity-verification timeout</a> <i>number</i>
Tree	<a href="#">timeout</a>
Range	5 to 60
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">subscriber-mgmt vrgw brg-profile</a> <i>string</i> <a href="#">description</a> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80

Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **hold-time** *number*

Synopsis	The time to hold on to a BRG after it went down
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">vrgw</a> <a href="#">brg-profile</a> <i>string</i> <b>hold-time</b> <i>number</i>
Tree	<a href="#">hold-time</a>
Range	0   30 to 2592000
Units	seconds
Default	0
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **home-pool**

Synopsis	Enter the <b>home-pool</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">vrgw</a> <a href="#">brg-profile</a> <i>string</i> <b>home-pool</b>
Tree	<a href="#">home-pool</a>
Introduced	16.0.R7
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **lease-time** *number*

Synopsis	Lease time used when allocating addresses from the pool
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">vrgw</a> <a href="#">brg-profile</a> <i>string</i> <b>home-pool</b> <b>lease-time</b> <i>number</i>
Tree	<a href="#">lease-time</a>
Range	300 to 315446399
Units	seconds
Default	21600
Introduced	16.0.R7
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**option** [*number*] (*number* | *keyword*)

Synopsis	Enter the <b>option</b> list instance
Context	<b>configure</b> <a href="#">subscriber-mgmt vrgw brg-profile</a> <i>string</i> <a href="#">home-pool option</a> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">option</a>
Introduced	16.0.R7
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**[number]** (*number* | *keyword*)

Synopsis	DHCP option to send identification strings to client
Context	<b>configure</b> <a href="#">subscriber-mgmt vrgw brg-profile</a> <i>string</i> <a href="#">home-pool option</a> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">option</a>
Range	1 to 254
Options	subnet-mask, default-router, dns-server, domain-name, netbios-name-server, netbios-node-type, lease-time, lease-renew-time, lease-rebind-time
Notes	This element is part of a list key.
Introduced	16.0.R7
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**ascii-string** *string*

Synopsis	ASCII string of the DHCP option
Context	<b>configure</b> <a href="#">subscriber-mgmt vrgw brg-profile</a> <i>string</i> <a href="#">home-pool option</a> ( <i>number</i>   <i>keyword</i> ) <a href="#">ascii-string</a> <i>string</i>
Tree	<a href="#">ascii-string</a>
String Length	1 to 127
Notes	The following elements are part of a mandatory choice: <b>ascii-string</b> , <b>duration</b> , <b>empty</b> , <b>hex-string</b> , <b>ipv4-address</b> , or <b>netbios-node-type</b> .
Introduced	16.0.R7
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**duration** *number*

Synopsis	DHCP option as time duration.
Context	<b>configure</b> <a href="#">subscriber-mgmt vrgw brg-profile</a> <i>string</i> <a href="#">home-pool option</a> ( <i>number</i>   <i>keyword</i> ) <a href="#">duration</a> <i>number</i>

Tree	<a href="#">duration</a>
Range	10 to 315446399
Units	seconds
Notes	The following elements are part of a mandatory choice: <b>ascii-string</b> , <b>duration</b> , <b>empty</b> , <b>hex-string</b> , <b>ipv4-address</b> , or <b>netbios-node-type</b> .
Introduced	16.0.R7
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## empty

Synopsis	Empty DHCP option.
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">vrgw</a> <a href="#">brg-profile</a> <i>string</i> <a href="#">home-pool</a> <i>option</i> ( <i>number</i>   <i>keyword</i> ) <a href="#">empty</a>
Tree	<a href="#">empty</a>
Notes	The following elements are part of a mandatory choice: <b>ascii-string</b> , <b>duration</b> , <b>empty</b> , <b>hex-string</b> , <b>ipv4-address</b> , or <b>netbios-node-type</b> .
Introduced	16.0.R7
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## hex-string *string*

Synopsis	DHCP option as a hexadecimal string
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">vrgw</a> <a href="#">brg-profile</a> <i>string</i> <a href="#">home-pool</a> <i>option</i> ( <i>number</i>   <i>keyword</i> ) <a href="#">hex-string</a> <i>string</i>
Tree	<a href="#">hex-string</a>
String Length	1 to 256
Notes	The following elements are part of a mandatory choice: <b>ascii-string</b> , <b>duration</b> , <b>empty</b> , <b>hex-string</b> , <b>ipv4-address</b> , or <b>netbios-node-type</b> .
Introduced	16.0.R7
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## ipv4-address *string*

Synopsis	DHCP option as a list of IPv4 addresses
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">vrgw</a> <a href="#">brg-profile</a> <i>string</i> <a href="#">home-pool</a> <i>option</i> ( <i>number</i>   <i>keyword</i> ) <a href="#">ipv4-address</a> <i>string</i>
Tree	<a href="#">ipv4-address</a>

Max. Instances	4
Notes	The following elements are part of a mandatory choice: <b>ascii-string</b> , <b>duration</b> , <b>empty</b> , <b>hex-string</b> , <b>ipv4-address</b> , or <b>netbios-node-type</b> . This element is ordered by the user.
Introduced	16.0.R7
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **netbios-node-type** *keyword*

Synopsis	DHCP option as NetBIOS node type.
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">vrgw</a> <a href="#">brg-profile</a> <i>string</i> <a href="#">home-pool</a> <a href="#">option</a> ( <i>number</i>   <i>keyword</i> ) <a href="#">netbios-node-type</a> <i>keyword</i>
Tree	<a href="#">netbios-node-type</a>
Options	b-node, p-node, m-node, h-node
Notes	The following elements are part of a mandatory choice: <b>ascii-string</b> , <b>duration</b> , <b>empty</b> , <b>hex-string</b> , <b>ipv4-address</b> , or <b>netbios-node-type</b> .
Introduced	16.0.R7
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **standby-ip-lifetime** *number*

Synopsis	The lifetime of the standby IP addresses
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">vrgw</a> <a href="#">brg-profile</a> <i>string</i> <a href="#">home-pool</a> <a href="#">standby-ip-lifetime</a> <i>number</i>
Tree	<a href="#">standby-ip-lifetime</a>
Range	300 to 315446399
Units	seconds
Default	21600
Introduced	16.0.R7
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **subnet**

Synopsis	Enter the <b>subnet</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">vrgw</a> <a href="#">brg-profile</a> <i>string</i> <a href="#">home-pool</a> <a href="#">subnet</a>

Tree	<a href="#">subnet</a>
Introduced	16.0.R7
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**end string**

Synopsis	Upper bound of the IP address range
Context	<b>configure</b> <a href="#">subscriber-mgmt vrgw brg-profile</a> <i>string</i> <a href="#">home-pool subnet end</a> <i>string</i>
Tree	<a href="#">end</a>
Default	192.168.0.254
Introduced	16.0.R7
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**prefix string**

Synopsis	Prefix and default-gateway to be used inside the home
Context	<b>configure</b> <a href="#">subscriber-mgmt vrgw brg-profile</a> <i>string</i> <a href="#">home-pool subnet prefix</a> <i>string</i>
Tree	<a href="#">prefix</a>
Default	192.168.0.1/24
Introduced	16.0.R7
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**start string**

Synopsis	Lower bound of the IP address range
Context	<b>configure</b> <a href="#">subscriber-mgmt vrgw brg-profile</a> <i>string</i> <a href="#">home-pool subnet start</a> <i>string</i>
Tree	<a href="#">start</a>
Default	192.168.0.2
Introduced	16.0.R7
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**initial-hold-time number**

Synopsis	Hold time for BRG instances created without any hosts
Context	<b>configure</b> <a href="#">subscriber-mgmt vrgw brg-profile</a> <i>string</i> <a href="#">initial-hold-time</a> <i>number</i>

Tree	<a href="#">initial-hold-time</a>
Range	0 to 900
Units	seconds
Default	300
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## radius-authentication

Synopsis	Enter the <b>radius-authentication</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt vrgw brg-profile</a> <i>string</i> <a href="#">radius-authentication</a>
Tree	<a href="#">radius-authentication</a>
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## password *string*

Synopsis	Password used for authentication
Context	<b>configure</b> <a href="#">subscriber-mgmt vrgw brg-profile</a> <i>string</i> <a href="#">radius-authentication password</a> <i>string</i>
Tree	<a href="#">password</a>
String Length	1 to 115
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## server-policy *reference*

Synopsis	Radius servers to be used for authentication
Context	<b>configure</b> <a href="#">subscriber-mgmt vrgw brg-profile</a> <i>string</i> <a href="#">radius-authentication server-policy</a> <i>reference</i>
Tree	<a href="#">server-policy</a>
Reference	<b>configure</b> <a href="#">aaa radius</a> <a href="#">server-policy</a> <i>string</i>
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**radius-proxy-server** [**router-instance**] *string name string*

Synopsis	Add a list entry for <b>radius-proxy-server</b>
Context	<b>configure</b> <b>subscriber-mgmt</b> <b>vrgw</b> <b>brg-profile</b> <i>string</i> <b>radius-proxy-server</b> <i>string name string</i>
Tree	<b>radius-proxy-server</b>
Max. Instances	4
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**[router-instance]** *string*

Synopsis	router-instance
Context	<b>configure</b> <b>subscriber-mgmt</b> <b>vrgw</b> <b>brg-profile</b> <i>string</i> <b>radius-proxy-server</b> <i>string name string</i>
Tree	<b>radius-proxy-server</b>
Notes	This element is part of a list key.
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**name** *string*

Synopsis	RADIUS proxy server name
Context	<b>configure</b> <b>subscriber-mgmt</b> <b>vrgw</b> <b>brg-profile</b> <i>string</i> <b>radius-proxy-server</b> <i>string name string</i>
Tree	<b>radius-proxy-server</b>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**sla-profile-string** *string*

Synopsis	Default for SLA-profile lookup
Context	<b>configure</b> <b>subscriber-mgmt</b> <b>vrgw</b> <b>brg-profile</b> <i>string</i> <b>sla-profile-string</b> <i>string</i>
Tree	<b>sla-profile-string</b>

String Length 0 to 32  
 Introduced 16.0.R4  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **sub-profile-string** *string*

Synopsis Default for subscriber-profile lookup  
 Context **configure** [subscriber-mgmt](#) [vrgw](#) [brg-profile](#) *string* **sub-profile-string** *string*  
 Tree [sub-profile-string](#)  
 String Length 0 to 32  
 Introduced 16.0.R4  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **uplink-initial-wait** *number*

Synopsis Wait time for non-routed uplink to become operational  
 Context **configure** [subscriber-mgmt](#) [vrgw](#) [brg-profile](#) *string* **uplink-initial-wait** *number*  
 Tree [uplink-initial-wait](#)  
 Range 10 to 300  
 Units seconds  
 Default 30  
 Introduced 16.0.R4  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **lanext**

Synopsis Enter the **lanext** context  
 Context **configure** [subscriber-mgmt](#) [vrgw](#) **lanext**  
 Tree [lanext](#)  
 Introduced 16.0.R1  
 Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **router-target-as-number** *number*

Synopsis AS number to derive RT and RD for the HLE service

---

Context	<b>configure</b> <a href="#">subscriber-mgmt vrgw lanext router-target-as-number</a> <i>number</i>
Tree	<a href="#">router-target-as-number</a>
Range	1 to 65535
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

## wlan-gw

Synopsis	Enter the <b>wlan-gw</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt wlan-gw</a>
Tree	<a href="#">wlan-gw</a>
Introduced	16.0.R4
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

## queries

Synopsis	Enter the <b>queries</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt wlan-gw queries</a>
Tree	<a href="#">queries</a>
Introduced	19.5.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

## tunnel [[name](#)] *string*

Synopsis	Enter the <b>tunnel</b> list instance
Context	<b>configure</b> <a href="#">subscriber-mgmt wlan-gw queries tunnel</a> <i>string</i>
Tree	<a href="#">tunnel</a>
Max. Instances	1024
Introduced	19.5.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

## [[name](#)] *string*

Synopsis	Tunnel query name
Context	<b>configure</b> <a href="#">subscriber-mgmt wlan-gw queries tunnel</a> <i>string</i>

---

Tree	<a href="#">tunnel</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	19.5.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **access-point-mac-address-learning-status** *keyword*

Synopsis	Matching criteria of tunnels based on learning status
Context	<b>configure</b> <a href="#">subscriber-mgmt wlan-gw queries tunnel</a> <i>string</i> <a href="#">access-point-mac-address-learning-status</a> <i>keyword</i>
Tree	<a href="#">access-point-mac-address-learning-status</a>
Options	failed, succeeded
Introduced	19.5.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **calculate-counts** *boolean*

Synopsis	Count the number of tunnels matching the criteria
Context	<b>configure</b> <a href="#">subscriber-mgmt wlan-gw queries tunnel</a> <i>string</i> <a href="#">calculate-counts</a> <i>boolean</i>
Tree	<a href="#">calculate-counts</a>
Default	false
Introduced	19.5.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **encapsulation**

Synopsis	Enable the <b>encapsulation</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt wlan-gw queries tunnel</a> <i>string</i> <a href="#">encapsulation</a>
Tree	<a href="#">encapsulation</a>
Introduced	19.5.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **gre boolean**

Synopsis	Controls whether the query returns Soft GRE tunnels
Context	<b>configure</b> <a href="#">subscriber-mgmt wlan-gw queries tunnel</a> <i>string encapsulation gre boolean</i>
Tree	<a href="#">gre</a>
Default	true
Introduced	19.5.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **I2 boolean**

Synopsis	Enable matching on Layer 2 tunnels
Context	<b>configure</b> <a href="#">subscriber-mgmt wlan-gw queries tunnel</a> <i>string encapsulation I2 boolean</i>
Tree	<a href="#">I2</a>
Default	true
Introduced	19.5.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **I2tp boolean**

Synopsis	Controls whether the query returns Soft L2TPv3 tunnels
Context	<b>configure</b> <a href="#">subscriber-mgmt wlan-gw queries tunnel</a> <i>string encapsulation I2tp boolean</i>
Tree	<a href="#">I2tp</a>
Default	true
Introduced	19.5.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **vxlan boolean**

Synopsis	Controls whether the query returns VXLAN tunnels
Context	<b>configure</b> <a href="#">subscriber-mgmt wlan-gw queries tunnel</a> <i>string encapsulation vxlan boolean</i>
Tree	<a href="#">vxlan</a>
Default	true
Introduced	19.5.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

## I2

Synopsis	Enter the <b>I2</b> context
Context	<b>configure subscriber-mgmt wlan-gw queries tunnel</b> <i>string I2</i>
Tree	<a href="#">I2</a>
Introduced	19.5.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **inner-vlan** *number*

Synopsis	Value to match the Layer 2 access point of the tunnel
Context	<b>configure subscriber-mgmt wlan-gw queries tunnel</b> <i>string I2 inner-vlan number</i>
Tree	<a href="#">inner-vlan</a>
Range	0 to 4095
Introduced	19.5.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **outer-vlan** *number*

Synopsis	Layer 2 access point matching with a specified S-VLAN
Context	<b>configure subscriber-mgmt wlan-gw queries tunnel</b> <i>string I2 outer-vlan number</i>
Tree	<a href="#">outer-vlan</a>
Range	0 to 4095
Introduced	19.5.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **sap** *string*

Synopsis	Value to match the L2-AP Access Point of the tunnel
Context	<b>configure subscriber-mgmt wlan-gw queries tunnel</b> <i>string I2 sap string</i>
Tree	<a href="#">sap</a>
String Length	1 to 45
Introduced	19.5.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

## I3

Synopsis	Enter the <b>I3</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt wlan-gw queries tunnel</a> <i>string</i> <b>I3</b>
Tree	<a href="#">I3</a>
Introduced	19.5.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **address-type** *keyword*

Synopsis	Address type to match
Context	<b>configure</b> <a href="#">subscriber-mgmt wlan-gw queries tunnel</a> <i>string</i> <b>I3</b> <b>address-type</b> <i>keyword</i>
Tree	<a href="#">address-type</a>
Options	ipv4, ipv6
Introduced	19.5.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **local-address** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	IP address as local endpoint to match
Context	<b>configure</b> <a href="#">subscriber-mgmt wlan-gw queries tunnel</a> <i>string</i> <b>I3</b> <b>local-address</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	<a href="#">local-address</a>
Introduced	19.5.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **remote-address** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	IP address as remote endpoint to match
Context	<b>configure</b> <a href="#">subscriber-mgmt wlan-gw queries tunnel</a> <i>string</i> <b>I3</b> <b>remote-address</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	<a href="#">remote-address</a>
Introduced	19.5.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**router-instance** *string*

Synopsis	Router instance to match
Context	<b>configure</b> <a href="#">subscriber-mgmt wlan-gw queries tunnel</a> <i>string</i> <a href="#">l3</a> <b>router-instance</b> <i>string</i>
Tree	<a href="#">router-instance</a>
Introduced	19.5.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**ues**

Synopsis	Enter the <b>ues</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt wlan-gw queries tunnel</a> <i>string</i> <b>ues</b>
Tree	<a href="#">ues</a>
Description	Commands in this context filter tunnels based on the properties of UEs that are currently active on the tunnel.
Introduced	19.5.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**maximum** *number*

Synopsis	Maximum number of UEs
Context	<b>configure</b> <a href="#">subscriber-mgmt wlan-gw queries tunnel</a> <i>string</i> <a href="#">ues</a> <b>maximum</b> <i>number</i>
Tree	<a href="#">maximum</a>
Max. Range	0 to 4294967295
Introduced	19.5.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**minimum** *number*

Synopsis	Minimum number of UEs
Context	<b>configure</b> <a href="#">subscriber-mgmt wlan-gw queries tunnel</a> <i>string</i> <a href="#">ues</a> <b>minimum</b> <i>number</i>
Tree	<a href="#">minimum</a>
Max. Range	0 to 4294967295
Default	1
Introduced	19.5.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

## state

Synopsis	Enable the <b>state</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt wlan-gw queries tunnel</a> <i>string ues state</i>
Tree	<a href="#">state</a>
Introduced	19.5.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

## cross-connect *boolean*

Synopsis	Match on tunnels with cross-connect UEs
Context	<b>configure</b> <a href="#">subscriber-mgmt wlan-gw queries tunnel</a> <i>string ues state cross-connect</i> <i>boolean</i>
Tree	<a href="#">cross-connect</a>
Default	true
Introduced	19.5.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

## dsm *boolean*

Synopsis	Match on DSM UEs
Context	<b>configure</b> <a href="#">subscriber-mgmt wlan-gw queries tunnel</a> <i>string ues state dsm</i> <i>boolean</i>
Tree	<a href="#">dsm</a>
Default	true
Introduced	19.5.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

## esm *boolean*

Synopsis	Match on ESM UEs
Context	<b>configure</b> <a href="#">subscriber-mgmt wlan-gw queries tunnel</a> <i>string ues state esm</i> <i>boolean</i>
Tree	<a href="#">esm</a>
Default	true
Introduced	19.5.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**l2 boolean**

Synopsis	Match on tunnels with L2W UEs
Context	<b>configure</b> <a href="#">subscriber-mgmt wlan-gw queries tunnel</a> <i>string ues state l2 boolean</i>
Tree	<a href="#">l2</a>
Default	true
Introduced	19.5.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**migrant boolean**

Synopsis	Match on tunnels with migrant UEs
Context	<b>configure</b> <a href="#">subscriber-mgmt wlan-gw queries tunnel</a> <i>string ues state migrant boolean</i>
Tree	<a href="#">migrant</a>
Default	true
Introduced	19.5.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**ue [name] string**

Synopsis	Enter the <b>ue</b> list instance
Context	<b>configure</b> <a href="#">subscriber-mgmt wlan-gw queries ue</a> <i>string</i>
Tree	<a href="#">ue</a>
Description	Commands in this context query for WLAN Gateway UEs where the filter criteria over WLAN-GW UEs are defined. The query can be used to retrieve the state of the UEs matching the configured criteria.
Max. Instances	1024
Introduced	19.5.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**[name] string**

Synopsis	UE query name
Context	<b>configure</b> <a href="#">subscriber-mgmt wlan-gw queries ue</a> <i>string</i>
Tree	<a href="#">ue</a>

String Length	1 to 32
Notes	This element is part of a list key.
Introduced	19.5.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

## address

Synopsis	Enter the <b>address</b> context
Context	<b>configure subscriber-mgmt wlan-gw queries ue</b> <i>string</i> <b>address</b>
Tree	<b>address</b>
Introduced	19.5.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

## dhcp6-na *string*

Synopsis	DHCPv6 IA-NA address to match for UEs
Context	<b>configure subscriber-mgmt wlan-gw queries ue</b> <i>string</i> <b>address dhcp6-na</b> <i>string</i>
Tree	<b>dhcp6-na</b>
Introduced	19.5.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

## ipv4 *string*

Synopsis	IPv4 address to match for UEs
Context	<b>configure subscriber-mgmt wlan-gw queries ue</b> <i>string</i> <b>address ipv4</b> <i>string</i>
Tree	<b>ipv4</b>
Introduced	19.5.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

## slaac *string*

Synopsis	SLAAC prefix to match for UEs
Context	<b>configure subscriber-mgmt wlan-gw queries ue</b> <i>string</i> <b>address slaac</b> <i>string</i>
Tree	<b>slaac</b>
Introduced	19.5.R1

Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **type** *keyword*

Synopsis Address type to match for UEs

Context **configure** [subscriber-mgmt wlan-gw queries ue](#) *string address type keyword*

Tree [type](#)

Options  
 ipv4 – Any IPv4 address  
 ipv6 – Any IPv6 address  
 ipv4-only – IPv4 address only  
 ipv6-only – IPv6 address only  
 ipv4v6 – IPv4 and IPv6 address

Introduced 19.5.R1

Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **bridge-domain** *number*

Synopsis Bridge Domain to match for UEs

Context **configure** [subscriber-mgmt wlan-gw queries ue](#) *string bridge-domain number*

Tree [bridge-domain](#)

Range 0 to 4294967294

Introduced 19.5.R1

Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **connection-state**

Synopsis Enable the **connection-state** context

Context **configure** [subscriber-mgmt wlan-gw queries ue](#) *string connection-state*

Tree [connection-state](#)

Introduced 19.5.R1

Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **already-signed-in** *boolean*

Synopsis Enable matching on UEs that are already signed in

Context **configure** [subscriber-mgmt wlan-gw queries ue](#) *string connection-state already-signed-in boolean*

---

Tree	<a href="#">already-signed-in</a>
Default	true
Introduced	19.5.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **authorized-only** *boolean*

Synopsis	Enable matching on UEs in an authorized state
Context	<b>configure</b> <a href="#">subscriber-mgmt wlan-gw queries ue</a> <i>string</i> <a href="#">connection-state authorized-only</a> <i>boolean</i>
Tree	<a href="#">authorized-only</a>
Default	true
Introduced	19.5.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **cross-connect** *boolean*

Synopsis	Enable matching on cross-connected UEs
Context	<b>configure</b> <a href="#">subscriber-mgmt wlan-gw queries ue</a> <i>string</i> <a href="#">connection-state cross-connect</a> <i>boolean</i>
Tree	<a href="#">cross-connect</a>
Default	true
Introduced	19.5.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **data-triggered** *boolean*

Synopsis	Enable matching on UEs in a data-triggered state
Context	<b>configure</b> <a href="#">subscriber-mgmt wlan-gw queries ue</a> <i>string</i> <a href="#">connection-state data-triggered</a> <i>boolean</i>
Tree	<a href="#">data-triggered</a>
Default	true
Introduced	19.5.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**delete-pending** *boolean*

Synopsis	Enable matching on UEs in a delete-pending state
Context	<b>configure</b> <a href="#">subscriber-mgmt wlan-gw queries ue</a> <i>string</i> <a href="#">connection-state delete-pending</a> <i>boolean</i>
Tree	<a href="#">delete-pending</a>
Default	true
Introduced	19.5.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**dhcp-triggered** *boolean*

Synopsis	Enable matching on UEs in DHCP-triggered state
Context	<b>configure</b> <a href="#">subscriber-mgmt wlan-gw queries ue</a> <i>string</i> <a href="#">connection-state dhcp-triggered</a> <i>boolean</i>
Tree	<a href="#">dhcp-triggered</a>
Default	true
Introduced	19.5.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**dsm** *boolean*

Synopsis	Controls whether the query returns UEs in DSM state
Context	<b>configure</b> <a href="#">subscriber-mgmt wlan-gw queries ue</a> <i>string</i> <a href="#">connection-state dsm</a> <i>boolean</i>
Tree	<a href="#">dsm</a>
Default	true
Introduced	19.5.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**esm** *boolean*

Synopsis	Controls whether the query returns UEs in ESM state
Context	<b>configure</b> <a href="#">subscriber-mgmt wlan-gw queries ue</a> <i>string</i> <a href="#">connection-state esm</a> <i>boolean</i>
Tree	<a href="#">esm</a>
Default	true
Introduced	19.5.R1

Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **gtp-authorized** *boolean*

Synopsis Enable matching on UEs in GTP-authorized state

Context **configure** [subscriber-mgmt wlan-gw queries ue](#) *string* [connection-state gtp-authorized](#) *boolean*

Tree [gtp-authorized](#)

Default true

Introduced 19.5.R1

Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **ip-assigned** *boolean*

Synopsis Match on UEs in an IP-assigned state

Context **configure** [subscriber-mgmt wlan-gw queries ue](#) *string* [connection-state ip-assigned](#) *boolean*

Tree [ip-assigned](#)

Default true

Introduced 19.5.R1

Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **ip-assigned-authorized** *boolean*

Synopsis Match on UEs in an IP-assigned and authorized state

Context **configure** [subscriber-mgmt wlan-gw queries ue](#) *string* [connection-state ip-assigned-authorized](#) *boolean*

Tree [ip-assigned-authorized](#)

Default true

Introduced 19.5.R1

Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **I2** *boolean*

Synopsis Match on Layer-2 wholesale state for UEs

Context **configure** [subscriber-mgmt wlan-gw queries ue](#) *string* [connection-state I2](#) *boolean*

Tree	<a href="#">l2</a>
Default	true
Introduced	19.5.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **portal** *boolean*

Synopsis	Controls whether the query returns UEs in portal state
Context	<b>configure</b> <a href="#">subscriber-mgmt wlan-gw queries ue</a> <i>string</i> <a href="#">connection-state portal</a> <i>boolean</i>
Tree	<a href="#">portal</a>
Default	true
Introduced	19.5.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **mac-address** *string*

Synopsis	MAC address to use for matching on UEs
Context	<b>configure</b> <a href="#">subscriber-mgmt wlan-gw queries ue</a> <i>string</i> <a href="#">mac-address</a> <i>string</i>
Tree	<a href="#">mac-address</a>
Introduced	19.5.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **soft-quota-exhausted** *boolean*

Synopsis	Send interim update message when the quota is reached
Context	<b>configure</b> <a href="#">subscriber-mgmt wlan-gw queries ue</a> <i>string</i> <a href="#">soft-quota-exhausted</a> <i>boolean</i>
Tree	<a href="#">soft-quota-exhausted</a>
Default	false
Introduced	21.7.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **tunnel**

Synopsis	Enter the <b>tunnel</b> context
Context	<b>configure</b> <a href="#">subscriber-mgmt wlan-gw queries ue</a> <i>string</i> <a href="#">tunnel</a>

Tree	<a href="#">tunnel</a>
Introduced	19.5.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **encapsulation** *keyword*

Synopsis	Tunnel type to match for active UEs
Context	<b>configure</b> <a href="#">subscriber-mgmt wlan-gw queries ue</a> <i>string</i> <a href="#">tunnel encapsulation</a> <i>keyword</i>
Tree	<a href="#">encapsulation</a>
Options	gre, l2tp, l2, vxlan
Introduced	19.5.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **local-address** (*ipv4-address-no-zone | ipv6-address-no-zone*)

Synopsis	IP address as local tunnel endpoint to match for UEs
Context	<b>configure</b> <a href="#">subscriber-mgmt wlan-gw queries ue</a> <i>string</i> <a href="#">tunnel local-address</a> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> )
Tree	<a href="#">local-address</a>
Introduced	19.5.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **remote-address** (*ipv4-address-no-zone | ipv6-address-no-zone*)

Synopsis	IP address as remote tunnel endpoint to match for UEs
Context	<b>configure</b> <a href="#">subscriber-mgmt wlan-gw queries ue</a> <i>string</i> <a href="#">tunnel remote-address</a> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> )
Tree	<a href="#">remote-address</a>
Introduced	19.5.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **router-instance** *string*

Synopsis	Router instance of tunnels to match for UEs
Context	<b>configure</b> <a href="#">subscriber-mgmt wlan-gw queries ue</a> <i>string</i> <a href="#">tunnel router-instance</a> <i>string</i>
Tree	<a href="#">router-instance</a>

Introduced	19.5.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **vlan number**

Synopsis	VLAN tag within the tunnel to match for UEs
Context	<b>configure subscriber-mgmt wlan-gw queries ue</b> <i>string</i> <b>vlan number</b>
Tree	<b>vlan</b>
Range	0 to 4095
Introduced	19.5.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **wlan-gw-group**

Synopsis	Enable the <b>wlan-gw-group</b> context
Context	<b>configure subscriber-mgmt wlan-gw queries ue</b> <i>string</i> <b>wlan-gw-group</b>
Tree	<b>wlan-gw-group</b>
Introduced	19.5.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **id number**

Synopsis	WLAN-GW ISA group ID
Context	<b>configure subscriber-mgmt wlan-gw queries ue</b> <i>string</i> <b>wlan-gw-group id number</b>
Tree	<b>id</b>
Range	1 to 4
Notes	This element is mandatory.
Introduced	19.5.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **member number**

Synopsis	The member of the WLAN-GW ISA group
Context	<b>configure subscriber-mgmt wlan-gw queries ue</b> <i>string</i> <b>wlan-gw-group member number</b>
Tree	<b>member</b>

---

Range	1 to 1024
Introduced	19.5.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**virtual-chassis-identifier** *string*

Synopsis	WLAN Gateway virtual chassis ID or dual homing key
Context	<b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">wlan-gw</a> <a href="#">virtual-chassis-identifier</a> <i>string</i>
Tree	<a href="#">virtual-chassis-identifier</a>
String Length	1 to 16
Introduced	16.0.R4
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

## 3.46 system commands

```

configure

### 3.46.1 system command descriptions

#### system

Synopsis	Enter the <b>system</b> context
Context	<b>configure system</b>
Tree	<a href="#">system</a>
Description	Commands in this context enable configuring of general system level functions and router management protocols.
Introduced	16.0.R1
Platforms	All

#### alarm-contact-in-power *boolean*

Synopsis	Power the output pin on the CPM alarm interface port
Context	<b>configure system alarm-contact-in-power <i>boolean</i></b>
Tree	<a href="#">alarm-contact-in-power</a>
Default	false
Introduced	16.0.R1
Platforms	7750 SR-a

#### alarm-contact-input [[input-pin-number](#)] *number*

Synopsis	Enter the <b>alarm-contact-input</b> list instance
Context	<b>configure system alarm-contact-input <i>number</i></b>
Tree	<a href="#">alarm-contact-input</a>
Introduced	16.0.R1
Platforms	7750 SR-a

#### [[input-pin-number](#)] *number*

Synopsis	Alarm contact input pin
Context	<b>configure system alarm-contact-input <i>number</i></b>
Tree	<a href="#">alarm-contact-input</a>
Range	1 to 4

Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7750 SR-a

### **admin-state** *keyword*

Synopsis	Administrative state of the alarm contact input
Context	<b>configure</b> <a href="#">system</a> <a href="#">alarm-contact-input</a> <i>number</i> <a href="#">admin-state</a> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	16.0.R1
Platforms	7750 SR-a

### **clear-message** *string*

Synopsis	Text message sent in the log event when an alarm clears
Context	<b>configure</b> <a href="#">system</a> <a href="#">alarm-contact-input</a> <i>number</i> <a href="#">clear-message</a> <i>string</i>
Tree	<a href="#">clear-message</a>
Description	<p>This command configures a text message to be included in the log event that is sent when the system clears an alarm.</p> <p>The system generates the default "Alarm Input Cleared" message if no message is configured. The <b>clear-message</b> string is included in the log event when the pin changes to the normal state.</p>
String Length	1 to 80
Default	Alarm Input Cleared
Introduced	16.0.R1
Platforms	7750 SR-a

### **description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">system</a> <a href="#">alarm-contact-input</a> <i>number</i> <a href="#">description</a> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 160
Introduced	16.0.R1

Platforms 7750 SR-a

### **normal-state** *keyword*

Synopsis Normal state associated with the alarm contact input

Context **configure** [system](#) [alarm-contact-input](#) *number* [normal-state](#) *keyword*

Tree [normal-state](#)

Options open, closed

Default open

Introduced 16.0.R1

Platforms 7750 SR-a

### **trigger-message** *string*

Synopsis Text message sent in the log event when input changes

Context **configure** [system](#) [alarm-contact-input](#) *number* [trigger-message](#) *string*

Tree [trigger-message](#)

Description This command configures a text message to be included in the log event that is sent when the system generates an alarm.

The system generates the default message "Alarm Input Triggered" if no message is configured. This command's message string is included in the log event when the pin changes from the normal state.

String Length 1 to 80

Default Alarm Input Triggered

Introduced 16.0.R1

Platforms 7750 SR-a

### **alarms**

Synopsis Enter the **alarms** context

Context **configure** [system](#) [alarms](#)

Tree [alarms](#)

Introduced 16.0.R4

Platforms All

**admin-state** *keyword*

Synopsis	Administrative state of the system alarm
Context	<b>configure</b> <a href="#">system</a> <a href="#">alarms</a> <b>admin-state</b> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	enable
Introduced	16.0.R4
Platforms	All

**max-cleared** *number*

Synopsis	Maximum number of cleared alarms
Context	<b>configure</b> <a href="#">system</a> <a href="#">alarms</a> <b>max-cleared</b> <i>number</i>
Tree	<a href="#">max-cleared</a>
Range	0 to 500
Default	500
Introduced	16.0.R4
Platforms	All

**allow-boot-license-violations** *boolean*

Synopsis	Allow boot license violations in boot-up configuration
Context	<b>configure</b> <a href="#">system</a> <b>allow-boot-license-violations</b> <i>boolean</i>
Tree	<a href="#">allow-boot-license-violations</a>
Default	true
Introduced	16.0.R4
Platforms	All

**bluetooth**

Synopsis	Enter the <b>bluetooth</b> context
Context	<b>configure</b> <a href="#">system</a> <b>bluetooth</b>
Tree	<a href="#">bluetooth</a>
Introduced	16.0.R1
Platforms	7750 SR-1, 7750 SR-s, 7950 XRS-20e

**admin-state** *keyword*

Synopsis	Administrative state of the Bluetooth module
Context	<b>configure</b> <a href="#">system</a> <a href="#">bluetooth</a> <b>admin-state</b> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	20.2.R1
Platforms	7750 SR-1, 7750 SR-s, 7950 XRS-20e

**advertising-timeout** *number*

Synopsis	Bluetooth advertising timeout
Context	<b>configure</b> <a href="#">system</a> <a href="#">bluetooth</a> <b>advertising-timeout</b> <i>number</i>
Tree	<a href="#">advertising-timeout</a>
Range	30 to 3600
Units	seconds
Introduced	16.0.R1
Platforms	7750 SR-1, 7750 SR-s, 7950 XRS-20e

**device** [[mac-address](#)] *string*

Synopsis	Enter the <b>device</b> list instance
Context	<b>configure</b> <a href="#">system</a> <a href="#">bluetooth</a> <b>device</b> <i>string</i>
Tree	<a href="#">device</a>
Max. Instances	5
Introduced	16.0.R1
Platforms	7750 SR-1, 7750 SR-s, 7950 XRS-20e

**[mac-address]** *string*

Synopsis	Bluetooth client device MAC address
Context	<b>configure</b> <a href="#">system</a> <a href="#">bluetooth</a> <b>device</b> <i>string</i>
Tree	<a href="#">device</a>

Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7750 SR-1, 7750 SR-s, 7950 XRS-20e

### **description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">system</a> <a href="#">bluetooth</a> <a href="#">device</a> <i>string</i> <a href="#">description</a> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R1
Platforms	7750 SR-1, 7750 SR-s, 7950 XRS-20e

### **module** [[cpm-slot](#)] *string*

Synopsis	Enter the <b>module</b> list instance
Context	<b>configure</b> <a href="#">system</a> <a href="#">bluetooth</a> <a href="#">module</a> <i>string</i>
Tree	<a href="#">module</a>
Introduced	16.0.R1
Platforms	7750 SR-1, 7750 SR-s, 7950 XRS-20e

### **[cpm-slot]** *string*

Synopsis	CPM slot on which the module resides
Context	<b>configure</b> <a href="#">system</a> <a href="#">bluetooth</a> <a href="#">module</a> <i>string</i>
Tree	<a href="#">module</a>
String Length	1
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7750 SR-1, 7750 SR-s, 7950 XRS-20e

### **provisioned-identifier** *string*

Synopsis	Bluetooth module ID
Context	<b>configure</b> <a href="#">system</a> <a href="#">bluetooth</a> <a href="#">module</a> <i>string</i> <a href="#">provisioned-identifier</a> <i>string</i>

---

Tree	<a href="#">provisioned-identifier</a>
String Length	1 to 32
Introduced	16.0.R1
Platforms	7750 SR-1, 7750 SR-s, 7950 XRS-20e

### **pairing-button** *boolean*

Synopsis	Enable the pairing button
Context	<b>configure</b> <a href="#">system bluetooth pairing-button</a> <i>boolean</i>
Tree	<a href="#">pairing-button</a>
Default	false
Introduced	16.0.R1
Platforms	7750 SR-1, 7750 SR-s, 7950 XRS-20e

### **passkey** *string*

Synopsis	Bluetooth passkey
Context	<b>configure</b> <a href="#">system bluetooth passkey</a> <i>string</i>
Tree	<a href="#">passkey</a>
String Length	6
Default	123456
Introduced	16.0.R1
Platforms	7750 SR-1, 7750 SR-s, 7950 XRS-20e

### **power-mode** *keyword*

Synopsis	Bluetooth module power mode
Context	<b>configure</b> <a href="#">system bluetooth power-mode</a> <i>keyword</i>
Tree	<a href="#">power-mode</a>
Options	manual, automatic
Default	automatic
Introduced	20.2.R1
Platforms	7750 SR-1, 7750 SR-s, 7950 XRS-20e

### **boot-bad-exec** *string*

Synopsis	CLI script file to execute following a failed boot-up
Context	<b>configure</b> <a href="#">system</a> <a href="#">boot-bad-exec</a> <i>string</i>
Tree	<a href="#">boot-bad-exec</a>
Description	This command configures the name of the CLI script file to be run following the failure of a boot-up configuration. <b>Note:</b> This command has no effect in model-driven mode.
String Length	1 to 180
Introduced	16.0.R1
Platforms	All

### **boot-good-exec** *string*

Synopsis	CLI script file to execute following successful boot-up
Context	<b>configure</b> <a href="#">system</a> <a href="#">boot-good-exec</a> <i>string</i>
Tree	<a href="#">boot-good-exec</a>
String Length	1 to 180
Introduced	16.0.R1
Platforms	All

### **central-frequency-clock**

Synopsis	Enter the <b>central-frequency-clock</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">central-frequency-clock</a>
Tree	<a href="#">central-frequency-clock</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **bits**

Synopsis	Enter the <b>bits</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">central-frequency-clock</a> <a href="#">bits</a>
Tree	<a href="#">bits</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## input

Synopsis	Enter the <b>input</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">central-frequency-clock</a> <a href="#">bits</a> <a href="#">input</a>
Tree	<a href="#">input</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## admin-state *keyword*

Synopsis	Administrative state of the BITS input timing reference
Context	<b>configure</b> <a href="#">system</a> <a href="#">central-frequency-clock</a> <a href="#">bits</a> <a href="#">input</a> <a href="#">admin-state</a> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## interface-type *keyword*

Synopsis	Interface type of the BITS timing reference
Context	<b>configure</b> <a href="#">system</a> <a href="#">central-frequency-clock</a> <a href="#">bits</a> <a href="#">interface-type</a> <i>keyword</i>
Tree	<a href="#">interface-type</a>
Options	ds1-esf, ds1-sf, e1-pcm30crc, e1-pcm31crc, g703-2048khz
Default	ds1-esf
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## output

Synopsis	Enter the <b>output</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">central-frequency-clock</a> <a href="#">bits</a> <a href="#">output</a>
Tree	<a href="#">output</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**admin-state** *keyword*

Synopsis	Administrative state of BITS output timing reference
Context	<b>configure</b> <a href="#">system</a> <a href="#">central-frequency-clock</a> <a href="#">bits</a> <a href="#">output</a> <a href="#">admin-state</a> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**line-length** *keyword*

Synopsis	Line length for the BITS output timing reference
Context	<b>configure</b> <a href="#">system</a> <a href="#">central-frequency-clock</a> <a href="#">bits</a> <a href="#">output</a> <a href="#">line-length</a> <i>keyword</i>
Tree	<a href="#">line-length</a>
Options	length-not-applicable, 110, 220, 330, 440, 550, 660
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**ql-minimum** *keyword*

Synopsis	Minimum signal quality level for BITSout port
Context	<b>configure</b> <a href="#">system</a> <a href="#">central-frequency-clock</a> <a href="#">bits</a> <a href="#">output</a> <a href="#">ql-minimum</a> <i>keyword</i>
Tree	<a href="#">ql-minimum</a>
Options	unused, prs, stu, st2, tnc, st3e, st3, prc, ssua, ssub, sec, eec1, eec2
Default	unused
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**source** *keyword*

Synopsis	Source of the BITS output timing reference
Context	<b>configure</b> <a href="#">system</a> <a href="#">central-frequency-clock</a> <a href="#">bits</a> <a href="#">output</a> <a href="#">source</a> <i>keyword</i>
Tree	<a href="#">source</a>
Options	line-ref, internal-clock
Default	line-ref

Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **squelch** *boolean*

Synopsis	Squelch the signal of the BITS output timing reference
Context	<b>configure</b> <a href="#">system</a> <a href="#">central-frequency-clock</a> <a href="#">bits</a> <a href="#">output</a> <a href="#">squelch</a> <i>boolean</i>
Tree	<a href="#">squelch</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **ql-override** *keyword*

Synopsis	Override for the quality level of the timing reference
Context	<b>configure</b> <a href="#">system</a> <a href="#">central-frequency-clock</a> <a href="#">bits</a> <a href="#">ql-override</a> <i>keyword</i>
Tree	<a href="#">ql-override</a>
Options	unused, prs, stu, st2, tnc, st3e, st3, prc, ssua, ssub, sec
Default	unused
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **ssm-bit** *number*

Synopsis	Sa bit to convey SSM information
Context	<b>configure</b> <a href="#">system</a> <a href="#">central-frequency-clock</a> <a href="#">bits</a> <a href="#">ssm-bit</a> <i>number</i>
Tree	<a href="#">ssm-bit</a>
Range	4 to 8
Default	8
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **gnss**

Synopsis	Enter the <b>gnss</b> context
----------	-------------------------------

Context	<b>configure system central-frequency-clock gnss</b>
Tree	<a href="#">gnss</a>
Introduced	22.10.R1
Platforms	7750 SR-1-24D, 7750 SR-1-46S, 7750 SR-1-48D, 7750 SR-1-92S, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-1se, 7750 SR-2se

### **admin-state** *keyword*

Synopsis	Administrative state of the gnss timing reference
Context	<b>configure system central-frequency-clock gnss admin-state</b> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	22.10.R1
Platforms	7750 SR-1-24D, 7750 SR-1-46S, 7750 SR-1-48D, 7750 SR-1-92S, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-1se, 7750 SR-2se

### **ql-override** *keyword*

Synopsis	Quality level override for a timing reference
Context	<b>configure system central-frequency-clock gnss ql-override</b> <i>keyword</i>
Tree	<a href="#">ql-override</a>
Options	unused, prs, stu, st2, tnc, st3e, st3
Default	unused
Introduced	22.10.R1
Platforms	7750 SR-1-24D, 7750 SR-1-46S, 7750 SR-1-48D, 7750 SR-1-92S, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-1se, 7750 SR-2se

### **ptp**

Synopsis	Enter the <b>ptp</b> context
Context	<b>configure system central-frequency-clock ptp</b>
Tree	<a href="#">ptp</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**admin-state** *keyword*

Synopsis	Administrative state of the PTP timing reference
Context	<b>configure</b> <a href="#">system</a> <a href="#">central-frequency-clock</a> <a href="#">ptp</a> <b>admin-state</b> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**ql-override** *keyword*

Synopsis	Quality level of a timing reference that overrides any value provided by the reference's SSM process
Context	<b>configure</b> <a href="#">system</a> <a href="#">central-frequency-clock</a> <a href="#">ptp</a> <b>ql-override</b> <i>keyword</i>
Tree	<a href="#">ql-override</a>
Options	unused, prs, stu, st2, tnc, st3e, st3, prc, ssua, ssub, sec
Default	unused
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**ql-minimum** *keyword*

Synopsis	Minimum signal quality level for system timing module
Context	<b>configure</b> <a href="#">system</a> <a href="#">central-frequency-clock</a> <b>ql-minimum</b> <i>keyword</i>
Tree	<a href="#">ql-minimum</a>
Options	unused, prs, stu, st2, tnc, st3e, st3, prc, ssua, ssub, sec, eec1, eec2
Default	unused
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**ql-selection** *boolean*

Synopsis	Consider quality level in system and BITS output timing
Context	<b>configure</b> <a href="#">system</a> <a href="#">central-frequency-clock</a> <b>ql-selection</b> <i>boolean</i>

Tree	<a href="#">ql-selection</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## ref-order

Synopsis	Enter the <b>ref-order</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">central-frequency-clock</a> <a href="#">ref-order</a>
Tree	<a href="#">ref-order</a>
Description	<p>Commands in this context specify the priority order of the synchronous equipment timing subsystem.</p> <p>If a reference source is disabled, this command defines the next reference source for the clock. If all reference sources are disabled, clocking is derived from a local oscillator.</p> <p>If a timing reference is linked to a source port that is operationally down, the port is no longer a qualified, valid reference.</p>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## fifth keyword

Synopsis	Fifth preferred timing reference source
Context	<b>configure</b> <a href="#">system</a> <a href="#">central-frequency-clock</a> <a href="#">ref-order</a> <i>fifth keyword</i>
Tree	<a href="#">fifth</a>
Options	ref1, ref2, bits, ptp, none, synce, gnss
Introduced	19.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## first keyword

Synopsis	First preferred timing reference source
Context	<b>configure</b> <a href="#">system</a> <a href="#">central-frequency-clock</a> <a href="#">ref-order</a> <i>first keyword</i>
Tree	<a href="#">first</a>
Options	ref1, ref2, bits, ptp, none, synce, gnss
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **fourth keyword**

Synopsis	Fourth preferred timing reference source
Context	<b>configure system central-frequency-clock ref-order fourth keyword</b>
Tree	<a href="#">fourth</a>
Options	ref1, ref2, bits, ptp, none, synce, gnss
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **second keyword**

Synopsis	Second preferred timing reference source
Context	<b>configure system central-frequency-clock ref-order second keyword</b>
Tree	<a href="#">second</a>
Options	ref1, ref2, bits, ptp, none, synce, gnss
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **sixth keyword**

Synopsis	Sixth preferred timing reference source
Context	<b>configure system central-frequency-clock ref-order sixth keyword</b>
Tree	<a href="#">sixth</a>
Options	ref1, ref2, bits, ptp, none, synce, gnss
Introduced	22.10.R1
Platforms	7750 SR-1-24D, 7750 SR-1-46S, 7750 SR-1-48D, 7750 SR-1-92S, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-1se, 7750 SR-2se

### **third keyword**

Synopsis	Third preferred timing reference source
Context	<b>configure system central-frequency-clock ref-order third keyword</b>
Tree	<a href="#">third</a>
Options	ref1, ref2, bits, ptp, none, synce, gnss
Introduced	16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## ref1

Synopsis Enter the **ref1** context  
 Context **configure system central-frequency-clock ref1**  
 Tree [ref1](#)  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## admin-state *keyword*

Synopsis Administrative state of the first timing reference  
 Context **configure system central-frequency-clock ref1 admin-state *keyword***  
 Tree [admin-state](#)  
 Options enable, disable  
 Default disable  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## ql-override *keyword*

Synopsis Quality level override of a timing reference  
 Context **configure system central-frequency-clock ref1 ql-override *keyword***  
 Tree [ql-override](#)  
 Options unused, prs, stu, st2, tnc, st3e, st3, prc, ssua, ssub, sec, eec1, eec2  
 Default unused  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## source-port *string*

Synopsis Source port for the first timing reference  
 Context **configure system central-frequency-clock ref1 source-port *string***  
 Tree [source-port](#)

Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## ref2

Synopsis	Enter the <b>ref2</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">central-frequency-clock</a> <a href="#">ref2</a>
Tree	<a href="#">ref2</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## admin-state *keyword*

Synopsis	Administrative state of the second timing reference
Context	<b>configure</b> <a href="#">system</a> <a href="#">central-frequency-clock</a> <a href="#">ref2</a> <a href="#">admin-state</a> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## ql-override *keyword*

Synopsis	Quality level override of a timing reference
Context	<b>configure</b> <a href="#">system</a> <a href="#">central-frequency-clock</a> <a href="#">ref2</a> <a href="#">ql-override</a> <i>keyword</i>
Tree	<a href="#">ql-override</a>
Options	unused, prs, stu, st2, tnc, st3e, st3, prc, ssua, ssub, sec, eec1, eec2
Default	unused
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## source-port *string*

Synopsis	Source port for the second timing reference
Context	<b>configure</b> <a href="#">system</a> <a href="#">central-frequency-clock</a> <a href="#">ref2</a> <a href="#">source-port</a> <i>string</i>

---

Tree	<a href="#">source-port</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **revert** *boolean*

Synopsis	Revert to higher-priority reference source
Context	<b>configure</b> <a href="#">system</a> <a href="#">central-frequency-clock</a> <b>revert</b> <i>boolean</i>
Tree	<a href="#">revert</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **sync**

Synopsis	Enter the <b>sync</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">central-frequency-clock</a> <b>sync</b>
Tree	<a href="#">sync</a>
Introduced	19.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **admin-state** *keyword*

Synopsis	Administrative state of the SyncE timing reference
Context	<b>configure</b> <a href="#">system</a> <a href="#">central-frequency-clock</a> <b>sync</b> <b>admin-state</b> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	19.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **ql-override** *keyword*

Synopsis	Override the quality level of a timing reference
Context	<b>configure</b> <a href="#">system</a> <a href="#">central-frequency-clock</a> <b>sync</b> <b>ql-override</b> <i>keyword</i>

Tree	<a href="#">ql-override</a>
Options	unused, prs, stu, st2, tnc, st3e, st3, prc, ssua, ssub, sec, eec1, eec2
Default	unused
Introduced	19.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **wait-to-restore** *number*

Synopsis	Time to re-validate a previously failed input reference
Context	<b>configure</b> <a href="#">system</a> <a href="#">central-frequency-clock</a> <a href="#">wait-to-restore</a> <i>number</i>
Tree	<a href="#">wait-to-restore</a>
Range	1 to 12
Units	minutes
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **cli-code** *string*

Synopsis	CLLI code value for the system
Context	<b>configure</b> <a href="#">system</a> <a href="#">cli-code</a> <i>string</i>
Tree	<a href="#">cli-code</a>
String Length	11
Introduced	16.0.R1
Platforms	All

### **congestion-management** *boolean*

Synopsis	Enable Virtual Service Router congestion management
Context	<b>configure</b> <a href="#">system</a> <a href="#">congestion-management</a> <i>boolean</i>
Tree	<a href="#">congestion-management</a>
Default	false
Introduced	16.0.R1
Platforms	VSR

**contact** *string*

Synopsis	Contact information for the managed node
Context	<b>configure</b> <a href="#">system</a> <a href="#">contact</a> <i>string</i>
Tree	<a href="#">contact</a>
String Length	1 to 80
Introduced	16.0.R1
Platforms	All

**coordinates** *string*

Synopsis	GPS coordinates for the system location
Context	<b>configure</b> <a href="#">system</a> <a href="#">coordinates</a> <i>string</i>
Tree	<a href="#">coordinates</a>
String Length	1 to 80
Introduced	16.0.R1
Platforms	All

**cpm-http-redirect**

Synopsis	Enter the <b>cpm-http-redirect</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">cpm-http-redirect</a>
Tree	<a href="#">cpm-http-redirect</a>
Introduced	16.0.R4
Platforms	All

**optimized-mode** *boolean*

Synopsis	Enable optimized mode for CPM HTTP redirect messages
Context	<b>configure</b> <a href="#">system</a> <a href="#">cpm-http-redirect</a> <a href="#">optimized-mode</a> <i>boolean</i>
Tree	<a href="#">optimized-mode</a>
Default	true
Introduced	16.0.R4
Platforms	All

**cron**

Synopsis	Enter the <b>cron</b> context
Context	<b>configure system cron</b>
Tree	<a href="#">cron</a>
Introduced	16.0.R1
Platforms	All

**schedule** [[schedule-name](#)] *string owner string*

Synopsis	Enter the <b>schedule</b> list instance
Context	<b>configure system cron schedule</b> <i>string owner string</i>
Tree	<a href="#">schedule</a>
Max. Instances	255
Introduced	16.0.R1
Platforms	All

**[schedule-name]** *string*

Synopsis	Schedule name
Context	<b>configure system cron schedule</b> <i>string owner string</i>
Tree	<a href="#">schedule</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

**owner** *string*

Synopsis	Schedule owner
Context	<b>configure system cron schedule</b> <i>string owner string</i>
Tree	<a href="#">schedule</a>
String Length	1 to 32
MD-CLI	TIMOS CLI
Default	

---

Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

**admin-state** *keyword*

Synopsis	Administrative state of the CRON schedule
Context	<b>configure</b> <b>system</b> <b>cron</b> <b>schedule</b> <i>string</i> <b>owner</b> <i>string</i> <b>admin-state</b> <i>keyword</i>
Tree	<b>admin-state</b>
Options	enable, disable
Default	disable
Introduced	16.0.R1
Platforms	All

**count** *number*

Synopsis	Number of times to repeat a periodic schedule run
Context	<b>configure</b> <b>system</b> <b>cron</b> <b>schedule</b> <i>string</i> <b>owner</b> <i>string</i> <b>count</b> <i>number</i>
Tree	<b>count</b>
Range	1 to 65535
Introduced	16.0.R1
Platforms	All

**day-of-month** *number*

Synopsis	Days in a month when a schedule runs
Context	<b>configure</b> <b>system</b> <b>cron</b> <b>schedule</b> <i>string</i> <b>owner</b> <i>string</i> <b>day-of-month</b> <i>number</i>
Tree	<b>day-of-month</b>
Range	-31 to -1   1 to 31
Max. Instances	62
Introduced	16.0.R1
Platforms	All

**description string**

Synopsis	Text description
Context	<b>configure</b> <a href="#">system</a> <a href="#">cron</a> <a href="#">schedule</a> <i>string</i> <a href="#">owner</a> <i>string</i> <a href="#">description</a> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R1
Platforms	All

**end-time**

Synopsis	Enter the <b>end-time</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">cron</a> <a href="#">schedule</a> <i>string</i> <a href="#">owner</a> <i>string</i> <a href="#">end-time</a>
Tree	<a href="#">end-time</a>
Introduced	16.0.R1
Platforms	All

**date-and-time string**

Synopsis	Date and time to stop triggering the schedule
Context	<b>configure</b> <a href="#">system</a> <a href="#">cron</a> <a href="#">schedule</a> <i>string</i> <a href="#">owner</a> <i>string</i> <a href="#">end-time</a> <a href="#">date-and-time</a> <i>string</i>
Tree	<a href="#">date-and-time</a>
Notes	The following elements are part of a choice: <b>date-and-time</b> or ( <b>day</b> and <b>time</b> ).
Introduced	16.0.R1
Platforms	All

**day keyword**

Synopsis	Day to stop triggering the schedule
Context	<b>configure</b> <a href="#">system</a> <a href="#">cron</a> <a href="#">schedule</a> <i>string</i> <a href="#">owner</a> <i>string</i> <a href="#">end-time</a> <a href="#">day</a> <i>keyword</i>
Tree	<a href="#">day</a>
Options	sunday, monday, tuesday, wednesday, thursday, friday, saturday
Notes	The following elements are part of a choice: <b>date-and-time</b> or ( <b>day</b> and <b>time</b> ).
Introduced	16.0.R1
Platforms	All

### **time string**

Synopsis	Time to stop triggering the schedule
Context	<b>configure system cron schedule string owner string end-time time string</b>
Tree	<b>time</b>
String Length	5
Notes	The following elements are part of a choice: <b>date-and-time</b> or ( <b>day</b> and <b>time</b> ).
Introduced	16.0.R1
Platforms	All

### **hour number**

Synopsis	Hours within a day when the schedule runs
Context	<b>configure system cron schedule string owner string hour number</b>
Tree	<b>hour</b>
Range	0 to 23
Max.	24
Instances	
Introduced	16.0.R1
Platforms	All

### **interval number**

Synopsis	Time between each periodic schedule run
Context	<b>configure system cron schedule string owner string interval number</b>
Tree	<b>interval</b>
Range	30 to 42949672
Units	seconds
Introduced	16.0.R1
Platforms	All

### **minute number**

Synopsis	Minutes in an hour when the schedule runs
Context	<b>configure system cron schedule string owner string minute number</b>

Tree	<a href="#">minute</a>
Range	0 to 59
Max. Instances	60
Introduced	16.0.R1
Platforms	All

### **month** (*keyword | number*)

Synopsis	Months when the schedule runs
Context	<b>configure</b> <a href="#">system cron schedule</a> <i>string</i> <a href="#">owner</a> <i>string</i> <a href="#">month</a> ( <i>keyword   number</i> )
Tree	<a href="#">month</a>
Range	1 to 12
Options	january, february, march, april, may, june, july, august, september, october, november, december
Max. Instances	12
Introduced	16.0.R1
Platforms	All

### **script-policy**

Synopsis	Enter the <b>script-policy</b> context
Context	<b>configure</b> <a href="#">system cron schedule</a> <i>string</i> <a href="#">owner</a> <i>string</i> <a href="#">script-policy</a>
Tree	<a href="#">script-policy</a>
Introduced	16.0.R1
Platforms	All

### **name** *string*

Synopsis	CLI script policy name
Context	<b>configure</b> <a href="#">system cron schedule</a> <i>string</i> <a href="#">owner</a> <i>string</i> <a href="#">script-policy</a> <a href="#">name</a> <i>string</i>
Tree	<a href="#">name</a>
String Length	1 to 32
Introduced	16.0.R1
Platforms	All

**owner string**

Synopsis	Script policy owner
Context	<b>configure</b> <a href="#">system</a> <a href="#">cron</a> <a href="#">schedule</a> <i>string</i> <a href="#">owner</a> <i>string</i> <a href="#">script-policy</a> <a href="#">owner</a> <i>string</i>
Tree	<a href="#">owner</a>
String Length	1 to 32
Introduced	16.0.R1
Platforms	All

**type keyword**

Synopsis	Schedule type
Context	<b>configure</b> <a href="#">system</a> <a href="#">cron</a> <a href="#">schedule</a> <i>string</i> <a href="#">owner</a> <i>string</i> <a href="#">type</a> <i>keyword</i>
Tree	<a href="#">type</a>
Options	periodic, calendar, oneshot
Default	periodic
Introduced	16.0.R1
Platforms	All

**weekday (keyword | number)**

Synopsis	Weekdays when the schedule runs
Context	<b>configure</b> <a href="#">system</a> <a href="#">cron</a> <a href="#">schedule</a> <i>string</i> <a href="#">owner</a> <i>string</i> <a href="#">weekday</a> ( <i>keyword   number</i> )
Tree	<a href="#">weekday</a>
Range	1 to 7
Options	sunday, monday, tuesday, wednesday, thursday, friday, saturday
Max. Instances	7
Introduced	16.0.R1
Platforms	All

**dhcp6**

Synopsis	Enter the <b>dhcp6</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">dhcp6</a>

Tree	<a href="#">dhcp6</a>
Introduced	16.0.R4
Platforms	All

### **adv-noaddrs-global** *keyword*

Synopsis	Applications to send NoAddrsAvail in Advertise messages
Context	<b>configure</b> <a href="#">system</a> <a href="#">dhcp6</a> <a href="#">adv-noaddrs-global</a> <i>keyword</i>
Tree	<a href="#">adv-noaddrs-global</a>
Options	esm-relay, server
Max. Instances	2
Introduced	16.0.R4
Platforms	All

### **dns**

Synopsis	Enter the <b>dns</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">dns</a>
Tree	<a href="#">dns</a>
Introduced	16.0.R1
Platforms	All

### **address-pref** *keyword*

Synopsis	Preference in DNS address resolving order
Context	<b>configure</b> <a href="#">system</a> <a href="#">dns</a> <a href="#">address-pref</a> <i>keyword</i>
Tree	<a href="#">address-pref</a>
Options	ipv4-only, ipv6-first
Introduced	16.0.R1
Platforms	All

### **dnssec**

Synopsis	Enter the <b>dnssec</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">dns</a> <a href="#">dnssec</a>

Tree	<a href="#">dnssec</a>
Introduced	16.0.R1
Platforms	All

**ad-validation** *keyword*

Synopsis	Validation of AD-bit presence in DNS server responses
Context	<b>configure</b> <a href="#">system</a> <a href="#">dns</a> <a href="#">dnssec</a> <a href="#">ad-validation</a> <i>keyword</i>
Tree	<a href="#">ad-validation</a>
Options	fall-through – Allow non-DNSSEC responses to fall-through to permit resolution in case of validation failure drop – Drop non-DNSSEC responses in case of validation failure
Introduced	16.0.R1
Platforms	All

**efm-oam**

Synopsis	Enter the <b>efm-oam</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">efm-oam</a>
Tree	<a href="#">efm-oam</a>
Introduced	16.0.R1
Platforms	All

**dying-gasp-tx-on-reset** *boolean*

Synopsis	Generate Information OAM PDU on soft reset notification
Context	<b>configure</b> <a href="#">system</a> <a href="#">efm-oam</a> <a href="#">dying-gasp-tx-on-reset</a> <i>boolean</i>
Tree	<a href="#">dying-gasp-tx-on-reset</a>
Default	false
Introduced	16.0.R1
Platforms	All

**grace-tx** *boolean*

Synopsis	Send Grace TLVs for soft reset graceful recovery events
Context	<b>configure</b> <a href="#">system</a> <a href="#">efm-oam</a> <a href="#">grace-tx</a> <i>boolean</i>

Tree	<a href="#">grace-tx</a>
Description	<p>When configured to <b>true</b>, the system sends the Nokia Vendor specific Grace TLV in the information PDU after an ISSU or a soft reset. The Grace TLV informs a remote peer to ignore the negotiated interval and multiplier and instead use the new timeout interval.</p> <p>By default, the command is disabled at the system level and enabled at the port level. Both the system and port level must be enabled to support grace on a specific port. When configured to <b>true</b>, the EFM-OAM protocol does not enter a non-operational state when both nodes acknowledge the grace function. This feature minimizes service interruption by giving the restarting router time to become operationally and administratively up within the grace period.</p> <p>The peer receiving the Grace TLV must be able to parse and process the vendor-specific messaging. Do not configure grace if the Nokia Vendor Specific Grace TLV is not supported on the remote peer.</p> <p>When configured to <b>false</b>, the Nokia Vendor Specific Grace TLV is not sent.</p>
Default	false
Introduced	16.0.R1
Platforms	All

## eth-cfm

Synopsis	Enter the <b>eth-cfm</b> context
Context	<b>configure system eth-cfm</b>
Tree	<a href="#">eth-cfm</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## grace boolean

Synopsis	Allow system level capability of grace messaging
Context	<b>configure system eth-cfm grace boolean</b>
Tree	<a href="#">grace</a>
Default	true
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## md-auto-id

Synopsis	Enter the <b>md-auto-id</b> context
----------	-------------------------------------

Context	<b>configure</b> <a href="#">system eth-cfm md-auto-id</a>
Tree	<a href="#">md-auto-id</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## ma-index-range

Synopsis	Enable the <b>ma-index-range</b> context
Context	<b>configure</b> <a href="#">system eth-cfm md-auto-id ma-index-range</a>
Tree	<a href="#">ma-index-range</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## end number

### WARNING:

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Upper bound of the range
Context	<b>configure</b> <a href="#">system eth-cfm md-auto-id ma-index-range end number</a>
Tree	<a href="#">end</a>
Range	1 to 4294967295
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## start number

### WARNING:

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Lower bound of the range
Context	<b>configure</b> <a href="#">system eth-cfm md-auto-id ma-index-range start number</a>
Tree	<a href="#">start</a>
Range	1 to 4294967295

Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## md-index-range

Synopsis	Enable the <b>md-index-range</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">eth-cfm</a> <a href="#">md-auto-id</a> <a href="#">md-index-range</a>
Tree	<a href="#">md-index-range</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## end number

### WARNING:

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Upper bound of the range
Context	<b>configure</b> <a href="#">system</a> <a href="#">eth-cfm</a> <a href="#">md-auto-id</a> <a href="#">md-index-range</a> <a href="#">end</a> <i>number</i>
Tree	<a href="#">end</a>
Range	1 to 4294967295
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## start number

### WARNING:

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Lower bound of the range
Context	<b>configure</b> <a href="#">system</a> <a href="#">eth-cfm</a> <a href="#">md-auto-id</a> <a href="#">md-index-range</a> <a href="#">start</a> <i>number</i>
Tree	<a href="#">start</a>
Range	1 to 4294967295

Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **named-display** *boolean*

Synopsis	Enable administrative name display in CLI show outputs
Context	<b>configure</b> <a href="#">system</a> <a href="#">eth-cfm</a> <a href="#">named-display</a> <i>boolean</i>
Tree	<a href="#">named-display</a>
Description	<p>When configured to <b>true</b>, the system displays the administrative names for domains, associations, and bridge-identifiers in <b>show eth-cfm</b> command outputs in addition to the numerical maintenance domain (MD) index, maintenance association (MA) index, and bridge ID values. The administrative names are displayed underneath the numerical values, each on a separate row.</p> <p>When configured to <b>false</b>, the system only displays the numerical MD index, MA index, and bridge ID values in <b>show eth-cfm</b> command outputs.</p>
Default	false
Introduced	23.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **redundancy**

Synopsis	Enter the <b>redundancy</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">eth-cfm</a> <a href="#">redundancy</a>
Tree	<a href="#">redundancy</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **mc-lag**

Synopsis	Enter the <b>mc-lag</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">eth-cfm</a> <a href="#">redundancy</a> <a href="#">mc-lag</a>
Tree	<a href="#">mc-lag</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**propagate-hold-time** (*number* | *keyword*)

Synopsis	Delay timer value for the fault propagation
Context	<b>configure</b> <a href="#">system eth-cfm redundancy mc-lag propagate-hold-time</a> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">propagate-hold-time</a>
Range	1 to 60
Units	seconds
Options	none
Default	1
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**standby-mep** *boolean*

Synopsis	Allow standby MC-LAG MEPs to act administratively down
Context	<b>configure</b> <a href="#">system eth-cfm redundancy mc-lag standby-mep</a> <i>boolean</i>
Tree	<a href="#">standby-mep</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**sender-id**

Synopsis	Enter the <b>sender-id</b> context
Context	<b>configure</b> <a href="#">system eth-cfm sender-id</a>
Tree	<a href="#">sender-id</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**local-name** *string*

Synopsis	Local name used in CFM PDUs
Context	<b>configure</b> <a href="#">system eth-cfm sender-id local-name</a> <i>string</i>
Tree	<a href="#">local-name</a>
String Length	1 to 45
Introduced	16.0.R1

---

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **type** *keyword*

Synopsis ETH-CFM sender ID to be used in CFM PDUs  
Context **configure** [system eth-cfm sender-id type keyword](#)  
Tree [type](#)  
Options system, local  
Default system  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **slm**

Synopsis Enter the **slm** context  
Context **configure** [system eth-cfm slm](#)  
Tree [slm](#)  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **inactivity-timer** *number*

Synopsis SLR inactivity timer to maintain the stale test data  
Context **configure** [system eth-cfm slm inactivity-timer number](#)  
Tree [inactivity-timer](#)  
Range 10 to 100  
Units seconds  
Default 100  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **fan-control**

Synopsis Enter the **fan-control** context  
Context **configure** [system fan-control](#)

Tree	<a href="#">fan-control</a>
Description	Commands in this context configure the speed of the router fans. <b>Caution:</b> Only use commands in this context with authorized direction from Nokia technical support.
Introduced	23.7.R1
Platforms	7750 SR-1-24D, 7750 SR-1-46S, 7750 SR-1-48D, 7750 SR-1-92S, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-1se

### **cooling-profile** *keyword*

Synopsis	Cooling profile used to determine fan speeds
Context	<b>configure</b> <a href="#">system</a> <a href="#">fan-control</a> <a href="#">cooling-profile</a> <i>keyword</i>
Tree	<a href="#">cooling-profile</a>
Description	This command configures the cooling profile used to determine the fan speed. Nokia recommends that the default setting be used unless aggressive cooling is explicitly required.
Options	default, aggressive
Default	default
Introduced	23.7.R1
Platforms	7750 SR-1-24D, 7750 SR-1-46S, 7750 SR-1-48D, 7750 SR-1-92S, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-1se

### **grpc**

Synopsis	Enter the <b>grpc</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">grpc</a>
Tree	<a href="#">grpc</a>
Introduced	16.0.R1
Platforms	All

### **admin-state** *keyword*

Synopsis	Administrative state of the gRPC server
Context	<b>configure</b> <a href="#">system</a> <a href="#">grpc</a> <a href="#">admin-state</a> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable

Default	disable
Introduced	16.0.R1
Platforms	All

### **allow-unsecure-connection**

Synopsis	Allow connection without secured transport protocol
Context	<b>configure</b> <a href="#">system</a> <a href="#">grpc</a> <a href="#">allow-unsecure-connection</a>
Tree	<a href="#">allow-unsecure-connection</a>
Description	When configured, the system allows an unsecured connection to remote managers; TCP connections are not encrypted, including username and password information.
Notes	The following elements are part of a choice: <b>allow-unsecure-connection</b> or <b>tls-server-profile</b> .
Introduced	16.0.R1
Platforms	All

### **delay-on-boot** *number*

Synopsis	Delay for gRPC connections after system boot
Context	<b>configure</b> <a href="#">system</a> <a href="#">grpc</a> <a href="#">delay-on-boot</a> <i>number</i>
Tree	<a href="#">delay-on-boot</a>
Description	This command configures the delay timer for gRPC connections. When the timer expires, gRPC becomes operational and connections are accepted. This delay prevents automation from managing the system while it is still converging.  When no delay is configured, connections are accepted after the system boots and gRPC becomes operational.
Range	1 to 3600
Units	seconds
Introduced	23.10.R1
Platforms	All

### **gnmi**

Synopsis	Enter the <b>gnmi</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">grpc</a> <a href="#">gnmi</a>
Tree	<a href="#">gnmi</a>

---

Introduced	16.0.R1
Platforms	All

### **admin-state** *keyword*

Synopsis	Administrative state of the gNMI service
Context	<b>configure</b> <a href="#">system</a> <a href="#">grpc</a> <a href="#">gnmi</a> <b>admin-state</b> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	enable
Introduced	16.0.R1
Platforms	All

### **auto-config-save** *boolean*

Synopsis	Automatically save configuration as part of commit
Context	<b>configure</b> <a href="#">system</a> <a href="#">grpc</a> <a href="#">gnmi</a> <b>auto-config-save</b> <i>boolean</i>
Tree	<a href="#">auto-config-save</a>
Description	When configured to <b>true</b> , the system automatically writes the running configuration to the save configuration file as part of a successful commit operation.
Default	true
Introduced	16.0.R1
Platforms	All

### **proto-version** *keyword*

Synopsis	gnmi.proto version
Context	<b>configure</b> <a href="#">system</a> <a href="#">grpc</a> <a href="#">gnmi</a> <b>proto-version</b> <i>keyword</i>
Tree	<a href="#">proto-version</a>
Description	This command sets the gnmi.proto version that the GRPC server should use for all gNMI RPCs. Only use options other than <b>latest</b> for backward compatibility with legacy collectors.
Options	latest – Latest supported version v070 – gNMI version 0.7.0
Default	latest
Introduced	23.3.R1

Platforms All

## gnoi

Synopsis Enter the **gnoi** context  
Context **configure** [system grpc gnoi](#)  
Tree [gnoi](#)  
Introduced 19.10.R1  
Platforms All

## cert-mgmt

Synopsis Enter the **cert-mgmt** context  
Context **configure** [system grpc gnoi cert-mgmt](#)  
Tree [cert-mgmt](#)  
Introduced 19.10.R1  
Platforms All

## admin-state *keyword*

Synopsis Administrative state of gNOI CertificateManagement  
Context **configure** [system grpc gnoi cert-mgmt admin-state](#) *keyword*  
Tree [admin-state](#)  
Options enable, disable  
Default disable  
Introduced 19.10.R1  
Platforms All

## file

Synopsis Enter the **file** context  
Context **configure** [system grpc gnoi file](#)  
Tree [file](#)  
Introduced 21.2.R1  
Platforms All

**admin-state** *keyword*

Synopsis	Administrative state of the gNOI File service
Context	<b>configure</b> <a href="#">system</a> <a href="#">grpc</a> <a href="#">gnoi</a> <a href="#">file</a> <b>admin-state</b> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	21.2.R1
Platforms	All

**system**

Synopsis	Enter the <b>system</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">grpc</a> <a href="#">gnoi</a> <b>system</b>
Tree	<a href="#">system</a>
Introduced	20.5.R1
Platforms	All

**admin-state** *keyword*

Synopsis	Administrative state of the gNOI System service
Context	<b>configure</b> <a href="#">system</a> <a href="#">grpc</a> <a href="#">gnoi</a> <a href="#">system</a> <b>admin-state</b> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	20.5.R1
Platforms	All

**listening-port** *number*

Synopsis	Listening port for the gRPC server
Context	<b>configure</b> <a href="#">system</a> <a href="#">grpc</a> <b>listening-port</b> <i>number</i>
Tree	<a href="#">listening-port</a>
Range	1024 to 49151   57400
Default	57400

---

Introduced	23.7.R1
Platforms	All

### **max-msg-size** *number*

Synopsis	Maximum size of received message
Context	<b>configure</b> <a href="#">system grpc max-msg-size</a> <i>number</i>
Tree	<a href="#">max-msg-size</a>
Range	1 to 1024
Units	megabytes
Default	512
Introduced	16.0.R1
Platforms	All

### **md-cli**

Synopsis	Enter the <b>md-cli</b> context
Context	<b>configure</b> <a href="#">system grpc md-cli</a>
Tree	<a href="#">md-cli</a>
Introduced	20.5.R1
Platforms	All

### **admin-state** *keyword*

Synopsis	Administrative state of the MD-CLI service
Context	<b>configure</b> <a href="#">system grpc md-cli admin-state</a> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	20.5.R1
Platforms	All

### **rib-api**

Synopsis	Enter the <b>rib-api</b> context
----------	----------------------------------

---

Context	<b>configure system grpc rib-api</b>
Tree	<a href="#">rib-api</a>
Introduced	16.0.R4
Platforms	All

### **admin-state** *keyword*

Synopsis	Administrative state of the RIB API service
Context	<b>configure system grpc rib-api admin-state keyword</b>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	16.0.R4
Platforms	All

### **purge-timeout** *number*

Synopsis	Time until stale entries are purged
Context	<b>configure system grpc rib-api purge-timeout number</b>
Tree	<a href="#">purge-timeout</a>
Range	1 to 100000
Units	seconds
Introduced	16.0.R4
Platforms	All

### **tcp-keepalive**

Synopsis	Enter the <b>tcp-keepalive</b> context
Context	<b>configure system grpc tcp-keepalive</b>
Tree	<a href="#">tcp-keepalive</a>
Introduced	16.0.R4
Platforms	All

**admin-state** *keyword*

Synopsis	Administrative state of the TCP keepalive algorithm
Context	<b>configure</b> <a href="#">system</a> <a href="#">grpc tcp-keepalive</a> <b>admin-state</b> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	16.0.R4
Platforms	All

**idle-time** *number*

Synopsis	Time until the first TCP keepalive probe is sent
Context	<b>configure</b> <a href="#">system</a> <a href="#">grpc tcp-keepalive</a> <b>idle-time</b> <i>number</i>
Tree	<a href="#">idle-time</a>
Description	This command configures the amount of time the connection must be idle before TCP keepalives are sent.
Range	1 to 100000
Units	seconds
Default	600
Introduced	16.0.R4
Platforms	All

**interval** *number*

Synopsis	Time between TCP keep-alive probes
Context	<b>configure</b> <a href="#">system</a> <a href="#">grpc tcp-keepalive</a> <b>interval</b> <i>number</i>
Tree	<a href="#">interval</a>
Range	1 to 100000
Units	seconds
Default	15
Introduced	16.0.R4
Platforms	All

**retries** *number*

Synopsis	Number of probe retries before closing the connection
Context	<b>configure</b> <a href="#">system</a> <a href="#">grpc tcp-keepalive</a> <b>retries</b> <i>number</i>
Tree	<a href="#">retries</a>
Description	This command configures the number of missed TCP keepalive probes before closing the TCP connection and attempting to reach the other destinations within the same destination group.
Range	3 to 100
Default	4
Introduced	16.0.R4
Platforms	All

**tls-server-profile** *reference*

Synopsis	Preferred TLS server profile
Context	<b>configure</b> <a href="#">system</a> <a href="#">grpc tls-server-profile</a> <i>reference</i>
Tree	<a href="#">tls-server-profile</a>
Reference	<b>configure</b> <a href="#">system security</a> <a href="#">tls server-tls-profile</a> <i>string</i>
Notes	The following elements are part of a choice: <b>allow-unsecure-connection</b> or <b>tls-server-profile</b> .
Introduced	16.0.R1
Platforms	All

**grpc-tunnel**

Synopsis	Enter the <b>grpc-tunnel</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">grpc-tunnel</a>
Tree	<a href="#">grpc-tunnel</a>
Introduced	22.2.R1
Platforms	All

**delay-on-boot** *number*

Synopsis	Delay for gRPC tunnels after system boot
Context	<b>configure</b> <a href="#">system</a> <a href="#">grpc-tunnel</a> <b>delay-on-boot</b> <i>number</i>

Tree	<a href="#">delay-on-boot</a>
Description	This command configures the delay timer for gRPC tunnels. When the timer expires, gRPC tunnels become operational and connections are accepted. This delay prevents the system from trying to initiate gRPC tunnels while it is still converging.  When no delay is configured, gRPC tunnels are initiated after the system boots and gRPC becomes operational.
Range	1 to 3600
Units	seconds
Introduced	23.10.R1
Platforms	All

### **destination-group** [[name](#)] *string*

Synopsis	Enter the <b>destination-group</b> list instance
Context	<b>configure</b> <a href="#">system</a> <a href="#">grpc-tunnel</a> <a href="#">destination-group</a> <i>string</i>
Tree	<a href="#">destination-group</a>
Description	Commands in this context configure parameters for destination groups.
Max. Instances	4
Introduced	22.2.R1
Platforms	All

### **[name]** *string*

Synopsis	Destination group name
Context	<b>configure</b> <a href="#">system</a> <a href="#">grpc-tunnel</a> <a href="#">destination-group</a> <i>string</i>
Tree	<a href="#">destination-group</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	22.2.R1
Platforms	All

### **allow-unsecure-connection**

Synopsis	Allow unsecured operation of gRPC connections
Context	<b>configure</b> <a href="#">system</a> <a href="#">grpc-tunnel</a> <a href="#">destination-group</a> <i>string</i> <a href="#">allow-unsecure-connection</a>

Tree	<a href="#">allow-unsecure-connection</a>
Description	This command allows a gRPC tunnel to run without a secured transport protocol. Data is transferred in unencrypted form.
Notes	The following elements are part of a choice: <b>allow-unsecure-connection</b> or <b>tls-client-profile</b> .
Introduced	22.2.R1
Platforms	All

### **description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">system</a> <a href="#">grpc-tunnel</a> <a href="#">destination-group</a> <i>string</i> <a href="#">description</a> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	22.2.R1
Platforms	All

### **destination** [[address](#)] (*ipv4-address-no-zone* | *ipv6-address-no-zone* | *fully-qualified-domain-name*) [port](#) *number*

Synopsis	Enter the <b>destination</b> list instance
Context	<b>configure</b> <a href="#">system</a> <a href="#">grpc-tunnel</a> <a href="#">destination-group</a> <i>string</i> <a href="#">destination</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i>   <i>fully-qualified-domain-name</i> ) <a href="#">port</a> <i>number</i>
Tree	<a href="#">destination</a>
Max. Instances	4
Notes	This element is ordered by the user.
Introduced	22.2.R1
Platforms	All

### **[address]** (*ipv4-address-no-zone* | *ipv6-address-no-zone* | *fully-qualified-domain-name*)

Synopsis	Address of the destination within the destination group
Context	<b>configure</b> <a href="#">system</a> <a href="#">grpc-tunnel</a> <a href="#">destination-group</a> <i>string</i> <a href="#">destination</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i>   <i>fully-qualified-domain-name</i> ) <a href="#">port</a> <i>number</i>
Tree	<a href="#">destination</a>

String Length	1 to 255
Notes	This element is part of a list key.
Introduced	22.2.R1
Platforms	All

### **port number**

Synopsis	TCP port number for the destination
Context	<b>configure system grpc-tunnel destination-group</b> <i>string destination</i> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i>   <i>fully-qualified-domain-name</i> ) <b>port number</b>
Tree	<a href="#">destination</a>
Range	1 to 65535
Notes	This element is part of a list key.
Introduced	22.2.R1
Platforms	All

### **local-source-address** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	Local IP address of packets sent from the source
Context	<b>configure system grpc-tunnel destination-group</b> <i>string destination</i> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i>   <i>fully-qualified-domain-name</i> ) <b>port number local-source-address</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	<a href="#">local-source-address</a>
Introduced	22.2.R1
Platforms	All

### **originated-qos-marking** *keyword*

Synopsis	QoS marking used for gRPC tunnel packets
Context	<b>configure system grpc-tunnel destination-group</b> <i>string destination</i> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i>   <i>fully-qualified-domain-name</i> ) <b>port number originated-qos-marking</b> <i>keyword</i>
Tree	<a href="#">originated-qos-marking</a>
Options	be, cp1, cp2, cp3, cp4, cp5, cp6, cp7, cs1, cp9, af11, cp11, af12, cp13, af13, cp15, cs2, cp17, af21, cp19, af22, cp21, af23, cp23, cs3, cp25, af31, cp27, af32, cp29, af33, cp31, cs4, cp33, af41, cp35, af42, cp37, af43, cp39, cs5, cp41, cp42, cp43, cp44, cp45, ef, cp47, nc1, cp49, cp50, cp51, cp52, cp53, cp54, cp55, nc2, cp57, cp58, cp59, cp60, cp61, cp62, cp63

Introduced 22.2.R1  
Platforms All

### **router-instance** *string*

Synopsis Router instance for the destination group  
Context **configure** [system](#) [grpc-tunnel](#) [destination-group](#) *string* [destination](#) (*ipv4-address-no-zone* | *ipv6-address-no-zone* | *fully-qualified-domain-name*) [port](#) *number* [router-instance](#) *string*  
Tree [router-instance](#)  
Introduced 22.2.R1  
Platforms All

### **tcp-keepalive**

Synopsis Enter the **tcp-keepalive** context  
Context **configure** [system](#) [grpc-tunnel](#) [destination-group](#) *string* [tcp-keepalive](#)  
Tree [tcp-keepalive](#)  
Introduced 22.2.R1  
Platforms All

### **admin-state** *keyword*

Synopsis Administrative state of the TCP keepalive algorithm  
Context **configure** [system](#) [grpc-tunnel](#) [destination-group](#) *string* [tcp-keepalive](#) [admin-state](#) *keyword*  
Tree [admin-state](#)  
Options enable, disable  
Default disable  
Introduced 22.2.R1  
Platforms All

### **idle-time** *number*

Synopsis Time until the first TCP keepalive probe is sent  
Context **configure** [system](#) [grpc-tunnel](#) [destination-group](#) *string* [tcp-keepalive](#) [idle-time](#) *number*

Tree	<a href="#">idle-time</a>
Description	This command configures the amount of time the connection must be idle before TCP keepalives are sent.
Range	1 to 100000
Units	seconds
Default	600
Introduced	22.2.R1
Platforms	All

### **interval** *number*

Synopsis	Time between TCP keep-alive probes
Context	<b>configure</b> <a href="#">system</a> <a href="#">grpc-tunnel</a> <a href="#">destination-group</a> <i>string</i> <a href="#">tcp-keepalive</a> <a href="#">interval</a> <i>number</i>
Tree	<a href="#">interval</a>
Range	1 to 100000
Units	seconds
Default	15
Introduced	22.2.R1
Platforms	All

### **retries** *number*

Synopsis	Number of probe retries before closing the connection
Context	<b>configure</b> <a href="#">system</a> <a href="#">grpc-tunnel</a> <a href="#">destination-group</a> <i>string</i> <a href="#">tcp-keepalive</a> <a href="#">retries</a> <i>number</i>
Tree	<a href="#">retries</a>
Description	This command configures the number of missed TCP keepalive probes before closing the TCP connection and attempting to reach the other destinations within the same destination group.
Range	3 to 100
Default	4
Introduced	22.2.R1
Platforms	All

### **tls-client-profile** *reference*

Synopsis	TLS client profile assigned to the destination group
----------	--

Context	<b>configure system grpc-tunnel destination-group</b> <i>string</i> <b>tls-client-profile</b> <i>reference</i>
Tree	<b>tls-client-profile</b>
Reference	<b>configure system security tls client-tls-profile</b> <i>string</i>
Notes	The following elements are part of a choice: <b>allow-unsecure-connection</b> or <b>tls-client-profile</b> .
Introduced	22.2.R1
Platforms	All

### **tunnel** [*name*] *string*

Synopsis	Enter the <b>tunnel</b> list instance
Context	<b>configure system grpc-tunnel tunnel</b> <i>string</i>
Tree	<b>tunnel</b>
Description	Commands in this context configure gRPC-tunnel-related parameters.
Max. Instances	4
Introduced	22.2.R1
Platforms	All

### **[name]** *string*

Synopsis	Tunnel name
Context	<b>configure system grpc-tunnel tunnel</b> <i>string</i>
Tree	<b>tunnel</b>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	22.2.R1
Platforms	All

### **admin-state** *keyword*

Synopsis	Administrative state of the tunnel
Context	<b>configure system grpc-tunnel tunnel</b> <i>string</i> <b>admin-state</b> <i>keyword</i>
Tree	<b>admin-state</b>
Options	enable, disable

Default	disable
Introduced	22.2.R1
Platforms	All

### **description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">system</a> <a href="#">grpc-tunnel</a> <a href="#">tunnel</a> <i>string</i> <a href="#">description</a> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	22.2.R1
Platforms	All

### **destination-group** *reference*

Synopsis	Destination group used in the tunnel
Context	<b>configure</b> <a href="#">system</a> <a href="#">grpc-tunnel</a> <a href="#">tunnel</a> <i>string</i> <a href="#">destination-group</a> <i>reference</i>
Tree	<a href="#">destination-group</a>
Reference	<b>configure</b> <a href="#">system</a> <a href="#">grpc-tunnel</a> <a href="#">destination-group</a> <i>string</i>
Introduced	22.2.R1
Platforms	All

### **handler** [[name](#)] *string*

Synopsis	Enter the <b>handler</b> list instance
Context	<b>configure</b> <a href="#">system</a> <a href="#">grpc-tunnel</a> <a href="#">tunnel</a> <i>string</i> <a href="#">handler</a> <i>string</i>
Tree	<a href="#">handler</a>
Description	Commands in this context configure handler parameters for this instance. Multiple handlers can be created for any tunnel.
Max. Instances	8
Introduced	22.2.R1
Platforms	All

**[name]** *string*

Synopsis	Handler name
Context	<b>configure</b> <a href="#">system</a> <a href="#">grpc-tunnel</a> <a href="#">tunnel</a> <i>string</i> <a href="#">handler</a> <i>string</i>
Tree	<a href="#">handler</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	22.2.R1
Platforms	All

**admin-state** *keyword*

Synopsis	Administrative state of the handler
Context	<b>configure</b> <a href="#">system</a> <a href="#">grpc-tunnel</a> <a href="#">tunnel</a> <i>string</i> <a href="#">handler</a> <i>string</i> <a href="#">admin-state</a> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	22.2.R1
Platforms	All

**port** *number*

Synopsis	TCP port number the handler listens to internally
Context	<b>configure</b> <a href="#">system</a> <a href="#">grpc-tunnel</a> <a href="#">tunnel</a> <i>string</i> <a href="#">handler</a> <i>string</i> <a href="#">port</a> <i>number</i>
Tree	<a href="#">port</a>
Range	1 to 65535
Introduced	22.2.R1
Platforms	All

**target-type**

Synopsis	Enter the <b>target-type</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">grpc-tunnel</a> <a href="#">tunnel</a> <i>string</i> <a href="#">handler</a> <i>string</i> <a href="#">target-type</a>
Tree	<a href="#">target-type</a>
Introduced	22.2.R1
Platforms	All

### **custom-type** *string*

Synopsis	Custom string for target type
Context	<b>configure</b> <a href="#">system</a> <a href="#">grpc-tunnel</a> <a href="#">tunnel</a> <i>string</i> <a href="#">handler</a> <i>string</i> <a href="#">target-type</a> <a href="#">custom-type</a> <i>string</i>
Tree	<a href="#">custom-type</a>
Description	This command configures a custom string for the target type. This string can correspond to specific values used by the gRPC tunnel protocol, such as GNMI_GNOI or SSH. If a custom string is defined, the gRPC tunnel client must specify the string to request a session for that handler. The string must be unique within a tunnel.
String Length	1 to 64
Notes	The following elements are part of a choice: <b>custom-type</b> , <b>grpc-server</b> , or <b>ssh-server</b> .
Introduced	22.2.R1
Platforms	All

### **grpc-server**

Synopsis	Target type set to GNMI_GNOI
Context	<b>configure</b> <a href="#">system</a> <a href="#">grpc-tunnel</a> <a href="#">tunnel</a> <i>string</i> <a href="#">handler</a> <i>string</i> <a href="#">target-type</a> <a href="#">grpc-server</a>
Tree	<a href="#">grpc-server</a>
Description	When configured, this command assigns the gRPC server as a handler for all tunnels sessions. At the gRPC tunnel protocol level, this corresponds to a value of GNMI_GNOI.
Notes	The following elements are part of a choice: <b>custom-type</b> , <b>grpc-server</b> , or <b>ssh-server</b> .
Introduced	22.2.R1
Platforms	All

### **ssh-server**

Synopsis	Target type is SSH
Context	<b>configure</b> <a href="#">system</a> <a href="#">grpc-tunnel</a> <a href="#">tunnel</a> <i>string</i> <a href="#">handler</a> <i>string</i> <a href="#">target-type</a> <a href="#">ssh-server</a>
Tree	<a href="#">ssh-server</a>
Description	When configured, this command assigns the SSH server as a handler for all tunnels sessions. At the gRPC tunnel protocol level, this corresponds to a value of SSH.
Notes	The following elements are part of a choice: <b>custom-type</b> , <b>grpc-server</b> , or <b>ssh-server</b> .
Introduced	22.2.R1
Platforms	All

## target-name

Synopsis	Enter the <b>target-name</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">grpc-tunnel</a> <a href="#">tunnel</a> <i>string</i> <b>target-name</b>
Tree	<a href="#">target-name</a>
Introduced	22.2.R1
Platforms	All

## custom-string *string*

Synopsis	Custom target name
Context	<b>configure</b> <a href="#">system</a> <a href="#">grpc-tunnel</a> <a href="#">tunnel</a> <i>string</i> <b>target-name</b> <a href="#">custom-string</a> <i>string</i>
Tree	<a href="#">custom-string</a>
String Length	1 to 64
Notes	The following elements are part of a choice: <b>custom-string</b> , <b>node-name</b> , or <b>user-agent</b> .
Introduced	22.2.R1
Platforms	All

## node-name

Synopsis	Set the node name as target name
Context	<b>configure</b> <a href="#">system</a> <a href="#">grpc-tunnel</a> <a href="#">tunnel</a> <i>string</i> <b>target-name</b> <a href="#">node-name</a>
Tree	<a href="#">node-name</a>
Description	When configured, this command uses the node name as the target name. The node name is configured by the <b>configure system name</b> command.
Notes	The following elements are part of a choice: <b>custom-string</b> , <b>node-name</b> , or <b>user-agent</b> .
Introduced	22.2.R1
Platforms	All

## user-agent

Synopsis	Set the user agent as the target name
Context	<b>configure</b> <a href="#">system</a> <a href="#">grpc-tunnel</a> <a href="#">tunnel</a> <i>string</i> <b>target-name</b> <a href="#">user-agent</a>
Tree	<a href="#">user-agent</a>

Description	When configured, this command uses the user agent as the target name. The agent is a string consisting of <i>node-name:vendor.model:software-version</i> .
Notes	The following elements are part of a choice: <b>custom-string</b> , <b>node-name</b> , or <b>user-agent</b> .
Introduced	22.2.R1
Platforms	All

### **icmp-vse** *boolean*

Synopsis	Enable vendor-specific extensions to ICMP
Context	<b>configure</b> <a href="#">system icmp-vse</a> <i>boolean</i>
Tree	<a href="#">icmp-vse</a>
Default	false
Introduced	16.0.R1
Platforms	All

### **ip**

Synopsis	Enter the <b>ip</b> context
Context	<b>configure</b> <a href="#">system ip</a>
Tree	<a href="#">ip</a>
Introduced	16.0.R1
Platforms	All

### **allow-qinq-network-interface** *boolean*

Synopsis	Allow QinQ encapsulation for network interfaces
Context	<b>configure</b> <a href="#">system ip allow-qinq-network-interface</a> <i>boolean</i>
Tree	<a href="#">allow-qinq-network-interface</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **enforce-unique-if-index** *boolean*

Synopsis	Force creation of globally unique IP interface indexes
----------	--

---

Context	<b>configure system ip enforce-unique-if-index</b> <i>boolean</i>
Tree	<a href="#">enforce-unique-if-index</a>
Default	false
Introduced	16.0.R1
Platforms	All

### **forward-6in4** *boolean*

Synopsis	Allow forwarding of IPv6 over IPv4 to system IP address
Context	<b>configure system ip forward-6in4</b> <i>boolean</i>
Tree	<a href="#">forward-6in4</a>
Default	false
Introduced	19.10.R1
Platforms	All

### **forward-ip-over-gre** *boolean*

Synopsis	Allow forwarding of IP over GRE to system IP address
Context	<b>configure system ip forward-ip-over-gre</b> <i>boolean</i>
Tree	<a href="#">forward-ip-over-gre</a>
Default	false
Introduced	19.10.R1
Platforms	All

### **ipv6-eh** *keyword*

Synopsis	Number of IPv6 extension headers parsed in line cards
Context	<b>configure system ip ipv6-eh</b> <i>keyword</i>
Tree	<a href="#">ipv6-eh</a>
Options	max, limited
Default	max
Introduced	20.5.R1
Platforms	All

## mpls

Synopsis	Enter the <b>mpls</b> context
Context	<b>configure system ip mpls</b>
Tree	<a href="#">mpls</a>
Introduced	19.10.R3
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## label-stack-statistics-count *number*

Synopsis	Collect traffic statistics on labels of the MPLS stack
Context	<b>configure system ip mpls label-stack-statistics-count <i>number</i></b>
Tree	<a href="#">label-stack-statistics-count</a>
Range	1 to 2
Default	1
Introduced	19.10.R3
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## l2tp

Synopsis	Enter the <b>l2tp</b> context
Context	<b>configure system l2tp</b>
Tree	<a href="#">l2tp</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## non-multi-chassis-tunnel-id-range

Synopsis	Enter the <b>non-multi-chassis-tunnel-id-range</b> context
Context	<b>configure system l2tp non-multi-chassis-tunnel-id-range</b>
Tree	<a href="#">non-multi-chassis-tunnel-id-range</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**end number**

Synopsis	Upper bound of the range
Context	<b>configure system l2tp non-multi-chassis-tunnel-id-range end number</b>
Tree	<a href="#">end</a>
Range	0 to 16383
Default	16383
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**start number**

Synopsis	Lower bound of the range
Context	<b>configure system l2tp non-multi-chassis-tunnel-id-range start number</b>
Tree	<a href="#">start</a>
Range	0 to 16383
Default	1
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**lACP**

Synopsis	Enter the <b>lACP</b> context
Context	<b>configure system lACP</b>
Tree	<a href="#">lACP</a>
Introduced	16.0.R1
Platforms	All

**system-priority number**

Synopsis	LACP system priority on aggregated Ethernet interfaces
Context	<b>configure system lACP system-priority number</b>
Tree	<a href="#">system-priority</a>
Range	1 to 65535
Default	32768
Introduced	16.0.R1

Platforms All

## lldp

Synopsis Enter the **lldp** context  
 Context **configure system lldp**  
 Tree **lldp**  
 Introduced 16.0.R1  
 Platforms All

### **admin-state** *keyword*

Synopsis Administrative state of LLDP  
 Context **configure system lldp admin-state** *keyword*  
 Tree **admin-state**  
 Options enable, disable  
 Default enable  
 Introduced 16.0.R1  
 Platforms All

### **message-fast-tx** *number*

Synopsis Interval at which LLDP frames are transmitted  
 Context **configure system lldp message-fast-tx** *number*  
 Tree **message-fast-tx**  
 Description This command configures the interval at which LLDP frames are transmitted on behalf of the LLDP during a fast transmission period.  
 Range 1 to 3600  
 Units seconds  
 Default 1  
 Introduced 16.0.R1  
 Platforms All

**message-fast-tx-init** *number*

Synopsis	PDU's to transmit during the fast transmission period
Context	<b>configure</b> <a href="#">system lldp message-fast-tx-init</a> <i>number</i>
Tree	<a href="#">message-fast-tx-init</a>
Range	1 to 8
Default	4
Introduced	16.0.R1
Platforms	All

**notification-interval** *number*

Synopsis	Minimum interval between change notifications
Context	<b>configure</b> <a href="#">system lldp notification-interval</a> <i>number</i>
Tree	<a href="#">notification-interval</a>
Range	5 to 3600
Units	seconds
Default	5
Introduced	16.0.R1
Platforms	All

**reinit-delay** *number*

Synopsis	Time required before re-initializing LLDP on a port
Context	<b>configure</b> <a href="#">system lldp reinit-delay</a> <i>number</i>
Tree	<a href="#">reinit-delay</a>
Range	1 to 10
Units	seconds
Default	2
Introduced	16.0.R1
Platforms	All

**tx-credit-max** *number*

Synopsis	Maximum consecutive LLDPDUs that can be transmitted
Context	<b>configure</b> <a href="#">system lldp tx-credit-max</a> <i>number</i>

Tree	<a href="#">tx-credit-max</a>
Range	1 to 100
Default	5
Introduced	16.0.R1
Platforms	All

### **tx-hold-multiplier** *number*

Synopsis	Transmit interval multiplier
Context	<b>configure</b> <a href="#">system lldp tx-hold-multiplier</a> <i>number</i>
Tree	<a href="#">tx-hold-multiplier</a>
Range	2 to 10
Default	4
Introduced	16.0.R1
Platforms	All

### **tx-interval** *number*

Synopsis	LLDP transmit interval
Context	<b>configure</b> <a href="#">system lldp tx-interval</a> <i>number</i>
Tree	<a href="#">tx-interval</a>
Range	5 to 32768
Units	seconds
Default	30
Introduced	16.0.R1
Platforms	All

## **load-balancing**

Synopsis	Enter the <b>load-balancing</b> context
Context	<b>configure</b> <a href="#">system load-balancing</a>
Tree	<a href="#">load-balancing</a>
Description	Commands in this context configure the interface per-flow load-balancing options that apply to traffic entering this interface and egressing over a LAG or ECMP on system egress. This setting is per interface.

Load-balancing options configured at the interface level overwrite load-balancing options configured at the system level.

Introduced 16.0.R1  
 Platforms All

### **I2tp-load-balancing** *boolean*

Synopsis Include L2TP header information for load balancing  
 Context **configure** [system load-balancing i2tp-load-balancing](#) *boolean*  
 Tree [i2tp-load-balancing](#)  
 Default false  
 Introduced 16.0.R4  
 Platforms All

### **I4-load-balancing** *boolean*

Synopsis Use load balancing based on Layer 4 fields  
 Context **configure** [system load-balancing i4-load-balancing](#) *boolean*  
 Tree [i4-load-balancing](#)  
 Introduced 16.0.R1  
 Platforms All

### **lsr-load-balancing** *keyword*

Synopsis Algorithm for system-wide LSR load balancing  
 Context **configure** [system load-balancing lsr-load-balancing](#) *keyword*  
 Tree [lsr-load-balancing](#)  
 Options lbl-only, lbl-ip, ip-only, eth-encap-ip, lbl-ip-l4-teid, lbl-eth-ip-l4-teid, lbl-ip-or-teid  
 Introduced 16.0.R1  
 Platforms All

### **mc-enh-load-balancing** *boolean*

Synopsis Enable enhanced egress multicast load balancing  
 Context **configure** [system load-balancing mc-enh-load-balancing](#) *boolean*  
 Tree [mc-enh-load-balancing](#)

---

Default	false
Introduced	16.0.R1
Platforms	All

### **service-id-lag-hashing** *boolean*

Synopsis	Enable enhanced VLL LAG service ID hashing
Context	<b>configure</b> <a href="#">system load-balancing service-id-lag-hashing</a> <i>boolean</i>
Tree	<a href="#">service-id-lag-hashing</a>
Default	false
Introduced	16.0.R1
Platforms	All

### **system-ip-load-balancing** *boolean*

Synopsis	Use system IP address for ECMP and LAG load balancing
Context	<b>configure</b> <a href="#">system load-balancing system-ip-load-balancing</a> <i>boolean</i>
Tree	<a href="#">system-ip-load-balancing</a>
Introduced	16.0.R1
Platforms	All

### **location** *string*

Synopsis	Site location of the system
Context	<b>configure</b> <a href="#">system location</a> <i>string</i>
Tree	<a href="#">location</a>
String Length	1 to 80
Introduced	16.0.R1
Platforms	All

### **login-control**

Synopsis	Enter the <b>login-control</b> context
Context	<b>configure</b> <a href="#">system login-control</a>
Tree	<a href="#">login-control</a>

Introduced 16.0.R1  
Platforms All

### **exponential-backoff** *boolean*

Synopsis Enable exponential-backoff of the login prompt  
Context **configure** [system login-control exponential-backoff](#) *boolean*  
Tree [exponential-backoff](#)  
Default false  
Introduced 16.0.R1  
Platforms All

### **ftp**

Synopsis Enter the **ftp** context  
Context **configure** [system login-control ftp](#)  
Tree [ftp](#)  
Introduced 16.0.R1  
Platforms All

### **inbound-max-sessions** *number*

Synopsis Maximum number of concurrent inbound FTP sessions  
Context **configure** [system login-control ftp inbound-max-sessions](#) *number*  
Tree [inbound-max-sessions](#)  
Range 0 to 5  
Default 3  
Introduced 16.0.R1  
Platforms All

### **idle-timeout** (*keyword* | *number*)

Synopsis Idle timeout for FTP, console, or Telnet sessions  
Context **configure** [system login-control idle-timeout](#) (*keyword* | *number*)  
Tree [idle-timeout](#)

---

Range	1 to 1440
Units	minutes
Options	none
Default	30
Introduced	16.0.R1
Platforms	All

### **login-banner** *boolean*

Synopsis	Display login banner
Context	<b>configure</b> <a href="#">system</a> <a href="#">login-control</a> <a href="#">login-banner</a> <i>boolean</i>
Tree	<a href="#">login-banner</a>
Default	false
Introduced	16.0.R1
Platforms	All

### **login-scripts**

Synopsis	Enter the <b>login-scripts</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">login-control</a> <a href="#">login-scripts</a>
Tree	<a href="#">login-scripts</a>
Introduced	16.0.R1
Platforms	All

### **global-script** *string*

Synopsis	URL of the global CLI login script
Context	<b>configure</b> <a href="#">system</a> <a href="#">login-control</a> <a href="#">login-scripts</a> <a href="#">global-script</a> <i>string</i>
Tree	<a href="#">global-script</a>
String Length	1 to 180
Introduced	16.0.R1
Platforms	All

## per-user-script

Synopsis	Enter the <b>per-user-script</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">login-control</a> <a href="#">login-scripts</a> <a href="#">per-user-script</a>
Tree	<a href="#">per-user-script</a>
Introduced	16.0.R1
Platforms	All

## file-name *string*

Synopsis	File name of the per-user login script
Context	<b>configure</b> <a href="#">system</a> <a href="#">login-control</a> <a href="#">login-scripts</a> <a href="#">per-user-script</a> <a href="#">file-name</a> <i>string</i>
Tree	<a href="#">file-name</a>
String Length	1 to 180
Introduced	16.0.R1
Platforms	All

## user-directory *string*

Synopsis	Directory name of user-defined login script
Context	<b>configure</b> <a href="#">system</a> <a href="#">login-control</a> <a href="#">login-scripts</a> <a href="#">per-user-script</a> <a href="#">user-directory</a> <i>string</i>
Tree	<a href="#">user-directory</a>
String Length	1 to 180
Introduced	16.0.R1
Platforms	All

## motd

Synopsis	Enter the <b>motd</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">login-control</a> <a href="#">motd</a>
Tree	<a href="#">motd</a>
Introduced	16.0.R1
Platforms	All

### **text string**

Synopsis	Message of the day displayed after console login
Context	<b>configure</b> <a href="#">system</a> <a href="#">login-control</a> <a href="#">motd</a> <b>text</b> <i>string</i>
Tree	<a href="#">text</a>
String Length	1 to 900
Notes	The following elements are part of a choice: <b>text</b> or <b>url</b> .
Introduced	16.0.R1
Platforms	All

### **url string**

Synopsis	URL of the location of message of the day
Context	<b>configure</b> <a href="#">system</a> <a href="#">login-control</a> <a href="#">motd</a> <b>url</b> <i>string</i>
Tree	<a href="#">url</a>
String Length	1 to 180
Notes	The following elements are part of a choice: <b>text</b> or <b>url</b> .
Introduced	16.0.R1
Platforms	All

### **pre-login-message**

Synopsis	Enter the <b>pre-login-message</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">login-control</a> <a href="#">pre-login-message</a>
Tree	<a href="#">pre-login-message</a>
Description	Commands in this context configure a message to display before logging in to the router using Telnet, SSH, or the console port.  Only one message can be configured. If a new pre-login message is configured, the new message overwrites the previous message.  <b>Note:</b> The pre-login message is displayed on both active and standby systems.
Introduced	16.0.R1
Platforms	All

### **message string**

Synopsis	Message displayed before the login prompt
----------	---

Context	<b>configure system login-control pre-login-message message</b> <i>string</i>
Tree	<a href="#">message</a>
Description	This command configures the pre-login message. Any printable, 7-bit ASCII characters can be used. If the string contains special characters (#, \$, spaces, and so on), the entire string must be enclosed within double quotes. Some special characters can be used to format the message text. Use the newline (\n) character to create multiline messages. A newline (\n) character in the message moves to the beginning of the next line by sending ASCII/UTF-8 characters 0xA (LF) and 0xD (CR) to the client terminal. A carriage return (\r) character in the message sends the ASCII/UTF-8 character 0xD (CR) to the client terminal.
String Length	1 to 900
Introduced	16.0.R1
Platforms	All

**name** *boolean*

Synopsis	Display the system name before the pre-login message
Context	<b>configure system login-control pre-login-message name</b> <i>boolean</i>
Tree	<a href="#">name</a>
Default	false
Introduced	16.0.R1
Platforms	All

**ssh**

Synopsis	Enter the <b>ssh</b> context
Context	<b>configure system login-control ssh</b>
Tree	<a href="#">ssh</a>
Introduced	16.0.R1
Platforms	All

**graceful-shutdown** *boolean*

Synopsis	Allow graceful shutdown of SSH sessions
Context	<b>configure system login-control ssh graceful-shutdown</b> <i>boolean</i>
Tree	<a href="#">graceful-shutdown</a>
Default	true

Introduced 16.0.R1  
Platforms All

### **inbound-max-sessions** *number*

Synopsis Maximum number of concurrent inbound sessions  
Context **configure** [system login-control ssh inbound-max-sessions](#) *number*  
Tree [inbound-max-sessions](#)  
Range 0 to 50  
Default 5  
Introduced 16.0.R1  
Platforms All

### **outbound-max-sessions** *number*

Synopsis Maximum number of concurrent outbound sessions  
Context **configure** [system login-control ssh outbound-max-sessions](#) *number*  
Tree [outbound-max-sessions](#)  
Range 0 to 15  
Default 5  
Introduced 16.0.R1  
Platforms All

### **ttl-security** *number*

Synopsis Minimum TTL value for incoming packets  
Context **configure** [system login-control ssh ttl-security](#) *number*  
Tree [ttl-security](#)  
Range 1 to 255  
Introduced 16.0.R1  
Platforms All

### **telnet**

Synopsis Enter the **telnet** context

---

Context	<b>configure</b> <a href="#">system login-control telnet</a>
Tree	<a href="#">telnet</a>
Introduced	16.0.R1
Platforms	All

### **graceful-shutdown** *boolean*

Synopsis	Allow graceful shutdown of Telnet sessions
Context	<b>configure</b> <a href="#">system login-control telnet graceful-shutdown</a> <i>boolean</i>
Tree	<a href="#">graceful-shutdown</a>
Default	false
Introduced	16.0.R1
Platforms	All

### **inbound-max-sessions** *number*

Synopsis	Maximum number of concurrent inbound sessions
Context	<b>configure</b> <a href="#">system login-control telnet inbound-max-sessions</a> <i>number</i>
Tree	<a href="#">inbound-max-sessions</a>
Range	0 to 50
Default	5
Introduced	16.0.R1
Platforms	All

### **outbound-max-sessions** *number*

Synopsis	Maximum number of concurrent outbound sessions
Context	<b>configure</b> <a href="#">system login-control telnet outbound-max-sessions</a> <i>number</i>
Tree	<a href="#">outbound-max-sessions</a>
Range	0 to 15
Default	5
Introduced	16.0.R1
Platforms	All

### **ttl-security** *number*

Synopsis	Minimum TTL value for incoming packets
Context	<b>configure</b> <a href="#">system login-control telnet ttl-security</a> <i>number</i>
Tree	<a href="#">ttl-security</a>
Range	1 to 255
Introduced	16.0.R1
Platforms	All

### **management-interface**

Synopsis	Enter the <b>management-interface</b> context
Context	<b>configure</b> <a href="#">system management-interface</a>
Tree	<a href="#">management-interface</a>
Description	Commands in this context configure the capabilities of router management interfaces such as CLI and NETCONF.
Introduced	16.0.R1
Platforms	All

### **cli**

Synopsis	Enter the <b>cli</b> context
Context	<b>configure</b> <a href="#">system management-interface cli</a>
Tree	<a href="#">cli</a>
Description	Commands in this context configure the CLI management interfaces.
Introduced	16.0.R1
Platforms	All

### **classic-cli**

Synopsis	Enter the <b>classic-cli</b> context
Context	<b>configure</b> <a href="#">system management-interface cli classic-cli</a>
Tree	<a href="#">classic-cli</a>
Description	Commands in this context configure the classic CLI management interface.
Introduced	16.0.R1
Platforms	All

### **allow-immediate** *boolean*

Synopsis	Allow writable access in classic CLI configure branch
Context	<b>configure</b> <a href="#">system management-interface cli classic-cli allow-immediate</a> <i>boolean</i>
Tree	<a href="#">allow-immediate</a>
Description	<p>When configured to <b>true</b>, this command enables write access in the classic CLI configuration branch without having to use the classic CLI <b>candidate edit</b> functionality.</p> <p>When configured to <b>false</b>, this command blocks write access and configuration changes in the classic CLI configuration branch, and the classic CLI configuration branch is read-only. This enforces using the classic CLI <b>candidate edit</b> functionality, including <b>candidate commit</b>, to modify the router configuration, instead of allowing immediate line-by-line configuration changes.</p>
Default	true
Introduced	16.0.R1
Platforms	All

### **rollback**

Synopsis	Enter the <b>rollback</b> context
Context	<b>configure</b> <a href="#">system management-interface cli classic-cli rollback</a>
Tree	<a href="#">rollback</a>
Description	Commands in this context control classic CLI configuration rollback functionality, such as the maximum number of rollback checkpoints the system maintains. Configuration rollback allows the operator to revert to previous router configuration states while minimizing impacts to services.
Introduced	16.0.R1
Platforms	All

### **local-checkpoints** *number*

Synopsis	Maximum number of rollback files on local storage
Context	<b>configure</b> <a href="#">system management-interface cli classic-cli rollback local-checkpoints</a> <i>number</i>
Tree	<a href="#">local-checkpoints</a>
Range	1 to 50
Default	10
Introduced	16.0.R1

Platforms All

### **location** *string*

Synopsis Path and filename prefix for rollback checkpoint files

Context **configure** [system](#) [management-interface](#) [cli](#) [classic-cli](#) [rollback](#) [location](#) *string*

Tree [location](#)

Description This command configures the local (for example, compact flash) or remote location and name of the classic CLI rollback checkpoint files. The filename must not contain a suffix. The suffixes for rollback checkpoint files are, for example, .rb, .rb.1, .rb.2, and so on. The suffixes are automatically appended to rollback checkpoint files.

String Length 1 to 180

Introduced 16.0.R1

Platforms All

### **remote-checkpoints** *number*

Synopsis Maximum rollback files saved at a remote location

Context **configure** [system](#) [management-interface](#) [cli](#) [classic-cli](#) [rollback](#) [remote-checkpoints](#) *number*

Tree [remote-checkpoints](#)

Range 1 to 200

Default 10

Introduced 16.0.R1

Platforms All

### **rescue**

Synopsis Enter the **rescue** context

Context **configure** [system](#) [management-interface](#) [cli](#) [classic-cli](#) [rollback](#) [rescue](#)

Tree [rescue](#)

Introduced 16.0.R1

Platforms All

### **location string**

Synopsis	Location of the rescue configuration file
Context	<b>configure</b> <a href="#">system management-interface cli classic-cli rollback rescue location string</a>
Tree	<a href="#">location</a>
Description	This command configures the local or remote location and filename of the classic CLI rescue configuration file. The suffix (.rc) is automatically appended to the filename when a rescue configuration file is saved. Trivial FTP (TFTP) is not supported for remote locations.
String Length	1 to 180
Introduced	16.0.R1
Platforms	All

### **cli-engine keyword**

Synopsis	System-wide CLI engine access
Context	<b>configure</b> <a href="#">system management-interface cli cli-engine keyword</a>
Tree	<a href="#">cli-engine</a>
Description	This command configures the system-wide CLI engine. The operator can configure one or both engines. For the configuration to take effect, exit the running CLI session and start a new session after committing the new value.
Options	classic-cli, md-cli
Max. Instances	2
Notes	This element is ordered by the user.
Introduced	16.0.R1
Platforms	All

### **md-cli**

Synopsis	Enter the <b>md-cli</b> context
Context	<b>configure</b> <a href="#">system management-interface cli md-cli</a>
Tree	<a href="#">md-cli</a>
Description	Commands in this context configure the MD-CLI management interface.
Introduced	16.0.R1
Platforms	All

## **auto-config-save** *boolean*

Synopsis	Automatically save configuration as part of commit
Context	<b>configure</b> <a href="#">system management-interface cli md-cli auto-config-save</a> <i>boolean</i>
Tree	<a href="#">auto-config-save</a>
Description	When configured to <b>true</b> , the system automatically writes the running configuration to the save configuration file as part of a successful commit operation.
Default	true
Introduced	16.0.R1
Platforms	All

## **environment**

Synopsis	Enter the <b>environment</b> context
Context	<b>configure</b> <a href="#">system management-interface cli md-cli environment</a>
Tree	<a href="#">environment</a>
Introduced	16.0.R1
Platforms	All

## **command-alias**

Synopsis	Enter the <b>command-alias</b> context
Context	<b>configure</b> <a href="#">system management-interface cli md-cli environment command-alias</a>
Tree	<a href="#">command-alias</a>
Introduced	21.7.R1
Platforms	All

## **alias** [[alias-name](#)] *string*

Synopsis	Enter the <b>alias</b> list instance
Context	<b>configure</b> <a href="#">system management-interface cli md-cli environment command-alias alias</a> <i>string</i>
Tree	<a href="#">alias</a>
Description	Commands in this context create aliases to existing MD-CLI commands or to Python applications.

Aliases may be mounted for use globally or for selected context paths. Arguments and output modifiers may be provided to aliases at configuration or run time.

Introduced	21.7.R1
Platforms	All

### **[alias-name]** *string*

Synopsis	Alias name
Context	<b>configure</b> <a href="#">system</a> <a href="#">management-interface cli</a> <a href="#">md-cli</a> <a href="#">environment</a> <a href="#">command-alias</a> <a href="#">alias</a> <i>string</i>
Tree	<a href="#">alias</a>
String Length	1 to 64
Notes	This element is part of a list key.
Introduced	21.7.R1
Platforms	All

### **admin-state** *keyword*

Synopsis	Administrative state of the alias
Context	<b>configure</b> <a href="#">system</a> <a href="#">management-interface cli</a> <a href="#">md-cli</a> <a href="#">environment</a> <a href="#">command-alias</a> <a href="#">alias</a> <i>string</i> <b>admin-state</b> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Description	This command controls the administrative state of the MD-CLI alias.  MD-CLI aliases that are administratively disabled cannot be executed, are not displayed in command completion, and do not appear in ? help.
Options	enable, disable
Default	disable
Introduced	21.10.R1
Platforms	All

### **cli-command** *string*

Synopsis	CLI command to run when executing the alias
Context	<b>configure</b> <a href="#">system</a> <a href="#">management-interface cli</a> <a href="#">md-cli</a> <a href="#">environment</a> <a href="#">command-alias</a> <a href="#">alias</a> <i>string</i> <b>cli-command</b> <i>string</i>
Tree	<a href="#">cli-command</a>

String Length	1 to 255
Notes	The following elements are part of a mandatory choice: <b>cli-command</b> or <b>python-script</b> .
Introduced	21.7.R1
Platforms	All

### **description** *string*

Synopsis	Alias description
Context	<b>configure</b> <a href="#">system</a> <a href="#">management-interface</a> <a href="#">cli</a> <a href="#">md-cli</a> <a href="#">environment</a> <a href="#">command-alias</a> <a href="#">alias</a> <i>string</i> <a href="#">description</a> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 110
Introduced	21.7.R1
Platforms	All

### **mount-point** [[path](#)] (*keyword* | *string*)

Synopsis	Add a list entry for <b>mount-point</b>
Context	<b>configure</b> <a href="#">system</a> <a href="#">management-interface</a> <a href="#">cli</a> <a href="#">md-cli</a> <a href="#">environment</a> <a href="#">command-alias</a> <a href="#">alias</a> <i>string</i> <a href="#">mount-point</a> ( <i>keyword</i>   <i>string</i> )
Tree	<a href="#">mount-point</a>
Min. Instances	1
Introduced	21.7.R1
Platforms	All

### [[path](#)] (*keyword* | *string*)

Synopsis	Mount point where the alias is available
Context	<b>configure</b> <a href="#">system</a> <a href="#">management-interface</a> <a href="#">cli</a> <a href="#">md-cli</a> <a href="#">environment</a> <a href="#">command-alias</a> <a href="#">alias</a> <i>string</i> <a href="#">mount-point</a> ( <i>keyword</i>   <i>string</i> )
Tree	<a href="#">mount-point</a>
String Length	1 to 255
Options	global
Notes	This element is part of a list key.
Introduced	21.7.R1

Platforms All

### **python-script** *reference*

Synopsis Python script to run when executing the alias

Context **configure** [system](#) [management-interface](#) [cli](#) [md-cli](#) [environment](#) [command-alias](#) [alias](#) [string](#) **python-script** *reference*

Tree [python-script](#)

Reference **configure** [python](#) [python-script](#) *string*

Notes The following elements are part of a mandatory choice: **cli-command** or **python-script**.

Introduced 21.7.R1

Platforms All

### **command-completion**

Synopsis Enter the **command-completion** context

Context **configure** [system](#) [management-interface](#) [cli](#) [md-cli](#) [environment](#) [command-completion](#)

Tree [command-completion](#)

Introduced 16.0.R1

Platforms All

### **enter** *boolean*

Synopsis Complete the command when the Enter key is pressed

Context **configure** [system](#) [management-interface](#) [cli](#) [md-cli](#) [environment](#) [command-completion](#) [enter](#) *boolean*

Tree [enter](#)

Default true

Introduced 16.0.R1

Platforms All

### **space** *boolean*

Synopsis Complete the command when the Space key is pressed

Context **configure** [system](#) [management-interface](#) [cli](#) [md-cli](#) [environment](#) [command-completion](#) [space](#) *boolean*

Tree	<a href="#">space</a>
Default	true
Introduced	16.0.R1
Platforms	All

**tab** *boolean*

Synopsis	Complete the command when the Tab key is pressed
Context	<b>configure</b> <a href="#">system management-interface cli md-cli environment command-completion tab boolean</a>
Tree	<a href="#">tab</a>
Default	true
Introduced	16.0.R1
Platforms	All

**console**

Synopsis	Enter the <b>console</b> context
Context	<b>configure</b> <a href="#">system management-interface cli md-cli environment console</a>
Tree	<a href="#">console</a>
Introduced	16.0.R1
Platforms	All

**length** *number*

Synopsis	Number of lines displayed on the console
Context	<b>configure</b> <a href="#">system management-interface cli md-cli environment console length number</a>
Tree	<a href="#">length</a>
Range	24 to 512
Default	24
Introduced	16.0.R1
Platforms	All

**width** *number*

Synopsis	Number of columns displayed on the console
----------	--

Context	<b>configure</b> <a href="#">system</a> <a href="#">management-interface</a> <a href="#">cli</a> <a href="#">md-cli</a> <a href="#">environment</a> <a href="#">console</a> <a href="#">width</a> <i>number</i>
Tree	<a href="#">width</a>
Range	80 to 512
Default	80
Introduced	16.0.R1
Platforms	All

## info-output

Synopsis	Enter the <b>info-output</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">management-interface</a> <a href="#">cli</a> <a href="#">md-cli</a> <a href="#">environment</a> <a href="#">info-output</a>
Tree	<a href="#">info-output</a>
Introduced	22.2.R1
Platforms	All

## always-display

Synopsis	Enter the <b>always-display</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">management-interface</a> <a href="#">cli</a> <a href="#">md-cli</a> <a href="#">environment</a> <a href="#">info-output</a> <a href="#">always-display</a>
Tree	<a href="#">always-display</a>
Description	Commands in this context specify elements that are always displayed in the <b>info</b> output, regardless of whether the <b>detail</b> option is used.
Introduced	22.2.R1
Platforms	All

## admin-state *boolean*

Synopsis	Always display admin-state elements
Context	<b>configure</b> <a href="#">system</a> <a href="#">management-interface</a> <a href="#">cli</a> <a href="#">md-cli</a> <a href="#">environment</a> <a href="#">info-output</a> <a href="#">always-display</a> <a href="#">admin-state</a> <i>boolean</i>
Tree	<a href="#">admin-state</a>
Description	When configured to <b>true</b> , the values of the <b>admin-state</b> elements in <b>info</b> output (without the <b>detail</b> option) are always displayed, even if they are the default values.
Default	false
Introduced	22.2.R1

Platforms All

## message-severity-level

Synopsis Enter the **message-severity-level** context

Context **configure** [system](#) [management-interface](#) [cli](#) [md-cli](#) [environment](#) [message-severity-level](#)

Tree [message-severity-level](#)

Introduced 16.0.R1

Platforms All

## cli keyword

Synopsis Message severity threshold for CLI messages

Context **configure** [system](#) [management-interface](#) [cli](#) [md-cli](#) [environment](#) [message-severity-level](#)  
[cli](#) *keyword*

Tree [cli](#)

Options warning, info

Default info

Introduced 16.0.R1

Platforms All

## more boolean

Synopsis Activate the pager when output is longer than a screen

Context **configure** [system](#) [management-interface](#) [cli](#) [md-cli](#) [environment](#) [more](#) *boolean*

Tree [more](#)

Default true

Introduced 16.0.R1

Platforms All

## progress-indicator

Synopsis Enter the **progress-indicator** context

Context **configure** [system](#) [management-interface](#) [cli](#) [md-cli](#) [environment](#) [progress-indicator](#)

Tree [progress-indicator](#)

Introduced 16.0.R1

Platforms All

### **admin-state** *keyword*

Synopsis Administrative state of the progress indicator

Context **configure** [system](#) [management-interface cli](#) [md-cli](#) [environment](#) [progress-indicator](#)  
[admin-state](#) *keyword*

Tree [admin-state](#)

Options enable, disable

Default enable

Introduced 16.0.R1

Platforms All

### **delay** *number*

Synopsis Delay before the progress indicator is displayed

Context **configure** [system](#) [management-interface cli](#) [md-cli](#) [environment](#) [progress-indicator](#)  
[delay](#) *number*

Tree [delay](#)

Range 0 to 10000

Units milliseconds

Default 1000

Introduced 16.0.R1

Platforms All

### **type** *keyword*

Synopsis Progress indicator output style

Context **configure** [system](#) [management-interface cli](#) [md-cli](#) [environment](#) [progress-indicator](#) [type](#)  
[keyword](#)

Tree [type](#)

Options dots

Default dots

Introduced 16.0.R1

Platforms All

## prompt

Synopsis	Enter the <b>prompt</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">management-interface</a> <a href="#">cli</a> <a href="#">md-cli</a> <a href="#">environment</a> <a href="#">prompt</a>
Tree	<a href="#">prompt</a>
Introduced	16.0.R1
Platforms	All

## context *boolean*

Synopsis	Show the current command context in the prompt
Context	<b>configure</b> <a href="#">system</a> <a href="#">management-interface</a> <a href="#">cli</a> <a href="#">md-cli</a> <a href="#">environment</a> <a href="#">prompt</a> <a href="#">context</a> <i>boolean</i>
Tree	<a href="#">context</a>
Default	true
Introduced	16.0.R1
Platforms	All

## newline *boolean*

Synopsis	Add a new line before every prompt line
Context	<b>configure</b> <a href="#">system</a> <a href="#">management-interface</a> <a href="#">cli</a> <a href="#">md-cli</a> <a href="#">environment</a> <a href="#">prompt</a> <a href="#">newline</a> <i>boolean</i>
Tree	<a href="#">newline</a>
Default	true
Introduced	16.0.R1
Platforms	All

## timestamp *boolean*

Synopsis	Show the timestamp before the first prompt line
Context	<b>configure</b> <a href="#">system</a> <a href="#">management-interface</a> <a href="#">cli</a> <a href="#">md-cli</a> <a href="#">environment</a> <a href="#">prompt</a> <a href="#">timestamp</a> <i>boolean</i>
Tree	<a href="#">timestamp</a>
Default	false
Introduced	16.0.R1
Platforms	All

### **uncommitted-changes-indicator** *boolean*

Synopsis	Show an asterisk (*) when uncommitted changes exist
Context	<b>configure</b> <a href="#">system</a> <a href="#">management-interface</a> <a href="#">cli</a> <a href="#">md-cli</a> <a href="#">environment</a> <a href="#">prompt</a> <a href="#">uncommitted-changes-indicator</a> <i>boolean</i>
Tree	<a href="#">uncommitted-changes-indicator</a>
Default	true
Introduced	16.0.R1
Platforms	All

### **python**

Synopsis	Enter the <b>python</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">management-interface</a> <a href="#">cli</a> <a href="#">md-cli</a> <a href="#">environment</a> <a href="#">python</a>
Tree	<a href="#">python</a>
Description	Commands in this context customize Python settings used with the Python 3 interpreter in MD-CLI applications such as pyexec, command aliases, EHS, and CRON.
Introduced	21.10.R1
Platforms	All

### **memory-reservation** *number*

Synopsis	Memory reserved per Python interpreter
Context	<b>configure</b> <a href="#">system</a> <a href="#">management-interface</a> <a href="#">cli</a> <a href="#">md-cli</a> <a href="#">environment</a> <a href="#">python</a> <a href="#">memory-reservation</a> <i>number</i>
Tree	<a href="#">memory-reservation</a>
Range	1 to 500
Units	megabytes
Introduced	21.10.R1
Platforms	All

### **minimum-available-memory** *number*

Synopsis	Minimum memory requirement to run a Python interpreter
Context	<b>configure</b> <a href="#">system</a> <a href="#">management-interface</a> <a href="#">cli</a> <a href="#">md-cli</a> <a href="#">environment</a> <a href="#">python</a> <a href="#">minimum-available-memory</a> <i>number</i>

Tree	<a href="#">minimum-available-memory</a>
Range	5 to 50
Units	percent
Introduced	21.10.R1
Platforms	All

### **timeout** *number*

Synopsis	Maximum run time before a Python application is stopped
Context	<b>configure</b> <a href="#">system management-interface cli md-cli environment python timeout</a> <i>number</i>
Tree	<a href="#">timeout</a>
Range	30 to 86400
Units	seconds
Default	3600
Introduced	21.10.R1
Platforms	All

### **time-display** *keyword*

Synopsis	Time zone to display time
Context	<b>configure</b> <a href="#">system management-interface cli md-cli environment time-display</a> <i>keyword</i>
Tree	<a href="#">time-display</a>
Description	<p>This command configures the time zone for a timestamp displayed in outputs, such as event logs and <b>show</b> commands for the current CLI session.</p> <p>In event logs, the selected time is used to control the timestamps in the CLI output of <b>show log log-id</b> and in YANG state in the /state/log/log-id branch (for logs such as session, cli, memory, SNMP, and NETCONF).</p> <p>Also see the <b>configure log log-id time-format</b> command.</p>
Options	local, utc
Default	local
Introduced	16.0.R1
Platforms	All

### **time-format** *keyword*

Synopsis	Format to display the date and time
----------	-------------------------------------

Context	<b>configure system management-interface cli md-cli environment time-format</b> <i>keyword</i>
Tree	<a href="#">time-format</a>
Description	This command specifies the format of the time display in the prompt, configuration, state, and certain <b>show</b> command output in the current CLI session.
Options	iso-8601, rfc-1123, rfc-3339
Default	rfc-3339
Introduced	20.5.R1
Platforms	All

### **commit-history** *number*

Synopsis	Number of commit history IDs to store
Context	<b>configure system management-interface commit-history</b> <i>number</i>
Tree	<a href="#">commit-history</a>
Description	This command sets the number of IDs to store in the commit history. Setting the value to 0 disables the commit history.
Range	0 to 200
Default	50
Introduced	21.10.R1
Platforms	All

### **configuration-mode** *keyword*

Synopsis	Management interfaces allowed to edit the configuration
Context	<b>configure system management-interface configuration-mode</b> <i>keyword</i>
Tree	<a href="#">configuration-mode</a>
Description	<p>This command controls which of the classic or model-driven management interfaces can modify the configuration of the router.</p> <p>Any management interface can be used in any configuration mode (to gather state information or perform operations, for example), but only specific management interfaces (CLI, NETCONF, and so on) are allowed to edit the configuration of the router in different modes. For example, only classic CLI and SNMP can be used to edit the configuration when in classic mode.</p>
Options	classic, model-driven, mixed
Introduced	16.0.R1
Platforms	All

**configuration-save**

Synopsis	Enter the <b>configuration-save</b> context
Context	<b>configure</b> <a href="#">system management-interface configuration-save</a>
Tree	<a href="#">configuration-save</a>
Description	Commands in this context configure the attributes for saved configuration files.
Introduced	16.0.R1
Platforms	All

**configuration-backups** *number*

Synopsis	Maximum number of configuration versions maintained
Context	<b>configure</b> <a href="#">system management-interface configuration-save configuration-backups</a> <i>number</i>
Tree	<a href="#">configuration-backups</a>
Description	<p>This command configures the maximum number of saved configuration file versions the router maintains.</p> <p>When the configuration is saved, configuration file names are appended with a numeric extension. Each subsequent configuration save creates a new configuration file version with an incremented numeric extension until the maximum count is reached, after which the next configuration save overwrites the oldest file version.</p> <p>Each persistent index file is updated at the same time as the associated configuration file. The system synchronizes the active and standby CPM for all configurations and their associated persistent index files.</p>
Range	1 to 200
Default	50
Introduced	16.0.R1
Platforms	All

**incremental-saves** *boolean*

Synopsis	Use incremental saved configuration files
Context	<b>configure</b> <a href="#">system management-interface configuration-save incremental-saves</a> <i>boolean</i>
Tree	<a href="#">incremental-saves</a>
Description	When configured to <b>true</b> , the system saves each commit to the <b>configure</b> configuration region in a separate incremental saved configuration file, which allows for faster commits, instead of saving a complete saved configuration file each time.

---

Default	true
Introduced	22.7.R1
Platforms	All

## **netconf**

Synopsis	Enter the <b>netconf</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">management-interface</a> <a href="#">netconf</a>
Tree	<a href="#">netconf</a>
Introduced	16.0.R1
Platforms	All

## **admin-state** *keyword*

Synopsis	Administrative state of NETCONF
Context	<b>configure</b> <a href="#">system</a> <a href="#">management-interface</a> <a href="#">netconf</a> <a href="#">admin-state</a> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	16.0.R1
Platforms	All

## **auto-config-save** *boolean*

Synopsis	Automatically save configuration as part of commit
Context	<b>configure</b> <a href="#">system</a> <a href="#">management-interface</a> <a href="#">netconf</a> <a href="#">auto-config-save</a> <i>boolean</i>
Tree	<a href="#">auto-config-save</a>
Description	When configured to <b>true</b> , the system automatically writes the running configuration to the save configuration file as part of a successful commit operation.
Default	true
Introduced	16.0.R1
Platforms	All

## capabilities

Synopsis	Enter the <b>capabilities</b> context
Context	<b>configure system management-interface netconf capabilities</b>
Tree	<a href="#">capabilities</a>
Description	Commands in this context configure explicit capabilities for the NETCONF server.
Introduced	16.0.R1
Platforms	All

## candidate *boolean*

Synopsis	Allow the NETCONF server to access candidate datastore
Context	<b>configure system management-interface netconf capabilities candidate <i>boolean</i></b>
Tree	<a href="#">candidate</a>
Description	<p>When configured to <b>true</b>, this command allows the SR OS NETCONF server to access the candidate configuration datastore. Configuring this command to <b>true</b> also enables using <b>commit</b> and <b>discard-changes</b>.</p> <p>When <b>configure system management-interface configuration-mode</b> is set to <b>classic</b>, the candidate capability is disabled, even if this command is configured to <b>true</b>.</p> <p>When configured to <b>false</b>, this command disables the SR OS NETCONF server from accessing the candidate datastore. If the candidate is disabled, requests that reference the candidate datastore return an error, and when a NETCONF client establishes a new session, the candidate capability is not advertised in the SR OS NETCONF Hello message.</p>
Default	true
Introduced	16.0.R1
Platforms	All

## delay-on-boot *number*

Synopsis	Delay for NETCONF connections after system boot
Context	<b>configure system management-interface netconf delay-on-boot <i>number</i></b>
Tree	<a href="#">delay-on-boot</a>
Description	<p>This command configures the delay timer for NETCONF connections. When the timer expires, NETCONF becomes operational and connections are accepted. This delay prevents automation from managing the system while it is still converging.</p> <p>When no delay is configured, connections are accepted after the system boots and NETCONF becomes operational.</p>

Range	1 to 3600
Units	seconds
Introduced	23.10.R1
Platforms	All

### **port number**

Synopsis	Port on which NETCONF server listens for connections
Context	<b>configure</b> <a href="#">system management-interface netconf port number</a>
Tree	<a href="#">port</a>
Description	<p>This command specifies the port on which the SR OS NETCONF server listens for new connections. One port can be configured for NETCONF management.</p> <p>The configured port applies to both non-VPRN and VPRN management. New NETCONF connections are able to use the configured port.</p> <p>For NETCONF connections not using VPRN management, active NETCONF connections are not disconnected if the connection port changes. For NETCONF connections using VPRN management, active NETCONF connections are disconnected if the connection port changes.</p>
Range	22   830
Default	830
Introduced	19.10.R1
Platforms	All

### **operations**

Synopsis	Enter the <b>operations</b> context
Context	<b>configure</b> <a href="#">system management-interface operations</a>
Tree	<a href="#">operations</a>
Description	Commands in this context configure parameters associated with operational commands in model-driven interfaces.
Introduced	21.5.R1
Platforms	All

### **global-timeouts**

Synopsis	Enter the <b>global-timeouts</b> context
Context	<b>configure</b> <a href="#">system management-interface operations global-timeouts</a>

Tree	<a href="#">global-timeouts</a>
Description	<p>Commands in this context configure system timeout parameters for operational commands.</p> <p>Timeout parameters provide default system-level control for various types of operational commands in model-driven interfaces. The timeout values are used when specific execution and retention timeouts are not requested for a specific operation.</p>
Introduced	21.5.R1
Platforms	All

### **asynchronous-execution** (*number* | *keyword*)

Synopsis	Timeout for asynchronous operation execution
Context	<b>configure</b> <a href="#">system management-interface operations global-timeouts asynchronous-execution</a> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">asynchronous-execution</a>
Description	<p>This command configures the period of time that operations launched as “asynchronous” are allowed to execute before being automatically stopped by the SR OS.</p> <p>An asynchronous operation is not deleted from the system when it is stopped. See the <b>asynchronous-retention</b> command.</p> <p>If a specific execution timeout is not included in the request for a particular asynchronous operation, this system-level timeout applies.</p> <p><b>Note:</b> This execution timeout is part of the general global operations infrastructure and is separate and independent from any operation-specific timeouts (for example, the <b>ping</b> operation also has its own timeout parameter).</p>
Range	1 to 604800
Units	seconds
Options	never
Default	3600
Introduced	21.5.R1
Platforms	All

### **asynchronous-retention** (*number* | *keyword*)

Synopsis	Timeout for asynchronous operation data retention
Context	<b>configure</b> <a href="#">system management-interface operations global-timeouts asynchronous-retention</a> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">asynchronous-retention</a>

Description	This command configures the period of time that data related to operations launched as “asynchronous” is retained in the system. After the retention timeout expires, all information related to the operation is deleted, including any status information and result data.  If a specific retention timeout is not included in the request for a particular asynchronous operation, this system-level timeout applies.
Range	1 to 604800
Units	seconds
Options	never
Default	86400
Introduced	21.5.R1
Platforms	All

### **synchronous-execution** (*number* | *keyword*)

Synopsis	Timeout for synchronous operation execution
Context	<b>configure</b> <a href="#">system management-interface operations global-timeouts synchronous-execution</a> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">synchronous-execution</a>
Description	This command configures the period of time that operations launched as “synchronous” (the default method for all operations) are allowed to execute before they are automatically stopped, and their associated data is deleted.  If a specific execution timeout is not included in the request for a particular synchronous operation, this system-level timeout applies.  <b>Note:</b> This execution timeout is part of the general global operations infrastructure and is separate and independent from any operation-specific timeouts (for example, the <b>ping</b> operation also has its own timeout parameter).  <b>Caution:</b> If this command is set with a specific time value, MD-CLI operations are subject to the timeout and are interrupted if they execute longer than the time value. This situation can arise because the timeout also applies to operations requested in the MD-CLI interface (for example, <b>ping</b> , <b>file dir</b> , and so on).
Range	1 to 604800
Units	seconds
Options	never
Default	never
Introduced	21.5.R1
Platforms	All

## remote-management

Synopsis	Enter the <b>remote-management</b> context
Context	<b>configure</b> <a href="#">system management-interface remote-management</a>
Tree	<a href="#">remote-management</a>
Description	Commands in this context configure the SR OS node to use the remote management service. Configuring remote management enables the SR OS node to report itself to a remote manager service running on a remote server, so that it is included in the dynamic list of available nodes. The manager service streamlines the management of multiple SR OS nodes running different SR OS versions using the same client application providing a similar shell to the MD-CLI.
Introduced	20.5.R1
Platforms	All

## admin-state *keyword*

Synopsis	Administrative state of remote management registration
Context	<b>configure</b> <a href="#">system management-interface remote-management admin-state</a> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	20.5.R1
Platforms	All

## allow-unsecure-connection

Synopsis	Allow connection without secured transport protocol
Context	<b>configure</b> <a href="#">system management-interface remote-management allow-unsecure-connection</a>
Tree	<a href="#">allow-unsecure-connection</a>
Description	When configured, this command allows an unsecured connection to remote managers; TCP connections are not encrypted, including username and password information.
Notes	The following elements are part of a choice: <b>allow-unsecure-connection</b> or <b>client-tls-profile</b> .
Introduced	20.5.R1
Platforms	All

**client-tls-profile** *reference*

Synopsis	TLS client profile name
Context	<b>configure</b> <a href="#">system</a> <a href="#">management-interface</a> <a href="#">remote-management</a> <a href="#">client-tls-profile</a> <i>reference</i>
Tree	<a href="#">client-tls-profile</a>
Description	This command specifies the client TLS profile to all remote managers.
Reference	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">tls</a> <a href="#">client-tls-profile</a> <i>string</i>
Notes	The following elements are part of a choice: <b>allow-unsecure-connection</b> or <b>client-tls-profile</b> .
Introduced	20.5.R1
Platforms	All

**connection-timeout** *number*

Synopsis	Time without a response before manager declared down
Context	<b>configure</b> <a href="#">system</a> <a href="#">management-interface</a> <a href="#">remote-management</a> <a href="#">connection-timeout</a> <i>number</i>
Tree	<a href="#">connection-timeout</a>
Range	1 to 3600
Units	seconds
Default	60
Introduced	20.5.R1
Platforms	All

**delay-on-boot** *number*

Synopsis	Delay for remote management after system boot
Context	<b>configure</b> <a href="#">system</a> <a href="#">management-interface</a> <a href="#">remote-management</a> <a href="#">delay-on-boot</a> <i>number</i>
Tree	<a href="#">delay-on-boot</a>
Description	<p>This command configures the delay timer for remote management connections over gRPC. When the timer expires, remote management becomes operational and connections are accepted. This delay prevents automation from managing the system while it is still converging.</p> <p>When no delay is configured, remote management connections are accepted after the system boots and gRPC becomes operational.</p>
Range	1 to 3600

Units	seconds
Introduced	23.10.R1
Platforms	All

### **device-label** *string*

Synopsis	Device label supplied to the remote manager
Context	<b>configure</b> <a href="#">system</a> <a href="#">management-interface</a> <a href="#">remote-management</a> <b>device-label</b> <i>string</i>
Tree	<a href="#">device-label</a>
Description	This command specifies a metadata label that is supplied to the manager. This label is used to group devices or network nodes with a common purpose or goal.
String Length	1 to 64
Introduced	20.5.R1
Platforms	All

### **device-name** *string*

Synopsis	Device name supplied to the remote manager
Context	<b>configure</b> <a href="#">system</a> <a href="#">management-interface</a> <a href="#">remote-management</a> <b>device-name</b> <i>string</i>
Tree	<a href="#">device-name</a>
Description	This command specifies a device name that is supplied to the manager. The name identifies a specific SR OS node in the network.  When unconfigured, the default system name is used.
String Length	1 to 64
Introduced	20.5.R1
Platforms	All

### **hello-interval** *number*

Synopsis	Time between hello messages from SR OS node to manager
Context	<b>configure</b> <a href="#">system</a> <a href="#">management-interface</a> <a href="#">remote-management</a> <b>hello-interval</b> <i>number</i>
Tree	<a href="#">hello-interval</a>
Range	10 to 216000
Units	seconds
Default	600

Introduced 20.5.R1  
 Platforms All

### **manager** [[manager-name](#)] *string*

Synopsis Enter the **manager** list instance

Context **configure** [system management-interface remote-management manager](#) *string*

Tree [manager](#)

Description Commands in this context configure options for a specific manager.  
 Commands configured in this context take precedence over command values specified directly in the **configure management-interface remote-management** context.  
 If a command is not configured in this context, the command setting is inherited from the higher level context.

Max. Instances 2

Introduced 20.5.R1

Platforms All

### **[manager-name]** *string*

Synopsis Remote management manager name

Context **configure** [system management-interface remote-management manager](#) *string*

Tree [manager](#)

String Length 1 to 64

Notes This element is part of a list key.

Introduced 20.5.R1

Platforms All

### **admin-state** *keyword*

Synopsis Administrative state of remote management registration

Context **configure** [system management-interface remote-management manager](#) *string* [admin-state](#) *keyword*

Tree [admin-state](#)

Options enable, disable

Default disable

Introduced	20.5.R1
Platforms	All

### **allow-unsecure-connection**

Synopsis	Allow connection without secured transport protocol
Context	<b>configure</b> <a href="#">system management-interface remote-management manager</a> <i>string</i> <a href="#">allow-unsecure-connection</a>
Tree	<a href="#">allow-unsecure-connection</a>
Description	When configured, the system allows an unsecured connection to the remote managers; the TCP connection is not encrypted. This includes username and password information.
Notes	The following elements are part of a choice: <b>allow-unsecure-connection</b> or <b>client-tls-profile</b> .
Introduced	20.5.R1
Platforms	All

### **client-tls-profile** *reference*

Synopsis	TLS client profile name assigned to the remote manager
Context	<b>configure</b> <a href="#">system management-interface remote-management manager</a> <i>string</i> <a href="#">client-tls-profile</a> <i>reference</i>
Tree	<a href="#">client-tls-profile</a>
Reference	<b>configure</b> <a href="#">system security tls client-tls-profile</a> <i>string</i>
Notes	The following elements are part of a choice: <b>allow-unsecure-connection</b> or <b>client-tls-profile</b> .
Introduced	20.5.R1
Platforms	All

### **connection-timeout** *number*

Synopsis	Time without response before manager is declared down
Context	<b>configure</b> <a href="#">system management-interface remote-management manager</a> <i>string</i> <a href="#">connection-timeout</a> <i>number</i>
Tree	<a href="#">connection-timeout</a>
Range	1 to 3600
Units	seconds

Introduced 20.5.R1  
 Platforms All

### **description** *string*

Synopsis Text description  
 Context **configure** [system](#) [management-interface](#) [remote-management](#) [manager](#) *string*  
[description](#) *string*  
 Tree [description](#)  
 String Length 1 to 80  
 Introduced 20.5.R1  
 Platforms All

### **device-label** *string*

Synopsis Device label supplied to the remote manager  
 Context **configure** [system](#) [management-interface](#) [remote-management](#) [manager](#) *string* [device-label](#) *string*  
 Tree [device-label](#)  
 Description This command specifies a metadata label that is supplied to the manager. This label is used to group devices or network nodes with a common purpose or goal.  
 String Length 1 to 64  
 Introduced 20.5.R1  
 Platforms All

### **device-name** *string*

Synopsis Device name supplied to the remote manager  
 Context **configure** [system](#) [management-interface](#) [remote-management](#) [manager](#) *string* [device-name](#) *string*  
 Tree [device-name](#)  
 Description This command specifies a device name that is supplied to the manager. The name identifies a specific SR OS node in the network.  
 When unconfigured, the default system name is used.  
 String Length 1 to 64  
 Introduced 20.5.R1

Platforms All

### **manager-address** (*ipv4-address-no-zone | ipv6-address-no-zone | fully-qualified-domain-name*)

Synopsis Destination IP address of the manager

Context **configure system management-interface remote-management manager** *string manager-address* (*ipv4-address-no-zone | ipv6-address-no-zone | fully-qualified-domain-name*)

Tree [manager-address](#)

String Length 1 to 255

Introduced 20.5.R1

Platforms All

### **manager-port** *number*

Synopsis Destination TCP port for gRPC connections to manager

Context **configure system management-interface remote-management manager** *string manager-port* *number*

Tree [manager-port](#)

Range 1 to 65535

Default 57400

Introduced 20.5.R1

Platforms All

### **router-instance** *string*

Synopsis Reference to a router or VPRN service name

Context **configure system management-interface remote-management manager** *string router-instance* *string*

Tree [router-instance](#)

Introduced 20.5.R1

Platforms All

### **source-address** (*ipv4-address-no-zone | ipv6-address-no-zone*)

Synopsis Source IP address for connection to the manager

Context	<b>configure system management-interface remote-management manager</b> <i>string</i> <b>source-address</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	<a href="#">source-address</a>
Introduced	20.5.R1
Platforms	All

### **source-port** (*number* | *keyword*)

Synopsis	Source TCP destination port number
Context	<b>configure system management-interface remote-management manager</b> <i>string</i> <b>source-port</b> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">source-port</a>
Range	1 to 65535
Options	grpc-default
Introduced	20.5.R1
Platforms	All

### **router-instance** *string*

Synopsis	Router name or VPRN service name
Context	<b>configure system management-interface remote-management router-instance</b> <i>string</i>
Tree	<a href="#">router-instance</a>
Default	management
Introduced	20.5.R1
Platforms	All

### **source-address** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	Source IP address for connection to the manager
Context	<b>configure system management-interface remote-management source-address</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	<a href="#">source-address</a>
Introduced	20.5.R1
Platforms	All

**source-port** (*number* | *keyword*)

Synopsis	Source TCP port number to connection to the manager
Context	<b>configure</b> <a href="#">system management-interface remote-management source-port</a> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">source-port</a>
Range	1 to 65535
Options	grpc-default
Default	grpc-default
Introduced	20.5.R1
Platforms	All

**schema-path** *string*

Synopsis	Schema path URL
Context	<b>configure</b> <a href="#">system management-interface schema-path</a> <i>string</i>
Tree	<a href="#">schema-path</a>
Description	<p>This command specifies the schema path where the SR OS YANG modules can be placed by the user before using a &lt;get-schema&gt; request. Nokia recommends that the URL string not exceed 135 characters for the &lt;get-schema&gt; request to work correctly with all schema files.</p> <p>If this command is not configured, the software upgrade process manages the YANG schema files to ensure the schema files are synchronized with the software image on both the primary and standby CPM.</p>
String Length	1 to 180
Introduced	16.0.R4
Platforms	All

**snmp**

Synopsis	Enter the <b>snmp</b> context
Context	<b>configure</b> <a href="#">system management-interface snmp</a>
Tree	<a href="#">snmp</a>
Introduced	16.0.R1
Platforms	All

**admin-state** *keyword*

Synopsis	Administrative state of the SNMP agent
Context	<b>configure</b> <a href="#">system</a> <a href="#">management-interface snmp</a> <b>admin-state</b> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Description	<p>This command administratively enables or disables SNMP agent operations. Disabling SNMP does not prevent the agent from sending SNMP notifications to configured SNMP trap destinations.</p> <p>In classic and mixed configuration mode, the agent is administratively disabled in the event of a reboot when the processing of the configuration file fails to complete or when an SNMP persistent index file fails while the <b>bof system persistent-indices</b> command is set to <b>true</b>. This prevents an SNMP-based management system from accessing and possibly synchronizing with a partially booted or incomplete network element. This auto-disable behavior is not applicable to model-driven configuration mode.</p>
Options	enable, disable
Default	enable
Introduced	16.0.R1
Platforms	All

**engine-id** *string*

Synopsis	SNMP engine ID that identifies the SNMPv3 node
Context	<b>configure</b> <a href="#">system</a> <a href="#">management-interface snmp</a> <b>engine-id</b> <i>string</i>
Tree	<a href="#">engine-id</a>
Description	<p>This command sets the SNMP engine ID that uniquely identifies the SNMPv3 node.</p> <p>If unconfigured, the system uses an engine ID based on the information from the system backplane.</p> <p>If the SNMP engine ID is changed, the current configuration must be saved and a reboot must be executed. Otherwise, the previously configured SNMP communities and logger trap-target notify communities will not be valid for the new engine ID.</p> <p><b>Note:</b> Changing the SNMP engine ID invalidates all SNMPv3 MD5 and SHA security digest keys, which may render the node unmanageable.</p> <p>When replacing a chassis, configure the new router to use the same engine ID as the previous router. This preserves SNMPv3 security keys and allows management stations to use their existing authentication keys for the new router.</p> <p>Ensure that the engine ID of each router is unique. A management domain can only maintain one instance of a specific engine ID.</p>
String Length	10 to 64
Introduced	16.0.R1
Platforms	All

### **general-port** *number*

Synopsis	Port number used to send general SNMP messages
Context	<b>configure</b> <a href="#">system management-interface snmp general-port</a> <i>number</i>
Tree	<a href="#">general-port</a>
Description	This command configures the port number used to receive SNMP request messages and send replies.  For the port used for SNMP notifications, configure the <b>configure log snmp-trap-group trap-target port</b> command.
Range	0   1 to 65535
Default	161
Introduced	16.0.R1
Platforms	All

### **max-bulk-duration** *number*

Synopsis	Maximum process duration before responses are returned
Context	<b>configure</b> <a href="#">system management-interface snmp max-bulk-duration</a> <i>number</i>
Tree	<a href="#">max-bulk-duration</a>
Description	This command sets the maximum duration to process an SNMP request before bulk responses are returned to avoid a timeout on the management system when a lot of information is returned in the response.
Range	100 to 5000
Units	milliseconds
Introduced	23.3.R1
Platforms	All

### **packet-size** *number*

Synopsis	Maximum SNMP packet size generated by the node
Context	<b>configure</b> <a href="#">system management-interface snmp packet-size</a> <i>number</i>
Tree	<a href="#">packet-size</a>
Range	484 to 9216
Default	1500
Introduced	16.0.R1
Platforms	All

## streaming

Synopsis	Enter the <b>streaming</b> context
Context	<b>configure</b> <a href="#">system management-interface snmp streaming</a>
Tree	<a href="#">streaming</a>
Introduced	16.0.R1
Platforms	All

## admin-state *keyword*

Synopsis	Administrative state of SNMP streaming
Context	<b>configure</b> <a href="#">system management-interface snmp streaming admin-state</a> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Description	This command enables or disables the proprietary SNMP request and response bundling as well as the TCP-based transport mechanism for optimizing network management of the router nodes. In higher latency networks, synchronizing router MIBs from network management using streaming takes less time than synchronizing using classic SNMP UDP requests. Streaming operates on TCP port 1491 and runs over IPv4 or IPv6.
Options	enable, disable
Default	disable
Introduced	16.0.R1
Platforms	All

## yang-modules

Synopsis	Enter the <b>yang-modules</b> context
Context	<b>configure</b> <a href="#">system management-interface yang-modules</a>
Tree	<a href="#">yang-modules</a>
Description	Commands in this context determine the system support of the Nokia YANG models. The settings affect the data sent in a NETCONF <hello>, data populated in the RFC 6022 /netconf-state/schemas list, data returned in a <get-schema> request, and data populated in the RFC 8525 /yang-library. See "NETCONF monitoring" and "YANG library" in the <i>7450 ESS, 7750 SR, 7950 XRS, and VSR System Management Guide</i> for more information.
Introduced	16.0.R1
Platforms	All

## nmda

Synopsis	Enter the <b>nmda</b> context
Context	<b>configure</b> <a href="#">system management-interface yang-modules nmda</a>
Tree	<a href="#">nmda</a>
Description	Commands in this context configure the attributes for the Network Management Datastores Architecture (NMDA).
Introduced	21.7.R1
Platforms	All

## nmda-support *boolean*

Synopsis	Advertise NMDA support over NETCONF
Context	<b>configure</b> <a href="#">system management-interface yang-modules nmda nmda-support boolean</a>
Tree	<a href="#">nmda-support</a>
Description	<p>When configured to <b>true</b>, this command enables the advertisement of NMDA support over NETCONF through the use of YANG library 1.1.</p> <p>When configured to <b>false</b>, this command disables NMDA advertisement over NETCONF and YANG library 1.0 is used.</p>
Default	false
Introduced	21.7.R1
Platforms	All

## nokia-combined-modules *boolean*

Synopsis	Support access to combined Nokia YANG models
Context	<b>configure</b> <a href="#">system management-interface yang-modules nokia-combined-modules boolean</a>
Tree	<a href="#">nokia-combined-modules</a>
Description	<p>When configured to <b>true</b>, the system supports the combined Nokia YANG files for both configuration and state data in the NETCONF server.</p> <p>When the system is operating in classic configuration mode, attempts to access (read or write) the configuration using the Nokia configuration modules or namespace via NETCONF result in errors, even if this command is set to <b>true</b>.</p> <p>When configured to <b>false</b>, access to the combined Nokia YANG files is not supported.</p> <p>This command and the <b>nokia-submodules</b> command cannot both be set to <b>true</b> at the same time.</p>

Introduced	16.0.R4
Platforms	All

### **nokia-submodules** *boolean*

Synopsis	Support submodule-based packaging of Nokia YANG models
Context	<b>configure</b> <a href="#">system management-interface yang-modules nokia-submodules</a> <i>boolean</i>
Tree	<a href="#">nokia-submodules</a>
Description	<p>When configured to <b>true</b>, the system supports the alternative submodule-based packaging of the Nokia YANG files for both configuration and state data in the NETCONF server.</p> <p>When the system is operating in classic configuration mode, attempts to access (read or write) the configuration using the Nokia configuration modules or namespace via NETCONF result in errors, even if this command is set to <b>true</b>.</p> <p>When configured to <b>false</b>, access to the submodule-based packaging of the Nokia YANG files is not supported.</p> <p>This command and the <b>nokia-combined-modules</b> command cannot both be set to <b>true</b> at the same time.</p>
Introduced	21.2.R1
Platforms	All

### **openconfig-modules** *boolean*

Synopsis	Support access to OpenConfig YANG models
Context	<b>configure</b> <a href="#">system management-interface yang-modules openconfig-modules</a> <i>boolean</i>
Tree	<a href="#">openconfig-modules</a>
Description	When configured to <b>true</b> , this command allows access to OpenConfig YANG models in all model-driven interfaces.
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **shared-model-management** *boolean*

Synopsis	Allow multiple models to configure the same elements
Context	<b>configure</b> <a href="#">system management-interface yang-modules shared-model-management</a> <i>boolean</i>
Tree	<a href="#">shared-model-management</a>

Description	When configured to <b>true</b> , the router allows Nokia and third-party models to configure the same elements in model-driven interfaces. When configured to <b>false</b> , only one model can be used to configure the same element.
Default	true
Introduced	23.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**name *string***

Synopsis	Administrative name assigned to the system
Context	<b>configure</b> <a href="#">system</a> <a href="#">name</a> <i>string</i>
Tree	<a href="#">name</a>
String Length	1 to 64
Introduced	16.0.R1
Platforms	All

**network-element-discovery**

Synopsis	Enter the <b>network-element-discovery</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">network-element-discovery</a>
Tree	<a href="#">network-element-discovery</a>
Introduced	19.5.R1
Platforms	All

**generate-traps *boolean***

Synopsis	Generate NE discovery traps
Context	<b>configure</b> <a href="#">system</a> <a href="#">network-element-discovery</a> <a href="#">generate-traps</a> <i>boolean</i>
Tree	<a href="#">generate-traps</a>
Default	false
Introduced	19.5.R1
Platforms	All

**profile** [*name*] *string*

Synopsis	Enter the <b>profile</b> list instance
Context	<b>configure</b> <a href="#">system</a> <a href="#">network-element-discovery</a> <a href="#">profile</a> <i>string</i>
Tree	<a href="#">profile</a>
Max. Instances	1
Introduced	19.5.R1
Platforms	All

**[name]** *string*

Synopsis	Profile name
Context	<b>configure</b> <a href="#">system</a> <a href="#">network-element-discovery</a> <a href="#">profile</a> <i>string</i>
Tree	<a href="#">profile</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	19.5.R1
Platforms	All

**neid** *string*

Synopsis	Network element ID of the advertised node
Context	<b>configure</b> <a href="#">system</a> <a href="#">network-element-discovery</a> <a href="#">profile</a> <i>string</i> <a href="#">neid</a> <i>string</i>
Tree	<a href="#">neid</a>
String Length	7 to 8
Introduced	19.5.R1
Platforms	All

**neip**

Synopsis	Enter the <b>neip</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">network-element-discovery</a> <a href="#">profile</a> <i>string</i> <a href="#">neip</a>
Tree	<a href="#">neip</a>
Introduced	19.5.R1
Platforms	All

## auto-generate

Synopsis	Enter the <b>auto-generate</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">network-element-discovery</a> <a href="#">profile</a> <i>string</i> <a href="#">neip</a> <a href="#">auto-generate</a>
Tree	<a href="#">auto-generate</a>
Introduced	21.2.R1
Platforms	All

## ipv4

Synopsis	Enable the <b>ipv4</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">network-element-discovery</a> <a href="#">profile</a> <i>string</i> <a href="#">neip</a> <a href="#">auto-generate</a> <a href="#">ipv4</a>
Tree	<a href="#">ipv4</a>
Introduced	21.2.R1
Platforms	All

## vendor-id-value *number*

Synopsis	Most significant byte if the NE IPv4 address
Context	<b>configure</b> <a href="#">system</a> <a href="#">network-element-discovery</a> <a href="#">profile</a> <i>string</i> <a href="#">neip</a> <a href="#">auto-generate</a> <a href="#">ipv4</a> <a href="#">vendor-id-value</a> <i>number</i>
Tree	<a href="#">vendor-id-value</a>
Range	1 to 255
Default	140
Introduced	21.2.R1
Platforms	All

## ipv6

Synopsis	Enable the <b>ipv6</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">network-element-discovery</a> <a href="#">profile</a> <i>string</i> <a href="#">neip</a> <a href="#">auto-generate</a> <a href="#">ipv6</a>
Tree	<a href="#">ipv6</a>
Introduced	21.2.R1
Platforms	All

**vendor-id-value** *number*

Synopsis	Most significant byte of the NE IPv6 address
Context	<b>configure</b> <a href="#">system network-element-discovery profile</a> <i>string</i> <a href="#">neip auto-generate ipv6 vendor-id-value</a> <i>number</i>
Tree	<a href="#">vendor-id-value</a>
Range	1 to 255
Default	140
Introduced	21.2.R1
Platforms	All

**ipv4** *string*

Synopsis	NEIP IPv4 address
Context	<b>configure</b> <a href="#">system network-element-discovery profile</a> <i>string</i> <a href="#">neip ipv4</a> <i>string</i>
Tree	<a href="#">ipv4</a>
Introduced	19.5.R1
Platforms	All

**ipv6** *string*

Synopsis	NEIP IPv6 address
Context	<b>configure</b> <a href="#">system network-element-discovery profile</a> <i>string</i> <a href="#">neip ipv6</a> <i>string</i>
Tree	<a href="#">ipv6</a>
Introduced	19.5.R1
Platforms	All

**platform-type** *string*

Synopsis	Platform name and chassis type to be advertised
Context	<b>configure</b> <a href="#">system network-element-discovery profile</a> <i>string</i> <a href="#">platform-type</a> <i>string</i>
Tree	<a href="#">platform-type</a>
String Length	1 to 255
Introduced	19.5.R1
Platforms	All

**system-mac** *string*

Synopsis	MAC address of the advertised node
Context	<b>configure</b> <a href="#">system</a> <a href="#">network-element-discovery profile</a> <i>string</i> <a href="#">system-mac</a> <i>string</i>
Tree	<a href="#">system-mac</a>
Introduced	19.5.R1
Platforms	All

**vendor-id** *string*

Synopsis	Vendor ID to be advertised
Context	<b>configure</b> <a href="#">system</a> <a href="#">network-element-discovery profile</a> <i>string</i> <a href="#">vendor-id</a> <i>string</i>
Tree	<a href="#">vendor-id</a>
String Length	1 to 255
Default	Nokia
Introduced	19.5.R1
Platforms	All

**ospf-dynamic-hostnames** *boolean*

Synopsis	Process received OSPF dynamic hostname information
Context	<b>configure</b> <a href="#">system</a> <a href="#">ospf-dynamic-hostnames</a> <i>boolean</i>
Tree	<a href="#">ospf-dynamic-hostnames</a>
Description	When configured to <b>true</b> , OSPF dynamic hostnames are enabled. The router receiving the new dynamic hostname within the OSPF Router Information (RI) LSA is instructed to process the received dynamic hostname information.  When configured to <b>false</b> , dynamic hostname information is not processed.
Default	false
Introduced	20.2.R1
Platforms	All

**persistence**

Synopsis	Enter the <b>persistence</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">persistence</a>
Tree	<a href="#">persistence</a>

Description	<p>Commands in this context configure persistence on the system.</p> <p>The persistence feature enables the system to retain state information learned through DHCP snooping across reboots. This information includes data such as the IP address and MAC binding information, lease-length information, and ingress SAP information (required for VPLS snooping to identify the ingress interface).</p> <p>If persistence is enabled when there are no DHCP relay or snooping commands enabled, the system creates an empty file.</p>
Introduced	16.0.R1
Platforms	All

## ancp

Synopsis	Enter the <b>ancp</b> context
Context	<b>configure system persistence ancp</b>
Tree	<a href="#">ancp</a>
Introduced	16.0.R1
Platforms	All

## description *string*

Synopsis	Text description
Context	<b>configure system persistence ancp description <i>string</i></b>

Introduced	16.0.R1
Platforms	7750 SR-1s, 7750 SR-2s, 7750 SR-2se, 7750 SR-7s, 7750 SR-14s, 7950 XRS

### **ptp**

Synopsis	Enter the <b>ptp</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">ptp</a>
Tree	<a href="#">ptp</a>
Description	Commands in this context configure Precision Time Control (PTP) parameters based on <i>IEEE 1588-2008, Precision Time Protocol</i> . The context is only supported on control assemblies that support 1588.
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**admin-state** *keyword*

Synopsis	Administrative state of PTP
Context	<b>configure system ptp admin-state</b> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**alternate-profile** [*name*] *string*

Synopsis	Enter the <b>alternate-profile</b> list instance
Context	<b>configure system ptp alternate-profile</b> <i>string</i>
Tree	<a href="#">alternate-profile</a>
Description	<p>Commands in this context create an alternate profile configuration for use in PTP messaging.</p> <p>The alternate profile can be used at the edge of a network to provide PTP time or frequency distribution outward to external PTP clocks.</p> <p>The alternate profile cannot be deleted if it is configured as the profile under a PTP port.</p>
Max. Instances	6
Introduced	22.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**[name]** *string*

Synopsis	Alternate profile name
Context	<b>configure system ptp alternate-profile</b> <i>string</i>
Tree	<a href="#">alternate-profile</a>
Description	<p>This command configures an alternate profile name.</p> <p>The strings "Primary" and "primary" cannot be used for the alternate-profile name.</p>
String Length	1 to 64
Notes	This element is part of a list key.
Introduced	22.7.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **admin-state** *keyword*

Synopsis Administrative state of the alternate PTP profile

Context **configure** [system](#) [ptp](#) [alternate-profile](#) *string* **admin-state** *keyword*

Tree [admin-state](#)

Options enable, disable

Default disable

Introduced 22.7.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **domain** *number*

#### **WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis Alternate profile PTP domain number

Context **configure** [system](#) [ptp](#) [alternate-profile](#) *string* **domain** *number*

Tree [domain](#)

Range 0 to 255

Default 24

Introduced 22.7.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **log-announce-interval** *number*

#### **WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis PTP announce message interval in log form

Context **configure** [system](#) [ptp](#) [alternate-profile](#) *string* **log-announce-interval** *number*

Tree [log-announce-interval](#)

Description This command configures the announce message interval used for multicast messages within the alternate profile.

For multicast messages used on PTP Ethernet ports, this command configures the message interval used for announce messages transmitted by the local node.

This value has no impact on the interval used for the BTCA, which is controlled by the value defined for the primary profile.

Range	-3 to 4
Default	-3
Introduced	22.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **profile** *keyword*

#### **WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Standard based profile used within an alternate profile
Context	<b>configure</b> <a href="#">system</a> <a href="#">ptp</a> <a href="#">alternate-profile</a> <i>string</i> <a href="#">profile</a> <i>keyword</i>
Tree	<a href="#">profile</a>
Description	This command specifies the standard based profile that is used as the basis for the alternate profile.  This setting controls the contents of PTP messages sent on ports and peers using this alternate profile.
Options	g8265dot1-2010, ieee1588-2008, g8275dot1-2014, g8275dot2-2016
Default	g8275dot1-2014
Introduced	22.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **announce-receipt-timeout** *number*

#### **WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Expired intervals count before timeout event declared
Context	<b>configure</b> <a href="#">system</a> <a href="#">ptp</a> <a href="#">announce-receipt-timeout</a> <i>number</i>
Tree	<a href="#">announce-receipt-timeout</a>

Description	This command configures the number of Announce message intervals that must expire with no received Announce messages before declaring an ANNOUNCE_RECEIPT_TIMEOUT event.
Range	2 to 10
Default	3
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### clock-type *keyword*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Clock type
Context	<b>configure</b> <a href="#">system</a> <a href="#">ptp</a> <a href="#">clock-type</a> <i>keyword</i>
Tree	<a href="#">clock-type</a>
Options	slave-only, master-only, boundary
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### domain *number*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	PTP domain
Context	<b>configure</b> <a href="#">system</a> <a href="#">ptp</a> <a href="#">domain</a> <i>number</i>
Tree	<a href="#">domain</a>
Description	<p>This command configures the PTP domain. The default and valid range of the domain depend on the configured PTP profile.</p> <ul style="list-style-type: none"> <li>• IEEE 1588-2008 - domain range of 0 to 255 (default 0)</li> <li>• G.8265.1 - domain range of 0 to 255 (default 4)</li> <li>• G.8275.1 - domain range of 24 to 43 (default 24)</li> </ul>

- G.8275.2 - domain range of 0 to 255 (default 44)

Range	0 to 255
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **local-priority** *number*

Synopsis	PTP clock local priority
Context	<b>configure system ptp local-priority</b> <i>number</i>
Tree	<a href="#">local-priority</a>
Description	<p>This command configures the local priority used to choose between PTP time Transmitters in the best timeTransmitter clock algorithm (BTCA). This setting applies when the PTP profile is either configured for G.8275.1 or G.8275.2 and is ignored for any other profile.</p> <p>For G.8275.1 or G.8275.2, this command configures the localPriority parameter associated with the local clock (<b>ptp</b> context). See G.8275.1 or G.8275.2 for detailed information.</p>
Range	1 to 255
Default	128
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **log-announce-interval** *number*

#### **WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Announce message interval in log form
Context	<b>configure system ptp log-announce-interval</b> <i>number</i>
Tree	<a href="#">log-announce-interval</a>
Description	<p>This command configures the Announce message interval used for both unicast and multicast messages.</p> <p>For unicast messages, the Announce message interval is requested during unicast negotiation to any peer. This controls the Announce message rate sent from remote peers to the local node. It does not affect the announce message rate that may be sent from the local node to remote peers. Remote peers may request an Announce message rate within the acceptable grant range.</p>

For multicast messages used on PTP Ethernet ports, this command specifies the message interval used for Announce messages transmitted by the local node.

This value also defines the interval between executions of the BTCA within the node.

To minimize BTCA driven reconfigurations, IEEE recommends that the announce interval should be consistent across the entire 1588 network.

Range	-3 to 4
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **network-type** *keyword*

Synopsis	PTP network type
Context	<b>configure</b> <a href="#">system</a> <a href="#">ptp</a> <a href="#">network-type</a> <i>keyword</i>
Tree	<a href="#">network-type</a>
Description	This command configures the codeset to be used for the encoding of QL values into PTP clockClass values and vice versa when the profile is configured for G.8265.1 or G.8275.2.  This setting only applies to the range of values observed in the clockClass values transmitted out of the node in Announce messages. The router supports the reception of any valid value in Table 1/G.8265.1 and Table2/G.8275.2.
Options	sonet, sdh
Default	sdh
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **port** [[port-id](#)] *reference*

Synopsis	Enter the <b>port</b> list instance
Context	<b>configure</b> <a href="#">system</a> <a href="#">ptp</a> <a href="#">port</a> <i>reference</i>
Tree	<a href="#">port</a>
Description	Commands in this context configure PTP over Ethernet on the physical port. The PTP process transmits and receives PTP messages through the port using Ethernet encapsulation (as opposed to UDP/IPv4 encapsulation).  Frames are transmitted with no VLAN tags, even if the port is configured for dot1q or qinq modes for encap-type. The received frames from the external PTP clock must also be untagged.  Two reserved multicast addresses are allocated for PTP messages (see Annex F IEEE Std 1588-2008). Either address can be configured for the PTP messages sent through the port.

A PTP port cannot be created if the PTP profile is configured for G.8265.1.

If the port supports 1588 port-based timestamping, Synchronous Ethernet must be enabled on the MDA when PTP over Ethernet is enabled.

De-provisioning of the card or MDA containing the specified port is not permitted while the port is configured within PTP.

Changing the encapsulation or the port type of the Ethernet port is not permitted when PTP Ethernet Multicast operation is configured on the port.

To allocate an Ethernet satellite client port as a PTP port, the Ethernet satellite must first be enabled for the transparent clock function. For more information, see the **configure satellite ethernet-satellite ptp-tc** command.

The SyncE/1588 ports of the CPM and CCMs can be specified as PTP ports. These use the 'A/3' and 'B/3' designation and both must be specified as two PTP ports if both are used. The active CPM sends and receives messages on both ports if they are specified and enabled.

Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **[port-id]** *reference*

Synopsis	Ethernet PTP port ID
Context	<b>configure system ptp port</b> <i>reference</i>
Tree	<a href="#">port</a>
Reference	<b>configure port</b> <i>string</i>
Notes	This element is part of a list key.
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **address** *string*

Synopsis	Destination MAC address of the transmitted PTP messages
Context	<b>configure system ptp port</b> <i>reference</i> <b>address</b> <i>string</i>
Tree	<a href="#">address</a>
Description	This command specifies the destination MAC address of the transmitted PTP messages. IEEE Std 1588-2008 Annex F defines two reserved addresses for 1588 messages, which include: <ul style="list-style-type: none"> <li>• <b>01-1B-19-00-00-00</b> — all except the peer delay mechanism messages</li> <li>• <b>01-80-C2-00-00-0E</b> — peer delay mechanism messages</li> </ul>

Both addresses are supported for reception, independent of the address configured by this command.

Default	01:1B:19:00:00:00
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **admin-state** *keyword*

Context	<b>configure</b> <a href="#">system</a> <a href="#">ptp</a> <a href="#">port</a> <i>reference</i> <b>admin-state</b> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	enable
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **alternate-profile** *reference*

Synopsis	Alternate profile for the PTP port
Context	<b>configure</b> <a href="#">system</a> <a href="#">ptp</a> <a href="#">port</a> <i>reference</i> <b>alternate-profile</b> <i>reference</i>
Tree	<a href="#">alternate-profile</a>
Description	This command creates the alternate profile that is used in communications with the port or peer. If no alternate profile is specified, the primary profile is used.
Reference	<b>configure</b> <a href="#">system</a> <a href="#">ptp</a> <b>alternate-profile</b> <i>string</i>
Introduced	22.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **local-priority** *number*

Synopsis	PTP port local priority
Context	<b>configure</b> <a href="#">system</a> <a href="#">ptp</a> <a href="#">port</a> <i>reference</i> <b>local-priority</b> <i>number</i>
Tree	<a href="#">local-priority</a>
Description	This command configures the local priority used to choose between PTP time Transmitters in the best time Transmitter clock algorithm (BTCA). This setting applies when the PTP profile is either configured for G.8275.1 or G.8275.2 and is ignored for any other profile.

For G.8275.1 or G.8275.2, this command configures the localPriority parameter associated with the Announce messages received from the external clocks (**ptp port** context). See G.8275.1 or G.8275.2 for detailed information.

Range	1 to 255
Default	128
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **log-delay-interval** *number*

Synopsis	Minimum interval for Delay_Req messages in log form
Context	<b>configure system ptp port reference log-delay-interval</b> <i>number</i>
Tree	<a href="#">log-delay-interval</a>
Description	<p>This command configures the minimum interval used for multicast Delay_Req messages for the port. For ports in a slave state, the interval is used, unless the parent port indicates a longer interval. For a port in master state, the interval is advertised to external slave ports as the minimum acceptable interval for Delay_Req messages from the slave ports.</p> <p>The router supports the 1588 standard requirement for a port in slave state to check the logMessageInterval field of received multicast Delay_Resp messages. If the value of the logMessageInterval field of the messages is greater than the value configured locally for the generation of Delay_Req messages, the slave must use the longer interval for the generation of Delay_Req messages.</p> <p>The interval value is specified as the logarithm to the base 2.</p>
Range	-6 to 0
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **log-sync-interval** *number*

Synopsis	Interval for transmission of Sync messages in log form
Context	<b>configure system ptp port reference log-sync-interval</b> <i>number</i>
Tree	<a href="#">log-sync-interval</a>
Description	<p>This command configures the interval used for Sync messages transmitted by the local node when the port is in master state.</p> <p>The interval value is specified as the logarithm to the base 2.</p>
Range	-6 to 0
Introduced	21.7.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **master-only** *boolean*

Synopsis Restrict the local port to master state

Context **configure system ptp port reference master-only boolean**

Tree [master-only](#)

Description When configured to **true**, the local port is restricted to master state only, ensuring that the system does not obtain synchronization from attached external devices.  
This command is supported only when the PTP profile is set for G.8275.1 or G.8275.2.

Introduced 21.7.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **priority1** *number*

Synopsis Priority1 of the local clock

Context **configure system ptp priority1 number**

Tree [priority1](#)

Description This command configures the priority1 parameter of the local clock. The setting is used when the profile is configured for IEEE 1588-2008.  
This value is used by the Best Master Clock Algorithm to determine which clock should provide timing for the network and is advertised in Announce messages.

Range 0 to 255

Default 128

Introduced 21.7.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **priority2** *number*

Synopsis Priority2 of the local clock

Context **configure system ptp priority2 number**

Tree [priority2](#)

Description This command configures the priority2 parameter of the local clock. The setting is used when the profile is configured for IEEE 1588-2008, G.8275.1, or G.8275.2.  
This value is used by the Best Master Clock algorithm to determine which clock should provide timing for the network and is advertised in Announce messages.

Range	0 to 255
Default	128
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **profile** *keyword*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	PTP profile
Context	<b>configure system ptp profile</b> <i>keyword</i>
Tree	<a href="#">profile</a>
Description	<p>This command configures the profile to be used for the internal PTP clock. It defines the Best timeTransmitter Clock Algorithm (BTCA) behavior.</p> <p>Profile changes may affect the settings of other configuration elements, such as the clock type and default settings for the delay interval, announce interval, and the Sync interval.</p> <p>The following clock types are supported for the indicated profiles:</p> <ul style="list-style-type: none"> <li>• G.8265.1: slave only, master only</li> <li>• IEEE 1588 2008: slave only, master only, boundary</li> <li>• G.8275.1: slave only, boundary, master only (master only, only if the platform includes an embedded GNSS receiver)</li> <li>• G.8275.2: slave only, boundary, master only (master only, only if the platform includes an embedded GNSS receiver)</li> </ul>
Options	g8265dot1-2010, ieee1588-2008, g8275dot1-2014, g8275dot2-2016
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **ptsf**

Synopsis	Enter the <b>ptsf</b> context
Context	<b>configure system ptp ptsf</b>

Tree	<a href="#">ptsf</a>
Description	Commands in this context configure the attributes of Packet Timing Signal Fail (PTSF).
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## monitor-ptsf-unusable

Synopsis	Enter the <b>monitor-ptsf-unusable</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">ptp</a> <a href="#">ptsf</a> <a href="#">monitor-ptsf-unusable</a>
Tree	<a href="#">monitor-ptsf-unusable</a>
Description	<p>Commands in this context configure monitoring of neighbor clocks for the PTSF-unusable state (condition) when the profile is set to g8275dot1-2014.</p> <p>When administratively enabled, the local clock monitors the noise level of PTP event messages between external neighbor PTP ports and the local clock. If it detects a high variation in the network path between the external neighbor port and the local port, it considers the neighbor port unusable. Announce messages from the neighbor are discarded and excluded from the BTCA and the port cannot be selected as the parent clock. The unusable condition must be manually cleared.</p> <p>When administratively disabled, the monitor PTSF function of the PTP clock clears PTSF-unusable states from all neighbor PTP ports. If no PTP messages are received from a neighbor for 15 minutes, the neighbor information is purged and the PTSF-unusable state is cleared.</p>
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## admin-state *keyword*

Synopsis	Administrative state of PTSF unusable monitoring
Context	<b>configure</b> <a href="#">system</a> <a href="#">ptp</a> <a href="#">ptsf</a> <a href="#">monitor-ptsf-unusable</a> <a href="#">admin-state</a> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## router [[router-instance](#)] *string*

Synopsis	Enter the <b>router</b> list instance
----------	---------------------------------------

Context	<b>configure system ptp router</b> <i>string</i>
Tree	<b>router</b>
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **[router-instance]** *string*

Synopsis	Router name or VPRN service name
Context	<b>configure system ptp router</b> <i>string</i>
Tree	<b>router</b>
MD-CLI	Base
Default	
Notes	This element is part of a list key.
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **admin-state** *keyword*

Synopsis	Administrative state of PTP on the router instance
Context	<b>configure system ptp router</b> <i>string admin-state keyword</i>
Tree	<b>admin-state</b>
Options	enable, disable
Default	enable
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **peer** [*ip-address*] (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	Enter the <b>peer</b> list instance
Context	<b>configure system ptp router</b> <i>string peer (ipv4-address-no-zone   ipv6-address-no-zone)</i>
Tree	<b>peer</b>
Description	Commands in this context configure a remote PTP peer.
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**[ip-address]** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	IP address of the remote PTP peer
Context	<b>configure system ptp router</b> <i>string peer</i> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	<a href="#">peer</a>
Notes	This element is part of a list key.
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**admin-state** *keyword*

Synopsis	Administrative state of the PTP peer
Context	<b>configure system ptp router</b> <i>string peer</i> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <a href="#">admin-state</a> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	enable
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**local-priority** *number*

Synopsis	PTP peer local priority
Context	<b>configure system ptp router</b> <i>string peer</i> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <a href="#">local-priority</a> <i>number</i>
Tree	<a href="#">local-priority</a>
Description	<p>This command configures the local priority for the peer, which is used to choose between PTP timeTransmitters in the best timeTransmitter clock algorithm (BTCA). This setting applies when the PTP profile is configured for G.8265.1, G.8275.1, or G.8275.2 and is ignored for any other profile.</p> <p>For G.8265.1, this command configures the priority used to choose between time Transmitter clocks with the same quality (see G.8265.1 for more details).</p> <p>For G.8275.1 or G.8275.2, this command configures the localPriority parameter associated with the Announce messages received from the external clocks (<b>ptp router peer</b> context). See G.8275.1 or G.8275.2 for detailed information.</p>
Range	1 to 255
Default	128

Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **log-sync-interval** *number*

#### **WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	PTP peer interval for Sync messages in log form
Context	<b>configure system ptp router</b> <i>string peer</i> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>log-sync-interval</b> <i>number</i>
Tree	<b>log-sync-interval</b>
Description	This command configures the message interval used for Sync and Delay_Resp messages that are requested during unicast negotiation to the peer. The setting controls messages sent from remote peers to the local node but the packet rate from the local node to remote peers is not affected. Remote peers may request a packet rate within the acceptable range.  The interval value is specified as the logarithm to the base 2.
Range	-6 to 0
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **peer-limit** *number*

Synopsis	Number of discovered peers allowed for routing instance
Context	<b>configure system ptp router</b> <i>string peer-limit</i> <i>number</i>
Tree	<b>peer-limit</b>
Description	This command specifies the maximum number of discovered peers permitted within the routing instance. This ensures that a routing instance does not consume all the possible discovered peers and prevents the routing instance from blocking discovered peers in other routing instances.  The sum of all peer limit values for all routing instances cannot exceed the maximum number of discovered peers supported by the system.
Range	0 to 512
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**tx-while-sync-uncertain** *boolean*

Synopsis	Send Announce messages while clock is unsynchronized
Context	<b>configure</b> <a href="#">system</a> <a href="#">ptp tx-while-sync-uncertain</a> <i>boolean</i>
Tree	<a href="#">tx-while-sync-uncertain</a>
Description	<p>When configured to <b>true</b>, the local PTP clock transmits Announce messages to downstream clocks to indicate it has not yet stabilized on the recovered synchronization source (upstream clocks or GM clock). While the PTP clock is unsynchronized, the Sync Uncertain state is true.</p> <p>When configured to <b>false</b>, the local PTP clock does not send Announce messages to downstream clocks to indicate it is not synchronized to a valid timing source. If the Sync Uncertain state of the clock is true while this command is configured to <b>false</b>, unicast negotiation grant requests are not granted and current grants are canceled.</p>
Default	true
Introduced	22.2.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**script-control**

Synopsis	Enter the <b>script-control</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">script-control</a>
Tree	<a href="#">script-control</a>
Introduced	16.0.R1
Platforms	All

**script** [[script-name](#)] *string* *owner* *string*

Synopsis	Enter the <b>script</b> list instance
Context	<b>configure</b> <a href="#">system</a> <a href="#">script-control</a> <a href="#">script</a> <i>string</i> <i>owner</i> <i>string</i>
Tree	<a href="#">script</a>
Max. Instances	1500
Introduced	16.0.R1
Platforms	All

**[script-name]** *string*

Synopsis	Script name
----------	-------------

Context	<b>configure system script-control script string owner string</b>
Tree	<b>script</b>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

### **owner string**

Synopsis	Script owner
Context	<b>configure system script-control script string owner string</b>
Tree	<b>script</b>
Description	<p>This command configures the owner to be associated with the script. The owner is optional and "TiMOS CLI" is used if an owner is not specified.</p> <p>The owner is an arbitrary name and not necessarily a user name. Commands in the scripts are not authorized against the owner. The <b>configure system security cli-script authorization x cli-user</b> command determines the user context against which commands in the scripts are authorized.</p>
String Length	1 to 32
MD-CLI	TiMOS CLI
Default	
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

### **admin-state keyword**

Synopsis	Administrative state of the script

### **ssh-max-sessions** *number*

Synopsis Maximum number of concurrent SSH sessions  
 Context **configure** [system](#) [security](#) [aaa](#) [cli-session-group](#) *string* [ssh-max-sessions](#) *number*  
 Tree [ssh-max-sessions](#)  
 Range 0 to 50  
 Introduced 16.0.R1  
 Platforms All

### **telnet-max-sessions** *number*

Synopsis Maximum number of concurrent Telnet sessions  
 Context **configure** [system](#) [security](#) [aaa](#) [cli-session-group](#) *string* [telnet-max-sessions](#) *number*  
 Tree [telnet-max-sessions](#)  
 Range 0 to 50  
 Introduced 16.0.R1  
 Platforms All

### **health-check** (*number* | *keyword*)

Synopsis Polling interval of RADIUS, TACACS+, and LDAP servers  
 Context **configure** [system](#) [security](#) [aaa](#) [health-check](#) (*number* | *keyword*)  
 Tree [health-check](#)  
 Range 6 to 1500

Units	seconds
Options	none
Default	30
Introduced	16.0.R1
Platforms	All

## local-profiles

Synopsis	Enter the <b>local-profiles</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">local-profiles</a>
Tree	<a href="#">local-profiles</a>
Introduced	16.0.R1
Platforms	All

## profile [[user-profile-name](#)] *string*

Synopsis	Enter the <b>profile</b> list instance
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">local-profiles</a> <a href="#">profile</a> <i>string</i>
Tree	<a href="#">profile</a>
Max. Instances	128
Introduced	16.0.R1
Platforms	All

## [\[user-profile-name\]](#) *string*

Synopsis	User profile name
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">local-profiles</a> <a href="#">profile</a> <i>string</i>
Tree	<a href="#">profile</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

**cli-session-group** *reference*

Synopsis	CLI session group to which the profile belongs
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">local-profiles</a> <a href="#">profile</a> <i>string</i> <a href="#">cli-session-group</a> <i>reference</i>
Tree	<a href="#">cli-session-group</a>
Reference	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">cli-session-group</a> <i>string</i>
Introduced	16.0.R1
Platforms	All

**combined-max-sessions** *number*

Synopsis	Maximum number of concurrent SSH and Telnet sessions
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">local-profiles</a> <a href="#">profile</a> <i>string</i> <a href="#">combined-max-sessions</a> <i>number</i>
Tree	<a href="#">combined-max-sessions</a>
Range	0 to 50
Introduced	16.0.R1
Platforms	All

**default-action** *keyword*

Synopsis	Action for non-matching entry
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">local-profiles</a> <a href="#">profile</a> <i>string</i> <a href="#">default-action</a> <i>keyword</i>
Tree	<a href="#">default-action</a>
Options	deny-all, permit-all, none, read-only-all
Default	none
Introduced	16.0.R1
Platforms	All

**entry** [[entry-id](#)] *number*

Synopsis	Enter the <b>entry</b> list instance
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">local-profiles</a> <a href="#">profile</a> <i>string</i> <a href="#">entry</a> <i>number</i>
Tree	<a href="#">entry</a>
Introduced	16.0.R1
Platforms	All

**[entry-id]** *number*

Synopsis	User profile entry ID
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">local-profiles</a> <a href="#">profile</a> <i>string</i> <a href="#">entry</a> <i>number</i>
Tree	<a href="#">entry</a>
Range	1 to 9999
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

**action** *keyword*

Synopsis	Action when a user command matches the entry
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">local-profiles</a> <a href="#">profile</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <i>keyword</i>
Tree	<a href="#">action</a>
Options	deny, permit, none, read-only
Default	none
Introduced	16.0.R1
Platforms	All

**description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">local-profiles</a> <a href="#">profile</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">description</a> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R1
Platforms	All

**match** *string*

Synopsis	Command to match the entry
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">local-profiles</a> <a href="#">profile</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <i>string</i>
Tree	<a href="#">match</a>

String Length	1 to 255
Introduced	16.0.R1
Platforms	All

## grpc

Synopsis	Enter the <b>grpc</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">local-profiles</a> <a href="#">profile</a> <i>string</i> <b>grpc</b>
Tree	<a href="#">grpc</a>
Introduced	16.0.R1
Platforms	All

## rpc-authorization

Synopsis	Enter the <b>rpc-authorization</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">local-profiles</a> <a href="#">profile</a> <i>string</i> <b>grpc</b> <b>rpc-authorization</b>
Tree	<a href="#">rpc-authorization</a>
Description	Commands in this context control the authorization of each RPC in gRPC interfaces.
Introduced	16.0.R1
Platforms	All

## gnmi-capabilities *keyword*

Synopsis	gNMI Capabilities RPC authorization
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">local-profiles</a> <a href="#">profile</a> <i>string</i> <b>grpc</b> <b>rpc-authorization</b> <b>gnmi-capabilities</b> <i>keyword</i>
Tree	<a href="#">gnmi-capabilities</a>
Options	permit, deny
Default	permit
Introduced	16.0.R1
Platforms	All

## gnmi-get *keyword*

Synopsis	gNMI Get RPC authorization
----------	----------------------------

Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">local-profiles</a> <a href="#">profile</a> <i>string</i> <a href="#">grpc</a> <a href="#">rpc-authorization</a> <a href="#">gnmi-get</a> <i>keyword</i>
Tree	<a href="#">gnmi-get</a>
Options	permit, deny
Default	permit
Introduced	16.0.R1
Platforms	All

### **gnmi-set** *keyword*

Synopsis	gNMI Set RPC authorization
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">local-profiles</a> <a href="#">profile</a> <i>string</i> <a href="#">grpc</a> <a href="#">rpc-authorization</a> <a href="#">gnmi-set</a> <i>keyword</i>
Tree	<a href="#">gnmi-set</a>
Options	permit, deny
Default	permit
Introduced	16.0.R1
Platforms	All

### **gnmi-subscribe** *keyword*

Synopsis	gNMI Subscribe RPC authorization
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">local-profiles</a> <a href="#">profile</a> <i>string</i> <a href="#">grpc</a> <a href="#">rpc-authorization</a> <a href="#">gnmi-subscribe</a> <i>keyword</i>
Tree	<a href="#">gnmi-subscribe</a>
Options	permit, deny
Default	permit
Introduced	16.0.R1
Platforms	All

### **gnoi-cert-mgmt-cangenerate** *keyword*

Synopsis	gNOI CanGenerateCSR RPC authorization
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">local-profiles</a> <a href="#">profile</a> <i>string</i> <a href="#">grpc</a> <a href="#">rpc-authorization</a> <a href="#">gnoi-cert-mgmt-cangenerate</a> <i>keyword</i>
Tree	<a href="#">gnoi-cert-mgmt-cangenerate</a>

---

Options	permit, deny
Default	deny
Introduced	19.10.R1
Platforms	All

### **gnoi-cert-mgmt-getcert** *keyword*

Synopsis	gNOI GetCertificates RPC authorization
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">local-profiles</a> <a href="#">profile</a> <i>string</i> <a href="#">grpc</a> <a href="#">rpc-authorization</a> <a href="#">gnoi-cert-mgmt-getcert</a> <i>keyword</i>
Tree	<a href="#">gnoi-cert-mgmt-getcert</a>
Options	permit, deny
Default	deny
Introduced	19.10.R1
Platforms	All

### **gnoi-cert-mgmt-install** *keyword*

Synopsis	gNOI Install RPC authorization
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">local-profiles</a> <a href="#">profile</a> <i>string</i> <a href="#">grpc</a> <a href="#">rpc-authorization</a> <a href="#">gnoi-cert-mgmt-install</a> <i>keyword</i>
Tree	<a href="#">gnoi-cert-mgmt-install</a>
Options	permit, deny
Default	deny
Introduced	19.10.R1
Platforms	All

### **gnoi-cert-mgmt-revoke** *keyword*

Synopsis	gNOI RevokeCertificates RPC authorization
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">local-profiles</a> <a href="#">profile</a> <i>string</i> <a href="#">grpc</a> <a href="#">rpc-authorization</a> <a href="#">gnoi-cert-mgmt-revoke</a> <i>keyword</i>
Tree	<a href="#">gnoi-cert-mgmt-revoke</a>
Options	permit, deny
Default	deny
Introduced	20.2.R1

---

Platforms All

### **gnoi-cert-mgmt-rotate** *keyword*

Synopsis gNOI Rotate RPC authorization

Context **configure** [system](#) [security](#) [aaa](#) [local-profiles](#) [profile](#) *string* [grpc](#) [rpc-authorization](#) [gnoi-cert-mgmt-rotate](#) *keyword*

Tree [gnoi-cert-mgmt-rotate](#)

Options permit, deny

Default deny

Introduced 19.10.R1

Platforms All

### **gnoi-file-get** *keyword*

Synopsis gNOI File Get RPC authorization

Context **configure** [system](#) [security](#) [aaa](#) [local-profiles](#) [profile](#) *string* [grpc](#) [rpc-authorization](#) [gnoi-file-get](#) *keyword*

Tree [gnoi-file-get](#)

Options permit, deny

Default permit

Introduced 21.2.R1

Platforms All

### **gnoi-file-put** *keyword*

Synopsis gNOI File Put RPC authorization

Context **configure** [system](#) [security](#) [aaa](#) [local-profiles](#) [profile](#) *string* [grpc](#) [rpc-authorization](#) [gnoi-file-put](#) *keyword*

Tree [gnoi-file-put](#)

Options permit, deny

Default permit

Introduced 21.2.R1

Platforms All

**gnoi-file-remove** *keyword*

Synopsis	gNOI File Remove RPC authorization
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">local-profiles</a> <a href="#">profile</a> <i>string</i> <a href="#">grpc</a> <a href="#">rpc-authorization</a> <a href="#">gnoi-file-remove</a> <i>keyword</i>
Tree	<a href="#">gnoi-file-remove</a>
Options	permit, deny
Default	permit
Introduced	21.2.R1
Platforms	All

**gnoi-file-stat** *keyword*

Synopsis	gNOI File Stat RPC authorization
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">local-profiles</a> <a href="#">profile</a> <i>string</i> <a href="#">grpc</a> <a href="#">rpc-authorization</a> <a href="#">gnoi-file-stat</a> <i>keyword</i>
Tree	<a href="#">gnoi-file-stat</a>
Options	permit, deny
Default	permit
Introduced	21.2.R1
Platforms	All

**gnoi-file-transfertoreremote** *keyword*

Synopsis	gNOI File TransferToRemote RPC authorization
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">local-profiles</a> <a href="#">profile</a> <i>string</i> <a href="#">grpc</a> <a href="#">rpc-authorization</a> <a href="#">gnoi-file-transfertoreremote</a> <i>keyword</i>
Tree	<a href="#">gnoi-file-transfertoreremote</a>
Options	permit, deny
Default	permit
Introduced	21.7.R1
Platforms	All

**gnoi-system-cancelreboot** *keyword*

Synopsis	gNOI System CancelReboot RPC authorization
----------	--

Context	<b>configure</b> <a href="#">system security aaa local-profiles profile</a> <i>string</i> <a href="#">grpc rpc-authorization gnoi-system-cancelreboot</a> <i>keyword</i>
Tree	<a href="#">gnoi-system-cancelreboot</a>
Options	permit, deny
Default	deny
Introduced	20.5.R1
Platforms	All

### **gnoi-system-ping** *keyword*

Synopsis	gNOI System Ping RPC authorization
Context	<b>configure</b> <a href="#">system security aaa local-profiles profile</a> <i>string</i> <a href="#">grpc rpc-authorization gnoi-system-ping</a> <i>keyword</i>
Tree	<a href="#">gnoi-system-ping</a>
Options	permit, deny
Default	permit
Introduced	21.7.R1
Platforms	All

### **gnoi-system-reboot** *keyword*

Synopsis	gNOI System Reboot RPC authorization
Context	<b>configure</b> <a href="#">system security aaa local-profiles profile</a> <i>string</i> <a href="#">grpc rpc-authorization gnoi-system-reboot</a> <i>keyword</i>
Tree	<a href="#">gnoi-system-reboot</a>
Options	permit, deny
Default	deny
Introduced	20.5.R1
Platforms	All

### **gnoi-system-rebootstatus** *keyword*

Synopsis	gNOI System RebootStatus RPC authorization
Context	<b>configure</b> <a href="#">system security aaa local-profiles profile</a> <i>string</i> <a href="#">grpc rpc-authorization gnoi-system-rebootstatus</a> <i>keyword</i>
Tree	<a href="#">gnoi-system-rebootstatus</a>

Options	permit, deny
Default	deny
Introduced	20.5.R1
Platforms	All

### **gnoi-system-setpackage** *keyword*

Synopsis	gNOI System SetPackage RPC authorization
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">local-profiles</a> <a href="#">profile</a> <i>string</i> <a href="#">grpc</a> <a href="#">rpc-authorization</a> <a href="#">gnoi-system-setpackage</a> <i>keyword</i>
Tree	<a href="#">gnoi-system-setpackage</a>
Options	permit, deny
Default	deny
Introduced	20.5.R1
Platforms	All

### **gnoi-system-switchcontrolprocessor** *keyword*

Synopsis	gNOI System SwitchControlProcessor RPC authorization
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">local-profiles</a> <a href="#">profile</a> <i>string</i> <a href="#">grpc</a> <a href="#">rpc-authorization</a> <a href="#">gnoi-system-switchcontrolprocessor</a> <i>keyword</i>
Tree	<a href="#">gnoi-system-switchcontrolprocessor</a>
Options	permit, deny
Default	deny
Introduced	20.5.R1
Platforms	All

### **gnoi-system-time** *keyword*

Synopsis	gNOI System Time RPC authorization
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">local-profiles</a> <a href="#">profile</a> <i>string</i> <a href="#">grpc</a> <a href="#">rpc-authorization</a> <a href="#">gnoi-system-time</a> <i>keyword</i>
Tree	<a href="#">gnoi-system-time</a>
Options	permit, deny
Default	permit
Introduced	21.7.R1

Platforms All

### **gnoi-system-traceroute** *keyword*

Synopsis gNOI System Traceroute RPC authorization

Context **configure** [system](#) [security](#) [aaa](#) [local-profiles](#) [profile](#) *string* [grpc](#) [rpc-authorization](#) [gnoi-system-traceroute](#) *keyword*

Tree [gnoi-system-traceroute](#)

Options permit, deny

Default permit

Introduced 21.7.R1

Platforms All

### **md-cli-session** *keyword*

Synopsis gNOI MdCli Session RPC authorization

Context **configure** [system](#) [security](#) [aaa](#) [local-profiles](#) [profile](#) *string* [grpc](#) [rpc-authorization](#) [md-cli-session](#) *keyword*

Tree [md-cli-session](#)

Options permit, deny

Default permit

Introduced 20.5.R1

Platforms All

### **rib-api-getversion** *keyword*

Synopsis RibApi GetVersion RPC authorization

Context **configure** [system](#) [security](#) [aaa](#) [local-profiles](#) [profile](#) *string* [grpc](#) [rpc-authorization](#) [rib-api-getversion](#) *keyword*

Tree [rib-api-getversion](#)

Options permit, deny

Default permit

Introduced 16.0.R4

Platforms All

**rib-api-modify** *keyword*

Synopsis	RibApi Modify RPC authorization
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">local-profiles</a> <a href="#">profile</a> <i>string</i> <a href="#">grpc</a> <a href="#">rpc-authorization</a> <a href="#">rib-api-modify</a> <i>keyword</i>
Tree	<a href="#">rib-api-modify</a>
Options	permit, deny
Default	permit
Introduced	16.0.R4
Platforms	All

**li** *boolean*

Synopsis	Allow lawful intercept profile ID
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">local-profiles</a> <a href="#">profile</a> <i>string</i> <a href="#">li</a> <i>boolean</i>
Tree	<a href="#">li</a>
Default	false
Introduced	19.10.R1
Platforms	All

**netconf**

Synopsis	Enter the <b>netconf</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">local-profiles</a> <a href="#">profile</a> <i>string</i> <a href="#">netconf</a>
Tree	<a href="#">netconf</a>
Introduced	16.0.R1
Platforms	All

**base-op-authorization**

Synopsis	Enter the <b>base-op-authorization</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">local-profiles</a> <a href="#">profile</a> <i>string</i> <a href="#">netconf</a> <a href="#">base-op-authorization</a>
Tree	<a href="#">base-op-authorization</a>
Description	<p>Commands in this context configure the permission to use NETCONF operations at the base operation level for the specified profile.</p> <p>The NETCONF operations are authorized by default in the built-in system-generated administrative profile.</p>

Introduced 16.0.R1  
Platforms All

### **action** *boolean*

Synopsis Allow NETCONF action operation  
Context **configure** [system](#) [security](#) [aaa](#) [local-profiles](#) [profile](#) *string* [netconf](#) [base-op-authorization](#) [action](#) *boolean*  
Tree [action](#)  
Default false  
Introduced 21.7.R1  
Platforms All

### **cancel-commit** *boolean*

Synopsis Allow NETCONF cancel-commit operation  
Context **configure** [system](#) [security](#) [aaa](#) [local-profiles](#) [profile](#) *string* [netconf](#) [base-op-authorization](#) [cancel-commit](#) *boolean*  
Tree [cancel-commit](#)  
Default false  
Introduced 21.7.R1  
Platforms All

### **close-session** *boolean*

Synopsis Allow NETCONF close-session operation  
Context **configure** [system](#) [security](#) [aaa](#) [local-profiles](#) [profile](#) *string* [netconf](#) [base-op-authorization](#) [close-session](#) *boolean*  
Tree [close-session](#)  
Default false  
Introduced 21.7.R1  
Platforms All

### **commit** *boolean*

Synopsis Allow NETCONF commit operation

Context	<b>configure system security aaa local-profiles profile</b> <i>string</i> <b>netconf base-op-authorization</b> <b>commit</b> <i>boolean</i>
Tree	<b>commit</b>
Default	false
Introduced	21.7.R1
Platforms	All

**copy-config** *boolean*

Synopsis	Allow NETCONF copy-config operation
Context	<b>configure system security aaa local-profiles profile</b> <i>string</i> <b>netconf base-op-authorization</b> <b>copy-config</b> <i>boolean</i>
Tree	<b>copy-config</b>
Default	false
Introduced	21.7.R1
Platforms	All

**create-subscription** *boolean*

Synopsis	Allow NETCONF create-subscription operation
Context	<b>configure system security aaa local-profiles profile</b> <i>string</i> <b>netconf base-op-authorization</b> <b>create-subscription</b> <i>boolean</i>
Tree	<b>create-subscription</b>
Description	<p>When configured to <b>true</b>, this command enables the NETCONF create-subscription operation in the default profile.</p> <p>The <b>base-op-authorization create-subscription</b> configuration is not pre-emptive, which means that it is checked only at the time of the initial subscription. Configuration changes to <b>base-op-authorization</b> do not cancel any in-progress subscriptions and operators who successfully subscribed continue to receive messages.</p> <p>When configured to <b>false</b>, this command disables the NETCONF create-subscription operation in the default profile.</p> <p>The operation is enabled by default in the built-in system-generated administrative profile.</p>
Default	false
Introduced	21.7.R1
Platforms	All

**delete-config** *boolean*

Synopsis	Allow NETCONF delete-config operation
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">local-profiles</a> <a href="#">profile</a> <i>string</i> <a href="#">netconf</a> <a href="#">base-op-authorization</a> <a href="#">delete-config</a> <i>boolean</i>
Tree	<a href="#">delete-config</a>
Default	false
Introduced	21.7.R1
Platforms	All

**discard-changes** *boolean*

Synopsis	Allow NETCONF discard-changes operation
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">local-profiles</a> <a href="#">profile</a> <i>string</i> <a href="#">netconf</a> <a href="#">base-op-authorization</a> <a href="#">discard-changes</a> <i>boolean</i>
Tree	<a href="#">discard-changes</a>
Default	false
Introduced	21.7.R1
Platforms	All

**edit-config** *boolean*

Synopsis	Allow NETCONF edit-config operation
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">local-profiles</a> <a href="#">profile</a> <i>string</i> <a href="#">netconf</a> <a href="#">base-op-authorization</a> <a href="#">edit-config</a> <i>boolean</i>
Tree	<a href="#">edit-config</a>
Default	false
Introduced	21.7.R1
Platforms	All

**get** *boolean*

Synopsis	Allow NETCONF get operation
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">local-profiles</a> <a href="#">profile</a> <i>string</i> <a href="#">netconf</a> <a href="#">base-op-authorization</a> <a href="#">get</a> <i>boolean</i>
Tree	<a href="#">get</a>
Default	false

Introduced 21.7.R1  
Platforms All

### **get-config** *boolean*

Synopsis Allow NETCONF get-config operation  
Context **configure** [system](#) [security](#) [aaa](#) [local-profiles](#) [profile](#) *string* [netconf](#) [base-op-authorization](#)  
[get-config](#) *boolean*  
Tree [get-config](#)  
Default false  
Introduced 21.7.R1  
Platforms All

### **get-data** *boolean*

Synopsis Allow NETCONF get-data operation  
Context **configure** [system](#) [security](#) [aaa](#) [local-profiles](#) [profile](#) *string* [netconf](#) [base-op-authorization](#)  
[get-data](#) *boolean*  
Tree [get-data](#)  
Default false  
Introduced 21.7.R1  
Platforms All

### **get-schema** *boolean*

Synopsis Allow NETCONF get-schema operation  
Context **configure** [system](#) [security](#) [aaa](#) [local-profiles](#) [profile](#) *string* [netconf](#) [base-op-authorization](#)  
[get-schema](#) *boolean*  
Tree [get-schema](#)  
Default false  
Introduced 21.7.R1  
Platforms All

### **kill-session** *boolean*

Synopsis Allow NETCONF kill-session operation

Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">local-profiles</a> <a href="#">profile</a> <i>string</i> <a href="#">netconf</a> <a href="#">base-op-authorization</a> <a href="#">kill-session</a> <i>boolean</i>
Tree	<a href="#">kill-session</a>
Default	false
Introduced	16.0.R1
Platforms	All

**lock** *boolean*

Synopsis	Allow NETCONF lock and unlock operations
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">local-profiles</a> <a href="#">profile</a> <i>string</i> <a href="#">netconf</a> <a href="#">base-op-authorization</a> <a href="#">lock</a> <i>boolean</i>
Tree	<a href="#">lock</a>
Default	false
Introduced	16.0.R1
Platforms	All

**validate** *boolean*

Synopsis	Allow NETCONF validate operation
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">local-profiles</a> <a href="#">profile</a> <i>string</i> <a href="#">netconf</a> <a href="#">base-op-authorization</a> <a href="#">validate</a> <i>boolean</i>
Tree	<a href="#">validate</a>
Default	false
Introduced	21.7.R1
Platforms	All

**ssh-max-sessions** *number*

Synopsis	Maximum number of concurrent SSH sessions
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">local-profiles</a> <a href="#">profile</a> <i>string</i> <a href="#">ssh-max-sessions</a> <i>number</i>
Tree	<a href="#">ssh-max-sessions</a>
Range	0 to 50
Introduced	16.0.R1
Platforms	All

**telnet-max-sessions** *number*

Synopsis	Maximum number of concurrent Telnet sessions
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">local-profiles</a> <a href="#">profile</a> <i>string</i> <b>telnet-max-sessions</b> <i>number</i>
Tree	<a href="#">telnet-max-sessions</a>
Range	0 to 50
Introduced	16.0.R1
Platforms	All

**management-interface**

Synopsis	Enter the <b>management-interface</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <b>management-interface</b>
Tree	<a href="#">management-interface</a>
Introduced	20.10.R1
Platforms	All

**md-cli**

Synopsis	Enter the <b>md-cli</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">management-interface</a> <b>md-cli</b>
Tree	<a href="#">md-cli</a>
Introduced	20.10.R1
Platforms	All

**command-accounting-during-load** *boolean*

Synopsis	Perform file command accounting for load or rollback
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">management-interface</a> <a href="#">md-cli</a> <b>command-accounting-during-load</b> <i>boolean</i>
Tree	<a href="#">command-accounting-during-load</a>
Default	true
Introduced	20.10.R1
Platforms	All

## output-authorization

Synopsis	Enter the <b>output-authorization</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">management-interface</a> <a href="#">output-authorization</a>
Tree	<a href="#">output-authorization</a>
Description	<p>Commands in this context configure output authorization for model-driven interfaces and telemetry.</p> <p>When output authorization is performed, commands that display configuration or state output must authorize every element in the output. If a remote AAA server is configured, there may be delays in displaying output while the output is authorized. The remote AAA server may receive a large volume of authorization requests when substantial output displays are needed, such as for system configuration details.</p> <p>Input to edit the configuration is always authorized, and is not affected by commands in this context.</p>
Introduced	20.10.R1
Platforms	All

## md-interfaces *boolean*

Synopsis	Authorize output in model-driven interfaces
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">management-interface</a> <a href="#">output-authorization</a> <a href="#">md-interfaces</a> <i>boolean</i>
Tree	<a href="#">md-interfaces</a>
Description	<p>When configured to <b>true</b>, output is authorized for the following:</p> <ul style="list-style-type: none"> <li>• MD-CLI <b>info</b> and <b>compare</b> commands</li> <li>• MD-CLI command completion of list key values</li> <li>• NETCONF &lt;get&gt; and &lt;get-config&gt; RPC</li> <li>• gRPC/gNMI Get RPCs</li> </ul>
Default	true
Introduced	20.10.R1
Platforms	All

## telemetry-data *boolean*

Synopsis	Authorize telemetry data in gNMI Subscribe RPC response
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">management-interface</a> <a href="#">output-authorization</a> <a href="#">telemetry-data</a> <i>boolean</i>
Tree	<a href="#">telemetry-data</a>

---

Default	false
Introduced	20.10.R1
Platforms	All

## remote-servers

Synopsis	Enter the <b>remote-servers</b> context
Context	<b>configure</b> <a href="#">system security aaa remote-servers</a>
Tree	<a href="#">remote-servers</a>
Introduced	16.0.R1
Platforms	All

## ldap

Synopsis	Enter the <b>ldap</b> context
Context	<b>configure</b> <a href="#">system security aaa remote-servers ldap</a>
Tree	<a href="#">ldap</a>
Introduced	16.0.R1
Platforms	All

## admin-state *keyword*

Synopsis	Administrative state of the LDAP operation protocol
Context	<b>configure</b> <a href="#">system security aaa remote-servers ldap admin-state</a> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	enable
Introduced	16.0.R1
Platforms	All

## public-key-authentication *boolean*

Synopsis	Allow SSH public key authentication from LDAP server
Context	<b>configure</b> <a href="#">system security aaa remote-servers ldap public-key-authentication</a> <i>boolean</i>
Tree	<a href="#">public-key-authentication</a>

Default	false
Introduced	16.0.R1
Platforms	All

### **route-preference** *keyword*

Synopsis	Route preference to reach the AAA server
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">remote-servers</a> <a href="#">ldap</a> <b>route-preference</b> <i>keyword</i>
Tree	<a href="#">route-preference</a>
Description	This command specifies the routing preference to reach the AAA server. If the configured option is to use both in-band and out-of-band routes, the out-of-band routes in the Base routing instance are used to reach the server before the in-band routes in the management routing instance.
Options	both, inband, outband
Default	both
Introduced	21.5.R1
Platforms	All

### **server** [[index](#)] *number*

Synopsis	Enter the <b>server</b> list instance
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">remote-servers</a> <a href="#">ldap</a> <b>server</b> <i>number</i>
Tree	<a href="#">server</a>
Max. Instances	5
Introduced	16.0.R1
Platforms	All

### **[index]** *number*

Synopsis	LDAP server ID
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">remote-servers</a> <a href="#">ldap</a> <b>server</b> <i>number</i>
Tree	<a href="#">server</a>
Range	1 to 5
Notes	This element is part of a list key.
Introduced	16.0.R1

Platforms All

### **address** [[ip-address](#)] (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis Enter the **address** list instance

Context **configure** [system](#) [security](#) [aaa](#) [remote-servers](#) [ldap](#) [server](#) *number* [address](#) (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Tree [address](#)

Max. Instances 1

Introduced 16.0.R1

Platforms All

### **[ip-address]** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis LDAP server address

Context **configure** [system](#) [security](#) [aaa](#) [remote-servers](#) [ldap](#) [server](#) *number* [address](#) (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Tree [address](#)

Notes This element is part of a list key.

Introduced 16.0.R1

Platforms All

### **port number**

Synopsis Port number on which to contact the LDAP server

Context **configure** [system](#) [security](#) [aaa](#) [remote-servers](#) [ldap](#) [server](#) *number* [address](#) (*ipv4-address-no-zone* | *ipv6-address-no-zone*) [port](#) *number*

Tree [port](#)

Range 1 to 65535

Default 389

Introduced 16.0.R1

Platforms All

**admin-state** *keyword*

Synopsis	Administrative state of the LDAP server
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">remote-servers</a> <a href="#">ldap server</a> <i>number</i> <b>admin-state</b> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	16.0.R1
Platforms	All

**bind-authentication**

Synopsis	Enter the <b>bind-authentication</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">remote-servers</a> <a href="#">ldap server</a> <i>number</i> <b>bind-authentication</b>
Tree	<a href="#">bind-authentication</a>
Introduced	16.0.R1
Platforms	All

**password** *string*

Synopsis	Password used for authentication with the LDAP server
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">remote-servers</a> <a href="#">ldap server</a> <i>number</i> <b>bind-authentication</b> <b>password</b> <i>string</i>
Tree	<a href="#">password</a>
String Length	1 to 199
Introduced	16.0.R1
Platforms	All

**root-dn** *string*

Synopsis	Root domain used for authentication with LDAP server
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">remote-servers</a> <a href="#">ldap server</a> <i>number</i> <b>bind-authentication</b> <b>root-dn</b> <i>string</i>
Tree	<a href="#">root-dn</a>
String Length	1 to 512
Introduced	16.0.R1

Platforms All

## search

Synopsis Enter the **search** context

Context **configure** [system](#) [security](#) [aaa](#) [remote-servers](#) [ldap](#) [server](#) *number* [search](#)

Tree [search](#)

Introduced 16.0.R1

Platforms All

## base-dn *string*

Synopsis LDAP server search base domain name

Context **configure** [system](#) [security](#) [aaa](#) [remote-servers](#) [ldap](#) [server](#) *number* [search](#) [base-dn](#) *string*

Tree [base-dn](#)

String Length 1 to 512

Introduced 16.0.R1

Platforms All

## server-name *string*

Synopsis LDAP server name

Context **configure** [system](#) [security](#) [aaa](#) [remote-servers](#) [ldap](#) [server](#) *number* [server-name](#) *string*

Tree [server-name](#)

String Length 1 to 32

Introduced 16.0.R1

Platforms All

## tls-profile *reference*

Synopsis TLS client profile used to encrypt the LDAP connection

Context **configure** [system](#) [security](#) [aaa](#) [remote-servers](#) [ldap](#) [server](#) *number* [tls-profile](#) *reference*

Tree [tls-profile](#)

Reference **configure** [system](#) [security](#) [tls](#) [client-tls-profile](#) *string*

---

Introduced	16.0.R1
Platforms	All

**server-retry** *number*

Synopsis	Number of attempts to retry contacting the LDAP server
Context	<b>configure</b> <a href="#">system security aaa remote-servers ldap server-retry</a> <i>number</i>
Tree	<a href="#">server-retry</a>
Range	1 to 10
Default	3
Introduced	16.0.R1
Platforms	All

**server-timeout** *number*

Synopsis	Timeout for a response from the LDAP server
Context	<b>configure</b> <a href="#">system security aaa remote-servers ldap server-timeout</a> <i>number</i>
Tree	<a href="#">server-timeout</a>
Range	1 to 90
Units	seconds
Default	3
Introduced	16.0.R1
Platforms	All

**use-default-template** *boolean*

Synopsis	Apply the default template to LDAP
Context	<b>configure</b> <a href="#">system security aaa remote-servers ldap use-default-template</a> <i>boolean</i>
Tree	<a href="#">use-default-template</a>
Default	true
Introduced	16.0.R1
Platforms	All

## radius

Synopsis	Enter the <b>radius</b> context
Context	<b>configure system security aaa remote-servers radius</b>
Tree	<a href="#">radius</a>
Introduced	16.0.R1
Platforms	All

## access-algorithm *keyword*

Synopsis	Algorithm used to access the set of RADIUS servers
Context	<b>configure system security aaa remote-servers radius access-algorithm <i>keyword</i></b>
Tree	<a href="#">access-algorithm</a>
Options	direct, round-robin
Default	direct
Introduced	16.0.R1
Platforms	All

## accounting *boolean*

Synopsis	Enable RADIUS command accounting
Context	<b>configure system security aaa remote-servers radius accounting <i>boolean</i></b>
Tree	<a href="#">accounting</a>
Default	false
Introduced	16.0.R1
Platforms	All

## accounting-port *number*

Synopsis	Port number on RADIUS server for accounting requests
Context	<b>configure system security aaa remote-servers radius accounting-port <i>number</i></b>
Tree	<a href="#">accounting-port</a>
Range	1 to 65535
Default	1813
Introduced	16.0.R1
Platforms	All

**admin-state** *keyword*

Synopsis	Administrative state of the authentication server
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">remote-servers</a> <a href="#">radius</a> <b>admin-state</b> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	enable
Introduced	16.0.R1
Platforms	All

**authorization** *boolean*

Synopsis	Enable RADIUS authorization
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">remote-servers</a> <a href="#">radius</a> <b>authorization</b> <i>boolean</i>
Tree	<a href="#">authorization</a>
Default	false
Introduced	16.0.R1
Platforms	All

**interactive-authentication** *boolean*

Synopsis	Enable RADIUS interactive authentication
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">remote-servers</a> <a href="#">radius</a> <b>interactive-authentication</b> <i>boolean</i>
Tree	<a href="#">interactive-authentication</a>
Default	false
Introduced	16.0.R1
Platforms	All

**port** *number*

Synopsis	UDP port number on which to contact RADIUS server
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">remote-servers</a> <a href="#">radius</a> <b>port</b> <i>number</i>
Tree	<a href="#">port</a>
Range	1 to 65535
Default	1812

Introduced	16.0.R1
Platforms	All

### **route-preference** *keyword*

Synopsis	Route preference to reach the AAA server
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">remote-servers</a> <a href="#">radius</a> <b>route-preference</b> <i>keyword</i>
Tree	<a href="#">route-preference</a>
Description	This command specifies the routing preference to reach the AAA server. If the configured option is to use both in-band and out-of-band routes, the out-of-band routes in the Base routing instance are used to reach the server before the in-band routes in the management routing instance.
Options	both, inband, outband
Default	both
Introduced	21.5.R1
Platforms	All

### **server** [[index](#)] *number*

Synopsis	Enter the <b>server</b> list instance
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">remote-servers</a> <a href="#">radius</a> <a href="#">server</a> <i>number</i>
Tree	<a href="#">server</a>
Max. Instances	5
Introduced	16.0.R1
Platforms	All

### **[index]** *number*

Synopsis	RADIUS server ID
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">remote-servers</a> <a href="#">radius</a> <a href="#">server</a> <i>number</i>
Tree	<a href="#">server</a>
Range	1 to 5
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

**address** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	IP address of the RADIUS server
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">remote-servers</a> <a href="#">radius</a> <a href="#">server</a> <i>number</i> <b>address</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	<a href="#">address</a>
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

**authenticator** *keyword*

Synopsis	Authenticator hash algorithm for the RADIUS server
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">remote-servers</a> <a href="#">radius</a> <a href="#">server</a> <i>number</i> <b>authenticator</b> <i>keyword</i>
Tree	<a href="#">authenticator</a>
Description	This command specifies the hash algorithm used to authenticate RADIUS Access-Request, Access-Accept, Access-Reject, Access-Challenge, Accounting-Request, and Accounting-Response packets.
Options	md5, sm3
Default	md5
Introduced	22.10.R1
Platforms	All

**secret** *string*

Synopsis	Secret key to access the RADIUS server
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">remote-servers</a> <a href="#">radius</a> <a href="#">server</a> <i>number</i> <b>secret</b> <i>string</i>
Tree	<a href="#">secret</a>
String Length	1 to 115
Introduced	16.0.R1
Platforms	All

**tls-client-profile** *reference*

Synopsis	TLS client profile for the RADIUS server
----------	--

Context	<b>configure system security aaa remote-servers radius server</b> <i>number</i> <i>tls-client-profile reference</i>
Tree	<a href="#">tls-client-profile</a>
Description	This command specifies the TLS client profile used to encrypt RADIUS communication. When configured, RADIUS messages are sent using TLS.
Reference	<b>configure system security</b> <a href="#">tls client-tls-profile</a> <i>string</i>
Introduced	21.10.R1
Platforms	All

### **server-retry** *number*

Synopsis	Number of attempts to retry contacting RADIUS server
Context	<b>configure system security aaa remote-servers radius server-retry</b> <i>number</i>
Tree	<a href="#">server-retry</a>
Range	1 to 10
Default	3
Introduced	16.0.R1
Platforms	All

### **server-timeout** *number*

Synopsis	Time to wait for a response from the RADIUS server
Context	<b>configure system security aaa remote-servers radius server-timeout</b> <i>number</i>
Tree	<a href="#">server-timeout</a>
Range	1 to 90
Units	seconds
Default	3
Introduced	16.0.R1
Platforms	All

### **use-default-template** *boolean*

Synopsis	Apply the RADIUS default user template to RADIUS user
Context	<b>configure system security aaa remote-servers radius use-default-template</b> <i>boolean</i>
Tree	<a href="#">use-default-template</a>

---

Default	false
Introduced	16.0.R1
Platforms	All

## **tacplus**

Synopsis	Enter the <b>tacplus</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">remote-servers</a> <a href="#">tacplus</a>
Tree	<a href="#">tacplus</a>
Introduced	16.0.R1
Platforms	All

## **accounting**

Synopsis	Enable the <b>accounting</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">remote-servers</a> <a href="#">tacplus</a> <a href="#">accounting</a>
Tree	<a href="#">accounting</a>
Introduced	16.0.R1
Platforms	All

## **record-type** *keyword*

Synopsis	Type of accounting record packet sent to TACACS+ server
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">remote-servers</a> <a href="#">tacplus</a> <a href="#">accounting</a> <a href="#">record-type</a> <i>keyword</i>
Tree	<a href="#">record-type</a>
Options	start-stop, stop-only
Default	stop-only
Introduced	16.0.R1
Platforms	All

## **admin-control**

Synopsis	Enter the <b>admin-control</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">remote-servers</a> <a href="#">tacplus</a> <a href="#">admin-control</a>
Tree	<a href="#">admin-control</a>

Introduced 16.0.R1  
Platforms All

### **tacplus-map-to-priv-lvl** *number*

Synopsis Interactive authentication from node to TACACS+ server  
Context **configure** [system security aaa remote-servers tacplus admin-control tacplus-map-to-priv-lvl number](#)  
Tree [tacplus-map-to-priv-lvl](#)  
Range 0 to 15  
Introduced 16.0.R1  
Platforms All

### **admin-state** *keyword*

Synopsis Administrative state of the TACACS+ protocol  
Context **configure** [system security aaa remote-servers tacplus admin-state keyword](#)  
Tree [admin-state](#)  
Options enable, disable  
Default enable  
Introduced 16.0.R1  
Platforms All

### **authorization**

Synopsis Enable the **authorization** context  
Context **configure** [system security aaa remote-servers tacplus authorization](#)  
Tree [authorization](#)  
Introduced 16.0.R1  
Platforms All

### **request-format**

Synopsis Enter the **request-format** context  
Context **configure** [system security aaa remote-servers tacplus authorization request-format](#)  
Tree [request-format](#)

Description	Commands in this context configure access operations that are sent to the TACACS+ server during authorization.
Introduced	21.10.R3
Platforms	All

### **access-operation-cmd** *keyword*

Synopsis	Access operations sent in authorization requests
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">remote-servers</a> <a href="#">tacplus</a> <a href="#">authorization</a> <a href="#">request-format</a> <b>access-operation-cmd</b> <i>keyword</i>
Tree	<a href="#">access-operation-cmd</a>
Description	This command sends an operation argument in authorization requests.  In model-driven interfaces, this command configures the system to send the operation in the cmd argument, and the path in the cmd-args argument, in TACACS+ authorization requests. This command does not apply to authorization requests in classic interfaces.
Options	delete
Max. Instances	1
Introduced	21.10.R3
Platforms	All

### **use-priv-lvl** *boolean*

Synopsis	Allow privilege level mapping
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">remote-servers</a> <a href="#">tacplus</a> <a href="#">authorization</a> <b>use-priv-lvl</b> <i>boolean</i>
Tree	<a href="#">use-priv-lvl</a>
Description	When configured to <b>true</b> , this command automatically performs a single authorization request to the TACACS+ server for cmd* (all commands) immediately after login, and then uses the local profile associated (via the <b>priv-lvl-map</b> ) with the priv-lvl returned by the TACACS+ server for all subsequent authorization (except <b>enable-admin</b> ). After the initial authorization for cmd*, no further authorization requests are sent to the TACACS+ server (except <b>enable-admin</b> ).  When configured to <b>false</b> , each command is sent to the TACACS+ server for authorization (this is true regardless of whether the <b>tacplus use-default-template</b> setting is enabled).
Default	false
Introduced	16.0.R1
Platforms	All

**interactive-authentication** *boolean*

Synopsis	Allows TACACS+ interactive authentication
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">remote-servers</a> <a href="#">tacplus</a> <a href="#">interactive-authentication</a> <i>boolean</i>
Tree	<a href="#">interactive-authentication</a>
Default	false
Introduced	16.0.R1
Platforms	All

**priv-lvl-map**

Synopsis	Enter the <b>priv-lvl-map</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">remote-servers</a> <a href="#">tacplus</a> <a href="#">priv-lvl-map</a>
Tree	<a href="#">priv-lvl-map</a>
Introduced	16.0.R1
Platforms	All

**priv-lvl** [[level](#)] *number*

Synopsis	Enter the <b>priv-lvl</b> list instance
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">remote-servers</a> <a href="#">tacplus</a> <a href="#">priv-lvl-map</a> <a href="#">priv-lvl</a> <i>number</i>
Tree	<a href="#">priv-lvl</a>
Introduced	16.0.R1
Platforms	All

**[level]** *number*

Synopsis	Privilege level for the mapping
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">remote-servers</a> <a href="#">tacplus</a> <a href="#">priv-lvl-map</a> <a href="#">priv-lvl</a> <i>number</i>
Tree	<a href="#">priv-lvl</a>
Range	0 to 15
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

**user-profile-name** *reference*

Synopsis	User profile for the mapping
Context	<b>configure system security aaa remote-servers tacplus priv-lvl-map priv-lvl</b> <i>number user-profile-name reference</i>
Tree	<a href="#">user-profile-name</a>
Reference	<b>configure system security aaa local-profiles profile</b> <i>string</i>
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

**route-preference** *keyword*

Synopsis	Route preference to reach the AAA server
Context	<b>configure system security aaa remote-servers tacplus route-preference</b> <i>keyword</i>
Tree	<a href="#">route-preference</a>
Description	This command specifies the routing preference to reach the AAA server. If the configured option is to use both in-band and out-of-band routes, the out-of-band routes in the Base routing instance are used to reach the server before the in-band routes in the management routing instance.
Options	both, inband, outband
Default	both
Introduced	21.5.R1
Platforms	All

**server** [[index](#)] *number*

Synopsis	Enter the <b>server</b> list instance
Context	<b>configure system security aaa remote-servers tacplus server</b> <i>number</i>
Tree	<a href="#">server</a>
Max. Instances	5
Introduced	16.0.R1
Platforms	All

**[index] number**

Synopsis	TACACS+ server ID
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">remote-servers</a> <a href="#">tacplus</a> <a href="#">server</a> <i>number</i>
Tree	<a href="#">server</a>
Range	1 to 5
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

**address** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	IP address of the TACACS+ server
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">remote-servers</a> <a href="#">tacplus</a> <a href="#">server</a> <i>number</i> <a href="#">address</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	<a href="#">address</a>
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

**port number**

Synopsis	TCP port ID on which to contact TACACS+ server
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">remote-servers</a> <a href="#">tacplus</a> <a href="#">server</a> <i>number</i> <a href="#">port</a> <i>number</i>
Tree	<a href="#">port</a>
Range	0   1 to 65535
Default	49
Introduced	16.0.R1
Platforms	All

**secret string**

Synopsis	Secret key to access the TACACS+ server
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">remote-servers</a> <a href="#">tacplus</a> <a href="#">server</a> <i>number</i> <a href="#">secret</a> <i>string</i>
Tree	<a href="#">secret</a>
String Length	1 to 199

---

Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

### **server-timeout** *number*

Synopsis	Time to wait for a response from the TACACS+ server
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">remote-servers</a> <a href="#">tacplus</a> <b>server-timeout</b> <i>number</i>
Tree	<a href="#">server-timeout</a>
Range	1 to 90
Units	seconds
Default	3
Introduced	16.0.R1
Platforms	All

### **use-default-template** *boolean*

Synopsis	Apply TACACS+ default user-template to TACACS+ user
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">remote-servers</a> <a href="#">tacplus</a> <b>use-default-template</b> <i>boolean</i>
Tree	<a href="#">use-default-template</a>
Default	true
Introduced	16.0.R1
Platforms	All

### **vprn-server**

Synopsis	Enter the <b>vprn-server</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">remote-servers</a> <b>vprn-server</b>
Tree	<a href="#">vprn-server</a>
Introduced	22.2.R1
Platforms	All

### **inband** *reference*

Synopsis	VPRN service used for AAA by in-band sessions
----------	---

Context	<b>configure system security aaa remote-servers vprn-server inband</b> <i>reference</i>
Tree	<a href="#">inband</a>
Description	This command configures TACACS+ or RADIUS servers in a VPRN to be used for AAA by that VPRN and by sessions in the Base routing instance.
Reference	<b>configure service vprn</b> <i>string</i>
Introduced	22.2.R1
Platforms	All

### **outband** *reference*

Synopsis	VPRN service used for AAA by out-of-band sessions
Context	<b>configure system security aaa remote-servers vprn-server outband</b> <i>reference</i>
Tree	<a href="#">outband</a>
Description	This command configures TACACS+ and RADIUS servers in a VPRN to be used for AAA by that VPRN and by sessions on the console or out-of-band (OOB) Ethernet ports.
Reference	<b>configure service vprn</b> <i>string</i>
Introduced	22.2.R1
Platforms	All

### **vprn** *reference*

Synopsis	VPRN used for AAA in VPRNs without a AAA server
Context	<b>configure system security aaa remote-servers vprn-server vprn</b> <i>reference</i>
Tree	<a href="#">vprn</a>
Description	This command configures TACACS+ or RADIUS servers in a VPRN to be used for AAA by that VPRN and by sessions in VPRNs without a AAA server configured.
Reference	<b>configure service vprn</b> <i>string</i>
Introduced	22.2.R1
Platforms	All

### **user-template** [[user-template-name](#)] *keyword*

Synopsis	Enter the <b>user-template</b> list instance
Context	<b>configure system security aaa user-template</b> <i>keyword</i>
Tree	<a href="#">user-template</a>

Introduced 16.0.R1  
 Platforms All

### **[user-template-name]** *keyword*

Synopsis Default user template applied to the system user  
 Context **configure** [system](#) [security](#) [aaa](#) [user-template](#) *keyword*  
 Tree [user-template](#)  
 Options ldap-default, radius-default, tacplus-default  
 Notes This element is part of a list key.  
 Introduced 16.0.R1  
 Platforms All

### **access**

Synopsis Enter the **access** context  
 Context **configure** [system](#) [security](#) [aaa](#) [user-template](#) *keyword* **access**  
 Tree [access](#)  
 Introduced 16.0.R1  
 Platforms All

### **console** *boolean*

Synopsis Allow console access (serial port or Telnet)  
 Context **configure** [system](#) [security](#) [aaa](#) [user-template](#) *keyword* **access** [console](#) *boolean*  
 Tree [console](#)  
 Default true  
 Introduced 16.0.R1  
 Platforms All

### **ftp** *boolean*

Synopsis Allow FTP access  
 Context **configure** [system](#) [security](#) [aaa](#) [user-template](#) *keyword* **access** [ftp](#) *boolean*  
 Tree [ftp](#)

---

Default	false
Introduced	16.0.R1
Platforms	All

### **grpc** *boolean*

Synopsis	Allow gRPC access
Context	<b>configure</b> <a href="#">system security aaa user-template</a> <i>keyword</i> <a href="#">access grpc</a> <i>boolean</i>
Tree	<a href="#">grpc</a>
Default	false
Introduced	16.0.R1
Platforms	All

### **li** *boolean*

Synopsis	Allow access to lawful intercept
Context	<b>configure</b> <a href="#">system security aaa user-template</a> <i>keyword</i> <a href="#">access li</a> <i>boolean</i>
Tree	<a href="#">li</a>
Default	false
Introduced	19.10.R1
Platforms	All

### **netconf** *boolean*

Synopsis	Allow NETCONF session access
Context	<b>configure</b> <a href="#">system security aaa user-template</a> <i>keyword</i> <a href="#">access netconf</a> <i>boolean</i>
Tree	<a href="#">netconf</a>
Default	false
Introduced	16.0.R1
Platforms	All

### **console**

Synopsis	Enter the <b>console</b> context
Context	<b>configure</b> <a href="#">system security aaa user-template</a> <i>keyword</i> <a href="#">console</a>

Tree	<a href="#">console</a>
Introduced	16.0.R1
Platforms	All

### **login-exec** *string*

Synopsis	File to execute for a successful user login via console
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">user-template</a> <i>keyword</i> <a href="#">console</a> <b>login-exec</b> <i>string</i>
Tree	<a href="#">login-exec</a>
String Length	1 to 200
Introduced	16.0.R1
Platforms	All

### **home-directory** (*sat-url* | *cflash-without-slot-url*)

Synopsis	User local home directory based on the template
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">user-template</a> <i>keyword</i> <a href="#">home-directory</a> ( <i>sat-url</i>   <i>cflash-without-slot-url</i> )
Tree	<a href="#">home-directory</a>
Description	This command configures the home directory of the user for file access. Files can be accessed locally by CLI <b>file</b> commands and output modifiers such as <b>&gt;</b> (file redirect), or remotely via FTP and SCP. If the home directory does not exist, a warning message is displayed when the user logs in.  When <b>restricted-to-home</b> is configured, file access is denied unless the <b>home-directory</b> is configured and the directory is created by an administrator.
String Length	1 to 200
Introduced	16.0.R1
Platforms	All

### **profile** *string*

Synopsis	User profile based on the template
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">user-template</a> <i>keyword</i> <a href="#">profile</a> <i>string</i>
Tree	<a href="#">profile</a>
String Length	1 to 32
Introduced	16.0.R1

Platforms All

### **restricted-to-home** *boolean*

**Synopsis** Restrict file access to the home directory of the user

**Context** **configure** **system** **security** **aaa** **user-template** *keyword* **restricted-to-home** *boolean*

**Tree** [restricted-to-home](#)

**Description** When configured to **true**, the router denies the user from accessing files outside of their home directory. Files can be accessed locally by CLI file commands and output modifiers such as > (file redirect), or remotely via FTP and SCP. The system denies all configuration save operations (such as **admin save**) via any management interface (such as CLI and NETCONF) unless **save-when-restricted** is enabled.

File access is denied unless a home directory is configured and the directory is created by an administrator.

When configured to **false**, the router permits the user to access all files on the system.

**Default** false

**Introduced** 16.0.R1

**Platforms** All

### **save-when-restricted** *boolean*

**Synopsis** Save configurations when the user is restricted to home

**Context** **configure** **system** **security** **aaa** **user-template** *keyword* **save-when-restricted** *boolean*

**Tree** [save-when-restricted](#)

**Description** When configured to **true**, the system permits configuration save operations for all configuration regions (such as bof and configure) via any management interface (such as CLI and NETCONF) even if **restricted-to-home** is enabled.

The configuration for each region can be saved with **admin save** CLI commands or when committed over NETCONF and gRPC.

When configured to **false**, the system denies saving the configuration when **restricted-to-home** is enabled, unless the home directory of the user includes the location of the saved configuration file.

**Default** false

**Introduced** 22.10.R1

**Platforms** All

## cli-script

Synopsis	Enter the <b>cli-script</b> context
Context	<b>configure system security cli-script</b>
Tree	<a href="#">cli-script</a>
Introduced	16.0.R1
Platforms	All

## authorization

Synopsis	Enter the <b>authorization</b> context
Context	<b>configure system security cli-script authorization</b>
Tree	<a href="#">authorization</a>
Introduced	16.0.R1
Platforms	All

## cron

Synopsis	Enter the <b>cron</b> context
Context	<b>configure system security cli-script authorization cron</b>
Tree	<a href="#">cron</a>
Description	Commands in this context configure authorization for the cron job scheduler.
Introduced	16.0.R1
Platforms	All

## cli-user *reference*

Synopsis	User profile name for CLI command script authorization
Context	<b>configure system security cli-script authorization cron cli-user <i>reference</i></b>
Tree	<a href="#">cli-user</a>
Reference	<b>configure system security user-params local-user user <i>string</i></b>
Introduced	16.0.R1
Platforms	All

## event-handler

Synopsis	Enter the <b>event-handler</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cli-script</a> <a href="#">authorization</a> <a href="#">event-handler</a>
Tree	<a href="#">event-handler</a>
Description	Commands in this context configure authorization for the Event Handling System (EHS). EHS allows user-controlled programmatic exception handling by allowing a CLI script to be executed upon the detection of a log event.
Introduced	16.0.R1
Platforms	All

## cli-user *reference*

Synopsis	User profile name for CLI command script authorization
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cli-script</a> <a href="#">authorization</a> <a href="#">event-handler</a> <a href="#">cli-user</a> <i>reference</i>
Tree	<a href="#">cli-user</a>
Reference	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">user</a> <i>string</i>
Introduced	16.0.R1
Platforms	All

## cpm-filter

Synopsis	Enter the <b>cpm-filter</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a>
Tree	<a href="#">cpm-filter</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## default-action *keyword*

Synopsis	Action for packets that do not match any filter entries
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">default-action</a> <i>keyword</i>
Tree	<a href="#">default-action</a>
Options	drop, accept
Default	accept
Introduced	16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## ip-filter

Synopsis Enter the **ip-filter** context  
 Context **configure system security cpm-filter ip-filter**  
 Tree [ip-filter](#)  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## admin-state *keyword*

Synopsis Administrative state of the CPM filter  
 Context **configure system security cpm-filter ip-filter admin-state *keyword***  
 Tree [admin-state](#)  
 Options enable, disable  
 Default disable  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## entry [[entry-id](#)] *number*

Synopsis Enter the **entry** list instance  
 Context **configure system security cpm-filter ip-filter entry *number***  
 Tree [entry](#)  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## [[entry-id](#)] *number*

Synopsis Filter entry ID  
 Context **configure system security cpm-filter ip-filter entry *number***  
 Tree [entry](#)  
 Range 1 to 131072  
 Notes This element is part of a list key.

Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## action

Synopsis	Enter the <b>action</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ip-filter</a> <a href="#">entry</a> <i>number</i> <b>action</b>
Tree	<a href="#">action</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## accept

Synopsis	Forward matching packets
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ip-filter</a> <a href="#">entry</a> <i>number</i> <b>action</b> <b>accept</b>
Tree	<a href="#">accept</a>
Notes	The following elements are part of a choice: <b>accept</b> , <b>default</b> , <b>drop</b> , or <b>queue</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## default

Synopsis	Use default action for matching packets
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ip-filter</a> <a href="#">entry</a> <i>number</i> <b>action</b> <b>default</b>
Tree	<a href="#">default</a>
Notes	The following elements are part of a choice: <b>accept</b> , <b>default</b> , <b>drop</b> , or <b>queue</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## drop

Synopsis	Drop matching packets
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ip-filter</a> <a href="#">entry</a> <i>number</i> <b>action</b> <b>drop</b>
Tree	<a href="#">drop</a>
Notes	The following elements are part of a choice: <b>accept</b> , <b>default</b> , <b>drop</b> , or <b>queue</b> .

Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **queue** *reference*

Synopsis	Forward matching packets to the CPM hardware queue
Context	<b>configure</b> <a href="#">system security cpm-filter ip-filter entry number action queue reference</a>
Tree	<a href="#">queue</a>
Reference	<b>configure</b> <a href="#">system security cpm-queue queue number</a>
Notes	The following elements are part of a choice: <b>accept</b> , <b>default</b> , <b>drop</b> , or <b>queue</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">system security cpm-filter ip-filter entry number description string</a>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **log** *reference*

Synopsis	Log ID where matching packets are entered
Context	<b>configure</b> <a href="#">system security cpm-filter ip-filter entry number log reference</a>
Tree	<a href="#">log</a>
Reference	<b>configure</b> <a href="#">filter log number</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **match**

Synopsis	Enter the <b>match</b> context
Context	<b>configure</b> <a href="#">system security cpm-filter ip-filter entry number match</a>

Tree	<a href="#">match</a>
Description	<p>Commands in this context specify match criteria for the entry. When the match criteria have been satisfied, the action associated with the entry is executed.</p> <p>If more than one match criterion is configured, all criteria must be met before the action associated with the entry is executed.</p>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **dscp keyword**

Synopsis	DSCP used as the match criterion on the packet
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ip-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">dscp</a> <i>keyword</i>
Tree	<a href="#">dscp</a>
Options	be, cp1, cp2, cp3, cp4, cp5, cp6, cp7, cs1, cp9, af11, cp11, af12, cp13, af13, cp15, cs2, cp17, af21, cp19, af22, cp21, af23, cp23, cs3, cp25, af31, cp27, af32, cp29, af33, cp31, cs4, cp33, af41, cp35, af42, cp37, af43, cp39, cs5, cp41, cp42, cp43, cp44, cp45, ef, cp47, nc1, cp49, cp50, cp51, cp52, cp53, cp54, cp55, nc2, cp57, cp58, cp59, cp60, cp61, cp62, cp63
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **dst-ip**

Synopsis	Enter the <b>dst-ip</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ip-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">dst-ip</a>
Tree	<a href="#">dst-ip</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **address** (*ipv4-prefix-with-host-bits* | *ipv4-address*)

Synopsis	IPv4 address used as the match criterion
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ip-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">dst-ip</a> <a href="#">address</a> ( <i>ipv4-prefix-with-host-bits</i>   <i>ipv4-address</i> )
Tree	<a href="#">address</a>
Notes	The following elements are part of a choice: ( <b>address</b> and <b>mask</b> ) or <b>ip-prefix-list</b> .
Introduced	16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **ip-prefix-list** *reference*

Synopsis IPv4 address prefix list used as match criterion

Context **configure** [system](#) [security](#) [cpm-filter](#) [ip-filter](#) [entry](#) *number* [match](#) [dst-ip](#) [ip-prefix-list](#) *reference*

Tree [ip-prefix-list](#)

Reference **configure** [filter](#) [match-list](#) [ip-prefix-list](#) *string*

Notes The following elements are part of a choice: (**address** and **mask**) or **ip-prefix-list**.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **mask** *string*

Synopsis IPv4 address mask used as the match criterion

Context **configure** [system](#) [security](#) [cpm-filter](#) [ip-filter](#) [entry](#) *number* [match](#) [dst-ip](#) [mask](#) *string*

Tree [mask](#)

Notes The following elements are part of a choice: (**address** and **mask**) or **ip-prefix-list**.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **dst-port**

Synopsis Enter the **dst-port** context

Context **configure** [system](#) [security](#) [cpm-filter](#) [ip-filter](#) [entry](#) *number* [match](#) [dst-port](#)

Tree [dst-port](#)

Notes The following elements are part of a choice: **port** or (**dst-port** and **src-port**).

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **eq** *number*

Synopsis Port number as the match criterion

Context **configure** [system](#) [security](#) [cpm-filter](#) [ip-filter](#) [entry](#) *number* [match](#) [dst-port](#) [eq](#) *number*

Tree	<a href="#">eq</a>
Range	0 to 65535
Notes	The following elements are part of a choice: ( <b>eq</b> and <b>mask</b> ), <b>port-list</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **mask number**

Synopsis	Port mask as the match criterion
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ip-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">dst-port</a> <a href="#">mask</a> <i>number</i>
Tree	<a href="#">mask</a>
Range	1 to 65535
Default	65535
Notes	The following elements are part of a choice: ( <b>eq</b> and <b>mask</b> ), <b>port-list</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **port-list reference**

Synopsis	Port list as the match criterion
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ip-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">dst-port</a> <a href="#">port-list</a> <i>reference</i>
Tree	<a href="#">port-list</a>
Reference	<b>configure</b> <a href="#">filter</a> <a href="#">match-list</a> <a href="#">port-list</a> <i>string</i>
Notes	The following elements are part of a choice: ( <b>eq</b> and <b>mask</b> ), <b>port-list</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **range**

Synopsis	Enable the <b>range</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ip-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">dst-port</a> <a href="#">range</a>
Tree	<a href="#">range</a>
Notes	The following elements are part of a choice: ( <b>eq</b> and <b>mask</b> ), <b>port-list</b> , or <b>range</b> .
Introduced	16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **end number**

Synopsis Upper bound of the port number to match

Context **configure system security cpm-filter ip-filter entry** *number match dst-port range end number*

Tree [end](#)

Range 0 to 65535

Notes This element is mandatory.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **start number**

Synopsis Lower bound of the port number to match

Context **configure system security cpm-filter ip-filter entry** *number match dst-port range start number*

Tree [start](#)

Range 0 to 65535

Notes This element is mandatory.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **fragment keyword**

Synopsis Match criterion based on presence of fragmented packets

Context **configure system security cpm-filter ip-filter entry** *number match fragment keyword*

Tree [fragment](#)

Description This command specifies the match criterion based on the existence or absence of fragmented IP packets.

Matching on fragmented IPv4 packets occurs when all packets have either the MF (more fragment) bit set or have the Fragment Offset field of the IP header set to a non-zero value. For IPv6, the existence of the IPv6 Fragmentation Extension Header results in a fragmented packet match.

Matching on non-fragmented IPv4 packets occurs when all packets have the MF bit set to zero and the Fragment Offset field is also set to zero. For IPv6, the absence of an IPv6 Fragmentation Extension Header results in a non-fragmented packet match.

Options	false, true
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## icmp

Synopsis	Enter the <b>icmp</b> context
Context	<b>configure</b> <a href="#">system security cpm-filter ip-filter entry number match icmp</a>
Tree	<a href="#">icmp</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## code number

Synopsis	ICMP code to match
Context	<b>configure</b> <a href="#">system security cpm-filter ip-filter entry number match icmp code number</a>
Tree	<a href="#">code</a>
Range	0 to 255
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## type number

Synopsis	ICMP type to match
Context	<b>configure</b> <a href="#">system security cpm-filter ip-filter entry number match icmp type number</a>
Tree	<a href="#">type</a>
Range	0 to 255
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## ip-option

Synopsis	Enable the <b>ip-option</b> context
----------	-------------------------------------

Context	<b>configure system security cpm-filter ip-filter entry</b> <i>number match ip-option</i>
Tree	<a href="#">ip-option</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**mask number**

Synopsis	Range of option numbers for the mask match criterion
Context	<b>configure system security cpm-filter ip-filter entry</b> <i>number match ip-option mask number</i>
Tree	<a href="#">mask</a>
Range	1 to 255
Default	255
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**type number**

Synopsis	Specific IP option to match
Context	<b>configure system security cpm-filter ip-filter entry</b> <i>number match ip-option type number</i>
Tree	<a href="#">type</a>
Range	0 to 255
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**multiple-option boolean**

Synopsis	Match on packets containing multiple option fields
Context	<b>configure system security cpm-filter ip-filter entry</b> <i>number match multiple-option boolean</i>
Tree	<a href="#">multiple-option</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **option-present** *boolean*

Synopsis	Match on packets with option field present
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ip-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">option-present</a> <i>boolean</i>
Tree	<a href="#">option-present</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **port**

Synopsis	Enter the <b>port</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ip-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">port</a>
Tree	<a href="#">port</a>
Notes	The following elements are part of a choice: <b>port</b> or ( <b>dst-port</b> and <b>src-port</b> ).
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **eq** *number*

Synopsis	Port number as the match criterion
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ip-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">port</a> <a href="#">eq</a> <i>number</i>
Tree	<a href="#">eq</a>
Range	0 to 65535
Notes	The following elements are part of a choice: ( <b>eq</b> and <b>mask</b> ), <b>port-list</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **mask** *number*

Synopsis	Port mask as the match criterion
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ip-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">port</a> <a href="#">mask</a> <i>number</i>
Tree	<a href="#">mask</a>
Range	1 to 65535
Default	65535
Notes	The following elements are part of a choice: ( <b>eq</b> and <b>mask</b> ), <b>port-list</b> , or <b>range</b> .

Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **port-list** *reference*

Synopsis	Port list as the match criterion
Context	<b>configure</b> <a href="#">system security cpm-filter ip-filter entry</a> <i>number match port port-list reference</i>
Tree	<a href="#">port-list</a>
Reference	<b>configure</b> <a href="#">filter match-list port-list string</a>
Notes	The following elements are part of a choice: ( <b>eq</b> and <b>mask</b> ), <b>port-list</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **range**

Synopsis	Enable the <b>range</b> context
Context	<b>configure</b> <a href="#">system security cpm-filter ip-filter entry</a> <i>number match port range</i>
Tree	<a href="#">range</a>
Notes	The following elements are part of a choice: ( <b>eq</b> and <b>mask</b> ), <b>port-list</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **end** *number*

Synopsis	Upper bound of the port number to match
Context	<b>configure</b> <a href="#">system security cpm-filter ip-filter entry</a> <i>number match port range end number</i>
Tree	<a href="#">end</a>
Range	0 to 65535
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **start** *number*

Synopsis	Lower bound of the port number to match
----------	---

Context	<b>configure system security cpm-filter ip-filter entry</b> <i>number match port range start number</i>
Tree	<a href="#">start</a>
Range	0 to 65535
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **protocol** (*number | keyword*)

Synopsis	IP protocol as the match criterion
Context	<b>configure system security cpm-filter ip-filter entry</b> <i>number match protocol</i> ( <i>number   keyword</i> )
Tree	<a href="#">protocol</a>
Range	0 to 255
Options	tcp-udp, icmp, igmp, ip, tcp, egp, igp, udp, rdp, ipv6, ipv6-route, ipv6-frag, idrp, rsvp, gre, ipv6-icmp, ipv6-no-nxt, ipv6-opts, iso-ip, eigrp, ospf-igp, ether-ip, encap, pnni, pim, vrrp, l2tp, stp, ptp, isis, crtp, crudp, sctp
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **router-instance** *string*

Synopsis	Router instance as the match criteria
Context	<b>configure system security cpm-filter ip-filter entry</b> <i>number match router-instance</i> <i>string</i>
Tree	<a href="#">router-instance</a>
String Length	1 to 64
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **src-ip**

Synopsis	Enter the <b>src-ip</b> context
Context	<b>configure system security cpm-filter ip-filter entry</b> <i>number match src-ip</i>
Tree	<a href="#">src-ip</a>
Introduced	16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **address** (*ipv4-prefix-with-host-bits* | *ipv4-address*)

Synopsis IPv4 address used as the match criterion

Context **configure** [system](#) [security](#) [cpm-filter](#) [ip-filter](#) [entry](#) *number* [match](#) [src-ip](#) [address](#) (*ipv4-prefix-with-host-bits* | *ipv4-address*)

Tree [address](#)

Notes The following elements are part of a choice: (**address** and **mask**) or **ip-prefix-list**.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **ip-prefix-list** *reference*

Synopsis IPv4 address prefix list used as match criterion

Context **configure** [system](#) [security](#) [cpm-filter](#) [ip-filter](#) [entry](#) *number* [match](#) [src-ip](#) [ip-prefix-list](#) *reference*

Tree [ip-prefix-list](#)

Reference **configure** [filter](#) [match-list](#) [ip-prefix-list](#) *string*

Notes The following elements are part of a choice: (**address** and **mask**) or **ip-prefix-list**.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **mask** *string*

Synopsis IPv4 address mask used as the match criterion

Context **configure** [system](#) [security](#) [cpm-filter](#) [ip-filter](#) [entry](#) *number* [match](#) [src-ip](#) [mask](#) *string*

Tree [mask](#)

Notes The following elements are part of a choice: (**address** and **mask**) or **ip-prefix-list**.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **src-port**

Synopsis Enter the **src-port** context

Context	<b>configure system security cpm-filter ip-filter entry</b> <i>number match src-port</i>
Tree	<a href="#">src-port</a>
Notes	The following elements are part of a choice: <b>port</b> or ( <b>dst-port</b> and <b>src-port</b> ).
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **eq** *number*

Synopsis	Port number as the match criterion
Context	<b>configure system security cpm-filter ip-filter entry</b> <i>number match src-port eq number</i>
Tree	<a href="#">eq</a>
Range	0 to 65535
Notes	The following elements are part of a choice: ( <b>eq</b> and <b>mask</b> ), <b>port-list</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **mask** *number*

Synopsis	Port mask as the match criterion
Context	<b>configure system security cpm-filter ip-filter entry</b> <i>number match src-port mask number</i>
Tree	<a href="#">mask</a>
Range	1 to 65535
Default	65535
Notes	The following elements are part of a choice: ( <b>eq</b> and <b>mask</b> ), <b>port-list</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **port-list** *reference*

Synopsis	Port list as the match criterion
Context	<b>configure system security cpm-filter ip-filter entry</b> <i>number match src-port port-list reference</i>
Tree	<a href="#">port-list</a>
Reference	<b>configure filter match-list port-list</b> <i>string</i>
Notes	The following elements are part of a choice: ( <b>eq</b> and <b>mask</b> ), <b>port-list</b> , or <b>range</b> .

Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## range

Synopsis	Enable the <b>range</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ip-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">src-port</a> <a href="#">range</a>
Tree	<a href="#">range</a>
Notes	The following elements are part of a choice: ( <b>eq</b> and <b>mask</b> ), <b>port-list</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## end number

Synopsis	Upper bound of the port number to match
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ip-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">src-port</a> <a href="#">range</a> <a href="#">end</a> <i>number</i>
Tree	<a href="#">end</a>
Range	0 to 65535
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## start number

Synopsis	Lower bound of the port number to match
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ip-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">src-port</a> <a href="#">range</a> <a href="#">start</a> <i>number</i>
Tree	<a href="#">start</a>
Range	0 to 65535
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## tcp-flags

Synopsis	Enter the <b>tcp-flags</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ip-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <b>tcp-flags</b>
Tree	<a href="#">tcp-flags</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## ack *boolean*

Synopsis	ACK bit in TCP header control bits as match criterion
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ip-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <b>tcp-flags</b> <b>ack</b> <i>boolean</i>
Tree	<a href="#">ack</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## syn *boolean*

Synopsis	SYN bit in TCP header control bits as match criterion
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ip-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <b>tcp-flags</b> <b>syn</b> <i>boolean</i>
Tree	<a href="#">syn</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## ipv6-filter

Synopsis	Enter the <b>ipv6-filter</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <b>ipv6-filter</b>
Tree	<a href="#">ipv6-filter</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## admin-state *keyword*

Synopsis	Administrative state of the CPM filter
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ipv6-filter</a> <b>admin-state</b> <i>keyword</i>

Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **entry** [[entry-id](#)] *number*

Synopsis	Enter the <b>entry</b> list instance
Context	<b>configure</b> <a href="#">system security cpm-filter ipv6-filter entry</a> <i>number</i>
Tree	<a href="#">entry</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **[entry-id]** *number*

Synopsis	Filter entry ID
Context	<b>configure</b> <a href="#">system security cpm-filter ipv6-filter entry</a> <i>number</i>
Tree	<a href="#">entry</a>
Range	1 to 131072
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **action**

Synopsis	Enter the <b>action</b> context
Context	<b>configure</b> <a href="#">system security cpm-filter ipv6-filter entry</a> <i>number</i> <b>action</b>
Tree	<a href="#">action</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **accept**

Synopsis	Forward matching packets
----------	--------------------------

---

Context	<b>configure system security cpm-filter ipv6-filter entry</b> <i>number</i> <b>action accept</b>
Tree	<b>accept</b>
Notes	The following elements are part of a choice: <b>accept</b> , <b>default</b> , <b>drop</b> , or <b>queue</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## default

Synopsis	Use default action for matching packets
Context	<b>configure system security cpm-filter ipv6-filter entry</b> <i>number</i> <b>action default</b>
Tree	<b>default</b>
Notes	The following elements are part of a choice: <b>accept</b> , <b>default</b> , <b>drop</b> , or <b>queue</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## drop

Synopsis	Drop matching packets
Context	<b>configure system security cpm-filter ipv6-filter entry</b> <i>number</i> <b>action drop</b>
Tree	<b>drop</b>
Notes	The following elements are part of a choice: <b>accept</b> , <b>default</b> , <b>drop</b> , or <b>queue</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## queue reference

Synopsis	Forward matching packets to the CPM hardware queue
Context	<b>configure system security cpm-filter ipv6-filter entry</b> <i>number</i> <b>action queue</b> <i>reference</i>
Tree	<b>queue</b>
Reference	<b>configure system security cpm-queue</b> <i>queue</i> <i>number</i>
Notes	The following elements are part of a choice: <b>accept</b> , <b>default</b> , <b>drop</b> , or <b>queue</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**description string**

Synopsis	Text description
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">description</a> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**log reference**

Synopsis	Log ID where matching packets are entered
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">log</a> <i>reference</i>
Tree	<a href="#">log</a>
Reference	<b>configure</b> <a href="#">filter</a> <a href="#">log</a> <i>number</i>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**match**

Synopsis	Enter the <b>match</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a>
Tree	<a href="#">match</a>
Description	<p>Commands in this context specify match criteria for the entry. When the match criteria have been satisfied, the action associated with the entry is executed.</p> <p>If more than one match criterion is configured, all criteria must be met before the action associated with the entry is executed.</p>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**dscp keyword**

Synopsis	DSCP used as the match criterion on the packet
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">dscp</a> <i>keyword</i>
Tree	<a href="#">dscp</a>
Options	be, cp1, cp2, cp3, cp4, cp5, cp6, cp7, cs1, cp9, af11, cp11, af12, cp13, af13, cp15, cs2, cp17, af21, cp19, af22, cp21, af23, cp23, cs3, cp25, af31, cp27, af32, cp29, af33, cp31,

cs4, cp33, af41, cp35, af42, cp37, af43, cp39, cs5, cp41, cp42, cp43, cp44, cp45, ef, cp47, nc1, cp49, cp50, cp51, cp52, cp53, cp54, cp55, nc2, cp57, cp58, cp59, cp60, cp61, cp62, cp63

Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## dst-ip

Synopsis Enter the **dst-ip** context  
 Context **configure** system security cpm-filter ipv6-filter entry *number* match **dst-ip**  
 Tree [dst-ip](#)  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## address (*ipv6-prefix-with-host-bits* | *ipv6-address*)

Synopsis IPv6 address used as the match criterion  
 Context **configure** system security cpm-filter ipv6-filter entry *number* match **dst-ip** address (*ipv6-prefix-with-host-bits* | *ipv6-address*)  
 Tree [address](#)  
 Notes The following elements are part of a choice: (**address** and **mask**) or **ipv6-prefix-list**.  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## ipv6-prefix-list *reference*

Synopsis IPv6 address prefix list used as match criterion  
 Context **configure** system security cpm-filter ipv6-filter entry *number* match **dst-ip** [ipv6-prefix-list](#) *reference*  
 Tree [ipv6-prefix-list](#)  
 Reference **configure** filter match-list [ipv6-prefix-list](#) *string*  
 Notes The following elements are part of a choice: (**address** and **mask**) or **ipv6-prefix-list**.  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **mask string**

Synopsis	IPv6 address mask used as the match criterion
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">dst-ip</a> <a href="#">mask</a> <i>string</i>
Tree	<a href="#">mask</a>
Notes	The following elements are part of a choice: ( <b>address</b> and <b>mask</b> ) or <b>ipv6-prefix-list</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **dst-port**

Synopsis	Enter the <b>dst-port</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">dst-port</a>
Tree	<a href="#">dst-port</a>
Notes	The following elements are part of a choice: <b>port</b> or ( <b>dst-port</b> and <b>src-port</b> ).
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **eq number**

Synopsis	Port number as the match criterion
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">dst-port</a> <a href="#">eq</a> <i>number</i>
Tree	<a href="#">eq</a>
Range	0 to 65535
Notes	The following elements are part of a choice: ( <b>eq</b> and <b>mask</b> ), <b>port-list</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **mask number**

Synopsis	Port mask as the match criterion
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">dst-port</a> <a href="#">mask</a> <i>number</i>
Tree	<a href="#">mask</a>
Range	1 to 65535
Default	65535

Notes	The following elements are part of a choice: ( <b>eq</b> and <b>mask</b> ), <b>port-list</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **port-list** *reference*

Synopsis	Port list as the match criterion
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">dst-port</a> <a href="#">port-list</a> <i>reference</i>
Tree	<a href="#">port-list</a>
Reference	<b>configure</b> <a href="#">filter</a> <a href="#">match-list</a> <a href="#">port-list</a> <i>string</i>
Notes	The following elements are part of a choice: ( <b>eq</b> and <b>mask</b> ), <b>port-list</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **range**

Synopsis	Enable the <b>range</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">dst-port</a> <a href="#">range</a>
Tree	<a href="#">range</a>
Notes	The following elements are part of a choice: ( <b>eq</b> and <b>mask</b> ), <b>port-list</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **end** *number*

Synopsis	Upper bound of the port number to match
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">dst-port</a> <a href="#">range</a> <a href="#">end</a> <i>number</i>
Tree	<a href="#">end</a>
Range	0 to 65535
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**start number**

Synopsis	Lower bound of the port number to match
Context	<b>configure</b> <a href="#">system security cpm-filter ipv6-filter entry number match dst-port range start number</a>
Tree	<a href="#">start</a>
Range	0 to 65535
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**extension-header**

Synopsis	Enter the <b>extension-header</b> context
Context	<b>configure</b> <a href="#">system security cpm-filter ipv6-filter entry number match extension-header</a>
Tree	<a href="#">extension-header</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**hop-by-hop boolean**

Synopsis	Match on existence of Hop-By-Hop Options Header
Context	<b>configure</b> <a href="#">system security cpm-filter ipv6-filter entry number match extension-header hop-by-hop boolean</a>
Tree	<a href="#">hop-by-hop</a>
Description	When configured to <b>true</b> , a match occurs when the Hop-by-Hop Options Extension Header is present.  When configured to <b>false</b> , a match occurs when the Hop-by-Hop Options Extension Header is not present.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**flow-label number**

Synopsis	Flow label in the IPv6 header as the match criterion
Context	<b>configure</b> <a href="#">system security cpm-filter ipv6-filter entry number match flow-label number</a>

Tree	<a href="#">flow-label</a>
Range	0 to 1048575
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **fragment** *keyword*

Synopsis	Match criterion based on presence of fragmented packets
Context	<b>configure</b> <a href="#">system security cpm-filter ipv6-filter entry</a> <i>number match fragment keyword</i>
Tree	<a href="#">fragment</a>
Description	<p>This command specifies the match criterion based on the existence or absence of fragmented IP packets.</p> <p>Matching on fragmented IPv4 packets occurs when all packets have either the MF (more fragment) bit set or have the Fragment Offset field of the IP header set to a non-zero value. For IPv6, the existence of the IPv6 Fragmentation Extension Header results in a fragmented packet match.</p> <p>Matching on non-fragmented IPv4 packets occurs when all packets have the MF bit set to zero and the Fragment Offset field is also set to zero. For IPv6, the absence of an IPv6 Fragmentation Extension Header results in a non-fragmented packet match.</p>
Options	false, true
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **icmp**

Synopsis	Enter the <b>icmp</b> context
Context	<b>configure</b> <a href="#">system security cpm-filter ipv6-filter entry</a> <i>number match icmp</i>
Tree	<a href="#">icmp</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **code** *number*

Synopsis	ICMP code as the match criterion
Context	<b>configure</b> <a href="#">system security cpm-filter ipv6-filter entry</a> <i>number match icmp code number</i>
Tree	<a href="#">code</a>
Range	0 to 255

Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **type** *number*

Synopsis	ICMP type as the match criterion
Context	<b>configure</b> <a href="#">system security cpm-filter ipv6-filter entry</a> <i>number</i> <b>match icmp type</b> <i>number</i>
Tree	<a href="#">type</a>
Range	0 to 255
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **next-header** (*number* | *keyword*)

Synopsis	IP protocol to match
Context	<b>configure</b> <a href="#">system security cpm-filter ipv6-filter entry</a> <i>number</i> <b>match next-header</b> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">next-header</a>
Range	0 to 255
Options	tcp-udp, icmp, igmp, ip, tcp, egp, igp, udp, rdp, ipv6, ipv6-route, ipv6-frag, idrp, rsvp, gre, ipv6-icmp, ipv6-no-nxt, ipv6-opts, iso-ip, eigrp, ospf-igp, ether-ip, encap, pnni, pim, vrrp, l2tp, stp, ptp, isis, crtp, crudp, sctp
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **port**

Synopsis	Enter the <b>port</b> context
Context	<b>configure</b> <a href="#">system security cpm-filter ipv6-filter entry</a> <i>number</i> <b>match port</b>
Tree	<a href="#">port</a>
Notes	The following elements are part of a choice: <b>port</b> or ( <b>dst-port</b> and <b>src-port</b> ).
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **eq** *number*

Synopsis	Port number as the match criterion
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">port</a> <a href="#">eq</a> <i>number</i>
Tree	<a href="#">eq</a>
Range	0 to 65535
Notes	The following elements are part of a choice: ( <b>eq</b> and <b>mask</b> ), <b>port-list</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **mask** *number*

Synopsis	Port mask as the match criterion
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">port</a> <a href="#">mask</a> <i>number</i>
Tree	<a href="#">mask</a>
Range	1 to 65535
Default	65535
Notes	The following elements are part of a choice: ( <b>eq</b> and <b>mask</b> ), <b>port-list</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **port-list** *reference*

Synopsis	Port list as the match criterion
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">port</a> <a href="#">port-list</a> <i>reference</i>
Tree	<a href="#">port-list</a>
Reference	<b>configure</b> <a href="#">filter</a> <a href="#">match-list</a> <a href="#">port-list</a> <i>string</i>
Notes	The following elements are part of a choice: ( <b>eq</b> and <b>mask</b> ), <b>port-list</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **range**

Synopsis	Enable the <b>range</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">port</a> <a href="#">range</a>

Tree	<a href="#">range</a>
Notes	The following elements are part of a choice: ( <b>eq</b> and <b>mask</b> ), <b>port-list</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**end number**

Synopsis	Upper bound of the port number to match
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">port</a> <a href="#">range</a> <a href="#">end</a> <i>number</i>
Tree	<a href="#">end</a>
Range	0 to 65535
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**start number**

Synopsis	Lower bound of the port number to match
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">port</a> <a href="#">range</a> <a href="#">start</a> <i>number</i>
Tree	<a href="#">start</a>
Range	0 to 65535
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**router-instance string**

Synopsis	Router instance as the match criteria
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">router-instance</a> <i>string</i>
Tree	<a href="#">router-instance</a>
String Length	1 to 64
Introduced	16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## src-ip

Synopsis Enter the **src-ip** context

Context **configure** [system security cpm-filter ipv6-filter entry number match src-ip](#)

Tree [src-ip](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## address (*ipv6-prefix-with-host-bits* | *ipv6-address*)

Synopsis IPv6 address used as the match criterion

Context **configure** [system security cpm-filter ipv6-filter entry number match src-ip address \(\*ipv6-prefix-with-host-bits\* | \*ipv6-address\*\)](#)

Tree [address](#)

Notes The following elements are part of a choice: (**address** and **mask**) or **ipv6-prefix-list**.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## ipv6-prefix-list *reference*

Synopsis IPv6 address prefix list used as match criterion

Context **configure** [system security cpm-filter ipv6-filter entry number match src-ip ipv6-prefix-list reference](#)

Tree [ipv6-prefix-list](#)

Reference **configure** [filter match-list ipv6-prefix-list string](#)

Notes The following elements are part of a choice: (**address** and **mask**) or **ipv6-prefix-list**.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## mask *string*

Synopsis IPv6 address mask used as the match criterion

Context **configure** [system security cpm-filter ipv6-filter entry number match src-ip mask string](#)

Tree [mask](#)

Notes	The following elements are part of a choice: ( <b>address</b> and <b>mask</b> ) or <b>ipv6-prefix-list</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **src-port**

Synopsis	Enter the <b>src-port</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">src-port</a>
Tree	<a href="#">src-port</a>
Notes	The following elements are part of a choice: <b>port</b> or ( <b>dst-port</b> and <b>src-port</b> ).
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **eq number**

Synopsis	Port number as the match criterion
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">src-port</a> <a href="#">eq</a> <i>number</i>
Tree	<a href="#">eq</a>
Range	0 to 65535
Notes	The following elements are part of a choice: ( <b>eq</b> and <b>mask</b> ), <b>port-list</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **mask number**

Synopsis	Port mask as the match criterion
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">src-port</a> <a href="#">mask</a> <i>number</i>
Tree	<a href="#">mask</a>
Range	1 to 65535
Default	65535
Notes	The following elements are part of a choice: ( <b>eq</b> and <b>mask</b> ), <b>port-list</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**port-list reference**

Synopsis	Port list as the match criterion
Context	<b>configure</b> <a href="#">system security cpm-filter ipv6-filter entry number match src-port port-list reference</a>
Tree	<a href="#">port-list</a>
Reference	<b>configure</b> <a href="#">filter match-list port-list string</a>
Notes	The following elements are part of a choice: ( <b>eq</b> and <b>mask</b> ), <b>port-list</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**range**

Synopsis	Enable the <b>range</b> context
Context	<b>configure</b> <a href="#">system security cpm-filter ipv6-filter entry number match src-port range</a>
Tree	<a href="#">range</a>
Notes	The following elements are part of a choice: ( <b>eq</b> and <b>mask</b> ), <b>port-list</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**end number**

Synopsis	Upper bound of the port number to match
Context	<b>configure</b> <a href="#">system security cpm-filter ipv6-filter entry number match src-port range end number</a>
Tree	<a href="#">end</a>
Range	0 to 65535
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**start number**

Synopsis	Lower bound of the port number to match
Context	<b>configure</b> <a href="#">system security cpm-filter ipv6-filter entry number match src-port range start number</a>

Tree	<a href="#">start</a>
Range	0 to 65535
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## tcp-flags

Synopsis	Enter the <b>tcp-flags</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">tcp-flags</a>
Tree	<a href="#">tcp-flags</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## ack *boolean*

Synopsis	ACK bit in TCP header control bits as match criterion
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">tcp-flags</a> <a href="#">ack</a> <i>boolean</i>
Tree	<a href="#">ack</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## syn *boolean*

Synopsis	SYN bit in TCP header control bits as match criterion
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">tcp-flags</a> <a href="#">syn</a> <i>boolean</i>
Tree	<a href="#">syn</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## mac-filter

Synopsis	Enter the <b>mac-filter</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">mac-filter</a>

Tree	<a href="#">mac-filter</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **admin-state** *keyword*

Synopsis	Administrative state of the CPM filter
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">mac-filter</a> <b>admin-state</b> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **entry** [[entry-id](#)] *number*

Synopsis	Enter the <b>entry</b> list instance
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">mac-filter</a> <b>entry</b> <i>number</i>
Tree	<a href="#">entry</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **[entry-id]** *number*

Synopsis	Filter entry ID
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">mac-filter</a> <b>entry</b> <i>number</i>
Tree	<a href="#">entry</a>
Range	1 to 131072
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **action**

Synopsis	Enter the <b>action</b> context
----------	---------------------------------

---

Context	<b>configure system security cpm-filter mac-filter entry <i>number</i> action</b>
Tree	<b>action</b>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## accept

Synopsis	Forward matching packets
Context	<b>configure system security cpm-filter mac-filter entry <i>number</i> action accept</b>
Tree	<b>accept</b>
Notes	The following elements are part of a choice: <b>accept</b> , <b>default</b> , <b>drop</b> , or <b>queue</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## default

Synopsis	Use default action for matching packets
Context	<b>configure system security cpm-filter mac-filter entry <i>number</i> action default</b>
Tree	<b>default</b>
Notes	The following elements are part of a choice: <b>accept</b> , <b>default</b> , <b>drop</b> , or <b>queue</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## drop

Synopsis	Drop matching packets
Context	<b>configure system security cpm-filter mac-filter entry <i>number</i> action drop</b>
Tree	<b>drop</b>
Notes	The following elements are part of a choice: <b>accept</b> , <b>default</b> , <b>drop</b> , or <b>queue</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## queue reference

Synopsis	Forward matching packets to the CPM hardware queue
----------	--

Context	<b>configure system security cpm-filter mac-filter entry</b> <i>number action queue reference</i>
Tree	<a href="#">queue</a>
Reference	<b>configure system security cpm-queue queue</b> <i>number</i>
Notes	The following elements are part of a choice: <b>accept</b> , <b>default</b> , <b>drop</b> , or <b>queue</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **description** *string*

Synopsis	Text description
Context	<b>configure system security cpm-filter mac-filter entry</b> <i>number description string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **log** *reference*

Synopsis	Log ID where matching packets are entered
Context	<b>configure system security cpm-filter mac-filter entry</b> <i>number log reference</i>
Tree	<a href="#">log</a>
Reference	<b>configure filter log</b> <i>number</i>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **match**

Synopsis	Enter the <b>match</b> context
Context	<b>configure system security cpm-filter mac-filter entry</b> <i>number match</i>
Tree	<a href="#">match</a>
Description	<p>Commands in this context specify match criteria for the entry. When the match criteria have been satisfied, the action associated with the entry is executed.</p> <p>If more than one match criterion is configured, all criteria must be met before the action associated with the entry is executed.</p>
Introduced	16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## cfm-opcode

Synopsis Enter the **cfm-opcode** context

Context **configure system security cpm-filter mac-filter entry number match cfm-opcode**

Tree [cfm-opcode](#)

Description Commands in this context specify match criteria based on the CFM opcode.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## eq number

Synopsis Equal to comparison operator for the CFM opcode

Context **configure system security cpm-filter mac-filter entry number match cfm-opcode eq number**

Tree [eq](#)

Range 0 to 255

Notes The following elements are part of a choice: **eq**, **gt**, **lt**, or **range**.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## gt number

Synopsis Greater than comparison operator for the CFM opcode

Context **configure system security cpm-filter mac-filter entry number match cfm-opcode gt number**

Tree [gt](#)

Range 0 to 254

Notes The following elements are part of a choice: **eq**, **gt**, **lt**, or **range**.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## lt number

Synopsis Less than comparison operator for the CFM opcode

Context	<b>configure system security cpm-filter mac-filter entry</b> <i>number match cfm-opcode lt number</i>
Tree	<a href="#">lt</a>
Range	1 to 255
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## range

Synopsis	Enable the <b>range</b> context
Context	<b>configure system security cpm-filter mac-filter entry</b> <i>number match cfm-opcode range</i>
Tree	<a href="#">range</a>
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## end number

Synopsis	Upper bound of the Opcode range to match
Context	<b>configure system security cpm-filter mac-filter entry</b> <i>number match cfm-opcode range end number</i>
Tree	<a href="#">end</a>
Range	1 to 255
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## start number

Synopsis	Lower bound of the OpCode range to match
Context	<b>configure system security cpm-filter mac-filter entry</b> <i>number match cfm-opcode range start number</i>
Tree	<a href="#">start</a>
Range	0 to 254

Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## **dst-mac**

Synopsis	Enable the <b>dst-mac</b> context
Context	<b>configure system security cpm-filter mac-filter entry number match dst-mac</b>
Tree	<b>dst-mac</b>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## **address string**

Synopsis	MAC address used as the match criterion
Context	<b>configure system security cpm-filter mac-filter entry number match dst-mac address string</b>
Tree	<b>address</b>
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## **mask string**

Synopsis	MAC address mask as the match criterion
Context	<b>configure system security cpm-filter mac-filter entry number match dst-mac mask string</b>
Tree	<b>mask</b>
Default	ff:ff:ff:ff:ff:ff
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## **etype string**

Synopsis	Ethernet type as the match criterion
Context	<b>configure system security cpm-filter mac-filter entry number match etype string</b>

Tree	<a href="#">etype</a>
Description	This command specifies an Ethernet type II Ethertype value to be used as a MAC filter match criterion.  The Ethernet type field is used by the Ethernet version-II frames and does not apply to IEEE 802.3 Ethernet frames.
String Length	5 to 6
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **frame-type** *keyword*

Synopsis	MAC frame type as the match criterion
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">mac-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <b>frame-type</b> <i>keyword</i>
Tree	<a href="#">frame-type</a>
Options	802dot2-llc, ethernet-ii
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **llc-dsap**

Synopsis	Enable the <b>llc-dsap</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">mac-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <b>llc-dsap</b>
Tree	<a href="#">llc-dsap</a>
Description	Commands in this context specify match criteria based on the Destination Service Access Point (DSAP).
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **dsap** *number*

Synopsis	8-bit DSAP as the match criterion
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">mac-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <b>llc-dsap</b> <b>dsap</b> <i>number</i>
Tree	<a href="#">dsap</a>
Range	0 to 255
Notes	This element is mandatory.

Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**mask number**

Synopsis	Mask for DSAP value as the match criterion
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">mac-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">llc-dsap</a> <a href="#">mask</a> <i>number</i>
Tree	<a href="#">mask</a>
Range	1 to 255
Default	255
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**llc-ssap**

Synopsis	Enable the <b>llc-ssap</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">mac-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">llc-ssap</a>
Tree	<a href="#">llc-ssap</a>
Description	Commands in this context specify match criteria based on the Source Service Access Point (SSAP).
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**mask number**

Synopsis	Mask for SSAP value as the match criterion
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">mac-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">llc-ssap</a> <a href="#">mask</a> <i>number</i>
Tree	<a href="#">mask</a>
Range	1 to 255
Default	255
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**ssap number**

Synopsis	8-bit SSAP as the match criterion
Context	<b>configure</b> <a href="#">system security cpm-filter mac-filter entry number match llc-ssap ssap number</a>
Tree	<a href="#">ssap</a>
Range	0 to 255
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**service reference**

Synopsis	Service ID used as the match condition
Context	<b>configure</b> <a href="#">system security cpm-filter mac-filter entry number match service reference</a>
Tree	<a href="#">service</a>
Reference	<b>configure</b> <a href="#">service vpls string</a>
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**src-mac**

Synopsis	Enable the <b>src-mac</b> context
Context	<b>configure</b> <a href="#">system security cpm-filter mac-filter entry number match src-mac</a>
Tree	<a href="#">src-mac</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**address string**

Synopsis	MAC address used as the match criterion
Context	<b>configure</b> <a href="#">system security cpm-filter mac-filter entry number match src-mac address string</a>
Tree	<a href="#">address</a>
Notes	This element is mandatory.
Introduced	16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **mask string**

Synopsis MAC address mask as the match criterion  
 Context **configure** [system](#) [security](#) [cpm-filter](#) [mac-filter](#) [entry](#) *number* [match](#) [src-mac](#) [mask](#) *string*  
 Tree [mask](#)  
 Default ff:ff:ff:ff:ff:ff  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **cpm-queue**

Synopsis Enter the **cpm-queue** context  
 Context **configure** [system](#) [security](#) [cpm-queue](#)  
 Tree [cpm-queue](#)  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **queue [queue-id] number**

Synopsis Enter the **queue** list instance  
 Context **configure** [system](#) [security](#) [cpm-queue](#) [queue](#) *number*  
 Tree [queue](#)  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **[queue-id] number**

Synopsis CPM queue ID  
 Context **configure** [system](#) [security](#) [cpm-queue](#) [queue](#) *number*  
 Tree [queue](#)  
 Range 33 to 2000  
 Notes This element is part of a list key.  
 Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **cbs number**

Synopsis Buffer size that can be drawn from queue buffer pool

Context **configure system security cpm-queue queue number cbs number**

Tree [cbs](#)

Description This command specifies the amount of buffer that can be drawn from the reserved buffer portion of the buffer pool of the queue.

Range 0 to 131072

Units kilobps

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **mbs number**

Synopsis Maximum queue depth to which the queue can grow

Context **configure system security cpm-queue queue number mbs number**

Tree [mbs](#)

Range 0 to 131072

Units kilobps

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **rate**

Synopsis Enter the **rate** context

Context **configure system security cpm-queue queue number rate**

Tree [rate](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **cir (number | keyword)**

Synopsis Amount of bandwidth committed to the queue

Context	<b>configure system security cpm-queue queue number rate cir</b> ( <i>number   keyword</i> )
Tree	<a href="#">cir</a>
Range	0 to 100000000
Units	kilobps
Options	max
Default	max
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **pir** (*number | keyword*)

Synopsis	Peak Information Rate for the queue
Context	<b>configure system security cpm-queue queue number rate pir</b> ( <i>number   keyword</i> )
Tree	<a href="#">pir</a>
Range	1 to 100000000
Units	kilobps
Options	max
Default	max
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **cpu-protection**

Synopsis	Enter the <b>cpu-protection</b> context
Context	<b>configure system security cpu-protection</b>
Tree	<a href="#">cpu-protection</a>
Description	Commands in this context configure CPU protection policies.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS

### **ip-src-monitoring**

Synopsis	Enter the <b>ip-src-monitoring</b> context
Context	<b>configure system security cpu-protection ip-src-monitoring</b>
Tree	<a href="#">ip-src-monitoring</a>

Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS

## included-protocols

Synopsis	Enter the <b>included-protocols</b> context
Context	<b>configure</b> <a href="#">system security cpu-protection ip-src-monitoring included-protocols</a>
Tree	<a href="#">included-protocols</a>
Description	Commands in this context specify the protocols included in IP source monitoring. The protocol packets will be subject to the per-source-rate of CPU protection policies. This configuration applies system wide and applies to CPU protection globally.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS

## dhcp *boolean*

Synopsis	Include extracted DHCP packets for IP source monitoring
Context	<b>configure</b> <a href="#">system security cpu-protection ip-src-monitoring included-protocols dhcp boolean</a>
Tree	<a href="#">dhcp</a>
Default	true
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS

## gtp *boolean*

Synopsis	Include extracted GTP packets for IP source monitoring
Context	<b>configure</b> <a href="#">system security cpu-protection ip-src-monitoring included-protocols gtp boolean</a>
Tree	<a href="#">gtp</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS

**icmp boolean**

Synopsis	Include extracted ICMP packets for IP source monitoring
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpu-protection</a> <a href="#">ip-src-monitoring</a> <a href="#">included-protocols</a> <a href="#">icmp</a> <i>boolean</i>
Tree	<a href="#">icmp</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS

**igmp boolean**

Synopsis	Include extracted IGMP packets for IP source monitoring
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpu-protection</a> <a href="#">ip-src-monitoring</a> <a href="#">included-protocols</a> <a href="#">igmp</a> <i>boolean</i>
Tree	<a href="#">igmp</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS

**link-specific-rate** (*number* | *keyword*)

Synopsis	Packet arrival rate limit for link level protocols
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpu-protection</a> <a href="#">link-specific-rate</a> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">link-specific-rate</a>
Description	This command configures a link-specific rate for CPU protection. The limit is applied to all ports within the system. The CPU receives no more than the configured packet rate for all link level protocols, such as LACP, from any one port.  The measurement is cleared each second and is based on the ingress port.
Range	1 to 65535
Units	packets per second
Options	max
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS

**policy** [*policy-id*] *number*

Synopsis	Enter the <b>policy</b> list instance
Context	<b>configure</b> <a href="#">system security cpu-protection policy</a> <i>number</i>
Tree	<a href="#">policy</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS

**[policy-id]** *number*

Synopsis	Policy ID
Context	<b>configure</b> <a href="#">system security cpu-protection policy</a> <i>number</i>
Tree	<a href="#">policy</a>
Range	1 to 255
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS

**alarm** *boolean*

Synopsis	Generate an event when the rate is exceeded
Context	<b>configure</b> <a href="#">system security cpu-protection policy</a> <i>number</i> <b>alarm</b> <i>boolean</i>
Tree	<a href="#">alarm</a>
Description	When configured to <b>true</b> , an event is generated when the rate is exceeded. The event includes information about the offending source. Only one event is generated per monitor period. When configured to <b>false</b> , notifications are disabled.
Default	true
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS

**description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">system security cpu-protection policy</a> <i>number</i> <b>description</b> <i>string</i>
Tree	<a href="#">description</a>

String Length	1 to 80
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS

## eth-cfm

Synopsis	Enter the <b>eth-cfm</b> context
Context	<b>configure</b> <a href="#">system security cpu-protection policy</a> <i>number</i> <b>eth-cfm</b>
Tree	<a href="#">eth-cfm</a>
Description	Commands in this context configure CPU policy entries that determine match criteria and overall arrival rate of the Ethernet Connectivity and Fault Management (ETH-CFM) packets at the CPU.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS

## entry [*id*] *number*

Synopsis	Enter the <b>entry</b> list instance
Context	<b>configure</b> <a href="#">system security cpu-protection policy</a> <i>number</i> <b>eth-cfm</b> <b>entry</b> <i>number</i>
Tree	<a href="#">entry</a>
Max. Instances	10
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS

## [*id*] *number*

Synopsis	Entry ID
Context	<b>configure</b> <a href="#">system security cpu-protection policy</a> <i>number</i> <b>eth-cfm</b> <b>entry</b> <i>number</i>
Tree	<a href="#">entry</a>
Range	1 to 100
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS

**level** *start number end number*

Synopsis	Add a list entry for <b>level</b>
Context	<b>configure system security cpu-protection policy number eth-cfm entry number level start number end number</b>
Tree	<b>level</b>
Description	Commands in this context specify the range of domain levels for the match criterion.
Min.	1
Instances	
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS

**start number**

Synopsis	Lower bound of the level range
Context	<b>configure system security cpu-protection policy number eth-cfm entry number level start number end number</b>
Tree	<b>level</b>
Range	0 to 7
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS

**end number**

Synopsis	Upper bound of the level range
Context	<b>configure system security cpu-protection policy number eth-cfm entry number level start number end number</b>
Tree	<b>level</b>
Range	0 to 7
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS

**opcode** *start number end number*

Synopsis	Add a list entry for <b>opcode</b>
----------	------------------------------------

Context	<b>configure system security cpu-protection policy number eth-cfm entry number opcode start number end number</b>
Tree	<a href="#">opcode</a>
Description	Commands in this context specify the range of operational codes (that identify the application) for the match criterion.
Min. Instances	1
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS

**start number**

Synopsis	Lower bound of the OpCode range
Context	<b>configure system security cpu-protection policy number eth-cfm entry number opcode start number end number</b>
Tree	<a href="#">opcode</a>
Range	0 to 255
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS

**end number**

Synopsis	Upper bound of the OpCode range
Context	<b>configure system security cpu-protection policy number eth-cfm entry number opcode start number end number</b>
Tree	<a href="#">opcode</a>
Range	0 to 255
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS

**pir (number | keyword)**

Synopsis	Packet arrival rate limit
Context	<b>configure system security cpu-protection policy number eth-cfm entry number pir (number   keyword)</b>

Tree	<a href="#">pir</a>
Range	0 to 65534
Units	packets per second
Options	max
Default	max
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS

### **out-profile-rate**

Synopsis	Enter the <b>out-profile-rate</b> context
Context	<b>configure</b> <a href="#">system security cpu-protection policy number out-profile-rate</a>
Tree	<a href="#">out-profile-rate</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS

### **log-events** *boolean*

Synopsis	Generate a log event when the packet rate is exceeded
Context	<b>configure</b> <a href="#">system security cpu-protection policy number out-profile-rate log-events boolean</a>
Tree	<a href="#">log-events</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS

### **pir** (*number* | *keyword*)

Synopsis	Packet arrival rate limit
Context	<b>configure</b> <a href="#">system security cpu-protection policy number out-profile-rate pir (number   keyword)</a>
Tree	<a href="#">pir</a>
Range	1 to 65534
Units	packets per second
Options	max
Introduced	16.0.R1

Platforms 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS

### **overall-rate** (*number* | *keyword*)

Synopsis Packet arrival rate limit for all packets

Context **configure** [system security cpu-protection policy](#) *number* **overall-rate** (*number* | *keyword*)

Tree [overall-rate](#)

Range 1 to 65534

Units packets per second

Options max

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS

### **per-source-parameters**

Synopsis Enter the **per-source-parameters** context

Context **configure** [system security cpu-protection policy](#) *number* **per-source-parameters**

Tree [per-source-parameters](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS

### **ip-src-monitoring**

Synopsis Enter the **ip-src-monitoring** context

Context **configure** [system security cpu-protection policy](#) *number* **per-source-parameters** **ip-src-monitoring**

Tree [ip-src-monitoring](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS

### **limit-dhcp-ci-addr-zero** *boolean*

Synopsis Apply rate limiting to packets with client IP address 0

Context **configure** [system security cpu-protection policy](#) *number* **per-source-parameters** **ip-src-monitoring** **limit-dhcp-ci-addr-zero** *boolean*

Tree [limit-dhcp-ci-addr-zero](#)

Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS

### **per-source-rate** (*number* | *keyword*)

Synopsis	Per-source packet arrival rate limit
Context	<b>configure</b> <a href="#">system security cpu-protection policy</a> <i>number</i> <b>per-source-rate</b> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">per-source-rate</a>
Description	<p>This command configures the per-source packet arrival rate limit.</p> <p>A source is defined as a unique combination of SAP and MAC source address or SAP and source IP address. The CPU receives no more than the specified packet rate from each source. The measurement is cleared every second.</p> <p>This configuration is applicable only if the policy is assigned to an interface (such as SAPs, subscriber interfaces, and spoke SDPs), and MAC monitoring or IP source monitoring is specified in the CPU protection configuration of the interface.</p>
Range	1 to 65534
Units	packets per second
Options	max
Default	max
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS

### **port-overall-rate**

Synopsis	Enter the <b>port-overall-rate</b> context
Context	<b>configure</b> <a href="#">system security cpu-protection port-overall-rate</a>
Tree	<a href="#">port-overall-rate</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS

### **action-low-priority** *boolean*

Synopsis	Mark packets that exceed the rate as low-priority
Context	<b>configure</b> <a href="#">system security cpu-protection port-overall-rate action-low-priority</a> <i>boolean</i>
Tree	<a href="#">action-low-priority</a>

Description	When configured to <b>true</b> , packets that exceed the per-port packet arrival rate limit are marked as low priority for preferential discard later (if there is congestion in the control plane) rather than discarded immediately.
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS

### **pir** (*number* | *keyword*)

Synopsis	Per-port packet arrival rate limit
Context	<b>configure</b> <a href="#">system security cpu-protection port-overall-rate pir</a> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">pir</a>
Range	1 to 65535
Units	packets per second
Options	max
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS

### **protocol-protection**

Synopsis	Enable the <b>protocol-protection</b> context
Context	<b>configure</b> <a href="#">system security cpu-protection protocol-protection</a>
Tree	<a href="#">protocol-protection</a>
Description	When enabled, the network processor on the CPM discards all packets received for protocols that are not configured on the interface. This action helps to mitigate DoS attacks by filtering invalid control traffic before it ingresses the CPU. For example, if IS-IS is not configured on an interface, protocol protection discards any IS-IS packets received on the interface.  Commands in this context further define the action when the context is enabled.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS

### **allow-sham-links** *boolean*

Synopsis	Allow OSPF sham link traffic
Context	<b>configure</b> <a href="#">system security cpu-protection protocol-protection allow-sham-links</a> <i>boolean</i>
Tree	<a href="#">allow-sham-links</a>

Description	When configured to <b>true</b> , tunneled OSPF packets received over the backbone network must be explicitly allowed when OSPF sham links form an adjacency over the MPLS-VPRN backbone network.
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS

### **block-pim-tunneled** *boolean*

Synopsis	Block extraction and processing of PIM packets
Context	<b>configure</b> <a href="#">system security cpu-protection protocol-protection block-pim-tunneled</a> <i>boolean</i>
Tree	<a href="#">block-pim-tunneled</a>
Description	When configured to <b>true</b> , PIM packets arriving at the SR OS node inside a tunnel (for example, MPLS or GRE) on a network interface are blocked and not processed. Traffic is not switched from the (*,G) to the (S,G) tree for PIM in an mVPN on the egress DR.
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS

### **dist-cpu-protection**

Synopsis	Enter the <b>dist-cpu-protection</b> context
Context	<b>configure</b> <a href="#">system security dist-cpu-protection</a>
Tree	<a href="#">dist-cpu-protection</a>
Description	Commands in this context configure distributed CPU protection (DCP) attributes.
Introduced	16.0.R1
Platforms	All

### **policy** [[policy-name](#)] *string*

Synopsis	Enter the <b>policy</b> list instance
Context	<b>configure</b> <a href="#">system security dist-cpu-protection policy</a> <i>string</i>
Tree	<a href="#">policy</a>
Description	Commands in this context configure the attributes of DCP policies. These policies can be applied to objects such as SAPs, network interfaces or ports

Max. Instances	130
Introduced	16.0.R1
Platforms	All

**[policy-name]** *string*

Synopsis	Policy name
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">dist-cpu-protection</a> <a href="#">policy</a> <i>string</i>
Tree	<a href="#">policy</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

**description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">dist-cpu-protection</a> <a href="#">policy</a> <i>string</i> <a href="#">description</a> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R1
Platforms	All

**local-monitoring-policer** [[policer-name](#)] *string*

Synopsis	Enter the <b>local-monitoring-policer</b> list instance
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">dist-cpu-protection</a> <a href="#">policy</a> <i>string</i> <a href="#">local-monitoring-policer</a> <i>string</i>
Tree	<a href="#">local-monitoring-policer</a>
Max. Instances	1
Introduced	16.0.R1
Platforms	All

**[policer-name] string**

Synopsis	Local monitoring policer name
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">dist-cpu-protection</a> <a href="#">policy</a> <i>string</i> <a href="#">local-monitoring-policer</a> <i>string</i>
Tree	<a href="#">local-monitoring-policer</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

**description string**

Synopsis	Text description
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">dist-cpu-protection</a> <a href="#">policy</a> <i>string</i> <a href="#">local-monitoring-policer</a> <i>string</i> <a href="#">description</a> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R1
Platforms	All

**exceed-action keyword**

Synopsis	Action taken when policer rates are exceeded
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">dist-cpu-protection</a> <a href="#">policy</a> <i>string</i> <a href="#">local-monitoring-policer</a> <i>string</i> <a href="#">exceed-action</a> <i>keyword</i>
Tree	<a href="#">exceed-action</a>
Description	This command specifies the action taken on the extracted control packets when the configured policer rates are exceeded.
Options	discard, low-priority, none
Default	none
Introduced	16.0.R1
Platforms	All

**log-events keyword**

Synopsis	Control of log events creation for status and activity
----------	--

Context	<b>configure system security dist-cpu-protection policy</b> <i>string</i> <b>local-monitoring-policer</b> <i>string</i> <b>log-events</b> <i>keyword</i>
Tree	<b>log-events</b>
Description	This command controls the creation of log events related to the status and activity of the local monitoring policer.
Options	false, true, verbose
Default	true
Introduced	16.0.R1
Platforms	All

## rate

Synopsis	Enter the <b>rate</b> context
Context	<b>configure system security dist-cpu-protection policy</b> <i>string</i> <b>local-monitoring-policer</b> <i>string</i> <b>rate</b>
Tree	<b>rate</b>
Description	Commands in this context specify the rate and burst tolerance for the policer. The actual hardware may not be able to perfectly rate limit to the exact configured parameters. In this case, the configured parameters will be adapted to the closest supported rate.
Introduced	16.0.R1
Platforms	All

## kbps

Synopsis	Enter the <b>kbps</b> context
Context	<b>configure system security dist-cpu-protection policy</b> <i>string</i> <b>local-monitoring-policer</b> <i>string</i> <b>rate kbps</b>
Tree	<b>kbps</b>
Notes	The following elements are part of a choice: <b>kbps</b> or <b>packets</b> .
Introduced	16.0.R1
Platforms	All

## limit (*keyword* | *number*)

Synopsis	Rate limit
----------	------------

Context	<b>configure system security dist-cpu-protection policy</b> <i>string</i> <b>local-monitoring-policer</b> <i>string</i> <b>rate kbps limit</b> ( <i>keyword</i>   <i>number</i> )
Tree	<b>limit</b>
Range	1 to 20000000
Units	kilobps
Options	max
Default	max
Introduced	16.0.R1
Platforms	All

### **mbs** *number*

Synopsis	Tolerance for the rate
Context	<b>configure system security dist-cpu-protection policy</b> <i>string</i> <b>local-monitoring-policer</b> <i>string</i> <b>rate kbps mbs</b> <i>number</i>
Tree	<b>mbs</b>
Range	0 to 4194304
Units	bytes
Introduced	16.0.R1
Platforms	All

### **packets**

Synopsis	Enter the <b>packets</b> context
Context	<b>configure system security dist-cpu-protection policy</b> <i>string</i> <b>local-monitoring-policer</b> <i>string</i> <b>rate packets</b>
Tree	<b>packets</b>
Notes	The following elements are part of a choice: <b>kbps</b> or <b>packets</b> .
Introduced	16.0.R1
Platforms	All

### **initial-delay** *number*

Synopsis	Additional packets allowed in an initial burst
Context	<b>configure system security dist-cpu-protection policy</b> <i>string</i> <b>local-monitoring-policer</b> <i>string</i> <b>rate packets initial-delay</b> <i>number</i>

Tree	<a href="#">initial-delay</a>
Description	This command specifies the number of packets allowed in an initial burst (or a burst after the policer bucket has drained to zero) in addition to the packets per interval limit. The typical setting would be a value equal to the number of received packets in several full handshakes or negotiations of the protocol.
Range	0 to 255
Units	packets
Default	0
Introduced	16.0.R1
Platforms	All

### **limit** (*keyword* | *number*)

Synopsis	Packets per interval limit
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">dist-cpu-protection</a> <a href="#">policy</a> <i>string</i> <a href="#">local-monitoring-policer</a> <i>string</i> <a href="#">rate</a> <a href="#">packets</a> <b>limit</b> ( <i>keyword</i>   <i>number</i> )
Tree	<a href="#">limit</a>
Range	0 to 8000
Units	packets per interval
Options	max
Default	max
Introduced	16.0.R1
Platforms	All

### **within** *number*

Synopsis	Measurement interval for packets rate
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">dist-cpu-protection</a> <a href="#">policy</a> <i>string</i> <a href="#">local-monitoring-policer</a> <i>string</i> <a href="#">rate</a> <a href="#">packets</a> <b>within</b> <i>number</i>
Tree	<a href="#">within</a>
Range	1 to 32767
Units	seconds
Default	1
Introduced	16.0.R1
Platforms	All

**protocol** [[protocol-name](#)] *keyword*

Synopsis	Enter the <b>protocol</b> list instance
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">dist-cpu-protection</a> <a href="#">policy</a> <i>string</i> <a href="#">protocol</a> <i>keyword</i>
Tree	<a href="#">protocol</a>
Introduced	16.0.R1
Platforms	All

**[protocol-name]** *keyword*

Synopsis	Protocol name
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">dist-cpu-protection</a> <a href="#">policy</a> <i>string</i> <a href="#">protocol</a> <i>keyword</i>
Tree	<a href="#">protocol</a>
Options	arp, dhcp, http-redirect, icmp, igmp, mld, ndis, pppoe-pppoa, all-unspecified, mpls-ttl, bfd-cpm, bgp, eth-cfm, isis, ldp, ospf, pim, rsvp, icmp-ping-check, lacp, vrrp, multi-chassis, multi-chassis-sync, bfd, ftp, icmp-v4, icmp-v6, l3-to-my-ipv4, l3-to-my-ipv6, lsp-ping, mc-lag, mcast-snooping, radius, rip, sbfd-reflector, snmp, ssh, stp, tacacs, telnet, tftp, twamp
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

**dynamic-parameters**

Synopsis	Enter the <b>dynamic-parameters</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">dist-cpu-protection</a> <a href="#">policy</a> <i>string</i> <a href="#">protocol</a> <i>keyword</i> <a href="#">dynamic-parameters</a>
Tree	<a href="#">dynamic-parameters</a>
Introduced	16.0.R1
Platforms	All

**detection-time** *number*

Synopsis	Minimum time the dynamic policer remains allocated
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">dist-cpu-protection</a> <a href="#">policy</a> <i>string</i> <a href="#">protocol</a> <i>keyword</i> <a href="#">dynamic-parameters</a> <a href="#">detection-time</a> <i>number</i>
Tree	<a href="#">detection-time</a>
Range	1 to 128000

Units	seconds
Default	30
Introduced	16.0.R1
Platforms	All

## exceed-action

Synopsis	Enter the <b>exceed-action</b> context
Context	<b>configure</b> <a href="#">system security dist-cpu-protection policy</a> <i>string</i> <a href="#">protocol</a> <i>keyword</i> <a href="#">dynamic-parameters</a> <b>exceed-action</b>
Tree	<a href="#">exceed-action</a>
Description	Commands in this context specify the settings for the scenario when the configured policer rates are exceeded.
Introduced	16.0.R1
Platforms	All

## action *keyword*

Synopsis	Action taken on control packets when rates are exceeded
Context	<b>configure</b> <a href="#">system security dist-cpu-protection policy</a> <i>string</i> <a href="#">protocol</a> <i>keyword</i> <a href="#">dynamic-parameters</a> <b>exceed-action</b> <b>action</b> <i>keyword</i>
Tree	<a href="#">action</a>
Options	discard, low-priority, none
Default	none
Introduced	16.0.R1
Platforms	All

## hold-down (*keyword* | *number*)

Synopsis	Hold down behavior
Context	<b>configure</b> <a href="#">system security dist-cpu-protection policy</a> <i>string</i> <a href="#">protocol</a> <i>keyword</i> <a href="#">dynamic-parameters</a> <b>exceed-action</b> <b>hold-down</b> ( <i>keyword</i>   <i>number</i> )
Tree	<a href="#">hold-down</a>
Description	This command specifies the behavior when the system detects that an enforcement policer has marked or discarded one or more packets and there is no action specified for the scenario when the rates are exceeded.

The hold time condition is cleared after the specified time has expired. The detection time (the minimum time that the policer remains allocated) begins after the hold down is complete. The hold down behavior is not applicable to a local monitoring policer.

An indefinite hold down behavior must be cleared using the **tools perform security dist-cpu-protection release-hold-down** command.

Range	1 to 10080
Units	seconds
Options	indefinite, none
Default	none
Introduced	16.0.R1
Platforms	All

### **log-events** *keyword*

Synopsis	Control of log events creation for status and activity
Context	<b>configure</b> <a href="#">system security dist-cpu-protection policy</a> <i>string</i> <a href="#">protocol</a> <i>keyword</i> <a href="#">dynamic-parameters log-events</a> <i>keyword</i>
Tree	<a href="#">log-events</a>
Description	This command controls the creation of log events related to the status and activity of the local monitoring policer.
Options	false, true, verbose
Default	true
Introduced	16.0.R1
Platforms	All

### **rate**

Synopsis	Enter the <b>rate</b> context
Context	<b>configure</b> <a href="#">system security dist-cpu-protection policy</a> <i>string</i> <a href="#">protocol</a> <i>keyword</i> <a href="#">dynamic-parameters rate</a>
Tree	<a href="#">rate</a>
Description	Commands in this context specify the rate and burst tolerance for the policer.  The actual hardware may not be able to perfectly rate limit to the exact configured parameters. In this case, the configured parameters will be adapted to the closest supported rate.
Introduced	16.0.R1
Platforms	All

## kbps

Synopsis	Enter the <b>kbps</b> context
Context	<b>configure</b> <a href="#">system security dist-cpu-protection policy</a> <i>string</i> <a href="#">protocol</a> <i>keyword</i> <a href="#">dynamic-parameters rate kbps</a>
Tree	<a href="#">kbps</a>
Notes	The following elements are part of a choice: <b>kbps</b> or <b>packets</b> .
Introduced	16.0.R1
Platforms	All

## limit (*keyword* | *number*)

Synopsis	Rate limit
Context	<b>configure</b> <a href="#">system security dist-cpu-protection policy</a> <i>string</i> <a href="#">protocol</a> <i>keyword</i> <a href="#">dynamic-parameters rate kbps limit</a> ( <i>keyword</i>   <i>number</i> )
Tree	<a href="#">limit</a>
Range	1 to 20000000
Units	kilobps
Options	max
Default	max
Introduced	16.0.R1
Platforms	All

## mbs *number*

Synopsis	Tolerance for the rate
Context	<b>configure</b> <a href="#">system security dist-cpu-protection policy</a> <i>string</i> <a href="#">protocol</a> <i>keyword</i> <a href="#">dynamic-parameters rate kbps mbs</a> <i>number</i>
Tree	<a href="#">mbs</a>
Range	0 to 4194304
Units	bytes
Introduced	16.0.R1
Platforms	All

**packets**

Synopsis	Enter the <b>packets</b> context
Context	<b>configure</b> <a href="#">system security dist-cpu-protection policy</a> <i>string</i> <a href="#">protocol</a> <i>keyword</i> <a href="#">dynamic-parameters rate packets</a>
Tree	<a href="#">packets</a>
Notes	The following elements are part of a choice: <b>kbps</b> or <b>packets</b> .
Introduced	16.0.R1
Platforms	All

**initial-delay** *number*

Synopsis	Additional packets allowed in an initial burst
Context	<b>configure</b> <a href="#">system security dist-cpu-protection policy</a> <i>string</i> <a href="#">protocol</a> <i>keyword</i> <a href="#">dynamic-parameters rate packets initial-delay</a> <i>number</i>
Tree	<a href="#">initial-delay</a>
Description	This command specifies the number of packets allowed in an initial burst (or a burst after the policer bucket has drained to zero) in addition to the packets per interval limit. The typical setting would be a value equal to the number of received packets in several full handshakes or negotiations of the protocol.
Range	0 to 255
Units	packets
Default	0
Introduced	16.0.R1
Platforms	All

**limit** (*keyword* | *number*)

Synopsis	Packets per interval limit
Context	<b>configure</b> <a href="#">system security dist-cpu-protection policy</a> <i>string</i> <a href="#">protocol</a> <i>keyword</i> <a href="#">dynamic-parameters rate packets limit</a> ( <i>keyword</i>   <i>number</i> )
Tree	<a href="#">limit</a>
Range	0 to 8000
Units	packets per interval
Options	max
Default	max
Introduced	16.0.R1

Platforms All

### **within** *number*

Synopsis Measurement interval for packets rate

Context **configure** [system security dist-cpu-protection policy](#) *string* [protocol](#) *keyword* [dynamic-parameters rate packets within](#) *number*

Tree [within](#)

Range 1 to 32767

Units seconds

Default 1

Introduced 16.0.R1

Platforms All

### **enforcement**

Synopsis Enter the **enforcement** context

Context **configure** [system security dist-cpu-protection policy](#) *string* [protocol](#) *keyword* [enforcement](#)

Tree [enforcement](#)

Introduced 16.0.R1

Platforms All

### **dynamic**

Synopsis Enter the **dynamic** context

Context **configure** [system security dist-cpu-protection policy](#) *string* [protocol](#) *keyword* [enforcement dynamic](#)

Tree [dynamic](#)

Notes The following elements are part of a choice: **dynamic**, **dynamic-local-mon-bypass**, **shared**, or **static**.

Introduced 16.0.R1

Platforms All

**mon-policer-name** *reference*

Synopsis	Dynamic enforcement policer for the protocol
Context	<b>configure</b> <a href="#">system security dist-cpu-protection policy</a> <i>string</i> <a href="#">protocol</a> <i>keyword</i> <a href="#">enforcement dynamic mon-policer-name</a> <i>reference</i>
Tree	<a href="#">mon-policer-name</a>
Description	This command specifies the dynamic enforcement policer that is instantiated when the associated local monitoring policer is determined to be in a nonconforming state (at the end of a minimum monitoring time of 60 seconds to reduce thrashing).
Reference	<b>configure</b> <a href="#">system security dist-cpu-protection policy</a> <i>string</i> <a href="#">local-monitoring-policer</a> <i>string</i>
Introduced	16.0.R1
Platforms	All

**dynamic-local-mon-bypass**

Synopsis	Do not include packets in the local monitoring function
Context	<b>configure</b> <a href="#">system security dist-cpu-protection policy</a> <i>string</i> <a href="#">protocol</a> <i>keyword</i> <a href="#">enforcement dynamic-local-mon-bypass</a>
Tree	<a href="#">dynamic-local-mon-bypass</a>
Description	When configured, packets from the protocol are not included in the local monitoring function and the dynamic enforcement policer is not instantiated for the protocol.
Notes	The following elements are part of a choice: <b>dynamic</b> , <b>dynamic-local-mon-bypass</b> , <b>shared</b> , or <b>static</b> .
Introduced	16.0.R1
Platforms	All

**static**

Synopsis	Enter the <b>static</b> context
Context	<b>configure</b> <a href="#">system security dist-cpu-protection policy</a> <i>string</i> <a href="#">protocol</a> <i>keyword</i> <a href="#">enforcement static</a>
Tree	<a href="#">static</a>
Notes	The following elements are part of a choice: <b>dynamic</b> , <b>dynamic-local-mon-bypass</b> , <b>shared</b> , or <b>static</b> .
Introduced	16.0.R1
Platforms	All

**policer-name** *reference*

Synopsis	Static policer enforced by the protocol
Context	<b>configure</b> <a href="#">system security dist-cpu-protection policy</a> <i>string</i> <a href="#">protocol</a> <i>keyword</i> <a href="#">enforcement static policer-name</a> <i>reference</i>
Tree	<a href="#">policer-name</a>
Reference	<b>configure</b> <a href="#">system security dist-cpu-protection policy</a> <i>string</i> <a href="#">static-policer</a> <i>string</i>
Introduced	16.0.R1
Platforms	All

**static-policer** [[policer-name](#)] *string*

Synopsis	Enter the <b>static-policer</b> list instance
Context	<b>configure</b> <a href="#">system security dist-cpu-protection policy</a> <i>string</i> <a href="#">static-policer</a> <i>string</i>
Tree	<a href="#">static-policer</a>
Description	Commands in this context configure a static enforcement policer that can be referenced by one or more protocols in the policy. When a policer is referenced by a protocol, the policer is instantiated for each object (for example, a SAP or network interface) that is created and references the policer.  If no policer resources are available on the associated card or FP, the object is not created.
Max. Instances	18
Introduced	16.0.R1
Platforms	All

**[policer-name]** *string*

Synopsis	Static policer name
Context	<b>configure</b> <a href="#">system security dist-cpu-protection policy</a> <i>string</i> <a href="#">static-policer</a> <i>string</i>
Tree	<a href="#">static-policer</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

**description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">dist-cpu-protection</a> <a href="#">policy</a> <i>string</i> <a href="#">static-policer</a> <i>string</i> <a href="#">description</a> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R1
Platforms	All

**detection-time** *number*

Synopsis	Minimum time the dynamic policer remains allocated
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">dist-cpu-protection</a> <a href="#">policy</a> <i>string</i> <a href="#">static-policer</a> <i>string</i> <a href="#">detection-time</a> <i>number</i>
Tree	<a href="#">detection-time</a>
Range	1 to 128000
Units	seconds
Default	30
Introduced	16.0.R1
Platforms	All

**exceed-action**

Synopsis	Enter the <b>exceed-action</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">dist-cpu-protection</a> <a href="#">policy</a> <i>string</i> <a href="#">static-policer</a> <i>string</i> <a href="#">exceed-action</a>
Tree	<a href="#">exceed-action</a>
Description	Commands in this context specify the settings for the scenario when the configured policer rates are exceeded.
Introduced	16.0.R1
Platforms	All

**action** *keyword*

Synopsis	Action taken on control packets when rates are exceeded
----------	---

Context	<b>configure system security dist-cpu-protection policy</b> <i>string</i> <b>static-policer</b> <i>string</i> <b>exceed-action action</b> <i>keyword</i>
Tree	<b>action</b>
Options	discard, low-priority, none
Default	none
Introduced	16.0.R1
Platforms	All

### **hold-down** (*keyword* | *number*)

Synopsis	Hold down behavior
Context	<b>configure system security dist-cpu-protection policy</b> <i>string</i> <b>static-policer</b> <i>string</i> <b>exceed-action hold-down</b> ( <i>keyword</i>   <i>number</i> )
Tree	<b>hold-down</b>
Description	<p>This command specifies the behavior when the system detects that an enforcement policer has marked or discarded one or more packets and there is no action specified for the scenario when the rates are exceeded.</p> <p>The hold time condition is cleared after the specified time has expired. The detection time (the minimum time that the policer remains allocated) begins after the hold down is complete. The hold down behavior is not applicable to a local monitoring policer.</p> <p>An indefinite hold down behavior must be cleared using the <b>tools perform security dist-cpu-protection release-hold-down</b> command.</p>
Range	1 to 10080
Units	seconds
Options	indefinite, none
Default	none
Introduced	16.0.R1
Platforms	All

### **log-events** *keyword*

Synopsis	Control of log events creation for status and activity
Context	<b>configure system security dist-cpu-protection policy</b> <i>string</i> <b>static-policer</b> <i>string</i> <b>log-events</b> <i>keyword</i>
Tree	<b>log-events</b>
Description	This command controls the creation of log events related to the status and activity of the local monitoring policer.
Options	false, true, verbose

Default	true
Introduced	16.0.R1
Platforms	All

## rate

Synopsis	Enter the <b>rate</b> context
Context	<b>configure</b> <a href="#">system security dist-cpu-protection policy</a> <i>string</i> <a href="#">static-policer</a> <i>string</i> <b>rate</b>
Tree	<a href="#">rate</a>
Description	Commands in this context specify the rate and burst tolerance for the policer. The actual hardware may not be able to perfectly rate limit to the exact configured parameters. In this case, the configured parameters will be adapted to the closest supported rate.
Introduced	16.0.R1
Platforms	All

## kbps

Synopsis	Enter the <b>kbps</b> context
Context	<b>configure</b> <a href="#">system security dist-cpu-protection policy</a> <i>string</i> <a href="#">static-policer</a> <i>string</i> <b>rate</b> <b>kbps</b>
Tree	<a href="#">kbps</a>
Notes	The following elements are part of a choice: <b>kbps</b> or <b>packets</b> .
Introduced	16.0.R1
Platforms	All

## limit (*keyword* | *number*)

Synopsis	Rate limit
Context	<b>configure</b> <a href="#">system security dist-cpu-protection policy</a> <i>string</i> <a href="#">static-policer</a> <i>string</i> <b>rate</b> <b>kbps</b> <b>limit</b> ( <i>keyword</i>   <i>number</i> )
Tree	<a href="#">limit</a>
Range	1 to 20000000
Units	kilobps
Options	max
Default	max
Introduced	16.0.R1

Platforms All

### **mbs** *number*

Synopsis Tolerance for the rate

Context **configure** [system security dist-cpu-protection policy](#) *string* [static-policer](#) *string* [rate](#) [kbps](#) [mbs](#) *number*

Tree [mbs](#)

Range 0 to 4194304

Units bytes

Introduced 16.0.R1

Platforms All

### **packets**

Synopsis Enter the **packets** context

Context **configure** [system security dist-cpu-protection policy](#) *string* [static-policer](#) *string* [rate](#) [packets](#)

Tree [packets](#)

Notes The following elements are part of a choice: **kbps** or **packets**.

Introduced 16.0.R1

Platforms All

### **initial-delay** *number*

Synopsis Additional packets allowed in an initial burst

Context **configure** [system security dist-cpu-protection policy](#) *string* [static-policer](#) *string* [rate](#) [packets](#) [initial-delay](#) *number*

Tree [initial-delay](#)

Description This command specifies the number of packets allowed in an initial burst (or a burst after the policer bucket has drained to zero) in addition to the packets per interval limit. The typical setting would be a value equal to the number of received packets in several full handshakes or negotiations of the protocol.

Range 0 to 255

Units packets

Default 0

Introduced 16.0.R1

Platforms All

### **limit** (*keyword* | *number*)

Synopsis Packets per interval limit

Context **configure** [system security dist-cpu-protection policy](#) *string* [static-policer](#) *string* [rate packets limit](#) (*keyword* | *number*)

Tree [limit](#)

Range 0 to 8000

Units packets per interval

Options max

Default max

Introduced 16.0.R1

Platforms All

### **within** *number*

Synopsis Measurement interval for packets rate

Context **configure** [system security dist-cpu-protection policy](#) *string* [static-policer](#) *string* [rate packets within](#) *number*

Tree [within](#)

Range 1 to 32767

Units seconds

Default 1

Introduced 16.0.R1

Platforms All

### **type** *keyword*

#### **WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis Policy type

Context **configure** [system security dist-cpu-protection policy](#) *string* [type](#) *keyword*

Tree [type](#)

---

Options	access-network, port
Introduced	21.5.R1
Platforms	All

## **dot1x**

Synopsis	Enter the <b>dot1x</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">dot1x</a>
Tree	<a href="#">dot1x</a>
Introduced	16.0.R1
Platforms	All

## **admin-state** *keyword*

Synopsis	Administrative state of 802.1x network access control
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">dot1x</a> <a href="#">admin-state</a> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	16.0.R1
Platforms	All

## **radius-policy** [[policy-name](#)] *string*

Synopsis	Enter the <b>radius-policy</b> list instance
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">dot1x</a> <a href="#">radius-policy</a> <i>string</i>
Tree	<a href="#">radius-policy</a>
Introduced	16.0.R1
Platforms	All

## **[policy-name]** *string*

Synopsis	RADIUS server policy name for 802.1X authentication
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">dot1x</a> <a href="#">radius-policy</a> <i>string</i>
Tree	<a href="#">radius-policy</a>

---

String Length	1 to 32
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

### **admin-state** *keyword*

Synopsis	Administrative state of the server for authentication
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">dot1x</a> <a href="#">radius-policy</a> <i>string</i> <b>admin-state</b> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	16.0.R1
Platforms	All

### **retry** *number*

Synopsis	Number of RADIUS requests toward the same RADIUS server
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">dot1x</a> <a href="#">radius-policy</a> <i>string</i> <b>retry</b> <i>number</i>
Tree	<a href="#">retry</a>
Range	1 to 10
Default	3
Introduced	16.0.R1
Platforms	All

### **server** [[server-index](#)] *number*

Synopsis	Enter the <b>server</b> list instance
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">dot1x</a> <a href="#">radius-policy</a> <i>string</i> <b>server</b> <i>number</i>
Tree	<a href="#">server</a>
Max. Instances	5
Introduced	16.0.R1
Platforms	All

**[server-index] number**

Synopsis	RADIUS server index
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">dot1x</a> <a href="#">radius-policy</a> <i>string</i> <a href="#">server</a> <i>number</i>
Tree	<a href="#">server</a>
Range	1 to 5
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

**accounting-port number**

Synopsis	UDP port to contact the RADIUS server for accounting
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">dot1x</a> <a href="#">radius-policy</a> <i>string</i> <a href="#">server</a> <i>number</i> <a href="#">accounting-port</a> <i>number</i>
Tree	<a href="#">accounting-port</a>
Range	1 to 65535
Default	1813
Introduced	16.0.R1
Platforms	All

**address string**

Synopsis	IP address of the RADIUS dot1x server
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">dot1x</a> <a href="#">radius-policy</a> <i>string</i> <a href="#">server</a> <i>number</i> <a href="#">address</a> <i>string</i>
Tree	<a href="#">address</a>
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

**authentication-port number**

Synopsis	UDP port to contact RADIUS server for authentication
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">dot1x</a> <a href="#">radius-policy</a> <i>string</i> <a href="#">server</a> <i>number</i> <a href="#">authentication-port</a> <i>number</i>
Tree	<a href="#">authentication-port</a>

---

Range	1 to 65535
Default	1812
Introduced	16.0.R1
Platforms	All

**secret string**

Synopsis	Secret key associated with the RADIUS server
Context	<b>configure</b> <a href="#">system security dot1x radius-policy</a> <i>string</i> <a href="#">server</a> <i>number</i> <a href="#">secret</a> <i>string</i>
Tree	<a href="#">secret</a>
String Length	1 to 54
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

**type keyword**

Synopsis	RADIUS server type
Context	<b>configure</b> <a href="#">system security dot1x radius-policy</a> <i>string</i> <a href="#">server</a> <i>number</i> <a href="#">type</a> <i>keyword</i>
Tree	<a href="#">type</a>
Options	authorization, accounting, combined
Default	authorization
Introduced	16.0.R1
Platforms	All

**source-address string**

Synopsis	Source address of the RADIUS packet
Context	<b>configure</b> <a href="#">system security dot1x radius-policy</a> <i>string</i> <a href="#">source-address</a> <i>string</i>
Tree	<a href="#">source-address</a>
Introduced	16.0.R1
Platforms	All

### **timeout** *number*

Synopsis	Time to wait for a response from the RADIUS server
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">dot1x</a> <a href="#">radius-policy</a> <i>string</i> <b>timeout</b> <i>number</i>
Tree	<a href="#">timeout</a>
Range	1 to 90
Units	seconds
Default	5
Introduced	16.0.R1
Platforms	All

### **ftp-server** *boolean*

Synopsis	Enable FTP servers running on the system
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">ftp-server</a> <i>boolean</i>
Tree	<a href="#">ftp-server</a>
Default	false
Introduced	16.0.R1
Platforms	All

### **hash-control**

Synopsis	Enter the <b>hash-control</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">hash-control</a>
Tree	<a href="#">hash-control</a>
Introduced	16.0.R4
Platforms	All

### **management-interface**

Synopsis	Enter the <b>management-interface</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">hash-control</a> <a href="#">management-interface</a>
Tree	<a href="#">management-interface</a>
Description	Commands in this context configure encryption parameters for different management interfaces.
Introduced	16.0.R4

Platforms All

## **classic-cli**

Synopsis Enter the **classic-cli** context

Context **configure** [system](#) [security](#) [hash-control](#) [management-interface](#) [classic-cli](#)

Tree [classic-cli](#)

Introduced 16.0.R4

Platforms All

## **read-algorithm** *keyword*

Synopsis Input encryption algorithm for configuration secrets

Context **configure** [system](#) [security](#) [hash-control](#) [management-interface](#) [classic-cli](#) [read-algorithm](#) *keyword*

Tree [read-algorithm](#)

Description This command specifies how encrypted configuration secrets are interpreted and which encryption types are accepted when secrets are input into the system or read from a configuration file (for example, at system bootup time).

Options all-hash, hash, hash2, custom

Default all-hash

Introduced 16.0.R4

Platforms All

## **write-algorithm** *keyword*

Synopsis Output encryption algorithm for configuration secrets

Context **configure** [system](#) [security](#) [hash-control](#) [management-interface](#) [classic-cli](#) [write-algorithm](#) *keyword*

Tree [write-algorithm](#)

Description This command specifies the format of the output for encrypted configuration secrets (for example, in the saved configuration file, or in the output of the **info** or **show** commands).

Options cleartext, hash, hash2, custom

Default hash2

Introduced 16.0.R4

Platforms All

## grpc

Synopsis	Enter the <b>grpc</b> context
Context	<b>configure</b> <a href="#">system security hash-control management-interface grpc</a>
Tree	<a href="#">grpc</a>
Introduced	16.0.R4
Platforms	All

## hash-algorithm *keyword*

Synopsis	Encryption algorithm for configuration secrets
Context	<b>configure</b> <a href="#">system security hash-control management-interface grpc hash-algorithm keyword</a>
Tree	<a href="#">hash-algorithm</a>
Description	This command specifies the format of the input and output for encrypted configuration secrets.
Options	cleartext, hash, hash2, custom
Default	hash2
Introduced	16.0.R4
Platforms	All

## md-cli

Synopsis	Enter the <b>md-cli</b> context
Context	<b>configure</b> <a href="#">system security hash-control management-interface md-cli</a>
Tree	<a href="#">md-cli</a>
Introduced	16.0.R4
Platforms	All

## hash-algorithm *keyword*

Synopsis	Encryption algorithm for configuration secrets
Context	<b>configure</b> <a href="#">system security hash-control management-interface md-cli hash-algorithm keyword</a>
Tree	<a href="#">hash-algorithm</a>

Description	This command specifies the format of the input and output for encrypted configuration secrets.
Options	cleartext, hash, hash2, custom
Default	hash2
Introduced	16.0.R4
Platforms	All

## netconf

Synopsis	Enter the <b>netconf</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">hash-control</a> <a href="#">management-interface</a> <b>netconf</b>
Tree	<a href="#">netconf</a>
Introduced	16.0.R4
Platforms	All

## hash-algorithm *keyword*

Synopsis	Encryption algorithm for configuration secrets
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">hash-control</a> <a href="#">management-interface</a> <a href="#">netconf</a> <a href="#">hash-algorithm</a> <i>keyword</i>
Tree	<a href="#">hash-algorithm</a>
Description	This command specifies the format of the input and output for encrypted configuration secrets.
Options	cleartext, hash, hash2, custom
Default	hash2
Introduced	16.0.R4
Platforms	All

## keychains

Synopsis	Enter the <b>keychains</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <b>keychains</b>
Tree	<a href="#">keychains</a>
Introduced	16.0.R1
Platforms	All

**keychain** [[keychain-name](#)] *string*

Synopsis	Enter the <b>keychain</b> list instance
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">keychains</a> <a href="#">keychain</a> <i>string</i>
Tree	<a href="#">keychain</a>
Max. Instances	256
Introduced	16.0.R1
Platforms	All

**[keychain-name]** *string*

Synopsis	Keychain name
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">keychains</a> <a href="#">keychain</a> <i>string</i>
Tree	<a href="#">keychain</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

**admin-state** *keyword*

Synopsis	Administrative state of the keychain
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">keychains</a> <a href="#">keychain</a> <i>string</i> <b>admin-state</b> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	enable
Introduced	16.0.R1
Platforms	All

**bidirectional**

Synopsis	Enter the <b>bidirectional</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">keychains</a> <a href="#">keychain</a> <i>string</i> <b>bidirectional</b>
Tree	<a href="#">bidirectional</a>

Introduced 16.0.R1  
 Platforms All

**authentication-key** *string***WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Authentication key used by the encryption algorithm
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">keychains</a> <a href="#">keychain</a> <i>string</i> <a href="#">receive</a> <a href="#">entry</a> <a href="#">number</a> <a href="#">authentication-key</a> <i>string</i>
Tree	<a href="#">authentication-key</a>
String Length	1 to 54
Introduced	16.0.R1
Platforms	All

**begin-time** *string*

Synopsis	Calendar date and time to start using the key
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">keychains</a> <a href="#">keychain</a> <i>string</i> <a href="#">receive</a> <a href="#">entry</a> <a href="#">number</a> <a href="#">begin-time</a> <i>string</i>
Tree	<a href="#">begin-time</a>
Introduced	16.0.R1
Platforms	All

**end-time** *string*

Synopsis	Calendar date and time when system stops using the key
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">keychains</a> <a href="#">keychain</a> <i>string</i> <a href="#">receive</a> <a href="#">entry</a> <i>number</i> <b>end-time</b> <i>string</i>
Tree	<a href="#">end-time</a>
Introduced	16.0.R1
Platforms	All

**tolerance** (*number* | *keyword*)

Synopsis	Time eligible receive key overlaps with active send key
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">keychains</a> <a href="#">keychain</a> <i>string</i> <a href="#">receive</a> <a href="#">entry</a> <i>number</i> <b>tolerance</b> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">tolerance</a>
Range	0 to 4294967294
Units	seconds
Options	infinite
Default	300
Introduced	16.0.R1
Platforms	All

**send**

Synopsis	Enter the <b>send</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">keychains</a> <a href="#">keychain</a> <i>string</i> <b>send</b>
Tree	<a href="#">send</a>
Introduced	16.0.R1
Platforms	All

**entry** [[keychain-entry-index](#)] *number*

Synopsis	Enter the <b>entry</b> list instance
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">keychains</a> <a href="#">keychain</a> <i>string</i> <a href="#">send</a> <a href="#">entry</a> <i>number</i>
Tree	<a href="#">entry</a>
Introduced	16.0.R1

Platforms All

### **[keychain-entry-index]** *number*

Synopsis Keychain identifier

Context **configure** [system](#) [security](#) [keychains](#) [keychain](#) *string* [send](#) [entry](#) *number*

Tree [entry](#)

Range 0 to 63 | 255

Notes This element is part of a list key.

Introduced 16.0.R1

Platforms All

### **admin-state** *keyword*

Synopsis Administrative state of the keychain entry

Context **configure** [system](#) [security](#) [keychains](#) [keychain](#) *string* [send](#) [entry](#) *number* [admin-state](#) *keyword*

Tree [admin-state](#)

Options enable, disable

Default enable

Introduced 16.0.R1

Platforms All

### **algorithm** *keyword*

#### **WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis Encryption algorithm used by the keychain key

Context **configure** [system](#) [security](#) [keychains](#) [keychain](#) *string* [send](#) [entry](#) *number* [algorithm](#) *keyword*

Tree [algorithm](#)

Options aes-128-cmac-96, hmac-sha-1-96, password, message-digest, hmac-md5, hmac-sha-1, hmac-sha-256, aes-128-gcm-16, aes-128-cmac-128

Introduced 16.0.R1

Platforms All

**authentication-key *string*****WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Authentication key used by the encryption algorithm
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">keychains</a> <a href="#">keychain</a> <i>string</i> <a href="#">send</a> <a href="#">entry</a> <i>number</i> <a href="#">authentication-key</a> <i>string</i>
Tree	<a href="#">authentication-key</a>
String Length	1 to 54
Introduced	16.0.R1
Platforms	All

**begin-time *string***

Synopsis	Calendar date and time to start using the key
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">keychains</a> <a href="#">keychain</a> <i>string</i> <a href="#">send</a> <a href="#">entry</a> <i>number</i> <a href="#">begin-time</a> <i>string</i>
Tree	<a href="#">begin-time</a>
Introduced	16.0.R1
Platforms	All

**tcp-option-number**

Synopsis	Enter the <b>tcp-option-number</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">keychains</a> <a href="#">keychain</a> <i>string</i> <a href="#">tcp-option-number</a>
Tree	<a href="#">tcp-option-number</a>
Introduced	16.0.R1
Platforms	All

**receive *keyword***

Synopsis	TCP option accepted in received TCP packets
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">keychains</a> <a href="#">keychain</a> <i>string</i> <a href="#">tcp-option-number</a> <a href="#">receive</a> <i>keyword</i>
Tree	<a href="#">receive</a>

Options	option-253, option-254, both, tcp-ao
Default	option-254
Introduced	16.0.R1
Platforms	All

### **send** *keyword*

Synopsis	TCP option accepted in sent TCP packets
Context	<b>configure</b> <a href="#">system security keychains keychain</a> <i>string</i> <a href="#">tcp-option-number</a> <b>send</b> <i>keyword</i>
Tree	<a href="#">send</a>
Options	option-253, option-254, tcp-ao
Default	option-254
Introduced	16.0.R1
Platforms	All

### **management**

Synopsis	Enter the <b>management</b> context
Context	<b>configure</b> <a href="#">system security management</a>
Tree	<a href="#">management</a>
Description	Commands in this context control which management protocols can be used to access the SR OS router via the 'Base' and 'management' router instances.
Introduced	16.0.R5
Platforms	All

### **allow-ftp** *boolean*

Synopsis	Allow access to the FTP server
Context	<b>configure</b> <a href="#">system security management allow-ftp</a> <i>boolean</i>
Tree	<a href="#">allow-ftp</a>
Description	When configured to <b>true</b> , this command allows FTP access to the SR OS router via the 'Base' and 'management' router instances. When configured to <b>false</b> , this command disallows access to the SR OS FTP server.
Default	true
Introduced	16.0.R6

---

Platforms All

### **allow-grpc** *boolean*

Synopsis Allow access to the gRPC server

Context **configure** [system](#) [security](#) [management](#) **allow-grpc** *boolean*

Tree [allow-grpc](#)

Description When configured to **true**, the system allows access to the gRPC server via the 'Base' and 'management' router instances.

Default true

Introduced 19.5.R1

Platforms All

### **allow-netconf** *boolean*

Synopsis Allow access to the NETCONF server

Context **configure** [system](#) [security](#) [management](#) **allow-netconf** *boolean*

Tree [allow-netconf](#)

Description When configured to **true**, the system allows NETCONF server access to the SR OS router via the 'Base' and 'management' router instances.

Default true

Introduced 19.5.R1

Platforms All

### **allow-ssh** *boolean*

Synopsis Allow access to the SSH server

Context **configure** [system](#) [security](#) [management](#) **allow-ssh** *boolean*

Tree [allow-ssh](#)

Description When configured to **true**, this command allows SSH server access to the SR OS router via the 'Base' and 'management' router instances.

When configured to **false**, this command disallows SSH server access.

Default true

Introduced 16.0.R5

Platforms All

**allow-telnet** *boolean*

Synopsis	Allow access to the IPv4 Telnet server
Context	<b>configure</b> <a href="#">system security management allow-telnet</a> <i>boolean</i>
Tree	<a href="#">allow-telnet</a>
Description	When configured to <b>true</b> , the system allows IPv4 Telnet server access to the SR OS router via the 'Base' and 'management' router instances. When configured to <b>false</b> , access to the IPv4 Telnet server is not allowed.
Default	true
Introduced	16.0.R5
Platforms	All

**allow-telnet6** *boolean*

Synopsis	Allow access to the Telnet IPv6 server
Context	<b>configure</b> <a href="#">system security management allow-telnet6</a> <i>boolean</i>
Tree	<a href="#">allow-telnet6</a>
Description	When configured to <b>true</b> , the system allows IPv6 Telnet server access to the SR OS router via the 'Base' and 'management' router instances. When configured to <b>false</b> , the system prevents access to the IPv6 Telnet server.
Default	true
Introduced	16.0.R5
Platforms	All

**management-access-filter**

Synopsis	Enter the <b>management-access-filter</b> context
Context	<b>configure</b> <a href="#">system security management-access-filter</a>
Tree	<a href="#">management-access-filter</a>
Description	Commands in this context configure the attributes for management access filters. Management access filters control all traffic in and out of the CPM. The filters can be used to restrict management of the router by other nodes outside of specific networks (or sub-networks) or through designated ports. Management filters are enforced by the system software.
Introduced	16.0.R4
Platforms	All

## ip-filter

Synopsis	Enter the <b>ip-filter</b> context
Context	<b>configure</b> <a href="#">system security management-access-filter ip-filter</a>
Tree	<a href="#">ip-filter</a>
Introduced	16.0.R4
Platforms	All

## admin-state *keyword*

Synopsis	Administrative state of management-access filters
Context	<b>configure</b> <a href="#">system security management-access-filter ip-filter admin-state keyword</a>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	enable
Introduced	16.0.R4
Platforms	All

## default-action *keyword*

Synopsis	Default action for the management access filter
Context	<b>configure</b> <a href="#">system security management-access-filter ip-filter default-action keyword</a>
Tree	<a href="#">default-action</a>
Description	This command specifies the default action for management access in the absence of a specific management access filter match.
Options	ignore-match, accept, drop, reject
Default	ignore-match
Introduced	16.0.R4
Platforms	All

## entry [[entry-id](#)] *number*

Synopsis	Enter the <b>entry</b> list instance
Context	<b>configure</b> <a href="#">system security management-access-filter ip-filter entry number</a>
Tree	<a href="#">entry</a>

Introduced	16.0.R4
Platforms	All

**[entry-id]** *number*

Synopsis	Entry ID to identify the match criteria and the action
Context	<b>configure</b> <a href="#">system security management-access-filter ip-filter entry</a> <i>number</i>
Tree	<a href="#">entry</a>
Description	This command specifies the entry ID to identify the match criteria and the corresponding action. It is recommended that entries are numbered in staggered increments. This allows users to insert a new entry in an existing policy without having to renumber the existing entries.
Range	1 to 9999
Notes	This element is part of a list key.
Introduced	16.0.R4
Platforms	All

**action** *keyword*

Synopsis	Action associated with the management access filter
Context	<b>configure</b> <a href="#">system security management-access-filter ip-filter entry</a> <i>number</i> <b>action</b> <i>keyword</i>
Tree	<a href="#">action</a>
Description	This command specifies the action associated with the management access filter match criteria entry.  If the packet does not meet any of the match criteria, the configured default action is applied.
Options	ignore-match, accept, drop, reject
Default	ignore-match
Introduced	16.0.R4
Platforms	All

**description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">system security management-access-filter ip-filter entry</a> <i>number</i> <b>description</b> <i>string</i>

Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R4
Platforms	All

### **log-events** *boolean*

Synopsis	Enable match logging
Context	<b>configure</b> <a href="#">system security management-access-filter ip-filter entry number log-events</a> <i>boolean</i>
Tree	<a href="#">log-events</a>
Description	When configured to <b>true</b> , this command enables match logging. When enabled, matches on the entry cause the Security event mafEntryMatch to be raised. When configured to <b>false</b> , match logging is disabled.
Default	false
Introduced	16.0.R4
Platforms	All

### **match**

Synopsis	Enter the <b>match</b> context
Context	<b>configure</b> <a href="#">system security management-access-filter ip-filter entry number match</a>
Tree	<a href="#">match</a>
Description	Commands in this context specify match criteria for the entry.
Introduced	16.0.R4
Platforms	All

### **dst-port**

Synopsis	Enable the <b>dst-port</b> context
Context	<b>configure</b> <a href="#">system security management-access-filter ip-filter entry number match dst-port</a>
Tree	<a href="#">dst-port</a>
Introduced	16.0.R4
Platforms	All

### **mask number**

Synopsis	IP address mask as the match criterion
Context	<b>configure</b> <a href="#">system security management-access-filter ip-filter entry</a> <i>number</i> <a href="#">match dst-port mask</a> <i>number</i>
Tree	<a href="#">mask</a>
Range	1 to 65535
Default	65535
Introduced	16.0.R4
Platforms	All

### **port number**

Synopsis	TCP or UDP port number as the match criterion
Context	<b>configure</b> <a href="#">system security management-access-filter ip-filter entry</a> <i>number</i> <a href="#">match dst-port port</a> <i>number</i>
Tree	<a href="#">port</a>
Range	1 to 65535
Notes	This element is mandatory.
Introduced	16.0.R4
Platforms	All

### **mgmt-port**

Synopsis	Enter the <b>mgmt-port</b> context
Context	<b>configure</b> <a href="#">system security management-access-filter ip-filter entry</a> <i>number</i> <a href="#">match mgmt-port</a>
Tree	<a href="#">mgmt-port</a>
Description	Commands in this context specify match criteria based on the Ethernet port.
Introduced	16.0.R4
Platforms	All

### **cpm**

Synopsis	Match any traffic received on any Ethernet port
----------	---

Context	<b>configure system security management-access-filter ip-filter entry <i>number</i> match mgmt-port cpm</b>
Tree	<b>cpm</b>
Notes	The following elements are part of a choice: <b>cpm</b> , ( <b>lag</b> and <b>lag-id</b> ), or <b>port-id</b> .
Introduced	16.0.R4
Platforms	All

### **lag string**

Synopsis	LAG ID as the match criterion
Context	<b>configure system security management-access-filter ip-filter entry <i>number</i> match mgmt-port lag string</b>
Tree	<b>lag</b>
String Length	1 to 27
Notes	The following elements are part of a choice: <b>cpm</b> , ( <b>lag</b> and <b>lag-id</b> ), or <b>port-id</b> .
Introduced	21.2.R1
Platforms	All

### **port-id string**

Synopsis	Port ID as the match criterion
Context	<b>configure system security management-access-filter ip-filter entry <i>number</i> match mgmt-port port-id string</b>
Tree	<b>port-id</b>
Notes	The following elements are part of a choice: <b>cpm</b> , ( <b>lag</b> and <b>lag-id</b> ), or <b>port-id</b> .
Introduced	16.0.R4
Platforms	All

### **protocol (*number* | *keyword*)**

Synopsis	IP protocol as the match criterion
Context	<b>configure system security management-access-filter ip-filter entry <i>number</i> match protocol (<i>number</i>   <i>keyword</i>)</b>
Tree	<b>protocol</b>
Range	0 to 255

Options	tcp-udp, icmp, igmp, ip, tcp, egp, igp, udp, rdp, ipv6, ipv6-route, ipv6-frag, idrp, rsvp, gre, ipv6-icmp, ipv6-no-nxt, ipv6-opts, iso-ip, eigrp, ospf-igp, ether-ip, encap, pnni, pim, vrrp, l2tp, stp, ptp, isis, crtp, crudp, sctp
Introduced	16.0.R4
Platforms	All

### **router-instance** *string*

Synopsis	Router instance as the match criterion
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">management-access-filter</a> <a href="#">ip-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">router-instance</a> <i>string</i>
Tree	<a href="#">router-instance</a>
Introduced	16.0.R4
Platforms	All

### **src-ip**

Synopsis	Enter the <b>src-ip</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">management-access-filter</a> <a href="#">ip-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">src-ip</a>
Tree	<a href="#">src-ip</a>
Description	Commands in this context specify match criteria based on the source IP address.
Introduced	16.0.R4
Platforms	All

### **address** (*ipv4-prefix* | *ipv4-address*)

Synopsis	IP address or IP prefix as the match criterion
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">management-access-filter</a> <a href="#">ip-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">src-ip</a> <a href="#">address</a> ( <i>ipv4-prefix</i>   <i>ipv4-address</i> )
Tree	<a href="#">address</a>
Notes	The following elements are part of a choice: ( <b>address</b> and <b>mask</b> ) or <b>ip-prefix-list</b> .
Introduced	16.0.R4
Platforms	All

## **ip-prefix-list** *reference*

Synopsis	IP prefix list as the match criterion
Context	<b>configure</b> <a href="#">system security management-access-filter ip-filter entry number match src-ip ip-prefix-list reference</a>
Tree	<a href="#">ip-prefix-list</a>
Reference	<b>configure</b> <a href="#">filter match-list ip-prefix-list string</a>
Notes	The following elements are part of a choice: ( <b>address</b> and <b>mask</b> ) or <b>ip-prefix-list</b> .
Introduced	20.7.R1
Platforms	All

## **mask** *string*

Synopsis	IP address mask as the match criterion
Context	<b>configure</b> <a href="#">system security management-access-filter ip-filter entry number match src-ip mask string</a>
Tree	<a href="#">mask</a>
Notes	The following elements are part of a choice: ( <b>address</b> and <b>mask</b> ) or <b>ip-prefix-list</b> .
Introduced	16.0.R4
Platforms	All

## **src-port**

Synopsis	Enable the <b>src-port</b> context
Context	<b>configure</b> <a href="#">system security management-access-filter ip-filter entry number match src-port</a>
Tree	<a href="#">src-port</a>
Introduced	21.7.R1
Platforms	All

## **mask** *number*

Synopsis	IP address mask as the match criterion
Context	<b>configure</b> <a href="#">system security management-access-filter ip-filter entry number match src-port mask number</a>
Tree	<a href="#">mask</a>
Range	1 to 65535

Default	65535
Introduced	21.7.R1
Platforms	All

**port number**

Synopsis	TCP or UDP port number as the match criterion
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">management-access-filter</a> <a href="#">ip-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">src-port</a> <a href="#">port</a> <i>number</i>
Tree	<a href="#">port</a>
Range	1 to 65535
Notes	This element is mandatory.
Introduced	21.7.R1
Platforms	All

**ipv6-filter**

Synopsis	Enter the <b>ipv6-filter</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">management-access-filter</a> <a href="#">ipv6-filter</a>
Tree	<a href="#">ipv6-filter</a>
Introduced	16.0.R4
Platforms	All

**admin-state keyword**

Synopsis	Administrative state of management-access filters
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">management-access-filter</a> <a href="#">ipv6-filter</a> <a href="#">admin-state</a> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	enable
Introduced	16.0.R4
Platforms	All

**default-action** *keyword*

Synopsis	Default action for the management access filter
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">management-access-filter</a> <a href="#">ipv6-filter</a> <b>default-action</b> <i>keyword</i>
Tree	<a href="#">default-action</a>
Description	This command specifies the default action for management access in the absence of a specific management access filter match.
Options	ignore-match, accept, drop, reject
Default	ignore-match
Introduced	16.0.R4
Platforms	All

**entry** [[entry-id](#)] *number*

Synopsis	Enter the <b>entry</b> list instance
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">management-access-filter</a> <a href="#">ipv6-filter</a> <b>entry</b> <i>number</i>
Tree	<a href="#">entry</a>
Introduced	16.0.R4
Platforms	All

**[entry-id]** *number*

Synopsis	Entry ID to identify the match criteria and the action
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">management-access-filter</a> <a href="#">ipv6-filter</a> <b>entry</b> <i>number</i>
Tree	<a href="#">entry</a>
Description	This command specifies the entry ID to identify the match criteria and the corresponding action. It is recommended that entries are numbered in staggered increments. This allows users to insert a new entry in an existing policy without having to renumber the existing entries.
Range	1 to 9999
Notes	This element is part of a list key.
Introduced	16.0.R4
Platforms	All

**action** *keyword*

Synopsis	Action associated with the management access filter
----------	---

Context	<b>configure system security management-access-filter ipv6-filter entry</b> <i>number</i> <b>action</b> <i>keyword</i>
Tree	<b>action</b>
Description	This command specifies the action associated with the management access filter match criteria entry.  If the packet does not meet any of the match criteria, the configured default action is applied.
Options	ignore-match, accept, drop, reject
Default	ignore-match
Introduced	16.0.R4
Platforms	All

### **description** *string*

Synopsis	Text description
Context	<b>configure system security management-access-filter ipv6-filter entry</b> <i>number</i> <b>description</b> <i>string</i>
Tree	<b>description</b>
String Length	1 to 80
Introduced	16.0.R4
Platforms	All

### **log-events** *boolean*

Synopsis	Enable match logging
Context	<b>configure system security management-access-filter ipv6-filter entry</b> <i>number</i> <b>log-events</b> <i>boolean</i>
Tree	<b>log-events</b>
Description	When configured to <b>true</b> , this command enables match logging. When enabled, matches on the entry cause the Security event mafEntryMatch to be raised.  When configured to <b>false</b> , match logging is disabled.
Default	false
Introduced	16.0.R4
Platforms	All

## match

Synopsis	Enter the <b>match</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">management-access-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <b>match</b>
Tree	<a href="#">match</a>
Description	Commands in this context specify match criteria for the entry.
Introduced	16.0.R4
Platforms	All

## dst-port

Synopsis	Enable the <b>dst-port</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">management-access-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <b>match</b> <b>dst-port</b>
Tree	<a href="#">dst-port</a>
Description	Commands in this context specify match criteria based on the destination port.
Introduced	16.0.R4
Platforms	All

## mask *number*

Synopsis	IP address mask as the match criterion
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">management-access-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <b>match</b> <b>dst-port</b> <b>mask</b> <i>number</i>
Tree	<a href="#">mask</a>
Range	1 to 65535
Default	65535
Introduced	16.0.R4
Platforms	All

## port *number*

Synopsis	TCP or UDP port number as the match criterion
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">management-access-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <b>match</b> <b>dst-port</b> <b>port</b> <i>number</i>
Tree	<a href="#">port</a>
Range	1 to 65535

---

Notes	This element is mandatory.
Introduced	16.0.R4
Platforms	All

### **flow-label** *number*

Synopsis	Flow identifier used to discriminate traffic flows
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">management-access-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">flow-label</a> <i>number</i>
Tree	<a href="#">flow-label</a>
Range	0 to 1048575
Introduced	16.0.R4
Platforms	All

### **mgmt-port**

Synopsis	Enter the <b>mgmt-port</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">management-access-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">mgmt-port</a>
Tree	<a href="#">mgmt-port</a>
Description	Commands in this context specify match criteria based on the Ethernet port.
Introduced	16.0.R4
Platforms	All

### **cpm**

Synopsis	Match any traffic received on any Ethernet port
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">management-access-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">mgmt-port</a> <a href="#">cpm</a>
Tree	<a href="#">cpm</a>
Notes	The following elements are part of a choice: <b>cpm</b> , ( <b>lag</b> and <b>lag-id</b> ), or <b>port-id</b> .
Introduced	16.0.R4
Platforms	All

**lag string**

Synopsis	LAG ID as the match criterion
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">management-access-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">mgmt-port</a> <b>lag</b> <i>string</i>
Tree	<a href="#">lag</a>
String Length	1 to 27
Notes	The following elements are part of a choice: <b>cpm</b> , ( <b>lag</b> and <b>lag-id</b> ), or <b>port-id</b> .
Introduced	21.2.R1
Platforms	All

**port-id string**

Synopsis	Port ID as the match criterion
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">management-access-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">mgmt-port</a> <b>port-id</b> <i>string</i>
Tree	<a href="#">port-id</a>
Notes	The following elements are part of a choice: <b>cpm</b> , ( <b>lag</b> and <b>lag-id</b> ), or <b>port-id</b> .
Introduced	16.0.R4
Platforms	All

**next-header** (*number* | *keyword*)

Synopsis	IP protocol to match
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">management-access-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">next-header</a> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">next-header</a>
Range	0 to 255
Options	tcp-udp, icmp, igmp, ip, tcp, egp, igp, udp, rdp, ipv6, ipv6-route, ipv6-frag, idrp, rsvp, gre, ipv6-icmp, ipv6-no-nxt, ipv6-opts, iso-ip, eigrp, ospf-igp, ether-ip, encap, pnni, pim, vrrp, l2tp, stp, ptp, isis, crtp, crudp, sctp
Introduced	16.0.R4
Platforms	All

**router-instance string**

Synopsis	Router instance as the match criterion
----------	--

Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">management-access-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">router-instance</a> <i>string</i>
Tree	<a href="#">router-instance</a>
Introduced	16.0.R4
Platforms	All

## src-ip

Synopsis	Enter the <b>src-ip</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">management-access-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">src-ip</a>
Tree	<a href="#">src-ip</a>
Description	Commands in this context specify match criteria based on the source port.
Introduced	16.0.R4
Platforms	All

## address (*ipv6-prefix* | *ipv6-address*)

Synopsis	IPv6 address or IPv6 prefix to match
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">management-access-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">src-ip</a> <a href="#">address</a> ( <i>ipv6-prefix</i>   <i>ipv6-address</i> )
Tree	<a href="#">address</a>
Notes	The following elements are part of a choice: ( <b>address</b> and <b>mask</b> ) or <b>ipv6-prefix-list</b> .
Introduced	16.0.R4
Platforms	All

## ipv6-prefix-list *reference*

Synopsis	IPv6 prefix list as the match criterion
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">management-access-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">src-ip</a> <a href="#">ipv6-prefix-list</a> <i>reference</i>
Tree	<a href="#">ipv6-prefix-list</a>
Reference	<b>configure</b> <a href="#">filter</a> <a href="#">match-list</a> <a href="#">ipv6-prefix-list</a> <i>string</i>
Notes	The following elements are part of a choice: ( <b>address</b> and <b>mask</b> ) or <b>ipv6-prefix-list</b> .
Introduced	20.7.R1
Platforms	All

### **mask string**

Synopsis	IP address mask as the match criterion
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">management-access-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">src-ip</a> <a href="#">mask</a> <i>string</i>
Tree	<a href="#">mask</a>
Notes	The following elements are part of a choice: ( <b>address</b> and <b>mask</b> ) or <b>ipv6-prefix-list</b> .
Introduced	16.0.R4
Platforms	All

### **src-port**

Synopsis	Enable the <b>src-port</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">management-access-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">src-port</a>
Tree	<a href="#">src-port</a>
Description	Commands in this context specify match criteria based on the source port.
Introduced	21.7.R1
Platforms	All

### **mask number**

Synopsis	IP address mask as the match criterion
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">management-access-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">src-port</a> <a href="#">mask</a> <i>number</i>
Tree	<a href="#">mask</a>
Range	1 to 65535
Default	65535
Introduced	21.7.R1
Platforms	All

### **port number**

Synopsis	TCP or UDP port number as the match criterion
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">management-access-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">src-port</a> <a href="#">port</a> <i>number</i>

Tree	<a href="#">port</a>
Range	1 to 65535
Notes	This element is mandatory.
Introduced	21.7.R1
Platforms	All

## mac-filter

Synopsis	Enter the <b>mac-filter</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">management-access-filter</a> <a href="#">mac-filter</a>
Tree	<a href="#">mac-filter</a>
Introduced	16.0.R4
Platforms	All

## admin-state *keyword*

Synopsis	Administrative state of management access MAC filter
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">management-access-filter</a> <a href="#">mac-filter</a> <a href="#">admin-state</a> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	enable
Introduced	16.0.R4
Platforms	All

## default-action *keyword*

Synopsis	Default action for the management access filter
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">management-access-filter</a> <a href="#">mac-filter</a> <a href="#">default-action</a> <i>keyword</i>
Tree	<a href="#">default-action</a>
Description	This command specifies the default action for management access in the absence of a specific management access filter match.
Options	ignore-match, accept, drop
Default	ignore-match
Introduced	16.0.R4
Platforms	All

**entry** [[entry-id](#)] *number*

Synopsis	Enter the <b>entry</b> list instance
Context	<b>configure</b> <a href="#">system security management-access-filter mac-filter entry</a> <i>number</i>
Tree	<a href="#">entry</a>
Introduced	16.0.R4
Platforms	All

**[entry-id]** *number*

Synopsis	Entry ID to identify the match criteria and the action
Context	<b>configure</b> <a href="#">system security management-access-filter mac-filter entry</a> <i>number</i>
Tree	<a href="#">entry</a>
Description	This command specifies the entry ID to identify the match criteria and the corresponding action. It is recommended that entries are numbered in staggered increments. This allows users to insert a new entry in an existing policy without having to renumber the existing entries.
Range	1 to 9999
Notes	This element is part of a list key.
Introduced	16.0.R4
Platforms	All

**action** *keyword*

Synopsis	Action associated with the management access filter
Context	<b>configure</b> <a href="#">system security management-access-filter mac-filter entry</a> <i>number</i> <a href="#">action</a> <i>keyword</i>
Tree	<a href="#">action</a>
Description	This command specifies the action associated with the management access filter match criteria entry.  If the packet does not meet any of the match criteria, the configured default action is applied.
Options	ignore-match, accept, drop
Default	ignore-match
Introduced	16.0.R4
Platforms	All

### **description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">system security management-access-filter mac-filter entry</a> <i>number</i> <a href="#">description</a> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R4
Platforms	All

### **log-events** *boolean*

Synopsis	Enable match logging
Context	<b>configure</b> <a href="#">system security management-access-filter mac-filter entry</a> <i>number</i> <a href="#">log-events</a> <i>boolean</i>
Tree	<a href="#">log-events</a>
Description	When configured to <b>true</b> , this command enables match logging. When enabled, matches on the entry cause the Security event mafEntryMatch to be raised. When configured to <b>false</b> , match logging is disabled.
Default	false
Introduced	16.0.R4
Platforms	All

### **match**

Synopsis	Enter the <b>match</b> context
Context	<b>configure</b> <a href="#">system security management-access-filter mac-filter entry</a> <i>number</i> <a href="#">match</a>
Tree	<a href="#">match</a>
Description	Commands in this context specify match criteria for the entry.
Introduced	16.0.R4
Platforms	All

### **cfm-opcode**

Synopsis	Enter the <b>cfm-opcode</b> context
----------	-------------------------------------

Context	<b>configure system security management-access-filter mac-filter entry <i>number match cfm-opcode</i></b>
Tree	<b>cfm-opcode</b>
Description	Commands in this context specify match criteria based on the CFM opcode.
Introduced	16.0.R4
Platforms	All

### **eq *number***

Synopsis	Equal to comparison operator for the CFM opcode
Context	<b>configure system security management-access-filter mac-filter entry <i>number match cfm-opcode eq number</i></b>
Tree	<b>eq</b>
Range	0 to 255
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	16.0.R4
Platforms	All

### **gt *number***

Synopsis	Greater than comparison operator for the CFM opcode
Context	<b>configure system security management-access-filter mac-filter entry <i>number match cfm-opcode gt number</i></b>
Tree	<b>gt</b>
Range	0 to 254
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	16.0.R4
Platforms	All

### **lt *number***

Synopsis	Less than comparison operator for the CFM opcode
Context	<b>configure system security management-access-filter mac-filter entry <i>number match cfm-opcode lt number</i></b>
Tree	<b>lt</b>
Range	1 to 255

Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	16.0.R4
Platforms	All

## range

Synopsis	Enable the <b>range</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">management-access-filter</a> <a href="#">mac-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">cfm-opcode</a> <b>range</b>
Tree	<a href="#">range</a>
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	16.0.R4
Platforms	All

## end number

Synopsis	Upper bound of the range for the OpCode to match
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">management-access-filter</a> <a href="#">mac-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">cfm-opcode</a> <b>range</b> <b>end</b> <i>number</i>
Tree	<a href="#">end</a>
Range	1 to 255
Notes	This element is mandatory.
Introduced	16.0.R4
Platforms	All

## start number

Synopsis	Lower bound of the range for the OpCode to match
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">management-access-filter</a> <a href="#">mac-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">cfm-opcode</a> <b>range</b> <b>start</b> <i>number</i>
Tree	<a href="#">start</a>
Range	0 to 254
Notes	This element is mandatory.
Introduced	16.0.R4
Platforms	All

## dot1p

Synopsis	Enable the <b>dot1p</b> context
Context	<b>configure</b> <a href="#">system security management-access-filter mac-filter entry</a> <i>number match dot1p</i>
Tree	<a href="#">dot1p</a>
Description	Commands in this context specify match criteria based on the IEEE 802.1p value.
Introduced	16.0.R4
Platforms	All

## mask *number*

Synopsis	3-bit mask as the match criterion
Context	<b>configure</b> <a href="#">system security management-access-filter mac-filter entry</a> <i>number match dot1p mask number</i>
Tree	<a href="#">mask</a>
Range	1 to 7
Default	7
Introduced	16.0.R4
Platforms	All

## priority *number*

Synopsis	IEEE 802.1p value as the match criterion
Context	<b>configure</b> <a href="#">system security management-access-filter mac-filter entry</a> <i>number match dot1p priority number</i>
Tree	<a href="#">priority</a>
Range	0 to 7
Notes	This element is mandatory.
Introduced	16.0.R4
Platforms	All

## dst-mac

Synopsis	Enable the <b>dst-mac</b> context
----------	-----------------------------------

Context	<b>configure system security management-access-filter mac-filter entry <i>number</i> match dst-mac</b>
Tree	<b>dst-mac</b>
Description	Commands in this context specify match criteria based on the destination MAC.
Introduced	16.0.R4
Platforms	All

### **address string**

Synopsis	MAC address used as the match criterion
Context	<b>configure system security management-access-filter mac-filter entry <i>number</i> match dst-mac address <i>string</i></b>
Tree	<b>address</b>
Notes	This element is mandatory.
Introduced	16.0.R4
Platforms	All

### **mask string**

Synopsis	MAC address mask as the match criterion
Context	<b>configure system security management-access-filter mac-filter entry <i>number</i> match dst-mac mask <i>string</i></b>
Tree	<b>mask</b>
Default	ff:ff:ff:ff:ff:ff
Introduced	16.0.R4
Platforms	All

### **etype string**

Synopsis	Ethernet type II Ethertype value as the match criterion
Context	<b>configure system security management-access-filter mac-filter entry <i>number</i> match etype <i>string</i></b>
Tree	<b>etype</b>
Description	This command specifies an Ethernet type II Ethertype value to be used as a MAC filter match criterion.  The Ethernet type field is used by the Ethernet version-II frames and does not apply to IEEE 802.3 Ethernet frames.

String Length	5 to 6
Introduced	16.0.R4
Platforms	All

### **frame-type** *keyword*

Synopsis	MAC frame type as the match criterion
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">management-access-filter</a> <a href="#">mac-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <b>frame-type</b> <i>keyword</i>
Tree	<a href="#">frame-type</a>
Options	802dot3, 802dot2-llc, 802dot2-snap, ethernet-ii, 802dot1-ag
Default	802dot3
Introduced	16.0.R4
Platforms	All

### **llc-dsap**

Synopsis	Enable the <b>llc-dsap</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">management-access-filter</a> <a href="#">mac-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <b>llc-dsap</b>
Tree	<a href="#">llc-dsap</a>
Description	Commands in this context specify match criteria based on the Destination Service Access Point (DSAP).
Introduced	16.0.R4
Platforms	All

### **dsap** *number*

Synopsis	8-bit DSAP as the match criterion
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">management-access-filter</a> <a href="#">mac-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <b>llc-dsap</b> <b>dsap</b> <i>number</i>
Tree	<a href="#">dsap</a>
Range	0 to 255
Notes	This element is mandatory.
Introduced	16.0.R4
Platforms	All

**mask number**

Synopsis	Mask for DSAP value as the match criterion
Context	<b>configure</b> <a href="#">system security management-access-filter mac-filter entry</a> <i>number</i> <a href="#">match llc-dsap</a> <a href="#">mask</a> <i>number</i>
Tree	<a href="#">mask</a>
Range	1 to 255
Default	255
Introduced	16.0.R4
Platforms	All

**llc-ssap**

Synopsis	Enable the <b>llc-ssap</b> context
Context	<b>configure</b> <a href="#">system security management-access-filter mac-filter entry</a> <i>number</i> <a href="#">match llc-ssap</a>
Tree	<a href="#">llc-ssap</a>
Description	Commands in this context specify match criteria based on the Source Service Access Point (SSAP).
Introduced	16.0.R4
Platforms	All

**mask number**

Synopsis	Mask for SSAP value as the match criterion
Context	<b>configure</b> <a href="#">system security management-access-filter mac-filter entry</a> <i>number</i> <a href="#">match llc-ssap</a> <a href="#">mask</a> <i>number</i>
Tree	<a href="#">mask</a>
Range	1 to 255
Default	255
Introduced	16.0.R4
Platforms	All

**ssap number**

Synopsis	8-bit SSAP as the match criterion
----------	-----------------------------------

Context	<b>configure</b> <a href="#">system security management-access-filter mac-filter entry</a> <i>number match llc-ssap ssap number</i>
Tree	<a href="#">ssap</a>
Range	0 to 255
Notes	This element is mandatory.
Introduced	16.0.R4
Platforms	All

### **service string**

Synopsis	Service ID used as the match condition
Context	<b>configure</b> <a href="#">system security management-access-filter mac-filter entry</a> <i>number match service string</i>
Tree	<a href="#">service</a>
String Length	1 to 64
Introduced	16.0.R4
Platforms	All

### **snap-oui keyword**

Synopsis	IEEE 802.3 LLC SNAP Ethernet Frame OUI value for match
Context	<b>configure</b> <a href="#">system security management-access-filter mac-filter entry</a> <i>number match snap-oui keyword</i>
Tree	<a href="#">snap-oui</a>
Description	This command specifies the IEEE 802.3 LLC SNAP Ethernet Frame OUI value as the MAC filter match criterion.
Options	zero, non-zero
Introduced	16.0.R4
Platforms	All

### **snap-pid number**

Synopsis	IEEE 802.3 LLC SNAP Ethernet Frame PID as the match
Context	<b>configure</b> <a href="#">system security management-access-filter mac-filter entry</a> <i>number match snap-pid number</i>
Tree	<a href="#">snap-pid</a>

Description	This command specifies an IEEE 802.3 LLC SNAP Ethernet Frame PID value used as the MAC filter match criterion.  The SNAP PID match criterion is independent of the OUI field within the SNAP header. Two packets with different 3-byte OUI fields but the same PID field match the same filter entry based on a SNAP PID match criterion.
Range	0 to 65535
Introduced	16.0.R4
Platforms	All

### src-mac

Synopsis	Enable the <b>src-mac</b> context
Context	<b>configure</b> <a href="#">system security management-access-filter mac-filter entry number match src-mac</a>
Tree	<a href="#">src-mac</a>
Description	Commands in this context specify match criteria based on the source MAC.
Introduced	16.0.R4
Platforms	All

### address string

Synopsis	MAC address used as the match criterion
Context	<b>configure</b> <a href="#">system security management-access-filter mac-filter entry number match src-mac address string</a>
Tree	<a href="#">address</a>
Notes	This element is mandatory.
Introduced	16.0.R4
Platforms	All

### mask string

Synopsis	MAC address mask as the match criterion
Context	<b>configure</b> <a href="#">system security management-access-filter mac-filter entry number match src-mac mask string</a>
Tree	<a href="#">mask</a>
Default	ff:ff:ff:ff:ff:ff
Introduced	16.0.R4

Platforms All

### **per-peer-queuing** *boolean*

Synopsis Allow CPM hardware queuing per peer

Context **configure** [system security per-peer-queuing](#) *boolean*

Tree [per-peer-queuing](#)

Description When configured to **true**, the router automatically allocates a separate CPM hardware queue for the peer when a peering session is established.  
When configured to **false**, a separate CPM hardware queue is not allowed.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **pki**

Synopsis Enter the **pki** context

Context **configure** [system security pki](#)

Tree [pki](#)

Introduced 16.0.R1

Platforms All

### **ca-profile** [[ca-profile-name](#)] *string*

Synopsis Enter the **ca-profile** list instance

Context **configure** [system security pki ca-profile](#) *string*

Tree [ca-profile](#)

Max. Instances 128

Introduced 16.0.R1

Platforms All

### **[ca-profile-name]** *string*

Synopsis CA profile name

Context **configure** [system security pki ca-profile](#) *string*

Tree [ca-profile](#)

---

String Length	1 to 32
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

### **admin-state** *keyword*

Synopsis	Administrative state of the CA profile
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">pki</a> <a href="#">ca-profile</a> <i>string</i> <b>admin-state</b> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	16.0.R1
Platforms	All

### **auto-crl-update**

Synopsis	Enable the <b>auto-crl-update</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">pki</a> <a href="#">ca-profile</a> <i>string</i> <b>auto-crl-update</b>
Tree	<a href="#">auto-crl-update</a>
Introduced	16.0.R1
Platforms	All

### **admin-state** *keyword*

Synopsis	Administrative state of the automatic CRL update
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">pki</a> <a href="#">ca-profile</a> <i>string</i> <b>auto-crl-update</b> <b>admin-state</b> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	16.0.R1
Platforms	All

## crl-urls

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Enter the <b>crl-urls</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">pki</a> <a href="#">ca-profile</a> <i>string</i> <a href="#">auto-crl-update</a> <b>crl-urls</b>
Tree	<a href="#">crl-urls</a>
Introduced	16.0.R1
Platforms	All

## url-entry [[entry-id](#)] *number*

Synopsis	Enter the <b>url-entry</b> list instance
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">pki</a> <a href="#">ca-profile</a> <i>string</i> <a href="#">auto-crl-update</a> <a href="#">crl-urls</a> <b>url-entry</b> <i>number</i>
Tree	<a href="#">url-entry</a>
Introduced	16.0.R1
Platforms	All

## [[entry-id](#)] *number*

Synopsis	URL on this system
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">pki</a> <a href="#">ca-profile</a> <i>string</i> <a href="#">auto-crl-update</a> <a href="#">crl-urls</a> <b>url-entry</b> <i>number</i>
Tree	<a href="#">url-entry</a>
Range	1 to 8
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

## transmission-profile *reference*

Synopsis	File transmission profile to update CRL
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">pki</a> <a href="#">ca-profile</a> <i>string</i> <a href="#">auto-crl-update</a> <a href="#">crl-urls</a> <b>url-entry</b> <i>number</i> <a href="#">transmission-profile</a> <i>reference</i>
Tree	<a href="#">transmission-profile</a>
Reference	<b>configure</b> <a href="#">system</a> <a href="#">transmission-profile</a> <i>string</i>

Introduced 16.0.R4  
 Platforms All

### **url** *http-url-path-loose*

Synopsis Location of updated CRL  
 Context **configure** [system](#) [security](#) [pki](#) [ca-profile](#) *string* [auto-crl-update](#) [crl-urls](#) [url-entry](#) *number*  
[url](#) *http-url-path-loose*  
 Tree [url](#)  
 String Length 1 to 180  
 Introduced 16.0.R1  
 Platforms All

### **periodic-update-interval** *number*

#### **WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis Interval between two consecutive CRL updates  
 Context **configure** [system](#) [security](#) [pki](#) [ca-profile](#) *string* [auto-crl-update](#) [periodic-update-interval](#)  
*number*  
 Tree [periodic-update-interval](#)  
 Range 3600 to 31622400  
 Units seconds  
 Default 86400  
 Introduced 16.0.R1  
 Platforms All

### **pre-update-time** *number*

#### **WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis Time prior to the next update time of the current CRL  
 Context **configure** [system](#) [security](#) [pki](#) [ca-profile](#) *string* [auto-crl-update](#) [pre-update-time](#) *number*

Tree	<a href="#">pre-update-time</a>
Range	0 to 31622400
Units	seconds
Default	3600
Introduced	16.0.R1
Platforms	All

### **retry-interval** *number*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Interval before retrying to update CRL
Context	<b>configure</b> <a href="#">system security pki ca-profile</a> <i>string</i> <a href="#">auto-crl-update</a> <a href="#">retry-interval</a> <i>number</i>
Tree	<a href="#">retry-interval</a>
Range	0 to 31622400
Units	seconds
Default	3600
Introduced	16.0.R1
Platforms	All

### **schedule-type** *keyword*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Time scheduler type for an automated CRL update
Context	<b>configure</b> <a href="#">system security pki ca-profile</a> <i>string</i> <a href="#">auto-crl-update</a> <a href="#">schedule-type</a> <i>keyword</i>
Tree	<a href="#">schedule-type</a>
Options	next-update-based, periodic
Default	next-update-based
Introduced	16.0.R1
Platforms	All

## cert-file *string*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Certificate file name
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">pki</a> <a href="#">ca-profile</a> <i>string</i> <b>cert-file</b> <i>string</i>
Tree	<a href="#">cert-file</a>
String Length	1 to 95
Introduced	16.0.R1
Platforms	All

## cmpv2

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Enter the <b>cmpv2</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">pki</a> <a href="#">ca-profile</a> <i>string</i> <b>cmpv2</b>
Tree	<a href="#">cmpv2</a>
Introduced	16.0.R1
Platforms	All

## accept-unprotected-message

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Enter the <b>accept-unprotected-message</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">pki</a> <a href="#">ca-profile</a> <i>string</i> <b>cmpv2</b> <b>accept-unprotected-message</b>
Tree	<a href="#">accept-unprotected-message</a>
Introduced	16.0.R1
Platforms	All

**error-message** *boolean***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Accept unprotected error messages
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">pki</a> <a href="#">ca-profile</a> <i>string</i> <a href="#">cmpv2</a> <a href="#">accept-unprotected-message</a> <a href="#">error-message</a> <i>boolean</i>
Tree	<a href="#">error-message</a>
Default	false
Introduced	16.0.R1
Platforms	All

**pkiconf-message** *boolean***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Accept unprotected PKI confirmation messages
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">pki</a> <a href="#">ca-profile</a> <i>string</i> <a href="#">cmpv2</a> <a href="#">accept-unprotected-message</a> <a href="#">pkiconf-message</a> <i>boolean</i>
Tree	<a href="#">pkiconf-message</a>
Default	false
Introduced	16.0.R1
Platforms	All

**always-set-sender-for-ir** *boolean***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Set subject name in CMPv2 header for all IR messages
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">pki</a> <a href="#">ca-profile</a> <i>string</i> <a href="#">cmpv2</a> <a href="#">always-set-sender-for-ir</a> <i>boolean</i>
Tree	<a href="#">always-set-sender-for-ir</a>
Default	false
Introduced	16.0.R1

Platforms All

## http

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis Enter the **http** context

Context **configure** system security pki ca-profile string cmpv2 http

Tree [http](#)

Introduced 16.0.R1

Platforms All

## response-timeout *number*

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis HTTP response timeout

Context **configure** system security pki ca-profile string cmpv2 http response-timeout *number*

Tree [response-timeout](#)

Range 1 to 3600

Units seconds

Default 30

Introduced 16.0.R1

Platforms All

## version *keyword*

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis HTTP version for CMPv2 messages

Context **configure** system security pki ca-profile string cmpv2 http version *keyword*

Tree [version](#)

Options	1.0, 1.1
Default	1.1
Introduced	16.0.R1
Platforms	All

## key-list

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Enter the <b>key-list</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">pki</a> <a href="#">ca-profile</a> <i>string</i> <a href="#">cmpv2</a> <b>key-list</b>
Tree	<a href="#">key-list</a>
Introduced	16.0.R1
Platforms	All

## key [[reference-number](#)] *string*

Synopsis	Enter the <b>key</b> list instance
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">pki</a> <a href="#">ca-profile</a> <i>string</i> <a href="#">cmpv2</a> <a href="#">key-list</a> <b>key</b> <i>string</i>
Tree	<a href="#">key</a>
Max. Instances	128
Introduced	16.0.R1
Platforms	All

## [[reference-number](#)] *string*

Synopsis	Unique identifier for the CA initial authentication key
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">pki</a> <a href="#">ca-profile</a> <i>string</i> <a href="#">cmpv2</a> <a href="#">key-list</a> <b>key</b> <i>string</i>
Tree	<a href="#">key</a>
String Length	1 to 64
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

**password** *string*

Synopsis	Shared secret for this CA initial authentication key
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">pki</a> <a href="#">ca-profile</a> <i>string</i> <a href="#">cmpv2</a> <a href="#">key-list</a> <a href="#">key</a> <i>string</i> <b>password</b> <i>string</i>
Tree	<a href="#">password</a>
String Length	1 to 115
Introduced	16.0.R1
Platforms	All

**recipient-subject** *string***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	DN attributes for recipient subject of CMPv2 requests
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">pki</a> <a href="#">ca-profile</a> <i>string</i> <a href="#">cmpv2</a> <b>recipient-subject</b> <i>string</i>
Tree	<a href="#">recipient-subject</a>
String Length	1 to 256
Notes	The following elements are part of a choice: <b>recipient-subject</b> or <b>use-ca-subject</b> .
Introduced	22.10.R1
Platforms	All

**response-signing-cert** *string***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	File name of the certificate to verify CMPv2 responses
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">pki</a> <a href="#">ca-profile</a> <i>string</i> <a href="#">cmpv2</a> <b>response-signing-cert</b> <i>string</i>
Tree	<a href="#">response-signing-cert</a>
Description	This command specifies an imported certificate used to verify the CMP response message that they are protected by signature. When unconfigured, CA's certificate is used.
String Length	1 to 95

Notes	The following elements are part of a choice: <b>response-signing-cert</b> or <b>response-signing-use-extracert</b> .
Introduced	16.0.R1
Platforms	All

## response-signing-use-extracert

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Use extraCerts certificate to verify response signature
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">pki</a> <a href="#">ca-profile</a> <i>string</i> <a href="#">cmpv2</a> <a href="#">response-signing-use-extracert</a>
Tree	<a href="#">response-signing-use-extracert</a>
Notes	The following elements are part of a choice: <b>response-signing-cert</b> or <b>response-signing-use-extracert</b> .
Introduced	22.10.R1
Platforms	All

## same-recipient-nonce-for-poll-request *boolean*

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Use same recipNonce as last CMPv2 response
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">pki</a> <a href="#">ca-profile</a> <i>string</i> <a href="#">cmpv2</a> <a href="#">same-recipient-nonce-for-poll-request</a> <i>boolean</i>
Tree	<a href="#">same-recipient-nonce-for-poll-request</a>
Default	false
Introduced	16.0.R1
Platforms	All

**signing-cert-subject** *string***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Subject DN attributes to identify signing certificate
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">pki</a> <a href="#">ca-profile</a> <i>string</i> <a href="#">cmpv2</a> <a href="#">signing-cert-subject</a> <i>string</i>
Tree	<a href="#">signing-cert-subject</a>
String Length	1 to 256
Introduced	23.3.R1
Platforms	All

**url****WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Enter the <b>url</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">pki</a> <a href="#">ca-profile</a> <i>string</i> <a href="#">cmpv2</a> <a href="#">url</a>
Tree	<a href="#">url</a>
Introduced	16.0.R1
Platforms	All

**service-name** *string***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Administrative service name
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">pki</a> <a href="#">ca-profile</a> <i>string</i> <a href="#">cmpv2</a> <a href="#">url</a> <a href="#">service-name</a> <i>string</i>
Tree	<a href="#">service-name</a>
String Length	1 to 64
Notes	The following elements are part of a choice: <b>service-name</b> or <b>transmission-profile</b> .
Introduced	16.0.R1
Platforms	All

**transmission-profile** *reference***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Transmission profile for CMPv2
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">pki</a> <a href="#">ca-profile</a> <i>string</i> <a href="#">cmpv2</a> <a href="#">url</a> <b>transmission-profile</b> <i>reference</i>
Tree	<a href="#">transmission-profile</a>
Reference	<b>configure</b> <a href="#">system</a> <a href="#">transmission-profile</a> <i>string</i>
Notes	The following elements are part of a choice: <b>service-name</b> or <b>transmission-profile</b> .
Introduced	23.3.R1
Platforms	All

**url-string** *http-optional-url-loose***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	URL for CMPv2
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">pki</a> <a href="#">ca-profile</a> <i>string</i> <a href="#">cmpv2</a> <a href="#">url</a> <b>url-string</b> <i>http-optional-url-loose</i>
Tree	<a href="#">url-string</a>
String Length	1 to 180
Introduced	16.0.R1
Platforms	All

**use-ca-subject****WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Use subject DN in CA certificate as CMPv2 request recipient
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">pki</a> <a href="#">ca-profile</a> <i>string</i> <a href="#">cmpv2</a> <b>use-ca-subject</b>
Tree	<a href="#">use-ca-subject</a>
Notes	The following elements are part of a choice: <b>recipient-subject</b> or <b>use-ca-subject</b> .

Introduced 22.10.R1  
 Platforms All

### **crl-file** *string*

### certificate-auto-update [[certificate-file-name](#)] *string*

Synopsis Enter the **certificate-auto-update** list instance

Context **configure** [system](#) [security](#) [pki](#) [certificate-auto-update](#) *string*

Tree [certificate-auto-update](#)

Description Commands in this context configure automatic certificate update associations.

Max. Instances 256

Introduced 22.10.R1

Platforms All

### [[certificate-file-name](#)] *string*

Synopsis Certificate file name

Context **configure** [system](#) [security](#) [pki](#) [certificate-auto-update](#) *string*

Tree [certificate-auto-update](#)

String Length 1 to 95

Notes This element is part of a list key.

Introduced 22.10.R1

Platforms All

**key-file-name** *string*

Synopsis	Imported key filename
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">pki</a> <a href="#">certificate-auto-update</a> <i>string</i> <b>key-file-name</b> <i>string</i>
Tree	<a href="#">key-file-name</a>
String Length	1 to 95
Introduced	22.10.R1
Platforms	All

**profile** *reference*

Synopsis	Certificate update profile name
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">pki</a> <a href="#">certificate-auto-update</a> <i>string</i> <b>profile</b> <i>reference</i>
Tree	<a href="#">profile</a>
Reference	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">pki</a> <a href="#">certificate-update-profile</a> <i>string</i>
Introduced	22.10.R1
Platforms	All

**certificate-display-format** *keyword*

Synopsis	Display format for Certificates and CRLs
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">pki</a> <a href="#">certificate-display-format</a> <i>keyword</i>
Tree	<a href="#">certificate-display-format</a>
Options	ascii, utf8
Default	ascii
Introduced	16.0.R1
Platforms	All

**certificate-expiration-warning**

Synopsis	Enter the <b>certificate-expiration-warning</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">pki</a> <a href="#">certificate-expiration-warning</a>
Tree	<a href="#">certificate-expiration-warning</a>
Introduced	16.0.R1
Platforms	All

**hours** *number*

Synopsis	Time before system generates certificate warning trap
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">pki</a> <a href="#">certificate-expiration-warning</a> <i>hours</i> <i>number</i>
Tree	<a href="#">hours</a>
Range	0 to 8760
Units	hours
Introduced	16.0.R1
Platforms	All

**repeat-hours** *number*

Synopsis	Time system repeats certificate expiration warning trap
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">pki</a> <a href="#">certificate-expiration-warning</a> <a href="#">repeat-hours</a> <i>number</i>
Tree	<a href="#">repeat-hours</a>
Range	0 to 8760
Units	hours
Default	0
Introduced	16.0.R1
Platforms	All

**certificate-update-profile** [[name](#)] *string*

Synopsis	Enter the <b>certificate-update-profile</b> list instance
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">pki</a> <a href="#">certificate-update-profile</a> <i>string</i>
Tree	<a href="#">certificate-update-profile</a>
Description	Commands in this context configure a certificate update profile that specifies the behavior of the automatic update certificate.
Max. Instances	256
Introduced	22.10.R1
Platforms	All

**[name]** *string*

Synopsis	Certificate update profile name
----------	---------------------------------

---

Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">pki</a> <a href="#">certificate-update-profile</a> <i>string</i>
Tree	<a href="#">certificate-update-profile</a>
Description	This command configures the certificate update profile name.
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	22.10.R1
Platforms	All

### **after-issue** *number*

Synopsis	Time for scheduler updates after certificate issuance
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">pki</a> <a href="#">certificate-update-profile</a> <i>string</i> <b>after-issue</b> <i>number</i>
Tree	<a href="#">after-issue</a>
Description	This command configures the time for scheduler updates after the certificate issue time.
Range	864000 to 157680000
Units	seconds
Notes	The following elements are part of a choice: <b>after-issue</b> or <b>before-expiry</b> .
Introduced	22.10.R1
Platforms	All

### **before-expiry** *number*

Synopsis	Time scheduler updates before certificate expiry
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">pki</a> <a href="#">certificate-update-profile</a> <i>string</i> <b>before-expiry</b> <i>number</i>
Tree	<a href="#">before-expiry</a>
Description	This command configures the time that the scheduler updates before the certificate expiration time.
Range	3600 to 157680000
Units	seconds
Default	86400
Notes	The following elements are part of a choice: <b>after-issue</b> or <b>before-expiry</b> .
Introduced	22.10.R1
Platforms	All

## cmpv2

Synopsis	Enter the <b>cmpv2</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">pki</a> <a href="#">certificate-update-profile</a> <i>string</i> <b>cmpv2</b>
Tree	<a href="#">cmpv2</a>
Notes	The following elements are part of a choice: <b>cmpv2</b> or <b>est</b> .
Introduced	22.10.R1
Platforms	All

## ca-profile *reference*

Synopsis	CA profile name
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">pki</a> <a href="#">certificate-update-profile</a> <i>string</i> <b>cmpv2</b> <a href="#">ca-profile</a> <i>reference</i>
Tree	<a href="#">ca-profile</a>
Description	This command specifies the use of CMPv2 as the protocol to update the certificate. The CMPv2 configuration is derived from the referenced CA profile.
Reference	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">pki</a> <a href="#">ca-profile</a> <i>string</i>
Introduced	22.10.R1
Platforms	All

## dsa

Synopsis	Enter the <b>dsa</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">pki</a> <a href="#">certificate-update-profile</a> <i>string</i> <b>dsa</b>
Tree	<a href="#">dsa</a>
Notes	The following elements are part of a choice: <b>dsa</b> , <b>ecdsa</b> , <b>rsa</b> , or <b>same-as-existing-key</b> .
Introduced	22.10.R1
Platforms	All

## key-size *number*

Synopsis	Length of the generated DSA key
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">pki</a> <a href="#">certificate-update-profile</a> <i>string</i> <b>dsa</b> <a href="#">key-size</a> <i>number</i>
Tree	<a href="#">key-size</a>
Description	This command specifies that the newly generated key is an DSA key with the specified key length in bits.

Range	512 to 8192
Default	2048
Introduced	22.10.R1
Platforms	All

## ecdsa

Synopsis	Enter the <b>ecdsa</b> context
Context	<b>configure</b> <a href="#">system security pki certificate-update-profile</a> <i>string</i> <a href="#">ecdsa</a>
Tree	<a href="#">ecdsa</a>
Notes	The following elements are part of a choice: <b>dsa</b> , <b>ecdsa</b> , <b>rsa</b> , or <b>same-as-existing-key</b> .
Introduced	22.10.R1
Platforms	All

## curve *keyword*

Synopsis	Elliptic curve to be used in ECDSA key generation
Context	<b>configure</b> <a href="#">system security pki certificate-update-profile</a> <i>string</i> <a href="#">ecdsa curve</a> <i>keyword</i>
Tree	<a href="#">curve</a>
Description	This command specifies that the newly generated key is an ECDSA key with the specified curve.
Options	secp256r1, secp384r1, secp521r1
Default	secp256r1
Introduced	22.10.R1
Platforms	All

## est

Synopsis	Enter the <b>est</b> context
Context	<b>configure</b> <a href="#">system security pki certificate-update-profile</a> <i>string</i> <a href="#">est</a>
Tree	<a href="#">est</a>
Notes	The following elements are part of a choice: <b>cmpv2</b> or <b>est</b> .
Introduced	22.10.R1
Platforms	All

### **est-profile** *reference*

Synopsis	EST profile name
Context	<b>configure</b> <a href="#">system security pki certificate-update-profile</a> <i>string</i> <b>est</b> <a href="#">est-profile</a> <i>reference</i>
Tree	<a href="#">est-profile</a>
Description	This command specifies the use of EST as the protocol to update the certificate. The EST configuration is derived from the referenced EST profile.
Reference	<b>configure</b> <a href="#">system security pki est-profile</a> <i>string</i>
Introduced	22.10.R1
Platforms	All

### **hash-algorithm** *keyword*

Synopsis	Hash algorithm for a certificate request
Context	<b>configure</b> <a href="#">system security pki certificate-update-profile</a> <i>string</i> <b>hash-algorithm</b> <i>keyword</i>
Tree	<a href="#">hash-algorithm</a>
Description	This command specifies the hash algorithm used to generate a certificate request.
Options	md5, sha1, sha224, sha256, sha384, sha512
Default	sha256
Introduced	22.10.R1
Platforms	All

### **retry-interval** *number*

Synopsis	Retry interval after a failed update
Context	<b>configure</b> <a href="#">system security pki certificate-update-profile</a> <i>string</i> <b>retry-interval</b> <i>number</i>
Tree	<a href="#">retry-interval</a>
Description	This command configures the retry interval after the update fails.
Range	60 to 36000
Units	seconds
Default	3600
Introduced	22.10.R1
Platforms	All

**rsa**

Synopsis	Enter the <b>rsa</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">pki</a> <a href="#">certificate-update-profile</a> <i>string</i> <b>rsa</b>
Tree	<a href="#">rsa</a>
Notes	The following elements are part of a choice: <b>dsa</b> , <b>ecdsa</b> , <b>rsa</b> , or <b>same-as-existing-key</b> .
Introduced	22.10.R1
Platforms	All

**key-size number**

Synopsis	Length of the generated RSA key
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">pki</a> <a href="#">certificate-update-profile</a> <i>string</i> <b>rsa</b> <a href="#">key-size</a> <i>number</i>
Tree	<a href="#">key-size</a>
Description	This command specifies that the newly generated key is a RSA key with the specified key length in bits.
Range	512 to 8192
Default	2048
Introduced	22.10.R1
Platforms	All

**same-as-existing-key**

Synopsis	Generate the new key to same type and key length
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">pki</a> <a href="#">certificate-update-profile</a> <i>string</i> <b>same-as-existing-key</b>
Tree	<a href="#">same-as-existing-key</a>
Description	When configured, this command specifies that the newly generated key is the same type and key length as the existing key.
Notes	The following elements are part of a choice: <b>dsa</b> , <b>ecdsa</b> , <b>rsa</b> , or <b>same-as-existing-key</b> .
Introduced	22.10.R1
Platforms	All

**common-name-list [cn-list-name] string**

Synopsis	Enter the <b>common-name-list</b> list instance
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">pki</a> <a href="#">common-name-list</a> <i>string</i>

Tree	<a href="#">common-name-list</a>
Max. Instances	64
Introduced	16.0.R1
Platforms	All

**[cn-list-name]** *string*

Synopsis	CN list name
Context	<b>configure</b> <a href="#">system security pki common-name-list</a> <i>string</i>
Tree	<a href="#">common-name-list</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

**common-name** [[cn-index](#)] *number*

Synopsis	Enter the <b>common-name</b> list instance
Context	<b>configure</b> <a href="#">system security pki common-name-list</a> <i>string</i> <a href="#">common-name</a> <i>number</i>
Tree	<a href="#">common-name</a>
Introduced	16.0.R1
Platforms	All

**[cn-index]** *number*

Synopsis	Common name index
Context	<b>configure</b> <a href="#">system security pki common-name-list</a> <i>string</i> <a href="#">common-name</a> <i>number</i>
Tree	<a href="#">common-name</a>
Range	1 to 128
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

### **cn-type** *keyword*

Synopsis	Common name type
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">pki</a> <a href="#">common-name-list</a> <i>string</i> <a href="#">common-name</a> <i>number</i> <b>cn-type</b> <i>keyword</i>
Tree	<a href="#">cn-type</a>
Options	ip-address, domain-name
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

### **cn-value** *string*

Synopsis	Common name value
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">pki</a> <a href="#">common-name-list</a> <i>string</i> <a href="#">common-name</a> <i>number</i> <b>cn-value</b> <i>string</i>
Tree	<a href="#">cn-value</a>
String Length	1 to 255
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

### **crl-expiration-warning**

Synopsis	Enter the <b>crl-expiration-warning</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">pki</a> <a href="#">crl-expiration-warning</a>
Tree	<a href="#">crl-expiration-warning</a>
Introduced	16.0.R1
Platforms	All

### **hours** *number*

Synopsis	Time before system generates CRL expiration warning trap
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">pki</a> <a href="#">crl-expiration-warning</a> <b>hours</b> <i>number</i>
Tree	<a href="#">hours</a>
Range	0 to 8760

Units	hours
Introduced	16.0.R1
Platforms	All

**repeat-hours** *number*

Synopsis	Time system repeats CRL expiration warning trap
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">pki</a> <a href="#">crl-expiration-warning</a> <a href="#">repeat-hours</a> <i>number</i>
Tree	<a href="#">repeat-hours</a>
Range	0 to 8760
Units	hours
Default	0
Introduced	16.0.R1
Platforms	All

**est-profile** [*name*] *string*

Synopsis	Enter the <b>est-profile</b> list instance
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">pki</a> <a href="#">est-profile</a> <i>string</i>
Tree	<a href="#">est-profile</a>
Description	Commands in this context configure an Enrollment over Secure Transport (EST) profile.
Max. Instances	128
Introduced	21.10.R1
Platforms	All

**[name]** *string*

Synopsis	Enrollment over Secured Transport profile name
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">pki</a> <a href="#">est-profile</a> <i>string</i>
Tree	<a href="#">est-profile</a>
Description	This command configures the EST profile name.
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	21.10.R1

Platforms All

### **check-id-kp-cmcra-only** *boolean*

Synopsis Check id-kp-cmcra in the EST certificate  
 Context **configure** [system](#) [security](#) [pki](#) [est-profile](#) *string* **check-id-kp-cmcra-only** *boolean*  
 Tree [check-id-kp-cmcra-only](#)  
 Default false  
 Introduced 21.10.R1  
 Platforms All

### **client-tls-profile** *string*

Synopsis TLS client profile assigned to applications  
 Context **configure** [system](#) [security](#) [pki](#) [est-profile](#) *string* **client-tls-profile** *string*  
 Tree [client-tls-profile](#)  
 Description This command specifies the TLS client profile to be assigned to applications for encryption. The profile creates the TLS connection to the EST server.  
 String Length 1 to 32  
 Introduced 21.10.R1  
 Platforms All

### **http-authentication**

Synopsis Enter the **http-authentication** context  
 Context **configure** [system](#) [security](#) [pki](#) [est-profile](#) *string* **http-authentication**  
 Tree [http-authentication](#)  
 Introduced 21.10.R1  
 Platforms All

### **password** *string*

Synopsis Password for EST authentication  
 Context **configure** [system](#) [security](#) [pki](#) [est-profile](#) *string* **http-authentication** **password** *string*  
 Tree [password](#)

String Length 1 to 115  
Introduced 21.10.R1  
Platforms All

### **username** *string*

Synopsis Username for the EST authentication  
Context **configure** [system](#) [security](#) [pki](#) [est-profile](#) *string* [http-authentication](#) [username](#) *string*  
Tree [username](#)  
String Length 1 to 32  
Introduced 21.10.R1  
Platforms All

### **server**

Synopsis Enter the **server** context  
Context **configure** [system](#) [security](#) [pki](#) [est-profile](#) *string* [server](#)  
Tree [server](#)  
Description Commands in this context configure EST server parameters.  
Introduced 21.10.R1  
Platforms All

### **fqdn** *string*

Synopsis Fully Qualified Domain Name (FQDN) of the EST server  
Context **configure** [system](#) [security](#) [pki](#) [est-profile](#) *string* [server](#) [fqdn](#) *string*  
Tree [fqdn](#)  
Description This command specifies to use the FQDN of the EST server.  
String Length 1 to 255  
Notes The following elements are part of a choice: **fqdn**, **ipv4**, or **ipv6**.  
Introduced 21.10.R1  
Platforms All

### **ipv4 string**

Synopsis	IPv4 address of the EST server
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">pki</a> <a href="#">est-profile</a> <i>string</i> <a href="#">server</a> <a href="#">ipv4</a> <i>string</i>
Tree	<a href="#">ipv4</a>
Notes	The following elements are part of a choice: <b>fqdn</b> , <b>ipv4</b> , or <b>ipv6</b> .
Introduced	21.10.R1
Platforms	All

### **ipv6 (ipv4-address-no-zone | ipv6-address-no-zone)**

Synopsis	IPv6 address of the EST server
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">pki</a> <a href="#">est-profile</a> <i>string</i> <a href="#">server</a> <a href="#">ipv6</a> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> )
Tree	<a href="#">ipv6</a>
Notes	The following elements are part of a choice: <b>fqdn</b> , <b>ipv4</b> , or <b>ipv6</b> .
Introduced	21.10.R1
Platforms	All

### **port number**

Synopsis	Port number of the EST server
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">pki</a> <a href="#">est-profile</a> <i>string</i> <a href="#">server</a> <a href="#">port</a> <i>number</i>
Tree	<a href="#">port</a>
Range	1 to 65535
Default	443
Introduced	21.10.R1
Platforms	All

### **transmission-profile string**

Synopsis	Transmission profile name for EST
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">pki</a> <a href="#">est-profile</a> <i>string</i> <a href="#">transmission-profile</a> <i>string</i>
Tree	<a href="#">transmission-profile</a>
Description	This command associates a file transmission profile to the EST profile.

The transmission profile defines transport parameters for protocol such as HTTP, include routing instance, source address, timeout value, and so on.

String Length	1 to 32
Introduced	21.10.R1
Platforms	All

### **imported-format** *keyword*

Synopsis	The supported encrypted file formats
Context	<b>configure</b> <a href="#">system security pki imported-format</a> <i>keyword</i>
Tree	<a href="#">imported-format</a>
Options	any, secure
Default	any
Introduced	16.0.R6
Platforms	All

### **maximum-cert-chain-depth** *number*

Synopsis	Maximum depth of certificate chain verification
Context	<b>configure</b> <a href="#">system security pki maximum-cert-chain-depth</a> <i>number</i>
Tree	<a href="#">maximum-cert-chain-depth</a>
Range	1 to 7
Default	7
Introduced	16.0.R1
Platforms	All

### **python-script**

Synopsis	Enter the <b>python-script</b> context
Context	<b>configure</b> <a href="#">system security python-script</a>
Tree	<a href="#">python-script</a>
Introduced	21.10.R1
Platforms	All

## authorization

Synopsis	Enter the <b>authorization</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">python-script</a> <a href="#">authorization</a>
Tree	<a href="#">authorization</a>
Introduced	21.10.R1
Platforms	All

## cron

Synopsis	Enter the <b>cron</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">python-script</a> <a href="#">authorization</a> <a href="#">cron</a>
Tree	<a href="#">cron</a>
Introduced	21.10.R1
Platforms	All

## cli-user *reference*

Synopsis	User profile name when executing a Python application
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">python-script</a> <a href="#">authorization</a> <a href="#">cron</a> <a href="#">cli-user</a> <i>reference</i>
Tree	<a href="#">cli-user</a>
Reference	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">user</a> <i>string</i>
Introduced	21.10.R1
Platforms	All

## event-handler

Synopsis	Enter the <b>event-handler</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">python-script</a> <a href="#">authorization</a> <a href="#">event-handler</a>
Tree	<a href="#">event-handler</a>
Introduced	21.10.R1
Platforms	All

## cli-user *reference*

Synopsis	User profile name when executing a Python application
----------	---

Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">python-script</a> <a href="#">authorization</a> <a href="#">event-handler</a> <a href="#">cli-user</a> <i>reference</i>
Tree	<a href="#">cli-user</a>
Reference	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">user</a> <i>string</i>
Introduced	21.10.R1
Platforms	All

## snmp

Synopsis	Enter the <b>snmp</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">snmp</a>
Tree	<a href="#">snmp</a>
Introduced	16.0.R1
Platforms	All

## **access** [[group](#)] *string* [context](#) *string* [security-model](#) *keyword* [security-level](#) *keyword*

Synopsis	Enter the <b>access</b> list instance
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">snmp</a> <a href="#">access</a> <i>string</i> <a href="#">context</a> <i>string</i> <a href="#">security-model</a> <i>keyword</i> <a href="#">security-level</a> <i>keyword</i>
Tree	<a href="#">access</a>
Introduced	16.0.R1
Platforms	All

## **[group]** *string*

Synopsis	Group name
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">snmp</a> <a href="#">access</a> <i>string</i> <a href="#">context</a> <i>string</i> <a href="#">security-model</a> <i>keyword</i> <a href="#">security-level</a> <i>keyword</i>
Tree	<a href="#">access</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

**context string**

Synopsis	String to match context name for access rights
Context	<b>configure</b> <a href="#">system</a> <a href="#">security snmp access string context string security-model keyword security-level keyword</a>
Tree	<a href="#">access</a>
String Length	0 to 32
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

**security-model keyword**

Synopsis	Security model
Context	<b>configure</b> <a href="#">system</a> <a href="#">security snmp access string context string security-model keyword security-level keyword</a>
Tree	<a href="#">access</a>
Options	snmpv1, snmpv2c, usm
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

**security-level keyword**

Synopsis	Minimum security level required to gain access rights
Context	<b>configure</b> <a href="#">system</a> <a href="#">security snmp access string context string security-model keyword security-level keyword</a>
Tree	<a href="#">access</a>
Options	no-auth-no-privacy, auth-no-privacy, privacy
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

**notify string**

Synopsis	SNMP view for notification access
----------	-----------------------------------

Context	<b>configure</b> <b>system</b> <b>security snmp access</b> <i>string</i> <b>context</b> <i>string</i> <b>security-model</b> <b>keyword</b> <b>security-level</b> <b>keyword</b> <b>notify</b> <i>string</i>
Tree	<b>notify</b>
Description	This command specifies the SNMP view used to control which MIB objects can be accessed for notifications.
String Length	1 to 32
Introduced	16.0.R1
Platforms	All

### **prefix-match** *keyword*

Synopsis	Match type for the context
Context	<b>configure</b> <b>system</b> <b>security snmp access</b> <i>string</i> <b>context</b> <i>string</i> <b>security-model</b> <b>keyword</b> <b>security-level</b> <b>keyword</b> <b>prefix-match</b> <b>keyword</b>
Tree	<b>prefix-match</b>
Options	exact, prefix
Introduced	16.0.R1
Platforms	All

### **read** *string*

Synopsis	SNMP view for read access
Context	<b>configure</b> <b>system</b> <b>security snmp access</b> <i>string</i> <b>context</b> <i>string</i> <b>security-model</b> <b>keyword</b> <b>security-level</b> <b>keyword</b> <b>read</b> <i>string</i>
Tree	<b>read</b>
Description	This command specifies the SNMP view used to control which MIB objects can be accessed using a read (get) operation.
String Length	1 to 32
Introduced	16.0.R1
Platforms	All

### **write** *string*

Synopsis	SNMP view for write access
Context	<b>configure</b> <b>system</b> <b>security snmp access</b> <i>string</i> <b>context</b> <i>string</i> <b>security-model</b> <b>keyword</b> <b>security-level</b> <b>keyword</b> <b>write</b> <i>string</i>
Tree	<b>write</b>

Description	This command specifies the SNMP view used to control which MIB objects can be accessed using a write (set) operation.
String Length	1 to 32
Introduced	16.0.R1
Platforms	All

## attempts

Synopsis	Enter the <b>attempts</b> context
Context	<b>configure system security snmp attempts</b>
Tree	<a href="#">attempts</a>
Description	Commands in this context configure settings for SNMPv2 or SNMPv3 connection attempts. The command settings are used to counter Denial of Service (DOS) attacks through SNMP.  If the threshold is exceeded, the host is locked out for the lockout time period.
Introduced	16.0.R1
Platforms	All

## count *number*

Synopsis	Unsuccessful attempts allowed within time period
Context	<b>configure system security snmp attempts count <i>number</i></b>
Tree	<a href="#">count</a>
Range	1 to 64
Default	20
Introduced	16.0.R1
Platforms	All

## lockout *number*

Synopsis	Lockout period during which the host cannot log in
Context	<b>configure system security snmp attempts lockout <i>number</i></b>
Tree	<a href="#">lockout</a>
Description	This command configures the time period during which the host cannot log in. When the host exceeds the attempted counts setting, the host is locked out from further login attempts for the configured time period.

Range	0 to 1440
Units	minutes
Default	10
Introduced	16.0.R1
Platforms	All

**time** *number*

Synopsis	Time before host lockout after unsuccessful attempts
Context	<b>configure</b> <a href="#">system</a> <a href="#">security snmp attempts</a> <i>time number</i>
Tree	<a href="#">time</a>
Range	0 to 60
Units	minutes
Default	5
Introduced	16.0.R1
Platforms	All

**community** [[community-string](#)] *string*

Synopsis	Enter the <b>community</b> list instance
Context	<b>configure</b> <a href="#">system</a> <a href="#">security snmp community</a> <i>string</i>
Tree	<a href="#">community</a>
Introduced	16.0.R1
Platforms	All

**[community-string]** *string*

Synopsis	SNMPv1 or SNMPv2c community string
Context	<b>configure</b> <a href="#">system</a> <a href="#">security snmp community</a> <i>string</i>
Tree	<a href="#">community</a>
String Length	1 to 114
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

**access-permissions** *keyword*

Synopsis	Access permissions for objects in the MIB
Context	<b>configure</b> <a href="#">system</a> <a href="#">security snmp community</a> <i>string</i> <b>access-permissions</b> <i>keyword</i>
Tree	<a href="#">access-permissions</a>
Options	r, rw, rwa, mgmt, vpls-mgmt
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

**source-access-list** *reference*

Synopsis	Source access list to validate received SNMP requests
Context	<b>configure</b> <a href="#">system</a> <a href="#">security snmp community</a> <i>string</i> <b>source-access-list</b> <i>reference</i>
Tree	<a href="#">source-access-list</a>
Reference	<b>configure</b> <a href="#">system</a> <a href="#">security snmp source-access-list</a> <i>string</i>
Introduced	16.0.R1
Platforms	All

**version** *keyword*

Synopsis	SNMP version
Context	<b>configure</b> <a href="#">system</a> <a href="#">security snmp community</a> <i>string</i> <b>version</b> <i>keyword</i>
Tree	<a href="#">version</a>
Options	v1, v2c, both
Default	both
Introduced	16.0.R1
Platforms	All

**source-access-list** [[list-name](#)] *string*

Synopsis	Enter the <b>source-access-list</b> list instance
Context	<b>configure</b> <a href="#">system</a> <a href="#">security snmp source-access-list</a> <i>string</i>
Tree	<a href="#">source-access-list</a>
Description	Commands in this context configure SNMP source access lists.

SNMP source access lists are used to validate the source IP address of received SNMP requests. Multiple community (VPRN or Base router) and USM community instances can reference the same SNMP source access list.

Max. Instances	16
Introduced	16.0.R1
Platforms	All

### **[list-name]** *string*

Synopsis	Source access list name
Context	<b>configure</b> <a href="#">system</a> <a href="#">security snmp source-access-list</a> <i>string</i>
Tree	<a href="#">source-access-list</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

### **source-host** [[host-name](#)] *string*

Synopsis	Enter the <b>source-host</b> list instance
Context	<b>configure</b> <a href="#">system</a> <a href="#">security snmp source-access-list</a> <i>string</i> <a href="#">source-host</a> <i>string</i>
Tree	<a href="#">source-host</a>
Max. Instances	16
Introduced	16.0.R1
Platforms	All

### **[host-name]** *string*

Synopsis	Source host entry name
Context	<b>configure</b> <a href="#">system</a> <a href="#">security snmp source-access-list</a> <i>string</i> <a href="#">source-host</a> <i>string</i>
Tree	<a href="#">source-host</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	16.0.R1

Platforms All

### **address** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis Source IP address entry used to validate SNMP requests

Context **configure** [system](#) [security snmp source-access-list](#) *string* [source-host](#) *string* [address](#) (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Tree [address](#)

Notes This element is mandatory.

Introduced 16.0.R1

Platforms All

### **usm-community** [[community-string](#)] *string*

Synopsis Enter the **usm-community** list instance

Context **configure** [system](#) [security snmp usm-community](#) *string*

Tree [usm-community](#)

Introduced 16.0.R1

Platforms All

### **[community-string]** *string*

Synopsis Community string associated with SNMPv3 access group

Context **configure** [system](#) [security snmp usm-community](#) *string*

Tree [usm-community](#)

String Length 1 to 114

Notes This element is part of a list key.

Introduced 16.0.R1

Platforms All

### **group** *string*

Synopsis Group to manage access rights of the community string

Context **configure** [system](#) [security snmp usm-community](#) *string* [group](#) *string*

Tree [group](#)

String Length 1 to 32  
 Introduced 16.0.R1  
 Platforms All

### **source-access-list** *reference*

Synopsis Source access list to validate received SNMP requests  
 Context **configure** [system](#) [security snmp usm-community](#) *string* [source-access-list](#) *reference*  
 Tree [source-access-list](#)  
 Reference **configure** [system](#) [security snmp](#) [source-access-list](#) *string*  
 Introduced 16.0.R1  
 Platforms All

### **view** [[view-name](#)] *string* [subtree](#) *string*

Synopsis Enter the **view** list instance  
 Context **configure** [system](#) [security snmp](#) [view](#) *string* [subtree](#) *string*  
 Tree [view](#)  
 Introduced 16.0.R1  
 Platforms All

### **[view-name]** *string*

Synopsis View name  
 Context **configure** [system](#) [security snmp](#) [view](#) *string* [subtree](#) *string*  
 Tree [view](#)  
 String Length 1 to 32  
 Notes This element is part of a list key.  
 Introduced 16.0.R1  
 Platforms All

### **subtree** *string*

Synopsis Object Identifier (OID) value  
 Context **configure** [system](#) [security snmp](#) [view](#) *string* [subtree](#) *string*

Tree	<a href="#">view</a>
String Length	1 to 256
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

### **mask string**

Synopsis	Mask value as binary value, or hex value
Context	<b>configure</b> <a href="#">system</a> <a href="#">security snmp view</a> <a href="#">string subtree</a> <a href="#">string mask</a> <a href="#">string</a>
Tree	<a href="#">mask</a>
String Length	1 to 16
Introduced	16.0.R1
Platforms	All

### **type keyword**

Synopsis	Type of SNMP security view mask
Context	<b>configure</b> <a href="#">system</a> <a href="#">security snmp view</a> <a href="#">string subtree</a> <a href="#">string type</a> <a href="#">keyword</a>
Tree	<a href="#">type</a>
Options	included, excluded
Introduced	16.0.R1
Platforms	All

### **source-address**

Synopsis	Enter the <b>source-address</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security source-address</a>
Tree	<a href="#">source-address</a>
Description	<p>Commands in this context configure the IP source address that is used in all unsolicited packets sent by the specified applications.</p> <p>This configuration applies to packets transmitted in-band (for example, a network port on an IOM) and does not apply to packets transmitted out-of-band on the management interface on the CPM Ethernet port. Packets transmitted using the CPM Ethernet port use the address of the CPM Ethernet port as the IP source address in the packet.</p> <p>When a source address is specified for the PTP application, the port-based 1588 hardware timestamping assist function is applied to PTP packets matching the IPv4</p>

address of the router interface used to ingress the SR/ESS or IP address specified in this command. If the IP address is removed, the port-based 1588 hardware timestamping assist function is only applied to PTP packets matching the IPv4 address of the router interface.

Introduced 16.0.R1  
Platforms All

### **ipv4** [[application](#)] *keyword*

Synopsis Enter the **ipv4** list instance  
Context **configure system security source-address ipv4 keyword**  
Tree [ipv4](#)  
Introduced 16.0.R1  
Platforms All

### **[application]** *keyword*

Synopsis Application that uses the source IP address  
Context **configure system security source-address ipv4 keyword**  
Tree [ipv4](#)  
Options telnet, ftp, ssh, radius, tacplus, snmptrap, syslog, ping, traceroute, dns, sntp, ntp, cflowd, ptp, mcreporter, sflow, icmp-error, ldap  
Notes This element is part of a list key.  
Introduced 16.0.R1  
Platforms All

### **address** *string*

#### **WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis Source IPv4 address  
Context **configure system security source-address ipv4 keyword address string**  
Tree [address](#)  
Notes The following elements are part of a mandatory choice: **address** or **interface-name**.  
Introduced 16.0.R1

Platforms All

### interface-name *string*

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis IP interface name

Context **configure** system security source-address ipv4 *keyword* interface-name *string*

Tree [interface-name](#)

String Length 1 to 32

Notes The following elements are part of a mandatory choice: **address** or **interface-name**.

Introduced 16.0.R1

Platforms All

### ipv6 [[application](#)] *keyword*

Synopsis Enter the **ipv6** list instance

Context **configure** system security source-address ipv6 *keyword*

Tree [ipv6](#)

Introduced 16.0.R1

Platforms All

### [[application](#)] *keyword*

Synopsis Application which uses the source IPv6 address

Context **configure** system security source-address ipv6 *keyword*

Tree [ipv6](#)

Options telnet, ftp, radius, tacplus, snmptrap, syslog, ping, traceroute, dns, cflowd, ntp, sflow, icmp6-error, ldap, ssh, ptp

Notes This element is part of a list key.

Introduced 16.0.R1

Platforms All

## address string

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Source IPv6 address
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">source-address</a> <a href="#">ipv6</a> <i>keyword</i> <a href="#">address</a> <i>string</i>
Tree	<a href="#">address</a>
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

## ssh

Synopsis	Enter the <b>ssh</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">ssh</a>
Tree	<a href="#">ssh</a>
Introduced	16.0.R1
Platforms	All

## authentication-method

Synopsis	Enter the <b>authentication-method</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">ssh</a> <a href="#">authentication-method</a>
Tree	<a href="#">authentication-method</a>
Introduced	23.7.R1
Platforms	All

## client

Synopsis	Enter the <b>client</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">ssh</a> <a href="#">authentication-method</a> <a href="#">client</a>
Tree	<a href="#">client</a>
Introduced	23.10.R3
Platforms	All

**public-key-only** *boolean*

Synopsis	Accept only public-key authentication for SSH session
Context	<b>configure</b> <a href="#">system security ssh authentication-method client public-key-only</a> <i>boolean</i>
Tree	<a href="#">public-key-only</a>
Description	<p>When configured to <b>true</b>, the system accepts only public key client authentication for the SSH server.</p> <p>This command defines the authentication method at the system level.</p> <p>When configured to <b>false</b>, the system accepts public key or password client authentication. If <b>interactive-authentication</b> is configured to <b>true</b> in the <b>configure system security aaa remote-servers radius</b> or <b>configure system security aaa remote-servers tacplus</b> context, the system also accepts interactive keyboard authentication.</p>
Default	false
Introduced	23.10.R3
Platforms	All

**server**

Synopsis	Enter the <b>server</b> context
Context	<b>configure</b> <a href="#">system security ssh authentication-method server</a>
Tree	<a href="#">server</a>
Introduced	23.7.R1
Platforms	All

**public-key-only** *boolean*

Synopsis	Accept only public-key authentication for SSH session
Context	<b>configure</b> <a href="#">system security ssh authentication-method server public-key-only</a> <i>boolean</i>
Tree	<a href="#">public-key-only</a>
Description	<p>When configured to <b>true</b>, the system accepts only public key client authentication for the SSH server.</p> <p>This command defines the authentication method at the system level.</p> <p>When configured to <b>false</b>, the system accepts public key or password client authentication. If <b>interactive-authentication</b> is configured to <b>true</b> in the <b>configure system security aaa remote-servers radius</b> or <b>configure system security aaa remote-servers tacplus</b> context, the system also accepts interactive keyboard authentication.</p>

Default	false
Introduced	23.7.R1
Platforms	All

## client-cipher-list-v2

Synopsis	Enter the <b>client-cipher-list-v2</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">ssh</a> <a href="#">client-cipher-list-v2</a>
Tree	<a href="#">client-cipher-list-v2</a>
Introduced	16.0.R1
Platforms	All

## cipher [[index](#)] *number*

Synopsis	Enter the <b>cipher</b> list instance
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">ssh</a> <a href="#">client-cipher-list-v2</a> <a href="#">cipher</a> <i>number</i>
Tree	<a href="#">cipher</a>
Description	Commands in this context configure a client-cipher instance. Client-ciphers are used when the SR OS is acting as an SSH client.
Introduced	16.0.R1
Platforms	All

## [[index](#)] *number*

Synopsis	Cipher index in the list
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">ssh</a> <a href="#">client-cipher-list-v2</a> <a href="#">cipher</a> <i>number</i>
Tree	<a href="#">cipher</a>
Range	1 to 255
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

## name *keyword*

Synopsis	Algorithm for performing encryption or decryption
----------	---

Context	<b>configure system security ssh client-cipher-list-v2 cipher</b> <i>number name keyword</i>
Tree	<a href="#">name</a>
Options	3des-cbc, aes128-cbc, aes192-cbc, aes256-cbc, aes128-ctr, aes192-ctr, aes256-ctr
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

## client-kex-list-v2

Synopsis	Enter the <b>client-kex-list-v2</b> context
Context	<b>configure system security ssh client-kex-list-v2</b>
Tree	<a href="#">client-kex-list-v2</a>
Introduced	19.10.R3
Platforms	All

## kex [[index](#)] *number*

Synopsis	Enter the <b>kex</b> list instance
Context	<b>configure system security ssh client-kex-list-v2 kex</b> <i>number</i>
Tree	<a href="#">kex</a>
Description	<p>Commands in this context configure SSH Key Exchange (KEX) algorithms for SR OS as a client.</p> <p>If a list is configured, SSH uses the list with the first-listed algorithm having the highest priority.</p> <p>By default, the client list is empty. The default list contains the following:</p> <ul style="list-style-type: none"> <li>• diffie-hellman-group16-sha512</li> <li>• diffie-hellman-group14-sha256</li> <li>• diffie-hellman-group14-sha1</li> <li>• diffie-hellman-group1-sha1</li> </ul>
Introduced	19.10.R3
Platforms	All

## [[index](#)] *number*

Synopsis	SSHv2 KEX algorithm index
Context	<b>configure system security ssh client-kex-list-v2 kex</b> <i>number</i>

Tree	<a href="#">kex</a>
Description	This command configures the index of the KEX algorithm in the list. The lowest index in the list is negotiated first on the SSH negotiation list, while the highest index is at the bottom of the SSH negotiation list.
Range	1 to 255
Notes	This element is part of a list key.
Introduced	19.10.R3
Platforms	All

### **name** *keyword*

Synopsis	KEX algorithm for computing a shared secret key
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">ssh</a> <a href="#">client-kex-list-v2</a> <a href="#">kex</a> <i>number</i> <a href="#">name</a> <i>keyword</i>
Tree	<a href="#">name</a>
Options	diffie-hellman-group1-sha1, diffie-hellman-group14-sha1, diffie-hellman-group-exchange-sha1, diffie-hellman-group14-sha256, diffie-hellman-group16-sha512
Notes	This element is mandatory.
Introduced	19.10.R3
Platforms	All

### **client-mac-list-v2**

Synopsis	Enter the <b>client-mac-list-v2</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">ssh</a> <a href="#">client-mac-list-v2</a>
Tree	<a href="#">client-mac-list-v2</a>
Introduced	16.0.R1
Platforms	All

### **mac** [[index](#)] *number*

Synopsis	Enter the <b>mac</b> list instance
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">ssh</a> <a href="#">client-mac-list-v2</a> <a href="#">mac</a> <i>number</i>
Tree	<a href="#">mac</a>
Description	Commands in this context configure SSH MAC algorithms for SR OS as a client.
Introduced	16.0.R1

Platforms All

### **[index] number**

Synopsis MAC algorithm index  
Context **configure** [system security ssh client-mac-list-v2 mac number](#)  
Tree [mac](#)  
Range 1 to 255  
Notes This element is part of a list key.  
Introduced 16.0.R1  
Platforms All

### **name keyword**

Synopsis Algorithm for calculating message authentication code  
Context **configure** [system security ssh client-mac-list-v2 mac number name keyword](#)  
Tree [name](#)  
Options hmac-sha2-512, hmac-sha2-256, hmac-sha1, hmac-sha1-96, hmac-md5, hmac-md5-96  
Notes This element is mandatory.  
Introduced 16.0.R1  
Platforms All

### **key-re-exchange**

Synopsis Enter the **key-re-exchange** context  
Context **configure** [system security ssh key-re-exchange](#)  
Tree [key-re-exchange](#)  
Introduced 16.0.R1  
Platforms All

### **client**

Synopsis Enter the **client** context  
Context **configure** [system security ssh key-re-exchange client](#)  
Tree [client](#)

---

Introduced	16.0.R1
Platforms	All

**admin-state** *keyword*

Synopsis	Administrative state of the key re-exchange
Context	<b>configure</b> <a href="#">system security ssh key-re-exchange client admin-state</a> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	enable
Introduced	16.0.R1
Platforms	All

**mbytes** (*number* | *keyword*)

Synopsis	Maximum bytes transmitted before key re-exchange begins
Context	<b>configure</b> <a href="#">system security ssh key-re-exchange client mbytes</a> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">mbytes</a>
Range	1 to 64000
Units	megabytes
Options	infinite
Default	1024
Introduced	16.0.R1
Platforms	All

**minutes** (*number* | *keyword*)

Synopsis	Maximum time before key re-exchange is initiated
Context	<b>configure</b> <a href="#">system security ssh key-re-exchange client minutes</a> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">minutes</a>
Range	1 to 1440
Units	minutes
Options	infinite
Default	60
Introduced	16.0.R1

Platforms All

## server

Synopsis Enter the **server** context  
 Context **configure** [system security ssh key-re-exchange server](#)  
 Tree [server](#)  
 Introduced 16.0.R1  
 Platforms All

## admin-state *keyword*

Synopsis Administrative state of the key re-exchange  
 Context **configure** [system security ssh key-re-exchange server admin-state keyword](#)  
 Tree [admin-state](#)  
 Options enable, disable  
 Default enable  
 Introduced 16.0.R1  
 Platforms All

## mbytes (*number* | *keyword*)

Synopsis Maximum bytes transmitted before key re-exchange begins  
 Context **configure** [system security ssh key-re-exchange server mbytes \(\*number\* | \*keyword\*\)](#)  
 Tree [mbytes](#)  
 Range 1 to 64000  
 Units megabytes  
 Options infinite  
 Default 1024  
 Introduced 16.0.R1  
 Platforms All

## minutes (*number* | *keyword*)

Synopsis Maximum time before key re-exchange is initiated

Context	<b>configure system security ssh key-re-exchange server minutes</b> ( <i>number   keyword</i> )
Tree	<a href="#">minutes</a>
Range	1 to 1440
Units	minutes
Options	infinite
Default	60
Introduced	16.0.R1
Platforms	All

### **permit-empty-passwords** *boolean*

Synopsis	Permit users with empty password strings to log in
Context	<b>configure system security ssh permit-empty-passwords</b> <i>boolean</i>
Tree	<a href="#">permit-empty-passwords</a>
Default	true
Introduced	22.10.R1
Platforms	All

### **preserve-key** *boolean*

Synopsis	Preserve keys and restore on system or server restart
Context	<b>configure system security ssh preserve-key</b> <i>boolean</i>
Tree	<a href="#">preserve-key</a>
Description	When configured to <b>true</b> , private, public, and host keys are saved by the server. The keys are restored following a system reboot or a restart of an SSH server.  When configured to <b>false</b> , the keys are held in memory by an SSH server but are not restored following a system reboot.
Default	false
Introduced	16.0.R1
Platforms	All

### **server-admin-state** *keyword*

Synopsis	Administrative state of the SSH server
Context	<b>configure system security ssh server-admin-state</b> <i>keyword</i>
Tree	<a href="#">server-admin-state</a>

---

Options	enable, disable
Default	enable
Introduced	16.0.R1
Platforms	All

## **server-cipher-list-v2**

Synopsis	Enter the <b>server-cipher-list-v2</b> context
Context	<b>configure</b> <a href="#">system security ssh server-cipher-list-v2</a>
Tree	<a href="#">server-cipher-list-v2</a>
Introduced	16.0.R1
Platforms	All

## **cipher** [[index](#)] *number*

Synopsis	Enter the <b>cipher</b> list instance
Context	<b>configure</b> <a href="#">system security ssh server-cipher-list-v2 cipher</a> <i>number</i>
Tree	<a href="#">cipher</a>
Description	Commands in this context configure a server-cipher instance. Server-ciphers are used when SR OS is acting as an SSH server.
Introduced	16.0.R1
Platforms	All

## **[index]** *number*

Synopsis	Cipher index in the list
Context	<b>configure</b> <a href="#">system security ssh server-cipher-list-v2 cipher</a> <i>number</i>
Tree	<a href="#">cipher</a>
Range	1 to 255
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

**name** *keyword*

Synopsis	Algorithm for performing encryption or decryption
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">ssh</a> <a href="#">server-cipher-list-v2</a> <a href="#">cipher</a> <i>number</i> <b>name</b> <i>keyword</i>
Tree	<a href="#">name</a>
Options	3des-cbc, aes128-cbc, aes192-cbc, aes256-cbc, aes128-ctr, aes192-ctr, aes256-ctr
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

**server-kex-list-v2**

Synopsis	Enter the <b>server-kex-list-v2</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">ssh</a> <a href="#">server-kex-list-v2</a>
Tree	<a href="#">server-kex-list-v2</a>
Introduced	19.10.R3
Platforms	All

**kex** [[index](#)] *number*

Synopsis	Enter the <b>kex</b> list instance
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">ssh</a> <a href="#">server-kex-list-v2</a> <a href="#">kex</a> <i>number</i>
Tree	<a href="#">kex</a>
Introduced	19.10.R3
Platforms	All

**[index]** *number*

Synopsis	SSHv2 KEX algorithm index
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">ssh</a> <a href="#">server-kex-list-v2</a> <a href="#">kex</a> <i>number</i>
Tree	<a href="#">kex</a>
Description	This command configures the index of the KEX algorithm in the list. The lowest index in the list is negotiated first on the SSH negotiation list, while the highest index is at the bottom of the SSH negotiation list.
Range	1 to 255
Notes	This element is part of a list key.

Introduced 19.10.R3  
Platforms All

### **name** *keyword*

Synopsis KEX algorithm for computing a shared secret key  
Context **configure** [system security ssh server-kex-list-v2](#) *kex number name keyword*  
Tree [name](#)  
Options diffie-hellman-group1-sha1, diffie-hellman-group14-sha1,  
diffie-hellman-group-exchange-sha1, diffie-hellman-group14-sha256,  
diffie-hellman-group16-sha512  
Notes This element is mandatory.  
Introduced 19.10.R3  
Platforms All

### **server-mac-list-v2**

Synopsis Enter the **server-mac-list-v2** context  
Context **configure** [system security ssh server-mac-list-v2](#)  
Tree [server-mac-list-v2](#)  
Introduced 16.0.R1  
Platforms All

### **mac** [[index](#)] *number*

Synopsis Enter the **mac** list instance  
Context **configure** [system security ssh server-mac-list-v2 mac](#) *number*  
Tree [mac](#)  
Introduced 16.0.R1  
Platforms All

### [[index](#)] *number*

Synopsis MAC algorithm index  
Context **configure** [system security ssh server-mac-list-v2 mac](#) *number*  
Tree [mac](#)

Range	1 to 255
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

### **name** *keyword*

Synopsis	Algorithm for calculating message authentication code
Context	<b>configure system security ssh server-mac-list-v2 mac number name keyword</b>
Tree	<a href="#">name</a>
Options	hmac-sha2-512, hmac-sha2-256, hmac-sha1, hmac-sha1-96, hmac-md5, hmac-md5-96
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

### **system-passwords**

Synopsis	Enter the <b>system-passwords</b> context
Context	<b>configure system security system-passwords</b>
Tree	<a href="#">system-passwords</a>
Description	This command enters the context to configure system passwords.
Introduced	16.0.R1
Platforms	All

### **admin-password** *string*

Synopsis	Context to configure system passwords
Context	<b>configure system security system-passwords admin-password string</b>
Tree	<a href="#">admin-password</a>
Description	<p>This command allows a user with administrative permissions to configure a password that enables a user to become an administrator.</p> <p>This password is valid only for one session. When enabled, no authorization to TACACS + or RADIUS is performed and the user is locally regarded as an administrative user.</p> <p>If the <b>admin-password</b> is configured in the <b>configure system security system-passwords admin-password</b> context, any user can enter the special mode by entering the <b>enable</b> command.</p>

**enable** is in the default profile. By default, all users are given access to this command.

After the **enable** command is entered, the user is prompted for a password. If the password matches, user is given unrestricted access to all commands.

The minimum length of the password is determined by the **minimum-length** command. The complexity requirements for the password are determined by the **complexity** command.

**Note:** This command applies to a local user, in addition to users on RADIUS, TACACS, and LDAP.

String Length	3 to 136
Introduced	16.0.R1
Platforms	All

## tech-support

Synopsis	Enter the <b>tech-support</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">tech-support</a>
Tree	<a href="#">tech-support</a>
Introduced	16.0.R1
Platforms	All

## ts-location (*ts-sat-url* | *cflash-url* | *string*)

Synopsis	Default file path for generated tech-support files
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">tech-support</a> <a href="#">ts-location</a> ( <i>ts-sat-url</i>   <i>cflash-url</i>   <i>string</i> )
Tree	<a href="#">ts-location</a>
String Length	1 to 180
Introduced	16.0.R1
Platforms	All

## telnet-server *boolean*

Synopsis	Enable Telnet servers running on the system
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">telnet-server</a> <i>boolean</i>
Tree	<a href="#">telnet-server</a>
Default	false
Introduced	16.0.R1

Platforms All

### **telnet6-server** *boolean*

Synopsis Enable Telnet IPv6 servers running on the system  
 Context **configure** [system security telnet6-server](#) *boolean*  
 Tree [telnet6-server](#)  
 Default false  
 Introduced 16.0.R1  
 Platforms All

### **tls**

Synopsis Enter the **tls** context  
 Context **configure** [system security tls](#)  
 Tree [tls](#)  
 Introduced 16.0.R1

Synopsis	Cipher suite code
Context	<b>configure</b> <a href="#">system security tls client-cipher-list</a> <i>string</i> <a href="#">tls12-cipher</a> <i>number</i> <b>name</b> <i>keyword</i>
Tree	<a href="#">name</a>
Options	tls-rsa-with3des-edc-cbc-sha, tls-rsa-with-aes128-cbc-sha, tls-rsa-with-aes256-cbc-sha, tls-rsa-with-aes128-cbc-sha256, tls-rsa-with-aes256-cbc-sha256, tls-rsa-with-aes128-gcm-sha256, tls-rsa-with-aes256-gcm-sha384
Notes	This element is mandatory.
Introduced	22.2.R1
Platforms	All

**tls13-cipher [index] number**

Synopsis	Enter the <b>tls13-cipher</b> list instance
Context	<b>configure</b> <a href="#">system security tls client-cipher-list</a> <i>string</i> <a href="#">tls13-cipher</a> <i>number</i>
Tree	<a href="#">tls13-cipher</a>
Description	Commands in this context configure the TLS 1.3-supported ciphers used by the client.
Introduced	22.7.R1
Platforms	All

**[index] number**

Synopsis	Index number of the TLS 1.3 cipher
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">tls</a> <a href="#">client-cipher-list</a> <i>string</i> <a href="#">tls13-cipher</a> <i>number</i>
Tree	<a href="#">tls13-cipher</a>
Range	1 to 255
Notes	This element is part of a list key.
Introduced	22.7.R1
Platforms	All

**name keyword**

Synopsis	Name of the TLS 1.3 cipher suite code
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">tls</a> <a href="#">client-cipher-list</a> <i>string</i> <a href="#">tls13-cipher</a> <i>number</i> <a href="#">name</a> <i>keyword</i>
Tree	<a href="#">name</a>
Options	<a href="#">tls-aes256-gcm-sha384</a> , <a href="#">tls-aes128-gcm-sha256</a> , <a href="#">tls-chacha20-poly1305-sha256</a> , <a href="#">tls-aes128-ccm8-sha256</a> , <a href="#">tls-aes128-ccm-sha256</a>
Notes	This element is mandatory.
Introduced	22.7.R1
Platforms	All

**client-group-list [client-group-list-name] string**

Synopsis	Enter the <b>client-group-list</b> list instance
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">tls</a> <a href="#">client-group-list</a> <i>string</i>
Tree	<a href="#">client-group-list</a>
Description	Commands in this context configure the list of TLS 1.3-supported group suite codes that the client sends in a client Hello message.
Max. Instances	16
Introduced	22.7.R1
Platforms	All

**[client-group-list-name] string**

Synopsis	Name of the TLS client group list
----------	-----------------------------------

Context	<b>configure system security tls client-group-list</b> <i>string</i>
Tree	<a href="#">client-group-list</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	22.7.R1
Platforms	All

### **tls13-group** [[index](#)] *number*

Synopsis	Enter the <b>tls13-group</b> list instance
Context	<b>configure system security tls client-group-list</b> <i>string</i> <a href="#">tls13-group</a> <i>number</i>
Tree	<a href="#">tls13-group</a>
Description	Commands in this context configure the TLS 1.3-supported group suite codes sent by the client in its Hello messages. SR OS supports the use of Elliptic-Curve Diffie-Hellman Ephemeral (ECDHE) groups.
Introduced	22.7.R1
Platforms	All

### **[index]** *number*

Synopsis	Index number of the TLS 1.3 group
Context	<b>configure system security tls client-group-list</b> <i>string</i> <a href="#">tls13-group</a> <i>number</i>
Tree	<a href="#">tls13-group</a>
Range	1 to 255
Notes	This element is part of a list key.
Introduced	22.7.R1
Platforms	All

### **name** *keyword*

Synopsis	Name of the TLS 1.3 group suite code
Context	<b>configure system security tls client-group-list</b> <i>string</i> <a href="#">tls13-group</a> <i>number</i> <b>name</b> <i>keyword</i>
Tree	<a href="#">name</a>
Options	tls-ecdhe-256, tls-ecdhe-384, tls-ecdhe-521, tls-x25519, tls-x448
Notes	This element is mandatory.

Introduced 22.7.R1  
 Platforms All

### **client-signature-list** [[client-signature-list-name](#)] *string*

Synopsis Enter the **client-signature-list** list instance  
 Context **configure** [system security tls client-signature-list](#) *string*  
 Tree [client-signature-list](#)  
 Description Commands in this context configure the list of TLS 1.3-supported signature suite codes that the client sends in a client Hello message.  
 Max. Instances 16  
 Introduced 22.7.R1  
 Platforms All

### **[client-signature-list-name]** *string*

Synopsis Name of the TLS 1.3 client signature list  
 Context **configure** [system security tls client-signature-list](#) *string*  
 Tree [client-signature-list](#)  
 String Length 1 to 32  
 Notes This element is part of a list key.  
 Introduced 22.7.R1  
 Platforms All

### **tls13-signature** [[index](#)] *number*

Synopsis Enter the **tls13-signature** list instance  
 Context **configure** [system security tls client-signature-list](#) *string* [tls13-signature](#) *number*  
 Tree [tls13-signature](#)  
 Description Commands in this context configure the TLS 1.3-supported signature suite codes sent by the client in its Hello messages.  
 Introduced 22.7.R1  
 Platforms All

**[index] number**

Synopsis	Index number of the TLS 1.3 signature
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">tls</a> <a href="#">client-signature-list</a> <i>string</i> <a href="#">tls13-signature</a> <i>number</i>
Tree	<a href="#">tls13-signature</a>
Range	1 to 255
Notes	This element is part of a list key.
Introduced	22.7.R1
Platforms	All

**name keyword**

Synopsis	Name of the TLS 1.3 signature suite code
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">tls</a> <a href="#">client-signature-list</a> <i>string</i> <a href="#">tls13-signature</a> <i>number</i> <i>name</i> <i>keyword</i>
Tree	<a href="#">name</a>
Options	<a href="#">tls-rsa-pkcs1-sha256</a> , <a href="#">tls-ecdsa-secp256r1-sha256</a> , <a href="#">tls-rsa-pkcs1-sha384</a> , <a href="#">tls-ecdsa-secp384r1-sha384</a> , <a href="#">tls-rsa-pkcs1-sha512</a> , <a href="#">tls-ecdsa-secp521r1-sha512</a> , <a href="#">tls-rsa-pss-rsae-sha256</a> , <a href="#">tls-rsa-pss-rsae-sha384</a> , <a href="#">tls-rsa-pss-rsae-sha512</a> , <a href="#">tls-ed25519</a> , <a href="#">tls-ed448</a> , <a href="#">tls-rsa-pss-pss-sha256</a> , <a href="#">tls-rsa-pss-pss-sha384</a> , <a href="#">tls-rsa-pss-pss-sha512</a>
Notes	This element is mandatory.
Introduced	22.7.R1
Platforms	All

**client-tls-profile [client-profile-name] string**

Synopsis	Enter the <b>client-tls-profile</b> list instance
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">tls</a> <a href="#">client-tls-profile</a> <i>string</i>
Tree	<a href="#">client-tls-profile</a>
Max. Instances	16
Introduced	16.0.R1
Platforms	All

**[client-profile-name] string**

Synopsis	Client TLS profile name
----------	-------------------------

---

Context	<b>configure system security tls client-tls-profile</b> <i>string</i>
Tree	<a href="#">client-tls-profile</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

### **admin-state** *keyword*

Synopsis	Administrative state of the client TLS profile
Context	<b>configure system security tls client-tls-profile</b> <i>string admin-state keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	16.0.R1
Platforms	All

### **cert-profile** *reference*

Synopsis	Certificate profile ID
Context	<b>configure system security tls client-tls-profile</b> <i>string cert-profile reference</i>
Tree	<a href="#">cert-profile</a>
Reference	<b>configure system security tls cert-profile</b> <i>string</i>
Introduced	16.0.R1
Platforms	All

### **cipher-list** *reference*

Synopsis	Cipher list for negotiation in the client Hello message
Context	<b>configure system security tls client-tls-profile</b> <i>string cipher-list reference</i>
Tree	<a href="#">cipher-list</a>
Reference	<b>configure system security tls client-cipher-list</b> <i>string</i>
Introduced	16.0.R1
Platforms	All

### **group-list** *reference*

Synopsis	Name of the list of supported group suite codes
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">tls</a> <a href="#">client-tls-profile</a> <i>string</i> <a href="#">group-list</a> <i>reference</i>
Tree	<a href="#">group-list</a>
Description	This command assigns an existing TLS 1.3 group list to the TLS client profile.
Reference	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">tls</a> <a href="#">client-group-list</a> <i>string</i>
Introduced	22.7.R1
Platforms	All

### **protocol-version** *keyword*

Synopsis	TLS protocol version used by the TLS client profile
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">tls</a> <a href="#">client-tls-profile</a> <i>string</i> <a href="#">protocol-version</a> <i>keyword</i>
Tree	<a href="#">protocol-version</a>
Description	This command configures the TLS version to be negotiated between the client and the server.  The client adds the specified version as a supported version in its Hello message to the server.
Options	<a href="#">tls-version-all</a> , <a href="#">tls-version-12</a> , <a href="#">tls-version-13</a>
Default	<a href="#">tls-version-12</a>
Introduced	22.7.R1
Platforms	All

### **signature-list** *reference*

Synopsis	Name of the list of supported signature suite codes
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">tls</a> <a href="#">client-tls-profile</a> <i>string</i> <a href="#">signature-list</a> <i>reference</i>
Tree	<a href="#">signature-list</a>
Description	This command assigns an existing TLS 1.3 signature list to the TLS client profile.
Reference	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">tls</a> <a href="#">client-signature-list</a> <i>string</i>
Introduced	22.7.R1
Platforms	All

**status-verify**

Synopsis	Enter the <b>status-verify</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">tls</a> <a href="#">client-tls-profile</a> <i>string</i> <b>status-verify</b>
Tree	<a href="#">status-verify</a>
Description	Commands in this context configure certificate revocation status verification options for the end-entity certificate in a TLS client.
Introduced	23.7.R1
Platforms	All

**default-result** *keyword*

Synopsis	Default result of certificate status verification
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">tls</a> <a href="#">client-tls-profile</a> <i>string</i> <b>status-verify</b> <b>default-result</b> <i>keyword</i>
Tree	<a href="#">default-result</a>
Description	<p>This command configures the default result of the entity certificate verification in the TLS client profile. This command overwrites the EE certificate revocation verification for the TLS client profile.</p> <p>By default the router checks the certification revocation status, but if this command is set to <b>good</b>, the end-entity certificate revocation status is overwritten and a good revocation status is returned for the EE certificate.</p> <p>If this command is set to <b>revoked</b>, the router returns the actual revocation status of the end-entity certificate.</p>
Options	revoked, good
Default	revoked
Introduced	23.7.R1
Platforms	All

**trust-anchor-profile** *reference*

Synopsis	Trust anchor profile
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">tls</a> <a href="#">client-tls-profile</a> <i>string</i> <b>trust-anchor-profile</b> <i>reference</i>
Tree	<a href="#">trust-anchor-profile</a>
Reference	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">tls</a> <b>trust-anchor-profile</b> <i>string</i>
Introduced	16.0.R1
Platforms	All

**server-cipher-list** [[server-cipher-list-name](#)] *string*

Synopsis	Enter the <b>server-cipher-list</b> list instance
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">tls</a> <a href="#">server-cipher-list</a> <i>string</i>
Tree	<a href="#">server-cipher-list</a>
Max. Instances	16
Introduced	16.0.R1
Platforms	All

**[server-cipher-list-name]** *string*

Synopsis	Server cipher list name
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">tls</a> <a href="#">server-cipher-list</a> <i>string</i>
Tree	<a href="#">server-cipher-list</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

**tls12-cipher** [[index](#)] *number*

Synopsis	Enter the <b>tls12-cipher</b> list instance
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">tls</a> <a href="#">server-cipher-list</a> <i>string</i> <a href="#">tls12-cipher</a> <i>number</i>
Tree	<a href="#">tls12-cipher</a>
Introduced	22.2.R1
Platforms	All

**[index]** *number*

Synopsis	Index of the cipher
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">tls</a> <a href="#">server-cipher-list</a> <i>string</i> <a href="#">tls12-cipher</a> <i>number</i>
Tree	<a href="#">tls12-cipher</a>
Range	1 to 255
Notes	This element is part of a list key.
Introduced	22.2.R1

Platforms All

### **name** *keyword*

Synopsis Cipher suite code

Context **configure system security tls server-cipher-list** *string* **tls12-cipher** *number* **name** *keyword*

Tree **name**

Options tls-rsa-with3des-edc-cbc-sha, tls-rsa-with-aes128-cbc-sha, tls-rsa-with-aes256-cbc-sha, tls-rsa-with-aes128-cbc-sha256, tls-rsa-with-aes256-cbc-sha256, tls-rsa-with-aes128-gcm-sha256, tls-rsa-with-aes256-gcm-sha384

Notes This element is mandatory.

Introduced 22.2.R1

Platforms All

### **tls13-cipher** [*index*] *number*

Synopsis Enter the **tls13-cipher** list instance

Context **configure system security tls server-cipher-list** *string* **tls13-cipher** *number*

Tree **tls13-cipher**

Description Commands in this context configure the TLS 1.3-supported ciphers used by the server.

Introduced 22.7.R1

Platforms All

### [*index*] *number*

Synopsis Index number of the TLS 1.3 cipher

Context **configure system security tls server-cipher-list** *string* **tls13-cipher** *number*

Tree **tls13-cipher**

Range 1 to 255

Notes This element is part of a list key.

Introduced 22.7.R1

Platforms All

**name** *keyword*

Synopsis	Name of the TLS 1.3 cipher suite code
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">tls</a> <a href="#">server-cipher-list</a> <i>string</i> <a href="#">tls13-cipher</a> <i>number</i> <i>name</i> <i>keyword</i>
Tree	<a href="#">name</a>
Options	tls-aes256-gcm-sha384, tls-aes128-gcm-sha256, tls-chacha20-poly1305-sha256, tls-aes128-ccm8-sha256, tls-aes128-ccm-sha256
Notes	This element is mandatory.
Introduced	22.7.R1
Platforms	All

**server-group-list** [[server-group-list-name](#)] *string*

Synopsis	Enter the <b>server-group-list</b> list instance
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">tls</a> <a href="#">server-group-list</a> <i>string</i>
Tree	<a href="#">server-group-list</a>
Description	Commands in this context configure the list of TLS 1.3-supported group suite codes that the server sends in a server Hello message.
Max. Instances	16
Introduced	22.7.R1
Platforms	All

**[server-group-list-name]** *string*

Synopsis	Name of the TLS server group list
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">tls</a> <a href="#">server-group-list</a> <i>string</i>
Tree	<a href="#">server-group-list</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	22.7.R1
Platforms	All

**tls13-group** [[index](#)] *number*

Synopsis	Enter the <b>tls13-group</b> list instance
----------	--

Context	<b>configure system security tls server-group-list</b> <i>string</i> <b>tls13-group</b> <i>number</i>
Tree	<b>tls13-group</b>
Description	Commands in this context configure the TLS 1.3-supported group suite codes sent by the server in its Hello messages. SR OS supports the use of Elliptic-Curve Diffie-Hellman Ephemeral (ECDHE) groups.
Introduced	22.7.R1
Platforms	All

**[index]** *number*

Synopsis	Index number of the TLS 1.3 group
Context	<b>configure system security tls server-group-list</b> <i>string</i> <b>tls13-group</b> <i>number</i>
Tree	<b>tls13-group</b>
Range	1 to 255
Notes	This element is part of a list key.
Introduced	22.7.R1
Platforms	All

**name** *keyword*

Synopsis	Name of the TLS 1.3 group suite code
Context	<b>configure system security tls server-group-list</b> <i>string</i> <b>tls13-group</b> <i>number</i> <b>name</b> <i>keyword</i>
Tree	<b>name</b>
Options	tls-ecdhe-256, tls-ecdhe-384, tls-ecdhe-521, tls-x25519, tls-x448
Notes	This element is mandatory.
Introduced	22.7.R1
Platforms	All

**server-signature-list** [**server-signature-list-name**] *string*

Synopsis	Enter the <b>server-signature-list</b> list instance
Context	<b>configure system security tls server-signature-list</b> <i>string</i>
Tree	<b>server-signature-list</b>
Description	Commands in this context configure the list of TLS 1.3-supported signature suite codes for the digital signature that the server sends in a server Hello message.

Max. Instances	16
Introduced	22.7.R1
Platforms	All

### **[server-signature-list-name]** *string*

Synopsis	Name of the TLS 1.3 server signature list
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">tls</a> <a href="#">server-signature-list</a> <i>string</i>
Tree	<a href="#">server-signature-list</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	22.7.R1
Platforms	All

### **tls13-signature** [[index](#)] *number*

Synopsis	Enter the <b>tls13-signature</b> list instance
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">tls</a> <a href="#">server-signature-list</a> <i>string</i> <a href="#">tls13-signature</a> <i>number</i>
Tree	<a href="#">tls13-signature</a>
Description	Commands in this context configure the TLS 1.3-supported signature suite codes sent by the server in its Hello messages.
Introduced	22.7.R1
Platforms	All

### **[index]** *number*

Synopsis	Index number of the TLS 1.3 signature
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">tls</a> <a href="#">server-signature-list</a> <i>string</i> <a href="#">tls13-signature</a> <i>number</i>
Tree	<a href="#">tls13-signature</a>
Range	1 to 255
Notes	This element is part of a list key.
Introduced	22.7.R1
Platforms	All

**name** *keyword*

Synopsis	Name of the TLS 1.3 signature suite code
Context	<b>configure</b> <b>system</b> <b>security</b> <b>tls</b> <b>server-signature-list</b> <i>string</i> <b>tls13-signature</b> <i>number</i> <b>name</b> <i>keyword</i>
Tree	<b>name</b>
Options	tls-rsa-pkcs1-sha256, tls-ecdsa-secp256r1-sha256, tls-rsa-pkcs1-sha384, tls-ecdsa-secp384r1-sha384, tls-rsa-pkcs1-sha512, tls-ecdsa-secp521r1-sha512, tls-rsa-pss-rsae-sha256, tls-rsa-pss-rsae-sha384, tls-rsa-pss-rsae-sha512, tls-ed25519, tls-ed448, tls-rsa-pss-pss-sha256, tls-rsa-pss-pss-sha384, tls-rsa-pss-pss-sha512
Notes	This element is mandatory.
Introduced	22.7.R1
Platforms	All

**server-tls-profile** [**server-profile-name**] *string*

Synopsis	Enter the <b>server-tls-profile</b> list instance
Context	<b>configure</b> <b>system</b> <b>security</b> <b>tls</b> <b>server-tls-profile</b> <i>string</i>
Tree	<b>server-tls-profile</b>
Max. Instances	16
Introduced	16.0.R1
Platforms	All

**[server-profile-name]** *string*

Synopsis	TLS server profile name
Context	<b>configure</b> <b>system</b> <b>security</b> <b>tls</b> <b>server-tls-profile</b> <i>string</i>
Tree	<b>server-tls-profile</b>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

**admin-state** *keyword*

Synopsis	Administrative state of the server TLS profile
----------	--

Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">tls</a> <a href="#">server-tls-profile</a> <i>string</i> <a href="#">admin-state</a> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	16.0.R1
Platforms	All

### **authenticate-client**

Synopsis	Enter the <b>authenticate-client</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">tls</a> <a href="#">server-tls-profile</a> <i>string</i> <a href="#">authenticate-client</a>
Tree	<a href="#">authenticate-client</a>
Introduced	16.0.R1
Platforms	All

### **common-name-list** *reference*

Synopsis	Common name list for client certificate authentication
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">tls</a> <a href="#">server-tls-profile</a> <i>string</i> <a href="#">authenticate-client</a> <a href="#">common-name-list</a> <i>reference</i>
Tree	<a href="#">common-name-list</a>
Reference	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">pki</a> <a href="#">common-name-list</a> <i>string</i>
Introduced	16.0.R1
Platforms	All

### **trust-anchor-profile** *reference*

Synopsis	Trust anchor profile for client authentication
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">tls</a> <a href="#">server-tls-profile</a> <i>string</i> <a href="#">authenticate-client</a> <a href="#">trust-anchor-profile</a> <i>reference</i>
Tree	<a href="#">trust-anchor-profile</a>
Reference	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">tls</a> <a href="#">trust-anchor-profile</a> <i>string</i>
Introduced	16.0.R1
Platforms	All

### **cert-profile** *reference*

Synopsis	Certificate profile ID
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">tls</a> <a href="#">server-tls-profile</a> <i>string</i> <a href="#">cert-profile</a> <i>reference</i>
Tree	<a href="#">cert-profile</a>
Reference	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">tls</a> <a href="#">cert-profile</a> <i>string</i>
Introduced	16.0.R1
Platforms	All

### **cipher-list** *reference*

Synopsis	Cipher list used by the TLS server profile
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">tls</a> <a href="#">server-tls-profile</a> <i>string</i> <a href="#">cipher-list</a> <i>reference</i>
Tree	<a href="#">cipher-list</a>
Reference	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">tls</a> <a href="#">server-cipher-list</a> <i>string</i>
Introduced	16.0.R1
Platforms	All

### **group-list** *reference*

Synopsis	Name of the list of supported group suite codes
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">tls</a> <a href="#">server-tls-profile</a> <i>string</i> <a href="#">group-list</a> <i>reference</i>
Tree	<a href="#">group-list</a>
Description	This command assigns an existing TLS 1.3 group list to the TLS server profile.
Reference	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">tls</a> <a href="#">server-group-list</a> <i>string</i>
Introduced	22.7.R1
Platforms	All

### **protocol-version** *keyword*

Synopsis	TLS protocol version used by the TLS server profile
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">tls</a> <a href="#">server-tls-profile</a> <i>string</i> <a href="#">protocol-version</a> <i>keyword</i>
Tree	<a href="#">protocol-version</a>
Description	This command configures the TLS version to be negotiated between the server and the client.

The server adds the specified version as a supported version in its Hello message to the client.

Options	tls-version-all, tls-version-12, tls-version-13
Default	tls-version-12
Introduced	22.7.R1
Platforms	All

### **signature-list** *reference*

Synopsis	Name of the list of supported signature suite codes
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">tls</a> <a href="#">server-tls-profile</a> <i>string</i> <a href="#">signature-list</a> <i>reference</i>
Tree	<a href="#">signature-list</a>
Description	This command assigns an existing TLS 1.3 signature list to the TLS server profile.
Reference	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">tls</a> <a href="#">server-signature-list</a> <i>string</i>
Introduced	22.7.R1
Platforms	All

### **status-verify**

Synopsis	Enter the <b>status-verify</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">tls</a> <a href="#">server-tls-profile</a> <i>string</i> <a href="#">status-verify</a>
Tree	<a href="#">status-verify</a>
Description	Commands in this context configure certificate revocation status verification options for the end-entity certificate in a TLS server.
Introduced	23.7.R1
Platforms	All

### **default-result** *keyword*

Synopsis	Default result of certificate status verification
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">tls</a> <a href="#">server-tls-profile</a> <i>string</i> <a href="#">status-verify</a> <a href="#">default-result</a> <i>keyword</i>
Tree	<a href="#">default-result</a>
Description	This command configures the default result of the entity certificate verification in the TLS server profile. This command overwrites the EE certificate revocation verification for the TLS server profile.

By default the router checks the certification revocation status, but if this command is set to **good**, the end-entity certificate revocation status is overwritten and a good revocation status is returned for the EE certificate.

If this command is set to **revoked**, the router returns the actual revocation status of the end-entity certificate.

Options	revoked, good
Default	revoked
Introduced	23.7.R1
Platforms	All

### **tls-re-negotiate-timer** *number*

Synopsis	TLS HELLO request timer
Context	<b>configure</b> <a href="#">system security tls server-tls-profile</a> <i>string</i> <b>tls-re-negotiate-timer</b> <i>number</i>
Tree	<a href="#">tls-re-negotiate-timer</a>
Range	0 to 65000
Units	minutes
Default	0
Introduced	16.0.R1
Platforms	All

### **trust-anchor-profile** [[trust-anchor-profile-name](#)] *string*

Synopsis	Enter the <b>trust-anchor-profile</b> list instance
Context	<b>configure</b> <a href="#">system security tls trust-anchor-profile</a> <i>string</i>
Tree	<a href="#">trust-anchor-profile</a>
Max. Instances	16
Introduced	16.0.R1
Platforms	All

### **[trust-anchor-profile-name]** *string*

Synopsis	Trust anchor profile name
Context	<b>configure</b> <a href="#">system security tls trust-anchor-profile</a> <i>string</i>
Tree	<a href="#">trust-anchor-profile</a>

String Length	1 to 32
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

### **trust-anchor** [[ca-profile-name](#)] *reference*

Synopsis	Add a list entry for <b>trust-anchor</b>
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">tls</a> <a href="#">trust-anchor-profile</a> <i>string</i> <b>trust-anchor</b> <i>reference</i>
Tree	<a href="#">trust-anchor</a>
Max. Instances	8
Introduced	16.0.R1
Platforms	All

### **[ca-profile-name]** *reference*

Synopsis	Trusted CA profile name
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">tls</a> <a href="#">trust-anchor-profile</a> <i>string</i> <b>trust-anchor</b> <i>reference</i>
Tree	<a href="#">trust-anchor</a>
Reference	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">pki</a> <a href="#">ca-profile</a> <i>string</i>
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

### **user-params**

Synopsis	Enter the <b>user-params</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a>
Tree	<a href="#">user-params</a>
Introduced	16.0.R1
Platforms	All

## attempts

Synopsis	Enter the <b>attempts</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">attempts</a>
Tree	<a href="#">attempts</a>
Introduced	16.0.R1
Platforms	All

## count *number*

Synopsis	Number of unsuccessful login attempts
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">attempts</a> <i>count number</i>
Tree	<a href="#">count</a>
Range	1 to 64
Default	3
Introduced	16.0.R1
Platforms	All

## lockout *number*

Synopsis	Lockout period after unsuccessful login attempts
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">attempts</a> <i>lockout number</i>
Tree	<a href="#">lockout</a>
Range	0 to 1440
Units	minutes
Default	10
Introduced	16.0.R1
Platforms	All

## time *number*

Synopsis	Time frame of unsuccessful login attempts
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">attempts</a> <i>time number</i>
Tree	<a href="#">time</a>
Range	0 to 60
Units	minutes

Default	5
Introduced	16.0.R1
Platforms	All

## authentication-order

Synopsis	Enter the <b>authentication-order</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">authentication-order</a>
Tree	<a href="#">authentication-order</a>
Description	<p>Commands in this context configure the sequence in which the system attempts authentication and authorization among the local user database, RADIUS servers, TACACS+ servers, and LDAP servers.</p> <p>Configure the order from the most preferred method to the least preferred. The presence of all methods in the command line does not guarantee they are all operational. Specifying options that are not available delays user authentication.</p> <p>If all operational methods are attempted and no authentication for a particular login has been granted, an entry in the security log records the failed attempt. Both the attempted login identification and originating IP address are logged with a timestamp.</p> <p>The order is not applicable to SNMPv3. SNMPv3 messages ignore the configured order and are authorized using the locally configured users only. TACACS+, RADIUS, and LDAP are not supported for SNMPv3 authentication.</p> <p><b>Note:</b> This command applies to a local user, in addition to users on RADIUS, TACACS+, and LDAP.</p>
Introduced	16.0.R1
Platforms	All

## exit-on-reject *boolean*

Synopsis	Stop authentication and authorization attempts after a reject
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">authentication-order</a> <a href="#">exit-on-reject</a> <i>boolean</i>
Tree	<a href="#">exit-on-reject</a>
Description	<p>When configured to <b>true</b>, the router stops authentication and authorization if one of the AAA methods configured in the order sends a rejection.</p> <p>When configured to <b>false</b>, the router attempts the next AAA method if a AAA method sends a rejection. If all AAA methods are exhausted, authentication and authorization is rejected.</p> <p>If the order specifies <b>local</b> as the first method, the following actions apply:</p> <ul style="list-style-type: none"> <li>• If this command is set to <b>true</b> and the user does not exist, the user is not authenticated.</li> </ul>

- If the user can be authenticated locally, other methods, if configured, are used for authorization and accounting.
- If the user is configured locally but without console access, login is denied.

Default	false
Introduced	16.0.R1
Platforms	All

### **order** *keyword*

Synopsis	Authentication and authorization order
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">authentication-order</a> <b>order</b> <i>keyword</i>
Tree	<a href="#">order</a>
Description	This command specifies the order of authentication and authorization. The default order is [ <b>radius tacplus ldap local</b> ].
Options	local, radius, tacplus, ldap
Max. Instances	4
Notes	This element is ordered by the user.
Introduced	16.0.R1
Platforms	All

### **local-user**

Synopsis	Enter the <b>local-user</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <b>local-user</b>
Tree	<a href="#">local-user</a>
Introduced	16.0.R1
Platforms	All

### **password**

Synopsis	Enter the <b>password</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <b>password</b>
Tree	<a href="#">password</a>
Introduced	16.0.R1

---

Platforms All

### **aging** *number*

Synopsis Maximum time during which a user password is valid

Context **configure** [system](#) [security](#) [user-params](#) [local-user](#) [password](#) *aging* *number*

Tree [aging](#)

Range 1 to 500

Units days

Introduced 16.0.R1

Platforms All

### **complexity-rules**

Synopsis Enter the **complexity-rules** context

Context **configure** [system](#) [security](#) [user-params](#) [local-user](#) [password](#) [complexity-rules](#)

Tree [complexity-rules](#)

Introduced 16.0.R1

Platforms All

### **allow-user-name** *boolean*

Synopsis Allow the username to be used as part of the password

Context **configure** [system](#) [security](#) [user-params](#) [local-user](#) [password](#) [complexity-rules](#) [allow-user-name](#) *boolean*

Tree [allow-user-name](#)

Default false

Introduced 16.0.R1

Platforms All

### **credits**

Synopsis Enter the **credits** context

Context **configure** [system](#) [security](#) [user-params](#) [local-user](#) [password](#) [complexity-rules](#) [credits](#)

Tree [credits](#)

---

Notes	The following elements are part of a choice: <b>credits</b> or <b>required</b> .
Introduced	16.0.R1
Platforms	All

### **lowercase** *number*

Synopsis	Maximum credits for the use of lowercase letters
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">password</a> <a href="#">complexity-rules</a> <a href="#">credits</a> <a href="#">lowercase</a> <i>number</i>
Tree	<a href="#">lowercase</a>
Range	1 to 10
Introduced	16.0.R1
Platforms	All

### **numeric** *number*

Synopsis	Maximum credits for the use of numeric characters
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">password</a> <a href="#">complexity-rules</a> <a href="#">credits</a> <a href="#">numeric</a> <i>number</i>
Tree	<a href="#">numeric</a>
Range	1 to 10
Introduced	16.0.R1
Platforms	All

### **special-character** *number*

Synopsis	Maximum credits for the use of special characters
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">password</a> <a href="#">complexity-rules</a> <a href="#">credits</a> <a href="#">special-character</a> <i>number</i>
Tree	<a href="#">special-character</a>
Range	1 to 10
Introduced	16.0.R1
Platforms	All

**uppercase** *number*

Synopsis	Maximum credits for the use of uppercase letters
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">password</a> <a href="#">complexity-rules</a> <a href="#">credits</a> <a href="#">uppercase</a> <i>number</i>
Tree	<a href="#">uppercase</a>
Range	1 to 10
Introduced	16.0.R1
Platforms	All

**minimum-classes** *number*

Synopsis	Minimum number of different character classes to use
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">password</a> <a href="#">complexity-rules</a> <a href="#">minimum-classes</a> <i>number</i>
Tree	<a href="#">minimum-classes</a>
Range	2 to 4
Introduced	16.0.R1
Platforms	All

**minimum-length** *number*

Synopsis	Minimum length required for local passwords
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">password</a> <a href="#">complexity-rules</a> <a href="#">minimum-length</a> <i>number</i>
Tree	<a href="#">minimum-length</a>
Range	6 to 50
Default	6
Introduced	16.0.R1
Platforms	All

**repeated-characters** *number*

Synopsis	Number of times same character can repeat consecutively
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">password</a> <a href="#">complexity-rules</a> <a href="#">repeated-characters</a> <i>number</i>
Tree	<a href="#">repeated-characters</a>

Range	2 to 8
Introduced	16.0.R1
Platforms	All

### **required**

Synopsis	Enter the <b>required</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">password</a> <a href="#">complexity-rules</a> <a href="#">required</a>
Tree	<a href="#">required</a>
Notes	The following elements are part of a choice: <b>credits</b> or <b>required</b> .
Introduced	16.0.R1
Platforms	All

### **lowercase number**

Synopsis	Number of lowercase letters required
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">password</a> <a href="#">complexity-rules</a> <a href="#">required</a> <a href="#">lowercase</a> <i>number</i>
Tree	<a href="#">lowercase</a>
Range	1 to 10
Introduced	16.0.R1
Platforms	All

### **numeric number**

Synopsis	Number of numeric characters required
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">password</a> <a href="#">complexity-rules</a> <a href="#">required</a> <a href="#">numeric</a> <i>number</i>
Tree	<a href="#">numeric</a>
Range	1 to 10
Introduced	16.0.R1
Platforms	All

### **special-character number**

Synopsis	Number of special characters required
----------	---------------------------------------

Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">password</a> <a href="#">complexity-rules</a> <a href="#">required</a> <a href="#">special-character</a> <i>number</i>
Tree	<a href="#">special-character</a>
Range	1 to 10
Introduced	16.0.R1
Platforms	All

### **uppercase** *number*

Synopsis	Number of uppercase letters required
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">password</a> <a href="#">complexity-rules</a> <a href="#">required</a> <a href="#">uppercase</a> <i>number</i>
Tree	<a href="#">uppercase</a>
Range	1 to 10
Introduced	16.0.R1
Platforms	All

### **hashing** *keyword*

Synopsis	Hashing algorithm for user passwords
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">password</a> <a href="#">hashing</a> <i>keyword</i>
Tree	<a href="#">hashing</a>
Options	bcrypt, sha2-pbkdf2, sha3-pbkdf2
Default	bcrypt
Introduced	20.7.R1
Platforms	All

### **history-size** *number*

Synopsis	Number of previous passwords to compare against
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">password</a> <a href="#">history-size</a> <i>number</i>
Tree	<a href="#">history-size</a>
Range	0 to 20
Introduced	16.0.R1
Platforms	All

**minimum-age** *number*

Synopsis	Minimum age required for a password before changing it
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">password</a> <i>minimum-age</i> <i>number</i>
Tree	<a href="#">minimum-age</a>
Range	0 to 86400
Units	seconds
Default	600
Introduced	16.0.R1
Platforms	All

**minimum-change** *number*

Synopsis	Minimum character differences between passwords
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">password</a> <i>minimum-change</i> <i>number</i>
Tree	<a href="#">minimum-change</a>
Range	1 to 20
Default	5
Introduced	16.0.R1
Platforms	All

**user** [[user-name](#)] *string*

Synopsis	Enter the <b>user</b> list instance
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">user</a> <i>string</i>
Tree	<a href="#">user</a>
Introduced	16.0.R1
Platforms	All

**[user-name]** *string*

Synopsis	Local user name
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">user</a> <i>string</i>
Tree	<a href="#">user</a>
String Length	1 to 32

Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

## **access**

Synopsis	Enter the <b>access</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">user</a> <i>string</i> <b>access</b>
Tree	<a href="#">access</a>
Introduced	16.0.R1
Platforms	All

## **console** *boolean*

Synopsis	Allow console port, Telnet, and SSH access
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">user</a> <i>string</i> <a href="#">access</a> <b>console</b> <i>boolean</i>
Tree	<a href="#">console</a>
Default	false
Introduced	16.0.R1
Platforms	All

## **ftp** *boolean*

Synopsis	Allow FTP access
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">user</a> <i>string</i> <a href="#">access</a> <b>ftp</b> <i>boolean</i>
Tree	<a href="#">ftp</a>
Default	false
Introduced	16.0.R1
Platforms	All

## **grpc** *boolean*

Synopsis	Allow gRPC access
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">user</a> <i>string</i> <a href="#">access</a> <b>grpc</b> <i>boolean</i>
Tree	<a href="#">grpc</a>

Default	false
Introduced	16.0.R1
Platforms	All

**li** *boolean*

Synopsis	Allow access to LI
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">user</a> <i>string</i> <a href="#">access</a> <b>li</b> <i>boolean</i>
Tree	<a href="#">li</a>
Default	false
Introduced	19.10.R1
Platforms	All

**netconf** *boolean*

Synopsis	Allow NETCONF access
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">user</a> <i>string</i> <a href="#">access</a> <b>netconf</b> <i>boolean</i>
Tree	<a href="#">netconf</a>
Default	false
Introduced	16.0.R1
Platforms	All

**snmp** *boolean*

Synopsis	Allow SNMP access
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">user</a> <i>string</i> <a href="#">access</a> <b>snmp</b> <i>boolean</i>
Tree	<a href="#">snmp</a>
Default	false
Introduced	16.0.R1
Platforms	All

**cli-engine** *keyword*

Synopsis	User level override for CLI engine access
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">user</a> <i>string</i> <a href="#">cli-engine</a> <i>keyword</i>

Tree	<a href="#">cli-engine</a>
Options	classic-cli, md-cli
Max. Instances	2
Notes	This element is ordered by the user.
Introduced	16.0.R1
Platforms	All

## console

Synopsis	Enter the <b>console</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">user</a> <i>string</i> <b>console</b>
Tree	<a href="#">console</a>
Introduced	16.0.R1
Platforms	All

## cannot-change-password *boolean*

Synopsis	Change password privileges
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">user</a> <i>string</i> <b>console</b> <b>cannot-change-password</b> <i>boolean</i>
Tree	<a href="#">cannot-change-password</a>
Default	false
Introduced	16.0.R1
Platforms	All

## login-exec (*sat-url* | *cflash-url* | *ftp-tftp-url* | *filename*)

Synopsis	File to execute when a user successfully logs in
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">user</a> <i>string</i> <b>console</b> <b>login-exec</b> ( <i>sat-url</i>   <i>cflash-url</i>   <i>ftp-tftp-url</i>   <i>filename</i> )
Tree	<a href="#">login-exec</a>
String Length	1 to 200
Introduced	16.0.R1
Platforms	All

**member reference**

Synopsis	User profiles for this user
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">user</a> <i>string</i> <a href="#">console</a> <a href="#">member</a> <i>reference</i>
Tree	<a href="#">member</a>
Reference	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">local-profiles</a> <a href="#">profile</a> <i>string</i>
Max. Instances	8
Notes	This element is ordered by the user.
Introduced	16.0.R1
Platforms	All

**new-password-at-login boolean**

Synopsis	Prompt a user to change password at next console login
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">user</a> <i>string</i> <a href="#">console</a> <a href="#">new-password-at-login</a> <i>boolean</i>
Tree	<a href="#">new-password-at-login</a>
Default	false
Introduced	16.0.R1
Platforms	All

**home-directory (sat-url | cflash-without-slot-url)**

Synopsis	Home directory for the user
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">user</a> <i>string</i> <a href="#">home-directory</a> ( <i>sat-url</i>   <i>cflash-without-slot-url</i> )
Tree	<a href="#">home-directory</a>
Description	<p>This command configures the home directory of the user for file access. Files can be accessed locally by CLI <b>file</b> commands and output modifiers such as &gt; (file redirect), or remotely via FTP and SCP. If the home directory does not exist, a warning message is displayed when the user logs in.</p> <p>When <b>restricted-to-home</b> is configured, file access is denied unless the <b>home-directory</b> is configured and the directory is created by an administrator.</p>
String Length	1 to 200
Introduced	16.0.R1

Platforms All

### **password** *string*

Synopsis User password for console and FTP access

Context **configure** [system](#) [security](#) [user-params](#) [local-user](#) [user](#) *string* **password** *string*

Tree [password](#)

String Length 3 to 136

Notes This element is mandatory.

Introduced 16.0.R1

Platforms All

### **public-keys**

Synopsis Enter the **public-keys** context

Context **configure** [system](#) [security](#) [user-params](#) [local-user](#) [user](#) *string* **public-keys**

Tree [public-keys](#)

Description Commands in this context configure public keys for SSH.

Introduced 16.0.R1

Platforms All

### **ecdsa**

Synopsis Enter the **ecdsa** context

Context **configure** [system](#) [security](#) [user-params](#) [local-user](#) [user](#) *string* [public-keys](#) **ecdsa**

Tree [ecdsa](#)

Description Commands in this context configure Elliptic Curve Digital Signature Algorithm (ECDSA) public keys.

Introduced 16.0.R1

Platforms All

### **ecdsa-key** [[ecdsa-public-key-id](#)] *number*

Synopsis Enter the **ecdsa-key** list instance

Context **configure** [system](#) [security](#) [user-params](#) [local-user](#) [user](#) *string* [public-keys](#) [ecdsa](#) **ecdsa-key** *number*

Tree	<a href="#">ecdsa-key</a>
Description	Commands in this context configure an ECDSA public key and associate the key with a username. A user can associate multiple public keys with a username. The key ID identifies these keys for the user.
Introduced	16.0.R1
Platforms	All

### **[ecdsa-public-key-id] *number***

Synopsis	ECDSA public key identifier
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">user</a> <i>string</i> <a href="#">public-keys</a> <a href="#">ecdsa</a> <a href="#">ecdsa-key</a> <i>number</i>

Introduced	16.0.R1
Platforms	All

### **key-value *string***

Synopsis	ECDSA public key value
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">user</a> <i>string</i> <a href="#">public-keys</a> <a href="#">ecdsa</a> <a href="#">ecdsa-key</a> <i>number</i> <a href="#">key-value</a> <i>string</i>
Tree	<a href="#">key-value</a>
Description	This command configures a value for the ECDSA public key. The public key must be enclosed in quotation marks. For ECDSA, the key is between 1 and 1024 bits.
String Length	1 to 255

Introduced	16.0.R1
Platforms	All

**rsa**

Synopsis	Enter the <b>rsa</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">user</a> <i>string</i> <a href="#">public-keys</a> <a href="#">rsa</a>
Tree	<a href="#">rsa</a>
Description	Commands in this context configure RSA public keys.
Introduced	16.0.R1
Platforms	All

**rsa-key** [[rsa-public-key-id](#)] *number*

Synopsis	Enter the <b>rsa-key</b> list instance
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">user</a> <i>string</i> <a href="#">public-keys</a> <a href="#">rsa</a> <a href="#">rsa-key</a> <i>number</i>
Tree	<a href="#">rsa-key</a>
Description	Commands in this context configure an RSA public key and associate the key with a username. A user can associate multiple public keys with a username. The key ID identifies these keys for the user.
Introduced	16.0.R1
Platforms	All

**[rsa-public-key-id]** *number*

Synopsis	RSA public key identifier
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">user</a> <i>string</i> <a href="#">public-keys</a> <a href="#">rsa</a> <a href="#">rsa-key</a> <i>number</i>
Tree	<a href="#">rsa-key</a>
Range	1 to 32
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

**description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">user</a> <i>string</i> <a href="#">public-keys</a> <a href="#">rsa</a> <a href="#">rsa-key</a> <a href="#">number</a> <a href="#">description</a> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R1
Platforms	All

**key-value** *string*

Synopsis	RSA public key value
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">user</a> <i>string</i> <a href="#">public-keys</a> <a href="#">rsa</a> <a href="#">rsa-key</a> <a href="#">number</a> <a href="#">key-value</a> <i>string</i>
Tree	<a href="#">key-value</a>
Description	This command configures a value for the RSA public key. The public key must be enclosed in quotation marks. For RSA, the key is between 768 and 4096 bits.
String Length	1 to 800
Introduced	16.0.R1
Platforms	All

**restricted-to-home** *boolean*

Synopsis	Restrict file access to the home directory of the user
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">user</a> <i>string</i> <a href="#">restricted-to-home</a> <i>boolean</i>
Tree	<a href="#">restricted-to-home</a>
Description	<p>When configured to <b>true</b>, the router denies the user from accessing files outside of their home directory. Files can be accessed locally by CLI file commands and output modifiers such as <b>&gt;</b> (file redirect), or remotely via FTP and SCP. The system denies all configuration save operations (such as <b>admin save</b>) via any management interface (such as CLI and NETCONF) unless <b>save-when-restricted</b> is enabled.</p> <p>File access is denied unless a home directory is configured and the directory is created by an administrator.</p> <p>When configured to <b>false</b>, the router permits the user to access all files on the system.</p>
Default	false
Introduced	16.0.R1

Platforms All

### **save-when-restricted** *boolean*

Synopsis Save configurations when the user is restricted to home

Context **configure** [system](#) [security](#) [user-params](#) [local-user](#) [user](#) *string* **save-when-restricted** *boolean*

Tree [save-when-restricted](#)

Description When configured to **true**, the system permits configuration save operations for all configuration regions (such as bof and configure) via any management interface (such as CLI and NETCONF) even if **restricted-to-home** is enabled.

The configuration for each region can be saved with **admin save** CLI commands or when committed over NETCONF and gRPC.

When configured to **false**, the system denies saving the configuration when **restricted-to-home** is enabled, unless the home directory of the user includes the location of the saved configuration file.

Default false

Introduced 22.10.R1

Platforms All

### **snmp**

Synopsis Enter the **snmp** context

Context **configure** [system](#) [security](#) [user-params](#) [local-user](#) [user](#) *string* **snmp**

Tree [snmp](#)

Introduced 16.0.R1

Platforms All

### **authentication**

Synopsis Enable the **authentication** context

Context **configure** [system](#) [security](#) [user-params](#) [local-user](#) [user](#) *string* **snmp** **authentication**

Tree [authentication](#)

Description Commands in this context configure the SNMPv3 authentication and privacy protocols for the user to communicate with the router. The keys are stored in an encrypted format in the configuration.

The keys configured with these commands must be localized keys, which are a hash of the SNMP engine ID and a password. The password is not entered directly in this

command. Use the **tools perform system management-interface snmp generate-key** command to generate localized authentication and privacy keys.

If authentication is not configured, only the username is required to allow and authenticate SNMPv3 operations.

Introduced	16.0.R1
Platforms	All

### **authentication-key** *string*

Synopsis	Localized authentication key
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">user</a> <i>string</i> <a href="#">snmp</a> <a href="#">authentication</a> <a href="#">authentication-key</a> <i>string</i>
Tree	<a href="#">authentication-key</a>
Description	This command specifies the authentication key for the authentication protocol. The key must be a localized key, which is a hash of the SNMP engine ID and a password. The password is not entered directly in this command. Use the <b>tools perform system management-interface snmp generate-key</b> command to generate a localized authentication key.
String Length	1 to 115
Introduced	16.0.R1
Platforms	All

### **authentication-protocol** *keyword*

Synopsis	Authentication protocol
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">user</a> <i>string</i> <a href="#">snmp</a> <a href="#">authentication</a> <a href="#">authentication-protocol</a> <i>keyword</i>
Tree	<a href="#">authentication-protocol</a>
Options	hmac-md5-96, hmac-sha1-96, hmac-sha2-224, hmac-sha2-256, hmac-sha2-384, hmac-sha2-512
Introduced	16.0.R1
Platforms	All

### **privacy**

Synopsis	Enable the <b>privacy</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">user</a> <i>string</i> <a href="#">snmp</a> <a href="#">authentication</a> <a href="#">privacy</a>

Tree	<a href="#">privacy</a>
Introduced	16.0.R1
Platforms	All

### **privacy-key string**

Synopsis	Localized privacy key
Context	<b>configure</b> <a href="#">system security user-params local-user user string snmp authentication privacy privacy-key string</a>
Tree	<a href="#">privacy-key</a>
Description	This command specifies the privacy key for the privacy protocol. The key must be a localized key, which is a hash of the SNMP engine ID and a password. The password is not entered directly in this command. Use the <b>tools perform system management-interface snmp generate-key</b> command to generate a localized privacy key.
String Length	1 to 71
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

### **privacy-protocol keyword**

Synopsis	Privacy protocol
Context	<b>configure</b> <a href="#">system security user-params local-user user string snmp authentication privacy privacy-protocol keyword</a>
Tree	<a href="#">privacy-protocol</a>
Options	cbc-des, cfb128-aes-128, cfb128-aes-192, cfb128-aes-256
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

### **group string**

Synopsis	User to associate with a group name
Context	<b>configure</b> <a href="#">system security user-params local-user user string snmp group string</a>
Tree	<a href="#">group</a>
String Length	1 to 32

Introduced	16.0.R1
Platforms	All

### ssh-authentication-method

Synopsis	Enter the <b>ssh-authentication-method</b> context
Context	<b>configure</b> <a href="#">system security user-params local-user user</a> <i>string</i> <a href="#">ssh-authentication-method</a>
Tree	<a href="#">ssh-authentication-method</a>
Introduced	23.7.R1
Platforms	All

### client

Synopsis	Enter the <b>client</b> context
Context	<b>configure</b> <a href="#">system security user-params local-user user</a> <i>string</i> <a href="#">ssh-authentication-method client</a>
Tree	<a href="#">client</a>
Introduced	23.10.R3
Platforms	All

### public-key-only *keyword*

Synopsis	Public key only SSH authentication for this user
Context	<b>configure</b> <a href="#">system security user-params local-user user</a> <i>string</i> <a href="#">ssh-authentication-method client public-key-only</a> <i>keyword</i>
Tree	<a href="#">public-key-only</a>
Description	<p>This command configures the authentication method accepted for the SSH session for the specified user. This user-level configuration overrides the system-level configuration defined in the <b>configure system security ssh authentication-method public-key-only</b> command.</p> <p>When unconfigured, the command inherits the setting from the system level command.</p> <p>The command options are:</p> <ul style="list-style-type: none"> <li>• <b>true</b> — accept only public key client authentication for the SSH server</li> <li>• <b>false</b> — accept public key or password client authentication for the SSH server. If <b>interactive-authentication</b> is configured to <b>true</b> in the <b>configure system security aaa remote-servers radius</b> or <b>configure system security aaa remote-servers tacplus</b> context, the system also accepts interactive keyboard authentication.</li> </ul>

Options	false, true
Introduced	23.10.R3
Platforms	All

## server

Synopsis	Enter the <b>server</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">user</a> <i>string</i> <a href="#">ssh-authentication-method</a> <b>server</b>
Tree	<a href="#">server</a>
Introduced	23.7.R1
Platforms	All

## public-key-only *keyword*

Synopsis	Public key only SSH authentication for this user
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">user</a> <i>string</i> <a href="#">ssh-authentication-method</a> <b>server</b> <a href="#">public-key-only</a> <i>keyword</i>
Tree	<a href="#">public-key-only</a>
Description	<p>This command configures the authentication method accepted for the SSH session for the specified user. This user-level configuration overrides the system-level configuration defined in the <b>configure system security ssh authentication-method public-key-only</b> command.</p> <p>When unconfigured, the command inherits the setting from the system level command. The command options are:</p> <ul style="list-style-type: none"> <li>• <b>true</b> — accept only public key client authentication for the SSH server</li> <li>• <b>false</b> — accept public key or password client authentication for the SSH server. If <b>interactive-authentication</b> is configured to <b>true</b> in the <b>configure system security aaa remote-servers radius</b> or <b>configure system security aaa remote-servers tacplus</b> context, the system also accepts interactive keyboard authentication.</li> </ul>
Options	false, true
Introduced	23.7.R1
Platforms	All

## vprn-network-exceptions

Synopsis	Enable the <b>vprn-network-exceptions</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">vprn-network-exceptions</a>

Tree	<a href="#">vprn-network-exceptions</a>
Description	<p>Commands in this context configure the rate limiting attributes for processing packets with label TTL expiry received within an LSP shortcut or VPRN instances in the system and from all network IP interfaces. This includes labeled user and control plan packets, ping, and traceroute packets within GRT and VPRN, and ICMP replies.</p> <p>These commands do not rate limit MPLS or service OAM packets.</p>
Introduced	16.0.R1
Platforms	All

### **count** *number*

Synopsis	Limit of exception messages received
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">vprn-network-exceptions</a> <b>count</b> <i>number</i>
Tree	<a href="#">count</a>
Description	This command specifies the threshold limit of exception messages. If the threshold value is exceeded within the configured time interval, packets are dropped.
Range	10 to 1000
Default	100
Introduced	16.0.R1
Platforms	All

### **window** *number*

Synopsis	Time interval to measure exception messages
Context	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">vprn-network-exceptions</a> <b>window</b> <i>number</i>
Tree	<a href="#">window</a>
Description	This command configures the time interval within which exception messages are counted. If the threshold value is exceeded within the configured time interval, packets are dropped.
Range	1 to 60
Units	seconds
Default	10
Introduced	16.0.R1
Platforms	All

**selective-fib** *boolean*

Synopsis	FIB assigned to the system
Context	<b>configure</b> <a href="#">system</a> <a href="#">selective-fib</a> <i>boolean</i>
Tree	<a href="#">selective-fib</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**software-repository** [[repository-name](#)] *string*

Synopsis	Enter the <b>software-repository</b> list instance
Context	<b>configure</b> <a href="#">system</a> <a href="#">software-repository</a> <i>string</i>
Tree	<a href="#">software-repository</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**[repository-name]** *string*

Synopsis	Software repository name
Context	<b>configure</b> <a href="#">system</a> <a href="#">software-repository</a> <i>string</i>
Tree	<a href="#">software-repository</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">system</a> <a href="#">software-repository</a> <i>string</i> <a href="#">description</a> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **primary-location** *string*

Synopsis	Primary location for files in the software repository
Context	<b>configure</b> <a href="#">system</a> <a href="#">software-repository</a> <i>string</i> <a href="#">primary-location</a> <i>string</i>
Tree	<a href="#">primary-location</a>
String Length	1 to 180
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **secondary-location** *string*

Synopsis	Secondary location for files in the software repository
Context	<b>configure</b> <a href="#">system</a> <a href="#">software-repository</a> <i>string</i> <a href="#">secondary-location</a> <i>string</i>
Tree	<a href="#">secondary-location</a>
String Length	1 to 180
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **tertiary-location** *string*

Synopsis	Tertiary location for files in the software repository
Context	<b>configure</b> <a href="#">system</a> <a href="#">software-repository</a> <i>string</i> <a href="#">tertiary-location</a> <i>string</i>
Tree	<a href="#">tertiary-location</a>
String Length	1 to 180
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **switch-fabric**

Synopsis	Enter the <b>switch-fabric</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">switch-fabric</a>
Tree	<a href="#">switch-fabric</a>
Description	Commands in this context configure system level attributes related to the switch fabric.
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR-7, 7750 SR-12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS

**failure-recovery**

Synopsis	Enter the <b>failure-recovery</b> context
Context	<b>configure system switch-fabric failure-recovery</b>
Tree	<a href="#">failure-recovery</a>
Description	Commands in this context configure the attributes related to the automatic switch fabric recovery process. This process is triggered when there are two resets of an IOM/XCM due to ICC failures within a small time frame. The recovery process involves the sequential resetting of SFM in case the issues are due to one of the SFM in the ICC communication path. As the final step in the recovery process, a CPM switchover is triggered to reset the active CPM.
Introduced	21.2.R1
Platforms	7450 ESS, 7750 SR-7, 7750 SR-12e, 7950 XRS

**admin-state** *keyword*

Synopsis	Administrative state of the failure recovery process
Context	<b>configure system switch-fabric failure-recovery admin-state</b> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	21.2.R1
Platforms	7450 ESS, 7750 SR-7, 7750 SR-12e, 7950 XRS

**sfm-loss-threshold** *number*

Synopsis	Number of SFMs that can fail before SFM overload state
Context	<b>configure system switch-fabric sfm-loss-threshold</b> <i>number</i>
Tree	<a href="#">sfm-loss-threshold</a>
Description	This command specifies the number of SFMs that are permitted to fail before the system goes into SFM overload state.  The default value for the 7750 SR-7s is 1 and the default value for the 7750 SR-14s is 2. Users can select the SFM limit based on the number possible for the system minus one. For the 7750 SR-7s, the limit is 3 and the limit for the 7750 SR-14s is 7.
Range	1 to 7
Introduced	20.5.R1
Platforms	7750 SR-7s, 7750 SR-14s

**telemetry**

Synopsis	Enter the <b>telemetry</b> context
Context	<b>configure system telemetry</b>
Tree	<b>telemetry</b>
Description	Commands in this context configure the parameters for the dial-out telemetry functionality.
Introduced	20.2.R1
Platforms	All

**destination-group [name] string**

Synopsis	Enter the <b>destination-group</b> list instance
Context	<b>configure system telemetry destination-group string</b>
Tree	<b>destination-group</b>
Description	Commands in this context configure parameters for destination groups.
Max. Instances	225
Introduced	20.5.R1
Platforms	All

**[name] string**

Synopsis	Destination group name
Context	<b>configure system telemetry destination-group string</b>
Tree	<b>destination-group</b>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	20.5.R1
Platforms	All

**allow-unsecure-connection**

Synopsis	Allow connection without secured transport protocol
Context	<b>configure system telemetry destination-group string allow-unsecure-connection</b>

Tree	<a href="#">allow-unsecure-connection</a>
Description	When configured, this command allows an unsecured connection to remote managers; TCP connections are not encrypted, including username and password information.
Notes	The following elements are part of a choice: <b>allow-unsecure-connection</b> or <b>tls-client-profile</b> .
Introduced	20.5.R1
Platforms	All

### **description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">system telemetry destination-group</a> <i>string</i> <a href="#">description</a> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	20.5.R1
Platforms	All

### **destination** [[address](#)] (*ipv4-address-no-zone* | *ipv6-address-no-zone* | *fully-qualified-domain-name*) [port](#) *number*

Synopsis	Enter the <b>destination</b> list instance
Context	<b>configure</b> <a href="#">system telemetry destination-group</a> <i>string</i> <a href="#">destination</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i>   <i>fully-qualified-domain-name</i> ) <a href="#">port</a> <i>number</i>
Tree	<a href="#">destination</a>
Max. Instances	4
Notes	This element is ordered by the user.
Introduced	20.5.R1
Platforms	All

### **[address]** (*ipv4-address-no-zone* | *ipv6-address-no-zone* | *fully-qualified-domain-name*)

Synopsis	Address of the destination within the destination group
Context	<b>configure</b> <a href="#">system telemetry destination-group</a> <i>string</i> <a href="#">destination</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i>   <i>fully-qualified-domain-name</i> ) <a href="#">port</a> <i>number</i>
Tree	<a href="#">destination</a>

---

String Length	1 to 255
Notes	This element is part of a list key.
Introduced	20.5.R1
Platforms	All

### **port number**

Synopsis	TCP port number for the destination
Context	<b>configure system telemetry destination-group</b> <i>string destination (ipv4-address-no-zone   ipv6-address-no-zone   fully-qualified-domain-name)</i> <b>port number</b>
Tree	<a href="#">destination</a>
Range	0   1 to 65535
Notes	This element is part of a list key.
Introduced	20.5.R1
Platforms	All

### **router-instance string**

Synopsis	Router name or VPRN service name
Context	<b>configure system telemetry destination-group</b> <i>string destination (ipv4-address-no-zone   ipv6-address-no-zone   fully-qualified-domain-name)</i> <b>port number</b> <b>router-instance string</b>
Tree	<a href="#">router-instance</a>
Introduced	20.5.R1
Platforms	All

### **tcp-keepalive**

Synopsis	Enter the <b>tcp-keepalive</b> context
Context	<b>configure system telemetry destination-group</b> <i>string tcp-keepalive</i>
Tree	<a href="#">tcp-keepalive</a>
Introduced	20.5.R1
Platforms	All

### **admin-state keyword**

Synopsis	Administrative state of the TCP keep-alive algorithm
----------	--

Context	<b>configure system telemetry destination-group</b> <i>string tcp-keepalive admin-state keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	20.5.R1
Platforms	All

### **idle-time** *number*

Synopsis	Time until the first TCP keepalive probe is sent
Context	<b>configure system telemetry destination-group</b> <i>string tcp-keepalive idle-time number</i>
Tree	<a href="#">idle-time</a>
Range	1 to 100000
Units	seconds
Default	600
Introduced	20.5.R1
Platforms	All

### **interval** *number*

Synopsis	Time between TCP keepalive probes
Context	<b>configure system telemetry destination-group</b> <i>string tcp-keepalive interval number</i>
Tree	<a href="#">interval</a>
Range	1 to 100000
Units	seconds
Default	15
Introduced	20.5.R1
Platforms	All

### **retries** *number*

Synopsis	Number of probe retries before closing the connection
Context	<b>configure system telemetry destination-group</b> <i>string tcp-keepalive retries number</i>
Tree	<a href="#">retries</a>

Description	This command configures the number of missed TCP keepalive probes before closing the TCP connection and attempting to reach the other destinations within the same destination group.
Range	3 to 100
Default	4
Introduced	20.5.R1
Platforms	All

### **tls-client-profile** *reference*

Synopsis	TLS client profile assigned to the destination group
Context	<b>configure</b> <a href="#">system</a> <a href="#">telemetry</a> <a href="#">destination-group</a> <i>string</i> <b>tls-client-profile</b> <i>reference</i>
Tree	<a href="#">tls-client-profile</a>
Reference	<b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">tls</a> <a href="#">client-tls-profile</a> <i>string</i>
Notes	The following elements are part of a choice: <b>allow-unsecure-connection</b> or <b>tls-client-profile</b> .
Introduced	20.5.R1
Platforms	All

### **notification-bundling**

Synopsis	Enter the <b>notification-bundling</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">telemetry</a> <a href="#">notification-bundling</a>
Tree	<a href="#">notification-bundling</a>
Description	Commands in this context configure the bundling of multiple notifications into one telemetry message.
Introduced	21.10.R1
Platforms	All

### **admin-state** *keyword*

Synopsis	Administrative state of notification bundling
Context	<b>configure</b> <a href="#">system</a> <a href="#">telemetry</a> <a href="#">notification-bundling</a> <b>admin-state</b> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable

---

Introduced	21.10.R1
Platforms	All

### **max-msg-count** *number*

Synopsis	Maximum notifications count in telemetry message bundle
Context	<b>configure</b> <a href="#">system</a> <a href="#">telemetry</a> <a href="#">notification-bundling</a> <b>max-msg-count</b> <i>number</i>
Tree	<a href="#">max-msg-count</a>
Range	2 to 1000
Default	100
Introduced	21.10.R1
Platforms	All

### **max-time-granularity** *number*

Synopsis	Maximum interval when bundling of notifications occurs
Context	<b>configure</b> <a href="#">system</a> <a href="#">telemetry</a> <a href="#">notification-bundling</a> <b>max-time-granularity</b> <i>number</i>
Tree	<a href="#">max-time-granularity</a>
Description	This command sets the maximum time interval during which telemetry notifications are bundled. All bundled notifications have the same timestamp, which is the timestamp of the bundle.
Range	1 to 1000
Units	milliseconds
Default	100
Introduced	21.10.R1
Platforms	All

### **persistent-subscriptions**

Synopsis	Enter the <b>persistent-subscriptions</b> context
Context	<b>configure</b> <a href="#">system</a> <a href="#">telemetry</a> <b>persistent-subscriptions</b>
Tree	<a href="#">persistent-subscriptions</a>
Introduced	20.5.R1
Platforms	All

**delay-on-boot** *number*

Synopsis	Delay for persistent subscriptions after system boot
Context	<b>configure</b> <a href="#">system</a> <a href="#">telemetry</a> <a href="#">persistent-subscriptions</a> <b>delay-on-boot</b> <i>number</i>
Tree	<a href="#">delay-on-boot</a>
Description	This command configures the delay timer for gRPC telemetry persistent subscriptions. When the timer expires, gRPC telemetry persistent subscriptions become operational and connections are initiated. This delay prevents the system from trying to establish gRPC persistent subscriptions while it is still converging.  When no delay is configured, gRPC telemetry persistent subscriptions are initiated after the system boots and gRPC becomes operational.
Range	1 to 3600
Units	seconds
Introduced	23.10.R1
Platforms	All

**subscription** [*name*] *string*

Synopsis	Enter the <b>subscription</b> list instance
Context	<b>configure</b> <a href="#">system</a> <a href="#">telemetry</a> <a href="#">persistent-subscriptions</a> <b>subscription</b> <i>string</i>
Tree	<a href="#">subscription</a>
Max. Instances	225
Introduced	20.5.R1
Platforms	All

**[name]** *string*

Synopsis	Persistent subscription name
Context	<b>configure</b> <a href="#">system</a> <a href="#">telemetry</a> <a href="#">persistent-subscriptions</a> <b>subscription</b> <i>string</i>
Tree	<a href="#">subscription</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	20.5.R1
Platforms	All

**admin-state** *keyword*

Synopsis	Administrative state of the persistent subscription
Context	<b>configure</b> <a href="#">system</a> <a href="#">telemetry</a> <a href="#">persistent-subscriptions</a> <a href="#">subscription</a> <i>string</i> <b>admin-state</b> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	20.5.R1
Platforms	All

**description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">system</a> <a href="#">telemetry</a> <a href="#">persistent-subscriptions</a> <a href="#">subscription</a> <i>string</i> <b>description</b> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	20.5.R1
Platforms	All

**destination-group** *reference*

Synopsis	Name of the destination group used in the subscription
Context	<b>configure</b> <a href="#">system</a> <a href="#">telemetry</a> <a href="#">persistent-subscriptions</a> <a href="#">subscription</a> <i>string</i> <b>destination-group</b> <i>reference</i>
Tree	<a href="#">destination-group</a>
Reference	<b>configure</b> <a href="#">system</a> <a href="#">telemetry</a> <a href="#">destination-group</a> <i>string</i>
Introduced	20.5.R1
Platforms	All

**encoding** *keyword*

Synopsis	Encoding used for telemetry notifications
Context	<b>configure</b> <a href="#">system</a> <a href="#">telemetry</a> <a href="#">persistent-subscriptions</a> <a href="#">subscription</a> <i>string</i> <b>encoding</b> <i>keyword</i>
Tree	<a href="#">encoding</a>

Description	This command specifies the encoding used for telemetry notifications as defined by the gNMI OpenConfig standard.
Options	json – JSON encoded text bytes – Encoded according to gnmi.schemas proto – Encoded with scalar TypedValue values json-ietf – JSON encoded text as per RFC 7951
Default	json
Introduced	20.5.R1
Platforms	All

### **local-source-address** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	Local IP address of packets sent from the source
Context	<b>configure</b> <a href="#">system</a> <a href="#">telemetry</a> <a href="#">persistent-subscriptions</a> <a href="#">subscription</a> <i>string</i> <b>local-source-address</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	<a href="#">local-source-address</a>
Introduced	20.5.R1
Platforms	All

### **mode** *keyword*

Synopsis	Mode for telemetry notifications
Context	<b>configure</b> <a href="#">system</a> <a href="#">telemetry</a> <a href="#">persistent-subscriptions</a> <a href="#">subscription</a> <i>string</i> <b>mode</b> <i>keyword</i>
Tree	<a href="#">mode</a>
Description	This command specifies the subscription path mode for telemetry notifications sent out for the persistent subscription.
Options	target-defined, on-change, sample
Introduced	20.5.R1
Platforms	All

### **originated-qos-marking** *keyword*

Synopsis	QoS marking used for telemetry notification packets
Context	<b>configure</b> <a href="#">system</a> <a href="#">telemetry</a> <a href="#">persistent-subscriptions</a> <a href="#">subscription</a> <i>string</i> <b>originated-qos-marking</b> <i>keyword</i>
Tree	<a href="#">originated-qos-marking</a>
Options	be, cp1, cp2, cp3, cp4, cp5, cp6, cp7, cs1, cp9, af11, cp11, af12, cp13, af13, cp15, cs2, cp17, af21, cp19, af22, cp21, af23, cp23, cs3, cp25, af31, cp27, af32, cp29, af33, cp31,

cs4, cp33, af41, cp35, af42, cp37, af43, cp39, cs5, cp41, cp42, cp43, cp44, cp45, ef, cp47, nc1, cp49, cp50, cp51, cp52, cp53, cp54, cp55, nc2, cp57, cp58, cp59, cp60, cp61, cp62, cp63

Introduced 20.5.R1  
Platforms All

### **sample-interval** *number*

Synopsis Sampling interval for the persistent subscription

Context **configure** [system](#) [telemetry](#) [persistent-subscriptions](#) [subscription](#) *string* **sample-interval** *number*

Tree [sample-interval](#)

Description This command configures the sampling interval for the persistent subscription. The interval applies only in sampling or target-defined modes.

Range 1000 to 18446744073709551615

Units milliseconds

Default 10000

Introduced 20.5.R1

Platforms All

### **sensor-group** *reference*

Synopsis Sensor group used in the persistent subscription

Context **configure** [system](#) [telemetry](#) [persistent-subscriptions](#) [subscription](#) *string* **sensor-group** *reference*

Tree [sensor-group](#)

Description This command specifies the sensor group to be used in the persistent subscription. If no valid paths exist in the sensor group, the configuration is accepted, however, no gRPC connection is established when persistent subscription is activated.

Reference **configure** [system](#) [telemetry](#) [sensor-groups](#) [sensor-group](#) *string*

Introduced 20.5.R1

Platforms All

### **sensor-groups**

Synopsis Enter the **sensor-groups** context

Context **configure** [system](#) [telemetry](#) [sensor-groups](#)

---

Tree	<a href="#">sensor-groups</a>
Introduced	20.5.R1

### **[cflash-id]** *string*

Synopsis cflash device name monitored for capacity  
 Context **configure** [system](#) [thresholds](#) [cflash-cap-alarm-percent](#) *string*  
 Tree [cflash-cap-alarm-percent](#)  
 String Length 1 to 200  
 Notes This element is part of a list key.  
 Introduced 16.0.R1  
 Platforms All

### **falling-threshold** *number*

Synopsis Falling threshold for the sampled statistic  
 Context **configure** [system](#) [thresholds](#) [cflash-cap-alarm-percent](#) *string* [falling-threshold](#) *number*  
 Tree [falling-threshold](#)  
 Description This command specifies a falling threshold for the sampled statistic. When the current sampled value is less than or equal to this threshold, and the value at the last sampling interval was greater than this threshold, a single threshold-crossing event is generated. A single threshold-crossing event is also generated if the first sample taken is less than or equal to this threshold and the associated **startup-alarm** command is equal to the **falling** or **either** values.  
 After a falling threshold-crossing event is generated, another such event is not generated until the sampled value rises above this threshold and reaches greater than or equal to the **rising-threshold** command.  
 Range 0 to 100  
 Units percent  
 Introduced 16.0.R4  
 Platforms All

### **interval** *number*

Synopsis Polling period over which data is sampled and compared  
 Context **configure** [system](#) [thresholds](#) [cflash-cap-alarm-percent](#) *string* [interval](#) *number*  
 Tree [interval](#)

Description	This command specifies the polling interval over which the data is sampled and compared with the rising and falling thresholds.
Range	1 to 2147483647
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

### **rising-threshold** *number*

Synopsis	Rising threshold for the sampled statistic
Context	<b>configure</b> <a href="#">system thresholds cflash-cap-alarm-percent</a> <i>string</i> <a href="#">rising-threshold</a> <i>number</i>
Tree	<a href="#">rising-threshold</a>
Description	<p>This command specifies a rising threshold for the sampled statistic. When the current sampled value is greater than or equal to this threshold, and the value at the last sampling interval was less than this threshold, a single threshold-crossing event is generated. A single threshold crossing event is also generated if the first sample taken is greater than or equal to this threshold and the associated <b>startup-alarm</b> command is equal to the <b>rising</b> or <b>either</b> values.</p> <p>After a rising threshold-crossing event is generated, another such event is not generated until the sampled value falls below this threshold and reaches less than or equal the <b>falling-threshold</b> command.</p>
Range	0 to 100
Units	percent
Notes	This element is mandatory.
Introduced	16.0.R4
Platforms	All

### **rmon-event-type** *keyword*

Synopsis	Notification type specifying action when event occurs
Context	<b>configure</b> <a href="#">system thresholds cflash-cap-alarm-percent</a> <i>string</i> <a href="#">rmon-event-type</a> <i>keyword</i>
Tree	<a href="#">rmon-event-type</a>
Options	none, log, trap, both
Default	both
Introduced	16.0.R1
Platforms	All

**startup-alarm** *keyword*

Synopsis	Alarm type when the alarm is first created
Context	<b>configure</b> <b>system</b> <b>thresholds</b> <b>cflash-cap-alarm-percent</b> <i>string</i> <b>startup-alarm</b> <i>keyword</i>
Tree	<b>startup-alarm</b>
Description	This command specifies the alarm type that may be sent when this alarm is first created. If the first sample is greater than or equal to the rising threshold value and <b>startup-alarm</b> is equal to <b>rising</b> or <b>either</b> , a single rising threshold crossing event is generated. If the first sample is less than or equal to the falling threshold value and <b>startup-alarm</b> is equal to <b>falling</b> or <b>either</b> , a single falling threshold crossing event is generated.
Options	rising, falling, either
Default	either
Introduced	16.0.R1
Platforms	All

**cflash-cap-warn-percent** [**cflash-id**] *string*

Synopsis	Enter the <b>cflash-cap-warn-percent</b> list instance
Context	<b>configure</b> <b>system</b> <b>thresholds</b> <b>cflash-cap-warn-percent</b> <i>string</i>
Tree	<b>cflash-cap-warn-percent</b>
Description	Commands in this context configure the capacity monitoring of the compact flash. The usage is monitored as a percentage of the capacity of the compact flash. The severity level is warning. Both a rising and falling threshold can be specified.
Introduced	16.0.R1
Platforms	All

**[cflash-id]** *string*

Synopsis	cflash device name monitored for capacity
Context	<b>configure</b> <b>system</b> <b>thresholds</b> <b>cflash-cap-warn-percent</b> <i>string</i>
Tree	<b>cflash-cap-warn-percent</b>
String Length	1 to 200
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

### **falling-threshold** *number*

Synopsis	Falling threshold for the sampled statistic
Context	<b>configure</b> <b>system</b> <b>thresholds</b> <b>cflash-cap-warn-percent</b> <i>string</i> <b>falling-threshold</b> <i>number</i>
Tree	<b>falling-threshold</b>
Description	<p>This command specifies a falling threshold for the sampled statistic. When the current sampled value is less than or equal to this threshold, and the value at the last sampling interval was greater than this threshold, a single threshold-crossing event is generated. A single threshold-crossing event is also generated if the first sample taken is less than or equal to this threshold and the associated <b>startup-alarm</b> command is equal to the <b>falling</b> or <b>either</b> values.</p> <p>After a falling threshold-crossing event is generated, another such event is not generated until the sampled value rises above this threshold and reaches greater than or equal to the <b>rising-threshold</b> command.</p>
Range	0 to 100
Units	percent
Introduced	16.0.R4
Platforms	All

### **interval** *number*

Synopsis	Polling period over which data is sampled and compared
Context	<b>configure</b> <b>system</b> <b>thresholds</b> <b>cflash-cap-warn-percent</b> <i>string</i> <b>interval</b> <i>number</i>
Tree	<b>interval</b>
Description	This command specifies the polling interval over which the data is sampled and compared with the rising and falling thresholds.
Range	1 to 2147483647
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

### **rising-threshold** *number*

Synopsis	Rising threshold for the sampled statistic
Context	<b>configure</b> <b>system</b> <b>thresholds</b> <b>cflash-cap-warn-percent</b> <i>string</i> <b>rising-threshold</b> <i>number</i>
Tree	<b>rising-threshold</b>
Description	This command specifies a rising threshold for the sampled statistic. When the current sampled value is greater than or equal to this threshold, and the value at the last

sampling interval was less than this threshold, a single threshold-crossing event is generated. A single threshold crossing event is also generated if the first sample taken is greater than or equal to this threshold and the associated **startup-alarm** command is equal to the **rising** or **either** values.

After a rising threshold-crossing event is generated, another such event is not generated until the sampled value falls below this threshold and reaches less than or equal the **falling-threshold** command.

Range	0 to 100
Units	percent
Notes	This element is mandatory.
Introduced	16.0.R4
Platforms	All

### **rmon-event-type** *keyword*

Synopsis	Notification type specifying action when event occurs
Context	<b>configure</b> <a href="#">system</a> <a href="#">thresholds</a> <a href="#">cflash-cap-warn-percent</a> <i>string</i> <b>rmon-event-type</b> <i>keyword</i>
Tree	<a href="#">rmon-event-type</a>
Options	none, log, trap, both
Default	both
Introduced	16.0.R1
Platforms	All

### **startup-alarm** *keyword*

Synopsis	Alarm type when the alarm is first created
Context	<b>configure</b> <a href="#">system</a> <a href="#">thresholds</a> <a href="#">cflash-cap-warn-percent</a> <i>string</i> <b>startup-alarm</b> <i>keyword</i>
Tree	<a href="#">startup-alarm</a>
Description	This command specifies the alarm type that may be sent when this alarm is first created. If the first sample is greater than or equal to the rising threshold value and <b>startup-alarm</b> is equal to <b>rising</b> or <b>either</b> , a single rising threshold crossing event is generated. If the first sample is less than or equal to the falling threshold value and <b>startup-alarm</b> is equal to <b>falling</b> or <b>either</b> , a single falling threshold crossing event is generated.
Options	rising, falling, either
Default	either
Introduced	16.0.R1
Platforms	All

## kb-memory-use-alarm

Synopsis	Enable the <b>kb-memory-use-alarm</b> context

Description	This command specifies the polling interval over which the data is sampled and compared with the rising and falling thresholds
Range	1 to 2147483647
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

**owner string**

Synopsis	Owner that created this entry and uses the resources
Context	<b>configure</b> <a href="#">system</a> <a href="#">thresholds</a> <a href="#">rmon</a> <a href="#">alarm</a> <i>number</i> <b>owner</b> <i>string</i>
Tree	<a href="#">owner</a>
String Length	1 to 80
Default	TIMOS CLI
Introduced	16.0.R1
Platforms	All

**rising-event number**

Synopsis	RMON event ID for rising threshold crossing event
Context	<b>configure</b> <a href="#">system</a> <a href="#">thresholds</a> <a href="#">rmon</a> <a href="#">alarm</a> <i>number</i> <b>rising-event</b> <i>number</i>
Tree	<a href="#">rising-event</a>
Range	0 to 65400
Introduced	16.0.R1
Platforms	All

**rising-threshold number**

Synopsis	Rising threshold for the sampled statistic
Context	<b>configure</b> <a href="#">system</a> <a href="#">thresholds</a> <a href="#">rmon</a> <a href="#">alarm</a> <i>number</i> <b>rising-threshold</b> <i>number</i>
Tree	<a href="#">rising-threshold</a>
Description	This command specifies the rising threshold for the sampled statistic. When the current sampled value is greater than or equal to this threshold and the value at the last sampling interval was below this threshold, a single threshold crossing event is generated. A single threshold crossing event is also generated if the first sample taken

is greater than or equal to this threshold and the associated **startup-alarm** command is set to **rising** or **either**.

After a rising threshold crossing event is generated, another such event is not generated until the sampled value falls below this threshold and reaches or falls below the **falling-threshold** command setting.

Range	-2147483648 to 2147483647
Introduced	16.0.R1
Platforms	All

### **sample-type** *keyword*

Synopsis	Sampling type for value comparison with thresholds
Context	<b>configure</b> <a href="#">system</a> <a href="#">thresholds</a> <a href="#">rmon</a> <a href="#">alarm</a> <i>number</i> <b>sample-type</b> <i>keyword</i>
Tree	<a href="#">sample-type</a>
Options	absolute, delta
Default	absolute
Introduced	16.0.R1
Platforms	All

### **startup-alarm** *keyword*

Synopsis	Alarm to send when this entry is first set to valid
Context	<b>configure</b> <a href="#">system</a> <a href="#">thresholds</a> <a href="#">rmon</a> <a href="#">alarm</a> <i>number</i> <b>startup-alarm</b> <i>keyword</i>
Tree	<a href="#">startup-alarm</a>
Options	rising, falling, either
Default	either
Introduced	16.0.R1
Platforms	All

### **variable-oid** *string*

Synopsis	Object identifier to sample the specific variable
Context	<b>configure</b> <a href="#">system</a> <a href="#">thresholds</a> <a href="#">rmon</a> <a href="#">alarm</a> <i>number</i> <b>variable-oid</b> <i>string</i>
Tree	<a href="#">variable-oid</a>
String Length	1 to 255
Notes	This element is mandatory.

Introduced 16.0.R1  
 Platforms All

### **event** [*rmon-event-id*] *number*

Synopsis Enter the **event** list instance

Synopsis	Use local time over UTC time in the system
Context	<b>configure</b> <a href="#">system time prefer-local-time</a> <i>boolean</i>
Tree	<a href="#">prefer-local-time</a>
Description	<p>When configured to <b>true</b>, the system uses local time. This preference is applied to objects such as log file names, created and completed times reported in log files, NETCONF and gRPC date-and-time leafs, and rollback times displayed in <b>show</b> command outputs.</p> <p>When configured to <b>false</b>, the system uses UTC time.</p> <p><b>Note:</b> The timezone used for <b>show</b> command outputs during a CLI session can be controlled using the <b>environment time-display</b> command.</p> <p><b>Note:</b> The format used for the date-time strings may change, depending on the command setting. For example, when this command is set to <b>true</b>, all date-time strings include a suffix of three to five characters that indicates the timezone used.</p> <p><b>Note:</b> The time format for timestamps on log events is controlled on a per-log basis, using the <b>configure log log-id time-format</b> command.</p>
Default	false
Introduced	16.0.R1
Platforms	All

**sntp**

Synopsis	Enter the <b>sntp</b> context
Context	<b>configure</b> <a href="#">system time sntp</a>
Tree	<a href="#">sntp</a>
Introduced	16.0.R1
Platforms	All

**admin-state** *keyword*

Synopsis	Administrative state of SNTP
Context	<b>configure</b> <a href="#">system time sntp admin-state</a> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	16.0.R1
Platforms	All

**server** [[ip-address](#)] (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	Enter the <b>server</b> list instance
Context	<b>configure system time sntp server</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	<a href="#">server</a>
Introduced	16.0.R1
Platforms	All

**[ip-address]** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	IP address of the SNTP server
Context	<b>configure system time sntp server</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	<a href="#">server</a>
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

**interval** *number*

Synopsis	Frequency of querying the server
Context	<b>configure system time sntp server</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <a href="#">interval</a> <i>number</i>
Tree	<a href="#">interval</a>
Range	64 to 1024
Units	seconds
Default	64
Introduced	16.0.R1
Platforms	All

**prefer** *boolean*

Synopsis	Preference value for this SNTP server
Context	<b>configure system time sntp server</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <a href="#">prefer</a> <i>boolean</i>
Tree	<a href="#">prefer</a>
Default	false

Introduced	16.0.R1
Platforms	All

### **version number**

Synopsis	SNTP version supported by this server
Context	<b>configure system time sntp server</b> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> ) <b>version number</b>
Tree	<b>version</b>
Range	1 to 3
Default	3
Introduced	16.0.R1
Platforms	All

### **sntp-state keyword**

Synopsis	Mode for Simple Network Time Protocol (SNTP)
Context	<b>configure system time sntp sntp-state keyword</b>
Tree	<b>sntp-state</b>
Options	unicast, broadcast
Default	unicast
Introduced	16.0.R1
Platforms	All

### **zone**

Synopsis	Enter the <b>zone</b> context
Context	<b>configure system time zone</b>
Tree	<b>zone</b>
Introduced	16.0.R1
Platforms	All

### **non-standard**

Synopsis	Enter the <b>non-standard</b> context
Context	<b>configure system time zone non-standard</b>

---

Tree	<a href="#">non-standard</a>
Notes	The following elements are part of a choice: <b>non-standard</b> or <b>standard</b> .
Introduced	16.0.R1
Platforms	All

### **name** *string*

Synopsis	Non-standard time zone name
Context	<b>configure</b> <a href="#">system time zone non-standard name</a> <i>string</i>
Tree	<a href="#">name</a>
String Length	1 to 5
Introduced	16.0.R1
Platforms	All

### **offset** *string*

Synopsis	Offset from UTC
Context	<b>configure</b> <a href="#">system time zone non-standard offset</a> <i>string</i>
Tree	<a href="#">offset</a>
String Length	5 to 6
Introduced	16.0.R1
Platforms	All

### **standard**

Synopsis	Enter the <b>standard</b> context
Context	<b>configure</b> <a href="#">system time zone standard</a>
Tree	<a href="#">standard</a>
Notes	The following elements are part of a choice: <b>non-standard</b> or <b>standard</b> .
Introduced	16.0.R1
Platforms	All

### **name** *keyword*

Synopsis	Standard time zone name
----------	-------------------------

Context	<b>configure system time zone standard name keyword</b>
Tree	<a href="#">name</a>
Options	hst, akst, pst, mst, cst, est, ast, nst, utc, gmt, wet, cet, eet, msk, msd, awst, acst, aest, nzst
Default	utc
Introduced	16.0.R1
Platforms	All

### **transmission-profile** [[name](#)] *string*

Synopsis	Enter the <b>transmission-profile</b> list instance
Context	<b>configure system transmission-profile string</b>
Tree	<a href="#">transmission-profile</a>
Introduced	16.0.R4
Platforms	All

### **[name]** *string*

Synopsis	File transmission profile name
Context	<b>configure system transmission-profile string</b>
Tree	<a href="#">transmission-profile</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	16.0.R4
Platforms	All

### **http-version** *keyword*

Synopsis	HTTP version
Context	<b>configure system transmission-profile string http-version keyword</b>
Tree	<a href="#">http-version</a>
Options	1.0, 1.1
Default	1.1
Introduced	23.3.R1
Platforms	All

### **ipv4-source-address** *string*

Synopsis	IPv4 source address used for the transport protocol
Context	<b>configure</b> <a href="#">system</a> <a href="#">transmission-profile</a> <i>string</i> <b>ipv4-source-address</b> <i>string</i>
Tree	<a href="#">ipv4-source-address</a>
Introduced	16.0.R4
Platforms	All

### **ipv6-source-address** *string*

Synopsis	IPv6 source address used for the transport protocol
Context	<b>configure</b> <a href="#">system</a> <a href="#">transmission-profile</a> <i>string</i> <b>ipv6-source-address</b> <i>string</i>
Tree	<a href="#">ipv6-source-address</a>
Introduced	16.0.R4
Platforms	All

### **redirection** *number*

Synopsis	Maximum level of redirection
Context	<b>configure</b> <a href="#">system</a> <a href="#">transmission-profile</a> <i>string</i> <b>redirection</b> <i>number</i>
Tree	<a href="#">redirection</a>
Range	1 to 8
Introduced	16.0.R4
Platforms	All

### **retry** *number*

Synopsis	Number of attempts to reconnecting to the server
Context	<b>configure</b> <a href="#">system</a> <a href="#">transmission-profile</a> <i>string</i> <b>retry</b> <i>number</i>
Tree	<a href="#">retry</a>
Range	1 to 256
Introduced	16.0.R4
Platforms	All

**router-instance** *string*

Synopsis	Router instance used by the transport protocol
Context	<b>configure</b> <a href="#">system</a> <a href="#">transmission-profile</a> <i>string</i> <b>router-instance</b> <i>string</i>
Tree	<a href="#">router-instance</a>
String Length	1 to 64
Default	Base
Introduced	16.0.R4
Platforms	All

**timeout** *number*

Synopsis	Timeout for a response from the server
Context	<b>configure</b> <a href="#">system</a> <a href="#">transmission-profile</a> <i>string</i> <b>timeout</b> <i>number</i>
Tree	<a href="#">timeout</a>
Range	1 to 3600
Units	seconds
Default	60
Introduced	16.0.R4
Platforms	All

**usb** [[usb-cflash](#)] *keyword*

Synopsis	Enter the <b>usb</b> list instance
Context	<b>configure</b> <a href="#">system</a> <a href="#">usb</a> <i>keyword</i>
Tree	<a href="#">usb</a>
Description	Commands in this context configure the operational state of the USB port.
Introduced	22.10.R1
Platforms	7750 SR-1-24D, 7750 SR-1-46S, 7750 SR-1-48D, 7750 SR-1-92S, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-1se, 7750 SR-2se

**[usb-cflash]** *keyword*

Synopsis	Specifies the compact flash ID
Context	<b>configure</b> <a href="#">system</a> <a href="#">usb</a> <i>keyword</i>
Tree	<a href="#">usb</a>

---

Options	cf2
Notes	This element is part of a list key.
Introduced	22.10.R1
Platforms	7750 SR-1-24D, 7750 SR-1-46S, 7750 SR-1-48D, 7750 SR-1-92S, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-1se, 7750 SR-2se

### **admin-state** *keyword*

Synopsis	Administrative state of the USB port
Context	<b>configure</b> <b>system</b> <b>usb</b> <i>keyword</i> <b>admin-state</b> <i>keyword</i>
Tree	<b>admin-state</b>
Options	enable, disable
Default	disable
Introduced	22.10.R1
Platforms	7750 SR-1-24D, 7750 SR-1-46S, 7750 SR-1-48D, 7750 SR-1-92S, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-1se, 7750 SR-2se

## 3.47 test-oam commands

```

configure
- test-oam
  - apply-groups reference

### 3.47.1 test-oam command descriptions

#### test-oam

Synopsis	Enter the <b>test-oam</b> context
Context	<b>configure test-oam</b>
Tree	<a href="#">test-oam</a>
Introduced	16.0.R4
Platforms	All

#### icmp

Synopsis	Enter the <b>icmp</b> context
Context	<b>configure test-oam icmp</b>
Tree	<a href="#">icmp</a>
Introduced	20.10.R1
Platforms	All

#### ipv6

Synopsis	Enter the <b>ipv6</b> context
Context	<b>configure test-oam icmp ipv6</b>
Tree	<a href="#">ipv6</a>
Introduced	22.7.R1
Platforms	All

#### length-field *boolean*

Synopsis	Use length field in ICMPv6 responses
Context	<b>configure test-oam icmp ipv6 length-field boolean</b>
Tree	<a href="#">length-field</a>
Default	false
Introduced	22.7.R1
Platforms	All

**maximum-original-datagram** *boolean*

Synopsis	ICMPv6 traceroute responses with largest datagram
Context	<b>configure test-oam icmp ipv6 maximum-original-datagram</b> <i>boolean</i>
Tree	<a href="#">maximum-original-datagram</a>
Description	When configured to <b>true</b> , this command enables the original datagram field of the ICMPv6 error message to be a maximum of 1232 bytes.  When configured to <b>false</b> , the original datagram field of the ICMPv6 error message smaller than 1232 bytes be built smaller.
Default	false
Introduced	22.7.R1
Platforms	All

**ping-template** [[name](#)] *string*

Synopsis	Enter the <b>ping-template</b> list instance
Context	<b>configure test-oam icmp ping-template</b> <i>string</i>
Tree	<a href="#">ping-template</a>
Description	Commands in this context define ping timers and thresholds that verify connectivity and the the operational state of the IP interface.
Introduced	20.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**[name]** *string*

Synopsis	Ping template name
Context	<b>configure test-oam icmp ping-template</b> <i>string</i>
Tree	<a href="#">ping-template</a>
String Length	1 to 64
Notes	This element is part of a list key.
Introduced	20.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**description** *string*

Synopsis	Text description
----------	------------------

Context	<b>configure test-oam icmp ping-template</b> <i>string description string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	20.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **dot1p** *number*

Synopsis	Dot1p in Ethernet header of outgoing ping packets
Context	<b>configure test-oam icmp ping-template</b> <i>string dot1p number</i>
Tree	<a href="#">dot1p</a>
Range	0 to 7
Default	7
Introduced	20.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **dscp** *keyword*

Synopsis	DSCP value used in the outgoing ping packet
Context	<b>configure test-oam icmp ping-template</b> <i>string dscp keyword</i>
Tree	<a href="#">dscp</a>
Options	be, cp1, cp2, cp3, cp4, cp5, cp6, cp7, cs1, cp9, af11, cp11, af12, cp13, af13, cp15, cs2, cp17, af21, cp19, af22, cp21, af23, cp23, cs3, cp25, af31, cp27, af32, cp29, af33, cp31, cs4, cp33, af41, cp35, af42, cp37, af43, cp39, cs5, cp41, cp42, cp43, cp44, cp45, ef, cp47, nc1, cp49, cp50, cp51, cp52, cp53, cp54, cp55, nc2, cp57, cp58, cp59, cp60, cp61, cp62, cp63
Default	nc1
Introduced	20.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **failure-threshold** *number*

Synopsis	Failure threshold to declare inter-connectivity down
Context	<b>configure test-oam icmp ping-template</b> <i>string failure-threshold number</i>
Tree	<a href="#">failure-threshold</a>
Range	2 to 10

Default	3
Introduced	20.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **interval** *number*

Synopsis	Packet transmit interval
Context	<b>configure</b> <a href="#">test-oam icmp ping-template</a> <i>string</i> <a href="#">interval</a> <i>number</i>
Tree	<a href="#">interval</a>
Range	1 to 60
Units	seconds
Default	60
Introduced	20.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **reactivation-failure-threshold** *number*

Synopsis	Threshold of consecutive failures at reactivation
Context	<b>configure</b> <a href="#">test-oam icmp ping-template</a> <i>string</i> <a href="#">reactivation-failure-threshold</a> <i>number</i>
Tree	<a href="#">reactivation-failure-threshold</a>
Description	This command configures the number of consecutive failures that must occur when transmitting at the reactivation interval without success before the transmission interval is changed to the standard interval.
Range	1 to 10
Default	4
Introduced	20.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **reactivation-interval** *number*

Synopsis	Ping reactivation interval
Context	<b>configure</b> <a href="#">test-oam icmp ping-template</a> <i>string</i> <a href="#">reactivation-interval</a> <i>number</i>
Tree	<a href="#">reactivation-interval</a>
Description	This command configures the packet transmit interval used when the IP interface becomes operationally down because of a ping template failure after receiving a successful response to the previous ICMP echo request.

Range	1 to 60
Units	seconds
Default	1
Introduced	20.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **reactivation-threshold** *number*

Synopsis	Success threshold to declare inter-connectivity up
Context	<b>configure</b> <a href="#">test-oam icmp ping-template</a> <i>string</i> <a href="#">reactivation-threshold</a> <i>number</i>
Tree	<a href="#">reactivation-threshold</a>
Description	This command configures the minimum number of consecutive successful responses of ICMP replies that must occur before the IP interface transitions from operationally down (due to ping validation failure) to operationally up. This value is a stability metric intended to prevent flapping.
Range	1 to 10
Default	3
Introduced	20.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **reactivation-timeout** *number*

Synopsis	Reactivation wait time before packet is declared lost
Context	<b>configure</b> <a href="#">test-oam icmp ping-template</a> <i>string</i> <a href="#">reactivation-timeout</a> <i>number</i>
Tree	<a href="#">reactivation-timeout</a>
Range	1 to 60
Units	seconds
Default	1
Introduced	20.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **size** *number*

Synopsis	Data field size of the outgoing ICMP echo packet
Context	<b>configure</b> <a href="#">test-oam icmp ping-template</a> <i>string</i> <a href="#">size</a> <i>number</i>
Tree	<a href="#">size</a>

Range	12 to 9786
Units	octets
Default	56
Introduced	20.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **timeout** *number*

Synopsis	Wait time before ICMP echo request is declared lost
Context	<b>configure</b> <a href="#">test-oam icmp ping-template</a> <i>string</i> <b>timeout</b> <i>number</i>
Tree	<a href="#">timeout</a>
Range	1 to 60
Units	seconds
Default	5
Introduced	20.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **ttl** *number*

Synopsis	TTL value for the outgoing ping packet
Context	<b>configure</b> <a href="#">test-oam icmp ping-template</a> <i>string</i> <b>tll</b> <i>number</i>
Tree	<a href="#">ttl</a>
Description	This command configures the TTL value used in the outgoing ping packet. The tested interface must be directly connected on the same subnet.
Range	1 to 255
Default	1
Introduced	20.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **link-measurement**

Synopsis	Enter the <b>link-measurement</b> context
Context	<b>configure</b> <a href="#">test-oam link-measurement</a>
Tree	<a href="#">link-measurement</a>

Description	Commands in this context configure the link measurement template attributes that are inherited on associated IP interfaces for delay reporting to the routing engine.
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **measurement-template** [[template-name](#)] *string*

Synopsis	Enter the <b>measurement-template</b> list instance
Context	<b>configure</b> <a href="#">test-oam</a> <a href="#">link-measurement</a> <a href="#">measurement-template</a> <i>string</i>
Tree	<a href="#">measurement-template</a>
Description	<p>Commands in this context configure the attributes of the measurement template that can be assigned to an IP interface.</p> <p>Changes can be made without disabling the template, although some modifications cause the test on associated IP interfaces to terminate and restart.</p> <p>A measurement template can be removed if no interfaces reference it.</p>
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **[template-name]** *string*

Synopsis	Measurement template name
Context	<b>configure</b> <a href="#">test-oam</a> <a href="#">link-measurement</a> <a href="#">measurement-template</a> <i>string</i>
Tree	<a href="#">measurement-template</a>
String Length	1 to 64
Notes	This element is part of a list key.
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **admin-state** *keyword*

Synopsis	Administrative state of the measurement template
Context	<b>configure</b> <a href="#">test-oam</a> <a href="#">link-measurement</a> <a href="#">measurement-template</a> <i>string</i> <a href="#">admin-state</a> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable

Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## aggregate-sample-window

Synopsis	Enter the <b>aggregate-sample-window</b> context
Context	<b>configure</b> <a href="#">test-oam link-measurement measurement-template</a> <i>string</i> <a href="#">aggregate-sample-window</a>
Tree	<a href="#">aggregate-sample-window</a>
Description	Commands in this context configure the attributes of the aggregate sample window used with the measurement template assigned to an IP interface. The aggregate sample window is the collection of sample windows.
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## multiplier *number*

Synopsis	Number of sample windows in the aggregate sample window
Context	<b>configure</b> <a href="#">test-oam link-measurement measurement-template</a> <i>string</i> <a href="#">aggregate-sample-window multiplier</a> <i>number</i>
Tree	<a href="#">multiplier</a>
Range	1 to 12
Default	12
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## threshold

Synopsis	Enter the <b>threshold</b> context
Context	<b>configure</b> <a href="#">test-oam link-measurement measurement-template</a> <i>string</i> <a href="#">aggregate-sample-window threshold</a>
Tree	<a href="#">threshold</a>
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**absolute number**

Synopsis	Absolute delta for delay measurement reporting
Context	<b>configure</b> <a href="#">test-oam link-measurement measurement-template</a> <i>string</i> <a href="#">aggregate-sample-window threshold absolute number</a>
Tree	<a href="#">absolute</a>
Description	This command configures the absolute minimum delta by which a new delay measurement must differ from the previously reported measurement to be reported to the routing engine.  If an absolute value is not configured the threshold is disabled.
Range	1 to 100000
Units	microseconds
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**relative number**

Synopsis	Relative delta for measurement reporting
Context	<b>configure</b> <a href="#">test-oam link-measurement measurement-template</a> <i>string</i> <a href="#">aggregate-sample-window threshold relative number</a>
Tree	<a href="#">relative</a>
Description	This command configures the relative minimum delta by which a new delay measurement must differ from the previously reported measurement to be reported to the routing engine.  If a relative value is not configured, the threshold is disabled.
Range	1 to 100
Units	percent
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**window-integrity number**

Synopsis	Sample percentage required for window integrity report
Context	<b>configure</b> <a href="#">test-oam link-measurement measurement-template</a> <i>string</i> <a href="#">aggregate-sample-window window-integrity number</a>
Tree	<a href="#">window-integrity</a>
Description	This command configures the percentage value that is used to determine whether the aggregate sample window is integral, by comparing the number of samples received from the sample window to the percentage configured.

The configured percentage translates to a required sample window count that must be included in the aggregate sample window. The number of samples is computed as follows:

$$(\text{window-integrity (\%)}) \times (((\text{aggregate-sample-window length (s)}) / (\text{sample-window length (s)}))$$

If the number of samples in the aggregate sample window is equal to or greater than the computed number of required samples, the sample window has integrity and the aggregate sample window result is compared to the configured sample window thresholds.

If the count is less than the computed number of required samples, the aggregate sample window does not have integrity and the value is not considered as representative. In this case the aggregate sample window results are not compared to the configured sample window thresholds.

If this parameter is not configured, integrity checking is disabled and all results are compared to the configured thresholds.

Range	1 to 100
Units	percent
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **delay** *keyword*

Synopsis	Delay measurement statistic type
Context	<b>configure</b> <a href="#">test-oam link-measurement measurement-template</a> <i>string</i> <b>delay</b> <i>keyword</i>
Tree	<a href="#">delay</a>
Description	This command configures the type of delay measurement statistic used in the sample window and aggregate sample window.
Options	min, max, avg
Default	min
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">test-oam link-measurement measurement-template</a> <i>string</i> <b>description</b> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80

Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **interval** *number*

Synopsis	Interval between test packet transmissions
Context	<b>configure</b> <a href="#">test-oam link-measurement measurement-template</a> <i>string interval number</i>
Tree	<a href="#">interval</a>
Range	1 to 10
Units	seconds
Default	1
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **last-reported-delay-hold** *number*

Synopsis	Time to wait to flush the last reported delay
Context	<b>configure</b> <a href="#">test-oam link-measurement measurement-template</a> <i>string last-reported-delay-hold number</i>
Tree	<a href="#">last-reported-delay-hold</a>
Description	<p>This command configures the timer that specifies the wait time before the last reported delay measurement is flushed after a link measurement test enters the operationally down state.</p> <p>The aging timer delays the flushing of the last reported delay metric to the routing engine. This timer starts a countdown to zero when an administrative function causes the operational state of the test on that specific interface to transition from up to down. If the timer expires before the operational state transitions to up, the previously reported value is flushed. The Delay Measurement Last Reported indicates “Cleared”. The timestamp indicates the time of the clear event. The Triggered By indicates “Expired”. If the administrative state recovers to operationally up before the expiration of the timer, the previous reported value is not flushed.</p> <p>The aging timer does not apply to failure conditions that do not affect the administrative state of the interface, for example interface failure or routing changes.</p>
Range	0   1 to 86400
Units	seconds
Default	86400
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**reporting** *boolean*

Synopsis	Report behavior for values for the configured threshold
Context	<b>configure</b> <a href="#">test-oam link-measurement measurement-template</a> <i>string</i> <a href="#">reporting</a> <i>boolean</i>
Tree	<a href="#">reporting</a>
Description	<p>When configured to <b>true</b>, the system reports a reached threshold to the routing engine. Reaching a configured <b>sample-window</b> or <b>aggregate-sample-window</b> indicates a value of interest.</p> <p>When configured to <b>false</b>, values reaching thresholds are not reported to the routing engine. In both enabled and disabled cases, the sample-window and aggregate-sample-window information and computed values are stored on the node until overwriting occurs.</p>
Default	true
Introduced	22.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**sample-window**

Synopsis	Enter the <b>sample-window</b> context
Context	<b>configure</b> <a href="#">test-oam link-measurement measurement-template</a> <i>string</i> <a href="#">sample-window</a>
Tree	<a href="#">sample-window</a>
Description	Commands in this context configure sample window attributes used when the measurement template is assigned to an IP interface. The sample window is the collection of individual probe results over a defined period.
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**multiplier** *number*

Synopsis	Multiplier of interval used for sample window length
Context	<b>configure</b> <a href="#">test-oam link-measurement measurement-template</a> <i>string</i> <a href="#">sample-window</a> <a href="#">multiplier</a> <i>number</i>
Tree	<a href="#">multiplier</a>
Description	This command configures the number of probe results that should be in the sample window. For example, a multiplier of 10 and an interval of 5 equals 50 probes being transmitted from an individual sample window. Consequently, 50 probe results are expected within the 50 second duration that the sample window is "In-progress".
Range	1 to 900

Default	10
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## threshold

Synopsis	Enter the <b>threshold</b> context
Context	<b>configure</b> <a href="#">test-oam link-measurement measurement-template</a> <i>string</i> <a href="#">sample-window</a> <b>threshold</b>
Tree	<a href="#">threshold</a>
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## absolute *number*

Synopsis	Absolute delta for delay measurement reporting
Context	<b>configure</b> <a href="#">test-oam link-measurement measurement-template</a> <i>string</i> <a href="#">sample-window</a> <b>threshold</b> <b>absolute</b> <i>number</i>
Tree	<a href="#">absolute</a>
Description	This command configures the absolute minimum delta by which a new delay measurement must differ from the previously reported measurement to be reported to the routing engine.  If an absolute value is not configured the threshold is disabled.
Range	1 to 100000
Units	microseconds
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## relative *number*

Synopsis	Relative delta for delay measurement reporting
Context	<b>configure</b> <a href="#">test-oam link-measurement measurement-template</a> <i>string</i> <a href="#">sample-window</a> <b>threshold</b> <b>relative</b> <i>number</i>
Tree	<a href="#">relative</a>
Description	This command configures the relative minimum delta by which a new delay measurement must differ from the previously reported measurement to be reported to the routing engine.

	If a relative value is not configured, the threshold is disabled.
Range	1 to 500
Units	percent
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **window-integrity** *number*

Synopsis	Sample percentage required for window integrity report
Context	<b>configure</b> <b>test-oam</b> <b>link-measurement</b> <b>measurement-template</b> <i>string</i> <b>sample-window</b> <b>window-integrity</b> <i>number</i>
Tree	<b>window-integrity</b>
Description	<p>This command configures the percentage value that is used to determine whether the sample window has enough samples to be considered representative for that window (integrity), by comparing the number of samples received from the sample window to the percentage configured.</p> <p>The configured percentage considers the interval of probes and the length of the sample window to determine the number of packets required in the sample:</p> $(\text{window-integrity } (\%)) \times ((\text{sample-window length } (s)) / \text{pps per test (interval)})$ <p>If the count is less than the computed number of required samples, the sample window does not have integrity and the sample window results are not compared to configured sample window thresholds.</p> <p>If the count is equal to or greater than the computed number of required samples, the sample window has integrity and the aggregate sample window result is compared to the configured sample window thresholds.</p> <p>If the count is less than the computed number of required samples, the sample window does not have integrity and the value is not considered as representative. In this case the sample window results are not compared to the configured sample window thresholds.</p> <p>If this parameter is not configured, integrity checking is disabled and all results are compared to the configured thresholds.</p>
Range	1 to 100
Units	percent
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **twamp-light**

Synopsis	Enter the <b>twamp-light</b> context
----------	--------------------------------------

Context	<b>configure</b> <a href="#">test-oam</a> <a href="#">link-measurement</a> <a href="#">measurement-template</a> <i>string</i> <a href="#">twamp-light</a>
Tree	<a href="#">twamp-light</a>
Description	Commands in this context configure TWAMP Light attributes that are used with the measurement template when assigned to IP interfaces.
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **allow-egress-remark-dscp** *boolean*

Synopsis	Allow overwrite of DSCP value by the egress QoS policy
Context	<b>configure</b> <a href="#">test-oam</a> <a href="#">link-measurement</a> <a href="#">measurement-template</a> <i>string</i> <a href="#">twamp-light</a> <a href="#">allow-egress-remark-dscp</a> <i>boolean</i>
Tree	<a href="#">allow-egress-remark-dscp</a>
Description	<p>When configured to <b>true</b>, the egress QoS process is able to modify the DSCP based on the egress QoS configuration and expose the DSCP to egress DSCP processing rules.</p> <p>When configured to <b>false</b>, the egress QoS process uses the DSCP as configured and bypasses egress QoS DSCP marking.</p> <p>If the <b>configure qos network egress remark-trusted force-egress-marking</b> command is configured for the network egress QoS profile, the egress QoS process is applied and the DSCP can be overwritten regardless of the <b>allow-egress-remark-dscp</b> configuration.</p>
Default	false
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **allow-ipv6-udp-checksum-zero** *boolean*

Synopsis	Process IPv6 packets with UDP check sum zero
Context	<b>configure</b> <a href="#">test-oam</a> <a href="#">link-measurement</a> <a href="#">measurement-template</a> <i>string</i> <a href="#">twamp-light</a> <a href="#">allow-ipv6-udp-checksum-zero</a> <i>boolean</i>
Tree	<a href="#">allow-ipv6-udp-checksum-zero</a>
Description	<p>When configured to <b>true</b>, processing of IPv6 packets that arrive with a UDP checksum of zero is allowed. The destination UDP ports that are registered as TWAMP Test packets in the template allow this behavior.</p> <p>When configured to <b>false</b>, IPv6 packets that arrive with a UDP checksum of zero are discarded.</p>
Default	false
Introduced	21.7.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **dest-udp-port** *number*

Synopsis Destination UDP port used by link measurement tests

Context **configure** **test-oam link-measurement measurement-template** *string* **twamp-light dest-udp-port** *number*

Tree **dest-udp-port**

Description This command configures the destination UDP port on outbound TWAMP Light measurement packets sent from the session controller. The destination UDP port must match the UDP port value configured on the TWAMP Light reflector that responds to this specific TWAMP Light test.

Range 1 to 65535

Default 862

Introduced 21.7.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **dscp** *keyword*

Synopsis DSCP copied to TWAMP Light echo request packet header

Context **configure** **test-oam link-measurement measurement-template** *string* **twamp-light dscp** *keyword*

Tree **dscp**

Description This command configures the DSCP to be copied into the IP header of each TWAMP Light echo request packet launched for the test.

Options be, cp1, cp2, cp3, cp4, cp5, cp6, cp7, cs1, cp9, af11, cp11, af12, cp13, af13, cp15, cs2, cp17, af21, cp19, af22, cp21, af23, cp23, cs3, cp25, af31, cp27, af32, cp29, af33, cp31, cs4, cp33, af41, cp35, af42, cp37, af43, cp39, cs5, cp41, cp42, cp43, cp44, cp45, ef, cp47, nc1, cp49, cp50, cp51, cp52, cp53, cp54, cp55, nc2, cp57, cp58, cp59, cp60, cp61, cp62, cp63

Default nc1

Introduced 21.7.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **fc** *keyword*

Synopsis Forwarding class name for the TWAMP Light packets

Context	<b>configure</b> <a href="#">test-oam link-measurement measurement-template</a> <i>string</i> <a href="#">twamp-light</a> <i>fc</i> <i>keyword</i>
Tree	<a href="#">fc</a>
Options	be, l2, af, l1, h2, ef, h1, nc
Default	h1
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## ipv6-destination-discovery

Synopsis	Enter the <b>ipv6-destination-discovery</b> context
Context	<b>configure</b> <a href="#">test-oam link-measurement measurement-template</a> <i>string</i> <a href="#">twamp-light</a> <a href="#">ipv6-destination-discovery</a>
Tree	<a href="#">ipv6-destination-discovery</a>
Description	Commands in this context configure IPv6 discovery of a directly-connected IPv6 peer address.
Introduced	22.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## admin-state *keyword*

Synopsis	Administrative state of IPv6 auto destination discovery
Context	<b>configure</b> <a href="#">test-oam link-measurement measurement-template</a> <i>string</i> <a href="#">twamp-light</a> <a href="#">ipv6-destination-discovery</a> <i>admin-state</i> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	22.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## discovery-interval *number*

Synopsis	Transmission frequency for discovery packets
Context	<b>configure</b> <a href="#">test-oam link-measurement measurement-template</a> <i>string</i> <a href="#">twamp-light</a> <a href="#">ipv6-destination-discovery</a> <i>discovery-interval</i> <i>number</i>
Tree	<a href="#">discovery-interval</a>

Description	This command configures transmission frequency of the discovery packet to the all-routers multicast group (ff02::2) to discover the link-local address of the peer. This frequency is used during the <b>discover-timer</b> interval.
Range	1 to 10
Units	seconds
Default	10
Introduced	22.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **discover-timer** *number*

Synopsis	Maximum time to remain in the discovery phase
Context	<b>configure</b> <a href="#">test-oam</a> <a href="#">link-measurement</a> <a href="#">measurement-template</a> <i>string</i> <a href="#">twamp-light ipv6-destination-discovery</a> <b>discover-timer</b> <i>number</i>
Tree	<a href="#">discover-timer</a>
Description	This command configures the amount of time to transmit peer discovery packets at the <b>discover-interval</b> .  The timer starts when the IPv6 protocols is enabled under the <b>configure router interface if-attribute delay dynamic twamp-light ipv6</b> context. At the expiration of the <b>discover-interval</b> or when a peer is discovered, whichever comes first, the probe interval changes to the value configured for the <b>update-interval</b> .
Range	1 to 1800
Units	seconds
Default	60
Introduced	22.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **update-interval** *number*

Synopsis	Transmission frequency to maintain the peer address
Context	<b>configure</b> <a href="#">test-oam</a> <a href="#">link-measurement</a> <a href="#">measurement-template</a> <i>string</i> <a href="#">twamp-light ipv6-destination-discovery</a> <b>update-interval</b> <i>number</i>
Tree	<a href="#">update-interval</a>
Range	0   1 to 3600
Units	seconds
Default	600
Introduced	22.7.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **pad-tlv-size** *number*

Synopsis Optional PAD TLV size

Context **configure** [test-oam link-measurement measurement-template](#) *string* [twamp-light pad-tlv-size](#) *number*

Tree [pad-tlv-size](#)

Description This command enables a STAMP PDU to include the PAD TLV. This increases the size of the STAMP PDU by the size of the added TLV. The PAD TLV includes an all zeros pattern.

Range 4 to 9714

Units bytes

Introduced 22.7.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **profile** *keyword*

Synopsis QoS profile for packet treatment in local node

Context **configure** [test-oam link-measurement measurement-template](#) *string* [twamp-light profile](#) *keyword*

Tree [profile](#)

Description This command specifies if the packets should be treated as in or out of profile as they move through the local node.

Options in, out

Default in

Introduced 21.7.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **return-path**

Synopsis Enter the **return-path** context

Context **configure** [test-oam link-measurement measurement-template](#) *string* [twamp-light return-path](#)

Tree [return-path](#)

Description Commands in this context configure the return-path TLV carried in the STAMP PDU.

Introduced 22.7.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### link *boolean*

Synopsis The Return Path sub-TLV specifying link

Context **configure test-oam link-measurement measurement-template** *string twamp-light return-path link* *boolean*

Tree [link](#)

Description When configured to **true**, the system includes the **return-path** TLV link. The link sub-tlv instructs a Session-Reflector configured for type **stamp** to use the receiving logical IP interface for the transmission of the response packet from the reflector to the **session-sender**. The destination of the reflected packet must be installed in the forwarding table and reachable out the IP interface or the packet is dropped by the Session-Reflector. When there are parallel non-equal cost return paths between the Session-Reflector and the Session-Sender the response packet can only be returned on the lowest cost path.

When configured to **false**, the Return Path TLV carried in the STAMP PDU is not included with the test packet.

Default false

Introduced 22.7.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### src-udp-port *number*

Synopsis Fixed source UDP port for link measurement tests

Context **configure test-oam link-measurement measurement-template** *string twamp-light src-udp-port* *number*

Tree [src-udp-port](#)

Description This command specifies a source UDP port for link measurement tests.

Unless required, Nokia suggests that the link measurement dynamically select an available source UDP port from the dynamic range. Before a UDP port in the configurable range can be configured as a source it must be owned by the application. Use the **configure test-oam twamp twamp-light source-udp-port-pools port pool-type** command to map the port range to the application.

By default a source UDP port allocates from the dynamic range. The configuration of the source port should only be configured when required for interoperability. When the source IP, destination IP, and destination UPD port are the same for a test, the source UDP port must be different in order to uniquely identify the session.

Range 64374 to 64383

Introduced 22.7.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**timestamp-format** *keyword*

Synopsis	Format of the timestamp used in TWAMP Light PDU
Context	<b>configure</b> <a href="#">test-oam link-measurement measurement-template</a> <i>string</i> <a href="#">twamp-light timestamp-format</a> <i>keyword</i>
Tree	<a href="#">timestamp-format</a>
Description	This command configures the format of the timestamp used in the TWAMP Light PDU and places the requested timestamp format in the packet using the appropriate epoch. This is unrelated to any time distribution protocol used to synchronize time between clocks.
Options	ntp, ptp
Default	ntp
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**tll** *number*

Synopsis	Time to live value used in the TWAMP Light test packet
Context	<b>configure</b> <a href="#">test-oam link-measurement measurement-template</a> <i>string</i> <a href="#">twamp-light tll</a> <i>number</i>
Tree	<a href="#">tll</a>
Range	1 to 255
Default	1
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**unidirectional-measurement** *keyword*

Synopsis	Method used to compute the unidirectional delay value
Context	<b>configure</b> <a href="#">test-oam link-measurement measurement-template</a> <i>string</i> <a href="#">unidirectional-measurement</a> <i>keyword</i>
Tree	<a href="#">unidirectional-measurement</a>
Description	This command specifies the unidirectional delay computation method as the actual forward delay (calculated using T2-T1 timestamps) or as derived using the round-trip delay divided by two (required if nodal clocks are not synchronized using an accurate time-synchronization method or protocol such as PTP).
Options	derived, actual

Default	derived
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## mpls

Synopsis	Enter the <b>mpls</b> context
Context	<b>configure test-oam mpls</b>
Tree	<b>mpls</b>
Introduced	23.7.R1
Platforms	All

## echo-request-downstream-map *keyword*

Synopsis	Format of the downstream mapping TLV
Context	<b>configure test-oam mpls echo-request-downstream-map <i>keyword</i></b>
Tree	<b>echo-request-downstream-map</b>
Description	<p>This command specifies the format of the downstream mapping TLV to use in all LSP trace packets and LDP tree trace packets originated on this node.</p> <p>The following downstream mapping TLVs are supported: the original Downstream Mapping (DSMAP) TLV, defined in RFC 4379 (obsoleted by RFC 8029) and the Downstream Detailed Mapping (DDMAP) TLV, defined in RFC 6424.</p> <p>See the "DDMAP TLV" section in the <i>7450 ESS, 7750 SR, 7950 XRS, and VSR OAM and Diagnostics Guide</i> for more information.</p>
Options	dsmap, ddmmap
Default	dsmap
Introduced	23.7.R1
Platforms	All

## timestamp-format *keyword*

Synopsis	Timestamp format for MPLS ping request and reply PDUs
Context	<b>configure test-oam mpls timestamp-format <i>keyword</i></b>
Tree	<b>timestamp-format</b>
Options	rfc4379, unix
Default	unix

Introduced	23.7.R1
Platforms	All

## **mpls-dm**

Synopsis	Enter the <b>mpls-dm</b> context
Context	<b>configure</b> <a href="#">test-oam mpls-dm</a>
Tree	<a href="#">mpls-dm</a>
Introduced	16.0.R6
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## **admin-state** *keyword*

Synopsis	Administrative state of MPLS DM packet processing
Context	<b>configure</b> <a href="#">test-oam mpls-dm admin-state</a> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	16.0.R6
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## **service-activation-testhead**

Synopsis	Enter the <b>service-activation-testhead</b> context
Context	<b>configure</b> <a href="#">test-oam service-activation-testhead</a>
Tree	<a href="#">service-activation-testhead</a>
Description	Commands in this context configure service activation launch parameters for the testhead function.  This functionality is supported on FP4 and later platforms.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

## **acceptance-criteria-template** [[ac-template-name](#)] *string*

Synopsis	Enter the <b>acceptance-criteria-template</b> list instance
----------	---

Context	<b>configure test-oam service-activation-testhead acceptance-criteria-template</b> <i>string</i>
Tree	<a href="#">acceptance-criteria-template</a>
Description	<p>Commands in this context configure the test acceptance criteria policy that the service test testhead OAM tool uses to determine the test result after test completion.</p> <p>The “default” value of this command is attached to every <b>service-stream</b> created under the <b>service-test</b> context for which no explicit acceptance criteria template policy is configured by the user.</p> <p>The default acceptance criteria template is not user-configurable.</p> <p>The default template does not set thresholds and only reports the end-of-run values.</p>
Max. Instances	100
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

### **[ac-template-name]** *string*

Synopsis	Acceptance criteria template name
Context	<b>configure test-oam service-activation-testhead acceptance-criteria-template</b> <i>string</i>
Tree	<a href="#">acceptance-criteria-template</a>
String Length	1 to 64
Notes	This element is part of a list key.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

### **cir-threshold** *number*

Synopsis	CIR threshold
Context	<b>configure test-oam service-activation-testhead acceptance-criteria-template</b> <i>string</i> <b>cir-threshold</b> <i>number</i>
Tree	<a href="#">cir-threshold</a>
Description	This command configures a CIR value that is compared to the measured results for the CIR test types. If the measured value is equal to or greater than the configured value, the test passes; otherwise, it fails. For more information, see the <b>m-factor</b> command.
Range	1 to 400000000
Units	kilobps
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

**delay-threshold** *number*

Synopsis	Delay threshold configuration for acceptance criteria template
Context	<b>configure</b> test-oam service-activation-testhead acceptance-criteria-template <i>string</i> delay-threshold <i>number</i>
Tree	delay-threshold
Description	This command configures a delay value that is compared to the measured delay at the end of the test to declare the test result. If the measured value is greater than the configured value, the test fails; otherwise, it passes. A measured delay value of zero also causes the test to fail.
Range	1 to 100000000
Units	microseconds
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

**delay-var-threshold** *number*

Synopsis	Delay variation threshold configuration for acceptance criteria template
Context	<b>configure</b> test-oam service-activation-testhead acceptance-criteria-template <i>string</i> delay-var-threshold <i>number</i>
Tree	delay-var-threshold
Description	This command configures a delay variation value that is compared to the measured delay variation at the end of the test to declare the test result. If the measured value is greater than the configured value, the test fails; otherwise, it passes.
Range	1 to 100000000
Units	microseconds
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

**description** *string*

Synopsis	Text description
Context	<b>configure</b> test-oam service-activation-testhead acceptance-criteria-template <i>string</i> description <i>string</i>
Tree	description
String Length	1 to 80
Introduced	23.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

### **loss-threshold** *decimal-number*

**Synopsis** Loss threshold for acceptance criteria template

**Context** **configure** **test-oam** **service-activation-testhead** **acceptance-criteria-template** *string* **loss-threshold** *decimal-number*

**Tree** [loss-threshold](#)

**Description** This command configures a frame loss ratio (FLR) value that is compared to the measured FLR at the end of the test to determine the test result. If the measured value is greater than the configured value, the test fails; otherwise, it passes. Thresholds must be explicitly configured to use them for the comparison.

The FLR is computed as a ratio of the difference of the number of received frames to the number of injected or sent frames divided by the number of sent frames.

**Range** 0.0000 to 100.0000

**Units** percent

**Introduced** 23.10.R1

**Platforms** 7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

### **loss-threshold-policing** *decimal-number*

**Synopsis** Frame loss ratio for a policing test

**Context** **configure** **test-oam** **service-activation-testhead** **acceptance-criteria-template** *string* **loss-threshold-policing** *decimal-number*

**Tree** [loss-threshold-policing](#)

**Description** This command configures a frame loss ratio (FLR) value for a policing test. The value is compared to the measured FLR at the end of the test to determine the test result. If the measured value is greater than the configured value, the test fails; otherwise, it passes.

Thresholds must be explicitly configured before they can be used for comparison. The FLR is computed as a ratio of the difference of the number of received frames to the number of injected or sent frames divided by the number of sent frames.

**Range** 0.0000 to 100.0000

**Units** percent

**Introduced** 23.10.R1

**Platforms** 7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

**m-factor** *number*

Synopsis	Throughput margin configuration
Context	<b>configure</b> <a href="#">test-oam service-activation-testhead acceptance-criteria-template</a> <i>string</i> <b>m-factor</b> <i>number</i>
Tree	<a href="#">m-factor</a>
Description	<p>This command configures the margin by which the observed throughput is off from the configured throughput to determine whether a service test passes or fails.</p> <p>The M-factor is used with the CIR threshold and PIR threshold values for different test types to determine whether a test passes or fails.</p> <p>type <b>cir</b></p> <ul style="list-style-type: none"> <li>If the measured throughput is less than the difference of the configured CIR threshold and the M-factor, the test fails.</li> </ul> <p>type <b>cir-pir</b></p> <ul style="list-style-type: none"> <li>If the measured throughput is less than the difference of the configured PIR threshold and the M-factor, the test fails.</li> </ul> <p>type <b>policing</b></p> <ul style="list-style-type: none"> <li>If the measured throughput is less than the difference of the configured PIR threshold and the M-factor, the test fails.</li> <li>If the measured throughput is greater than the sum of the configured PIR threshold and the M-factor, the test fails.</li> </ul> <p>type <b>performance</b></p> <ul style="list-style-type: none"> <li>If the measured throughput is less than the difference of the configured PIR threshold and the M-factor, the test fails.</li> </ul>
Range	1 to 400000000
Units	kilobps
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

**pir-threshold** *number*

Synopsis	PIR threshold
Context	<b>configure</b> <a href="#">test-oam service-activation-testhead acceptance-criteria-template</a> <i>string</i> <b>pir-threshold</b> <i>number</i>
Tree	<a href="#">pir-threshold</a>
Description	<p>This command configures a PIR value that is compared to the measured results for the <b>cir-pir</b>, <b>policing</b>, and <b>performance</b> test types. If the measured value is equal to or greater than the configured value, the test passes; otherwise, it fails. For more information, see the <b>m-factor</b> command.</p>
Range	1 to 400000000

Units	kilobps
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

### **frame-size-template** [[fs-template-name](#)] *string*

Synopsis	Enter the <b>frame-size-template</b> list instance
Context	<b>configure</b> <a href="#">test-oam service-activation-testhead frame-size-template</a> <i>string</i>
Tree	<a href="#">frame-size-template</a>
Description	Commands in this context create a template to configure frames of different sizes for use with a test stream configured under the <b>service-test</b> command. The ITU-T Y.1564 methodology designates the letters “a” to “h” for a default frame size. The default frame size can be overwritten.
Max. Instances	100
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

### **[fs-template-name]** *string*

Synopsis	Frame size template name
Context	<b>configure</b> <a href="#">test-oam service-activation-testhead frame-size-template</a> <i>string</i>
Tree	<a href="#">frame-size-template</a>
String Length	1 to 64
Notes	This element is part of a list key.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

### **size-a** *number*

Synopsis	Size-a
Context	<b>configure</b> <a href="#">test-oam service-activation-testhead frame-size-template</a> <i>string</i> <b>size-a</b> <i>number</i>
Tree	<a href="#">size-a</a>
Range	64 to 9212
Units	bytes

---

Default	64
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

### **size-b number**

Synopsis	Size-b
Context	<b>configure</b> <a href="#">test-oam service-activation-testhead frame-size-template</a> <i>string</i> <b>size-b number</b>
Tree	<a href="#">size-b</a>
Range	64 to 9212
Units	bytes
Default	128
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

### **size-c number**

Synopsis	Size-c
Context	<b>configure</b> <a href="#">test-oam service-activation-testhead frame-size-template</a> <i>string</i> <b>size-c number</b>
Tree	<a href="#">size-c</a>
Range	64 to 9212
Units	bytes
Default	256
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

### **size-d number**

Synopsis	Size-d
Context	<b>configure</b> <a href="#">test-oam service-activation-testhead frame-size-template</a> <i>string</i> <b>size-d number</b>
Tree	<a href="#">size-d</a>
Range	64 to 9212
Units	bytes

Default	512
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

**size-e number**

Synopsis	Size-e
Context	<b>configure</b> <a href="#">test-oam service-activation-testhead frame-size-template</a> <i>string size-e number</i>
Tree	<a href="#">size-e</a>
Range	64 to 9212
Units	bytes
Default	1024
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

**size-f number**

Synopsis	Size-f
Context	<b>configure</b> <a href="#">test-oam service-activation-testhead frame-size-template</a> <i>string size-f number</i>
Tree	<a href="#">size-f</a>
Range	64 to 9212
Units	bytes
Default	1280
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

**size-g number**

Synopsis	Size-g
Context	<b>configure</b> <a href="#">test-oam service-activation-testhead frame-size-template</a> <i>string size-g number</i>
Tree	<a href="#">size-g</a>
Range	64 to 9212
Units	bytes
Default	1518

Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

**size-h** *number*

Synopsis	Size-h
Context	<b>configure</b> <a href="#">test-oam service-activation-testhead frame-size-template</a> <i>string</i> <b>size-h</b> <i>number</i>
Tree	<a href="#">size-h</a>
Range	64 to 9212
Units	bytes
Default	9212
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

**size-u** *number*

Synopsis	Size-u
Context	<b>configure</b> <a href="#">test-oam service-activation-testhead frame-size-template</a> <i>string</i> <b>size-u</b> <i>number</i>
Tree	<a href="#">size-u</a>
Range	64 to 9212
Units	bytes
Default	2000
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

**service-test** [[test-name](#)] *string*

Synopsis	Enter the <b>service-test</b> list instance
Context	<b>configure</b> <a href="#">test-oam service-activation-testhead service-test</a> <i>string</i>
Tree	<a href="#">service-test</a>
Description	Commands in this context configure the service test parameters.
Max. Instances	500
Introduced	23.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

### **[test-name]** *string*

Synopsis Service activation test name

Context **configure** [test-oam service-activation-testhead service-test](#) *string*

Tree [service-test](#)

String Length 1 to 64

Notes This element is part of a list key.

Introduced 23.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

### **accounting-policy** *reference*

Synopsis Accounting policy to record service test results

Context **configure** [test-oam service-activation-testhead service-test](#) *string* [accounting-policy reference](#)

Tree [accounting-policy](#)

Description This command creates a link to an accounting policy for the specified service test. The **record** of the accounting policy must be set to **complete-service-activation-test**.

Reference **configure** [log accounting-policy](#) *number*

Introduced 23.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

### **admin-state** *keyword*

Synopsis Administrative state of the service test

Context **configure** [test-oam service-activation-testhead service-test](#) *string* [admin-state](#) *keyword*

Tree [admin-state](#)

Options enable, disable

Default disable

Introduced 23.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

**description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">test-oam</a> <a href="#">service-activation-testhead</a> <a href="#">service-test</a> <i>string</i> <a href="#">description</a> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

**service-stream** [[stream-id](#)] *number*

Synopsis	Enter the <b>service-stream</b> list instance
Context	<b>configure</b> <a href="#">test-oam</a> <a href="#">service-activation-testhead</a> <a href="#">service-test</a> <i>string</i> <a href="#">service-stream</a> <i>number</i>
Tree	<a href="#">service-stream</a>
Description	Commands in this context configure a service stream profile for the specified service test.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

**[stream-id]** *number*

Synopsis	Service stream ID
Context	<b>configure</b> <a href="#">test-oam</a> <a href="#">service-activation-testhead</a> <a href="#">service-test</a> <i>string</i> <a href="#">service-stream</a> <i>number</i>
Tree	<a href="#">service-stream</a>
Range	1 to 8
Notes	This element is part of a list key.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

**acceptance-criteria-template** *reference***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Acceptance criteria association to a service stream
Context	<b>configure</b> test-oam service-activation-testhead service-test <i>string</i> service-stream <i>number</i> acceptance-criteria-template <i>reference</i>
Tree	acceptance-criteria-template
Description	This command creates a link to an acceptance criteria template policy configured by the user for the specified service stream.  Assign the "default" acceptance criteria template to remove the existing template in a service stream.
Reference	<b>configure</b> test-oam service-activation-testhead acceptance-criteria-template <i>string</i>
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

### admin-state *keyword*

Synopsis	Administrative state of the service stream
Context	<b>configure</b> test-oam service-activation-testhead service-test <i>string</i> service-stream <i>number</i> admin-state <i>keyword</i>
Tree	admin-state
Options	enable, disable
Default	disable
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

### description *string*

#### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Text description

## frame-mix

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Enter the <b>frame-mix</b> context
Context	<b>configure</b> test-oam service-activation-testhead service-test <i>string</i> service-stream <i>number</i> frame-mix
Tree	frame-mix
Description	Commands in this context configure frame mixing for the specified service stream by referencing the frame size template.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

## frame-size-template *reference*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Frame size template for the service stream
Context	<b>configure</b> test-oam service-activation-testhead service-test <i>string</i> service-stream <i>number</i> frame-mix frame-size-template <i>reference</i>
Tree	frame-size-template
Description	This command configures the frame size template for the specified service stream. The user can assign the default <i>frame-size-tmpl-name</i> "default" to remove the existing template in a service stream.
Reference	<b>configure</b> test-oam service-activation-testhead frame-size-template <i>string</i>
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

## sequence *string*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Sequence of frame sizes for the service stream
Context	<b>configure</b> <a href="#">test-oam</a> <a href="#">service-activation-testhead</a> <a href="#">service-test</a> <i>string</i> <a href="#">service-stream</a> <i>number</i> <a href="#">frame-mix</a> <a href="#">sequence</a> <i>string</i>
Tree	<a href="#">sequence</a>
Description	This command configures the frame sequence for the specified service stream by referencing the <b>frame-size-template</b> configuration.
String Length	1 to 16
Default	a
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

## frame-payload

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Enter the <b>frame-payload</b> context
Context	<b>configure</b> <a href="#">test-oam</a> <a href="#">service-activation-testhead</a> <a href="#">service-test</a> <i>string</i> <a href="#">service-stream</a> <i>number</i> <a href="#">frame-payload</a>
Tree	<a href="#">frame-payload</a>
Description	Commands in this context configure packet header information used in frames generated by the testhead function.  Only the specified header information is included in the frame. At a minimum, the user must configure the Ethernet destination MAC address and ETH-CFM information to include in the frame payload configuration.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

## data-pattern

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Enter the <b>data-pattern</b> context
Context	<b>configure</b> <a href="#">test-oam</a> <a href="#">service-activation-testhead</a> <a href="#">service-test</a> <i>string</i> <a href="#">service-stream</a> <i>number</i> <a href="#">frame-payload</a> <a href="#">data-pattern</a>
Tree	<a href="#">data-pattern</a>

Description	Commands in this context configure the data pattern to populate the payload portion of the frame generated by the service activation testhead.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

### repeat (*hex-string* | *number*)

#### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Repeated 4-byte pattern to pad each packet sent
Context	<b>configure</b> <a href="#">test-oam</a> <a href="#">service-activation-testhead</a> <a href="#">service-test</a> <i>string</i> <a href="#">service-stream</a> <i>number</i> <a href="#">frame-payload</a> <a href="#">data-pattern</a> <b>repeat</b> ( <i>hex-string</i>   <i>number</i> )
Tree	<a href="#">repeat</a>
Description	This command configures the data pattern padding bytes for the frames launched for the service stream.  The specified data pattern value is repeated as many times as required to fill the remaining length of the payload for the highest level of the specified PDU. If only the Ethernet and ETH-CFM information is added, the data pattern is included in the data TLV of the ETH-CFM frame.
String Length	10
Max. Range	0 to 4294967295
Default	0x00000000
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

### ethernet

#### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Enter the <b>ethernet</b> context
Context	<b>configure</b> <a href="#">test-oam</a> <a href="#">service-activation-testhead</a> <a href="#">service-test</a> <i>string</i> <a href="#">service-stream</a> <i>number</i> <a href="#">frame-payload</a> <b>ethernet</b>
Tree	<a href="#">ethernet</a>
Description	Commands in this context configure the Ethernet header parameters and ETH-CFM information used by the testhead tool.

Only the specified header information is included in the frame. At a minimum, Ethernet MAC address and ETH-CFM information must be included.

Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

## c-tag

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Enter the <b>c-tag</b> context
Context	<b>configure</b> <a href="#">test-oam</a> <a href="#">service-activation-testhead</a> <a href="#">service-test</a> <i>string</i> <a href="#">service-stream</a> <i>number</i> <a href="#">frame-payload</a> <a href="#">ethernet</a> <b>c-tag</b>
Tree	<a href="#">c-tag</a>
Description	Commands in this context configure the customer VLAN tag (c-tag) information.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

## discard-eligible *boolean*

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Enable marking of the DEI bit in the VLAN header
Context	<b>configure</b> <a href="#">test-oam</a> <a href="#">service-activation-testhead</a> <a href="#">service-test</a> <i>string</i> <a href="#">service-stream</a> <i>number</i> <a href="#">frame-payload</a> <a href="#">ethernet</a> <b>c-tag</b> <b>discard-eligible</b> <i>boolean</i>
Tree	<a href="#">discard-eligible</a>
Description	When configured to <b>true</b> , the frame is discard eligible.
Default	false
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

## dot1p *number*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	PCP of Ethernet frames for service stream
Context	<b>configure</b> <a href="#">test-oam</a> <a href="#">service-activation-testhead</a> <a href="#">service-test</a> <i>string</i> <a href="#">service-stream</a> <i>number</i> <a href="#">frame-payload</a> <a href="#">ethernet</a> <a href="#">c-tag</a> <b>dot1p</b> <i>number</i>
Tree	<a href="#">dot1p</a>
Description	This command configures the priority code point (dot1p) value for the VLAN.
Range	0 to 7
Default	7
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

## dst-mac *string*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Destination MAC address of Ethernet frames
Context	<b>configure</b> <a href="#">test-oam</a> <a href="#">service-activation-testhead</a> <a href="#">service-test</a> <i>string</i> <a href="#">service-stream</a> <i>number</i> <a href="#">frame-payload</a> <a href="#">ethernet</a> <b>dst-mac</b> <i>string</i>
Tree	<a href="#">dst-mac</a>
Description	This command configures the unicast destination MAC address to use in the frame generated by the service activation testhead.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

## eth-cfm

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Enter the <b>eth-cfm</b> context
----------	----------------------------------

Context	<b>configure</b> <a href="#">test-oam</a> <a href="#">service-activation-testhead</a> <a href="#">service-test</a> <i>string</i> <a href="#">service-stream</a> <i>number</i> <a href="#">frame-payload</a> <a href="#">ethernet</a> <a href="#">eth-cfm</a>
Tree	<a href="#">eth-cfm</a>
Description	Commands in this context configure ETH-CFM source MEP, destination MAC, and the ETH-CFM PDU type to carry the service activation stream.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

## source

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Enter the <b>source</b> context
Context	<b>configure</b> <a href="#">test-oam</a> <a href="#">service-activation-testhead</a> <a href="#">service-test</a> <i>string</i> <a href="#">service-stream</a> <i>number</i> <a href="#">frame-payload</a> <a href="#">ethernet</a> <a href="#">eth-cfm</a> <a href="#">source</a>
Tree	<a href="#">source</a>
Description	Commands in this context define the source launch maintenance association end point (MEP) for service activation. If a MEP that matches this configuration does not exist, the service activation test does not start.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

## ma-admin-name *reference*

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Source Ethernet maintenance association name
Context	<b>configure</b> <a href="#">test-oam</a> <a href="#">service-activation-testhead</a> <a href="#">service-test</a> <i>string</i> <a href="#">service-stream</a> <i>number</i> <a href="#">frame-payload</a> <a href="#">ethernet</a> <a href="#">eth-cfm</a> <a href="#">source</a> <a href="#">ma-admin-name</a> <i>reference</i>
Tree	<a href="#">ma-admin-name</a>
Reference	<b>configure</b> <a href="#">eth-cfm</a> <a href="#">domain</a> <i>string</i> <a href="#">association</a> <i>string</i>
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

## md-admin-name *reference*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Source Ethernet maintenance domain name
Context	<b>configure</b> <a href="#">test-oam</a> <a href="#">service-activation-testhead</a> <a href="#">service-test</a> <i>string</i> <a href="#">service-stream</a> <i>number</i> <a href="#">frame-payload</a> <a href="#">ethernet</a> <a href="#">eth-cfm</a> <a href="#">source</a> <a href="#">md-admin-name</a> <i>reference</i>
Tree	<a href="#">md-admin-name</a>
Reference	<b>configure</b> <a href="#">eth-cfm</a> <a href="#">domain</a> <i>string</i>
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

## mep-id *number*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Source Ethernet maintenance association end point
Context	<b>configure</b> <a href="#">test-oam</a> <a href="#">service-activation-testhead</a> <a href="#">service-test</a> <i>string</i> <a href="#">service-stream</a> <i>number</i> <a href="#">frame-payload</a> <a href="#">ethernet</a> <a href="#">eth-cfm</a> <a href="#">source</a> <a href="#">mep-id</a> <i>number</i>
Tree	<a href="#">mep-id</a>
Range	1 to 8191
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

## s-tag

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Enter the <b>s-tag</b> context
Context	<b>configure</b> <a href="#">test-oam</a> <a href="#">service-activation-testhead</a> <a href="#">service-test</a> <i>string</i> <a href="#">service-stream</a> <i>number</i> <a href="#">frame-payload</a> <a href="#">ethernet</a> <a href="#">s-tag</a>
Tree	<a href="#">s-tag</a>

Description	Commands in this context configure service VLAN tag (s-tag) information specification.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

### discard-eligible *boolean*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Enable marking of the DEI bit in the VLAN header
Context	<b>configure</b> <a href="#">test-oam</a> <a href="#">service-activation-testhead</a> <a href="#">service-test</a> <i>string</i> <a href="#">service-stream</a> <i>number</i> <a href="#">frame-payload</a> <a href="#">ethernet s-tag</a> <b>discard-eligible</b> <i>boolean</i>
Tree	<a href="#">discard-eligible</a>
Description	When configured to <b>true</b> , the frame is discard eligible.
Default	false
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

### dot1p *number*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	PCP of Ethernet frames for service stream
Context	<b>configure</b> <a href="#">test-oam</a> <a href="#">service-activation-testhead</a> <a href="#">service-test</a> <i>string</i> <a href="#">service-stream</a> <i>number</i> <a href="#">frame-payload</a> <a href="#">ethernet s-tag</a> <b>dot1p</b> <i>number</i>
Tree	<a href="#">dot1p</a>
Description	This command configures the priority code point (dot1p) value for the VLAN.
Range	0 to 7
Default	7
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

**rate-cir number****WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	CIR packet transmit rate for the service stream
Context	<b>configure</b> <a href="#">test-oam</a> <a href="#">service-activation-testhead</a> <a href="#">service-test</a> <i>string</i> <a href="#">service-stream</a> <i>number</i> <b>rate-cir</b> <i>number</i>
Tree	<a href="#">rate-cir</a>
Description	<p>This command configures the CIR that must be validated for a specific stream. If configured, the PIR value must be equal to or greater than the CIR value.</p> <p>When specified, the CIR rate overrides the default CIR value. The configured value must be a positive integer; fractional values are not allowed. If this command is not executed, or the CIR parameter is not explicitly specified, the default CIR value applies.</p> <p>The service activation testhead generates traffic up to the specified rate based on the test-types command, as follows.</p> <ul style="list-style-type: none"> <li>• For <b>type cir</b>, traffic is generated at a rate up to the configured CIR.</li> <li>• For <b>type cir-pir</b>, traffic is generated at a rate up to the configured PIR.</li> <li>• For <b>type policing</b>, traffic is generated at a rate up to 125% of the configured PIR.</li> <li>• For <b>type performance</b>, traffic is generated at a rate up to the configured PIR.</li> </ul>
Range	0 to 400000000
Units	kilobps
Default	0
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

**rate-pir number****WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	PIR packet transmit rate for the service stream
Context	<b>configure</b> <a href="#">test-oam</a> <a href="#">service-activation-testhead</a> <a href="#">service-test</a> <i>string</i> <a href="#">service-stream</a> <i>number</i> <b>rate-pir</b> <i>number</i>
Tree	<a href="#">rate-pir</a>
Description	This command specifies the PIR rate, which overrides the default administrative PIR value. The configured value must be a positive integer; fractional values are not allowed.

If this command is not executed or the PIR parameter is not explicitly specified, the default PIR value applies.

The service activation testhead generates traffic up to the specified rate based on the test-types command, as follows.

- For **type cir**, traffic is generated at a rate up to the configured CIR.
- For **type cir-pir**, traffic is generated at a rate up to the configured PIR.
- For **type policing**, traffic is generated at a rate up to 125% of the configured PIR.
- For **type performance**, traffic is generated at a rate up to the configured PIR.

Range	0 to 400000000
Units	kilobps
Default	0
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

### service-stream-completion-notification *boolean*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Enable SNMP trap generation upon test completion
Context	<b>configure</b> test-oam service-activation-testhead service-test <i>string</i> service-stream <i>number</i> service-stream-completion-notification <i>boolean</i>
Tree	service-stream-completion-notification
Default	false
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

### test-types

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Enter the <b>test-types</b> context
Context	<b>configure</b> test-oam service-activation-testhead service-test <i>string</i> service-stream <i>number</i> test-types
Tree	test-types

Description	Commands in this context configure the types of tests to perform on a specific service stream.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

**cir boolean****WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	CIR test for the service stream
Context	<b>configure</b> <a href="#">test-oam</a> <a href="#">service-activation-testhead</a> <a href="#">service-test</a> <i>string</i> <a href="#">service-stream</a> <i>number</i> <a href="#">test-types</a> <a href="#">cir</a> <i>boolean</i>
Tree	<a href="#">cir</a>
Default	false
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

**cir-pir boolean****WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	CIR-PIR test for the service stream
Context	<b>configure</b> <a href="#">test-oam</a> <a href="#">service-activation-testhead</a> <a href="#">service-test</a> <i>string</i> <a href="#">service-stream</a> <i>number</i> <a href="#">test-types</a> <a href="#">cir-pir</a> <i>boolean</i>
Tree	<a href="#">cir-pir</a>
Default	false
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

**performance** *boolean***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Performance test for the service stream
Context	<b>configure</b> <a href="#">test-oam</a> <a href="#">service-activation-testhead</a> <a href="#">service-test</a> <i>string</i> <a href="#">service-stream</a> <i>number</i> <a href="#">test-types</a> <a href="#">performance</a> <i>boolean</i>
Tree	<a href="#">performance</a>
Default	false
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

**policing** *boolean***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Policing test for the service stream
Context	<b>configure</b> <a href="#">test-oam</a> <a href="#">service-activation-testhead</a> <a href="#">service-test</a> <i>string</i> <a href="#">service-stream</a> <i>number</i> <a href="#">test-types</a> <a href="#">policing</a> <i>boolean</i>
Tree	<a href="#">policing</a>
Default	false
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

**service-test-completion-notification** *boolean*

Synopsis	Enable SNMP trap generation upon test completion
Context	<b>configure</b> <a href="#">test-oam</a> <a href="#">service-activation-testhead</a> <a href="#">service-test</a> <i>string</i> <a href="#">service-test-completion-notification</a> <i>boolean</i>
Tree	<a href="#">service-test-completion-notification</a>
Default	false
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

**stream-run-type** *keyword*

Synopsis	Service stream run order
Context	<b>configure</b> <a href="#">test-oam</a> <a href="#">service-activation-testhead</a> <a href="#">service-test</a> <i>string</i> <b>stream-run-type</b> <i>keyword</i>
Tree	<a href="#">stream-run-type</a>
Options	sequential, parallel
Default	parallel
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

**test-duration**

Synopsis	Enter the <b>test-duration</b> context
Context	<b>configure</b> <a href="#">test-oam</a> <a href="#">service-activation-testhead</a> <a href="#">service-test</a> <i>string</i> <b>test-duration</b>
Tree	<a href="#">test-duration</a>
Description	Commands in this context configure the test duration for the various functional test types.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

**cir**

Synopsis	Enter the <b>cir</b> context
Context	<b>configure</b> <a href="#">test-oam</a> <a href="#">service-activation-testhead</a> <a href="#">service-test</a> <i>string</i> <b>test-duration</b> <b>cir</b>
Tree	<a href="#">cir</a>
Description	Commands in this context configure the duration for the CIR test type.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

**minutes-seconds** *string*

Synopsis	Duration of the service test CIR tests
Context	<b>configure</b> <a href="#">test-oam</a> <a href="#">service-activation-testhead</a> <a href="#">service-test</a> <i>string</i> <b>test-duration</b> <b>cir</b> <b>minutes-seconds</b> <i>string</i>
Tree	<a href="#">minutes-seconds</a>
String Length	5

Default	05:00
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

## **cir-pir**

Synopsis	Enter the <b>cir-pir</b> context
Context	<b>configure</b> <a href="#">test-oam</a> <a href="#">service-activation-testhead</a> <a href="#">service-test</a> <i>string</i> <a href="#">test-duration</a> <b>cir-pir</b>
Tree	<a href="#">cir-pir</a>
Description	Commands in this context configure the duration for the CIR-PIR test type.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

## **minutes-seconds** *string*

Synopsis	Duration of the service test CIR-PIR tests
Context	<b>configure</b> <a href="#">test-oam</a> <a href="#">service-activation-testhead</a> <a href="#">service-test</a> <i>string</i> <a href="#">test-duration</a> <b>cir-pir</b> <a href="#">minutes-seconds</a> <i>string</i>
Tree	<a href="#">minutes-seconds</a>
String Length	5
Default	10:00
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

## **performance**

Synopsis	Enter the <b>performance</b> context
Context	<b>configure</b> <a href="#">test-oam</a> <a href="#">service-activation-testhead</a> <a href="#">service-test</a> <i>string</i> <a href="#">test-duration</a> <b>performance</b>
Tree	<a href="#">performance</a>
Description	Commands in this context configure the duration for the performance test type.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

### hours-minutes-seconds *string*

Synopsis	Duration of performance tests belonging to the test
Context	<b>configure</b> <a href="#">test-oam</a> <a href="#">service-activation-testhead</a> <a href="#">service-test</a> <i>string</i> <a href="#">test-duration</a> <a href="#">performance</a> <a href="#">hours-minutes-seconds</a> <i>string</i>
Tree	<a href="#">hours-minutes-seconds</a>
String Length	8
Default	00:15:00
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

### policing

Synopsis	Enter the <b>policing</b> context
Context	<b>configure</b> <a href="#">test-oam</a> <a href="#">service-activation-testhead</a> <a href="#">service-test</a> <i>string</i> <a href="#">test-duration</a> <a href="#">policing</a>
Tree	<a href="#">policing</a>
Description	Commands in this context configure the duration for the policing test type.
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

### minutes-seconds *string*

Synopsis	Duration of policing tests belonging to the test
Context	<b>configure</b> <a href="#">test-oam</a> <a href="#">service-activation-testhead</a> <a href="#">service-test</a> <i>string</i> <a href="#">test-duration</a> <a href="#">policing</a> <a href="#">minutes-seconds</a> <i>string</i>
Tree	<a href="#">minutes-seconds</a>
String Length	5
Default	10:00
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

### twamp

Synopsis	Enter the <b>twamp</b> context
Context	<b>configure</b> <a href="#">test-oam</a> <a href="#">twamp</a>
Tree	<a href="#">twamp</a>

Introduced	16.0.R4
Platforms	All

## server

Synopsis	Enter the <b>server</b> context
Context	<b>configure</b> <a href="#">test-oam twamp server</a>
Tree	<a href="#">server</a>
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## admin-state *keyword*

Synopsis	Administrative state of the TWAMP server
Context	<b>configure</b> <a href="#">test-oam twamp server admin-state</a> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## allow-ipv6-udp-checksum-zero *boolean*

Synopsis	Process IPv6 packets with a zero UDP checksum
Context	<b>configure</b> <a href="#">test-oam twamp server allow-ipv6-udp-checksum-zero</a> <i>boolean</i>
Tree	<a href="#">allow-ipv6-udp-checksum-zero</a>
Description	<p>When configured to <b>true</b>, this command configures the acceptance of IPv6 packets with UDP checksums of 0. This optional configuration allows the router to process arriving IPv6 TWAMP Test packets that contain IPv6 UDP checksum of 0x0000. The UDP port specific to this TWAMP Light test bypasses the default discard IPv6 UDP checksum 0x0000. If this optional command is not configured, IPv6 UDP checksum 0x0000 arriving packets are discarded.</p> <p>When configured to <b>false</b>, packets that arrive with an IPv6 UDP checksum of 0x0000 are discarded.</p>
Default	false
Introduced	22.2.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**enforce-test-session-start-time** *boolean*

Synopsis	Discard TWAMP packets before test-session start time
Context	<b>configure</b> <a href="#">test-oam twamp server enforce-test-session-start-time</a> <i>boolean</i>
Tree	<a href="#">enforce-test-session-start-time</a>
Description	When configured to <b>true</b> , the router checks the signalled test-session start time against the server time and discards TWAMP test packets that arrive before the negotiated test-session start time.  When configured to <b>false</b> , the router processes all TWAMP test packets without checking the test-session start time against the server time.
Default	true
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**inactivity-timeout** *number***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Inactivity timeout for TWAMP control connections
Context	<b>configure</b> <a href="#">test-oam twamp server inactivity-timeout</a> <i>number</i>
Tree	<a href="#">inactivity-timeout</a>
Range	60 to 3600
Units	seconds
Default	900
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**max-connections** *number***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Limit of concurrent TWAMP server control connections
Context	<b>configure</b> <a href="#">test-oam twamp server max-connections</a> <i>number</i>

Tree	<a href="#">max-connections</a>
Range	0 to 64
Default	32
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **max-sessions** *number*

#### **WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Maximum number of concurrent TWAMP server test sessions
Context	<b>configure</b> <a href="#">test-oam twamp server max-sessions</a> <i>number</i>
Tree	<a href="#">max-sessions</a>
Range	0 to 128
Default	32
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **prefix** [[ip-prefix](#)] (*ipv4-prefix* | *ipv6-prefix*)

Synopsis	Enter the <b>prefix</b> list instance
Context	<b>configure</b> <a href="#">test-oam twamp server prefix</a> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> )
Tree	<a href="#">prefix</a>
Max. Instances	100
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **[ip-prefix]** (*ipv4-prefix* | *ipv6-prefix*)

Synopsis	Prefix to match against TWAMP client address
Context	<b>configure</b> <a href="#">test-oam twamp server prefix</a> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> )
Tree	<a href="#">prefix</a>
Notes	This element is part of a list key.

Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">test-oam twamp server prefix</a> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> ) <a href="#">description string</a>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **max-connections** *number*

Synopsis	Maximum number of control connections for TWAMP prefix
Context	<b>configure</b> <a href="#">test-oam twamp server prefix</a> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> ) <a href="#">max-connections number</a>
Tree	<a href="#">max-connections</a>
Range	0 to 64
Default	32
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **max-sessions** *number*

Synopsis	Maximum concurrent TWAMP test sessions based on prefix
Context	<b>configure</b> <a href="#">test-oam twamp server prefix</a> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> ) <a href="#">max-sessions number</a>
Tree	<a href="#">max-sessions</a>
Range	0 to 128
Default	32
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **twamp-light**

Synopsis	Enter the <b>twamp-light</b> context
----------	--------------------------------------

---

Context	<b>configure</b> <a href="#">test-oam twamp twamp-light</a>
Tree	<a href="#">twamp-light</a>
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **inactivity-timeout** *number*

Synopsis	Time to maintain stale state on the session reflector
Context	<b>configure</b> <a href="#">test-oam twamp twamp-light inactivity-timeout</a> <i>number</i>
Tree	<a href="#">inactivity-timeout</a>
Range	10 to 100
Units	seconds
Default	100
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **source-udp-port-pools**

Synopsis	Enter the <b>source-udp-port-pools</b> context
Context	<b>configure</b> <a href="#">test-oam twamp twamp-light source-udp-port-pools</a>
Tree	<a href="#">source-udp-port-pools</a>
Introduced	22.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **port** [[port-number](#)] *number*

Synopsis	Enter the <b>port</b> list instance
Context	<b>configure</b> <a href="#">test-oam twamp twamp-light source-udp-port-pools port</a> <i>number</i>
Tree	<a href="#">port</a>
Introduced	22.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **[port-number]** *number*

Synopsis	Source UDP port pools port number
----------	-----------------------------------

Context	<b>configure</b> <i>test-oam twamp twamp-light source-udp-port-pools port number</i>
Tree	<a href="#">port</a>
Range	64374 to 64383
Notes	This element is part of a list key.
Introduced	22.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **pool-type** *keyword*

Synopsis	Pool type of an application pool
Context	<b>configure</b> <i>test-oam twamp twamp-light source-udp-port-pools port number pool-type keyword</i>
Tree	<a href="#">pool-type</a>
Description	<p>This command maps the specified source UDP port to the TWAMP Light application allowed to configure the source UDP port. OAM-PM IP tests can only configure the source UDP port when the port pool UDP source port is configured with a <b>pool-type oam-pm</b>. The <b>test-oam link-measurement measurement-template</b> can only configure the <b>src-udp-port</b> when the port pool UDP source port is configured with <b>pool-type link-measurement</b>.</p> <p>A pool type cannot be changed if its current application is a test (either an oam-pm session or link-measurement template) and is configured to use the specified port, regardless of the administrative or operational state. The configuration reference linking to the source UDP prevents the change.</p>
Options	oam-pm, link-measurement
Default	oam-pm
Introduced	22.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### 3.48.1 vrrp command descriptions

#### **vrrp**

Synopsis	Enter the <b>vrrp</b> context
Context	<b>configure vrrp</b>
Tree	<a href="#">vrrp</a>
Introduced	16.0.R1
Platforms	All

#### **policy** [[policy-id](#)] *number*

Synopsis	Enter the <b>policy</b> list instance
Context	<b>configure vrrp policy</b> <i>number</i>
Tree	<a href="#">policy</a>
Introduced	16.0.R1
Platforms	All

#### **[policy-id]** *number*

Synopsis	Policy ID
Context	<b>configure vrrp policy</b> <i>number</i>
Tree	<a href="#">policy</a>
Range	1 to 9999
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

#### **admin-state** *keyword*

Synopsis	Administrative state of VRRP priority control policy
Context	<b>configure vrrp policy</b> <i>number</i> <b>admin-state</b> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	enable

Introduced 16.0.R1  
Platforms All

### **context** *string*

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis Service name to which this policy applies  
Context **configure vrrp policy number context string**  
Tree [context](#)  
String Length 1 to 64  
Introduced 16.0.R1  
Platforms All

### **delta-in-use-limit** *number*

Synopsis Limit on the delta priority control events  
Context **configure vrrp policy number delta-in-use-limit number**  
Tree [delta-in-use-limit](#)  
Range 1 to 254  
Default 1  
Introduced 16.0.R1  
Platforms All

### **description** *string*

Synopsis Text description  
Context **configure vrrp policy number description string**  
Tree [description](#)  
String Length 1 to 80  
Introduced 16.0.R1  
Platforms All

## priority-event

Synopsis	Enter the <b>priority-event</b> context
Context	<b>configure vrrp policy number priority-event</b>
Tree	<a href="#">priority-event</a>
Introduced	16.0.R1
Platforms	All

## host-unreachable [[ip-address](#)] (*ipv4-address-with-zone* | *ipv6-address-with-zone*)

Synopsis	Enter the <b>host-unreachable</b> list instance
Context	<b>configure vrrp policy number priority-event host-unreachable</b> ( <i>ipv4-address-with-zone</i>   <i>ipv6-address-with-zone</i> )
Tree	<a href="#">host-unreachable</a>
Introduced	16.0.R1
Platforms	All

## [[ip-address](#)] (*ipv4-address-with-zone* | *ipv6-address-with-zone*)

Synopsis	Host IP address that receives a constant ping probe
Context	<b>configure vrrp policy number priority-event host-unreachable</b> ( <i>ipv4-address-with-zone</i>   <i>ipv6-address-with-zone</i> )
Tree	<a href="#">host-unreachable</a>
Description	This command configures the host IP address for which the specific host unreachable priority event monitors connectivity with a continuous ICMP echo request (ping) probe.
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

## drop-count *number*

Synopsis	Threshold for consecutive message send attempts
Context	<b>configure vrrp policy number priority-event host-unreachable</b> ( <i>ipv4-address-with-zone</i>   <i>ipv6-address-with-zone</i> ) <b>drop-count number</b>
Tree	<a href="#">drop-count</a>
Range	1 to 60
Default	3

Introduced	16.0.R1
Platforms	All

### **hold-clear** *number*

Synopsis	Delay time for a cleared event on the router instance
Context	<b>configure</b> <a href="#">vrrp policy</a> <i>number</i> <a href="#">priority-event host-unreachable</a> ( <i>ipv4-address-with-zone   ipv6-address-with-zone</i> ) <b>hold-clear</b> <i>number</i>
Tree	<a href="#">hold-clear</a>
Range	1 to 86400
Units	seconds
Introduced	16.0.R1
Platforms	All

### **hold-set** *number*

Synopsis	Hold time before transitioning to cleared state
Context	<b>configure</b> <a href="#">vrrp policy</a> <i>number</i> <a href="#">priority-event host-unreachable</a> ( <i>ipv4-address-with-zone   ipv6-address-with-zone</i> ) <b>hold-set</b> <i>number</i>
Tree	<a href="#">hold-set</a>
Range	1 to 86400
Units	seconds
Introduced	16.0.R1
Platforms	All

### **padding-size** *number*

Synopsis	Packet length padding of the ICMP packet
Context	<b>configure</b> <a href="#">vrrp policy</a> <i>number</i> <a href="#">priority-event host-unreachable</a> ( <i>ipv4-address-with-zone   ipv6-address-with-zone</i> ) <b>padding-size</b> <i>number</i>
Tree	<a href="#">padding-size</a>
Range	0 to 16384
Units	bytes
Default	56
Introduced	16.0.R1
Platforms	All

## priority

Synopsis	Enter the <b>priority</b> context
Context	<b>configure vrrp policy number priority-event host-unreachable</b> ( <i>ipv4-address-with-zone   ipv6-address-with-zone</i> ) <b>priority</b>
Tree	<a href="#">priority</a>
Introduced	16.0.R1
Platforms	All

## event-type *keyword*

Synopsis	Effect of priority-level value on base priority value
Context	<b>configure vrrp policy number priority-event host-unreachable</b> ( <i>ipv4-address-with-zone   ipv6-address-with-zone</i> ) <b>priority event-type keyword</b>
Tree	<a href="#">event-type</a>
Options	delta, explicit
Default	delta
Introduced	16.0.R1
Platforms	All

## priority-level *number*

Synopsis	Priority level associated with this event
Context	<b>configure vrrp policy number priority-event host-unreachable</b> ( <i>ipv4-address-with-zone   ipv6-address-with-zone</i> ) <b>priority priority-level number</b>
Tree	<a href="#">priority-level</a>
Range	1 to 254
Introduced	16.0.R1
Platforms	All

## request-interval *number*

Synopsis	Time interval between consecutive ICMP echo requests
Context	<b>configure vrrp policy number priority-event host-unreachable</b> ( <i>ipv4-address-with-zone   ipv6-address-with-zone</i> ) <b>request-interval number</b>
Tree	<a href="#">request-interval</a>

Range	1 to 60
Units	seconds
Default	1
Introduced	16.0.R1
Platforms	All

**timeout** *number*

Synopsis	Timeout for ICMP echo request messages
Context	<b>configure</b> <a href="#">vrrp policy</a> <i>number</i> <a href="#">priority-event</a> <a href="#">host-unreachable</a> ( <i>ipv4-address-with-zone</i>   <i>ipv6-address-with-zone</i> ) <a href="#">timeout</a> <i>number</i>
Tree	<a href="#">timeout</a>
Range	1 to 60
Units	seconds
Default	1
Introduced	16.0.R1
Platforms	All

**lag-port-down** [[lag-name](#)] *string*

Synopsis	Enter the <b>lag-port-down</b> list instance
Context	<b>configure</b> <a href="#">vrrp policy</a> <i>number</i> <a href="#">priority-event</a> <a href="#">lag-port-down</a> <i>string</i>
Tree	<a href="#">lag-port-down</a>
Introduced	16.0.R1
Platforms	All

**[lag-name]** *string*

Synopsis	LAG name
Context	<b>configure</b> <a href="#">vrrp policy</a> <i>number</i> <a href="#">priority-event</a> <a href="#">lag-port-down</a> <i>string</i>
Tree	<a href="#">lag-port-down</a>
String Length	1 to 27
Notes	This element is part of a list key.
Introduced	21.2.R1
Platforms	All

**hold-clear** *number*

Synopsis	Delay time for a cleared event on the router instance
Context	<b>configure</b> <i>vrp policy number priority-event lag-port-down string hold-clear number</i>
Tree	<a href="#">hold-clear</a>
Range	1 to 86400
Units	seconds
Introduced	16.0.R1
Platforms	All

**hold-set** *number*

Synopsis	Hold time before transitioning to cleared state
Context	<b>configure</b> <i>vrp policy number priority-event lag-port-down string hold-set number</i>
Tree	<a href="#">hold-set</a>
Range	1 to 86400
Units	seconds
Introduced	16.0.R1
Platforms	All

**number-down** [[number-of-lag-ports-down](#)] *number*

Synopsis	Enter the <b>number-down</b> list instance
Context	<b>configure</b> <i>vrp policy number priority-event lag-port-down string number-down number</i>
Tree	<a href="#">number-down</a>
Introduced	16.0.R1
Platforms	All

**[number-of-lag-ports-down]** *number*

Synopsis	Threshold of down LAG ports that create a set event
Context	<b>configure</b> <i>vrp policy number priority-event lag-port-down string number-down number</i>
Tree	<a href="#">number-down</a>
Range	1 to 64
Notes	This element is part of a list key.

Introduced	16.0.R1
Platforms	All

## priority

Synopsis	Enter the <b>priority</b> context
Context	<b>configure</b> <a href="#">vrrp policy number</a> <a href="#">priority-event lag-port-down string</a> <a href="#">number-down number</a> <a href="#">priority</a>
Tree	<a href="#">priority</a>
Introduced	16.0.R1
Platforms	All

## event-type *keyword*

Synopsis	Effect of priority-level value on base priority value
Context	<b>configure</b> <a href="#">vrrp policy number</a> <a href="#">priority-event lag-port-down string</a> <a href="#">number-down number</a> <a href="#">priority event-type keyword</a>
Tree	<a href="#">event-type</a>
Options	delta, explicit
Default	delta
Introduced	16.0.R1
Platforms	All

## priority-level *number*

Synopsis	Priority level associated with this event
Context	<b>configure</b> <a href="#">vrrp policy number</a> <a href="#">priority-event lag-port-down string</a> <a href="#">number-down number</a> <a href="#">priority priority-level number</a>
Tree	<a href="#">priority-level</a>
Range	1 to 254
Introduced	16.0.R1
Platforms	All

## weight-down [[lag-ports-down-weight](#)] *number*

Synopsis	Enter the <b>weight-down</b> list instance
----------	--

Context	<b>configure</b> <i>vrrp policy number priority-event lag-port-down string weight-down number</i>
Tree	<i>weight-down</i>
Introduced	16.0.R1
Platforms	All

### **[lag-ports-down-weight]** *number*

Synopsis	LAG name for the reduced LAG ports
Context	<b>configure</b> <i>vrrp policy number priority-event lag-port-down string weight-down number</i>
Tree	<i>weight-down</i>
Range	1 to 64
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

### **priority**

Synopsis	Enter the <b>priority</b> context
Context	<b>configure</b> <i>vrrp policy number priority-event lag-port-down string weight-down number priority</i>
Tree	<i>priority</i>
Introduced	16.0.R1
Platforms	All

### **event-type** *keyword*

Synopsis	Effect of priority-level value on base priority value
Context	<b>configure</b> <i>vrrp policy number priority-event lag-port-down string weight-down number priority event-type keyword</i>
Tree	<i>event-type</i>
Options	delta, explicit
Default	delta
Introduced	16.0.R1
Platforms	All

**priority-level** *number*

Synopsis	Priority level associated with this event
Context	<b>configure</b> <a href="#">vrrp policy</a> <i>number</i> <a href="#">priority-event lag-port-down</a> <i>string</i> <a href="#">weight-down</a> <i>number</i> <a href="#">priority</a> <a href="#">priority-level</a> <i>number</i>
Tree	<a href="#">priority-level</a>
Range	1 to 254
Introduced	16.0.R1
Platforms	All

**mc-ipsec-non-forwarding** [[tunnel-group-id](#)] *number*

Synopsis	Enter the <b>mc-ipsec-non-forwarding</b> list instance
Context	<b>configure</b> <a href="#">vrrp policy</a> <i>number</i> <a href="#">priority-event mc-ipsec-non-forwarding</a> <i>number</i>
Tree	<a href="#">mc-ipsec-non-forwarding</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**[tunnel-group-id]** *number*

Synopsis	IPSEC tunnel group monitored by priority control event
Context	<b>configure</b> <a href="#">vrrp policy</a> <i>number</i> <a href="#">priority-event mc-ipsec-non-forwarding</a> <i>number</i>
Tree	<a href="#">mc-ipsec-non-forwarding</a>
Range	1 to 64
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**hold-clear** *number*

Synopsis	Delay time for a cleared event on the router instance
Context	<b>configure</b> <a href="#">vrrp policy</a> <i>number</i> <a href="#">priority-event mc-ipsec-non-forwarding</a> <i>number</i> <a href="#">hold-clear</a> <i>number</i>
Tree	<a href="#">hold-clear</a>
Range	1 to 86400
Units	seconds

Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **hold-set** *number*

Synopsis	Hold time before transitioning to cleared state
Context	<b>configure</b> <a href="#">vrrp policy</a> <i>number</i> <a href="#">priority-event mc-ipsec-non-forwarding</a> <i>number</i> <b>hold-set</b> <i>number</i>
Tree	<a href="#">hold-set</a>
Range	1 to 86400
Units	seconds
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **priority**

Synopsis	Enter the <b>priority</b> context
Context	<b>configure</b> <a href="#">vrrp policy</a> <i>number</i> <a href="#">priority-event mc-ipsec-non-forwarding</a> <i>number</i> <b>priority</b>
Tree	<a href="#">priority</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **event-type** *keyword*

Synopsis	Event type
Context	<b>configure</b> <a href="#">vrrp policy</a> <i>number</i> <a href="#">priority-event mc-ipsec-non-forwarding</a> <i>number</i> <b>priority</b> <a href="#">event-type</a> <i>keyword</i>
Tree	<a href="#">event-type</a>
Options	delta, explicit
Default	delta
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **priority-level** *number*

Synopsis	Priority level associated with this event
----------	---

Context	<b>configure</b> <i>vrrp policy number priority-event mc-ipsec-non-forwarding number priority priority-level number</i>
Tree	<a href="#">priority-level</a>
Range	1 to 254
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **port-down** [[port-id](#)] *string*

Synopsis	Enter the <b>port-down</b> list instance
Context	<b>configure</b> <i>vrrp policy number priority-event port-down string</i>
Tree	<a href="#">port-down</a>
Introduced	16.0.R1
Platforms	All

### **[port-id]** *string*

Synopsis	Port ID for the reduced LAG ports
Context	<b>configure</b> <i>vrrp policy number priority-event port-down string</i>
Tree	<a href="#">port-down</a>
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

### **hold-clear** *number*

Synopsis	Delay time for a cleared event on the router instance
Context	<b>configure</b> <i>vrrp policy number priority-event port-down string hold-clear number</i>
Tree	<a href="#">hold-clear</a>
Range	1 to 86400
Units	seconds
Introduced	16.0.R1
Platforms	All

**hold-set** *number*

Synopsis	Hold time before transitioning to cleared state
Context	<b>configure</b> <a href="#">vrrp policy</a> <i>number</i> <a href="#">priority-event</a> <a href="#">port-down</a> <i>string</i> <b>hold-set</b> <i>number</i>
Tree	<a href="#">hold-set</a>
Range	1 to 86400
Units	seconds
Introduced	16.0.R1
Platforms	All

**priority**

Synopsis	Enter the <b>priority</b> context
Context	<b>configure</b> <a href="#">vrrp policy</a> <i>number</i> <a href="#">priority-event</a> <a href="#">port-down</a> <i>string</i> <b>priority</b>
Tree	<a href="#">priority</a>
Introduced	16.0.R1
Platforms	All

**event-type** *keyword*

Synopsis	Effect of priority-level value on base priority value
Context	<b>configure</b> <a href="#">vrrp policy</a> <i>number</i> <a href="#">priority-event</a> <a href="#">port-down</a> <i>string</i> <a href="#">priority</a> <b>event-type</b> <i>keyword</i>
Tree	<a href="#">event-type</a>
Options	delta, explicit
Default	delta
Introduced	16.0.R1
Platforms	All

**priority-level** *number*

Synopsis	Priority level associated with this event
Context	<b>configure</b> <a href="#">vrrp policy</a> <i>number</i> <a href="#">priority-event</a> <a href="#">port-down</a> <i>string</i> <a href="#">priority</a> <b>priority-level</b> <i>number</i>
Tree	<a href="#">priority-level</a>
Range	1 to 254
Introduced	16.0.R1

Platforms All

### **route-unknown** [[ip-prefix](#)] (*ipv4-prefix* | *ipv6-prefix*)

Synopsis Enter the **route-unknown** list instance

Context **configure** [vrrp policy](#) *number* [priority-event](#) [route-unknown](#) (*ipv4-prefix* | *ipv6-prefix*)

Tree [route-unknown](#)

Introduced 16.0.R1

Platforms All

### **[ip-prefix]** (*ipv4-prefix* | *ipv6-prefix*)

Synopsis IP prefix of route monitored by priority control event

Context **configure** [vrrp policy](#) *number* [priority-event](#) [route-unknown](#) (*ipv4-prefix* | *ipv6-prefix*)

Tree [route-unknown](#)

Notes This element is part of a list key.

Introduced 16.0.R1

Platforms All

### **hold-clear** *number*

Synopsis Delay time for a cleared event on the router instance

Context **configure** [vrrp policy](#) *number* [priority-event](#) [route-unknown](#) (*ipv4-prefix* | *ipv6-prefix*)  
[hold-clear](#) *number*

Tree [hold-clear](#)

Range 1 to 86400

Units seconds

Introduced 16.0.R1

Platforms All

### **hold-set** *number*

Synopsis Hold time before transitioning to cleared state

Context **configure** [vrrp policy](#) *number* [priority-event](#) [route-unknown](#) (*ipv4-prefix* | *ipv6-prefix*)  
[hold-set](#) *number*

Tree [hold-set](#)

Range	1 to 86400
Units	seconds
Introduced	16.0.R1
Platforms	All

## less-specific

Synopsis	Enable the <b>less-specific</b> context
Context	<b>configure</b> <b>vrp</b> <b>policy</b> <i>number</i> <b>priority-event</b> <b>route-unknown</b> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> ) <b>less-specific</b>
Tree	<b>less-specific</b>
Introduced	16.0.R1
Platforms	All

## allow-default *boolean*

Synopsis	Match on default route
Context	<b>configure</b> <b>vrp</b> <b>policy</b> <i>number</i> <b>priority-event</b> <b>route-unknown</b> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> ) <b>less-specific</b> <b>allow-default</b> <i>boolean</i>
Tree	<b>allow-default</b>
Default	false
Introduced	16.0.R1
Platforms	All

## next-hop [*ip-address*] (*ipv4-address-with-zone* | *ipv6-address-with-zone*)

Synopsis	Add a list entry for <b>next-hop</b>
Context	<b>configure</b> <b>vrp</b> <b>policy</b> <i>number</i> <b>priority-event</b> <b>route-unknown</b> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> ) <b>next-hop</b> ( <i>ipv4-address-with-zone</i>   <i>ipv6-address-with-zone</i> )
Tree	<b>next-hop</b>
Introduced	19.5.R1
Platforms	All

## [*ip-address*] (*ipv4-address-with-zone* | *ipv6-address-with-zone*)

Synopsis	Next-hop IP address for a returned route prefix
----------	---

Context	<b>configure vrrp policy number priority-event route-unknown</b> ( <i>ipv4-prefix   ipv6-prefix</i> ) <b>next-hop</b> ( <i>ipv4-address-with-zone   ipv6-address-with-zone</i> )
Tree	<b>next-hop</b>
Description	This command configures the next-hop IP address used to match the route prefix being monitored by the priority control event with the results of a route table lookup.
Notes	This element is part of a list key.
Introduced	19.5.R1
Platforms	All

## priority

Synopsis	Enter the <b>priority</b> context
Context	<b>configure vrrp policy number priority-event route-unknown</b> ( <i>ipv4-prefix   ipv6-prefix</i> ) <b>priority</b>
Tree	<b>priority</b>
Introduced	16.0.R1
Platforms	All

## event-type keyword

Synopsis	Effect of priority-level value on base priority value
Context	<b>configure vrrp policy number priority-event route-unknown</b> ( <i>ipv4-prefix   ipv6-prefix</i> ) <b>priority event-type keyword</b>
Tree	<b>event-type</b>
Options	delta, explicit
Default	delta
Introduced	16.0.R1
Platforms	All

## priority-level number

Synopsis	Priority level associated with this event
Context	<b>configure vrrp policy number priority-event route-unknown</b> ( <i>ipv4-prefix   ipv6-prefix</i> ) <b>priority priority-level number</b>
Tree	<b>priority-level</b>
Range	1 to 254

---

Introduced	16.0.R1
Platforms	All

### **protocol** *keyword*

Synopsis	Routing protocol as match criterion
Context	<b>configure</b> <b>vrp policy</b> <i>number</i> <b>priority-event</b> <b>route-unknown</b> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> ) <b>protocol</b> <i>keyword</i>
Tree	<b>protocol</b>
Options	bgp, ospf, isis, rip, static, bgp-vpn
Max. Instances	6
Introduced	16.0.R1
Platforms	All

## 4 Deprecated and obsolete commands

This section lists the deprecated and obsolete commands in this major release.

## 4.1 Deprecated commands

This chapter provides a list of commands that are marked as “status deprecated” in the Nokia YANG models and the MD-CLI and should no longer be used. Only releases in which commands are initially deprecated are included in this section. If applicable, the equivalent configuration groups command is also deprecated (but not explicitly listed).

See the SR OS Software Release Notes for more information.

### 4.1.1 23.3.R1

#### **subscriber-mgmt commands:**

- configure subscriber-mgmt radius-accounting-policy triggered-updates gtp-mobility

### 4.1.2 23.10.R2

#### **filter commands:**

- configure filter ip-filter entry action forward next-hop interface-name

## 4.2 Obsolete commands

This chapter provides a list of commands that are marked as “status obsolete” in the Nokia YANG models and the MD-CLI. These commands can no longer be used and are considered invalid. Only releases in which commands are initially obsoleted are included in this section. If applicable, the equivalent configuration groups command is also obsoleted (but not explicitly listed).

See the SR OS Software Release Notes for more information.

### 4.2.1 23.3.R1

#### aaa commands:

- configure aaa diameter peer-policy
- configure aaa diameter peer-policy applications
- configure aaa diameter peer-policy applications gx
- configure aaa diameter peer-policy applications gy
- configure aaa diameter peer-policy applications nasreq
- configure aaa diameter peer-policy apply-groups
- configure aaa diameter peer-policy apply-groups-exclude
- configure aaa diameter peer-policy connection-timer
- configure aaa diameter peer-policy description
- configure aaa diameter peer-policy ipv4-source-address
- configure aaa diameter peer-policy ipv6-source-address
- configure aaa diameter peer-policy name
- configure aaa diameter peer-policy origin-host
- configure aaa diameter peer-policy origin-realm
- configure aaa diameter peer-policy peer
- configure aaa diameter peer-policy peer address
- configure aaa diameter peer-policy peer admin-state
- configure aaa diameter peer-policy peer apply-groups
- configure aaa diameter peer-policy peer apply-groups-exclude
- configure aaa diameter peer-policy peer connection-timer
- configure aaa diameter peer-policy peer destination-host
- configure aaa diameter peer-policy peer destination-realm
- configure aaa diameter peer-policy peer peer-name
- configure aaa diameter peer-policy peer preference
- configure aaa diameter peer-policy peer statistics
- configure aaa diameter peer-policy peer transaction-timer

- configure aaa diameter peer-policy peer transport
- configure aaa diameter peer-policy peer transport port-number
- configure aaa diameter peer-policy peer watchdog-timer
- configure aaa diameter peer-policy proxy
- configure aaa diameter peer-policy proxy admin-state
- configure aaa diameter peer-policy proxy local-address
- configure aaa diameter peer-policy proxy mcs-peer
- configure aaa diameter peer-policy proxy mcs-peer address
- configure aaa diameter peer-policy proxy mcs-peer apply-groups
- configure aaa diameter peer-policy proxy mcs-peer apply-groups-exclude
- configure aaa diameter peer-policy proxy mcs-peer sync-tag
- configure aaa diameter peer-policy proxy router-instance
- configure aaa diameter peer-policy python-policy
- configure aaa diameter peer-policy role
- configure aaa diameter peer-policy router-instance
- configure aaa diameter peer-policy transaction-timer
- configure aaa diameter peer-policy vendor-support
- configure aaa diameter peer-policy watchdog-timer

**isa commands:**

- configure isa video-group ad-insert
- configure isa video-group rt-client

**lag commands:**

- configure lag port-weight-speed
- configure lag weight-threshold
- configure lag weight-threshold action
- configure lag weight-threshold cost
- configure lag weight-threshold value

**python commands:**

- configure python python-policy vsd
- configure python python-policy vsd apply-groups
- configure python python-policy vsd apply-groups-exclude
- configure python python-policy vsd script

**redundancy commands:**

- configure redundancy multi-chassis peer sync diameter-proxy

**router commands:**

- configure router interface ip-tunnel

- configure router interface ip-tunnel remote-ip
- configure router nat inside large-scale dual-stack-lite deterministic policy-map
- configure router nat inside large-scale dual-stack-lite deterministic policy-map admin-state
- configure router nat inside large-scale dual-stack-lite deterministic policy-map apply-groups
- configure router nat inside large-scale dual-stack-lite deterministic policy-map apply-groups-exclude
- configure router nat inside large-scale dual-stack-lite deterministic policy-map map
- configure router nat inside large-scale dual-stack-lite deterministic policy-map map apply-groups
- configure router nat inside large-scale dual-stack-lite deterministic policy-map map apply-groups-exclude
- configure router nat inside large-scale dual-stack-lite deterministic policy-map map first-outside-address
- configure router nat inside large-scale dual-stack-lite deterministic policy-map map from
- configure router nat inside large-scale dual-stack-lite deterministic policy-map map to
- configure router nat inside large-scale dual-stack-lite deterministic policy-map nat-policy
- configure router nat inside large-scale dual-stack-lite deterministic policy-map source-prefix
- configure router nat inside large-scale nat44 deterministic policy-map
- configure router nat inside large-scale nat44 deterministic policy-map admin-state
- configure router nat inside large-scale nat44 deterministic policy-map apply-groups
- configure router nat inside large-scale nat44 deterministic policy-map apply-groups-exclude
- configure router nat inside large-scale nat44 deterministic policy-map map
- configure router nat inside large-scale nat44 deterministic policy-map map apply-groups
- configure router nat inside large-scale nat44 deterministic policy-map map apply-groups-exclude
- configure router nat inside large-scale nat44 deterministic policy-map map first-outside-address
- configure router nat inside large-scale nat44 deterministic policy-map map from
- configure router nat inside large-scale nat44 deterministic policy-map map to
- configure router nat inside large-scale nat44 deterministic policy-map nat-policy
- configure router nat inside large-scale nat44 deterministic policy-map source-prefix

**service commands:**

- configure service ies video-interface adi
- configure service ies video-interface adi scte30
- configure service ies video-interface adi scte30 ad-server
- configure service ies video-interface adi scte30 ad-server address
- configure service ies video-interface adi scte30 local-address
- configure service ies video-interface adi scte30 local-address apply-groups
- configure service ies video-interface adi scte30 local-address apply-groups-exclude
- configure service ies video-interface adi scte30 local-address control
- configure service ies video-interface adi scte30 local-address data
- configure service ies video-interface rt-client

- configure service ies video-interface rt-client apply-groups
- configure service ies video-interface rt-client apply-groups-exclude
- configure service ies video-interface rt-client src-address
- configure service vprn nat inside large-scale dual-stack-lite deterministic policy-map
- configure service vprn nat inside large-scale dual-stack-lite deterministic policy-map admin-state
- configure service vprn nat inside large-scale dual-stack-lite deterministic policy-map apply-groups
- configure service vprn nat inside large-scale dual-stack-lite deterministic policy-map apply-groups-exclude
- configure service vprn nat inside large-scale dual-stack-lite deterministic policy-map map
- configure service vprn nat inside large-scale dual-stack-lite deterministic policy-map map apply-groups
- configure service vprn nat inside large-scale dual-stack-lite deterministic policy-map map apply-groups-exclude
- configure service vprn nat inside large-scale dual-stack-lite deterministic policy-map map first-outside-address
- configure service vprn nat inside large-scale dual-stack-lite deterministic policy-map map from
- configure service vprn nat inside large-scale dual-stack-lite deterministic policy-map map to
- configure service vprn nat inside large-scale dual-stack-lite deterministic policy-map nat-policy
- configure service vprn nat inside large-scale dual-stack-lite deterministic policy-map source-prefix
- configure service vprn nat inside large-scale nat44 deterministic policy-map
- configure service vprn nat inside large-scale nat44 deterministic policy-map admin-state
- configure service vprn nat inside large-scale nat44 deterministic policy-map apply-groups
- configure service vprn nat inside large-scale nat44 deterministic policy-map apply-groups-exclude
- configure service vprn nat inside large-scale nat44 deterministic policy-map map
- configure service vprn nat inside large-scale nat44 deterministic policy-map map apply-groups
- configure service vprn nat inside large-scale nat44 deterministic policy-map map apply-groups-exclude
- configure service vprn nat inside large-scale nat44 deterministic policy-map map first-outside-address
- configure service vprn nat inside large-scale nat44 deterministic policy-map map from
- configure service vprn nat inside large-scale nat44 deterministic policy-map map to
- configure service vprn nat inside large-scale nat44 deterministic policy-map nat-policy
- configure service vprn nat inside large-scale nat44 deterministic policy-map source-prefix
- configure service vprn video-interface adi
- configure service vprn video-interface adi scte30
- configure service vprn video-interface adi scte30 ad-server
- configure service vprn video-interface adi scte30 ad-server address
- configure service vprn video-interface adi scte30 local-address
- configure service vprn video-interface adi scte30 local-address apply-groups
- configure service vprn video-interface adi scte30 local-address apply-groups-exclude

- configure service vprn video-interface adi scte30 local-address control
- configure service vprn video-interface adi scte30 local-address data
- configure service vprn video-interface rt-client
- configure service vprn video-interface rt-client apply-groups
- configure service vprn video-interface rt-client apply-groups-exclude
- configure service vprn video-interface rt-client src-address

**subscriber-mgmt commands:**

- configure subscriber-mgmt bgp-peering-policy prefix-limit
- configure subscriber-mgmt diameter-gx-policy peer-policy
- configure subscriber-mgmt diameter-gy-policy peer-policy
- configure subscriber-mgmt diameter-nasreq-policy peer-policy

**system commands:**

- configure system management-interface netconf capabilities writable-running
- configure system management-interface yang-modules base-r13-modules
- configure system security cli-script authorization vsd
- configure system security cli-script authorization vsd cli-user

#### 4.2.2 23.3.R2

**subscriber-mgmt commands:**

- configure subscriber-mgmt pfcf association association-setup-retry
