3.43.1 service command descriptions

service

| | |
|------------|----------------------------------|
| Synopsis | Enter the service context |
| Context | configure service |
| Tree | service |
| Introduced | 16.0.R1 |
| Platforms | All |

cpipe [[service-name](#)] *string*

| | |
|------------|--|
| Synopsis | Enter the cpipe list instance |
| Context | configure service cpipe string |
| Tree | cpipe |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

[service-name] *string*

| | |
|---------------|--|
| Synopsis | Administrative service name |
| Context | configure service cpipe string |
| Tree | cpipe |
| String Length | 1 to 64 |
| Notes | This element is part of a list key. |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

admin-state *keyword*

| | |
|----------|---|
| Synopsis | Administrative state of the service |
| Context | configure service cpipe string admin-state keyword |
| Tree | admin-state |
| Default | disable |
| Options | enable, disable |

Introduced 20.10.R1
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

customer *reference*

WARNING:

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis Service customer ID
 Context **configure** *service cpipe string customer reference*
 Tree *customer*
 Reference **configure** *service customer string*
 Notes This element is mandatory.
 Introduced 20.10.R1
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

description *string*

Synopsis Text description
 Context **configure** *service cpipe string description string*

|------------|---|
| Synopsis | Enter the report-alarm context |
| Context | configure service cpipe string sap string cem report-alarm |
| Tree | report-alarm |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

buffer-overflow *boolean*

| | |
|------------|--|
| Synopsis | Report alarm for buffer overflow |
| Context | configure service cpipe string sap string cem report-alarm buffer-overflow <i>boolean</i> |
| Tree | buffer-overflow |
| Default | true |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

buffer-underflow *boolean*

| | |
|------------|---|
| Synopsis | Report alarm for buffer underflow |
| Context | configure service cpipe string sap string cem report-alarm buffer-underflow <i>boolean</i> |
| Tree | buffer-underflow |
| Default | true |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

malformed-packets *boolean*

| | |
|------------|--|
| Synopsis | Report alarm for malformed packets |
| Context | configure service cpipe string sap string cem report-alarm malformed-packets <i>boolean</i> |
| Tree | malformed-packets |
| Default | true |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

packet-loss *boolean*

| | |
|------------|--|
| Synopsis | Report remote peer is currently in packet loss status |
| Context | configure service cpipe string sap string cem report-alarm packet-loss <i>boolean</i> |
| Tree | packet-loss |
| Default | true |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

remote-fault *boolean*

| | |
|------------|---|
| Synopsis | Report remote TDM interface is currently not in service |
| Context | configure service cpipe string sap string cem report-alarm remote-fault <i>boolean</i> |
| Tree | remote-fault |
| Default | false |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

remote-packet-loss *boolean*

| | |
|------------|---|
| Synopsis | Report remote peer is currently in packet loss status |
| Context | configure service cpipe string sap string cem report-alarm remote-packet-loss <i>boolean</i> |
| Tree | remote-packet-loss |
| Default | false |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

remote-rdi *boolean*

| | |
|------------|---|
| Synopsis | Report remote TDM interface is currently in RDI status |
| Context | configure service cpipe string sap string cem report-alarm remote-rdi <i>boolean</i> |
| Tree | remote-rdi |
| Default | false |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

stray-packets *boolean*

| | |
|------------|--|
| Synopsis | Report alarm for stray packets |
| Context | configure service cpipe string sap string cem report-alarm stray-packets <i>boolean</i> |
| Tree | stray-packets |
| Default | true |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

rtp-header *boolean*

| | |
|------------|--|
| Synopsis | Use RTP header for transmitted packets to the PSN |
| Context | configure service cpipe string sap string cem rtp-header <i>boolean</i> |
| Tree | rtp-header |
| Default | false |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR-7/12/12e, 7750 SR-a, 7750 SR-e |

collect-stats *boolean*

| | |
|------------|---|
| Synopsis | Collect accounting statistics |
| Context | configure service cpipe string sap string collect-stats <i>boolean</i> |
| Tree | collect-stats |
| Default | false |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

| Tree | egress |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

agg-rate

| | |
|------------|--|
| Synopsis | Enter the agg-rate context |
| Context | configure service cpipe <i>string</i> sap <i>string</i> egress agg-rate |
| Tree | agg-rate |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

adaptation-rule *keyword*

| | |
|------------|---|
| Synopsis | Adaptation rule to compute the operational PIR value when an aggregate shaper is used |
| Context | configure service cpipe <i>string</i> sap <i>string</i> egress agg-rate adaptation-rule <i>keyword</i> |
| Tree | adaptation-rule |
| Default | closest |
| Options | max, min, closest |
| Introduced | 22.10.R1 |
| Platforms | 7750 SR-1, 7750 SR-s |

burst-limit (*number* | *keyword*)

| | |
|------------|---|
| Synopsis | Shaping burst size when an aggregate shaper is used |
| Context | configure service cpipe <i>string</i> sap <i>string</i> egress agg-rate burst-limit (<i>number</i> <i>keyword</i>) |
| Tree | burst-limit |
| Range | 1 to 14000000 |
| Default | auto |
| Units | bytes |
| Options | auto |
| Introduced | 22.10.R1 |
| Platforms | 7750 SR-1, 7750 SR-s |

limit-unused-bandwidth *boolean*

| | |
|------------|--|
| Synopsis | Enable aggregate rate overrun protection |
| Context | configure service cpipe <i>string</i> sap <i>string</i> egress agg-rate limit-unused-bandwidth <i>boolean</i> |
| Tree | limit-unused-bandwidth |
| Default | false |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

rate *number*

| | |
|----------|---|
| Synopsis | Enforced aggregate rate for all queues |
| Context | configure service cpipe <i>string</i> sap <i>string</i> egress agg-rate rate <i>number</i> |

| | |
|------------|--|
| Tree | rate |
| Range | 1 to 6400000000 |
| Units | kilobps |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

qos

| | |
|------------|---|
| Synopsis | Enter the qos context |
| Context | configure service cpipe string sap string egress qos |
| Tree | qos |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

policer-control-policy

| | |
|------------|--|
| Synopsis | Enter the policer-control-policy context |
| Context | configure service cpipe string sap string egress qos policer-control-policy |
| Tree | policer-control-policy |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS |

overrides

| | |
|------------|--|
| Synopsis | Enable the overrides context |
| Context | configure service cpipe string sap string egress qos policer-control-policy overrides |
| Tree | overrides |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS |

root

| | |
|----------|---|
| Synopsis | Enter the root context |
| Context | configure service cpipe string sap string egress qos policer-control-policy overrides root |
| Tree | root |

Introduced 20.10.R1
 Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS

max-rate (*number* | *keyword*)

Synopsis Maximum frame-based bandwidth limit
 Context **configure** [service](#) [cpipe](#) *string* [sap](#) *string* [egress](#) [qos](#) [policer-control-policy](#) [overrides](#) [root](#)
[max-rate](#) (*number* | *keyword*)
 Tree [max-rate](#)
 Range 1 to 6400000000
 Options max
 Introduced 20.10.R1
 Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS

priority-mbs-thresholds

Synopsis Enter the **priority-mbs-thresholds** context
 Context **configure** [service](#) [cpipe](#) *string* [sap](#) *string* [egress](#) [qos](#) [policer-control-policy](#) [overrides](#) [root](#)
[priority-mbs-thresholds](#)
 Tree [priority-mbs-thresholds](#)
 Introduced 20.10.R1
 Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS

min-thresh-separation (*number* | *keyword*)

Synopsis Minimum amount of separation buffer space
 Context **configure** [service](#) [cpipe](#) *string* [sap](#) *string* [egress](#) [qos](#) [policer-control-policy](#) [overrides](#) [root](#)
[priority-mbs-thresholds](#) [min-thresh-separation](#) (*number* | *keyword*)
 Tree [min-thresh-separation](#)
 Range 0 to 16777216
 Units bytes
 Options auto
 Introduced 20.10.R1
 Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS

priority [*priority-level*] *number*

| | |
|------------|---|
| Synopsis | Enter the priority list instance |
| Context | configure service cpipe <i>string</i> sap <i>string</i> egress qos policer-control-policy overrides root priority-mbs-thresholds priority <i>number</i> |
| Tree | priority |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS |

[priority-level] *number*

| | |
|------------|---|
| Synopsis | Priority level |
| Context | configure service cpipe <i>string</i> sap <i>string</i> egress qos policer-control-policy overrides root priority-mbs-thresholds priority <i>number</i> |
| Tree | priority |
| Range | 1 to 8 |
| Notes | This element is part of a list key. |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS |

mbs-contribution (*number* | *keyword*)

| | |
|------------|--|
| Synopsis | Minimum amount of cumulative buffer space allowed |
| Context | configure service cpipe <i>string</i> sap <i>string</i> egress qos policer-control-policy overrides root priority-mbs-thresholds priority <i>number</i> mbs-contribution (<i>number</i> <i>keyword</i>) |
| Tree | mbs-contribution |
| Range | 0 to 16777216 |
| Units | bytes |
| Options | auto |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS |

policy-name *reference*

| | |
|----------|--|
| Synopsis | Policer control policy name |
| Context | configure service cpipe <i>string</i> sap <i>string</i> egress qos policer-control-policy policy-name <i>reference</i> |

| | |
|------------|---|
| Tree | policy-name |
| Reference | configure qos policer-control-policy <i>string</i> |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS |

sap-egress

| | |
|------------|--|
| Synopsis | Enter the sap-egress context |
| Context | configure service cpipe <i>string</i> sap <i>string</i> egress qos sap-egress |
| Tree | sap-egress |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

overrides

| | |
|------------|--|
| Synopsis | Enter the overrides context |
| Context | configure service cpipe <i>string</i> sap <i>string</i> egress qos sap-egress overrides |
| Tree | overrides |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

policer [[policer-id](#)] *reference*

| | |
|------------|---|
| Synopsis | Enter the policer list instance |
| Context | configure service cpipe <i>string</i> sap <i>string</i> egress qos sap-egress overrides policer <i>reference</i> |
| Tree | policer |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS |

[[policer-id](#)] *reference*

| | |
|----------|---|
| Synopsis | Policer unique ID |
| Context | configure service cpipe <i>string</i> sap <i>string</i> egress qos sap-egress overrides policer <i>reference</i> |
| Tree | policer |

| | |
|------------|--|
| Reference | configure qos sap-egress <i>string</i> policer <i>number</i> |
| Notes | This element is part of a list key. |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS |

cbs (*number* | *keyword*)

| | |
|------------|--|
| Synopsis | CBS |
| Context | configure service cpipe <i>string</i> sap <i>string</i> egress qos sap-egress overrides policer
<i>reference</i> cbs (<i>number</i> <i>keyword</i>) |
| Tree | cbs |
| Range | 0 to 268435456 |
| Units | bytes |
| Options | auto |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS |

mbs (*number* | *keyword*)

| | |
|------------|--|
| Synopsis | MBS |
| Context | configure service cpipe <i>string</i> sap <i>string</i> egress qos sap-egress overrides policer
<i>reference</i> mbs (<i>number</i> <i>keyword</i>) |
| Tree | mbs |
| Range | 0 to 268435456 |
| Units | bytes |
| Options | auto |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS |

packet-byte-offset *number*

| | |
|----------|--|
| Synopsis | Packet size modification for policing information |
| Context | configure service cpipe <i>string</i> sap <i>string</i> egress qos sap-egress overrides policer
<i>reference</i> packet-byte-offset <i>number</i> |
| Tree | packet-byte-offset |
| Range | -64 to 31 |

| | |
|------------|---|
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS |

percent-rate

| | |
|------------|--|
| Synopsis | Enter the percent-rate context |
| Context | configure service cpipe string sap string egress qos sap-egress overrides policer reference percent-rate |
| Tree | percent-rate |
| Notes | The following elements are part of a choice: percent-rate or rate . |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS |

cir decimal-number

| | |
|------------|--|
| Synopsis | CIR percent rate |
| Context | configure service cpipe string sap string egress qos sap-egress overrides policer reference percent-rate cir <i>decimal-number</i> |
| Tree | cir |
| Range | 0.00 to 100.00 |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS |

pir decimal-number

| | |
|------------|--|
| Synopsis | PIR percent rate |
| Context | configure service cpipe string sap string egress qos sap-egress overrides policer reference percent-rate pir <i>decimal-number</i> |
| Tree | pir |
| Range | 0.01 to 100.00 |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS |

rate

| | |
|----------|-------------------------------|
| Synopsis | Enter the rate context |
|----------|-------------------------------|

| | |
|------------|---|
| Context | configure service cpipe string sap string egress qos sap-egress overrides policer reference rate |
| Tree | rate |
| Notes | The following elements are part of a choice: percent-rate or rate . |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS |

cir (number | keyword)

| | |
|------------|--|
| Synopsis | CIR rate |
| Context | configure service cpipe string sap string egress qos sap-egress overrides policer reference rate cir (number keyword) |
| Tree | cir |
| Range | 0 to 6400000000 |
| Units | kilobps |
| Options | max |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS |

pir (number | keyword)

| | |
|------------|--|
| Synopsis | PIR rate |
| Context | configure service cpipe string sap string egress qos sap-egress overrides policer reference rate pir (number keyword) |
| Tree | pir |
| Range | 1 to 6400000000 |
| Units | kilobps |
| Options | max |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS |

stat-mode keyword

| | |
|----------|--|
| Synopsis | Mode of statistics collected by the policer |
| Context | configure service cpipe string sap string egress qos sap-egress overrides policer reference stat-mode keyword |

| | |
|------------|--|
| Tree | stat-mode |
| Options | no-stats, minimal, offered-profile-no-cir, offered-total-cir, offered-profile-cir, offered-limited-capped-cir, offered-profile-capped-cir, offered-total-cir-exceed, offered-four-profile-no-cir, offered-total-cir-four-profile |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS |

queue [[queue-id](#)] *reference*

| | |
|------------|---|
| Synopsis | Enter the queue list instance |
| Context | configure service cpipe <i>string</i> sap <i>string</i> egress qos sap-egress overrides queue <i>reference</i> |
| Tree | queue |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

[queue-id] *reference*

| | |
|------------|---|
| Synopsis | Policer unique ID |
| Context | configure service cpipe <i>string</i> sap <i>string</i> egress qos sap-egress overrides queue <i>reference</i> |
| Tree | queue |
| Reference | configure qos sap-egress <i>string</i> queue <i>number</i> |
| Notes | This element is part of a list key. |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

adaptation-rule

| | |
|------------|---|
| Synopsis | Enter the adaptation-rule context |
| Context | configure service cpipe <i>string</i> sap <i>string</i> egress qos sap-egress overrides queue <i>reference</i> adaptation-rule |
| Tree | adaptation-rule |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

cir keyword

| | |
|------------|---|
| Synopsis | Constraint used when deriving the operational CIR value |
| Context | configure service cpipe string sap string egress qos sap-egress overrides queue
reference adaptation-rule cir keyword |
| Tree | cir |
| Options | max, min, closest |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

pir keyword

| | |
|------------|---|
| Synopsis | Constraint used when deriving the operational PIR value |
| Context | configure service cpipe string sap string egress qos sap-egress overrides queue
reference adaptation-rule pir keyword |
| Tree | pir |
| Options | max, min, closest |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

avg-frame-overhead decimal-number

| | |
|------------|---|
| Synopsis | Average packet-to-frame encapsulation overhead |
| Context | configure service cpipe string sap string egress qos sap-egress overrides queue
reference avg-frame-overhead decimal-number |
| Tree | avg-frame-overhead |
| Range | 0.00 to 100.00 |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

burst-limit (number | keyword)

| | |
|----------|--|
| Synopsis | Explicit shaping burst size for the queue |
| Context | configure service cpipe string sap string egress qos sap-egress overrides queue
reference burst-limit (number keyword) |
| Tree | burst-limit |
| Range | 1 to 14000000 |

| | |
|------------|--|
| Units | bytes |
| Options | auto |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

cbs (*number* | *keyword*)

| | |
|------------|--|
| Synopsis | CBS |
| Context | configure service cpipe string sap string egress qos sap-egress overrides queue
<i>reference</i> cbs (<i>number</i> <i>keyword</i>) |
| Tree | cbs |
| Range | 0 to 1048576 |
| Units | kilobytes |
| Options | auto |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

drop-tail

| | |
|------------|---|
| Synopsis | Enter the drop-tail context |
| Context | configure service cpipe string sap string egress qos sap-egress overrides queue
<i>reference</i> drop-tail |
| Tree | drop-tail |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

low

| | |
|------------|--|
| Synopsis | Enter the low context |
| Context | configure service cpipe string sap string egress qos sap-egress overrides queue
<i>reference</i> drop-tail low |
| Tree | low |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

percent-reduction-from-mbs (*number* | *keyword*)

| | |
|------------|--|
| Synopsis | Percentage reduction from the MBS for a queue drop tail |
| Context | configure service cpipe <i>string</i> sap <i>string</i> egress qos sap-egress overrides queue reference drop-tail low percent-reduction-from-mbs (<i>number</i> <i>keyword</i>) |
| Tree | percent-reduction-from-mbs |
| Range | 0 to 100 |
| Options | auto |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

hs-class-weight *number*

| | |
|------------|--|
| Synopsis | Class weight override for the queue |
| Context | configure service cpipe <i>string</i> sap <i>string</i> egress qos sap-egress overrides queue reference hs-class-weight <i>number</i> |
| Tree | hs-class-weight |
| Range | 1 2 4 8 |
| Introduced | 20.10.R1 |
| Platforms | 7750 SR-7/12/12e |

hs-wred-queue

| | |
|------------|--|
| Synopsis | Enter the hs-wred-queue context |
| Context | configure service cpipe <i>string</i> sap <i>string</i> egress qos sap-egress overrides queue reference hs-wred-queue |
| Tree | hs-wred-queue |
| Introduced | 20.10.R1 |
| Platforms | 7750 SR-7/12/12e |

policy *reference*

| | |
|-----------|--|
| Synopsis | Slope policy applied to the HSQ queue group queue |
| Context | configure service cpipe <i>string</i> sap <i>string</i> egress qos sap-egress overrides queue reference hs-wred-queue policy <i>reference</i> |
| Tree | policy |
| Reference | configure qos slope-policy <i>string</i> |

Introduced 20.10.R1
 Platforms 7750 SR-7/12/12e

hs-wrr-weight *number*

Synopsis Weighted Round Robin (WRR) weight to parent with this queue into the scheduler
 Context **configure** [service](#) [cpipe](#) [string](#) [sap](#) [string](#) [egress](#) [qos](#) [sap-egress](#) [overrides](#) [queue](#)
reference **hs-wrr-weight** *number*
 Tree [hs-wrr-weight](#)
 Range 1 to 127
 Default 1
 Introduced 20.10.R1
 Platforms 7750 SR-7/12/12e

mbs (*number* | *keyword*)

Synopsis MBS
 Context **configure** [service](#) [cpipe](#) [string](#) [sap](#) [string](#) [egress](#) [qos](#) [sap-egress](#) [overrides](#) [queue](#)
reference **mbs** (*number* | *keyword*)
 Tree [mbs](#)
 Range 0 to 1073741824
 Units bytes
 Options auto
 Introduced 20.10.R1
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

monitor-queue-depth

Synopsis Enable the **monitor-queue-depth** context
 Context **configure** [service](#) [cpipe](#) [string](#) [sap](#) [string](#) [egress](#) [qos](#) [sap-egress](#) [overrides](#) [queue](#)
reference **monitor-queue-depth**
 Tree [monitor-queue-depth](#)
 Introduced 20.10.R1
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

fast-polling *boolean*

| | |
|-------------|---|
| Synopsis | Enable fast polling of the queue depth |
| Context | configure service cpipe string sap string egress qos sap-egress overrides queue reference monitor-queue-depth fast-polling <i>boolean</i> |
| Tree | fast-polling |
| Description | When configured to true , this command enables fast polling of the queue depth. Faster polling allows a more accurate view of the actual depth.
When configured to false , fast queue polling is not enabled. |
| Default | false |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

violation-threshold *decimal-number*

| | |
|-------------|---|
| Synopsis | Threshold for queue depth before violation is raised |
| Context | configure service cpipe string sap string egress qos sap-egress overrides queue reference monitor-queue-depth violation-threshold <i>decimal-number</i> |
| Tree | violation-threshold |
| Description | This command specifies the threshold for the queue MBS. When the queue depth exceeds the threshold value, a violation is registered. |
| Range | 0.01 to 99.99 |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

parent

| | |
|------------|--|
| Synopsis | Enter the parent context |
| Context | configure service cpipe string sap string egress qos sap-egress overrides queue reference parent |
| Tree | parent |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

cir-weight *number*

| | |
|----------|---|
| Synopsis | CIR parameter that overrides parent for queue group |
|----------|---|

| | |
|------------|---|
| Context | configure service cpipe string sap string egress qos sap-egress overrides queue reference parent cir-weight number |
| Tree | cir-weight |
| Range | 0 to 100 |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

weight number

| | |
|------------|---|
| Synopsis | PIR parameter that overrides parent for queue group |
| Context | configure service cpipe string sap string egress qos sap-egress overrides queue reference parent weight number |
| Tree | weight |
| Range | 0 to 100 |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

percent-rate

| | |
|------------|---|
| Synopsis | Enter the percent-rate context |
| Context | configure service cpipe string sap string egress qos sap-egress overrides queue reference percent-rate |
| Tree | percent-rate |

[scheduler-name] *string*

| | |
|---------------|--|
| Synopsis | Scheduler name |
| Context | configure service cpipe <i>string</i> sap <i>string</i> egress qos scheduler-policy overrides
scheduler <i>string</i> |
| Tree | scheduler |
| Description | <p>This command specifies the scheduler name which is composed of printable 7-bit ASCII characters. If the string contains special characters (#, \$, spaces, and so on), the entire string must be enclosed within double quotes. Each scheduler must have a unique name within the context of the scheduler policy. However, the same name can be reused in multiple scheduler policies. If the scheduler name already exists within the policy tier level, the context changes to that scheduler name for the purpose of editing the scheduler commands.</p> <p>If the scheduler name exists within the policy on a different tier, an error occurs and the current context will not change. If the scheduler name does not exist in this or another tier within the scheduler policy, it is assumed that an attempt is being made to create a scheduler of that name.</p> <p>If the provided scheduler name is invalid, a name syntax error will occur, the command will not execute, and the context will not change.</p> |
| String Length | 1 to 32 |
| Notes | This element is part of a list key. |
| Introduced | 20.10.R1 |

scheduler [[scheduler-name](#)] *string*

| | |
|------------|--|
| Synopsis | Enter the scheduler list instance |
| Context | configure service cpipe string sap string ingress qos scheduler-policy overrides
scheduler <i>string</i> |
| Tree | scheduler |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

[[scheduler-name](#)] *string*

| | |
|---------------|--|
| Synopsis | Scheduler name |
| Context | configure service cpipe string sap string ingress qos scheduler-policy overrides
scheduler <i>string</i> |
| Tree | scheduler |
| Description | <p>This command specifies the scheduler name which is composed of printable 7-bit ASCII characters. If the string contains special characters (#, \$, spaces, and so on), the entire string must be enclosed within double quotes. Each scheduler must have a unique name within the context of the scheduler policy. However, the same name can be reused in multiple scheduler policies. If the scheduler name already exists within the policy tier level, the context changes to that scheduler name for the purpose of editing the scheduler commands.</p> <p>If the scheduler name exists within the policy on a different tier, an error occurs and the current context will not change. If the scheduler name does not exist in this or another tier within the scheduler policy, it is assumed that an attempt is being made to create a scheduler of that name.</p> <p>If the provided scheduler name is invalid, a name syntax error will occur, the command will not execute, and the context will not change.</p> |
| String Length | 1 to 32 |
| Notes | This element is part of a list key. |
| Introduced | 20.10.R1 |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

Context **configure service customer** *string* **multi-service-site** *string* **egress scheduler-policy overrides scheduler** *string*

Tree [scheduler](#)

Introduced 16.0.R1

Platforms All

[scheduler-name] *string*

Synopsis Scheduler name

Context **configure service customer** *string* **multi-service-site** *string* **egress scheduler-policy overrides scheduler** *string*

Tree [scheduler](#)

Description This command specifies the scheduler name which is composed of printable 7-bit ASCII characters. If the string contains special characters (**#**, **\$**, spaces, and so on), the entire string must be enclosed within double quotes. Each scheduler must have a unique name within the context of the scheduler policy. However, the same name can be reused in multiple scheduler policies. If the scheduler name already exists within the policy tier level, the context changes to that scheduler name for the purpose of editing the scheduler commands.

If the scheduler name exists within the policy on a different tier, an error occurs and the current context will not change. If the scheduler name does not exist in this or another tier within the scheduler policy, it is assumed that an attempt is being made to create a scheduler of that name.

If the provided scheduler name is invalid, a name syntax error occurs, the command does not execute, and the context does not change.

String Length 1 to 32

adv-service-mtu *number*

Synopsis Advertised service MTU value

Context **configure** *service* *epipe* *string* *bgp* *number* **adv-service-mtu** *number*

Tree [adv-service-mtu](#)

Description This command configures the MTU signaled value used in the BGP for the service. When configured, the router uses the value for signaling and for validation with the received MTU instead of the service MTU. However, the value does not affect the locally enforced value, which is still based on the service MTU.

bgp *boolean*

| | |
|-------------|--|
| Synopsis | Use BGP tunneling for next-hop resolution |
| Context | configure service epipe <i>string</i> bgp-evpn mpls <i>number</i> auto-bind-tunnel resolution-filter bgp <i>boolean</i> |
| Tree | bgp |
| Description | When configured to true , BGP searches the BGP LSP for the address of the BGP next hop. |

When configured to **false**, BGP tunneling is not used and inter-area or inter-as prefixes are not resolved.

| | |
|------------|---------|
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

ldp *boolean*

| | |
|-------------|---|
| Synopsis | Use LDP tunneling for next-hop resolution |
| Context | configure service epipe <i>string</i> bgp-evpn mpls <i>number</i> auto-bind-tunnel resolution-filter
ldp <i>boolean</i> |
| Tree | ldp |
| Description | When configured to true , BGP searches for an LDP LSP with a FEC prefix corresponding to the address of the BGP next hop.
When configured to false , LDP tunneling is not used for next-hop resolution. |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

mpls-fwd-policy *boolean*

| | |
|-------------|---|
| Synopsis | Use MPLS forwarding policy for next-hop resolution |
| Context | configure service epipe <i>string</i> bgp-evpn mpls <i>number</i> auto-bind-tunnel resolution-filter
mpls-fwd-policy <i>boolean</i> |
| Tree | mpls-fwd-policy |
| Description | When configured to true , BGP uses the MPLS forwarding policy to determine the address of the BGP next hop.
When configured to false , the MPLS forwarding policy is not used for next-hop resolution. |
| Default | false |
| Introduced | 19.5.R1 |
| Platforms | All |

rib-api *boolean*

| | |
|----------|--|
| Synopsis | Use RIB API gRPC service for next-hop resolution |
|----------|--|

| | |
|-------------|---|
| Context | configure service epipe <i>string</i> bgp-evpn mpls <i>number</i> auto-bind-tunnel resolution-filter rib-api <i>boolean</i> |
| Tree | rib-api |
| Description | When configured to true , BGP uses tunnels programmed using the RIB API gRPC service to resolve the next hops of routes imported into the EVPN service.
When configured to false , the RIB API service tunnels are not used for next-hop resolution. |
| Default | false |
| Introduced | 19.5.R1 |
| Platforms | All |

rsvp *boolean*

| | |
|-------------|---|
| Synopsis | Use RSVP tunneling for next-hop resolution |
| Context | configure service epipe <i>string</i> bgp-evpn mpls <i>number</i> auto-bind-tunnel resolution-filter rsvp <i>boolean</i> |
| Tree | rsvp |
| Description | When configured to true , BGP searches the best metric RSVP LSP to determine the address of the BGP next hop. This address can correspond to the system interface or to another loopback interface used by the BGP instance on the remote node. The LSP metric is provided by MPLS in the tunnel table. In the case of multiple RSVP LSPs with the same lowest metric, BGP selects the LSP with the lowest tunnel ID.
When configured to false , the RSVP LSP is not used for next-hop resolution. |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

sr-isis *boolean*

| | |
|-------------|---|
| Synopsis | Use IS-IS SR tunneling for next-hop resolution |
| Context | configure service epipe <i>string</i> bgp-evpn mpls <i>number</i> auto-bind-tunnel resolution-filter sr-isis <i>boolean</i> |
| Tree | sr-isis |
| Description | When configured to true , BGP uses an IS-IS tunnel type to determine the address of the BGP next hop.
The SR tunnel to the BGP next hop is selected in the TTM from the lowest-numbered IS-IS instance.
When configured to false , IS-IS tunneling is not used for next-hop resolution. |

| | |
|------------|---------|
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

sr-ospf *boolean*

| | |
|-------------|---|
| Synopsis | Use OSPF SR tunneling for next-hop resolution |
| Context | configure service epipe <i>string</i> bgp-evpn mpls <i>number</i> auto-bind-tunnel resolution-filter sr-ospf <i>boolean</i> |
| Tree | sr-ospf |
| Description | <p>When configured to true, BGP uses an OSPF tunnel type to determine the address of the BGP next hop.</p> <p>The SR tunnel to the BGP next hop is selected in the TTM from the lowest-numbered OPSF instance.</p> <p>When configured to false, OSPF tunneling is not used for next-hop resolution.</p> |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

sr-ospf3 *boolean*

| | |
|-------------|--|
| Synopsis | Use OSPFv3 SR tunneling for next-hop resolution |
| Context | configure service epipe <i>string</i> bgp-evpn mpls <i>number</i> auto-bind-tunnel resolution-filter sr-ospf3 <i>boolean</i> |
| Tree | sr-ospf3 |
| Description | <p>When configured to true, BGP uses an OSPF3 tunnel type to determine the address of the BGP next hop.</p> <p>The SR tunnel to the BGP next hop is selected in the TTM from the lowest-numbered OPSF3 instance.</p> <p>When configured to false, OSPF3 tunneling is not used for next-hop resolution.</p> |
| Default | false |
| Introduced | 19.10.R1 |
| Platforms | All |

sr-policy *boolean*

| | |
|----------|---|
| Synopsis | Use SR policies for next-hop resolution |
|----------|---|

| | |
|-------------|--|
| Context | configure service epipe <i>string</i> bgp-evpn mpls <i>number</i> auto-bind-tunnel resolution-filter sr-policy <i>boolean</i> |
| Tree | sr-policy |
| Description | When configured to true , this command instructs BGP to use an SR policy to determine the address of the BGP next hop. The SR policy search criteria includes a non-null endpoint and color value that matches the BGP next hop and color extended community value, respectively, of the EVPN route.

When configured to false , SR policies are not used for next-hop resolution. |
| Default | false |
| Introduced | 19.5.R1 |
| Platforms | All |

sr-te *boolean*

| | |
|-------------|--|
| Synopsis | Use SR-TE tunneling for next-hop resolution |
| Context | configure service epipe <i>string</i> bgp-evpn mpls <i>number</i> auto-bind-tunnel resolution-filter sr-te <i>boolean</i> |
| Tree | sr-te |
| Description | When configured to true , BGP uses an SR-TE tunnel type to determine the address of the BGP next hop.

The SR tunnel to the BGP next hop is selected in the TTM from the lowest-numbered tunnel ID.

When configured to false , SR-TE tunneling is not used for next-hop resolution. |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

udp *boolean*

| | |
|-------------|--|
| Synopsis | Use MPLS over UDP tunneling for next-hop resolution |
| Context | configure service epipe <i>string</i> bgp-evpn mpls <i>number</i> auto-bind-tunnel resolution-filter udp <i>boolean</i> |
| Tree | udp |
| Description | When configured to true , BGP uses an MPLS over UDP tunnel type to determine the address of the BGP next hop.

When configured to false , MPLS over UDP tunneling is not used for next-hop resolution. |
| Default | false |
| Introduced | 16.0.R1 |

Platforms All

weighted-ecmp *boolean*

Synopsis Allow weighted load balancing

Context **configure** *service* *epipe string* *bgp-evpn mpls number* *auto-bind-tunnel* *weighted-ecmp boolean*

Tree [weighted-ecmp](#)

Description When configured to **true**, this router enables weighted ECMP for packets using tunnels that a VPLS or Epipe automatically binds to. Packets are sprayed across LSPs in the ECMP according to the outcome of the hash algorithm and the configured load balancing weight of each LSP.

When configured to **false**, this command disables weighted ECMP for next-hop tunnel selection.

Default false

Introduced 22.7.R1

Platforms All

default-route-tag *string*

WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis Default route tag

| | |
|-------------|--|
| Context | configure <i>service epipe string bgp-evpn mpls number default-route-tag string</i> |
| Tree | default-route-tag |
| Description | <p>This command configures a route tag that is used when sending a route to the BGP application (for the corresponding service and BGP instance). If the corresponding BGP instance is enabled, the command cannot be changed.</p> <p>When used for BGP EVPN contexts, only one route tag can be passed to BGP for matching on export policies. In case of a conflict with other route tags pushed by EVPN, the default route tag has the least priority.</p> <p>The following are examples of the conflict priority handling:</p> <ul style="list-style-type: none"> • If a service is configured with both default-route-tag X and proxy-arp evpn-route-tag Y, the EVPN uses route tag Y when sending EVPN proxy-arp routes to the BGP RIB for advertisement. • If a given IP-prefix route is tagged in the route-table with tag A and the R-VPLS, in which the route is advertised, uses B as the default-route-tag, then EVPN keeps tag A when sending the route to the BGP RIB. <p>The default-route-tag configuration is only supported on EVPN and IP-VPN service routes. The route tag for ES and AD per-ES routes is always zero.</p> |
| Introduced | 16.0.R4 |
| Platforms | All |

dynamic-egress-label-limit *boolean*

| | |
|-------------|---|
| Synopsis | Enables dynamic egress label limit |
| Context | configure <i>service epipe string bgp-evpn mpls number dynamic-egress-label-limit boolean</i> |
| Tree | dynamic-egress-label-limit |
| Description | <p>When configured to true, this command relaxes the egress MPLS label limit check when resolving BGP next hops in the tunnel table.</p> <p>For VPRN services, the OAM label is never computed and, therefore, one more egress label is allowed.</p> <p>For EVPN (Epipe and VPLS) services, the system only computes the control word and ESI label if they are used. For the control word, the system reduces the egress label limit by one label if the control word is configured in the service. When configured, the ESI label is not counted for Epipes or VPLS services without an ES.</p> <p>When configured to false this command, for EVPN, Epipe, and VPLS services, always accounts for the ESI label and control word.</p> |
| Default | false |
| Introduced | 22.2.R1 |
| Platforms | All |

eth-tag *number*

| | |
|-------------|---|
| Synopsis | Ethernet tag of the attachment circuit |
| Context | configure service epipe <i>string</i> bgp-evpn remote-attachment-circuit <i>string</i> eth-tag <i>number</i> |
| Tree | eth-tag |
| Description | This command configures the Ethernet tag value of the attachment circuit.

When configured in the local attachment circuit context, the tag value is used in the advertised AD per-EVI route sent for the attachment circuit.

When configured in the remote attachment circuit context, the value is compared with the Ethernet tag value of the imported D per-EVI routes for the service. When there is a match, the system creates an EVPN destination for the Epipe. |
| Range | 1 to 16777215 |
| Introduced | 20.10.R1 |
| Platforms | All |

segment-routing-v6 [[bgp-instance](#)] *number*

| | |

| Tree | segment-routing-v6 |
| Range | 1 |
| Notes | This element is part of a list key. |
| Introduced | 21.7.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS, VSR |

admin-state *keyword*

| | |
|------------|--|
| Synopsis | Administrative state of segment routing over IPv6 |
| Context | configure service epipe <i>string</i> bgp-evpn segment-routing-v6 <i>number</i> admin-state <i>keyword</i> |
| Tree | admin-state |
| Default | disable |
| Options | enable, disable |
| Introduced | 21.7.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS, VSR |

default-route-tag *string***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|-------------|--|
| Synopsis | Default route tag |
| Context | configure service epipe <i>string</i> bgp-evpn segment-routing-v6 <i>number</i> default-route-tag <i>string</i> |
| Tree | default-route-tag |
| Description | <p>This command configures a route tag that is used when sending a route to the BGP application (for the corresponding service and BGP instance). If the corresponding BGP instance is enabled, the command cannot be changed.</p> <p>When used for BGP EVPN contexts, only one route tag can be passed to BGP for matching on export policies. In case of a conflict with other route tags pushed by EVPN, the default route tag has the least priority.</p> <p>The following are examples of the conflict priority handling:</p> <ul style="list-style-type: none"> • If a service is configured with both default-route-tag <i>X</i> and proxy-arp evpn-route-tag <i>Y</i>, the EVPN uses route tag <i>Y</i> when sending EVPN proxy-arp routes to the BGP RIB for advertisement. • If a given IP-prefix route is tagged in the route-table with tag <i>A</i> and the R-VPLS, in which the route is advertised, uses <i>B</i> as the default-route-tag, then EVPN keeps tag <i>A</i> when sending the route to the BGP RIB. <p>The default-route-tag configuration is only supported on EVPN and IP-VPN service routes. The route tag for ES and AD per-ES routes is always zero.</p> |
| Introduced | 21.7.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS, VSR |

ecmp number

| | |
|------------|--|
| Synopsis | Maximum ECMP value configured on the service |

| Tree | ecmp |
| Range | 1 to 32 |
| Default | 1 |
| Introduced | 21.7.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS, VSR |

evi-three-byte-auto-rt boolean**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|-------------|---|
| Synopsis | Auto-derive the BGP EVPN route target |
| Context | configure service epipe <i>string</i> bgp-evpn segment-routing-v6 <i>number</i> evi-three-byte-auto-rt <i>boolean</i> |
| Tree | evi-three-byte-auto-rt |
| Description | <p>When configured to true, the BGP-EVPN instance import and export route target is auto-derived as described in RFC 8365 (Global-Administrator:A/Type/D-ID/Service-ID).
Where:</p> <ul style="list-style-type: none"> • Global Administrator – is the configured 2-octet AS number; if the configured ASN exceeds the 2 byte limit, the low order 16-bit value is taken • A=0 (for auto-derivation) • Type=4 (EVI-based route-target) • D-ID= [1..2] – encodes the BGP instance, which allows the auto-derivation of different route-targets in multi-instance services; the value is inherited from the corresponding BGP instance • Service ID=3-octet EVI <p>When configured to false, route target derivation is not allowed.</p> |
| Default | false |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS, VSR |

force-vc-forwarding *keyword*

| | |
|-------------|--|
| Synopsis | Datapath forwarding to force vlan-vc-type |
| Context | configure service epipe <i>string</i> bgp-evpn segment-routing-v6 <i>number</i> force-vc-forwarding <i>keyword</i> |
| Tree | force-vc-forwarding |
| Description | <p>This command allows the system to preserve the VLAN ID and 802.1p bits of the service-delimiting qtag in a new tag added in the customer frame before sending it to the EVPN destinations.</p> <p>This command may be used in conjunction with the sap ingress vlan-translation command. If so used, the configured translated VLAN ID is the VLAN ID sent to the EVPN destinations as opposed to the service-delimiting tag VLAN ID. If the ingress SAP/SDP binding is 'null'-encapsulated, the output VLAN ID and pbits is zero.</p> |
| Options | vlan, qinq-c-tag-c-tag, qinq-s-tag-c-tag |
| Introduced | 21.7.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS, VSR |

oper-group *reference*

| | |
|-------------|--|
| Synopsis | Operational group |
| Context | configure service epipe <i>string</i> bgp-evpn segment-routing-v6 <i>number</i> oper-group <i>reference</i> |
| Tree | oper-group |
| Description | <p>This command adds the BGP EVPN SRv6 instance or an Ethernet Segment (ES) as a member of the operational group.</p> <p>When configured on a BGP EVPN instance, the operational group is up when it is either empty (meaning that the operational group has no members) or at least an EVPN destination is created under the EVPN instance added as member. When configured, no other SAP, SDP binding, or BGP EVPN instance can be added to the same operational group within the same or different service.</p> <p>The operational group will be down when it is applied on a BGP EVPN instance as well as:</p> <ul style="list-style-type: none"> • the service is admin-state disable • the BGP EVPN MPLS and VXLAN are admin-state disable • all the EVPN destinations in the instance are removed <p>When configured on an ES, the state of the operational group depends on the state of the SAPs contained in the ES. The operational group transitions to up if at least one SAP in the ES is up. The operational group goes down when all the associated SAPs are operationally down. The ES operational group should be monitored on the LAG associated to the ES, along with single-active multi-homing, so that the NDF state can be signaled to the CE by LAG standby signaling.</p> |

| | |
|------------|---|
| Reference | configure service oper-group <i>string</i> |
| Introduced | 21.7.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS, VSR |

|------------|--|
| Synopsis | Time to hold the active state before entering standby when a local MC-LAG SAP goes down |
| Context | configure service epipe <i>string</i> endpoint <i>string</i> hold-time-active <i>number</i> |
| Tree | hold-time-active |
| Range | 1 to 60 |
| Units | deciseconds |
| Introduced | 16.0.R1 |
| Platforms | All |

revert-time (*number* | *keyword*)

| | |
|------------|--|
| Synopsis | Time to wait before reverting back to the primary spoke-sdp defined on this service endpoint |
| Context | configure service epipe <i>string</i> endpoint <i>string</i> revert-time (<i>number</i> <i>keyword</i>) |
| Tree | revert-time |
| Range | 1 to 600 |
| Default | immediate |
| Units | seconds |
| Options | never, immediate |
| Introduced | 16.0.R1 |
| Platforms | All |

standby-signaling *keyword*

| | |
|------------|--|
| Synopsis | Endpoint behavior to handle the PW standby bit |
| Context | configure service epipe <i>string</i> endpoint <i>string</i> standby-signaling <i>keyword</i> |
| Tree | standby-signaling |
| Options | master, slave |
| Introduced | 16.0.R1 |
| Platforms | All |

eth-cfm

| | |
|----------|----------------------------------|
| Synopsis | Enter the eth-cfm context |
|----------|----------------------------------|

| | |
|------------|--|
| Context | configure service epipe <i>string eth-cfm</i> |
| Tree | eth-cfm |
| Introduced | 19.5.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

ignore-l2vpn-mtu-mismatch *boolean*

| | |
|-------------|---|
| Synopsis | Ignore the L2 VPN MTU mismatch with local service MTU |
| Context | configure service epipe <i>string ignore-l2vpn-mtu-mismatch</i> <i>boolean</i> |
| Tree | ignore-l2vpn-mtu-mismatch |
| Description | <p>When configured to true, the router does not check the value of the Layer 2 MTU in the Layer2 Info Extended Community received in a BGP update message against the local service MTU or locally signaled MTU. It may, therefore, bring up the BGP VPWS service regardless of any MTU mismatch.</p> <p>When configured to false, an MTU mismatch prevents the system from bringing up a BGP-VPWS service.</p> |
| Default | false |
| Introduced | 22.2.R1 |
| Platforms | All |

load-balancing

| | |
|------------|---|
| Synopsis | Enter the load-balancing context |
| Context | configure service epipe <i>string load-balancing</i> |
| Tree | load-balancing |
| Introduced | 16.0.R1 |
| Platforms | All |

lbl-eth-or-ip-l4-teid *boolean*

| | |
|-------------|--|
| Synopsis | Enable hashing of MPLS ethernet and IP packets on SAPs |
| Context | configure service epipe <i>string load-balancing lbl-eth-or-ip-l4-teid</i> <i>boolean</i> |
| Tree | lbl-eth-or-ip-l4-teid |
| Description | <p>When configured to true, this command enables hashing of MPLS Ethernet and MPLS IP packets received on the Epipe and VPLS service SAP using the MPLS labels, the inner IP addresses, the port numbers, and the GTP TEID field, if read by the system. This capability is supported on line cards that are FP4-based and later.</p> |

| | |
|------------|--|
| Default | false |
| Introduced | 22.2.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

per-service-hashing *boolean*

| | |
|------------|--|
| Synopsis | Enable per-service hashing for Ethernet services |
| Context | configure service epipe <i>string</i> load-balancing per-service-hashing <i>boolean</i> |
| Tree | per-service-hashing |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

nat-outside [[nat-group](#)] *number*

| | |
|------------|--|
| Synopsis | Enter the nat-outside list instance |
| Context | configure service epipe <i>string</i> nat-outside <i>number</i> |
| Tree | nat-outside |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

[nat-group] *number*

| | |
|------------|--|
| Synopsis | NAT group |
| Context | configure service epipe <i>string</i> nat-outside <i>number</i> |
| Tree | nat-outside |
| Max. Range | 0 to 4294967295 |
| Notes | This element is part of a list key. |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

admin-state *keyword*

| | |
|----------|---|
| Synopsis | Administrative state of Epipe as a NAT outside service |
| Context | configure service epipe <i>string</i> nat-outside <i>number</i> admin-state <i>keyword</i> |

| | |
|------------|--|
| Tree | admin-state |
| Default | disable |
| Options | enable, disable |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

oper-group *reference*

| | |
|------------|--|
| Synopsis | Oper-group name |
| Context | configure service epipe <i>string</i> oper-group <i>reference</i> |
| Tree | oper-group |
| Reference | configure service oper-group <i>string</i> |
| Introduced | 16.0.R1 |
| Platforms | All |

pbb

| | |
|------------|--|
| Synopsis | Enter the pbb context |
| Context | configure service epipe <i>string</i> pbb |
| Tree | pbb |
| Introduced | 16.0.R1 |
| Platforms | All |

force-qtag-forwarding *boolean*

| | |
|------------|--|
| Synopsis | Add an IEEE 802.1q tag after CMAC addresses PBB header |
| Context | configure service epipe <i>string</i> pbb force-qtag-forwarding <i>boolean</i> |
| Tree | force-qtag-forwarding |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

local-switch-service-state *keyword*

| | |
|----------|--|
| Synopsis | Endpoint state used to determine PBB-Epipe state |
|----------|--|

| | |
|-------------|--|
| Context | configure service epipe <i>string pbb local-switch-service-state keyword</i> |
| Tree | local-switch-service-state |
| Description | In a PBB Epipe with two SAPs and a PBB tunnel, this command controls whether the operational state of the PBB-Epipe service depends on the state of the PBB tunnel only, or on the state of two of the three endpoints (PBB tunnel and two SAPs). The second case implies that at least one of the SAPs must be up for the PBB-Epipe service to be operationally up. |
| Default | sap |
| Options | sap, pbb-tunnel |
| Introduced | 21.7.R1 |
| Platforms | All |

tunnel

| | |
|------------|---|
| Synopsis | Enable the tunnel context |
| Context | configure service epipe <i>string pbb tunnel</i> |
| Tree | tunnel |
| Introduced | 16.0.R1 |
| Platforms | All |

backbone-dest-mac *string*

| | |
|------------|--|
| Synopsis | Backbone Destination MAC address |
| Context | configure service epipe <i>string pbb tunnel backbone-dest-mac string</i> |
| Tree | backbone-dest-mac |
| Notes | The following elements are part of a mandatory choice: backbone-dest-mac or backbone-dest-mac-name . |
| Introduced | 16.0.R1 |
| Platforms | All |

backbone-dest-mac-name *reference*

| | |
|-----------|--|
| Synopsis | Backbone destination MAC name for PBB packets |
| Context | configure service epipe <i>string pbb tunnel backbone-dest-mac-name reference</i> |
| Tree | backbone-dest-mac-name |
| Reference | configure service pbb mac <i>string</i> |

| | |
|------------|--|
| Notes | The following elements are part of a mandatory choice: backbone-dest-mac or backbone-dest-mac-name . |
| Introduced | 16.0.R1 |
| Platforms | All |

backbone-vpls-service-name *reference*

WARNING:

Modifying this element recreates the parent element automatically for the new value to take effect.

| | |
|------------|--|
| Synopsis | Backbone VPLS service |
| Context | configure service epipe <i>string</i> pbb tunnel backbone-vpls-service-name <i>reference</i> |
| Tree | backbone-vpls-service-name |
| Reference | configure service vpls <i>string</i> |
| Notes | This element is mandatory. |
| Introduced | 16.0.R1 |
| Platforms | All |

isid *number*

WARNING:

Modifying this element recreates the parent element automatically for the new value to take effect.

| | |
|------------|---|
| Synopsis | Service instance ID |
| Context | configure service epipe <i>string</i> pbb tunnel isid <i>number</i> |
| Tree | isid |
| Range | 0 to 16777215 |
| Notes | This element is mandatory. |
| Introduced | 16.0.R1 |
| Platforms | All |

sap [[sap-id](#)] *string*

| | |
|----------|---|
| Synopsis | Enter the sap list instance |
| Context | configure service epipe <i>string</i> sap <i>string</i> |

| | |
|----------------|---------------------|
| Tree | sap |
| Max. Instances | 2 |
| Introduced | 16.0.R1 |
| Platforms | All |

[sap-id] string

| | |
|---------------|--|
| Synopsis | SAP ID |
| Context | configure service epipe string sap string |
| Tree | sap |
| String Length | 1 to 45 |
| Notes | This element is part of a list key. |
| Introduced | 16.0.R1 |
| Platforms | All |

aarp

| | |
|------------|---|
| Synopsis | Enable the aarp context |
| Context | configure service epipe string sap string aarp |
| Tree | aarp |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

id reference

| | |
|------------|--|
| Synopsis | AARP instance ID |
| Context | configure service epipe string sap string aarp id reference |
| Tree | id |
| Reference | configure application-assurance aarp number |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

type keyword

| | |
|------------|--|
| Synopsis | Role referenced by the AARP |
| Context | configure service epipe <i>string</i> sap <i>string</i> aarp <i>type</i> <i>keyword</i> |
| Tree | type |
| Options | dual-homed, dual-homed-secondary |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

accounting-policy reference

| | |
|------------|---|
| Synopsis | Accounting policy |
| Context | configure service epipe <i>string</i> sap <i>string</i> accounting-policy <i>reference</i> |
| Tree | accounting-policy |

[scheduler-name] *string*

Synopsis Scheduler name

Context **configure** [service](#) [epipe](#) *string* [sap](#) *string* [egress](#) [qos](#) [scheduler-policy](#) [overrides](#) [scheduler](#) *string*

Tree [scheduler](#)

Description This command specifies the scheduler name which is composed of printable 7-bit ASCII characters. If the string contains special characters (#, \$, spaces, and so on), the entire string must be enclosed within double quotes. Each scheduler must have a unique name within the context of the scheduler policy. However, the same name can

be reused in multiple scheduler policies. If the scheduler name already exists within the policy tier level, the context changes to that scheduler name for the purpose of editing the scheduler commands.

If the scheduler name exists within the policy on a different tier, an error occurs and the current context will not change. If the scheduler name does not exist in this or another tier within the scheduler policy, it is assumed that an attempt is being made to create a scheduler of that name.

If the provided scheduler name is invalid, a name syntax error will occur, the command will not execute, and the context will not change.

| Tree | collect-lmm-fc-stats |
| Description | <p>Commands in this context configure per forwarding class (FC) LMM information collection.</p> <p>The commands fc-in-profile and fc in this context are mutually exclusive. The commands apply to either profile-aware or profile-unaware FCs respectively.</p> <p>This command and the collect-lmm-stats command are mutually exclusive when there is entity resource contention.</p> |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

fc keyword

| | |
|----------------|---|
| Synopsis | Forwarding class name for profile-unaware counter |
| Context | configure service epipe <i>string</i> sap <i>string</i> eth-cfm collect-lmm-fc-stats fc <i>keyword</i> |
| Tree | fc |
| Description | <p>This command configures individual counters for the specified FCs without regard for profile. The system includes all countable packets that match a configured FC, regardless of profile, in this counter.</p> <p>An FC specified as part of this command and for this specific context cannot be specified as a profile-aware FC using the fc-in-profile command under the collect-lmm-fc-stats context.</p> <p>When this command is reentered, a differential is performed. Omitted FCs stop counting, newly added FCs start counting, and unchanged FCs continue to count.</p> |
| Options | be, l2, af, l1, h2, ef, h1, nc |
| Max. Instances | 8 |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

fc-in-profile *keyword*

| | |
|----------------|---|
| Synopsis | Forwarding class name for profile-aware counter |
| Context | configure service epipe <i>string</i> sap <i>string</i> eth-cfm collect-lmm-fc-stats fc-in-profile <i>keyword</i> |
| Tree | fc-in-profile |
| Description | <p>This command configures individual counters for the specified FCs with regard to profile. The system includes all countable packets that match a configured FC and that are deemed to be in-profile in this counter.</p> <p>An FC specified as part of this command and for this specific context cannot be specified as a profile-unaware FC using the fc command under the collect-lmm-fc-stats context.</p> <p>When this command is reentered, a differential is performed. Omitted FCs stop counting, newly added FCs start counting, and unchanged FCs continue to count.</p> |
| Options | be, l2, af, l1, h2, ef, h1, nc |
| Max. Instances | 8 |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

collect-lmm-stats *boolean*

| | |
|------------|---|
| Synopsis | Collect statistics for loss measurement message tests |
| Context | configure service epipe <i>string</i> sap <i>string</i> eth-cfm collect-lmm-stats <i>boolean</i> |
| Tree | collect-lmm-stats |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

mep [md-admin-name](#) *reference* [ma-admin-name](#) *reference* [mep-id](#) *number*

| | |

| Tree | admin-state |
| Default | disable |
| Options | enable, disable |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

ais

| | |
|------------|---|
| Synopsis | Enable the ais context |
| Context | configure service epipe <i>string</i> sap <i>string</i> eth-cfm mep md-admin-name <i>reference</i> ma-admin-name <i>reference</i> mep-id <i>number</i> ais |
| Tree | ais |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

client-meg-level *number*

| | |
|------------|--|
| Synopsis | Client MEG level for AIS message generation |
| Context | configure service epipe <i>string</i> sap <i>string</i> eth-cfm mep md-admin-name <i>reference</i> ma-admin-name <i>reference</i> mep-id <i>number</i> ais client-meg-level <i>number</i> |
| Tree | client-meg-level |
| Range | 1 to 7 |
| Max. | 7 |
| Instances | |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

interface-support *boolean*

| | |
|----------|--|
| Synopsis | Enable generation of AIS PDUs based on endpoint state |
| Context | configure service epipe <i>string</i> sap <i>string</i> eth-cfm mep md-admin-name <i>reference</i> ma-admin-name <i>reference</i> mep-id <i>number</i> ais interface-support <i>boolean</i> |

| | |
|------------|--|
| Tree | interface-support |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

interval *number*

| | |
|------------|--|
| Synopsis | Transmission interval for AIS messages |
| Context | configure service epipe <i>string</i> sap <i>string</i> eth-cfm mep md-admin-name <i>reference</i> ma-admin-name <i>reference</i> mep-id <i>number</i> ais interval <i>number</i> |
| Tree | interval |
| Range | 1 60 |
| Default | 1 |
| Units | seconds |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

low-priority-defect *keyword*

| | |
|------------|--|
| Synopsis | Lowest priority defect allowed to generate fault alarm |
| Context | configure service epipe <i>string</i> sap <i>string</i> eth-cfm mep md-admin-name <i>reference</i> ma-admin-name <i>reference</i> mep-id <i>number</i> ais low-priority-defect <i>keyword</i> |
| Tree | low-priority-defect |
| Default | all-def |
| Options | all-def, mac-rem-err-xcon |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

priority *number*

| | |
|----------|--|
| Synopsis | Priority of the AIS messages generated by the node |
| Context | configure service epipe <i>string</i> sap <i>string</i> eth-cfm mep md-admin-name <i>reference</i> ma-admin-name <i>reference</i> mep-id <i>number</i> ais priority <i>number</i> |
| Tree | priority |
| Range | 0 to 7 |
| Default | 7 |

| | |
|------------|--|
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

alarm-notification

| | |
|-------------|---|
| Synopsis | Enter the alarm-notification context |
| Context | configure service epipe <i>string</i> sap <i>string</i> eth-cfm mep md-admin-name <i>reference</i> ma-admin-name <i>reference</i> mep-id <i>number</i> alarm-notification |
| Tree | alarm-notification |
| Description | Commands in this context configure the Fault Notification Generator (FNG) time values to raise an alarm or reset the CCM defect alarm.

Use these timers for network management processes. The timers are not tied into delaying the notification to the fault management system on the network element and do not affect fault propagation mechanisms. |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

fng-alarm-time *number*

| | |
|------------|--|
| Synopsis | Time that must expire before an FNG alarm is raised |
| Context | configure service epipe <i>string</i> sap <i>string</i> eth-cfm mep md-admin-name <i>reference</i> ma-admin-name <i>reference</i> mep-id <i>number</i> alarm-notification fng-alarm-time <i>number</i> |
| Tree | fng-alarm-time |
| Range | 250 500 1000 |
| Units | centiseconds |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

fng-reset-time *number*

| | |
|------------|--|
| Synopsis | Time that must expire before an FNG alarm is reset |
| Context | configure service epipe <i>string</i> sap <i>string</i> eth-cfm mep md-admin-name <i>reference</i> ma-admin-name <i>reference</i> mep-id <i>number</i> alarm-notification fng-reset-time <i>number</i> |
| Tree | fng-reset-time |
| Range | 250 500 1000 |
| Units | centiseconds |
| Introduced | 16.0.R1 |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

ccm boolean

Synopsis Generate CCM messages

Context **configure** [service](#) [epipe](#) *string* [sap](#) *string* [eth-cfm](#) [mep](#) [md-admin-name](#) *reference* [ma-admin-name](#) *reference* [mep-id](#) *number* [ccm](#) *boolean*

Tree [ccm](#)

Default false

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

ccm-ltm-priority number

Synopsis Priority of CCM and LTM messages transmitted by the MEP

Context **configure** [service](#) [epipe](#) *string* [sap](#) *string* [eth-cfm](#) [mep](#) [md-admin-name](#) *reference* [ma-admin-name](#) *reference* [mep-id](#) *number* [ccm-ltm-priority](#) *number*

Tree [ccm-ltm-priority](#)

Range 0 to 7

Default 7

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

ccm-padding-size number

Synopsis Number of octets of padding to insert in CCM packets

Context **configure** [service](#) [epipe](#) *string* [sap](#) *string* [eth-cfm](#) [mep](#) [md-admin-name](#) *reference* [ma-admin-name](#) *reference* [mep-id](#) *number* [ccm-padding-size](#) *number*

Tree [ccm-padding-size](#)

Description This command sets the byte size of the optional Data TLV to be included in the ETH-CC PDU.

This command increases the size of the ETH-CC PDU by the configured value. The base size of the ETH-CC PDU, including the Interface Status TLV and Port Status TLV, is 83 bytes not including the Layer 2 encapsulation. CCM padding is not supported when the CCM interval (configured through **configure eth-cfm domain association ccm-interval**) is less than 1 second.

Range 3 to 1500

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

cfm-vlan-tag *string*

Synopsis VLAN tags to apply to CFM PDUs for egress processing

Context **configure service epipe** *string* **sap** *string* **eth-cfm mep md-admin-name** *reference* **ma-admin-name** *reference* **mep-id** *number* **cfm-vlan-tag** *string*

Tree **cfm-vlan-tag**

String Length 1 to 9

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

csf

Synopsis Enable the **csf** context

Context **configure service epipe** *string* **sap** *string* **eth-cfm mep md-admin-name** *reference* **ma-admin-name** *reference* **mep-id** *number* **csf**

Tree **csf**

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

multiplier *decimal-number*

Synopsis Multiplication factor used to clear the CSF condition

Context **configure service epipe** *string* **sap** *string* **eth-cfm mep md-admin-name** *reference* **ma-admin-name** *reference* **mep-id** *number* **csf multiplier** *decimal-number*

Tree **multiplier**

Range 0.0 | 2.0 to 30.0

Default 3.5

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

description *string*

| Tree | tx-eth-vsm-grace |

| | |
|-------------|---|
| Description | <p>When configured to true, the router can transmit the Nokia ETH-CFM Grace PDU from the MEP when a system soft reset notification is received for one or more cards.</p> <p>The Nokia Grace function is a vendor-specific PDU that informs MEP peers that the local node may be entering a period of expected defect.</p> <p>The operator must configure the configure system eth-cfm grace command to instruct the system that the node is capable of transmitting expected-defect windows to peers. The system can only transmit one form of ETH-CFM grace (Nokia ETH-CFM Grace or ITU-T Y.1731 ETH-ED).</p> <p>When configured to false, the router disables the transmission of the Nokia ETH-CFM Grace PDU from the MEP.</p> |
| Default | true |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

| | |
|------------|--|
| Synopsis | MEP provisioned using MA primary VLAN ID |
| Context | configure service epipe <i>string sap string eth-cfm mep md-admin-name reference ma-admin-name reference mep-id number primary-vlan boolean</i> |
| Tree | primary-vlan |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

mip primary-vlan (*number* | *keyword*)

| | |
|-------------|---|
| Synopsis | Enter the mip list instance |
| Context | configure service epipe <i>string</i> sap <i>string</i> eth-cfm mip primary-vlan (<i>number</i> <i>keyword</i>) |
| Tree | mip |
| Description | This command allows the CFM function to include additional VLAN tags to the CFM packet that are carried to the egress and treated as service delimited. Typically, this function is used to influence the VLAN carried over a binding that uses the vc-type vlan or the binding forces the use of one or more VLAN tag that results in a mismatch between the service data arriving at the binding and the locally generated ETH-CFM PDUs arriving at the same egress. When this command is included under the MEP or MIP configuration, the tags used as part of the configuration typically match the SAP service delimited configuration. |
| Introduced | 21.5.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

primary-vlan (*number* | *keyword*)

| | |
|-------------|---|
| Synopsis | VLAN ID to which the MIP is attached |
| Context | configure service epipe <i>string</i> sap <i>string</i> eth-cfm mip primary-vlan (<i>number</i> <i>keyword</i>) |
| Tree | mip |
| Description | This command provides an option for linking a MIP with a Primary VLAN number or none. When the none option is provided, the MIP does not include the primary vlan. |
| Range | 1 to 4094 |
| Options | none |
| Notes | This element is part of a list key. |
| Introduced | 21.5.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

cfm-vlan-tag *string*

| | |
|-------------|---|
| Synopsis | VLAN tags to apply to CFM PDUs for egress processing |
| Context | configure service epipe <i>string</i> sap <i>string</i> eth-cfm mip primary-vlan (<i>number</i> <i>keyword</i>)
cfm-vlan-tag <i>string</i> |
| Tree | cfm-vlan-tag |
| Description | This command allows the CFM function to include additional VLAN tags to the CFM packet that are carried to the egress and treated as service delimited. Typically, this function is used to influence the VLAN carried over a binding that uses the vc-type vlan or the binding forces the use of one or more VLAN tag that results in a mismatch between the service data arriving at the binding and the locally generated ETH-CFM |

PDU's arriving at the same egress. When this command is included under the MEP or MIP configuration, the tags used as part of the configuration typically match the SAP service delimited configuration.

| | |
|---------------|--|
| String Length | 1 to 9 |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

| Tree | mac-address |
| Introduced | 21.5.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

squelch-ingress-ctag-levels *number*

| | |
|-------------------|--|
| Synopsis | Squelch levels using additional VLAN C-Tag space |
| Context | configure service epipe <i>string</i> sap <i>string</i> eth-cfm squelch-ingress-ctag-levels <i>number</i> |
| Tree | squelch-ingress-ctag-levels |
| Description | This command defines the levels of the ETH-CFM packets that are silently discarded on ingress into the SAP or SDP binding from the wire that matches the service delineation of the SAP or SDP binding plus an additional VLAN, up to a maximum tag length of two tags. All ETH-CFM packets inbound to the SAP or SDP binding that match the configured levels are dropped without regard for any other ETH-CFM criteria. No statistical information or drop count is available for any ETH-CFM packet that is silently discarded by this option.

The list of levels must be a complete contiguous list from 0 up to the highest level to be dropped. |
| Range | 0 to 7 |
| Max.
Instances | 8 |
| Introduced | 21.2.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

| Platforms | All |

llf

| | |
|-------------|--|
| Synopsis | Enter the llf context |
| Context | configure service epipe <i>string sap string ethernet llf</i> |
| Tree | llf |
| Description | <p>Commands in this context enable Link Loss Forwarding (LLF) on an Ethernet port. This feature provides an end-to-end OAM fault notification for Ethernet VLL service. It brings down the Ethernet port (Ethernet LLF) or sends a SONET/SDH Path AIS (ATM LLF) toward the attached CE when there is a local fault on the pseudowire or service, or a remote fault on the SAP or pseudowire, signaled with label withdrawal or T-LDP status bits. It ceases when the fault disappears.</p> <p>The Ethernet port must be configured for null encapsulation.</p> <p>This feature is also supported in Epipes with BGP-EVPN enabled. In this case, upon removal of the EVPN destination, the port transitions to an operationally down state, however the AD per-EVI route for the SAP is still advertised (the SAP remains</p> |

operationally up). The port transitions to the operationally up state when the EVPN destination is created.

| | |
|------------|---------|

|------------|--|
| Synopsis | Enter the scheduler list instance |
| Context | configure service epipe <i>string</i> sap <i>string</i> ingress qos scheduler-policy overrides
scheduler <i>string</i> |
| Tree | scheduler |
| Introduced | 16.0.R1 |
| Platforms | All |

[scheduler-name] *string*

| | |
|---------------|--|
| Synopsis | Scheduler name |
| Context | configure service epipe <i>string</i> sap <i>string</i> ingress qos scheduler-policy overrides
scheduler <i>string</i> |
| Tree | scheduler |
| Description | <p>This command specifies the scheduler name which is composed of printable 7-bit ASCII characters. If the string contains special characters (<code>#</code>, <code>\$</code>, spaces, and so on), the entire string must be enclosed within double quotes. Each scheduler must have a unique name within the context of the scheduler policy. However, the same name can be reused in multiple scheduler policies. If the scheduler name already exists within the policy tier level, the context changes to that scheduler name for the purpose of editing the scheduler commands.</p> <p>If the scheduler name exists within the policy on a different tier, an error occurs and the current context will not change. If the scheduler name does not exist in this or another tier within the scheduler policy, it is assumed that an attempt is being made to create a scheduler of that name.</p> <p>If the provided scheduler name is invalid, a name syntax error will occur, the command will not execute, and the context will not change.</p> |
| String Length | 1 to 32 |
| Notes | This element is part of a list key. |
| Introduced | 16.0.R1 |
| Platforms | All |

parent

| | |

 Reference **configure router** *string segment-routing segment-routing-v6 locator string*
 Notes This element is part of a list key.
 Introduced 21.7.R1
 Platforms 7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS, VSR

function

Synopsis Enter the **function** context

| | |
|-------------|---|
| Context | configure service epipe string segment-routing-v6 number locator reference function |
| Tree | function |
| Description | Commands in this context configure SRv6 SID function values and parameters for the locator. |
| Introduced | 21.7.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS, VSR |

end-dx2

| | |
|------------|--|
| Synopsis | Enable the end-dx2 context |
| Context | configure service epipe string segment-routing-v6 number locator reference function end-dx2 |
| Tree | end-dx2 |
| Introduced | 21.7.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS, VSR |

value number

| | |
|-------------|--|
| Synopsis | SRv6 function value |
| Context | configure service epipe string segment-routing-v6 number locator reference function end-dx2 value number |
| Tree | value |
| Description | This command assigns the optional static function value for the routes in the VPRN, VPLS, or Epipe instance.

When unconfigured, the system allocates a value dynamically. |
| Range | 1 to 1048575 |
| Introduced | 21.7.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS, VSR |

micro-segment-locator [*locator-name*] reference

| | |
|----------------|---|
| Synopsis | Enter the micro-segment-locator list instance |
| Context | configure service epipe string segment-routing-v6 number micro-segment-locator reference |
| Tree | micro-segment-locator |
| Max. Instances | 1 |

| | |
|------------|---|
| Introduced | 22.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS, VSR |

[locator-name] *reference*

| | |
|-------------|---|
| Synopsis | Micro-segment SRv6 locator name |
| Context | configure service epipe <i>string</i> segment-routing-v6 <i>number</i> micro-segment-locator <i>reference</i> |
| Tree | micro-segment-locator |
| Description | This command associates a pre-defined micro-segment SRv6 locator (defined in the configure router segment-routing segment-routing-v6 context) with the SRv6 instance in the service. The same micro-segment locator can be referenced in multiple BGP instances used by IPVPN or EVPN. |
| Reference | configure router <i>string</i> segment-routing segment-routing-v6 micro-segment-locator <i>string</i> |
| Notes | This element is part of a list key. |
| Introduced | 22.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS, VSR |

function

| | |
|------------|--|
| Synopsis | Enter the function context |
| Context | configure service epipe <i>string</i> segment-routing-v6 <i>number</i> micro-segment-locator <i>reference</i> function |
| Tree | function |
| Introduced | 22.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS, VSR |

udx2

| | |
|-------------|--|
| Synopsis | Enable the udx2 context |
| Context | configure service epipe <i>string</i> segment-routing-v6 <i>number</i> micro-segment-locator <i>reference</i> function udx2 |
| Tree | udx2 |
| Description | Commands in this context configure the SRv6 micro-segment uDX2 behavior and the function value that is associated with the SRv6 instance in the service. When configured, decapsulation and cross-connect to the egress SAP occurs in the Epipe service. |

| | |
|------------|---|
| Introduced | 22.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS, VSR |

value number

| | |
|-------------|--|
| Synopsis | SRv6 function value |
| Context | configure service epipe string segment-routing-v6 number micro-segment-locator reference function udx2 value number |
| Tree | value |
| Description | This command assigns the optional static function value for the routes in the VPRN, VPLS, or Epipe instance.
When unconfigured, the system allocates a value dynamically. |
| Range | 1 to 1048575 |
| Introduced | 22.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS, VSR |

service-id number**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

| | |
|------------|---|
| Synopsis | Service ID |
| Context | configure service epipe string service-id number |
| Tree | service-id |
| Range | 1 to 2147483647 |
| Introduced | 16.0.R1 |
| Platforms | All |

service-mtu number

| | |
|-------------|---|
| Synopsis | MTU size |
| Context | configure service epipe string service-mtu number |
| Tree | service-mtu |
| Description | This command configures the Maximum Transmission Unit (MTU) value (payload) for the service. The system uses the value to validate the operational state of the SAP and SDP binding within the service. The value overrides the default MTU for the service type. |

The service MTU and a SAP's service delineation encapsulation overhead (4 bytes for a dot1q tag) are used to derive the required MTU of the physical port or channel on which the SAP was created. If the required payload is larger than the port or channel MTU, the SAP is placed in an inoperative state. If the required MTU is equal to or less than the port or channel MTU, the SAP transitions to the operative state.

When binding an SDP to a service, the service MTU is compared to the path MTU associated with the SDP. The path MTU can be administratively defined in the context of the SDP. The default or administrative path MTU can be dynamically reduced due to the MTU capabilities discovered by the tunneling mechanism of the SDP or the egress interface MTU capabilities based on the next hop in the tunnel path. If the service MTU is larger than the path MTU, the SDP binding for the service is placed in an inoperative state. If the service MTU is equal to or less than the path MTU, the SDP binding is placed in an operational state.

If a service MTU, port or channel MTU, or path MTU is dynamically or administratively modified, all associated SAP and SDP binding operational states are automatically reevaluated.

Binding operational states are automatically reevaluated.

For I-VPLS and Epipes bound to a B-VPLS, the service MTU must be at least 18 bytes smaller than the B-VPLS service MTU to accommodate the PBB header.

Because this connects a Layer 2 to a Layer 3 service, adjust the service MTU under the Epipe service. The MTU that is advertised from the Epipe side is service MTU minus EtherHeaderSize.

In the **configure service epipe spoke-sdp** context, the **adv-service-mtu** command can be used to override the configured MTU value used in T-LDP signaling to the far-end of an Epipe spoke-sdp. The **adv-service-mtu** command is also used to validate the value signaled by the far-end PE.

| Introduced | 21.2.R1 |
| Platforms | All |

encap *keyword*

| | |
|------------|---|
| Synopsis | BFD encapsulation used on the SDP binding |
| Context | configure service epipe <i>string</i> spoke-sdp <i>string</i> bfd bfd-liveness encap <i>keyword</i> |
| Tree | encap |
| Default | ipv4 |
| Options | ipv4 |
| Introduced | 21.2.R1 |
| Platforms | All |

bfd-template *reference*

| | |
|-------------|---|
| Synopsis | BFD template associated with the SDP binding |
| Context | configure service epipe <i>string</i> spoke-sdp <i>string</i> bfd bfd-template <i>reference</i> |
| Tree | bfd-template |
| Description | This command configures a named BFD template to be used by VCCV BFD on PWs belonging to the VLL service. The template specifies parameters, such as the minimum transmit and receive control packet timer intervals, used by the BFD session. Template parameters are configured under the configure router bfd context. |
| Reference | configure bfd bfd-template <i>string</i> |
| Introduced | 21.2.R1 |
| Platforms | All |

failure-action *keyword*

| | |
|-------------|---|
| Synopsis | VCCV BFD action taken on the SDP binding |
| Context | configure service epipe <i>string</i> spoke-sdp <i>string</i> bfd failure-action <i>keyword</i> |
| Tree | failure-action |
| Description | This command configures a named BFD template to be used by VCCV BFD on PWs belonging to the VLL service. The template specifies parameters, such as the minimum transmit and receive control packet timer intervals, used by the BFD session. Template parameters are configured under the configure router bfd context. |
| Default | none |
| Options | none, down |
| Introduced | 21.2.R1 |
| Platforms | All |

wait-for-up-timer *number*

| | |
|-------------|--|
| Synopsis | Time waited for BFD up status |
| Context | configure service epipe <i>string</i> spoke-sdp <i>string</i> bfd wait-for-up-timer <i>number</i> |
| Tree | wait-for-up-timer |
| Description | This command configures the time interval that is used to wait for a BFD session to come up.

This command is triggered when a spoke-SDP is first administratively enabled and a VCCV BFD session transitions from up to down. The command is required to allow time for BFD sessions to come up, and for BFD to settle before selecting the active spoke-SDP for use in a redundant set. In the case where a VCCV BFD session is bouncing, the timer prevents excessive flapping of the operational state of a spoke-SDP. |
| Range | 1 to 60 |
| Units | seconds |
| Introduced | 21.2.R1 |
| Platforms | All |

collect-stats *boolean*

| | |
|------------|---|
| Synopsis | Allow agent to collect accounting statistics |
| Context | configure service epipe <i>string</i> spoke-sdp <i>string</i> collect-stats <i>boolean</i> |
| Tree | collect-stats |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

control-word *boolean*

| | |
|------------|--|
| Synopsis | Use the control word as preferred |
| Context | configure service epipe <i>string</i> spoke-sdp <i>string</i> control-word <i>boolean</i> |
| Tree | control-word |
| Default | false |
| Introduced | 16.0.R1 |

Tree [tx-eth-vsm-grace](#)

Description When configured to **true**, the router can transmit the Nokia ETH-CFM Grace PDU from the MEP when a system soft reset notification is received for one or more cards.

The Nokia Grace function is a vendor-specific PDU that informs MEP peers that the local node may be entering a period of expected defect.

The operator must configure the **configure system eth-cfm grace** command to instruct the system that the node is capable of transmitting expected-defect windows to peers. The system can only transmit one form of ETH-CFM grace (Nokia ETH-CFM Grace or ITU-T Y.1731 ETH-ED).

When configured to **false**, the router disables the transmission of the Nokia ETH-CFM Grace PDU from the MEP.

Default true

| | |
|------------|---|
| Synopsis | Enter the mip list instance |
| Context | configure service epipe <i>string spoke-sdp string eth-cfm mip primary-vlan (number keyword)</i> |
| Tree | mip |
| Introduced | 21.5.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

primary-vlan (*number | keyword*)

| | |
|-------------|---|
| Synopsis | VLAN ID to which the MIP is attached |
| Context | configure service epipe <i>string spoke-sdp string eth-cfm mip primary-vlan (number keyword)</i> |
| Tree | mip |
| Description | This command provides an option for linking a MIP with a Primary VLAN number or none. When the none option is provided, the MIP does not include the primary vlan. |
| Range | 1 to 4094 |
| Options | none |
| Notes | This element is part of a list key. |
| Introduced | 21.5.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

cfm-vlan-tag *string*

| | |
|----------|---|
| Synopsis | VLAN tags to apply to CFM PDUs for egress processing |
| Context | configure service epipe <i>string spoke-sdp string eth-cfm mip primary-vlan (number keyword) cfm-vlan-tag string</i> |
| Tree | cfm-vlan-tag |

| | |
|---------------|--|
| Description | This command allows the CFM function to include additional VLAN tags to the CFM packet that are carried to the egress and treated as service delimited. Typically, this function is used to influence the VLAN carried over a binding that uses the vc-type vlan or the binding forces the use of one or more VLAN tag that results in a mismatch between the service data arriving at the binding and the locally generated ETH-CFM PDUs arriving at the same egress. When this command is included under the MEP or MIP configuration, the tags used as part of the configuration typically match the SAP service delimited configuration. |
| String Length | 1 to 9 |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

|---------------|--|
| Synopsis | Text description |
| Context | configure service ies <i>string</i> interface <i>string</i> description <i>string</i> |
| Tree | description |
| String Length | 1 to 255 |
| Introduced | 16.0.R1 |
| Platforms | All |

dynamic-tunnel-redundant-nexthop *string*

| | |
|-------------|--|
| Synopsis | Redundant next-hop address for the dynamic IPsec tunnel |
| Context | configure service ies <i>string</i> interface <i>string</i> dynamic-tunnel-redundant-nexthop <i>string</i> |
| Tree | dynamic-tunnel-redundant-nexthop |
| Description | This command specifies the redundant next-hop address on a public or private IPsec interface (with public or private tunnel SAP) for a dynamic IPsec tunnel. The next-hop address is used by a standby node to shunt traffic to a master if it receives the address. The next-hop address is resolved in the routing table of a corresponding service. |
| Notes | The following elements are part of a choice: multi-chassis-shunting-profile or (dynamic-tunnel-redundant-nexthop and static-tunnel-redundant-nexthop) . |
| Introduced | 19.7.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

hold-time

| | |

| | |
|-------------|---|
| Synopsis | Enter the up context |
| Context | configure service ies string interface string hold-time ipv6 up |
| Tree | up |
| Description | Commands in this context configure the up hold timer, which specifies the delay before deactivation of the associated interface. The delay is invoked whenever the system attempts to bring the associated IP interface down. |
| Introduced | 16.0.R1 |
| Platforms | All |

seconds *number*

| | |
|------------|---|
| Synopsis | Up hold time for the IP interface |
| Context | configure service ies string interface string hold-time ipv6 up seconds number |
| Tree | seconds |
| Range | 1 to 1200 |
| Units | seconds |
| Introduced | 16.0.R1 |
| Platforms | All |

if-attribute

| | |
|------------|---|
| Synopsis | Enter the if-attribute context |
| Context | configure service ies string interface string if-attribute |
| Tree | if-attribute |
| Introduced | 16.0.R1 |
| Platforms | All |

admin-group *reference*

| | |
|----------|---|
| Synopsis | Administrative group name for the interface |
|----------|---|

| | |
|----------------|--|
| Context | configure service ies <i>string interface string if-attribute admin-group reference</i> |
| Tree | admin-group |
| Reference | configure routing-options <i>if-attribute admin-group string</i> |
| Max. Instances | 32 |
| Introduced | 16.0.R1 |
| Platforms | All |

srlg-group [*name*] *reference*

| | |
|------------|---|
| Synopsis | Add a list entry for srlg-group |
| Context | configure service ies <i>string interface string if-attribute srlg-group reference</i> |
| Tree | srlg-group |
| Introduced | 16.0.R1 |
| Platforms | All |

[name] *reference*

| | |
|------------|---|
| Synopsis | SRLG name |
| Context | configure service ies <i>string interface string if-attribute srlg-group reference</i> |
| Tree | srlg-group |
| Reference | configure routing-options <i>if-attribute srlg-group string</i> |
| Notes | This element is part of a list key. |
| Introduced | 16.0.R1 |
| Platforms | All |

ingress

| | |
|------------|---|
| Synopsis | Enter the ingress context |
| Context | configure service ies <i>string interface string ingress</i> |
| Tree | ingress |
| Introduced | 19.7.R1 |
| Platforms | All |

destination-class-lookup *boolean*

| | |
|-------------|---|
| Synopsis | Enable BGP destination class lookup |
| Context | configure service ies <i>string</i> interface <i>string</i> ingress destination-class-lookup <i>boolean</i> |
| Tree | destination-class-lookup |
| Description | When configured to true , the router performs a destination class lookup. This command is supported on FP3-based cards and later and is used in combination with the destination-class match criterion for an IP filter policy to filter egress traffic based on BGP destination classes.

When configured to false , destination class lookup is not enabled. |
| Default | false |
| Introduced | 20.7.R1 |
| Platforms | All |

policy-accounting *reference*

| | |
|------------|---|
| Synopsis | Ingress policy accounting template name |
| Context | configure service ies <i>string</i> interface <i>string</i> ingress policy-accounting <i>reference</i> |
| Tree | policy-accounting |
| Reference | configure routing-options policy-accounting policy-acct-template <i>string</i> |
| Introduced | 19.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS |

ingress-stats *boolean*

| | |
|------------|---|
| Synopsis | Collect ingress statistics |
| Context | configure service ies <i>string</i> interface <i>string</i> ingress-stats <i>boolean</i> |
| Tree | ingress-stats |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

ip-mtu *number*

| | |
|----------|---|
| Synopsis | IP MTU applied to outgoing packets |
| Context | configure service ies <i>string</i> interface <i>string</i> ip-mtu <i>number</i> |
| Tree | ip-mtu |

| | |
|------------|-------------|
| Range | 512 to 9786 |
| Units | bytes |
| Introduced | 16.0.R1 |
| Platforms | All |

ipsec

| | |
|-------------|--|
| Synopsis | Enable the ipsec context |
| Context | configure service ies <i>string</i> interface <i>string</i> ipsec |
| Tree | ipsec |
| Description | Commands in this context configure an IPsec secured interface. |
| Introduced | 22.7.R1 |
| Platforms | VSR |

admin-state *keyword*

| | |
|------------|---|
| Synopsis | Administrative state of IPsec secured interface |
| Context | configure service ies <i>string</i> interface <i>string</i> ipsec admin-state <i>keyword</i> |
| Tree | admin-state |
| Default | disable |
| Options | enable, disable |
| Introduced | 22.7.R1 |
| Platforms | VSR |

ip-exception *reference*

| | |
|-------------|--|
| Synopsis | IP exception filter |
| Context | configure service ies <i>string</i> interface <i>string</i> ipsec ip-exception <i>reference</i> |
| Tree | ip-exception |
| Description | This command configures the IP exception filter for the secured interface. All ingress traffic matching the specified filter bypasses IPsec processing. |
| Reference | configure filter ip-exception <i>string</i> |
| Introduced | 22.7.R1 |
| Platforms | VSR |

ipsec-tunnel *[name] string*

| | |
|-------------|---|
| Synopsis | Enter the ipsec-tunnel list instance |
| Context | configure service ies string interface string ipsec ipsec-tunnel string |
| Tree | ipsec-tunnel |
| Description | Commands in this context configure IPsec tunnels used to secure traffic forwarded over the interface. |
| Introduced | 22.7.R1 |
| Platforms | VSR |

[name] *string*

| | |
|---------------|--|
| Synopsis | IPsec tunnel name |
| Context | configure service ies string interface string ipsec ipsec-tunnel string |
| Tree | ipsec-tunnel |
| String Length | 1 to 32 |
| Notes | This element is part of a list key. |
| Introduced | 22.7.R1 |
| Platforms | VSR |

admin-state *keyword*

| | |
|------------|--|
| Synopsis | Administrative state of the IPsec tunnel |
| Context | configure service ies string interface string ipsec ipsec-tunnel string admin-state keyword |
| Tree | admin-state |
| Default | disable |
| Options | enable, disable |
| Introduced | 22.7.R1 |
| Platforms | VSR |

bfd

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|------------|--|
| Synopsis | Enter the bfd context |
| Context | configure service ies string interface string ipsec ipsec-tunnel string bfd |
| Tree | bfd |
| Introduced | 22.7.R1 |
| Platforms | VSR |

bfd-designate *boolean*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|------------|--|
| Synopsis | Designate IPsec tunnel to carry BFD traffic |
| Context | configure service ies string interface string ipsec ipsec-tunnel string bfd bfd-designate boolean |
| Tree | bfd-designate |
| Default | false |
| Introduced | 22.7.R1 |
| Platforms | VSR |

bfd-liveness

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|-------------|--|
| Synopsis | Enable the bfd-liveness context |
| Context | configure service ies string interface string ipsec ipsec-tunnel string bfd bfd-liveness |
| Tree | bfd-liveness |
| Description | Commands in this context configure a BFD session to provide a heart-beat mechanism for a specified IPsec tunnel. There can be only one BFD session assigned to any given IPsec tunnel, but there can be multiple IPsec tunnels using the same BFD session. |

BFD controls the state of the association tunnel. If the BFD session goes down, the system brings down the associated non-designated IPsec tunnel.

Introduced 22.7.R1
 Platforms VSR

dest-ip string

WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis Destination address used for the BFD session
 Context **configure service ies string interface string ipsec ipsec-tunnel string bfd bfd-liveness dest-ip string**
 Tree **dest-ip**
 Notes This element is mandatory.
 Introduced 22.7.R1
 Platforms VSR

interface string

WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis Name of the interface used by the BFD session
 Context **configure service ies string interface string ipsec ipsec-tunnel string bfd bfd-liveness interface string**
 Tree **interface**
 String Length 1 to 32
 Notes This element is mandatory.
 Introduced 22.7.R1
 Platforms VSR

service-name *string***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|---------------|---|
| Synopsis | Administrative service name |
| Context | configure service ies <i>string</i> interface <i>string</i> ipsec ipsec-tunnel <i>string</i> bfd bfd-liveness service-name <i>string</i> |
| Tree | service-name |
| Description | This command configures the name of the service where BFD traffic is forwarded to. |
| String Length | 1 to 64 |
| Notes | This element is mandatory. |
| Introduced | 22.7.R1 |
| Platforms | VSR |

clear-df-bit *boolean***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|-------------|---|
| Synopsis | Reset the DF bit to 0 in all payload IP packets |
| Context | configure service ies <i>string</i> interface <i>string</i> ipsec ipsec-tunnel <i>string</i> clear-df-bit <i>boolean</i> |
| Tree | clear-df-bit |
| Description | When configured to true , the DF bit is set to 0 in all payload IP packets associated with the IPsec tunnel, before any potential fragmentation occurs. |
| Default | false |
| Introduced | 22.7.R1 |
| Platforms | VSR |

copy-traffic-class-upon-decapsulation *boolean***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|----------|--|
| Synopsis | Enable traffic class copy upon decapsulation |
|----------|--|

| | |
|-------------|---|
| Context | configure service ies <i>string</i> interface <i>string</i> ipsec ipsec-tunnel <i>string</i> copy-traffic-class-upon-decapsulation <i>boolean</i> |
| Tree | copy-traffic-class-upon-decapsulation |
| Description | When configured to true , the system copies the traffic class from the outer tunnel IP packet header to the payload IP packet header in the decapsulating direction (public to private). |
| Default | false |
| Introduced | 22.7.R1 |
| Platforms | VSR |

description *string*

| | |
|---------------|--|
| Synopsis | Text description |
| Context | configure service ies <i>string</i> interface <i>string</i> ipsec ipsec-tunnel <i>string</i> description <i>string</i> |
| Tree | description |
| String Length | 1 to 80 |
| Introduced | 22.7.R1 |
| Platforms | VSR |

encapsulated-ip-mtu *number*

WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|-------------|---|
| Synopsis | Maximum size of the encapsulated tunnel packet |
| Context | configure service ies <i>string</i> interface <i>string</i> ipsec ipsec-tunnel <i>string</i> encapsulated-ip-mtu <i>number</i> |
| Tree | encapsulated-ip-mtu |
| Description | This command specifies the maximum size of the encapsulated tunnel packet to the IPsec tunnel, the IP tunnel, or the dynamic tunnels terminated on the IPsec Gateway. If the encapsulated IPv4 or IPv6 tunnel packet exceeds this value, the system fragments the packet. |
| Range | 512 to 9000 |
| Units | bytes |
| Introduced | 22.7.R1 |
| Platforms | VSR |

icmp-generation

WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|-------------|--|
| Synopsis | Enter the icmp-generation context |
| Context | configure service ies string interface string ipsec ipsec-tunnel string icmp-generation |
| Tree | icmp-generation |
| Description | Commands in this context configure settings for ICMPv4 message generation. |
| Introduced | 22.7.R1 |
| Platforms | VSR |

frag-required

WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|-------------|--|
| Synopsis | Enter the frag-required context |
| Context | configure service ies string interface string ipsec ipsec-tunnel string icmp-generation frag-required |
| Tree | frag-required |
| Description | Commands in this context configure the attributes for sending generated ICMP Destination Unreachable "fragmentation needed and DF set" messages (type 3, code 4) back to the source, if the received size of the IPv4 packet on the private side exceeds the private MTU size. |
| Introduced | 22.7.R1 |
| Platforms | VSR |

admin-state *keyword*

WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|----------|---|
| Synopsis | Administrative state of sending ICMP messages |
| Context | configure service ies string interface string ipsec ipsec-tunnel string icmp-generation frag-required admin-state <i>keyword</i> |

| | |
|-------------|--|
| Tree | admin-state |
| Description | This command configures the administrative state of sending ICMP Destination Unreachable "fragmentation needed, DF set" messages (type 3, code 4) messages to the source if the received size of the IPv4 packet on the private side exceeds the private MTU size. |
| Default | enable |
| Options | enable, disable |
| Introduced | 22.7.R1 |
| Platforms | VSR |

interval *number*

WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|-------------|--|
| Synopsis | Interval for sending ICMP messages |
| Context | configure service ies <i>string</i> interface <i>string</i> ipsec ipsec-tunnel <i>string</i> icmp-generation frag-required interval <i>number</i> |
| Tree | interval |
| Description | This command configures the interval for sending ICMP Destination Unreachable "fragmentation needed, DF set" messages (type 3, code 4). |
| Range | 1 to 60 |
| Default | 10 |
| Units | seconds |
| Introduced | 22.7.R1 |
| Platforms | VSR |

message-count *number*

WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|----------|---|
| Synopsis | Maximum number of ICMP messages that can be sent |
| Context | configure service ies <i>string</i> interface <i>string</i> ipsec ipsec-tunnel <i>string</i> icmp-generation frag-required message-count <i>number</i> |
| Tree | message-count |

| | |
|-------------|--|
| Description | This command configures the maximum number of ICMP Destination Unreachable "fragmentation needed, DF set" messages (type 3, code 4) that can be sent during the configured interval. |
| Range | 10 to 1000 |
| Default | 100 |
| Introduced | 22.7.R1 |
| Platforms | VSR |

icmp6-generation

WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|-------------|--|
| Synopsis | Enter the icmp6-generation context |
| Context | configure service ies string interface string ipsec ipsec-tunnel string icmp6-generation |
| Tree | icmp6-generation |
| Description | Commands in this context configure settings for ICMPv6 message generation. |
| Introduced | 22.7.R1 |
| Platforms | VSR |

packet-too-big

WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|-------------|---|
| Synopsis | Enter the packet-too-big context |
| Context | configure service ies string interface string ipsec ipsec-tunnel string icmp6-generation packet-too-big |
| Tree | packet-too-big |
| Description | <p>Commands in this context configure the parameters to send ICMPv6 PTB (Packet Too Big) messages on the private side.</p> <p>The system sends PTB messages if a received IPv6 packet on the private side is greater than 1280 bytes and it exceeds the private MTU of the tunnel.</p> <p>The private MTU for the tunnel is configured via the configure router interface ipsec ipsec-tunnel ip-mtu command for the interface.</p> |
| Introduced | 22.7.R1 |

Platforms VSR

admin-state *keyword*

WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|------------|--|
| Synopsis | Administrative state of Packet Too Big message sends |
| Context | configure service ies <i>string</i> interface <i>string</i> ipsec ipsec-tunnel <i>string</i> icmp6-generation packet-too-big admin-state <i>keyword</i> |

| Introduced | 22.7.R1 |
| Platforms | VSR |

strict-match *boolean*

WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|-------------|---|
| Synopsis | Enable strict match of the security policy entry |
| Context | configure service ies string interface string ipsec ipsec-tunnel string security-policy strict-match boolean |
| Tree | strict-match |
| Description | When configured to true , this command enables strict match of the security policy entry. |

When a CREATE_CHILD exchange request is received for a static IPsec tunnel, and this request is not a rekey request, ISA matches the received TSi and TSr with the configured security policy. This can be a match only when a received TS (in TSi or TSr) address range matches exactly with the subnet in a security policy entry.

If there is no match, the setup fails, and TS_UNACCEPTABLE is sent.

If there is a match, but there is an existing CHILD_SA for the matched security policy, the setup fails, and NO_PROPOSAL_CHOSEN is sent.

If there is a match, and there is not a CHILD_SA for the matched entry, the subnet is sent in the matched security policy entry as TSi and TSr, and the CHILD_SA is created.

| | |
|------------|---------|
| Default | false |
| Introduced | 22.7.R1 |
| Platforms | VSR |

ipv6-exception *reference*

| | |
|-------------|---|
| Synopsis | IPv6 filter exception used to bypass encryption |
| Context | configure service ies string interface string ipsec ipv6-exception reference |
| Tree | ipv6-exception |
| Description | This command specifies the IPv6 filter exception for an IPsec-secured IPv6 interface. When an IPv6 filter exception is added, clear text packets that match the exception criteria in the IPv6 filter exception can ingress the interface, even when IPsec is enabled on the interface. |
| Reference | configure filter ipv6-exception string |
| Introduced | 22.7.R1 |
| Platforms | VSR |

|-------------|---|
| Synopsis | Number of consecutive BFD messages missed from the peer |
| Context | configure service ies <i>string</i> interface <i>string</i> ipv4 bfd multiplier <i>number</i> |
| Tree | multiplier |
| Description | This command configures the number of missed messages before the BFD session state is changed to down and the upper-level protocol is notified of the fault. A multiplier of less than 3 should not be used in production environments. |

| | |
|------------|---------|
| Range | 1 to 20 |
| Default | 3 |
| Introduced | 16.0.R1 |
| Platforms | All |

receive number

| | |
|-------------|--|
| Synopsis | BFD receive interval over this interface |
| Context | configure service ies string interface string ipv4 bfd receive number |
| Tree | receive |
| Description | This command specifies the receive interval for the BFD session.
On the 7750 SR, this command can only be configured to a value less than 100 when the type command is configured to cpm-np . |
| Range | 10 to 100000 |
| Default | 100 |
| Units | milliseconds |
| Introduced | 16.0.R1 |
| Platforms | All |

transmit-interval number

| | |
|-------------|---|
| Synopsis | BFD transmit interval over this interface |
| Context | configure service ies string interface string ipv4 bfd transmit-interval number |
| Tree | transmit-interval |
| Description | This command configures the transmit intervals.
On the 7750 SR, this command can only be configured to a value less than 100 when the type command is configured to cpm-np . |
| Range | 10 to 100000 |
| Default | 100 |
| Units | milliseconds |
| Introduced | 16.0.R1 |
| Platforms | All |

type keyword

| | |
|-------------|---|
| Synopsis | Local termination point for the BFD session |
| Context | configure service ies string interface string ipv4 bfd type keyword |
| Tree | type |
| Description | This command sets the local termination point for the BFD session to allow for fast timers down to 10 ms granularity.
The options to specify where the BFD session runs are: <ul style="list-style-type: none"> • auto (default) – the system chooses and uses the line card CPU only for single-hop BFD sessions with timer intervals equal to or greater than 100ms. All others are placed on the cpm-np. • cpm-np – BFD session runs on the FP complex associated with the CPM. This is either the FP on the CPM or the one elected on smaller systems. • fp – BFD session runs on the line card CPU. This option can only be used for single-hop BFD sessions with timers equal to or greater than 100ms. |
| Default | auto |
| Options | cpm-np, auto, fp |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

vendor-specific-option

Synopsis Enter the **vendor-specific-option** context

Context **configure** [service](#) [ies](#) [string](#) [interface](#) [string](#) [ipv4](#) [dhcp](#) [option-82](#) [vendor-specific-option](#)

Tree [vendor-specific-option](#)

Description Commands in this context configure the Nokia Vendor-Specific Option (VSO) of the DHCP packet.

Introduced 16.0.R1

Platforms All

client-mac-address *boolean*

Synopsis Send the MAC address in the VSO

Context **configure** [service](#) [ies](#) [string](#) [interface](#) [string](#) [ipv4](#) [dhcp](#) [option-82](#) [vendor-specific-option](#) [client-mac-address](#) *boolean*

Tree [client-mac-address](#)

| | |
|------------|---------|
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

pool-name *boolean*

| | |
|------------|--|
| Synopsis | Send the pool name in the VSO |
| Context | configure service ies <i>string</i> interface <i>string</i> ipv4 dhcp option-82 vendor-specific-option pool-name <i>boolean</i> |
| Tree | pool-name |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

sap-id *boolean*

| | |
|------------|---|
| Synopsis | Send SAP ID in the sub-option of the DHCP relay packet |
| Context | configure service ies <i>string</i> interface <i>string</i> ipv4 dhcp option-82 vendor-specific-option sap-id <i>boolean</i> |
| Tree | sap-id |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

service-id *boolean*

| | |
|------------|---|
| Synopsis | Send the service ID in the Vendor Specific Option |
| Context | configure service ies <i>string</i> interface <i>string</i> ipv4 dhcp option-82 vendor-specific-option service-id <i>boolean</i> |
| Tree | service-id |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

string *string*

| | |
|---------------|---|
| Synopsis | User-defined ASCII string for the VSO |
| Context | configure service ies string interface string ipv4 dhcp option-82 vendor-specific-option string string |
| Tree | string |
| String Length | 1 to 32 |
| Introduced | 16.0.R1 |
| Platforms | All |

system-id *boolean*

| | |
|------------|---|
| Synopsis | Send the system ID in the VSO |
| Context | configure service ies string interface string ipv4 dhcp option-82 vendor-specific-option system-id boolean |
| Tree | system-id |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

proxy-server

| | |
|------------|---|
| Synopsis | Enter the proxy-server context |
| Context | configure service ies string interface string ipv4 dhcp proxy-server |
| Tree | proxy-server |
| Introduced | 16.0.R1 |
| Platforms | All |

admin-state *keyword*

| | |
|------------|---|
| Synopsis | Administrative state of the DHCP proxy server |
| Context | configure service ies string interface string ipv4 dhcp proxy-server admin-state keyword |
| Tree | admin-state |
| Default | disable |
| Options | enable, disable |
| Introduced | 16.0.R1 |

Platforms All

emulated-server *string*

Synopsis IP address used as the DHCP server address for the SAP

Context **configure** [service ies](#) *string* [interface](#) *string* [ipv4 dhcp proxy-server emulated-server](#) *string*

Tree [emulated-server](#)

Description This command configures the IP address which will be used as the DHCP server address in the context of the SAP. Typically, the configured address should be in the context of the subnet represented by the service.

Introduced 16.0.R1

Platforms All

lease-time

Synopsis Enter the **lease-time** context

Context **configure** [service ies](#) *string* [interface](#) *string* [ipv4 dhcp proxy-server lease-time](#)

Tree [lease-time](#)

Introduced 16.0.R1

Platforms All

radius-override *boolean*

Synopsis Use lease time information provided by RADIUS server

Context **configure** [service ies](#) *string* [interface](#) *string* [ipv4 dhcp proxy-server lease-time radius-override](#) *boolean*

Tree [radius-override](#)

Default false

Introduced 16.0.R1

Platforms All

value *number*

Synopsis DHCP lease time

Context **configure** [service ies](#) *string* [interface](#) *string* [ipv4 dhcp proxy-server lease-time value](#) *number*

| | |
|------------|-----------------------|
| Tree | value |
| Range | 300 to 315446399 |
| Units | seconds |
| Introduced | 16.0.R1 |
| Platforms | All |

python-policy *reference*

| | |
|------------|--|
| Synopsis | Python policy |
| Context | configure service ies string interface string ipv4 dhcp python-policy reference |
| Tree | python-policy |
| Reference | configure python python-policy string |
| Introduced | 16.0.R1 |
| Platforms | All |

relay-plain-bootp *boolean*

| | |
|------------|--|
| Synopsis | Enable relaying of plain BOOTP packets |
| Context | configure service ies string interface string ipv4 dhcp relay-plain-bootp boolean |
| Tree | relay-plain-bootp |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

relay-proxy

| | |
|------------|--|
| Synopsis | Enable the relay-proxy context |
| Context | configure service ies string interface string ipv4 dhcp relay-proxy |
| Tree | relay-proxy |
| Introduced | 16.0.R1 |
| Platforms | All |

release-update-src-ip *boolean*

| | |
|----------|--|
| Synopsis | Update the source IP address of a DHCP RELEASE message |
|----------|--|

| | |
|------------|---|
| Context | configure service ies <i>string</i> interface <i>string</i> ipv4 dhcp relay-proxy release-update-src-ip <i>boolean</i> |
| Tree | release-update-src-ip |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

siaddr-override *string*

| | |
|------------|--|
| Synopsis | DHCP server IP address for address hiding function |
| Context | configure service ies <i>string</i> interface <i>string</i> ipv4 dhcp relay-proxy siaddr-override <i>string</i> |
| Tree | siaddr-override |
| Introduced | 16.0.R1 |
| Platforms | All |

release-include-gi-address *boolean*

| | |
|------------|--|
| Synopsis | Include gateway IP address in DHCP Release messages |
| Context | configure service ies <i>string</i> interface <i>string</i> ipv4 dhcp release-include-gi-address <i>boolean</i> |
| Tree | release-include-gi-address |
| Default | false |
| Introduced | 21.7.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

server *string*

| | |
|----------------|--|
| Synopsis | IP addresses for DHCP server requests |
| Context | configure service ies <i>string</i> interface <i>string</i> ipv4 dhcp server <i>string</i> |
| Tree | server |
| Description | This command configures a list of servers that this interface forwards requests to.
The operator can enter the list of servers as either IP addresses or fully qualified domain names. The operator must specify at least one server specified for DHCP relay to work. If there are multiple servers, the system forwards the request to all the servers in the list. |
| Max. Instances | 8 |

| | |
|------------|--------------------------------------|
| Notes | This element is ordered by the user. |
| Introduced | 16.0.R1 |
| Platforms | All |

src-ip-addr *keyword*

| | |
|------------|---|
| Synopsis | Type of source address to use for DHCP relay |
| Context | configure service ies <i>string</i> interface <i>string</i> ipv4 dhcp src-ip-addr <i>keyword</i> |
| Tree | src-ip-addr |
| Default | auto |
| Options | auto, gi-address |
| Introduced | 16.0.R1 |
| Platforms | All |

trusted *boolean*

| | |
|-------------|---|
| Synopsis | Relay untrusted packets |
| Context | configure service ies <i>string</i> interface <i>string</i> ipv4 dhcp trusted <i>boolean</i> |
| Tree | trusted |
| Description | <p>When configured to true, the router enables the trusted mode on the interface. When enabled, the relay agent changes the existing GI address (of the request) to the ingress interface, and forwards the request.</p> <p>A DHCP request that contains a GI address of 0.0.0.0 and an Option 82 field in the packet is discarded unless it arrives on a trusted circuit.</p> <p>This behavior only applies if the Relay Agent Information Option action is to keep the existing information. When the Option 82 field is replaced by the relay agent, the original Option 82 information is lost, and there is no reason to enable the trusted option.</p> |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

use-arp *boolean*

| | |
|----------|---|
| Synopsis | Use ARP to determine the destination hardware address |
| Context | configure service ies <i>string</i> interface <i>string</i> ipv4 dhcp use-arp <i>boolean</i> |
| Tree | use-arp |

| | |
|------------|---------|
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

icmp

| | |
|------------|--|
| Synopsis | Enter the icmp context |
| Context | configure service ies <i>string</i> interface <i>string</i> ipv4 icmp |
| Tree | icmp |
| Introduced | 16.0.R1 |
| Platforms | All |

mask-reply *boolean*

| | |
|------------|--|
| Synopsis | Allow responses to ICMP mask requests on the interface |
| Context | configure service ies <i>string</i> interface <i>string</i> ipv4 icmp mask-reply <i>boolean</i> |
| Tree | mask-reply |
| Default | true |
| Introduced | 16.0.R1 |
| Platforms | All |

param-problem

| | |
|-------------|--|
| Synopsis | Enter the param-problem context |
| Context | configure service ies <i>string</i> interface <i>string</i> ipv4 icmp param-problem |
| Tree | param-problem |
| Description | Commands in this context specify the settings for ICMP Parameter Problem messages generated by the interface. |
| Introduced | 16.0.R1 |
| Platforms | All |

admin-state *keyword*

| | |
|----------|---|
| Synopsis | Administrative state of sent Parameter Problem messages |
| Context | configure service ies <i>string</i> interface <i>string</i> ipv4 icmp param-problem admin-state <i>keyword</i> |

| | |
|------------|-----------------------------|
| Tree | admin-state |
| Default | enable |
| Options | enable, disable |
| Introduced | 16.0.R1 |
| Platforms | All |

number *number*

| | |
|------------|--|
| Synopsis | Maximum number of Parameter Problem messages to send |
| Context | configure service ies <i>string</i> interface <i>string</i> ipv4 icmp param-problem number <i>number</i> |
| Tree | number |
| Range | 10 to 1000 |
| Default | 100 |
| Introduced | 16.0.R1 |
| Platforms | All |

seconds *number*

| | |
|------------|---|
| Synopsis | Time used to limit number of Parameter Problem messages |
| Context | configure service ies <i>string</i> interface <i>string</i> ipv4 icmp param-problem seconds <i>number</i> |
| Tree | seconds |
| Range | 1 to 60 |
| Default | 10 |
| Units | seconds |
| Introduced | 16.0.R1 |
| Platforms | All |

redirects

| | |
|-------------|---|
| Synopsis | Enter the redirects context |
| Context | configure service ies <i>string</i> interface <i>string</i> ipv4 icmp redirects |
| Tree | redirects |
| Description | <p>Commands in this context configure the settings for ICMP redirect messages generated by the interface.</p> <p>The system sends ICMP redirect messages to alert the sending node that a more optimal route is available on another router on the same subnetwork.</p> |

| | |
|------------|---------|
| Introduced | 16.0.R1 |
| Platforms | All |

admin-state *keyword*

| | |
|------------|--|
| Synopsis | Administrative state of sending ICMP redirect messages |
| Context | configure service ies <i>string</i> interface <i>string</i> ipv4 icmp redirects admin-state <i>keyword</i> |
| Tree | admin-state |
| Default | enable |
| Options | enable, disable |
| Introduced | 16.0.R1 |
| Platforms | All |

number *number*

| | |
|------------|--|
| Synopsis | Maximum number of ICMP redirect messages to send |
| Context | configure service ies <i>string</i> interface <i>string</i> ipv4 icmp redirects number <i>number</i> |
| Tree | number |
| Range | 10 to 1000 |
| Default | 100 |
| Introduced | 16.0.R1 |
| Platforms | All |

seconds *number*

| | |
|------------|---|
| Synopsis | Time used to limit the number of ICMP redirect messages |
| Context | configure service ies <i>string</i> interface <i>string</i> ipv4 icmp redirects seconds <i>number</i> |
| Tree | seconds |
| Range | 1 to 60 |
| Default | 10 |
| Units | seconds |
| Introduced | 16.0.R1 |
| Platforms | All |

ttl-expired

| | |
|-------------|---|
| Synopsis | Enter the ttl-expired context |
| Context | configure service ies string interface string ipv4 icmp ttl-expired |
| Tree | ttl-expired |
| Description | Commands in this context configure the settings for ICMP TTL expired messages generated by the interface. |
| Introduced | 16.0.R1 |
| Platforms | All |

admin-state keyword

| | |
|------------|--|
| Synopsis | Administrative state of sending TTL expired messages |
| Context | configure service ies string interface string ipv4 icmp ttl-expired admin-state keyword |
| Tree | admin-state |
| Default | enable |
| Options | enable, disable |
| Introduced | 16.0.R1 |
| Platforms | All |

number number

| | |
|------------|--|
| Synopsis | Maximum number of TTL expired messages to send |
| Context | configure service ies string interface string ipv4 icmp ttl-expired number number |
| Tree | number |
| Range | 10 to 2000 |
| Default | 100 |
| Introduced | 16.0.R1 |
| Platforms | All |

seconds number

| | |
|----------|---|
| Synopsis | Time used to limit the number of TTL expired messages |
| Context | configure service ies string interface string ipv4 icmp ttl-expired seconds number |
| Tree | seconds |
| Range | 1 to 60 |

| | |
|------------|---------|
| Default | 10 |
| Units | seconds |
| Introduced | 16.0.R1 |
| Platforms | All |

unreachables

| | |
|-------------|--|
| Synopsis | Enter the unreachables context |
| Context | configure service ies string interface string ipv4 icmp unreachables |
| Tree | unreachables |
| Description | Commands in this context specify the settings for ICMP host and network destination unreachable messages generated by the interface. |
| Introduced | 16.0.R1 |
| Platforms | All |

admin-state *keyword*

| | |
|------------|---|
| Synopsis | Administrative state of sending unreachable messages |
| Context | configure service ies string interface string ipv4 icmp unreachables admin-state keyword |
| Tree | admin-state |
| Default | enable |
| Options | enable, disable |
| Introduced | 16.0.R1 |
| Platforms | All |

number *number*

| | |
|------------|---|
| Synopsis | Maximum number of unreachable messages to send |
| Context | configure service ies string interface string ipv4 icmp unreachables number number |
| Tree | number |
| Range | 10 to 2000 |
| Default | 100 |
| Introduced | 16.0.R1 |
| Platforms | All |

seconds *number*

| | |
|------------|---|
| Synopsis | Time to limit the number of ICMP unreachable messages |
| Context | configure service ies <i>string</i> interface <i>string</i> ipv4 icmp unreachable <i>seconds</i> <i>number</i> |
| Tree | seconds |
| Range | 1 to 60 |
| Default | 10 |
| Units | seconds |
| Introduced | 16.0.R1 |
| Platforms | All |

ip-helper-address *string*

| | |
|------------|---|
| Synopsis | Gateway address |
| Context | configure service ies <i>string</i> interface <i>string</i> ipv4 ip-helper-address <i>string</i> |
| Tree | ip-helper-address |
| Introduced | 16.0.R1 |
| Platforms | All |

local-dhcp-server *reference*

| | |
|------------|--|
| Synopsis | DHCP server for the interface |
| Context | configure service ies <i>string</i> interface <i>string</i> ipv4 local-dhcp-server <i>reference</i> |
| Tree | local-dhcp-server |
| Reference | configure router <i>string</i> dhcp-server dhcpv4 <i>string</i> |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

neighbor-discovery

| | |
|------------|--|
| Synopsis | Enter the neighbor-discovery context |
| Context | configure service ies <i>string</i> interface <i>string</i> ipv4 neighbor-discovery |
| Tree | neighbor-discovery |
| Introduced | 16.0.R1 |
| Platforms | All |

host-route

| | |
|------------|---|
| Synopsis | Enter the host-route context |
| Context | configure service ies <i>string</i> interface <i>string</i> ipv4 neighbor-discovery host-route |
| Tree | host-route |
| Introduced | 19.10.R1 |
| Platforms | All |

populate [[route-type](#)] *keyword*

| | |
|------------|---|
| Synopsis | Enter the populate list instance |
| Context | configure service ies <i>string</i> interface <i>string</i> ipv4 neighbor-discovery host-route populate <i>keyword</i> |
| Tree | populate |
| Introduced | 19.10.R1 |
| Platforms | All |

[[route-type](#)] *keyword*

| | |
|------------|---|
| Synopsis | Type of ARP or ND entries that generate host routes |
| Context | configure service ies <i>string</i> interface <i>string</i> ipv4 neighbor-discovery host-route populate <i>keyword</i> |
| Tree | populate |
| Options | static, dynamic, evpn |
| Notes | This element is part of a list key. |
| Introduced | 19.10.R1 |
| Platforms | All |

route-tag *number*

WARNING:

Modifying this element recreates the parent element automatically for the new value to take effect.

| | |
|----------|---|
| Synopsis | Tag value used with the host route from an ARP/ND entry |
| Context | configure service ies <i>string</i> interface <i>string</i> ipv4 neighbor-discovery host-route populate <i>keyword</i> route-tag <i>number</i> |

| | |
|-------------|--|
| Tree | route-tag |
| Description | This command specifies the route tag that is added in the route table for ARP or ND host routes. This tag can be matched on BGP VRF export and BGP peer export policies. |
| Range | 1 to 255 |
| Introduced | 19.10.R1 |
| Platforms | All |

learn-unsolicited *boolean*

| | |
|-------------|--|
| Synopsis | Learn new entries from any received NA message |
| Context | configure service ies <i>string</i> interface <i>string</i> ipv4 neighbor-discovery learn-unsolicited <i>boolean</i> |
| Tree | learn-unsolicited |
| Description | <p>When configured to true, the router can learn neighbor entries from received unsolicited Neighbor Advertisement (NA) messages, with or without the solicited (S) flag set. The command can be enabled for global addresses, link-local addresses, or for both.</p> <p>When configured to false, the router follows standard behavior for learning neighbor entries.</p> <ul style="list-style-type: none"> • If an unsolicited NA (regardless of the S flag) is received from a neighbor that is not yet in the Neighbor Discovery (ND) cache, the NA is ignored. • If an NS, RS, RA, or Redirect message with a Link Layer Address (MAC) is received from a neighbor that is not yet in the ND cache, a new neighbor entry is created in the cache to store the received Link Layer MAC. The neighbor is put in the STALE state. |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

limit

| | |
|------------|---|
| Synopsis | Enter the limit context |
| Context | configure service ies <i>string</i> interface <i>string</i> ipv4 neighbor-discovery limit |
| Tree | limit |
| Introduced | 16.0.R1 |
| Platforms | All |

log-only *boolean*

| | |
|------------|--|
| Synopsis | Generate log entries only if limit is reached |
| Context | configure service ies string interface string ipv4 neighbor-discovery limit log-only <i>boolean</i> |
| Tree | log-only |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

max-entries *number*

| | |
|------------|--|
| Synopsis | Maximum number of entries learned on an IP interface |
| Context | configure service ies string interface string ipv4 neighbor-discovery limit max-entries <i>number</i> |
| Tree | max-entries |
| Range | 0 to 524288 |
| Introduced | 16.0.R1 |
| Platforms | All |

threshold *number*

| | |
|------------|--|
| Synopsis | Threshold value that triggers a warning message |
| Context | configure service ies string interface string ipv4 neighbor-discovery limit threshold <i>number</i> |
| Tree | threshold |
| Range | 1 to 100 |
| Default | 90 |
| Units | percent |
| Introduced | 16.0.R1 |
| Platforms | All |

local-proxy-arp *boolean*

| | |
|----------|---|
| Synopsis | Enable local proxy ARP on interface |
| Context | configure service ies string interface string ipv4 neighbor-discovery local-proxy-arp <i>boolean</i> |

| | |
|-------------|--|
| Tree | local-proxy-arp |
| Description | When configured to true , the router enables local proxy ARP on the interface.
When configured to false , the router does not respond to ARP requests for addresses on the same subnet. |
| Introduced | 16.0.R1 |
| Platforms | All |

populate *boolean*

| | |
|------------|--|
| Synopsis | Allow static and dynamic hosts to be populated in system ARP cache |
| Context | configure service ies <i>string</i> interface <i>string</i> ipv4 neighbor-discovery populate <i>boolean</i> |
| Tree | populate |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

proactive-refresh *boolean*

| | |
|-------------|--|
| Synopsis | Send a single refresh message before entry timeout |
| Context | configure service ies <i>string</i> interface <i>string</i> ipv4 neighbor-discovery proactive-refresh <i>boolean</i> |
| Tree | proactive-refresh |
| Description | When configured to true , the router always sends a refresh message 30 seconds before the timeout of the entry (a single refresh message with no retries).
When configured to false , the router marks an entry as stale 30 seconds before age-out, and the router only sends an ARP request to refresh the entry if the IOM receives traffic that uses it. Then, the IOM asks the ARP application to send a refresh message. With ARP proactive refresh enabled, the ARP module sends a refresh message regardless of the IOM receiving traffic. |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

proxy-arp-policy *reference*

| | |
|----------|-----------------------|
| Synopsis | Proxy ARP policy name |
|----------|-----------------------|

| | |
|----------------|--|
| Context | configure service ies <i>string</i> interface <i>string</i> ipv4 neighbor-discovery proxy-arp-policy <i>reference</i> |
| Tree | proxy-arp-policy |
| Reference | configure policy-options policy-statement <i>string</i> |
| Max. Instances | 5 |
| Notes | This element is ordered by the user. |
| Introduced | 16.0.R1 |
| Platforms | All |

remote-proxy-arp *boolean*

| | |
|------------|--|
| Synopsis | Enable remote proxy ARP on the interface |
| Context | configure service ies <i>string</i> interface <i>string</i> ipv4 neighbor-discovery remote-proxy-arp <i>boolean</i> |
| Tree | remote-proxy-arp |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

retry-timer *number*

| | |
|------------|--|
| Synopsis | ARP retry interval |
| Context | configure service ies <i>string</i> interface <i>string</i> ipv4 neighbor-discovery retry-timer <i>number</i> |
| Tree | retry-timer |
| Range | 1 to 300 |
| Default | 50 |
| Units | deciseconds |
| Introduced | 16.0.R1 |
| Platforms | All |

static-neighbor [[ipv4-address](#)] *string*

| | |
|----------|--|
| Synopsis | Enter the static-neighbor list instance |
| Context | configure service ies <i>string</i> interface <i>string</i> ipv4 neighbor-discovery static-neighbor <i>string</i> |

| | |
|------------|---------------------------------|
| Tree | static-neighbor |
| Introduced | 16.0.R1 |
| Platforms | All |

[ipv4-address] *string*

| | |
|------------|--|
| Synopsis | IPv4 address that corresponds to the physical address |
| Context | configure service ies <i>string</i> interface <i>string</i> ipv4 neighbor-discovery static-neighbor <i>string</i> |
| Tree | static-neighbor |
| Notes | This element is part of a list key. |
| Introduced | 16.0.R1 |
| Platforms | All |

mac-address *string*

| | |
|------------|--|
| Synopsis | MAC address for the static neighbor |
| Context | configure service ies <i>string</i> interface <i>string</i> ipv4 neighbor-discovery static-neighbor <i>string</i> mac-address <i>string</i> |
| Tree | mac-address |
| Notes | This element is mandatory. |
| Introduced | 16.0.R1 |
| Platforms | All |

static-neighbor-unnumbered

| | |
|------------|---|
| Synopsis | Enable the static-neighbor-unnumbered context |
| Context | configure service ies <i>string</i> interface <i>string</i> ipv4 neighbor-discovery static-neighbor-unnumbered |
| Tree | static-neighbor-unnumbered |
| Introduced | 16.0.R1 |
| Platforms | All |

mac-address *string*

| | |
|----------|-------------------------------------|
| Synopsis | MAC address for the static neighbor |
|----------|-------------------------------------|

| | |
|------------|---|
| Context | configure service ies <i>string</i> interface <i>string</i> ipv4 neighbor-discovery static-neighbor-unnumbered mac-address <i>string</i> |
| Tree | mac-address |
| Notes | This element is mandatory. |
| Introduced | 16.0.R1 |
| Platforms | All |

timeout *number*

| | |
|-------------|---|
| Synopsis | Timeout for an ARP entry learned on the interface |
| Context | configure service ies <i>string</i> interface <i>string</i> ipv4 neighbor-discovery timeout <i>number</i> |
| Tree | timeout |
| Description | This command configures the minimum time an ARP entry learned on the IP interface is stored in the ARP table. ARP entries are automatically refreshed when an ARP request or gratuitous ARP is seen by an IP host. Otherwise, the ARP entry is aged from the ARP table. |
| Range | 0 to 65535 |
| Default | 14400 |
| Units | seconds |
| Introduced | 16.0.R1 |
| Platforms | All |

primary

| | |
|------------|---|
| Synopsis | Enable the primary context |
| Context | configure service ies <i>string</i> interface <i>string</i> ipv4 primary |
| Tree | primary |
| Introduced | 16.0.R1 |
| Platforms | All |

address *string*

| | |
|----------|---|
| Synopsis | Primary IPv4 address assigned to the interface |
| Context | configure service ies <i>string</i> interface <i>string</i> ipv4 primary address <i>string</i> |
| Tree | address |
| Notes | This element is mandatory. |

| | |
|------------|---------|
| Introduced | 16.0.R1 |
| Platforms | All |

broadcast *keyword*

| | |
|------------|---|
| Synopsis | Broadcast address format |
| Context | configure service ies <i>string</i> interface <i>string</i> ipv4 primary broadcast <i>keyword</i> |
| Tree | broadcast |
| Default | host-ones |
| Options | all-ones, host-ones |
| Introduced | 16.0.R1 |
| Platforms | All |

prefix-length *number*

| | |
|------------|--|
| Synopsis | IPv4 address prefix length |
| Context | configure service ies <i>string</i> interface <i>string</i> ipv4 primary prefix-length <i>number</i> |
| Tree | prefix-length |
| Range | 0 to 32 |
| Notes | This element is mandatory. |
| Introduced | 16.0.R1 |
| Platforms | All |

track-srrp *number*

| | |
|------------|---|
| Synopsis | SRRP instance whose state is tracked on this IP address |

admin-state *keyword*

| | |
|-------------|--|
| Synopsis | Administrative state of VRRP |
| Context | configure service ies <i>string</i> interface <i>string</i> ipv4 vrrp <i>number</i> admin-state <i>keyword</i> |
| Tree | admin-state |
| Description | <p>The command determines the administrative state of non-owner virtual router instances.</p> <p>Non-owner virtual router instances can be administratively disabled. This allows the termination of VRRP participation in the virtual router and stops all routing and other access capabilities with regards to the virtual router IP addresses. Disabling the virtual router instance provides a mechanism to maintain the virtual routers without causing false backup or master state changes.</p> <p>When disabled, no VRRP advertisement messages are generated and all received VRRP advertisement messages are silently discarded with no processing.</p> <p>Whenever the administrative or operational state of a virtual router instance transitions, a log message is generated.</p> <p>An owner virtual router context does not use this command. To administratively disable an owner virtual router instance, use the admin-state command within the parent IP interface node which administratively disables the IP interface.</p> |
| Default | enable |
| Options | enable, disable |
| Introduced | 16.0.R1 |
| Platforms | All |

authentication-key *string*

| | |
|---------------|--|
| Synopsis | Password for simple text authentication |
| Context | configure service ies <i>string</i> interface <i>string</i> ipv4 vrrp <i>number</i> authentication-key <i>string</i> |
| Tree | authentication-key |
| Description | This command optionally assigns a simple text password authentication key to generate master VRRP advertisement messages and validate received VRRP advertisement messages.

If this command is re-executed with a different password key defined, the new key immediately replaces the old key. This command may be executed at any time. |
| String Length | 1 to 38 |
| Introduced | 16.0.R1 |
| Platforms | All |

backup *string*

| | |
|----------------|---|
| Synopsis | Virtual router IP addresses for the interface |
| Context | configure service ies <i>string</i> interface <i>string</i> ipv4 vrrp <i>number</i> backup <i>string</i> |
| Tree | backup |
| Description | This command associates virtual router IP addresses with those of the parental IP interface.

This command has two different functions based on whether it is being executed on an owner or non-owner virtual router instance.

Non-owner virtual router instances create a routable IP interface address that is operationally dependent on the virtual router instance mode (master or backup). This command, when executed on an owner virtual router instance, does not create a routable IP interface address; it simply defines the existing IP addresses of the parental IP interface that are advertised by the virtual router instance.

For owner virtual router instances, this command defines the IP addresses that are advertised within VRRP advertisement messages. This communicates the IP addresses that the master is advertising to backup virtual routers receiving the messages. The specified <i>unicast-ipv4-address</i> must be equal to one of the existing IP addresses in the parental IP interface (primary or secondary) or this command fails.

See "Owner and non-owner VRRP" in the <i>7450 ESS, 7750 SR, 7950 XRS, and VSR Router Configuration Guide</i> for more information about owner and non-owner virtual router instances. |
| Max. Instances | 16 |

mac *string*

| | |
|-------------|--|
| Synopsis | Virtual MAC address to use in ARP responses |
| Context | configure service ies <i>string</i> interface <i>string</i> ipv4 vrrp number mac <i>string</i> |
| Tree | mac |
| Description | <p>This command sets an explicit MAC address for the virtual router instance that overrides the VRRP default derived from the VRID.</p> <p>Changing the default MAC address is useful when an existing HSRP or other non-VRRP default MAC is in use by the IP hosts that use the virtual router IP address. Many hosts do not monitor unessential ARPs and continue to use the cached non-VRRP MAC address after the virtual router becomes master of the host's gateway address.</p> <p>Additionally, this command sets the MAC address used in ARP responses when the virtual router instance is master. Routing of IP packets with <i>unicast-mac-address</i> as the destination MAC is also enabled. The MAC must be the same for all virtual routers participating as a virtual router or indeterminate connectivity by the attached IP hosts</p> |

results. All VRRP advertisement messages are transmitted with *unicast-mac-address* as the source MAC.

An operator can execute this command at any time and it takes effect immediately. When the virtual router MAC on a master virtual router instance changes, a gratuitous ARP is immediately sent with a VRRP advertisement message. If the virtual router instance is disabled or operating as a backup, the gratuitous ARP and VRRP advertisement messages are not sent.

| | |
|------------|---------|
| Introduced | 16.0.R1 |
| Platforms | All |

master-int-inherit *boolean*

| | |
|-------------|---|
| Synopsis | Allow master instance to dictate the master down timer |
| Context | configure <i>service ies string interface string ipv4 vrrp number master-int-inherit boolean</i> |
| Tree | master-int-inherit |
| Description | <p>When configured to true, the virtual router instance inherits the advertisement interval timer of the master VRRP router, which backup routers use to calculate the master down timer.</p> <p>When configured to false, the locally configured message interval must match the master's VRRP advertisement message advertisement interval field value or the message is discarded.</p> |
| Introduced | 16.0.R1 |
| Platforms | All |

message-interval *number*

| | |
|-------------|--|
| Synopsis | Interval for sending VRRP advertisement messages |
| Context | configure <i>service ies string interface string ipv4 vrrp number message-interval number</i> |
| Tree | message-interval |
| Description | <p>This command configures the administrative advertisement message timer used by the master virtual router instance to send VRRP advertisement messages. The backup master down timer is derived from the value configured using this command.</p> <p>The usage of this command varies for non-owner virtual router instances, depending on the state of the virtual router (master or backup) and the state of the master-int-inherit command:</p> <ul style="list-style-type: none"> • When a non-owner is operating as master for the virtual router, the system uses the configured value of this command as the operational advertisement timer, similar to an owner virtual router instance. The master-int-inherit command has no effect when operating as master. • When a non-owner is in the backup state with master-int-inherit disabled, the system uses the configured value of this command to match the incoming |

advertisement interval field of the VRRP advertisement message. If the locally configured message interval does not match the advertisement interval field, the system discards the VRRP advertisement.

- When a non-owner is in the backup state with **master-int-inherit** enabled, the configured value of this command is ignored. The master down timer is indirectly derived from the advertisement interval field value of the incoming VRRP advertisement message.

| | |

monitor-oper-group *reference*

WARNING:

Modifying this element recreates the parent element automatically for the new value to take effect.

| | |
|-------------|---|
| Synopsis | VRRP instance to follow a specified operational group |
| Context | configure service ies string interface string ipv4 vrrp number monitor-oper-group reference |
| Tree | monitor-oper-group |
| Description | This command configures VRRP to associate with an operational group. When associated, VRRP notifies the operational group of its state changes so that other protocols can monitor it to provide a redundancy mechanism. When VRRP is the master router, the operational group is up and the operational group is down for all other VRRP states. |
| Reference | configure service oper-group string |
| Introduced | 22.2.R1 |
| Platforms | All |

ntp-reply *boolean*

| | |
|-------------|--|
| Synopsis | Allow processing of NTP requests |
| Context | configure service ies string interface string ipv4 vrrp number ntp-reply boolean |
| Tree | ntp-reply |
| Description | When configured to true , the router redirects NTP requests to the VRRP virtual IP address. This behavior only applies to the router acting as the master VRRP router. |

When configured to **false**, the router does not process NTP requests.

| | |
|------------|---------|
| Default | false |
| Introduced | 20.2.R1 |
| Platforms | All |

oper-group *reference*

| | |
|-------------|---|
| Synopsis | Operational group name associated with the VRRP |
| Context | configure service ies string interface string ipv4 vrrp number oper-group reference |
| Tree | oper-group |
| Description | This command configures an operational group to associate with the VRRP. When associated, VRRP notifies the operational group of its state changes so that other protocols can monitor it to provide a redundancy mechanism. When VRRP is the master router (MR), the operational group is up. The operational group is down for all other VRRP states. |
| Reference | configure service oper-group string |
| Introduced | 16.0.R1 |
| Platforms | All |

owner *boolean*

WARNING:

Modifying this element recreates the parent element automatically for the new value to take effect.

| | |
|-------------|---|
| Synopsis | Designate the virtual router instance as owner |
| Context | configure service ies string interface string ipv4 vrrp number owner boolean |
| Tree | owner |
| Description | When configured to true , the router designates this virtual router instance as the owner of the virtual router IP addresses. Therefore, this virtual router becomes responsible for forwarding packets sent to the virtual router IP addresses. The owner also assumes the role of master virtual router.

When configured to false , this virtual router instance is designated as a non-owner. |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

passive *boolean*

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

| | |
|-------------|---|
| Synopsis | Suppress the processing of VRRP advertisement messages |
| Context | configure <i>service ies string interface string ipv4 vrrp number</i> passive <i>boolean</i> |
| Tree | passive |
| Description | <p>When configured to true, the router identifies this virtual router instance as passive; and therefore the owner of the virtual router IP addresses. A passive virtual router instance does not transmit or receive VRRP advertisement messages and is always in either the master state (if the interface is operationally up) or the init state (if the interface is operationally down).</p> <p>When configured to false, this virtual router instance is not identified as passive, meaning that it transmits and receives VRRP advertisement messages.</p> |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

ping-reply *boolean*

| | |
|-------------|---|
| Synopsis | Allow non-owner master to reply to ICMP echo requests |
| Context | configure <i>service ies string interface string ipv4 vrrp number</i> ping-reply <i>boolean</i> |
| Tree | ping-reply |
| Description | <p>When configured to true, the router allows the non-owner master to reply to ICMP echo requests directed at the IP addresses of the virtual router instance. Any routed interface can receive the ping request. Ping must not have been disabled at the management security level (either on the parental IP interface or on the Ping source host address).</p> <p>When configured to false, ICMP echo requests sent to non-owner master virtual IP addresses are silently discarded.</p> <p>Non-owner backup virtual routers never respond to ICMP echo requests, regardless of the configuration of this command.</p> |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

policy *reference*

| | |
|----------|------------------------------|
| Synopsis | VRRP priority control policy |
|----------|------------------------------|

| | |
|-------------|--|
| Context | configure service ies <i>string</i> interface <i>string</i> ipv4 vrrp <i>number</i> policy <i>reference</i> |
| Tree | policy |
| Description | <p>This command configures a VRRP priority control policy to associate with the virtual router instance.</p> <p>VRRP priority control policies can override or adjust the base priority value of the virtual router instance, depending on events or conditions within the chassis.</p> <p>An operator can associate a policy with more than one virtual router instance. The priority events within the policy either override or diminish the base priority set with the priority command. As priority events clear in the policy, the in-use priority can eventually be restored to the base priority value.</p> <p>For non-owner virtual router instances, if this command is not executed, the base priority is used as the in-use priority.</p> |
| Reference | configure vrrp policy <i>number</i> |
| Introduced | 16.0.R1 |
| Platforms | All |

preempt *boolean*

| | |
|-------------|--|
| Synopsis | Allow the VRRP to override an existing non-owner master |
| Context | configure service ies <i>string</i> interface <i>string</i> ipv4 vrrp <i>number</i> preempt <i>boolean</i> |
| Tree | preempt |
| Description | <p>When configured to true, this virtual router instance overrides any non-owner master with an in-use message priority value less than the in-use priority value of this virtual router.</p> <p>When configured to false, this virtual router only becomes master if the master down timer expires before a VRRP advertisement message is received from another virtual router.</p> |
| Default | true |
| Introduced | 16.0.R1 |
| Platforms | All |

priority *number*

| | |
|-------------|---|
| Synopsis | Base priority for the VRRP |
| Context | configure service ies <i>string</i> interface <i>string</i> ipv4 vrrp <i>number</i> priority <i>number</i> |
| Tree | priority |
| Description | This command configures the base router priority for the virtual router instance, which defines the selection order of the virtual router in the master election process. |

The in-use priority is derived from the base priority. However, the in-use priority is modified by optional VRRP priority control policies. An operator can use VRRP priority control policies to either override or adjust the base priority value depending on events or conditions within the chassis.

| | |
|------------|----------|
| Range | 1 to 255 |
| Introduced | 16.0.R1 |
| Platforms | All |

ssh-reply *boolean*

| | |
|-------------|--|
| Synopsis | Allow the non-owner master to reply to SSH requests |
| Context | configure service ies <i>string</i> interface <i>string</i> ipv4 vrrp <i>number</i> ssh-reply <i>boolean</i> |
| Tree | ssh-reply |
| Description | When configured to true , the router allows the non-owner master to reply to SSH requests directed at the IP addresses of the virtual router instance. Any routed interface can receive the SSH request. SSH cannot be disabled at the management security level (either on the parental IP interface or on the SSH source host address).

When configure to false , SSH requests to non-owner master virtual IP addresses are silently discarded. |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

standby-forwarding *boolean*

| | |
|-------------|---|
| Synopsis | Allow standby router to forward traffic |
| Context | configure service ies <i>string</i> interface <i>string</i> ipv4 vrrp <i>number</i> standby-forwarding <i>boolean</i> |
| Tree | standby-forwarding |
| Description | When configured to true , the standby router forwards all traffic.

When configured to false , the standby router cannot forward traffic sent to the MAC address of the virtual router. However, the standby router still forwards traffic sent to its own MAC address. |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

telnet-reply *boolean*

| | |
|-------------|---|
| Synopsis | Allow non-owner master to reply to Telnet requests |
| Context | configure service ies <i>string</i> interface <i>string</i> ipv4 vrrp <i>number</i> telnet-reply <i>boolean</i> |
| Tree | telnet-reply |
| Description | <p>When configured to true, the router allows the non-owner master to reply to Telnet requests directed at the IP addresses of the virtual router instance. Any routed interface can receive Telnet requests. Telnet cannot be disabled at the management security level (either on the parental IP interface or on the Telnet source host address).</p> <p>When configured to false, the router silently discards Telnet requests sent to non-owner master virtual IP addresses.</p> |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

traceroute-reply *boolean*

| | |
|-------------|---|
| Synopsis | Allow non-owner master to reply to traceroute requests |
| Context | configure service ies <i>string</i> interface <i>string</i> ipv4 vrrp <i>number</i> traceroute-reply <i>boolean</i> |
| Tree | traceroute-reply |
| Description | <p>When configured to true, the router allows a non-owner master to reply to traceroute requests directed to the IP addresses of the virtual router instance.</p> <p>When configured to false, the router silently discards traceroute requests sent to non-owner master virtual IP addresses.</p> <p>Traceroute must not have been disabled at the management security level (either on the parental IP interface or the source host address).</p> |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

Modifying this element recreates the parent element automatically for the new value to take effect.

| | |
|-------------|---|
| Synopsis | Enable Duplicate Address Detection |
| Context | configure <i>service ies string interface string ipv6 address string duplicate-address-detection boolean</i> |
| Tree | <i>duplicate-address-detection</i> |
| Description | When configured to true , the router enables Duplicate Address Detection (DAD).
When configured to false , the router disables DAD and sets the address to preferred, even if there is a duplicated address. |
| Default | true |
| Introduced | 16.0.R1 |
| Platforms | All |

eui-64 *boolean***WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

| | |
|-------------|--|
| Synopsis | Form IPv6 address from prefix and 64-bit interface ID |
| Context | configure service ies <i>string</i> interface <i>string</i> ipv6 address <i>string</i> eui-64 <i>boolean</i> |
| Tree | eui-64 |
| Description | When configured to true , the router forms a complete IPv6 address from the supplied prefix and 64-bit interface identifier. The 64-bit interface identifier is derived from the MAC address on Ethernet interfaces. For interfaces without a MAC address, for example POS interfaces, use the base MAC address of the chassis. |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

prefix-length *number*

| | |
|------------|---|
| Synopsis | IPv6 address prefix length |
| Context | configure service ies <i>string</i> interface <i>string</i> ipv6 address <i>string</i> prefix-length <i>number</i> |

| Notes | This element is mandatory. |
| Introduced | 16.0.R1 |
| Platforms | All |

primary-preference *number*

| | |
|-------------|---|
| Synopsis | Index assigned to the IPv6 address of the interface |
| Context | configure service ies <i>string</i> interface <i>string</i> ipv6 address <i>string</i> primary-preference <i>number</i> |
| Tree | primary-preference |
| Description | This command assigns a primary preference index to an IPv6 address of the interface to enforce the order in which the address is used by control plane protocols and applications that require a fixed address of the interface, such as LDP and Segment Routing. In cases where a fixed address is required when originating packets from the interface, the IPv6 address with the lowest primary preference index is selected. If the selected address is removed, the next IPv6 address with the next lowest primary preference index is selected. |

If this index is not specified for the IPv6 address, the system assigns the next available index value to the address. The address index space is unique across all addresses of a given interface.

| | |
|------------|--|
| Synopsis | Administrative state of BFD sessions |
| Context | configure service ies <i>string</i> interface <i>string</i> ipv6 bfd admin-state <i>keyword</i> |
| Tree | admin-state |
| Default | disable |
| Options | enable, disable |
| Introduced | 16.0.R1 |
| Platforms | All |

echo-receive *number*

| | |
|------------|--|
| Synopsis | Minimum echo interval over this interface |
| Context | configure service ies <i>string</i> interface <i>string</i> ipv6 bfd echo-receive <i>number</i> |
| Tree | echo-receive |
| Range | 100 to 100000 |
| Units | milliseconds |
| Introduced | 16.0.R1 |
| Platforms | All |

multiplier *number*

| | |
|-------------|---|
| Synopsis | Number of consecutive BFD messages missed from the peer |
| Context | configure service ies <i>string</i> interface <i>string</i> ipv6 bfd multiplier <i>number</i> |
| Tree | multiplier |
| Description | This command configures the number of missed messages before the BFD session state is changed to down and the upper-level protocol is notified of the fault. A multiplier of less than 3 should not be used in production environments. |
| Range | 1 to 20 |
| Default | 3 |
| Introduced | 16.0.R1 |
| Platforms | All |

receive *number*

| | |
|-------------|--|
| Synopsis | BFD receive interval over this interface |
| Context | configure service ies <i>string</i> interface <i>string</i> ipv6 bfd receive <i>number</i> |
| Tree | receive |
| Description | This command specifies the receive interval for the BFD session.
On the 7750 SR, this command can only be configured to a value less than 100 when the type command is configured to cpm-np . |
| Range | 10 to 100000 |
| Default | 100 |
| Units | milliseconds |
| Introduced | 16.0.R1 |
| Platforms | All |

transmit-interval *number*

| | |
|-------------|---|
| Synopsis | BFD transmit interval over this interface |
| Context | configure service ies <i>string</i> interface <i>string</i> ipv6 bfd transmit-interval <i>number</i> |
| Tree | transmit-interval |
| Description | This command configures the transmit intervals.
On the 7750 SR, this command can only be configured to a value less than 100 when the type command is configured to cpm-np . |
| Range | 10 to 100000 |
| Default | 100 |
| Units | milliseconds |
| Introduced | 16.0.R1 |
| Platforms | All |

type *keyword*

| | |
|-------------|---|
| Synopsis | Local termination point for the BFD session |
| Context | configure service ies <i>string</i> interface <i>string</i> ipv6 bfd type <i>keyword</i> |
| Tree | type |
| Description | This command sets the local termination point for the BFD session to allow for fast timers down to 10 ms granularity.
The options to specify where the BFD session runs are: <ul style="list-style-type: none"> • auto (default) – the system chooses and uses the line card CPU only for single-hop BFD sessions with timer intervals equal to or greater than 100ms. All others are placed on the cpm-np. • cpm-np – BFD session runs on the FP complex associated with the CPM. This is either the FP on the CPM or the one elected on smaller systems. • fp – BFD session runs on the line card CPU. This option can only be used for single-hop BFD sessions with timers equal to or greater than 100ms. |
| Default | auto |
| Options | cpm-np, auto, fp |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

dhcp6

| | |
|----------|--------------------------------|
| Synopsis | Enter the dhcp6 context |
|----------|--------------------------------|

| | |
|------------|---|
| Context | configure service ies <i>string</i> interface <i>string</i> ipv6 dhcp6 |
| Tree | dhcp6 |
| Introduced | 16.0.R1 |
| Platforms | All |

relay

| | |
|------------|---|
| Synopsis | Enter the relay context |
| Context | configure service ies <i>string</i> interface <i>string</i> ipv6 dhcp6 relay |
| Tree | relay |
| Introduced | 16.0.R1 |
| Platforms | All |

admin-state *keyword*

| | |
|------------|--|
| Synopsis | Administrative state of DHCPv6 Relay |
| Context | configure service ies <i>string</i> interface <i>string</i> ipv6 dhcp6 relay admin-state <i>keyword</i> |
| Tree | admin-state |
| Default | disable |
| Options | enable, disable |
| Introduced | 16.0.R1 |
| Platforms | All |

description *string*

| | |
|---------------|---|
| Synopsis | Text description |
| Context | configure service ies <i>string</i> interface <i>string</i> ipv6 dhcp6 relay description <i>string</i> |
| Tree | description |
| String Length | 1 to 80 |
| Introduced | 16.0.R1 |
| Platforms | All |

lease-populate

| | |
|----------|---|
| Synopsis | Enter the lease-populate context |
|----------|---|

| | |
|------------|--|
| Context | configure service ies <i>string</i> interface <i>string</i> ipv6 dhcp6 relay lease-populate |
| Tree | lease-populate |
| Introduced | 16.0.R1 |
| Platforms | All |

max-nbr-of-leases *number*

| | |
|------------|--|
| Synopsis | Maximum number of lease states allocated by the DHCPv6 relay function, allowed on interface |
| Context | configure service ies <i>string</i> interface <i>string</i> ipv6 dhcp6 relay lease-populate max-nbr-of-leases <i>number</i> |
| Tree | max-nbr-of-leases |
| Range | 0 to 32767 |
| Default | 0 |
| Introduced | 16.0.R1 |
| Platforms | All |

route-populate

| | |
|------------|---|
| Synopsis | Enter the route-populate context |
| Context | configure service ies <i>string</i> interface <i>string</i> ipv6 dhcp6 relay lease-populate route-populate |
| Tree | route-populate |
| Introduced | 16.0.R1 |
| Platforms | All |

na *boolean*

| | |
|------------|---|
| Synopsis | Create route based on IA_NA prefix option in relay-reply message |
| Context | configure service ies <i>string</i> interface <i>string</i> ipv6 dhcp6 relay lease-populate route-populate na <i>boolean</i> |
| Tree | na |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

pd

| | |
|------------|--|
| Synopsis | Enable the pd context |
| Context | configure service ies string interface string ipv6 dhcp6 relay lease-populate route-populate pd |
| Tree | pd |
| Introduced | 16.0.R1 |
| Platforms | All |

exclude boolean

| | |
|------------|--|
| Synopsis | Create back hole route based on prefix exclude option in relay-reply message |
| Context | configure service ies string interface string ipv6 dhcp6 relay lease-populate route-populate pd exclude boolean |
| Tree | exclude |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

ta boolean

| | |
|------------|--|
| Synopsis | Create route based on IA_TA prefix option in relay-reply message |
| Context | configure service ies string interface string ipv6 dhcp6 relay lease-populate route-populate ta boolean |
| Tree | ta |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

link-address string

| | |
|------------|---|
| Synopsis | Link address of the DHCPv6 relay messages |
| Context | configure service ies string interface string ipv6 dhcp6 relay link-address string |
| Tree | link-address |
| Introduced | 16.0.R1 |
| Platforms | All |

neighbor-resolution *boolean*

| | |
|------------|--|
| Synopsis | Enable neighbor resolution via DHCPv6 relay |
| Context | configure service ies <i>string</i> interface <i>string</i> ipv6 dhcp6 relay neighbor-resolution <i>boolean</i> |
| Tree | neighbor-resolution |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

option

| | |
|------------|--|
| Synopsis | Enter the option context |
| Context | configure service ies <i>string</i> interface <i>string</i> ipv6 dhcp6 relay option |
| Tree | option |
| Introduced | 16.0.R1 |
| Platforms | All |

interface-id

| | |
|------------|---|
| Synopsis | Enter the interface-id context |
| Context | configure service ies <i>string</i> interface <i>string</i> ipv6 dhcp6 relay option interface-id |
| Tree | interface-id |
| Introduced | 16.0.R1 |
| Platforms | All |

ascii-tuple

| | |
|------------|---|
| Synopsis | Use ASCII-encoded concatenated tuple |
| Context | configure service ies <i>string</i> interface <i>string</i> ipv6 dhcp6 relay option interface-id ascii-tuple |
| Tree | ascii-tuple |
| Notes | The following elements are part of a choice: ascii-tuple , if-index , sap-id , or string . |
| Introduced | 16.0.R1 |
| Platforms | All |

if-index

| | |
|------------|--|
| Synopsis | Use interface index in interface ID option in DHCPv6 relay packet |
| Context | configure service ies string interface string ipv6 dhcp6 relay option interface-id if-index |
| Tree | if-index |
| Notes | The following elements are part of a choice: ascii-tuple , if-index , sap-id , or string . |
| Introduced | 16.0.R1 |
| Platforms | All |

sap-id

| | |
|------------|--|
| Synopsis | Use SAP ID in interface ID option in DHCPv6 relay packet |
| Context | configure service ies string interface string ipv6 dhcp6 relay option interface-id sap-id |
| Tree | sap-id |
| Notes | The following elements are part of a choice: ascii-tuple , if-index , sap-id , or string . |
| Introduced | 16.0.R1 |
| Platforms | All |

string *string*

| | |
|---------------|---|
| Synopsis | String for interface ID option in DHCPv6 relay packet |
| Context | configure service ies string interface string ipv6 dhcp6 relay option interface-id string string |
| Tree | string |
| String Length | 1 to 80 |
| Notes | The following elements are part of a choice: ascii-tuple , if-index , sap-id , or string . |
| Introduced | 16.0.R1 |
| Platforms | All |

remote-id *boolean*

| | |
|----------|--|
| Synopsis | Allow remote ID option to be sent in the DHCPv6 relay packet |
| Context | configure service ies string interface string ipv6 dhcp6 relay option remote-id boolean |
| Tree | remote-id |
| Default | false |

Introduced 16.0.R1
 Platforms All

python-policy *reference*

Synopsis Python policy name
 Context **configure** [service](#) [ies](#) [string](#) [interface](#) [string](#) [ipv6](#) [dhcp6](#) [relay](#) [python-policy](#) [reference](#)
 Tree [python-policy](#)
 Reference **configure** [python](#) [python-policy](#) [string](#)
 Introduced 16.0.R1
 Platforms All

server *string*

Synopsis DHCPv6 server to which the DHCPv6 requests are forwarded
 Context **configure** [service](#) [ies](#) [string](#) [interface](#) [string](#) [ipv6](#) [dhcp6](#) [relay](#) [server](#) [string](#)
 Tree [server](#)
 Max. Instances 8
 Notes This element is ordered by the user.
 Introduced 16.0.R1
 Platforms All

source-address *string*

Synopsis Source IPv6 address of the DHCPv6 relay messages
 Context **configure** [service](#) [ies](#) [string](#) [interface](#) [string](#) [ipv6](#) [dhcp6](#) [relay](#) [source-address](#) [string](#)
 Tree [source-address](#)
 Introduced 16.0.R1
 Platforms All

user-db *reference*

Synopsis Local user database for authentication
 Context **configure** [service](#) [ies](#) [string](#) [interface](#) [string](#) [ipv6](#) [dhcp6](#) [relay](#) [user-db](#) [reference](#)

| | |
|------------|--|
| Tree | user-db |
| Reference | configure subscriber-mgmt local-user-db <i>string</i> |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

server

| | |
|------------|--|
| Synopsis | Enter the server context |
| Context | configure service ies <i>string</i> interface <i>string</i> ipv6 dhcp6 server |
| Tree | server |
| Introduced | 16.0.R1 |
| Platforms | All |

max-nbr-of-leases *number*

| | |
|------------|--|
| Synopsis | DHCPv6 leases allowed |
| Context | configure service ies <i>string</i> interface <i>string</i> ipv6 dhcp6 server max-nbr-of-leases <i>number</i> |
| Tree | max-nbr-of-leases |
| Range | 0 to 8000 |
| Default | 8000 |
| Introduced | 16.0.R1 |
| Platforms | All |

prefix-delegation

| | |
|-------------|--|
| Synopsis | Enter the prefix-delegation context |
| Context | configure service ies <i>string</i> interface <i>string</i> ipv6 dhcp6 server prefix-delegation |
| Tree | prefix-delegation |
| Description | Commands in this context configure the options for delegating a long-lived prefix from a delegating router to a requesting router, where the delegating router does not require knowledge about the link topology in the network to which the prefixes are assigned. |
| Introduced | 16.0.R1 |
| Platforms | All |

admin-state *keyword*

| | |
|------------|---|
| Synopsis | Administrative state of the prefix delegation |
| Context | configure service ies string interface string ipv6 dhcp6 server prefix-delegation admin-state <i>keyword</i> |
| Tree | admin-state |
| Default | disable |
| Options | enable, disable |
| Introduced | 16.0.R1 |
| Platforms | All |

prefix [[ipv6-prefix](#)] *string*

| | |
|-------------|---|
| Synopsis | Enter the prefix list instance |
| Context | configure service ies string interface string ipv6 dhcp6 server prefix-delegation prefix <i>string</i> |
| Tree | prefix |
| Description | Commands in this context configure the IPv6 prefix that is delegated by the system. |
| Introduced | 16.0.R1 |
| Platforms | All |

[[ipv6-prefix](#)] *string*

| | |
|------------|---|
| Synopsis | IPv6 address and prefix |
| Context | configure service ies string interface string ipv6 dhcp6 server prefix-delegation prefix <i>string</i> |
| Tree | prefix |
| Notes | This element is part of a list key. |
| Introduced | 16.0.R1 |
| Platforms | All |

client-id

| | |
|----------|--|
| Synopsis | Enter the client-id context |
| Context | configure service ies string interface string ipv6 dhcp6 server prefix-delegation prefix string client-id |
| Tree | client-id |

| | |
|------------|---------|
| Introduced | 16.0.R1 |
| Platforms | All |

duid string

| | |
|---------------|--|
| Synopsis | Requesting router ID |
| Context | configure service ies string interface string ipv6 dhcp6 server prefix-delegation prefix string client-id duid string |
| Tree | duid |
| String Length | 1 to 130 |
| Introduced | 16.0.R1 |
| Platforms | All |

iaid number

| | |
|-------------|--|
| Synopsis | IAID from the requesting router to match |
| Context | configure service ies string interface string ipv6 dhcp6 server prefix-delegation prefix string client-id iaid number |
| Tree | iaid |
| Description | This command configures the Identity Association ID (IAID) associated with a prefix delegation entry and must match the IAID sent by the requesting router for the prefix delegation to succeed. |
| Range | 1 to 4294967295 |
| Introduced | 16.0.R1 |
| Platforms | All |

preferred-lifetime (number | keyword)

| | |
|-------------|--|
| Synopsis | Preferred lifetime of the prefix |
| Context | configure service ies string interface string ipv6 dhcp6 server prefix-delegation prefix string preferred-lifetime (number keyword) |
| Tree | preferred-lifetime |
| Description | This command configures the preferred lifetime of the prefix. The value cannot be greater than the valid lifetime value. |
| Range | 1 to 4294967294 |
| Default | 604800 |
| Units | seconds |

| | |
|------------|----------|
| Options | infinite |
| Introduced | 16.0.R1 |
| Platforms | All |

valid-lifetime (*number* | *keyword*)

| | |
|------------|--|
| Synopsis | Valid lifetime of the prefix |
| Context | configure service ies <i>string</i> interface <i>string</i> ipv6 dhcp6 server prefix-delegation prefix <i>string</i> valid-lifetime (<i>number</i> <i>keyword</i>) |
| Tree | valid-lifetime |
| Range | 1 to 4294967294 |
| Default | 2592000 |
| Units | seconds |
| Options | infinite |
| Introduced | 16.0.R1 |
| Platforms | All |

duplicate-address-detection *boolean*

| | |
|------------|--|
| Synopsis | Enable Duplicate Address Detection per interface |
| Context | configure service ies <i>string</i> interface <i>string</i> ipv6 duplicate-address-detection <i>boolean</i> |
| Tree | duplicate-address-detection |
| Default | true |
| Introduced | 16.0.R1 |
| Platforms | All |

forward-ipv4-packets *boolean*

| | |
|------------|---|
| Synopsis | Forward unencapsulated IPv4 packets |
| Context | configure service ies <i>string</i> interface <i>string</i> ipv6 forward-ipv4-packets <i>boolean</i> |
| Tree | forward-ipv4-packets |
| Default | false |
| Introduced | 19.5.R1 |
| Platforms | All |

icmp6

| | |
|------------|---|
| Synopsis | Enter the icmp6 context |
| Context | configure service ies string interface string ipv6 icmp6 |
| Tree | icmp6 |
| Introduced | 16.0.R1 |
| Platforms | All |

packet-too-big

| | |
|-------------|--|
| Synopsis | Enter the packet-too-big context |
| Context | configure service ies string interface string ipv6 icmp6 packet-too-big |
| Tree | packet-too-big |
| Description | Commands in this context configure limiting the number of ICMPv6 Packet Too Big messages. |
| Introduced | 16.0.R1 |
| Platforms | All |

admin-state *keyword*

| | |
|------------|--|
| Synopsis | Administrative state of Packet Too Big message sends |
| Context | configure service ies string interface string ipv6 icmp6 packet-too-big admin-state keyword |
| Tree | admin-state |
| Default | enable |
| Options | enable, disable |
| Introduced | 16.0.R1 |
| Platforms | All |

number *number*

| | |
|----------|--|
| Synopsis | Number of Packet Too big Messages issued per time frame |
| Context | configure service ies string interface string ipv6 icmp6 packet-too-big number number |
| Tree | number |
| Range | 10 to 1000 |
| Default | 100 |

Introduced 16.0.R1
 Platforms All

seconds *number*

Synopsis Time used to limit Packet Too Big messages
 Context **configure** [service](#) [ies](#) *string* [interface](#) *string* [ipv6](#) [icmp6](#) [packet-too-big](#) [seconds](#) *number*
 Tree [seconds](#)
 Range 1 to 60
 Default 10
 Introduced 16.0.R1
 Platforms All

param-problem

Synopsis Enter the **param-problem** context

number *number*

| | |
|------------|--|
| Synopsis | Number to limit Unreachable messages per time frame |
| Context | configure service ies <i>string</i> interface <i>string</i> ipv6 icmp6 unreachable number <i>number</i> |
| Tree | number |
| Range | 10 to 2000 |
| Default | 100 |
| Introduced | 16.0.R1 |
| Platforms | All |

seconds *number*

| | |
|------------|---|
| Synopsis | Time used to limit ICMPv6 Unreachable messages |
| Context | configure service ies <i>string</i> interface <i>string</i> ipv6 icmp6 unreachable seconds <i>number</i> |
| Tree | seconds |
| Range | 1 to 60 |
| Default | 10 |
| Introduced | 16.0.R1 |
| Platforms | All |

link-local-address

| | |
|------------|--|
| Synopsis | Enter the link-local-address context |
| Context | configure service ies <i>string</i> interface <i>string</i> ipv6 link-local-address |
| Tree | link-local-address |
| Introduced | 16.0.R1 |
| Platforms | All |

address string

| | |
|------------|---|
| Synopsis | IPv6 link-local address |
| Context | configure service ies string interface string ipv6 link-local-address address string |
| Tree | address |
| Introduced | 16.0.R1 |
| Platforms | All |

duplicate-address-detection boolean

| | |
|-------------|--|
| Synopsis | Enable Duplicate Address Detection |
| Context | configure service ies string interface string ipv6 link-local-address duplicate-address-detection boolean |
| Tree | duplicate-address-detection |
| Description | When configured to true , the router enables Duplicate Address Detection (DAD) on the interface.

When configured to false , the router disables DAD and sets the address to preferred, even if there is a duplicated address. |
| Default | true |
| Introduced | 16.0.R1 |
| Platforms | All |

local-dhcp-server reference

| | |
|------------|---|
| Synopsis | DHCP server for the interface |
| Context | configure service ies string interface string ipv6 local-dhcp-server reference |
| Tree | local-dhcp-server |
| Reference | configure router string dhcp-server dhcpv6 string |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

neighbor-discovery

| | |
|------------|--|
| Synopsis | Enter the neighbor-discovery context |
| Context | configure service ies string interface string ipv6 neighbor-discovery |
| Tree | neighbor-discovery |
| Introduced | 16.0.R1 |

Platforms All

host-route

Synopsis Enter the **host-route** context

Options static, dynamic, evpn

Notes This element is part of a list key.

Introduced 20.2.R1

Platforms All

route-tag *number*

WARNING:

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis Tag value used with the host route from an ARP/ND entry

| | |
|-------------|--|
| Context | configure service ies string interface string ipv6 neighbor-discovery host-route populate keyword route-tag number |
| Tree | route-tag |
| Description | This command specifies the route tag that is added in the route table for ARP or ND host routes. This tag can be matched on BGP VRF export and BGP peer export policies. |
| Range | 1 to 255 |
| Introduced | 20.2.R1 |
| Platforms | All |

learn-unsolicited keyword

| | |
|-------------|---|
| Synopsis | Type of entries learned from unsolicited NA messages |
| Context | configure service ies string interface string ipv6 neighbor-discovery learn-unsolicited keyword |
| Tree | learn-unsolicited |
| Description | This command enables the ability to learn neighbor entries out of received unsolicited Neighbor Advertisement (NA) messages, with or without the solicited flag set.

When unconfigured, the router follows standard RFC 4861 behavior for learning of neighbor entries. The neighbor is put in the stale state. This is the standard RFC behavior. |
| Options | global, link-local, both |
| Introduced | 16.0.R1 |
| Platforms | All |

limit

| | |
|------------|--|
| Synopsis | Enter the limit context |
| Context | configure service ies string interface string ipv6 neighbor-discovery limit |
| Tree | limit |
| Introduced | 16.0.R1 |
| Platforms | All |

log-only boolean

| | |
|----------|---|
| Synopsis | Generate log entries when limit is reached |
| Context | configure service ies string interface string ipv6 neighbor-discovery limit log-only boolean |

| | |
|-------------|--|
| Tree | log-only |
| Description | When configured to true , the router sends the warning message at the specified threshold percentage or upon exceeding the specified limit. Entries that exceed the limit are learned.

When configured to false , the router does not send the warning message. |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

max-entries *number*

| | |
|-------------|---|
| Synopsis | Maximum number of entries learned on an IP interface |
| Context | configure service ies string interface string ipv6 neighbor-discovery limit max-entries number |
| Tree | max-entries |
| Description | This command configures the maximum number of entries that can be learned on an IP interface.

When unconfigured, no maximum limit is imposed. |
| Range | 0 to 102400 |
| Introduced | 16.0.R1 |
| Platforms | All |

threshold *number*

| | |
|------------|---|
| Synopsis | Threshold percentage that triggers a warning message |
| Context | configure service ies string interface string ipv6 neighbor-discovery limit threshold number |
| Tree | threshold |
| Range | 1 to 100 |
| Default | 90 |
| Units | percent |
| Introduced | 16.0.R1 |
| Platforms | All |

local-proxy-nd *boolean*

| | |
|-------------|--|
| Synopsis | Enable local proxy neighbor discovery on the interface |
| Context | configure service ies <i>string</i> interface <i>string</i> ipv6 neighbor-discovery local-proxy-nd <i>boolean</i> |
| Tree | local-proxy-nd |
| Description | When configured to true , the router enables local proxy neighbor discovery on the interface and replies to neighbor solicitation requests when both the hosts are on the same subnet. In this case, ICMP redirects are disabled.

When configured to false , the router disables local proxy neighbor discovery on the interface and does not reply to neighbor solicitation requests if both the hosts are on the same subnet. |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

proactive-refresh *keyword*

| | |
|-------------|---|
| Synopsis | Proactive refresh of neighbor entries |
| Context | configure service ies <i>string</i> interface <i>string</i> ipv6 neighbor-discovery proactive-refresh <i>keyword</i> |
| Tree | proactive-refresh |
| Description | This command enables a proactive refresh of the neighbor entries. After the stale timer expires, the router sends an NUD message to the host (regardless of the existence of traffic to the IP address on the IOM), so the entry can be refreshed or removed. |
| Options | global, link-local, both |
| Introduced | 16.0.R1 |
| Platforms | All |

proxy-nd-policy *reference*

admin-state *keyword*

| | |
|-------------|---|
| Synopsis | Administrative state of VRRP |
| Context | configure service ies <i>string</i> interface <i>string</i> ipv6 vrrp <i>number</i> admin-state <i>keyword</i> |
| Tree | admin-state |
| Description | The command determines the administrative state of non-owner virtual router instances. |

Non-owner virtual router instances can be administratively disabled. This allows the termination of VRRP participation in the virtual router and stops all routing and other access capabilities with regards to the virtual router IP addresses. Disabling the virtual router instance provides a mechanism to maintain the virtual routers without causing false backup or master state changes.

When **disabled**, no VRRP advertisement messages are generated and all received VRRP advertisement messages are silently discarded with no processing.

Whenever the administrative or operational state of a virtual router instance transitions, a log message is generated.

An owner virtual router context does not use this command. To administratively disable an owner virtual router instance, use the **admin-state** command within the parent IP interface node which administratively disables the IP interface.

| | |
|------------|-----------------|
| Default | enable |
| Options | enable, disable |
| Introduced | 16.0.R1 |
| Platforms | All |

backup string

| | |
|----------------|--|
| Synopsis | Virtual router IP addresses for the interface |
| Context | configure service ies string interface string ipv6 vrrp number backup string |
| Tree | backup |
| Description | <p>This command associates router IPv6 virtual router IP addresses with those of the parental IP interface.</p> <p>This command has two different functions based on whether it is being executed on an owner or non-owner virtual router instance.</p> <p>Non-owner virtual router instance create a routable IP interface address that is operationally dependent on the virtual router instance mode (master or backup). This command, when executed on an owner virtual router instance, does not create a routable IP interface address; it simply defines the existing IP addresses of the parental IP interface that are advertised by the virtual router instance.</p> <p>For owner virtual router instances, this command defines the IP addresses that are advertised within VRRP advertisement messages. This communicates the IP addresses that the master is representing to backup virtual routers receiving the messages. The specified IPv6 address must be equal to one of the existing parental IP addresses in the parental IP interface (primary or secondary) or this command fails.</p> <p>See "Owner and non-owner VRRP" in the <i>7450 ESS, 7750 SR, 7950 XRS, and VSR Router Configuration Guide</i> for more information about owner and non-owner virtual router instances.</p> |

mac *string*

Synopsis Virtual MAC address to use in ARP responses

Context **configure** *service ies string interface string ipv6 vrrp number mac string*

Tree *mac*

Description This command sets an explicit MAC address for the virtual router instance that overrides the VRRP default derived from the VRID.

Changing the default MAC address is useful when an existing HSRP or other non-VRRP default MAC is in use by the IP hosts that use the virtual router IP address. Many hosts do not monitor unessential ARPs and continue to use the cached non-VRRP MAC address after the virtual router becomes master of the host's gateway address.

Additionally, this command sets the MAC address used in ARP responses when the virtual router instance is master. Routing of IP packets with *unicast-mac-address* as the destination MAC is also enabled. The MAC must be the same for all virtual routers participating as a virtual router or indeterminate connectivity by the attached IP hosts results. All VRRP advertisement messages are transmitted with *unicast-mac-address* as the source MAC.

An operator can execute this command at any time and it takes effect immediately. When the virtual router MAC on a master virtual router instance changes, a gratuitous ARP is immediately sent with a VRRP advertisement message. If the virtual router instance is disabled or operating as a backup, the gratuitous ARP and VRRP advertisement messages are not sent.

Introduced 16.0.R1

Platforms All

master-int-inherit *boolean*

Synopsis Allow master instance to dictate the master down timer

Context **configure** *service ies string interface string ipv6 vrrp number master-int-inherit boolean*

Tree [master-int-inherit](#)

Description When configured to **true**, the virtual router instance inherits the advertisement interval timer of the master VRRP router, which backup routers use to calculate the master down timer.

When configured to **false**, the locally configured message interval must match the master's VRRP advertisement message advertisement interval field value or the message is discarded.

Introduced 16.0.R1

Platforms All

message-interval *number*

Synopsis Interval for sending VRRP advertisement messages

Context **configure** *service ies string interface string ipv6 vrrp number message-interval number*

Tree [message-interval](#)

Description This command configures the administrative advertisement message timer used by the master virtual router instance to send VRRP advertisement messages. The backup master down timer is derived from the value configured using this command.

The use of this command varies for non-owner virtual router instances, depending on the state of the virtual router (master or backup) and the state of the **master-int-inherit** command:

- When a non-owner is operating as master for the virtual router, the system uses the configured value of this command as the operational advertisement timer, similar

to an owner virtual router instance. The **master-int-inherit** command has no effect when operating as the master.

- When a non-owner is in the backup state with **master-int-inherit** disabled, the system uses the configured value of this command to match the incoming advertisement interval field of the VRRP advertisement message. If the locally configured message interval does not match the advertisement interval field, the system discards the VRRP advertisement.
- When a non-owner is in the backup state with **master-int-inherit** enabled, the configured value of this command is ignored. The master down timer is indirectly derived from the advertisement interval field value of the incoming VRRP advertisement message.

| Platforms | All |

mac *string*

| | |
|------------|---|
| Synopsis | MAC address for the interface |
| Context | configure service ies string interface string mac string |
| Tree | mac |
| Introduced | 16.0.R1 |
| Platforms | All |

mac-accounting *boolean*

| | |
|------------|---|
| Synopsis | Enable MAC accounting functionality |
| Context | configure service ies string interface string mac-accounting boolean |
| Tree | mac-accounting |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

monitor-oper-group *reference*

| | |
|------------|---|
| Synopsis | Operational group to monitor |
| Context | configure service ies string interface string monitor-oper-group reference |
| Tree | monitor-oper-group |
| Reference | configure service oper-group string |
| Introduced | 16.0.R1 |
| Platforms | All |

multi-chassis-shunting-profile *reference*

| | |
|-------------|--|
| Synopsis | Multi-chassis shunting profile name |
| Context | configure service ies <i>string</i> interface <i>string</i> multi-chassis-shunting-profile <i>reference</i> |
| Tree | multi-chassis-shunting-profile |
| Description | This command configures the name of a multi-chassis shunting profile to use on public or private tunnel interfaces. |
| Reference | configure router <i>string</i> ipsec multi-chassis-shunting-profile <i>string</i> |
| Notes | The following elements are part of a choice: multi-chassis-shunting-profile or (dynamic-tunnel-redundant-nexthop and static-tunnel-redundant-nexthop). |
| Introduced | 22.5.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

multicast-network-domain *reference*

| | |
|------------|--|
| Synopsis | Network domain name |
| Context | configure service ies <i>string</i> interface <i>string</i> multicast-network-domain <i>reference</i> |
| Tree | multicast-network-domain |
| Reference | configure router <i>string</i> network-domains network-domain <i>string</i> |
| Introduced | 16.0.R1 |
| Platforms | All |

ping-template

| | |
|------------|--|
| Synopsis | Enable the ping-template context |
| Context | configure service ies <i>string</i> interface <i>string</i> ping-template |
| Tree | ping-template |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

admin-state *keyword*

| | |
|----------|---|
| Synopsis | Administrative state of the ping template |
| Context | configure service ies <i>string</i> interface <i>string</i> ping-template admin-state <i>keyword</i> |
| Tree | admin-state |

| | |
|------------|--|
| Default | disable |
| Options | enable, disable |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

destination-address *string*

WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|-------------|---|
| Synopsis | Ping template destination address |
| Context | configure service ies <i>string</i> interface <i>string</i> ping-template <i>destination-address</i> <i>string</i> |
| Tree | destination-address |
| Description | <p>This command configures the address to where the ICMP echo requests are directed to test connectivity. The source of the ICMP echo request is the primary IPv4 address of the interface under which the ping-template is configured. The destination address must be on the same subnet as the source IP address. A configuration warning message displays if the primary IPv4 address and the destination are not on the same subnet, INFO: PIP #2092 Ping template misconfiguration - destination-address and primary IP address should fall in the same subnet.</p> <p>Unnumbered interfaces and loopback addresses are not supported.</p> <p>The config service ies vprn interface ping-template must be administratively disabled to remove or change the destination-address ip-address.</p> |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

name *reference*

WARNING:

Modifying this element recreates the parent element automatically for the new value to take effect.

| | |
|-------------|---|
| Synopsis | Ping template name |
| Context | configure service ies <i>string</i> interface <i>string</i> ping-template <i>name</i> <i>reference</i> |
| Tree | name |
| Description | This command configures the name of the ping template to be assigned to the IP interface. |
| Reference | configure test-oam icmp ping-template <i>string</i> |

| | |
|------------|--|
| Notes | This element is mandatory. |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

ptp-hw-assist

| | |
|------------|---|
| Synopsis | Enter the ptp-hw-assist context |
| Context | configure service ies <i>string</i> interface <i>string</i> ptp-hw-assist |
| Tree | ptp-hw-assist |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

admin-state *keyword*

| | |
|-------------|---|
| Synopsis | Administrative state of the PTP time stamping assist |
| Context | configure service ies <i>string</i> interface <i>string</i> ptp-hw-assist admin-state <i>keyword</i> |
| Tree | admin-state |
| Description | <p>This command controls the administrative state of port-based time stamping assist of PTP packets at the physical interface. This capability is supported on specific hardware. The command may be blocked if not all hardware has the required level of support.</p> <p>Only one interface per physical port can have ptp-hw-assist enabled. This feature cannot be enabled if the physical port supporting the interface is configured as a PTP port.</p> |
| Default | disable |
| Options | enable, disable |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

radius-auth-policy *reference*

| | |
|------------|--|
| Synopsis | Authentication policy |
| Context | configure service ies <i>string</i> interface <i>string</i> radius-auth-policy <i>reference</i> |
| Tree | radius-auth-policy |
| Reference | configure subscriber-mgmt radius-authentication-policy <i>string</i> |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

sap [[sap-id](#)] *string*

| | |
|----------------|--|
| Synopsis | Enter the sap list instance |
| Context | configure service ies <i>string</i> interface <i>string</i> sap <i>string</i> |
| Tree | sap |
| Max. Instances | 1 |
| Introduced | 16.0.R1 |
| Platforms | All |

[sap-id] *string*

| Notes | This element is part of a list key. |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR-7/12/12e |

hs-class-weight *number*

| | |
|----------|---|
| Synopsis | Class weight override of the WRR group |
| Context | configure service ies string interface string sap string egress qos sap-egress overrides hs-wrr-group reference hs-class-weight number |
| Tree | hs-class-weight |

| | |
|------------|------------------|
| Range | 1 2 4 8 |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR-7/12/12e |

percent-rate *decimal-number*

| | |
|------------|---|
| Synopsis | Percent rate override applied to the HS WRR group |
| Context | configure service ies <i>string</i> interface <i>string</i> sap <i>string</i> egress qos sap-egress overrides hs-wrr-group reference percent-rate <i>decimal-number</i> |
| Tree | percent-rate |
| Range | 0.01 to 100.00 |
| Notes | The following elements are part of a choice: percent-rate or rate . |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR-7/12/12e |

rate (*number* | *keyword*)

| | |
|------------|--|
| Synopsis | Scheduling rate override applied to the HS WRR group |
| Context | configure service ies <i>string</i> interface <i>string</i> sap <i>string</i> egress qos sap-egress overrides hs-wrr-group reference rate (<i>number</i> <i>keyword</i>) |
| Tree | rate |
| Range | 1 to 2000000000 |
| Units | kilobps |
| Options | max |
| Notes | The following elements are part of a choice: percent-rate or rate . |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR-7/12/12e |

policer [[policer-id](#)] *reference*

| | |
|------------|---|
| Synopsis | Enter the policer list instance |
| Context | configure service ies <i>string</i> interface <i>string</i> sap <i>string</i> egress qos sap-egress overrides policer <i>reference</i> |
| Tree | policer |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR |

[policer-id] reference

| | |
|------------|---|
| Synopsis | Policer unique ID |
| Context | configure service ies string interface string sap string egress qos sap-egress overrides policer reference |
| Tree | policer |
| Reference | configure qos sap-egress string policer number |
| Notes | This element is part of a list key. |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR |

cbs (number | keyword)

| | |
|------------|--|
| Synopsis | CBS |
| Context | configure service ies string interface string sap string egress qos sap-egress overrides policer reference cbs (number keyword) |
| Tree | cbs |
| Range | 0 to 268435456 |
| Units | bytes |
| Options | auto |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR |

mbs (number | keyword)

| | |
|------------|--|
| Synopsis | MBS |
| Context | configure service ies string interface string sap string egress qos sap-egress overrides policer reference mbs (number keyword) |
| Tree | mbs |
| Range | 0 to 268435456 |
| Units | bytes |
| Options | auto |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR |

packet-byte-offset *number*

| | |
|------------|---|
| Synopsis | Packet size modification for policing information |
| Context | configure service ies <i>string</i> interface <i>string</i> sap <i>string</i> egress qos sap-egress overrides policer reference packet-byte-offset <i>number</i> |
| Tree | packet-byte-offset |
| Range | -64 to 31 |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR |

percent-rate

| | |
|------------|---|
| Synopsis | Enter the percent-rate context |
| Context | configure service ies <i>string</i> interface <i>string</i> sap <i>string</i> egress qos sap-egress overrides policer reference percent-rate |
| Tree | percent-rate |
| Notes | The following elements are part of a choice: percent-rate or rate . |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR |

cir *decimal-number*

| | |
|------------|---|
| Synopsis | CIR percent rate |
| Context | configure service ies <i>string</i> interface <i>string</i> sap <i>string</i> egress qos sap-egress overrides policer reference percent-rate cir <i>decimal-number</i> |
| Tree | cir |
| Range | 0.00 to 100.00 |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR |

pir *decimal-number*

| | |
|----------|---|
| Synopsis | PIR percent rate |
| Context | configure service ies <i>string</i> interface <i>string</i> sap <i>string</i> egress qos sap-egress overrides policer reference percent-rate pir <i>decimal-number</i> |
| Tree | pir |
| Range | 0.01 to 100.00 |

| | |
|------------|--|
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR |

rate

| | |
|------------|--|
| Synopsis | Enter the rate context |
| Context | configure service ies string interface string sap string egress qos sap-egress overrides policer reference rate |
| Tree | rate |
| Notes | The following elements are part of a choice: percent-rate or rate . |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR |

cir (*number* | *keyword*)

| | |
|------------|---|
| Synopsis | CIR rate |
| Context | configure service ies string interface string sap string egress qos sap-egress overrides policer reference rate cir (<i>number</i> <i>keyword</i>) |
| Tree | cir |
| Range | 0 to 6400000000 |
| Units | kilobps |
| Options | max |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR |

pir (*number* | *keyword*)

| | |
|------------|---|
| Synopsis | PIR rate |
| Context | configure service ies string interface string sap string egress qos sap-egress overrides policer reference rate pir (<i>number</i> <i>keyword</i>) |
| Tree | pir |
| Range | 1 to 6400000000 |
| Units | kilobps |
| Options | max |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR |

stat-mode *keyword*

| | |
|------------|---|
| Synopsis | Mode of statistics collected by the policer |
| Context | configure service ies string interface string sap string egress qos sap-egress overrides policer reference stat-mode <i>keyword</i> |
| Tree | stat-mode |
| Options | no-stats, minimal, offered-profile-no-cir, offered-total-cir, offered-profile-cir, offered-limited-capped-cir, offered-profile-capped-cir, offered-total-cir-exceed, offered-four-profile-no-cir, offered-total-cir-four-profile |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR |

queue [[queue-id](#)] *reference*

| | |
|------------|--|
| Synopsis | Enter the queue list instance |
| Context | configure service ies string interface string sap string egress qos sap-egress overrides queue <i>reference</i> |
| Tree | queue |
| Introduced | 16.0.R1 |
| Platforms | All |

[queue-id] *reference*

| | |
|------------|--|
| Synopsis | Policer unique ID |
| Context | configure service ies string interface string sap string egress qos sap-egress overrides queue <i>reference</i> |
| Tree | queue |
| Reference | configure qos sap-egress string queue <i>number</i> |
| Notes | This element is part of a list key. |
| Introduced | 16.0.R1 |
| Platforms | All |

adaptation-rule

| | |
|----------|--|
| Synopsis | Enter the adaptation-rule context |
| Context | configure service ies string interface string sap string egress qos sap-egress overrides queue reference adaptation-rule |

| | |
|------------|---------------------------------|
| Tree | adaptation-rule |
| Introduced | 16.0.R1 |
| Platforms | All |

cir keyword

| | |
|------------|---|
| Synopsis | Constraint used when deriving the operational CIR value |
| Context | configure service ies string interface string sap string egress qos sap-egress overrides queue reference adaptation-rule cir keyword |
| Tree | cir |
| Options | max, min, closest |
| Introduced | 16.0.R1 |
| Platforms | All |

pir keyword

| | |
|------------|---|
| Synopsis | Constraint used when deriving the operational PIR value |
| Context | configure service ies string interface string sap string egress qos sap-egress overrides queue reference adaptation-rule pir keyword |
| Tree | pir |
| Options | max, min, closest |
| Introduced | 16.0.R1 |
| Platforms | All |

avg-frame-overhead decimal-number

| | |
|------------|---|
| Synopsis | Average packet-to-frame encapsulation overhead |
| Context | configure service ies string interface string sap string egress qos sap-egress overrides queue reference avg-frame-overhead decimal-number |
| Tree | avg-frame-overhead |
| Range | 0.00 to 100.00 |
| Introduced | 16.0.R1 |
| Platforms | All |

burst-limit (*number* | *keyword*)

| | |
|------------|--|
| Synopsis | Explicit shaping burst size for the queue |
| Context | configure service ies string interface string sap string egress qos sap-egress overrides queue reference burst-limit (<i>number</i> <i>keyword</i>) |
| Tree | burst-limit |
| Range | 1 to 14000000 |
| Units | bytes |
| Options | auto |
| Introduced | 16.0.R1 |
| Platforms | All |

cbs (*number* | *keyword*)

| | |
|------------|--|
| Synopsis | CBS |
| Context | configure service ies string interface string sap string egress qos sap-egress overrides queue reference cbs (<i>number</i> <i>keyword</i>) |
| Tree | cbs |
| Range | 0 to 1048576 |
| Units | kilobytes |
| Options | auto |
| Introduced | 16.0.R1 |
| Platforms | All |

drop-tail

| | |
|------------|---|
| Synopsis | Enter the drop-tail context |
| Context | configure service ies string interface string sap string egress qos sap-egress overrides queue reference drop-tail |
| Tree | drop-tail |
| Introduced | 16.0.R1 |
| Platforms | All |

low

| | |
|----------|------------------------------|
| Synopsis | Enter the low context |
|----------|------------------------------|

| | |
|------------|--|
| Context | configure service ies <i>string</i> interface <i>string</i> sap <i>string</i> egress qos sap-egress overrides queue reference drop-tail low |
| Tree | low |
| Introduced | 16.0.R1 |
| Platforms | All |

percent-reduction-from-mbs (*number* | *keyword*)

| | |
|------------|--|
| Synopsis | Percentage reduction from the MBS for a queue drop tail |
| Context | configure service ies <i>string</i> interface <i>string</i> sap <i>string</i> egress qos sap-egress overrides queue reference drop-tail low percent-reduction-from-mbs (<i>number</i> <i>keyword</i>) |
| Tree | percent-reduction-from-mbs |
| Range | 0 to 100 |
| Options | auto |
| Introduced | 16.0.R1 |
| Platforms | All |

hs-class-weight *number*

| | |
|------------|--|
| Synopsis | Class weight override for the queue |
| Context | configure service ies <i>string</i> interface <i>string</i> sap <i>string</i> egress qos sap-egress overrides queue reference hs-class-weight <i>number</i> |
| Tree | hs-class-weight |
| Range | 1 2 4 8 |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR-7/12/12e |

hs-wred-queue

| | |
|------------|--|
| Synopsis | Enter the hs-wred-queue context |
| Context | configure service ies <i>string</i> interface <i>string</i> sap <i>string</i> egress qos sap-egress overrides queue reference hs-wred-queue |
| Tree | hs-wred-queue |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR-7/12/12e |

policy reference

| | |
|------------|--|
| Synopsis | Slope policy applied to the HSQ queue group queue |
| Context | configure service ies string interface string sap string egress qos sap-egress overrides queue reference hs-wred-queue policy reference |
| Tree | policy |
| Reference | configure qos slope-policy string |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR-7/12/12e |

hs-wrr-weight number

| | |
|------------|--|
| Synopsis | Weighted Round Robin (WRR) weight to parent with this queue into the scheduler |
| Context | configure service ies string interface string sap string egress qos sap-egress overrides queue reference hs-wrr-weight number |
| Tree | hs-wrr-weight |
| Range | 1 to 127 |
| Default | 1 |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR-7/12/12e |

mbs (number | keyword)

| | |
|------------|--|
| Synopsis | MBS |
| Context | configure service ies string interface string sap string egress qos sap-egress overrides queue reference mbs (number keyword) |
| Tree | mbs |
| Range | 0 to 1073741824 |
| Units | bytes |
| Options | auto |
| Introduced | 16.0.R1 |
| Platforms | All |

monitor-queue-depth

| | |
|----------|---|
| Synopsis | Enable the monitor-queue-depth context |
|----------|---|

| | |
|------------|---|
| Context | configure service ies string interface string sap string egress qos sap-egress overrides queue reference monitor-queue-depth |
| Tree | monitor-queue-depth |
| Introduced | 20.10.R1 |
| Platforms | All |

fast-polling *boolean*

| | |
|-------------|---|
| Synopsis | Enable fast polling of the queue depth |
| Context | configure service ies string interface string sap string egress qos sap-egress overrides queue reference monitor-queue-depth fast-polling <i>boolean</i> |
| Tree | fast-polling |
| Description | When configured to true , this command enables fast polling of the queue depth. Faster polling allows a more accurate view of the actual depth.
When configured to false , fast queue polling is not enabled. |
| Default | false |
| Introduced | 20.10.R1 |
| Platforms | All |

violation-threshold *decimal-number*

| | |
|-------------|---|
| Synopsis | Threshold for queue depth before violation is raised |
| Context | configure service ies string interface string sap string egress qos sap-egress overrides queue reference monitor-queue-depth violation-threshold <i>decimal-number</i> |
| Tree | violation-threshold |
| Description | This command specifies the threshold for the queue MBS. When the queue depth exceeds the threshold value, a violation is registered. |
| Range | 0.01 to 99.99 |
| Introduced | 20.10.R1 |
| Platforms | All |

parent

| | |
|----------|--|
| Synopsis | Enter the parent context |
| Context | configure service ies string interface string sap string egress qos sap-egress overrides queue reference parent |
| Tree | parent |

Introduced 16.0.R1
 Platforms All

cir-weight *number*

Synopsis CIR parameter that overrides parent for queue group
 Context **configure** [service](#) [ies](#) [string](#) [interface](#) [string](#) [sap](#) [string](#) [egress](#) [qos](#) [sap-egress](#) [overrides](#) [queue](#) [reference](#) [parent](#) **cir-weight** *number*
 Tree [cir-weight](#)
 Range 0 to 100
 Introduced 16.0.R1
 Platforms All

weight *number*

Synopsis PIR parameter that overrides parent for queue group
 Context **configure** [service](#) [ies](#) [string](#) [interface](#) [string](#) [sap](#) [string](#) [egress](#) [qos](#) [sap-egress](#) [overrides](#) [queue](#) [reference](#) [parent](#) **weight** *number*

port-redirect-group

Synopsis Enter the **port-redirect-group** context
 Context **configure** [service ies string](#) [interface string](#) [sap string](#) [egress qos sap-egress](#) [port-redirect-group](#)
 Tree [port-redirect-group](#)
 Introduced 16.0.R1
 Platforms All

group-name *reference*

| | |
|------------|--|
| Synopsis | Name of the queue group redirect list policy |
| Context | configure service ies string interface string sap string egress qos sap-egress port-redirect-group group-name reference |
| Tree | group-name |
| Reference | configure qos queue-group-templates egress queue-group string |
| Introduced | 16.0.R1 |
| Platforms | All |

instance *number*

| | |
|------------|---|
| Synopsis | Instance of port queue group |
| Context | configure service ies string interface string sap string egress qos sap-egress port-redirect-group instance number |
| Tree | instance |
| Range | 1 to 65535 |
| Introduced | 16.0.R1 |
| Platforms | All |

scheduler-policy

| | |
|------------|---|
| Synopsis | Enter the scheduler-policy context |
| Context | configure service ies string interface string sap string egress qos scheduler-policy |
| Tree | scheduler-policy |
| Introduced | 16.0.R1 |
| Platforms | All |

overrides

| | |
|------------|---|
| Synopsis | Enter the overrides context |
| Context | configure service ies string interface string sap string egress qos scheduler-policy overrides |
| Tree | overrides |
| Introduced | 16.0.R1 |
| Platforms | All |

scheduler [*scheduler-name*] *string*

| | |
|------------|---|
| Synopsis | Enter the scheduler list instance |
| Context | configure <i>service ies string interface string sap string egress qos scheduler-policy overrides scheduler string</i> |
| Tree | <i>scheduler</i> |
| Introduced | 16.0.R1 |
| Platforms | All |

[scheduler-name] *string*

| | |
|---------------|--|
| Synopsis | Scheduler name |
| Context | configure <i>service ies string interface string sap string egress qos scheduler-policy overrides scheduler string</i> |
| Tree | <i>scheduler</i> |
| Description | <p>This command specifies the scheduler name which is composed of printable 7-bit ASCII characters. If the string contains special characters (#, \$, spaces, and so on), the entire string must be enclosed within double quotes. Each scheduler must have a unique name within the context of the scheduler policy. However, the same name can be reused in multiple scheduler policies. If the scheduler name already exists within the policy tier level, the context changes to that scheduler name for the purpose of editing the scheduler commands.</p> <p>If the scheduler name exists within the policy on a different tier, an error occurs and the current context will not change. If the scheduler name does not exist in this or another tier within the scheduler policy, it is assumed that an attempt is being made to create a scheduler of that name.</p> <p>If the provided scheduler name is invalid, a name syntax error will occur, the command will not execute, and the context will not change.</p> |
| String Length | 1 to 32 |
| Notes | This element is part of a list key. |
| Introduced | 16.0.R1 |
| Platforms | All |

parent

| | |
|----------|--|
| Synopsis | Enter the parent context |
| Context | configure <i>service ies string interface string sap string egress qos scheduler-policy overrides scheduler string parent</i> |
| Tree | <i>parent</i> |

Introduced 16.0.R1
 Platforms All

cir-weight *number*

Synopsis Weight used at the within-CIR port priority level
 Context **configure** [service](#) [ies](#) [string](#) [interface](#) [string](#) [sap](#) [string](#) [egress](#) [qos](#) [scheduler-policy](#) [overrides](#) [scheduler](#) [string](#) [parent](#) **cir-weight** *number*
 Tree [cir-weight](#)
 Range 0 to 100
 Introduced 16.0.R1

| Tree | collect-lmm-fc-stats |
| Description | <p>Commands in this context configure per forwarding class (FC) LMM information collection.</p> <p>The commands fc-in-profile and fc in this context are mutually exclusive. The commands apply to either profile-aware or profile-unaware FCs respectively.</p> <p>This command and the collect-lmm-stats command are mutually exclusive when there is entity resource contention.</p> |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

fc keyword

| | |
|-------------|---|
| Synopsis | Forwarding class name for profile-unaware counter |
| Context | configure service ies string interface string sap string eth-cfm collect-lmm-fc-stats fc <i>keyword</i> |
| Tree | fc |
| Description | <p>This command configures individual counters for the specified FCs without regard for profile. The system includes all countable packets that match a configured FC, regardless of profile, in this counter.</p> <p>An FC specified as part of this command and for this specific context cannot be specified as a profile-aware FC using the fc-in-profile command under the collect-lmm-fc-stats context.</p> |

When this command is reentered, a differential is performed. Omitted FCs stop counting, newly added FCs start counting, and unchanged FCs continue to count.

| | |
|----------------|--|
| Options | be, l2, af, l1, h2, ef, h1, nc |
| Max. Instances | 8 |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

ingress

| | |
|------------|---|
| Synopsis | Enter the ingress context |
| Context | configure service ies <i>string</i> interface <i>string</i> sap <i>string</i> ingress |
| Tree | ingress |
| Introduced | 16.0.R1 |
| Platforms | All |

filter

| | |
|------------|---|
| Synopsis | Enter the filter context |
| Context | configure service ies <i>string</i> interface <i>string</i> sap <i>string</i> ingress filter |
| Tree | filter |
| Introduced | 16.0.R1 |
| Platforms | All |

ip reference

| | |
|------------|--|
| Synopsis | IPv4 filter policy name |
| Context | configure service ies <i>string</i> interface <i>string</i> sap <i>string</i> ingress filter ip reference |
| Tree | ip |
| Reference | configure filter ip-filter <i>string</i> |
| Introduced | 16.0.R1 |
| Platforms | All |

ipv6 reference

| | |
|------------|--|
| Synopsis | IPv6 filter policy name |
| Context | configure service ies <i>string</i> interface <i>string</i> sap <i>string</i> ingress filter ipv6 reference |
| Tree | ipv6 |
| Reference | configure filter ipv6-filter <i>string</i> |
| Introduced | 16.0.R1 |
| Platforms | All |

qos

| | |
|------------|--|
| Synopsis | Enter the qos context |
| Context | configure service ies <i>string</i> interface <i>string</i> sap <i>string</i> ingress qos |
| Tree | qos |
| Introduced | 16.0.R1 |
| Platforms | All |

match-qinq-dot1p *keyword*

| | |
|------------|---|
| Synopsis | Ingress match QinQ Dot1p |
| Context | configure service ies string interface string sap string ingress qos match-qinq-dot1p <i>keyword</i> |
| Tree | match-qinq-dot1p |
| Options | top, bottom |
| Introduced | 16.0.R1 |
| Platforms | All |

policer-control-policy

| | |
|------------|--|
| Synopsis | Enter the policer-control-policy context |
| Context | configure service ies string interface string sap string ingress qos policer-control-policy |
| Tree | policer-control-policy |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR |

overrides

| | |
|------------|--|
| Synopsis | Enable the overrides context |
| Context | configure service ies string interface string sap string ingress qos policer-control-policy overrides |
| Tree | overrides |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR |

root

| | |
|------------|---|
| Synopsis | Enter the root context |
| Context | configure service ies string interface string sap string ingress qos policer-control-policy overrides root |
| Tree | root |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR |

max-rate (*number* | *keyword*)

| | |
|------------|---|
| Synopsis | Maximum frame-based bandwidth limit |
| Context | configure service ies <i>string</i> interface <i>string</i> sap <i>string</i> ingress qos policer-control-policy overrides root max-rate (<i>number</i> <i>keyword</i>) |
| Tree | max-rate |
| Range | 1 to 6400000000 |
| Options | max |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR |

priority-mbs-thresholds

| | |
|------------|---|
| Synopsis | Enter the priority-mbs-thresholds context |
| Context | configure service ies <i>string</i> interface <i>string</i> sap <i>string</i> ingress qos policer-control-policy overrides root priority-mbs-thresholds |
| Tree | priority-mbs-thresholds |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR |

min-thresh-separation (*number* | *keyword*)

| | |
|------------|--|
| Synopsis | Minimum amount of separation buffer space |
| Context | configure service ies <i>string</i> interface <i>string</i> sap <i>string</i> ingress qos policer-control-policy overrides root priority-mbs-thresholds min-thresh-separation (<i>number</i> <i>keyword</i>) |
| Tree | min-thresh-separation |
| Range | 0 to 16777216 |
| Units | bytes |
| Options | auto |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR |

priority [[priority-level](#)] *number*

| | |
|----------|--|
| Synopsis | Enter the priority list instance |
| Context | configure service ies <i>string</i> interface <i>string</i> sap <i>string</i> ingress qos policer-control-policy overrides root priority-mbs-thresholds priority <i>number</i> |

| | |
|------------|--|
| Tree | priority |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR |

[priority-level] *number*

| | |
|------------|---|
| Synopsis | Priority level |
| Context | configure service ies string interface string sap string ingress qos policer-control-policy overrides root priority-mbs-thresholds priority number |
| Tree | priority |
| Range | 1 to 8 |
| Notes | This element is part of a list key. |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR |

mbs-contribution (*number | keyword*)

| | |
|------------|---|
| Synopsis | Minimum amount of cumulative buffer space allowed |
| Context | configure service ies string interface string sap string ingress qos policer-control-policy overrides root priority-mbs-thresholds priority number mbs-contribution (number keyword) |
| Tree | mbs-contribution |
| Range | 0 to 16777216 |
| Units | bytes |
| Options | auto |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR |

policy-name *reference*

| | |
|------------|--|
| Synopsis | Policer control policy name |
| Context | configure service ies string interface string sap string ingress qos policer-control-policy policy-name reference |
| Tree | policy-name |
| Reference | configure qos policer-control-policy string |
| Introduced | 16.0.R1 |

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR

sap-ingress

Synopsis Enter the **sap-ingress** context

Context **configure** [service](#) [ies](#) [string](#) [interface](#) [string](#) [sap](#) [string](#) [ingress](#) [qos](#) [sap-ingress](#)

Introduced 20.10.R1
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

activate-entry-tag *number*

Synopsis Tag ID activated for IPv6 criteria
 Context **configure** [service ies](#) *string* [interface](#) *string* [sap](#) *string* [ingress qos sap-ingress overrides ipv6-criteria activate-entry-tag](#) *number*
 Tree [activate-entry-tag](#)
 Range 1 to 255
 Introduced 20.10.R1
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

policer [[policer-id](#)] *reference*

Synopsis Enter the **policer** list instance
 Context **configure** [service ies](#) *string* [interface](#) *string* [sap](#) *string* [ingress qos sap-ingress overrides policer](#) *reference*
 Tree [policer](#)
 Introduced 16.0.R1
 Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR

[policer-id] *reference*

Synopsis Policer unique ID
 Context **configure** [service ies](#) *string* [interface](#) *string* [sap](#) *string* [ingress qos sap-ingress overrides policer](#) *reference*
 Tree [policer](#)
 Reference **configure** [qos sap-ingress](#) *string* [policer](#) *number*
 Notes This element is part of a list key.
 Introduced 16.0.R1
 Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR

cbs (*number* | *keyword*)

Synopsis CBS

| | |
|------------|--|
| Context | configure service ies <i>string</i> interface <i>string</i> sap <i>string</i> ingress qos sap-ingress overrides
policer reference cbs (<i>number</i> <i>keyword</i>) |
| Tree | cbs |
| Range | 0 to 268435456 |
| Units | bytes |
| Options | auto |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR |

mbs (*number* | *keyword*)

| | |
|------------|--|
| Synopsis | MBS |
| Context | configure service ies <i>string</i> interface <i>string</i> sap <i>string</i> ingress qos sap-ingress overrides
policer reference mbs (<i>number</i> <i>keyword</i>) |
| Tree | mbs |
| Range | 0 to 268435456 |
| Units | bytes |
| Options | auto |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR |

packet-byte-offset *number*

| | |
|------------|--|
| Synopsis | Packet size modification for policing information |
| Context | configure service ies <i>string</i> interface <i>string</i> sap <i>string</i> ingress qos sap-ingress overrides
policer reference packet-byte-offset <i>number</i> |
| Tree | packet-byte-offset |
| Range | -32 to 31 |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR |

percent-rate

| | |
|----------|--|
| Synopsis | Enter the percent-rate context |
| Context | configure service ies <i>string</i> interface <i>string</i> sap <i>string</i> ingress qos sap-ingress overrides
policer reference percent-rate |

| | |
|------------|---|
| Tree | percent-rate |
| Notes | The following elements are part of a choice: percent-rate or rate . |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR |

cir *decimal-number*

| | |
|------------|---|
| Synopsis | CIR percent rate |
| Context | configure service ies string interface string sap string ingress qos sap-ingress overrides policer reference percent-rate cir <i>decimal-number</i> |
| Tree | cir |
| Range | 0.00 to 100.00 |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR |

pir *decimal-number*

| | |
|------------|---|
| Synopsis | PIR percent rate |
| Context | configure service ies string interface string sap string ingress qos sap-ingress overrides policer reference percent-rate pir <i>decimal-number</i> |
| Tree | pir |
| Range | 0.01 to 100.00 |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR |

rate

| | |
|------------|---|
| Synopsis | Enter the rate context |
| Context | configure service ies string interface string sap string ingress qos sap-ingress overrides policer reference rate |
| Tree | rate |
| Notes | The following elements are part of a choice: percent-rate or rate . |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR |

cir (*number* | *keyword*)

| | |
|------------|---|
| Synopsis | CIR rate |
| Context | configure service ies <i>string</i> interface <i>string</i> sap <i>string</i> ingress qos sap-ingress overrides policer reference rate cir (<i>number</i> <i>keyword</i>) |
| Tree | cir |
| Range | 0 to 6400000000 |
| Units | kilobps |
| Options | max |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR |

pir (*number* | *keyword*)

| | |
|------------|---|
| Synopsis | PIR rate |
| Context | configure service ies <i>string</i> interface <i>string</i> sap <i>string</i> ingress qos sap-ingress overrides policer reference rate pir (<i>number</i> <i>keyword</i>) |
| Tree | pir |
| Range | 1 to 6400000000 |
| Units | kilobps |
| Options | max |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR |

stat-mode *keyword*

| | |
|------------|---|
| Synopsis | Mode of statistics collected by the policer |
| Context | configure service ies <i>string</i> interface <i>string</i> sap <i>string</i> ingress qos sap-ingress overrides policer reference stat-mode <i>keyword</i> |
| Tree | stat-mode |
| Options | no-stats, minimal, offered-profile-no-cir, offered-total-cir, offered-priority-no-cir, offered-profile-cir, offered-priority-cir, offered-limited-profile-cir, offered-profile-capped-cir, offered-limited-capped-cir |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR |

queue [[queue-id](#)] *reference*

| | |
|------------|---|
| Synopsis | Enter the queue list instance |
| Context | configure service ies <i>string</i> interface <i>string</i> sap <i>string</i> ingress qos sap-ingress overrides queue <i>reference</i> |
| Tree | queue |
| Introduced | 16.0.R1 |
| Platforms | All |

[queue-id] *reference*

| | |
|------------|---|

scheduler [*scheduler-name*] *string*

| | |
|------------|--|
| Synopsis | Enter the scheduler list instance |
| Context | configure <i>service ies string interface string sap string ingress qos scheduler-policy overrides scheduler string</i> |
| Tree | <i>scheduler</i> |
| Introduced | 16.0.R1 |
| Platforms | All |

[scheduler-name] *string*

| | |
|---------------|--|
| Synopsis | Scheduler name |
| Context | configure <i>service ies string interface string sap string ingress qos scheduler-policy overrides scheduler string</i> |
| Tree | <i>scheduler</i> |
| Description | <p>This command specifies the scheduler name which is composed of printable 7-bit ASCII characters. If the string contains special characters (#, \$, spaces, and so on), the entire string must be enclosed within double quotes. Each scheduler must have a unique name within the context of the scheduler policy. However, the same name can be reused in multiple scheduler policies. If the scheduler name already exists within the policy tier level, the context changes to that scheduler name for the purpose of editing the scheduler commands.</p> <p>If the scheduler name exists within the policy on a different tier, an error occurs and the current context will not change. If the scheduler name does not exist in this or another tier within the scheduler policy, it is assumed that an attempt is being made to create a scheduler of that name.</p> <p>If the provided scheduler name is invalid, a name syntax error will occur, the command will not execute, and the context will not change.</p> |

local-ip-address (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|-------------|--|
| Synopsis | Local IP address of this tunnel |
| Context | configure service ies <i>string</i> interface <i>string</i> sap <i>string</i> ip-tunnel <i>string</i> local-ip-address (<i>ipv4-address-no-zone</i> <i>ipv6-address-no-zone</i>) |
| Tree | local-ip-address |
| Description | This command specifies the local IP address to use for the IP tunnel. This configuration applies to the outer IP header of the encapsulated packets. The address must belong to one of the IP subnets associated with the public SAP interface of the tunnel group. The source IP address, the remote IP address, and the backup remote IP address of a tunnel must all belong to the same address family (IPv4 or IPv6).

When this command specifies an IPv6 address, it must be a global unicast address. |
| Introduced | 16.0.R1 |
| Platforms | All |

pmtu-discovery-aging *number*

| Platforms | All |

ipsec-gateway [**name**] *string*

| | |
|----------------|---|
| Synopsis | Enter the ipsec-gateway list instance |
| Context | configure service ies <i>string</i> interface <i>string</i> sap <i>string</i> ipsec-gateway <i>string</i> |
| Tree | ipsec-gateway |
| Max. Instances | 1 |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

[name] *string*

| | |
|----------|--------------------|
| Synopsis | IPsec gateway name |
|----------|--------------------|

| | |
|---------------|--|
| Context | configure service ies string interface string sap string ipsec-gateway string |
| Tree | ipsec-gateway |
| String Length | 1 to 32 |
| Notes | This element is part of a list key. |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

admin-state *keyword*

| | |
|------------|--|
| Synopsis | Administrative state of the IPsec gateway |
| Context | configure service ies string interface string sap string ipsec-gateway string admin-state keyword |
| Tree | admin-state |
| Default | disable |
| Options | enable, disable |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

cert

| | |
|------------|---|
| Synopsis | Enter the cert context |
| Context | configure service ies string interface string sap string ipsec-gateway string cert |
| Tree | cert |
| Introduced | 19.7.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

cert-profile *reference*

| | |
|------------|--|
| Synopsis | Certificate profile name |
| Context | configure service ies string interface string sap string ipsec-gateway string cert cert-profile reference |
| Tree | cert-profile |
| Reference | configure ipsec cert-profile string |
| Introduced | 19.7.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

status-verify

| | |
|-------------|---|
| Synopsis | Enter the status-verify context |
| Context | configure service ies string interface string sap string ipsec-gateway string cert status-verify |
| Tree | status-verify |
| Description | Commands in this context configure certificate revocation status verification. |
| Introduced | 19.7.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

default-result *keyword*

| | |
|-------------|--|
| Synopsis | Default result of Certificate Status Verification (CSV) |
| Context | configure service ies string interface string sap string ipsec-gateway string cert status-verify default-result keyword |
| Tree | default-result |
| Description | This command specifies the default result when both the primary and secondary methods fail to provide an answer. |
| Default | revoked |
| Options | revoked, good |
| Introduced | 19.7.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

primary *keyword*

| | |
|------------|---|
| Synopsis | Primary method of CSV to verify the revocation status |
| Context | configure service ies string interface string sap string ipsec-gateway string cert status-verify primary keyword |
| Tree | primary |
| Default | crI |
| Options | crI, ocsp |
| Introduced | 19.7.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

secondary *keyword*

| | |
|------------|--|
| Synopsis | Secondary method of CSV to verify the revocation status |
| Context | configure service ies <i>string</i> interface <i>string</i> sap <i>string</i> ipsec-gateway <i>string</i> cert status-verify secondary <i>keyword</i> |
| Tree | secondary |
| Default | none |
| Options | none, <i>crl</i> , <i>ocsp</i> |
| Introduced | 19.7.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

trust-anchor-profile *reference*

| | |
|------------|--|
| Synopsis | Trust anchor profile name |
| Context | configure service ies <i>string</i> interface <i>string</i> sap <i>string</i> ipsec-gateway <i>string</i> cert trust-anchor-profile <i>reference</i> |
| Tree | trust-anchor-profile |
| Reference | configure ipsec trust-anchor-profile <i>string</i> |
| Introduced | 19.7.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

client-db

| | |
|-------------|--|
| Synopsis | Enable the client-db context |
| Context | configure service ies <i>string</i> interface <i>string</i> sap <i>string</i> ipsec-gateway <i>string</i> client-db |
| Tree | client-db |
| Description | Commands in this context configure the IPsec client database. The client database is used to authenticate the IKEv2 dynamic LAN-to-LAN tunnel. |
| Introduced | 19.7.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

fallback *boolean*

| | |
|----------|---|
| Synopsis | Fall back to the default authentication policy |
| Context | configure service ies <i>string</i> interface <i>string</i> sap <i>string</i> ipsec-gateway <i>string</i> client-db fallback <i>boolean</i> |
| Tree | fallback |

| | |
|-------------|--|
| Description | When configured to true , this command specifies whether the IPsec gateway can fall back to the default authentication policy when the IPsec tunnel authentication request fails to match any clients in the IPsec database.

When configured to false and the client database lookup fails to return a matched result, the system fails the tunnel setup. |
| Default | true |
| Introduced | 19.7.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

name reference

| | |
|------------|--|
| Synopsis | Client database name |
| Context | configure service ies <i>string</i> interface <i>string</i> sap <i>string</i> ipsec-gateway <i>string</i> client-db <i>name reference</i> |
| Tree | name |
| Reference | configure ipsec client-db <i>string</i> |
| Notes | This element is mandatory. |
| Introduced | 19.7.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

default-secure-service

| | |
|------------|---|
| Synopsis | Enable the default-secure-service context |
| Context | configure service ies <i>string</i> interface <i>string</i> sap <i>string</i> ipsec-gateway <i>string</i> default-secure-service |
| Tree | default-secure-service |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

interface string

WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|----------|---|
| Synopsis | Private IPsec tunnel interface name |
| Context | configure service ies <i>string</i> interface <i>string</i> sap <i>string</i> ipsec-gateway <i>string</i> default-secure-service interface <i>string</i> |

| Context | configure service ies <i>string</i> interface <i>string</i> sap <i>string</i> lag |
| Tree | lag |
| Introduced | 16.0.R1 |

Platforms All

link-map-profile *number*

Synopsis LAG link map profile for a SAP or network interface

Context **configure** *service ies string interface string sap string lag link-map-profile number*

Tree [link-map-profile](#)

Description This command assigns a preconfigured LAG link map profile to a SAP or network interface configured on a LAG or a PW port that exists on a LAG. After an operator assigns a LAG link map profile, the system rehashes the SAP or network interface egress traffic over the LAG as required by the new configuration.

If the LAG link map profile for a SAP or network interface is deleted, the system reverts back to per-flow hashing.

Range 1 to 64

Introduced 16.0.R1

Platforms All

per-link-hash

Synopsis Enter the **per-link-hash** context

Context **configure** *service ies string interface string sap string lag per-link-hash*

| Tree | failure-action |
| Description | This command configures a named BFD template to be used by VCCV BFD on PWs belonging to the VLL service. The template specifies parameters, such as the minimum transmit and receive control packet timer intervals, used by the BFD session. Template parameters are configured under the configure router bfd context. |
| Default | none |
| Options | none, down |
| Introduced | 21.2.R1 |
| Platforms | All |

wait-for-up-timer *number*

| | |
|-------------|--|
| Synopsis | Time waited for BFD up status |
| Context | configure service ies <i>string</i> interface <i>string</i> spoke-sdp <i>string</i> bfd wait-for-up-timer <i>number</i> |
| Tree | wait-for-up-timer |
| Description | This command configures the time interval that is used to wait for a BFD session to come up.

This command is triggered when a spoke-SDP is first administratively enabled and a VCCV BFD session transitions from up to down. The command is required to allow time for BFD sessions to come up, and for BFD to settle before selecting the active spoke-SDP for use in a redundant set. In the case where a VCCV BFD session is bouncing, the timer prevents excessive flapping of the operational state of a spoke-SDP. |
| Range | 1 to 60 |
| Units | seconds |
| Introduced | 21.2.R1 |

rx-eth-vsm-grace *boolean*

Synopsis Receive and process Nokia ETH-CFM Grace PDU on the MEP

Context **configure** [service](#) [ies](#) [string](#) [interface](#) [string](#) [spoke-sdp](#) [string](#) [eth-cfm](#) [mep](#) [md-admin-name](#) [reference](#) [ma-admin-name](#) [reference](#) [mep-id](#) [number](#) [grace](#) [eth-vsm-grace](#) [rx-eth-vsm-grace](#) *boolean*

Tree [rx-eth-vsm-grace](#)

Description When configured to **true**, the router enables the Nokia Grace function, which is a vendor-specific PDU that informs MEP peers that the local node may be entering a period of expected defect.

When configured to **false**, the router disables the Nokia Grace function.

Default true

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

tx-eth-vsm-grace *boolean*

Synopsis Transmit ETH-ED PDUs from the MEP

Context **configure** [service](#) [ies](#) [string](#) [interface](#) [string](#) [spoke-sdp](#) [string](#) [eth-cfm](#) [mep](#) [md-admin-name](#) [reference](#) [ma-admin-name](#) [reference](#) [mep-id](#) [number](#) [grace](#) [eth-vsm-grace](#) [tx-eth-vsm-grace](#) *boolean*

Tree [tx-eth-vsm-grace](#)

Description When configured to **true**, the router can transmit the Nokia ETH-CFM Grace PDU from the MEP when a system soft reset notification is received for one or more cards.

The Nokia Grace function is a vendor-specific PDU that informs MEP peers that the local node may be entering a period of expected defect.

The operator must configure the **configure system eth-cfm grace** command to instruct the system that the node is capable of transmitting expected-defect windows to peers. The system can only transmit one form of ETH-CFM grace (Nokia ETH-CFM Grace or ITU-T Y.1731 ETH-ED).

When configured to **false**, the router disables the transmission of the Nokia ETH-CFM Grace PDU from the MEP.

squelch-ingress-levels *number*

| | |
|----------|---|
| Synopsis | Levels for which ETH-CFM packets are silently discarded |
|----------|---|

| | |
|----------------|---|
| Context | configure service ies <i>string</i> interface <i>string</i> spoke-sdp <i>string</i> eth-cfm squelch-ingress-levels <i>number</i> |
| Tree | squelch-ingress-levels |
| Description | This command defines the levels of the ETH-CFM packets that are silently discarded on ingress into the SAP or SDP binding from the wire that matches the service delineation of the SAP or SDP binding. All ETH-CFM packets inbound to the SAP or SDP binding that match the configured levels are dropped without regard for any other ETH-CFM criteria. No statistical information or drop count is available for any ETH-CFM packet that is silently discarded by this option.

The list of levels must be a complete contiguous list from 0 up to the highest level that will be dropped. |
| Range | 0 to 7 |
| Max. Instances | 8 |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

|------------|--|
| Synopsis | Up hold time for the IP interface |
| Context | configure service ies <i>string</i> redundant-interface <i>string</i> hold-time ipv4 up seconds <i>number</i> |
| Tree | seconds |
| Range | 1 to 1200 |
| Units | seconds |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

ip-mtu *number*

| | |
|------------|---|
| Synopsis | IP MTU applied to outgoing packets |
| Context | configure service ies <i>string</i> redundant-interface <i>string</i> ip-mtu <i>number</i> |
| Tree | ip-mtu |
| Range | 512 to 9786 |
| Units | bytes |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

ipv4

| | |
|------------|---|
| Synopsis | Enter the ipv4 context |
| Context | configure service ies <i>string</i> redundant-interface <i>string</i> ipv4 |
| Tree | ipv4 |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

primary

| | |
|------------|---|
| Synopsis | Enable the primary context |
| Context | configure service ies <i>string</i> redundant-interface <i>string</i> ipv4 primary |
| Tree | primary |
| Introduced | 16.0.R4 |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

address *string*

Synopsis IPv4 address to be assigned to the interface
Context **configure** [service](#) [ies](#) *string* [redundant-interface](#) *string* [ipv4](#) [primary](#) [address](#) *string*
Tree [address](#)
Notes This element is mandatory.
Introduced 16.0.R4
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

prefix-length *number*

Synopsis IPv4 address prefix length
Context **configure** [service](#) [ies](#) *string* [redundant-interface](#) *string* [ipv4](#) [primary](#) [prefix-length](#) *number*
Tree [prefix-length](#)
Range 0 to 32
Notes This element is mandatory.
Introduced 16.0.R4
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

remote-ip *string*

Synopsis Remote IP address for the interface
Context **configure** [service](#) [ies](#) *string* [redundant-interface](#) *string* [ipv4](#) [primary](#) [remote-ip](#) *string*
Tree [remote-ip](#)
Introduced 16.0.R4
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

spoke-sdp [[sdp-bind-id](#)] *string*

Synopsis Enter the **spoke-sdp** list instance
Context **configure** [service](#) [ies](#) *string* [redundant-interface](#) *string* [spoke-sdp](#) *string*
Tree [spoke-sdp](#)

| | |
|----------------|---|
| Max. Instances | 1 |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

[sdp-bind-id] *string*

| | |
|---------------|---|
| Synopsis | SDP binding ID |
| Context | configure service ies <i>string</i> redundant-interface <i>string</i> spoke-sdp <i>string</i> |
| Tree | spoke-sdp |
| String Length | 3 to 16 |
| Notes | This element is part of a list key. |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

admin-state *keyword*

| | |
|------------|---|
| Synopsis | Administrative state of the SDP binding to the service |
| Context | configure service ies <i>string</i> redundant-interface <i>string</i> spoke-sdp <i>string</i> admin-state <i>keyword</i> |
| Tree | admin-state |
| Default | enable |
| Options | enable, disable |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

control-word *boolean*

| | |
|------------|--|
| Synopsis | Use the control word as preferred |
| Context | configure service ies <i>string</i> redundant-interface <i>string</i> spoke-sdp <i>string</i> control-word <i>boolean</i> |
| Tree | control-word |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

description *string*

| | |
|---------------|---|
| Synopsis | Text description |
| Context | configure service ies <i>string</i> redundant-interface <i>string</i> spoke-sdp <i>string</i> description <i>string</i> |
| Tree | description |
| String Length | 1 to 80 |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

egress

| | |
|------------|--|
| Synopsis | Enter the egress context |
| Context | configure service ies <i>string</i> redundant-interface <i>string</i> spoke-sdp <i>string</i> egress |
| Tree | egress |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

filter

| | |
|------------|---|
| Synopsis | Enter the filter context |
| Context | configure service ies <i>string</i> redundant-interface <i>string</i> spoke-sdp <i>string</i> egress filter |
| Tree | filter |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

ip reference

| | |
|------------|--|
| Synopsis | IPv4 filter policy name |
| Context | configure service ies <i>string</i> redundant-interface <i>string</i> spoke-sdp <i>string</i> egress filter ip <i>reference</i> |
| Tree | ip |
| Reference | configure filter ip-filter <i>string</i> |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

vc-label *number***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|------------|--|
| Synopsis | Egress MPLS VC label to send packets to the far end |
| Context | configure service ies <i>string</i> redundant-interface <i>string</i> spoke-sdp <i>string</i> egress vc-label <i>number</i> |
| Tree | vc-label |
| Range | 16 to 1048575 |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

ingress

| | |
|------------|--|
| Synopsis | Enter the ingress context |
| Context | configure service ies <i>string</i> redundant-interface <i>string</i> spoke-sdp <i>string</i> ingress |
| Tree | ingress |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

filter

| | |
|------------|---|
| Synopsis | Enter the filter context |
| Context | configure service ies <i>string</i> redundant-interface <i>string</i> spoke-sdp <i>string</i> ingress filter |
| Tree | filter |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

ip reference

| | |
|----------|---|
| Synopsis | IPv4 filter policy name |
| Context | configure service ies <i>string</i> redundant-interface <i>string</i> spoke-sdp <i>string</i> ingress filter ip <i>reference</i> |
| Tree | ip |

| | |

| Tree | admin-state |
| Default | disable |
| Options | enable, disable |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

authenticated-brg-only *boolean***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|------------|---|
| Synopsis | Allow BRGs that have been pre-authenticated |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> brg authenticated-brg-only <i>boolean</i> |
| Tree | authenticated-brg-only |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

default-brg-profile *reference***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|------------|--|
| Synopsis | Default BRG profile that can be overridden during authentication |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> brg default-brg-profile <i>reference</i> |
| Tree | default-brg-profile |
| Reference | configure subscriber-mgmt vrgw brg-profile <i>string</i> |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

cflowd-parameters

| | |
|------------|---|
| Synopsis | Enter the cflowd-parameters context |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> cflowd-parameters |
| Tree | cflowd-parameters |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

sampling [[sampling-type](#)] *keyword*

| | |
|------------|---|
| Synopsis | Enter the sampling list instance |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> cflowd-parameters sampling <i>keyword</i> |
| Tree | sampling |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

[sampling-type] *keyword*

| | |
|----------|---|
| Synopsis | Traffic sampling type |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> cflowd-parameters sampling <i>keyword</i> |
| Tree | sampling |

| | |
|-------------|---|
| Description | This command configures the type of traffic to be sampled on the associated IP interface. |
| Options | unicast, multicast, both |
| Notes | This element is part of a list key. |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

direction *keyword*

| | |
|-------------|---|
| Synopsis | Direction of traffic for cflowd sampling |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> cflowd-parameters sampling <i>keyword</i> direction <i>keyword</i> |
| Tree | direction |
| Description | This command configures the direction in which sampling occurs on the associated IP interfaces. |
| Default | ingress-only |
| Options | ingress-only, egress-only, both |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

sample-profile (*keyword* | *number*)

| | |
|-------------|--|
| Synopsis | Sample profile ID |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> cflowd-parameters sampling <i>keyword</i> sample-profile (<i>keyword</i> <i>number</i>) |
| Tree | sample-profile |
| Description | This command defines the sampling rate profile associated with this interface. |
| Max. Range | 0 to 4294967295 |
| Options | 1 |
| Introduced | 19.5.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

type *keyword*

| | |
|----------|-------------------------|
| Synopsis | Type of cflowd analysis |
|----------|-------------------------|

| | |
|-------------|---|
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> cflowd-parameters sampling <i>keyword</i> type <i>keyword</i> |
| Tree | type |
| Description | This command configures the cflowd sampling type on the associated IP interface. |
| Options | acl, interface |
| Notes | This element is mandatory. |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

data-trigger

| | |
|------------|---|
| Synopsis | Enter the data-trigger context |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> data-trigger |
| Tree | data-trigger |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

admin-state *keyword*

| | |
|------------|--|
| Synopsis | Administrative state of data-triggered host creation |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> data-trigger admin-state <i>keyword</i> |
| Tree | admin-state |
| Default | disable |
| Options | enable, disable |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

description *string*

WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|------------|---|
| Synopsis | PE that provisions the GTP user interface |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> gtp-parameters fpe <i>reference</i> |
| Tree | fpe |
| Reference | configure fwd-path-ext fpe <i>number</i> |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

gx-policy reference

| | |
|------------|--|
| Synopsis | Diameter application policy |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> gx-policy <i>reference</i> |
| Tree | gx-policy |
| Reference | configure subscriber-mgmt diameter-gx-policy <i>string</i> |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

ingress

| | |
|------------|---|
| Synopsis | Enter the ingress context |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ingress |
| Tree | ingress |
| Introduced | 19.7.R1 |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

policy-accounting *reference*

Synopsis Ingress policy accounting template name

Context **configure** [service](#) [ies](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [ingress-policy-accounting](#) *reference*

Tree [policy-accounting](#)

Reference **configure** [routing-options](#) [policy-accounting](#) [policy-acct-template](#) *string*

Introduced 19.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-s

ingress-stats *boolean*

Synopsis Collect ingress interface statistics

Context **configure** [service](#) [ies](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [ingress-stats](#) *boolean*

Tree [ingress-stats](#)

Default false

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

ip-mtu *number*

Synopsis Interface IP MTU

Context **configure** [service](#) [ies](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [ip-mtu](#) *number*

Tree [ip-mtu](#)

Range 512 to 9786

Units bytes

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

ipoe-linking

Synopsis Enter the **ipoe-linking** context

| | |
|------------|---|
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipoe-linking |
| Tree | ipoe-linking |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

admin-state *keyword*

| | |
|------------|--|
| Synopsis | Administrative state of IPoE host linking |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipoe-linking
admin-state <i>keyword</i> |
| Tree | admin-state |
| Default | disable |
| Options | enable, disable |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

gratuitous-router-advertisement *boolean*

WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|------------|--|
| Synopsis | Send unsolicited router advertisement after DHCP setup |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipoe-linking
gratuitous-router-advertisement <i>boolean</i> |
| Tree | gratuitous-router-advertisement |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

shared-circuit-id *boolean*

WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|----------|---|
| Synopsis | Enable circuit ID in DHCPv4 Option82 to validate DHCPv6 |
|----------|---|

| | |
|------------|---|
| Context | configure service ies <i>string</i> <i>subscriber-interface string</i> <i>group-interface string</i> <i>ipoe-linking shared-circuit-id boolean</i> |
| Tree | shared-circuit-id |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

ipoe-session

| | |
|------------|---|
| Synopsis | Enter the ipoe-session context |
| Context | configure service ies <i>string</i> <i>subscriber-interface string</i> <i>group-interface string</i> <i>ipoe-session</i> |
| Tree | ipoe-session |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

admin-state *keyword*

| | |
|------------|---|
| Synopsis | Administrative state of IPoE session management |
| Context | configure service ies <i>string</i> <i>subscriber-interface string</i> <i>group-interface string</i> <i>ipoe-session admin-state keyword</i> |
| Tree | admin-state |
| Options | enable, disable |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

description *string*

| | |
|---------------|--|
| Synopsis | Text description |
| Context | configure service ies <i>string</i> <i>subscriber-interface string</i> <i>group-interface string</i> <i>ipoe-session description string</i> |
| Tree | description |
| String Length | 1 to 80 |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

force-auth

| | |
|------------|--|
| Synopsis | Enter the force-auth context |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipoe-session force-auth |
| Tree | force-auth |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

cid-change *boolean*

| | |
|------------|--|
| Synopsis | Ignore min-auth-interval when circuit ID changed |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipoe-session force-auth cid-change <i>boolean</i> |
| Tree | cid-change |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

rid-change *boolean*

| | |
|------------|--|
| Synopsis | Ignore min-auth-interval when remote ID changed |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipoe-session force-auth rid-change <i>boolean</i> |
| Tree | rid-change |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

ipoe-session-policy *reference***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|-----------|--|
| Synopsis | IPoE Session policy to be used for new sessions |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipoe-session ipoe-session-policy <i>reference</i> |
| Tree | ipoe-session-policy |
| Reference | configure subscriber-mgmt ipoe-session-policy <i>string</i> |

| | |
|------------|---|
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

min-auth-interval (*keyword* | *number*)

| | |
|------------|---|
| Synopsis | Minimum time between two authentication attempts |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipoe-session min-auth-interval (<i>keyword</i> <i>number</i>) |
| Tree | min-auth-interval |
| Range | 1 to 32000000 |
| Default | infinite |
| Units | seconds |
| Options | infinite, always-reauthenticate |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

radius-session-timeout *keyword*

| | |
|------------|--|
| Synopsis | Session timeout attribute to be interpreted |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipoe-session radius-session-timeout <i>keyword</i> |
| Tree | radius-session-timeout |
| Options | absolute, ignore, backwards-compatible |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

sap-session-limit *number*

| | |
|------------|--|
| Synopsis | Maximum number of sessions per SAP |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipoe-session sap-session-limit <i>number</i> |
| Tree | sap-session-limit |
| Range | 1 to 131071 |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

session-limit *number*

| | |
|------------|--|
| Synopsis | Maximum number of sessions on this group interface |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipoe-session session-limit <i>number</i> |
| Tree | session-limit |
| Range | 1 to 500000 |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

stateless-redundancy *boolean***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|------------|--|
| Synopsis | Remove IPoE sessions when the system becomes stand-by in a stateless multi-chassis redundancy setup |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipoe-session stateless-redundancy <i>boolean</i> |
| Tree | stateless-redundancy |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

user-db *reference***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|------------|---|
| Synopsis | Local user database that is used to (pre-)authenticate new sessions |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipoe-session user-db <i>reference</i> |
| Tree | user-db |
| Reference | configure subscriber-mgmt local-user-db <i>string</i> |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

ipv4

| | |
|------------|---|
| Synopsis | Enter the ipv4 context |
| Context | configure service ies string subscriber-interface string group-interface string ipv4 |
| Tree | ipv4 |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

arp-host

| | |
|------------|--|
| Synopsis | Enter the arp-host context |
| Context | configure service ies string subscriber-interface string group-interface string ipv4 arp-host |
| Tree | arp-host |
| Introduced | 16.0.R6 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

admin-state *keyword*

| | |
|------------|--|
| Synopsis | Administrative state of ARP hosts |
| Context | configure service ies string subscriber-interface string group-interface string ipv4 arp-host admin-state keyword |
| Tree | admin-state |
| Options | enable, disable |
| Introduced | 16.0.R6 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

host-limit *number*

| | |
|------------|--|
| Synopsis | Maximum number of ARP hosts |
| Context | configure service ies string subscriber-interface string group-interface string ipv4 arp-host host-limit number |
| Tree | host-limit |
| Range | 1 to 524287 |
| Introduced | 16.0.R6 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

min-auth-interval *number*

| | |
|------------|---|
| Synopsis | Minimum authentication interval |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv4 arp-host min-auth-interval <i>number</i> |
| Tree | min-auth-interval |
| Range | 1 to 6000 |
| Default | 15 |
| Units | minutes |
| Introduced | 16.0.R6 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

sap-host-limit *number*

| | |
|------------|--|
| Synopsis | Maximum number of ARP hosts per SAP |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv4 arp-host sap-host-limit <i>number</i> |
| Tree | sap-host-limit |
| Range | 1 to 131071 |
| Default | 1 |
| Introduced | 16.0.R6 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

dhcp

| | |
|------------|---|
| Synopsis | Enter the dhcp context |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv4 dhcp |
| Tree | dhcp |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

admin-state *keyword*

| | |
|----------|--|
| Synopsis | Administrative state of DHCP |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv4 dhcp admin-state <i>keyword</i> |

| | |
|------------|---|
| Tree | admin-state |
| Options | enable, disable |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

client-applications

| | |
|------------|---|
| Synopsis | Enter the client-applications context |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv4 dhcp client-applications |
| Tree | client-applications |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

dhcp *boolean*

| | |
|------------|---|
| Synopsis | Enable IPoE clients to use DHCP relay or proxy server |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv4 dhcp client-applications dhcp <i>boolean</i> |
| Tree | dhcp |
| Default | true |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

ppp *boolean*

| | |
|------------|--|
| Synopsis | Enable PPPoE clients to use DHCP relay or proxy server |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv4 dhcp client-applications ppp <i>boolean</i> |
| Tree | ppp |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

description *string*

| | |
|---------------|---|
| Synopsis | Text description |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv4 dhcp description <i>string</i> |
| Tree | description |
| String Length | 1 to 80 |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

filter *reference*

| | |
|------------|---|
| Synopsis | DHCP filter ID for the group interface |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv4 dhcp filter <i>reference</i> |
| Tree | filter |
| Reference | configure filter dhcp-filter <i>number</i> |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

gi-address *string*

| | |
|-------------|---|
| Synopsis | GI address for the DHCP relay |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv4 dhcp gi-address <i>string</i> |
| Tree | gi-address |
| Description | <p>This command configures the GI address to distinguish between the different subscriber interfaces (and potentially group interfaces) defined when the router functions as a DHCP relay.</p> <p>By default, the GI address used in the relayed DHCP packet is the primary IP address of a normal IES interface. Specifying the GI address allows the user to choose a secondary address. For group interfaces, a GI address must be specified under the group interface DHCP context or subscriber interface DHCP context for DHCP to function.</p> |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

lease-populate

| | |
|------------|---|
| Synopsis | Enter the lease-populate context |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv4 dhcp lease-populate |
| Tree | lease-populate |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

I2-header

| | |
|------------|---|
| Synopsis | Enable the I2-header context |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv4 dhcp lease-populate I2-header |
| Tree | I2-header |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

mac *string*

| | |
|------------|---|
| Synopsis | IEEE address used in anti-spoofing entries for the SAP |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv4 dhcp lease-populate I2-header mac <i>string</i> |
| Tree | mac |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

max-leases *number*

| | |
|------------|--|
| Synopsis | Maximum number of DHCPv4 leases |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv4 dhcp lease-populate max-leases <i>number</i> |
| Tree | max-leases |
| Range | 1 to 511999 |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

match-circuit-id *boolean*

| | |
|------------|---|
| Synopsis | Enable Option 82 circuit ID on relayed DHCP packets |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv4 dhcp match-circuit-id <i>boolean</i> |
| Tree | match-circuit-id |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

offer-selection

| | |
|------------|---|
| Synopsis | Enter the offer-selection context |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv4 dhcp offer-selection |
| Tree | offer-selection |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

client-mac

| | |
|------------|--|
| Synopsis | Enter the client-mac context |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv4 dhcp offer-selection client-mac |
| Tree | client-mac |
| Notes | The following elements are part of a choice: client-mac or server . |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

discover-delay *number*

| | |
|-------------|---|
| Synopsis | Delay before sending DHCP Discover messages |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv4 dhcp offer-selection client-mac discover-delay <i>number</i> |
| Tree | discover-delay |
| Description | This command configures the time to delay sending DHCP Discover messages from the specified MAC addresses. |

| | |
|------------|---|
| Range | 1 to 100 |
| Units | deciseconds |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

mac-address *keyword*

| | |
|-------------|--|
| Synopsis | Designated client MAC addresses for Offer selection |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv4 dhcp offer-selection client-mac mac-address <i>keyword</i> |
| Tree | mac-address |
| Description | This command specifies the client MAC addresses for which the Discover delay applies. |
| Options | odd, even |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

discover-delay *number*

| | |
|-------------|--|
| Synopsis | Delay before sending DHCP Discover messages |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv4 dhcp offer-selection discover-delay <i>number</i> |
| Tree | discover-delay |
| Description | This command configures the time to delay sending DHCP Discover messages. The delay is applied to all DHCP Discover messages for which no per DHCP server or per client MAC delay is configured. |
| Range | 1 to 100 |
| Units | deciseconds |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

server [**ipv4-address**] *string*

| | |
|----------|--|
| Synopsis | Enter the server list instance |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv4 dhcp offer-selection server <i>string</i> |
| Tree | server |

| | |
|----------------|---|
| Max. Instances | 8 |
| Notes | The following elements are part of a choice: client-mac or server . |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

[ipv4-address] *string*

| | |
|------------|--|
| Synopsis | IP address of the DHCP server |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv4 dhcp offer-selection server <i>string</i> |
| Tree | server |
| Notes | This element is part of a list key. |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

discover-delay *number*

| | |
|-------------|--|
| Synopsis | Delay before sending DHCP Discover messages |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv4 dhcp offer-selection server <i>string</i> discover-delay <i>number</i> |
| Tree | discover-delay |
| Description | This command configures the time to delay DHCP Discover messages sent to the server. |
| Range | 1 to 100 |
| Units | deciseconds |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

option-82

| | |
|----------|--|
| Synopsis | Enter the option-82 context |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv4 dhcp option-82 |
| Tree | option-82 |

| | |
|-------------|---|
| Description | Commands in this context configure the processing required when the router receives a DHCP request that already has an Option 82 field in the packet. |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

| | |
|------------|---|
| Synopsis | Action to take with received DHCP Option 82 |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv4 dhcp option-82 action <i>keyword</i> |
| Tree | action |
| Default | keep |
| Options | replace, drop, keep |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

circuit-id

| | |
|------------|--|
| Synopsis | Enter the circuit-id context |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv4 dhcp option-82 circuit-id |
| Tree | circuit-id |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

ascii-tuple

| | |
|------------|---|
| Synopsis | Use the ASCII-encoded tuple for the circuit ID |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv4 dhcp option-82 circuit-id ascii-tuple |
| Tree | ascii-tuple |
| Notes | The following elements are part of a choice: ascii-tuple , ifindex , none , sap-id , or vlan-ascii-tuple . |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

ifindex

| | |
|------------|--|
| Synopsis | Use the interface index for the circuit ID |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv4 dhcp option-82 circuit-id ifindex |
| Tree | ifindex |
| Notes | The following elements are part of a choice: ascii-tuple , ifindex , none , sap-id , or vlan-ascii-tuple . |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

none

| | |
|------------|---|
| Synopsis | Do not include the circuit ID |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv4 dhcp option-82 circuit-id none |
| Tree | none |
| Notes | The following elements are part of a choice: ascii-tuple , ifindex , none , sap-id , or vlan-ascii-tuple . |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

sap-id

| | |
|------------|---|
| Synopsis | Use the SAP ID |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv4 dhcp option-82 circuit-id sap-id |
| Tree | sap-id |
| Notes | The following elements are part of a choice: ascii-tuple , ifindex , none , sap-id , or vlan-ascii-tuple . |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

vlan-ascii-tuple

| | |
|----------|---|
| Synopsis | Include the VLAN ID and dot1p bits in the ASCII tuple |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv4 dhcp option-82 circuit-id vlan-ascii-tuple |

| | |
|-------------|---|
| Tree | vlan-ascii-tuple |
| Description | When configured, the router includes the VLAN ID and dot1p bits with the ASCII-tuple information. This only occurs on dot1q and QinQ-encapsulated ports. When the Option 82 bits are stripped, dot1p bits are copied to the Ethernet header of the outgoing packet.
When unconfigured, the router leaves the circuit ID sub-option of the DHCP packet empty. |
| Notes | The following elements are part of a choice: ascii-tuple , ifindex , none , sap-id , or vlan-ascii-tuple . |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

remote-id

| | |
|-------------|--|
| Synopsis | Enter the remote-id context |
| Context | configure service ies string subscriber-interface string group-interface string ipv4 dhcp option-82 remote-id |
| Tree | remote-id |
| Description | Commands in this context configure the remote IP sub-option of the DHCP packet with the identity of the remote host end (typically the DHCP client). |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

ascii-string *string*

| | |
|---------------|--|
| Synopsis | User-defined ASCII string for the remote ID |
| Context | configure service ies string subscriber-interface string group-interface string ipv4 dhcp option-82 remote-id ascii-string string |
| Tree | ascii-string |
| String Length | 1 to 32 |
| Notes | The following elements are part of a choice: ascii-string , mac , or none . |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

mac

| | |
|----------|---------------------------------------|
| Synopsis | Use the MAC address for the remote ID |
|----------|---------------------------------------|

| | |
|------------|--|
| Context | configure service ies <i>string</i> <i>subscriber-interface string</i> <i>group-interface string</i> <i>ipv4 dhcp option-82 remote-id mac</i> |
| Tree | mac |
| Notes | The following elements are part of a choice: ascii-string , mac , or none . |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

none

| | |
|------------|---|
| Synopsis | Do not include the remote ID |
| Context | configure service ies <i>string</i> <i>subscriber-interface string</i> <i>group-interface string</i> <i>ipv4 dhcp option-82 remote-id none</i> |
| Tree | none |
| Notes | The following elements are part of a choice: ascii-string , mac , or none . |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

vendor-specific-option

| | |
|-------------|---|
| Synopsis | Enter the vendor-specific-option context |
| Context | configure service ies <i>string</i> <i>subscriber-interface string</i> <i>group-interface string</i> <i>ipv4 dhcp option-82 vendor-specific-option</i> |
| Tree | vendor-specific-option |
| Description | Commands in this context configure the Nokia Vendor-Specific Option (VSO) of the DHCP packet. |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

client-mac-address *boolean*

| | |
|------------|--|
| Synopsis | Send the MAC address in the VSO |
| Context | configure service ies <i>string</i> <i>subscriber-interface string</i> <i>group-interface string</i> <i>ipv4 dhcp option-82 vendor-specific-option client-mac-address boolean</i> |
| Tree | client-mac-address |
| Default | false |
| Introduced | 16.0.R1 |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

pool-name *boolean*

Synopsis Send the pool name in the VSO

Context **configure** **service** **ies** *string* **subscriber-interface** *string* **group-interface** *string* **ipv4** **dhcp** **option-82** **vendor-specific-option** **pool-name** *boolean*

Tree [pool-name](#)

Default false

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

sap-id *boolean*

Synopsis Send SAP ID in the sub-option of the DHCP relay packet

Context **configure** **service** **ies** *string* **subscriber-interface** *string* **group-interface** *string* **ipv4** **dhcp** **option-82** **vendor-specific-option** **sap-id** *boolean*

Tree [sap-id](#)

Default false

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

service-id *boolean*

Synopsis Send the service ID in the Vendor Specific Option

Context **configure** **service** **ies** *string* **subscriber-interface** *string* **group-interface** *string* **ipv4** **dhcp** **option-82** **vendor-specific-option** **service-id** *boolean*

Tree [service-id](#)

 Default false
 Introduced 16.0.R1
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

proxy-server

Synopsis Enter the **proxy-server** context
 Context **configure** [service](#) [ies](#) [string](#) [subscriber-interface](#) [string](#) [group-interface](#) [string](#) [ipv4](#) [dhcp](#) [proxy-server](#)
 Tree [proxy-server](#)
 Introduced 16.0.R1
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

admin-state *keyword*

Synopsis Administrative state of the DHCP proxy server
 Context **configure** [service](#) [ies](#) [string](#) [subscriber-interface](#) [string](#) [group-interface](#) [string](#) [ipv4](#) [dhcp](#) [proxy-server](#) [admin-state](#) *keyword*
 Tree [admin-state](#)
 Default disable
 Options enable, disable
 Introduced 16.0.R1
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

emulated-server *string*

| | |
|------------|--|
| Synopsis | IP address used as DHCP server address in SAP context |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv4 dhcp proxy-server emulated-server <i>string</i> |
| Tree | emulated-server |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

lease-time

| | |
|------------|---|
| Synopsis | Enter the lease-time context |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv4 dhcp proxy-server lease-time |
| Tree | lease-time |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

radius-override *boolean*

| | |
|------------|---|
| Synopsis | Use lease time information provided by RADIUS server |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv4 dhcp proxy-server lease-time radius-override <i>boolean</i> |
| Tree | radius-override |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

value *number*

| | |
|------------|--|
| Synopsis | DHCP lease time |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv4 dhcp proxy-server lease-time value <i>number</i> |
| Tree | value |
| Range | 300 to 315446399 |
| Units | seconds |
| Introduced | 16.0.R1 |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

python-policy *reference*

Synopsis Python policy name

Context **configure** [service](#) [ies](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [ipv4](#) [dhcp](#) [python-policy](#) *reference*

Tree [python-policy](#)

Description This command associates a Python policy name with the interface.

Reference **configure** [python](#) [python-policy](#) *string*

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

relay-proxy

Synopsis Enable the **relay-proxy** context

Context **configure** [service](#) [ies](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [ipv4](#) [dhcp](#) [relay-proxy](#)

Tree [relay-proxy](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

release-update-src-ip *boolean*

Synopsis Update the source IP address of a DHCP RELEASE message

Context **configure** [service](#) [ies](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [ipv4](#) [dhcp](#) [relay-proxy](#) [release-update-src-ip](#) *boolean*

Tree [release-update-src-ip](#)

Default false

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

siaddr-override *string*

Synopsis DHCP server IP address for address hiding function

| | |
|------------|---|
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv4 dhcp relay-proxy siaddr-override <i>string</i> |
| Tree | siaddr-override |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

release-include-gi-address *boolean*

| | |
|------------|--|
| Synopsis | Include gateway IP address in DHCP Release messages |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv4 dhcp release-include-gi-address <i>boolean</i> |
| Tree | release-include-gi-address |
| Default | false |
| Introduced | 21.7.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

server *string*

| | |
|----------------|--|
| Synopsis | IP addresses for DHCP server requests |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv4 dhcp server <i>string</i> |
| Tree | server |
| Description | This command configures a list of servers that this interface forwards requests to.
The operator can enter the list of servers as either IP addresses or fully qualified domain names. The operator must specify at least one server specified for DHCP relay to work. If there are multiple servers, the system forwards the request to all the servers in the list. |
| Max. Instances | 8 |
| Notes | This element is ordered by the user. |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

src-ip-addr *keyword*

| | |
|----------|---|
| Synopsis | Type of source address to use for DHCP relay |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv4 dhcp src-ip-addr <i>keyword</i> |

| | |
|------------|---|
| Tree | src-ip-addr |
| Default | auto |
| Options | auto, gi-address |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

trusted *boolean*

| | |
|-------------|---|
| Synopsis | Relay untrusted packets |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv4 dhcp trusted <i>boolean</i> |
| Tree | trusted |
| Description | <p>When configured to true, the router enables the trusted mode on the interface. When enabled, the relay agent changes the existing GI address (of the request) to the ingress interface, and forwards the request.</p> <p>A DHCP request that contains a GI address of 0.0.0.0 and an Option 82 field in the packet is discarded unless it arrives on a trusted circuit.</p> <p>This behavior only applies if the Relay Agent Information Option action is to keep the existing information. When the Option 82 field is replaced by the relay agent, the original Option 82 information is lost, and there is no reason to enable the trusted option.</p> |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

user-db *reference*

WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|------------|--|
| Synopsis | Local user database for authentication |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv4 dhcp user-db <i>reference</i> |
| Tree | user-db |
| Reference | configure subscriber-mgmt local-user-db <i>string</i> |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

icmp

| | |
|------------|--|
| Synopsis | Enter the icmp context |
| Context | configure service ies string subscriber-interface string group-interface string ipv4 icmp |
| Tree | icmp |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

mask-reply *boolean*

| | |
|------------|---|
| Synopsis | Allow responses to ICMP mask requests on the interface |
| Context | configure service ies string subscriber-interface string group-interface string ipv4 icmp mask-reply boolean |
| Tree | mask-reply |
| Default | true |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

param-problem

| | |
|-------------|--|
| Synopsis | Enter the param-problem context |
| Context | configure service ies string subscriber-interface string group-interface string ipv4 icmp param-problem |
| Tree | param-problem |
| Description | Commands in this context specify the settings for ICMP Parameter Problem messages generated by the interface. |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

admin-state *keyword*

| | |

use-matching-address *boolean*

| | |
|-------------|--|
| Synopsis | Use the subscriber interface address as source address |
| Context | configure service ies <i>string</i> <i>subscriber-interface string</i> <i>group-interface string</i> <i>ipv4 icmp ttl-expired use-matching-address boolean</i> |
| Tree | use-matching-address |
| Description | <p>When configured to true, the system uses a matching subscriber interface address as the source address of the ICMP TTL expired message.</p> <p>For matching to occur, the source address of the offending packet must be in the same subnet of the subscriber interface address.</p> <p>When configured to false, the system uses the first configured address.</p> |
| Default | false |
| Introduced | 22.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

unreachables

| | |
|-------------|---|
| Synopsis | Enter the unreachables context |
| Context | configure service ies <i>string</i> <i>subscriber-interface string</i> <i>group-interface string</i> <i>ipv4 icmp unreachables</i> |
| Tree | unreachables |
| Description | Commands in this context specify the settings for ICMP host and network destination unreachable messages generated by the interface. |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

admin-state *keyword*

| | |
|------------|---|
| Synopsis | Administrative state of sending unreachable messages |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv4 icmp unreachables admin-state <i>keyword</i> |
| Tree | admin-state |
| Default | enable |
| Options | enable, disable |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

number *number*

| | |
|------------|---|
| Synopsis | Maximum number of unreachable messages to send |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv4 icmp unreachables number <i>number</i> |
| Tree | number |
| Range | 10 to 2000 |
| Default | 100 |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

seconds *number*

| | |
|------------|--|
| Synopsis | Time to limit the number of ICMP unreachable messages |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv4 icmp unreachables seconds <i>number</i> |
| Tree | seconds |
| Range | 1 to 60 |
| Default | 10 |
| Units | seconds |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

ignore-df-bit *boolean*

| | |
|----------|---|
| Synopsis | Ignore DF bit in the IPv4 header when fragmenting |
|----------|---|

| | |
|-------------|---|
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv4 ignore-df-bit <i>boolean</i> |
| Tree | ignore-df-bit |
| Description | When configured to true , fragmentation is applied according to the applicable egress MTU instead of the DF bit for frames egressing the WLAN-GW group. The DF bit is reset for frames that are fragmented.

When configured to false , the router fragments a packet larger than the MTU if the DF bit is set to 0 and drops the packet if the DF bit is set to 1. |
| Default | false |
| Introduced | 20.5.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

neighbor-discovery

| | |
|------------|--|
| Synopsis | Enter the neighbor-discovery context |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv4 neighbor-discovery |
| Tree | neighbor-discovery |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

local-proxy-arp *boolean*

| | |
|-------------|--|
| Synopsis | Enable local proxy ARP on interface |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv4 neighbor-discovery local-proxy-arp <i>boolean</i> |
| Tree | local-proxy-arp |
| Description | When configured to true , the router enables local proxy ARP on the interface.

When configured to false , the router does not respond to ARP requests for addresses on the same subnet. |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

populate *boolean*

| | |
|----------|--|
| Synopsis | Allow static and dynamic hosts to be populated in system ARP cache |
|----------|--|

| | |
|------------|--|
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv4 neighbor-discovery populate <i>boolean</i> |
| Tree | populate |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

proxy-arp-policy *reference*

| | |
|----------------|--|
| Synopsis | Proxy ARP policy name |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv4 neighbor-discovery proxy-arp-policy <i>reference</i> |
| Tree | proxy-arp-policy |
| Reference | configure policy-options policy-statement <i>string</i> |
| Max. Instances | 5 |
| Notes | This element is ordered by the user. |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

remote-proxy-arp *boolean*

| | |
|------------|--|
| Synopsis | Enable remote proxy ARP on the interface |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv4 neighbor-discovery remote-proxy-arp <i>boolean</i> |
| Tree | remote-proxy-arp |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

timeout *number*

| | |
|----------|--|
| Synopsis | Timeout for an ARP entry learned on the interface |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv4 neighbor-discovery timeout <i>number</i> |
| Tree | timeout |
| Range | 0 to 65535 |

| | |
|------------|---|
| Default | 14400 |
| Units | seconds |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

qos-route-lookup *keyword*

| | |
|------------|--|
| Synopsis | QoS route lookup |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv4 qos-route-lookup <i>keyword</i> |
| Tree | qos-route-lookup |
| Options | destination |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s |

urpf-check

| | |
|------------|---|
| Synopsis | Enable the urpf-check context |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv4 urpf-check |
| Tree | urpf-check |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

mode *keyword*

| | |
|------------|--|
| Synopsis | Unicast RPF check mode |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv4 urpf-check mode <i>keyword</i> |
| Tree | mode |
| Default | strict |
| Options | strict, loose, strict-no-ecmp |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

ipv6

| | |
|------------|---|
| Synopsis | Enable the ipv6 context |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv6 |
| Tree | ipv6 |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

allow-multiple-wan-addresses *boolean*

| | |
|------------|--|
| Synopsis | Allow multiple WAN addresses |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv6 allow-multiple-wan-addresses <i>boolean</i> |
| Tree | allow-multiple-wan-addresses |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

auto-reply

| | |
|------------|---|
| Synopsis | Enter the auto-reply context |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv6 auto-reply |
| Tree | auto-reply |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

neighbor-solicitation *boolean*

| | |
|------------|---|
| Synopsis | Enable auto-reply for NS |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv6 auto-reply neighbor-solicitation <i>boolean</i> |
| Tree | neighbor-solicitation |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

router-solicitation *boolean*

| | |
|------------|--|
| Synopsis | Enable auto-reply for RS |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv6 auto-reply router-solicitation <i>boolean</i> |
| Tree | router-solicitation |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

dhcp6

| | |
|------------|--|
| Synopsis | Enter the dhcp6 context |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv6 dhcp6 |
| Tree | dhcp6 |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

filter *reference*

| | |
|------------|--|
| Synopsis | DHCPv6 filter |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv6 dhcp6 filter <i>reference</i> |
| Tree | filter |
| Reference | configure filter dhcp6-filter <i>number</i> |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

option

| | |
|------------|---|
| Synopsis | Enter the option context |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv6 dhcp6 option |
| Tree | option |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

interface-id

| | |
|------------|---|
| Synopsis | Enter the interface-id context |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv6 dhcp6 option interface-id |
| Tree | interface-id |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

ascii-tuple

| | |
|------------|--|
| Synopsis | Use ASCII-encoded concatenated tuple |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv6 dhcp6 option interface-id ascii-tuple |
| Tree | ascii-tuple |
| Notes | The following elements are part of a choice: ascii-tuple , if-index , sap-id , or string . |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

if-index

| | |
|------------|---|
| Synopsis | Use interface index in interface ID option in DHCPv6 relay packet |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv6 dhcp6 option interface-id if-index |
| Tree | if-index |
| Notes | The following elements are part of a choice: ascii-tuple , if-index , sap-id , or string . |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

sap-id

| | |
|----------|---|
| Synopsis | Use SAP ID in interface ID option in DHCPv6 relay packet |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv6 dhcp6 option interface-id sap-id |
| Tree | sap-id |
| Notes | The following elements are part of a choice: ascii-tuple , if-index , sap-id , or string . |

Introduced 16.0.R1
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

string *string*

Synopsis String for interface ID option in DHCPv6 relay packet
Context **configure** **service** **ies** *string* **subscriber-interface** *string* **group-interface** *string* **ipv6** **dhcp6** **option** **interface-id** *string* *string*
Tree [string](#)
String Length 1 to 80
Notes The following elements are part of a choice: **ascii-tuple**, **if-index**, **sap-id**, or **string**.
Introduced 16.0.R1
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

remote-id *boolean*

Synopsis Allow remote ID option to be sent in the DHCPv6 relay packet
Context **configure** **service** **ies** *string* **subscriber-interface** *string* **group-interface** *string* **ipv6** **dhcp6** **option** **remote-id** *boolean*
Tree [remote-id](#)
Default false
Introduced 16.0.R1
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

override-slaac *boolean*

Synopsis Allow WAN address offered by DHCP to overwrite the WAN address acquired from SLAAC
Context **configure** **service** **ies** *string* **subscriber-interface** *string* **group-interface** *string* **ipv6** **dhcp6** **override-slaac** *boolean*
Tree [override-slaac](#)
Default false
Introduced 16.0.R1
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

pd-managed-route

| | |
|------------|--|
| Synopsis | Enable the pd-managed-route context |
| Context | configure service ies <i>string</i> <i>subscriber-interface</i> <i>string</i> <i>group-interface</i> <i>string</i> <i>ipv6 dhcp6</i>
<i>pd-managed-route</i> |
| Tree | <i>pd-managed-route</i> |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

next-hop *keyword*

| | |
|------------|--|
| Synopsis | Next hop type |
| Context | configure service ies <i>string</i> <i>subscriber-interface</i> <i>string</i> <i>group-interface</i> <i>string</i> <i>ipv6 dhcp6</i>
<i>pd-managed-route next-hop</i> <i>keyword</i> |
| Tree | <i>next-hop</i> |
| Default | ipv6 |
| Options | ipv4, ipv6 |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

proxy-server

| | |
|------------|--|
| Synopsis | Enter the proxy-server context |
| Context | configure service ies <i>string</i> <i>subscriber-interface</i> <i>string</i> <i>group-interface</i> <i>string</i> <i>ipv6 dhcp6</i>
<i>proxy-server</i> |
| Tree | <i>proxy-server</i> |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

admin-state *keyword*

| | |
|----------|---|
| Synopsis | Administrative state of the DHCPv6 proxy server |
| Context | configure service ies <i>string</i> <i>subscriber-interface</i> <i>string</i> <i>group-interface</i> <i>string</i> <i>ipv6 dhcp6</i>
<i>proxy-server admin-state</i> <i>keyword</i> |
| Tree | <i>admin-state</i> |
| Default | disable |
| Options | enable, disable |

Introduced 16.0.R1
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

client-applications

Synopsis Enter the **client-applications** context
Context **configure** **service** **ies** *string* **subscriber-interface** *string* **group-interface** *string* **ipv6** **dhcp6**
proxy-server **client-applications**
Tree **client-applications**
Introduced 16.0.R1
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

dhcp boolean

Synopsis Enable IPoE clients to use DHCP relay or proxy server
Context **configure** **service** **ies** *string* **subscriber-interface** *string* **group-interface** *string* **ipv6** **dhcp6**
proxy-server **client-applications** **dhcp** *boolean*
Tree **dhcp**
Default true
Introduced 16.0.R1
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

ppp boolean

Synopsis Allow the PPP application to use DHCP relay functionality
Context **configure** **service** **ies** *string* **subscriber-interface** *string* **group-interface** *string* **ipv6** **dhcp6**
proxy-server **client-applications** **ppp** *boolean*
Tree **ppp**
Default false
Introduced 16.0.R1
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

preferred-lifetime (*number* | *keyword*)

Synopsis Time for prefix to remain preferred on this interface
Context **configure** **service** **ies** *string* **subscriber-interface** *string* **group-interface** *string* **ipv6** **dhcp6**
proxy-server **preferred-lifetime** (*number* | *keyword*)

| | |
|------------|---|
| Tree | preferred-lifetime |
| Range | 300 to 4294967294 |
| Default | 3600 |
| Units | seconds |
| Options | infinite |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

rebind-timer *number*

| | |
|------------|---|
| Synopsis | Rebind timer (T2) for this interface |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv6 dhcp6 proxy-server rebind-timer <i>number</i> |
| Tree | rebind-timer |
| Range | 0 to 1209600 |
| Default | 2880 |
| Units | seconds |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

renew-timer *number*

| | |
|------------|--|
| Synopsis | Renew timer (T1) |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv6 dhcp6 proxy-server renew-timer <i>number</i> |
| Tree | renew-timer |
| Range | 0 to 604800 |
| Default | 1800 |
| Units | seconds |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

server-id

| | |
|----------|------------------------------------|
| Synopsis | Enter the server-id context |
|----------|------------------------------------|

| | |
|------------|--|
| Context | configure service ies <i>string</i> <i>subscriber-interface string</i> <i>group-interface string</i> <i>ipv6 dhcp6 proxy-server server-id</i> |
| Tree | server-id |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

duid-en-ascii *string*

| | |
|---------------|---|
| Synopsis | Vendor-assigned ID based on Enterprise Number (DUID-EN) |
| Context | configure service ies <i>string</i> <i>subscriber-interface string</i> <i>group-interface string</i> <i>ipv6 dhcp6 proxy-server server-id</i> duid-en-ascii <i>string</i> |
| Tree | duid-en-ascii |
| String Length | 1 to 58 |
| Notes | The following elements are part of a choice: duid-en-ascii , duid-en-hex , or duid-ll . |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

duid-en-hex *string*

| | |
|---------------|---|
| Synopsis | DUID system ID in hexadecimal format |
| Context | configure service ies <i>string</i> <i>subscriber-interface string</i> <i>group-interface string</i> <i>ipv6 dhcp6 proxy-server server-id</i> duid-en-hex <i>string</i> |
| Tree | duid-en-hex |
| String Length | 1 to 118 |
| Notes | The following elements are part of a choice: duid-en-ascii , duid-en-hex , or duid-ll . |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

duid-ll

| | |
|------------|---|
| Synopsis | Use link-layer address (DUID-LL) as DUID |
| Context | configure service ies <i>string</i> <i>subscriber-interface string</i> <i>group-interface string</i> <i>ipv6 dhcp6 proxy-server server-id</i> duid-ll |
| Tree | duid-ll |
| Notes | The following elements are part of a choice: duid-en-ascii , duid-en-hex , or duid-ll . |
| Introduced | 16.0.R1 |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

valid-lifetime (*number* | *keyword*)

Synopsis Time for prefix to remain valid on this interface

Context **configure service ies** *string* **subscriber-interface** *string* **group-interface** *string* **ipv6 dhcp6 proxy-server valid-lifetime** (*number* | *keyword*)

Tree [valid-lifetime](#)

Range 300 to 4294967294

Default 86400

Units seconds

Options infinite

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

python-policy *reference*

Synopsis Python policy

Context **configure service ies** *string* **subscriber-interface** *string* **group-interface** *string* **ipv6 dhcp6 python-policy** *reference*

Tree [python-policy](#)

Reference **configure python python-policy** *string*

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

relay

Synopsis Enter the **relay** context

Context **configure service ies** *string* **subscriber-interface** *string* **group-interface** *string* **ipv6 dhcp6 relay**

Tree [relay](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

admin-state *keyword*

| | |
|------------|--|
| Synopsis | Administrative state of DHCPv6 Relay |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv6 dhcp6 relay admin-state <i>keyword</i> |
| Tree | admin-state |
| Default | disable |
| Options | enable, disable |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

advertise-selection

| | |
|------------|---|
| Synopsis | Enter the advertise-selection context |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv6 dhcp6 relay advertise-selection |
| Tree | advertise-selection |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

client-mac

| | |
|------------|--|
| Synopsis | Enter the client-mac context |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv6 dhcp6 relay advertise-selection client-mac |
| Tree | client-mac |
| Notes | The following elements are part of a choice: client-mac or server . |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

mac-address *keyword*

| | |
|----------|---|
| Synopsis | Designated client MAC addresses for Advertise selection |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv6 dhcp6 relay advertise-selection client-mac mac-address <i>keyword</i> |
| Tree | mac-address |
| Options | odd, even |

| | |
|------------|---|
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

preference-option

| | |
|-------------|--|
| Synopsis | Enter the preference-option context |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv6 dhcp6 relay advertise-selection client-mac preference-option |
| Tree | preference-option |
| Description | Commands in this context configure the DHCPv6 preference option that is inserted in the DHCPv6 Advertise message. |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

value number

| | |
|------------|---|
| Synopsis | Preference option value for DHCPv6 Advertise messages |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv6 dhcp6 relay advertise-selection client-mac preference-option value <i>number</i> |
| Tree | value |
| Range | 0 to 255 |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

solicit-delay number

| | |
|-------------|--|
| Synopsis | Delay before sending DHCPv6 Solicit messages |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv6 dhcp6 relay advertise-selection client-mac solicit-delay <i>number</i> |
| Tree | solicit-delay |
| Description | This command configures the time to delay DHCPv6 Solicit messages sent from the designated client MAC addresses. |
| Range | 1 to 100 |
| Units | deciseconds |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

preference-option

| | |
|-------------|---|
| Synopsis | Enter the preference-option context |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv6 dhcp6 relay advertise-selection preference-option |
| Tree | preference-option |
| Description | Commands in this context configure the DHCPv6 preference option that is inserted in the DHCPv6 Advertise message. |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

value *number*

| | |
|------------|---|
| Synopsis | Preference option value for DHCPv6 Advertise messages |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv6 dhcp6 relay advertise-selection preference-option value <i>number</i> |
| Tree | value |
| Range | 0 to 255 |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

server [*ipv6-address*] *string*

| | |
|----------------|--|
| Synopsis | Enter the server list instance |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv6 dhcp6 relay advertise-selection server <i>string</i> |
| Tree | server |
| Max. Instances | 8 |
| Notes | The following elements are part of a choice: client-mac or server . |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

[ipv6-address] *string*

| | |
|----------|---------------------------------|
| Synopsis | IP address of the DHCPv6 server |
|----------|---------------------------------|

| | |
|------------|--|
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv6 dhcp6 relay advertise-selection server <i>string</i> |
| Tree | server |
| Notes | This element is part of a list key. |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

preference-option

| | |
|-------------|---|
| Synopsis | Enter the preference-option context |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv6 dhcp6 relay advertise-selection server <i>string</i> preference-option |
| Tree | preference-option |
| Description | Commands in this context configure the DHCPv6 preference option that is inserted in the DHCPv6 Advertise message. |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

value *number*

| | |
|------------|---|
| Synopsis | Preference option value for DHCPv6 Advertise messages |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv6 dhcp6 relay advertise-selection server <i>string</i> preference-option value <i>number</i> |
| Tree | value |
| Range | 0 to 255 |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

solicit-delay *number*

| | |
|-------------|---|
| Synopsis | Delay before sending DHCPv6 Solicit messages |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv6 dhcp6 relay advertise-selection server <i>string</i> solicit-delay <i>number</i> |
| Tree | solicit-delay |
| Description | This command configures the time to delay DHCPv6 Solicit messages sent to the server. |
| Range | 1 to 100 |

| | |
|------------|---|
| Units | deciseconds |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

solicit-delay *number*

| | |
|-------------|--|
| Synopsis | Delay before sending DHCPv6 Solicit messages |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv6 dhcp6 relay advertise-selection solicit-delay <i>number</i> |
| Tree | solicit-delay |
| Description | This command configures the time to delay DHCPv6 Solicit messages. The delay is applied to DHCPv6 Solicit messages for which no overriding value is configured in the server instance or the client-mac context. |
| Range | 1 to 100 |
| Units | deciseconds |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

client-applications

| | |
|------------|---|
| Synopsis | Enter the client-applications context |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv6 dhcp6 relay client-applications |
| Tree | client-applications |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

dhcp *boolean*

| | |
|------------|---|
| Synopsis | Enable IPoE clients to use DHCP relay or proxy server |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv6 dhcp6 relay client-applications dhcp <i>boolean</i> |
| Tree | dhcp |
| Default | true |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

ppp boolean

| | |
|------------|---|
| Synopsis | Allow the PPP application to use DHCP relay functionality |
| Context | configure service ies string subscriber-interface string group-interface string ipv6 dhcp6 relay client-applications ppp boolean |
| Tree | ppp |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

description string

| | |
|---------------|--|
| Synopsis | Text description |
| Context | configure service ies string subscriber-interface string group-interface string ipv6 dhcp6 relay description string |
| Tree | description |
| String Length | 1 to 80 |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

lease-split

| | |
|-------------|---|
| Synopsis | Enter the lease-split context |
| Context | configure service ies string subscriber-interface string group-interface string ipv6 dhcp6 relay lease-split |
| Tree | lease-split |
| Description | <p>Commands in this context configure DHCPv6 lease split.</p> <p>DHCPv6 lease split is active when administratively enabled and for all IA_NA and IA_PD options in the transaction, the configured lease split valid lifetime (short lease time) is less than or equal to one of the following:</p> <ul style="list-style-type: none"> the renew time T1 committed by the server (long renew time) half of the preferred lifetime committed by the server when T1 committed by the server equals zero |
| Introduced | 21.2.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

admin-state *keyword*

| | |
|------------|--|
| Synopsis | Administrative state of DHCPv6 lease split |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv6 dhcp6 relay lease-split admin-state <i>keyword</i> |
| Tree | admin-state |
| Default | disable |
| Options | enable, disable |
| Introduced | 21.2.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

valid-lifetime *number*

| | |
|------------|--|
| Synopsis | DHCPv6 lease split valid lifetime (short lease time) |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv6 dhcp6 relay lease-split valid-lifetime <i>number</i> |
| Tree | valid-lifetime |
| Range | 300 to 315446399 |
| Default | 3600 |
| Units | seconds |
| Introduced | 21.2.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

link-address *string*

| | |
|------------|--|
| Synopsis | Link address for the DHCPv6 relay messages |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv6 dhcp6 relay link-address <i>string</i> |
| Tree | link-address |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

server *string*

| | |
|----------|--|
| Synopsis | DHCP6 server(s) to which the DHCP6 requests are forwarded |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv6 dhcp6 relay server <i>string</i> |

| | |
|----------------|---|
| Tree | server |
| Max. Instances | 8 |
| Notes | This element is ordered by the user. |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

source-address *string*

| | |
|------------|---|
| Synopsis | Source IPv6 address for the DHCPv6 relay messages |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv6 dhcp6 relay source-address <i>string</i> |
| Tree | source-address |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

snooping

| | |
|------------|---|
| Synopsis | Enter the snooping context |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv6 dhcp6 snooping |
| Tree | snooping |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s |

admin-state *keyword*

| | |
|------------|--|
| Synopsis | Administrative state of DHCPv6 snooping |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv6 dhcp6 snooping admin-state <i>keyword</i> |
| Tree | admin-state |
| Default | disable |
| Options | enable, disable |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s |

user-db *reference*

| | |
|------------|---|
| Synopsis | Local user database for authentication |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv6 dhcp6 user-db <i>reference</i> |
| Tree | user-db |
| Reference | configure subscriber-mgmt local-user-db <i>string</i> |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

user-ident *keyword*

| | |
|------------|--|
| Synopsis | DHCP6 user identification for this interface |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv6 dhcp6 user-ident <i>keyword</i> |
| Tree | user-ident |
| Default | mac |
| Options | mac, mac-interface-id |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

ipoe-bridged-mode *boolean*

| | |
|------------|---|
| Synopsis | Enable IPv6 IPoE bridged mode |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv6 ipoe-bridged-mode <i>boolean</i> |
| Tree | ipoe-bridged-mode |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

neighbor-discovery

| | |
|----------|---|
| Synopsis | Enter the neighbor-discovery context |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv6 neighbor-discovery |
| Tree | neighbor-discovery |

Introduced 16.0.R1
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

dad-snooping *boolean*

Synopsis Populate table via duplicate address detection packets
 Context **configure** **service** **ies** *string* **subscriber-interface** *string* **group-interface** *string* **ipv6**
neighbor-discovery **dad-snooping** *boolean*
 Tree **dad-snooping**
 Default false
 Introduced 16.0.R1
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

neighbor-limit *number*

Synopsis Maximum number of neighbor entries learned per SLAAC host
 Context **configure** **service** **ies** *string* **subscriber-interface** *string* **group-interface** *string* **ipv6**
neighbor-discovery **neighbor-limit** *number*
 Tree **neighbor-limit**
 Range 1 to 8
 Default 1
 Introduced 16.0.R1
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

qos-route-lookup *keyword*

Synopsis QoS route lookup
 Context **configure** **service** **ies** *string* **subscriber-interface** *string* **group-interface** *string* **ipv6** **qos-**
route-lookup *keyword*
 Tree **qos-route-lookup**
 Options destination
 Introduced 16.0.R1
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s

router-advertisements

| | |
|------------|---|
| Synopsis | Enter the router-advertisements context |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv6 router-advertisements |
| Tree | router-advertisements |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

admin-state *keyword*

| | |
|------------|--|
| Synopsis | Administrative state of router advertisements |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv6 router-advertisements admin-state <i>keyword</i> |
| Tree | admin-state |
| Default | disable |
| Options | enable, disable |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

force-mcast *keyword*

| | |
|------------|--|
| Synopsis | Protocol with forced multicast |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv6 router-advertisements force-mcast <i>keyword</i> |
| Tree | force-mcast |
| Options | ip, ip-mac |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

max-advertisement-interval *number*

| | |
|----------|--|
| Synopsis | Maximum advertisement interval |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv6 router-advertisements max-advertisement-interval <i>number</i> |
| Tree | max-advertisement-interval |
| Range | 900 to 1800 |

| | |
|------------|---|
| Default | 1800 |
| Units | seconds |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

min-advertisement-interval *number*

| | |
|------------|--|
| Synopsis | Minimum advertisement interval |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv6 router-advertisements min-advertisement-interval <i>number</i> |
| Tree | min-advertisement-interval |
| Range | 900 to 1350 |
| Default | 900 |
| Units | seconds |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

options

| | |
|------------|---|
| Synopsis | Enter the options context |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv6 router-advertisements options |
| Tree | options |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

current-hop-limit *number*

| | |
|------------|--|
| Synopsis | Hop limit to be advertised |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv6 router-advertisements options current-hop-limit <i>number</i> |
| Tree | current-hop-limit |
| Range | 0 to 255 |
| Default | 64 |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

dns

| | |
|------------|---|
| Synopsis | Enter the dns context |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv6 router-advertisements options dns |
| Tree | dns |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

include-rdnss *boolean*

| | |
|------------|--|
| Synopsis | Include the RDNSS server option 25 |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv6 router-advertisements options dns include-rdnss <i>boolean</i> |
| Tree | include-rdnss |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

rdnss-lifetime (*number* | *keyword*)

| | |
|------------|---|
| Synopsis | Maximum time for the RDNSS address to remain valid |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv6 router-advertisements options dns rdnss-lifetime (<i>number</i> <i>keyword</i>) |
| Tree | rdnss-lifetime |
| Range | 900 to 3600 |
| Default | 3600 |
| Units | seconds |
| Options | infinite |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

managed-configuration *boolean*

| | |
|----------|------------------------------------|
| Synopsis | Managed address configuration flag |
|----------|------------------------------------|

| | |
|------------|--|
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv6 router-advertisements options managed-configuration <i>boolean</i> |
| Tree | managed-configuration |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

mtu (*number* | *keyword*)

| | |
|------------|--|
| Synopsis | Advertised MTU value |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv6 router-advertisements options mtu (<i>number</i> <i>keyword</i>) |
| Tree | mtu |
| Range | 1280 to 9212 |
| Default | not-included |
| Units | bytes |
| Options | not-included |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

other-stateful-configuration *boolean*

| | |
|------------|---|
| Synopsis | Other stateful configuration flag |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv6 router-advertisements options other-stateful-configuration <i>boolean</i> |
| Tree | other-stateful-configuration |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

reachable-time *number*

| | |
|----------|--|
| Synopsis | Neighbor discovery reachable time that is advertised for this group interface |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv6 router-advertisements options reachable-time <i>number</i> |
| Tree | reachable-time |

| | |
|------------|---|
| Range | 0 to 3600000 |
| Default | 0 |
| Units | milliseconds |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

retransmit-timer *number*

| | |
|------------|---|
| Synopsis | Neighbor discovery retransmit timer that is advertised for this group interface |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv6 router-advertisements options retransmit-timer <i>number</i> |
| Tree | retransmit-timer |
| Range | 0 to 1800000 |
| Default | 0 |
| Units | seconds |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

router-lifetime (*number* | *keyword*)

| | |
|------------|---|
| Synopsis | Router lifetime |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv6 router-advertisements options router-lifetime (<i>number</i> <i>keyword</i>) |
| Tree | router-lifetime |
| Range | 2700 to 9000 |
| Default | 4500 |
| Units | seconds |
| Options | no-default-router |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

prefix-options

| | |
|----------|--|
| Synopsis | Enter the prefix-options context |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv6 router-advertisements prefix-options |

| | |
|------------|---|
| Tree | prefix-options |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

autonomous *boolean*

| | |
|------------|---|
| Synopsis | Value of the autonomous flag |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv6 router-advertisements prefix-options autonomous <i>boolean</i> |
| Tree | autonomous |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

on-link *boolean*

| | |
|------------|--|
| Synopsis | Assign the prefix to an interface on the specified link |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv6 router-advertisements prefix-options on-link <i>boolean</i> |
| Tree | on-link |
| Default | true |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

preferred-lifetime (*number* | *keyword*)

| | |
|------------|---|
| Synopsis | Time for a prefix to remain preferred |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv6 router-advertisements prefix-options preferred-lifetime (<i>number</i> <i>keyword</i>) |
| Tree | preferred-lifetime |
| Range | 0 to 4294967294 |
| Default | 3600 |
| Units | seconds |
| Options | infinite |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

valid-lifetime (*number* | *keyword*)

| | |
|------------|---|
| Synopsis | Time for a prefix to remain valid |
| Context | configure <i>service</i> <i>ies</i> <i>string</i> <i>subscriber-interface</i> <i>string</i> <i>group-interface</i> <i>string</i> <i>ipv6</i> <i>router-advertisements</i> <i>prefix-options</i> <i>valid-lifetime</i> (<i>number</i> <i>keyword</i>) |
| Tree | valid-lifetime |
| Range | 0 to 4294967294 |
| Default | 86400 |
| Units | seconds |
| Options | infinite |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

router-solicit

| | |
|------------|---|
| Synopsis | Enter the router-solicit context |
| Context | configure <i>service</i> <i>ies</i> <i>string</i> <i>subscriber-interface</i> <i>string</i> <i>group-interface</i> <i>string</i> <i>ipv6</i> <i>router-solicit</i> |
| Tree | router-solicit |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

admin-state *keyword*

| | |
|------------|---|
| Synopsis | Administrative state of router-solicit based authentication |
| Context | configure <i>service</i> <i>ies</i> <i>string</i> <i>subscriber-interface</i> <i>string</i> <i>group-interface</i> <i>string</i> <i>ipv6</i> <i>router-solicit</i> <i>admin-state</i> <i>keyword</i> |
| Tree | admin-state |
| Default | disable |
| Options | enable, disable |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

inactivity-timer (*number* | *keyword*)

| | |
|----------|---|
| Synopsis | Time before an inactive host is removed |
|----------|---|

| | |
|------------|--|
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv6 router-solicit inactivity-timer (<i>number</i> <i>keyword</i>) |
| Tree | inactivity-timer |
| Range | 1 to 31536000 |
| Default | 300 |
| Units | seconds |
| Options | infinite |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

min-auth-interval *number*

| | |
|------------|--|
| Synopsis | Minimum interval between two consecutive authentication attempts for the same host |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv6 router-solicit min-auth-interval <i>number</i> |
| Tree | min-auth-interval |
| Range | 1 to 360000 |
| Default | 300 |
| Units | seconds |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

user-db *reference*

| | |
|------------|---|
| Synopsis | Local user-database that is used for router solicit based authentication |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv6 router-solicit user-db <i>reference</i> |
| Tree | user-db |
| Reference | configure subscriber-mgmt local-user-db <i>string</i> |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

urpf-check

| | |
|----------|--------------------------------------|
| Synopsis | Enable the urpf-check context |
|----------|--------------------------------------|

| | |
|------------|--|
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv6 urpf-check |
| Tree | urpf-check |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

mode *keyword*

| | |
|------------|--|
| Synopsis | Unicast RPF check mode |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> ipv6 urpf-check mode <i>keyword</i> |
| Tree | mode |
| Default | strict |
| Options | strict, loose, strict-no-ecmp |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

local-address-assignment

| | |
|------------|---|
| Synopsis | Enter the local-address-assignment context |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> local-address-assignment |
| Tree | local-address-assignment |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

admin-state *keyword*

| | |
|------------|--|
| Synopsis | Administrative state of Local Address Assignment |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> local-address-assignment admin-state <i>keyword</i> |
| Tree | admin-state |
| Default | disable |
| Options | enable, disable |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

ipv4

| | |
|------------|---|
| Synopsis | Enter the ipv4 context |
| Context | configure service ies <i>string</i> <i>subscriber-interface</i> <i>string</i> <i>group-interface</i> <i>string</i> <i>local-address-assignment</i> ipv4 |
| Tree | ipv4 |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

client-applications

| | |
|------------|--|
| Synopsis | Enter the client-applications context |
| Context | configure service ies <i>string</i> <i>subscriber-interface</i> <i>string</i> <i>group-interface</i> <i>string</i> <i>local-address-assignment</i> ipv4 client-applications |
| Tree | client-applications |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

ipoe *boolean*

| | |
|------------|---|
| Synopsis | Request local addresses for non-DHCP/managed IPoE hosts |
| Context | configure service ies <i>string</i> <i>subscriber-interface</i> <i>string</i> <i>group-interface</i> <i>string</i> <i>local-address-assignment</i> ipv4 client-applications ipoe <i>boolean</i> |
| Tree | ipoe |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

ppp *boolean*

| | |
|------------|--|
| Synopsis | Request local addresses for PPP IPCP hosts |
| Context | configure service ies <i>string</i> <i>subscriber-interface</i> <i>string</i> <i>group-interface</i> <i>string</i> <i>local-address-assignment</i> ipv4 client-applications ppp <i>boolean</i> |
| Tree | ppp |
| Default | false |
| Introduced | 16.0.R1 |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

default-pool *string*

Synopsis Default pools

Context **configure** *service ies string subscriber-interface string group-interface string local-address-assignment ipv4 default-pool string*

Tree [default-pool](#)

String Length 1 to 32

Max. Instances 2

Notes This element is ordered by the user.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

server *reference*

Synopsis Local DHCP server that contains pools for local address assignment

Context **configure** *service ies string subscriber-interface string group-interface string local-address-assignment ipv4 server reference*

Tree [server](#)

Reference **configure** *router string dhcp-server dhcpv4 string*

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

ipv6

Synopsis Enter the **ipv6** context

Context **configure** *service ies string subscriber-interface string group-interface string local-address-assignment ipv6*

Tree [ipv6](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

client-applications

| | |
|------------|--|
| Synopsis | Enter the client-applications context |
| Context | configure service ies string subscriber-interface string group-interface string local-address-assignment ipv6 client-applications |
| Tree | client-applications |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

ipoe-slaac *boolean*

| | |
|------------|--|
| Synopsis | Request local addresses for IPoE SLAAC hosts |
| Context | configure service ies string subscriber-interface string group-interface string local-address-assignment ipv6 client-applications ipoe-slaac <i>boolean</i> |
| Tree | ipoe-slaac |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

ipoe-wan *boolean*

| | |
|------------|--|
| Synopsis | Request local addresses for IPoE IA NA hosts |
| Context | configure service ies string subscriber-interface string group-interface string local-address-assignment ipv6 client-applications ipoe-wan <i>boolean</i> |
| Tree | ipoe-wan |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

ppp-slaac *boolean*

| | |
|------------|---|
| Synopsis | Request local addresses for PPP SLAAC hosts |
| Context | configure service ies string subscriber-interface string group-interface string local-address-assignment ipv6 client-applications ppp-slaac <i>boolean</i> |
| Tree | ppp-slaac |
| Default | false |
| Introduced | 16.0.R1 |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

server reference

Synopsis Local DHCPv6 server that contains pools for local address assignment

Context **configure** [service ies](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [local-address-assignment ipv6 server](#) *reference*

Tree [server](#)

Reference **configure** [router](#) *string* [dhcp-server dhcpv6](#) *string*

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

mac string

Synopsis MAC address for the interface

Context **configure** [service ies](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [mac](#) *string*

Tree [mac](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

nasreq-auth-policy reference

Synopsis Diameter NASREQ application policy to use for authentication

Context **configure** [service ies](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [nasreq-auth-policy](#) *reference*

Tree [nasreq-auth-policy](#)

Reference **configure** [subscriber-mgmt](#) [diameter-nasreq-policy](#) *string*

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

oper-up-while-empty boolean

Synopsis Enable this group interface without any active SAPs

Context **configure** [service ies](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [oper-up-while-empty](#) *boolean*

Tree [oper-up-while-empty](#)

| | |
|------------|---|
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

pppoe

| | |
|------------|--|
| Synopsis | Enter the pppoe context |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> pppoe |
| Tree | pppoe |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

admin-state *keyword*

| | |
|------------|---|
| Synopsis | Administrative state of PPPoE |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> pppoe admin-state <i>keyword</i> |
| Tree | admin-state |
| Default | disable |
| Options | enable, disable |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

anti-spoof *keyword*

| | |
|------------|--|
| Synopsis | PPPoE anti-spoof filtering |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> pppoe anti-spoof <i>keyword</i> |
| Tree | anti-spoof |
| Default | mac-sid |
| Options | mac-sid, mac-sid-ip |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

description *string*

| | |
|---------------|---|
| Synopsis | Text description |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> pppoe description <i>string</i> |
| Tree | description |
| String Length | 1 to 80 |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

dhcp-client

| | |
|------------|---|
| Synopsis | Enter the dhcp-client context |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> pppoe dhcp-client |
| Tree | dhcp-client |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

client-id *keyword*

| | |
|------------|--|
| Synopsis | Type of information that DHCP option 61 contains |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> pppoe dhcp-client client-id <i>keyword</i> |
| Tree | client-id |
| Options | mac-pppoe-session-id |
| Introduced | 16.0.R7 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

policy *reference*

| | |
|------------|---|
| Synopsis | PPPoE policy |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> pppoe policy <i>reference</i> |
| Tree | policy |
| Reference | configure subscriber-mgmt ppp-policy <i>string</i> |
| Introduced | 16.0.R1 |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

python-policy *reference*

Synopsis Python policy used to modify PPPoE packets

Context **configure** [service](#) [ies](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [pppoe](#) [python-policy](#) *reference*

Tree [python-policy](#)

Reference **configure** [python](#) [python-policy](#) *string*

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

sap-session-limit *number*

Synopsis Maximum PPPoE sessions per SAP

Context **configure** [service](#) [ies](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [pppoe](#) [sap-session-limit](#) *number*

Tree [sap-session-limit](#)

Range 1 to 131071

Default 1

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

session-limit *number*

Synopsis Maximum PPPoE sessions

Context **configure** [service](#) [ies](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [pppoe](#) [session-limit](#) *number*

Tree [session-limit](#)

Range 1 to 333823

Default 1

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

user-db *reference*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|------------|--|
| Synopsis | Local user database for authentication |

| Synopsis | Redundant interface |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> redundant-interface <i>reference</i> |
| Tree | redundant-interface |
| Reference | configure service ies <i>string</i> redundant-interface <i>string</i> |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

sap [[sap-id](#)] *string*

| | |
|----------|------------------------------------|
| Synopsis | Enter the sap list instance |
|----------|------------------------------------|

| | |
|------------|---|
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> sap <i>string</i> |
| Tree | sap |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

[sap-id] *string*

| | |
|---------------|---|
| Synopsis | SAP ID |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> sap <i>string</i> |
| Tree | sap |
| String Length | 1 to 45 |
| Notes | This element is part of a list key. |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

accounting-policy *reference*

| | |
|------------|--|
| Synopsis | Accounting policy |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> sap <i>string</i> accounting-policy <i>reference</i> |
| Tree | accounting-policy |
| Reference | configure log accounting-policy <i>number</i> |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

admin-state *keyword*

| | |
|------------|--|
| Synopsis | Administrative state of the SAP |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> sap <i>string</i> admin-state <i>keyword</i> |
| Tree | admin-state |
| Default | enable |
| Options | enable, disable |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

anti-spoof *keyword*

| | |
|------------|--|
| Synopsis | Type of anti-spoof filtering |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> sap <i>string</i> anti-spoof <i>keyword</i> |
| Tree | anti-spoof |
| Options | source-ip-addr, source-ip-and-mac-addr, next-hop-ip-and-mac-addr |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

app-profile *reference*

| | |
|------------|---|
| Synopsis | Application profile name |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> sap <i>string</i> app-profile <i>reference</i> |
| Tree | app-profile |
| Reference | configure application-assurance group <i>number</i> partition <i>number</i> policy app-profile <i>string</i> |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

calling-station-id *string*

| | |
|---------------|---|
| Synopsis | Calling station ID |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> sap <i>string</i> calling-station-id <i>string</i> |

| Tree | rx-eth-vsm-grace |
| Description | When configured to true , the router enables the Nokia Grace function, which is a vendor-specific PDU that informs MEP peers that the local node may be entering a period of expected defect.

When configured to false , the router disables the Nokia Grace function. |
| Default | true |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s |

tx-eth-vsm-grace *boolean*

| | |
|-------------|---|
| Synopsis | Transmit ETH-ED PDUs from the MEP |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> sap <i>string</i> eth-cfm mep md-admin-name <i>reference</i> ma-admin-name <i>reference</i> mep-id <i>number</i> grace eth-vsm-grace tx-eth-vsm-grace <i>boolean</i> |
| Tree | tx-eth-vsm-grace |
| Description | When configured to true , the router can transmit the Nokia ETH-CFM Grace PDU from the MEP when a system soft reset notification is received for one or more cards. |

The Nokia Grace function is a vendor-specific PDU that informs MEP peers that the local node may be entering a period of expected defect.

The operator must configure the **configure system eth-cfm grace** command to instruct the system that the node is capable of transmitting expected-defect windows to peers. The system can only transmit one form of ETH-CFM grace (Nokia ETH-CFM Grace or ITU-T Y.1731 ETH-ED).

When configured to **false**, the router disables the transmission of the Nokia ETH-CFM Grace PDU from the MEP.

| | |
|------------|--|
| Default | true |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s |

squelch-ingress-levels *number*

| | |
|----------------|---|
| Synopsis | Levels for which ETH-CFM packets are silently discarded |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> sap <i>string</i> eth-cfm squelch-ingress-levels <i>number</i> |
| Tree | squelch-ingress-levels |
| Description | This command defines the levels of the ETH-CFM packets that are silently discarded on ingress into the SAP or SDP binding from the wire that matches the service delineation of the SAP or SDP binding. All ETH-CFM packets inbound to the SAP or SDP binding that match the configured levels are dropped without regard for any other ETH-CFM criteria. No statistical information or drop count is available for any ETH-CFM packet that is silently discarded by this option.

The list of levels must be a complete contiguous list from 0 up to the highest level that will be dropped. |
| Range | 0 to 7 |
| Max. Instances | 8 |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s |

 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

policy-name *reference*

Synopsis Policy ID
 Context **configure** [service](#) [ies](#) [string](#) [subscriber-interface](#) [string](#) [group-interface](#) [string](#) [sap](#) [string](#) [ingress](#) [qos](#) [sap-ingress](#) [policy-name](#) [reference](#)

| | |
|------------|---|
| Tree | policy-name |
| Reference | configure qos sap-ingress <i>string</i> |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

queuing-type *keyword*

| | |
|------------|---|
| Synopsis | Queuing type |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> sap <i>string</i> ingress qos sap-ingress queuing-type <i>keyword</i> |
| Tree | queuing-type |
| Options | shared, multipoint-shared |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR-7/12/12e, 7750 SR-a, 7750 SR-e, VSR |

scheduler-policy

| | |
|------------|--|
| Synopsis | Enter the scheduler-policy context |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> sap <i>string</i> ingress qos scheduler-policy |
| Tree | scheduler-policy |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

policy-name *reference*

| | |
|------------|---|
| Synopsis | Scheduler policy name |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> sap <i>string</i> ingress qos scheduler-policy policy-name <i>reference</i> |
| Tree | policy-name |
| Reference | configure qos scheduler-policy <i>string</i> |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

lag

| | |
|------------|---|
| Synopsis | Enter the lag context |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> sap <i>string</i> lag |
| Tree | lag |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

link-map-profile *number*

| | |
|-------------|---|
| Synopsis | LAG link map profile for a SAP or network interface |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> sap <i>string</i> lag link-map-profile <i>number</i> |
| Tree | link-map-profile |
| Description | <p>This command assigns a preconfigured LAG link map profile to a SAP or network interface configured on a LAG or a PW port that exists on a LAG. After an operator assigns a LAG link map profile, the system rehashes the SAP or network interface egress traffic over the LAG as required by the new configuration.</p> <p>If the LAG link map profile for a SAP or network interface is deleted, the system reverts back to per-flow hashing.</p> |
| Range | 1 to 64 |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

per-link-hash

| | |
|------------|--|
| Synopsis | Enter the per-link-hash context |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> sap <i>string</i> lag per-link-hash |
| Tree | per-link-hash |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

class *number*

| | |
|----------|---|
| Synopsis | Class used on LAG egress using weighted per-link-hash |
|----------|---|

| | |
|------------|---|
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> sap <i>string</i> lag per-link-hash class <i>number</i> |
| Tree | class |
| Range | 1 to 3 |
| Default | 1 |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

weight *number*

| | |
|------------|--|
| Synopsis | Weight used on LAG egress using weighted per-link-hash |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> sap <i>string</i> lag per-link-hash weight <i>number</i> |
| Tree | weight |
| Range | 1 to 1024 |
| Default | 1 |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

monitor-oper-group *reference*

| | |
|------------|---|
| Synopsis | Monitor operational group |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> sap <i>string</i> monitor-oper-group <i>reference</i> |
| Tree | monitor-oper-group |
| Reference | configure service oper-group <i>string</i> |
| Notes | The following elements are part of a choice: monitor-oper-group or oper-group . |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

multi-service-site *reference*

| | |
|----------|---|
| Synopsis | Multi service site name |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> sap <i>string</i> multi-service-site <i>reference</i> |
| Tree | multi-service-site |

| | |
|------------|---|
| Reference | configure service customer <i>string</i> multi-service-site <i>string</i> |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

oper-group *reference*

| | |
|------------|---|
| Synopsis | Operational group |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> sap <i>string</i> oper-group <i>reference</i> |
| Tree | oper-group |
| Reference | configure service oper-group <i>string</i> |
| Notes | The following elements are part of a choice: monitor-oper-group or oper-group . |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

static-host

| | |
|------------|---|
| Synopsis | Enter the static-host context |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> sap <i>string</i> static-host |
| Tree | static-host |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

ipv4 [**ip**] *string* **mac** *string*

| | |
|------------|---|
| Synopsis | Enter the ipv4 list instance |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> sap <i>string</i> static-host ipv4 <i>string</i> mac <i>string</i> |
| Tree | ipv4 |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

[ip] *string*

| | |
|----------|--------------------------------------|
| Synopsis | IPv4 address used by the static host |
|----------|--------------------------------------|

| | |
|------------|---|
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> sap <i>string</i> static-host ipv4 <i>string</i> mac <i>string</i> |
| Tree | ipv4 |
| Notes | This element is part of a list key. |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

mac *string*

| | |
|------------|---|
| Synopsis | MAC address used by the static host |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> sap <i>string</i> static-host ipv4 <i>string</i> mac <i>string</i> |
| Tree | ipv4 |
| Notes | This element is part of a list key. |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

admin-state *keyword*

| | |
|------------|---|
| Synopsis | Administrative state of the static host |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> sap <i>string</i> static-host ipv4 <i>string</i> mac <i>string</i> admin-state <i>keyword</i> |
| Tree | admin-state |
| Default | disable |
| Options | enable, disable |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

ancp-string *string*

| | |
|---------------|--|
| Synopsis | ANCP string |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> sap <i>string</i> static-host ipv4 <i>string</i> mac <i>string</i> ancp-string <i>string</i> |
| Tree | ancp-string |
| String Length | 1 to 63 |
| Introduced | 16.0.R1 |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

app-profile

Synopsis Enter the **app-profile** context

Context **configure** [service](#) [ies](#) [string](#) [subscriber-interface](#) [string](#) [group-interface](#) [string](#) [sap](#) [string](#) [static-host](#) [ipv4](#) [string](#) [mac](#) [string](#) **app-profile**

Tree [app-profile](#)

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

profile *reference*

Synopsis Application profile used by the static host

Context **configure** [service](#) [ies](#) [string](#) [subscriber-interface](#) [string](#) [group-interface](#) [string](#) [sap](#) [string](#) [static-host](#) [ipv4](#) [string](#) [mac](#) [string](#) **app-profile** [profile](#) *reference*

Tree [profile](#)

Reference **configure** [application-assurance](#) [group](#) [number](#) [partition](#) [number](#) [policy](#) [app-profile](#) [string](#)

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

scope *keyword*

Synopsis Scope of the static host application profile

Context **configure** [service](#) [ies](#) [string](#) [subscriber-interface](#) [string](#) [group-interface](#) [string](#) [sap](#) [string](#) [static-host](#) [ipv4](#) [string](#) [mac](#) [string](#) **app-profile** [scope](#) *keyword*

Tree [scope](#)

Default subscriber

Options subscriber, mac

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

int-dest-id *string*

Synopsis Intermediate destination ID

| | |
|---------------|--|
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> sap <i>string</i> static-host ipv4 <i>string</i> mac <i>string</i> int-dest-id <i>string</i> |
| Tree | int-dest-id |
| String Length | 1 to 32 |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

managed-route [**prefix**] *string*

| | |
|-------------|--|
| Synopsis | Enter the managed-route list instance |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> sap <i>string</i> static-host ipv4 <i>string</i> mac <i>string</i> managed-route <i>string</i> |
| Tree | managed-route |
| Description | Commands in this context configure managed route parameters. |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

[prefix] *string*

| | |
|------------|--|
| Synopsis | Managed route prefix associated with IPv4 static host |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> sap <i>string</i> static-host ipv4 <i>string</i> mac <i>string</i> managed-route <i>string</i> |
| Tree | managed-route |
| Notes | This element is part of a list key. |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

cpe-check

| | |
|------------|---|
| Synopsis | Enable the cpe-check context |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> sap <i>string</i> static-host ipv4 <i>string</i> mac <i>string</i> managed-route <i>string</i> cpe-check |
| Tree | cpe-check |
| Introduced | 22.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

destination-ip-address (*ipv4-address-no-zone* | *ipv6-address-no-zone*)**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

| | |
|------------|--|
| Synopsis | IP address of the target CPE device |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> sap <i>string</i> static-host ipv4 <i>string</i> mac <i>string</i> managed-route <i>string</i> cpe-check destination-ip-address (<i>ipv4-address-no-zone</i> <i>ipv6-address-no-zone</i>) |
| Tree | destination-ip-address |
| Introduced | 22.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

drop-count *number*

| | |
|------------|--|
| Synopsis | Consecutive ping replies missed before CPE deemed down |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> sap <i>string</i> static-host ipv4 <i>string</i> mac <i>string</i> managed-route <i>string</i> cpe-check drop-count <i>number</i> |
| Tree | drop-count |
| Range | 1 to 255 |
| Default | 3 |
| Introduced | 22.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

failed-action

| | |
|------------|---|
| Synopsis | Enter the failed-action context |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> sap <i>string</i> static-host ipv4 <i>string</i> mac <i>string</i> managed-route <i>string</i> cpe-check failed-action |
| Tree | failed-action |
| Introduced | 22.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

metric *number*

| | |
|----------|--|
| Synopsis | Metric associated with the provisioned managed route |
|----------|--|

| | |
|------------|--|
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> sap <i>string</i> static-host ipv4 <i>string</i> mac <i>string</i> managed-route <i>string</i> cpe-check failed-action metric <i>number</i> |
| Tree | metric |
| Max. Range | 0 to 4294967295 |
| Default | 0 |
| Notes | The following elements are part of a choice: (metric , preference , and tag) or withdraw . |
| Introduced | 22.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

preference *number*

| | |
|------------|--|
| Synopsis | Preference associated to the provisioned managed route |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> sap <i>string</i> static-host ipv4 <i>string</i> mac <i>string</i> managed-route <i>string</i> cpe-check failed-action preference <i>number</i> |
| Tree | preference |
| Range | 0 to 255 |
| Notes | The following elements are part of a choice: (metric , preference , and tag) or withdraw . |
| Introduced | 22.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

tag *number*

| | |
|------------|---|
| Synopsis | Route tag used if CPE check fails |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> sap <i>string</i> static-host ipv4 <i>string</i> mac <i>string</i> managed-route <i>string</i> cpe-check failed-action tag <i>number</i> |
| Tree | tag |
| Max. Range | 0 to 4294967295 |
| Default | 0 |
| Notes | The following elements are part of a choice: (metric , preference , and tag) or withdraw . |
| Introduced | 22.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

withdraw *boolean*

| | |
|------------|--|
| Synopsis | Withdraw the route when the CPE check fails |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> sap <i>string</i> static-host ipv4 <i>string</i> mac <i>string</i> managed-route <i>string</i> cpe-check failed-action withdraw <i>boolean</i> |
| Tree | withdraw |
| Default | false |
| Notes | The following elements are part of a choice: (metric , preference , and tag) or withdraw . |
| Introduced | 22.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

interval *number*

| | |
|------------|---|
| Synopsis | Interval between ICMP pings to the target CPE IP address |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> sap <i>string</i> static-host ipv4 <i>string</i> mac <i>string</i> managed-route <i>string</i> cpe-check interval <i>number</i> |
| Tree | interval |
| Range | 1 to 255 |
| Default | 1 |
| Units | seconds |
| Introduced | 22.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

log *boolean*

| | |
|------------|---|
| Synopsis | Log CPE connectivity checks transitions |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> sap <i>string</i> static-host ipv4 <i>string</i> mac <i>string</i> managed-route <i>string</i> cpe-check log <i>boolean</i> |
| Tree | log |
| Default | false |
| Introduced | 22.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

padding-size *number*

| | |
|----------|--|
| Synopsis | Padding size for CPE connectivity checks |
|----------|--|

| | |
|------------|--|
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> sap <i>string</i> static-host ipv4 <i>string</i> mac <i>string</i> managed-route <i>string</i> cpe-check padding-size <i>number</i> |
| Tree | padding-size |
| Range | 0 to 16384 |
| Default | 56 |
| Units | bytes |
| Introduced | 22.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

source-ip-address (*ipv4-address-no-zone | ipv6-address-no-zone*)

| | |
|------------|--|
| Synopsis | Source IP address used in the ICMP messages |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> sap <i>string</i> static-host ipv4 <i>string</i> mac <i>string</i> managed-route <i>string</i> cpe-check source-ip-address (<i>ipv4-address-no-zone ipv6-address-no-zone</i>) |
| Tree | source-ip-address |
| Introduced | 22.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

timeout *number*

| | |
|------------|---|
| Synopsis | Time interval determining that a ping is missed |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> sap <i>string</i> static-host ipv4 <i>string</i> mac <i>string</i> managed-route <i>string</i> cpe-check timeout <i>number</i> |
| Tree | timeout |
| Range | 1 to 10 |
| Default | 1 |
| Units | seconds |
| Introduced | 22.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

metric *number*

| | |
|----------|--|
| Synopsis | Metric associated with the provisioned managed route |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> sap <i>string</i> static-host ipv4 <i>string</i> mac <i>string</i> managed-route <i>string</i> metric <i>number</i> |
| Tree | metric |

| | |
|-------------|---|
| Description | This command configures a metric to associate with the provisioned managed route. |
| Max. Range | 0 to 4294967295 |
| Default | 0 |
| Introduced | 22.2.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

preference *number*

| | |
|-------------|---|
| Synopsis | Preference associated to the provisioned managed route |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> sap <i>string</i> static-host ipv4 <i>string</i> mac <i>string</i> managed-route <i>string</i> preference <i>number</i> |
| Tree | preference |
| Description | This command configures the preference associated with the provisioned managed route. |
| Range | 0 to 255 |
| Default | 0 |
| Introduced | 22.2.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

tag *number*

| | |
|------------|--|
| Synopsis | Route tag used if CPE check fails |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> sap <i>string</i> static-host ipv4 <i>string</i> mac <i>string</i> managed-route <i>string</i> tag <i>number</i> |
| Tree | tag |
| Max. Range | 0 to 4294967295 |
| Default | 0 |
| Introduced | 22.2.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

rip-policy *reference*

| | |
|----------|--|
| Synopsis | RIP policy name |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> sap <i>string</i> static-host ipv4 <i>string</i> mac <i>string</i> rip-policy <i>reference</i> |
| Tree | rip-policy |

| | |
|------------|---|
| Reference | configure subscriber-mgmt rip-policy <i>string</i> |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

shcv

| | |
|------------|--|
| Synopsis | Enter the shcv context |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> sap <i>string</i> static-host ipv4 <i>string</i> mac <i>string</i> shcv |
| Tree | shcv |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

sla-profile *reference*

| | |
|------------|---|
| Synopsis | SLA profile name |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> sap <i>string</i> static-host ipv4 <i>string</i> mac <i>string</i> sla-profile <i>reference</i> |
| Tree | sla-profile |
| Reference | configure subscriber-mgmt sla-profile <i>string</i> |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

sub-profile *reference*

| | |
|------------|---|
| Synopsis | Sub-profile name |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> sap <i>string</i> static-host ipv4 <i>string</i> mac <i>string</i> sub-profile <i>reference</i> |
| Tree | sub-profile |
| Reference | configure subscriber-mgmt sub-profile <i>string</i> |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

subscriber-id

| | |
|----------|--|
| Synopsis | Enter the subscriber-id context |
|----------|--|

| | |
|------------|---|
| Context | configure service ies <i>string subscriber-interface string group-interface string sap string static-host ipv4 string mac string subscriber-id</i> |
| Tree | <i>subscriber-id</i> |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

string *string*

| | |
|---------------|---|
| Synopsis | Subscriber identification |
| Context | configure service ies <i>string subscriber-interface string group-interface string sap string static-host ipv4 string mac string subscriber-id string string</i> |
| Tree | <i>string</i> |
| String Length | 1 to 64 |
| Notes | The following elements are part of a choice: string or use-sap-id . |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

use-sap-id

| | |
|------------|--|
| Synopsis | Use the SAP id as subscriber ID |
| Context | configure service ies <i>string subscriber-interface string group-interface string sap string static-host ipv4 string mac string subscriber-id use-sap-id</i> |
| Tree | <i>use-sap-id</i> |
| Notes | The following elements are part of a choice: string or use-sap-id . |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

ipv6 [*prefix*] *string mac string*

| | |
|------------|---|
| Synopsis | Enter the ipv6 list instance |
| Context | configure service ies <i>string subscriber-interface string group-interface string sap string static-host ipv6 string mac string</i> |
| Tree | <i>ipv6</i> |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

[prefix] string

| | |
|------------|--|
| Synopsis | IPv6 prefix |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> sap <i>string</i> static-host ipv6 <i>string</i> mac <i>string</i> |
| Tree | ipv6 |
| Notes | This element is part of a list key. |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

mac string

| | |
|------------|--|
| Synopsis | MAC address |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> sap <i>string</i> static-host ipv6 <i>string</i> mac <i>string</i> |
| Tree | ipv6 |
| Notes | This element is part of a list key. |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

admin-state keyword

| | |
|------------|--|
| Synopsis | Administrative state of the static host |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> sap <i>string</i> static-host ipv6 <i>string</i> mac <i>string</i> admin-state <i>keyword</i> |
| Tree | admin-state |
| Default | disable |
| Options | enable, disable |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

anccp-string string

| | |
|----------|--|
| Synopsis | ANCP string |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> sap <i>string</i> static-host ipv6 <i>string</i> mac <i>string</i> anccp-string <i>string</i> |

| | |
|---------------|---|
| Tree | ancp-string |
| String Length | 1 to 63 |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

app-profile

| | |
|------------|--|
| Synopsis | Enter the app-profile context |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> sap <i>string</i> static-host ipv6 <i>string</i> mac <i>string</i> app-profile |
| Tree | app-profile |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

profile *reference*

| | |
|------------|---|
| Synopsis | Application profile used by the static host |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> sap <i>string</i> static-host ipv6 <i>string</i> mac <i>string</i> app-profile profile <i>reference</i> |
| Tree | profile |
| Reference | configure application-assurance group <i>number</i> partition <i>number</i> policy app-profile <i>string</i> |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

scope *keyword*

| | |
|------------|---|
| Synopsis | Scope of the static host application profile |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> sap <i>string</i> static-host ipv6 <i>string</i> mac <i>string</i> app-profile scope <i>keyword</i> |
| Tree | scope |
| Default | subscriber |
| Options | subscriber, mac |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

int-dest-id *string*

| | |
|---------------|--|
| Synopsis | Intermediate destination ID |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> sap <i>string</i> static-host ipv6 <i>string</i> mac <i>string</i> int-dest-id <i>string</i> |
| Tree | int-dest-id |
| String Length | 1 to 32 |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

mac-linking *string*

| | |
|------------|--|
| Synopsis | IPv6 host associated with the IPv4 host through the learned MAC address |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> sap <i>string</i> static-host ipv6 <i>string</i> mac <i>string</i> mac-linking <i>string</i> |
| Tree | mac-linking |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

managed-route [[ipv6-prefix](#)] *string*

| | |
|-------------|--|
| Synopsis | Enter the managed-route list instance |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> sap <i>string</i> static-host ipv6 <i>string</i> mac <i>string</i> managed-route <i>string</i> |
| Tree | managed-route |
| Description | Commands in this context configure managed route parameters. |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

[[ipv6-prefix](#)] *string*

| | |
|------------|--|
| Synopsis | Managed route prefix associated with IPv6 static host |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> sap <i>string</i> static-host ipv6 <i>string</i> mac <i>string</i> managed-route <i>string</i> |
| Tree | managed-route |
| Notes | This element is part of a list key. |
| Introduced | 16.0.R4 |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

cpe-check

Synopsis Enable the **cpe-check** context

Context **configure** **service** **ies** *string* **subscriber-interface** *string* **group-interface** *string* **sap** *string* **static-host** **ipv6** *string* **mac** *string* **managed-route** *string* **cpe-check**

Tree **cpe-check**

Introduced 22.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

destination-ip-address (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

WARNING:

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis IP address of the target CPE device

Context **configure** **service** **ies** *string* **subscriber-interface** *string* **group-interface** *string* **sap** *string* **static-host** **ipv6** *string* **mac** *string* **managed-route** *string* **cpe-check** **destination-ip-address** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Tree **destination-ip-address**

Introduced 22.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

drop-count *number*

Synopsis Consecutive ping replies missed before CPE deemed down

Context **configure** **service** **ies** *string* **subscriber-interface** *string* **group-interface** *string* **sap** *string* **static-host** **ipv6** *string* **mac** *string* **managed-route** *string* **cpe-check** **drop-count** *number*

Tree **drop-count**

Range 1 to 255

Default 3

Introduced 22.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

failed-action

| | |
|------------|---|
| Synopsis | Enter the failed-action context |
| Context | configure service ies string subscriber-interface string group-interface string sap string static-host ipv6 string mac string managed-route string cpe-check failed-action |
| Tree | failed-action |
| Introduced | 22.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

metric number

| | |
|------------|---|
| Synopsis | Metric associated with the provisioned managed route |
| Context | configure service ies string subscriber-interface string group-interface string sap string static-host ipv6 string mac string managed-route string cpe-check failed-action metric number |
| Tree | metric |
| Max. Range | 0 to 4294967295 |
| Default | 0 |
| Notes | The following elements are part of a choice: (metric , preference , and tag) or withdraw . |
| Introduced | 22.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

preference number

| | |
|------------|---|
| Synopsis | Preference associated to the provisioned managed route |
| Context | configure service ies string subscriber-interface string group-interface string sap string static-host ipv6 string mac string managed-route string cpe-check failed-action preference number |
| Tree | preference |
| Range | 0 to 255 |
| Notes | The following elements are part of a choice: (metric , preference , and tag) or withdraw . |
| Introduced | 22.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

tag number

| | |
|----------|-----------------------------------|
| Synopsis | Route tag used if CPE check fails |
|----------|-----------------------------------|

| | |
|------------|---|
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> sap <i>string</i> static-host ipv6 <i>string</i> mac <i>string</i> managed-route <i>string</i> cpe-check failed-action tag <i>number</i> |
| Tree | tag |
| Max. Range | 0 to 4294967295 |
| Default | 0 |
| Notes | The following elements are part of a choice: (metric , preference , and tag) or withdraw . |
| Introduced | 22.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

withdraw *boolean*

| | |
|------------|---|
| Synopsis | Withdraw the route when the CPE check fails |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> sap <i>string</i> static-host ipv6 <i>string</i> mac <i>string</i> managed-route <i>string</i> cpe-check failed-action withdraw <i>boolean</i> |
| Tree | withdraw |
| Default | false |
| Notes | The following elements are part of a choice: (metric , preference , and tag) or withdraw . |
| Introduced | 22.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

interval *number*

| | |
|------------|--|
| Synopsis | Interval between ICMP pings to the target CPE IP address |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> sap <i>string</i> static-host ipv6 <i>string</i> mac <i>string</i> managed-route <i>string</i> cpe-check interval <i>number</i> |
| Tree | interval |
| Range | 1 to 255 |
| Default | 1 |
| Units | seconds |
| Introduced | 22.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

log *boolean*

| | |
|------------|---|
| Synopsis | Log CPE connectivity checks transitions |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> sap <i>string</i> static-host ipv6 <i>string</i> mac <i>string</i> managed-route <i>string</i> cpe-check log <i>boolean</i> |
| Tree | log |
| Default | false |
| Introduced | 22.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

padding-size *number*

| | |
|------------|---|
| Synopsis | Padding size for CPE connectivity checks |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> sap <i>string</i> static-host ipv6 <i>string</i> mac <i>string</i> managed-route <i>string</i> cpe-check padding-size <i>number</i> |
| Tree | padding-size |
| Range | 0 to 16384 |
| Default | 56 |
| Units | bytes |
| Introduced | 22.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

source-ip-address (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

| | |
|------------|--|
| Synopsis | Source IP address used in the ICMP messages |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> sap <i>string</i> static-host ipv6 <i>string</i> mac <i>string</i> managed-route <i>string</i> cpe-check source-ip-address (<i>ipv4-address-no-zone</i> <i>ipv6-address-no-zone</i>) |
| Tree | source-ip-address |
| Introduced | 22.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

timeout *number*

| | |
|----------|--|
| Synopsis | Time interval determining that a ping is missed |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> sap <i>string</i> static-host ipv6 <i>string</i> mac <i>string</i> managed-route <i>string</i> cpe-check timeout <i>number</i> |

| | |
|------------|---|
| Tree | timeout |
| Range | 1 to 10 |
| Default | 1 |
| Units | seconds |
| Introduced | 22.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

metric number

| | |
|-------------|---|
| Synopsis | Metric associated with the provisioned managed route |
| Context | configure service ies string subscriber-interface string group-interface string sap string static-host ipv6 string mac string managed-route string metric number |
| Tree | metric |
| Description | This command configures a metric to associate with the provisioned managed route. |
| Max. Range | 0 to 4294967295 |
| Default | 0 |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

preference number

| | |
|-------------|---|
| Synopsis | Preference associated to the provisioned managed route |
| Context | configure service ies string subscriber-interface string group-interface string sap string static-host ipv6 string mac string managed-route string preference number |
| Tree | preference |
| Description | This command configures the preference associated with the provisioned managed route. |
| Range | 0 to 255 |
| Default | 0 |
| Introduced | 22.2.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

tag number

| | |
|----------|-----------------------------------|
| Synopsis | Route tag used if CPE check fails |
|----------|-----------------------------------|

| | |
|------------|---|
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> sap <i>string</i> static-host ipv6 <i>string</i> mac <i>string</i> managed-route <i>string</i> tag <i>number</i> |
| Tree | tag |
| Max. Range | 0 to 4294967295 |
| Default | 0 |
| Introduced | 22.2.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

retail-svc-id *number*

WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|------------|--|
| Synopsis | Retail service ID |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> sap <i>string</i> static-host ipv6 <i>string</i> mac <i>string</i> retail-svc-id <i>number</i> |
| Tree | retail-svc-id |
| Range | 1 to 2147483647 |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

shcv

| | |
|------------|---|
| Synopsis | Enter the shcv context |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> sap <i>string</i> static-host ipv6 <i>string</i> mac <i>string</i> shcv |
| Tree | shcv |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

sla-profile *reference*

| | |
|----------|---|
| Synopsis | SLA profile name |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> sap <i>string</i> static-host ipv6 <i>string</i> mac <i>string</i> sla-profile <i>reference</i> |
| Tree | sla-profile |

| | |
|------------|--|
| Reference | configure subscriber-mgmt sla-profile <i>string</i> |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

sub-profile *reference*

| | |
|------------|---|
| Synopsis | Sub-profile name |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> sap <i>string</i> static-host ipv6 <i>string</i> mac <i>string</i> sub-profile <i>reference</i> |
| Tree | sub-profile |
| Reference | configure subscriber-mgmt sub-profile <i>string</i> |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

subscriber-id

| | |
|------------|--|
| Synopsis | Enter the subscriber-id context |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> sap <i>string</i> static-host ipv6 <i>string</i> mac <i>string</i> subscriber-id |
| Tree | subscriber-id |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

string *string*

| | |
|---------------|--|
| Synopsis | Subscriber identification |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> sap <i>string</i> static-host ipv6 <i>string</i> mac <i>string</i> subscriber-id <i>string</i> string |
| Tree | string |
| String Length | 1 to 64 |
| Notes | The following elements are part of a choice: string or use-sap-id . |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

use-sap-id

| | |
|------------|---|
| Synopsis | Use the SAP id as subscriber ID |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> sap <i>string</i> static-host ipv6 <i>string</i> mac <i>string</i> subscriber-id use-sap-id |
| Tree | use-sap-id |
| Notes | The following elements are part of a choice: string or use-sap-id . |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

mac-learning

| | |
|------------|--|
| Synopsis | Enter the mac-learning context |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> sap <i>string</i> static-host mac-learning |
| Tree | mac-learning |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

data-triggered *boolean*

| | |
|------------|--|
| Synopsis | Enable learning of MAC addresses from data packets |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> sap <i>string</i> static-host mac-learning data-triggered <i>boolean</i> |
| Tree | data-triggered |
| Default | false |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

single-mac *boolean*

| | |
|------------|--|
| Synopsis | Enforce single MAC address and subscriber for the SAP |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> sap <i>string</i> static-host mac-learning single-mac <i>boolean</i> |
| Tree | single-mac |
| Default | false |
| Introduced | 16.0.R4 |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

sub-sla-mgmt

Synopsis Enter the **sub-sla-mgmt** context

Context **configure service ies** *string* **subscriber-interface** *string* **group-interface** *string* **sap** *string* **sub-sla-mgmt**

Tree **sub-sla-mgmt**

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

admin-state *keyword*

Synopsis Administrative state of SAP subscriber management

Context **configure service ies** *string* **subscriber-interface** *string* **group-interface** *string* **sap** *string* **sub-sla-mgmt admin-state** *keyword*

Tree **admin-state**

Default disable

Options enable, disable

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

defaults

Synopsis Enter the **defaults** context

Context **configure service ies** *string* **subscriber-interface** *string* **group-interface** *string* **sap** *string* **sub-sla-mgmt defaults**

Tree **defaults**

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

app-profile *reference*

Synopsis Default application profile name for this SAP

Context **configure service ies** *string* **subscriber-interface** *string* **group-interface** *string* **sap** *string* **sub-sla-mgmt defaults app-profile** *reference*

Tree **app-profile**

| | |
|------------|--|
| Reference | configure application-assurance group number partition number policy app-profile string |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

int-dest-id

| | |
|------------|--|
| Synopsis | Enter the int-dest-id context |
| Context | configure service ies string subscriber-interface string group-interface string sap string
sub-sla-mgmt defaults int-dest-id |
| Tree | int-dest-id |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

string *string*

| | |
|---------------|--|
| Synopsis | Use the configured string |
| Context | configure service ies string subscriber-interface string group-interface string sap string
sub-sla-mgmt defaults int-dest-id string string |
| Tree | string |
| String Length | 1 to 32 |
| Notes | The following elements are part of a choice: string or top-q-tag . |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

top-q-tag

| | |
|------------|--|
| Synopsis | Use the top Q-tag of this SAP |
| Context | configure service ies string subscriber-interface string group-interface string sap string
sub-sla-mgmt defaults int-dest-id top-q-tag |
| Tree | top-q-tag |
| Notes | The following elements are part of a choice: string or top-q-tag . |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

sla-profile *reference*

| | |

| Tree | sla-profile |
| Reference | configure subscriber-mgmt sla-profile <i>string</i> |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

sub-profile *reference*

| | |
|------------|---|
| Synopsis | Default subscriber profile used for subscribers on this SAP |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> sap <i>string</i>
sub-sla-mgmt defaults sub-profile <i>reference</i> |
| Tree | sub-profile |
| Reference | configure subscriber-mgmt sub-profile <i>string</i> |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

subscriber-id

| | |
|------------|--|
| Synopsis | Enter the subscriber-id context |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> sap <i>string</i>
sub-sla-mgmt defaults subscriber-id |
| Tree | subscriber-id |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

auto-id

| | |
|------------|--|
| Synopsis | Use auto-generated subscriber identification string |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> sap <i>string</i>
sub-sla-mgmt defaults subscriber-id auto-id |
| Tree | auto-id |
| Notes | The following elements are part of a choice: auto-id , sap-id , or string . |
| Introduced | 16.0.R1 |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

sap-id

Synopsis Use SAP ID as default subscriber identification string

Context **configure** [service ies](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [sap](#) *string* [sub-sla-mgmt](#) [defaults](#) [subscriber-id](#) [sap-id](#)

Tree [sap-id](#)

Notes The following elements are part of a choice: **auto-id**, **sap-id**, or **string**.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

string *string*

Synopsis Default subscriber identification string for the SAP

Context **configure** [service ies](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [sap](#) *string* [sub-sla-mgmt](#) [defaults](#) [subscriber-id](#) *string* *string*

Tree [string](#)

String Length 1 to 64

Notes The following elements are part of a choice: **auto-id**, **sap-id**, or **string**.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

single-sub-parameters

Synopsis Enter the **single-sub-parameters** context

Context **configure** [service ies](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [sap](#) *string* [sub-sla-mgmt](#) [single-sub-parameters](#)

Tree [single-sub-parameters](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

non-sub-traffic

Synopsis Enable the **non-sub-traffic** context

| | |
|------------|---|
| Context | configure service ies <i>string</i> <i>subscriber-interface string</i> <i>group-interface string</i> <i>sap string</i> <i>sub-sla-mgmt</i> <i>single-sub-parameters</i> <i>non-sub-traffic</i> |
| Tree | non-sub-traffic |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

app-profile *reference*

| | |
|------------|--|
| Synopsis | Application profile name for all non-subscriber traffic |
| Context | configure service ies <i>string</i> <i>subscriber-interface string</i> <i>group-interface string</i> <i>sap string</i> <i>sub-sla-mgmt</i> <i>single-sub-parameters</i> <i>non-sub-traffic</i> <i>app-profile reference</i> |
| Tree | app-profile |
| Reference | configure application-assurance <i>group number</i> <i>partition number</i> <i>policy app-profile string</i> |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

sla-profile *reference*

| | |
|------------|--|
| Synopsis | SLA profile applicable for all non-subscriber traffic |
| Context | configure service ies <i>string</i> <i>subscriber-interface string</i> <i>group-interface string</i> <i>sap string</i> <i>sub-sla-mgmt</i> <i>single-sub-parameters</i> <i>non-sub-traffic</i> <i>sla-profile reference</i> |
| Tree | sla-profile |
| Reference | configure subscriber-mgmt <i>sla-profile string</i> |
| Notes | This element is mandatory. |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

sub-profile *reference*

| | |
|------------|--|
| Synopsis | Subscriber ID profile applied for all non-subscriber traffic |
| Context | configure service ies <i>string</i> <i>subscriber-interface string</i> <i>group-interface string</i> <i>sap string</i> <i>sub-sla-mgmt</i> <i>single-sub-parameters</i> <i>non-sub-traffic</i> <i>sub-profile reference</i> |
| Tree | sub-profile |
| Reference | configure subscriber-mgmt <i>sub-profile string</i> |
| Notes | This element is mandatory. |
| Introduced | 16.0.R1 |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

subscriber-id *string*

WARNING:

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis Subscriber ID applied for all non-subscriber traffic

Context **configure** [service](#) [ies](#) [string](#) [subscriber-interface](#) [string](#) [group-interface](#) [string](#) [sap](#) [string](#) [sub-sla-mgmt](#) [single-sub-parameters](#) [non-sub-traffic](#) [subscriber-id](#) [string](#)

Tree [subscriber-id](#)

String Length 1 to 64

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

profiled-traffic-only *boolean*

Synopsis Include all traffic in subscriber profile

Context **configure** [service](#) [ies](#) [string](#) [subscriber-interface](#) [string](#) [group-interface](#) [string](#) [sap](#) [string](#) [sub-sla-mgmt](#) [single-sub-parameters](#) [profiled-traffic-only](#) [boolean](#)

Tree [profiled-traffic-only](#)

Default false

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

sub-ident-policy *reference*

Synopsis Subscriber identification policy used on this SAP

Context **configure** [service](#) [ies](#) [string](#) [subscriber-interface](#) [string](#) [group-interface](#) [string](#) [sap](#) [string](#) [sub-sla-mgmt](#) [sub-ident-policy](#) [reference](#)

Tree [sub-ident-policy](#)

Reference **configure** [subscriber-mgmt](#) [sub-ident-policy](#) [string](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

subscriber-limit (*keyword* | *number*)

| | |
|------------|---|
| Synopsis | Maximum number of subscribers on this SAP |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> sap <i>string</i> sub-sla-mgmt subscriber-limit (<i>keyword</i> <i>number</i>) |
| Tree | subscriber-limit |
| Range | 1 to 131071 |
| Default | 1 |
| Options | no-limit |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

sap-parameters

| | |
|------------|---|
| Synopsis | Enter the sap-parameters context |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> sap-parameters |
| Tree | sap-parameters |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

anti-spoof *keyword*

| | |
|------------|--|
| Synopsis | Anti-spoof type of the SAP |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> sap-parameters anti-spoof <i>keyword</i> |
| Tree | anti-spoof |
| Default | ip-mac |
| Options | ip-mac, nh-mac |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

description *string*

| | |
|----------|--|
| Synopsis | Text description |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> sap-parameters description <i>string</i> |

| | |
|---------------|---|
| Tree | description |
| String Length | 1 to 80 |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

sub-sla-mgmt

| | |
|------------|---|
| Synopsis | Enter the sub-sla-mgmt context |
| Context | configure service ies string subscriber-interface string group-interface string sap-parameters sub-sla-mgmt |
| Tree | sub-sla-mgmt |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

defaults

| | |
|------------|---|
| Synopsis | Enter the defaults context |
| Context | configure service ies string subscriber-interface string group-interface string sap-parameters sub-sla-mgmt defaults |
| Tree | defaults |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

app-profile *reference*

| | |
|------------|---|
| Synopsis | Default application profile name |
| Context | configure service ies string subscriber-interface string group-interface string sap-parameters sub-sla-mgmt defaults app-profile <i>reference</i> |
| Tree | app-profile |
| Reference | configure application-assurance group number partition number policy app-profile string |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

sla-profile *reference*

| | |
|----------|---------------------|
| Synopsis | Default SLA profile |
|----------|---------------------|

| | |
|------------|---|
| Context | configure service ies <i>string</i> <i>subscriber-interface string</i> <i>group-interface string</i> <i>sap-parameters sub-sla-mgmt defaults sla-profile reference</i> |
| Tree | sla-profile |
| Reference | configure subscriber-mgmt sla-profile <i>string</i> |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

sub-profile *reference*

| | |
|------------|---|
| Synopsis | Default subscriber profile |
| Context | configure service ies <i>string</i> <i>subscriber-interface string</i> <i>group-interface string</i> <i>sap-parameters sub-sla-mgmt defaults sub-profile reference</i> |
| Tree | sub-profile |
| Reference | configure subscriber-mgmt sub-profile <i>string</i> |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

subscriber-id

| | |
|------------|---|
| Synopsis | Enter the subscriber-id context |
| Context | configure service ies <i>string</i> <i>subscriber-interface string</i> <i>group-interface string</i> <i>sap-parameters sub-sla-mgmt defaults subscriber-id</i> |
| Tree | subscriber-id |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

auto-id

| | |
|------------|---|
| Synopsis | Subscriber ID that is autogenerated |
| Context | configure service ies <i>string</i> <i>subscriber-interface string</i> <i>group-interface string</i> <i>sap-parameters sub-sla-mgmt defaults subscriber-id auto-id</i> |
| Tree | auto-id |
| Notes | The following elements are part of a choice: auto-id or string . |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

string *string*

| | |
|---------------|--|
| Synopsis | String to be used as default subscriber ID |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> sap-parameters sub-sla-mgmt defaults subscriber-id <i>string</i> <i>string</i> |
| Tree | string |
| String Length | 1 to 64 |
| Notes | The following elements are part of a choice: auto-id or string . |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

sub-ident-policy *reference*

| | |
|------------|---|
| Synopsis | Subscriber identification policy |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> sap-parameters sub-sla-mgmt sub-ident-policy <i>reference</i> |
| Tree | sub-ident-policy |
| Reference | configure subscriber-mgmt sub-ident-policy <i>string</i> |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

shcv-policy *reference*

| | |
|------------|--|
| Synopsis | Subscriber host connectivity verification policy for IPv4 and IPv6 |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> shcv-policy <i>reference</i> |
| Tree | shcv-policy |
| Reference | configure subscriber-mgmt shcv-policy <i>string</i> |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

shcv-policy-ipv4 *reference*

| | |
|----------|---|
| Synopsis | Subscriber host connectivity verification policy for IPv4 |

| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

srrp [[srrp-id](#)] *number*

| | |
|----------------|--|
| Synopsis | Enter the srrp list instance |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> srrp <i>number</i> |
| Tree | srrp |
| Max. Instances | 1 |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

[srrp-id] *number*

| | |
|------------|--|
| Synopsis | SRRP instance ID |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> srrp <i>number</i> |
| Tree | srrp |
| Range | 1 to 4294967295 |
| Notes | This element is part of a list key. |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

admin-state *keyword*

| | |
|------------|--|
| Synopsis | Administrative state of SRRP |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> srrp <i>number</i> admin-state <i>keyword</i> |
| Tree | admin-state |
| Default | disable |
| Options | enable, disable |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

bfd-liveness

| | |
|------------|--|
| Synopsis | Enable the bfd-liveness context |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> srrp <i>number</i> bfd-liveness |
| Tree | bfd-liveness |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

dest-ip *string***WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

| | |
|------------|--|
| Synopsis | Destination IPv4 prefix |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> srrp <i>number</i> bfd-liveness dest-ip <i>string</i> |
| Tree | dest-ip |
| Notes | This element is mandatory. |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

interface-name *string***WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

| | |
|---------------|--|
| Synopsis | Name of the interface running BFD |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> srrp <i>number</i> bfd-liveness interface-name <i>string</i> |
| Tree | interface-name |
| String Length | 1 to 32 |
| Notes | This element is mandatory. |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

service-name *string***WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

| | |
|---------------|--|
| Synopsis | Administrative service name |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> srrp <i>number</i> bfd-liveness service-name <i>string</i> |
| Tree | service-name |
| String Length | 1 to 64 |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

description *string*

| | |
|---------------|---|
| Synopsis | Text description |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> srrp <i>number</i> description <i>string</i> |
| Tree | description |
| String Length | 1 to 80 |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

gw-mac *string*

| | |
|------------|---|
| Synopsis | Gateway MAC address |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> srrp <i>number</i> gw-mac <i>string</i> |
| Tree | gw-mac |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

keep-alive-interval *number*

| | |
|------------|--|
| Synopsis | Interval between SRRP advertisements |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> srrp <i>number</i> keep-alive-interval <i>number</i> |
| Tree | keep-alive-interval |
| Range | 1 to 100 |
| Default | 10 |
| Units | deciseconds |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

message-path *reference***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|------------|--|
| Synopsis | SAP to use as the SRRP message path |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> srrp <i>number</i> message-path <i>reference</i> |
| Tree | message-path |
| Reference | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> sap <i>string</i> |

priority-step *number*

| | |
|------------|--|
| Synopsis | Step value to change priority of SRRP instance |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> srrp <i>number</i> monitor-oper-group priority-step <i>number</i> |
| Tree | priority-step |
| Range | 1 to 10 |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

one-garp-per-sap *boolean*

| | |
|------------|--|
| Synopsis | Send one gratuitous ARP to each SAP |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> srrp <i>number</i> one-garp-per-sap <i>boolean</i> |
| Tree | one-garp-per-sap |
| Default | false |
| Introduced | 16.0.R1 |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

policy reference

Synopsis VRRP priority control policy associated with the SRRP

Context **configure service ies string subscriber-interface string group-interface string srrp number policy reference**

Tree [policy](#)

Reference **configure vrrp policy number**

Max. Instances 2

Notes This element is ordered by the user.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

preempt boolean

Synopsis Allow the SRRP instance to override an existing master

Context **configure service ies string subscriber-interface string group-interface string srrp number preempt boolean**

Tree [preempt](#)

Default true

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

priority number

Synopsis Priority for this interface at this level

Context **configure service ies string subscriber-interface string group-interface string srrp number priority number**

Tree [priority](#)

Range 1 to 254

Default 100

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

send-fib-population-packets *keyword*

| | |
|------------|--|
| Synopsis | Mode used to send FIB population packets (such as ARP) on switchover |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> srrp <i>number</i> send-fib-population-packets <i>keyword</i> |
| Tree | send-fib-population-packets |
| Default | all |
| Options | all, outer-tag-only |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

suppress-aa-sub *boolean*

| | |
|------------|---|
| Synopsis | Enable application assurance suppression for ESM subscribers |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> suppress-aa-sub <i>boolean</i> |
| Tree | suppress-aa-sub |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

tos-marking-state *keyword*

| | |
|------------|---|
| Synopsis | TOS marking state |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> tos-marking-state <i>keyword</i> |
| Tree | tos-marking-state |
| Default | untrusted |
| Options | trusted, untrusted |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

type *keyword***WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

| | |
|------------|---|
| Synopsis | Group interface type |
| Context | configure service ies string subscriber-interface string group-interface string type keyword |
| Tree | type |
| Default | plain |
| Options | plain, lns, wlan-gw, gtp, bonding |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

wlan-gw

| | |
|------------|--|
| Synopsis | Enter the wlan-gw context |
| Context | configure service ies string subscriber-interface string group-interface string wlan-gw |
| Tree | wlan-gw |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

admin-state *keyword*

| | |
|------------|--|
| Synopsis | Administrative state of WLAN Gateway |
| Context | configure service ies string subscriber-interface string group-interface string wlan-gw admin-state keyword |
| Tree | admin-state |
| Default | disable |
| Options | enable, disable |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

gateway-address [[address](#)] (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

| | |
|----------|--|
| Synopsis | Enter the gateway-address list instance |
|----------|--|

| | |
|----------------|--|
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> wlan-gw gateway-address (<i>ipv4-address-no-zone</i> <i>ipv6-address-no-zone</i>) |
| Tree | gateway-address |
| Max. Instances | 10 |
| Introduced | 16.0.R4 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

[address] (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

| | |
|------------|--|
| Synopsis | Gateway endpoint address of the WLAN Gateway tunnel |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> wlan-gw gateway-address (<i>ipv4-address-no-zone</i> <i>ipv6-address-no-zone</i>) |
| Tree | gateway-address |
| Notes | This element is part of a list key. |
| Introduced | 16.0.R4 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

purpose

| | |
|------------|---|
| Synopsis | Enter the purpose context |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> wlan-gw gateway-address (<i>ipv4-address-no-zone</i> <i>ipv6-address-no-zone</i>) purpose |
| Tree | purpose |
| Introduced | 16.0.R4 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

xconnect *boolean*

| | |
|------------|---|
| Synopsis | Use tunnel IP address for crosse-connect traffic |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> wlan-gw gateway-address (<i>ipv4-address-no-zone</i> <i>ipv6-address-no-zone</i>) purpose xconnect <i>boolean</i> |
| Tree | xconnect |
| Default | false |
| Introduced | 16.0.R4 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

gateway-router *string*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|------------|--|
| Synopsis | Routing instance the WLAN-GW endpoint resides in |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> wlan-gw gateway-router <i>string</i> |
| Tree | gateway-router |
| Introduced | 16.0.R4 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

group-encryption

| | |
|------------|--|
| Synopsis | Enter the group-encryption context |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> wlan-gw group-encryption |
| Tree | group-encryption |
| Introduced | 21.10.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

encryption-keygroup-inbound *reference*

| | |
|------------|---|
| Synopsis | Encryption keygroup for inbound traffic |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> wlan-gw group-encryption encryption-keygroup-inbound <i>reference</i> |
| Tree | encryption-keygroup-inbound |
| Reference | configure group-encryption encryption-keygroup <i>number</i> |
| Introduced | 21.10.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

encryption-keygroup-outbound *reference*

| | |
|----------|--|
| Synopsis | Encryption keygroup for inbound traffic |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> wlan-gw group-encryption encryption-keygroup-outbound <i>reference</i> |

| | |
|------------|---|
| Tree | encryption-keygroup-outbound |
| Reference | configure group-encryption encryption-keygroup <i>number</i> |
| Introduced | 21.10.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

I2-ap

| | |
|------------|---|
| Synopsis | Enter the I2-ap context |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> wlan-gw I2-ap |
| Tree | I2-ap |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

access-point [[sap-id](#)] *string*

| | |
|------------|--|
| Synopsis | Enter the access-point list instance |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> wlan-gw I2-ap access-point <i>string</i> |
| Tree | access-point |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

[[sap-id](#)] *string*

| | |
|---------------|--|
| Synopsis | SAP ID for the Layer 2 access point |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> wlan-gw I2-ap access-point <i>string</i> |
| Tree | access-point |
| String Length | 1 to 45 |
| Notes | This element is part of a list key. |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

admin-state *keyword*

| | |
|------------|---|
| Synopsis | Administrative state of the L2 access points |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> wlan-gw l2-ap access-point <i>string</i> admin-state <i>keyword</i> |
| Tree | admin-state |
| Default | disable |
| Options | enable, disable |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

encap-type *keyword***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|------------|--|
| Synopsis | Service encapsulation type of this access point |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> wlan-gw l2-ap access-point <i>string</i> encap-type <i>keyword</i> |
| Tree | encap-type |
| Options | null, dot1q, qinq |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

epipe-sap-template *reference***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|------------|--|
| Synopsis | Parameters template for the internal connections with the ISA cards |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> wlan-gw l2-ap access-point <i>string</i> epipe-sap-template <i>reference</i> |
| Tree | epipe-sap-template |
| Reference | configure service template epipe-sap-template <i>string</i> |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

auto-sub-id-fmt *keyword*

| | |
|------------|--|
| Synopsis | Format of the auto-generated subscriber ID |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> wlan-gw l2-ap auto-sub-id-fmt <i>keyword</i> |
| Tree | auto-sub-id-fmt |
| Default | include-ap-tags |
| Options | include-ap-tags, sap-only |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

default-encap-type *keyword***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|------------|---|
| Synopsis | Default encapsulation type for Layer 2 access points |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> wlan-gw l2-ap default-encap-type <i>keyword</i> |
| Tree | default-encap-type |
| Default | null |
| Options | null, dot1q, qinq |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

lanext**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|------------|--|
| Synopsis | Enable the lanext context |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> wlan-gw lanext |
| Tree | lanext |
| Introduced | 16.0.R1 |

Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

max-bd *number*

WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis Maximum number of bridge domains

Context **configure** [service](#) [ies](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [wlan-gw](#) [lanext](#) **max-bd** *number*

Tree [max-bd](#)

Range 1 to 131071

Default 131071

Introduced 16.0.R1

Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

learn-ap-mac

Synopsis Enable the **learn-ap-mac** context

Context **configure** [service](#) [ies](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [wlan-gw](#) [learn-ap-mac](#)

Tree [learn-ap-mac](#)

Introduced 16.0.R1

Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

delay-auth *boolean*

Synopsis Delay authentication until ARP/ND is answered or timed out, after which AP MAC can be included

Context **configure** [service](#) [ies](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [wlan-gw](#) [learn-ap-mac](#) **delay-auth** *boolean*

Tree [delay-auth](#)

Default false

Introduced 16.0.R1

Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

mobility

| | |
|------------|---|
| Synopsis | Enter the mobility context |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> wlan-gw
mobility |
| Tree | mobility |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

hold-time *number*

| | |
|------------|--|
| Synopsis | Minimum time between two mobility events for a single UE |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> wlan-gw
mobility hold-time <i>number</i> |
| Tree | hold-time |
| Range | 0 to 255 |
| Default | 5 |
| Units | seconds |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

inter-tunnel-type *boolean*

WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|------------|---|
| Synopsis | Enable mobility between terminating tunnel types |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> wlan-gw
mobility inter-tunnel-type <i>boolean</i> |
| Tree | inter-tunnel-type |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

inter-vlan *boolean*

| | |
|----------|---|
| Synopsis | Enable mobility within different VLANs within the same range of VLAN Q-tags |
|----------|---|

| | |
|------------|--|
| Context | configure service ies <i>string</i> <i>subscriber-interface string</i> <i>group-interface string</i> <i>wlan-gw mobility inter-vlan boolean</i> |
| Tree | inter-vlan |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

trigger

| | |
|------------|---|
| Synopsis | Enter the trigger context |
| Context | configure service ies <i>string</i> <i>subscriber-interface string</i> <i>group-interface string</i> <i>wlan-gw mobility trigger</i> |
| Tree | trigger |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

control *boolean*

| | |
|------------|---|
| Synopsis | Use control traffic (DHCP, DHCPv6, and ICMPv6-RS messages) as mobility trigger |
| Context | configure service ies <i>string</i> <i>subscriber-interface string</i> <i>group-interface string</i> <i>wlan-gw mobility trigger control boolean</i> |
| Tree | control |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

data *boolean*

| | |
|------------|--|
| Synopsis | Use data traffic as mobility trigger |
| Context | configure service ies <i>string</i> <i>subscriber-interface string</i> <i>group-interface string</i> <i>wlan-gw mobility trigger data boolean</i> |
| Tree | data |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

iapp *boolean*

| | |
|------------|--|
| Synopsis | Use Inter Access Point Protocol (IAPP) messages as mobility trigger |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> wlan-gw
mobility trigger iapp <i>boolean</i> |
| Tree | iapp |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

oper-down-on-group-degrade *boolean*

| | |
|------------|--|
| Synopsis | Bring interface operationally down when its ISA WLAN Gateway becomes degraded |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> wlan-gw
oper-down-on-group-degrade <i>boolean</i> |
| Tree | oper-down-on-group-degrade |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

tcp-mss-adjust *number*

| | |
|------------|---|
| Synopsis | Value for the TCP Maximum Segment Size (MSS) option if not present, or if value is higher |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> wlan-gw
tcp-mss-adjust <i>number</i> |
| Tree | tcp-mss-adjust |
| Range | 160 to 10240 |
| Units | bytes |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

tunnel-egress-qos

| | |
|----------|--|
| Synopsis | Enter the tunnel-egress-qos context |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> wlan-gw
tunnel-egress-qos |

| | |
|------------|------------------------------------|
| Tree | tunnel-egress-qos |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

admin-state *keyword*

WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|------------|---|
| Synopsis | Administrative state of egress QoS for WLAN-GW tunnels |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> wlan-gw tunnel-egress-qos admin-state <i>keyword</i> |
| Tree | admin-state |
| Default | disable |
| Options | enable, disable |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

agg-rate-limit (*number* | *keyword*)

| | |
|------------|--|
| Synopsis | Aggregate rate limit of each shaper associated with this interface |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> wlan-gw tunnel-egress-qos agg-rate-limit (<i>number</i> <i>keyword</i>) |
| Tree | agg-rate-limit |
| Range | 1 to 100000000 |
| Default | max |
| Options | max |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

granularity *keyword*

WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|------------|---|
| Synopsis | Granularity of the egress shaping for WLAN Gateway |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> wlan-gw tunnel-egress-qos granularity <i>keyword</i> |
| Tree | granularity |
| Default | per-tunnel |
| Options | per-tunnel, per-retailer |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

hold-time (*number* | *keyword*)

| | |
|------------|---|
| Synopsis | Minimum time that the egress QoS resources associated with a tunnel (such as a shaper) are held |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> wlan-gw tunnel-egress-qos hold-time (<i>number</i> <i>keyword</i>) |
| Tree | hold-time |
| Range | 1 to 86400 |
| Units | seconds |
| Options | infinite |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

multi-client-only *boolean*

| | |
|------------|---|
| Synopsis | Tunnel traffic to shape when multiple UEs use this tunnel |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> wlan-gw tunnel-egress-qos multi-client-only <i>boolean</i> |
| Tree | multi-client-only |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

qos reference

WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|------------|--|
| Synopsis | Identifier of the egress QoS policy associated with each tunnel of this interface |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> wlan-gw tunnel-egress-qos qos <i>reference</i> |
| Tree | qos |
| Reference | configure qos sap-egress <i>string</i> |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

scheduler-policy reference

WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|------------|---|
| Synopsis | Identifier of the egress scheduler policy associated with each tunnel of this interface |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> wlan-gw tunnel-egress-qos scheduler-policy <i>reference</i> |
| Tree | scheduler-policy |
| Reference | configure qos scheduler-policy <i>string</i> |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

tunnel-encaps

| | |
|------------|---|
| Synopsis | Enter the tunnel-encaps context |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> wlan-gw tunnel-encaps |
| Tree | tunnel-encaps |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

learn-l2tp-cookie (*keyword* | *hex-string*)

| | |
|---------------|--|
| Synopsis | System that learns the cookie from L2TP tunnels terminating on this interface |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> wlan-gw tunnel-encaps learn-l2tp-cookie (<i>keyword</i> <i>hex-string</i>) |
| Tree | learn-l2tp-cookie |
| String Length | 6 |
| Default | never |
| Options | never, always |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

vlan-range [[range](#)] *string*

| | |
|------------|--|
| Synopsis | Enter the vlan-range list instance |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> wlan-gw vlan-range <i>string</i> |
| Tree | vlan-range |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

[range] *string*

| | |
|------------|--|
| Synopsis | IEEE 802.1q VLAN tag range |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> wlan-gw vlan-range <i>string</i> |
| Tree | vlan-range |
| Notes | This element is part of a list key. |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

authentication

| | |
|----------|---|
| Synopsis | Enter the authentication context |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> wlan-gw vlan-range <i>string</i> authentication |
| Tree | authentication |

Introduced 16.0.R1
Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

hold-time *number*

Synopsis Minimum time to hold a UE down after an authentication failure
Context **configure** *service* *ies* *string* *subscriber-interface* *string* *group-interface* *string* *wlan-gw* *vlan-range* *string* *authentication* *hold-time* *number*
Tree [hold-time](#)
Range 0 to 3600
Default 5
Units seconds
Introduced 16.0.R1
Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

local

Synopsis Enable the **local** context
Context **configure** *service* *ies* *string* *subscriber-interface* *string* *group-interface* *string* *wlan-gw* *vlan-range* *string* *authentication* *local*
Tree [local](#)
Introduced 22.2.R1
Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

coa-policy *reference*

Synopsis RADIUS ISA policy applied to CoA or disconnect messages
Context **configure** *service* *ies* *string* *subscriber-interface* *string* *group-interface* *string* *wlan-gw* *vlan-range* *string* *authentication* *local* *coa-policy* *reference*
Tree [coa-policy](#)

Introduced 22.2.R1
Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

default-ue-state *keyword*

| | |
|------------|---|
| Synopsis | UE state accepted for immediate authentication |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> wlan-gw vlan-range <i>string</i> authentication local default-ue-state <i>keyword</i> |
| Tree | default-ue-state |
| Options | portal, dsm |
| Notes | This element is mandatory. |
| Introduced | 22.2.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

on-control-plane *boolean*

| | |
|------------|---|
| Synopsis | Trigger authentication on first control plane packet instead of first data packet |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> wlan-gw vlan-range <i>string</i> authentication on-control-plane <i>boolean</i> |
| Tree | on-control-plane |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

policy *reference*

| | |
|------------|---|
| Synopsis | RADIUS policy for authentication |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> wlan-gw vlan-range <i>string</i> authentication policy <i>reference</i> |
| Tree | policy |
| Reference | configure aaa radius isa-policy <i>string</i> |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

vlan-mismatch-timeout *number*

| | |
|----------|---|
| Synopsis | Timeout value for the RADIUS proxy cache if a packet is received with a non-matching VLAN |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> wlan-gw vlan-range <i>string</i> authentication vlan-mismatch-timeout <i>number</i> |

| | |
|------------|---------------------------------------|
| Tree | vlan-mismatch-timeout |
| Range | 5 to 60 |
| Units | seconds |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

data-triggered-ue-creation

| | |
|------------|--|
| Synopsis | Enter the data-triggered-ue-creation context |
| Context | configure service ies string subscriber-interface string group-interface string wlan-gw vlan-range string data-triggered-ue-creation |
| Tree | data-triggered-ue-creation |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

admin-state *keyword*

| | |
|------------|---|
| Synopsis | Administrative state of data-triggered UE creation |
| Context | configure service ies string subscriber-interface string group-interface string wlan-gw vlan-range string data-triggered-ue-creation admin-state <i>keyword</i> |
| Tree | admin-state |
| Default | disable |
| Options | enable, disable |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

arp *boolean*

| | |
|------------|---|
| Synopsis | Authenticate ARP packets received from an unknown UE |
| Context | configure service ies string subscriber-interface string group-interface string wlan-gw vlan-range string data-triggered-ue-creation arp <i>boolean</i> |
| Tree | arp |
| Default | false |
| Introduced | 22.7.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

create-proxy-cache-entry

| | |
|------------|--|
| Synopsis | Enter the create-proxy-cache-entry context |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> wlan-gw vlan-range <i>string</i> data-triggered-ue-creation create-proxy-cache-entry |
| Tree | create-proxy-cache-entry |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

mac-format *string*

| | |
|---------------|---|
| Synopsis | MAC address format |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> wlan-gw vlan-range <i>string</i> data-triggered-ue-creation create-proxy-cache-entry mac-format <i>string</i> |
| Tree | mac-format |
| String Length | 2 to 7 |
| Default | aa: |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

proxy-server

| | |
|------------|---|
| Synopsis | Enable the proxy-server context |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> wlan-gw vlan-range <i>string</i> data-triggered-ue-creation create-proxy-cache-entry proxy-server |
| Tree | proxy-server |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

name *string*

| | |
|---------------|--|
| Synopsis | RADIUS Proxy server name |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> wlan-gw vlan-range <i>string</i> data-triggered-ue-creation create-proxy-cache-entry proxy-server name <i>string</i> |
| Tree | name |
| String Length | 1 to 32 |

| | |
|------------|------------------------------------|
| Notes | This element is mandatory. |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

router-instance *string*

| | |
|------------|---|
| Synopsis | Router instance of the RADIUS proxy server |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> wlan-gw vlan-range <i>string</i> data-triggered-ue-creation create-proxy-cache-entry proxy-server router-instance <i>string</i> |
| Tree | router-instance |
| Notes | This element is mandatory. |
| Introduced | 16.0.R4 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

dhcp4

| | |
|------------|---|
| Synopsis | Enter the dhcp4 context |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> wlan-gw vlan-range <i>string</i> dhcp4 |
| Tree | dhcp4 |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

admin-state *keyword*

| | |
|------------|---|
| Synopsis | Administrative state of DHCPv4 |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> wlan-gw vlan-range <i>string</i> dhcp4 admin-state <i>keyword</i> |
| Tree | admin-state |
| Default | disable |
| Options | enable, disable |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

dns string

| | |
|----------------|--|
| Synopsis | DNS servers signaled in DHCP |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> wlan-gw vlan-range <i>string</i> dhcp4 dns <i>string</i> |
| Tree | dns |
| Max. Instances | 2 |
| Notes | This element is ordered by the user. |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

l2-aware-ip-address (*ipv4-unicast-address* | *keyword*)

| | |
|------------|---|
| Synopsis | L2-Aware NAT inside IP address |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> wlan-gw vlan-range <i>string</i> dhcp4 l2-aware-ip-address (<i>ipv4-unicast-address</i> <i>keyword</i>) |
| Tree | l2-aware-ip-address |
| Options | from-pool |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

lease-time

| | |
|------------|---|
| Synopsis | Enter the lease-time context |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> wlan-gw vlan-range <i>string</i> dhcp4 lease-time |
| Tree | lease-time |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

active number

| | |
|----------|---|
| Synopsis | IP address lease time for the UE after successful (portal) authentication |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> wlan-gw vlan-range <i>string</i> dhcp4 lease-time active <i>number</i> |
| Tree | active |

| | |
|------------|------------------------------------|
| Range | 300 to 3600 |
| Default | 600 |
| Units | seconds |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

initial number

| | |
|------------|---|
| Synopsis | IP address lease time that is provided before and during (portal) authentication to the UE |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> wlan-gw vlan-range <i>string</i> dhcp4 lease-time initial <i>number</i> |
| Tree | initial |
| Range | 300 to 3600 |
| Default | 600 |
| Units | seconds |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

nbns string

| | |
|----------------|--|
| Synopsis | NetBIOS servers signaled in DHCP |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> wlan-gw vlan-range <i>string</i> dhcp4 nbns <i>string</i> |
| Tree | nbns |
| Max. Instances | 2 |
| Notes | This element is ordered by the user. |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

dhcp6

| | |
|----------|--|
| Synopsis | Enter the dhcp6 context |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> wlan-gw vlan-range <i>string</i> dhcp6 |

| | |
|------------|------------------------------------|
| Tree | dhcp6 |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

admin-state *keyword*

| | |
|------------|--|
| Synopsis | Administrative state of the protocol |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> wlan-gw vlan-range <i>string</i> dhcp6 admin-state <i>keyword</i> |
| Tree | admin-state |
| Default | disable |
| Options | enable, disable |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

preferred-lifetime

| | |
|------------|--|
| Synopsis | Enter the preferred-lifetime context |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> wlan-gw vlan-range <i>string</i> dhcp6 preferred-lifetime |
| Tree | preferred-lifetime |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

active *number*

| | |
|------------|--|
| Synopsis | Preferred signaled lifetime after full authentication |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> wlan-gw vlan-range <i>string</i> dhcp6 preferred-lifetime active <i>number</i> |
| Tree | active |
| Range | 300 to 3600 |
| Default | 600 |
| Units | seconds |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

initial number

| | |
|------------|--|
| Synopsis | Preferred signaled lifetime when the UE is not fully authenticated |
| Context | configure service ies <i>string</i> <i>subscriber-interface string</i> <i>group-interface string</i> <i>wlan-gw</i> <i>vlan-range string</i> <i>dhcp6 preferred-lifetime initial number</i> |
| Tree | <i>initial</i> |
| Range | 300 to 3600 |
| Default | 300 |
| Units | seconds |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

valid-lifetime

| | |
|------------|---|
| Synopsis | Enter the valid-lifetime context |
| Context | configure service ies <i>string</i> <i>subscriber-interface string</i> <i>group-interface string</i> <i>wlan-gw</i> <i>vlan-range string</i> <i>dhcp6 valid-lifetime</i> |
| Tree | <i>valid-lifetime</i> |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

active number

| | |
|------------|---|
| Synopsis | Signaled valid lifetime after full authentication |
| Context | configure service ies <i>string</i> <i>subscriber-interface string</i> <i>group-interface string</i> <i>wlan-gw</i> <i>vlan-range string</i> <i>dhcp6 valid-lifetime active number</i> |
| Tree | <i>active</i> |
| Range | 300 to 3600 |
| Default | 600 |
| Units | seconds |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

initial number

| | |
|----------|--|
| Synopsis | Valid signaled lifetime when the UE is not fully authenticated |
|----------|--|

| | |
|------------|--|

| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

dsm

| | |
|------------|---|
| Synopsis | Enter the dsm context |
| Context | configure service ies <i>string</i> <i>subscriber-interface</i> <i>string</i> <i>group-interface</i> <i>string</i> <i>wlan-gw</i> <i>vlan-range</i> <i>string</i> dsm |
| Tree | dsm |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

accounting-policy *reference*

WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|------------|---|
| Synopsis | ISA Radius Policy for accounting |
| Context | configure service ies <i>string</i> <i>subscriber-interface</i> <i>string</i> <i>group-interface</i> <i>string</i> <i>wlan-gw</i> <i>vlan-range</i> <i>string</i> dsm accounting-policy <i>reference</i> |
| Tree | accounting-policy |
| Reference | configure aaa radius isa-policy <i>string</i> |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

accounting-update

| | |
|----------|--|
| Synopsis | Enable the accounting-update context |
| Context | configure service ies <i>string</i> <i>subscriber-interface</i> <i>string</i> <i>group-interface</i> <i>string</i> <i>wlan-gw</i> <i>vlan-range</i> <i>string</i> dsm accounting-update |

| | |
|------------|------------------------------------|
| Tree | accounting-update |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

interval *number*

| | |
|------------|---|
| Synopsis | Time interval between consecutive Interim accounting update messages |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> wlan-gw vlan-range <i>string</i> dsm accounting-update interval <i>number</i> |
| Tree | interval |
| Range | 5 to 259200 |
| Units | minutes |
| Notes | This element is mandatory. |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

admin-state *keyword*

| | |
|------------|---|
| Synopsis | Administrative state of DSM |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> wlan-gw vlan-range <i>string</i> dsm admin-state <i>keyword</i> |
| Tree | admin-state |
| Default | disable |
| Options | enable, disable |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

application-assurance

| | |
|------------|--|
| Synopsis | Enter the application-assurance context |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> wlan-gw vlan-range <i>string</i> dsm application-assurance |
| Tree | application-assurance |
| Introduced | 21.10.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

accounting-statistics *boolean*

| | |
|------------|---|
| Synopsis | Collect AA statistics |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> wlan-gw vlan-range <i>string</i> dsm application-assurance accounting-statistics <i>boolean</i> |
| Tree | accounting-statistics |
| Default | false |
| Introduced | 21.10.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

profile *reference*

| | |
|------------|---|
| Synopsis | AA application profile used for portal authentication |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> wlan-gw vlan-range <i>string</i> dsm application-assurance profile <i>reference</i> |
| Tree | profile |
| Reference | configure application-assurance group <i>number</i> partition <i>number</i> policy app-profile <i>string</i> |
| Introduced | 21.10.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

url-parameter *string*

| | |
|---------------|--|
| Synopsis | AA URL parameter included for HTTP portal redirect |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> wlan-gw vlan-range <i>string</i> dsm application-assurance url-parameter <i>string</i> |
| Tree | url-parameter |
| String Length | 1 to 247 |
| Introduced | 22.2.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

egress

| | |
|----------|---|
| Synopsis | Enter the egress context |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> wlan-gw vlan-range <i>string</i> dsm egress |
| Tree | egress |

Introduced 16.0.R1
 Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

policer *reference*

Synopsis Policer for egress traffic
 Context **configure** [service](#) [ies](#) [string](#) [subscriber-interface](#) [string](#) [group-interface](#) [string](#) [wlan-gw](#) [vlan-range](#) [string](#) [dsm](#) [egress](#) [policer](#) [reference](#)
 Tree [policer](#)
 Reference **configure** [subscriber-mgmt](#) [isa-policer](#) [string](#)
 Introduced 16.0.R1
 Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

ingress

Synopsis Enter the **ingress** context
 Context **configure** [service](#) [ies](#) [string](#) [subscriber-interface](#) [string](#) [group-interface](#) [string](#) [wlan-gw](#) [vlan-range](#) [string](#) [dsm](#) [ingress](#)
 Tree [ingress](#)
 Introduced 16.0.R1
 Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

ip-filter *reference*

Synopsis Filter for ingress traffic
 Context **configure** [service](#) [ies](#) [string](#) [subscriber-interface](#) [string](#) [group-interface](#) [string](#) [wlan-gw](#) [vlan-range](#) [string](#) [dsm](#) [ingress](#) [ip-filter](#) [reference](#)
 Tree [ip-filter](#)
 Reference **configure** [subscriber-mgmt](#) [isa-filter](#) [string](#)
 Introduced 16.0.R1
 Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

policer *reference*

Synopsis Policer for ingress traffic

| | |
|------------|--|
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> wlan-gw vlan-range <i>string</i> dsm ingress policer <i>reference</i> |
| Tree | policer |
| Reference | configure subscriber-mgmt isa-policer <i>string</i> |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

soft-quota-exhausted-filter *reference*

| | |
|-------------|---|
| Synopsis | Filter applied when soft volume quota is reached |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> wlan-gw vlan-range <i>string</i> dsm ingress soft-quota-exhausted-filter <i>reference</i> |
| Tree | soft-quota-exhausted-filter |
| Description | This command applies a filter when a soft volume quota is reached. The filter replaces the currently applied filter (which can be preconfigured using the ip-filter command in the configure service vprn subscriber-interface group-interface wlan-gw vlan-range dsm ingress ip-filter context or be set using a RADIUS CoA message) for the UE upon quota exhaustion. If the quota is extended using a RADIUS CoA message, the filter is automatically reverted. Configuration changes apply only to new DSM UEs and not to existing UEs. |
| Reference | configure subscriber-mgmt isa-filter <i>string</i> |
| Introduced | 21.7.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

one-time-redirect

| | |
|------------|---|
| Synopsis | Enter the one-time-redirect context |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> wlan-gw vlan-range <i>string</i> dsm one-time-redirect |
| Tree | one-time-redirect |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

port *number*

| | |
|----------|--|
| Synopsis | Destination port of packets considered for HTTP redirect |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> wlan-gw vlan-range <i>string</i> dsm one-time-redirect port <i>number</i> |

| | |
|------------|------------------------------------|
| Tree | port |
| Range | 1 to 65535 |
| Default | 80 |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

url string

| | |
|---------------|---|
| Synopsis | URL for redirected HTTP protocol packets that can be overridden by AAA |
| Context | configure service ies string subscriber-interface string group-interface string wlan-gw vlan-range string dsm one-time-redirect url string |
| Tree | url |
| String Length | 1 to 255 |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

volume-quota-direction keyword

| | |
|-------------|---|
| Synopsis | Volume quota direction for WLAN GW |
| Context | configure service ies string subscriber-interface string group-interface string wlan-gw vlan-range string dsm volume-quota-direction keyword |
| Tree | volume-quota-direction |
| Description | This command specifies the direction that volume quotas are applied. Configuration changes apply only to new DSM UEs and not to existing UEs. |
| Default | both |
| Options | both, ingress, egress |
| Introduced | 21.7.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

dynamic-service boolean

| | |
|----------|--|
| Synopsis | Dynamically assign WLAN-GW subscriber to a VPLS service |
| Context | configure service ies string subscriber-interface string group-interface string wlan-gw vlan-range string dynamic-service boolean |
| Tree | dynamic-service |

| | |
|-------------|---|
| Description | When configured to true , the WLAN-GW subscriber is dynamically assigned to a VPLS service, based on RADIUS authentication reply attributes. This feature is used in conjunction with the configure service vpls wlan-gw wlan-gw-group command.

See "Dynamic VPLS service" in the <i>7450 ESS, 7750 SR, and VSR Triple Play Service Delivery Architecture Guide</i> for more information about the dynamic VPLS service feature. |
| Default | false |
| Introduced | 23.3.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

extension [[extension-range](#)] *string*

| | |
|------------|---|
| Synopsis | Add a list entry for extension |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> wlan-gw vlan-range <i>string</i> extension <i>string</i> |
| Tree | extension |
| Introduced | 21.7.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

[extension-range] *string*

| | |
|-------------|---|
| Synopsis | VLAN tag range used for matching |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> wlan-gw vlan-range <i>string</i> extension <i>string</i> |
| Tree | extension |
| Description | This command configures the additional VLAN range that is used for matching. Any traffic within the extension range is considered part of the same VLAN range for purposes of intra-SSID mobility. |
| Notes | This element is part of a list key. |
| Introduced | 21.7.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

http-redirect-policy *reference*

| | |
|----------|---|
| Synopsis | Default HTTP redirect policy for portal authentication |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> wlan-gw vlan-range <i>string</i> http-redirect-policy <i>reference</i> |
| Tree | http-redirect-policy |

| | |
|------------|---|
| Reference | configure subscriber-mgmt http-redirect-policy <i>string</i> |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

idle-timeout-action *keyword*

| | |
|------------|--|
| Synopsis | Action to perform when the idle timeout expires |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> wlan-gw vlan-range <i>string</i> idle-timeout-action <i>keyword</i> |
| Tree | idle-timeout-action |
| Default | remove |
| Options | remove, shcv |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

I2-service

| | |
|------------|--|
| Synopsis | Enable the I2-service context |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> group-interface <i>string</i> wlan-gw vlan-range <i>string</i> I2-service |
| Tree | I2-service |
| Introduced | 16.0.R1 |

down

| | |
|-------------|--|
| Synopsis | Enter the down context |
| Context | configure service ies string subscriber-interface string hold-time ipv4 down |
| Tree | down |
| Description | Commands in this context configure the down hold timer, which specifies the delay before activating the associated interface. The delay is invoked whenever the system attempts to bring the associated IP interface up, unless an operator configures the init-only command. |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

init-only *boolean*

| | |
|-------------|---|
| Synopsis | Apply delay only at interface configuration or reboot |
| Context | configure service ies string subscriber-interface string hold-time ipv4 down init-only boolean |
| Tree | init-only |
| Description | This command applies a delay only when the IP interface is first configured or after a system reboot. |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

seconds *number*

| | |
|----------|--|
| Synopsis | Down hold time for the IP interface |
| Context | configure service ies string subscriber-interface string hold-time ipv4 down seconds number |

| | |
|------------|---|
| Tree | seconds |
| Range | 1 to 1200 |
| Units | seconds |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

up

| | |
|-------------|---|
| Synopsis | Enter the up context |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> hold-time ipv4 up |
| Tree | up |
| Description | Commands in this context configure the up hold timer, which specifies the delay before deactivation of the associated interface. The delay is invoked whenever the system attempts to bring the associated IP interface down. |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

seconds *number*

| | |
|------------|---|
| Synopsis | Up hold time for the IP interface |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> hold-time ipv4 up seconds <i>number</i> |
| Tree | seconds |
| Range | 1 to 1200 |
| Units | seconds |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

ipv6

| | |
|------------|--|
| Synopsis | Enter the ipv6 context |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> hold-time ipv6 |
| Tree | ipv6 |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

down

| | |
|-------------|---|
| Synopsis | Enter the down context |
| Context | configure service ies string subscriber-interface string hold-time ipv6 down |
| Tree | down |
| Description | Commands in this context configure the down hold timer, which specifies the delay before activation of the associated interface. The delay is invoked whenever the system attempts to bring the associated IP interface up, unless an operator configures the init-only command. |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

init-only boolean

| | |
|-------------|--|
| Synopsis | Apply delay only at interface configuration or reboot |
| Context | configure service ies string subscriber-interface string hold-time ipv6 down init-only boolean |
| Tree | init-only |
| Description | This command applies the delay only when when the IP interface is first configured or after a system reboot. |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

seconds number

| | |
|------------|--|
| Synopsis | Down hold time for the IP interface |
| Context | configure service ies string subscriber-interface string hold-time ipv6 down seconds number |
| Tree | seconds |
| Range | 1 to 1200 |
| Units | seconds |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

up

| | |
|-------------|---|
| Synopsis | Enter the up context |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> hold-time ipv6 up |
| Tree | up |
| Description | Commands in this context configure the up hold timer, which specifies the delay before deactivation of the associated interface. The delay is invoked whenever the system attempts to bring the associated IP interface down. |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

seconds *number*

| | |
|------------|---|
| Synopsis | Up hold time for the IP interface |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> hold-time ipv6 up seconds <i>number</i> |
| Tree | seconds |
| Range | 1 to 1200 |
| Units | seconds |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

ipoe-linking

| | |
|------------|---|
| Synopsis | Enter the ipoe-linking context |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> ipoe-linking |
| Tree | ipoe-linking |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

gratuitous-router-advertisement *boolean*

| | |
|----------|--|
| Synopsis | Send unsolicited router advertisement after DHCP setup |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> ipoe-linking gratuitous-router-advertisement <i>boolean</i> |
| Tree | gratuitous-router-advertisement |
| Default | false |

Introduced 16.0.R1
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

ipoe-session

Synopsis Enter the **ipoe-session** context
Context **configure** [service](#) [ies](#) *string* [subscriber-interface](#) *string* [ipoe-session](#)
Tree [ipoe-session](#)
Introduced 16.0.R1
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

session-limit *number*

Synopsis Maximum number of sessions on this group interface
Context **configure** [service](#) [ies](#) *string* [subscriber-interface](#) *string* [ipoe-session](#) **session-limit** *number*
Tree [session-limit](#)
Range 1 to 500000
Introduced 16.0.R1
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

ipv4

Synopsis Enter the **ipv4** context
Context **configure** [service](#) [ies](#) *string* [subscriber-interface](#) *string* [ipv4](#)
Tree [ipv4](#)
Introduced 16.0.R1
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

address [[ipv4-address](#)] *string*

Synopsis Enter the **address** list instance
Context **configure** [service](#) [ies](#) *string* [subscriber-interface](#) *string* [ipv4](#) **address** *string*
Tree [address](#)
Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

[ipv4-address] *string*

Synopsis IP address associated with the subscriber subnet

Context **configure** *service ies string subscriber-interface string ipv4 address string*

Tree *address*

Notes This element is part of a list key.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

gateway *string*

Synopsis Gateway IP address within the subnet for SRRP routing

Context **configure** *service ies string subscriber-interface string ipv4 address string gateway string*

Tree *gateway*

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

holdup-time *number*

Synopsis Wait time before accepting new state attribute

Context **configure** *service ies string subscriber-interface string ipv4 address string holdup-time number*

Tree *holdup-time*

Range 100 to 5000

Units milliseconds

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

populate-host-routes *boolean*

Synopsis Populate subscriber host routes in local FIB

Context **configure** *service ies string subscriber-interface string ipv4 address string populate-host-routes boolean*

| | |
|------------|---|
| Tree | populate-host-routes |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

prefix-length *number*

| | |
|------------|---|
| Synopsis | IPv4 address prefix length |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> ipv4 <i>address</i> <i>string</i> prefix-length <i>number</i> |
| Tree | prefix-length |
| Range | 0 to 32 |
| Notes | This element is mandatory. |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

track-srrp *number*

| | |
|------------|--|
| Synopsis | SRRP instance whose state is tracked on this IP address |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> ipv4 <i>address</i> <i>string</i> track-srrp <i>number</i> |
| Tree | track-srrp |
| Range | 1 to 4294967295 |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

allow-unmatching-subnets *boolean*

| | |
|------------|--|
| Synopsis | Allow subscriber hosts without a matching subnet |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> ipv4 allow-unmatching-subnets <i>boolean</i> |
| Tree | allow-unmatching-subnets |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

default-dns *string*

| | |
|----------------|--|
| Synopsis | Default DNS server addresses |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> ipv4 default-dns <i>string</i> |
| Tree | default-dns |
| Max. Instances | 2 |
| Notes | This element is ordered by the user. |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

dhcp

| | |
|------------|---|
| Synopsis | Enter the dhcp context |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> ipv4 dhcp |
| Tree | dhcp |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

admin-state *keyword*

| | |
|------------|--|
| Synopsis | Administrative state of DHCP |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> ipv4 dhcp admin-state <i>keyword</i> |
| Tree | admin-state |
| Options | enable, disable |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

client-applications

| | |
|------------|---|
| Synopsis | Enter the client-applications context |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> ipv4 dhcp client-applications |
| Tree | client-applications |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

dhcp *boolean*

| | |
|------------|---|
| Synopsis | Enable IPoE clients to use DHCP relay or proxy server |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> ipv4 dhcp client-applications dhcp <i>boolean</i> |
| Tree | dhcp |
| Default | true |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

ppp *boolean*

| | |
|------------|---|
| Synopsis | Enable PPPoE clients to use DHCP relay or proxy server |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> ipv4 dhcp client-applications ppp boolean |
| Tree | ppp |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

description *string*

| | |
|---------------|---|
| Synopsis | Text description |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> ipv4 dhcp description <i>string</i> |
| Tree | description |
| String Length | 1 to 80 |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

gi-address *string*

| | |
|----------|--|
| Synopsis | GI address for the DHCP relay |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> ipv4 dhcp gi-address <i>string</i> |
| Tree | gi-address |

| | |
|-------------|---|
| Description | <p>This command configures the GI address to distinguish between the different subscriber interfaces (and potentially group interfaces) defined when the router functions as a DHCP relay.</p> <p>By default, the GI address used in the relayed DHCP packet is the primary IP address of a normal IES interface. Specifying the GI address allows the user to choose a secondary address. For group interfaces, a GI address must be specified under the group interface DHCP context or subscriber interface DHCP context for DHCP to function.</p> |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

lease-populate

| | |
|------------|--|
| Synopsis | Enter the lease-populate context |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> ipv4 dhcp lease-populate |
| Tree | lease-populate |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

max-leases *number*

| | |
|------------|---|
| Synopsis | Maximum number of DHCPv4 leases |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> ipv4 dhcp lease-populate max-leases <i>number</i> |
| Tree | max-leases |
| Range | 0 to 511999 |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

option-82

| | |
|-------------|---|
| Synopsis | Enter the option-82 context |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> ipv4 dhcp option-82 |
| Tree | option-82 |
| Description | Commands in this context configure the processing required when the router receives a DHCP request that already has an Option 82 field in the packet. |
| Introduced | 16.0.R1 |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

vendor-specific-option

Synopsis Enter the **vendor-specific-option** context

Context **configure service ies string subscriber-interface string ipv4 dhcp option-82 vendor-specific-option**

Tree [vendor-specific-option](#)

Description Commands in this context configure the Nokia Vendor-Specific Option (VSO) of the DHCP packet.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

client-mac-address *boolean*

Synopsis Send the MAC address in the VSO

Context **configure service ies string subscriber-interface string ipv4 dhcp option-82 vendor-specific-option client-mac-address *boolean***

Tree [client-mac-address](#)

Default false

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

sap-id *boolean*

Synopsis Send SAP ID in the sub-option of the DHCP relay packet

Context **configure service ies string subscriber-interface string ipv4 dhcp option-82 vendor-specific-option sap-id *boolean***

Tree [sap-id](#)

Default false

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

service-id *boolean*

Synopsis Send the service ID in the Vendor Specific Option

| | |
|------------|---|
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> ipv4 dhcp option-82 vendor-specific-option service-id <i>boolean</i> |
| Tree | service-id |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

string *string*

| | |
|---------------|--|
| Synopsis | User-defined ASCII string for the VSO |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> ipv4 dhcp option-82 vendor-specific-option string <i>string</i> |
| Tree | string |
| String Length | 1 to 32 |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

system-id *boolean*

| | |
|------------|--|
| Synopsis | Send the system ID in the VSO |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> ipv4 dhcp option-82 vendor-specific-option system-id <i>boolean</i> |
| Tree | system-id |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

proxy-server

| | |
|------------|--|
| Synopsis | Enter the proxy-server context |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> ipv4 dhcp proxy-server |
| Tree | proxy-server |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

admin-state *keyword*

| | |
|------------|--|
| Synopsis | Administrative state of the DHCP proxy server |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> ipv4 dhcp proxy-server admin-state <i>keyword</i> |
| Tree | admin-state |
| Default | disable |
| Options | enable, disable |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

emulated-server *string*

| | |
|------------|---|
| Synopsis | IP address used as DHCP server address in SAP context |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> ipv4 dhcp proxy-server emulated-server <i>string</i> |
| Tree | emulated-server |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

lease-time

| | |
|------------|--|
| Synopsis | Enter the lease-time context |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> ipv4 dhcp proxy-server lease-time |
| Tree | lease-time |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

radius-override *boolean*

| | |
|------------|--|
| Synopsis | Use lease time information provided by RADIUS server |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> ipv4 dhcp proxy-server lease-time radius-override <i>boolean</i> |
| Tree | radius-override |
| Default | false |
| Introduced | 16.0.R1 |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

value *number*

Synopsis DHCP lease time

Context **configure** [service ies](#) *string* [subscriber-interface](#) *string* [ipv4 dhcp proxy-server lease-time](#) *value number*

Tree [value](#)

Range 300 to 315446399

Units seconds

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

python-policy *reference*

Synopsis Python policy

Context **configure** [service ies](#) *string* [subscriber-interface](#) *string* [ipv4 dhcp python-policy](#) *reference*

Tree [python-policy](#)

Reference **configure** [python](#) [python-policy](#) *string*

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

relay-proxy

Synopsis Enable the **relay-proxy** context

Context **configure** [service ies](#) *string* [subscriber-interface](#) *string* [ipv4 dhcp relay-proxy](#)

Tree [relay-proxy](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

release-update-src-ip *boolean*

Synopsis Update the source IP address of a DHCP RELEASE message

Context **configure** [service ies](#) *string* [subscriber-interface](#) *string* [ipv4 dhcp relay-proxy](#) [release-update-src-ip](#) *boolean*

| | |
|------------|---|
| Tree | release-update-src-ip |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

siaddr-override *string*

| | |
|------------|---|
| Synopsis | DHCP server IP address for address hiding function |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> ipv4 dhcp relay-proxy siaddr-override <i>string</i> |
| Tree | siaddr-override |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

release-include-gi-address *boolean*

| | |
|------------|---|
| Synopsis | Include the GI address in DHCP relay messages |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> ipv4 dhcp release-include-gi-address <i>boolean</i> |
| Tree | release-include-gi-address |
| Default | false |
| Introduced | 21.7.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

server *string*

| | |
|----------------|--|
| Synopsis | DHCP server IP addresses |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> ipv4 dhcp server <i>string</i> |
| Tree | server |
| Max. Instances | 8 |
| Notes | This element is ordered by the user. |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

src-ip-addr *keyword*

| | |
|------------|--|
| Synopsis | Type of source address to use for DHCP relay |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> ipv4 dhcp src-ip-addr <i>keyword</i> |
| Tree | src-ip-addr |
| Default | auto |
| Options | auto, gi-address |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

virtual-subnet *boolean*

| | |
|------------|---|
| Synopsis | Enable a virtual subnet for DHCPv4 hosts |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> ipv4 dhcp virtual-subnet <i>boolean</i> |
| Tree | virtual-subnet |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

export-host-routes *boolean*

| | |
|------------|---|
| Synopsis | Allow export of subscriber management host routes |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> ipv4 export-host-routes <i>boolean</i> |
| Tree | export-host-routes |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

unnumbered

| | |
|------------|--|
| Synopsis | Enter the unnumbered context |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> ipv4 unnumbered |
| Tree | unnumbered |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

ip-address *string*

| | |
|------------|--|
| Synopsis | IP address for the subscriber interface |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> ipv4 unnumbered ip-address <i>string</i> |
| Tree | ip-address |
| Notes | The following elements are part of a choice: ip-address or ip-int-name . |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

ip-int-name *string*

| | |
|---------------|---|
| Synopsis | Interface name from which an IPv4 address is borrowed |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> ipv4 unnumbered ip-int-name <i>string</i> |
| Tree | ip-int-name |
| String Length | 1 to 32 |
| Notes | The following elements are part of a choice: ip-address or ip-int-name . |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

ipv6

| | |
|------------|--|
| Synopsis | Enable the ipv6 context |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> ipv6 |
| Tree | ipv6 |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

address [[ipv6-address](#)] *string*

| | |
|------------|--|
| Synopsis | Enter the address list instance |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> ipv6 address <i>string</i> |
| Tree | address |
| Introduced | 16.0.R1 |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

[ipv6-address] *string*

Synopsis IPv6 address for the subscriber interface
 Context **configure** *service ies string subscriber-interface string ipv6 address string*
 Tree [address](#)
 Notes This element is part of a list key.
 Introduced 16.0.R1
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

host-type *keyword*

WARNING:

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis Host type for subscriber interface prefixes
 Context **configure** *service ies string subscriber-interface string ipv6 address string host-type keyword*
 Tree [host-type](#)
 Default pd
 Options pd, wan, pd-wan
 Introduced 16.0.R1
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

prefix-length *number*

Synopsis IPv6 address prefix length
 Context **configure** *service ies string subscriber-interface string ipv6 address string prefix-length number*
 Tree [prefix-length](#)
 Range 0 to 128
 Notes This element is mandatory.
 Introduced 16.0.R1
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

allow-multiple-wan-addresses *boolean*

| | |
|------------|--|
| Synopsis | Allow multiple WAN addresses |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> ipv6 allow-multiple-wan-addresses <i>boolean</i> |
| Tree | allow-multiple-wan-addresses |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

allow-unmatching-prefixes *boolean*

| | |
|------------|---|
| Synopsis | Allow subscriber hosts without a matching prefix |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> ipv6 allow-unmatching-prefixes <i>boolean</i> |
| Tree | allow-unmatching-prefixes |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

default-dns *string*

| | |
|----------------|--|
| Synopsis | Default DNS server addresses |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> ipv6 default-dns <i>string</i> |
| Tree | default-dns |
| Max. Instances | 2 |
| Notes | This element is ordered by the user. |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

delegated-prefix-length (*number* | *keyword*)

| | |
|----------|---|
| Synopsis | IPv6 delegated prefix length |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> ipv6 delegated-prefix-length (<i>number</i> <i>keyword</i>) |

| | |
|------------|---|
| Tree | delegated-prefix-length |
| Range | 48 to 64 |
| Default | 64 |
| Options | variable |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

dhcp6

| | |
|------------|--|
| Synopsis | Enter the dhcp6 context |
| Context | configure service ies string subscriber-interface string ipv6 dhcp6 |
| Tree | dhcp6 |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

override-slaac *boolean*

| | |
|------------|--|
| Synopsis | Allow WAN address offered by DHCP to overwrite the WAN address acquired from SLAAC |
| Context | configure service ies string subscriber-interface string ipv6 dhcp6 override-slaac <i>boolean</i> |
| Tree | override-slaac |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

pd-managed-route

| | |
|------------|---|
| Synopsis | Enable the pd-managed-route context |
| Context | configure service ies string subscriber-interface string ipv6 dhcp6 pd-managed-route |
| Tree | pd-managed-route |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

next-hop *keyword*

| | |
|------------|--|
| Synopsis | Next hop type |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> ipv6 dhcp6 pd-managed-route next-hop <i>keyword</i> |
| Tree | next-hop |
| Default | ipv6 |
| Options | ipv4, ipv6 |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

proxy-server

| | |
|------------|---|
| Synopsis | Enter the proxy-server context |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> ipv6 dhcp6 proxy-server |
| Tree | proxy-server |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

admin-state *keyword*

| | |
|------------|---|
| Synopsis | Administrative state of the DHCPv6 proxy server |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> ipv6 dhcp6 proxy-server admin-state <i>keyword</i> |
| Tree | admin-state |
| Default | disable |
| Options | enable, disable |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

client-applications

| | |
|------------|--|
| Synopsis | Enter the client-applications context |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> ipv6 dhcp6 proxy-server client-applications |
| Tree | client-applications |
| Introduced | 16.0.R1 |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

dhcp boolean

Synopsis Enable IPoE clients to use DHCP relay or proxy server

Context **configure** [service ies string subscriber-interface string ipv6 dhcp6 proxy-server client-applications dhcp boolean](#)

Tree [dhcp](#)

Default true

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

ppp boolean

Synopsis Allow the PPP application to use DHCP relay functionality

Context **configure** [service ies string subscriber-interface string ipv6 dhcp6 proxy-server client-applications ppp boolean](#)

Tree [ppp](#)

Default false

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

preferred-lifetime (number | keyword)

Synopsis Time for prefix to remain preferred on this interface

Context **configure** [service ies string subscriber-interface string ipv6 dhcp6 proxy-server preferred-lifetime \(number | keyword\)](#)

Tree [preferred-lifetime](#)

Range 300 to 4294967294

Default 3600

Units seconds

Options infinite

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

rebind-timer *number*

| | |
|------------|---|
| Synopsis | Rebind timer (T2) for this interface |
| Context | configure service ies string subscriber-interface string ipv6 dhcp6 proxy-server rebind-timer <i>number</i> |
| Tree | rebind-timer |
| Range | 0 to 1209600 |
| Default | 2880 |
| Units | seconds |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

renew-timer *number*

| | |
|------------|--|
| Synopsis | Renew timer (T1) |
| Context | configure service ies string subscriber-interface string ipv6 dhcp6 proxy-server renew-timer <i>number</i> |
| Tree | renew-timer |
| Range | 0 to 604800 |
| Default | 1800 |
| Units | seconds |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

server-id

| | |
|------------|--|
| Synopsis | Enter the server-id context |
| Context | configure service ies string subscriber-interface string ipv6 dhcp6 proxy-server server-id |
| Tree | server-id |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

duid-en-ascii *string*

| | |
|----------|---|
| Synopsis | Vendor-assigned ID based on Enterprise Number (DUID-EN) |
|----------|---|

| | |
|---------------|--|
| Context | configure service ies string subscriber-interface string ipv6 dhcp6 proxy-server server-id duid-en-ascii string |
| Tree | duid-en-ascii |
| String Length | 1 to 58 |
| Notes | The following elements are part of a choice: duid-en-ascii , duid-en-hex , or duid-ll . |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

duid-en-hex string

| | |
|---------------|--|
| Synopsis | DUID system ID in hexadecimal format |
| Context | configure service ies string subscriber-interface string ipv6 dhcp6 proxy-server server-id duid-en-hex string |
| Tree | duid-en-hex |
| String Length | 1 to 118 |
| Notes | The following elements are part of a choice: duid-en-ascii , duid-en-hex , or duid-ll . |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

duid-ll

| | |
|------------|--|
| Synopsis | Use link-layer address (DUID-LL) as DUID |
| Context | configure service ies string subscriber-interface string ipv6 dhcp6 proxy-server server-id duid-ll |
| Tree | duid-ll |
| Notes | The following elements are part of a choice: duid-en-ascii , duid-en-hex , or duid-ll . |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

valid-lifetime (number | keyword)

| | |
|----------|---|
| Synopsis | Time for prefix to remain valid on this interface |
| Context | configure service ies string subscriber-interface string ipv6 dhcp6 proxy-server valid-lifetime (number keyword) |
| Tree | valid-lifetime |
| Range | 300 to 4294967294 |

| | |
|------------|---|
| Default | 86400 |
| Units | seconds |
| Options | infinite |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

python-policy *reference*

| | |
|------------|--|
| Synopsis | Python policy |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> ipv6 dhcp6 python-policy reference |
| Tree | python-policy |
| Reference | configure python python-policy <i>string</i> |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

relay

| | |
|------------|--|
| Synopsis | Enter the relay context |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> ipv6 dhcp6 relay |
| Tree | relay |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

admin-state *keyword*

| | |
|------------|--|
| Synopsis | Administrative state of DHCPv6 Relay |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> ipv6 dhcp6 relay admin-state keyword |
| Tree | admin-state |
| Default | disable |
| Options | enable, disable |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

client-applications

| | |
|------------|--|
| Synopsis | Enter the client-applications context |
| Context | configure service ies string subscriber-interface string ipv6 dhcp6 relay client-applications |
| Tree | client-applications |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

dhcp boolean

| | |
|------------|---|
| Synopsis | Enable IPoE clients to use DHCP relay or proxy server |
| Context | configure service ies string subscriber-interface string ipv6 dhcp6 relay client-applications dhcp boolean |
| Tree | dhcp |
| Default | true |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

ppp boolean

| | |
|------------|--|
| Synopsis | Allow the PPP application to use DHCP relay functionality |
| Context | configure service ies string subscriber-interface string ipv6 dhcp6 relay client-applications ppp boolean |
| Tree | ppp |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

description string

| | |
|---------------|---|
| Synopsis | Text description |
| Context | configure service ies string subscriber-interface string ipv6 dhcp6 relay description string |
| Tree | description |
| String Length | 1 to 80 |
| Introduced | 16.0.R1 |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

lease-split

Synopsis Enter the **lease-split** context

Context **configure service ies string subscriber-interface string ipv6 dhcp6 relay lease-split**

Tree **lease-split**

Description Commands in this context configure DHCPv6 lease split.

DHCPv6 lease split is active when administratively enabled and for all IA_NA and IA_PD options in the transaction, the configured lease split valid lifetime (short lease time) is less than or equal to one of the following:

- the renew time T1 committed by the server (long renew time)
- half of the preferred lifetime committed by the server when T1 committed by the server equals zero

Introduced 21.2.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

admin-state *keyword*

Synopsis Administrative state of DHCPv6 lease split

Context **configure service ies string subscriber-interface string ipv6 dhcp6 relay lease-split admin-state keyword**

Tree **admin-state**

Default disable

Options enable, disable

Introduced 21.2.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

valid-lifetime *number*

Synopsis DHCPv6 lease split valid lifetime (short lease time)

Context **configure service ies string subscriber-interface string ipv6 dhcp6 relay lease-split valid-lifetime number**

Tree **valid-lifetime**

Range 300 to 315446399

Default 3600

Units seconds

Introduced 21.2.R1
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

link-address *string*

Synopsis Link address for the DHCPv6 relay messages
Context **configure** [service](#) [ies](#) *string* [subscriber-interface](#) *string* [ipv6](#) [dhcp6](#) [relay](#) [link-address](#) *string*
Tree [link-address](#)
Introduced 16.0.R1
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

server *string*

Synopsis DHCP6 server(s) to which the DHCP6 requests are forwarded
Context **configure** [service](#) [ies](#) *string* [subscriber-interface](#) *string* [ipv6](#) [dhcp6](#) [relay](#) [server](#) *string*
Tree [server](#)
Max. Instances 8
Notes This element is ordered by the user.
Introduced 16.0.R1
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

source-address *string*

Synopsis Source IPv6 address for the DHCPv6 relay messages
Context **configure** [service](#) [ies](#) *string* [subscriber-interface](#) *string* [ipv6](#) [dhcp6](#) [relay](#) [source-address](#) *string*
Tree [source-address](#)
Introduced 16.0.R1
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

ipoe-bridged-mode *boolean*

Synopsis Enable IPv6 IPoE bridged mode
Context **configure** [service](#) [ies](#) *string* [subscriber-interface](#) *string* [ipv6](#) [ipoe-bridged-mode](#) *boolean*

| | |
|------------|---|
| Tree | ipoe-bridged-mode |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

link-local-address

| | |
|------------|---|
| Synopsis | Enter the link-local-address context |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> ipv6 link-local-address |
| Tree | link-local-address |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

address *string*

| | |
|------------|---|
| Synopsis | IPv6 link local address |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> ipv6 link-local-address address <i>string</i> |
| Tree | address |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

prefix [[ipv6-prefix](#)] *string*

| | |
|------------|---|
| Synopsis | Enter the prefix list instance |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> ipv6 prefix <i>string</i> |
| Tree | prefix |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

[[ipv6-prefix](#)] *string*

| | |
|----------|---|
| Synopsis | IPv6 address for a router interface |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> ipv6 prefix <i>string</i> |
| Tree | prefix |

| | |
|------------|---|
| Notes | This element is part of a list key. |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

holdup-time *number*

| | |
|------------|---|
| Synopsis | Time to wait before route accepts new state attribute |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> ipv6 prefix <i>string</i> holdup-time <i>number</i> |
| Tree | holdup-time |
| Range | 100 to 5000 |
| Units | milliseconds |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

host-type *keyword*

WARNING:

Modifying this element recreates the parent element automatically for the new value to take effect.

| | |
|------------|--|
| Synopsis | Host type for subscriber interface prefixes |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> ipv6 prefix <i>string</i> host-type <i>keyword</i> |
| Tree | host-type |
| Default | pd |
| Options | pd, wan, pd-wan |
| Introduced | 16.0.R1 |

| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

ppp *boolean*

| | |
|------------|---|
| Synopsis | Request local addresses for PPP IPCP hosts |
| Context | configure service ies string subscriber-interface string local-address-assignment ipv4 client-applications ppp <i>boolean</i> |
| Tree | ppp |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

default-pool *string*

| | |
|----------------|--|
| Synopsis | Default pools |
| Context | configure service ies string subscriber-interface string local-address-assignment ipv4 default-pool <i>string</i> |
| Tree | default-pool |
| String Length | 1 to 32 |
| Max. Instances | 2 |
| Notes | This element is ordered by the user. |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

server *reference*

| | |
|------------|---|
| Synopsis | Local DHCP server that contains pools for local address assignment |
| Context | configure service ies string subscriber-interface string local-address-assignment ipv4 server <i>reference</i> |
| Tree | server |
| Reference | configure router string dhcp-server dhcpv4 string |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

ipv6

| | |
|------------|---|
| Synopsis | Enter the ipv6 context |
| Context | configure service ies string subscriber-interface string local-address-assignment ipv6 |
| Tree | ipv6 |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

client-applications

| | |
|------------|---|
| Synopsis | Enter the client-applications context |
| Context | configure service ies string subscriber-interface string local-address-assignment ipv6 client-applications |
| Tree | client-applications |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

ipoe-slaac *boolean*

| | |
|------------|--|
| Synopsis | Request local addresses for IPoE SLAAC hosts |
| Context | configure service ies string subscriber-interface string local-address-assignment ipv6 client-applications ipoe-slaac boolean |
| Tree | ipoe-slaac |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

ipoe-wan *boolean*

| | |
|------------|--|
| Synopsis | Request local addresses for IPoE IA NA hosts |
| Context | configure service ies string subscriber-interface string local-address-assignment ipv6 client-applications ipoe-wan boolean |
| Tree | ipoe-wan |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

ppp-slaac *boolean*

| | |
|------------|--|
| Synopsis | Request local addresses for PPP SLAAC hosts |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> local-address-assignment ipv6 client-applications ppp-slaac <i>boolean</i> |
| Tree | ppp-slaac |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

server *reference*

| | |
|------------|---|
| Synopsis | Local DHCPv6 server that contains pools for local address assignment |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> local-address-assignment ipv6 server <i>reference</i> |
| Tree | server |
| Reference | configure router <i>string</i> dhcp-server dhcpv6 <i>string</i> |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

pppoe

| | |
|------------|---|
| Synopsis | Enter the pppoe context |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> pppoe |
| Tree | pppoe |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

description *string*

| | |
|---------------|---|
| Synopsis | Text description |
| Context | configure service ies <i>string</i> subscriber-interface <i>string</i> pppoe description <i>string</i> |
| Tree | description |
| String Length | 1 to 80 |
| Introduced | 16.0.R1 |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

session-limit *number*

Synopsis Maximum PPPoE sessions
 Context **configure** *service ies string subscriber-interface string pppoe session-limit number*
 Tree [session-limit](#)
 Range 1 to 333823
 Default 1
 Introduced 16.0.R1
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

wan-mode *keyword*

WARNING:

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis Mode of operation for hosts with /128 WAN IPv6 address
 Context **configure** *service ies string subscriber-interface string wan-mode keyword*
 Tree [wan-mode](#)
 Default mode64
 Options mode64, mode128
 Introduced 16.0.R1
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

wlan-gw

Synopsis Enable the **wlan-gw** context
 Context **configure** *service ies string subscriber-interface string wlan-gw*
 Tree [wlan-gw](#)
 Introduced 16.0.R1
 Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

pool-manager

| | |
|------------|--|
| Synopsis | Enter the pool-manager context |
| Context | configure service ies string subscriber-interface string wlan-gw pool-manager |
| Tree | pool-manager |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

dhcp6-client

| | |
|------------|---|
| Synopsis | Enter the dhcp6-client context |
| Context | configure service ies string subscriber-interface string wlan-gw pool-manager dhcp6-client |
| Tree | dhcp6-client |

| Tree | subscriber-mgmt |
| Introduced | 22.2.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

multi-chassis-shunt-id *number*

| | |
|-------------|---|
| Synopsis | Shunt ID for a pair of resilient nodes |
| Context | configure service ies <i>string</i> subscriber-mgmt multi-chassis-shunt-id <i>number</i> |
| Tree | multi-chassis-shunt-id |
| Description | <p>This command configures the shunt ID that is used to shunt downstream traffic from a standby node to an active node. Because this ID identifies the traffic service on the standby node, the same ID must be configured per service on each node.</p> <p>This configuration is required for BNG CUPS inter-UPF resiliency shunting, but not for non-BNG CUPS shunting. However, when configured, it is also used for shunting non-BNG CUPS sessions in the same service.</p> |
| Range | 1 to 8191 |
| Introduced | 22.2.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

up-resiliency

| | |
|------------|---|
| Synopsis | Enter the up-resiliency context |
| Context | configure service ies string subscriber-mgmt up-resiliency |
| Tree | up-resiliency |
| Introduced | 22.2.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

monitor-oper-group [[oper-group](#)] *reference*

| | |
|----------------|---|
| Synopsis | Enter the monitor-oper-group list instance |
| Context | configure service ies string subscriber-mgmt up-resiliency monitor-oper-group <i>reference</i> |
| Tree | monitor-oper-group |
| Description | Commands in this context define parameters to derive the service health based on monitored operational groups. The BNG UPF sends the health value to the BNG CPF. The BNG CPF uses the value to determine the need for a BNG UPF status change (active or standby).

Note:
The following is only applicable for the configure service vpls capture-sap context. If the configured groups are not the same for all capture SAPs sharing the same underlying port or LAG, the configuration of a Layer 2 access ID alias is required, or else the system chooses arbitrarily one set of configured groups. |
| Max. Instances | 4 |
| Introduced | 22.2.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

[[oper-group](#)] *reference*

| | |
|------------|---|
| Synopsis | Operational group name |
| Context | configure service ies string subscriber-mgmt up-resiliency monitor-oper-group <i>reference</i> |
| Tree | monitor-oper-group |
| Reference | configure service oper-group string |
| Notes | This element is part of a list key. |
| Introduced | 22.2.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

health-drop *number*

| | |
|-------------|---|
| Synopsis | Number subtracted from the health value per failure |
| Context | configure service ies <i>string</i> subscriber-mgmt up-resiliency monitor-oper-group <i>reference</i> health-drop <i>number</i> |
| Tree | health-drop |
| Description | This command defines how the failure of an operational group member affects the health value. The base health value is 255; the value decreases with the defined number per member failure to a minimum of 0. |
| Range | 1 to 255 |
| Default | 1 |
| Introduced | 22.2.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

| Synopsis | Text description |
| Context | configure service ipipe <i>string endpoint string description string</i> |
| Tree | description |
| String Length | 1 to 80 |
| Introduced | 20.10.R1 |
| Platforms | All |

hold-time-active *number*

| | |
|----------|---|
| Synopsis | Time to hold the active state before entering standby when a local MC-LAG SAP goes down |
| Context | configure service ipipe <i>string endpoint string hold-time-active number</i> |
| Tree | hold-time-active |
| Range | 1 to 60 |

| | |
|------------|-------------|
| Units | deciseconds |
| Introduced | 20.10.R1 |
| Platforms | All |

revert-time (*number* | *keyword*)

| | |
|------------|---|
| Synopsis | Time to wait before reverting back to the primary spoke-sdp defined on this service endpoint |
| Context | configure service ipipe <i>string</i> endpoint <i>string</i> revert-time (<i>number</i> <i>keyword</i>) |
| Tree | revert-time |
| Range | 1 to 600 |
| Default | immediate |
| Units | seconds |
| Options | never, immediate |
| Introduced | 20.10.R1 |
| Platforms | All |

standby-signaling *keyword*

| | |
|------------|---|
| Synopsis | Endpoint behavior for status of sending PW standby bit |
| Context | configure service ipipe <i>string</i> endpoint <i>string</i> standby-signaling <i>keyword</i> |
| Tree | standby-signaling |
| Options | master |
| Introduced | 20.10.R1 |
| Platforms | All |

sap [[sap-id](#)] *string*

| | |
|------------|--|
| Synopsis | Enter the sap list instance |
| Context | configure service ipipe <i>string</i> sap <i>string</i> |
| Tree | sap |
| Introduced | 20.10.R1 |
| Platforms | All |

[sap-id] string

| | |
|---------------|--|
| Synopsis | SAP ID |
| Context | configure service ipipe <i>string</i> sap <i>string</i> |
| Tree | sap |
| String Length | 1 to 45 |
| Notes | This element is part of a list key. |
| Introduced | 20.10.R1 |
| Platforms | All |

accounting-policy reference

| | |
|------------|---|
| Synopsis | Accounting policy |
| Context | configure service ipipe <i>string</i> sap <i>string</i> accounting-policy <i>reference</i> |
| Tree | accounting-policy |
| Reference | configure log accounting-policy <i>number</i> |
| Introduced | 20.10.R1 |
| Platforms | All |

admin-state keyword

| | |
|------------|---|
| Synopsis | Administrative state of the SAP |
| Context | configure service ipipe <i>string</i> sap <i>string</i> admin-state <i>keyword</i> |
| Tree | admin-state |
| Default | enable |
| Options | enable, disable |
| Introduced | 20.10.R1 |
| Platforms | All |

app-profile reference

| | |
|-----------|---|
| Synopsis | Application profile name |
| Context | configure service ipipe <i>string</i> sap <i>string</i> app-profile <i>reference</i> |
| Tree | app-profile |
| Reference | configure application-assurance group <i>number</i> partition <i>number</i> policy app-profile <i>string</i> |

| | |
|------------|--|
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

bandwidth *number*

| | |
|------------|--|
| Synopsis | SAP bandwidth |
| Context | configure service ipipe <i>string</i> sap <i>string</i> bandwidth <i>number</i> |
| Tree | bandwidth |
| Range | 1 to 6400000000 |
| Units | kilobps |
| Introduced | 20.10.R1 |
| Platforms | All |

ce-address (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

| | |
|------------|---|
| Synopsis | IP address of the CE device |
| Context | configure service ipipe <i>string</i> sap <i>string</i> ce-address (<i>ipv4-address-no-zone</i> <i>ipv6-address-no-zone</i>) |
| Tree | ce-address |
| Introduced | 20.10.R1 |
| Platforms | All |

collect-stats *boolean*

| | |
|------------|---|
| Synopsis | Collect accounting statistics |
| Context | configure service ipipe <i>string</i> sap <i>string</i> collect-stats <i>boolean</i> |
| Tree | collect-stats |
| Default | false |
| Introduced | 20.10.R1 |
| Platforms | All |

cpu-protection

| | |
|----------|---|
| Synopsis | Enter the cpu-protection context |
| Context | configure service ipipe <i>string</i> sap <i>string</i> cpu-protection |
| Tree | cpu-protection |

Introduced 20.10.R1
 Platforms 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS

mac-monitoring

Synopsis Monitor MAC for CPU protection
 Context **configure** [service](#) [ipipe](#) *string* [sap](#) *string* [cpu-protection](#) [mac-monitoring](#)

egress

Synopsis Enter the **egress** context
 Context **configure service ipipe string sap string egress**
 Tree **egress**
 Introduced 20.10.R1
 Platforms All

agg-rate

Synopsis Enter the **agg-rate** context
 Context **configure service ipipe string sap string egress agg-rate**
 Tree **agg-rate**
 Introduced 20.10.R1
 Platforms All

adaptation-rule *keyword*

Synopsis Adaptation rule to compute the operational PIR value when an aggregate shaper is used
 Context **configure service ipipe string sap string egress agg-rate adaptation-rule *keyword***
 Tree **adaptation-rule**
 Default closest
 Options max, min, closest
 Introduced 22.10.R1
 Platforms 7750 SR-1, 7750 SR-s

burst-limit (*number | keyword*)

Synopsis Shaping burst size when an aggregate shaper is used
 Context **configure service ipipe string sap string egress agg-rate burst-limit (*number | keyword*)**
 Tree **burst-limit**
 Range 1 to 14000000

| | |
|------------|----------------------|
| Default | auto |
| Units | bytes |
| Options | auto |
| Introduced | 22.10.R1 |
| Platforms | 7750 SR-1, 7750 SR-s |

limit-unused-bandwidth *boolean*

| | |
|------------|--|
| Synopsis | Enable aggregate rate overrun protection |
| Context | configure service ipipe <i>string</i> sap <i>string</i> egress agg-rate limit-unused-bandwidth <i>boolean</i> |
| Tree | limit-unused-bandwidth |
| Default | false |
| Introduced | 20.10.R1 |
| Platforms | All |

rate *number*

| | |
|------------|---|
| Synopsis | Enforced aggregate rate for all queues |
| Context | configure service ipipe <i>string</i> sap <i>string</i> egress agg-rate rate <i>number</i> |
| Tree | rate |
| Range | 1 to 6400000000 |
| Units | kilobps |
| Introduced | 20.10.R1 |
| Platforms | All |

filter

| | |
|------------|--|
| Synopsis | Enter the filter context |
| Context | configure service ipipe <i>string</i> sap <i>string</i> egress filter |
| Tree | filter |
| Introduced | 20.10.R1 |
| Platforms | All |

ip reference

| | |
|------------|--|
| Synopsis | MAC filter ID |
| Context | configure service ipipe <i>string</i> sap <i>string</i> egress filter ip <i>reference</i> |
| Tree | ip |
| Reference | configure filter ip-filter <i>string</i> |
| Introduced | 20.10.R1 |
| Platforms | All |

ipv6 reference

| | |
|------------|--|
| Synopsis | IPv6 filter identifier |
| Context | configure service ipipe <i>string</i> sap <i>string</i> egress filter ipv6 <i>reference</i> |
| Tree | ipv6 |
| Reference | configure filter ipv6-filter <i>string</i> |
| Introduced | 20.10.R1 |
| Platforms | All |

qos

| | |
|------------|---|
| Synopsis | Enter the qos context |
| Context | configure service ipipe <i>string</i> sap <i>string</i> egress qos |
| Tree | qos |
| Introduced | 20.10.R1 |
| Platforms | All |

policer-control-policy

| | |
|------------|--|
| Synopsis | Enter the policer-control-policy context |
| Context | configure service ipipe <i>string</i> sap <i>string</i> egress qos policer-control-policy |
| Tree | policer-control-policy |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR |

overrides

| | |
|------------|--|
| Synopsis | Enable the overrides context |
| Context | configure service ipipe <i>string</i> sap <i>string</i> egress qos policer-control-policy overrides |
| Tree | overrides |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR |

root

| | |
|------------|---|
| Synopsis | Enter the root context |
| Context | configure service ipipe <i>string</i> sap <i>string</i> egress qos policer-control-policy overrides root |
| Tree | root |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR |

max-rate (*number* | *keyword*)

| | |
|------------|---|
| Synopsis | Maximum frame-based bandwidth limit |
| Context | configure service ipipe <i>string</i> sap <i>string</i> egress qos policer-control-policy overrides root max-rate (<i>number</i> <i>keyword</i>) |
| Tree | max-rate |
| Range | 1 to 6400000000 |
| Options | max |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR |

priority-mbs-thresholds

| | |
|------------|---|
| Synopsis | Enter the priority-mbs-thresholds context |
| Context | configure service ipipe <i>string</i> sap <i>string</i> egress qos policer-control-policy overrides root priority-mbs-thresholds |
| Tree | priority-mbs-thresholds |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR |

min-thresh-separation (*number* | *keyword*)

| | |
|------------|--|
| Synopsis | Minimum amount of separation buffer space |
| Context | configure service ipipe <i>string</i> sap <i>string</i> egress qos policer-control-policy overrides root priority-mbs-thresholds min-thresh-separation (<i>number</i> <i>keyword</i>) |
| Tree | min-thresh-separation |
| Range | 0 to 16777216 |
| Units | bytes |
| Options | auto |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR |

priority [[priority-level](#)] *number*

| | |
|------------|--|
| Synopsis | Enter the priority list instance |
| Context | configure service ipipe <i>string</i> sap <i>string</i> egress qos policer-control-policy overrides root priority-mbs-thresholds priority <i>number</i> |
| Tree | priority |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR |

[priority-level] *number*

| | |
|------------|--|
| Synopsis | Priority level |
| Context | configure service ipipe <i>string</i> sap <i>string</i> egress qos policer-control-policy overrides root priority-mbs-thresholds priority <i>number</i> |

| Tree | policy-name |
| Reference | configure qos policer-control-policy <i>string</i> |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR |

qinq-mark-top-only *boolean*

| | |
|------------|---|
| Synopsis | Mark top Q-tags |
| Context | configure service ipipe <i>string</i> sap <i>string</i> egress qos qinq-mark-top-only <i>boolean</i> |
| Tree | qinq-mark-top-only |
| Default | false |
| Introduced | 20.10.R1 |
| Platforms | All |

sap-egress

| | |
|------------|--|
| Synopsis | Enter the sap-egress context |
| Context | configure service ipipe <i>string</i> sap <i>string</i> egress qos sap-egress |
| Tree | sap-egress |
| Introduced | 20.10.R1 |
| Platforms | All |

overrides

| | |
|------------|--|
| Synopsis | Enter the overrides context |
| Context | configure service ipipe string sap string egress qos sap-egress overrides |
| Tree | overrides |
| Introduced | 20.10.R1 |
| Platforms | All |

hs-secondary-shaper *string*

| | |
|---------------|---|
| Synopsis | HS Secondary Shaper |
| Context | configure service ipipe string sap string egress qos sap-egress overrides hs-secondary-shaper string |
| Tree | hs-secondary-shaper |
| String Length | 1 to 32 |
| Introduced | 20.10.R1 |
| Platforms | 7750 SR-7/12/12e |

hs-wrr-group [[group-id](#)] *reference*

| | |
|------------|---|
| Synopsis | Enter the hs-wrr-group list instance |
| Context | configure service ipipe string sap string egress qos sap-egress overrides hs-wrr-group reference |
| Tree | hs-wrr-group |
| Introduced | 20.10.R1 |
| Platforms | 7750 SR-7/12/12e |

[[group-id](#)] *reference*

| | |
|------------|---|
| Synopsis | HS WRR group identifier |
| Context | configure service ipipe string sap string egress qos sap-egress overrides hs-wrr-group reference |
| Tree | hs-wrr-group |
| Reference | configure qos sap-egress string hs-wrr-group number |
| Notes | This element is part of a list key. |
| Introduced | 20.10.R1 |

Platforms 7750 SR-7/12/12e

hs-class-weight *number*

Synopsis Class weight override of the WRR group

Context **configure** [service](#) [ipipe](#) *string* [sap](#) *string* [egress](#) [qos](#) [sap-egress](#) [overrides](#) [hs-wrr-group](#)
reference [hs-class-weight](#) *number*

Tree [hs-class-weight](#)

Range 1 | 2 | 4 | 8

Introduced 20.10.R1

Platforms 7750 SR-7/12/12e

percent-rate *decimal-number*

Synopsis Percent rate override applied to the HS WRR group

Context **configure** [service](#) [ipipe](#) *string* [sap](#) *string* [egress](#) [qos](#) [sap-egress](#) [overrides](#) [hs-wrr-group](#)
reference [percent-rate](#) *decimal-number*

Tree [percent-rate](#)

Range 0.01 to 100.00

Notes The following elements are part of a choice: **percent-rate** or **rate**.

Introduced 20.10.R1

Platforms 7750 SR-7/12/12e

rate (*number* | *keyword*)

Synopsis Scheduling rate override applied to the HS WRR group

Context **configure** [service](#) [ipipe](#) *string* [sap](#) *string* [egress](#) [qos](#) [sap-egress](#) [overrides](#) [hs-wrr-group](#)
reference [rate](#) (*number* | *keyword*)

Tree [rate](#)

Range 1 to 2000000000

Units kilobps

Options max

Notes The following elements are part of a choice: **percent-rate** or **rate**.

Introduced 20.10.R1

Platforms 7750 SR-7/12/12e

policer [[policer-id](#)] *reference*

| | |
|------------|---|
| Synopsis | Enter the policer list instance |
| Context | configure service ipipe <i>string</i> sap <i>string</i> egress qos sap-egress overrides policer <i>reference</i> |
| Tree | policer |
| Introduced | 20.10.R1 |

| Introduced | 20.10.R1 |
| Platforms | 7750 SR-7/12/12e |

policy reference

| | |
|------------|---|
| Synopsis | Slope policy applied to the HSQ queue group queue |
| Context | configure service ipipe string sap string egress qos sap-egress overrides queue reference hs-wred-queue policy reference |
| Tree | policy |
| Reference | configure qos slope-policy string |
| Introduced | 20.10.R1 |
| Platforms | 7750 SR-7/12/12e |

hs-wrr-weight *number*

| | |
|------------|---|
| Synopsis | Weighted Round Robin (WRR) weight to parent with this queue into the scheduler |
| Context | configure service ipipe string sap string egress qos sap-egress overrides queue reference hs-wrr-weight number |
| Tree | hs-wrr-weight |
| Range | 1 to 127 |
| Default | 1 |
| Introduced | 20.10.R1 |
| Platforms | 7750 SR-7/12/12e |

mbs (*number* | *keyword*)

| | |
|----------|---|
| Synopsis | MBS |
| Context | configure service ipipe string sap string egress qos sap-egress overrides queue reference mbs (number keyword) |
| Tree | mbs |
| Range | 0 to 1073741824 |

| | |
|------------|----------|
| Units | bytes |
| Options | auto |
| Introduced | 20.10.R1 |
| Platforms | All |

monitor-queue-depth

| | |
|------------|---|
| Synopsis | Enable the monitor-queue-depth context |
| Context | configure service ipipe <i>string</i> sap <i>string</i> egress qos sap-egress overrides queue reference monitor-queue-depth |
| Tree | monitor-queue-depth |
| Introduced | 20.10.R1 |
| Platforms | All |

fast-polling *boolean*

| | |
|-------------|---|
| Synopsis | Enable fast polling of the queue depth |
| Context | configure service ipipe <i>string</i> sap <i>string</i> egress qos sap-egress overrides queue reference monitor-queue-depth fast-polling <i>boolean</i> |
| Tree | fast-polling |
| Description | When configured to true , this command enables fast polling of the queue depth. Faster polling allows a more accurate view of the actual depth.
When configured to false , fast queue polling is not enabled. |
| Default | false |
| Introduced | 20.10.R1 |
| Platforms | All |

violation-threshold *decimal-number*

| | |
|-------------|---|
| Synopsis | Threshold for queue depth before violation is raised |
| Context | configure service ipipe <i>string</i> sap <i>string</i> egress qos sap-egress overrides queue reference monitor-queue-depth violation-threshold <i>decimal-number</i> |
| Tree | violation-threshold |
| Description | This command specifies the threshold for the queue MBS. When the queue depth exceeds the threshold value, a violation is registered. |
| Range | 0.01 to 99.99 |

Introduced 20.10.R1
 Platforms All

| Tree | scheduler |
| Introduced | 20.10.R1 |
| Platforms | All |

[scheduler-name] *string*

| | |
|---------------|--|
| Synopsis | Scheduler name |
| Context | configure service ipipe string sap string egress qos scheduler-policy overrides scheduler string |
| Tree | scheduler |
| Description | <p>This command specifies the scheduler name which is composed of printable 7-bit ASCII characters. If the string contains special characters (#, \$, spaces, and so on), the entire string must be enclosed within double quotes. Each scheduler must have a unique name within the context of the scheduler policy. However, the same name can be reused in multiple scheduler policies. If the scheduler name already exists within the policy tier level, the context changes to that scheduler name for the purpose of editing the scheduler commands.</p> <p>If the scheduler name exists within the policy on a different tier, an error occurs and the current context will not change. If the scheduler name does not exist in this or another tier within the scheduler policy, it is assumed that an attempt is being made to create a scheduler of that name.</p> <p>If the provided scheduler name is invalid, a name syntax error will occur, the command will not execute, and the context will not change.</p> |
| String Length | 1 to 32 |
| Notes | This element is part of a list key. |
| Introduced | 20.10.R1 |
| Platforms | All |

parent

| | |

[[scheduler-name](#)] *string*

| | |
|---------------|--|
| Synopsis | Scheduler name |
| Context | configure service ipipe <i>string</i> sap <i>string</i> ingress qos scheduler-policy overrides
scheduler <i>string</i> |
| Tree | scheduler |
| Description | <p>This command specifies the scheduler name which is composed of printable 7-bit ASCII characters. If the string contains special characters (#, \$, spaces, and so on), the entire string must be enclosed within double quotes. Each scheduler must have a unique name within the context of the scheduler policy. However, the same name can be reused in multiple scheduler policies. If the scheduler name already exists within the policy tier level, the context changes to that scheduler name for the purpose of editing the scheduler commands.</p> <p>If the scheduler name exists within the policy on a different tier, an error occurs and the current context will not change. If the scheduler name does not exist in this or another tier within the scheduler policy, it is assumed that an attempt is being made to create a scheduler of that name.</p> <p>If the provided scheduler name is invalid, a name syntax error will occur, the command will not execute, and the context will not change.</p> |

service-mtu *number*

| | |
|----------|---|
| Synopsis | MTU size |
| Context | configure service ipipe <i>string service-mtu number</i> |
| Tree | service-mtu |

Description This command configures the Maximum Transmission Unit (MTU) value (payload) for the service. The system uses the value to validate the operational state of the SAP and SDP binding within the service. The value overrides the default MTU for the service type.

The service MTU and a SAP's service delineation encapsulation overhead (4 bytes for a dot1q tag) are used to derive the required MTU of the physical port or channel on which the SAP was created. If the required payload is larger than the port or channel MTU, the SAP is placed in an inoperative state. If the required MTU is equal to or less than the port or channel MTU, the SAP transitions to the operative state.

When binding an SDP to a service, the service MTU is compared to the path MTU associated with the SDP. The path MTU can be administratively defined in the context of the SDP. The default or administrative path MTU can be dynamically reduced due to the MTU capabilities discovered by the tunneling mechanism of the SDP or the egress interface MTU capabilities based on the next hop in the tunnel path. If the service MTU is larger than the path MTU, the SDP binding for the service is placed in an inoperative state. If the service MTU is equal to or less than the path MTU, the SDP binding is placed in an operational state.

If a service MTU, port or channel MTU, or path MTU is dynamically or administratively modified, all associated SAP and SDP binding operational states are automatically reevaluated.

Binding operational states are automatically reevaluated.

For I-VPLS and Epipe bound to a B-VPLS, the service MTU must be at least 18 bytes smaller than the B-VPLS service MTU to accommodate the PBB header.

Because this connects a Layer 2 to a Layer 3 service, adjust the service MTU under the Epipe service. The MTU that is advertised from the Epipe side is service MTU minus EtherHeaderSize.

In the **configure service epipe spoke-sdp** context, the **adv-service-mtu** command can be used to override the configured MTU value used in T-LDP signaling to the far-end of an Epipe spoke-sdp. The **adv-service-mtu** command is also used to validate the value signaled by the far-end PE.

| | |
|----------|--|
| Synopsis | Administrative state of the SDP binding to the service |
|----------|--|

| | |
|------------|---|
| Context | configure service ipipe <i>string spoke-sdp string admin-state keyword</i> |
| Tree | admin-state |
| Default | enable |
| Options | enable, disable |
| Introduced | 20.10.R1 |
| Platforms | All |

app-profile *reference*

| | |
|------------|---|
| Synopsis | Application profile name for this SDP |
| Context | configure service ipipe <i>string spoke-sdp string app-profile reference</i> |
| Tree | app-profile |
| Reference | configure application-assurance group <i>number partition number policy app-profile string</i> |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

bandwidth (*number | keyword*)

| | |
|------------|--|
| Synopsis | Bandwidth that is reserved for this SDP binding |
| Context | configure service ipipe <i>string spoke-sdp string bandwidth (number keyword)</i> |
| Tree | bandwidth |
| Range | 0 to 100000000 |
| Default | 0 |
| Units | kilobps |
| Options | max |
| Introduced | 20.10.R1 |
| Platforms | All |

bfd

| | |
|------------|---|
| Synopsis | Enter the bfd context |
| Context | configure service ipipe <i>string spoke-sdp string bfd</i> |
| Tree | bfd |
| Introduced | 21.2.R1 |
| Platforms | All |

bfd-liveness

| | |
|------------|---|
| Synopsis | Enable the bfd-liveness context |
| Context | configure service ipipe <i>string</i> spoke-sdp <i>string</i> bfd bfd-liveness |
| Tree | bfd-liveness |
| Introduced | 21.2.R1 |
| Platforms | All |

encap *keyword*

| | |
|------------|--|
| Synopsis | BFD encapsulation used on the SDP binding |
| Context | configure service ipipe <i>string</i> spoke-sdp <i>string</i> bfd bfd-liveness encap <i>keyword</i> |
| Tree | encap |
| Default | ipv4 |
| Options | ipv4 |
| Introduced | 21.2.R1 |
| Platforms | All |

bfd-template *reference*

| | |
|-------------|---|
| Synopsis | BFD template associated with the SDP binding |
| Context | configure service ipipe <i>string</i> spoke-sdp <i>string</i> bfd bfd-template <i>reference</i> |
| Tree | bfd-template |
| Description | This command configures a named BFD template to be used by VCCV BFD on PWs belonging to the VLL service. The template specifies parameters, such as the minimum transmit and receive control packet timer intervals, used by the BFD session. Template parameters are configured under the configure router bfd context. |
| Reference | configure bfd bfd-template <i>string</i> |
| Introduced | 21.2.R1 |
| Platforms | All |

ce-address (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

| | |
|----------|---|
| Synopsis | IP address of the CE device |
| Context | configure service ipipe <i>string</i> spoke-sdp <i>string</i> ce-address (<i>ipv4-address-no-zone</i> <i>ipv6-address-no-zone</i>) |

| | |
|------------|----------------------------|
| Tree | ce-address |
| Introduced | 20.10.R1 |
| Platforms | All |

control-word *boolean*

| | |
|------------|---|
| Synopsis | Use control word as part of packet encapsulation |
| Context | configure service ipipe <i>string</i> spoke-sdp <i>string</i> control-word <i>boolean</i> |
| Tree | control-word |
| Default | false |
| Introduced | 20.10.R1 |
| Platforms | All |

description *string*

| | |
|---------------|---|
| Synopsis | Text description |
| Context | configure service ipipe <i>string</i> spoke-sdp <i>string</i> description <i>string</i> |
| Tree | description |
| String Length | 1 to 80 |
| Introduced | 20.10.R1 |
| Platforms | All |

egress

| | |
|------------|--|
| Synopsis | Enter the egress context |
| Context | configure service ipipe <i>string</i> spoke-sdp <i>string</i> egress |

| Notes | The following elements are part of a choice: (destination-nat , dnat , and dnat-ip-address) or forward . |
| Introduced | 21.2.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

ip-address *string*

| | |
|------------|---|
| Synopsis | Substitute destination IP address of matching packets |
| Context | configure service nat classifier <i>string</i> default action destination-nat ip-address <i>string</i> |
| Tree | ip-address |
| Introduced | 21.2.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

forward

WARNING:

Modifying this element clears ISA state, such as flow state, for the new value to take effect.

| | |
|------------|--|
| Synopsis | Forward mode of operation |
| Context | configure service nat classifier <i>string</i> default action forward |
| Tree | forward |
| Notes | The following elements are part of a choice: (destination-nat , dnat , and dnat-ip-address) or forward . |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

dnat-ip-address *string***WARNING:**

Modifying this element clears ISA state, such as flow state, for the new value to take effect.

| | |
|------------|--|
| Synopsis | Default destination IP address for matching entries with dNAT action |
| Context | configure service nat classifier <i>string</i> default dnat-ip-address <i>string</i> |
| Tree | dnat-ip-address |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

description *string*

| | |
|---------------|--|
| Synopsis | Text description |
| Context | configure service nat classifier <i>string</i> description <i>string</i> |
| Tree | description |
| String Length | 1 to 80 |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

entry [*id*] *number*

| | |
|----------------|--|
| Synopsis | Enter the entry list instance |
| Context | configure service nat classifier <i>string</i> entry <i>number</i> |
| Tree | entry |
| Max. Instances | 32 |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

[id] *number*

| | |
|----------|--|
| Synopsis | Classifier rule entry ID |
| Context | configure service nat classifier <i>string</i> entry <i>number</i> |
| Tree | entry |
| Range | 1 to 1000 |
| Notes | This element is part of a list key. |

| | |
|------------|--|
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

action

| | |
|------------|---|
| Synopsis | Enter the action context |
| Context | configure service nat classifier <i>string entry number action</i> |
| Tree | action |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

destination-nat

| | |
|------------|--|
| Synopsis | Enable the destination-nat context |
| Context | configure service nat classifier <i>string entry number action destination-nat</i> |
| Tree | destination-nat |
| Notes | The following elements are part of a choice: (destination-nat , dnat , and dnat-ip-address) or forward . |
| Introduced | 21.2.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

ip-address *string*

| | |
|------------|---|
| Synopsis | Replacement destination IP address for packets |
| Context | configure service nat classifier <i>string entry number action destination-nat ip-address string</i> |
| Tree | ip-address |
| Introduced | 21.2.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

forward

WARNING:

Modifying this element clears ISA state, such as flow state, for the new value to take effect.

| | |
|----------|---------------------------|
| Synopsis | Forward mode of operation |
|----------|---------------------------|

| | |
|------------|--|
| Context | configure service nat classifier <i>string entry number action forward</i> |
| Tree | forward |
| Notes | The following elements are part of a choice: (destination-nat , dnat , and dnat-ip-address) or forward . |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

description *string*

| | |
|---------------|---|
| Synopsis | Text description |
| Context | configure service nat classifier <i>string entry number description string</i> |
| Tree | description |
| String Length | 1 to 80 |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

match

| | |
|------------|--|
| Synopsis | Enter the match context |
| Context | configure service nat classifier <i>string entry number match</i> |
| Tree | match |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

dst-port-range

| | |
|------------|---|
| Synopsis | Enter the dst-port-range context |
| Context | configure service nat classifier <i>string entry number match dst-port-range</i> |
| Tree | dst-port-range |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

end number**WARNING:**

Modifying this element clears ISA state, such as flow state, for the new value to take effect.

| | |
|------------|---|
| Synopsis | Upper bound of the port range |
| Context | configure service nat classifier string entry number match dst-port-range end number |
| Tree | end |
| Range | 0 1 to 65535 |
| Default | 65535 |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

start number**WARNING:**

Modifying this element clears ISA state, such as flow state, for the new value to take effect.

| | |
|------------|---|
| Synopsis | Lower bound of the port range |
| Context | configure service nat classifier string entry number match dst-port-range start number |
| Tree | start |
| Range | 0 1 to 65535 |
| Default | 0 |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

foreign-ip-address string**WARNING:**

Modifying this element clears ISA state, such as flow state, for the new value to take effect.

| | |
|------------|---|
| Synopsis | Foreign IP address as the match criterion |
| Context | configure service nat classifier string entry number match foreign-ip-address string |
| Tree | foreign-ip-address |
| Introduced | 19.5.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

protocol *keyword***WARNING:**

Modifying this element clears ISA state, such as flow state, for the new value to take effect.

| | |
|------------|--|
| Synopsis | IP protocol to match |
| Context | configure service nat classifier <i>string</i> entry number match protocol <i>keyword</i> |
| Tree | protocol |
| Default | udp |
| Options | tcp, udp |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

deterministic-script

| | |
|------------|---|
| Synopsis | Enter the deterministic-script context |
| Context | configure service nat deterministic-script |
| Tree | deterministic-script |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

location *string*

| | |
|---------------|--|
| Synopsis | Remote location where Python script is exported |
| Context | configure service nat deterministic-script location <i>string</i> |
| Tree | location |
| String Length | 1 to 180 |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

firewall-policy [[name](#)] *string*

| | |
|-------------|---|
| Synopsis | Enter the firewall-policy list instance |
| Context | configure service nat firewall-policy <i>string</i> |
| Tree | firewall-policy |
| Description | Commands in this context configure the attributes of the firewall policy, for use in contexts where basic protection from outside attack vectors is required. |

Firewall policies cannot be deleted if they are in use.

| | |
|----------------|------------------------------------|
| Max. Instances | 2048 |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

[name] *string*

| | |
|---------------|--|
| Synopsis | Firewall policy name |
| Context | configure service nat firewall-policy <i>string</i> |
| Tree | firewall-policy |
| String Length | 1 to 32 |
| Notes | This element is part of a list key. |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

alg

| | |
|-------------|--|
| Synopsis | Enter the alg context |
| Context | configure service nat firewall-policy <i>string</i> alg |
| Tree | alg |
| Description | Commands in this context configure the Application Layer Gateway (ALG) attributes of the policy. |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

ftp *boolean*

| | |
|------------|---|
| Synopsis | Use FTP ALG for the policy |
| Context | configure service nat firewall-policy <i>string</i> alg ftp <i>boolean</i> |
| Tree | ftp |
| Default | true |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

rtsp boolean

| | |
|-------------|--|
| Synopsis | Use RTSP ALG for the policy |
| Context | configure service nat firewall-policy string alg rtsp boolean |
| Tree | rtsp |
| Description | When configured to true , Real-Time Streaming Protocol (RTSP) ALG is used for the policy. |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

sip boolean

| | |
|------------|---|
| Synopsis | Use SIP ALG for the policy |
| Context | configure service nat firewall-policy string alg sip boolean |
| Tree | sip |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

description string

| | |
|---------------|--|
| Synopsis | Text description |
| Context | configure service nat firewall-policy string description string |
| Tree | description |
| String Length | 1 to 80 |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

domain

| | |
|-------------|--|
| Synopsis | Enter the domain context |
| Context | configure service nat firewall-policy string domain |
| Tree | domain |
| Description | Commands in this context configure the attributes of the domain for the firewall policy. All associated traffic must be part of the prefixes specified by this domain. |

| | |
|------------|---|
| Notes | The following elements are part of a choice: domain or I2-outside . |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

name *string*

| | |
|---------------|--|
| Synopsis | Firewall domain name |
| Context | configure service nat firewall-policy string domain name string |
| Tree | name |
| String Length | 1 to 32 |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

router-instance *string*

| | |
|-------------|---|
| Synopsis | Router or VPRN service name |
| Context | configure service nat firewall-policy string domain router-instance string |
| Tree | router-instance |
| Description | This command specifies the router instance or VPRN service for this domain. All associated traffic must be part of the prefixes specified by this domain. |
| Introduced | 16.0.R4 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

filtering *keyword*

| | |
|------------|---|
| Synopsis | Filtering method for inbound traffic for the policy |
| Context | configure service nat firewall-policy string filtering keyword |
| Tree | filtering |
| Default | endpoint-independent |
| Options | endpoint-independent, address-and-port-dependent |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

I2-outside

| | |
|-------------|--|
| Synopsis | Use Layer 2 outside service address location |
| Context | configure service nat firewall-policy <i>string</i> I2-outside |
| Tree | I2-outside |
| Description | This command specifies Layer 2 outside service address location for the NAT policy instead of Layer 3 outside service. |
| Notes | The following elements are part of a choice: domain or I2-outside . |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

port-limits

| | |
|------------|--|
| Synopsis | Enter the port-limits context |
| Context | configure service nat firewall-policy <i>string</i> port-limits |
| Tree | port-limits |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

forwarding *number*

| | |
|------------|---|
| Synopsis | Maximum number of port forwarding entries |
| Context | configure service nat firewall-policy <i>string</i> port-limits forwarding <i>number</i> |
| Tree | forwarding |
| Range | 1 to 64 |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

priority-sessions

| | |
|------------|--|
| Synopsis | Enter the priority-sessions context |
| Context | configure service nat firewall-policy <i>string</i> priority-sessions |
| Tree | priority-sessions |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

fc

| | |
|-------------|---|
| Synopsis | Enter the fc context |
| Context | configure service nat firewall-policy string priority-sessions fc |
| Tree | fc |
| Description | Commands in this context specify which Forwarding Class (FC) options have prioritized sessions. |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

af boolean

| | |
|-------------|--|
| Synopsis | Prioritize traffic from AF forwarding classes |
| Context | configure service nat firewall-policy string priority-sessions fc af boolean |
| Tree | af |
| Description | When configured to true , traffic from Assured Forwarding (AF) FC sessions is prioritized. When configured to false , AF traffic is not prioritized. |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

be boolean

| | |
|-------------|---|
| Synopsis | Prioritize traffic from BE forwarding classes |
| Context | configure service nat firewall-policy string priority-sessions fc be boolean |
| Tree | be |
| Description | When configured to true , traffic from Best Effort (BE) FC sessions is prioritized. When configured to false , BE traffic is not prioritized. |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

ef boolean

| | |
|----------|---|
| Synopsis | Prioritize traffic from EF forwarding classes |
| Context | configure service nat firewall-policy string priority-sessions fc ef boolean |

| | |
|------------|------------------------------------|
| Tree | ef |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

h1 *boolean*

| | |
|-------------|---|
| Synopsis | Prioritize traffic from H1 forwarding classes |
| Context | configure service nat firewall-policy <i>string</i> priority-sessions fc h1 <i>boolean</i> |
| Tree | h1 |
| Description | When configured to true , traffic from H1 sessions is prioritized. When configured to false, H1 traffic is not prioritized. |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

h2 *boolean*

| | |
|------------|---|
| Synopsis | Prioritize traffic from H2 forwarding classes |
| Context | configure service nat firewall-policy <i>string</i> priority-sessions fc h2 <i>boolean</i> |
| Tree | h2 |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

l1 *boolean*

| | |
|------------|---|
| Synopsis | Prioritize traffic from L1 forwarding classes |
| Context | configure service nat firewall-policy <i>string</i> priority-sessions fc l1 <i>boolean</i> |
| Tree | l1 |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

l2 boolean

| | |
|-------------|--|
| Synopsis | Prioritize traffic from L2 forwarding classes |
| Context | configure service nat firewall-policy <i>string</i> priority-sessions fc l2 boolean |
| Tree | l2 |
| Description | When configured to true , traffic from L2 sessions is prioritized. When configured to false, L2 traffic is not prioritized. |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

nc boolean

| | |
|------------|--|
| Synopsis | Prioritize traffic from NC forwarding classes |
| Context | configure service nat firewall-policy <i>string</i> priority-sessions fc nc boolean |
| Tree | nc |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

session-limits

| | |
|-------------|---|
| Synopsis | Enter the session-limits context |
| Context | configure service nat firewall-policy <i>string</i> session-limits |
| Tree | session-limits |
| Description | Commands in this context configure session-limit attributes for the policy. |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

max number

| | |
|----------|--|
| Synopsis | Maximum number of sessions per subscriber |
| Context | configure service nat firewall-policy <i>string</i> session-limits max number |
| Tree | max |
| Range | 1 to 65535 |
| Default | 65535 |

| | |
|------------|------------------------------------|
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

reserved *number*

| | |
|-------------|--|
| Synopsis | Number of sessions reserved for prioritized sessions |
| Context | configure service nat firewall-policy string session-limits reserved number |
| Tree | reserved |
| Description | This command configures the number of sessions per block that are reserved for prioritized sessions. |
| Range | 1 to 65534 |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

watermarks

| | |
|-------------|---|
| Synopsis | Enable the watermarks context |
| Context | configure service nat firewall-policy string session-limits watermarks |
| Tree | watermarks |
| Description | This command configures watermarks for NAT resources. |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

high *number*

| | |
|-------------|---|
| Synopsis | High watermark percentage |
| Context | configure service nat firewall-policy string session-limits watermarks high number |
| Tree | high |
| Description | This command configures the high threshold value as a percentage of the total port-block space in a NAT pool. |
| Range | 0 to 100 |
| Units | percent |
| Notes | This element is mandatory. |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

low number

| | |
|-------------|--|
| Synopsis | Low watermark percentage |
| Context | configure service nat firewall-policy string session-limits watermarks low number |
| Tree | low |
| Description | This command configures the low threshold value as a percentage of the total port-block space in a NAT pool. |
| Range | 0 to 100 |
| Units | percent |
| Notes | This element is mandatory. |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

tcp

| | |
|-------------|--|
| Synopsis | Enter the tcp context |
| Context | configure service nat firewall-policy string tcp |
| Tree | tcp |
| Description | Commands in this context configure the transmission control protocol (TCP) attributes of the policy. |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

mss-adjust number

| | |
|-------------|--|
| Synopsis | TCP MSS adjustment value |
| Context | configure service nat firewall-policy string tcp mss-adjust number |
| Tree | mss-adjust |
| Description | This command configures the value to use to adjust the TCP Maximum Segment Size (MSS) option, if not already present or the present value is higher. |
| Range | 160 to 10240 |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

timeouts

| | |
|-------------|--|
| Synopsis | Enter the timeouts context |
| Context | configure service nat firewall-policy string timeouts |
| Tree | timeouts |
| Description | Commands in this context configure the attributes of session idle timeouts for the policy. |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

icmp6-query *number*

| | |
|------------|---|
| Synopsis | Timeout applied to an ICMPv6 Query session |
| Context | configure service nat firewall-policy string timeouts icmp6-query number |
| Tree | icmp6-query |
| Range | 60 to 240 |
| Default | 60 |
| Units | seconds |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

sip *number*

| | |
|------------|---|
| Synopsis | SIP inactive media timeout |
| Context | configure service nat firewall-policy string timeouts sip number |
| Tree | sip |
| Range | 10 to 7200 |
| Default | 120 |
| Units | seconds |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

tcp

| | |
|----------|--|
| Synopsis | Enter the tcp context |
| Context | configure service nat firewall-policy string timeouts tcp |
| Tree | tcp |

| | |
|-------------|--|
| Description | Commands in this context configure TCP timeout attributes. |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

established *number*

| | |
|------------|---|
| Synopsis | Idle timeout for TCP session in established state |
| Context | configure service nat firewall-policy <i>string</i> timeouts tcp established <i>number</i> |
| Tree | established |
| Range | 60 to 86400 |
| Default | 7440 |
| Units | seconds |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

rst *number*

| | |
|-------------|---|
| Synopsis | Suspend time for TCP connection ports closed by RST |
| Context | configure service nat firewall-policy <i>string</i> timeouts tcp rst <i>number</i> |
| Tree | rst |
| Description | This command configures the suspend time for outside TCP ports that are used in translations for TCP connections, when they are closed by TCP Reset (RST). After the timer expires, the outside ports can be reused for new TCP translations. |
| Range | 0 to 240 |
| Default | 0 |
| Units | seconds |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

syn *number*

| | |
|----------|---|
| Synopsis | TCP session timeout when synchronizing initial sequence |
| Context | configure service nat firewall-policy <i>string</i> timeouts tcp syn <i>number</i> |
| Tree | syn |
| Range | 6 to 86400 |

| | |
|------------|------------------------------------|
| Default | 15 |
| Units | seconds |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

time-wait *number*

| | |
|------------|---|
| Synopsis | Timeout applied to a TCP session in the time-wait state |
| Context | configure service nat firewall-policy <i>string</i> timeouts tcp time-wait <i>number</i> |
| Tree | time-wait |
| Range | 0 to 240 |
| Default | 0 |
| Units | seconds |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

transitory *number*

| | |
|------------|--|
| Synopsis | Idle timeout for TCP session in transitory state |
| Context | configure service nat firewall-policy <i>string</i> timeouts tcp transitory <i>number</i> |
| Tree | transitory |
| Range | 60 to 86400 |
| Default | 240 |
| Units | seconds |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

udp

| | |
|-------------|---|
| Synopsis | Enter the udp context |
| Context | configure service nat firewall-policy <i>string</i> timeouts udp |
| Tree | udp |
| Description | Commands in this context configure the User Datagram Protocol (UDP) mapping timeout attributes. |
| Introduced | 16.0.R1 |

Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

dns number

Synopsis Timeout applied to UDP session with destination port 53

Context **configure service nat firewall-policy string timeouts udp dns number**

Tree **dns**

Range 15 to 86400

Default 15

Units seconds

Introduced 16.0.R1

Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

initial number

Synopsis UDP mapping timeout applied to new sessions

Context **configure service nat firewall-policy string timeouts udp initial number**

Tree **initial**

Range 10 to 300

Default 15

Units seconds

Introduced 16.0.R1

Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

normal number

Synopsis UDP mapping timeout

Context **configure service nat firewall-policy string timeouts udp normal number**

Tree **normal**

Range 60 to 86400

Default 300

Units seconds

Introduced 16.0.R1

Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

unknown-protocol *number***WARNING:**

Modifying this element clears ISA state, such as flow state, for the new value to take effect.

| | |
|------------|--|
| Synopsis | Timeout for flows with an unknown protocol |
| Context | configure service nat firewall-policy <i>string</i> timeouts unknown-protocol <i>number</i> |
| Tree | unknown-protocol |
| Range | 60 to 86400 |
| Default | 300 |
| Units | seconds |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

udp

| | |
|------------|--|
| Synopsis | Enter the udp context |
| Context | configure service nat firewall-policy <i>string</i> udp |
| Tree | udp |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

inbound-refresh *boolean*

| | |
|-------------|---|
| Synopsis | Extend UDP session timeout on inbound traffic |
| Context | configure service nat firewall-policy <i>string</i> udp inbound-refresh <i>boolean</i> |
| Tree | inbound-refresh |
| Description | When configured to true , this command extends the UDP session timeout on inbound traffic.
When configured to false , the UDP session timeout is not extended. |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

unknown-protocols

| | |
|-------------|---|
| Synopsis | Enter the unknown-protocols context |
| Context | configure service nat firewall-policy <i>string</i> unknown-protocols |
| Tree | unknown-protocols |
| Description | Commands in this context configure the treatment of flows of unknown Layer 4 protocols that cannot be natively handled by the system. |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

all

| | |
|-------------|--|
| Synopsis | Allow all protocols to create unknown flows |
| Context | configure service nat firewall-policy <i>string</i> unknown-protocols all |
| Tree | all |
| Description | This command specifies that all protocols are permitted to create unknown flows. Protocol or IPv6 extension header values that are explicitly supported by SR OS will not be treated as unknown protocols. |
| Notes | The following elements are part of a choice: all or protocol . |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

protocol *number*

| | |
|----------------|---|
| Synopsis | IANA number of protocol allowed to create unknown flow |
| Context | configure service nat firewall-policy <i>string</i> unknown-protocols protocol <i>number</i> |
| Tree | protocol |
| Description | This command specifies the Internet Assigned Numbers Authority (IANA) number of a protocol that is permitted to create unknown flows. Protocol or IPv6 extension header values that are explicitly supported by SR OS can be configured but will not be treated as unknown protocols. |
| Range | 0 to 255 |
| Max. Instances | 8 |
| Notes | The following elements are part of a choice: all or protocol . |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

map-t

| | |
|------------|------------------------------------|
| Synopsis | Enter the map-t context |
| Context | configure service nat map-t |
| Tree | map-t |
| Introduced | 16.0.R4 |
| Platforms | VSR |

domain [name] string

| | |
|----------------|--|
| Synopsis | Enter the domain list instance |
| Context | configure service nat map-t domain string |
| Tree | domain |
| Max. Instances | 63 |
| Introduced | 16.0.R4 |
| Platforms | VSR |

[name] string

| | |
|---------------|--|
| Synopsis | MAP domain name |
| Context | configure service nat map-t domain string |
| Tree | domain |
| String Length | 1 to 32 |
| Notes | This element is part of a list key. |
| Introduced | 16.0.R4 |
| Platforms | VSR |

admin-state keyword

| | |
|----------|--|
| Synopsis | Administrative state of the MAP domain |
| Context | configure service nat map-t domain string admin-state keyword |
| Tree | admin-state |
| Default | disable |
| Options | enable, disable |

Introduced 16.0.R4
 Platforms VSR

description *string*

Synopsis Text description

| Context | configure service nat map-t domain <i>string</i> mapping-rule <i>string</i> ipv4-prefix <i>string</i> |
| Tree | ipv4-prefix |
| Introduced | 16.0.R4 |
| Platforms | VSR |

psid-offset *number*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|------------|--|
| Synopsis | The offset of the Port Set ID (PSID) within a 16 bits wide port space |
| Context | configure service nat map-t domain <i>string</i> mapping-rule <i>string</i> psid-offset <i>number</i> |
| Tree | psid-offset |
| Range | 0 to 16 |
| Default | 6 |
| Introduced | 16.0.R4 |
| Platforms | VSR |

rule-prefix *string*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|------------|--|
| Synopsis | The IPv6 prefix |
| Context | configure service nat map-t domain <i>string</i> mapping-rule <i>string</i> rule-prefix <i>string</i> |
| Tree | rule-prefix |
| Introduced | 16.0.R4 |
| Platforms | VSR |

mtu *number*

| | |
|------------|---|
| Synopsis | Configure the MTU |
| Context | configure service nat map-t domain <i>string</i> mtu <i>number</i> |
| Tree | mtu |
| Range | 160 to 8686 |
| Default | 8686 |
| Introduced | 16.0.R4 |
| Platforms | VSR |

tcp-mss-adjust *number*

| | |
|------------|---|
| Synopsis | The value to adjust the TCP Maximum Segment Size (MSS) option |
| Context | configure service nat map-t domain <i>string</i> tcp-mss-adjust <i>number</i> |
| Tree | tcp-mss-adjust |
| Range | 0 160 to 8626 |
| Default | 0 |
| Introduced | 16.0.R4 |
| Platforms | VSR |

nat-policy [[name](#)] *string*

| | |
|----------------|---|
| Synopsis | Enter the nat-policy list instance |
| Context | configure service nat nat-policy <i>string</i> |
| Tree | nat-policy |
| Max. Instances | 4096 |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

[name] *string*

| | |
|---------------|---|
| Synopsis | NAT policy name |
| Context | configure service nat nat-policy <i>string</i> |
| Tree | nat-policy |
| String Length | 1 to 32 |
| Notes | This element is part of a list key. |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

alg

| | |
|----------|--|
| Synopsis | Enter the alg context |
| Context | configure service nat nat-policy <i>string</i> alg |
| Tree | alg |

| | |
|-------------|--|
| Description | Commands in this context configure the Application Layer Gateway (ALG) attributes of the policy. |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

ftp boolean

| | |
|------------|--|
| Synopsis | Use FTP ALG for the policy |
| Context | configure service nat nat-policy string alg ftp boolean |
| Tree | ftp |
| Default | true |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

pptp boolean

| | |
|-------------|---|
| Synopsis | Use PPTP ALG for the policy |
| Context | configure service nat nat-policy string alg pptp boolean |
| Tree | pptp |
| Description | <p>When configured to true, the policy uses Point-to-Point Tunneling Protocol (PPTP) ALG.</p> <p>PPTP sessions can only be initiated from NAT inside.</p> <p>GRE traffic is allowed through NAT only if the corresponding mapping exists.</p> <p>There can be seven calls (GRE tunnels) per control session.</p> <p>When configured to false, PPTP ALG is not used.</p> |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

rtsp boolean

| | |
|-------------|--|
| Synopsis | Use RTSP ALG for the policy |
| Context | configure service nat nat-policy string alg rtsp boolean |
| Tree | rtsp |
| Description | When configured to true , Real-Time Streaming Protocol (RTSP) ALG is used for the policy. |

| | |
|------------|--|
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

sip boolean

| | |
|------------|--|
| Synopsis | Use SIP ALG for the policy |
| Context | configure service nat nat-policy string alg sip boolean |
| Tree | sip |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

block-limit number

| | |
|------------|---|
| Synopsis | Maximum number of port blocks per subscriber |
| Context | configure service nat nat-policy string block-limit number |
| Tree | block-limit |
| Range | 1 to 40 |
| Default | 1 |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

description string

| | |
|---------------|---|
| Synopsis | Text description |
| Context | configure service nat nat-policy string description string |
| Tree | description |
| String Length | 1 to 80 |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

dnat

| | |
|----------|-------------------------------|
| Synopsis | Enter the dnat context |
|----------|-------------------------------|

| | |
|------------|---|
| Context | configure service nat nat-policy string dnat |
| Tree | dnat |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

classifier reference

WARNING:

Modifying this element clears ISA state, such as flow state, for the new value to take effect.

| | |
|-------------|---|
| Synopsis | NAT classifier |
| Context | configure service nat nat-policy string dnat classifier reference |
| Tree | classifier |
| Description | When configured within the NAT policy, this command references a NAT classifier that activates DNAT functionality. The configuration uses a filter-like approach to identify the traffic that is subjected to DNAT. It is required for translation of the destination IP address. |
| Reference | configure service nat classifier string |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

dnat-only

| | |
|-------------|--|
| Synopsis | Enable the dnat-only context |
| Context | configure service nat nat-policy string dnat-only |
| Tree | dnat-only |
| Description | Commands in this context configure the attributes of DNAT-only. When DNAT-only is configured, no source or port NAT (SNAPT) is performed. Only the destination IP address (going from inside to outside) is translated; the source IP address and port are not translated. |
| Notes | The following elements are part of a choice: dnat-only , I2-outside , or pool . |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

nat-group *reference*

**WARNING:**

Modifying this element clears ISA state, such as flow state, for the new value to take effect.

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

| | |
|-------------|--|
| Synopsis | NAT group |
| Context | configure service nat nat-policy <i>string</i> dnat-only nat-group <i>reference</i> |
| Tree | nat-group |
| Description | This command configures the NAT group in which DNAT translation takes place for the outside routing context. |
| Reference | configure isa nat-group <i>number</i> |
| Notes | The following elements are part of a mandatory choice: nat-group or wlan-gw-group . |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

router-instance *string*

**WARNING:**

Modifying this element clears ISA state, such as flow state, for the new value to take effect.

| | |
|------------|---|
| Synopsis | Router name or VPRN service name |
| Context | configure service nat nat-policy <i>string</i> dnat-only router-instance <i>string</i> |
| Tree | router-instance |
| Notes | This element is mandatory. |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

wlan-gw-group *reference*

**WARNING:**

Modifying this element clears ISA state, such as flow state, for the new value to take effect.

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

| | |
|-------------|--|
| Synopsis | WLAN GW group used for NAT |
| Context | configure service nat nat-policy <i>string</i> dnat-only wlan-gw-group <i>reference</i> |
| Tree | wlan-gw-group |
| Description | This command configures the NAT WLAN Gateway (GW) group in which DNAT translation takes place for the outside routing context. |
| Reference | configure isa wlan-gw-group <i>number</i> |
| Notes | The following elements are part of a mandatory choice: nat-group or wlan-gw-group . |
| Introduced | 16.0.R4 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

filtering *keyword*

| | |
|------------|--|
| Synopsis | Filtering method for inbound traffic for the policy |
| Context | configure service nat nat-policy <i>string</i> filtering <i>keyword</i> |
| Tree | filtering |
| Default | endpoint-independent |
| Options | endpoint-independent, address-and-port-dependent |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

flow-log-policy

| | |
|------------|---|
| Synopsis | Enter the flow-log-policy context |
| Context | configure service nat nat-policy <i>string</i> flow-log-policy |
| Tree | flow-log-policy |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

ipfix *reference*

| | |
|----------|--|
| Synopsis | IPFIX export policy |
| Context | configure service nat nat-policy <i>string</i> flow-log-policy ipfix <i>reference</i> |

| | |
|-------------|--|
| Tree | ipfix |
| Description | This command specifies an IP flow information export policy for the flow-log policy. |
| Reference | configure service ipfix export-policy <i>string</i> |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

syslog *reference*

| | |
|-------------|---|
| Synopsis | Syslog export policy name |
| Context | configure service nat nat-policy <i>string</i> flow-log-policy syslog <i>reference</i> |
| Tree | syslog |
| Description | This command configures a syslog export policy with a set of transport parameters used to transmit NAT flow records in syslog format to an external collector node. The policy name is referenced from the NAT policy applied to an inside routing context. |
| Reference | configure service nat syslog export-policy <i>string</i> |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

I2-outside

| | |
|-------------|--|
| Synopsis | Use Layer 2 outside service address location |
| Context | configure service nat nat-policy <i>string</i> I2-outside |
| Tree | I2-outside |
| Description | This command specifies Layer 2 outside service address location for the NAT policy instead of Layer 3 outside service. |
| Notes | The following elements are part of a choice: dnat-only , I2-outside , or pool . |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

pool

| | |
|----------|--|
| Synopsis | Enter the pool context |
| Context | configure service nat nat-policy <i>string</i> pool |
| Tree | pool |
| Notes | The following elements are part of a choice: dnat-only , I2-outside , or pool . |

| | |
|------------|--|
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

name *string*

WARNING:

Modifying this element clears ISA state, such as flow state, for the new value to take effect.

| | |
|---------------|---|
| Synopsis | NAT pool name |
| Context | configure service nat nat-policy <i>string</i> pool name <i>string</i> |
| Tree | name |
| String Length | 1 to 32 |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

router-instance *string*

WARNING:

Modifying this element clears ISA state, such as flow state, for the new value to take effect.

| | |
|------------|--|
| Synopsis | Router or VPRN service name |
| Context | configure service nat nat-policy <i>string</i> pool router-instance <i>string</i> |
| Tree | router-instance |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

port-forwarding-range-end *number*

| | |
|-------------|--|
| Synopsis | End of the port forwarding range |
| Context | configure service nat nat-policy <i>string</i> port-forwarding-range-end <i>number</i> |
| Tree | port-forwarding-range-end |
| Description | <p>This command specifies the end of the port range available for port forwarding. The start of the range is always equal to one.</p> <p>The number of ports that can be configured is half of the available block => $64512 / 2 = 32256$. In combination with the configured value for port-forwarding-range-end, the formulas are:</p> <p>max port-reservation blocks = $65535 - \text{port-forwarding-range-end}$</p> |

$\text{max port-reservation ports} = (65535 - \text{port-forwarding-range-end}) / 2$

If **port-reservation** is already configured, the following applies for the maximum port-forwarding-range-end:

$\text{max port-forwarding-range-end} = 65535 - \text{port-reservation blocks}$
 $\text{max port-forwarding-range-end} = 65535 - (\text{port-reservation ports} * 2)$

| | |
|------------|--|
| Range | 1023 to 65535 |
| Default | 1023 |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

port-limits

| | |
|------------|--|
| Synopsis | Enter the port-limits context |
| Context | configure service nat nat-policy string port-limits |
| Tree | port-limits |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

forwarding *number*

| | |
|------------|--|
| Synopsis | Maximum number of port forwarding entries |
| Context | configure service nat nat-policy string port-limits forwarding number |
| Tree | forwarding |
| Range | 1 to 64 |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

reserved *number*

| | |
|-------------|---|
| Synopsis | Number of ports reserved for prioritized sessions |
| Context | configure service nat nat-policy string port-limits reserved number |
| Tree | reserved |
| Description | This command configures the number of ports per block that are reserved for prioritized sessions. |
| Range | 1 to 65534 |
| Introduced | 16.0.R1 |

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

watermarks

Synopsis Enable the **watermarks** context
Context **configure service nat nat-policy string port-limits watermarks**
Tree [watermarks](#)
Description This command configures watermarks for NAT resources.
Introduced 16.0.R1
Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

high number

Synopsis High watermark percentage
Context **configure service nat nat-policy string port-limits watermarks high number**
Tree [high](#)
Description This command configures the high threshold value as a percentage of the total port-block space in a NAT pool.
Range 0 to 100
Units percent
Notes This element is mandatory.
Introduced 16.0.R1
Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

low number

Synopsis Low watermark percentage
Context **configure service nat nat-policy string port-limits watermarks low number**
Tree [low](#)
Description This command configures the low threshold value as a percentage of the total port-block space in a NAT pool.
Range 0 to 100
Units percent
Notes This element is mandatory.
Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

priority-sessions

Synopsis Enter the **priority-sessions** context

Context **configure service nat nat-policy string priority-sessions**

Tree [priority-sessions](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

fc

Synopsis Enter the **fc** context

Context **configure service nat nat-policy string priority-sessions fc**

Tree [fc](#)

Description Commands in this context specify which Forwarding Class (FC) options have prioritized sessions.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

af boolean

Synopsis Prioritize traffic from AF forwarding classes

Context **configure service nat nat-policy string priority-sessions fc af boolean**

Tree [af](#)

Description When configured to **true**, traffic from Assured Forwarding (AF) FC sessions is prioritized. When configured to **false**, AF traffic is not prioritized.

Default false

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

be boolean

Synopsis Prioritize traffic from BE forwarding classes

Context **configure service nat nat-policy string priority-sessions fc be boolean**

Tree [be](#)

| | |
|-------------|---|
| Description | When configured to true , traffic from Best Effort (BE) FC sessions is prioritized. When configured to false , BE traffic is not prioritized. |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

ef boolean

| | |
|------------|--|
| Synopsis | Prioritize traffic from EF forwarding classes |
| Context | configure service nat nat-policy <i>string</i> priority-sessions fc ef boolean |
| Tree | ef |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

h1 boolean

| | |
|-------------|--|
| Synopsis | Prioritize traffic from H1 forwarding classes |
| Context | configure service nat nat-policy <i>string</i> priority-sessions fc h1 boolean |
| Tree | h1 |
| Description | When configured to true , traffic from H1 sessions is prioritized. When configured to false, H1 traffic is not prioritized. |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

h2 boolean

| | |
|------------|--|
| Synopsis | Prioritize traffic from H2 forwarding classes |
| Context | configure service nat nat-policy <i>string</i> priority-sessions fc h2 boolean |
| Tree | h2 |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

I1 *boolean*

| | |
|------------|--|
| Synopsis | Prioritize traffic from L1 forwarding classes |
| Context | configure service nat nat-policy <i>string</i> priority-sessions fc l1 <i>boolean</i> |
| Tree | l1 |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

I2 *boolean*

| | |
|-------------|--|
| Synopsis | Prioritize traffic from L2 forwarding classes |
| Context | configure service nat nat-policy <i>string</i> priority-sessions fc l2 <i>boolean</i> |
| Tree | l2 |
| Description | When configured to true , traffic from L2 sessions is prioritized. When configured to false, L2 traffic is not prioritized. |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

nc *boolean*

| | |
|------------|--|
| Synopsis | Prioritize traffic from NC forwarding classes |
| Context | configure service nat nat-policy <i>string</i> priority-sessions fc nc <i>boolean</i> |
| Tree | nc |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

session-limits

| | |
|-------------|--|
| Synopsis | Enter the session-limits context |
| Context | configure service nat nat-policy <i>string</i> session-limits |
| Tree | session-limits |
| Description | Commands in this context configure session-limit attributes for the policy. |
| Introduced | 16.0.R1 |

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

max number

Synopsis Maximum number of sessions per subscriber
 Context **configure service nat nat-policy string session-limits max number**
 Tree **max**
 Range 1 to 65535
 Default 65535
 Introduced 16.0.R1
 Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

reserved number

Synopsis Number of sessions reserved for prioritized sessions
 Context **configure service nat nat-policy string session-limits reserved number**
 Tree **reserved**
 Description This command configures the number of sessions per block that are reserved for prioritized sessions.
 Range 1 to 65534
 Introduced 16.0.R1
 Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

watermarks

Synopsis Enable the **watermarks** context
 Context **configure service nat nat-policy string session-limits watermarks**
 Tree **watermarks**
 Description This command configures watermarks for NAT resources.
 Introduced 16.0.R1
 Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

high number

Synopsis High watermark percentage

| | |
|-------------|---|
| Context | configure service nat nat-policy <i>string session-limits watermarks high number</i> |
| Tree | high |
| Description | This command configures the high threshold value as a percentage of the total port-block space in a NAT pool. |
| Range | 0 to 100 |
| Units | percent |
| Notes | This element is mandatory. |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

low number

| | |
|-------------|--|
| Synopsis | Low watermark percentage |
| Context | configure service nat nat-policy <i>string session-limits watermarks low number</i> |
| Tree | low |
| Description | This command configures the low threshold value as a percentage of the total port-block space in a NAT pool. |
| Range | 0 to 100 |
| Units | percent |
| Notes | This element is mandatory. |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

tcp

| | |
|-------------|--|
| Synopsis | Enter the tcp context |
| Context | configure service nat nat-policy <i>string tcp</i> |
| Tree | tcp |
| Description | Commands in this context configure the transmission control protocol (TCP) attributes of the policy. |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

mss-adjust *number*

| | |
|-------------|--|
| Synopsis | TCP MSS adjustment value |
| Context | configure service nat nat-policy <i>string</i> tcp mss-adjust <i>number</i> |
| Tree | mss-adjust |
| Description | This command configures the value to use to adjust the TCP Maximum Segment Size (MSS) option, if not already present or the present value is higher. |
| Range | 160 to 10240 |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

reset-unknown *boolean*

| | |
|-------------|---|
| Synopsis | Generate TCP reset for packets from unknown flows |
| Context | configure service nat nat-policy <i>string</i> tcp reset-unknown <i>boolean</i> |
| Tree | reset-unknown |
| Description | When configured to true , TCP packets are dropped and a TCP reset is generated if the NAT inside receives a TCP packet without the SYN flag set for an unknown flow.
When configured to false , no TCP reset is generated. |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

timeouts

| | |
|-------------|--|
| Synopsis | Enter the timeouts context |
| Context | configure service nat nat-policy <i>string</i> timeouts |
| Tree | timeouts |
| Description | Commands in this context configure the attributes of session idle timeouts for the policy. |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

icmp-query *number*

| | |
|----------|---|
| Synopsis | Timeout applied to an ICMP Query session |
| Context | configure service nat nat-policy <i>string</i> timeouts icmp-query <i>number</i> |

| | |
|------------|--|
| Tree | icmp-query |
| Range | 60 to 240 |
| Default | 60 |
| Units | seconds |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

sip number

| | |
|------------|--|
| Synopsis | SIP inactive media timeout |
| Context | configure service nat nat-policy string timeouts sip number |
| Tree | sip |
| Range | 10 to 7200 |
| Default | 120 |
| Units | seconds |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

subscriber-retention number

| | |
|-------------|--|
| Synopsis | IP address hold time after host and port blocks expire |
| Context | configure service nat nat-policy string timeouts subscriber-retention number |
| Tree | subscriber-retention |
| Description | This command configures the time to keep a NAT subscriber and its associated IP address after all hosts and associated port blocks expire. If a NAT subscriber host appears before the retention timeout elapses, it is given the same outside IP address. |
| Range | 0 to 1440 |
| Default | 0 |
| Units | minutes |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

tcp

| | |
|----------|------------------------------|
| Synopsis | Enter the tcp context |
|----------|------------------------------|

| | |
|-------------|---|
| Context | configure service nat nat-policy string timeouts tcp |
| Tree | tcp |
| Description | Commands in this context configure TCP timeout attributes. |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

established number

| | |
|------------|--|
| Synopsis | Idle timeout for TCP session in established state |
| Context | configure service nat nat-policy string timeouts tcp established number |
| Tree | established |
| Range | 60 to 86400 |
| Default | 7440 |
| Units | seconds |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

rst number

| | |
|-------------|---|
| Synopsis | Suspend time for TCP connection ports closed by RST |
| Context | configure service nat nat-policy string timeouts tcp rst number |
| Tree | rst |
| Description | This command configures the suspend time for outside TCP ports that are used in translations for TCP connections, when they are closed by TCP Reset (RST). After the timer expires, the outside ports can be reused for new TCP translations. |
| Range | 0 to 240 |
| Default | 0 |
| Units | seconds |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

syn number

| | |
|----------|--|
| Synopsis | TCP session timeout when synchronizing initial sequence |
| Context | configure service nat nat-policy string timeouts tcp syn number |

| | |
|------------|--|
| Tree | syn |
| Range | 6 to 86400 |
| Default | 15 |
| Units | seconds |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

time-wait *number*

| | |
|------------|--|
| Synopsis | Timeout applied to a TCP session in the time-wait state |
| Context | configure service nat nat-policy <i>string</i> timeouts tcp time-wait <i>number</i> |
| Tree | time-wait |
| Range | 0 to 240 |
| Default | 0 |
| Units | seconds |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

transitory *number*

| | |
|------------|---|
| Synopsis | Idle timeout for TCP session in transitory state |
| Context | configure service nat nat-policy <i>string</i> timeouts tcp transitory <i>number</i> |
| Tree | transitory |
| Range | 60 to 86400 |
| Default | 240 |
| Units | seconds |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

udp

| | |
|----------|--|
| Synopsis | Enter the udp context |
| Context | configure service nat nat-policy <i>string</i> timeouts udp |
| Tree | udp |

| | |
|-------------|---|
| Description | Commands in this context configure the User Datagram Protocol (UDP) mapping timeout attributes. |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

dns number

| | |
|------------|---|
| Synopsis | Timeout applied to UDP session with destination port 53 |
| Context | configure service nat nat-policy <i>string</i> timeouts udp dns number |
| Tree | dns |
| Range | 15 to 86400 |
| Default | 15 |
| Units | seconds |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

initial number

| | |
|------------|---|
| Synopsis | UDP mapping timeout applied to new sessions |
| Context | configure service nat nat-policy <i>string</i> timeouts udp initial number |
| Tree | initial |
| Range | 10 to 300 |
| Default | 15 |
| Units | seconds |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

normal number

| | |
|----------|--|
| Synopsis | UDP mapping timeout |
| Context | configure service nat nat-policy <i>string</i> timeouts udp normal number |
| Tree | normal |
| Range | 60 to 86400 |
| Default | 300 |
| Units | seconds |

| | |
|------------|--|
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

udp

| | |
|------------|--|
| Synopsis | Enter the udp context |
| Context | configure service nat nat-policy string udp |
| Tree | udp |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

inbound-refresh *boolean*

| | |
|-------------|---|
| Synopsis | Extend UDP session timeout on inbound traffic |
| Context | configure service nat nat-policy string udp inbound-refresh boolean |
| Tree | inbound-refresh |
| Description | When configured to true , this command extends the UDP session timeout on inbound traffic.
When configured to false , the UDP session timeout is not extended. |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

pcp-server-policy [*name*] *string*

| | |
|------------|---|
| Synopsis | Enter the pcp-server-policy list instance |
| Context | configure service nat pcp-server-policy string |
| Tree | pcp-server-policy |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

[*name*] *string*

| | |
|----------|---|
| Synopsis | PCP server policy name |
| Context | configure service nat pcp-server-policy string |

| | |
|---------------|--|
| Tree | pcp-server-policy |
| String Length | 1 to 32 |
| Notes | This element is part of a list key. |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

description *string*

| | |
|---------------|--|
| Synopsis | Text description |
| Context | configure service nat pcp-server-policy <i>string</i> description <i>string</i> |
| Tree | description |
| String Length | 1 to 80 |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

lifetime

| | |
|------------|---|
| Synopsis | Enter the lifetime context |
| Context | configure service nat pcp-server-policy <i>string</i> lifetime |
| Tree | lifetime |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

maximum *number*

| | |
|------------|---|
| Synopsis | Maximum lifetime of explicit mappings made by the PCP servers |
| Context | configure service nat pcp-server-policy <i>string</i> lifetime maximum <i>number</i> |
| Tree | maximum |
| Range | 61 to 86400 |
| Default | 86400 |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

minimum *number*

| | |
|------------|--|
| Synopsis | Minimum lifetime of explicit mappings made by the PCP servers |
| Context | configure service nat pcp-server-policy <i>string lifetime minimum number</i> |
| Tree | minimum |
| Range | 60 to 86399 |
| Default | 120 |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

max-description-size *number*

| | |
|------------|--|
| Synopsis | Maximum length of mapping descriptions made by the PCP servers |
| Context | configure service nat pcp-server-policy <i>string max-description-size number</i> |
| Tree | max-description-size |
| Range | 1 to 64 |
| Default | 64 |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

opcode

| | |
|------------|---|
| Synopsis | Enter the opcode context |
| Context | configure service nat pcp-server-policy <i>string opcode</i> |
| Tree | opcode |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

announce *boolean*

| | |
|------------|--|
| Synopsis | Process the announce PCP requests |
| Context | configure service nat pcp-server-policy <i>string opcode announce boolean</i> |
| Tree | announce |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

get *boolean*

| | |
|------------|--|
| Synopsis | Process the get PCP requests |
| Context | configure service nat pcp-server-policy <i>string</i> opcode get <i>boolean</i> |
| Tree | get |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

map *boolean*

| | |
|------------|--|
| Synopsis | Process the map PCP requests |
| Context | configure service nat pcp-server-policy <i>string</i> opcode map <i>boolean</i> |
| Tree | map |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

option

| | |
|------------|---|
| Synopsis | Enter the option context |
| Context | configure service nat pcp-server-policy <i>string</i> option |
| Tree | option |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

description *boolean*

| | |
|------------|--|
| Synopsis | Text description |
| Context | configure service nat pcp-server-policy <i>string</i> option description <i>boolean</i> |
| Tree | description |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

next *boolean*

| | |
|------------|--|
| Synopsis | Process the PCP requests that contain the next option |
| Context | configure service nat pcp-server-policy string option next <i>boolean</i> |
| Tree | next |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

port-reservation *boolean*

| | |
|------------|--|
| Synopsis | Process the PCP requests that contain the prefer failure option |
| Context | configure service nat pcp-server-policy string option port-reservation <i>boolean</i> |
| Tree | port-reservation |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

port-set *boolean*

| | |
|-------------|---|
| Synopsis | Support the PORT_SET option in PCP MAP requests |
| Context | configure service nat pcp-server-policy string option port-set <i>boolean</i> |
| Tree | port-set |
| Description | <p>When configured to true, the PCP MAP option optimizes PCP performance for applications that require multiple sets of port forwards. A range of consecutive port forwards can be requested by the PCP client with a single PCP request.</p> <p>When configured to false, the default behavior is applied, where a plain MAP option is used to allocate a single port in a single request.</p> |
| Default | false |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

prefer-failure *boolean*

| | |
|----------|--|
| Synopsis | Process the PCP requests that contain the port reservation option |
| Context | configure service nat pcp-server-policy string option prefer-failure <i>boolean</i> |

| | |
|------------|--|
| Tree | prefer-failure |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

third-party *boolean*

| | |
|------------|--|
| Synopsis | Process the PCP requests that contain the third party option |
| Context | configure service nat pcp-server-policy <i>string</i> option third-party <i>boolean</i> |
| Tree | third-party |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

reuse-external-ip-address *boolean*

| | |
|-------------|--|
| Synopsis | Reuse external IP address for NAT subscriber |
| Context | configure service nat pcp-server-policy <i>string</i> reuse-external-ip-address <i>boolean</i> |
| Tree | reuse-external-ip-address |
| Description | <p>When configured to true, the system reuses the external IP address assigned to a subscriber when the requested well-known port or external IP mapping is not available.</p> <p>When configured to false, a request for a well-known port is allocated as requested on a different external IP address if the port is already allocated to another subscriber sharing the same external IP address. The existing external IP address is initially allocated to the subscriber as a result of the initial traffic flow.</p> <p>This configuration flag can be set dynamically but the flag affects only PCP port forwards that are created after the flag has been set.</p> |
| Default | false |
| Introduced | 19.10.R3 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

version

| | |
|------------|--|
| Synopsis | Enter the version context |
| Context | configure service nat pcp-server-policy <i>string</i> version |
| Tree | version |
| Introduced | 16.0.R1 |

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

maximum *number*

Synopsis Maximum protocol version supported by the PCP servers

Context **configure** [service nat pcp-server-policy](#) *string version maximum number*

Tree [maximum](#)

Range 1 to 255

Default 1

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

minimum *number*

Synopsis Minimum protocol version supported by the PCP servers

Context **configure** [service nat pcp-server-policy](#) *string version minimum number*

Tree [minimum](#)

Range 1 to 255

Default 1

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

prefix-list [[name](#)] *string*

Synopsis Enter the **prefix-list** list instance

Context **configure** [service nat prefix-list](#) *string*

| String Length | 1 to 32 |
| Default | TMNX |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

max-tx-delay *number*

| | |
|------------|--|
| Synopsis | Maximum time a syslog message delays in the output buffer to aggregate multiple events |
| Context | configure service nat syslog export-policy <i>string</i> max-tx-delay <i>number</i> |
| Tree | max-tx-delay |
| Range | 0 to 100 |
| Default | 3 |
| Units | deciseconds |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

mtu *number*

| | |
|------------|--|
| Synopsis | Maximum transmission unit |
| Context | configure service nat syslog export-policy <i>string</i> mtu <i>number</i> |
| Tree | mtu |
| Range | 512 to 9000 |
| Default | 1500 |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

rate-limit *number*

| | |
|------------|---|
| Synopsis | Frame limit |
| Context | configure service nat syslog export-policy <i>string</i> rate-limit <i>number</i> |
| Tree | rate-limit |
| Range | 10 to 2147483647 |
| Units | packets per second |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

severity-level *keyword*

| | |
|------------|--|
| Synopsis | Severity level in the PRI part of the syslog messages |
| Context | configure service nat syslog export-policy <i>string</i> severity-level <i>keyword</i> |
| Tree | severity-level |
| Default | info |
| Options | emergency, alert, critical, error, warning, notice, info, debug |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

up-nat-policy [[name](#)] *string*

| | |
|----------|--|
| Synopsis | Enter the up-nat-policy list instance |
| Context | configure service nat up-nat-policy <i>string</i> |
| Tree | up-nat-policy |

| | |
|----------------|--|
| Max. Instances | 32 |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

[name] *string*

| | |
|---------------|---|
| Synopsis | UP NAT policy name |
| Context | configure <i>service nat up-nat-policy string</i> |
| Tree | <i>up-nat-policy</i> |
| Description | This command specifies the UP NAT policy name. The name default has a special meaning representing the default UP NAT policy template. The system uses the default template when the BNG CPF does not receive a more specific name when the subscriber is instantiated. |
| String Length | 1 to 32 |
| Notes | This element is part of a list key. |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

alg

| | |
|-------------|--|
| Synopsis | Enter the alg context |
| Context | configure <i>service nat up-nat-policy string alg</i> |
| Tree | <i>alg</i> |
| Description | Commands in this context configure the Application Layer Gateway (ALG) attributes of the policy. |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

ftp *boolean*

| | |
|------------|--|
| Synopsis | Use FTP ALG for the policy |
| Context | configure <i>service nat up-nat-policy string alg ftp boolean</i> |
| Tree | <i>ftp</i> |
| Default | true |
| Introduced | 20.10.R1 |

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

pptp *boolean*

Synopsis Use PPTP ALG for the policy

Context **configure** **service nat up-nat-policy** *string alg pptp boolean*

Tree [pptp](#)

Description When configured to **true**, the policy uses Point-to-Point Tunneling Protocol (PPTP) ALG.

PPTP sessions can only be initiated from NAT inside.

GRE traffic is allowed through NAT only if the corresponding mapping exists.

There can be seven calls (GRE tunnels) per control session.

When configured to **false**, PPTP ALG is not used.

Default false

Introduced 20.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

rtsp *boolean*

Synopsis Use RTSP ALG for the policy

Context **configure** **service nat up-nat-policy** *string alg rtsp boolean*

Tree [rtsp](#)

Description When configured to **true**, Real-Time Streaming Protocol (RTSP) ALG is used for the policy.

Default false

Introduced 20.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

sip *boolean*

Synopsis Use SIP ALG for the policy

Context **configure** **service nat up-nat-policy** *string alg sip boolean*

Tree [sip](#)

Default false

Introduced 20.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

block-limit *number*

Synopsis Maximum number of port blocks per NAT subscriber

Context **configure service nat up-nat-policy** *string* **block-limit** *number*

Tree [block-limit](#)

Range 1 to 10

Default 1

Introduced 23.3.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

default-host

Synopsis Enable the **default-host** context

Context **configure service nat up-nat-policy** *string* **default-host**

Tree [default-host](#)

Description Commands in this context configure the default DMZ host options. A default DMZ host is a node on the inside to which all unknown traffic is redirected by changing the destination IPv4 address in the traffic header. During this operation, the checksums in the Layer 3 and Layer 4 header (UDP and TCP) are recalculated.

Unknown traffic in NAT represent all unmatched traffic arriving from the outside (where there is no pinhole or a matching flow record created by traffic initiated from the inside). The purpose of the default DMZ host is to capture and analyze the unknown traffic as part of threat analysis.

The rate of redirected unknown traffic can be restricted by configuration.

Introduced 22.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

inside-router-instance *string*

Synopsis Router instance of the DMZ

Context **configure service nat up-nat-policy** *string* **default-host** **inside-router-instance** *string*

Tree [inside-router-instance](#)

Description This command configures the router instance on the inside where the default DMZ host resides.

Introduced 22.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

ip-address *string*

Synopsis IP address of the default DMZ host

Context **configure service nat up-nat-policy** *string* **default-host ip-address** *string*

Tree [ip-address](#)

Description This command configures the IP address of the default DMZ host. Redirection to the default DMZ host is achieved by replacing the destination IP address in the traffic header in the unknown traffic initiated from the outside with the one of the default DMZ host.

Introduced 22.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

rate-limit *number*

Synopsis Rate limit for unknown traffic sent to default DMZ host

Context **configure service nat up-nat-policy** *string* **default-host rate-limit** *number*

Tree [rate-limit](#)

Description This command configures the rate limit of the unknown traffic sent to the default DMZ host.

Unknown traffic sent to the default DMZ host is rate limited by a configurable value expressed in mbps. The rate limit is configurable per NAT pool per ISA, vISA, or ESA-VM.

Range 1 to 10000

Default 10

Units megabps

Introduced 22.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

description *string*

Synopsis Text description

Context **configure service nat up-nat-policy** *string* **description** *string*

| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

fc

| | |
|-------------|---|
| Synopsis | Enter the fc context |
| Context | configure service nat up-nat-policy string priority-sessions fc |
| Tree | fc |
| Description | Commands in this context specify which Forwarding Class (FC) options have prioritized sessions. |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

af boolean

| | |
|-------------|--|
| Synopsis | Prioritize traffic from AF forwarding classes |
| Context | configure service nat up-nat-policy string priority-sessions fc af boolean |
| Tree | af |
| Description | When configured to true , traffic from Assured Forwarding (AF) FC sessions is prioritized. When configured to false , AF traffic is not prioritized. |
| Default | false |
| Introduced | 20.10.R1 |

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

be *boolean*

Synopsis Prioritize traffic from BE forwarding classes

Context **configure service nat up-nat-policy** *string* **priority-sessions fc be** *boolean*

Tree **be**

Description When configured to **true**, traffic from Best Effort (BE) FC sessions is prioritized. When configured to **false**, BE traffic is not prioritized.

Default false

Introduced 20.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

ef *boolean*

Synopsis Prioritize traffic from EF forwarding classes

Context **configure service nat up-nat-policy** *string* **priority-sessions fc ef** *boolean*

Tree **ef**

Default false

Introduced 20.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

h1 *boolean*

Synopsis Prioritize traffic from H1 forwarding classes

Context **configure service nat up-nat-policy** *string* **priority-sessions fc h1** *boolean*

Tree **h1**

Description When configured to **true**, traffic from H1 sessions is prioritized. When configured to false, H1 traffic is not prioritized.

Default false

Introduced 20.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

h2 *boolean*

Synopsis Prioritize traffic from H2 forwarding classes

| | |
|------------|--|
| Context | configure service nat up-nat-policy <i>string</i> priority-sessions fc h2 <i>boolean</i> |
| Tree | h2 |
| Default | false |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

I1 *boolean*

| | |
|------------|--|
| Synopsis | Prioritize traffic from L1 forwarding classes |
| Context | configure service nat up-nat-policy <i>string</i> priority-sessions fc I1 <i>boolean</i> |
| Tree | I1 |
| Default | false |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

I2 *boolean*

| | |
|-------------|--|
| Synopsis | Prioritize traffic from L2 forwarding classes |
| Context | configure service nat up-nat-policy <i>string</i> priority-sessions fc I2 <i>boolean</i> |
| Tree | I2 |
| Description | When configured to true , traffic from L2 sessions is prioritized. When configured to false, L2 traffic is not prioritized. |
| Default | false |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

nc *boolean*

| | |
|------------|--|
| Synopsis | Prioritize traffic from NC forwarding classes |
| Context | configure service nat up-nat-policy <i>string</i> priority-sessions fc nc <i>boolean</i> |
| Tree | nc |
| Default | false |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

session-limits

| | |
|-------------|---|
| Synopsis | Enter the session-limits context |
| Context | configure service nat up-nat-policy string session-limits |
| Tree | session-limits |
| Description | Commands in this context configure session-limit attributes for the policy. |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

max number

| | |
|------------|---|
| Synopsis | Maximum number of sessions per subscriber |
| Context | configure service nat up-nat-policy string session-limits max number |
| Tree | max |
| Range | 1 to 65535 |
| Default | 65535 |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

reserved number

| | |
|-------------|--|
| Synopsis | Number of sessions reserved for prioritized sessions |
| Context | configure service nat up-nat-policy string session-limits reserved number |
| Tree | reserved |
| Description | This command configures the number of sessions per block that are reserved for prioritized sessions. |
| Range | 1 to 65534 |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

watermarks

| | |
|-------------|---|
| Synopsis | Enable the watermarks context |
| Context | configure service nat up-nat-policy string session-limits watermarks |
| Tree | watermarks |
| Description | This command configures watermarks for NAT resources. |

| | |
|------------|--|
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

high number

| | |
|-------------|---|
| Synopsis | High watermark percentage |
| Context | configure service nat up-nat-policy <i>string session-limits watermarks high number</i> |
| Tree | high |
| Description | This command configures the high threshold value as a percentage of the total port-block space in a NAT pool. |
| Range | 0 to 100 |
| Units | percent |
| Notes | This element is mandatory. |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

low number

| | |
|-------------|--|
| Synopsis | Low watermark percentage |
| Context | configure service nat up-nat-policy <i>string session-limits watermarks low number</i> |
| Tree | low |
| Description | This command configures the low threshold value as a percentage of the total port-block space in a NAT pool. |
| Range | 0 to 100 |
| Units | percent |
| Notes | This element is mandatory. |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

tcp

| | |
|----------|--|
| Synopsis | Enter the tcp context |
| Context | configure service nat up-nat-policy <i>string tcp</i> |
| Tree | tcp |

| | |
|-------------|--|
| Description | Commands in this context configure the transmission control protocol (TCP) attributes of the policy. |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

mss-adjust *number*

| | |
|-------------|--|
| Synopsis | TCP MSS adjustment value |
| Context | configure service nat up-nat-policy <i>string tcp mss-adjust number</i> |
| Tree | mss-adjust |
| Description | This command configures the value to use to adjust the TCP Maximum Segment Size (MSS) option, if not already present or the present value is higher. |
| Range | 160 to 10240 |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

reset-unknown *boolean*

| | |
|-------------|---|
| Synopsis | Generate TCP reset for packets from unknown flows |
| Context | configure service nat up-nat-policy <i>string tcp reset-unknown boolean</i> |
| Tree | reset-unknown |
| Description | When configured to true , TCP packets are dropped and a TCP reset is generated if the NAT inside receives a TCP packet without the SYN flag set for an unknown flow.
When configured to false , no TCP reset is generated. |
| Default | false |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

timeouts

| | |
|-------------|--|
| Synopsis | Enter the timeouts context |
| Context | configure service nat up-nat-policy <i>string timeouts</i> |
| Tree | timeouts |
| Description | Commands in this context configure the attributes of session idle timeouts for the policy. |
| Introduced | 20.10.R1 |

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

icmp-query *number*

Synopsis Timeout applied to an ICMP Query session

Context **configure service nat up-nat-policy** *string timeouts icmp-query number*

Tree [icmp-query](#)

Range 60 to 240

Default 60

Units seconds

Introduced 20.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

sip *number*

Synopsis SIP inactive media timeout

Context **configure service nat up-nat-policy** *string timeouts sip number*

Tree [sip](#)

Range 10 to 7200

Default 120

Units seconds

Introduced 20.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

subscriber-retention *number*

Synopsis IP address hold time after host and port blocks expire

Context **configure service nat up-nat-policy** *string timeouts subscriber-retention number*

Tree [subscriber-retention](#)

Description This command configures the time to keep a NAT subscriber and its associated IP address after all hosts and associated port blocks expire. If a NAT subscriber host appears before the retention timeout elapses, it is given the same outside IP address.

Range 0 to 1440

Default 0

Units minutes

| | |
|------------|--|
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

tcp

| | |
|-------------|--|
| Synopsis | Enter the tcp context |
| Context | configure service nat up-nat-policy string timeouts tcp |
| Tree | tcp |
| Description | Commands in this context configure TCP timeout attributes. |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

established *number*

| | |
|------------|--|
| Synopsis | Idle timeout for TCP session in established state |
| Context | configure service nat up-nat-policy string timeouts tcp established <i>number</i> |
| Tree | established |
| Range | 60 to 86400 |
| Default | 7440 |
| Units | seconds |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

rst *number*

| | |
|-------------|---|
| Synopsis | Suspend time for TCP connection ports closed by RST |
| Context | configure service nat up-nat-policy string timeouts tcp rst <i>number</i> |
| Tree | rst |
| Description | This command configures the suspend time for outside TCP ports that are used in translations for TCP connections, when they are closed by TCP Reset (RST). After the timer expires, the outside ports can be reused for new TCP translations. |
| Range | 0 to 240 |
| Default | 0 |
| Units | seconds |
| Introduced | 20.10.R1 |

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

syn number

Synopsis TCP session timeout when synchronizing initial sequence

Context **configure service nat up-nat-policy** *string timeouts tcp syn number*

Tree [syn](#)

Range 6 to 86400

Default 15

Units seconds

Introduced 20.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

time-wait number

Synopsis Timeout applied to a TCP session in the time-wait state

Context **configure service nat up-nat-policy** *string timeouts tcp time-wait number*

Tree [time-wait](#)

Range 0 to 240

Default 0

Units seconds

Introduced 20.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

transitory number

Synopsis Idle timeout for TCP session in transitory state

Context **configure service nat up-nat-policy** *string timeouts tcp transitory number*

Tree [transitory](#)

Range 60 to 86400

Default 240

Units seconds

Introduced 20.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

udp

| | |
|-------------|---|
| Synopsis | Enter the udp context |
| Context | configure service nat up-nat-policy <i>string</i> timeouts udp |
| Tree | udp |
| Description | Commands in this context configure the User Datagram Protocol (UDP) mapping timeout attributes. |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

dns *number*

| | |
|------------|--|
| Synopsis | Timeout applied to UDP session with destination port 53 |
| Context | configure service nat up-nat-policy <i>string</i> timeouts udp dns <i>number</i> |
| Tree | dns |
| Range | 15 to 86400 |
| Default | 15 |
| Units | seconds |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

initial *number*

| | |
|------------|--|
| Synopsis | UDP mapping timeout applied to new sessions |
| Context | configure service nat up-nat-policy <i>string</i> timeouts udp initial <i>number</i> |
| Tree | initial |
| Range | 10 to 300 |
| Default | 15 |
| Units | seconds |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

normal *number*

| | |
|----------|---------------------|
| Synopsis | UDP mapping timeout |
|----------|---------------------|

| | |
|------------|---|
| Context | configure service nat up-nat-policy <i>string</i> timeouts udp normal <i>number</i> |
| Tree | normal |
| Range | 60 to 86400 |
| Default | 300 |
| Units | seconds |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

udp

| | |
|------------|---|
| Synopsis | Enter the udp context |
| Context | configure service nat up-nat-policy <i>string</i> udp |
| Tree | udp |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

inbound-refresh *boolean*

| | |
|-------------|---|
| Synopsis | Extend UDP session timeout on inbound traffic |
| Context | configure service nat up-nat-policy <i>string</i> udp inbound-refresh <i>boolean</i> |
| Tree | inbound-refresh |
| Description | When configured to true , this command extends the UDP session timeout on inbound traffic.
When configured to false , the UDP session timeout is not extended. |
| Default | false |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

oper-group [*name*] *string*

| | |
|----------------|---|
| Synopsis | Enter the oper-group list instance |
| Context | configure service oper-group <i>string</i> |
| Tree | oper-group |
| Max. Instances | 32768 |
| Introduced | 16.0.R1 |

Platforms All

[name] *string*

Synopsis Operational group name
 Context **configure** [service oper-group](#) *string*
 Tree [oper-group](#)
 String Length 1 to 32
 Notes This element is part of a list key.
 Introduced 16.0.R1
 Platforms All

bfd-liveness

Synopsis Enable the **bfd-liveness** context
 Context **configure** [service oper-group](#) *string* **bfd-liveness**
 Tree [bfd-liveness](#)
 Introduced 16.0.R1
 Platforms All

dest-ip *string*

WARNING:

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis Destination address for BFD
 Context **configure** [service oper-group](#) *string* **bfd-liveness** **dest-ip** *string*
 Tree [dest-ip](#)

| Introduced | 16.0.R1 |
| Platforms | All |

mac-pinning *boolean*

| | |
|------------|---|
| Synopsis | Enable MAC address pinning on this spoke SDP |
| Context | configure service pw-template <i>string</i> fdb mac-pinning <i>boolean</i> |
| Tree | mac-pinning |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

maximum-mac-addresses *number*

| | |
|----------|--|
| Synopsis | Maximum number of MAC address entries in the FDB |
| Context | configure service pw-template <i>string</i> fdb maximum-mac-addresses <i>number</i> |
| Tree | maximum-mac-addresses |

Description This command specifies the maximum number of FDB entries for both learned and static MAC addresses for this PW template.

When the configured limit is reached, no new addresses are learned from the SAP or spoke SDP until at least one FDB entry is aged out or cleared.

When the configured limit is reached and the **configure service pw-template fdb discard-unknown-source** command is set to **true** for this PW template, packets with unknown source MAC addresses are discarded. If **discard-unknown-source** is set to **false**, the packets are forwarded if their destination MAC addresses are known, or flooded if their destination MAC addresses are unknown.

However, if the **configure service vpls fdb discard-unknown** command is set to **true**, packets with unknown destination MAC addresses are discarded, even if the limit of FDB entries on the specific VPLS instance is not reached.

When unconfigured, the PW template uses the global MAC learning limitations.

| Synopsis | Administrative state of keepalive mechanism for the SDP |
| Context | configure service sdp number keep-alive admin-state keyword |
| Tree | admin-state |
| Default | disable |
| Options | enable, disable |
| Introduced | 16.0.R1 |
| Platforms | All |

hello-time *number*

WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|----------|--|
| Synopsis | Time period between SDP keepalive messages |
| Context | configure service sdp number keep-alive hello-time number |
| Tree | hello-time |
| Range | 1 to 3600 |
| Default | 10 |
| Units | seconds |

| | |
|------------|---------|
| Introduced | 16.0.R1 |
| Platforms | All |

hold-down-time *number*

| | |
|------------|--|
| Synopsis | Minimum time the SDP remains in the down state |
| Context | configure service sdp <i>number</i> keep-alive hold-down-time <i>number</i> |
| Tree | hold-down-time |
| Range | 0 to 3600 |
| Default | 10 |
| Units | seconds |
| Introduced | 16.0.R1 |
| Platforms | All |

maximum-drop-count *number*

| | |
|------------|--|
| Synopsis | Maximum failed request attempts when SDP is down |
| Context | configure service sdp <i>number</i> keep-alive maximum-drop-count <i>number</i> |
| Tree | maximum-drop-count |
| Range | 1 to 5 |
| Default | 3 |
| Introduced | 16.0.R1 |
| Platforms | All |

message-length *number*

| | |
|------------|--|
| Synopsis | Length of the keepalive request messages transmitted |
| Context | configure service sdp <i>number</i> keep-alive message-length <i>number</i> |
| Tree | message-length |
| Range | 40 to 9198 |
| Introduced | 16.0.R1 |
| Platforms | All |

timeout *number*

| | |
|------------|---|
| Synopsis | Time SDP waits before tearing down the session |
| Context | configure service sdp number keep-alive timeout number |
| Tree | timeout |
| Range | 1 to 10 |
| Default | 5 |
| Units | seconds |
| Introduced | 16.0.R1 |
| Platforms | All |

ldp *boolean***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|------------|---|
| Synopsis | Enable LDP-signaled LSPs |
| Context | configure service sdp number ldp boolean |
| Tree | ldp |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

local-end (*ipv4-address-no-zone* | *ipv6-address-no-zone*)**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|------------|---|
| Synopsis | Local end address of tunnel defined by the SDP |
| Context | configure service sdp number local-end (ipv4-address-no-zone ipv6-address-no-zone) |
| Tree | local-end |
| Introduced | 16.0.R1 |
| Platforms | All |

lsp [*lsp-name*] *string*

| | |
|----------------|---|
| Synopsis | Add a list entry for lsp |
| Context | configure service sdp <i>number lsp string</i> |
| Tree | lsp |
| Max. Instances | 16 |
| Introduced | 16.0.R1 |
| Platforms | All |

[lsp-name] *string*

| | |
|---------------|---|
| Synopsis | LSP name to associate with the SDP |
| Context | configure service sdp <i>number lsp string</i> |
| Tree | lsp |
| String Length | 1 to 64 |
| Notes | This element is part of a list key. |
| Introduced | 16.0.R1 |
| Platforms | All |

metric *number*

| | |
|------------|--|
| Synopsis | Metric used in tunnel table manager for decision making |
| Context | configure service sdp <i>number metric number</i> |
| Tree | metric |
| Range | 1 to 65535 |
| Introduced | 16.0.R1 |
| Platforms | All |

mixed-lsp-mode

| | |
|------------|---|
| Synopsis | Enable the mixed-lsp-mode context |
| Context | configure service sdp <i>number mixed-lsp-mode</i> |
| Tree | mixed-lsp-mode |
| Introduced | 16.0.R1 |
| Platforms | All |

revert-time (*number* | *keyword*)

| | |
|------------|--|
| Synopsis | Delay before SDP can revert to higher priority LSP type |
| Context | configure <i>service sdp number mixed-lsp-mode revert-time</i> (<i>number</i> <i>keyword</i>) |
| Tree | revert-time |
| Range | 1 to 600 |
| Default | immediate |
| Units | seconds |
| Options | never, immediate |
| Introduced | 16.0.R1 |
| Platforms | All |

network-domain *reference*

| | |
|------------|---|
| Synopsis | Network domain name associated with the SDP |
| Context | configure <i>service sdp number network-domain reference</i> |
| Tree | network-domain |
| Reference | configure <i>router string network-domains network-domain string</i> |
| Introduced | 16.0.R1 |
| Platforms | All |

path-mtu *number*

| | |
|------------|--|
| Synopsis | Maximum Transmission Unit (MTU) the SDP can transmit |
| Context | configure <i>service sdp number path-mtu number</i> |
| Tree | path-mtu |
| Range | 576 to 9782 |
| Units | bytes |
| Introduced | 16.0.R1 |
| Platforms | All |

pbb-etype *string*

| | |
|----------|---|
| Synopsis | Ethertype used for PBB |
| Context | configure <i>service sdp number pbb-etype string</i> |

| | |
|---------------|---------------------------|
| Tree | pbb-etype |
| String Length | 5 to 6 |
| Default | 0x88E7 |
| Introduced | 16.0.R1 |
| Platforms | All |

pw-port

| | |
|------------|---|
| Synopsis | Enter the pw-port context |
| Context | configure service sdp number pw-port |
| Tree | pw-port |
| Introduced | 16.0.R4 |
| Platforms | All |

binding-port *string*

| | |
|------------|---|
| Synopsis | Binding port |
| Context | configure service sdp number pw-port binding-port string |
| Tree | binding-port |
| Introduced | 16.0.R4 |
| Platforms | All |

sdp-group [[group-name](#)] *reference*

| | |
|------------|---|
| Synopsis | Add a list entry for sdp-group |
| Context | configure service sdp number sdp-group reference |
| Tree | sdp-group |
| Introduced | 16.0.R1 |
| Platforms | All |

[group-name] *reference*

| | |
|----------|---|
| Synopsis | SDP administrative group name |
| Context | configure service sdp number sdp-group reference |
| Tree | sdp-group |

| | |
|------------|---|
| Reference | configure service sdp-group <i>group-name string</i> |
| Notes | This element is part of a list key. |
| Introduced | 16.0.R1 |
| Platforms | All |

signaling *keyword*

WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|-------------|--|
| Synopsis | Signaling protocol used to obtain pseudowire labels |
| Context | configure service sdp <i>number signaling keyword</i> |
| Tree | signaling |
| Description | <p>This command specifies the signaling protocol used to obtain the ingress and egress pseudowire labels in frames transmitted and received on the SDP. The signaling value can only be changed while the administrative status of the SDP is down. Additionally, the signaling can only be changed on an SDP if the SDP is not in use by BGP-AD or BGP-VPLS. BGP signaling can only be enabled if the SDP does not already have pseudowires signaled over it. Also, BGP signaling is not supported with mixed mode LSP SDPs.</p> <p>Note: If the tldp option is selected as the mechanism for exchanging service labels over an MPLS or GRE SDP and the T-LDP session is automatically established, an explicit T-LDP session that is subsequently configured takes precedence over the automatic T-LDP session. However, if the explicit, manually-configured session is then removed, the system does not revert to the automatic session and the automatic session is also deleted. To address this, recreate the T-LDP session by using the admin-state command to administratively disable and then enable the SDP.</p> |
| Options | off, tldp, bgp |
| Introduced | 16.0.R1 |
| Platforms | All |

source-bmac-lsb

| | |
|------------|--|
| Synopsis | Enter the source-bmac-lsb context |
| Context | configure service sdp <i>number source-bmac-lsb</i> |
| Tree | source-bmac-lsb |
| Introduced | 16.0.R1 |
| Platforms | All |

control-pw-vc-id *number*

| | |
|------------|---|
| Synopsis | VC ID of the control pseudowire |
| Context | configure service sdp <i>number</i> source-bmac-lsb control-pw-vc-id <i>number</i> |
| Tree | control-pw-vc-id |
| Range | 1 to 4294967295 |
| Introduced | 16.0.R1 |
| Platforms | All |

value *string*

| | |
|------------|--|
| Synopsis | 16 least significant bits of virtual backbone MAC |
| Context | configure service sdp <i>number</i> source-bmac-lsb value <i>string</i> |
| Tree | value |
| Introduced | 16.0.R1 |
| Platforms | All |

sr-isis *boolean*

| | |
|------------|--|
| Synopsis | Enable Segment Routing for IS-IS |
| Context | configure service sdp <i>number</i> sr-isis <i>boolean</i> |
| Tree | sr-isis |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

sr-ospf *boolean*

| | |
|------------|--|
| Synopsis | Enable an MPLS SDP of LSP type OSPF Segment Routing |
| Context | configure service sdp <i>number</i> sr-ospf <i>boolean</i> |
| Tree | sr-ospf |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

tunnel-far-end (*ipv4-address-no-zone | ipv6-address-no-zone*)**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|------------|---|
| Synopsis | System address of the far-end router for the SDP |
| Context | configure service sdp number tunnel-far-end (<i>ipv4-address-no-zone ipv6-address-no-zone</i>) |

ac-df-capability *keyword*

WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis AC-influenced DF election capability
 Context **configure service system bgp evpn ethernet-segment** *string ac-df-capability* *keyword*
 Tree [ac-df-capability](#)
 Description This command configures the Attachment Circuit-influenced (AC-influenced) designated forwarder (DF) election capability (AC-DF) into the DF election for the Ethernet Segment (ES).
 AC-DF supports EVPN Auto-Discovery per EVI/ES (AD per EVI/ES) routes for a specific PE, to ensure the PE is included in the candidate DF election list.
 When AC-DF is excluded on a specific ES, the presence or absence of the AD per EVI/ES routes from the ES peers does not modify the candidate DF election list for the ES. Excluding the AC-DF is recommended in ESs that use an operational group monitored by the access LAG to signal the standby LACP or to power-off.
 Default include
 Options include, exclude
 Introduced 21.5.R1
 Platforms All

vprn-next-hop [[ip-address](#)] (*ipv4-address-no-zone | ipv6-address-no-zone*)

| | |
|----------------|---|
| Synopsis | Enter the vprn-next-hop list instance |
| Context | configure service system bgp evpn ethernet-segment <i>string association vprn-next-hop (ipv4-address-no-zone ipv6-address-no-zone)</i> |
| Tree | vprn-next-hop |
| Description | Commands in this list instance are used to associate an IPv4 or IPv6 address to an Ethernet segment. A virtual Ethernet segment using this VPRN next-hop association represents a Layer 3 Ethernet segment as described in <i>draft-sajassi-bess-evpn-ip-aliasing</i> . This IP address must be installed in the route table of the VPRN service identified by the EVI so that the Auto-Discovery per-ES or EVI routes for the ES are advertised. Only one VPRN next hop is supported per Ethernet segment. |
| Max. Instances | 1 |
| Notes | The following elements are part of a choice: lag , network-interconnect-vxlan , port , pw-port , sdp , or vprn-next-hop . |

Introduced 22.10.R1
 Platforms All

etree-leaf-label *boolean*

| | |
|-------------|---|
| Synopsis | Enable E-Tree leaf label for PE |
| Context | configure <i>service</i> <i>system</i> <i>bgp evpn etree-leaf-label</i> <i>boolean</i> |
| Tree | <i>etree-leaf-label</i> |
| Description | <p>When configured to true, this command enables EVPN Ethernet-Tree (E-Tree) VPLS services on the router (not B-VPLS), allocates an E-Tree leaf label for the Provider Edge (PE) device, and configures the ILM entry. This command ensures that in-flight traffic can perform an ILM entry lookup at any time, and avoids discards when administratively enabling or disabling services, or reduces the timing window so that it does not occur during normal operation or configuration. The value for the E-Tree leaf label is set via the etree-leaf-label-value command.</p> <p>When configured to false, PE leaf labels are not supported. The bgp-evpn mpls admin-state command in the configure service epipe context cannot be administratively enabled if this command is set to false.</p> |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

etree-leaf-label-value (*number* | *keyword*)

| | |

d-path-length-ignore *boolean*

| | |
|------------|---|
| Synopsis | Ignore D-PATH length for BGP path selection of EVPN-IFF |
| Context | configure service system bgp evpn ip-prefix-routes d-path-length-ignore <i>boolean</i> |
| Tree | d-path-length-ignore |
| Default | false |
| Introduced | 21.10.R1 |
| Platforms | All |

iff-attribute-uniform-propagation *boolean*

| | |
|-------------|--|
| Synopsis | Enable uniform propagation of BGP attributes |
| Context | configure service system bgp evpn ip-prefix-routes iff-attribute-uniform-propagation <i>boolean</i> |
| Tree | iff-attribute-uniform-propagation |
| Description | When configured to true , this command enables the uniform propagation of BGP attributes for EVPN-IFF (Interfaceful) routes. EVPN-IFF is used in R-VPLS services with bgp-evpn ip-route-advertisement . When enabled, the received EVPN-IFF routes for the R-VPLS can be propagated with the original BGP path attributes into EVPN-IFL, IPVPN, EVPN-IFF (in other R-VPLS services) or BGP IP routes advertised for the attached VPRN. The command also enables the attribute propagation in the opposite direction, for example, from EVPN-IFL/IPVPN/IP/EVPN-IFF routes into EVPN-IFF routes. |

The propagation follows the uniform mode defined in draft-ietf-bess-evpn-ipvpn-interworking.

When configured to **false**, this command re-originates the BGP Path Attributes when propagating EVPN-IFF routes into other Inter-Subnet Forwarding families.

| | |
|------------|---------|
| Default | false |
| Introduced | 21.2.R1 |
| Platforms | All |

iff-bgp-path-selection *boolean*

| | |
|-------------|---|
| Synopsis | Enable BGP path selection for EVPN-IFF routes |
| Context | configure service system bgp evpn ip-prefix-routes iff-bgp-path-selection <i>boolean</i> |
| Tree | iff-bgp-path-selection |
| Description | <p>When configured to true, this command enables the EVPN-IFF routes to be ordered and selected in a similar manner as IPVPN or EVPN-IFL routes, that is, based on the regular BGP path selection process.</p> <p>When configured to false, this command makes the system order EVPN-IFF routes based on their {RVPLS Iindex, RD, Ethernet Tag}. For example, if two EVPN-IFF routes are received for the same prefix on the same R-VPLS and with different RDs (Route Distinguishers), the route with the lowest RD is selected.</p> |
| Default | false |
| Introduced | 21.2.R1 |
| Platforms | All |

multicast-leave-sync-propagation *number*

| | |
|-------------|---|
| Synopsis | Multicast leave group synchronization delay |
| Context | configure service system bgp evpn multicast-leave-sync-propagation <i>number</i> |
| Tree | multicast-leave-sync-propagation |
| Description | <p>This command configures the additional amount of time that the system waits before removing a multicast state that was synchronized in an Ethernet Segment via Multicast Join or Leave Synch routes. This value represents a delta corresponding to the time it takes for a BGP advertisement to propagate to ES peers.</p> <p>The node triggering the route computes the maximum response time as the product of the locally configured values, Last Member Query Count and Last Member Query Interval, and adds the delta value to the maximum response time. The query count value is configured in the configure services vrpn igmp robust-count command. The query interval value is taken from the configure service vpls sap igmp-snooping last-member-query-interval or the configure service vpls spoke-sdp igmp-snooping last-member-query-interval configuration, depending on the Ethernet Segment.</p> |

Increasing the maximum response time by this value can help minimize the churn of removing and recreating the state on the node.

This value should be configured consistently in all ES peers.

| | |
|------------|----------|
| Range | 0 to 300 |
| Default | 5 |

| Tree | <i>policy</i> |
| String Length | 1 to 32 |
| Notes | This element is part of a list key. |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

description *string*

| | |
|---------------|---|
| Synopsis | Text description |
| Context | configure service upnp policy <i>string</i> description <i>string</i> |
| Tree | <i>description</i> |
| String Length | 1 to 80 |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

mapping-limit *number*

| | |
|----------|---|
| Synopsis | Maximum number of UPnP mappings per subscriber |
| Context | configure service upnp policy <i>string</i> mapping-limit <i>number</i> |
| Tree | <i>mapping-limit</i> |

| | |
|------------|--|
| Range | 1 to 256 |
| Default | 256 |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

port number

| | |
|------------|---|
| Synopsis | HTTP TCP port to which the UPnP IGD listens |
| Context | configure service upnp policy string port number |
| Tree | port |
| Range | 1 to 65535 |
| Default | 5000 |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

strict-mode boolean

| | |
|-------------|---|
| Synopsis | Enable UPnP strict mode |
| Context | configure service upnp policy string strict-mode boolean |
| Tree | strict-mode |
| Description | When configured to true , this command enables UPnP strict mode, in which the system only allows changes to an existing UPnP mapping if the request comes from the same UPnP client. |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

vpls [service-name] string

| | |
|------------|--------------------------------------|
| Synopsis | Enter the vpls list instance |
| Context | configure service vpls string |
| Tree | vpls |
| Introduced | 16.0.R1 |
| Platforms | All |

[service-name] *string*

| | |
|---------------|---|
| Synopsis | Administrative service name |
| Context | configure service vpls <i>string</i> |
| Tree | vpls |
| String Length | 1 to 64 |
| Notes | This element is part of a list key. |

Platforms All

adv-service-mtu *number*

Synopsis Advertised service MTU value

Context **configure** [service vpls string](#) [bgp number](#) **adv-service-mtu** *number*

Tree [adv-service-mtu](#)

Description This command configures the MTU signaled value used in the BGP for the service. When configured, the router uses the value for signaling and for validation with the received MTU instead of the service MTU. However, the value does not affect the locally enforced value, which is still based on the service MTU.

Range 0 to 9782

Introduced 22.2.R1

Platforms All

pw-template-binding [[pw-template-name](#)] *reference*

| Introduced | 16.0.R1 |
| Platforms | All |

bgp *boolean*

| | |
|-------------|---|
| Synopsis | Use BGP tunneling for next-hop resolution |
| Context | configure service vpls string bgp-evpn mpls number auto-bind-tunnel resolution-filter
bgp <i>boolean</i> |
| Tree | bgp |
| Description | When configured to true , BGP searches the BGP LSP for the address of the BGP next hop.

When configured to false , BGP tunneling is not used and inter-area or inter-as prefixes are not resolved. |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

ldp *boolean*

| | |
|-------------|--|
| Synopsis | Use LDP tunneling for next-hop resolution |
| Context | configure service vpls string bgp-evpn mpls number auto-bind-tunnel resolution-filter
ldp <i>boolean</i> |
| Tree | ldp |
| Description | When configured to true , BGP searches for an LDP LSP with a FEC prefix corresponding to the address of the BGP next hop.

When configured to false , LDP tunneling is not used for next-hop resolution. |
| Default | false |

| | |
|------------|---------|
| Introduced | 16.0.R1 |
| Platforms | All |

mpls-fwd-policy *boolean*

| | |
|-------------|---|
| Synopsis | Use MPLS forwarding policy for next-hop resolution |
| Context | configure service vpls string bgp-evpn mpls number auto-bind-tunnel resolution-filter mpls-fwd-policy <i>boolean</i> |
| Tree | mpls-fwd-policy |
| Description | When configured to true , BGP uses the MPLS forwarding policy to determine the address of the BGP next hop.

When configured to false , the MPLS forwarding policy is not used for next-hop resolution. |
| Default | false |
| Introduced | 19.5.R1 |
| Platforms | All |

rib-api *boolean*

| | |
|-------------|---|
| Synopsis | Use RIB API gRPC service for next-hop resolution |
| Context | configure service vpls string bgp-evpn mpls number auto-bind-tunnel resolution-filter rib-api <i>boolean</i> |
| Tree | rib-api |
| Description | When configured to true , BGP uses tunnels programmed using the RIB API gRPC service to resolve the next hops of routes imported into the EVPN service.

When configured to false , the RIB API service tunnels are not used for next-hop resolution. |
| Default | false |
| Introduced | 19.5.R1 |
| Platforms | All |

rsvp *boolean*

| | |
|----------|--|
| Synopsis | Use RSVP tunneling for next-hop resolution |
| Context | configure service vpls string bgp-evpn mpls number auto-bind-tunnel resolution-filter rsvp <i>boolean</i> |
| Tree | rsvp |

| | |
|-------------|---|
| Description | When configured to true , BGP searches the best metric RSVP LSP to determine the address of the BGP next hop. This address can correspond to the system interface or to another loopback interface used by the BGP instance on the remote node. The LSP metric is provided by MPLS in the tunnel table. In the case of multiple RSVP LSPs with the same lowest metric, BGP selects the LSP with the lowest tunnel ID.

When configured to false , the RSVP LSP is not used for next-hop resolution. |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

sr-isis boolean

| | |
|-------------|---|
| Synopsis | Use IS-IS SR tunneling for next-hop resolution |
| Context | configure service vpls string bgp-evpn mpls number auto-bind-tunnel resolution-filter sr-isis boolean |
| Tree | sr-isis |
| Description | When configured to true , BGP uses an IS-IS tunnel type to determine the address of the BGP next hop.

The SR tunnel to the BGP next hop is selected in the TTM from the lowest-numbered IS-IS instance.

When configured to false , IS-IS tunneling is not used for next-hop resolution. |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

sr-ospf boolean

| | |
|-------------|--|
| Synopsis | Use OSPF SR tunneling for next-hop resolution |
| Context | configure service vpls string bgp-evpn mpls number auto-bind-tunnel resolution-filter sr-ospf boolean |
| Tree | sr-ospf |
| Description | When configured to true , BGP uses an OSPF tunnel type to determine the address of the BGP next hop.

The SR tunnel to the BGP next hop is selected in the TTM from the lowest-numbered OSPF instance.

When configured to false , OSPF tunneling is not used for next-hop resolution. |
| Default | false |
| Introduced | 16.0.R1 |

Platforms All

sr-ospf3 *boolean*

Synopsis Use OSPFv3 SR tunneling for next-hop resolution

Context **configure service vpls string bgp-evpn mpls number auto-bind-tunnel resolution-filter sr-ospf3 boolean**

Tree [sr-ospf3](#)

Description When configured to **true**, BGP uses an OSPF3 tunnel type to determine the address of the BGP next hop.

The SR tunnel to the BGP next hop is selected in the TTM from the lowest-numbered OPSF3 instance.

When configured to **false**, OSPF3 tunneling is not used for next-hop resolution.

Default false

Introduced 19.10.R1

Platforms All

sr-policy *boolean*

Synopsis Use SR policies for next-hop resolution

Context **configure service vpls string bgp-evpn mpls number auto-bind-tunnel resolution-filter sr-policy boolean**

Tree [sr-policy](#)

Description When configured to **true**, this command instructs BGP to use an SR policy to determine the address of the BGP next hop. The SR policy search criteria includes a non-null endpoint and color value that matches the BGP next hop and color extended community value, respectively, of the EVPN route.

When configured to **false**, SR policies are not used for next-hop resolution.

Default false

Introduced 19.5.R1

Platforms All

sr-te *boolean*

Synopsis Use SR-TE tunneling for next-hop resolution

Context **configure service vpls string bgp-evpn mpls number auto-bind-tunnel resolution-filter sr-te boolean**

Tree [sr-te](#)

| | |
|-------------|--|
| Description | When configured to true , BGP uses an SR-TE tunnel type to determine the address of the BGP next hop.
The SR tunnel to the BGP next hop is selected in the TTM from the lowest-numbered tunnel ID.
When configured to false , SR-TE tunneling is not used for next-hop resolution. |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

udp boolean

| | |
|-------------|--|
| Synopsis | Use MPLS over UDP tunneling for next-hop resolution |
| Context | configure service vpls string bgp-evpn mpls number auto-bind-tunnel resolution-filter
udp boolean |
| Tree | udp |
| Description | When configured to true , BGP uses an MPLS over UDP tunnel type to determine the address of the BGP next hop.
When configured to false , MPLS over UDP tunneling is not used for next-hop resolution. |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

weighted-ecmp boolean

| | |
|-------------|--|
| Synopsis | Allow weighted load balancing |
| Context | configure service vpls string bgp-evpn mpls number auto-bind-tunnel weighted-ecmp
boolean |
| Tree | weighted-ecmp |
| Description | When configured to true , this router enables weighted ECMP for packets using tunnels that a VPLS or Epipe automatically binds to. Packets are sprayed across LSPs in the ECMP according to the outcome of the hash algorithm and the configured load balancing weight of each LSP.
When configured to false , this command disables weighted ECMP for next-hop tunnel selection. |
| Default | false |
| Introduced | 22.7.R1 |
| Platforms | All |

control-word *boolean***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|------------|---|
| Synopsis | Allow use of the CW bit in the label message |
| Context | configure <i>service vpls string bgp-evpn mpls number control-word boolean</i> |
| Tree | <i>control-word</i> |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

default-route-tag *string***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|-------------|--|
| Synopsis | Default route tag |
| Context | configure <i>service vpls string bgp-evpn mpls number default-route-tag string</i> |
| Tree | <i>default-route-tag</i> |
| Description | <p>This command configures a route tag that is used when sending a route to the BGP application (for the corresponding service and BGP instance). If the corresponding BGP instance is enabled, the command cannot be changed.</p> <p>When used for BGP EVPN contexts, only one route tag can be passed to BGP for matching on export policies. In case of a conflict with other route tags pushed by EVPN, the default route tag has the least priority.</p> <p>The following are examples of the conflict priority handling:</p> <ul style="list-style-type: none"> • If a service is configured with both default-route-tag <i>X</i> and proxy-arp evpn-route-tag <i>Y</i>, the EVPN uses route tag <i>Y</i> when sending EVPN proxy-arp routes to the BGP RIB for advertisement. • If a given IP-prefix route is tagged in the route-table with tag <i>A</i> and the R-VPLS, in which the route is advertised, uses <i>B</i> as the default-route-tag, then EVPN keeps tag <i>A</i> when sending the route to the BGP RIB. <p>The default-route-tag configuration is only supported on EVPN and IP-VPN service routes. The route tag for ES and AD per-ES routes is always zero.</p> |
| Introduced | 16.0.R4 |
| Platforms | All |

dynamic-egress-label-limit *boolean*

| | |
|-------------|---|
| Synopsis | Enables dynamic egress label limit |
| Context | configure service vpls string bgp-evpn mpls number dynamic-egress-label-limit <i>boolean</i> |
| Tree | dynamic-egress-label-limit |
| Description | <p>When configured to true, this command relaxes the egress MPLS label limit check when resolving BGP next hops in the tunnel table.</p> <p>For VPRN services, the OAM label is never computed and, therefore, one more egress label is allowed.</p> <p>For EVPN (Epipe and VPLS) services, the system only computes the control word and ESI label if they are used. For the control word, the system reduces the egress label limit by one label if the control word is configured in the service. When configured, the ESI label is not counted for Epipes or VPLS services without an ES.</p> <p>When configured to false this command, for EVPN, Epipe, and VPLS services, always accounts for the ESI label and control word.</p> |
| Default | false |
| Introduced | 22.2.R1 |
| Platforms | All |

ecmp *number*

| | |
|------------|--|
| Synopsis | Maximum ECMP routes information |
| Context | configure service vpls string bgp-evpn mpls number ecmp <i>number</i> |
| Tree | ecmp |
| Range | 1 to 32 |
| Default | 1 |
| Introduced | 16.0.R1 |
| Platforms | All |

entropy-label *boolean*

| | |
|------------|--|
| Synopsis | Allow use of entropy labels for spoke SDPs |
| Context | configure service vpls string bgp-evpn mpls number entropy-label <i>boolean</i> |
| Tree | entropy-label |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

evi-three-byte-auto-rt *boolean***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|-------------|--|
| Synopsis | Auto-derive the BGP EVPN route target |
| Context | configure <i>service vpls string bgp-evpn mpls number evi-three-byte-auto-rt boolean</i> |
| Tree | <i>evi-three-byte-auto-rt</i> |
| Description | <p>When configured to true, the BGP-EVPN instance import and export route target is auto-derived as described in RFC 8365 (Global-Administrator:A/Type/D-ID/Service-ID).</p> <p>Where:</p> <ul style="list-style-type: none"> • Global Administrator – is the configured 2-octet AS number; if the configured ASN exceeds the 2 byte limit, the low order 16-bit value is taken • A=0 (for auto-derivation) • Type=4 (EVI-based route-target) • D-ID= [1..2] – encodes the BGP instance, which allows the auto-derivation of different route-targets in multi-instance services; the value is inherited from the corresponding BGP instance • Service ID=3-octet EVI <p>When configured to false, route target derivation is not allowed.</p> |
| Default | false |
| Introduced | 21.10.R1 |
| Platforms | All |

domain-id *string*

| | |
|----------|--|
| Synopsis | Domain ID of received BGP route before readvertisement |
|----------|--|

| | |
|-------------|--|
| Context | configure service vpls string <i>bgp-evpn routes ip-prefix domain-id string</i> |
| Tree | domain-id |
| Description | <p>This command specifies the domain ID. The domain ID identifies the network from which the BGP route was received before the RTM advertises it to a different neighbor. The domain ID is part of a domain, represented as domain-id:isf_safi_type in the D-PATH attribute, as described in <i>draft-ietf-bess-evpn-ipvpn-interworking</i>. Gateway routers modify the D-PATH attribute. A gateway is a PE where a VPRN is instantiated. The VPRN in this case advertises or receives routes from multiple BGP owners (for example, EVPN-IFL and BGP-IPVPN) or multiple instances of the same owner (for example, VPRN with two BGP-IPVPN instances).</p> <p>Gateways use the D-PATH attribute to detect loops (for received routes where the D-PATH contains a local domain ID) and to make BGP best-path selection decisions based on the D-PATH length (shorter D-PATH is preferred).</p> <p>In the following example, suppose a gateway receives prefix P in an EVPN-IFL instance with the following D-PATH from neighbor N:</p> <p>Seg Len=1 / 65000:1:128</p> <p>If the router imports the route in VPRN-1, BGP-EVPN SRv6 instance with domain 65000:2, it readvertises it to its BGP-IPVPN MPLS instance as follows:</p> <p>Seg Len=2 / 65000:2:70 / 65000:1:128</p> <p>That is, the gateway prepends the local domain ID and family to the D-PATH before readvertising the route into a different instance.</p> |
| Introduced | 21.10.R1 |
| Platforms | All |

include-direct-interface-host *boolean*

| | |

Synopsis Group interface
 Context **configure** [service vpls](#) *string* [capture-sap](#) *string* [msap-defaults](#) [group-interface](#) *string*
 Tree [group-interface](#)
 String Length 1 to 32
 Introduced 16.0.R1
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

policy *reference*

Synopsis MSAP policy

| | |
|------------|--|
| Context | configure service vpls string capture-sap string msap-defaults policy reference |
| Tree | policy |
| Reference | configure subscriber-mgmt msap-policy string |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

service-name *string*

| | |
|---------------|---|
| Synopsis | Administrative service name |
| Context | configure service vpls string capture-sap string msap-defaults service-name string |
| Tree | service-name |
| String Length | 1 to 64 |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

nasreq-auth-policy *reference*

| | |
|------------|--|
| Synopsis | Diameter NASREQ application policy to use for authentication |
| Context | configure service vpls string capture-sap string nasreq-auth-policy reference |
| Tree | nasreq-auth-policy |
| Reference | configure subscriber-mgmt diameter-nasreq-policy string |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

pfcp

| | |
|------------|--|
| Synopsis | Enter the pfcp context |
| Context | configure service vpls string capture-sap string pfcp |
| Tree | pfcp |
| Introduced | 20.5.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

association *reference*

| | |
|----------|---|
| Synopsis | Association used for PFCP messages on the capture SAP |
|----------|---|

| | |
|-------------|--|
| Context | configure service vpls string capture-sap string pfcf association reference |
| Tree | association |
| Description | This command links the capture SAP to a PFCF association. This enables CUPS for the capture SAP and any trigger packets are forwarded to the BNG CUPS CPF. |
| Reference | configure subscriber-mgmt pfcf association string |
| Introduced | 20.5.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

I2-access-id-alias string

| | |
|---------------|---|
| Synopsis | String used as Layer 2 access ID for the capture SAP |
| Context | configure service vpls string capture-sap string pfcf I2-access-id-alias string |
| Tree | I2-access-id-alias |
| Description | This command defines a Layer 2 access ID alias for the capture SAP. It replaces the default underlying port-based or LAG-based Layer 2 access ID. Different capture SAPs on the same underlying port or LAG can have different Layer 2 access ID aliases. |
| String Length | 1 to 32 |
| Introduced | 22.2.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

up-resiliency

| | |
|------------|--|
| Synopsis | Enter the up-resiliency context |
| Context | configure service vpls string capture-sap string pfcf up-resiliency |
| Tree | up-resiliency |
| Introduced | 22.2.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

monitor-oper-group [oper-group] reference

| | |
|-------------|---|
| Synopsis | Enter the monitor-oper-group list instance |
| Context | configure service vpls string capture-sap string pfcf up-resiliency monitor-oper-group reference |
| Tree | monitor-oper-group |
| Description | Commands in this context define parameters to derive the service health based on monitored operational groups. The BNG UPF sends the health value to the BNG CPF. |

The BNG CPF uses the value to determine the need for a BNG UPF status change (active or standby).

Note:

The following is only applicable for the **configure service vpls capture-sap** context. If the configured groups are not the same for all capture SAPs sharing the same underlying port or LAG, the configuration of a Layer 2 access ID alias is required, or else the system chooses arbitrarily one set of configured groups.

| | |
|----------------|---|
| Max. Instances | 4 |
| Introduced | 22.2.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

[oper-group] *reference*

| | |
|------------|--|
| Synopsis | Operational group name |
| Context | configure service vpls string capture-sap string pfc up-resiliency monitor-oper-group reference |
| Tree | monitor-oper-group |
| Reference | configure service oper-group string |
| Notes | This element is part of a list key. |
| Introduced | 22.2.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

health-drop *number*

| | |
|-------------|---|
| Synopsis | Number subtracted from the health value per failure |
| Context | configure service vpls string capture-sap string pfc up-resiliency monitor-oper-group reference health-drop number |
| Tree | health-drop |
| Description | This command defines how the failure of an operational group member affects the health value. The base health value is 255; the value decreases with the defined number per member failure to a minimum of 0. |
| Range | 1 to 255 |
| Default | 1 |
| Introduced | 22.2.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

pppoe

| | |
|------------|--|
| Synopsis | Enter the pppoe context |
| Context | configure service vpls <i>string</i> capture-sap <i>string</i> pppoe |
| Tree | pppoe |

|------------|--|
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

ccm boolean

| | |
|------------|--|
| Synopsis | Generate CCM messages |
| Context | configure service vpls string eth-cfm mep md-admin-name reference ma-admin-name reference mep-id number ccm boolean |
| Tree | ccm |
| Default | false |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

ccm-ltm-priority number

| | |
|------------|--|
| Synopsis | Priority of CCM and LTM messages transmitted by the MEP |
| Context | configure service vpls string eth-cfm mep md-admin-name reference ma-admin-name reference mep-id number ccm-ltm-priority number |
| Tree | ccm-ltm-priority |
| Range | 0 to 7 |
| Default | 7 |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

ccm-padding-size number

| | |
|-------------|---|
| Synopsis | Number of octets of padding to insert in CCM packets |
| Context | configure service vpls string eth-cfm mep md-admin-name reference ma-admin-name reference mep-id number ccm-padding-size number |
| Tree | ccm-padding-size |
| Description | This command sets the byte size of the optional Data TLV to be included in the ETH-CC PDU.

This command increases the size of the ETH-CC PDU by the configured value. The base size of the ETH-CC PDU, including the Interface Status TLV and Port Status TLV, is 83 bytes not including the Layer 2 encapsulation. CCM padding is not supported when the CCM interval (configured through configure eth-cfm domain association ccm-interval) is less than 1 second. |
| Range | 3 to 1500 |

| | |
|------------|--|
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

cfm-vlan-tag *string*

| | |
|---------------|--|
| Synopsis | VLAN tags to apply to CFM PDUs for egress processing |
| Context | configure service vpls string eth-cfm mep md-admin-name <i>reference</i> ma-admin-name <i>reference</i> mep-id number cfm-vlan-tag string |
| Tree | cfm-vlan-tag |
| String Length | 1 to 9 |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

description *string*

| | |
|---------------|---|
| Synopsis | Text description |
| Context | configure service vpls string eth-cfm mep md-admin-name <i>reference</i> ma-admin-name <i>reference</i> mep-id number description string |
| Tree | description |
| String Length | 1 to 80 |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

eth-test

| | |
|-------------|---|
| Synopsis | Enable the eth-test context |
| Context | configure service vpls string eth-cfm mep md-admin-name <i>reference</i> ma-admin-name <i>reference</i> mep-id number eth-test |
| Tree | eth-test |
| Description | Commands in this context configure information used by the Ethernet Test (ETH-TST) packet. The commands must be configured on both the sender and the receiver nodes. The test packets are used with the oam eth-cfm eth-test command. |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

bit-error-threshold *number*

| | |
|------------|---|
| Synopsis | Lowest priority defect allowed to generate fault alarm |
| Context | configure service vpls <i>string</i> eth-cfm mep md-admin-name <i>reference</i> ma-admin-name <i>reference</i> mep-id <i>number</i> eth-test bit-error-threshold <i>number</i> |
| Tree | bit-error-threshold |
| Range | 0 to 11840 |
| Default | 1 |
| Units | bit errors |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

test-pattern

| | |
|-------------|--|
| Synopsis | Enter the test-pattern context |
| Context | configure service vpls <i>string</i> eth-cfm mep md-admin-name <i>reference</i> ma-admin-name <i>reference</i> mep-id <i>number</i> eth-test test-pattern |
| Tree | test-pattern |
| Description | Commands in this context specify the test pattern for the ETH-TST frames. The pattern does not have to be the same on the sender and the receiver. |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

crc-tlv *boolean*

| | |
|------------|---|
| Synopsis | Generate a CRC checksum |
| Context | configure service vpls <i>string</i> eth-cfm mep md-admin-name <i>reference</i> ma-admin-name <i>reference</i> mep-id <i>number</i> eth-test test-pattern crc-tlv <i>boolean</i> |
| Tree | crc-tlv |
| Default | false |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

pattern *keyword*

| | |
|----------|---------------------------------------|
| Synopsis | Test pattern for Ethernet Test frames |
|----------|---------------------------------------|

| | |
|-------------|---|
| Context | configure service vpls string eth-cfm mep md-admin-name reference ma-admin-name reference mep-id number eth-test test-pattern pattern keyword |
| Tree | pattern |
| Description | This command specifies the test pattern of the Ethernet Test (ETH-TST) frames. This does not have to be configured the same on the sender and the receiver. |
| Default | all-zeros |
| Options | all-zeros, all-ones |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

grace

| | |
|-------------|---|
| Synopsis | Enter the grace context |
| Context | configure service vpls string eth-cfm mep md-admin-name reference ma-admin-name reference mep-id number grace |
| Tree | grace |
| Description | Commands in this context configure the Nokia ETH-CFM Grace function and the ITU-T Y.1731 Ethernet Expected Default (ETH-ED) function. |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

| Description | Commands in this context configure the Nokia ETH-CFM Grace function. |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

rx-eth-vsm-grace *boolean*

| | |
|-------------|---|
| Synopsis | Receive and process Nokia ETH-CFM Grace PDU on the MEP |
| Context | configure service vpls string eth-cfm mep md-admin-name reference ma-admin-name reference mep-id number grace eth-vsm-grace rx-eth-vsm-grace boolean |
| Tree | rx-eth-vsm-grace |
| Description | When configured to true , the router enables the Nokia Grace function, which is a vendor-specific PDU that informs MEP peers that the local node may be entering a period of expected defect.

When configured to false , the router disables the Nokia Grace function. |
| Default | true |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

tx-eth-vsm-grace *boolean*

| | |
|-------------|---|
| Synopsis | Transmit ETH-ED PDUs from the MEP |
| Context | configure service vpls string eth-cfm mep md-admin-name reference ma-admin-name reference mep-id number grace eth-vsm-grace tx-eth-vsm-grace boolean |
| Tree | tx-eth-vsm-grace |
| Description | When configured to true , the router can transmit the Nokia ETH-CFM Grace PDU from the MEP when a system soft reset notification is received for one or more cards.

The Nokia Grace function is a vendor-specific PDU that informs MEP peers that the local node may be entering a period of expected defect.

The operator must configure the configure system eth-cfm grace command to instruct the system that the node is capable of transmitting expected-defect windows to peers. The system can only transmit one form of ETH-CFM grace (Nokia ETH-CFM Grace or ITU-T Y.1731 ETH-ED). |

When configured to **false**, the router disables the transmission of the Nokia ETH-CFM Grace PDU from the MEP.

| | |
|------------|--|
| Default | true |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

low-priority-defect *keyword*

|------------|---|
| Synopsis | Primary or secondary port level |
| Context | configure service vpls string fdb mac-move sap reference level keyword |
| Tree | level |
| Options | primary, secondary |
| Notes | This element is mandatory. |
| Introduced | 19.7.R1 |
| Platforms | All |

secondary-cumulative-factor *number*

| | |
|----------|--|
| Synopsis | Number of periods to measure mac-relearn rate |
| Context | configure service vpls string fdb mac-move secondary-cumulative-factor number |
| Tree | secondary-cumulative-factor |
| Range | 2 to 9 |
| Default | 2 |

Introduced 19.7.R1
 Platforms All

spoke-sdp [[sdp-bind-id](#)] *reference*

Synopsis Enter the **spoke-sdp** list instance
 Context **configure** [service](#) [vpls](#) *string* [fdb](#) [mac-move](#) [spoke-sdp](#) *reference*
 Tree [spoke-sdp](#)
 Introduced 19.7.R1
 Platforms All

[sdp-bind-id] *reference*

Synopsis SDP binding ID
 Context **configure** [service](#) [vpls](#) *string* [fdb](#) [mac-move](#) [spoke-sdp](#) *reference*
 Tree [spoke-sdp](#)
 Reference **configure** [service](#) [vpls](#) *string* [spoke-sdp](#) *string*
 Notes This element is part of a list key.
 Introduced 19.7.R1
 Platforms All

level *keyword*

Synopsis Primary or secondary port level
 Context **configure** [service](#) [vpls](#) *string* [fdb](#) [mac-move](#) [spoke-sdp](#) *reference* [level](#) *keyword*
 Tree [level](#)
 Options primary, secondary
 Notes This element is mandatory.
 Introduced 19.7.R1
 Platforms All

mac-subnet-length *number*

Synopsis Number of bits performing MAC learning or MAC switching
 Context **configure** [service](#) [vpls](#) *string* [fdb](#) [mac-subnet-length](#) *number*

| | |
|------------|-----------------------------------|
| Tree | mac-subnet-length |
| Range | 24 to 48 |
| Default | 48 |
| Introduced | 16.0.R1 |
| Platforms | All |

selective-learning *boolean*

| | |
|------------|---|
| Synopsis | Allocate FDB entries on selectively learned line cards |
| Context | configure service vpls string fdb selective-learning boolean |
| Tree | selective-learning |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

static-mac

| | |
|------------|---|
| Synopsis | Enter the static-mac context |
| Context | configure service vpls string fdb static-mac |
| Tree | static-mac |
| Introduced | 16.0.R1 |
| Platforms | All |

mac [[mac-address](#)] *string*

| | |
|------------|--|
| Synopsis | Enter the mac list instance |
| Context | configure service vpls string fdb static-mac mac string |
| Tree | mac |
| Introduced | 16.0.R1 |
| Platforms | All |

[mac-address] *string*

| | |
|----------|--|
| Synopsis | Static MAC address to SAP/SDP-binding or black-hole |
| Context | configure service vpls string fdb static-mac mac string |

| | |
|------------|-------------------------------------|
| Tree | mac |
| Notes | This element is part of a list key. |
| Introduced | 16.0.R1 |
| Platforms | All |

blackhole

WARNING:

Modifying this element recreates the parent element automatically for the new value to take effect.

| | |
|------------|--|
| Synopsis | Create a static FDB entry for the MAC address to black-hole traffic |
| Context | configure service vpls string fdb static-mac mac string blackhole |
| Tree | blackhole |
| Notes | The following elements are part of a mandatory choice: blackhole , endpoint , mesh-sdp , sap , or spoke-sdp . |
| Introduced | 16.0.R1 |
| Platforms | All |

endpoint *reference*

WARNING:

Modifying this element recreates the parent element automatically for the new value to take effect.

| | |
|------------|---|
| Synopsis | Endpoint associated with this MAC |
| Context | configure service vpls string fdb static-mac mac string endpoint reference |
| Tree | endpoint |
| Reference | configure service vpls string endpoint string |
| Notes | The following elements are part of a mandatory choice: blackhole , endpoint , mesh-sdp , sap , or spoke-sdp . |
| Introduced | 16.0.R1 |
| Platforms | All |

mesh-sdp *reference*

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

| | |
|------------|--|
| Synopsis | Mesh SDP bind associated with this MAC |
| Context | configure service vpls string fdb static-mac mac string mesh-sdp reference |
| Tree | mesh-sdp |
| Reference | configure service vpls string mesh-sdp string |
| Notes | The following elements are part of a mandatory choice: blackhole , endpoint , mesh-sdp , sap , or spoke-sdp . |
| Introduced | 16.0.R1 |
| Platforms | All |

monitor *keyword*

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

| | |
|------------|--|
| Synopsis | Entity to be monitored to decide whether this entry can be installed in the FDB |
| Context | configure service vpls string fdb static-mac mac string monitor keyword |
| Tree | monitor |
| Default | none |
| Options | none, forward-status |
| Introduced | 16.0.R1 |
| Platforms | All |

sap *reference*

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

| | |
|----------|--|
| Synopsis | SAP associated with this MAC |
| Context | configure service vpls string fdb static-mac mac string sap reference |
| Tree | sap |

| | |
|------------|--|
| Reference | configure service vpls string sap string |
| Notes | The following elements are part of a mandatory choice: blackhole , endpoint , mesh-sdp , sap , or spoke-sdp . |
| Introduced | 16.0.R1 |
| Platforms | All |

spoke-sdp *reference*

WARNING:

Modifying this element recreates the parent element automatically for the new value to take effect.

| | |
|------------|--|
| Synopsis | Spoke SDP bind associated with this MAC |
| Context | configure service vpls string fdb static-mac mac string spoke-sdp reference |
| Tree | spoke-sdp |
| Reference | configure service vpls string spoke-sdp string |
| Notes | The following elements are part of a mandatory choice: blackhole , endpoint , mesh-sdp , sap , or spoke-sdp . |
| Introduced | 16.0.R1 |
| Platforms | All |

table

| | |
|------------|--|
| Synopsis | Enter the table context |
| Context | configure service vpls string fdb table |
| Tree | table |
| Introduced | 16.0.R1 |
| Platforms | All |

high-wmark *number*

| | |
|----------|--|
| Synopsis | High watermark for the FDB table |
| Context | configure service vpls string fdb table high-wmark number |
| Tree | high-wmark |
| Range | 0 to 100 |
| Default | 95 |

| | |
|------------|---------|
| Introduced | 16.0.R1 |
| Platforms | All |

low-wmark *number*

| | |
|------------|--|
| Synopsis | Low watermark for the FDB table |
| Context | configure service vpls <i>string</i> fdb table low-wmark <i>number</i> |
| Tree | low-wmark |
| Range | 0 to 100 |
| Default | 90 |
| Introduced | 16.0.R1 |
| Platforms | All |

size *number*

| | |
|------------|---|
| Synopsis | Maximum MAC entries in the FDB |
| Context | configure service vpls <i>string</i> fdb table size <i>number</i> |
| Tree | size |
| Range | 1 to 511999 |
| Default | 250 |
| Introduced | 16.0.R1 |
| Platforms | All |

gsmp

| | |
|------------|---|
| Synopsis | Enter the gsmp context |
| Context | configure service vpls <i>string</i> gsmp |
| Tree | gsmp |
| Introduced | 16.0.R1 |
| Platforms | All |

admin-state *keyword*

| | |
|----------|--|
| Synopsis | Administrative state of GSMP |
| Context | configure service vpls <i>string</i> gsmp admin-state <i>keyword</i> |

| | |
|------------|-----------------------------|
| Tree | admin-state |
| Default | disable |
| Options | enable, disable |
| Introduced | 16.0.R1 |
| Platforms | All |

group [[name](#)] *string*

| | |
|----------------|--|
| Synopsis | Enter the group list instance |
| Context | configure service vpls string gsmp group string |
| Tree | group |
| Max. Instances | 1024 |
| Introduced | 16.0.R1 |
| Platforms | All |

[name] *string*

| | |
|---------------|--|
| Synopsis | GSMP group name |
| Context | configure service vpls string gsmp group string |
| Tree | group |
| String Length | 1 to 32 |
| Notes | This element is part of a list key. |
| Introduced | 16.0.R1 |
| Platforms | All |

admin-state *keyword*

| | |
|------------|--|
| Synopsis | Administrative state of the GSMP group |
| Context | configure service vpls string gsmp group string admin-state <i>keyword</i> |
| Tree | admin-state |
| Default | disable |
| Options | enable, disable |
| Introduced | 16.0.R1 |
| Platforms | All |

ancp

| | |
|------------|---|
| Synopsis | Enter the ancp context |
| Context | configure service vpls string gsmp group string ancp |
| Tree | ancp |
| Introduced | 16.0.R1 |
| Platforms | All |

dynamic-topology-discovery *boolean*

| | |
|------------|---|
| Synopsis | Enable the ANCP dynamic topology discovery capability |
| Context | configure service vpls string gsmp group string ancp dynamic-topology-discovery <i>boolean</i> |
| Tree | dynamic-topology-discovery |
| Default | true |
| Introduced | 16.0.R1 |
| Platforms | All |

oam *boolean*

| | |
|------------|--|
| Synopsis | Enable GSMP ANCP OAM capability at startup of GSMP connection |
| Context | configure service vpls string gsmp group string ancp oam <i>boolean</i> |
| Tree | oam |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

description *string*

| | |
|---------------|--|
| Synopsis | Text description |
| Context | configure service vpls string gsmp group string description <i>string</i> |
| Tree | description |
| String Length | 1 to 80 |
| Introduced | 16.0.R1 |
| Platforms | All |

hold-multiplier *number*

| | |
|------------|---|
| Synopsis | Hold-multiplier for the GSMP connections in this group |
| Context | configure service vpls <i>string</i> gsmp group <i>string</i> hold-multiplier <i>number</i> |
| Tree | hold-multiplier |
| Range | 1 to 100 |
| Default | 3 |
| Introduced | 16.0.R1 |
| Platforms | All |

idle-filter *boolean*

| | |
|------------|--|
| Synopsis | Filter ANCP messages from IDLE DSL lines |
| Context | configure service vpls <i>string</i> gsmp group <i>string</i> idle-filter <i>boolean</i> |
| Tree | idle-filter |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

keepalive *number*

| | |
|------------|---|
| Synopsis | Keepalive value for the GSMP connections in this group |
| Context | configure service vpls <i>string</i> gsmp group <i>string</i> keepalive <i>number</i> |
| Tree | keepalive |
| Range | 1 to 25 |
| Default | 10 |
| Units | seconds |
| Introduced | 16.0.R1 |
| Platforms | All |

neighbor [*remote-address*] *string*

| | |
|----------|--|
| Synopsis | Enter the neighbor list instance |
| Context | configure service vpls <i>string</i> gsmp group <i>string</i> neighbor <i>string</i> |
| Tree | neighbor |

Introduced 16.0.R1
Platforms All

[remote-address] *string*

Synopsis GSMP neighbor remote IP address
Context **configure service vpls string gsmp group string neighbor string**
Tree **neighbor**
Notes This element is part of a list key.
Introduced 16.0.R1
Platforms All

admin-state *keyword*

Synopsis Administrative state of the GSMP neighbor
Context **configure service vpls string gsmp group string neighbor string admin-state keyword**
Tree **admin-state**
Default disable
Options enable, disable
Introduced 16.0.R1
Platforms All

description *string*

Synopsis Text description
Context **configure service vpls string gsmp group string neighbor string description string**
Tree **description**
String Length 1 to 80
Introduced 16.0.R1
Platforms All

local-address *string*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|------------|--|
| Synopsis | Restrict connections to this local address only within the service running ANCP |
| Context | configure <i>service vpls string</i> <i>gsmg group string</i> <i>neighbor string</i> local-address <i>string</i> |
| Tree | local-address |
| Introduced | 16.0.R1 |
| Platforms | All |

priority-marking

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|------------|---|
| Synopsis | Enter the priority-marking context |
| Context | configure <i>service vpls string</i> <i>gsmg group string</i> <i>neighbor string</i> priority-marking |
| Tree | priority-marking |
| Introduced | 16.0.R1 |
| Platforms | All |

dscp *keyword*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|----------|---|
| Synopsis | DSCP that is used while remarking the in profile packets |
| Context | configure <i>service vpls string</i> <i>gsmg group string</i> <i>neighbor string</i> priority-marking dscp <i>keyword</i> |
| Tree | dscp |
| Options | be, cp1, cp2, cp3, cp4, cp5, cp6, cp7, cs1, cp9, af11, cp11, af12, cp13, af13, cp15, cs2, cp17, af21, cp19, af22, cp21, af23, cp23, cs3, cp25, af31, cp27, af32, cp29, af33, cp31, cs4, cp33, af41, cp35, af42, cp37, af43, cp39, cs5, cp41, cp42, cp43, cp44, cp45, ef, cp47, nc1, cp49, cp50, cp51, cp52, cp53, cp54, cp55, nc2, cp57, cp58, cp59, cp60, cp61, cp62, cp63 |
| Notes | The following elements are part of a choice: dscp or prec . |

Introduced 16.0.R1
 Platforms All

prec *number*

WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis Precedence priority marking
 Context **configure** [service vpls](#) *string* [gsmg group](#) *string* [neighbor](#) *string* [priority-marking prec](#) *number*
 Tree [prec](#)
 Range 0 to 7
 Notes The following elements are part of a choice: **dscp** or **prec**.
 Introduced 16.0.R1
 Platforms All

persistence *boolean*

Synopsis Store DSL line information when the GSMP connection terminates
 Context **configure** [service vpls](#) *string* [gsmg group](#) *string* [persistence](#) *boolean*
 Tree [persistence](#)
 Default false
 Introduced 16.0.R1
 Platforms All

igmp-host-tracking

Synopsis Enter the **igmp-host-tracking** context
 Context **configure** [service vpls](#) *string* [igmp-host-tracking](#)
 Tree [igmp-host-tracking](#)
 Introduced 16.0.R1
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

admin-state *keyword*

| | |
|------------|---|
| Synopsis | Administrative state of IGMP host tracking |
| Context | configure service vpls <i>string</i> igmp-host-tracking admin-state <i>keyword</i> |
| Tree | admin-state |
| Default | disable |
| Options | enable, disable |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

expiry-time *number*

| | |
|------------|--|
| Synopsis | Time that the system continues to track inactive hosts |
| Context | configure service vpls <i>string</i> igmp-host-tracking expiry-time <i>number</i> |
| Tree | expiry-time |
| Range | 1 to 65535 |
| Default | 260 |
| Units | seconds |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

igmp-snooping

| | |
|------------|---|
| Synopsis | Enter the igmp-snooping context |
| Context | configure service vpls <i>string</i> igmp-snooping |
| Tree | igmp-snooping |
| Introduced | 16.0.R1 |
| Platforms | All |

admin-state *keyword*

| | |
|----------|--|
| Synopsis | Administrative state of snooping |
| Context | configure service vpls <i>string</i> igmp-snooping admin-state <i>keyword</i> |
| Tree | admin-state |
| Default | disable |
| Options | enable, disable |

| | |
|------------|---------|
| Introduced | 16.0.R1 |
| Platforms | All |

evpn-proxy

| | |
|------------|--|
| Synopsis | Enter the evpn-proxy context |
| Context | configure service vpls <i>string</i> igmp-snooping evpn-proxy |
| Tree | evpn-proxy |
| Introduced | 20.10.R1 |
| Platforms | All |

admin-state *keyword*

| | |
|------------|--|
| Synopsis | Administrative state of EVPN proxy |
| Context | configure service vpls <i>string</i> igmp-snooping evpn-proxy admin-state <i>keyword</i> |
| Tree | admin-state |
| Default | disable |
| Options | enable, disable |
| Introduced | 20.10.R1 |
| Platforms | All |

mvr

| | |
|------------|---|
| Synopsis | Enter the mvr context |
| Context | configure service vpls <i>string</i> igmp-snooping mvr |
| Tree | mvr |
| Introduced | 16.0.R1 |
| Platforms | All |

admin-state *keyword*

| | |
|----------|---|
| Synopsis | Administrative state of MVR |
| Context | configure service vpls <i>string</i> igmp-snooping mvr admin-state <i>keyword</i> |
| Tree | admin-state |
| Default | disable |

| | |
|------------|-----------------|
| Options | enable, disable |
| Introduced | 16.0.R1 |
| Platforms | All |

description *string*

| | |
|---------------|---|
| Synopsis | Text description |
| Context | configure service vpls <i>string</i> igmp-snooping mvr description <i>string</i> |
| Tree | description |
| String Length | 1 to 80 |
| Introduced | 16.0.R1 |
| Platforms | All |

group-policy *string*

| | |
|---------------|--|
| Synopsis | Policy that applies MVR |
| Context | configure service vpls <i>string</i> igmp-snooping mvr group-policy <i>string</i> |
| Tree | group-policy |
| String Length | 1 to 32 |
| Introduced | 16.0.R1 |
| Platforms | All |

query-interval *number*

| | |
|------------|--|
| Synopsis | Time between two consecutive host-query messages |
| Context | configure service vpls <i>string</i> igmp-snooping query-interval <i>number</i> |
| Tree | query-interval |
| Range | 1 to 65535 |
| Default | 125 |
| Units | seconds |
| Introduced | 16.0.R1 |
| Platforms | All |

query-source-address (*keyword* | *ipv4-address*)

| | |
|------------|--|
| Synopsis | Source address for IGMP queries |
| Context | configure service vpls string igmp-snooping query-source-address (<i>keyword</i> <i>ipv4-address</i>) |
| Tree | query-source-address |
| Default | system |
| Options | system |
| Introduced | 16.0.R1 |
| Platforms | All |

report-source-address *string*

| | |
|------------|--|
| Synopsis | Source IP address used when generating IGMP reports |
| Context | configure service vpls string igmp-snooping report-source-address <i>string</i> |
| Tree | report-source-address |
| Introduced | 16.0.R1 |
| Platforms | All |

robust-count *number*

| | |
|------------|---|
| Synopsis | Number of retries after expected message loss |
| Context | configure service vpls string igmp-snooping robust-count <i>number</i> |
| Tree | robust-count |
| Range | 1 to 255 |
| Default | 2 |
| Introduced | 16.0.R1 |
| Platforms | All |

ignore-l2vpn-mtu-mismatch *boolean*

| | |
|-------------|--|
| Synopsis | Ignore the L2 VPN MTU mismatch with local service MTU |
| Context | configure service vpls string ignore-l2vpn-mtu-mismatch <i>boolean</i> |
| Tree | ignore-l2vpn-mtu-mismatch |
| Description | When configured to true , the router does not check the value of the Layer 2 MTU in the Layer2 Info Extended Community received in a BGP update message against the local |

service MTU or locally signaled MTU. It may, therefore, bring up the BGP VPLS service regardless of any MTU mismatch.

When configured to **false**, an MTU mismatch prevents the system from bringing up a BGP-VPLS service.

| | |
|------------|---------|
| Default | false |
| Introduced | 22.2.R1 |
| Platforms | All |

interface [[interface-name](#)] *string*

| | |
|------------|---|
| Synopsis | Enter the interface list instance |
| Context | configure service vpls string interface string |
| Tree | interface |
| Introduced | 16.0.R1 |
| Platforms | All |

[interface-name] *string*

| | |
|---------------|---|
| Synopsis | IP interface name |
| Context | configure service vpls string interface string |
| Tree | interface |
| String Length | 1 to 32 |
| Notes | This element is part of a list key. |
| Introduced | 16.0.R1 |
| Platforms | All |

admin-state *keyword*

| | |
|------------|---|
| Synopsis | Administrative state of the interface |
| Context | configure service vpls string interface string admin-state keyword |
| Tree | admin-state |
| Default | enable |
| Options | enable, disable |
| Introduced | 16.0.R1 |
| Platforms | All |

description *string*

| | |
|---------------|---|
| Synopsis | Text description |
| Context | configure <i>service vpls string interface string description string</i> |
| Tree | <i>description</i> |
| String Length | 1 to 255 |
| Introduced | 16.0.R1 |
| Platforms | All |

hold-time

| | |
|------------|--|
| Synopsis | Enter the hold-time context |
| Context | configure <i>service vpls string interface string hold-time</i> |
| Tree | <i>hold-time</i> |
| Introduced | 16.0.R1 |
| Platforms | All |

ipv4

| | |
|------------|---|
| Synopsis | Enter the ipv4 context |
| Context | configure <i>service vpls string interface string hold-time ipv4</i> |
| Tree | <i>ipv4</i> |
| Introduced | 16.0.R1 |
| Platforms | All |

down

| | |
|-------------|--|
| Synopsis | Enter the down context |
| Context | configure <i>service vpls string interface string hold-time ipv4 down</i> |
| Tree | <i>down</i> |
| Description | Commands in this context configure the down hold timer, which specifies the delay before activating the associated interface. The delay is invoked whenever the system attempts to bring the associated IP interface up, unless an operator configures the init-only command. |
| Introduced | 16.0.R1 |
| Platforms | All |

init-only *boolean*

| | |
|-------------|--|
| Synopsis | Apply delay only at interface configuration or reboot |
| Context | configure service vpls <i>string</i> interface <i>string</i> hold-time ipv4 down init-only <i>boolean</i> |
| Tree | init-only |
| Description | This command applies a delay only when the IP interface is first configured or after a system reboot. |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

seconds *number*

| | |
|------------|---|
| Synopsis | Down hold time for the IP interface |
| Context | configure service vpls <i>string</i> interface <i>string</i> hold-time ipv4 down seconds <i>number</i> |
| Tree | seconds |
| Range | 1 to 1200 |
| Units | seconds |
| Introduced | 16.0.R1 |
| Platforms | All |

up

| | |
|-------------|---|
| Synopsis | Enter the up context |
| Context | configure service vpls <i>string</i> interface <i>string</i> hold-time ipv4 up |
| Tree | up |
| Description | Commands in this context configure the up hold timer, which specifies the delay before deactivation of the associated interface. The delay is invoked whenever the system attempts to bring the associated IP interface down. |
| Introduced | 16.0.R1 |
| Platforms | All |

seconds *number*

| | |
|----------|---|
| Synopsis | Up hold time for the IP interface |
| Context | configure service vpls <i>string</i> interface <i>string</i> hold-time ipv4 up seconds <i>number</i> |

| | |
|------------|-------------------------|
| Tree | seconds |
| Range | 1 to 1200 |
| Units | seconds |
| Introduced | 16.0.R1 |
| Platforms | All |

ipv4

| | |
|------------|--|
| Synopsis | Enter the ipv4 context |
| Context | configure service vpls string interface string ipv4 |
| Tree | ipv4 |
| Introduced | 16.0.R1 |
| Platforms | All |

neighbor-discovery

| | |
|------------|---|
| Synopsis | Enter the neighbor-discovery context |
| Context | configure service vpls string interface string ipv4 neighbor-discovery |
| Tree | neighbor-discovery |
| Introduced | 16.0.R1 |
| Platforms | All |

static-neighbor [[ipv4-address](#)] *string*

| | |
|------------|--|
| Synopsis | Enter the static-neighbor list instance |
| Context | configure service vpls string interface string ipv4 neighbor-discovery static-neighbor string |
| Tree | static-neighbor |
| Introduced | 16.0.R1 |
| Platforms | All |

[\[ipv4-address\]](#) *string*

| | |
|----------|--|
| Synopsis | IPv4 address that corresponds to the physical address |
| Context | configure service vpls string interface string ipv4 neighbor-discovery static-neighbor string |

| | |
|------------|-------------------------------------|
| Tree | static-neighbor |
| Notes | This element is part of a list key. |
| Introduced | 16.0.R1 |
| Platforms | All |

mac-address *string*

| | |
|------------|---|
| Synopsis | MAC address for the static neighbor |
| Context | configure service vpls <i>string</i> interface <i>string</i> ipv4 neighbor-discovery static-neighbor <i>string</i> mac-address <i>string</i> |
| Tree | mac-address |
| Notes | This element is mandatory. |
| Introduced | 16.0.R1 |
| Platforms | All |

timeout *number*

| | |
|------------|---|
| Synopsis | ARP timeout value to determine how long an ARP entry remains in the ARP cache |
| Context | configure service vpls <i>string</i> interface <i>string</i> ipv4 neighbor-discovery timeout <i>number</i> |
| Tree | timeout |
| Range | 0 to 65535 |
| Default | 14400 |
| Units | seconds |
| Introduced | 16.0.R1 |
| Platforms | All |

primary

| | |
|------------|--|
| Synopsis | Enable the primary context |
| Context | configure service vpls <i>string</i> interface <i>string</i> ipv4 primary |
| Tree | primary |
| Introduced | 16.0.R1 |
| Platforms | All |

address *string*

| | |
|------------|---|
| Synopsis | IP address of the interface |
| Context | configure service vpls string interface string ipv4 primary address string |
| Tree | address |
| Notes | This element is mandatory. |
| Introduced | 16.0.R1 |
| Platforms | All |

prefix-length *number*

| | |
|------------|---|
| Synopsis | IPv4 address prefix length |
| Context | configure service vpls string interface string ipv4 primary prefix-length number |
| Tree | prefix-length |
| Range | 0 to 32 |
| Notes | This element is mandatory. |
| Introduced | 16.0.R1 |
| Platforms | All |

mac *string*

| | |
|------------|--|
| Synopsis | MAC address for the interface |
| Context | configure service vpls string interface string mac string |
| Tree | mac |
| Introduced | 16.0.R1 |
| Platforms | All |

isid-policy

| | |
|------------|--|
| Synopsis | Enter the isid-policy context |
| Context | configure service vpls string isid-policy |
| Tree | isid-policy |
| Introduced | 19.10.R1 |
| Platforms | All |

entry [[range-entry-id](#)] *number*

| | |
|------------|---|
| Synopsis | Enter the entry list instance |
| Context | configure service vpls <i>string</i> isid-policy entry <i>number</i> |
| Tree | entry |
| Introduced | 19.10.R1 |
| Platforms | All |

[range-entry-id] *number*

| | |
|------------|---|
| Synopsis | ISID policy entry ID |
| Context | configure service vpls <i>string</i> isid-policy entry <i>number</i> |
| Tree | entry |
| Range | 1 to 8191 |
| Notes | This element is part of a list key. |
| Introduced | 19.10.R1 |
| Platforms | All |

advertise-local *boolean*

| | |
|------------|--|
| Synopsis | Advertise locally-defined I-VPLS ISIDs or static ISIDs |
| Context | configure service vpls <i>string</i> isid-policy entry <i>number</i> advertise-local <i>boolean</i> |
| Tree | advertise-local |
| Default | true |
| Introduced | 19.10.R1 |
| Platforms | All |

range

| | |
|------------|---|
| Synopsis | Enter the range context |
| Context | configure service vpls <i>string</i> isid-policy entry <i>number</i> range |
| Tree | range |
| Introduced | 19.10.R1 |
| Platforms | All |

end number

| | |
|------------|--|
| Synopsis | Upper bound of the ISID range |
| Context | configure service vpls string isid-policy entry number range end number |
| Tree | end |
| Range | 1 to 16777215 |
| Introduced | 19.10.R1 |
| Platforms | All |

start number

| | |
|------------|--|
| Synopsis | Lower bound of the ISID range |
| Context | configure service vpls string isid-policy entry number range start number |
| Tree | start |
| Range | 1 to 16777215 |
| Introduced | 19.10.R1 |
| Platforms | All |

use-def-mcast boolean

| | |
|------------|---|
| Synopsis | Use default multicast tree to propagate ISIS range |
| Context | configure service vpls string isid-policy entry number use-def-mcast boolean |
| Tree | use-def-mcast |
| Default | false |
| Introduced | 19.10.R1 |
| Platforms | All |

load-balancing

| | |
|------------|---|
| Synopsis | Enter the load-balancing context |
| Context | configure service vpls string load-balancing |
| Tree | load-balancing |
| Introduced | 16.0.R1 |
| Platforms | All |

lbl-eth-or-ip-l4-teid *boolean*

| | |
|-------------|--|
| Synopsis | Enable hashing of MPLS ethernet and IP packets on SAPs |
| Context | configure service vpls <i>string</i> load-balancing lbl-eth-or-ip-l4-teid <i>boolean</i> |
| Tree | lbl-eth-or-ip-l4-teid |
| Description | When configured to true , this command enables hashing of MPLS Ethernet and MPLS IP packets received on the Epipe and VPLS service SAP using the MPLS labels, the inner IP addresses, the port numbers, and the GTP TEID field, if read by the system. This capability is supported on line cards that are FP4-based and later. |
| Default | false |
| Introduced | 22.2.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

per-service-hashing *boolean*

| | |
|------------|---|
| Synopsis | Enable per-service hashing for Ethernet services |
| Context | configure service vpls <i>string</i> load-balancing per-service-hashing <i>boolean</i> |
| Tree | per-service-hashing |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

spi-load-balancing *boolean*

| | |
|------------|--|
| Synopsis | Allow use of SPI (Security Parameter Index) in hashing for ESP/AH encrypted IPv4/IPv6 traffic |
| Context | configure service vpls <i>string</i> load-balancing spi-load-balancing <i>boolean</i> |
| Tree | spi-load-balancing |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

teid-load-balancing *boolean*

| | |
|----------|---|
| Synopsis | Include TEID in hashing algorithm for GTP-U/C encapsulated traffic |
| Context | configure service vpls <i>string</i> load-balancing teid-load-balancing <i>boolean</i> |
| Tree | teid-load-balancing |

| | |
|------------|---------|
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

m-vpls *boolean*

WARNING:

Modifying this element recreates the parent element automatically for the new value to take effect.

| | |
|------------|---|
| Synopsis | Specify whether this is a management VPLS |
| Context | configure service vpls <i>string</i> m-vpls <i>boolean</i> |
| Tree | m-vpls |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

mac-flush

| | |
|------------|---|
| Synopsis | Enter the mac-flush context |
| Context | configure service vpls <i>string</i> mac-flush |
| Tree | mac-flush |
| Introduced | 16.0.R1 |
| Platforms | All |

tldp

| | |
|------------|--|
| Synopsis | Enter the tldp context |
| Context | configure service vpls <i>string</i> mac-flush tldp |
| Tree | tldp |
| Introduced | 16.0.R1 |
| Platforms | All |

propagate *boolean*

| | |
|----------|--|
| Synopsis | Propagate MAC flush messages received from the T-LDP |
|----------|--|

| | |
|------------|---|
| Context | configure service vpls string mac-flush tldp propagate boolean |
| Tree | propagate |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

send-on-failure boolean

| | |
|------------|---|
| Synopsis | Send MAC withdraw message on SAP/Spoke-SDP failure |
| Context | configure service vpls string mac-flush tldp send-on-failure boolean |
| Tree | send-on-failure |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

mac-protect

| | |
|------------|--|
| Synopsis | Enter the mac-protect context |
| Context | configure service vpls string mac-protect |
| Tree | mac-protect |
| Introduced | 19.10.R1 |
| Platforms | All |

mac [mac-address] string

| | |
|------------|---|
| Synopsis | Add a list entry for mac |
| Context | configure service vpls string mac-protect mac string |
| Tree | mac |
| Introduced | 19.10.R1 |
| Platforms | All |

[mac-address] string

| | |
|----------|---|
| Synopsis | Protected MAC address |
| Context | configure service vpls string mac-protect mac string |

| | |
|------------|-------------------------------------|
| Tree | mac |
| Notes | This element is part of a list key. |
| Introduced | 19.10.R1 |
| Platforms | All |

mcast-ipv6-snooping-scope *keyword*

| | |
|------------|---|
| Synopsis | IPv6 multicast snooping scope |
| Context | configure service vpls <i>string</i> mcast-ipv6-snooping-scope <i>keyword</i> |
| Tree | mcast-ipv6-snooping-scope |
| Default | mac-based |
| Options | sg-based, mac-based |
| Introduced | 16.0.R1 |
| Platforms | All |

mcr-default-gtw

| String Length | 3 to 16 |
| Notes | This element is part of a list key. |
| Introduced | 16.0.R1 |
| Platforms | All |

accounting-policy *reference*

| | |
|------------|---|
| Synopsis | Policy to collect accounting statistics |
| Context | configure service vpls <i>string</i> mesh-sdp <i>string</i> accounting-policy <i>reference</i> |
| Tree | accounting-policy |
| Reference | configure log accounting-policy <i>number</i> |
| Introduced | 16.0.R1 |
| Platforms | All |

admin-state *keyword*

| | |
|----------|--|
| Synopsis | Administrative state of the SDP binding to the service |
|----------|--|

| | |
|------------|---|
| Context | configure service vpls <i>string</i> mesh-sdp <i>string</i> admin-state <i>keyword</i> |
| Tree | admin-state |
| Default | enable |
| Options | enable, disable |
| Introduced | 16.0.R1 |
| Platforms | All |

bfd

| | |
|------------|--|
| Synopsis | Enter the bfd context |
| Context | configure service vpls <i>string</i> mesh-sdp <i>string</i> bfd |
| Tree | bfd |
| Introduced | 21.2.R1 |
| Platforms | All |

bfd-liveness

| | |
|------------|---|
| Synopsis | Enable the bfd-liveness context |
| Context | configure service vpls <i>string</i> mesh-sdp <i>string</i> bfd bfd-liveness |
| Tree | bfd-liveness |
| Introduced | 21.2.R1 |
| Platforms | All |

encap *keyword*

| | |
|------------|--|
| Synopsis | BFD encapsulation used on the SDP binding |
| Context | configure service vpls <i>string</i> mesh-sdp <i>string</i> bfd bfd-liveness encap <i>keyword</i> |
| Tree | encap |
| Default | ipv4 |
| Options | ipv4 |
| Introduced | 21.2.R1 |
| Platforms | All |

bfd-template *reference*

| | |
|-------------|---|
| Synopsis | BFD template associated with the SDP binding |
| Context | configure service vpls <i>string</i> mesh-sdp <i>string</i> bfd bfd-template <i>reference</i> |
| Tree | bfd-template |
| Description | This command configures a named BFD template to be used by VCCV BFD on PWs belonging to the VLL service. The template specifies parameters, such as the minimum transmit and receive control packet timer intervals, used by the BFD session. Template parameters are configured under the configure router bfd context. |
| Reference | configure bfd bfd-template <i>string</i> |
| Introduced | 21.2.R1 |
| Platforms | All |

collect-stats *boolean*

| | |
|------------|---|
| Synopsis | Allow agent to collect accounting statistics |
| Context | configure service vpls <i>string</i> mesh-sdp <i>string</i> collect-stats <i>boolean</i> |
| Tree | collect-stats |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

control-word *boolean*

| | |
|------------|--|
| Synopsis | Use the control word as preferred |
| Context | configure service vpls <i>string</i> mesh-sdp <i>string</i> control-word <i>boolean</i> |
| Tree | control-word |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

cpu-protection

| | |

| Tree | tx-eth-vsm-grace |
| Description | When configured to true , the router can transmit the Nokia ETH-CFM Grace PDU from the MEP when a system soft reset notification is received for one or more cards.

The Nokia Grace function is a vendor-specific PDU that informs MEP peers that the local node may be entering a period of expected defect.

The operator must configure the configure system eth-cfm grace command to instruct the system that the node is capable of transmitting expected-defect windows to peers. The system can only transmit one form of ETH-CFM grace (Nokia ETH-CFM Grace or ITU-T Y.1731 ETH-ED).

When configured to false , the router disables the transmission of the Nokia ETH-CFM Grace PDU from the MEP. |
| Default | true |
| Introduced | 16.0.R1 |

| Tree | mip |
| Introduced | 21.5.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

primary-vlan (*number* | *keyword*)

| | |
|----------|--------------------------------------|
| Synopsis | VLAN ID to which the MIP is attached |
|----------|--------------------------------------|

| | |
|-------------|---|
| Context | configure service vpls string mesh-sdp string eth-cfm mip primary-vlan (<i>number keyword</i>) |
| Tree | mip |
| Description | This command provides an option for linking a MIP with a Primary VLAN number or none. When the none option is provided, the MIP does not include the primary vlan. |
| Range | 1 to 4094 |
| Options | none |
| Notes | This element is part of a list key. |
| Introduced | 21.5.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

cfm-vlan-tag string

| | |
|---------------|--|
| Synopsis | VLAN tags to apply to CFM PDUs for egress processing |
| Context | configure service vpls string mesh-sdp string eth-cfm mip primary-vlan (<i>number keyword</i>) cfm-vlan-tag string |
| Tree | cfm-vlan-tag |
| Description | This command allows the CFM function to include additional VLAN tags to the CFM packet that are carried to the egress and treated as service delimited. Typically, this function is used to influence the VLAN carried over a binding that uses the vc-type vlan or the binding forces the use of one or more VLAN tag that results in a mismatch between the service data arriving at the binding and the locally generated ETH-CFM PDUs arriving at the same egress. When this command is included under the MEP or MIP configuration, the tags used as part of the configuration typically match the SAP service delimited configuration. |
| String Length | 1 to 9 |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

mac-address string

| | |
|------------|---|
| Synopsis | MAC address of the MIP |
| Context | configure service vpls string mesh-sdp string eth-cfm mip primary-vlan (<i>number keyword</i>) mac-address string |
| Tree | mac-address |
| Introduced | 21.5.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

squelch-ingress-ctag-levels *number*

| | |
|----------------|---|
| Synopsis | Squelch levels using additional VLAN C-Tag space |
| Context | configure service vpls string mesh-sdp string eth-cfm squelch-ingress-ctag-levels number |
| Tree | squelch-ingress-ctag-levels |
| Description | <p>This command defines the levels of the ETH-CFM packets that are silently discarded on ingress into the SAP or SDP binding from the wire that matches the service delineation of the SAP or SDP binding plus an additional VLAN, up to a maximum tag length of two tags. All ETH-CFM packets inbound to the SAP or SDP binding that match the configured levels are dropped without regard for any other ETH-CFM criteria. No statistical information or drop count is available for any ETH-CFM packet that is silently discarded by this option.</p> <p>The list of levels must be a complete contiguous list from 0 up to the highest level to be dropped.</p> |
| Range | 0 to 7 |
| Max. Instances | 8 |
| Introduced | 21.2.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

squelch-ingress-levels *number*

| | |
|----------------|--|
| Synopsis | Levels for which ETH-CFM packets are silently discarded |
| Context | configure service vpls string mesh-sdp string eth-cfm squelch-ingress-levels number |
| Tree | squelch-ingress-levels |
| Description | <p>This command defines the levels of the ETH-CFM packets that are silently discarded on ingress into the SAP or SDP binding from the wire that matches the service delineation of the SAP or SDP binding. All ETH-CFM packets inbound to the SAP or SDP binding that match the configured levels are dropped without regard for any other ETH-CFM criteria. No statistical information or drop count is available for any ETH-CFM packet that is silently discarded by this option.</p> <p>The list of levels must be a complete contiguous list from 0 up to the highest level that will be dropped.</p> |
| Range | 0 to 7 |
| Max. Instances | 8 |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

vmep-filter *boolean*

| | |
|------------|---|
| Synopsis | Suppress eth-cfm PDUs based on level lower than or equal to configured Virtual MEP |
| Context | configure service vpls <i>string</i> mesh-sdp <i>string</i> eth-cfm vmep-filter <i>boolean</i> |
| Tree | vmep-filter |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

etree-leaf *boolean***WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

| | |
|------------|--|
| Synopsis | Enable etree leaf access-circuit status |
| Context | configure service vpls <i>string</i> mesh-sdp <i>string</i> etree-leaf <i>boolean</i> |
| Tree | etree-leaf |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

etree-root-leaf-tag *boolean***WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

| | |

auto-learn-mac-protect *boolean*

| | |
|------------|--|
| Synopsis | Enable automatic population of the MAC protect list |
| Context | configure service vpls <i>string</i> mesh-sdp <i>string</i> fdb auto-learn-mac-protect <i>boolean</i> |
| Tree | auto-learn-mac-protect |
| Default | false |
| Introduced | 16.0.R4 |
| Platforms | All |

auto-learn-mac-protect-exclude-list *reference*

| | |
|-------------|--|
| Synopsis | Referenced MAC protect exclusion list name |
| Context | configure service vpls <i>string</i> mesh-sdp <i>string</i> fdb auto-learn-mac-protect-exclude-list <i>reference</i> |
| Tree | auto-learn-mac-protect-exclude-list |
| Description | This command references the name of a MAC protect exclusion list.

Dynamically-learned MAC Source Addresses (SA) are protected if they are learned on an object with ALMP configured and no exclusion list is associated with the object, or if the MAC SA does not match any entry in an associated exclusion list.

An exclusion list can be used in multiple objects of a service. If a list is empty, ALMP does not exclude any learned MAC SAs from protection on the object. |
| Reference | configure service mac-list <i>string</i> |
| Introduced | 20.5.R1 |
| Platforms | All |

mac-pinning *boolean*

| | |
|----------|---|
| Synopsis | MAC address pinning in active status |
| Context | configure service vpls <i>string</i> mesh-sdp <i>string</i> fdb mac-pinning <i>boolean</i> |

| | |
|------------|-----------------------------|
| Tree | mac-pinning |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

protected-src-mac-violation-action *keyword*

| | |
|------------|---|
| Synopsis | Action to take whenever a relearn request for a protected MAC is received |
| Context | configure service vpls <i>string</i> mesh-sdp <i>string</i> fdb protected-src-mac-violation-action <i>keyword</i> |
| Tree | protected-src-mac-violation-action |
| Options | sdp-bind-oper-down, alarm-only, discard |
| Introduced | 16.0.R4 |
| Platforms | All |

force-vc-forwarding *keyword*

| | |
|------------|--|
| Synopsis | VC forwarding action |

| Context | configure service vpls <i>string</i> mesh-sdp <i>string</i> mld-snooping static |
| Tree | static |
| Introduced | 16.0.R1 |
| Platforms | All |

group [[group-address](#)] *string*

| | |
|------------|---|
| Synopsis | Enter the group list instance |
| Context | configure service vpls <i>string</i> mesh-sdp <i>string</i> mld-snooping static group <i>string</i> |
| Tree | group |
| Introduced | 16.0.R1 |
| Platforms | All |

[[group-address](#)] *string*

| | |
|------------|---|
| Synopsis | Group address of multicast channel |
| Context | configure service vpls <i>string</i> mesh-sdp <i>string</i> mld-snooping static group <i>string</i> |
| Tree | group |
| Notes | This element is part of a list key. |
| Introduced | 16.0.R1 |
| Platforms | All |

source [[source-address](#)] *string*

| | |
|------------|---|
| Synopsis | Add a list entry for source |
| Context | configure service vpls <i>string</i> mesh-sdp <i>string</i> mld-snooping static group <i>string</i> source <i>string</i> |
| Tree | source |
| Notes | The following elements are part of a mandatory choice: source or starg . |
| Introduced | 16.0.R1 |
| Platforms | All |

[source-address] *string*

| | |
|------------|---|
| Synopsis | Source IP address |
| Context | configure service vpls <i>string</i> mesh-sdp <i>string</i> mld-snooping static group <i>string</i> source <i>string</i> |
| Tree | source |
| Notes | This element is part of a list key. |
| Introduced | 16.0.R2 |
| Platforms | All |

starg

| | |
|------------|--|
| Synopsis | any source address (*,G) |
| Context | configure service vpls <i>string</i> mesh-sdp <i>string</i> mld-snooping static group <i>string</i> starg |
| Tree | starg |
| Notes | The following elements are part of a mandatory choice: source or starg . |
| Introduced | 16.0.R2 |
| Platforms | All |

version *keyword*

| | |
|------------|--|
| Synopsis | Version of MLD running on the SAP or SDP |
| Context | configure service vpls <i>string</i> mesh-sdp <i>string</i> mld-snooping version <i>keyword</i> |
| Tree | version |
| Default | 2 |
| Options | 1, 2 |
| Introduced | 16.0.R1 |
| Platforms | All |

mrp

| | |
|------------|--|
| Synopsis | Enter the mrp context |
| Context | configure service vpls <i>string</i> mesh-sdp <i>string</i> mrp |
| Tree | mrp |
| Introduced | 20.10.R1 |
| Platforms | All |

join-time *number*

| | |
|------------|--|
| Synopsis | Maximum rate for attribute join messages sent on SDP |
| Context | configure service vpls <i>string</i> mesh-sdp <i>string</i> mrp join-time <i>number</i> |
| Tree | join-time |
| Range | 1 to 10 |
| Default | 2 |
| Units | deciseconds |
| Introduced | 20.10.R1 |
| Platforms | All |

leave-all-time *number*

| | |
|------------|---|
| Synopsis | Frequency of LeaveAll PDUs by LeaveAll state machine |
| Context | configure service vpls <i>string</i> mesh-sdp <i>string</i> mrp leave-all-time <i>number</i> |
| Tree | leave-all-time |
| Range | 60 to 300 |
| Default | 100 |
| Units | deciseconds |
| Introduced | 20.10.R1 |
| Platforms | All |

leave-time *number*

| | |
|------------|---|
| Synopsis | Time in LV state before transition to MT state |
| Context | configure service vpls <i>string</i> mesh-sdp <i>string</i> mrp leave-time <i>number</i> |
| Tree | leave-time |
| Range | 30 to 60 |
| Default | 30 |
| Units | deciseconds |
| Introduced | 20.10.R1 |
| Platforms | All |

periodic-time *number*

| | |
|------------|--|
| Synopsis | Frequency of periodic events generated by state machine |
| Context | configure service vpls <i>string</i> mesh-sdp <i>string</i> mrp periodic-time <i>number</i> |
| Tree | periodic-time |
| Range | 10 to 100 |
| Default | 10 |
| Units | deciseconds |
| Introduced | 20.10.R1 |
| Platforms | All |

periodic-timer *boolean*

| | |
|------------|--|
| Synopsis | Enable the Periodic Transmission Timer |
| Context | configure service vpls <i>string</i> mesh-sdp <i>string</i> mrp periodic-timer <i>boolean</i> |
| Tree | periodic-timer |
| Default | false |
| Introduced | 20.10.R1 |
| Platforms | All |

policy *reference*

| | |
|------------|--|
| Synopsis | MRP policy to control Group B-MAC attributes |
| Context | configure service vpls <i>string</i> mesh-sdp <i>string</i> mrp policy <i>reference</i> |
| Tree | policy |
| Reference | configure service mrp policy <i>string</i> |
| Introduced | 20.10.R1 |
| Platforms | All |

pbb

| | |
|------------|--|
| Synopsis | Enter the pbb context |
| Context | configure service vpls <i>string</i> mesh-sdp <i>string</i> pbb |
| Tree | pbb |
| Introduced | 20.10.R1 |
| Platforms | All |

fault-propagation

| | |
|------------|--|
| Synopsis | Enter the fault-propagation context |
| Context | configure service vpls <i>string</i> mesh-sdp <i>string</i> pbb fault-propagation |
| Tree | fault-propagation |
| Introduced | 20.10.R1 |
| Platforms | All |

backbone-mac-address [[address](#)] *string*

| | |
|------------|---|
| Synopsis | Add a list entry for backbone-mac-address |
| Context | configure service vpls <i>string</i> mesh-sdp <i>string</i> pbb fault-propagation backbone-mac-address <i>string</i> |
| Tree | backbone-mac-address |
| Introduced | 20.10.R1 |
| Platforms | All |

[[address](#)] *string*

| | |
|------------|---|
| Synopsis | Backbone MAC address |
| Context | configure service vpls <i>string</i> mesh-sdp <i>string</i> pbb fault-propagation backbone-mac-address <i>string</i> |
| Tree | backbone-mac-address |
| Notes | This element is part of a list key. |
| Introduced | 20.10.R1 |
| Platforms | All |

backbone-mac-name [[name](#)] *reference*

| | |
|------------|---|
| Synopsis | Add a list entry for backbone-mac-name |
| Context | configure service vpls <i>string</i> mesh-sdp <i>string</i> pbb fault-propagation backbone-mac-name <i>reference</i> |
| Tree | backbone-mac-name |
| Introduced | 20.10.R1 |
| Platforms | All |

[name] *reference*

| | |
|------------|--|
| Synopsis | Backbone MAC address name |
| Context | configure service vpls string mesh-sdp string pbb fault-propagation backbone-mac-name reference |
| Tree | backbone-mac-name |
| Reference | configure service pbb mac string |
| Notes | This element is part of a list key. |
| Introduced | 20.10.R1 |
| Platforms | All |

vc-type *keyword***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|------------|--|
| Synopsis | Type of virtual circuit (VC) associated with the SDP binding; VPLS not supported |
| Context | configure service vpls string mesh-sdp string vc-type keyword |
| Tree | vc-type |
| Default | ether |
| Options | ether, vlan |
| Introduced | 16.0.R1 |
| Platforms | All |

vlan-vc-tag *number*

| | |
|------------|---|
| Synopsis | SDP bind VC tag |
| Context | configure service vpls string mesh-sdp string vlan-vc-tag number |
| Tree | vlan-vc-tag |
| Range | 0 to 4094 |
| Introduced | 16.0.R1 |
| Platforms | All |

mfib

| | |
|------------|---|
| Synopsis | Enter the mfib context |
| Context | configure service vpls string mfib |
| Tree | mfib |
| Introduced | 16.0.R1 |
| Platforms | All |

table

| | |
|------------|---|
| Synopsis | Enter the table context |
| Context | configure service vpls string mfib table |
| Tree | table |
| Introduced | 16.0.R1 |
| Platforms | All |

high-wmark *number*

| | |
|------------|---|
| Synopsis | High watermark for the MFIB table |
| Context | configure service vpls string mfib table high-wmark number |
| Tree | high-wmark |
| Range | 0 to 100 |
| Default | 95 |
| Introduced | 16.0.R1 |
| Platforms | All |

low-wmark *number*

| | |
|------------|--|
| Synopsis | Low watermark for the MFIB table |
| Context | configure service vpls string mfib table low-wmark number |
| Tree | low-wmark |
| Range | 0 to 100 |
| Default | 90 |
| Introduced | 16.0.R1 |
| Platforms | All |

size number

| | |
|------------|---|
| Synopsis | Maximum SG entries in the MFIB |
| Context | configure service vpls string mfib table size number |
| Tree | size |
| Range | 1 to 40959 |
| Introduced | 16.0.R1 |
| Platforms | All |

mld-snooping

| | |
|------------|---|
| Synopsis | Enter the mld-snooping context |
| Context | configure service vpls string mld-snooping |
| Tree | mld-snooping |
| Introduced | 16.0.R1 |
| Platforms | All |

admin-state keyword

| | |
|------------|---|
| Synopsis | Administrative state of snooping |
| Context | configure service vpls string mld-snooping admin-state keyword |
| Tree | admin-state |
| Default | disable |
| Options | enable, disable |
| Introduced | 16.0.R1 |
| Platforms | All |

evpn-proxy

| | |
|------------|--|
| Synopsis | Enter the evpn-proxy context |
| Context | configure service vpls string mld-snooping evpn-proxy |
| Tree | evpn-proxy |
| Introduced | 20.10.R1 |
| Platforms | All |

admin-state *keyword*

| | |
|------------|---|
| Synopsis | Administrative state of EVPN proxy |
| Context | configure service vpls <i>string</i> mld-snooping evpn-proxy admin-state <i>keyword</i> |
| Tree | admin-state |
| Default | disable |
| Options | enable, disable |
| Introduced | 20.10.R1 |
| Platforms | All |

mvr

| | |
|------------|---|
| Synopsis | Enter the mvr context |
| Context | configure service vpls <i>string</i> mld-snooping mvr |
| Tree | mvr |
| Introduced | 16.0.R1 |
| Platforms | All |

admin-state *keyword*

| | |
|------------|---|
| Synopsis | Administrative state of MVR |
| Context | configure service vpls <i>string</i> mld-snooping mvr admin-state <i>keyword</i> |
| Tree | admin-state |
| Default | disable |
| Options | enable, disable |
| Introduced | 16.0.R1 |
| Platforms | All |

description *string*

| | |
|---------------|--|
| Synopsis | Text description |
| Context | configure service vpls <i>string</i> mld-snooping mvr description <i>string</i> |
| Tree | description |
| String Length | 1 to 80 |
| Introduced | 16.0.R1 |

Platforms All

group-policy *string*

Synopsis Policy that applies MVR
 Context **configure** [service](#) [vpls](#) *string* [mld-snooping](#) [mvr](#) [group-policy](#) *string*
 Tree [group-policy](#)
 String Length 1 to 32
 Introduced 16.0.R1
 Platforms All

query-interval *number*

Synopsis Time between two consecutive host-query messages
 Context **configure** [service](#) [vpls](#) *string* [mld-snooping](#) [query-interval](#) *number*
 Tree [query-interval](#)
 Range 1 to 65535
 Default 125
 Units seconds
 Introduced 16.0.R1
 Platforms All

query-source-address (*keyword* | *ipv6-address*)

Synopsis Source IP address used in MLD queries
 Context **configure** [service](#) [vpls](#) *string* [mld-snooping](#) [query-source-address](#) (*keyword* | *ipv6-address*)
 Tree [query-source-address](#)
 Default system
 Options system
 Introduced 16.0.R1
 Platforms All

report-source-address *string*

Synopsis Source IP address used when generating MLD reports

| | |
|------------|---|
| Context | configure service vpls <i>string</i> mld-snooping report-source-address <i>string</i> |
| Tree | report-source-address |
| Introduced | 16.0.R1 |
| Platforms | All |

robust-count *number*

| | |
|------------|--|
| Synopsis | Number of retries after expected message loss |
| Context | configure service vpls <i>string</i> mld-snooping robust-count <i>number</i> |
| Tree | robust-count |
| Range | 1 to 255 |
| Default | 2 |
| Introduced | 16.0.R1 |
| Platforms | All |

mrp

| | |
|------------|--|
| Synopsis | Enter the mrp context |
| Context | configure service vpls <i>string</i> mrp |
| Tree | mrp |
| Introduced | 20.10.R1 |
| Platforms | All |

admin-state *keyword*

| | |
|------------|---|
| Synopsis | Administrative state of MRP |
| Context | configure service vpls <i>string</i> mrp admin-state <i>keyword</i> |
| Tree | admin-state |
| Default | disable |
| Options | enable, disable |
| Introduced | 20.10.R1 |
| Platforms | All |

mmp

| | |
|------------|---|
| Synopsis | Enter the mmp context |
| Context | configure service vpls <i>string</i> mrp mmp |
| Tree | mmp |
| Introduced | 20.10.R1 |
| Platforms | All |

admin-state *keyword*

| | |
|------------|---|
| Synopsis | Administrative state of MMRP |
| Context | configure service vpls <i>string</i> mrp mmp admin-state <i>keyword</i> |
| Tree | admin-state |
| Options | enable, disable |
| Introduced | 20.10.R1 |
| Platforms | All |

attribute-table

| | |
|------------|--|
| Synopsis | Enter the attribute-table context |
| Context | configure service vpls <i>string</i> mrp mmp attribute-table |
| Tree | attribute-table |
| Introduced | 20.10.R1 |
| Platforms | All |

high-wmark *number*

| | |
|------------|--|
| Synopsis | High watermark for the MMRP attribute table |
| Context | configure service vpls <i>string</i> mrp mmp attribute-table high-wmark <i>number</i> |
| Tree | high-wmark |
| Range | 0 to 100 |
| Default | 95 |
| Introduced | 20.10.R1 |
| Platforms | All |

low-wmark *number*

| | |
|------------|--|
| Synopsis | Low watermark for the MMRP attribute table |
| Context | configure service vpls <i>string</i> mrp mmrp attribute-table low-wmark <i>number</i> |
| Tree | low-wmark |
| Range | 0 to 100 |
| Default | 90 |
| Introduced | 20.10.R1 |
| Platforms | All |

size *number*

| | |
|------------|---|
| Synopsis | Maximum number of attributes accepted by B-VPLS |
| Context | configure service vpls <i>string</i> mrp mmrp attribute-table size <i>number</i> |
| Tree | size |
| Range | 1 to 8192 |
| Default | 2048 |
| Introduced | 20.10.R1 |
| Platforms | All |

end-station-only *boolean*

| | |
|------------|--|
| Synopsis | Prevent generation or processing of MMRP messages |
| Context | configure service vpls <i>string</i> mrp mmrp end-station-only <i>boolean</i> |
| Tree | end-station-only |
| Default | false |
| Introduced | 20.10.R1 |
| Platforms | All |

flood-time *number*

| | |
|------------|---|
| Synopsis | Time when traffic is flooded after status change |
| Context | configure service vpls <i>string</i> mrp mmrp flood-time <i>number</i> |
| Tree | flood-time |
| Range | 3 to 600 |
| Introduced | 20.10.R1 |

Platforms All

multicast-info-policy *reference*

Synopsis Multicast information policy
 Context **configure** [service vpls string multicast-info-policy reference](#)
 Tree [multicast-info-policy](#)
 Reference **configure** [multicast-management multicast-info-policy string](#)
 Introduced 16.0.R1
 Platforms All

pbb

Synopsis Enter the **pbb** context
 Context **configure** [service vpls string pbb](#)
 Tree [pbb](#)
 Introduced 16.0.R1
 Platforms All

backbone-vpls [[backbone-vpls-service-name](#)] *reference*

Synopsis Enter the **backbone-vpls** list instance
 Context **configure** [service vpls string pbb backbone-vpls reference](#)
 Tree [backbone-vpls](#)
 Max. 1
 Instances
 Introduced 16.0.R1
 Platforms All

[backbone-vpls-service-name] *reference*

Synopsis Service name
 Context **configure** [service vpls string pbb backbone-vpls reference](#)
 Tree [backbone-vpls](#)
 Reference **configure** [service vpls string](#)

| | |
|------------|-------------------------------------|
| Notes | This element is part of a list key. |
| Introduced | 16.0.R1 |
| Platforms | All |

fdb

| | |
|------------|---|
| Synopsis | Enter the fdb context |
| Context | configure service vpls <i>string</i> pbb backbone-vpls <i>reference</i> fdb |
| Tree | fdb |
| Introduced | 20.2.R1 |
| Platforms | All |

protected-src-mac-violation-action *keyword*

| | |
|------------|--|
| Synopsis | Action taken upon a relearn request for protected MAC |
| Context | configure service vpls <i>string</i> pbb backbone-vpls <i>reference</i> fdb protected-src-mac-violation-action <i>keyword</i> |
| Tree | protected-src-mac-violation-action |
| Options | discard |
| Introduced | 20.5.R1 |
| Platforms | All |

igmp-snooping

| | |
|------------|---|
| Synopsis | Enter the igmp-snooping context |
| Context | configure service vpls <i>string</i> pbb backbone-vpls <i>reference</i> igmp-snooping |
| Tree | igmp-snooping |
| Introduced | 16.0.R1 |
| Platforms | All |

mrouter-destination [[mac-reference](#)] *reference*

| | |
|----------|---|
| Synopsis | Add a list entry for mrouter-destination |
| Context | configure service vpls <i>string</i> pbb backbone-vpls <i>reference</i> igmp-snooping mrouter-destination <i>reference</i> |
| Tree | mrouter-destination |

Introduced 16.0.R1
 Platforms All

[**mac-reference**] *reference*

Synopsis Mac name reference
 Context **configure service vpls string pbb backbone-vpls reference igmp-snooping mrouter-destination reference**
 Tree **mrouter-destination**
 Reference **configure service pbb mac string**
 Notes This element is part of a list key.
 Introduced 16.0.R1
 Platforms All

isid *number*

WARNING:

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis Backbone VPLS ISID
 Context **configure service vpls string pbb backbone-vpls reference isid number**
 Tree **isid**
 Range 0 to 16777215
 Notes This element is mandatory.
 Introduced 16.0.R1
 Platforms All

mesh-sdp [**sdp-bind-id**] *reference*

Synopsis Enter the **mesh-sdp** list instance
 Context **configure service vpls string pbb backbone-vpls reference mesh-sdp reference**
 Tree **mesh-sdp**
 Introduced 16.0.R1
 Platforms All

[sdp-bind-id] reference

| | |
|------------|---|
| Synopsis | Backbone VPLS SDP Binding ID |
| Context | configure service vpls string pbb backbone-vpls reference mesh-sdp reference |
| Tree | mesh-sdp |
| Reference | configure service vpls string mesh-sdp string |
| Notes | This element is part of a list key. |
| Introduced | 16.0.R1 |
| Platforms | All |

igmp-snooping

| | |
|------------|---|
| Synopsis | Enter the igmp-snooping context |
| Context | configure service vpls string pbb backbone-vpls reference mesh-sdp reference igmp-snooping |
| Tree | igmp-snooping |
| Introduced | 16.0.R1 |
| Platforms | All |

mrouter-port boolean

| | |
|------------|--|
| Synopsis | Operate port as a multicast router port |
| Context | configure service vpls string pbb backbone-vpls reference mesh-sdp reference igmp-snooping mrouter-port boolean |
| Tree | mrouter-port |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

mld-snooping

| | |
|------------|--|
| Synopsis | Enter the mld-snooping context |
| Context | configure service vpls string pbb backbone-vpls reference mesh-sdp reference mld-snooping |
| Tree | mld-snooping |
| Introduced | 16.0.R1 |

Platforms All

mrouter-port *boolean*

Synopsis Operate port as a multicast router port

Context **configure** [service vpls string pbb backbone-vpls reference mesh-sdp reference mld-snooping mrouter-port boolean](#)

Tree [mrouter-port](#)

Default false

Introduced 16.0.R1

Platforms All

mld-snooping

Synopsis Enter the **mld-snooping** context

Context **configure** [service vpls string pbb backbone-vpls reference mld-snooping](#)

Tree [mld-snooping](#)

Introduced 16.0.R1

Platforms All

mrouter-destination [[mac-reference](#)] *reference*

Synopsis Add a list entry for **mrouter-destination**

Context **configure** [service vpls string pbb backbone-vpls reference mld-snooping mrouter-destination reference](#)

Tree [mrouter-destination](#)

Introduced 16.0.R1

Platforms All

[[mac-reference](#)] *reference*

Synopsis Mac name reference

Context **configure** [service vpls string pbb backbone-vpls reference mld-snooping mrouter-destination reference](#)

Tree [mrouter-destination](#)

Reference **configure** [service pbb mac string](#)

| | |

| Introduced | 23.3.R1 |

Platforms All

data-delay-interval *number*

WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis S-PMSI data delay timer

Context **configure** [service vpls](#) [string](#) [provider-tunnel](#) [selective data-delay-interval](#) *number*

Tree [data-delay-interval](#)

Description This command configures the S-PMSI data delay timer.

The data delay interval determines the time the router takes to switch over the traffic from the Ingress Replication binds to the wildcard S-PMSI or from the wildcard S-PMSI to the S-PMSI, after the S-PMSI is created. This time should account for the time it takes for BGP to propagate the S-PMSI A-D route to the downstream PEs and the time it takes the downstream PEs to join the tree all the way up to the root.

Range 3 to 180

Default 3

Units seconds

Introduced 23.3.R1

Platforms All

data-threshold

WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis Enter the **data-threshold** context

Context **configure** [service vpls](#) [string](#) [provider-tunnel](#) [selective data-threshold](#)

Tree [data-threshold](#)

Description Commands in this context specify the data rate threshold that triggers the switch from the inclusive provider tunnel to the selective provider tunnel for (C-S, C-G) within the group range.

Optionally, PE thresholds to create or delete ng-MVPN S-PMSI may also be specified. Omitting the PE thresholds preserves the currently set value (or defaults if never set). Multiple statements (one per a unique group) are allowed in the configuration.

This command is not applicable to multistream S-PMSI.

This command for S-PMSI trees can also be used in EVPN services. The command options are used in the same way as in MVPN when applied to EVPN, in particular the rate and PE thresholds.

Introduced 23.3.R1

Platforms All

group-prefix [[ip-group-prefix](#)] (*ipv4-prefix* | *ipv6-prefix*)

Synopsis Enter the **group-prefix** list instance

Context **configure service vpls string provider-tunnel selective data-threshold group-prefix** (*ipv4-prefix* | *ipv6-prefix*)

[ip-group-prefix] (*ipv4-prefix* | *ipv6-prefix*)

Synopsis Multicast group prefix

Context **configure service vpls string provider-tunnel selective data-threshold group-prefix** (*ipv4-prefix* | *ipv6-prefix*)

Tree [group-prefix](#)

Notes This element is part of a list key.

Introduced 23.3.R1

Platforms All

pe-threshold-add *number*

Synopsis Number of receiver PEs for S-PMSI tunnel creation

Context **configure service vpls string provider-tunnel selective data-threshold group-prefix** (*ipv4-prefix* | *ipv6-prefix*) **pe-threshold-add** *number*

Tree [pe-threshold-add](#)

Description This command specifies the number of Receiver PEs for creating S-PMSI.

A S-PMSI is created when the following apply:

- The number of receiver PEs for a multicast group is non-zero.
- The number of receiver PEs is below the threshold.
- The BW threshold is satisfied.

Range 1 to 65535

| | |
|------------|---------|
| Default | 65535 |
| Introduced | 23.3.R1 |
| Platforms | All |

pe-threshold-delete *number*

| | |
|-------------|---|
| Synopsis | Number of receiver PEs for S-PMSI tunnel deletion |
| Context | configure service vpls <i>string</i> provider-tunnel selective data-threshold group-prefix (<i>ipv4-prefix</i> <i>ipv6-prefix</i>) pe-threshold-delete <i>number</i> |
| Tree | pe-threshold-delete |
| Description | This command specifies the number of Receiver PEs to delete S-PMSI. When the number of receiver PEs for a multicast group configuration is above the threshold, S-PMSI is deleted and the multicast group is moved to IR or a wildcard S-PMSI. Nokia recommends that the delete threshold be configured to be significantly larger than the add threshold to avoid re-signaling of S-PMSI as the Receiver PE count fluctuates |
| Range | 2 to 65535 |
| Default | 65535 |
| Introduced | 23.3.R1 |
| Platforms | All |

threshold *number*

| | |
|-------------|---|
| Synopsis | Threshold rate for a group prefix |
| Context | configure service vpls <i>string</i> provider-tunnel selective data-threshold group-prefix (<i>ipv4-prefix</i> <i>ipv6-prefix</i>) threshold <i>number</i> |
| Tree | threshold |
| Description | This command specifies the threshold rate for a group prefix. If the rate for a (C-S, C-G) within the specified group range exceeds the threshold, traffic for the (C-S, C-G) is switched to the selective provider tunnel. |
| Range | 0 to 4294967294 |
| Units | kilobps |
| Notes | This element is mandatory. |
| Introduced | 23.3.R1 |
| Platforms | All |

maximum-p2mp-spmsi *number*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|-------------|--|
| Synopsis | Maximum number of P2MP S-PMSI tunnels |
| Context | configure service vpls string provider-tunnel selective maximum-p2mp-spmsi number |
| Tree | maximum-p2mp-spmsi |
| Description | This command specifies the maximum number of S-PMSI tunnels for the EVPN service. When the limit is reached, no more RSVP P2MP S-PMSI or LDP P2MP S-PMSI are created and traffic over the data threshold value stays on I-PMSI |
| Range | 1 to 4000 |
| Default | 10 |
| Introduced | 23.3.R1 |
| Platforms | All |

mldp *boolean*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|-------------|---|
| Synopsis | Enable MLDP |
| Context | configure service vpls string provider-tunnel selective mldp boolean |
| Tree | mldp |
| Description | When configured to true , this command enables the use of MLDP as a protocol for an LDP P2MP LSP that is used for forwarding Broadcast, Unicast unknown, and Multicast (BUM) packets of a VPLS or B-VPLS instance. This command is also used for forwarding IP multicast packets of an EVPN VPLS or R-VPLS service.

When configured to false , this command disables the use of MLDP as a protocol to set up the P2MP LSP. |
| Default | false |
| Introduced | 23.3.R1 |
| Platforms | All |

owner keyword**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|-------------|---|
| Synopsis | Provider-tunnel selective owner |
| Context | configure service vpls string provider-tunnel selective owner keyword |
| Tree | owner |
| Description | This command selects the owner protocol of the S-PMSI tunnel in the service.
The owner must be explicitly set before the provider tunnel can be enabled. |
| Options | bgp-evpn-mpls |
| Introduced | 23.3.R1 |
| Platforms | All |

wildcard-spmsi boolean**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|-------------|--|
| Synopsis | Enable wildcard S-PMSI support |
| Context | configure service vpls string provider-tunnel selective wildcard-spmsi boolean |
| Tree | wildcard-spmsi |
| Description | When configured to true , the system enables RFC 6625 (C-*, C-*) S-PMSI functionality for EVPN VPLS or R-VPLS services. When enabled, (C-*, C-*) S-PMSI is used instead of I-PMSI for this EVPN VPLS or RVPLS service.

The configure service vprn pim rp auto-rp-discovery command and this command are mutually exclusive.

When configured to false , the system disables the (C-*, C-*) S-PMSI functionality. |
| Default | false |
| Introduced | 23.3.R1 |

advertise-neighbor-type *keyword*

WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|-------------|--|
| Synopsis | Advertisement type of static or dynamic entries in EVPN |
| Context | configure service vpls <i>string</i> proxy-nd evpn advertise-neighbor-type <i>keyword</i> |
| Tree | advertise-neighbor-type |
| Description | <p>This command enables the advertisement of static or dynamic entries that are learned as host, router, or host and router (only one option is possible in a specified service). It also determines the R flag (host or router) when sending Neighbor Advertisement (NA) messages for existing EVPN entries in the proxy-ND table.</p> <p>The router-host command option is only possible when the ARP/ND extended community is advertised along with the MAC/IP routes. It determines that both host and router (dynamic and static) entries are advertised in MAC/IP routes, with an indication whether the entry is host or router in the R flag. These EVPN entries are installed as host or router entries depending on the R flag of the route, and NA messages for them are sent with the proper host or router indication.</p> |
| Default | router |
| Options | router, host, router-host |
| Introduced | 16.0.R1 |
| Platforms | All |

flood

| | |
|------------|--|

Tree [cpu-protection](#)
Introduced 16.0.R1
Platforms 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS

eth-cfm-monitoring

Synopsis Enable the **eth-cfm-monitoring** context
Context **configure** [service](#) [vpls](#) [string](#) [sap](#) [string](#) [cpu-protection](#) **eth-cfm-monitoring**
Tree [eth-cfm-monitoring](#)
Notes The following elements are part of a choice: **eth-cfm-monitoring** or **mac-monitoring**.
Introduced 16.0.R1
Platforms 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS

aggregate

Synopsis Apply rate limit to the sum of the per peer packet rates
Context **configure** [service](#) [vpls](#) [string](#) [sap](#) [string](#) [cpu-protection](#) [eth-cfm-monitoring](#) **aggregate**
Tree [aggregate](#)
Introduced 16.0.R1
Platforms 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS

car

Synopsis Ignore Ethernet CFM packets when enforcing overall rate
Context **configure** [service](#) [vpls](#) [string](#) [sap](#) [string](#) [cpu-protection](#) [eth-cfm-monitoring](#) **car**
Tree [car](#)
Introduced 16.0.R1
Platforms 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS

mac-monitoring

| | |
|------------|---|
| Synopsis | Monitor MAC for CPU protection |
| Context | configure service vpls <i>string</i> sap <i>string</i> cpu-protection mac-monitoring |
| Tree | mac-monitoring |
| Notes | The following elements are part of a choice: eth-cfm-monitoring or mac-monitoring . |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS |

policy-id *reference*

| | |
|------------|---|
| Synopsis | CPM protection policy |
| Context | configure service vpls <i>string</i> sap <i>string</i> cpu-protection policy-id <i>reference</i> |
| Tree | policy-id |
| Reference | configure system security cpu-protection policy <i>number</i> |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS |

description *string*

| | |
|---------------|---|
| Synopsis | Text description |
| Context | configure service vpls <i>string</i> sap <i>string</i> description <i>string</i> |
| Tree | description |
| String Length | 1 to 160 |
| Introduced | 16.0.R1 |
| Platforms | All |

dhcp

| | |
|------------|--|
| Synopsis | Enter the dhcp context |
| Context | configure service vpls <i>string</i> sap <i>string</i> dhcp |
| Tree | dhcp |
| Introduced | 16.0.R1 |
| Platforms | All |

admin-state *keyword*

| | |
|------------|--|
| Synopsis | Administrative state of DHCP |
| Context | configure service vpls <i>string</i> sap <i>string</i> dhcp admin-state <i>keyword</i> |
| Tree | admin-state |
| Options | enable, disable |
| Introduced | 16.0.R1 |
| Platforms | All |

description *string*

| | |
|---------------|---|
| Synopsis | Text description |
| Context | configure service vpls <i>string</i> sap <i>string</i> dhcp description <i>string</i> |
| Tree | description |
| String Length | 1 to 80 |
| Introduced | 16.0.R1 |
| Platforms | All |

lease-populate

| | |
|------------|--|
| Synopsis | Enter the lease-populate context |
| Context | configure service vpls <i>string</i> sap <i>string</i> dhcp lease-populate |
| Tree | lease-populate |
| Introduced | 16.0.R1 |
| Platforms | All |

max-leases *number*

| | |
|------------|---|
| Synopsis | Maximum number of DHCPv4 leases |
| Context | configure service vpls <i>string</i> sap <i>string</i> dhcp lease-populate max-leases <i>number</i> |
| Tree | max-leases |
| Range | 0 to 131071 |
| Introduced | 16.0.R1 |
| Platforms | All |

option-82

| | |
|-------------|---|
| Synopsis | Enter the option-82 context |
| Context | configure service vpls string sap string dhcp option-82 |
| Tree | option-82 |
| Description | Commands in this context configure the processing required when the router receives a DHCP request that already has an Option 82 field in the packet. |
| Introduced | 16.0.R1 |
| Platforms | All |

action *keyword*

| | |
|------------|---|
| Synopsis | Action to take with received DHCP Option 82 |
| Context | configure service vpls string sap string dhcp option-82 action keyword |
| Tree | action |
| Default | keep |
| Options | replace, drop, keep |
| Introduced | 16.0.R1 |
| Platforms | All |

circuit-id

| | |
|------------|---|
| Synopsis | Enter the circuit-id context |
| Context | configure service vpls string sap string dhcp option-82 circuit-id |
| Tree | circuit-id |
| Introduced | 16.0.R1 |
| Platforms | All |

ascii-tuple

| | |
|----------|--|
| Synopsis | Use the ASCII-encoded tuple for the circuit ID |
| Context | configure service vpls string sap string dhcp option-82 circuit-id ascii-tuple |
| Tree | ascii-tuple |
| Notes | The following elements are part of a choice: ascii-tuple , hex-string , none , or vlan-ascii-tuple . |

| | |
|------------|---------|
| Introduced | 16.0.R1 |
| Platforms | All |

hex-string *string*

| | |
|---------------|--|
| Synopsis | User-defined hexadecimal value of the option |
| Context | configure service vpls string sap string dhcp option-82 circuit-id hex-string string |
| Tree | hex-string |
| String Length | 1 to 66 |
| Notes | The following elements are part of a choice: ascii-tuple , hex-string , none , or vlan-ascii-tuple . |
| Introduced | 16.0.R1 |
| Platforms | All |

none

| | |
|------------|--|
| Synopsis | Do not include the circuit ID |
| Context | configure service vpls string sap string dhcp option-82 circuit-id none |
| Tree | none |
| Notes | The following elements are part of a choice: ascii-tuple , hex-string , none , or vlan-ascii-tuple . |
| Introduced | 16.0.R1 |
| Platforms | All |

vlan-ascii-tuple

| | |
|-------------|---|
| Synopsis | Include the VLAN ID and dot1p bits in the ASCII tuple |
| Context | configure service vpls string sap string dhcp option-82 circuit-id vlan-ascii-tuple |
| Tree | vlan-ascii-tuple |
| Description | When configured, the router includes the VLAN ID and dot1p bits with the ASCII-tuple information. This only occurs on dot1q and QinQ-encapsulated ports. When the Option 82 bits are stripped, dot1p bits are copied to the Ethernet header of the outgoing packet.
When unconfigured, the router leaves the circuit ID sub-option of the DHCP packet empty. |
| Notes | The following elements are part of a choice: ascii-tuple , hex-string , none , or vlan-ascii-tuple . |
| Introduced | 16.0.R1 |

Platforms All

remote-id

Synopsis Enter the **remote-id** context

Context **configure service vpls string sap string dhcp option-82 remote-id**

Tree [remote-id](#)

Description Commands in this context configure the remote IP sub-option of the DHCP packet with the identity of the remote host end (typically the DHCP client).

Introduced 16.0.R1

Platforms All

ascii-string *string*

Synopsis User-defined ASCII string for the remote ID

Context **configure service vpls string sap string dhcp option-82 remote-id ascii-string string**

Tree [ascii-string](#)

String Length 1 to 32

Notes The following elements are part of a choice: **ascii-string**, **hex-string**, **mac**, or **none**.

Introduced 16.0.R1

Platforms All

hex-string *string*

Synopsis Option as a hexadecimal string

Context **configure service vpls string sap string dhcp option-82 remote-id hex-string string**

Tree [hex-string](#)

String Length 1 to 66

Notes The following elements are part of a choice: **ascii-string**, **hex-string**, **mac**, or **none**.

Introduced 16.0.R1

Platforms All

mac

Synopsis Use the MAC address for the remote ID

| | |
|------------|--|
| Context | configure service vpls string sap string dhcp option-82 remote-id mac |
| Tree | mac |
| Notes | The following elements are part of a choice: ascii-string , hex-string , mac , or none . |
| Introduced | 16.0.R1 |
| Platforms | All |

none

| | |
|------------|--|
| Synopsis | Do not include the remote ID |
| Context | configure service vpls string sap string dhcp option-82 remote-id none |
| Tree | none |
| Notes | The following elements are part of a choice: ascii-string , hex-string , mac , or none . |
| Introduced | 16.0.R1 |
| Platforms | All |

vendor-specific-option

| | |
|-------------|---|
| Synopsis | Enter the vendor-specific-option context |
| Context | configure service vpls string sap string dhcp option-82 vendor-specific-option |
| Tree | vendor-specific-option |
| Description | Commands in this context configure the Nokia Vendor-Specific Option (VSO) of the DHCP packet. |
| Introduced | 16.0.R1 |
| Platforms | All |

client-mac-address *boolean*

| | |
|------------|---|
| Synopsis | Send the MAC address in the VSO |
| Context | configure service vpls string sap string dhcp option-82 vendor-specific-option client-mac-address <i>boolean</i> |
| Tree | client-mac-address |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

sap-id *boolean*

| | |
|------------|---|
| Synopsis | Send SAP ID in the sub-option of the DHCP relay packet |
| Context | configure service vpls string sap string dhcp option-82 vendor-specific-option sap-id <i>boolean</i> |
| Tree | sap-id |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

service-id *boolean*

| | |
|------------|---|
| Synopsis | Send the service ID in the Vendor Specific Option |
| Context | configure service vpls string sap string dhcp option-82 vendor-specific-option service-id <i>boolean</i> |
| Tree | service-id |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

string *string*

| | |
|---------------|--|
| Synopsis | User-defined ASCII string for the VSO |
| Context | configure service vpls string sap string dhcp option-82 vendor-specific-option string <i>string</i> |
| Tree | string |
| String Length | 1 to 32 |
| Introduced | 16.0.R1 |
| Platforms | All |

system-id *boolean*

| | |
|----------|--|
| Synopsis | Send the system ID in the VSO |
| Context | configure service vpls string sap string dhcp option-82 vendor-specific-option system-id <i>boolean</i> |
| Tree | system-id |
| Default | false |

| | |
|------------|---------|
| Introduced | 16.0.R1 |
| Platforms | All |

proxy-server

| | |
|------------|---|
| Synopsis | Enter the proxy-server context |
| Context | configure service vpls string sap string dhcp proxy-server |
| Tree | proxy-server |
| Introduced | 16.0.R1 |
| Platforms | All |

admin-state *keyword*

| | |
|------------|--|
| Synopsis | Administrative state of the DHCP proxy server |
| Context | configure service vpls string sap string dhcp proxy-server admin-state <i>keyword</i> |
| Tree | admin-state |
| Default | disable |
| Options | enable, disable |
| Introduced | 16.0.R1 |
| Platforms | All |

emulated-server *string*

| | |
|------------|---|
| Synopsis | IP address used as DHCP server address in SAP context |
| Context | configure service vpls string sap string dhcp proxy-server emulated-server <i>string</i> |
| Tree | emulated-server |
| Introduced | 16.0.R1 |
| Platforms | All |

lease-time

| | |
|------------|--|
| Synopsis | Enter the lease-time context |
| Context | configure service vpls string sap string dhcp proxy-server lease-time |
| Tree | lease-time |
| Introduced | 16.0.R1 |

Platforms All

radius-override *boolean*

Synopsis Use lease time information provided by RADIUS server

Context **configure** [service vpls string sap string dhcp proxy-server lease-time radius-override boolean](#)

Tree [radius-override](#)

Default false

Introduced 16.0.R1

Platforms All

value *number*

Synopsis DHCP lease time

Context **configure** [service vpls string sap string dhcp proxy-server lease-time value number](#)

Tree [value](#)

Range 300 to 315446399

Units seconds

Introduced 16.0.R1

Platforms All

snoop *boolean*

Synopsis Enable DHCP snooping on the SAP

Context **configure** [service vpls string sap string dhcp snoop boolean](#)

Tree [snoop](#)

Default false

Introduced 16.0.R1

Platforms All

dist-cpu-protection *reference*

Synopsis Distributed CPU protection policy for SAP

Context **configure** [service vpls string sap string dist-cpu-protection reference](#)

Tree [dist-cpu-protection](#)

| | |
|------------|---|
| Reference | configure system security dist-cpu-protection policy <i>string</i> |
| Introduced | 16.0.R1 |
| Platforms | All |

egress

| | |
|------------|---|
| Synopsis | Enter the egress context |
| Context | configure service vpls <i>string</i> sap <i>string</i> egress |
| Tree | egress |
| Introduced | 16.0.R1 |
| Platforms | All |

agg-rate

| | |
|------------|---|
| Synopsis | Enter the agg-rate context |
| Context | configure service vpls <i>string</i> sap <i>string</i> egress agg-rate |
| Tree | agg-rate |
| Notes | The following elements are part of a choice: agg-rate or percent-agg-rate . |
| Introduced | 16.0.R1 |
| Platforms | All |

adaptation-rule *keyword*

| | |
|------------|---|
| Synopsis | Adaptation rule to compute the operational PIR value when an aggregate shaper is used |
| Context | configure service vpls <i>string</i> sap <i>string</i> egress agg-rate adaptation-rule <i>keyword</i> |
| Tree | adaptation-rule |
| Default | closest |
| Options | max, min, closest |
| Introduced | 22.10.R1 |
| Platforms | 7750 SR-1, 7750 SR-s |

burst-limit (*number* | *keyword*)

| | |
|----------|---|
| Synopsis | Shaping burst size when an aggregate shaper is used |
| Context | configure service vpls <i>string</i> sap <i>string</i> egress agg-rate burst-limit (<i>number</i> <i>keyword</i>) |

| | |
|------------|-----------------------------|
| Tree | burst-limit |
| Range | 1 to 14000000 |
| Default | auto |
| Units | bytes |
| Options | auto |
| Introduced | 22.10.R1 |
| Platforms | 7750 SR-1, 7750 SR-s |

limit-unused-bandwidth *boolean*

| | |
|------------|---|
| Synopsis | Enable aggregate rate overrun protection |
| Context | configure service vpls <i>string</i> sap <i>string</i> egress agg-rate limit-unused-bandwidth <i>boolean</i> |
| Tree | limit-unused-bandwidth |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

queue-frame-based-accounting *boolean*

| | |
|------------|---|
| Synopsis | Enable frame-based accounting on all policers and queues associated with context |
| Context | configure service vpls <i>string</i> sap <i>string</i> egress agg-rate queue-frame-based-accounting <i>boolean</i> |
| Tree | queue-frame-based-accounting |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

rate *number*

| | |
|------------|--|
| Synopsis | Enforced aggregate rate for all queues |
| Context | configure service vpls <i>string</i> sap <i>string</i> egress agg-rate rate <i>number</i> |
| Tree | rate |
| Range | 1 to 6400000000 |
| Units | kilobps |
| Introduced | 16.0.R1 |

Platforms All

dest-mac-rewrite *string*

Synopsis Destination MAC overwrite for unicast
Context **configure** [service vpls string sap string egress dest-mac-rewrite string](#)
Tree [dest-mac-rewrite](#)
Introduced 16.0.R5
Platforms All

filter

Synopsis Enter the **filter** context
Context **configure** [service vpls string sap string egress filter](#)
Tree [filter](#)
Introduced 16.0.R1
Platforms All

ip reference

Synopsis IPv4 filter policy name
Context **configure** [service vpls string sap string egress filter ip reference](#)
Tree [ip](#)
Reference **configure** [filter ip-filter string](#)
Introduced 16.0.R1
Platforms All

ipv6 reference

Synopsis IPv6 filter policy name
Context **configure** [service vpls string sap string egress filter ipv6 reference](#)
Tree [ipv6](#)
Reference **configure** [filter ipv6-filter string](#)
Introduced 16.0.R1
Platforms All

mac reference

| | |
|------------|---|
| Synopsis | MAC filter policy name |
| Context | configure service vpls <i>string</i> sap <i>string</i> egress filter mac reference |
| Tree | mac |
| Reference | configure filter mac-filter <i>string</i> |
| Introduced | 16.0.R1 |
| Platforms | All |

qos

| | |
|------------|--|
| Synopsis | Enter the qos context |
| Context | configure service vpls <i>string</i> sap <i>string</i> egress qos |
| Tree | qos |
| Introduced | 16.0.R1 |
| Platforms | All |

policer-control-policy

| | |
|------------|---|
| Synopsis | Enter the policer-control-policy context |
| Context | configure service vpls <i>string</i> sap <i>string</i> egress qos policer-control-policy |
| Tree | policer-control-policy |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR |

overrides

| | |
|------------|---|
| Synopsis | Enable the overrides context |
| Context | configure service vpls <i>string</i> sap <i>string</i> egress qos policer-control-policy overrides |
| Tree | overrides |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR |

root

| | |
|------------|--|
| Synopsis | Enter the root context |
| Context | configure service vpls string sap string egress qos policer-control-policy overrides root |
| Tree | root |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR |

max-rate (*number* | *keyword*)

| | |
|------------|---|
| Synopsis | Maximum frame-based bandwidth limit |
| Context | configure service vpls string sap string egress qos policer-control-policy overrides root
max-rate (<i>number</i> <i>keyword</i>) |
| Tree | max-rate |
| Range | 1 to 6400000000 |
| Options | max |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR |

priority-mbs-thresholds

| | |
|------------|---|
| Synopsis | Enter the priority-mbs-thresholds context |
| Context | configure service vpls string sap string egress qos policer-control-policy overrides root
priority-mbs-thresholds |
| Tree | priority-mbs-thresholds |

| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR |

cbs (number | keyword)

| | |
|------------|--|
| Synopsis | CBS |
| Context | configure service vpls string sap string egress qos sap-egress overrides policer reference cbs (number keyword) |
| Tree | cbs |
| Range | 0 to 268435456 |
| Units | bytes |
| Options | auto |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR |

mbs (number | keyword)

| | |
|------------|--|
| Synopsis | MBS |
| Context | configure service vpls string sap string egress qos sap-egress overrides policer reference mbs (number keyword) |
| Tree | mbs |
| Range | 0 to 268435456 |
| Units | bytes |
| Options | auto |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR |

packet-byte-offset *number*

| | |
|------------|---|
| Synopsis | Packet size modification for policing information |
| Context | configure service vpls string sap string egress qos sap-egress overrides policer reference packet-byte-offset number |
| Tree | packet-byte-offset |
| Range | -64 to 31 |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR |

percent-rate

| | |
|------------|--|
| Synopsis | Enter the percent-rate context |
| Context | configure service vpls string sap string egress qos sap-egress overrides policer reference percent-rate |
| Tree | percent-rate |
| Notes | The following elements are part of a choice: percent-rate or rate . |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR |

cir *decimal-number*

| | |
|------------|---|
| Synopsis | CIR percent rate |
| Context | configure service vpls string sap string egress qos sap-egress overrides policer reference percent-rate cir decimal-number |
| Tree | cir |
| Range | 0.00 to 100.00 |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR |

pir *decimal-number*

| | |
|----------|---|
| Synopsis | PIR percent rate |
| Context | configure service vpls string sap string egress qos sap-egress overrides policer reference percent-rate pir decimal-number |
| Tree | pir |
| Range | 0.01 to 100.00 |

| | |
|------------|--|
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR |

rate

| | |
|------------|--|
| Synopsis | Enter the rate context |
| Context | configure service vpls string sap string egress qos sap-egress overrides policer reference rate |
| Tree | rate |
| Notes | The following elements are part of a choice: percent-rate or rate . |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR |

cir (*number* | *keyword*)

| | |
|------------|---|
| Synopsis | CIR rate |
| Context | configure service vpls string sap string egress qos sap-egress overrides policer reference rate cir (number keyword) |
| Tree | cir |
| Range | 0 to 6400000000 |
| Units | kilobps |
| Options | max |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR |

pir (*number* | *keyword*)

| | |
|------------|---|
| Synopsis | PIR rate |
| Context | configure service vpls string sap string egress qos sap-egress overrides policer reference rate pir (number keyword) |
| Tree | pir |
| Range | 1 to 6400000000 |
| Units | kilobps |
| Options | max |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR |

stat-mode *keyword*

| | |
|------------|---|
| Synopsis | Mode of statistics collected by the policer |
| Context | configure service vpls <i>string</i> sap <i>string</i> egress qos sap-egress overrides policer reference stat-mode <i>keyword</i> |
| Tree | stat-mode |
| Options | no-stats, minimal, offered-profile-no-cir, offered-total-cir, offered-profile-cir, offered-limited-capped-cir, offered-profile-capped-cir, offered-total-cir-exceed, offered-four-profile-no-cir, offered-total-cir-four-profile |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR |

queue [[queue-id](#)] *reference*

| | |
|------------|---|
| Synopsis | Enter the queue list instance |
| Context | configure service vpls <i>string</i> sap <i>string</i> egress qos sap-egress overrides queue reference |
| Tree | queue |
| Introduced | 16.0.R1 |
| Platforms | All |

[queue-id] *reference*

| | |
|------------|---|
| Synopsis | Policer unique ID |
| Context | configure service vpls <i>string</i> sap <i>string</i> egress qos sap-egress overrides queue reference |
| Tree | queue |
| Reference | configure qos sap-egress <i>string</i> queue <i>number</i> |
| Notes | This element is part of a list key. |
| Introduced | 16.0.R1 |
| Platforms | All |

adaptation-rule

| | |
|----------|--|
| Synopsis | Enter the adaptation-rule context |
| Context | configure service vpls <i>string</i> sap <i>string</i> egress qos sap-egress overrides queue reference adaptation-rule |

| | |
|------------|---------------------------------|
| Tree | adaptation-rule |
| Introduced | 16.0.R1 |
| Platforms | All |

cir keyword

| | |
|------------|---|
| Synopsis | Constraint used when deriving the operational CIR value |
| Context | configure service vpls string sap string egress qos sap-egress overrides queue reference adaptation-rule cir keyword |
| Tree | cir |
| Options | max, min, closest |
| Introduced | 16.0.R1 |
| Platforms | All |

pir keyword

| | |
|------------|---|
| Synopsis | Constraint used when deriving the operational PIR value |
| Context | configure service vpls string sap string egress qos sap-egress overrides queue reference adaptation-rule pir keyword |
| Tree | pir |
| Options | max, min, closest |
| Introduced | 16.0.R1 |
| Platforms | All |

avg-frame-overhead decimal-number

| | |
|------------|---|
| Synopsis | Average packet-to-frame encapsulation overhead |
| Context | configure service vpls string sap string egress qos sap-egress overrides queue reference avg-frame-overhead decimal-number |
| Tree | avg-frame-overhead |
| Range | 0.00 to 100.00 |
| Introduced | 16.0.R1 |
| Platforms | All |

burst-limit (*number* | *keyword*)

| | |
|------------|--|
| Synopsis | Explicit shaping burst size for the queue |
| Context | configure service vpls string sap string egress qos sap-egress overrides queue reference burst-limit (<i>number</i> <i>keyword</i>) |
| Tree | burst-limit |
| Range | 1 to 14000000 |
| Units | bytes |
| Options | auto |
| Introduced | 16.0.R1 |
| Platforms | All |

cbs (*number* | *keyword*)

| | |
|------------|--|
| Synopsis | CBS |
| Context | configure service vpls string sap string egress qos sap-egress overrides queue reference cbs (<i>number</i> <i>keyword</i>) |
| Tree | cbs |
| Range | 0 to 1048576 |
| Units | kilobytes |
| Options | auto |
| Introduced | 16.0.R1 |
| Platforms | All |

drop-tail

| | |
|------------|---|
| Synopsis | Enter the drop-tail context |
| Context | configure service vpls string sap string egress qos sap-egress overrides queue reference drop-tail |
| Tree | drop-tail |
| Introduced | 16.0.R1 |
| Platforms | All |

low

| | |
|----------|------------------------------|
| Synopsis | Enter the low context |
|----------|------------------------------|

| | |
|------------|---|
| Context | configure service vpls string sap string egress qos sap-egress overrides queue reference drop-tail low |
| Tree | low |
| Introduced | 16.0.R1 |
| Platforms | All |

percent-reduction-from-mbs (*number | keyword*)

| | |
|------------|--|
| Synopsis | Percentage reduction from the MBS for a queue drop tail |
| Context | configure service vpls string sap string egress qos sap-egress overrides queue reference drop-tail low percent-reduction-from-mbs (<i>number keyword</i>) |
| Tree | percent-reduction-from-mbs |
| Range | 0 to 100 |
| Options | auto |
| Introduced | 16.0.R1 |
| Platforms | All |

hs-class-weight *number*

| | |
|------------|---|
| Synopsis | Class weight override for the queue |
| Context | configure service vpls string sap string egress qos sap-egress overrides queue reference hs-class-weight <i>number</i> |
| Tree | hs-class-weight |
| Range | 1 2 4 8 |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR-7/12/12e |

hs-wred-queue

| | |
|------------|---|
| Synopsis | Enter the hs-wred-queue context |
| Context | configure service vpls string sap string egress qos sap-egress overrides queue reference hs-wred-queue |
| Tree | hs-wred-queue |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR-7/12/12e |

policy reference

| | |
|------------|--|
| Synopsis | Slope policy applied to the HSQ queue group queue |
| Context | configure service vpls string sap string egress qos sap-egress overrides queue reference hs-wred-queue policy reference |
| Tree | policy |
| Reference | configure qos slope-policy string |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR-7/12/12e |

hs-wrr-weight number

| | |
|------------|--|
| Synopsis | Weighted Round Robin (WRR) weight to parent with this queue into the scheduler |
| Context | configure service vpls string sap string egress qos sap-egress overrides queue reference hs-wrr-weight number |
| Tree | hs-wrr-weight |
| Range | 1 to 127 |
| Default | 1 |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR-7/12/12e |

mbs (number | keyword)

| | |
|------------|--|
| Synopsis | MBS |
| Context | configure service vpls string sap string egress qos sap-egress overrides queue reference mbs (number keyword) |
| Tree | mbs |
| Range | 0 to 1073741824 |
| Units | bytes |
| Options | auto |
| Introduced | 16.0.R1 |
| Platforms | All |

monitor-queue-depth

| | |
|----------|---|
| Synopsis | Enable the monitor-queue-depth context |
|----------|---|

| | |
|------------|---|
| Context | configure service vpls string sap string egress qos sap-egress overrides queue reference monitor-queue-depth |
| Tree | monitor-queue-depth |
| Introduced | 20.10.R1 |
| Platforms | All |

fast-polling *boolean*

| | |
|-------------|--|
| Synopsis | Enable fast polling of the queue depth |
| Context | configure service vpls string sap string egress qos sap-egress overrides queue reference monitor-queue-depth fast-polling boolean |
| Tree | fast-polling |
| Description | When configured to true , this command enables fast polling of the queue depth. Faster polling allows a more accurate view of the actual depth.
When configured to false , fast queue polling is not enabled. |
| Default | false |
| Introduced | 20.10.R1 |
| Platforms | All |

violation-threshold *decimal-number*

| | |
|-------------|--|
| Synopsis | Threshold for queue depth before violation is raised |
| Context | configure service vpls string sap string egress qos sap-egress overrides queue reference monitor-queue-depth violation-threshold decimal-number |
| Tree | violation-threshold |
| Description | This command specifies the threshold for the queue MBS. When the queue depth exceeds the threshold value, a violation is registered. |
| Range | 0.01 to 99.99 |
| Introduced | 20.10.R1 |
| Platforms | All |

parent

| | |
|----------|--|
| Synopsis | Enter the parent context |
| Context | configure service vpls string sap string egress qos sap-egress overrides queue reference parent |
| Tree | parent |

Introduced 16.0.R1
 Platforms All

cir-weight *number*

Synopsis CIR parameter that overrides parent for queue group
 Context **configure** [service vpls string sap string egress qos sap-egress overrides queue reference parent cir-weight number](#)
 Tree [cir-weight](#)
 Range 0 to 100
 Introduced 16.0.R1
 Platforms All

weight *number*

Synopsis PIR parameter that overrides parent for queue group
 Context **configure** [service vpls string sap string egress qos sap-egress overrides queue reference parent weight number](#)
 Tree [weight](#)
 Range 0 to 100
 Introduced 16.0.R1
 Platforms All

percent-rate

Synopsis Enter the **percent-rate** context
 Context **configure** [service vpls string sap string egress qos sap-egress overrides queue reference percent-rate](#)
 Tree [percent-rate](#)
 Notes The following elements are part of a choice: **percent-rate** or **rate**.
 Introduced 16.0.R1
 Platforms All

cir decimal-number

Synopsis CIR percent rate

| | |
|------------|---|
| Context | configure service vpls string sap string egress qos sap-egress overrides queue reference percent-rate cir decimal-number |
| Tree | cir |
| Range | 0.00 to 100.00 |
| Introduced | 16.0.R1 |
| Platforms | All |

pir decimal-number

| | |
|------------|---|
| Synopsis | PIR percent rate |
| Context | configure service vpls string sap string egress qos sap-egress overrides queue reference percent-rate pir decimal-number |
| Tree | pir |
| Range | 0.01 to 100.00 |
| Introduced | 16.0.R1 |
| Platforms | All |

rate

| | |
|------------|--|
| Synopsis | Enter the rate context |
| Context | configure service vpls string sap string egress qos sap-egress overrides queue reference rate |
| Tree | rate |
| Notes | The following elements are part of a choice: percent-rate or rate . |
| Introduced | 16.0.R1 |
| Platforms | All |

cir (number | keyword)

| | |
|----------|---|
| Synopsis | CIR rate |
| Context | configure service vpls string sap string egress qos sap-egress overrides queue reference rate cir (number keyword) |
| Tree | cir |
| Range | 0 to 6400000000 |
| Units | kilobps |
| Options | max |

Introduced 16.0.R1
 Platforms All

pir (*number* | *keyword*)

Synopsis PIR rate

 Reference **configure** [qos sap-egress string](#)
 Introduced 16.0.R1
 Platforms All

port-redirect-group

Synopsis Enter the **port-redirect-group** context
 Context **configure** [service vpls string sap string egress qos sap-egress port-redirect-group](#)
 Tree [port-redirect-group](#)
 Introduced 16.0.R1
 Platforms All

group-name *reference*

Synopsis Name of the queue group redirect list policy

| | |
|------------|--|
| Context | configure service vpls string sap string egress qos sap-egress port-redirect-group group-name reference |
| Tree | group-name |
| Reference | configure qos queue-group-templates egress queue-group string |
| Introduced | 16.0.R1 |
| Platforms | All |

instance number

| | |
|------------|---|
| Synopsis | Instance of port queue group |
| Context | configure service vpls string sap string egress qos sap-egress port-redirect-group instance number |
| Tree | instance |
| Range | 1 to 65535 |
| Introduced | 16.0.R1 |
| Platforms | All |

scheduler-policy

| | |
|------------|---|
| Synopsis | Enter the scheduler-policy context |
| Context | configure service vpls string sap string egress qos scheduler-policy |
| Tree | scheduler-policy |
| Introduced | 16.0.R1 |
| Platforms | All |

overrides

| | |
|------------|---|
| Synopsis | Enter the overrides context |
| Context | configure service vpls string sap string egress qos scheduler-policy overrides |
| Tree | overrides |
| Introduced | 16.0.R1 |
| Platforms | All |

scheduler [**scheduler-name**] *string*

| | |
|----------|--|
| Synopsis | Enter the scheduler list instance |
|----------|--|

| | |
|------------|--|
| Context | configure service vpls string sap string egress qos scheduler-policy overrides scheduler string |
| Tree | scheduler |
| Introduced | 16.0.R1 |
| Platforms | All |

[scheduler-name] string

| | |
|---------------|--|
| Synopsis | Scheduler name |
| Context | configure service vpls string sap string egress qos scheduler-policy overrides scheduler string |
| Tree | scheduler |
| Description | <p>This command specifies the scheduler name which is composed of printable 7-bit ASCII characters. If the string contains special characters (#, \$, spaces, and so on), the entire string must be enclosed within double quotes. Each scheduler must have a unique name within the context of the scheduler policy. However, the same name can be reused in multiple scheduler policies. If the scheduler name already exists within the policy tier level, the context changes to that scheduler name for the purpose of editing the scheduler commands.</p> <p>If the scheduler name exists within the policy on a different tier, an error occurs and the current context will not change. If the scheduler name does not exist in this or another tier within the scheduler policy, it is assumed that an attempt is being made to create a scheduler of that name.</p> <p>If the provided scheduler name is invalid, a name syntax error will occur, the command will not execute, and the context will not change.</p> |
| String Length | 1 to 32 |
| Notes | This element is part of a list key. |
| Introduced | 16.0.R1 |
| Platforms | All |

parent

| | |
|------------|---|
| Synopsis | Enter the parent context |
| Context | configure service vpls string sap string egress qos scheduler-policy overrides scheduler string parent |
| Tree | parent |
| Introduced | 16.0.R1 |
| Platforms | All |

cir-weight *number*

| | |
|------------|--|
| Synopsis | Weight used at the within-CIR port priority level |
| Context | configure service vpls <i>string</i> sap <i>string</i> egress qos scheduler-policy overrides scheduler <i>string</i> parent cir-weight <i>number</i> |
| Tree | cir-weight |
| Range | 0 to 100 |
| Introduced | 16.0.R1 |
| Platforms | All |

weight *number*

| | |
|------------|--|
| Synopsis | Relative weight of the scheduler to feed the queue |
| Context | configure service vpls <i>string</i> sap <i>string</i> egress qos scheduler-policy overrides scheduler <i>string</i> parent weight <i>number</i> |
| Tree | weight |
| Range | 0 to 100 |
| Introduced | 16.0.R1 |
| Platforms | All |

rate

| | |
|------------|---|
| Synopsis | Enter the rate context |
| Context | configure service vpls <i>string</i> sap <i>string</i> egress qos scheduler-policy overrides scheduler <i>string</i> rate |
| Tree | rate |
| Introduced | 16.0.R1 |
| Platforms | All |

cir (*number* | *keyword*)

| | |
|----------|---|
| Synopsis | CIR at which the queue it to operate |
| Context | configure service vpls <i>string</i> sap <i>string</i> egress qos scheduler-policy overrides scheduler <i>string</i> rate cir (<i>number</i> <i>keyword</i>) |
| Tree | cir |
| Range | 0 to 6400000000 |

| | |
|------------|----------|
| Units | kilobps |
| Options | sum, max |
| Introduced | 16.0.R1 |
| Platforms | All |

pir (*number* | *keyword*)

| | |
|------------|---|
| Synopsis | PIR at which the queue is to operate |
| Context | configure service vpls string sap string egress qos scheduler-policy overrides scheduler string rate pir (<i>number</i> <i>keyword</i>) |
| Tree | pir |
| Range | 1 to 6400000000 |
| Units | kilobps |
| Options | max |
| Introduced | 16.0.R1 |
| Platforms | All |

policy-name *reference*

| | |
|------------|---|
| Synopsis | Scheduler policy name |
| Context | configure service vpls string sap string egress qos scheduler-policy policy-name reference |
| Tree | policy-name |
| Reference | configure qos scheduler-policy string |
| Introduced | 16.0.R1 |
| Platforms | All |

eth-cfm

| | |
|------------|---|
| Synopsis | Enter the eth-cfm context |
| Context | configure service vpls string sap string eth-cfm |
| Tree | eth-cfm |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

collect-lmm-fc-stats

| | |
|-------------|--|
| Synopsis | Enter the collect-lmm-fc-stats context |
| Context | configure service vpls string sap string eth-cfm collect-lmm-fc-stats |
| Tree | collect-lmm-fc-stats |
| Description | <p>Commands in this context configure per forwarding class (FC) LMM information collection.</p> <p>The commands fc-in-profile and fc in this context are mutually exclusive. The commands apply to either profile-aware or profile-unaware FCs respectively.</p> <p>This command and the collect-lmm-stats command are mutually exclusive when there is entity resource contention.</p> |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

fc keyword

| | |
|----------------|---|
| Synopsis | Forwarding class name for profile-unaware counter |
| Context | configure service vpls string sap string eth-cfm collect-lmm-fc-stats fc keyword |
| Tree | fc |
| Description | <p>This command configures individual counters for the specified FCs without regard for profile. The system includes all countable packets that match a configured FC, regardless of profile, in this counter.</p> <p>An FC specified as part of this command and for this specific context cannot be specified as a profile-aware FC using the fc-in-profile command under the collect-lmm-fc-stats context.</p> <p>When this command is reentered, a differential is performed. Omitted FCs stop counting, newly added FCs start counting, and unchanged FCs continue to count.</p> |
| Options | be, l2, af, l1, h2, ef, h1, nc |
| Max. Instances | 8 |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

fc-in-profile keyword

| | |
|----------|--|
| Synopsis | Forwarding class name for profile-aware counter |
| Context | configure service vpls string sap string eth-cfm collect-lmm-fc-stats fc-in-profile keyword |
| Tree | fc-in-profile |

| | |
|----------------|---|
| Description | <p>This command configures individual counters for the specified FCs with regard to profile. The system includes all countable packets that match a configured FC and that are deemed to be in-profile in this counter.</p> <p>An FC specified as part of this command and for this specific context cannot be specified as a profile-unaware FC using the fc command under the collect-lmm-fc-stats context.</p> <p>When this command is reentered, a differential is performed. Omitted FCs stop counting, newly added FCs start counting, and unchanged FCs continue to count.</p> |
| Options | be, l2, af, l1, h2, ef, h1, nc |

| Tree | tx-eth-vsm-grace |
| Description | When configured to true , the router can transmit the Nokia ETH-CFM Grace PDU from the MEP when a system soft reset notification is received for one or more cards.

The Nokia Grace function is a vendor-specific PDU that informs MEP peers that the local node may be entering a period of expected defect.

The operator must configure the configure system eth-cfm grace command to instruct the system that the node is capable of transmitting expected-defect windows to peers. The system can only transmit one form of ETH-CFM grace (Nokia ETH-CFM Grace or ITU-T Y.1731 ETH-ED). |

When configured to **false**, the router disables the transmission of the Nokia ETH-CFM Grace PDU from the MEP.

| | |

| Context | configure service vpls <i>string</i> sap <i>string</i> eth-cfm mip primary-vlan (<i>number</i> <i>keyword</i>)
cfm-vlan-tag <i>string</i> |
| Tree | cfm-vlan-tag |
| Description | This command allows the CFM function to include additional VLAN tags to the CFM packet that are carried to the egress and treated as service delimited. Typically, this function is used to influence the VLAN carried over a binding that uses the vc-type vlan or the binding forces the use of one or more VLAN tag that results in a mismatch between the service data arriving at the binding and the locally generated ETH-CFM PDUs arriving at the same egress. When this command is included under the MEP or MIP configuration, the tags used as part of the configuration typically match the SAP service delimited configuration. |
| String Length | 1 to 9 |

| Context | configure service vpls <i>string</i> sap <i>string</i> eth-cfm mip primary-vlan (<i>number</i> <i>keyword</i>)
mac-address <i>string</i> |
| Tree | mac-address |
| Introduced | 21.5.R1 |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

snelch- ingress-ctag-levels *number*

Synopsis Snelch levels using additional VLAN C-Tag space

Context **configure** **service vpls** *string sap string eth-cfm snelch- ingress-ctag-levels number*

Tree [snelch- ingress-ctag-levels](#)

Description This command defines the levels of the ETH-CFM packets that are silently discarded on ingress into the SAP or SDP binding from the wire that matches the service delineation of the SAP or SDP binding plus an additional VLAN, up to a maximum tag length of two tags. All ETH-CFM packets inbound to the SAP or SDP binding that match the configured levels are dropped without regard for any other ETH-CFM criteria. No statistical information or drop count is available for any ETH-CFM packet that is silently discarded by this option.

The list of levels must be a complete contiguous list from 0 up to the highest level to be dropped.

Range 0 to 7

Max. 8

Instances

Introduced 21.2.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

snelch- ingress-levels *number*

Synopsis Levels for which ETH-CFM packets are silently discarded

Context **configure** **service vpls** *string sap string eth-cfm snelch- ingress-levels number*

Tree [snelch- ingress-levels](#)

Description This command defines the levels of the ETH-CFM packets that are silently discarded on ingress into the SAP or SDP binding from the wire that matches the service delineation of the SAP or SDP binding. All ETH-CFM packets inbound to the SAP or SDP binding that match the configured levels are dropped without regard for any other ETH-CFM criteria. No statistical information or drop count is available for any ETH-CFM packet that is silently discarded by this option.

The list of levels must be a complete contiguous list from 0 up to the highest level that will be dropped.

auto-learn-mac-protect-exclude-list *reference*

| | |
|-------------|--|
| Synopsis | Referenced MAC protect exclusion list |
| Context | configure service vpls <i>string</i> sap <i>string</i> fdb auto-learn-mac-protect-exclude-list <i>reference</i> |
| Tree | auto-learn-mac-protect-exclude-list |
| Description | This command references the name of a MAC protect exclusion list.

Dynamically-learned MAC Source Addresses (SA) are protected if they are learned on an object with ALMP configured and no exclusion list is associated with the object, or if the MAC SA does not match any entry in an associated exclusion list.

An exclusion list can be used in multiple objects of a service. If a list is empty, ALMP does not exclude any learned MAC SAs from protection on the object. |
| Reference | configure service mac-list <i>string</i> |
| Introduced | 20.5.R1 |
| Platforms | All |

discard-unknown-source *boolean*

|-------------|---|
| Synopsis | Group address of static IGMP multicast channel |
| Context | configure service vpls string sap string igmp-snooping static group string |
| Tree | group |
| Description | This command configures an address that receives data on an interface. The IP address must be unique for each static group. |
| Notes | This element is part of a list key. |
| Introduced | 16.0.R1 |
| Platforms | All |

source [[source-address](#)] *string*

| | |
|------------|---|
| Synopsis | Add a list entry for source |
| Context | configure service vpls string sap string igmp-snooping static group string source string |
| Tree | source |
| Notes | The following elements are part of a mandatory choice: source or starg . |
| Introduced | 16.0.R1 |
| Platforms | All |

[source-address] *string*

| | |
|------------|---|
| Synopsis | Source IP address of multicast channel sending data |
| Context | configure service vpls <i>string</i> sap <i>string</i> igmp-snooping static group <i>string</i> source <i>string</i> |
| Tree | source |
| Notes | This element is part of a list key. |
| Introduced | 16.0.R2 |
| Platforms | All |

starg

| | |
|------------|--|
| Synopsis | any source address (*,G) |
| Context | configure service vpls <i>string</i> sap <i>string</i> igmp-snooping static group <i>string</i> starg |
| Tree | starg |
| Notes | The following elements are part of a mandatory choice: source or starg . |
| Introduced | 16.0.R2 |
| Platforms | All |

version *keyword*

| | |
|------------|--|
| Synopsis | IGMP protocol version |
| Context | configure service vpls <i>string</i> sap <i>string</i> igmp-snooping version <i>keyword</i> |
| Tree | version |
| Default | 3 |
| Options | 1, 2, 3 |
| Introduced | 16.0.R1 |
| Platforms | All |

ingress

| | |
|------------|---|
| Synopsis | Enter the ingress context |
| Context | configure service vpls <i>string</i> sap <i>string</i> ingress |
| Tree | ingress |
| Introduced | 16.0.R1 |
| Platforms | All |

filter

| | |
|------------|--|
| Synopsis | Enter the filter context |
| Context | configure service vpls <i>string</i> sap <i>string</i> ingress filter |
| Tree | filter |
| Introduced | 16.0.R1 |
| Platforms | All |

ip reference

| | |
|------------|--|
| Synopsis | IPv4 filter policy name |
| Context | configure service vpls <i>string</i> sap <i>string</i> ingress filter ip <i>reference</i> |
| Tree | ip |
| Reference | configure filter ip-filter <i>string</i> |
| Introduced | 16.0.R1 |
| Platforms | All |

ipv6 reference

| | |
|------------|--|
| Synopsis | IPv6 filter policy name |
| Context | configure service vpls <i>string</i> sap <i>string</i> ingress filter ipv6 <i>reference</i> |
| Tree | ipv6 |
| Reference | configure filter ipv6-filter <i>string</i> |
| Introduced | 16.0.R1 |
| Platforms | All |

mac reference

| | |
|------------|---|
| Synopsis | MAC filter policy name |
| Context | configure service vpls <i>string</i> sap <i>string</i> ingress filter mac <i>reference</i> |
| Tree | mac |
| Reference | configure filter mac-filter <i>string</i> |
| Introduced | 16.0.R1 |
| Platforms | All |

qos

| | |
|------------|---|
| Synopsis | Enter the qos context |
| Context | configure service vpls <i>string</i> sap <i>string</i> ingress qos |
| Tree | qos |
| Introduced | 16.0.R1 |
| Platforms | All |

match-qinq-dot1p *keyword*

| | |
|------------|---|
| Synopsis | Ingress match QinQ Dot1p |
| Context | configure service vpls <i>string</i> sap <i>string</i> ingress qos match-qinq-dot1p <i>keyword</i> |
| Tree | match-qinq-dot1p |
| Options | top, bottom |
| Introduced | 16.0.R1 |
| Platforms | All |

policer-control-policy

| | |
|------------|--|
| Synopsis | Enter the policer-control-policy context |
| Context | configure service vpls <i>string</i> sap <i>string</i> ingress qos policer-control-policy |
| Tree | policer-control-policy |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR |

overrides

| | |
|------------|--|
| Synopsis | Enable the overrides context |
| Context | configure service vpls <i>string</i> sap <i>string</i> ingress qos policer-control-policy overrides |
| Tree | overrides |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR |

root

| | |
|------------|---|
| Synopsis | Enter the root context |
| Context | configure service vpls string sap string ingress qos policer-control-policy overrides root |
| Tree | root |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR |

max-rate (*number* | *keyword*)

| | |
|------------|---|
| Synopsis | Maximum frame-based bandwidth limit |
| Context | configure service vpls string sap string ingress qos policer-control-policy overrides root max-rate (<i>number</i> <i>keyword</i>) |
| Tree | max-rate |
| Range | 1 to 6400000000 |
| Options | max |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR |

priority-mbs-thresholds

| | |
|------------|---|
| Synopsis | Enter the priority-mbs-thresholds context |
| Context | configure service vpls string sap string ingress qos policer-control-policy overrides root priority-mbs-thresholds |
| Tree | priority-mbs-thresholds |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR |

min-thresh-separation (*number* | *keyword*)

| | |
|----------|--|
| Synopsis | Minimum amount of separation buffer space |
| Context | configure service vpls string sap string ingress qos policer-control-policy overrides root priority-mbs-thresholds min-thresh-separation (<i>number</i> <i>keyword</i>) |
| Tree | min-thresh-separation |
| Range | 0 to 16777216 |
| Units | bytes |
| Options | auto |

Introduced 16.0.R1
 Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR

priority [[priority-level](#)] *number*

Synopsis Enter the **priority** list instance
 Context **configure** [service](#) [vpls](#) [string](#) [sap](#) [string](#) [ingress](#) [qos](#) [policer-control-policy](#) [overrides](#) [root](#) [priority-mbs-thresholds](#) [priority](#) *number*
 Tree [priority](#)
 Introduced 16.0.R1
 Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR

[priority-level] *number*

Synopsis Priority level
 Context **configure** [service](#) [vpls](#) [string](#) [sap](#) [string](#) [ingress](#) [qos](#) [policer-control-policy](#) [overrides](#) [root](#) [priority-mbs-thresholds](#) [priority](#) *number*
 Tree [priority](#)
 Range 1 to 8
 Notes This element is part of a list key.
 Introduced 16.0.R1
 Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR

mbs-contribution (*number* | *keyword*)

Synopsis Minimum amount of cumulative buffer space allowed
 Context **configure** [service](#) [vpls](#) [string](#) [sap](#) [string](#) [ingress](#) [qos](#) [policer-control-policy](#) [overrides](#) [root](#) [priority-mbs-thresholds](#) [priority](#) *number* [mbs-contribution](#) (*number* | *keyword*)
 Tree [mbs-contribution](#)
 Range 0 to 16777216
 Units bytes
 Options auto
 Introduced 16.0.R1
 Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR

policy-name *reference*

| | |
|------------|--|
| Synopsis | Policer control policy name |
| Context | configure service vpls string sap string ingress qos policer-control-policy policy-name reference |
| Tree | policy-name |
| Reference | configure qos policer-control-policy string |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR |

sap-ingress

| | |
|------------|---|
| Synopsis | Enter the sap-ingress context |
| Context | configure service vpls string sap string ingress qos sap-ingress |
| Tree | sap-ingress |
| Introduced | 16.0.R1 |
| Platforms | All |

fp-redirect-group

| | |
|------------|---|
| Synopsis | Enter the fp-redirect-group context |
| Context | configure service vpls string sap string ingress qos sap-ingress fp-redirect-group |
| Tree | fp-redirect-group |
| Introduced | 16.0.R1 |
| Platforms | All |

group-name *reference*

| | |
|------------|--|
| Synopsis | Queue group template name created on forwarding plane |
| Context | configure service vpls string sap string ingress qos sap-ingress fp-redirect-group group-name reference |
| Tree | group-name |
| Reference | configure qos queue-group-templates ingress queue-group string |
| Introduced | 16.0.R1 |
| Platforms | All |

instance *number*

| | |
|------------|---|
| Synopsis | Queue group instance |
| Context | configure service vpls <i>string</i> sap <i>string</i> ingress qos sap-ingress fp-redirect-group
instance <i>number</i> |
| Tree | instance |
| Range | 1 to 65535 |
| Introduced | 16.0.R1 |
| Platforms | All |

overrides

| | |
|------------|---|
| Synopsis | Enter the overrides context |
| Context | configure service vpls <i>string</i> sap <i>string</i> ingress qos sap-ingress overrides |
| Tree | overrides |
| Introduced | 16.0.R1 |
| Platforms | All |

ip-criteria

| | |
|------------|---|
| Synopsis | Enter the ip-criteria context |
| Context | configure service vpls <i>string</i> sap <i>string</i> ingress qos sap-ingress overrides ip-criteria |
| Tree | ip-criteria |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

activate-entry-tag *number*

| | |
|------------|---|
| Synopsis | Tag ID activated for IPv4 criteria |
| Context | configure service vpls <i>string</i> sap <i>string</i> ingress qos sap-ingress overrides ip-criteria
activate-entry-tag <i>number</i> |
| Tree | activate-entry-tag |
| Range | 1 to 255 |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

ipv6-criteria

| | |
|------------|---|
| Synopsis | Enter the ipv6-criteria context |
| Context | configure service vpls string sap string ingress qos sap-ingress overrides ipv6-criteria |
| Tree | ipv6-criteria |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

activate-entry-tag number

| | |
|------------|---|
| Synopsis | Tag ID activated for IPv6 criteria |
| Context | configure service vpls string sap string ingress qos sap-ingress overrides ipv6-criteria activate-entry-tag number |
| Tree | activate-entry-tag |
| Range | 1 to 255 |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

policer [policer-id] reference

| | |
|------------|---|
| Synopsis | Enter the policer list instance |
| Context | configure service vpls string sap string ingress qos sap-ingress overrides policer reference |
| Tree | policer |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR |

[policer-id] reference

| | |
|------------|---|
| Synopsis | Policer unique ID |
| Context | configure service vpls string sap string ingress qos sap-ingress overrides policer reference |
| Tree | policer |
| Reference | configure qos sap-ingress string policer number |
| Notes | This element is part of a list key. |
| Introduced | 16.0.R1 |

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR

cbs (*number* | *keyword*)

Synopsis CBS

Context **configure service vpls string sap string ingress qos sap-ingress overrides policer**
reference cbs (number | keyword)

Tree [cbs](#)

Range 0 to 268435456

Units bytes

Options auto

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR

mbs (*number* | *keyword*)

Synopsis MBS

Context **configure service vpls string sap string ingress qos sap-ingress overrides policer**
reference mbs (number | keyword)

Tree [mbs](#)

Range 0 to 268435456

Units bytes

Options auto

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR

packet-byte-offset *number*

Synopsis Packet size modification for policing information

Context **configure service vpls string sap string ingress qos sap-ingress overrides policer**
reference packet-byte-offset number

Tree [packet-byte-offset](#)

Range -32 to 31

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR

percent-rate

| | |
|------------|--|
| Synopsis | Enter the percent-rate context |

|---------------|--|
| Synopsis | Scheduler name |
| Context | configure service vpls string sap string ingress qos scheduler-policy overrides scheduler string |
| Tree | scheduler |
| Description | <p>This command specifies the scheduler name which is composed of printable 7-bit ASCII characters. If the string contains special characters (#, \$, spaces, and so on), the entire string must be enclosed within double quotes. Each scheduler must have a unique name within the context of the scheduler policy. However, the same name can be reused in multiple scheduler policies. If the scheduler name already exists within the policy tier level, the context changes to that scheduler name for the purpose of editing the scheduler commands.</p> <p>If the scheduler name exists within the policy on a different tier, an error occurs and the current context will not change. If the scheduler name does not exist in this or another tier within the scheduler policy, it is assumed that an attempt is being made to create a scheduler of that name.</p> <p>If the provided scheduler name is invalid, a name syntax error will occur, the command will not execute, and the context will not change.</p> |
| String Length | 1 to 32 |
| Notes | This element is part of a list key. |
| Introduced | 16.0.R1 |
| Platforms | All |

parent

| | |
|------------|--|
| Synopsis | Enter the parent context |
| Context | configure service vpls <i>string</i> sap <i>string</i> ingress qos scheduler-policy overrides scheduler <i>string</i> parent |
| Tree | parent |
| Introduced | 16.0.R1 |
| Platforms | All |

cir-weight *number*

| | |
|------------|--|
| Synopsis | Weight used at the within-CIR port priority level |
| Context | configure service vpls <i>string</i> sap <i>string</i> ingress qos scheduler-policy overrides scheduler <i>string</i> parent cir-weight <i>number</i> |
| Tree | cir-weight |
| Range | 0 to 100 |
| Introduced | 16.0.R1 |
| Platforms | All |

weight *number*

| | |
|------------|--|
| Synopsis | Relative weight of the scheduler to feed the queue |
| Context | configure service vpls <i>string</i> sap <i>string</i> ingress qos scheduler-policy overrides scheduler <i>string</i> parent weight <i>number</i> |
| Tree | weight |
| Range | 0 to 100 |
| Introduced | 16.0.R1 |
| Platforms | All |

rate

| | |
|------------|--|
| Synopsis | Enter the rate context |
| Context | configure service vpls <i>string</i> sap <i>string</i> ingress qos scheduler-policy overrides scheduler <i>string</i> rate |
| Tree | rate |
| Introduced | 16.0.R1 |
| Platforms | All |

cir (*number* | *keyword*)

| | |
|------------|---|
| Synopsis | CIR at which the queue it to operate |
| Context | configure service vpls <i>string</i> sap <i>string</i> ingress qos scheduler-policy overrides scheduler <i>string</i> rate cir (<i>number</i> <i>keyword</i>) |
| Tree | cir |
| Range | 0 to 6400000000 |
| Units | kilobps |
| Options | sum, max |
| Introduced | 16.0.R1 |
| Platforms | All |

pir (*number* | *keyword*)

| | |
|------------|---|
| Synopsis | PIR at which the queue is to operate |
| Context | configure service vpls <i>string</i> sap <i>string</i> ingress qos scheduler-policy overrides scheduler <i>string</i> rate pir (<i>number</i> <i>keyword</i>) |
| Tree | pir |
| Range | 1 to 6400000000 |
| Units | kilobps |
| Options | max |
| Introduced | 16.0.R1 |
| Platforms | All |

policy-name *reference*

| | |
|------------|--|
| Synopsis | Scheduler policy name |
| Context | configure service vpls <i>string</i> sap <i>string</i> ingress qos scheduler-policy policy-name <i>reference</i> |
| Tree | policy-name |
| Reference | configure qos scheduler-policy <i>string</i> |
| Introduced | 16.0.R1 |
| Platforms | All |

qtag-manipulation

| | |
|------------|---|
| Synopsis | Enter the qtag-manipulation context |
| Context | configure service vpls <i>string</i> sap <i>string</i> ingress qtag-manipulation |
| Tree | qtag-manipulation |
| Introduced | 16.0.R1 |
| Platforms | All |

c-tag (*number* | *keyword*)

| | |
|------------|--|
| Synopsis | Inner ingress vlan translation for two service delimiting vlan values |
| Context | configure service vpls <i>string</i> sap <i>string</i> ingress qtag-manipulation c-tag (<i>number</i> <i>keyword</i>) |
| Tree | c-tag |
| Range | 0 to 4094 |
| Options | tag-* |
| Notes | The following elements are part of a choice: push-dot1q-vlan or (c-tag and s-tag). |
| Introduced | 22.10.R1 |
| Platforms | All |

push-dot1q-vlan (*number* | *keyword*)

| | |
|------------|--|
| Synopsis | VLAN translation information |
| Context | configure service vpls <i>string</i> sap <i>string</i> ingress qtag-manipulation push-dot1q-vlan (<i>number</i> <i>keyword</i>) |
| Tree | push-dot1q-vlan |
| Range | 0 to 4094 |
| Options | use-sap-svlan |
| Notes | The following elements are part of a choice: push-dot1q-vlan or (c-tag and s-tag). |
| Introduced | 16.0.R1 |
| Platforms | All |

s-tag *number*

| | |
|----------|---|
| Synopsis | Outer ingress VLAN translation for two service delimiting VLAN values |
| Context | configure service vpls <i>string</i> sap <i>string</i> ingress qtag-manipulation s-tag <i>number</i> |

| | |
|------------|---|
| Tree | s-tag |
| Range | 0 to 4094 |
| Notes | The following elements are part of a choice: push-dot1q-vlan or (c-tag and s-tag). |
| Introduced | 22.10.R1 |
| Platforms | All |

I2pt

| | |
|------------|--|
| Synopsis | Enter the I2pt context |
| Context | configure service vpls string sap string I2pt |
| Tree | I2pt |
| Introduced | 16.0.R1 |
| Platforms | All |

force-boundary

| | |
|------------|---|
| Synopsis | Enable the force-boundary context |
| Context | configure service vpls string sap string I2pt force-boundary |
| Tree | force-boundary |
| Introduced | 16.0.R1 |
| Platforms | All |

protocols

| | |
|------------|---|
| Synopsis | Enter the protocols context |
| Context | configure service vpls string sap string I2pt force-boundary protocols |
| Tree | protocols |
| Introduced | 16.0.R1 |
| Platforms | All |

cdp boolean

| | |
|----------|---|
| Synopsis | Enable Cisco discovery protocol |
| Context | configure service vpls string sap string I2pt force-boundary protocols cdp boolean |
| Tree | cdp |

| | |
|------------|---------|
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

ntp boolean

| | |
|------------|---|
| Synopsis | Enable dynamic trunking protocol |
| Context | configure service vpls string sap string l2pt force-boundary protocols ntp boolean |
| Tree | ntp |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

pagp boolean

| | |
|------------|--|
| Synopsis | Enable port aggregation protocol |
| Context | configure service vpls string sap string l2pt force-boundary protocols pagp boolean |
| Tree | pagp |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

stp boolean

| | |
|------------|---|
| Synopsis | Enable all spanning tree protocols |
| Context | configure service vpls string sap string l2pt force-boundary protocols stp boolean |
| Tree | stp |
| Default | true |
| Introduced | 16.0.R1 |
| Platforms | All |

udld boolean

| | |
|----------|--|
| Synopsis | Enable unidirectional link detection |
| Context | configure service vpls string sap string l2pt force-boundary protocols udld boolean |

| | |
|------------|----------------------|
| Tree | udld |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

vtp *boolean*

| | |
|------------|--|
| Synopsis | Enable virtual trunk protocol |
| Context | configure service vpls <i>string</i> sap <i>string</i> l2pt force-boundary protocols vtp <i>boolean</i> |
| Tree | vtp |
| Default | false |
